The CANS school module, which evaluates school functioning, is regularly applied when children and youth initially enroll in CSOC, then every 180 days after enrollment and at discharge. This offers a more consistent and objective picture of a youth’s school functioning over time. The following results were documented:

- 65.38% showed improved school functioning
- 57.98% showed improved school attendance
- 59.12% showed improved school behavior
