

Louisiana Ryan White HIV/AIDS Part B CBO Program

Statewide Quarterly Report

July 01, 2018 - September 30, 2018

Community Based Organizations (CBOs) funded by Louisiana's Ryan White (RW) Part B program served 2,037 persons living with HIV, approximately 9% (2,037/22,056) of persons living with HIV in Louisiana.

The program served a larger proportion of persons who are female and white compared to the larger HIV+ population in Louisiana.

67% (n=1,371) of clients served live below the federal poverty level (FPL).

The majority of clients served (95%) had health insurance.

Primary Health Insurance Type for RW Part B Clients Served by CBOs

*Includes all clients who received a service between July 01, 2018 and September 30, 2018 from a RW Part B CBO.

†Includes all persons diagnosed with HIV on or before September 30, 2018 who were last known to be alive and living in Louisiana.

Louisiana Ryan White HIV/AIDS Part B CBO Program Statewide Quarterly Report July 01, 2018 - September 30, 2018

UTILIZATION

Non-medical case management was provided to 93% (n=1,894) of clients.

Food bank/home-delivered meals and medical transportation were the second and third most utilized services with 58% (n=1,177) and 44% (n=852) respectively of clients receiving these services.

Encounters for non-medical case management were most frequently classified as follow-up or monitoring, followed by treatment adherence counseling, referral/advocacy, and case conferencing.

SERVICES PROVIDED	No. Clients	No. Units	Units per Client	No. Encounters	Encounters per Client

Continuum Legend	
	Total
	% In Care*
	% Virally Suppressed†

CLINICAL OUTCOMES

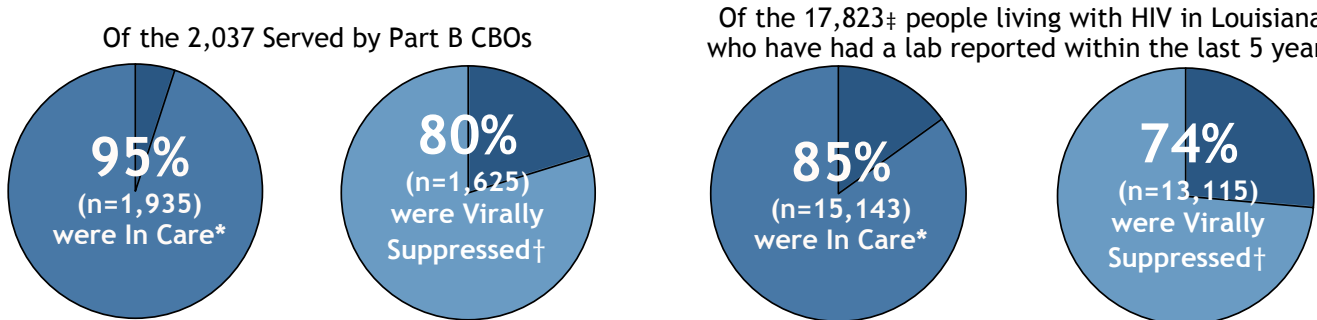

A total of 95% (1,935/2,037) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

80% (1,625/2,037) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

For clients served by RW Part B CBO program who were in care, 84% (1,625/1,935) were virally suppressed. For the larger HIV+ population living in Louisiana who were in care, 87% (13,115/15,143) were virally suppressed.

Clients who are white and Hispanic, older, and have higher incomes were more likely to be virally suppressed.

Clients who are uninsured are less likely to be virally suppressed. Only 63% (61/97) of those who are uninsured achieved viral suppression compared to 91% (209/229) of those with private health insurance.

*Clients defined as 'in care' had at least one CD4 or Viral Load reported between October 01, 2017 and September 30, 2018.

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between October 01, 2017 and September 30, 2018 with the most recent result <200 copies/mL.

‡Includes persons diagnosed before October 01, 2017, last known to be alive and living in Louisiana as of September 30, 2018, and who've had a lab reported within the last 5 years (on or after October 01, 2013).

CARE CONTINUUM BY HEALTH INSURANCE TYPE

Louisiana Ryan White HIV/AIDS Part B CBO Program Statewide Quarterly Report July 01, 2018 - September 30, 2018

UNMET NEED

Unmet need includes persons who are defined as out of care. These persons know their positive HIV status and are not receiving HIV-related medical care. Persons living with HIV who have no evidence of receiving a viral load test or CD4 count within a 12-month period meet the definition of unmet need. Furthermore, unmet need has been defined here only to include persons with a lab reported to the health department within the last 5 years (on or after October 01, 2013).

15% (2,680/17,823) of PLWH in Louisiana met the definition for unmet need between October 01, 2017 and September 30, 2018.

Males, Hispanics, and persons 13-44 years old were most likely not to be receiving HIV-related medical care.

Regions supported by Ryan White Part B CBOs with the largest proportion of people with unmet need include Shreveport and Alexandria.
