

**Louisiana Department of Health and Hospitals
Health Plan Advisory 13-2
January 15, 2013**

The Department sent the following message to all Medicaid Providers regarding a few invalid procedure codes that have now been made non-payable.

ATTENTION ALL MEDICAID PROVIDERS REGARDING INVALID CODES:

It has been brought to the attention of DHH that a few long standing invalid procedure codes were still listed on the Professional Services fee schedule. This has been corrected and the invalid procedure codes, 99289, 99290, and 99436 have been made non-payable on all types of service and will no longer appear on the fee schedule with the next monthly update. Providers should begin using the following replacement codes: 99466, 99467, and 99464 effective with date of service January 1, 2013. The fees for these replacement codes will remain the same as the previous procedure codes.
