

Louisiana Department of Health
Informational Bulletin 12-17
Revised September 1, 2017

Provider Registry and Provider Directories

The Provider Registry is an integral part of the Healthy Louisiana Program. It consists of a comprehensive electronic record provided by each of the Healthy Louisiana Plans for each contracted provider within their network. Each record has 78 different data fields and the Registry already contains more than 50,000 active records.

The data to populate the Provider Registry originates with the Provider and the extraction of information provided to the Health Plan(s) during the contracting process. The Health Plan creates the individual provider records, validates the data, and submits the complete electronic record to Molina, Louisiana Medicaid's fiscal intermediary. Molina uses the information to reconcile with claims encounter data that the Health Plans submit monthly to Molina.

No later than 5 p.m. Central Time each Tuesday and Friday, the Health Plans forward their updated files to Molina, including added Providers, removed Providers, and other changes to Provider records. Molina combines the files from the five Health Plans and electronically forwards the file to Maximus' data center in Reston, Va.

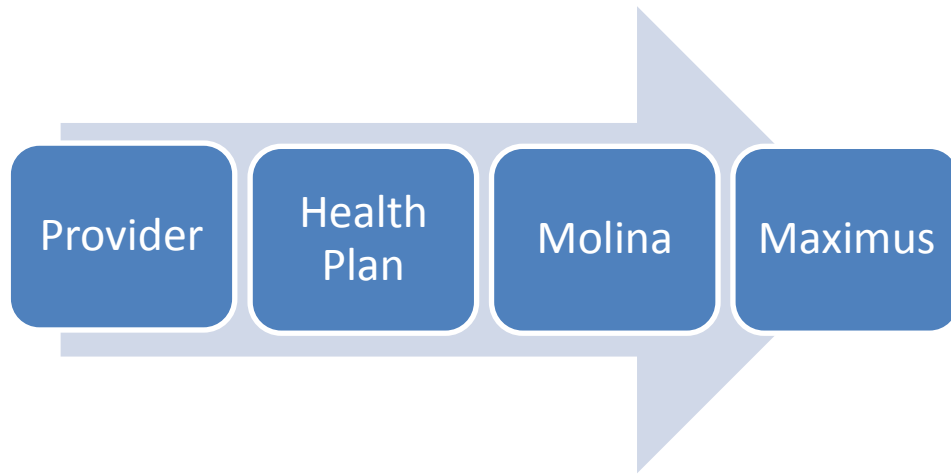

The most current Provider Registry is used by Maximus to assist Medicaid recipients in selecting a Health Plan both through calls to the Enrollment Center and online. It is also the data that is used for the interactive Provider Search engine at www.healthy.la.gov under the link "Search for Providers."

Note that that not all specialty types are mapped to the Provider Search. While any provider can be located through a name search, only a subset of all specialties are represented on the lookup. Specialty types that are categorized at this time as 'Other Medical' include podiatry and oncology.

Verifying Your Information

Because the flow of information for the electronic Provider Registry originates with the Provider and Health Plan and is based on the contract between them, it is important that

providers verify their information. This can be done by checking the online provider search at www.healthy.la.gov and/or contacting the Health Plans directly.

Provider Requests for Changes to the Provider Registry

Any corrections to a provider record must be made by the **Health Plan**, rather than directly by LDH, Molina, or Maximus which cannot directly input data or make changes to the records in the Provider Registry; therefore any provider needing to correct their registry information should contact each Health Plan directly.

Each of the Health Plans has established their preferred method for providers to submit questions regarding the Provider Registry (only) and requests for corrections. They are as follows:

- **Aetna:** LandryJ@aetna.com, 504-667-4490
- **Healthy Blue:** lainterpr@healthyblue.la.gov
- **AmeriHealth Caritas:** network@amerihealthcaritas.la.gov
- **Louisiana Healthcare Connections:** 1-866-595-8133 and LHC_Provider_Credent@centene.com
- **UnitedHealthcare Community Plan:** 1-866-675-1607 (M-F 7 am to 7 pm)

If the Health Plan is unable to make the requested addition or change (*e.g.*, because of issues related to the contract or credentialing), the provider will advise the provider of the reason in writing and copy LDH.

Provider Directories

In addition to the consolidated Provider Registry, each Health Plan is required to maintain a comprehensive Provider Directory which can be accessed through their website and must be mailed to members on request. The Health Plan's Provider Directory posted on their website includes their most up-to-date information on their network and contains an even greater level of detail than the Provider Registry. Prospective members and stakeholders can call the Enrollment Center at 1-855-229-6848 and request that a printed copy of the five Provider Directories be mailed. However, it should be noted that the information is highly likely to have changed subsequent to printing the Directory.
