LOUISIANA DEPARTMENT OF HEALTH

OCDD Weekly Status Report – August 13, 2021

The following is a snapshot of information pertaining to individuals served through the Louisiana Department of Health (LDH) Office for Citizens with Developmental Disabilities (OCDD) regarding the COVID-19 event. This snapshot will be updated and published on a weekly basis. The COVID-Positive Counts are cumulative counts and include all cases reported since the beginning of the pandemic, including those who have recovered, died, or have been moved out of the facility. Total cases should not be compared to the current census to determine the percentage infected, as the census counts for many facilities have decreased over time. Currently, all deaths in individuals with COVID positive lab results are being counted, this may include individuals with pre-existing conditions, individuals who have met the "end of isolation" criteria prior to death, or individuals ultimately determined to have another cause of death. Data for this report is obtained from various internal sources and does not represent Office of Public Health (OPH) data.
