

2015 Provider Satisfaction Report

Louisiana Healthcare Connections

Project Number(s): 9106582

1965 Evergreen Boulevard Suite 100, Duluth, Georgia 30096

Introduction

Your Sales Executive is Steve Brightwell (678-689-0286), and your Account Project Manager is Adam Plato (770-978-3173 ext. 1325). Should you have any questions or comments regarding any aspect of the survey or reporting process, please feel free to call either your Sales Executive or Account Project Manager.

Many organizations conduct the SPHA Provider Satisfaction Survey to monitor provider satisfaction levels and to respond to one or more NCQA Health Plan Accreditation Standards. The 2015 SPHA Provider Satisfaction Survey template was designed to support the following NCQA standards.

- ✓ NCQA Standard UM 11 (Experience with the Utilization Management Process) currently directs managed care organizations, at least annually, to assess the practitioner's experience with the UM process. Organizations are expected to collect and analyze data and provider feedback in an effort to drive quality improvements.
- ✓ NCQA Standard QI 10 (Continuity and Coordination of Medical Care) looks to managed care organizations to gather information, at least annually, to assess and identify opportunities to improve coordination of medical care across its delivery system. This includes conducting quantitative analysis of data and feedback.

The Provider Satisfaction Survey targets providers to measure their satisfaction with Louisiana Healthcare Connections. For comparison purposes, results are presented by Summary Rates. The Summary Rate is the sum of the proportion of respondents who selected the most positive response options ('Well above average' or 'Somewhat above average;' 'Yes;' and 'Completely satisfied' or 'Somewhat satisfied') for the attribute.

Composite scores are calculated by taking the average Summary Rates of the attributes in the specified section. The following composites are included in the Louisiana Healthcare Connections survey:

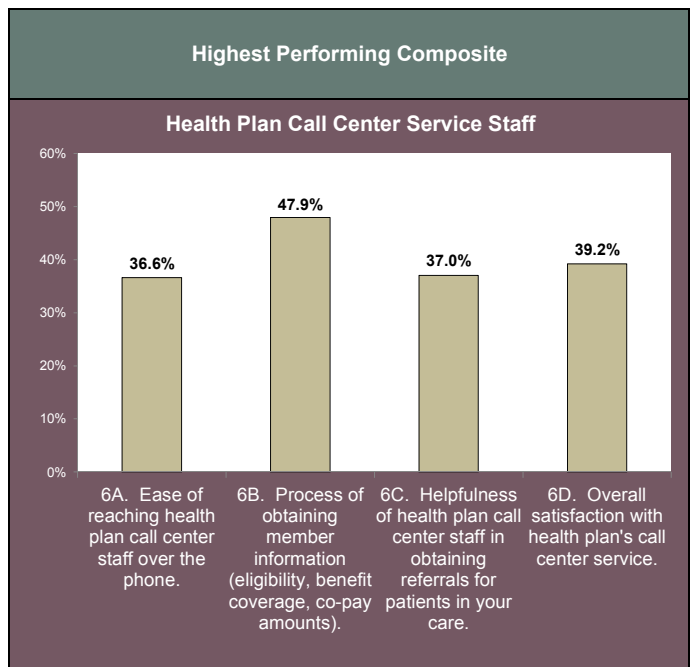

- Overall Satisfaction
- All Other Plans (Comparative Rating)
- Finance Issues
- Utilization and Quality Management
- Network/Coordination of Care
- Pharmacy
- Health Plan Call Center Service Staff
- Provider Relations

Chart 1 highlights key results from Louisiana Healthcare Connections' Provider Satisfaction Survey.

Chart 1

Provider Satisfaction Report Highlights

Highest and Lowest Performing Questions	2015		2015 Mean Scores**		2014 SPHA B.o.B.***	
	n*	SRS*	Louisiana	SPHA B.o.B.	Medicaid	Aggregate
Highest Scoring Questions						
7B. Provider Relations representative's ability to answer questions and resolve problems.	108	50.0%	3.65	3.69	54.2%	53.9%
6B. Process of obtaining member information (eligibility, benefit coverage, co-pay amounts).	217	47.9%	3.66	3.54	44.1%	45.0%
6D. Overall satisfaction with health plan's call center service.	217	39.2%	3.47	3.44	41.0%	43.2%
Lowest Scoring Questions						
4F. The frequency of feedback/reports from Behavioral Health Clinicians for patients in your care.	146	17.1%	3.10	NA	NA	NA
5C. Variety of branded drugs on the formulary.	200	16.5%	2.89	3.00	19.7%	22.3%
4E. The timeliness of feedback/reports from Behavioral Health Clinicians for patients in your care.	152	15.1%	3.05	NA	NA	NA

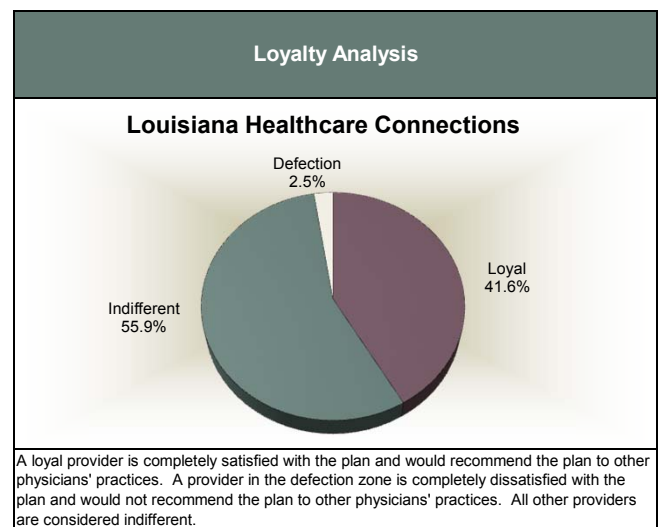

Priority Matrix

Composite	Correlation****	Percentile
Strength		
No composites are considered Strengths.		
Top Priority		
Provider Relations	0.600	39th
Finance Issues	0.557	62nd
Health Plan Call Center Service Staff	0.546	45th
Pharmacy	0.537	40th
Utilization and Quality Management	0.529	46th

Strength: Composite is highly correlated with overall satisfaction and ranks at or above the 75th percentile when compared to the SPHA Book of Business benchmark.

Top Priority: Composite is highly correlated with overall satisfaction and ranks below the 75th percentile when compared to the SPHA Book of Business benchmark.

* The Valid n represents the number of responses to the question. Summary Rate Scores (SRS) represent the top two response percentages ("Well above average" and "Somewhat above average;" "Yes;" and "Completely satisfied" and "Somewhat satisfied").

** Mean scores are the average of all responses. SPHA B.o.B. is represented by the Medicaid Book of Business.

*** SPH Analytics' 2014 Medicaid Book of Business benchmark consists of data from 23 plans representing 12193 respondents, while the Aggregate Book of Business benchmark consists of data from 33 plans representing 14423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

**** A correlation coefficient approaching a value of 1.000 represents an increasing association of the composite with overall satisfaction.

Note: Significance Testing - Cells highlighted in red denote current year plan percentage is significantly lower when compared to trend or benchmark data; cells highlighted in green denote current year plan percentage is significantly higher when compared to trend or benchmark data; no shading denotes that there was no significant difference between the percentages, there is no comparable data, or that there was insufficient sample size to conduct the statistical test. All significance testing is performed at the 95% significance level.

1. Executive Summary

SPH Analytics (SPHA), a National Committee for Quality Assurance (NCQA) Certified Survey Vendor, was selected by Louisiana Healthcare Connections to conduct its 2015 Provider Satisfaction Survey. Information obtained from these surveys allows plans to measure how well they are meeting their providers' expectations and needs. Based on the data collected, this report summarizes the results and assists in identifying plan strengths and opportunities.

SPHA followed a one-wave mail and Internet¹ with phone follow-up survey methodology to administer the Provider Satisfaction Survey from September to October of 2015. A total of 272 surveys were completed (89 mail, 6 Internet, and 177 phone), yielding a response rate of 7.0% for the mail/Internet data component and 28.5% for the phone data component. Please refer to the *Methodology* (Section 2) for further detail on the calculation of response rates.

The chart below presents 2015 Summary Rates² for Louisiana Healthcare Connections' composites and key attributes. Data and significance testing for trend years and the 2014 SPH Analytics Medicaid Book of Business are also provided for comparison.

Composites/Attributes	2015 Summary Rates	2014 Summary Rates	*	2013 Summary Rates	*	2014 SPHA Medicaid BoB Summary Rates ³	**
Overall Satisfaction with Louisiana Healthcare Connections	76.0%	60.7%	↑	57.8%	↑	69.8%	↑
All Other Plans (Comparative Rating)	34.9%	21.0%	↑	23.2%	↑	36.4%	
Finance Issues	35.2%	20.5%	↑	29.6%		31.5%	
Utilization and Quality Management	30.6%	19.0%		20.4%	↑	33.9%	
Network/Coordination of Care	25.2%	9.8%		17.8%		29.7%	
Pharmacy	17.8%	16.1%		16.4%		22.2%	
Health Plan Call Center Service Staff	40.2%	25.6%	↑	27.2%	↑	40.8%	
Provider Relations	37.6%	27.2%		29.5%		41.6%	
Recommend to Other Physicians' Practices	88.0%	88.7%		72.3%	↑	83.3%	

*↓↑ Indicates a significant difference when compared to previous years.

**↓↑ Indicates a significant difference when compared to the 2014 SPH Analytics Medicaid Book of Business.

¹ The mail wave included the web address, along with a user ID and password, to complete the survey online.

² The Summary Rate represents the most favorable response percentage(s).

³ SPH Analytics' 2014 Medicaid Book of Business consists of data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

Presentation of Results

- Summary Rate is the proportion of respondents who selected the most positive response options ('Well above average' or 'Somewhat above average,' 'Yes,' and 'Completely satisfied' or 'Somewhat satisfied') for the attribute.
- Attributes are the individual questions that focus on specific characteristics of the health plan.
- Composites are calculated by taking the average of the Summary Rates of the attributes in the specified section.
- 2014 SPH Analytics Medicaid Book of Business consists of data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.
- 2014 SPH Analytics Aggregate Book of Business consists of data from 33 plans representing 14,423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

2015 Provider Satisfaction Composites

All Other Plans (Comparative Rating)

This item asks the respondent to rate Louisiana Healthcare Connections compared to all other plans with which the provider contracts.

Finance Issues

This composite addresses the consistency of reimbursement fees with contract rates, accuracy and timeliness of claims processing, and resolution of claims payment problems or disputes.

Utilization and Quality Management

This composite measures access to knowledgeable Utilization Management staff, procedures and timeliness for obtaining pre-certification/referral/authorization information, the health plan's facilitation/support of appropriate clinical care for patients, access to Case/Care Managers from this health plan, and the degree to which the plan covers and encourages preventive care and wellness. Additionally, the survey tool includes two custom questions within this composite that allow providers to evaluate the extent to which UM staff share review criteria and reasons for adverse determinations and the consistency of review decisions. The custom questions (3G and 3H) are not included in the composite score calculations as they do not have a benchmark in the SPHA Book of Business.

Network/Coordination of Care

This composite addresses the number and quality of specialists, as well as the timeliness of feedback/reports from specialists, in this health plan's provider network. Additionally, the survey tool includes three custom questions within this composite that allow providers to evaluate the frequency of feedback and reports from specialists and Behavioral Health Clinicians for patients in their care and the timeliness of feedback and reports from Behavioral Health Clinicians for patients in their care. The custom questions (4D through 4F) are not included in the composite score calculations as they do not have a benchmark in the SPHA Book of Business.

Pharmacy

This composite assesses the consistency of the formulary over time, the extent to which the formulary reflects current standards of care, the variety of branded drugs on the formulary, the ease of prescribing preferred medications within formulary guidelines, and the availability of comparable drugs to substitute those not included in the formulary.

Health Plan Call Center Service Staff

This composite measures the ease of reaching health plan call center staff over the phone, the process of obtaining member information (eligibility, benefit coverage, co-pay amounts), the helpfulness of health plan call center staff in obtaining referrals for patients in their care, and overall satisfaction with the health plan's call center service.

Provider Relations

This composite addresses the quality of the provider orientation process and of written communications, policy bulletins, and manuals. If a Provider Relations representative from the health plan is assigned to the practice, providers are also asked about the representative's ability to answer questions and resolve problems.

Overall Satisfaction

Respondents are asked if they would recommend Louisiana Healthcare Connections to other physicians' practices. They are also asked to rate their overall satisfaction with each of the following health plans:

- Louisiana Healthcare Connections
- Amerigroup
- Aetna Better Health of Louisiana
- AmeriHealth Caritas (formerly L.A. Care)
- United Healthcare Community Plan

One open-ended question allows respondents to comment on what Louisiana Healthcare Connections can do to improve its service to their organization.

Two final questions asked if the respondent would like Louisiana Healthcare Connections to follow-up with them regarding their open-ended comment and if their practice has access to telephonic interpretation for LHCC patients that have limited English proficiency.

2. Methodology

SPHA utilized a one-wave mail and Internet⁴ with phone follow-up survey methodology to administer the Provider Satisfaction Survey:

Survey Administration Tasks	Date
Questionnaire, including the web address to complete the survey online, is sent to each provider's office.	9/3/2015
Telephone calls by CATI (computer-assisted telephone interviews) are conducted for non-respondents.	9/24/2015
Data collection ends.	10/26/2015

Sampling Methodology

Louisiana Healthcare Connections provided SPHA with a database consisting of 5,093 Louisiana Healthcare Connections providers. SPHA then cleaned the database by removing any records with duplicate NPIs. From the database of unique providers, 1,500 providers were pulled according to the stratification instructions given by Louisiana Healthcare Connections. A cap of 5 providers from primary care provider addresses and 2 from specialists was implemented unless stratification quotas were not met. A total of 272 mail, Internet, and phone surveys were completed.

Response Rate

Louisiana Healthcare Connections' sample size is 1,500. SPH Analytics collected 272 surveys (89 mail, 6 Internet, and 177 phone) from the eligible provider population from September to October of 2015. After adjusting for ineligible members, your mail/Internet survey response rate is 7.0%, and your phone survey response rate is 28.5%. A response rate is only calculated for those providers who are eligible and able to respond.

The mail/Internet survey was distributed to a sample of 1,500 providers, and a total of 135 surveys were considered ineligible. Mail surveys are considered ineligible if returned for the following reasons: bad address with no forwarding information, provider is deceased, or if the provider no longer participates with the health plan. The chart on the following page shows the number of ineligible mail surveys for these disposition categories.

At the pre-determined date, follow-up phone calls were made to office managers of non-respondent practices by means of the CATI system. As a result, 870 office managers were included in the sample for the phone follow-up data collection component. From this sample of office managers, 177 surveys were completed. Phone surveys are considered ineligible if they meet one of the disposition categories listed in the table on the following page.

⁴ The mail wave included the web address, along with a user ID and password, to complete the survey online.

Survey Methodology	Ineligible Disposition	N
Mail/Internet Component	Bad Address with no forwarding information	135
	Deceased, Not Eligible	0
TOTAL MAIL/INTERNET INELIGIBLE SURVEYS		135

Survey Methodology	Ineligible Disposition	N
Phone Component	Deceased	0
	No Eligible Respondent	100
	Wrong Number	91
	Fax/Pager/Modem/Data Line	9
	Not in Service	0
	Disconnected	43
	Number Changed	7
	Cell Phone	0
TOTAL PHONE INELIGIBLE SURVEYS		250

To calculate the response rate, ineligible surveys are subtracted from the sample size:

$$\frac{\text{Completed surveys}}{\text{Sample size} - \text{Ineligible surveys}} = \text{Response rate}$$

Using the final figures from Louisiana Healthcare Connections' Provider Satisfaction Survey, the numerators and denominators used to compute your response rates are as follows:

Mail/Internet Component

$$\frac{89 \text{ (mail)} + 6 \text{ (Internet)}}{1,500 \text{ (sample)} - 135 \text{ (ineligible)}} = 7.0\%$$

Phone Component

$$\frac{177 \text{ (phone)}}{870 \text{ (sample)} - 250 \text{ (ineligible)}} = 28.5\%$$

Profile of Survey Respondents

The demographic characteristics of surveyed respondents should be representative of your provider population. Page 2A illustrates the percentage of respondents by demographic category within your respondent group:

- Area of Medicine (A)
- Physicians in Practice (B)
- Years in Practice (C)
- Portion of Managed Care Volume Represented by Health Plan (D)
- Survey Respondent (E)
- Insurance Participation (G)

Page 2B provides the demographic proportions for Louisiana Healthcare Connections compared to trend data while page 2C provides the percentage of respondents by demographic category and is compared to the 2014 SPH Analytics Medicaid Book of Business. Page 2C also includes the overall satisfaction (8B) Summary Rate Score for both Louisiana Healthcare Connections and the 2014 SPH Analytics Medicaid Book of Business for each demographic category.

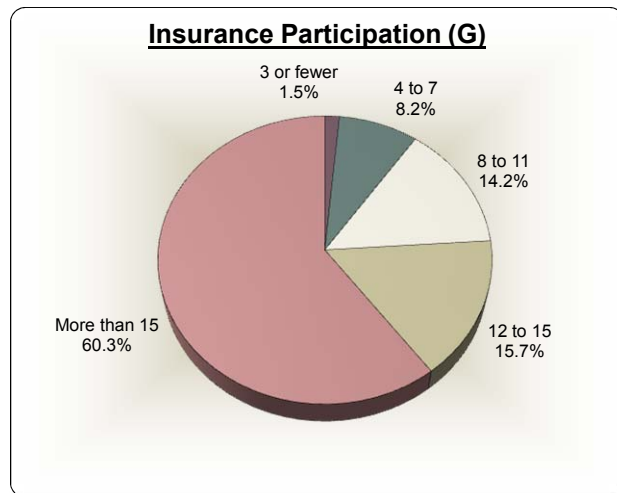

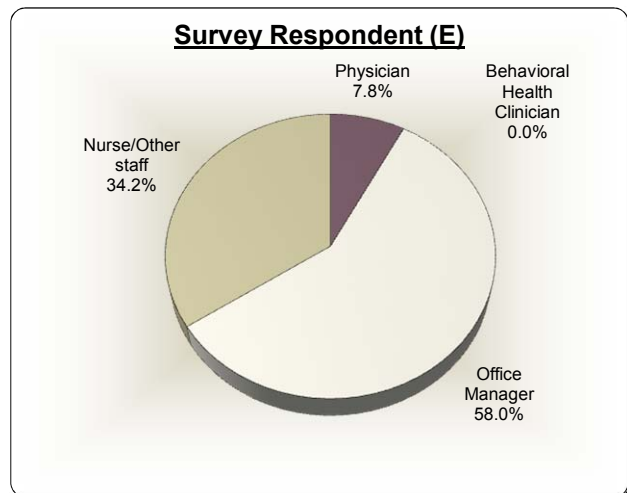

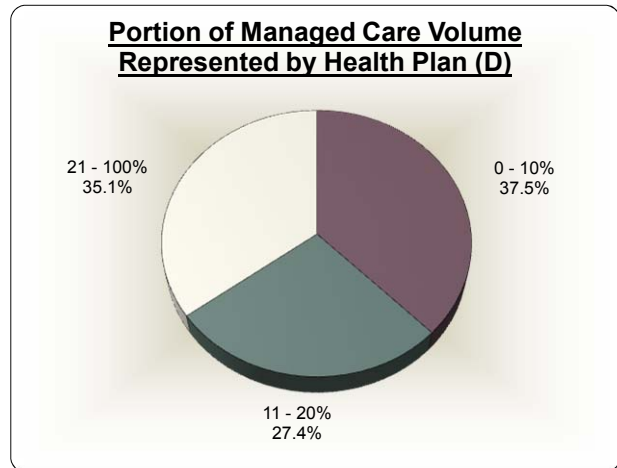

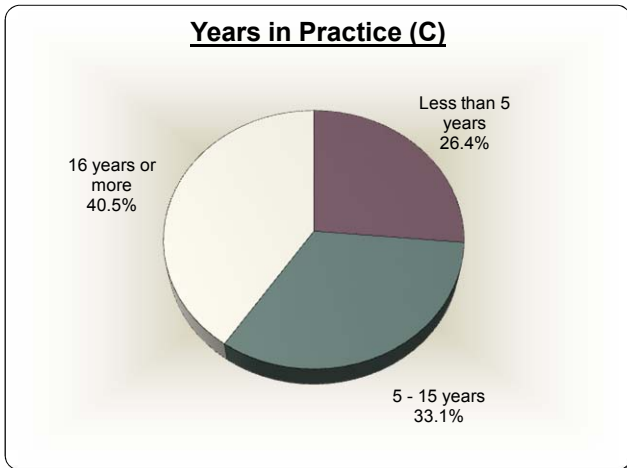

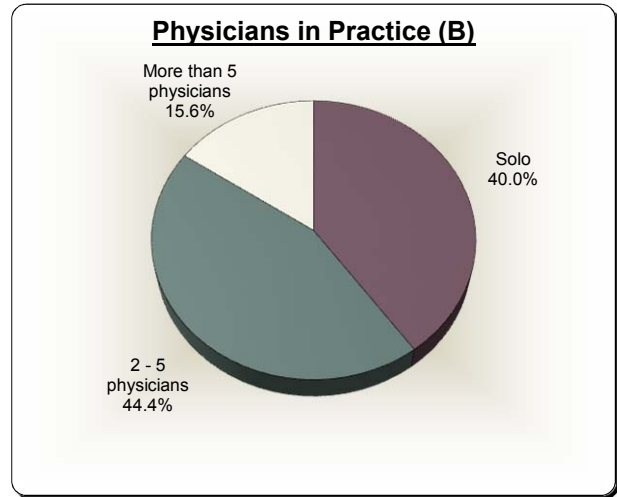

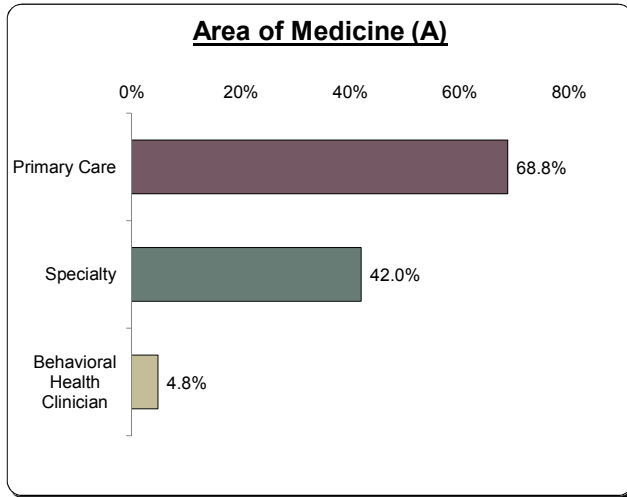

A *z-test* determines significant differences between the percentages, which are highlighted to help identify how your plan's population compares to the benchmark. See the *Technical Notes* for more information on this topic.

** Significance Testing - ↓ denotes plan percentage is significantly lower when compared to benchmark; ↑ denotes plan percentage is significantly higher when compared to benchmark; ↔ denotes that there was no significant difference between the percentages; — denotes that there was insufficient sample size to conduct the statistical test or there is no benchmark. All significance testing is performed at the 95% significance level.

Note 1: The sum of responses for Area of Medicine may be greater than 100% as respondents are able to choose multiple response options.

Note 2: There were no survey respondents who identified as Behavioral Health Clinician (E). As such, NA is displayed.

3. Summary of Trend and Benchmark Comparisons

Questions are combined into composite categories comprising a particular service area managed by your plan. These composites, the questions that make up the composites (attributes), and rating questions are shown on the following benchmark pages.

- Page 3A Summary of Benchmark Comparisons
Displays a comparison of Louisiana Healthcare Connections' Summary Rates to trend data and the Summary Rates of the 2014 SPH Analytics Medicaid and Aggregate Books of Business. Significant differences are highlighted.
- Page 3B Trend Comparisons – Graphical Representation
Graphical presentation comparing Louisiana Healthcare Connections' 2015 composite Summary Rates to trend results.
- Page 3C Benchmark Comparisons – Percentiles
Displays a comparison of Louisiana Healthcare Connections' Summary Rates to the Summary Rate Percentiles of the 2014 SPH Analytics Medicaid Book of Business Percentiles. Attributes at or above the 75th percentile are shaded green, attributes at or above the 50th percentile but below the 75th percentile are shaded yellow, and attributes below the 25th percentile are shaded red. Attributes at or above the 25th percentile but below the 50th percentile and those attributes without a comparable benchmark are not shaded.
- Page 3D Benchmark Comparisons – Physician and Office Manager Respondents
The chart on page 3D compares Louisiana Healthcare Connections' Summary Rates from Physician and Office Manager respondents as defined by question E, *'Please mark who is completing this survey'* (response options: Physician, Behavioral Health Clinician, Office Manager, Nurse, Other staff) to the Summary Rates of Physician and Office Manager respondents from the 2014 SPH Analytics Medicaid Respondent-Level Benchmark. Significant differences are highlighted.
- Page 3E Benchmark Comparisons – Primary Care and Specialty Respondents
The chart on page 3E compares Louisiana Healthcare Connections' Summary Rates from respondents in the Primary Care and Specialty areas of medicine as defined by question A, *'Please indicate your area of medicine'* (response options: Primary Care, Specialty, and Behavioral Health Clinician) to the Summary Rates of Primary Care and Specialty area of medicine respondents from the 2014 SPH Analytics Medicaid Respondent-Level Benchmark. Significant differences are highlighted.

A brief description of each benchmark is included in the below table:

Benchmark	Definition	Contains Data From
2014 SPH Analytics Medicaid Book of Business	Contains data from all eligible Medicaid Provider Satisfaction surveys for which SPHA collected data. Calculated on the plan level.	<ul style="list-style-type: none"> • 23 plans
2014 SPH Analytics Medicaid Respondent-Level Benchmark	Contains data from all eligible Medicaid Provider Satisfaction surveys for which SPHA collected data. Calculated on the respondent level.	<ul style="list-style-type: none"> • 12,193 respondents
2014 SPH Analytics Aggregate Book of Business	Contains data from all eligible Aggregate Provider Satisfaction surveys for which SPHA collected data. Calculated on the plan level.	<ul style="list-style-type: none"> • 33 plans • 14,423 respondents

* Summary Rate Scores (SRS) represent the most favorable response option(s).

** The 2014 SPHA Medicaid Book of Business Benchmark consists of Primary Care Physicians, Specialists, and Behavioral Health Clinicians. These benchmark comparisons are based on respondent-level results. Please see the Technical Notes for further detail.

Note 1: Significance Testing - Cells highlighted in red denote current year plan percentage is significantly lower when compared to benchmark data; Cells highlighted in green denote current year plan percentage is significantly higher when compared to benchmark data; No shading denotes that there was no significant difference between the percentages, there is no benchmark, or that there was insufficient sample size to conduct the statistical test. All significance testing is performed at the 95% significance level.

Note 2: The Overall Satisfaction Summary Rate includes only 8B. It does not include 8A or 8C through 8F.

Note 3: The Provider Relations composite is the average of 7B through 7D. It does not include 7A.

Note 4: The Utilization and Quality Management composite is the average of 3A through 3F and does not include custom questions 3G or 3H. The Network/Coordination of Care composite is the average of 4A through 4C and does not include custom questions 4D through 4F.

4. *Composite Analyses*

The *Composite Analyses* section provides in-depth examination of the following composite features:

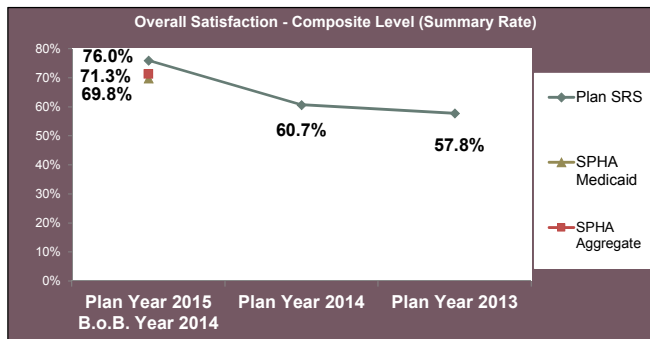

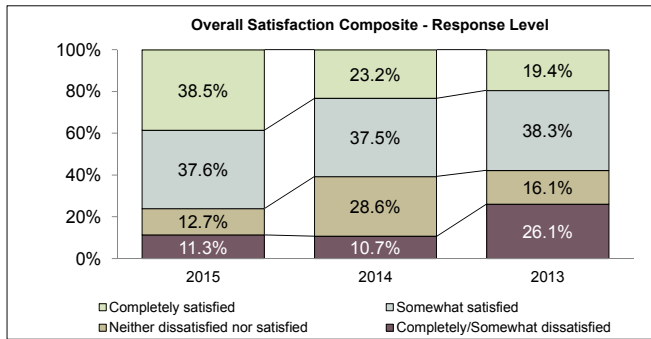

- ☑ Response Level Percentages – graphical display of composite responses. This graph provides a breakdown of the composite response distributions for current and trend data, namely, ‘Well above average,’ ‘Somewhat above average,’ ‘Average,’ and ‘Somewhat/Well below average’ for all composites except for overall satisfaction (8B), which is broken down by ‘Completely satisfied,’ ‘Somewhat satisfied,’ ‘Neither dissatisfied nor satisfied,’ and ‘Completely/Somewhat dissatisfied.’
- ☑ Composite Level (Summary Rate) – graphical display of the composite and benchmark Summary Rate Scores. This graph plots where the composite Summary Rate Score falls in relation to trend data and the 2014 Medicaid and Aggregate benchmark Summary Rate Scores.
- ☑ Top Box Scores – displays the top response percentages. Top Box Scores and valid n’s for 2015 are compared to trend data and the 2014 Medicaid and Aggregate benchmark Top Box Scores.
- ☑ Summary Rate Scores – displays the top two response percentages. Summary Rate Scores and valid n’s for 2015 are compared to trend data and the 2014 Medicaid and Aggregate benchmark Summary Rate Scores.
- ☑ Summary Rate and Top Box Scores for 2015 are compared to the 2014 SPH Analytics Medicaid Book of Business percentile scores. Percentile threshold rankings are displayed for the average, 25th percentile, 50th percentile, 75th percentile, and 90th percentile. Plan scores are displayed as they emerge along the percentile continuum with an explanation of findings.

* Top Box Scores represent the top response percentage ("Well above average"). Summary Rate Scores represent the top two response percentages ("Well above average" and "Somewhat above average").

** SPH Analytics' 2014 Medicaid Book of Business consists of data from 23 plans representing 12193 respondents, while the Aggregate Book of Business consists of data from 33 plans representing 14423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine. See Technical Notes for more information.

Note 1: Significance Testing - Cells highlighted in red denote current year plan percentage is significantly lower when compared to trend or benchmark data; cells highlighted in green denote current year plan percentage is significantly higher when compared to trend or benchmark data; no shading denotes that there was no significant difference between the percentages or that there was insufficient sample size to conduct the statistical test. All significance testing is performed at the 95% significance level.

Note 2: The Network/Coordination of Care composite is the average of 4A through 4C. It does not include custom questions 4D through 4F. As such, the Top Box and Summary Rate percentile graphs do not include the custom questions as they do not have a benchmark in the SPHA Book of Business.

Your 2015 Top Box Summary Rate for the Provider Relations composite is 19.3%, which is not significantly different from SPHA's 2014 Medicaid Book of Business Top Box Summary Rate Score of 21.6%.

Your 2015 Summary Rate for the Provider Relations composite is 37.6%, which is not significantly different from SPHA's 2014 Medicaid Book of Business Summary Rate Score of 41.6%.

* Top Box Scores represent the top response percentage ("Yes;" "Well above average"). Summary Rate Scores represent the top two response percentages ("Yes;" "Well above average" and "Somewhat above average").

** SPH Analytics' 2014 Medicaid Book of Business consists of data from 23 plans representing 12193 respondents, while the Aggregate Book of Business consists of data from 33 plans representing 14423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine. See Technical Notes for more information.

Note 1: Significance Testing - Cells highlighted in red denote current year plan percentage is significantly lower when compared to trend or benchmark data; cells highlighted in green denote current year plan percentage is significantly higher when compared to trend or benchmark data; no shading denotes that there was no significant difference between the percentages or that there was insufficient sample size to conduct the statistical test. All significance testing is performed at the 95% significance level.

Note 2: The Provider Relations composite is the average of 7B through 7D. It does not include 7A.

5. Global Proportions

Pages 5A through 5C provide a graphical presentation of the percentage of providers who chose each response option.⁵ The charts present the composite percentages, as well as the percentages for each attribute that make up the composite.

Global proportions are a useful tool to understand a provider's satisfaction, dissatisfaction, or neutrality when they rate a particular service or service area. Summary Rate Scores alone are not as complete an indication of performance given that they do not show a distribution of responses across all response categories.

	Summary Rate Score			
	Well above average	Somewhat above average	Average	Somewhat/Well below average
Case 1	65%	10%	20%	5%
Case 2	15%	60%	15%	10%

The above chart demonstrates two cases in which a high Summary Rate becomes less revealing. In Case 1, a relatively large percentage of providers are found to be very satisfied ('Well above average'). In Case 2, a large proportion of the Summary Rate responses are 'Somewhat above average,' rather than the more favorable response of 'Well above average.' When reviewing cases one and two, the first case shows a higher average rating than the second, even though the Summary Rates are equal (both 75%).

Charts 5A – 5C

⁵ Response distributions are also provided in the Question Summaries, which are located in section 15, *Appendix A*.

6. Segmentation Analyses

The database provided by Louisiana Healthcare Connections includes demographic information, and the Provider Satisfaction Survey asks demographic questions about the respondent’s medical practice, which facilitates a market segmentation of the providers. The charts beginning on page 6A present Summary Rate Scores organized across the following demographics:

- Area of Medicine (A)
- Physicians in Practice (B)
- Years in Practice (C)
- Portion of Managed Care Volume Represented by Health Plan (D)
- Survey Respondent (E)
- Preferred Communication (F)
- Insurance Participation (G)
- Survey Methodology

The percentages represent the Summary Rate for each segment of the demographic category. For example, in the table below, the Summary Rate for 8B, ‘Please rate your overall satisfaction with Louisiana Healthcare Connections,’ is the percentage of respondents who selected ‘Completely satisfied’ or ‘Somewhat satisfied.’

The interpretation of this example would be, “Of the respondents who have been in practice less than five years, 80.0% are ‘Completely satisfied’ or ‘Somewhat satisfied’ with Louisiana Healthcare Connections, while 79.2% of respondents who have been in practice five to 15 years and 69.8% of respondents who have been in practice 16 years or more are ‘Completely satisfied’ or ‘Somewhat satisfied’ with Louisiana Healthcare Connections.”

Years in Practice	Less than 5 years	5 – 15 years	16 years or more
8B. Please rate your overall satisfaction with Louisiana Healthcare Connections.	80.0%	79.2%	69.8%

Results on the following pages are provided for individual attributes and for each composite. Caution is recommended when making comparisons between segments with a small valid n (less than 30), as the results may not be representative of the population.

* Range is the difference between Summary Rates shown. Due to the small sample size of Physician respondents, this segment is excluded from range calculations.

** Valid n refers to the total number of respondents answering the item within the subgroup under the column heading.

Note 1: The Overall Satisfaction Summary Rate includes only 8B. It does not include 8A or 8C through 8F.

Note 2: The Provider Relations composite is the average of 7B through 7D. It does not include 7A.

Note 3: The Utilization and Quality Management composite is the average of 3A through 3F and does not include custom questions 3G or 3H. The Network/Coordination of Care composite is the average of 4A through 4C and does not include custom questions 4D through 4F.

Note 4: There were no respondents in the Behavioral Health Clinician segment. As such, this segment is excluded from this analysis.

7C. Quality of provider orientation process.	2	0.0%	17	35.3%	24	45.8%	25	32.0%	91	28.6%	17.3%
7D. Quality of written communications, policy bulletins, and manuals.	2	0.0%	18	44.4%	23	39.1%	27	29.6%	117	29.1%	10.1%

* Range is the difference between Summary Rates shown. Due to the small sample size of respondents with 7 or fewer, these segments are excluded from range calculations.

** Valid n refers to the total number of respondents answering the item within the subgroup under the column heading.

Note 1: The Overall Satisfaction Summary Rate includes only 8B. It does not include 8A or 8C through 8F.

Note 2: The Provider Relations composite is the average of 7B through 7D. It does not include 7A.

Note 3: The Utilization and Quality Management composite is the average of 3A through 3F and does not include custom questions 3G or 3H. The Network/Coordination of Care composite is the average of 4A through 4C and does not include custom questions 4D through 4F.

* Range is the difference between Summary Rates shown. Due to the small sample size of Internet respondents, this segment is excluded from range calculations.

** Valid n refers to the total number of respondents answering the item within the subgroup under the column heading.

Note 1: The Overall Satisfaction Summary Rate includes only 8B. It does not include 8A or 8C through 8F.

Note 2: The Provider Relations composite is the average of 7B through 7D. It does not include 7A.

Note 3: The Utilization and Quality Management composite is the average of 3A through 3F and does not include custom questions 3G or 3H. The Network/Coordination of Care composite is the average of 4A through 4C and does not include custom questions 4D through 4F.

7. Correlation Analysis

The provider’s overall satisfaction with the plan (8B) is an important measure of how well the plan is meeting the needs and expectations of the provider network. Thus, the collection and review of data related to the provider’s rating of Louisiana Healthcare Connections could provide your plan with the fundamental information needed to help maintain or even improve the overall caliber of your plan.

Not all plan services impact providers’ overall rating of the plan to the same degree. A correlation analysis was run to determine which attributes have the strongest relationship with overall satisfaction with the plan (8B). The correlation analysis produces the Pearson correlation coefficient, which illustrates the strength of the relationship between each attribute and overall satisfaction. A correlation coefficient of ‘1’ represents the strongest relationship (a perfect positive correlation), while a coefficient of ‘0’ represents the weakest relationship (no correlation). A correlation coefficient approaching a value of +/- 1.000 represents an increasing association of the attribute with overall satisfaction.

The attributes with the highest correlation coefficients are noted below. Attributes are listed in descending order of correlation coefficient.

Attribute	Correlation Coefficient
7C. Quality of provider orientation process.	0.618
2B. Accuracy of claims processing.	0.545
7D. Quality of written communications, policy bulletins, and manuals.	0.544
5B. Extent to which formulary reflects current standards of care.	0.530
3C. Timeliness of obtaining pre-certification/referral/authorization information.	0.519
2D. Resolution of claims payment problems or disputes.	0.516
3B. Procedures for obtaining pre-certification/referral/authorization information.	0.506

The correlation analysis presented on page 7A lists each applicable attribute and the corresponding Pearson correlation coefficient. Summary Rates for Louisiana Healthcare Connections are displayed. Summary Rates for the 2014 SPH Analytics Medicaid Book of Business 25th and 75th percentiles are provided where applicable to help identify how Louisiana Healthcare Connections performs for each attribute. Attributes identified as highly correlated with overall satisfaction are highlighted in tan.

* Summary Rate Scores are the sum of the most favorable response options.

** A correlation coefficient approaching a value of +/-1.000 represents an increasing association of the attribute with overall satisfaction. See Technical Notes for a thorough explanation of the correlation analysis.

Note: Attributes with a strong relationship (0.400 correlation) with 8B (Overall satisfaction with Health Plan) are shown in bold. The highest performing attributes, those with a correlation of 0.5 or greater, are shaded tan.

-  At or above the 75th percentile.
-  At or above the 25th percentile, but below the 75th percentile; or no benchmark.
-  Below the 25th percentile.

8. Priority Matrix

SPHA offers a graphical display of relative performance of survey composites, along with each composite's relative 'importance' as it relates to overall satisfaction with Louisiana Healthcare Connections. The matrix on page 8A is divided into four sections. A composite's placement in the matrix is determined by its correlation with overall satisfaction and its percentile ranking as compared to the 2014 SPH Analytics Medicaid Book of Business⁶ percentile scores.⁷

Composites highly correlated with overall satisfaction as determined by the Correlation Analysis and scoring at or above the 75th percentile are considered plan *Strengths* and are placed in the top right cell. Composites highly correlated with overall satisfaction but scoring below the 75th percentile are considered *Top Priority* and are placed in the top left cell. *Monitor and Maintain* includes those composites in the bottom right cell, which are not highly correlated with overall satisfaction but rank at or above the 75th percentile. Composites that are not highly correlated with overall satisfaction and rank below the 75th percentile are considered *Medium Priority* and are placed in the bottom left cell.

<p><u>Top Priority</u></p> <ul style="list-style-type: none"> • Highly correlated with overall satisfaction • Summary Rate Score falls below the 75th percentile 	<p><u>Strength</u></p> <ul style="list-style-type: none"> • Highly correlated with overall satisfaction • Summary Rate Score is at or above the 75th percentile
<p><u>Medium Priority</u></p> <ul style="list-style-type: none"> • Summary Rate Score falls below the 75th percentile 	<p><u>Monitor and Maintain</u></p> <ul style="list-style-type: none"> • Summary Rate Score is at or above the 75th percentile

Chart 8A

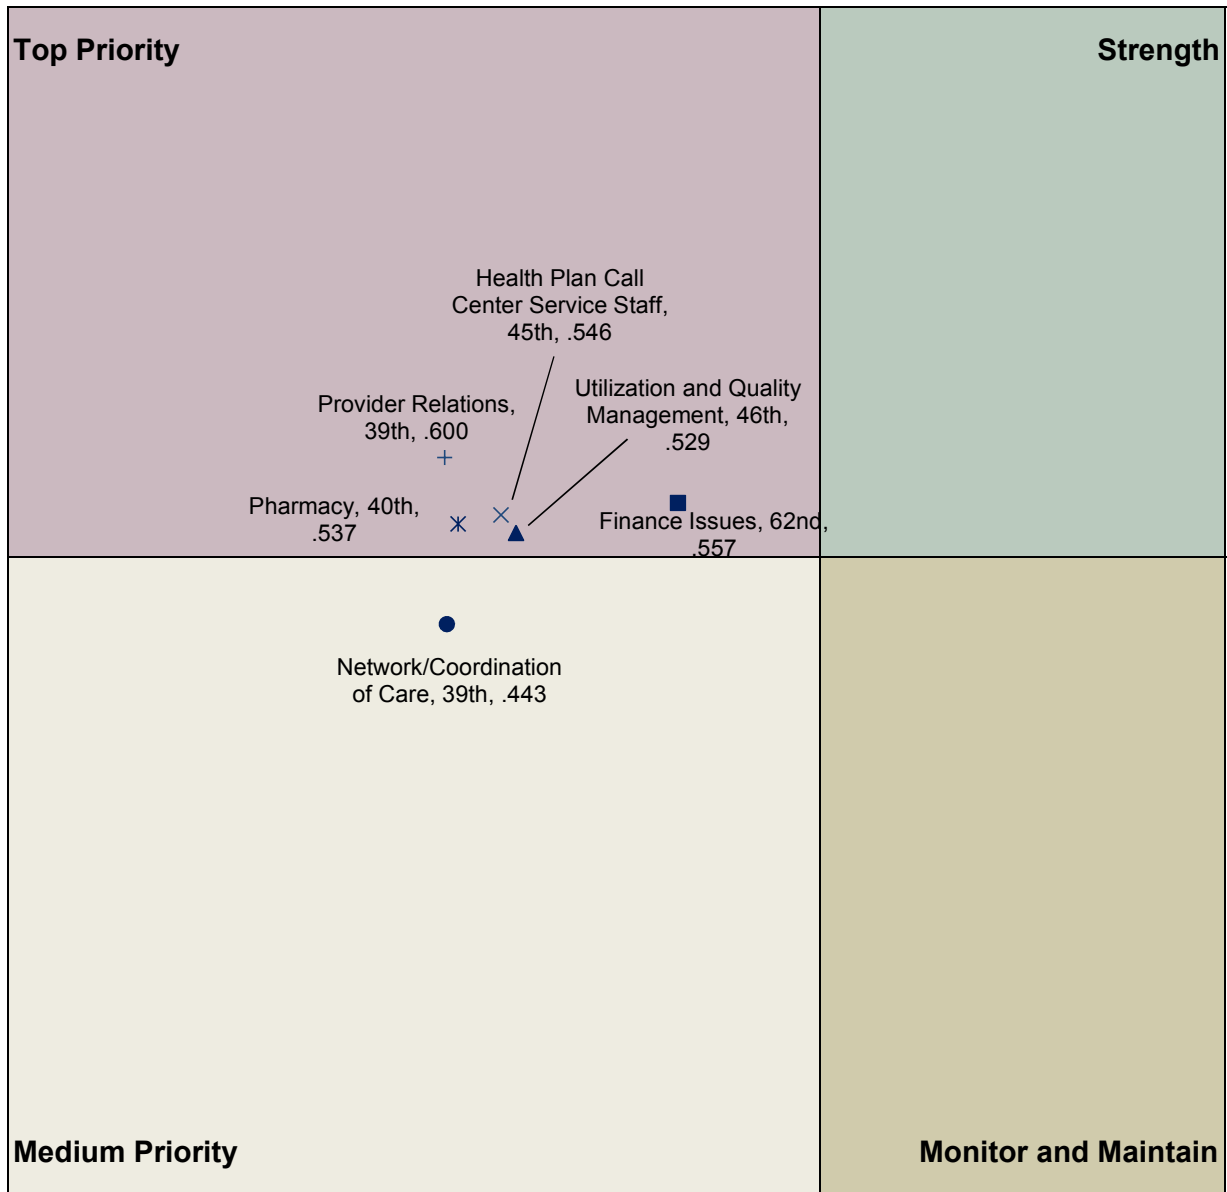

⁶ SPH Analytics' 2014 Medicaid Book of Business consists of data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

⁷ The *All Other Plans (Comparative Rating)* attribute is not included in this analysis. It is often an indicator of plan performance, but it is not an attribute on which plans can directly act. Please note, however, that this attribute is highly correlated with overall satisfaction and with each of the composites. As such, as plan performance improves or declines, it is possible that directional shifts will also occur in this attribute's Summary Rate Score.

Priority Matrix

Louisiana Healthcare Connections

Provider Satisfaction Survey

Top Priority: Summary Rate falls below the 75th percentile when compared to the 2014 SPHA Medicaid Book of business benchmark on composites that are moderately or highly correlated with Overall Satisfaction with Louisiana Healthcare Connections.

Strength: Summary Rate at or above the 75th percentile when compared to the 2014 SPHA Medicaid Book of business benchmark on composites that are moderately or highly correlated with Overall Satisfaction with Louisiana Healthcare Connections.

Medium Priority: Summary Rate falls below the 75th percentile when compared to the 2014 SPHA Medicaid Book of business benchmark on composites that are slightly associated with Overall Satisfaction with Louisiana Healthcare Connections.

Monitor and Maintain: Summary Rate at or above the 75th percentile when compared to the 2014 SPHA Medicaid Book of business benchmark on composites that are slightly associated with Overall Satisfaction with Louisiana Healthcare Connections.

9. Loyalty Analysis

Provider loyalty develops when the health plan consistently meets or exceeds the expectations of its providers. A loyal provider is very satisfied with the plan and willing to recommend the plan to other physicians' practices.

Page 9A presents an assessment of provider loyalty with Louisiana Healthcare Connections. Provider loyalty is based upon responses to question 8B, ('Please rate your overall satisfaction with Louisiana Healthcare Connections') and question 8A, ('Would you recommend Louisiana Healthcare Connections to other physicians' practices?').

The different zones within the analysis are defined as follows:

Loyal Zone: Providers are completely satisfied and would recommend the plan to other physicians' practices.

Defection Zone: Providers are completely dissatisfied and would not recommend the plan to other physicians' practices.

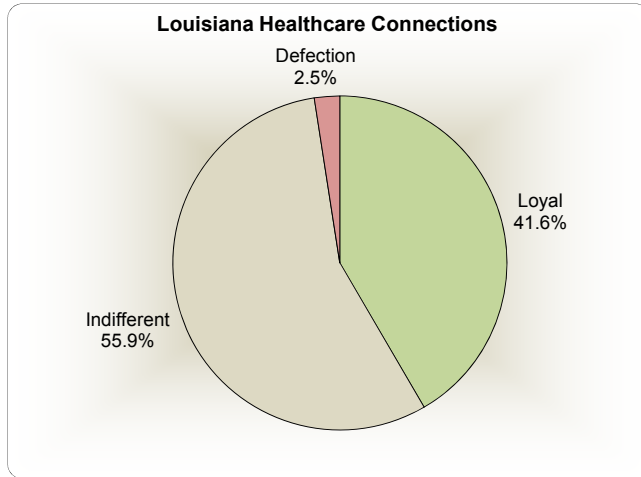

Indifferent Zone: Providers are mixed as to whether they are satisfied or whether they would recommend the plan to other physicians' practices.

Chart 9A

Loyalty Analysis

Louisiana Healthcare Connections Provider Satisfaction Survey

202 Eligible Respondents*

Zone Definitions

	Recommend Health Plan to other physicians' practices? (8A)		Overall satisfaction with Health Plan? (8B)
Loyal	"Yes"	And	"Completely satisfied"
Indifferent	All other responses		
Defection	"No"	And	"Completely dissatisfied"

Loyalty Scores & Comparison

Zone	2015		2014		2013		2014 SPHA Medicaid Book of Business	Significance Testing**		
	Valid n	Percent	Valid n	Percent	Valid n	Percent		2014 to 2015	2013 to 2015	2015 to SPHA B.o.B.
Loyal	84	41.6%	12	23.5%	34	20.9%	33.1%	Significant increase	Significant increase	Significantly higher
Indifferent	113	55.9%	39	76.5%	113	69.3%	64.0%	Significant decrease	Significant decrease	Significantly lower
Defection	5	2.5%	0	0.0%	16	9.8%	2.9%	Unable to Test	Significant decrease	Not significant

* Eligible Respondents are those answering both questions.

** Significance Testing - "Significant decrease/Significantly lower" denotes the result that would be found if a hypothesis test were conducted to determine if the percentage is lower. "Significant increase/Significantly higher" denotes the result that would be found if a hypothesis test were conducted to determine if the percentage is higher. "Not significant" denotes that there was insufficient support to conclude that there was a significant difference in percentages. "Unable to Test" denotes that there was insufficient sample size to conduct the statistical test. All significance testing is performed at the 95% significance level.

10. Technical Notes

Presented alphabetically by subject area

Composite Categories

The Louisiana Healthcare Connections Provider Satisfaction Survey includes eight composite categories. Each composite category represents an overall aspect of plan quality and is comprised of similar questions. For each composite, an overall score is computed. The composite score is the average of the Summary Rates of the questions comprising a composite. For example, the *Finance Issues* composite is the average of the Summary Rates of questions 2A through 2D.

Correlation Analysis

Correlation analysis is run between attributes and the overall satisfaction variable as measured by question 8B, *Please rate your overall satisfaction with Louisiana Healthcare Connections*. The Pearson's product moment correlation coefficient, r , is used to measure the strength of the linear association between each attribute and the overall satisfaction variable. These scores can range from 0 (no relationship) to +1 (perfect positive relationship).

The correlation analysis is designed to compare continuous variables. As such, not every survey attribute, such as those with dichotomous response options ("Yes" or "No"), is applicable for use within the correlation analysis.

Demographic Categories

SPHA collapses several of the practice characteristic variables into fewer segments than those defined by the survey. The consolidation of these categories with small samples allows for more valid between-group statistical comparisons.

Mean Score

Mean Scores are an average of all responses. They are calculated by assigning a value of five to the most favorable response option, a four to the next most favorable response option, and so on until a value of one is reached. These values are assuming that there are five response options. If there are a different number of response options, the most favorable response option receives a value equal to the total number of response options. When every response receives a value, the values are averaged to give the Mean Score.

Multiple Mark Response

Some questions allow for respondents to mark multiple response options. As a result, response options to these questions typically add up to more than 100%. Also note that Multiple Mark Responses contain an extra row of information in the Banner Tables called 'Total Valid Responses,' which displays the total number of responses given.

Response Rate

The formula for determining the response rate is:

$$\frac{\text{Completed surveys}}{\text{Final sample size} - \text{Ineligible surveys}} = \text{Response rate}$$

For a mail and Internet with phone follow-up survey methodology, the following dispositions are considered ineligible: deceased, not eligible, bad address, wrong number, fax/pager/modem/data line, not in service, number changed, cell phone, and disconnected.

Rounding of Data

For many survey questions, you will often see listed response distribution percentages that do not add to exactly 100%. In some cases, they may add to 99.9% and in others to 100.1%. This tends to cause some concern, as it gives the appearance of a valid response being omitted or even counted twice. The following explanation is provided as a means to understanding how rounding affects the percentages shown in the report.

The key to understanding how rounding affects listed percentages is to know that the survey question’s entire valid response set is being accounted for. That is, although the percentages do not add to exactly 100%, the entire response set is represented in the percentages shown.

In many cases, dividing a number of responses by the total number of valid responses provides a percentage that will go out to an infinite number of decimal places. An example of this is dividing one by three: No matter how many decimal places this quotient is taken out, it will always be a continuous string of three’s. As a result, we see the following when adding each of the item response percentages:

Response 1:	n = 1	.3	.33	.333	.3333
Response 2:	n = 1	.3	.33	.333	.3333
Response 3:	<u>n = 1</u>	<u>.3</u>	<u>.33</u>	<u>.333</u>	<u>.3333</u>
	3	.9	.99	.999	.9999

It is evident that no matter how many decimal places we take our quotient out, we will never be able to add the results to exactly ‘1’ (or 100%), even though all ‘3’ responses are included in the percentage calculation. Through consultation with a number of our clients, SPHA has determined that using a single decimal place in the reporting of percentages provides an adequate level of detail. Typically, when percentages are calculated in our report applications, all decimal places are computed, but only the first decimal place is actually shown. As such, adding rounded single-digit decimals may not equal 100%. If the same figures were taken out an additional decimal place, however, they might then add to exactly 100%. Or, as the example above shows, they may never equal an even 100%. Finally, when rounding, SPHA employs the standard practice of rounding down any number from one to four and rounding up any number from five to nine.

Sampling Error

Sampling error can be thought of as the extent to which survey results may differ from what would be obtained if every eligible member in the sample had been surveyed. The size of such error depends largely on the percentage distributions (i.e., the number of respondents selecting each answer category) and the number of members surveyed. The more disproportionate the percentage distributions or the larger the sample size is, the smaller the error.

The following tables may be used in estimating approximate sampling error. The first table shows the range (plus or minus the figure shown) within which the population percentage could be expected to lay **95** out of 100 times a sample of that size and percentage distribution would be selected. The second table shows the range (plus or minus the figure shown) within which the population percentage could be expected to lay **90** out of 100 times a sample of that size and percentage distribution would be selected.

95% Confidence Interval Approximate Half Width (+/-) for Population Percent					
Valid Responses	Percentage Distribution				
	50/50	60/40	70/30	80/20	90/10
50	13.9	13.6	12.7	11.1	8.3
100	9.8	9.6	9.0	7.8	5.9
200	6.9	6.8	6.4	5.5	4.2
300	5.7	5.5	5.2	4.5	3.4
400	4.9	4.8	4.5	3.9	2.9
500	4.4	4.3	4.0	3.5	2.6
750	3.6	3.5	3.3	2.9	2.1
850	3.4	3.3	3.1	2.7	2.0

90% Confidence Interval Approximate Half Width (+/-) for Population Percent					
Valid Responses	Percentage Distribution				
	50/50	60/40	70/30	80/20	90/10
50	11.6	11.4	10.7	9.3	7.0
100	8.2	8.1	7.5	6.6	4.9
200	5.8	5.7	5.3	4.7	3.5
300	4.7	4.7	4.4	3.8	2.8
400	4.1	4.0	3.8	3.3	2.5
500	3.7	3.6	3.4	2.9	2.2
750	3.0	2.9	2.8	2.4	1.8
850	2.8	2.8	2.6	2.3	1.7

The sampling error table is used in the following manner. Assume that 'Overall satisfaction with the health plan' received a Summary Rate of seventy percent (70.0%) from a sample of 500 valid responses. For a 95% confidence interval, look at the table where the sample size of 500 intersects the percentage distribution of 70/30. The margin of error for this sample size is four percentage points (4.0%). Therefore, on

average, in 95 out of 100 similar samples, the 95% confidence interval (e.g., 66.0% to 74.0%) will span the true unknown population percentage.

Statistical Significance

A statistically significant hypothesis testing result means that — based on the sample(s), conditions/assumptions, and level of significance — there is sufficient evidence to conclude the alternate hypothesis. For example, when testing for a difference between a population Summary Rate and a set constant score (SPH Analytics Book of Business), statistical significance would mean that there is sufficient support for the statement that there is a difference between the population Summary Rate and the set constant score. As another example, when testing to see if there is a difference between last year’s population Summary Rate and this year’s population Summary Rate—statistical significance would mean that there is sufficient evidence for the statement that the population Summary Rates are different.

Throughout the report, statistically significant results are denoted through green and red highlighted cells. Green cells indicate that the current year score has significantly increased compared to previous years or is significantly above the SPHA benchmark. Red cells indicated that the current year score has significantly decreased compared to previous years or is significantly below the SPHA benchmark.

Summary Rates

All survey questions have specific response options designated for inclusion in Summary Rate scoring. These scores are computed as the proportion of favorable responses to the total number of valid responses for each question. For example, the rating questions’ Summary Rates are computed using the following proportion:

$$\frac{\text{Well above average} + \text{Somewhat above average}}{\text{Well above average} + \text{Somewhat above average} + \text{Average} + \text{Somewhat below average} + \text{Well below average}}$$

The overall satisfaction questions use the following scale specifically asking about the respondent’s level of satisfaction:

$$\frac{\text{Completely satisfied} + \text{Somewhat satisfied}}{\text{Completely satisfied} + \text{Somewhat satisfied} + \text{Neither dissatisfied nor satisfied} + \text{Somewhat dissatisfied} + \text{Completely dissatisfied}}$$

SPH Analytics Aggregate Book of Business (2014)

The 2014 SPH Analytics Aggregate Book of Business is a benchmark that is comprised of data from 33 plans representing 14,423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

SPH Analytics Medicaid Book of Business (2014)

The 2014 SPH Analytics Medicaid Book of Business is a benchmark that is comprised of data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

SPH Analytics Medicaid Respondent-Level Benchmark (2014)

The 2014 SPH Analytics Medicaid Respondent-Level Benchmark contains respondent-level data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine. This benchmark segments results by Survey Respondent (Physician and Office Manager) and Area of Medicine (Primary Care and Specialty) and is shown on the *respondent-level*, meaning that ratings from the respondents are averaged to compute the Summary Rate.

Valid n

The term valid n is used to show the number of respondents giving a valid response to a particular question. It gives information only on the question it refers to and no others. Valid responses are those that actually rate an attribute. They do not include responses such as ‘N/A’ because a response of ‘N/A’ does not rate an attribute. The difference in value between the valid n and the total number of respondents completing the survey is a result of removing invalid responses and respondents submitting a survey but not answering that particular question.

Z-Test

To test for true differences in population score(s), statistical inference methods are applied. In particular, hypothesis testing is done to draw conclusions about differences in scores between a population and a set constant (e.g., a Summary Rate versus SPH Analytics Book of Business score). The hypothesis of no difference is rejected if the absolute value of the test statistic exceeds a critical value corresponding to a level of significance. The test statistic used depends on which of these types of hypothesis tests are performed.

When checking for a statistically significant difference between a Summary Rate for a population and a set constant score—with various conditions/assumptions—SPHA uses the statistic test that follows:

$$z = \frac{\hat{p} - p_0}{\sqrt{\frac{p_0 q_0}{n}}}$$

\hat{p} = Summary Rate from the sample
 p_0 = Set constant score for comparison
 $q_0 = 1 - (\text{Set constant score}) = (1 - p_0)$
 n = Sample size

For hypothesis testing of composites, n equals the maximum denominator of the composite questions. With a large sample size (generally $n > 30$, technically $np_0 \geq 5$ and $nq_0 \geq 5$), the z-statistic has a distribution that can be treated as the standard normal distribution. Thus, the hypothesis that the population ‘Summary Rate’ equals the set constant score, p_0 , is rejected at a 0.05 level of significance when the absolute value of the z-statistic exceeds 1.96 (obtained from cumulative standard normal distribution table).

The second hypothesis-testing situation involves testing for statistically significant differences between two population percents (or proportions), e.g., two population

Summary Rates. When comparing the population percentages (or proportions)—with various conditions/ assumptions—the appropriate test statistic is the z-statistic as follows:

$$z = \frac{\hat{p}_1 - \hat{p}_2}{\sqrt{\hat{p}\hat{q}\left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

\hat{p}_1 = Summary Rate from the 1st sample
 \hat{p}_2 = Summary Rate from the 2nd sample
 n_1 = Size of the sample from the 1st population
 n_2 = Size of the sample from the 2nd population
 \hat{p} = Pooled Summary Rate, $\hat{p} = \frac{n_1\hat{p}_1 + n_2\hat{p}_2}{n_1 + n_2}$
 $\hat{q} = 1 - (\text{Pooled Summary Rate})$

For hypothesis testing of composites, *n* equals the maximum denominator of the composite questions. With large sample sizes ($n_1\hat{p}_1 \geq 5$, $n_1(1 - \hat{p}_1) \geq 5$, $n_2\hat{p}_2 \geq 5$, and $n_2(1 - \hat{p}_2) \geq 5$) the z-statistic has a distribution that can be treated as the standard normal distribution. Thus, the hypothesis that the populations under comparison have equal population Summary Rates is rejected at a 0.05 level of significance when the absolute value of the z-statistic exceeds 1.96 (obtained from cumulative standard normal distribution table).

PHYSICIAN SATISFACTION SURVEY

Answer **all** the questions by marking the box with blue or black ink. Like this .
 With the exception of Question F, all responses to the survey are kept confidential and only SPH Analytics has access to them. If you want to know more about this study, please call SPH Analytics at 1-800-692-0041.

Demographics

Please answer the following questions about you and your practice.

- A. Please indicate your area of medicine. (Mark all that apply)
- _A Primary Care
_B Specialty
_C Behavioral Health Clinician
- B. How many physicians are in your practice?
- ₁ Solo
₂ 2-5 physicians
₃ More than 5 physicians
- C. How many years have you been in this practice?
- ₁ Less than 5 years
₂ 5-15 years
₃ 16 years or more
- D. What portion of your managed care volume is represented by Louisiana Healthcare Connections?
- ₁ None
₂ 10% or less
₃ 11-20%
₄ 21-30%
₅ 31-50%
₆ 51-75%
₇ 76-100%

- E. Please mark who is completing this survey. (Mark only one)
- ₁ Physician
₂ Behavioral Health Clinician
₃ Office Manager
₄ Nurse
₅ Other staff
- F. What is your preferred method of receiving communications from this health plan?
- ₁ Mail
₂ Telephone
₃ Fax
₄ Online portal
₅ E-mail (Please indicate your e-mail address):

- ₆ In person from your Provider Relations Specialist
₇ Other (Please specify):

- G. Please indicate the number of insurance companies with which you or your practice participates.
- ₁ 3 or fewer
₂ 4 to 7
₃ 8 to 11
₄ 12 to 15
₅ More than 15

Comparative Rating

This first question asks you to think about Louisiana Healthcare Connections in comparison to all of the other health plans that you work with.

1A. How would you rate Louisiana Healthcare Connections compared to all other health plans you contract with?

Well below average
 Somewhat below average
 Average
 Somewhat above average
 Well above average
 Not applicable

₁ ₂ ₃ ₄ ₅ ₆

Finance Issues

These questions ask about Finance Issues. Please rate Louisiana Healthcare Connections in the following service areas when compared to your experience with other health plans you work with.

- 2A. Consistency of reimbursement fees with your contract rates. ₁ ₂ ₃ ₄ ₅ ₆
- 2B. Accuracy of claims processing. ₁ ₂ ₃ ₄ ₅ ₆
- 2C. Timeliness of claims processing. ₁ ₂ ₃ ₄ ₅ ₆
- 2D. Resolution of claims payment problems or disputes. ₁ ₂ ₃ ₄ ₅ ₆

12. Comments

Open-ended questions often provide valuable insight into topics not specifically addressed on the survey tool. Respondents can give feedback regarding issues, concerns, compliments, and praise based upon their interaction with the health plan or simply provide additional demographic information. The 2015 Louisiana Healthcare Connections survey tool includes two open-ended questions:

- ✓ QF. What is your preferred method of receiving communications from this health plan? E-mail address.
- ✓ Q9. What could Louisiana Healthcare Connections do to improve its service to your organization?

Verbatim comments for open-ended questions are included within an Excel data file (9106582 Comments Report). To preserve confidentiality, these comments are separated into two tabs. The first tab of the Excel file includes responses for QF and is indexed by the following database fields provided by Louisiana Healthcare Connections:

- Provider NPI
- Title
- Practice Name

The second tab of the Excel file includes responses to Q9 and is indexed by the following key questions and demographics to provide more information about the individual respondent:

- ✓ Overall Satisfaction with Louisiana Healthcare Connections (8B)
- ✓ Willingness to Recommend (8A)
- ✓ Area of Medicine (A)
- ✓ Physicians in Practice (B)
- ✓ Years in Practice (C)
- ✓ Portion of Managed Care Volume Represented by Health Plan (D)
- ✓ Survey Respondent (E)
- ✓ Insurance Participation (G)
- ✓ Methodology

13. Banner Tables

The tables in the following section show detailed results for each question in your survey. Responses are organized across the banner table by various practice characteristics. In order to aid you in viewing the data contained in these tables, the following explanation is provided.

The different categories by which the data are 'sliced' are presented as column headers. Each category has a set of possible response choices that are listed immediately below the headers. The left-most column in each table is labeled 'Total' and shows results for the entire set of valid responses.

On the left side of the page, you will see three row headers: 'Total,' 'Total Answering,' and 'No Answer.' 'Total' represents the number of possible responses that meet the criteria for inclusion into the given question. For questions that are asked of all respondents, this figure will typically equal the valid number of responses to the current survey. 'Total Answering' shows how many of the total respondents provided valid answers to the given question. Finally, 'No Answer' is the number of individuals who did not respond to the question, even though they were eligible to do so.

You will notice that, in some cases, a survey response choice shows only the number of respondents providing that answer with no percentage. These response options are not considered valid responses by standard analytical practice and are therefore omitted from the percentage calculations.

In some tables, an additional row is added to show Summary Rates and is labeled 'Summary Rate.' These scores are a single question response or combination of question responses considered to be favorable. It is included at the bottom of each of these tables and is shown with the response option or options that make up the score listed beside it.

Information regarding the statistical testing of results is shown in the lower left corner of each table. The first line displays the Comparison Groups. These are the columns (denoted by uppercase letters and separated by a slash (/)) in which statistical tests are run. Columns (B) and (C), for example, show results for the Primary Care and Specialty groups. These columns are compared in the statistical test to each other, but not to any other columns. If a letter is present, whether uppercase or lowercase, its corresponding percentage is significantly higher than the specified percentages within its comparison group.

The second line shows the type or types of statistical tests that are included in the table. The last two lines define the meaning of the uppercase and lowercase letters. If a percentage has an uppercase letter beneath it, a significant difference exists at the 95% level of confidence. A lowercase letter denotes a significant difference at the 90% level of confidence. A banner table example is presented on the following page with key points noted.

	AREA OF MEDICINE		
	Total	Primary Care	Specialty
	(A)	(B)	(C)
Total	433 ¹	22	407
Total Answering	429 ² 100.0%	22 100.0%	403 100.0%
No Answer	4 ³	-	4
Yes	198 46.2%	6 27.3%	189 46.9% B ⁴
No	231 53.8%	16 72.7% C ⁵	214 53.1%

1. For the given question, 433 respondents were eligible to answer. For questions asked of all respondents, this figure will equal the number of complete surveys. In other cases, it will equal the number of appropriate responses to a gate question. Gate questions are those that filter out respondents who would not logically be able to answer follow-up questions. For example, respondents who say that they do not have a personal doctor would not be able to provide a doctor rating, and so they are filtered out of the response set for the rating question.

2. Of those who were eligible to answer this question, 429 provided a valid response.

3. Four respondents – all Specialists – who were eligible to answer the question did not provide an answer.

4. Specialists provided a significantly higher percentage of ‘Yes’ responses than PCPs. The ‘B’ below the percentage refers to the group in column B – in this case, PCPs – and signifies that the 46.9% is significantly higher than the 27.3%. Because the ‘B’ is capitalized, we know that the difference is significant at the 95% level.

5. PCPs provided a significantly higher percentage of ‘No’ responses. As in the previous note, the ‘C’ refers to the group in column C – Specialists – and is significant at 95%.

Comparison Groups: BCD/EFG/HIJ/KLM/NOPQ/RSTUV
 Independent Z-Test for Percentages (unpooled proportions)
 Uppercase letters indicate significance at the 95% level.
 Lowercase letters indicate significance at the 90% level.
 Note: When comparing groups the Z-Test is only valid for large sample sizes (generally, n >=30)

14. Glossary of Terms

Attributes are the individual questions that relate to specific characteristics of the health plan.

Composites are the mean of the Summary Rates of attributes with similar question topics.

Rating questions use a scale of 'Completely dissatisfied' to 'Completely satisfied' to assess overall experience with Louisiana Healthcare Connections.

Summary Rates are single statistics generated for a survey question. Summary Rates represent the percentage of respondents who chose the most favorable response option(s) ('Well above average' or 'Somewhat above average,' 'Yes,' and 'Completely satisfied' or 'Somewhat satisfied').

SPH Analytics Aggregate Book of Business (2014)

The 2014 SPH Analytics Aggregate Book of Business is a benchmark containing data from 33 plans representing 14,423 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

SPH Analytics Medicaid Book of Business (2014)

The 2014 SPH Analytics Medicaid Book of Business is a benchmark containing data from 23 plans representing 12,193 respondents in Primary Care, Specialty, and Behavioral Health areas of medicine.

15. Appendix A: Question Summaries

The proportion of respondents who fall into each response category for all questions is shown beginning on page A.1. Each question addresses the provider’s rating of Louisiana Healthcare Connections. The Question Summary pages are broken down into several sections, which are described below.

Valid n & Category Responses

The Valid n column shows the number of respondents who chose to answer the question. This number may be lower than the total number of respondents who completed the survey because respondents either chose not to answer the question (left the question blank on the survey tool) or selected ‘Not Applicable.’ The Category Responses section provides the percentage of respondents who selected each response option.

Summary Rates

The Summary Rates section provides trend and benchmark comparisons of Louisiana Healthcare Connections’ Summary Rates. The Summary Rate is the proportion of respondents choosing the most positive response option(s) for each question. Typically, it is the sum of the proportion of respondents who selected ‘Well above average’ or ‘Somewhat above average.’ For all other questions, the Summary Rate is the sum of the bold category responses.

Mean Scores

The Mean Scores section provides further analysis of your results. While Summary Rates are very helpful in that they highlight areas where your plan scores well, they are not a complete indication of performance.

Mean Scores provide an average of responses. The score is calculated by assigning a value of one to five to each response option. For example, ‘Well above average’ receives a score of 5, while ‘Well below average’ receives a score of 1. Therefore, higher Mean Scores indicate more favorable responses, while lower Mean Scores indicate unfavorable responses.

For example, the Mean Score for Louisiana Healthcare Connections in the example below is 3.24, meaning that the average response option chosen is between ‘Average’ and ‘Somewhat above average.’

Question	Plan	Plan Mean	2014 SPHA B.o.B Mean

Consulting Services

SPH Analytics Can Help You Identify Opportunities to Improve Performance

SPH Analytics (SPHA) Consulting Services help evaluate initiatives for potential improvement based on the data provided and best industry practices through consultation with your organization's team members. An in-depth analysis can help organizations identify strengths and weaknesses to improve performance.

Harnessing the Power of Information

SPHA Consulting Services help organizations develop initiatives and solutions for improved performance, patient/member satisfaction, and improvement in scores and ratings.

Action Plans for Improvement

SPHA consultants work with you to develop action plans for improvement. Our experienced consultants have extensive backgrounds in quality improvement, healthcare research, and program evaluation and development. Consultants have worked with and for leading healthcare organizations to implement process improvements and strategic initiatives.

Stars/Scores Improvement

We understand Star Ratings and scores improvement is important to your organization. As a leader in healthcare transformation, SPHA helps you evaluate your organization's performance to develop a realistic plan for improvement. SPHA looks beyond typical measures to help you gain a more meaningful understanding of patient and member sentiment. SPHA consultants help guide your performance improvement initiatives.

The answers are not always easy to find. However, there are steps you can take to bring you closer to your goals. SPHA's knowledgeable consultants help you develop plans that empower long-term success in the rapidly changing healthcare environment.

Benefits of SPHA's Consulting Services:

- Gain insight and information based on overall findings
- Examine organizational strengths and weaknesses and their impact on performance
- Identify common themes, best practices, and calls to action
- Develop action plans for improvement
- Improve ratings and scores
