

Heroin & Opioid Crisis Interagency Survey

Heroin and Opioid Crisis Interagency Coordination Survey

During the 2017 Regular Legislative Session, Act 88 established the Advisory Council on Heroin and Opioid Prevention and Education (HOPE). The Council's purpose is to create an Interagency Heroin and Opioid Coordination Plan, coordinate parish-level data on opioid overdoses and usage of overdose-reversal medication (Naloxone), and coordinate a central online location to disseminate information and resources, including the Interagency Heroin and Opioid Coordination Plan. Two sub-committees were formed to address this body of work: a Data Workgroup, and an Interagency Coordination Plan Workgroup.

The objective of the Interagency Coordination Plan Workgroup is to coordinate and organize existing initiatives and resources to assist in developing a statewide coordination plan. We are asking for your participation in this survey so we may gather information on heroin and opioid initiatives taking place within your organization **since July 1, 2016 (State Fiscal Year 2017)** and the impacts of these initiatives. We request a response to this survey by **close-of-business on April 5th, 2018**. Please send completed survey responses to Brad Wellons with the Office of Behavioral Health at brad.wellons@la.gov

Feel free to share this survey with other agencies, organizations or departments, as well. Thank you for your time, and we look forward to your response.

Agency/Organization Mission

1. What is your agency's (or organization's) mission?

To protect the public health, safety, and welfare, and to provide for state administrative control, supervision, licensing, and regulation of the practice of physical therapy in Louisiana.

2. How does addressing the opioid crisis impact your mission?

By participating in the statewide response to heroin and opioid prevention and education, the Louisiana Physical Therapy Board (LPTB) is assisting in the protection of public health, safety, and welfare of citizens of Louisiana. Physical therapists are an important component to the patient medical team. Outreach efforts can be made by the LPTB to spread awareness of the opportunities that our licensees have to assist in the battle against heroin and opioid use in Louisiana. The LPTB can spread awareness to licensees about heroin and opioid use, including signs for awareness of patients who may be addicted to substances, as well as ways to address addiction with patients and work within the medical model to provide referrals. The LPTB can fulfill its mission of public protection by educating physical therapists on their role as an alternative to pain relief for individuals who would otherwise receive addictive substances for relief.

Future Opportunities

4. Identify any potential opportunities to partner with other agencies or organizations to expand the scope of your initiatives:

Although the Louisiana Physical Therapy Board (“LPTB”) does not have any current initiatives, the LPTB has identified potential opportunities to partner with the professional association (Louisiana Physical Therapy Association “LPTA”) to launch an outreach and awareness campaign to the physical therapist and physical therapist assistant licensees in Louisiana. The LPTB has also identified other state licensing boards as potential stakeholders to partner in educational and outreach efforts for licensees statewide. The healthcare licensing boards, in partnership with the Governor’s office and the Department of Health, could share resources to launch a campaign that would provide education and awareness to licensees in the state who are healthcare providers.

5. What new initiatives would you undertake if funding were available?

The LPTB would launch a statewide educational outreach for physical therapy licensees, in partnership with the Louisiana Physical Therapy Association to provide education to licensees on their role in the medical team in care to patients with a focus on addictive substance prevention, as well as how to properly identify signs of addiction and referring to other healthcare providers. In a broader scope, the LPTB would partner with other healthcare licensing boards to spread awareness and provide education and outreach to all healthcare licensees. This multidisciplinary approach would allow the boards, in partnership with the Governor’s office and the Department of Health, to share resources and create a comprehensive campaign for healthcare providers.
