

Heroin & Opioid Crisis Interagency Survey

Heroin and Opioid Crisis Interagency Coordination Survey

During the 2017 Regular Legislative Session, Act 88 established the Advisory Council on Heroin and Opioid Prevention and Education (HOPE). The Council's purpose is to create an Interagency Heroin and Opioid Coordination Plan, coordinate parish-level data on opioid overdoses and usage of overdose-reversal medication (Naloxone), and coordinate a central online location to disseminate information and resources, including the Interagency Heroin and Opioid Coordination Plan. Two sub-committees were formed to address this body of work: a Data Workgroup, and an Interagency Coordination Plan Workgroup.

The objective of the Interagency Coordination Plan Workgroup is to coordinate and organize existing initiatives and resources to assist in developing a statewide coordination plan. We are asking for your participation in this survey so we may gather information on heroin and opioid initiatives taking place within your organization **since July 1, 2016 (State Fiscal Year 2017)** and the impacts of these initiatives. We request a response to this survey by **close-of-business on April 5th, 2018**. Please send completed survey responses to Brad Wellons with the Office of Behavioral Health at brad.wellons@la.gov

Feel free to share this survey with other agencies, organizations or departments, as well. Thank you for your time, and we look forward to your response.

Future Opportunities

4. Identify any potential opportunities to partner with other agencies or organizations to expand the scope of your initiatives:

The credibility of our continuing education is ultimately decided by the Louisiana State Board of Optometry Examiners. Our association works with them to be sure the education offered meets standards as dictated by the board and our state laws.

5. What new initiatives would you undertake if funding were available?

6. Please provide any additional information that you feel necessary to explain or help us understand any of your responses to this survey:

I cannot speak for the profession as a whole, but as a therapeutic optometrist working in a highly medical/surgical oriented practice I have never prescribed an opioid for ocular pain for greater than 7 days. Even those instances of more than 3 days are rare. I think prescribing data will show this to be the case. However, I understand the responsibility that comes with the scope to prescribe these medications when indicated and am willing to consider more action as a component of the general medical community.

Thank you for taking the time to fill out this survey. Your input is greatly appreciated. Please remember to save the survey document and send to brad.wellons@la.gov
