MATERNITY LEAVE IN LOUISIANA

KEY FINDINGS FROM RESEARCH ON MATERNITY LEAVE

Longer maternity leave is associated with increased breastfeeding duration as well as improved maternal mental health and child development.¹,²

Maternity leave also gives mothers and babies more time to bond. Studies have shown that babies who have more bonding time with their mothers during the first 6 months of life tend to be more secure and confident as they grow up.³

WHAT LOUISIANA MOMS SAY ABOUT MATERNITY LEAVE

“I think working women should have more paid time off. With all the time you have to take for appointments … it’s a shame you only get a percentage of your pay and only a few weeks off. You don’t have enough time to enjoy and raise your baby.”⁴

“A push for longer paid leave would be amazing. I was allowed 6 weeks paid leave…I chose to take an additional 2 weeks without pay. Those 2 weeks made a difference in my ability to return to work without feeling like a bad mom. I needed that bonding time as much as he needed me.”⁴

“I stopped breastfeeding after 5 weeks because the stress of returning to work so soon affected my milk supply … if more time off was given to new moms, there may be more mothers who would breastfeed their babies for a longer period of time. 6 weeks is not long enough to adjust to a new baby and breastfeeding.”⁴

CURRENT LOUISIANA POLICY ON MATERNITY LEAVE

The Louisiana Fair Employment Practices (FEP) Act requires employers with more than 25 employees to provide unpaid leave for up to six weeks for “normal” pregnancies, and up to 4 months for more “seriously disabling” pregnancies.⁵

In accordance with the Family and Medical Leave Act (FMLA), a federal law, all FMLA-eligible employees in the United States are entitled 12 work weeks of unpaid leave per year. During this time, employees are entitled to the same health benefits provided by their employer at the same cost they pay while working. When an employee’s FMLA leave ends, the employee has the right to return to the same or equivalent position.⁶

MATERNITY LEAVE IN LOUISIANA

2012 PRAMS DATA

PAID VS. UNPAID LEAVE

61% of women who were employed during their pregnancies (and planned to or had returned to work at the time of survey) took only unpaid leave after the birth of a new baby.  

![Pie chart showing distribution of maternity leave taken in Louisiana](chart.png)

- I took only unpaid leave: 61%
- I did not take leave: 8%
- I took only paid leave: 25%
- I took both paid and unpaid leave: 7%

FACTORS AFFECTING WOMENS’ LEAVE DECISIONS

Women who were employed during their pregnancy said the following factors influenced their decisions related to taking leave:

- I had too much work to do: 12%
- I was afraid I’d lose my job: 16%
- My job does not offer a flexible work schedule: 24%
- I had not built up enough leave time to take any more time off: 25%
- I could not financially afford to take leave: 35%
- My job does not have paid leave: 44%

FINANCIAL BARRIERS TO TAKING LEAVE BY EDUCATION LEVEL

Among working mothers who said they could not financially afford to take leave,* over 50% had achieved a high school degree as their highest level of education.
