JEFFERSON PARISH
Department of Emergency Management

Cynthia Lee Sheng
Parish President

Joseph A. Valiente
Director

February 22, 2021

Park Place HealthCare, LLC
535 Commerce Street
Gretna, LA 70056

Ms Berry,

The Jefferson Parish Department of Emergency Management has received your Emergency Plan on February 22, 2021 for the year 2021. We have reviewed your Emergency Plan and filed it as an official record.

Should you have any questions, please contact our office or you may email me at cfward@jeffparish.net.

Thank you,

A handwritten signature in cursive script, appearing to read "Claire Ward".

Claire Ward, NREMT – EM3

2021 Nursing Home Emergency Preparedness Plan Survey

VERIFICATION of OHSEP SUBMITTAL for Year: 2021

Nursing Facility's Name: Park Place Healthcare, LLC.

The **EMERGENCY PREPAREDNESS PLAN** or a **SUMMARY of UPDATES** to a previously submitted plan was submitted to the local parish **OFFICE OF HOMELAND SECURITY AND EMERGENCY PREPAREDNESS**.

Jefferson Parish Office of Emergency Management
(Name of the Local/Parish Office of Homeland Security and Emergency Preparedness)

Date submitted: 2/21/2021

MARK the appropriate answer:

- ☐ YES ☐ NO -Did the local parish Office of Homeland Security and Emergency Preparedness give any recommendations?
- ☐ - I have included recommendations, or correspondence from OHSEP and facility's response with this review.
- ☐ - There was **NO** response from the local/parish Office of Homeland Security and Emergency Preparedness; include verification of delivery such as a mail receipt, a signed delivery receipt, or other proof that it was sent or delivered to their office for the current year. Be sure to include the date plan was sent or delivered.

2021 Nursing Home Emergency Preparedness Plan Survey

- I. **PURPOSE** – Complete the survey using information from the facility's current emergency plan.
- A. Are the facility's goals, in regards to emergency planning, documented in plan?
☒ YES
➤ NO, if goals are NOT in plan add the facility's goals and indicate completion by marking YES.
- B. Does the facility's plan enable the achievement of those goals?
☒ YES
➤ NO, if plan does NOT provide for the achievement of goals, correct the plan and indicate completion by marking YES.
- C. Determinations, by the facility, for sheltering in place or evacuation due to Hurricanes.
1. Utilizing all current, available, and relevant information answer the following:
- a) MARK the strongest category of hurricane the facility can safely shelter in place for?
- i. ☐ Category 1- winds 74 to 95 mph
 - ii. ☒ Category 2- winds 96 to 110 mph
 - iii. ☐ Category 3- winds 111 to 130 mph
 - iv. ☐ Category 4- winds 131 to 155 mph
 - v. ☐ Category 5- winds 156 mph and greater
- b) At what time, in hours before the hurricane's arrival, will the decision to shelter in place have to be made by facility?
- i. 72 Hours before the arrival of the hurricane.
- c) What is the latest time, in hours before the hurricanes arrival, which preparations will need to start in order to safely shelter in place?
- i. 48 Hours before the arrival of the hurricane.
- d) Who is responsible for making the decision to shelter in place?
TITLE/POSITION: Owner
NAME: Bob Dean, Jr.
2. Utilizing all current, available, and relevant information answer the following:
- a) MARK the weakest category of hurricane the facility will have to evacuate for?
- i. ☒ Category 1- winds 74 to 95 mph
 - ii. ☒ Category 2- winds 96 to 110 mph
 - iii. ☐ Category 3- winds 111 to 130 mph
 - iv. ☐ Category 4- winds 131 to 155 mph
 - v. ☐ Category 5- winds 156 mph and greater
- b) At what time, in hours before the hurricanes arrival, will the decision to evacuate have to be made by facility?
- i. 72 Hours before the arrival of the hurricane.
- c) What is the latest time, in hours before the hurricane's arrival, which preparations will need to start in order to safely evacuate?
- i. 72 Hours before the arrival of the hurricane.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

d) Who is responsible for making the decision to evacuate?

TITLE/POSITION: Owner

NAME: Bob Dean, Jr.

II. **SITUATION** - Complete the survey using information from the facility's current emergency plan.

A. Facility Description:

1. What year was the facility built? 1984

2. How many floors does facility have? 1

3. Is building constructed to withstand hurricanes or high winds?

☒ Yes, answer 3.a, b, c, d

☐ No/Unknown, answer 3.e

a) MARK the **highest category** of hurricane or wind speed that building can withstand?

i. ☐ Category 1- winds 74 to 95 mph

ii. ☐ Category 2- winds 96 to 110 mph

iii. ☒ Category 3- winds 111 to 130 mph

iv. ☐ Category 4- winds 131 to 155 mph

v. ☐ Category 5- winds 156 mph and greater

vi. ☐ Unable to determine : see A.3.e

b) MARK the **highest category** of hurricane or wind speed that facility roof can withstand?

i. ☐ Category 1- winds 74 to 95 mph

ii. ☐ Category 2- winds 96 to 110 mph

iii. ☒ Category 3- winds 111 to 130 mph

iv. ☐ Category 4- winds 131 to 155 mph

v. ☐ Category 5- winds 156 mph and greater

vi. ☐ Unable to determine : see A.3.e

c) MARK the source of information provided in a) and b) above? (DO NOT give names or wind speeds of historical storms/hurricanes that facility withstood.)

i. ☒ Based on professional/expert report,

ii. ☐ Based on building plans or records,

iii. ☐ Based on building codes from the year building was constructed

iv. ☐ Other non-subjective based source. Name and describe source.

d) MARK if the windows are resistant to or are protected from wind and windblown debris?

i. ☐ Yes

ii. ☒ No

e) If plan does not have information on the facility's wind speed ratings (wind loads) explain why. na

4. What are the elevations (**in feet above sea level, use NAVD 88 if available**) of the following:

a) Building's lowest living space is 3.8 feet above sea level.

b) Air conditioner (HVAC) is 14.5 feet above sea level.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- c) Generator(s) is 6.8 feet above sea level.
- d) Lowest electrical service box(s) is 9.8 feet above sea level.
- e) Fuel storage tank(s), if applicable, is 3.8 feet above sea level.
- f) Private water well, if applicable, is n/a feet above sea level.
- g) Private sewer system and motor, if applicable, is n/a feet above sea level.

5. Does plan contain a copy of the facility's Sea Lake Overland Surge from Hurricanes (SLOSH) model?

☒ Yes. Use SLOSH to answer A.5.a. and b.

➤ If No. Obtain SLOSH, incorporate into planning, and then indicate that this has been done by marking yes.

a) Is the building or any of its essential systems susceptible to flooding from storm surge as predicted by the SLOSH model?

i. ☐ Yes- answer A.5.b

ii. ☒ No, go to A. 6.

b) If yes, what is the weakest SLOSH predicted category of hurricane that will cause flooding?

i. ☐ Category 1- winds 74 to 95 mph

ii. ☐ Category 2- winds 96 to 110 mph

iii. ☐ Category 3- winds 111 to 130 mph

iv. ☐ Category 4- winds 131 to 155 mph

v. ☐ Category 5- winds 156 mph and greater

6. Mark the FEMA Flood Zone the building is located in?

a) ☐ **B and X** – Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods. B Zones are also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile. **Moderate to Low Risk Area**

b) ☐ **C and X** – Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level. Zone C may have ponding and local drainage problems that don't warrant a detailed study or designation as base floodplain. Zone X is the area determined to be outside the 500-year flood and protected by levee from 100-year flood. **Moderate to Low Risk Area**

c) ☐ **A** – Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones. **High Risk Area**

d) ☒ **AE** – The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30 Zones. **High Risk Area**

e) ☐ **A1-30** – These are known as numbered A Zones (e.g., A7 or A14). This is the base floodplain where the FIRM shows a BFE (old format). **High Risk Area**

f) ☐ **AH** – Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones. **High Risk Area**

- g) ☐ **AO** – River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones. **High Risk Area**
- h) ☐ **AR** – Areas with a temporarily increased flood risk due to the building or restoration of a flood control system (such as a levee or a dam). Mandatory flood insurance purchase requirements will apply, but rates will not exceed the rates for unnumbered A zones if the structure is built or restored in compliance with Zone AR floodplain management regulations. **High Risk Area**
- i) ☐ **A99** – Areas with a 1% annual chance of flooding that will be protected by a Federal flood control system where construction has reached specified legal requirements. No depths or base flood elevations are shown within these zones. **High Risk Area**
- j) ☐ **V** – Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. No base flood elevations are shown within these zones. **High Risk – Coastal Areas**
- k) ☐ **VE, V1 – 30** – Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones. **High Risk – Coastal Areas**
- l) ☐ **D** – Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk. **Undetermined Risk Area**

7. What is the area's Base Flood Elevation (BFE) if given in flood mapping?

- ❖ See the **A** zones. Note: **AE** zones are now used on new format FIRMs instead of A1-A30 Zones. The BFE is a computed elevation to which floodwater is anticipated to rise. Base Flood Elevations (BFEs) are shown on Flood Insurance Rate Maps (FIRMs) and flood profiles.
- ❖ The facility's Base Flood Elevation(BFE) is: 1.5

8. Does the facility flood during or after heavy rains?

- a) ☐ Yes
b) ☒ No

9. Does the facility flood when the water levels rise in nearby lakes, ponds, rivers, streams, bayous, canals, drains, or similar?

- a) ☐ Yes
b) ☒ No

10. Is facility protected from flooding by a levee or flood control or mitigation system (levee, canal, pump, etc)?

- a) ☒ Yes
b) ☐ No

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

11. Have the areas of the building that are to be used for safe zones/sheltering been identified?
 - a) ☒ Yes
 - b) No. Identify these areas then indicate that this has been completed by marking Yes.
12. Have the facility's internal and external environments been evaluated to identify potential chemical or biological hazards?
 - a) ☒ Yes
 - b) No. Evaluate and identify areas then indicate that this has been done by marking Yes.
13. Has the facility's external environment been evaluated to identify potential hazards that may fall or be blown onto or into the facility?
 - a) ☒ Yes
 - b) No. Evaluate and identify areas then indicate that this has been done by answering Yes.
14. Emergency Generator - **generator information should match MSTAT!**
 - a) Is the generator(s) intended to be used to shelter in place during hurricanes (extended duration)?
 - i. ☒ Yes. The generator(s) will be used for Sheltering in place for Hurricanes.
 - ii. ☐ No. The generator(s) will **NOT** be used for Sheltering In Place for Hurricanes.
 - b) What is the **wattage(s)** of the generator(s)? Give answer in **kilowatts (kW)**.
 1st; 300KW 2nd generator; _____ 3rd generator; _____
 - c) Mark which primary **fuel** each generator(s) uses?

i. <input type="checkbox"/> natural gas;	2nd generator; <input type="checkbox"/> natural gas;	3rd generator; <input type="checkbox"/> natural gas
ii. <input type="checkbox"/> propane;	2nd generator; <input type="checkbox"/> propane;	3rd generator; <input type="checkbox"/> propane
iii. <input type="checkbox"/> gasoline;	2nd generator; <input type="checkbox"/> gasoline;	3rd generator; <input type="checkbox"/> gasoline
iv. <input checked="" type="checkbox"/> diesel;	2nd generator; <input type="checkbox"/> diesel;	3rd generator; <input type="checkbox"/> diesel
 - d) How many **total hours** would generator(s) run on the fuel supply **always on hand**? (enter NG if Natural Gas)
 1st 336 Hours 2nd _____ Hours 3rd _____ Hours
 - e) If generator **will be used for sheltering in place for a hurricane (extended duration)**, are there provisions for a seven day supply of fuel?
 - i. ☐ Not applicable. The facility will not use the generator for sheltering in place during hurricanes.
 - ii. ☒ Yes. Facility has a seven day supply **on hand at all times or natural gas**.
 - iii. ☐ Yes. Facility has **signed current contract/agreement** for getting a seven day fuel supply **before hurricane**.
 - iv. No supply or contract. Obtain either **a contract or an onsite supply of fuel**, OR **make decision to not use generator for sheltering in place, then mark answer**.
 - f) Will life sustaining devices, that are dependent on electricity, be supplied by these generator(s) during outages?
 - i. ☒ Yes
 - ii. ☐ No

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

g) Does generator provide for air conditioning?

i. ☒ Yes. Mark closest percentage of the building that is cooled?

- ☒ 100 % of the building cooled
- ☐ 76% or more of the building is cooled
- ☐ 51 to 75% of the building is cooled
- ☐ 26 to 50% of the building is cooled
- ☐ Less than 25% of the building is cooled

☒ No. The generator does not provide for any air conditioning.

ii. If air conditioning fails, for any reason, does the facility have procedures (specific actions) in place to prevent heat related medical conditions?

- ☒ Yes
- ☐ No

h) Does facility have in the plan, a current list of what equipment is supplied by each generator?

☒ Yes

If No - Evaluate, identify then indicate that this has been done by answering Yes.

15. Utility information – answer all that apply (should match what is in MSTAT!)

a) Who supplies electricity to the facility?

i. Suppliers name: ENTERGY

ii. Account #: 172829608

b) Who supplies water to the facility? (supplier's name)

i. Suppliers name: Jefferson S&W

ii. Account #: 734292

c) Who supplies fuels (natural gas, propane, gasoline, diesel, etc) to the facility? If applicable.

i. Suppliers name: Atmos Energy

ii. Account #: 4039030812

d) Does plan contain the emergency contact information for the utility providers? (Contact names, 24 hour emergency phone numbers)?

i. ☒ Yes

ii. No. Please obtain contact information for your utility providers.

16. Floor Plans

a) Does plan have current legible floor plans of the facility?

i. ☒ Yes

ii. No. Please obtain, then indicate that this has been done by answering Yes

b) Indicate if the following locations are marked, indicated or described on floor plan:

i. Safe areas for sheltering: ☒ Yes. If No- Please indentify on floor plan and mark Yes.

ii. Storage areas for supplies: ☒ Yes. If No- indicate on floor plan and mark Yes.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- iii. Emergency power outlets: ☒ Yes. If No- identify on floor plan and mark Yes.
 - iv. Emergency communication area: ☒ Yes. If No- identify on floor plan and mark Yes.
 - v. The location of emergency plan: ☒ Yes. If No- identify on floor plan and mark Yes.
 - vi. Emergency command post: ☒ Yes. If No - identify on floor plan and mark Yes.
- B. Operational Considerations - Complete using information from facility's current emergency plan.
1. Residents information
- a) What is the facility's total number of state licensed beds?
Total Licensed Beds: 138
 - b) If the facility had to be evacuated today to the host facility(s) - answer the following using current resident census and their transportation requirements:
 - i. How many high risk patients (RED) will need to be transported by **advanced life support ambulance** due to dependency on mechanical or electrical life sustaining devices or very critical medical condition? Give the total number of residents that meet these criteria the facility would need its named ambulance provider to transport.
RED: 11
 - ii. How many residents (YELLOW) will need to be transported by a **basic ambulance** who are not dependent on mechanical or electrical life sustaining devices, but who cannot be transported using normal means (buses, vans, cars). For example, this category might include patients that cannot sit up, are medically unstable, or that may not fit into regular transportation? Give the total number of residents that meet these criteria the facility would need its named ambulance provider to transport.
YELLOW: 52
 - iii. How many residents (GREEN) can only travel using **wheelchair accessible transportation**? Give the total number of residents that meet these criteria the facility would need its named transportation provider to transport.
GREEN WHEEL CHAIR: 15
 - iv. How many residents (GREEN) need no specialized transportation could go **by car, van, or bus**? Give the total number of residents that meet these criteria the facility would need its named transportation provider to transport.
GREEN: 9
 - c) Is the following provided in the list(s) or roster(s) of current residents that is kept in or used for the facility emergency preparedness plan: **do not send in this list or roster.**
 - i. Each resident's current and active diagnosis?
☒ Yes. If No - Obtain and mark Yes.
 - ii. Each resident's current list of medications including dosages and times?
☒ Yes. If No - Obtain and mark Yes.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- iii. Each resident's allergies, if any?
☒ Yes. If No - Obtain and mark Yes.
- iv. Each resident's current dietary needs or restrictions?
☒ Yes. If No - Obtain and mark Yes.
- v. Each resident's next of kin or responsible party and their contact information?
☒ Yes. If No - Obtain and mark Yes.
- vi. Each resident's current transportation requirements? (advanced life support ambulance, basic ambulance, wheel chair accessible vehicle, car-van-bus)
☒ Yes. If No - Obtain and mark Yes.

2. Staff

- a) Is each of the following provided in the list(s) or roster(s) of all current staff that is kept in or used with the facility emergency preparedness plan: **do not send in this list or roster.**
 - i. Emergency contact information for all current staff?
☒ Yes. If No - Obtain and mark Yes.
 - ii. Acknowledgement of if they will work during emergency events like hurricanes or not?
☒ Yes. If No - Obtain and mark Yes.
- b) What is total number of planned staff and other non residents that will require facility transportation for an evacuation or need to be sheltered?
30

3. Transportation - should match what is in MSTAT!

- a) Does facility have transportation, or have current or currently verified contracts or agreements for emergency evacuation transportation?
☒ Yes. If No - Obtain transportation and mark Yes.
- i. Is the capacity of planned emergency transportation adequate for the transport of all residents, planned staff and supplies to the evacuation host site(s)?
☒ Yes. If No - Obtain adequate transport and mark Yes.
- ii. Is all transportation air conditioned?
☒ Yes. go to B. 3. a) iv.
☐ No, go to B. 3. a) iii.
- iii. If not air conditioned are there provisions (specific actions and supplies) in plan to prevent and treat heat related medical conditions?
☐ Yes. If No - make plans (specific actions and supplies) and mark Yes.
- iv. Is there a specified time or timeline (H-Hour) that transportation supplier will need to be notified by?
☒ Yes. What is that time 72 hours?
☐ No. There is no need for a specified time or timeline for contacting transportation.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- b) Does each contract or agreement for NON-AMBULANCE transportation contain the following information? **NOTE: Vehicles that are not owned by but at the disposal of the facility shall have written usage agreements (with all required information) that are signed and dated. Vehicles that are owned by the facility will need to verify ownership.**
- The complete name of the transportation provider?
☒ Yes. If No - obtain and mark Yes.
 - The number of vehicles and type (van, bus, car) of vehicles contracted for?
☒ Yes. If No - obtain and mark Yes.
 - The capacity (number of people) of each vehicle?
☒ Yes. If No - obtain and mark yes.
 - Statement of if each vehicle is air conditioned?
☒ Yes. If No - obtain and mark Yes.
 - Verification of facility ownership, if applicable; copy of vehicle's title or registration?
☒ Yes. If No - obtain and mark Yes.
- c) Have copies of each signed and dated contract/agreement been included for submitting?
☒ Yes. If no, obtain and mark Yes.
- d) Has a cover page been completed and attached for each contract/agreement. *(blank form provided)*
☒ Yes. If No - complete and mark Yes.
4. Host Site(s)-*extra pages for multiple sites have been included with forms near end of survey. (should match what is in MSTAT!)*
- Does the facility have current contracts or verified agreements for a primary evacuation host site(s) outside of the primary area of risk?
☐ Yes. If No - obtain and mark Yes.
 - Provide the following information:(list all sites, if multiple sites list each - see extra pages)
 - What is the name of each primary site(s)?
Plaquemine Plaza Holdings, LLC.
 - What is the physical address of each host site(s)?
24320 Ferdinand Street
Plaquemine, LA 70759
 - What is the distance to each host site(s)?
82.0
 - Is the host site(s) located outside of the parishes identified as hurricane risk areas?
Yes
 - Does plan include map of route to be taken and written directions to host site?
☒ Yes. If No - obtain and mark Yes.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- vi. Who is the contact person at each primary host site(s)?
Name: Bob G. Dean, Jr.
Phone: 1-225-343-9152
Email: _____
Fax: _____
- vii. What is the capacity (number of residents allowed) of each primary host site(s)?
➤ Capacity that will be allowed at each site: 138
➤ Total Capacity of all primary sites: 138
➤ Is this adequate for all evacuating residents?
☒ Yes. If No - obtain and mark Yes.
- viii. Is the primary site a currently licensed nursing home(s)?
☐ Yes, go to- B.4.b) x.
☒ No, go to- B.4.b) ix.
- ix. If primary host site is not a licensed nursing home provide a description of host site(s) including;
➤ What type of facility it is?
Hurricane Evacuation Site
➤ What is host site currently being used for?
Evacuation Site
➤ Is the square footage of the space to be used adequate for the residents?
☒ Yes
☐ No
➤ What is the age of the host facility(s)?

➤ Is host facility(s) air conditioned?
☒ Yes
☐ No
➤ What is the current physical condition of facility?
☒ Good
☐ Fair
☐ Poor
➤ Are there adequate provisions for food preparation and service?
☒ Yes
☐ No
➤ Are there adequate provisions for bathing and toilet accommodations?
☒ Yes
☐ No
➤ Are any other facilities contracted to use this site?
☒ Yes
☐ No
- x. Is the capacity of primary host site(s) adequate for staff?
☒ Yes
☐ No. If No - where will staff be housed?

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- xi. Is there a specified time or timeline (H-Hour) that primary host site will need to be notified by?
☒ Yes. If Yes - what is that time? _____
☐ No.
- c) Does the facility have current contracts or verified agreements for an alternate or secondary host site(s)?
☒ Yes. If No - obtain and mark Yes.
- d) Provide the following information:(list all sites, if multiple sites **list each** - see extra pages)
- i. What is the name of each alternate/secondary site(s)?
Independence Evacuation Site
 - ii. What is the physical address of each alternate/secondary host site(s)?
129 Calhoun Street
Independence, LA 70443
 - iii. What is the distance, in miles, to each alternate/secondary host site(s)?
69.3
 - iv. Is the host site(s) located outside of the parishes identified as hurricane risk areas?
☒ Yes
☐ No
 - v. Does plan include map of route to be taken and written directions to host site?
☒ Yes. If No - obtain and mark Yes.
 - vi. Who is the contact person at each alternate/secondary host site(s)?
 Name: Bob G. Dean, Jr
 Phone: 1-225-343-9152
 Email: _____
 Fax: _____
 - vii. What is the capacity (number of residents allowed) of each alternate/secondary host site(s)?
 ➤ Capacity that will be allowed at each alternate/secondary site:
138
 ➤ Total Capacity of all alternate/secondary sites:
138
 ➤ Is this adequate for all evacuating residents?
☐ Yes. If No - obtain and mark Yes.
 - viii. Is the alternate/secondary site a currently licensed nursing home(s)?
☐ Yes, go to - B.4.d) x.
☒ No, go to - B.4.d) ix.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- ix. If alternate/secondary host site is not a licensed nursing home provide a description of host site(s) including;
- What type of facility it is?
Hurricane Evacuation Site
 - What is host site currently being used for?
Evacuation Site
 - Is the square footage of the space to be used adequate for the residents?
☒ Yes
☐ No
 - What is the age of the host facility(s)?
 - Is host facility(s) air conditioned?
☒ Yes
☐ No
 - What is the current physical condition of facility?
☒ Good
☐ Fair
☐ Poor
 - Are there provisions for food preparation and service?
☒ Yes

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

5. **Non-perishable food or nourishment** – for sheltering in place or for host site(s)
- a) For Sheltering In Place, does facility have – **on site** – a seven day supply of non-perishable food/nourishment that meets all resident's needs?
- ☒ Yes. If yes go to - B. 5. c)
☐ No. If no go to - B. 5. b)
- b) Provide the following if no onsite supply:
- i. Does facility have a current or currently verified contract to have a seven day supply of non-perishable food that meets all resident's needs delivered prior to a foreseeable emergency event?
- ☐ Yes, go to - B. 5.b). ii, iii, iv
If No - obtain supply or contract then mark appropriate answer.
- ii. Does each contract contain all of the following?
- name of supplier?
 - specified time or timeline (H-Hour) that supplier will need to be notified
 - contact information of supplier
- ☐ Yes. If No - obtain information then mark Yes.
- iii. Have copies of each signed and dated contract/agreement been included for submitting?
- ☐ Yes. If No - obtain and mark Yes.
- iv. Has a cover page been completed and attached for each contract/agreement. *(blank form provided)*
- ☐ Yes. If No - complete and mark Yes.
- c) For evacuations, does facility have provisions for **food/nourishment supplies at host site(s)**?
- ☒ Yes. If No - make necessary arrangements then mark Yes.
- d) Is there a means to prepare and serve food/nourishment at host site(s)?
- ☒ Yes. If No - make necessary arrangements then mark Yes.
6. **Drinking Water or fluids** – for sheltering in place – one gallon per day per resident.
- a) Does facility have – **on site** – a seven day supply of drinking water or fluids for all resident's needs?
- ☒ Yes. Go to B. 6. c)
☐ No. If No See B. 6.b)
- b) If no, provide the following:
- i. Does facility have a current contract for a seven day supply of drinking water or fluids to be delivered prior to a foreseeable emergency event?
- ☐ Yes, see B. 6.b). ii, iii, iv,
If No - please obtain supply or contract.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- ii. Does each contract for **Drinking Water** or fluids contain all of the following?
- name of supplier?
 - specified time or timeline (H-Hour) that supplier will need to be notified
 - contact information of supplier
- ☒ Yes. If No - obtain information then mark Yes.
- iii. Have copies of each signed and dated contract/agreement been included for submitting?
- ☒ Yes. If no - obtain and mark Yes
- iv. Has a cover page been completed and attached for each contract/agreement. *(blank form provided)*
- ☒ Yes. If no - complete and mark Yes
- c) Does facility have a supply of water for needs other than drinking?
- ☒ Yes
- If No - make necessary provisions for water for non drinking needs then mark Yes.
- d) For evacuations, does host site(s) have an adequate supply of water for all needs?
- ☒ Yes
- If No - make necessary provisions for water for non drinking needs then mark Yes
7. Medications- for sheltering in place or for host site(s)
- a) Does facility have – on site - a seven day supply of medications for all resident's needs?
- ☒ Yes. go to - B. 7. c)
- ☐ No. go to - B. 7.b) i,ii,iii,iv
- b) If no, provide the following:
- i. Does facility have a current or currently verified contract to have a seven day supply of medications delivered prior to a foreseeable emergency event?
- ☐ Yes, see B. 7.b). ii, iii, iv
- If No - please obtain supply or contract then mark Yes.
- ii. Does contract for medications contain the following?
- Name of supplier?
 - Specified time or timeline (H-Hour) that supplier will need to be notified
 - Contact information of supplier
- ☒ Yes. If No - obtain information then mark Yes.
- iii. Have copies of each signed and dated contract/agreement been included for submitting?
- ☒ Yes. If no - obtain and mark Yes.
- iv. Has a cover page been completed and attached for each contract/agreement. *(blank form provided)*
- ☐ Yes. If no - complete and mark Yes.

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- c) For evacuation, does facility have provisions for medications at host site(s)?

☒ Yes

If No - make necessary provisions for medications then mark Yes.

8. Medical, Personal Hygiene, and Sanitary Supplies – for sheltering in place or for host site(s)

- a) Does facility have –on site- medical, personal hygiene, and sanitary supplies to last seven days for all resident's needs?

☒ Yes. go to - B. 8. c)

☐ No. go to - B. 8. b) i,ii,iii,iv

- b) If no, provide the following:

- i. Does facility have a current or currently verified contract to have a seven day supply of medical, personal hygiene, and sanitary goods delivered prior to a foreseeable emergency event?

☐ Yes, see B. 7.b). ii, iii, iv

If No - please obtain supply or contract then mark Yes.

- ii. Does contract for medical, hygiene, and sanitary goods contain the following?

– Name of supplier?

– Specified time or timeline (H-Hour) that supplier will need to be notified

– Contact information of supplier

☐ Yes. If No, obtain information then mark Yes.

- iii. Have copies of each signed and dated contract/agreement been included for submitting?

☐ Yes. If no, obtain and mark Yes.

- iv. Has a cover page been completed and attached for each contract/agreement. *(blank form provided)*

☐ Yes. If no, complete and mark Yes

- c) For evacuation, does facility have provisions for medical, personal hygiene, and sanitary supplies at host site(s)?

☒ Yes

If No - make necessary provisions for medications then mark Yes

9. Communications/Monitoring - all hazards

- a) **Monitoring Alerts.** Provide the following:

- i. What equipment/system does facility use to monitor emergency broadcasts or alerts? TV & Internet

- ii. Is there back up or alternate equipment and what is it?

☒ Yes. Name equipment: Battery operated radio/cell phone

☐ No

- iii. Is the equipment tested?

☒ Yes

☐ No

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- iv. Is the **monitoring** equipment powered and operable during utility outages?
☒ Yes.
☐ No.
- v. Are there provisions/plans for facility to **monitor** emergency broadcasts and alerts **at evacuation site**?
☒ Yes
☐ No

b) **Communicating- send and receive- with emergency services and authorities. Provide the following:**

- i. What equipment does facility have to **communicate** during emergencies?
Cell phones
- ii. Is there back up or alternate equipment used to send/receive and what is it?
☐ Yes. Name equipment: _____
☒ No
- iii. Is the equipment tested?
☐ Yes
☐ No
- iv. Is the **communication** equipment powered and operable during utility outages?
☒ Yes.
☐ No
- v. Are there provisions/plans for facility to send and receive **communications** at evacuation site?
☒ Yes
☐ No

C. All Hazard Analysis

- 1. Has the facility identified potential emergencies and disasters that facility may be affected by, such as fire, severe weather, missing residents, utility (water/electrical) outages, flooding, and chemical or biological releases?
☒ Yes
If No - identify, and then mark Yes to signify that this has been completed.

2021 Nursing Home Emergency Preparedness Plan Survey

III. **CONCEPT OF OPERATIONS** – Answer the following or Provide the requested information. Any areas of planning that have not been provided for in the facility's emergency preparedness plan will need to be addressed.

A. **Plans for sheltering in place**

1. Does facility have written viable plans for sheltering in place during emergencies?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes.

a) Does the plan for sheltering in place take into account all known limitations of the facility to withstand flooding and wind? (This includes if limits were undetermined as well)

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

b) Does the plan for sheltering in place take into account all requirements (if any) by the local Office of Homeland Security and Emergency Preparedness?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

2. Does facility have written viable plans for adequate staffing when sheltering in place?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes.

3. Does facility have written viable plans for sufficient supplies to be on site prior to an emergency event which will enable it to be totally self-sufficient for seven days? (potable and non-potable water, food, fuel, medications, medical, personal hygiene, sanitary, repair, etc)

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

4. Does facility have communication plans for sheltering in place?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

a) Does facility have written viable plans for contacting staff pre event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

b) Does facility have written viable plans for notifying resident's responsible party before emergency event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

c) Does facility have written viable plans for monitoring emergency alerts and broadcasts before, during, and after event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- d) Does facility have written viable plans for receiving information from emergency services and authorities before, during, and after event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- e) Does facility have written viable plans for contacting emergency services and authorities before, during, and after event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

5. Does facility have written viable plans for providing emergency medical care if needed while sheltering in place?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

6. Does facility have written viable plans for the preparation and service of meals while sheltering?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

7. Does facility have written viable plans for repairing damages to the facility incurred during the emergency?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

B. Plans for Evacuation

1. Does facility have written viable plans for adequate transportation for transporting all residents to the evacuation host site(s)?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- a) Does facility have written viable plans for adequate staffing for the loading of residents and supplies for travel to evacuation host site(s)?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- b) Does facility have written viable plans for adequate staffing to ensure that all residents have access to licensed nursing staff and appropriate nursing services during all phases of the evacuation?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- c) Does facility have written viable plans for adequate staffing for the unloading of residents and supplies at evacuation host site(s)?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

2. Does facility have written viable plans for adequate transportation for the return of all residents to the facility?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- a) Does facility have written viable plans for staffing to load residents and supplies at the shelter site for the return to facility?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- b) Does facility have written viable plans for staffing to ensure that all residents have access to licensed nursing staff and appropriate nursing services provided during the return to facility?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- c) Does facility have written viable plans for staffing for the unloading of residents and supplies after return to facility?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

3. Does facility have written viable plans for the management of staff, including provisions for adequate qualified staffing and the distribution and assignment of responsibilities and functions at the evacuation host site(s)?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

4. Does facility have written viable plans to have sufficient supplies – to be totally self sufficient - at or delivered to the evacuation host site(s) prior to or to coincide with arrival of residents? (potable and non-potable water, food, fuel, medications, medical goods, personal hygiene, sanitary, clothes, bedding, linens, etc)

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

5. Does facility have written viable plans for communication during evacuation?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- a) Does facility have written viable plans for contacting host site prior to evacuation?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

- b) Does facility have written viable plans for contacting staff before an emergency event?

☒ Yes

If No - Planning is needed for compliance. Complete then mark Yes

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- c) Does facility have written viable plans for notifying resident's responsible party - pre event- of intentions to evacuate?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- d) Does facility have written viable plans for monitoring emergency alerts and broadcasts - while at host site- before, during, and after event?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- e) Does facility have written viable plans for receiving information from and contacting emergency services and authorities -while at host site- before, during and after event?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- f) Does facility have written viable plans for the need to remain at an unlicensed evacuation shelter site for more than five days, if evacuating to an unlicensed site?
☒ Yes ☐ Evacuating to a licensed site
If No - Planning is needed for compliance. Complete then mark Yes
6. Does facility have written viable plans to provide emergency medical care if needed while at evacuation site(s)?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- C. Does facility have written viable plans for all identified potential hazards?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- D. Does facility have written viable plans for communicating during all emergencies?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
1. Does facility have written viable plans for immediately providing written notification by hand delivery, facsimile, email or other acceptable method of the nursing home's decision to either shelter in place or evacuate due to any emergency to the Health Standards Section of the Department of Health and Hospitals?
☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes

2021 Nursing Home Emergency Preparedness Plan Survey

2. Does plan include providing the following information to Health Standards Section of the Department of Health and Hospitals?
- a) Is it a full facility evacuation, partial facility evacuation or shelter in place?
 - b) The date(s) and approximate time(s) of full or partial evacuation?
 - c) The names and locations of all host site(s)?
 - d) The emergency contact information for the person in charge of evacuated residents at each host site(s)?
 - e) The names of all residents being evacuated and the location each resident is going to?
 - f) A plan to notify Health Standards Section within 48 hours of any deviations or changes from original notification?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
3. Does facility have written viable plans for receiving and sending emergency information during emergencies?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
4. Does facility have written viable plans for monitoring emergency alerts and broadcasts at all times?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
5. Does facility have written viable plans for notifying authorities of decision to shelter in place or evacuate?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
6. Does facility have written viable plans for notifying authorities and responsible parties of the locations of all residents and any changes of those locations?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- E. Does facility have written viable plans for entering all required information into the Health Standards Section's (HSS) emergency preparedness webpage?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes
- F. Does facility have written viable plans for triaging residents according to their transportation needs?
- ☒ Yes
If No - Planning is needed for compliance. Complete then mark Yes

IV. ORGANIZATION AND RESPONSIBILITIES - The following should be determined and kept current in the facility's plan:

A. Who is responsible for the decision to shelter in place or evacuate?

Provide Name: Bob G. Dean, Jr.

Position: Owner

Emergency contact information:

Phone: 1-225-343-9152

Email: _____

Fax: _____

B. Who is the backup/second in line responsible for decision to sheltering in place/evacuating?

Provide Name: _____

Position: _____

Emergency contact information:

Phone: _____

Email: _____

Fax: _____

C. Who will be in charge when sheltering in place?

Provide Name: Bob G. Dean, Jr.

Position: Owner

Emergency contact information:

Phone: 1-225-343-9152

Email: _____

Fax: _____

D. Who will be the backup/second in line when sheltering in place?

Provide Name: Donise Boscareno

Position: Director of Operations

Emergency contact information:

Phone: 1-225-485-5877

Email: Dboscaren@lahcc.com

Fax: _____

E. Who will be in charge at each evacuation host site(s)?

Provide Name: Bob G. Dean, Jr.

Position: Owner

Emergency contact information:

Phone: 1-225-343-9152

Email: _____

Fax: _____

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

- F. Who has been (by position or title) designated or assigned in the facility's plan to the following required duties?
1. Title or position of person(s) assigned to notify the responsible party of each resident of the following information within 24 hours of the decision:
Donneba Thammard, Social Services Coordinator
 - a) If facility is going to shelter in place or evacuate.
 - b) The date and approximate time that the facility is evacuating.
 - c) The name, address, and all contact information of the evacuation site.
 - d) An emergency telephone number for responsible party to call for information.
 2. Title or position of person(s) assigned to notify the Department of Health and Hospitals- Health Standards Section and the local Office of Homeland Security and Emergency Preparedness of the facility's decision to shelter in place or evacuate:
SONYA BERRY, Administrator
 3. Title or position of person(s) assigned to securely attach the following information to each resident during an emergency so that it remains with the resident at all times?
Akayla Bailey, Director of Nursing
 - a) Resident's identification.
 - b) Resident's current or active diagnoses.
 - c) Resident's medications, including dosage and times administered.
 - d) Resident's allergies.
 - e) Resident's special dietary needs or restrictions.
 - f) Resident's next of kin, including contact information.
 4. Title or position of person(s) assigned to ensure that an adequate supply of the following items accompany residents on buses or other transportation during all phases of evacuation?
Akayla Bailey, Director of Nursing & Stephen Black, Assistant Director of Nursing
 - a) Water
 - b) Food
 - c) Nutritional supplies and supplements
 - d) All other necessary supplies for the resident.
 5. Title(s) or position(s) of person(s) assigned for contacting emergency services and monitoring emergency broadcasts and alerts?
SONYA BERRY, Administrator

2021 Nursing Home Emergency Preparedness Plan Survey

V. Administration & Logistics

Annexes or tabbed sections that contain only current information pertinent to planning and the plan but are too cumbersome for the body of the plan; maps, forms, agreements or contracts, rosters, lists, floor plans, contact information, etc. These items can be placed here.

These blank forms are provided for your use and are to be completed:

- Page 1 - the Cover page of this document complete prior to submitting
- Page 2 - OHSEP Verification complete prior to submitting
- Transportation contract or agreement cover page, to be attached to each
- Evacuation host site contract or agreement cover page, to be attached to each
- Supply Cover sheets are to be used for each:
 - Non-perishable food/nourishment contract or agreement cover page, to be attached to each
 - Drinking water contract or agreement cover page, to be attached to each
 - Medication contract or agreement cover page, to be attached to each
 - Miscellaneous contract or agreement for supplies or resources that do not have a specific cover page, to be attached to each
- Multiple Host Site pages
- Authentication page, last page of document to be complete prior to submitting

VI. Plan Development and Maintenance

- A. Has the plan been developed in cooperation with the local Office of Homeland Security and Emergency Preparedness?

☒ Yes
☐ No

- B. If not, was there an attempt by facility to work with the local Office of Homeland Security and Emergency Preparedness?

☐ Yes
☐ No

- C. During the review of the facility's emergency preparedness plan were the following steps taken?

1. Were all out dated or non essential information and material removed?

☒ Yes

No - Complete this step then mark Yes

2. Were all contracts or agreements updated, renewed or verified?

☒ Yes

No - Complete this step then mark Yes

3. Was all emergency contact information for suppliers, services, and resources updated?

☒ Yes

No - Complete this step then mark Yes

4. Was all missing information obtained added to plan and the planning revised to reflect new information?

☒ Yes

No - Complete this step then mark Yes

THIS IS NOT AN EMERGENCY PLAN

Revised for 2021

2021 Nursing Home Emergency Preparedness Plan Survey

5. Were all updates, amendments, modifications or changes to the nursing facility's emergency preparedness plan submitted to the Health Standards Section along with this survey?

☒ Yes

No - Complete this step then mark Yes

VII. Authentication

The plan should be signed and dated by the responsible party(s) each year or as changes, modifications, or updates are made. A copy of that **Authentication page** shall be signed, dated and included with this survey. *(Blank form provided near end of document)*

If there is a change of responsible party(s) (administrator, etc) plan needs to be updated to reflect this change page resigned/dated and copy submitted to Health Standards Section.

2021 Nursing Home Emergency Preparedness Plan Survey

TRANSPORTATION COVER SHEET

TYPE or CLEARLY PRINT and attach a cover page to each transportation resource agreement, transportation contract, or verification of facility's ownership of transportation.

Example: If there are 5 transportation providers there should be 5 coversheets, one attached to the front of each signed and dated agreement, verification or contract.

If transportation is facility-owned, state that it is facility owned and provide verification of ownership and all applicable information. A photocopy of a vehicle's title or registration will be sufficient for verification of ownership. Ongoing contracts will need to be verified annually and signed by all parties.

Name of transportation resource provider (print):

Acadian Ambulance Services of New Orleans, LLC.

Contact Person: Kevin Spansel

Phone # of Contact Person: 504-374-2811

Physical Address of transportation provider:

P O BOX 98000
Lafayette, LA 70509-8000

Time Lines or Restrictions: H-Hour or the number of hours needed.

What is the latest time that transportation resource can be contacted according to agreement?

72 Hours

How long will it take the transportation to reach the facility after being contacted?

TBD

How long will the facility need to load residents and supplies onto the transportation?

TBD

Type (bus, van, car, ambulance, wheelchair) transport vehicle to be provided:

Ambulance & Wheelchair Van

Total number of transport vehicles to be provided: TBD

Total number and type (wheelchair, stretcher, seated) of passengers each vehicle will accommodate:

TBD

Is the transportation air conditioned? ☒ YES ☐ NO

If transportation is facility owned attach verification of ownership.

Date of agreement/contract/verification: 1/1/2021

Date agreement/ contract ends: Annually

Re: Evacuation Agreement

Dear: Admin

In response to a request for verification from Facility (hereinafter "Facility"), please allow this to serve as confirmation that Facility currently has in place an Agreement for the evacuation of resident/patients in the case of a disaster, as required by the Louisiana Department of Health and Hospitals and in accordance with the terms and conditions of such Agreement. The Agreement auto renews annually unless otherwise terminated by either party. As of this Date, no notice of termination has been received and therefore such Agreement remains in full force and effect.

Sincerely,

DocuSigned by:

PURPOSE

To evacuate nursing home residents, as directed by each nursing home administrator, in the event of an approaching hurricane or other disaster which requires evacuation and to return residents as instructed.

To transport all required medical equipment and supplies, mattresses, wheelchairs, etc. as needed.

MISCELLANEOUS

Customer shall furnish a minimum of one (1) nurse aide per bus for each trip.

Provider shall furnish one (1) 26 ft. box truck per nursing home to transport all equipment and supplies. As space is available, provider will transport, on the buses, mattresses, wheelchairs, medical supplies, etc. as needed.

It is the intent of the provider to furnish safe, comfortable and expedient transportation to and from your designated locations.

This agreement shall commence on March 1, 2021, and end on February 28, 2022, unless extended by mutual written agreement by the parties hereto.

Signed this 2nd day of February, 2021.

EVACUATION HOST SITE COVER SHEET

TYPE or CLEARLY PRINT and attach a cover page to each evacuation host site agreement, evacuation host site contract, or verification of evacuation host site. Complete this cover page for each facility named in the document.

Example: If there are 5 evacuation host site(s) contracts there should be 5 coversheets, one attached to the front of each signed and dated contract. If there are 5 evacuation host sites named in one agreement there should be 5 coversheets attached to that agreement.

Ongoing evacuation host site contracts will need to be verified annually and signed by all parties.

Name of EVACUATION HOST SITE:

Plaquemine Plaza Holdings, LLC.

Contact Person: Bob G. Dean, Jr.

Phone # of Contact Person: 1-225-343-9152

FAX#:

E-Mail Address:

Physical Address of evacuation site:

24320 Ferdinand Street

Plaquemine, LA. 70769

Time Lines or Restrictions: H-Hour or the number of hours needed.

What is the latest time that evacuation host site can be contacted according to agreement?

72 Hours

How long will it take to reach the evacuation host site facility?

1 hr and 42 min

How long will it take to unload residents and supplies from the transportation?

2 hours

Type of evacuation host site:

Is it the ☒ PRIMARY or ☐ ALTERNATE site?

Is it a ☐ LICENSED Nursing Home or ☒ NON-LICENSED FACILITY?

Total number of residents and staff that facility is willing to host: 138

Is the evacuation host site air conditioned? ☒ Yes, air conditioned ☐ Not air conditioned

Date of agreement/contract/verification: 1/1/2021

Date agreement/contract ends: Annually

**DS SERVICES OF AMERICA, INC.
EMERGENCY WATER AGREEMENT**

This Emergency Water Agreement (the "Agreement") is entered into as of January, 2021 (the "Effective Date") by and between DS Services of America, Inc., ("DSS") and the undersigned customer ("Customer"). Under this Agreement, DSS will supply Customer's bottled water needs in the event of a local or national declared emergency or natural disaster, subject to the following terms and conditions:

- (1) In the event of a declared emergency or natural disaster, all water distribution is governed by the local emergency management agency and/ or the Federal Emergency Management Association ("FEMA"). Accordingly, DSS's obligations hereunder are subject to FEMA requirements.
- (2) All deliveries under this Agreement will be based on availability after DSS services regularly scheduled customers.
- (3) A 50-gallon minimum on all emergency water shipments may be required. Product sales are subject to availability of package size and water type.
- (4) Customer shall be charged DSS's list prices in the local market at the time of delivery, payable by either cash or credit card and all sales are final. Refundable bottle deposits are required on all five and three gallon bottles (where applicable), subject to return of the bottles in good condition, normal wear and tear excepted.
- (5) This Agreement shall remain in effect for one (1) year from the Effective Date. A new Emergency Water Agreement, if needed, must be entered into by Customer each calendar year. Requests should be sent to: corppo@dsservices.com
- (6) DSS DISCLAIMS ANY AND ALL WARRANTIES UNDER THIS AGREEMENT, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. The total liability of DSS

under this Agreement shall be limited to repairing or replacing defective water bottles delivered by DSS to Customer. DSS specifically disclaims any responsibility or liability for any consequential, incidental, special, exemplary, punitive, or other similar damages, however denominated. If, despite the limitations contained herein, monetary liability is imposed upon DSS, Customer agrees that under no circumstances shall any liability exceed the lesser of actual damages or an amount equal to the total payment(s) made by Customer to DSS pursuant to this Agreement. Customer agrees to waive and hold DSS and its subsidiaries, directors, officers, agents and employees harmless against any claims, damage, injury, or liability suffered or incurred by Customer or Customer's agents, guests or family members arising from Customer's or Customer's agents, guests and family members negligence or misconduct or operation or use of water bottles or other products provided to Customer under this Agreement. Customer acknowledges that water can cause damage to surfaces with which it comes in contact, and that water leaks may occur from water bottles. Customer is responsible for selecting the location for placement of water bottles in Customer's location in order to minimize potential loss or damage.

(7) This Agreement shall be governed and interpreted in accordance with the laws of the State of Georgia. Customer may not assign its rights or obligations under this Agreement, in whole or in part, nor delegate its duties under this Agreement, without the prior written consent of DSS. This Agreement constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes any prior negotiations, promises, understandings, agreements, course of dealing or performance, representations, warranties, or communications, whether oral or written, between the parties hereto.

Reinhart Foodservice Louisiana, LLC d/b/a
Performance Foodservice - New Orleans
918 Edwards Ave.
Harahan, LA 70123

February 16, 2021

Valued Customer:

Reinhart Foodservice Louisiana, LLC, doing business as Performance Foodservice-New Orleans ("Performance Foodservice"), is committed to working with you through our disaster planning service to ensure that emergency supplies are provided to your facility prior to and in the event of a disaster or emergency. This letter shall serve as documentation of Performance Foodservice's policy regarding delivery of goods during a disaster or emergency.

Should Performance Foodservice be affected by a disaster or emergency, it will take the following actions:

- Customers will be notified of delays by phone as soon as possible.
- Proper food safety and sanitation procedures will be maintained throughout the event.
- Customers will not receive any food that has been affected by damage sustained from the disaster or emergency.
- Deliveries will resume as soon as possible from either the affected Performance Foodservice facility or one or more alternate facilities.

If your facility is involved in a disaster or emergency, Performance Foodservice may supply the following items upon request and depending upon availability:

- Coordinated delivery schedule adjustments prior to or after the emergency has passed.
- Disaster/Emergency order consultation and order placement assistance.
- Delivery of emergency rations and supplies as available from the Performance Foodservice OPCO's inventory supplies and delivered on a first come/first serve basis prior to the event, and/or as service is available in the affected area.

Refer to your state's Department of Health and Human Services guidelines for food and water supply for emergencies. Performance Foodservice will provide to you, upon request, a Disaster Planning Kit which gives information on recommended perishable and non-perishable food and water to keep on hand in case an emergency arises, and a Three-Day Emergency/Disaster Menu.

Should your facility undergo a disaster or emergency, it is your responsibility to notify Performance Foodservice regarding stoppage of delivery or delivery to an alternate site. Alternate shelter site deliveries will be made as available on normal routes and days in the area. You should take as many supplies as possible to the shelter site from your current inventory. This recommendation is to ensure your existing inventory is not destroyed during the event and/or product is available for meals should our ability to ship supplies to the alternate site be delayed because of excessive demands prior to and following the event. Should you have any questions regarding this policy, please contact your Performance Foodservice Healthcare Account Manager or Customer Service at 1-800-488-3988.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Wood', written over a horizontal line.

Dear Performance Foodservice Customer:

Prior to the Department of Health and Hospital (DHH) deadline for updating your Emergency Plan, Reinhart Foodservice Louisiana, L.L.C. d/b/a Performance Foodservice-New Orleans and Shreveport ("Performance Foodservice") has updated our Emergency Preparedness Manual. As in the past, in the event of an emergency, Performance is committed to giving priority service to hospital and nursing home customers. Our response time, however, may be affected by weather and road conditions, which will determine our ability to safely put our drivers and trucks on the road. Further, our initial ability to supply shelf stable food and paper items may be limited by current inventories. Stocking levels of these items vary based on sales and lead-time required to obtain stock. Appropriate substitutions will be made as inventory is depleted. Remember it is important to adjust inventory levels prior to the orders!

In complying with DHH's Model Nursing Home Emergency Plan, Performance's recommendations have taken into consideration the following:

- Facilities are expected to exist without outside assistance for 48 hours. For food service this includes:
 - Special diets
 - Residents, staff, families of residents and families of staff who must be fed
- If sheltering in place, facility should be prepared for 7 days, and the plan should include:
 - The amount of food kept on hand
 - Plans for the deliveries prior to and after the event =
 - When will the order be placed?
 - When will the order be delivered?
- If evacuating, preparations should include food for:
 - Residents, staff, families of residents and staff who will be traveling with the facility
 - Food and water for the trip, taking into consideration extended travel times due to traffic conditions
 - Special dietary needs
 - Meal service supplies, i.e. paper supplies, can openers, etc.

A three-day sample disaster menu has been included with this document. In addition to a regular disaster menu, we suggest that facilities have a policy in place to address the needs of residents on therapeutic diets such as those with dysphagia or swallowing problems.

Performance has established the following policies regarding merchandise return. All items must be returned in the original, unadulterated, unopened, undamaged case within fourteen days of invoice date. No refrigerated, frozen, bottled water or damaged merchandise may be returned per HACCP regulations. A restocking fee of 33% will be charged on all returned products.

We strongly recommend you purchase and store your disaster food and paper supplies by June 1st, the start of the hurricane season. These supplies should be kept in your inventory throughout the year. If you are forced to evacuate, please make arrangements to bring your food and disposable supplies with you as well as to the procedures for medicine and patient charts. At the end of hurricane season, any inventory remaining of these items will be worked into your fall/winter menu cycle.

We are frequently asked about our ability to furnish water during an emergency weather situation. We stock a limited amount of bottled water with inventory based on current sales volume. We strongly suggest that you make arrangements with a local water supplier to source potable water before an emergency catches your facility unprepared.

When sheltering is in place, DHH's Model Nursing Home Plan requires seven days drinking water, which is defined as one gallon of fluids per person per day. When evacuating, facilities should also plan for water needs during travel, which may be extended due to traffic conditions. Facilities should have letters on file from the city, parish, police jury, fire departments or even local milk companies who can provide the quantities of water needed. We will work diligently to provide supplies of water that we can source on short notice, but significantly increasing our bottled water inventory based on speculated sales is not practical or economically feasible.

Finally, we have been asked about placing refrigerated trailers at customer sites prior to a hurricane's landfall. Because of the unpredictable nature of these storms, it is not prudent to deploy our equipment prior to a storm. Our policy is to place these trailers in strategic locations, if necessary, after the storm passes. With a limited number of trailers, they will be placed where they can benefit the largest number of customers, rather than reserved for any single facility.

In closing, attached is emergency contact information to be used during a disaster situation. If you have any questions about any topic, please contact your healthcare specialist immediately.

Sincerely,

Healthcare Division

Revised: 1/11/2021

Introduction to Disaster Preparedness

Preparing for a disaster is daunting. Food service operations within healthcare facilities face unique challenges during disasters. Healthcare facilities frequently remain open even under extenuating circumstances. On one hand, facilities must deal with the hardships that accompany the disaster itself such as power outages, and on the other hand, they must care for disaster victims. Healthcare food service directors can start preparing for the worst by joining the disaster preparedness committee. Being involved will foster strong communication. Communicating disaster response plans ensures the food service staff will understand their role in supporting the facility and other departments will know what assistance the food service department needs to continue to carry out its mission. Along with attending emergency preparedness meetings, food service directors may want to review disaster response recommendations for the types of disasters that are of concern in the facility's geographic location. This background knowledge will be useful for committee discussions as well as food service department trainings.

In general, natural disasters fit into one of three categories: short term, long term and water supply disruptions.

- Short term disasters occur within a small geographic area, are handled by local emergency services and the disaster duration typically ranges from hours to a couple of days. Complications such as utility and transportation disruptions are also relatively short.
- Long term disasters range from several days to weeks. Local emergency services need state and national support to provide relief from the disaster. Interruptions in utilities and transportation last longer because repairs to infrastructure are more complex.
- Water supply disruptions can result from natural disasters or they can occur independent of a disaster due to situations such as water main breaks or introduction of toxins into the source of drinking water. Food service directors can help with estimating the facility's water needs and creating an emergency water supply plan. Both the Joint Commission and the Centers for Medicare and Medicaid require healthcare facilities to have an emergency water supply plan.

As you review the tools and resources in this disaster preparedness kit, keep in mind the three main types of disasters, as well as which specific disasters your area is prone to. Planning ahead can make all the difference. If you would like more information on disaster preparedness resources, contact Nutrition Services at rfs-nsdept@pfgc.com.

HEALTHCARE DISASTER PROCEDURE MANUAL

This manual is provided as a sample prototype. Please customize to meet the needs of your facility according to your local jurisdiction.

Disaster Procedures

It is important that a plan for procuring, preparing, and serving foods be familiar to the administrator, food service supervisor and food service employees in the event of a disaster. Each facility should have a disaster procedure outlined to continue operations during an emergency. Service of a meal at the usual time will help to maintain morale and keep staff from becoming disorganized and panicked.

BASIC PRINCIPLES OF FOODSERVICE WITHOUT UTILITIES OR WITH EQUIPMENT MALFUNCTION:

1. Use as much of the perishable items on hand that does not require cooking for service (milk and milk products, fresh fruit, vegetables that can be eaten raw, cold cuts, and fully cooked leftovers). It is **CRITICAL** that the temperature of these foods be checked to ensure that they are not in the temperature danger zone. The temperature danger zone according to the FDA Food Code is 41-135°F (check with your local jurisdiction for applicable temperatures in your area). Examine products in the cooler and freezer and use perishable products before utilizing non-perishable pantry items.
2. **DO NOT** open refrigerator or freezer doors unless necessary. Try to take inventory by looking through the window, only open the door to get products for immediate use. Ice cream can be used if it is still frozen. Generally, food in a refrigerator is safe if the power is out no more than a few hours and if the temperature does not exceed 40°F for more than two (2) hours. Always keep an appliance thermometer in the refrigerator to see if food is being stored at safe temperatures (40°F or below). To retain cold temperature, open freezer or refrigerator door only as often as necessary. If freezer is not full, group packages together quickly. Meat and poultry should be separated from other product and placed on separate trays so their juices will not contaminate each other or other foods if they thaw. Check food for evidence of thawing before refreezing. Food that has or may have thawed during a power outage, and has refrozen before being checked, cannot reliably be examined for damage. You cannot rely on appearance or odor to determine whether a food will make you sick. Meats that have thawed according to methods acceptable by your jurisdiction and are still below 40°F and then are properly cooked or reheated to recommended minimum internal temperatures within 4 hours are safe to consume. Meats that feel slimy or that have an odor should be thrown away. Seafood and ground meat are more likely to thaw and/or spoil before other meats and should receive attention before other items.
3. Many refrigerator items are salvageable if they are not needing to be time and temperature controlled for safety (e.g. mustard, ketchup, peanut butter, vinegar-based salad dressings and sauces).
4. Use canned foods after the perishable items have been used or are no longer safe to use (e.g. use cottage cheese or cheese slices before using canned tuna).

5. Meals are to be served on disposable ware until the ability to wash and sanitize dishes is restored.
6. If water is not available, save all liquids from canned fruits and vegetables. Ice made from potable water should be removed from the ice machine and stored in clean, covered, food-grade containers and placed in the refrigerator/freezer. An emergency back-up source for water needs to be identified. Consider having an agreement with a local water supply company. Check with your local jurisdiction to determine the required amount that must be allotted and stored per person. Vegetable juices from canned vegetables can provide fluids. Fruit juices may be used in place of drinking water. Juice and coffee from machines that contain potable water may also be used to provide liquid. In cases of disaster, community water systems may become contaminated and water from these systems might need to be disinfected prior to use for human consumption. Contact your local health department for information on the preferred method prior to disinfecting any water.
7. At least one flashlight with working batteries should be kept in the supervisor's desk.
8. Dietary personnel should be instructed in procedures and menus for emergency feeding initially when no emergency is present. An annual in-service should be provided on emergency feeding.
9. If electricity or gas is unavailable, use chafing dishes and sterno to heat ready-to-eat and/or canned food if the equipment is available. Any properly refrigerated leftovers must be heated to an internal temperature of 165°F. Alternate sources of heating can be used if proper ventilation is available.
10. It is recommended that bags of ice be kept in the freezer in the event of injuries.
11. Emergency supply of bottled water should always be kept on hand. Check with your local jurisdiction to determine the required amount that must be allotted and stored per person. This includes residents, staff, families of residents and families of staff who will be at the facility. If traveling to an evacuation site, the facility must have enough fluids for the travel. Assume that all other water sources are contaminated until proven safe. Purify all water used for drinking, cooking and for washing cooking and eating utensils. Purify the water used for washing hands, body, kitchen and bathroom surfaces. Do not use water that has an odor, dark color, or contains floating material. Refer to your local health department in situations where water has been contaminated for the preferred manner to disinfect water. Murky and discolored water should be allowed to settle and filter before disinfecting. To disinfect water using heat, boil at a rolling boil for three minutes, allow cooling, and store in cleaned, sanitized and covered food-grade containers. To disinfect clear water using chemicals, add 1/8 teaspoon (8 drops) of unscented, liquid chlorine bleach (5.25% concentration) per gallon of water. Let the water stand for at least 30 minutes before using. Commercially prepared iodine tablets which are formulated for disinfecting water may also be used to chemically disinfect water. Contact your local health department for the preferred method in your area before attempting to disinfect any water.
12. Normal laundry procedures would be disrupted during a natural disaster.

RESIDENT MEAL SERVICE

1. Disposable service is to be used. Do not take non-disposable trays into the resident's room unless necessary.
2. All residents should receive a regular diet meal except for residents whose diets are highly restrictive. Highly restrictive diets include brittle diabetics, renal diets and those residents with food allergies. Texture modified diets should be observed when possible (see sample letter for Medical Staff). A high protein level is contraindicated when the water supply is limited. Discussion with medical staff must take place prior to an emergency as to the feasibility of supplement service during an emergency.
3. Follow the basic menu pattern:
 - Breakfast:
 - Fruit juice
 - Dry cereal
 - Bread, margarine, jelly
 - Fresh milk then aseptic packaged milk if available or reconstituted dry milk
 - Lunch and Dinner:
 - Protein source
 - Vegetable
 - Starch, bread or crackers with margarine
 - Fruit or dessert
 - Fresh milk then aseptic packaged milk if available or reconstituted dry milk
4. Protein sources include: cottage cheese, cold cuts, cheese, canned tuna, three bean salad, peanut butter, canned meat (beef, chicken or pork), chili and beans, pork and beans, ravioli, kidney beans, pinto beans, ranch style beans, wieners, beef stew or hash.
5. Staples include: canned vegetables, canned soups, canned fruit juices, aseptic milk, boxed cookies, graham crackers, saltines, jelly, dry cereal, canned pudding, evaporated or non-fat dry milk, and mayonnaise.
6. Use as much perishable items on the first day of the menu – such as lettuce, tomatoes, ice cream, frozen vegetables or meats. If gas service has not been interrupted make use of any frozen or refrigerated items. Refer to your state food code for regulations regarding the amount of time that food can remain without temperature control. A Temperature Chart is also included with this manual.
7. Canned vegetables can be served as salad by marinating in Italian or French Salad Dressing and served at room temperature. These items should be used after all perishable items have been utilized for the menu.
8. If dry milk is reconstituted, it must be reconstituted with potable water, kept in cleaned and sanitized, covered, food-grade containers, and must be time and temperature controlled for safety prior to use.

Supplies

CONTROL OF SUPPLIES IS EXTREMELY IMPORTANT. Please be familiar with the following:

1. A non-perishable food supply is routinely maintained in inventory. This includes a back-up source for water. Check with your local jurisdiction for the recommended amount of days' worth of supplies that you should have on-hand.
2. All perishable supplies are routinely maintained in inventory. Check with your local jurisdiction for the recommended amount of days' worth of supplies that you should have on-hand.
3. Disposable supplies should always be kept on-hand. Check with your local jurisdiction for the recommended amount of days' worth of supplies that you should have on-hand.

Sanitation

This is the responsibility of everyone that prepares and serves food. Good personal hygiene and sanitary food handling practices help to control food-borne diseases.

1. Single service and disposable items should be stored, handled and dispensed in a sanitary manner.
2. Waste should be collected in plastic bags, sealed tightly at the top and put in a dumpster for collection. Be careful not to overfill the bag or make it too heavy to handle.
3. When manual dish washing is employed, dishes and utensils must be immersed for at least 30 seconds in clean hot water at a temperature of 171°F or immersed in a sanitizing solution that has been prepared to the recommended concentration and confirmed with appropriate chemical test strip. Immersion times for chemical sanitation vary so check with the sanitizing chemical's manufacturer for the recommended time.

Work Assignments

Work assignments should take into consideration what employees have been trained for; however, everyone must be flexible. All workers should carry out tasks assigned to them by the person in charge. Non-foodservice employees may be assigned to the kitchen for preparation, tray delivery and clean up. The order of authority within the department starts with the foodservice supervisor, then the cook, followed by the relief cook.

NAME OF FACILITY

SAMPLE LETTER

As a Physician on Staff, I approve liberal modification of restricted diets during a disaster situation to include, but not limited to extreme fire damage or weather emergencies.

Know Your Risks Assessment Form Directions

- ❖ Rate the probability and severity for each type of disaster from 0 – 5, with 5 being the most probable / most severe.
- ❖ Probability = how likely is it that the disaster will strike your business
- ❖ Severity = how damaging the disaster would be to your business if it were to strike
- ❖ Multiply the probability score by the severity score and write the result in the total column
- ❖ Devise a plan for any event scoring ≥ 17

Emergency Supply Kit

Food Preparation Supplies:

- ☐ Water: seven-day supply - 1 gallon of water per person per day*
(*Note: This recommendation may vary so check with your local/state authorities)
- ☐ Food: seven-day supply of non-perishable food
- ☐ Manual can opener for food
- ☐ Extra supplements
- ☐ Paper cups, plates and plastic utensils, paper towels
- ☐ Gravity tube-feeding supplies
- ☐ Hand/battery operated equipment (whisks, heating elements)

Safety Equipment Supplies:

- ☐ Battery-powered, hand crank radio, or a NOAA weather radio with extra batteries
- ☐ Flashlights with extra batteries
- ☐ First aid kit
- ☐ Basic tool kit (hammer, nails, screwdriver, screws, pliers/wrench)
- ☐  approved foodservice gloves
- ☐ Fire Extinguisher
- ☐ Matches in a waterproof container

Food Safety and Sanitation Supplies:

- ☐ Thermometers – digital, dial, instant-read, oven, cooler, freezer
- ☐ Blankets/extra towels/tarps to insulate coolers/freezers
- ☐ Dry ice – (cooler/freezer space must be ventilated due to carbon dioxide production)
- ☐ Hand sanitizing gel
- ☐ Water purification supplies (contact your local health department for local recommendations)

- ☐ Sanitizer test strips
- ☐ Sterno® or other portable heat source for cooking
- ☐ Moist towelettes, garbage bags and plastic ties for personal sanitation
- ☐ Liquid bleach (no soap or additives, 5.25% sodium hypochlorite)
- ☐ Garbage bags for food waste
- ☐ Duct tape
- ☐ Picnic coolers with gel packs
- ☐ Personal protective equipment
 - ☐ Eye protection
 - ☐ Fitted dust mask (N-95)
 - ☐ Rubber boots
 - ☐ Rubber gloves
 - ☐ Protective clothing
 - ☐ Wash cloths
 - ☐ Face masks

Other Supplies:

- ☐ Secure area for cash/receipts
- ☐ Emergency reference material such as a first aid book
- ☐ Camcorder/camera to document damage

Power Outage Food Safety

Dietary Employee Training Program

Objective: The participant will be able to:

- Identify the need for food safety during a power outage.
- List ways to prepare for potential power outages.
- Explain how to keep freezers and coolers cold without power.
- Describe how to create a safe environment for potentially hazardous foods in the freezer and cooler when power returns.

Course Outline:

- I. Introduction: The Importance of Food Safety During a Power Outage
- II. Storing and Using Food Supplies Appropriately
- III. Conclusion / Discussion
- IV. Pre/Post Test

Course Information:

I. Introduction: The Importance of Food Safety During a Power Outage

Keeping food safe is an essential part of the daily foodservice profession. A foodborne illness or outbreak can be caused by improperly handling food or food left in the temperature danger zone (41°F-135°F) for more than four hours. Because food temperature is an important part of food safety, if your facility loses power, certain procedures must be enforced in order to ensure all food is being stored, cooked, held for service, or served in the safest manner possible.

II. Storing and Using Food Supplies Appropriately

A. Be Prepared

In order to combat a potentially hazardous situation, being prepared and having your staff well trained for potential power outages is essential. Be sure the freezer is always at 0°F and the cooler is at or below 39°F on a typical day. Use appliance thermometers to determine the temperature of the freezer or cooler. The appliance thermometer will also indicate the temperature of the freezer or cooler when the power goes out. When storing frozen foods, keep the freezer as full as possible and keep food close together so the food stays colder longer. It is also recommended to have a hanging cooler/freezer thermometer to determine the temperature of the storage areas. Be aware of possible sources of ice or dry ice to keep freezers and coolers cold. Your facility may also want to consider buying picnic coolers for refrigerated food in case the power outage will last longer than four hours. Purchase or make ice or store gel packs in the freezer to use in the coolers when needed. Preparing in advance for a possible power outage is important for ensuring the safety of the food being served.

B. What to Do When the Power Goes Out

If the power goes out at your facility, it is important to preserve as much temperature control in the freezer and cooler as possible by keeping the doors closed as much as possible. To help keep the cooler and freezer cooler longer, buy ice or dry ice and place in the storage area. If using dry ice, it is essential to ensure that there is proper ventilation in the cooler or freezer to avoid carbon

dioxide build-up. Make as few trips as possible into the freezer or cooler, making sure the door is closed immediately after you enter and exit. It is also helpful to list the contents of the freezer on the outside of the freezer door so the staff know exactly what they need and are able to get in and out as quickly as possible. Be sure to check the temperature of the freezer and cooler before removing food to ensure it has not in the temperature danger zone and is safe to eat. Also, be sure to check the temperature of the food periodically with a bimetallic stem or infrared thermometer. Since the cooler usually can keep food cool for only four hours, it is important to use the food in the cooler first before it is no longer safe to eat. Make sure all refrigerated foods are cooked to the proper internal temperature to destroy any possible foodborne illness or pathogens. Any food items left in the cooler longer than four hours after the power outage should be discarded. Once the refrigerated food is no longer available or safe to use, begin to use the foods located in the freezer. It is important to remember that if any food looks questionable or has an odor, discard it immediately; do not attempt to use it. After food in the freezer has been used up or is no longer safe to use, move on to food stored in dry storage. For emergency cooking, your facility can use a fireplace if indoors and a charcoal grill or camp stove outdoors. If cooking indoors, be sure to do so in areas with proper ventilation. Be sure to take food temperatures often. Keep foods hot by using candle warmers, chafing dishes, and fondue pots. Use only approved devices for warming food. Canned foods can be eaten directly out of a can. If cooking in a can, be sure to remove the label and top from the can for safety. When using open flame to cook your food, always be sure to extinguish the flame before leaving the room or area.

C. What to Do When Power Returns

When your facility regains power, be sure to check the safety of all food in the freezer and cooler. If an appliance thermometer was kept in your freezer or refrigerator, check the temperature when the power comes back on. If foods in the freezer are below 41°F and ice crystals are present, the foods can be refrozen for future use or immediately cooked. If there is not a thermometer in the freezer, check each package of food to determine its safety. Discard any perishable food left at 41°F or higher for 4 hours or longer. If the power outage lasted long enough that refrigerated and frozen food needed to be discarded, clean and sanitize the storage units before adding new food to remove any possible cross contamination or odors from spoiled foods. Be sure to remove the shelves and trays and wash with hot water and baking soda. Follow with a rinse and then sanitize. If an odor persists, allow the storage unit to air out for several days or use equal parts of vinegar and water to absorb the odor.

III. Conclusion/ Discussion

While food safety is important in everyday food preparation, it is also very important during an emergency. Even though food supplies may be decreasing, it is not safe to eat potentially hazardous foods which have been in the temperature danger zone for more than 4 hours. Keeping customers safe is important not only during a normal day, but also when your facility is in a state of emergency.

The information provided in this in-service is not meant to be all-inclusive. Performance values the safety and well-being of their customers and therefore strongly recommends contacting your local jurisdiction disaster planning. For more information regarding Dietary Employee Training Program or other nutrition services, contact rfs-nsdept@pfgc.com. 1. T, 2. F, 3. F, 4. F, 5. T

IV. Pre Test / Post Test (Circle One)

Name: _____

- | | | |
|---|---|--|
| T | F | 1. Keeping food safe is critical to avoid causing a foodborne illness or outbreak. |
| T | F | 2. When storing foods in the freezer, store them as far apart as possible to keep the freezer cold. |
| T | F | 3. Dry ice can be used to keep a walk-in freezer cold, even if proper ventilation is not available. |
| T | F | 4. An employee should make as many trips as possible into the freezer or refrigerator to determine the temperature. |
| T | F | 5. If power has been out for over four hours, discard the food in the refrigerator, and then clean and sanitize the storage unit before adding new food. |

Recovering from Natural Disasters

Dietary Employee Training Program

Objective: The participant will be able to:

- Describe different ways to prepare for a disaster.
- Identify precautions that need to be taken after a disaster.
- Understand ways to clean and decontaminate after a disaster.

Course Outline:

- I. Introduction: Natural Disasters
- II. Preparing and Reacting to a Natural Disaster
- III. Conclusion / Discussion
- IV. Pre/Post Test

Course Information:

I. Introduction: Natural Disasters

Natural disasters could affect any facility at any location. Being prepared for a disaster can increase safety at any site. Each type of disaster is different and should be handled accordingly. No matter the type of disaster, it is important that all employees and volunteers have the appropriate protective wear. In most disaster sites, gloves, boots, and protective clothing are needed.

II. Preparing and Reacting to a Natural Disaster

A. Any Natural Disaster (*tornado, hurricane, flood, fire, earthquake, etc.*)

o Preparing for a Disaster

- Take video or photographs of facility's entire inventory and equipment for your records and place in a fireproof safe.
- Keep receipts and bills of inventory in a fireproof safe or on a secure cloud-based computer network.
- Begin buying gloves, cleaning chemicals, and items needed for a disaster to be prepared, as stores only carry so many items and could be out by time you get there.

o After any Disaster

- When foodservice personnel are cleared to enter a disaster affected area, wear protective clothing which includes long pants, long-sleeved shirt, closed-toed rubber soled shoes or boots, work gloves and depending on the situation, a dust mask, safety glasses, and a hard hat.
- Watch for hidden damage. In most disaster sites, damage is not always visible.
- Avoid leaning or pushing on damaged material, it could be supporting the structure.
- If you smell natural or propane gas or hear a hissing noise, leave the property immediately. Call the fire department, or if you have a propane tank system, contact a propane supplier.
- Avoid walking across areas of the floor that sag or have weak spots. If the area needs to be traveled, place a thick plywood panel across the damaged area, extending 8-12 inches on each side of the weak area.

- If the power is out, use battery operated flashlights. Do not use candles or any type of open flame because there could be faulty electrical equipment, down lines, or gas leaks.
- When making temporary repairs save all the receipts.
- Take photographs or video of all the damage for insurance purposes.
- Electricity should be turned off if you see sparks, frayed wires, or smell hot insulation.
- If the sewage lines are damaged, do not use the sinks, showers, and toilets.
- Turn off the water if there are any damaged water pipes.
- If cleaning chemicals get mixed they can become toxic. When entering an area with a strong smell or your eyes start to burn or water, open the windows and get out of the building. If the chemical spill is nontoxic, carefully clean up the spill using personal protective equipment outlined in the chemical's safety data sheet.
- Drywall and insulation will need to be replaced if there is water damage from a flood or fire extinguisher. If not replaced it could lead to mold, mildew, and a weak structure.

○ **Cleaning Up After a Disaster**

When determining if an item is salvageable, start by discarding the non-salvageable items to eliminate any confusion. All saved items should be washed and sanitized to ensure safety.

- **Hard, non-porous surfaces (floors, walls, equipment)**
 - The first step in cleaning this type of surface is to remove all visible dirt and excess water. Then wash and sanitize the item if able and let dry. Disinfect metal pots and pans by boiling for 10 minutes. Fans can be used to speed up the drying process.
- **Porous, soft, absorbent, uncleanable surfaces**
 - This surface type includes damaged equipment, wood, plastic utensils, linens, drywall, insulation, paneling, furnishings, wallpaper, books, paperwork, and menus. If any of these items are affected by damage, they need to be discarded.
- **Coolers/Freezers**
 - When cleaning the cooler(s) and freezer(s), remove all the shelves and trays so everything can be washed, rinsed, and sanitized. If there is still an odor, wash with hot water and baking soda and leave the door open for 15 minutes. Other products to help reduce the odor include newspaper, coffee grounds, baking soda, or cotton balls soaked in vanilla.

○ **Fire Disaster**

- First check with the fire department to be sure it is safe to enter the facility.
- Check the ceiling for signs of sagging. If the plaster or wallboards get wet from the fire hose it becomes very heavy and dangerous if it falls.
- Open the windows and doors for ventilation and drying.
- Throw away all food and beverages exposed to heat, smoke, or soot.
- Pots, pans, dishes, and silverware should be washed in soapy water, rinsed, and polished with a fine powder cleaner.
- Painted walls and washable wallpaper can be cleaned by wiping the surface with a bleach solution to decrease the chances of mold and mildew growth.

o **Flood Disaster**

- Avoid flood water because it could be contaminated with sewage, chemicals, and bacteria.
- If the sewage system is damaged, it should be a priority to fix right away.
- Disinfect everything that was touched by the flood water.
- It is important to remember that after the water is gone, the building structure could be weak, and caution needs to be taken.
- Throw away all food that has been in contact with flood water.

III. Conclusion/ Discussion

All employees should be aware of how to properly handle any disaster situation. Taking proper precautions when at a disaster site could prevent unnecessary accidents.

The information provided in this in-service should not be used to replace policies set by your facility or local jurisdiction. Performance values the safety and well-being of their customers and therefore strongly recommends consulting your local jurisdiction for more information on kitchen decontamination and salvaging inventory. For more information regarding Dietary Employee Training Program or other nutrition services, please contact rfs-nsdept@pfgc.com. 1. F, 2. T, 3. F, 4. T, 5.F

IV. Pre/ Post Test (Circle One)

Name: _____

- | | | |
|---|---|--|
| T | F | 1. If you smell natural or propane gas, the first thing to do is to turn off the gas and wait. |
| T | F | 2. It is important to photograph or videotape all inventory before a disaster and place in a fireproof safe. |
| T | F | 3. Contaminated books, paperwork, and menus can all be kept and decontaminated. |
| T | F | 4. Throw away all food that comes in contact with smoke, heat, soot, or flood water. |
| T | F | 5. In a flood, once the water is gone, the building is completely safe to enter. |

Disaster Planning – Pandemic

Dietary Employee Training Program

Objective: The participant will be able to:

- ♦ Explain the impact pandemics can have on society
- ♦ Understand workplace policies designed to prevent illness
- ♦ Give examples of what employees can do to minimize the spread of infectious diseases at work

Course Outline:

- I. Introduction to pandemics
- II. Dealing with Pandemics
- III. Conclusion / Discussion

Course Information:

I. Introduction: Pandemics

A pandemic is a disease that has spread worldwide and is caused by a microbe that has never caused sickness in humans before. Some pandemic diseases result from a microbe crossing over from animals to humans. Most pandemics are caused by viruses and influenza is the most common. Since pandemics are new diseases to humans it takes time for scientists to develop vaccines. Once a vaccine is available, getting vaccinated is important because it is the most effective way to prevent the spread of a pandemic illness. As with all other types of disasters, pandemics can have enormous economic and social consequences. Having massive illness is disruptive to business, schools, and government functions. If the pandemic results in a high death toll the emotional consequences to survivors may last their entire lifetimes.

II. Dealing with Pandemics

It is critical for employers and employees to work together to prevent the spread of infectious diseases. Employers should set policies that minimize employee contact with infectious diseases. On the other hand, employees can prevent illness by adopting healthy behaviors.

A. Before a Pandemic Hits

- a. Employers need to keep updated emergency contact information for employees
- b. Employers encouraging employees to get an annual flu shot is an effective way to decrease workplace illness
- c. Employees should be reminded that getting the flu shot cannot give you the flu because the virus has been deactivated.
- d. Managers may provide cross training among employees so that essential functions can be performed if staffing levels are disrupted during a pandemic.
- e. Managers may include a pandemic scenario during disaster drill trainings.
- f. Healthy habits such as not smoking, eating healthy, exercising, & getting adequate sleep will reduce the chances of contracting an infectious disease.

B. Workplace Policies and Operating Procedures Once a Pandemic Hits

- a. Stay home if you have a fever or symptoms of a fever (chills, sweating, aches, weakness / fatigue) to stay home until at least 24 hours after symptoms have resolved without medication. Please note that the time frame for staying home after symptoms have resolved can vary and that you should check with guidelines from your local health department or the Centers for Disease Control and Prevention (CDC) for exact details.
- b. Consult a doctor before returning to work.
- c. Talk with your manager if you need flexibility on sick leave policies during the pandemic.
- d. Decrease face time with other employees by using web or tele meetings and trainings.
- e. Talk with your manager if you need tissues, soap, and no touch garbage cans.

C. Employee Behavior During a Pandemic

- a. Wash hands often and use proper hand washing techniques.
- b. Follow cough and sneeze etiquette (use tissues, cover mouth, or cough & sneeze into a tissue).
- c. Avoid shaking hands.
- d. Keep a distance of at least six feet from other people.
- e. Clean and sanitize surfaces that come in frequent contact with hands such as computers, phones, and work surfaces).
- f. Monitor the expiration dates on cleaning and sanitizing solutions and replace as needed.
- g. Properly use any needed personal protective equipment (gloves, mask)

III. Conclusion / Discussion

Pandemics can unexpectedly reduce staffing levels and impair a business's ability to function. It is up to both employees and employers to stop the spread of infectious diseases in the workplace. By planning ahead, setting appropriate policies, and educating employees on health behaviors businesses may be able to continue to operate even during a pandemic.

For more information regarding Dietary Employee Training Program or other nutrition services, please contact rfs-nsdept@pfgc.com. 1.T, 2.F, 3.T, 4.T, 5.F

Pre-Test / Post-Test (Circle One)

Name: _____

- T F 1. Cross training employees helps businesses continue to function during a pandemic.
- T F 2. Getting vaccinated is not effective in preventing the spread of infectious diseases.
- T F 3. Proper hand washing helps prevent the spread of pandemic diseases.
- T F 4. The CDC provides guidelines on how long employees who have contracted the pandemic illness must stay home after symptoms have resolved.
- T F 5. Cleaning and sanitizing workspaces has no impact on the spread of infectious diseases.

Case Study One: Thunderstorm

You oversee the foodservice operations at an assisted living facility with 50 residents. It has been a misty and dreary morning. You hear that the radio is on in the kitchen and the dietary staff is listening while preparing lunch. At about 11 o'clock the National Weather Service announces a severe thunderstorm warning for your county. Ten minutes later you can hear the storm outside. At about 11:30 the lights in the kitchen go out, the radio goes dead, and your office computer turns off. Your facility does not have a back-up generator. The stove and oven are gas and remain on.

1. What do you do next?

According to your cellphone the time is now 12 noon. Residents have been gathered into the dining room by the CNAs. The manager of your facility called the utility company and learned that there are a lot of trees down within the service area. The company customer service representative politely promised that power will be restored to your facility as quickly as possible but could not say when that will be. Meanwhile the storm has not subsided. There are enough battery-operated lights in the dining room for residents to eat. Following lunch, the dietary staff gathers up the dirty dishes and wipes off the tables.

2. What priorities will you assign them for the afternoon?

By 1:30 staff has checked the temperatures of the meats and other time / temperature control for safety foods. Following temperature checks the cooler and freezer doors were shut and you instructed staff to keep them closed unless necessary. There has been no update on when power will be restored, and the storm has not let up. Staff shift change is at 2 pm.

3. What issues do you need to address to continue to ensure that your meals meet food safety standards?

Staff shift change went smoothly with only one call-in. The second shift workers chatted with first shift about the downed trees, which roads are blocked, and which parts of the city did not have functioning traffic lights on their drives into work. You review your cooler and freezer inventory against your menu and update supper to include as much time / temperature control for safety foods as possible. You print off a copy of your disaster menu with recipes and instruct staff to take inventory of your dry storage area. By comparing the inventory to your recipes, you determine that the facility currently has enough food to last at least three days on the disaster menu, even if the storm gets worse and supply deliveries become interrupted.

You report your findings to the building manager. The dietary staff is busily preparing supper in the kitchen. You instruct staff to check the temperature of all time / temperature control for safety foods and record the result. Staff is disposing of any foods from the refrigerator or freezer with a temperature above 41°F.

4. What are your concerns if power is not restored by morning?

Case Study Two: Tornado

You are the foodservice director for a 50-bed nursing home in the town of Midwest, Minnesota. You have a staff of 10 full time and part time foodservice workers. On a hot July evening Midwest experiences an F3 tornado which thankfully misses the nursing home but has snapped many power lines across town leaving the entire town without electricity. Since the nursing home is small, you do not have a backup generator. There are no plans to evacuate the facility since it did not sustain any damage and power is expected to be back up within 24-48 hours according to the electrical company.

1. What kind of disaster(s) is this (internal, external, technological)?
2. How will you keep potentially hazardous food safe? What will you need to discard? What will you be able to keep?
3. What kinds of foods can you safely serve residents?
4. What other effects could this disaster have on your foodservice facility?
5. You are expecting a delivery from your supplier the day after the disaster. How should you handle the delivery?
6. What will you need to do to recover from this disaster?

Case Study Three: Water Contamination

You are a 100-bed hospital with a small public cafeteria for hospital visitors in Yukon, Minnesota. You are currently at 50% capacity. The local health department has just announced that the city water supply has been compromised due to a break in one of the main water pipes. The city has issued a boil water alert.

1. What kind of disaster(s) is this?
2. What are some safe sources of drinking water?
3. How would you go about determining how much water to purchase?
4. What is the recommended process for boiling water to kill bacteria?
5. What foodservice equipment should not be used during this time?
6. What are some alternate sources of "fluids" other than bottled water?

Case Study Four: Pandemic

National news has recently reported the outbreak of the H5N7 pandemic influenza. You are the foodservice manager of a small assisted living facility in Rural, Illinois, one-hour away from Chicago. As far as you know, no outbreak has been announced in your town. Your facility has established a pandemic influenza plan which includes a "lock down" on the establishment. This means that no unauthorized visitors will be allowed into the establishment. Your administrator expects you to develop policies with your staff to uphold the plan.

1. What type of disaster is this (short term, long term, water supply disruption)? Explain.
2. What are some personal hygiene policies you will need to discuss with your staff? Foodservice delivery personnel?
3. If staff members are affected by the pandemic influenza, what would be some ways that they could communicate with staff at the assisted living facility?
4. If you are short-handed what are some other possible sources of staff?
5. Name some examples of food supplies that you may want to stockpile in case of delayed deliveries.

2021 Nursing Home Emergency Preparedness Plan Survey

EVACUATION HOST SITE COVER SHEET

TYPE or CLEARLY PRINT and attach a cover page to each evacuation host site agreement, evacuation host site contract, or verification of evacuation host site. Complete this cover page for each facility named in the document.

Example: If there are 5 evacuation host site(s) contracts there should be 5 coversheets, one attached to the front of each signed and dated contract. If there are 5 evacuation host sites named in one agreement there should be 5 coversheets attached to that agreement.

Ongoing evacuation host site contracts will need to be verified annually and signed by all parties.

Name of EVACUATION HOST SITE:

Plaquemine Plaza Holdings, LLC.

Contact Person: Bob G. Dean, Jr.

Phone # of Contact Person: 1-225-343-9152

FAX#:

E-Mail Address:

Physical Address of evacuation site:

24320 Ferdinand Street

Plaquemine, LA. 70769

Time Lines or Restrictions: H-Hour or the number of hours needed.

What is the latest time that evacuation host site can be contacted according to agreement?

72 Hours

How long will it take to reach the evacuation host site facility?

1 hr and 42 min

How long will it take to unload residents and supplies from the transportation?

2 hours

Type of evacuation host site:

Is it the ☒ PRIMARY or ☐ ALTERNATE site?

Is it a ☐ LICENSED Nursing Home or ☒ NON-LICENSED FACILITY?

Total number of residents and staff that facility is willing to host: 138

Is the evacuation host site air conditioned? ☒ Yes, air conditioned ☐ Not air conditioned

Date of agreement/contract/verification: 1/1/2021

Date agreement/contract ends: Annually

2021 Nursing Home Emergency Preparedness Plan Survey

Multiple Primary Host Site(s) - print then complete the following two pages for each additional site.

I. Provide the following information: (list primary sites in this area, if multiple sites list each)

- i. What is the name of each primary site(s)?
Masion De'Ville of Houma
- ii. What is the physical address of each host site(s)?
107 South Hollywood Road
Houma, La. 70360
- iii. What is the distance to each host site(s)?
55.6
- iv. Is the host site(s) located outside of the parishes identified as hurricane risk areas?
Yes
- v. Does plan include map of route to be taken and written directions to host site?
☒ Yes. If No - obtain and mark Yes.
- vi. Who is the contact person at each primary host site(s)?
Name: William Daigre, LNFA
Phone: 1-504-421-0144
Email: _____
Fax: _____
- vii. What is the capacity (number of residents allowed) of each primary host site(s)?
 - Capacity that will be allowed at each site:
TBD
 - Is this adequate for all evacuating residents?
☒ Yes. If No - obtain and mark Yes.
- viii. Is the primary site a currently licensed nursing home(s)?
☒ Yes, go to- B.4.b) x.
☐ No, go to- B.4.b) ix.
- ix. If primary host site is **not** a licensed nursing home provide a description of host site(s) including;
 - What type of facility it is?

 - What is host site currently being used for?

 - Is the square footage/area of the space to be used adequate for the residents?
☒ Yes
☐ No
 - What is the age of the host facility(s)?

 - Is host facility(s) air conditioned?
☒ Yes
☐ No

2021 Nursing Home Emergency Preparedness Plan Survey

AUTHENTICATION

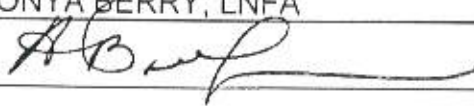

Facility Name (Print):

Park Place Healthcare, LLC.

The Emergency Preparedness Plan for the above named facility provides the emergency operational plans and procedures that this facility will follow during emergency events. The current plan supersedes any previous emergency preparedness plans promulgated by this facility for this purpose. This plan was developed to provide for the health, safety, and wellbeing of all residents. I (current/acting administrator) have read and agree that the information used and included in the facility's emergency preparedness plan is current, valid, and reliable.
