

Outcomes: Systems Level and CSoC-Specific							
Outcome	Report	Goal of Monitoring	Specific Metrics	Reporting Period			
				7/1/18-9/30/18	10/1/18-12/31/18	1/1/19-3/31/19	4/1/19-6/30/19
Reduce OOH Placements	CSoC Youth: Children in Restrictive Settings (CSoC report QM3)	Monitor over time for functioning of CSoC, stable or reduced numbers	Percent of <u>CSoC members</u> (under 22) who were served in a psychiatric hospital during the quarter	4.41%	5.00%	4.99%	3.93%
	CSoC Youth: ALOS for children in restrictive settings (CSoC report QM3)	Monitor over time for functioning of CSoC, stable or reduced numbers	Average Length of Stay (ALOS) for <u>CSoC members</u> (under 22) in psychiatric hospitalization, in days.	7.51	6.55	7.13	7.10
	CSoC Youth: HEDIS Follow up after discharge from hospitalization (CSoC report FUH)	Monitor over time for functioning of CSoC, stable or reduced numbers	Percent of CSoC members under 21 discharging from psychiatric hospitalization who receive a follow-up appointment in 7 days. <i>Note: HEDIS includes waiver service CSoC ILSB only; Modified HEDIS adds waiver services CSoC YST, PST, STR.</i>	1/1/2018 to 12/01/2018 (Reported Annually)			
			Percent of CSoC members under 21 discharging from psychiatric hospitalization who receive a follow-up appointment in 30 days. <i>Note: HEDIS includes waiver service CSoC ILSB only; Modified HEDIS adds waiver services CSoC YST, PST, STR.</i>	HEDIS: 52.37% Modified HEDIS: 65.46% Run Date: 1/21/2019			
					HEDIS: 71.31% Modified HEDIS: 83.29% Run Date: 1/21/2019		
				7/1/18-9/30/18	10/1/18-12/31/18	1/1/19-3/31/19	4/1/19-6/30/19
	CSoC Youth: Living Situation at Discharge (CSoC report QM09)	Direct measure of the ability of CSoC to maintain youth in the home and community and avoid out of home	Percent of youth whose living situation at discharge from CSoC is a family home.	92.09%	94.59%	92.21%	94.77%
Improve Outcomes	CSoC Youth: CANS Outcomes (CSoC report QM8)	Direct measure of the ability of CSoC to improve youths' clinical functioning	Average decrease (intake to discharge) on standardized tool measuring clinical functioning (CANS)	-17.02	-16.08	-17.16	-17.23
			Percent of youth showing improved clinical functioning (from intake to discharge) on standardized tool (CANS)	76.10%	75.75%	76.79%	75.00%
			<i>Compliance Percentage (% youth with intake and discharge CANS so improvement can be calculated)</i>	94.27%	96.88%	95.92%	95.78%
	CSoC Youth: Improved School Functioning (CSoC report QM10)	Direct measure of the ability of CSoC to improve youths' school functioning	Percent of youth showing improved school functioning (intake to discharge) on standardized tool (CANS: School Module)	71.43%	71.71%	68.75%	65.21%
