Subject: Louisiana Bayou Health Physical Health Services – Full Risk-Bearing Managed Care Organization Rate Range Development and Actuarial Certification update for the Period December 1, 2015 through January 31, 2016

Dear Ms. Steele:

The Louisiana Department of Health and Hospitals (DHH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Bayou Health program for the period of December 1, 2015 through January 31, 2016. This certification update includes two technical revisions that are retrospectively effective February 1, 2015 and two programmatic changes that will be effective December 1, 2015. For reference, the original capitation rate certification letter for the period July 1, 2015 through January 31, 2016 is included with this document in Appendix E.

This letter provides an overview of the analyses and methodology to support the technical revisions, programmatic changes, and the resulting capitation rate ranges effective December 1, 2015 through January 31, 2016 for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. It resulted in the development of a range of actuarially sound rates for each rate cell. The capitation rate ranges are summarized in Appendix A and represent payment in full for the covered services. Appendix B shows the full rate development from the base data as shown in the data book released by the State, dated January 31, 2015 (after excluding LaHIPP claims and including the revised Maternity kick payment deliveries {Table 1-A and 1-B}), and applies all the rate setting adjustments as described in this letter.

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows,

governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate, and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and taxes, and the cost of capital. Technical Revisions

Following the implementation of the Bayou Health at-risk capitated program, effective February 1, 2015, Mercer became aware of two issues requiring a technical revision to the previously certified rates. These are the following:

- A misalignment in the Maternity kick payment delivery event count logic between the State's fiscal agent and what was included in rate development.
- A decision made by the First Circuit Court of Appeals altering the reimbursement to out-of-state border hospitals.

These issues and methodology of the technical revisions are described in detail in the following sections.

Technical Revision #1 (Maternity Kick Payment Delivery Event Count Logic)

Mercer worked with DHH and the State's fiscal agent (Molina) to revise and align the Maternity kick payment delivery event count logic underlying the rate development and the logic implemented by Molina for payment to the Bayou Health managed care organizations (MCOs). A full description of the Maternity kick payment logic can be found in Schedule Z of the Bayou Health MCO financial reporting requirements guideline.

The following describes all the changes made to the inpatient physical health services encounters delivery event count logic. All other logic remains unchanged:

- Included all available diagnoses codes on a claim to identify a delivery. Previously, only the primary diagnosis code was used to identify a delivery.
- Included inpatient hospital claims only (claim type = 01 and billing provider type = 60) to identify a delivery. Previously, outpatient claims and all billing provider types were considered to identify a delivery.
- Restricted the age of the enrolled mother to greater than or equal to 10 years of age to identify a delivery. Previously, all ages were considered to identify a delivery.

- Diagnoses code range 640-669 where the 5th digit must be a 1 or 2. Previously, all codes in the range 650-669 were used to identify a delivery and no consideration was made for the 5th digit.
- Stillborn deliveries are identified using the following revenue codes: V271, V273-274, or V276-277. Previously, all V27 (V271-V279) were used to identify a stillborn delivery.

The following describes all the changes made to the professional encounters delivery logic, all other logic remains unchanged:

- Restricted to billing provider types 19, 20, and 90 to identify a delivery. Previously, all billing provider types were considered to identify a delivery.
- Restricted the age of the recipient to greater than or equal to 10 years of age to identify a delivery. Previously, all ages were considered to identify a delivery.

Additionally, after all encounters are identified, a single live-born delivery is identified for a given recipient within a 245-day period, plus or minus. Previously, a 120-day period, plus or minus, was used to identify a single delivery.

The revision to the Maternity kick payment delivery event count logic resulted in a reduction in deliveries of 1.98%, which increased the cost per delivery by 2.02%. Table 1-A shows the regional impact to the Maternity kick payment deliveries and cost per delivery. Table 1-B shows the regional impact to the Full Medicaid Pricing (FMP) cost per delivery.

Technical Revision #2 (Out-of-State Border Hospital Reimbursement)

A First Circuit Court of Appeals decision, Vicksburg, LLC v. State ex rel. Dep't of Health and Hospitals, 2010-1248 (La. App. 1st Cir. 3/25/11), 63 So.3d205, determined that a reimbursement methodology promulgated by DHH was unconstitutional in its application to River Region. River Region is a hospital located in Vicksburg, Mississippi, and administered inpatient health care services to Louisiana Medicaid patients. Consequently, DHH altered its reimbursement methodology to Mississippi out-of-state (Mississippi trade area) border hospitals from a per diem basis to a percentage of billed charges. These hospitals will now be reimbursed at 60% and 40% of billed charges for children and adults, respectively.

Mercer re-priced these out-of-state border hospital claims using the base claims experience (calendar year {CY} 2013) and determined the change to be immaterial to all rating categories with the exception of the Maternity kick payment. The South Central and North regions' Maternity kick payments were affected most with a 4.78% and 1.60% increase, respectively, as these are the regions bordering the Mississippi trade area. There was minimal to no impact to the Maternity kick payments of the Capital and Gulf regions. Table 2 shows the regional impact to the Maternity kick payments cost per delivery.

Programmatic Changes

Effective December 1, 2015, DHH will implement two program changes to Bayou Health:

- The termination of the Louisiana's Health Insurance Premium Payment (LaHIPP) program.
- The mandatory enrollment of populations who were previously allowed to voluntarily opt-out of Bayou Health.

The details of the methodology used to quantify and reflect the impact of the aforementioned program changes are described in the following sections.

Programmatic Change #1 (LaHIPP Program)
Effective December 1, 2015, DHH will terminate the LaHIPP program. This program pays for some or all of the health insurance premiums for an enrollee if they have insurance available through someone in the family and are enrolled in Medicaid. The program also covers out of pocket expenses incurred by the enrollee (Medicaid is the secondary payer).

LaHIPP is not a category of eligibility and enrollees in this program were eligible under the other categories of aid (COA) in Bayou Health. LaHIPP membership and claims experience were removed from the base claims experience (CY 2013) for purposes of developing the capitation rate range. Appendix C shows the statewide impact by COA from removing LaHIPP enrollees from the base claims experience. The LaHIPP claims are explicitly provided in the data book dated January 31, 2015.

Programmatic Change #2 (Voluntary Opt-Out Populations)
Effective December 1, 2015, populations currently allowed to voluntarily opt-out of Bayou Health will become mandatorily enrolled. These populations are defined in section 3.1 of the contract as the following:

- Children under 19 years of age who are:
  - Eligible for Supplemental Security Income (SSI) under title XVI of the Social Security Act;
  - Eligible under Section 1902(e)(3) of the Social Security Act;
  - In foster care or other out-of-home placement;
  - Receiving foster care or adoption assistance;
  - Receiving services through a family-centered, community-based, coordinated care system that receives grant funds under Section 501(a)(1)(D) of title V of the Social Security Act, and is defined by the DHH in terms of either program participation or special health care needs; or
  - Enrolled in Family Opportunity Act Medicaid Buy-In Program
- Native Americans who are members of federally recognized tribes, except when the MCO is:
  - The Indian Health Service; or
  - An Indian health program or urban Indian program operated by a tribe or tribal organization under a contract, grant, cooperative agreements or compact with the Indian Health Service.

Mercer used logic provided by DHH to identify SSI and foster care children who have opted-out of Bayou Health; however, there was no clearly defined logic available to Mercer to identify Native Americans. Thus, for base claims experience, Mercer utilized the residual CY 2013 FFS claims incurred by FFS populations who met the criteria for inclusion into Bayou Health and were not identified as a voluntary opt-in population (home- and community-based services {HCBS} Waiver and Chisholm Class Members), as defined in section 3.2 of the contract.

After identifying the appropriate voluntary opt-out populations' CY 2013 FFS membership and claims experience, Mercer created an adjustment to be applied in the rate development to account for the voluntary opt-out experience. When reviewing the opt-out experience to create this adjustment, Mercer accounted for the same rating adjustments as the Shared Savings/FFS population in the capitation rates effective February 1, 2015. These adjustments include:

- Incurred but not reported (IBNR)
- Fee adjustments
- Retroactive eligibility
- Fraud and abuse recoupments
- ACT 312 and pharmacy rebates
- Pediatric Day Health Care adjustments
- Specialized behavioral health mixed services protocol
- Affordable Care Act (ACA) Primary Care Providers (PCP) enhanced payments
- Trend

As the opt-out population has not been previously covered by the Bayou Health program, additional considerations had to be taken for the trend duration for the opt-out experience. The population covered under Bayou Health effective February 1, 2015 has a trending midpoint of August 1, 2015. The rating period for the voluntary opt-out population is December 1, 2015 through January 31, 2015 and therefore has a trending midpoint of January 1, 2015. Mercer accounted for the five month difference in trending midpoint for the opt-out population.

Additionally, Mercer used specific managed care contracting adjustments for the voluntary opt-out population. Considering the short rating period for the voluntary opt-outs, Mercer did not apply contracting adjustments for utilization but did apply a 1.0% to 3.0% increase for unit cost.

The overall adjustment for the inclusion of the voluntary opt-out populations can be found in Appendix D.

Certification of Rate Ranges

In preparing the rate ranges shown in Appendix A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by DHH and its fiscal agent. DHH, its fiscal agent, and the Prepaid plans are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that the rates in Appendix A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. Rate estimates provided are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual Bayou Health MCO costs will differ from these projections. Mercer has developed these rates on behalf of DHH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c), and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Bayou Health MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Bayou Health MCOs for any purpose. Mercer recommends that any Bayou Health MCO considering contracting with DHH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with DHH.

This certification letter assumes the reader is familiar with the Bayou Health program, Medicaid eligibility rules, and actuarial rate-setting techniques. It is intended for DHH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results.

Appendix B: Development of Rate Ranges for December 1, 2015 through January 31, 2016

Rate Development Description

The below portrays the details of the rate development based on the combined Prepaid, Shared Savings, and Legacy Medicaid/FFS (Chisholm and HCBS) data. The rate development exhibit takes the base data that was provided in Attachment 1 of the data book issued on January 31, 2015, (after excluding LaHIPP claims and including the revised Maternity kick payment deliveries {Table 1-A}), and applies the various rate-setting adjustments. The columns in the exhibit are as follows:

Base Data – The base data in these columns includes IBNR.
Member Month (MMs) – MMs for the CY 2013 period.
Per Member Per Month (PMPM) – Computed as the total paid amount divided by the total MMs. Statewide PMPMs were used where appropriate, as indicated in the rate certification letter.

Base Data Adjustments:
Annual Trend – (Low & High) – Annualized trend that is equivalent to the trend factor applied to the base data.
Trend Factor – (Low & High) – Trend factor that is equivalent to the compounded annualized trend applied to the base data.
Base Period Adj. – Overall base period adjustment applied to both the low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

Base Period Adjustments	
Prepaid	**Shared/FFS**
	Fraud and Abuse Adjustment (statewide adj.)
Fee Schedule Adjustment (hospital specific adj.)	Fee Schedule Adjustment (hospital specific adj.)

Managed Care Adj. Factor – (Low & High) – Low and high managed care savings factors applied to the corresponding low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

Managed Care Adjustments

Prepaid	Shared/FFS
Managed Care Savings*	Managed Care Savings*
	GDR

* Managed care savings adjustments were applied to previously unmanaged populations utilizing Legacy Medicaid/FFS claims (HCBS and Chisholm), as well as newly added services.

Out-of-State Adj. Factor – Factor applied to account for the out-of-state border hospitals reimbursement change. Applies to both Low and High PMPMs.
Outlier Add-on (PMPM) – PMPM added to account for outlier payments. Applies to both Low and High PMPMs.
Claims PMPM – (Low) – Calculated as: N = [B *E * (1+G)*H*J*L] + M.
Claims PMPM – (High) – Calculated as: O = [B * F * (1+G)*I*K*L] + M.
Fixed Admin Load – (Low & High) – A PMPM adjustment added to the corresponding Low and High PMPMs.
Variable Admin Load – (Low & High) – A percentage adjustment applied to the corresponding Low and High PMPMs.
Profit @ 2% – Provision in these rates has been made for a 2% risk margin.
Premium Tax @ 2.25% – Provision in these rates has been made for Louisiana's 2.25% premium tax.
PMPM After Admin – (Low) – Calculated as: V = (N * (1 + Q) + P)/(1 – T – U).
PMPM After Admin – (High) – Calculated as: W = (O * (1 + S) + R)/(1 – T – U).
Full Medicaid Pricing (FMP) Add-On – FMP component of the rate.
Premium tax on FMP – Provision in the FMP component of the rates has been made for Louisiana's 2.25% premium tax.
Final Loaded Rates – (Low) – Calculated as: Z = V + X + Y.
Final Loaded Rates – (High) – Calculated as: AA = W + X + Y.

Subject: Louisiana Bayou Health Program – Full Risk-Bearing Managed Care Organization Rate Development and Actuarial Certification for the Period July 1, 2015 through January 31, 2016

Dear Ms. Steele:

The Louisiana Department of Health and Hospitals (DHH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Bayou Health program for the period of July 1, 2015 through January 31, 2016. This certification includes the addition of Full Medicaid Pricing (FMP) for ambulance and hospital-based physician services, and replaces the capitation rate ranges certified in the January 31, 2015 letter for the period February 1, 2015 through January 31, 2016.

The Bayou Health program began February 1, 2012, and operated under two separate managed care paradigms for the first three years of the program. The Bayou Health Prepaid program operated under an at-risk capitated arrangement, and the Shared Savings program was an enhanced Primary Care Case Management (ePCCM) program. Effective February 1, 2015, Bayou Health will begin operating as an at-risk capitated program only.

This letter presents an overview of the methodology used in Mercer's managed care rate development for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. It resulted in the development of a range of actuarially sound rates for each rate cell. The capitation rate ranges are summarized in Appendix A and represent payment in full for the covered services and CMS Consultation guide is included in Appendix N.

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and taxes, and the cost of capital. Note: Please see pages 8-9 of the August 2005, Actuarial Certification of Rates for Medicaid Managed Care Programs, from the American Academy of Actuaries, http://www.actuary.org/pdf/practnotes/health_medicaid_05.pdf.

Rate Methodology

Overview

Capitation rate ranges for the Bayou Health program were developed in accordance with rate-setting guidelines established by CMS. For rate range development for the Bayou Health managed care organizations (MCOs), Mercer used calendar year 2013 (CY13) Medicaid FFS medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. Restrictions were applied to the enrollment and claims data so that it was appropriate for the populations and benefit package defined in the contract.

Mercer reviewed the data provided by DHH and the Prepaid and Shared Savings plans for consistency and reasonableness and determined that the data are appropriate for the purpose of setting capitation rates for the MCO program. The data certification shown in Appendix L has been provided by DHH, and its purpose is to certify the accuracy, completeness, and consistency of the base data.

Adjustments were made to the selected base data to match the covered populations and Bayou Health benefit packages for rating year 2015 (RY15). Additional adjustments were then applied to the base data to incorporate:

- Prospective and historic (retrospective) program changes not reflected (or not fully reflected) in the base data.
- Provision for incurred-but-not-reported (IBNR) claims.
- Financial adjustments to encounter data for under-reporting.
- Trend factors to forecast the expenditures and utilization to the contract period.
- Changes in benefits covered by managed care.
- Addition of new populations to the Bayou Health program.
- Opportunities for managed care efficiencies.
- Administration and underwriting profit/risk/contingency loading.

In addition to these adjustments, DHH takes two additional steps in the matching of payment to risk:

- Application of maternity supplemental (kick) payments.
- Application of risk-adjusted regional rates.

The resulting rate ranges for each individual rate cell were net of Graduate Medical Education (GME) payments to teaching hospitals provided in the Louisiana Medicaid State Plan. Appendix M shows the full rate development from the base data as shown in the data book released by the State, dated January 31, 2015, and applies all the rate setting adjustments as described in this letter.

Bayou Health Populations

Covered Populations

In general, the Bayou Health program includes individuals classified as Supplemental Security Income (SSI), Family & Children, Breast and Cervical Cancer (BCC), and LaCHIP Affordable Plan (LAP) as mandatory or voluntary opt-out populations. Voluntary opt-in populations include Home- and Community-Based Services (HCBS) waiver participants and Chisholm Class Members (CCM).

Chisholm Class Members

Effective February 1, 2015, members of Louisiana's Chisholm class will be permitted to participate in Bayou Health on a voluntary opt-in basis. Previously, membership in the Chisholm class would make a recipient ineligible for Bayou Health.

Chisholm refers to a class action lawsuit (*Chisholm v. Hood*) filed in 1997. CCMs are defined as all current and future recipients of Medicaid in the State of Louisiana, under age 21, who are now or will in the future be placed on the Office of Citizens with Developmental Disabilities' Request for Services Registry.

LaHIPP Population

Effective February 1, 2015, Bayou Health will include individuals covered by the Louisiana's Health Insurance Premium Payment (LaHIPP) Program. This program pays for some or all of the health insurance premiums for an enrollee if they have insurance available through someone in the family and are enrolled in Medicaid. The program also covers out of pocket expenses incurred by the enrollee (Medicaid is the secondary payer).

Premiums will continue to be paid by DHH, but out of pocket expenses incurred by the enrollee will be the responsibility of the MCO. LaHIPP is not a category of eligibility. Enrollees in this program are eligible under the other categories of aid (COA) and their experiences are included in the applicable COA and Rate Cell combination for purposes of developing the capitation rate range.

Excluded Populations

The following individuals are excluded from participation in the Bayou Health program:

- Medicare-Medicaid Dual Eligible Beneficiaries.
- Qualified Medicare Beneficiaries (QMB) (only where State only pays Medicare premiums).
- Specified Low-income Medicare Beneficiaries (SLMB) (where State only pays Medicare premiums).
- Medically Needy Spend-Down Individuals.
- Individuals residing in Long-term Care Facilities (Nursing Home, Intermediate Care Facility/Developmentally Disabled (ICF/DD)).
- Individuals enrolled in the Program for All-inclusive Care for the Elderly (PACE).
- Individuals only eligible for Family Planning services.
- Individuals enrolled in the Greater New Orleans Community Health Connection (GNOCHC) Demonstration waiver.

Appendix B encompasses a comprehensive list of Bayou Health's covered and excluded populations.

Rate Category Groupings

Rates will vary by the major categories of eligibility. Furthermore, where appropriate, the rates within a particular category of eligibility are subdivided into different age bands to reflect differences in risk due to age. In addition, due to the high cost associated with pregnancies, DHH will pay a maternity kick payment to the MCOs for each delivery that takes place. Table 1 shows a list of the different rate cells for each eligibility category including the maternity kick payments.

Bayou Health Services

Covered Services

Appendix C lists the services that the Bayou Health MCOs must provide. The MCOs also have the ability to develop creative and innovative solutions to care for their members (i.e., provide other cost-effective alternative services) as long as the contractually-required Medicaid services are covered. Costs of alternative services are expected to be funded through savings on the contractually-required services for which these services are a cost-effective substitute.

New Services

Effective February 1, 2015, DHH has decided to incorporate services covered historically by FFS in the Bayou Health program. The following services were previously excluded from the Bayou Health program and now are included:

- Hospice services.
- Personal care services for ages 0-20.
- Non-Emergent Medical Transportation (NEMT) services (non-covered services).

Hospice and Personal Care services claims are all captured in Legacy Medicaid/FFS claims. Therefore, the impact of Hospice and Personal Care services can be calculated by referencing Attachment 1 of the Bayou Health Data Book released by the State, dated January 31, 2015.

Additionally, NEMT will be the responsibility of the Bayou Health MCO, even if the recipient is being transported to a Medicaid-covered service that is not a Bayou Health-covered service. Previously, Prepaid enrollee NEMT to Bayou Health excluded services would have been FFS. Mercer has created an adjustment for the Prepaid NEMT Encounters to account for this addition and the impact can be found in Appendix D. This additional service cannot be distinguished for Shared Savings/FFS claims because all NEMT services for these populations were covered under FFS. The impact of the additional services are fully captured for the Shared Savings and FFS populations in the NEMT experience on Attachment 1 of the Bayou Health Data Book released by the State, dated January 31, 2015.

Behavioral Health Mixed Services Protocol

In the Request for Proposals (RFP) issued by the State for the Bayou Health program to be effective February 1, 2015, Behavioral Health services are divided into two levels: basic and specialized. Basic Behavioral Health services will be the responsibility of Bayou Health MCOs. Basic services include:

- General hospital inpatient services, including acute detoxification.

- General hospital emergency room (ER) services, including acute detoxification.
- Federally Qualified Health Center (FQHC)/Rural Health Center (RHC) encounters that do not include any service by a specialized behavioral health professional.
- Professional services, excluding services provided by specialized behavioral health professionals.

Specialized Behavioral Health services will be identified primarily based on provider type. Any service provided by behavioral health specialists, as well as behavioral health facilities are considered Specialized Behavioral Health. Appendix E summarizes the adjustment that was applied to each Basic Behavioral Health service category.

Behavioral health pharmacy costs will remain the responsibility of the Bayou Health plans, regardless of the prescribing doctor's specialty. Therefore, no adjustment to pharmacy costs are required.

Excluded Services

Bayou Health MCOs are not responsible for providing acute care services and other Medicaid services not identified in Appendix C, including the following services:

- Applied Behavioral Analysis.
- Dental services with the exception of Early and Periodic Screening & Diagnostic Treatment (EPSDT) varnishes provided in a primary care setting.
- ICF/DD services.
- Personal Care services for those ages 21 and older.
- Nursing Facility services.
- School-based Individualized Education Plan services provided by a school district and billed through the intermediate school district, or school-based services funded with certified public expenditures including school nurses.
- HCBS waiver services.
- Specialized Behavioral Health.
- Targeted Case Management services.
- Services provided through DHH's Early-Steps Program.

Data Adjustments

IBNR Claims

Completion factors were developed to incorporate consideration for any outstanding claims liability. The paid through date for the IBNR factor development is February 28, 2014 (2 months of runout).

To establish the completion factors for the Shared Savings/Legacy Medicaid FFS data, claims were grouped into three COA and seven main completion service categories. All remaining service categories were grouped into the other service category. Completion category mapping is provided in Appendix C. Note that the BCC and CCM populations utilized SSI completion factors and the LAP population utilized Family & Children completion factors, as these populations are expected to exhibit similar completion patterns. Appendix F-1 summarizes the completion factors adjustment that was applied to the Shared Savings/Legacy Medicaid FFS data.

Encounter claim completion factors, developed separately for each Prepaid plan, were compared to completion factors provided by the Prepaid plan actuaries and summarized by completion category of service. Appendix F-2 summarizes the completion factors adjustment that was applied to the Prepaid encounter data. Mercer determined that Prepaid encounter claims categorized as "Prescribed Drugs" for all populations and "Other" for the Family & Children and LAP populations only, is deemed to be complete, thus a 0% IBNR adjustment is applied. All other IBNR adjustments shown as 0.0% in Appendices F-1 and F-2 are due to rounding.

Under-Reporting

Under-reporting adjustments were developed by comparing encounter data from the Medicaid management information system (MMIS) to financial information provided by the Prepaid plans. This adjustment was computed and applied on a plan basis resulting in an overall adjustment of 3.6%. Note this adjustment does not apply to the Shared Savings claims nor Legacy Medicaid/FFS data. This adjustment is included in the data book released by the State, dated January 31, 2015.

Third-Party Liabilities

All claims are reported net of third party liability, therefore no adjustment is required.

Fraud and Abuse Recoveries

DHH provided data related to fraud and abuse recoveries on the Shared Savings and Legacy FFS. The total adjustment applied was -0.1%. Prepaid plans included fraud and abuse recoveries in their financial reports. These recoveries were included in the development of the under-reporting adjustment.

Co-Payments

Co-pays are only applicable to prescription drugs. Pharmacy claims are reported net of any co-payments so no additional adjustment is necessary.

Disproportionate Share Hospital Payments

Disproportionate share hospital (DSH) payments are made outside of the MMIS system and have not been included in the capitation rates.

Fee Schedule Adjustments

Fee Changes

These capitation rates reflect changes made by DHH to the fee schedules used in the FFS program. The first of these changes, effective February 1, 2013, was a 1% cut in fees paid to non-rural, non-state hospitals. This 1% cut also applied to physician services, except for procedure codes affected by Section 1202 of the Affordable Care Act (ACA), when performed by a physician eligible for the enhanced payment rate. Fee changes also include estimation of cost settlements and reflect the most up to date cost settlement percentages for each facility. For most non-rural facilities, the cost settlement percentage is 66.46%; however, some facilities are settled at different amounts. Rural facilities are cost settled at 110%. The Fee Schedule adjustments for Prepaid and Shared Savings/FFS are different primarily because the Shared Savings adjustment includes the impact of removing GME costs. A detailed breakdown of the fee changes by fee type (Inpatient, Outpatient, and Physician) is provided in Tables 3 through 7.

Hospital Privatization

During 2013, nine state hospitals were affected by privatization, with seven privatizing and two closing. They are listed below:

Privatizing

- E.A. Conway
- Huey P. Long
- Leonard J. Chabert
- LSU Shreveport
- Medical Center of LA – New Orleans
- University Medical Center Lafayette
- Washington St. Tammany Regional Medical Center

Closing

- W.O. Moss Regional Medical Center
- Earl K. Long

As a result of this privatization, they are no longer paid for services based on the state hospital fee schedule, but rather on the non-state, non-rural fee schedule. Similarly, reimbursement for

cost-based services for these hospitals is now based on the 66.46% cost settlement percentage for non-state, non-rural hospitals, rather than the 90% cost-settlement percentage applicable to state hospitals. The utilization in the facilities that are closing was assumed to be absorbed by other facilities in the regions and claims were adjusted accordingly.

For Shared Savings/FFS inpatient hospital claims, the inpatient settlements received as a state hospital were removed from the rate calculation since they are not paid to non-state hospitals. The claims were then re-priced using the July 1, 2014 per diems provided by DHH. For the two hospitals that are closing, W.O. Moss Regional Medical Center and Earl K. Long, DHH provided Mercer guidance on which hospitals were expected to absorb their utilization. W.O. Moss Regional Medical Center will be absorbed by Lake Charles Memorial and Earl K. Long will be absorbed by Our Lady of the Lake. For Encounter claims, the ratio between historical per diems and current per diems were used for claims re-pricing.

For outpatient hospital claims, the historical claims were adjusted for differences between the state hospital fee schedule and the general hospital fee schedule. Outpatient cost-based services were re-priced based on cost-to-charge ratios (CCRs) provided by DHH, which reflect costs associated with the Prepaid plans claims. The overall claims dollar impact of this adjustment is shown in Tables 8 and 9.

Full Medicaid Pricing

Beginning in April 2014, DHH implemented a series of program changes to ensure consistent pricing in the Medicaid program for hospital services, including inpatient hospital, outpatient hospital, hospital-based physician, and ambulance services. This change required the use of FMP in the calculation of per member per month (PMPM) payments to MCOs. DHH expects that this rate increase will lead to increased payments to those providers contracting with the MCOs to maintain and increase access to inpatient hospital, outpatient hospital, hospital-based physician, and ambulance services to the enrolled Medicaid populations. Mercer and the State reviewed the aggregate funding levels for these services between the base period and the contract period and determined that an addition to the historical data was necessary in order to ensure the capitation rate ranges reflect adequate statewide pricing levels. Separate adjustments were made to each of the four services to capture the full impact of statewide funding.

FMP adjustments were implemented for inpatient and outpatient services effective April 2014. Physician and ambulance FMP adjustments are effective July 2015.

Inpatient Hospital Services

For the Prepaid encounter and the Shared Savings/FFS data, inpatient service costs were increased by 65.1% and 59.9%, respectively. Mercer relied upon an analysis of Medicare diagnosis related group equivalent pricing of Medicaid services provided by DHH. For the Prepaid encounter, this analysis was done for the population served by the three Prepaid plans in aggregate. A separate analysis was done for the Shared Savings/FFS population. The

analyses relied upon encounter and Shared Savings/FFS data incurred from July 2012 to June 2013 and compared the adjusted Medicare payments to the Medicaid payment on a per discharge basis at each hospital. The Medicare payments were adjusted to reflect the treatment of Medicaid patients and reflected the state fiscal year 2014 (SFY14) reimbursement schedule. The SFY13 Medicaid payments were adjusted to reflect fee changes effective in SFY14 and payments made outside of the claims system (outlier payments). Mercer applied the ratio between the two payments to the base data at a hospital-specific level.

Outpatient Hospital Services

For the Prepaid encounter and the Shared Savings/FFS data, outpatient service costs were increased by 52.7% and 56.3%, respectively. The outpatient increase was developed according to the State Plan using cost to charge ratios, which used reported costs and billed charges by hospital. The cost to charge ratios supplied by DHH were reported on hospital fiscal year bases, which varied by hospital from 2/28/2013 to 12/31/2013. The billed charges originated from the Prepaid encounter and the Shared Savings/FFS base data. Mercer applied the ratio between the base data and cost estimates at a hospital level to develop the outpatient component of the FMP.

Hospital-Based Physician Services

For Prepaid encounter and Shared Savings/FFS experience, hospital-based physician services meeting the State Plan's criteria for FMP were increased by 83.2% and 105.6%, respectively. Mercer performed an analysis of hospital-based physician services provided at participating facilities by participating physicians compared to the average commercial rates for the same services according to the State Plan methodology. The average commercial rates are maintained by DHH and updated periodically. For state-owned or operated entities, average commercial rate factors are updated annually. DHH provided state-owned conversion factors for calendar year 2015. For non-state owned or operated entities, the average commercial rate factors are indexed to Medicare rates and updated every 3 years. DHH provided the latest available non-state factors, which were last updated as recently as April 2013. The scheduled update of these factors is currently underway and expected to be completed by the end of calendar year 2015.

Ambulance Services

For Prepaid encounter and Shared Savings/FFS experience, ambulance services meeting the State Plan's criteria for FMP were increased by 49.2% and 44.4%, respectively. Mercer performed an analysis of ambulance services utilized by Medicaid enrollees according to the State Plan using Medicare fee schedules and average commercial rates as a percentage of Medicare. Ambulance providers were classified as either Large Urban Governmentals (LUG) or non-LUGs. LUGs have historically received 100% of the gap between average commercial rate

and the Medicaid fee schedule while non-LUGs have historically received 17.35% of the gap. Mercer developed increases using these assumed funding levels. Average commercial rates as a percentage of Medicare were provided by DHH and were determined based on SFY12 claims. According to the State Plan, average commercial rates are updated every three years. The next update is anticipated to occur before the end of calendar year 2015.

ACA PCP

Under Section 1202 of the ACA, state Medicaid programs were required to increase payments to PCPs in 2013 and 2014. This requirement expires on December 31, 2014. As a result, 2013 Bayou Health encounter and FFS claims were adjusted to reflect the decrease in PCP payment rates between 2013 and 2015. The reduction, applied at the COA level is based on adjusting the provider fee schedule from the enhanced ACA rate to the Medicaid rate set by DHH. For the Prepaid Encounters, the enhanced payment data was under-reported at the time Mercer requested data as Prepaid health plans were still reprocessing some of the enhanced claims. Discussions were held with each of the existing Prepaid health plans to make sure that Mercer was identifying these claims appropriately. For detail on the adjustment applied to these claims, see Appendices G1-G2.

Table 11 summarizes the overall adjustment by COA that was applied to the Prepaid encounter and Shared Savings/FFS claims data.

Program Changes

The following adjustments were developed for known program changes as of December 31, 2014.

Act 312

Effective January 1, 2014, Act 312 requires that when medications are restricted for use by an MCO using a step therapy or fail first protocol, the prescribing physician shall be provided with, and have access to, a clear and convenient process to expeditiously request an override of such restrictions from the MCO. The MCO is required to grant the override under certain conditions. Mercer reviewed this new requirement and estimated the impact of this change to be an increase of approximately 3% of pharmacy costs.

EED

Beginning February 2015, facility and delivering physician costs for EEDs will not be covered under the Bayou Health program. MCOs receive an EED Kick Payment for deliveries that occur prior to 39 weeks for reasons that are not medically indicated in the Louisiana Electronic Event Registration System (LEERS) maintained by the Office of Public Health/Vital Records. Deliveries that occur prior to 39 weeks for reasons that are medically indicated in LEERS will receive the Maternity Kick Payment. Mercer identified the average facility and delivering physician costs included in the Maternity Kick Payment by region and removed those costs to create the EED Kick Payment. Table 12 shows the EED adjustment and reduction amount by region in the low and high scenarios. The resulting EED Kick Payment is equal to the Maternity Kick Payment plus the reduction amount in Table 12 and is shown in Appendix A.

Retro-Active Eligibility Adjustment

Beginning in February 2015 members granted retro-active eligibility will be capitated retro-actively, based on their eligibility for Bayou Health, for up to 12 months prior to enrollment in an MCO. The MCO selected by these members will then receive one capitation payment per month of retro-active enrollment, and will be liable for all claims incurred during this retro-active

eligibility period. Mercer developed an adjustment factor to apply to the base data in the capitation rate development. Mercer did not apply any savings adjustments to the retro-active period claims in the development of these factors because the MCO will have no ability to manage utilization during the retro-active period.

The retro-active eligibility adjustment was developed as an increase to the capitation rates set for all members, meaning that the capitation payment is higher than otherwise required on non-retro-active member months (MMs). Retro-active enrollment in any given rate cell will generate the same capitation payment per month to the MCO as any other enrollee in that same rate cell. The factors were developed at a rate cell level on a statewide basis (i.e., all regions used the same factors). The calculation relied upon retro-active claims PMPM, unique enrollee counts, and the average duration to develop the expected increase to Bayou Health claims.

Mercer reviewed the average duration of enrollees who were retro-actively enrolled during 2013 using data from July 2012 to December 2013. From August 2012 to May 2013, DHH performed additional enrollment review processes, which caused the average duration of retro-active enrollment to increase significantly over normal levels. After May 2013, DHH returned to normal enrollment review processes and the average duration of enrollment decreased significantly. DHH confirmed that they do not foresee a need for implementing this additional review process in the future and expect the enrollment patterns to be consistent with those observed in the second half of 2013. Mercer relied upon July through December 2013 enrollment lags to develop an average durational assumption by COA and is shown in Appendix H-1.

In some rate cells, the retro-active claims PMPM was below the base data claims PMPM. This generated an adjustment factor less than 1.0. The decision was made to not use a factor less than 1.0 on any rate cell. These implied factors (calculated) and final factors (used) are supplied in Appendix H-2.

Table 13 summarizes the overall adjustment by rate cell for retro-active eligibility.

Rating Adjustments

Trend

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the cost of providing health care services in a future period. Mercer studied historical cost and utilization data for each of the three data sources incorporated in the capitation rates: Prepaid encounters, Shared Savings, and FFS. Trends were selected based on Louisiana experience, as well as national trend information.

Due to the relatively short history of managed care in Louisiana, as well as the bifurcated nature of the current Bayou Health program, Mercer's trend studies using Louisiana-specific data were limited in scope. Based on these studies, it was determined that the use of a single trend rate for all three data sources was best. In selecting these trends, there was reliance on national Medicaid trends as well as Louisiana-specific data.

Trends, delineated by utilization, unit cost, PMPM, and by population are shown in Appendices I1-I3.

[1] Revised from 0.7 to 0.4 due to a typographical error in the certification letter dated January 31, 2015.

PDHC Adjustments

The number of PDHC providers has grown throughout the State during 2014. In areas where centers have begun operation, there has been an increase in the total costs of enrollees whom utilize these services indicating that this population may have been historically under served by alternative services.

Due to the uneven distribution of PDHC providers in the State, each regional group has different proportions of members utilizing PDHC services. Mercer developed projected utilization per 1,000 MMs of PDHC-eligible members for each region based on the number of new facilities that will be operating during the rating period in that region. PDHC eligible members were simply defined as any enrollee in a child rate cell (SSI ages 0-18, Family & Children ages 0-18, LA CHIP, HCBS 0-19, and Chisholm). Any enrollees under the age of 21 are eligible for PDHC services, however, the data showed that virtually all users of this service were under the age of 19 and therefore no adjustment to the adult rate cells was warranted. Table 14 shows the summary of PDHC providers and estimated PDHC users by regions. To develop the estimated PDHC service cost, Mercer developed the PDHC cost per PDHC user per month. The estimation is based on the regional experience of PDHC providers during CY13. In the Gulf region, where there is little experience due to a lack of providers, an average statewide cost was used. The summary of estimated PDHC service cost per PDHC user per month and the estimated PDHC service cost due to the increased number of providers are shown in Table 15.

Managed Care Adjustments

For those populations and services that had previously been excluded from Bayou Health, Mercer adjusted the capitation rates to reflect areas for managed care efficiency. Managed Care is able to generate savings by:

- Encouraging the use of preventive services so that acute conditions are not exacerbated to the point that requires a visit to the ER or hospitalization.
- Using alternatives to the ER for conditions that are non-emergent in nature.
- Increasing access and providing member education.
- Minimizing duplication of services.
- Hospital discharge planning to ensure a smooth transition from facility-based care to community resources and minimize readmissions.

Statewide managed care savings factors were applied to the HCBS and Chisholm class COAs. Additionally, durable medical equipment (DME) and NEMT costs for Shared Savings enrollees were adjusted as part of this rate setting, as these services were excluded from Bayou Health Shared Savings. Appendices J1-J2 summarizes the managed care savings adjustments that were applied to the Shared Savings/Legacy Medicaid FFS data.

[3] Based on PDHC users' CY13 experience. Gulf region does not have enough experience and the projection is based on the average of the other three regions' projections.

Shared Savings Rx claims

Under the Bayou Health Shared Savings program, plans had limited ability to manage prescription drug costs. In order to use the Shared Savings experience to set capitated rates, adjustments were needed to account for generic dispense rate (GDR) differences between the Prepaid and Shared Savings experience. For the Prepaid program, GDR was approximately 84%, compared to approximately 77% for Shared Savings and FFS. Mercer assumed the change in GDR would be zero the first month the rates are in effect, increasing evenly over the next three months until an 84% GDR is achieved in May 2015. Per section 6.33 of the Bayou Health RFP, MCOs are required to allow members 60 days to transition medications after enrollment in the MCO. The extra 30 days is to allow time for the MCO to identify the member for such a transition. This adjustment is a downward adjustment to the Shared Savings claims data. Mercer's analyzed Shared Savings prescription drug experience and compared it to the spending on similar therapeutic classes of drugs in the Prepaid program. Mercer determined that achieving the same GDR levels would result in savings of 13%-16%. After adjusting for phase-in, the savings for rating year 2015 is 11%-13%. Tables 16 and 17 detail the savings breakdown by COA, both without and with the phase in period.

Rx Rebates

FFS and Shared Savings claims were reduced 1.5% for Rx rebates collected by the MCO. This factor was developed using Prepaid plans experience as reported in financial statements provided to DHH. Prepaid Encounters were taken as net of drug rebates, so no adjustment was necessary.

Outliers

As part of the State Plan, inpatient hospitals receive an additional payment for high-cost stays for children under six, called outliers. These payments are for inpatient stays with a total cost to the hospital in excess of $150,000, where the cost is determined based on the hospital's Neonatal Intensive Care Unit (NICU) or Pediatric Intensive Care Unit (PICU)-specific cost-to-charge ratio (CCR). DHH makes payments to a maximum of $10 million, annually. As payment of outlier liability is the responsibility of Bayou Health MCOs, this additional $10 million was built into the rates based on the distribution by rate cell observed in SFY11 and SFY12. The most recent outlier information received was for SFY13 payments, which Mercer analyzed and determined the claims payment distribution to be an anomaly compared to SFY11 and SFY12 experience that was more consistently distributed. Thus, Mercer came to the decision that utilizing data from SFY11 and SFY12 would provide a more representative basis for the future claims distribution patterns. Outliers added an average cost of $0.93 PMPM to the base data used in rate setting. Table 18 details the impact of outliers on the rates by rate cell.

GME

Mercer removed GME amounts in the FFS and Shared Savings data to be consistent with DHH's intention to continue paying GME amounts directly to the teaching hospitals. The

adjustment to remove GME from FFS and Shared Savings is part of the fee adjustment process for hospital claims. It is not explicitly calculated as a separate item. Mercer uses fee schedules that are net of GME in the fee adjustment process. Encounter data does not include GME payments and therefore no adjustment is required.

Data Smoothing

For certain rate cells, there were not enough MMs within each region to produce a statistically credible rate. For rate cells with less than 30,000 MMs per region, Mercer calculated a statewide capitation rate. Affected rate cells include:

- SSI newborns 0-1 years of age
- BCC, All Ages
- LAP, All Ages
- HCBS, All Ages
- CCM, All Ages

Voluntary Opt-In Adjustments

It is unclear at this time if there will be a material difference in the risk profile of the Opt-in population from the historical FFS population. Therefore, Mercer made no adjustments for selection risk in the development of the HCBS and CCM rates.

Non-Medical Expense Load

The actuarially sound capitation rate ranges developed include a provision for MCO administration and other non-medical expenses. Mercer reviewed historical Prepaid plan expense data and relied on its professional experience in working with numerous State Medicaid programs to develop the administrative load. The load for each rate cell was determined using a fixed and variable cost model. Under this model, a fixed administrative expense is attributed to each MM, which reflects program requirements, such as state-mandated staffing. Added to this is a variable administrative amount, based on claims volume. For pharmacy, 2% of claims cost was targeted, while 6.1% was targeted for medical. Maternity kick payment rate cells have only the variable medical administrative load. Previously, a percentage load was applied to all rate cells, with a smaller load being applied to maternity kick payments. This change results in retention loads that vary as a percentage by rate cell. See Appendix K for the percentage of premium allocated to total retention load in the rates. These percentages include all three components of retention: Administrative Costs, Margin, and Premium Tax. This methodology results in a higher allocation of administrative costs on the rate cells with higher utilization, which Mercer believes is more accurate in reflecting the drivers of plan administration requirements.

Mercer reviewed plan financial information provided by the Prepaid plans to develop administrative cost expectations. The development included allocations for increases in expenses including items such as additional case management due to claims volume and increases in staff compensation over time. The administrative development also included an expected increase in salary for the Behavioral Health Medical Director ($200,000), Program Integrity Officer ($100,000), and two Fraud and Abuse Investigators ($65,000 each). Final Administrative cost expectation was $21.78-$23.34 PMPM.

Additionally, provision has been made in these rates for a 2% risk margin calculated before applying any adjustment for FMP. Final rates also include provision for Louisiana's 2.25% premium tax.

Risk Adjustment

Risk adjustment will be applied to the rates in Attachment A to reflect differences in health status of the members served in each MCO using the Adjusted Clinical Groups (ACG) model. The risk adjustment process does not increase nor decrease the overall cost of the program, but can change the distribution across the various Bayou Health MCOs according to the relative risk of their enrolled members.

Federal Health Insurer Fee

Section 9010 of the ACA established a health insurance provider fee (HIPF), which applies to certain for-profit/tax-paying health insurers. For-profit Medicaid health plans are not exempt from the HIPF, which will become a cost of doing business that is appropriate to recognize in actuarially sound capitation rates.

At the time of this certification, many aspects of the calculation and application of this fee are not yet determined and/or finalized. These fees will be calculated and become payable sometime during the third quarter of 2016. As these fees are not yet defined by insurer and by market place, no adjustment has been made in the rate range development for the Bayou Health program. An adjustment and revised certification will be considered when the fee amount and impacted entities applicable to this rate period are announced in 2016.

Certification of Final Rate Ranges

In preparing the rate ranges shown in Attachment A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by DHH and its fiscal agent. DHH, its fiscal agent, and the Prepaid plans are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In

our opinion they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that the rates in Attachment A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. Rate estimates provided are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual Bayou Health MCO costs will differ from these projections. Mercer has developed these rates on behalf of DHH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c), and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Bayou Health MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Bayou Health MCOs for any purpose. Mercer recommends that any Bayou Health MCO considering contracting with DHH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with DHH.

This certification letter assumes the reader is familiar with the Bayou Health Program, Medicaid eligibility rules, and actuarial rate-setting techniques. It is intended for DHH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results.

Notes:

* The above analysis does not include payments to members who paid out-of-pocket for services before being enrolled in Medicaid.

1. Final retro-adjustment factor was set to a 1.0 factor for those instances where the observed retro-active factor resulted in a negative adjustment.
2. Retro-active period claims not credible as the LAP population entered into Bayou Health effective January 1, 2013. Assumes Family & Children experience for the LAP retro-adjustment factor.
3. HCBS waiver and Chisholm populations are new to the Bayou Health program and no retro-active claims experience is available to determine retro-active period adjustment factor.

Subject: Capitation Rate Range Certification for the Bayou Health Prepaid Program – Implementation Year (February 1, 2015 – January 31, 2016)

Dear Jaredd:

I, Jen Steele, Medicaid Deputy Director and Chief Financial Officer, for the State of Louisiana's Department of Health and Hospitals (DHH), hereby affirm that the data prepared and submitted to Mercer Government Human Services Consulting (Mercer) for the purpose of certifying the February 1, 2015 – January 31, 2016 Prepaid rates were prepared under my direction, and to the best of my knowledge and belief, are accurate, complete, and consistent with the data used to develop the capitation rates. This data includes calendar year (CY) 2013 fee-for-service (FFS) data files, MCO submitted encounter data, and supplemental information on payments made outside of Louisiana's Medicaid Management Information Systems (MMIS).

Mercer relied on DHH and its fiscal agent for the collection and processing of the FFS data, encounter data, and other information used in setting these capitation rates. Mercer did not audit the data, but did assess the data for reasonableness as documented in the rate certification letter.

The columns in the exhibit are as follows:

Base Data – The base data in these columns includes IBNR.
MMs – MMs for the CY13 period.
PMPM – Computed as the total paid amount divided by the total MMs. Statewide PMPMs were used where appropriate, as indicated in the rate certification letter.

Base Data Adjustments:
Annual Trend - (Low & High) – Annualized trend that is equivalent to the trend factor applied to the base data.
Trend Factor - (Low & High) – Trend factor that is equivalent to the compounded annualized trend applied to the base data.
Base Period Adj. – Overall base period adjustment applied to both the low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

A. A letter from the certifying actuary, who meets the qualification standards established by the American Academy of Actuaries and follows the practice standards established by the Actuarial Standards Board, that certifies that the final capitation rates or rate ranges meet the standards in 42 CFR §438.6(c).	Please refer to the certification letter dated August 11, 2015. All following page and exhibit references are specific to this certification.
B. The final and certified capitation rates or the final and certified rate ranges for all rate cells and regions, as applicable.	Please refer to Appendix A for a summary of all rate ranges by rate cell and region.
C. Brief descriptions of:

Subject: Louisiana Bayou Health Program – Specialized Behavioral Health (BH) Actuarial Certification for Capitation Rate Ranges Effective December 1, 2015 through January 31, 2016

Dear Jen:

The State of Louisiana (State) contracted with Mercer Government Human Services Consulting (Mercer), part of Mercer Health & Benefits LLC, to develop actuarially sound capitation rate ranges for use in the State's contracts with the managed care organizations (MCOs) for Medicaid Specialized BH services provided to Medicaid-eligible adults and children in the Bayou Health program. The rate ranges were developed for specialized BH services covered under the managed care program for Medicaid-eligible adults and children for the contract period, effective from December 1, 2015 through January 31, 2016 (rating period).

This letter presents an overview of the analyses and methodology used in Mercer's managed care rate range development for Medicaid services for the purpose of satisfying the requirements of the Centers for Medicare and Medicaid Services (CMS) in a manner consistent with CMS regulations, 42 CFR 438.6(c).

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate, and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government-mandated assessments, fees and taxes, and the cost of capital.

This letter describes the development of the draft rate ranges in Appendix B. The assumptions detailed in the memo illustrate the development of the midpoint rates for each rate cell on a statewide basis. The regional development of the rate ranges is included in the Appendices, which include the individual impacts of the programmatic change adjustments by region and rate cell.

Program Overview

The Louisiana Behavioral Health Partnership (LBHP) began March 1, 2012, and has operated under an at-risk capitation contract for the Adult population since the program inception. The Children's program has been administered on a non-risk basis by the Prepaid Inpatient Health Plan (PIHP). Effective December 1, 2015, the specialized BH services will be covered under the contracts with the Bayou Health MCOs. The initial rating period will be December 1, 2015 through January 31, 2016 to align with the remainder of the current Bayou Health rating period. Effective February 1, 2016, the specialized BH services will be integrated into the overall Bayou Health rating structure.

Separate capitation payments will be made for specialized behavioral health services effective December 1, 2015. The MCOs will continue to receive a payment for prior Bayou Health covered services under the Bayou Health rate cell structure. In addition, a separate payment will be made for eligible individuals for their specialized behavioral services under the current LBHP rate cell structure as outlined later in this letter.

Covered Populations

Bayou Health covers a broad array of Medicaid eligible populations. Specific information on the covered populations is contained in the contract. The following categories of aid (COA) are covered for a BH capitated payment under the contract and considered in rate setting:

- Non-Disabled Adults, Ages 21+
- Disabled Adults, Ages 21+
- Dually Eligibles, All Ages
- Non-Disabled Children, Ages 0-20
- Foster Care and Disabled Children, Ages 0-20

Mercer summarized the specialized behavioral health service utilization and cost data for the Medicaid eligible individuals into the rate cell structure. This structure is based on the prior LBHP rate structure for specialized BH services from Mercer's review of the historical cost and utilization patterns in the available experience.

The historical BH costs vary by age and eligibility category. Separate rate cells were designed for the Child and Adult populations. Non-Disabled populations have significantly lower BH costs compared to Disabled/Foster Care populations. As such, separate rate cells were created for the non-Disabled and Disabled/Foster Care populations. The dually eligible population is eligible for services where Medicare is the primary payer. As the Medicare crossover services will be excluded from the Bayou Health capitated program, a separate rate cell was necessary to address

the cost differences for the dually eligible populations. Due to the small number of dual eligibles under the age of 21, Mercer included all dual eligibles regardless of age into a single rate cell.

Populations that remain fee-for-service (FFS) or part of the non-risk program and are not covered under the capitation payment are as follows:

- Eligible under the Refugee Cash/Medical Assistance program
- Eligible under the Medicare Savings Program (Qualified Medicare Beneficiary, Specified Low-Income Medicare Beneficiary, Qualified Individuals, and Qualified Disabled Working Individuals)
- Eligible under the Emergency Services Only program (aliens who do not meet Medicaid citizenship/ 5-year residency requirements)
- Eligible under the Long-Term Care Medicare Co-insurance program
- Eligible under the Section 1115 Greater New Orleans Community Health Connection Waiver
- Eligible under the Family Planning Eligibility Option (FPEO) that provides family-planning-services
- Eligible under the Program of All-Inclusive Care for the Elderly (PACE), a community-based alternative to placement in a nursing facility that includes a complete “managed care” type benefit combining medical, social and long-term care services
- Adults residing in Intermediate Care Facilities for People with Developmental Disabilities (ICF/DD)
- Non-Medicaid adult on the eligibility file who is eligible for a Low-Income Subsidy program administered by the Social Security Administration
- Any Medicaid eligible person during a period of incarceration

Covered Services

The Bayou Health program will cover a broad array of specialized mental health and addiction services, including the following services covered under the State Plan:

- Inpatient Psychiatric Hospital services
- Psychiatric Emergency Room services
- Outpatient Psychiatric services
- Crisis Intervention services
- Community Psychiatric Support services
- Addiction services.
- Assertive Community Treatment
- Multi-systemic Treatment
- Medical Physician / Psychiatrist / Nurse Practitioner

- Psychosocial Rehabilitation
- Other BH Professional (Mental Health (MH) Providers and Clinics, Nurses, and Other Licensed Providers)
- Federally Qualified Health Center (FQHC)
- Psychiatric Residential Treatment Facility
- Therapeutic Group Home
- 1915(b)(3) Services - Case Conference

Medicaid eligibles receive Physical Health and other Medicaid-covered services from the Bayou Health MCOs or through the State's fee-for-service (FFS) program. The acute care portion of Bayou Health includes coverage for prescription drugs for both Physical Health and BH medications. As such, prescription drugs are not included in these capitation rate ranges nor any prescription drug considerations discussed in this letter.

Children who are enrolled in the CSoC 1915(c) waiver program or included in the 1915(b)(3) CSoC program will only be in Bayou Health for Psychiatric Residential Treatment Facility (PRTF), Therapeutic Group Home (TGH) and Substance Use Disorder (SUD) Residential services in terms of BH coverage. The other specialized BH services will be managed by Magellan. More information on CSoC considerations is included later in this letter. The State maintains a list of the individuals enrolled in the CSoC program as well as a waiver segment code on the eligibility records. This logic was utilized to exclude the requisite services from the rate development.

For the dually eligible individuals, Medicare crossover claims have been excluded from the base data and rate development. These services are paid directly by the State after coordinating with Medicare and have been excluded from the services covered under the capitation rates.

This actuarial certification is specific to the capitation rates for the Specialized BH portion of the Bayou Health program effective December 1, 2015 through January 31, 2016.

Rate Methodology

Overview

Capitation rate ranges for the Specialized BH services were developed in accordance with rate-setting guidelines established by CMS. One of the key considerations in the development of the rate ranges was the base data. The primary base data used to develop the rate ranges were managed care encounter data provided by the State.

The encounter data are submitted by the PIHP to the State's fiscal agent, Molina. Molina provided an extract of the encounter data to Mercer in March 2014 for use in the preparation of the Data

Book. The encounter data extract included recipient-level claims and utilization detail. The eligibility information used in the encounter data analysis is summarized from the State's eligibility file, which outlines enrollment segments for each member. The contents of the Data Book are consistent with the data summarized for the current LBHP rate period of March 2015 through November 2015 with the exception of additional breakouts by region. The decision was made to utilize the same base data for the December 2015 through January 2016 rate development and prepare updated Data Books for Specialized BH services with the use of 2014 data for the February 2016 rates consistent with the plan for the Bayou Health program.

Mercer reviewed the Specialized BH contract to identify covered services. Then, the following adjustments to the base data were evaluated:

- Trend factors to forecast the expenditures and utilization for the rating period
- Programmatic changes not reflected in the base data
- Managed care adjustments
- Administration and risk margin loading

The various steps in the rate range development are described in the following paragraphs.

Base Data

The base data used to establish the capitation rates are summarized in the Data Book. The Data Book contains demographic, cost, and utilization data related to specialized BH services only. The Data Book is included along with this certification letter.

PIHP Encounter Data

The State provided Mercer with 2012 and CY 2013 encounter data submitted by the PIHP for services delivered to adults (on an at-risk basis) and children (on a non-risk basis). Mercer used this data to support the rate calculations. After review of the data, Mercer determined that actual experience incurred from January 1, 2013 through December 31, 2013, paid through February 2014 was suitable for rate development and as noted consistent with the Data Book utilized in the development of the March 2015 through November 2015 rates. Data prior to this time period reflected lower volume of services as the adult managed care program began in March, 2012.

Mercer performed a review of the PIHP encounter data for the State. This review included:

- Checks for month-to-month consistency of claims and eligibility
- Checks for reasonability of the utilization and unit cost information
- Comparisons to PIHP financial data and historical FFS data

- Analysis of claims lag triangles

Note that Mercer has used and relied upon enrollment, eligibility, claim, reimbursement level, benefit design, and financial data and information supplied by the State and the PIHP. The State and the PIHP are solely responsible for the validity and completeness of these supplied data and information. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended rate-setting purpose. However, if the data and information are incomplete and/or inaccurate, the values shown in this report may differ significantly from values that would be obtained with accurate and complete information; this may require a later revision to this report.

Base Data Adjustments

After analysis of historical payment patterns and discussions with the State, Mercer was able to assess the accuracy and completeness of the information and estimate any necessary adjustments. Mercer applied adjustments to the encounter data so that they reflected the populations and services covered under the contract, including the considerations of the new mixed services protocol effective March 2015.

Mercer reviewed the PIHP encounter data to ensure they were appropriate for the populations and services covered. The following items were not included in the encounter data or were already deducted from the paid amounts in the encounter data, and therefore no further adjustment was necessary:

- Third-party liability recoveries are already deducted from the payments used in rate setting. No material amounts were paid outside the claim system.
- Copayments, coinsurance, and deductibles
- Disproportionate Share Hospital payments (AA.3.5)

Mercer understands that payment rates for Graduate Medical Education (GME) hospitals included in the claim data are consistent with applicable State fee schedule rates which do not include the GME portion of Inpatient payments. Because Mercer relied on the payment information included in the dataset submitted by the PIHP, the GME portion of Inpatient payments are not included in the base data and won't be included in the capitation rates. The State will continue to make supplemental payments to hospitals for GME, as applicable.

Completion factors were applied to the encounter data to reflect claims not yet adjudicated (see step AA.3.14 in the CMS Rate-setting Checklist). Financial lags were available separately for

Inpatient and all other services. Mercer compared the results of the encounter completion analysis to the financial lags to evaluate whether an encounter underreporting adjustment was necessary. .

For more information on the adjustments listed above, please refer to Section 4 of the Data Book included in this submission.

Other Base Data Considerations

Excluded Populations and Services

Certain adjustments were not necessary due to exclusions made in the data summarization process. These adjustments include:

- **Excluding non-covered populations** (for example, qualified Medicare beneficiaries, Medically Needy spend-down individuals, etc., see step AA.2.1) — Please see Data Book Section 2 for more information.
- **Excluding non-covered services** (for example, Physical Health services, 1915(c) Waiver services, etc., see step AA.3.1) — Please see Data Book Section 3 for more information.

State Plan Service Considerations

The rate development considers expected costs for State Plan services delivered in a managed care environment. In some cases for the Adult population, the prior PIHP provided an approved service in-lieu-of a State Plan service. In these cases, Mercer has reflected the costs of the State Plan service and applied a managed care discount to arrive at total costs consistent with actual paid expenses. The table below identified the key services priced using this methodology.

2013 Paid Encounter Claims

State Plan	In Lieu Of	Non-Dual	Dual Eligble	Encounter Unit Cost	State Plan Unit Cost	Managed Care Discount
Inpatient	IP IMD (21-64)	$ 13,021,841	N/A	$ 489.45	$ 646.94	-24%
Acute Detox Facilities	SUD Residential	$ 4,163,515	$ 338,654	$ 67.14	$ 145.51	-54%
ER	Crisis	$ 141,408	$ 25,365	$ 81.79	$ 249.12	-67%

The unit costs for the in-lieu-of services was less than the alternative State Plan services, demonstrating the cost-effectiveness of these services.

New Mixed Service Protocol

The State has implemented changes to the services classified as specialized behavioral health services. Previously, Institutional services (Inpatient, Outpatient, and ER) were covered as specialized behavioral health services under LBHP if the claim was identified with a qualifying BH

diagnosis. Effective March 1, 2015, only claims from BH facilities or services provided by BH specialists will be classified as specialized behavioral health services, as described below.

- **Inpatient and Outpatient services —** BH facilities include freestanding psychiatric hospitals, general hospital distinct part psych (DPP) units, MH clinics and rehab facilities, substance use disorder facilities, residential settings, and other BH providers.
- **Professional BH services —** BH specialists include physicians, doctors of osteopathic medicine (DO), and advanced practice registered nurses with specialty in psychiatry, as well as psychologist and licensed MH professionals. Unlicensed BH providers are covered for Rehab services only. Coverage includes services provided by BH specialists regardless of service location, including consults and services provided by a BH specialist in a general Inpatient or ER setting. Servicing provider specialty (as opposed to billing provider) is used to determine classification of specialized behavioral health services. Services billed and provided separately by non-BH specialists (such as general nurse practitioner) where place of service is a BH facility are classified as Acute care services under Bayou Health and not classified as specialized behavioral health services.
- **ER Services —** ER services are not classified as specialized BH, except for professional components billed by BH specialists or when the facility component is billed by a BH facility (for example, a freestanding psychiatric facility or DPP unit billing revenue code 450).
- **Federally Qualified Health Center (FQHC) and Rural Health Clinic (RHC) services —** FQHC and RHC services are covered in full when any service provided during a visit is provided by a BH specialist. All other FQHC and RHC visits are not classified as specialized BH services.

The details of the mixed service protocol are summarized in the Data Book. The net impact of the changes to the mixed service protocol resulted in approximately $13.8 M of historical 2013 encounter data being reclassified as basic BH, which was already accounted for in the Bayou Health February 2015 rates.

Trend

Trend is an estimate of the change in the overall cost of providing health care services over a finite period of time (AA.3.10). Capitation rate ranges are actuarial projections of future contingent events and a trend factor is necessary to estimate the expenses of providing health care services in the future rating period.

To develop the December 1, 2015 through January 31, 2016 rate ranges using the CY 2013 encounter data as a base, Mercer projected costs based on a review of historical experience, emerging trends, and expected costs and utilization during the rating period. The midpoint of the

base data was July 1, 2013. The midpoint of the rating period is January 1, 2016, which necessitated 30 months of total trend to project from the base time period to the rating period.

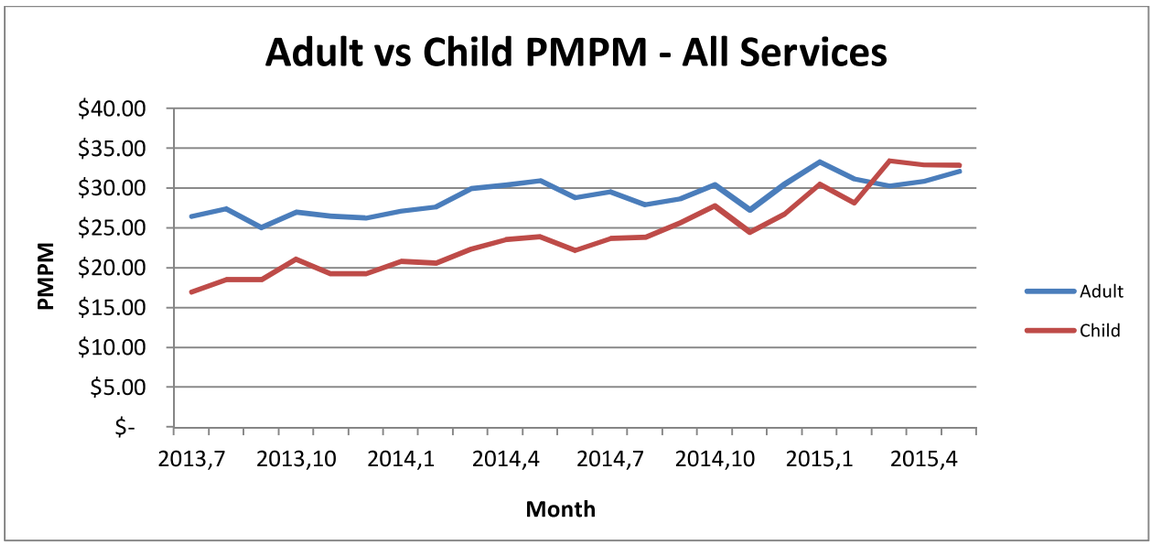
Trend Data Sources

As more recent utilization and cost data has become available for Specialized BH services beyond the 2013 base data period, Mercer focused the trend analysis on the actual trend patterns from the midpoint of the base data period (July 2013) through the most recently available data through May 2015.Mercer created rolling-average Per Member Per Month (PMPM) summaries using the managed care encounter data for various time intervals (three month, six month, nine month and 12 month) by region, rating group, and major service category.

The trend analysis focused on the emerging PMPM trends, which encompassed both the unit cost and utilization components. Each rate cell in the State experience exhibited unique trends reflecting the underlying characteristics of the population and the mix of services received. The CY 2014 and emerging 2015 data indicated significant increases in utilization for many services. The trends for the community psychiatric and psychosocial rehabilitation service categories exhibited significant PMPM growth from the beginning of 2013 through May 2015. Given the limited projection period from the end of the available data (May 2015) through the midpoint of the rate period (January 1, 2016), Mercer assumed prospective trend patterns for the Specialized BH services consistent with the trend levels exhibited in the emerging data through May 2015.

Mercer reviewed trend information in other state's Medicaid programs and national indices as reasonability checks. These sources were reviewed, but the trend observations in the LA specific program experience were determined to be the most credible base for future projections. The significant utilization trends exhibited in the LA program experience are higher than other state programs that have higher established historical utilization levels.

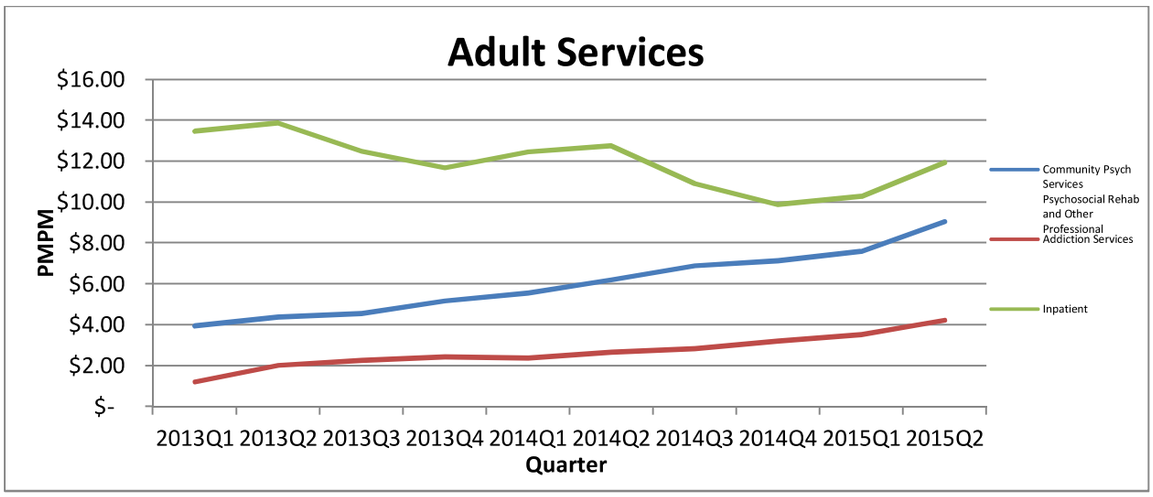
Trends observed in the data through May 2015 indicate significant growth in the overall service utilization for all regions and rate cells, particularly the children's services. The graphs below show quarterly PMPM growth between CY 2013 and May 2015.



The PMPM progression illustrates that, while Adult trends appeared to mitigate during 2014 from the historic growth, trends in the first two quarters of 2015 have re-emerged for certain services. While children's services have historically been low compared to that of adults, recent utilization growth has driven notably high PMPM trends in 2014 and 2015. Mercer developed trend assumptions at the region and category of service level based on the specific trend patterns reflected in the data. Generally, the trend drivers were consistent by region. As such, the trend observations are provided below on a statewide basis specific to each population.

Adult Trend Observations

The adult trends are primarily driven by utilization growth in Community Psych, Psychosocial Rehab and Addiction Services throughout 2013 and into the first two quarters of 2015. There was significant growth of community based services starting in CY 2013 that has continued into 2015. Utilization of addiction treatment services has experienced more significant trends in 2015. The higher trends for community-based services were partially offset in 2014 by decreasing utilization of Inpatient services. The table below shows the trends in the historic quarterly adult PMPMs for these three categories of service.



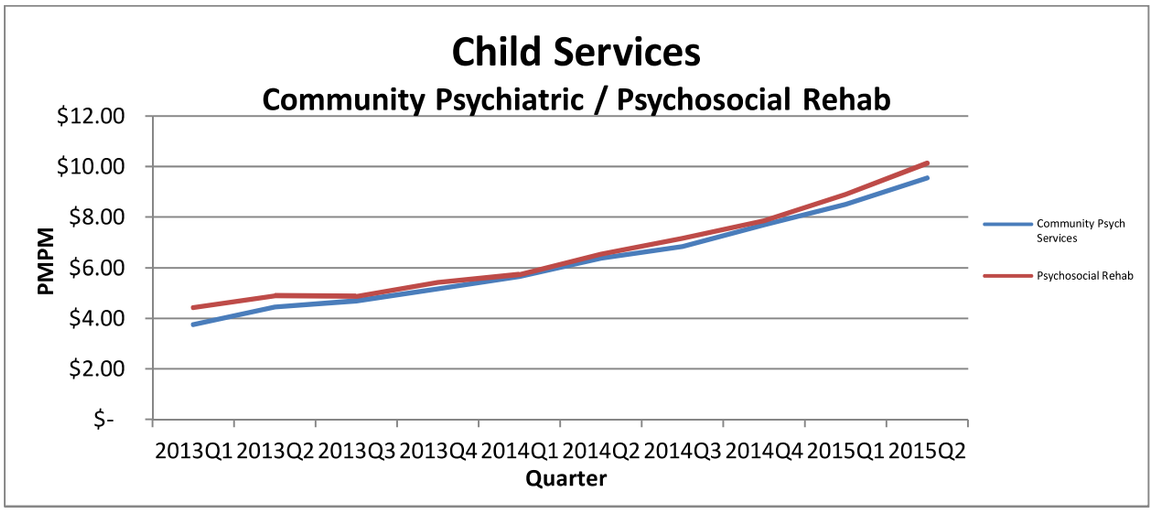
The composite annual PMPM trends for each category of service for adults are listed in the table below. Mercer grouped similar categories of service that had similar trend patterns together to increase credibility for the smaller categories of service. Trends were applied for 30 months from the midpoint of CY 2013 to the midpoint of the December 1, 2015 through January 31, 2016 rating period.

Categories of Service	Annualized PMPM Trend
Inpatient, Inpatient Detox	-3.5%
Emergency Room, Outpatient, Medical Physician/Psychiatrist, Other Professional, FQHC,	18.2%
Community Psychiatric Support, Psychosocial Rehab, ACT	22.7%
Addiction Services	39.5%
Crisis Intervention, MST, and Other Services	31.3%
Total	11.5%

Child Trend Observations

The Child trends are driven by utilization growth in Community Psych and Psychosocial Rehab, and recently Other Professional services. Significant growth in these services was observed throughout the entire period between CY 2013 and the early months of CY 2015. Based on the continued growth into CY 2015, Mercer expects higher trends to continue throughout CY 2015, and into the rating period for children's services. The table below shows the trends in the historic

quarterly child PMPMs for the categories of service that are driving the growth in children's services.



The overall trend projection for each category of service for children is listed in the table below.

Categories of Service	Annualized PMPM Trend
Inpatient, Inpatient Detox	9.0%
Emergency Room, Outpatient, Medical Physician/Psychiatrist, Other Professional, FQHC,	18.6%
Community Psychiatric Support, Psychosocial Rehab, ACT	42.1%
PRTF	16.6%
Crisis Intervention, MST, Addiction Services, Other Services, Therapeutic Group Home	12.6%
Total	29.7%

The overall annualized projected BH service trend assumption is 11.5% for adults, 29.7% for children, or 24.4% overall including increases in both utilization and general cost inflation. Mercer recognizes that prospective trends can vary based, on fluctuations in service utilization and has considered this variability in the development of the trend ranges. To project the final rate ranges, Mercer varied the trend assumptions by varying the annualized trend from an overall annual rate of 21.1% at the Lower Bound to 27.0% at the Upper Bound. The Lower Bound represents lower

rates of growth as initial period trends moderate and the Upper Bound represents continued utilization growth at the higher levels observed during the initial years of the program.

Programmatic Changes

Mercer and the State discussed programmatic changes that may impact the managed care contract. This included a review of changes to the State's hospital fee schedules, adjustments to account for changes in population mix, rate changes for certain providers after the 2013 base data time period, and adjustments for final decisions on program coverage after the development of the base data. The following sections describe the analysis for each program change as well as the statewide impact of the adjustment. Mercer has included Appendix C which details the percentage and PMPM impact of each adjustment by region and rate cell.

Inpatient Hospital Fee Schedules

Inpatient Hospital fee schedules have changed in Medicaid from the levels reported in the base data. Most notably, rates for certain public hospitals changed as a result of the public/private partnership. The changes to the hospital rates represent both increases and decreases depending on the hospital.

Mercer has included an adjustment to the capitation rates to account for the changes to the hospital reimbursement, including the public/private partnership. In order to account for this change, Mercer analyzed the base data by hospital and region separately for adults and children services. For adults, Mercer compared the PIHP fee schedules and per diem costs reported in the encounter data to the new State Medicaid fee schedule. Based on this comparison, Mercer determined no adjustment was needed for the Adult rates as the PIHP fee schedule underlying the encounter data generally aligned with the new State Medicaid fee schedule. For children, however, hospital reimbursement levels in the encounter data generally followed historic State Medicaid fee schedules. As a result, an adjustment was necessary to reflect changes between the historic and the new fee schedule for the children's rates.

Overall, this represents a 0.3% increase to the rate ranges and impacts child rating groups only.

Medication Management Rate Change

Effective January 2013, the prior Medication Management procedure code of 90862 was eliminated and the services were required to be billed under General Evaluation and Management codes 99211-99214, 90863. These codes, as reflected in the base data, were reimbursed at lower rates averaging approximately $47 per unit than the prior medication management services in 2012. The PIHP revised the fee schedule in 2014 to adjust the fees for medication management

services up to prior historical levels. The State indicated it expects providers to continue to be paid at the higher reimbursement level under the Bayou Health program.

Mercer analyzed 2014 encounter data by region and observed an increase in the average reimbursement rate for these services to roughly $73 per unit. Mercer calculated the program change impact based on reported service utilization in each region.

As the Medication Management service costs are captured in both the Medical Physician/Psychiatrist category and the Other Professional category along with other procedures, Mercer calculated a proportionate program change to each category to incorporate the expected impact on the broader service category for this fee increase. Specifically, Mercer applied adjustments to Medical Physician/Psychiatrist and to Other Professional categories of service.

Overall, this represents a 1.4% increase to the rates and impacts all rating groups.

Population Mix Considerations

Disability Medicaid Closure

In 2014, the State eliminated coverage of the Disability Medicaid category identified by Type Case code 125. This group included coverage for approximately 10,000 aged, blind and disabled adults. Although this coverage category was discontinued, approximately 50% of individuals previously eligible are expected to enroll through either provisional Medicaid (Type case 211) or Supplemental Security Income eligibility. Mercer evaluated the historical costs for the Disability Medicaid population identified under Type Case code 125 and compared this group to the remaining population in the Disabled Adult and Dual Eligible Adult rates cells. The Disability Medicaid group had higher-than-average costs in each of the rate cells. Based on the assumption that not all individuals previously covered under Disability Medicaid individuals would reenroll (which is supported by emerging 2014 enrollment), Mercer calculated a downward adjustment to reflect the lower average cost of the remaining population.

LaCHIP – Family and Children

Subsequent to the summarization of the CY 2013 base data, the State informed Mercer of an eligibility group that will be covered under the managed care program for specialized BH services but was not included in the CY 2013 base data. Mercer analyzed historic CY 2013 claim experience for this population group and developed an adjustment factor that reflects the PMPM impact to the existing CY 2013 average PMPM.

The impact of these two population adjustments is a decrease of 0.5% to the rates overall and impacts adult rating groups only.

Retroactive Eligibility Adjustment

The retroactivity considerations for Specialized BH services will mirror the coverage responsibility of the Bayou Health plans for acute care services. As a reminder, beginning in February 2015 members granted retroactive eligibility were capitated retroactively, based on their eligibility for Bayou Health, for up to 12 months prior to enrollment in an MCO. The MCO selected by these members will then receive one capitation payment per month of retroactive enrollment, and will be liable for all claims incurred during this retroactive eligibility period. For Specialized BH services this policy goes into effect on December 1, 2015. Mercer developed an adjustment factor to apply to the base data in the capitation rate development.

The retroactive eligibility adjustment was developed specific to each rate cell as utilization levels for specialized BH services varied between retroactive and non-retroactive enrollees. Retroactive enrollment in any given rate cell will generate the same capitation payment per month to the MCO as any other enrollee in that same rate cell. The factors were developed at a rate cell level on a statewide basis (i.e., all regions used the same factors). The calculation relied upon retroactive claims PMPM, unique enrollee counts, and the average duration to develop the expected increase to Bayou Health claims.

Mercer reviewed the average duration of enrollees who were retroactively enrolled during 2013. The program change was calculated by summarizing the PMPM for the retroactive eligibles and blending it with the respective rate cell PMPM based on enrollment. The program change adjustment reflects the impact on average rate cell PMPMs as a result of adding these retroactive eligibles. The table below summarizes the impact of the Retroactive Eligibility Adjustment.

Population	Adjustment
Non-Disabled Adults	-0.1%
Disabled Adults	0.2%
Non-Disabled Children	-0.2%
Disabled Children	-0.1%
Dually Eligibles	0.0%

Other Populations

The State has outlined recent decisions to further clarity the Bayou Health covered populations for specialized BH services. As these populations represent a change from what was captured in the base data or Data Book, Mercer analyzed the impact on the PMPM for these changes for the final rates. The table below summarized the impact for the following population changes.

- Coverage of Spend-down populations

- Coverage of Medically Needy populations
- Removal of Denied SSI, Forced Benefits and Terminated SSI populations

Population	Adjustment
Non-Disabled Adults	-0.3%
Disabled Adults	-0.0%
Non-Disabled Children	+0.0%
Disabled Children	+0.0%
Dually Eligibles	0.0%

These other population considerations added 23,165 member months (or 0.2%) to the populations included in the Data Book.

Overall, the adjustments for Disability Medicaid Closure, LaCHIP – Family and Child, Retroactive Eligibility and Other Population considerations represent a decrease of 0.6% to the capitation rate ranges on a statewide basis.

Permanent Supportive Housing Provider Rate Increase

Subsequent to CY 2013, the State implemented a 5% rate increase to certain providers delivering community psych services to individuals in the permanent supportive housing (PSH) program. Using the list of PSH providers from the State, Mercer summarized historic cost and utilization data for community psych services for these providers and calculated the impact of the 5% increase. Mercer applied this impact to rating group and region based on historic utilization patterns.

Overall, this represents a 0.1% increase to the rates and impacts all rating groups.

1915(c) CSoC Regional Expansion

As noted earlier in this letter, the CSoC population will be generally excluded from Bayou Health for specialized BH services. Magellan will continue to administer this program. From 2013 through early 2015, the CSoC population has expanded. Mercer evaluated the implications of this expansion on the rate cells for the Bayou Health program.

The State submitted an amendment to the 1915(c) CSoC waiver to increase the number of waiver slots and expand the waiver program statewide starting in 2014. Upon expansion, certain Children previously classified in a disabled or non-disabled rating group shifted to the CSoC program. Mercer calculated the volume of CSoC transitions by comparing the average 2013 CSoC

enrollment to emerging levels as of April, 2015. The growth by region is outlined in the table below:

CSoC Enrollment	Average 2013	As of April, 2015
Gulf	198	449
Capital	214	426
South Central	152	341
North	491	510
Statewide	1,054	1,726

Mercer then analyzed the historic Specialized BH expenses associated with CSoC enrollees and noted that it is materially higher when compared to the PMPM for other child rating groups ($554 PMPM vs $18 PMPM, respectively). Because of this differential, the movement of those higher needs children out of disabled or non-disabled rating groups resulted in a reduction in the average PMPM by region. The transition analysis was performed on a regional basis using the underlying PMPMs for each region as well as CSoC-specific PMPMs for each region.

Overall, this represents a decrease of 1.8% to the rates and impacts child rating groups only.

Bayou Retained Liability for CSoC Specialized BH Services

As individuals change eligibility status between the CSoC program and other Bayou rate cells, the State has implemented policies that warrant program change consideration from the Data Book.

Month One Claim Liability

If individuals transition from a Bayou rate cell to CSoC after the first day of the month, Bayou will retain liability for specialized BH services for the remainder of that month. After the first month of CSoC eligibility, claim liability for specialized BH services will no longer be the responsibility of Bayou. For the capitation rate development, Mercer has assumed full capitation payment for Specialized BH services will be made to the Bayou Health MCOs for the first month for which they are identified for the CSoC waiver, even if the individual is only enrolled in CSoC for a partial month.

To calculate this adjustment, Mercer summarized the initial month of specialized BH services and eligibility for those individuals transitioning to CSoC. Mercer then compared this data to that of non-Disabled and Disabled children to develop an appropriate PMPM adjustment. Because individuals transitioning to CSoC typically have higher utilization levels than that of non-Disabled

or Disabled children, this coverage change results in an upward PMPM adjustment to the costs captured in the Data Book.

SUD Residential/PRTF/TGH Coverage
All SUD Residential, PRTF and TGH services delivered to CSoC individuals will remain with Bayou Health regardless of CSoC eligibility status. Mercer summarized SUD Residential, PRTF and TGH claims for CSoC eligibles and included these expenses in the respective non-Disabled Child or Disabled Child rate cells. This coverage decision results in an upward adjustment to the costs captured in the data book.

The impact of these two considerations is a 0.8% increase to the rates overall and impacts child rating groups only.

Historic Outpatient Cost Settlements
The State has historically implemented fee schedule adjustments for various outpatient services. For outpatient providers, the fee schedule adjustment process includes an estimation of cost settlements that are not captured in the historic base data. Since cost settlements will become the responsibility of the MCOs under managed care, an adjustment to the Bayou Health rates was necessary. Because outpatient services do not constitute a material portion of the service array for Specialized BH, this adjustment was not expected to be material.

To calculate the historic outpatient cost settlement impact, Mercer analyzed provider-level cost settlement information provided by the State. Comparing this information to claim payment data, Mercer calculated the historic cost settlement impact by provider. These cost settlements were included as a program change to the Specialized BH portion of the Bayou Health rates.

Overall, this represents a slight positive impact, rounded to 0.0%, to the rates and impacts all rating groups.

PRTF Per Diem Adjustment
The State informed Mercer of two PRTF providers that have historically been subject to risk sharing arrangements that have had recent per diem changes. The prior risk sharing process resulted in additional payments to the providers as the per diem documented in the cost reports was higher than the interim rates. Mercer has built in consideration of provider specific rates for these providers based on the cost report per diems.

To calculate the impact, the State provided Mercer with the risk sharing calculations that were based on base paid and final targeted per diem rates for these two providers. The final cost

impact was calculated by another firm on behalf of the State. Mercer reviewed these calculations for reasonability but did not audit them. Mercer leveraged the final calculations to determine the net impact to the CY 2013 time period to develop the program change impact. Mercer incorporated the expected cost for the per diem change based on utilization during the 2013 time period and applied an upward adjustment to the PRTF COS.

Overall, this represents an increase 0.2% to the rates on a statewide basis and impacts child rating groups only.

Inpatient Concurrent Review

Based on the contract with the State, Magellan currently authorizes Inpatient stays up to seven day increments, and will be responsible for any current Inpatient authorization period that extends beyond the effective date of December 1, 2105. The Bayou Health MCOs will be responsible for concurrent review of any open authorizations and will assume responsibility for the inpatient stay after the Magellan authorization period ends.

Mercer analyzed the impact of transitioning the responsibility for the concurrent review portion of IP stays that were authorized in the prior month by analyzing 2014 and 2015 claims data. As the Data Book is summarized based on the service begin date for the inpatient stay, this transition of responsibility in the middle of stays that cross-over December 1, 2015 creates an additional liability for the Bayou Health program. This adjustment was applied for one month as only December 2015 will be impacted by the transition from Magellan to Bayou.

Mercer understands that Magellan authorizations are typically seven days. Mercer has assumed any concurrent reviews and continued authorizations by Magellan would occur in seven day increments. As such, Mercer analyzed the average monthly volume of inpatient expenses that start in one month and continue into another month and segmented the stay into a period that concludes Magellan's coverage based on seven day increments with the remainder of the stay transitioning over to Bayou Health. For example, a stay that began on November 14th and continued through December 12th was assumed to be Magellan's responsibility from November 14th through December 5th (first 21 days, 3 7-day increments) with the December 6th through the 12th as the responsibility of the Bayou Health plan.

While this adjustment is only expected to impact the December 2015 coverage month as the average length of stay is approximately 7 days, the adjustment has been scaled to impact half of the rating period of December 2015 and January 2016.

Average monthly expense associated with remainder of stays	$238,000

Average monthly inpatient expense	$5,143,000
Average monthly inpatient impact associated with continuing stays	4.6%
Final impact to the rating period (impact to one of two months only)	2.3%

The table below summarizes the impact by rate cell across all service categories.

Population	Adjustment
Non-Disabled Adults	0.5%
Disabled Adults	1.0%
Non-Disabled Children	0.2%
Disabled Children	0.2%
Dually Eligibles	0.1%

Elimination of the 1915(i) Program Authority and Amendment of the State Plan

In order to accelerate receipt of medically necessary specialized mental health services for adults and make community-based LMHP services available to more individuals, the State intends to transition services currently in the 1915(i) to the Medicaid State Plan. The prior 1915(i) authority limited the availability of certain services to adults requiring acute stabilization or meeting certain functional criteria for a major mental disorder and the seriously mentally ill (SMI). The services covered under the 1915(i) included community psychiatric services including ACT, psychosocial rehab services, and services provided by other licensed mental health professionals. Another aspect of the 1915(i) program was the requirement of an independent assessment to confirm an individual met the population criteria before services could be received.

While the services will be covered under the State Plan, individuals will need to meet medical necessity criteria in order to be authorized for the services. Mercer understands the medical necessity criteria for community psychiatric and psychosocial rehab services will generally align with the diagnosis criteria associated with major mental disorders and SMI. The criteria for other licensed mental health professionals will apply to a broader segment of the covered population and not be specific to major mental disorders or SMI.

Mercer has reviewed the changes to the delivery of these former 1915(i) services with Mercer clinicians and policy consultants and identified two specific rate considerations.

- Elimination of the Independent Assessment will likely result in individuals accessing services more quickly. The State has indicated that individuals have experienced on average a 30-day wait period for services while they await the independent assessment. Mercer analyzed the historical claims data to identify the subset of the 1915(i) users that were new to the program and expected to utilize more services in a 12-month period if the independent assessment was eliminated. Specifically, Mercer evaluated the individuals

who utilized services up through December 2013 and made an assumption about the number of clients who utilized services in December that would have utilized more services had their authorizations started earlier in the year. For example, individuals with 12-months of annual utilization were not impacted by the change, but 87% of the individuals with authorizations starting in December were assumed to use an additional month of service. The summary below shows the program change calculation.

Total 1915(i) recipients in 2013	5,555
Subset of recipients that projected to receive an additional month of service	1,363
Average monthly cost of 1915(i) services	$587
Annualized program change impact	$799,868
Total 2013 1915(i) expenses	$9,753,804

- Expanded access to services provided by other licensed professionals (OLP) will likely result in an increase to the penetration rate over time for other professional services. Individuals will still need to meet medical necessity criteria to access other professional services, but more individuals are expected to meet the criteria than historically when the 1915(i) services were limited to SMI or major mental disorder. To evaluate the potential change in utilization, Mercer reviewed the service utilization and penetration rates for other states where other professional services have been covered in the State Plan. The penetration rates in these other states are higher for adults indicating broader utilization of the services. The penetration rate findings are as follows:

2013 Penetration Rate for OLP Services in Louisiana	2.5% of Adults
Penetration Rate for similar OLP Services in Other States	Up to 10% of Adults

Mercer assumed the utilization of these services would increase over time essentially modeling a two-fold expansion of these services from November 2015 to January 2017. The utilization has been assumed to progressively increase over time as provider capacity may need to be developed to meet the demand as individuals understand the availability of these services.

Projected November 2015 users based on emerging data	3,549
Projected January 2017 users	7,097
Total new users in rating period for December 2015 and January 2016	760
Average monthly cost of services provided by other licensed professionals	$82

Annualized program change impact ($62,455 multiplied by 6)	$374,733
Total 2013 services provided by other licensed professionals	$6,563,731

This issue will continue to be monitored and evaluated as part of future rate-setting exercises as more data becomes available. The overall impact of the adjustment to account for the elimination of the 1915(i) authority and coverage of these services under the State Plan is a 0.6% impact overall and impacts the adult rate cells only.

The overall impact all of all the programmatic changes described above is a 1.3% increase to the rates. Again, the regional and rate cell impacts of these changes are summarized in Appendix C.

1915(b)(3) Services

The historical utilization of Physician Case Consultation services has been minimal in the initial years of the program. As such, the 1915(b)(3) rate for this service is essentially $0.00 on a PMPM basis. The service utilization will continue to be analyzed and the rate adjusted accordingly, as necessary. This is within the requested waiver authority of $0.13 PMPM.

Managed Care Assumptions

Mercer evaluated whether additional adjustments were necessary to address changes to utilization as a result of care management practices. As the adult encounter data are from a period of time when capitated managed care was in operation, Mercer did not incorporate any further adjustment for future changes as a result of managed care. Similarly, Mercer made no adjustment to the Children's capitation rate calculations for additional impact of managed care. While the data from the Children's program are from a non-risk setting, the current PIHP did perform utilization review and care management of the Children's population under the non-risk contract. Also, the two-month rating period of December/January does not provide sufficient time to impact the service utilization patterns.

Administration and Risk Margin Loading

Mercer included an assumption for administrative expenses under a managed care program with particular consideration for the impact of integration with the existing Bayou Health acute care program. The State provided Mercer with anticipated staffing requirements for the upcoming Bayou Health contract period beginning December 1, 2015. Mercer reviewed the behavioral health staffing requirements as they apply to each MCO participating in the Bayou Health program. Each staffing position was evaluated to determine if it would be already fulfilled within the current Bayou health program, and therefore would not need to be considered as part of the behavioral health program. The administrative costs for the required staffing positions were

modeled based on wage and other employee-related expense information from the Bureau of Labor and Statistics. Mercer also included consideration for MCO overhead for these staffing positions. Mercer developed a PMPM cost expectation for these additional staffing needs and converted the PMPM to a percentage based on the final service cost projection underlying the rates.

Based on this review, Mercer included a general administrative allowance of 8.0%, which is similar to the prior administrative assumption under the current adult capitation rates. This is due to the fact that the State is now contracting with multiple MCOs rather than just one. In addition to the general administrative allowance, an underwriting gain/risk margin of 2.0% has been included in the capitation rates. The administration and risk margin load factor (AA.3.2) is expressed as a percentage of the gross capitation rate (that is, premium) before premium tax adjustment, and is consistent with the current Bayou Health rates.

Health Insurer Provider Fee Consideration

The State plans to address the Health Insurer Provider Fee and associated implications of non-deductibility through a retrospective payment once the fees are known for the impacted premium years. As such, no consideration has been made for the fee in these capitation rates. Further discussion between the MCOs and the State will occur as fee notices become available from the IRS for the respective premium year.

Premium Tax Adjustment

Louisiana Statute 22:842 requires businesses issuing life, accident, health or service insurance or other forms of contracts or obligations covering such risks to pay certain premium taxes. The tax for businesses with revenue exceeding $7,000 amounts to 2.25% of gross annual premiums. The State has determined that the PIHP contract for the Medicaid Adult capitated BH program is subject to this taxation. This is a uniform, broad-based fee imposed on all health maintenance organizations and preferred provider organizations and all lines of business.

This premium tax is a legitimate cost of doing business in the State of Louisiana for Medicaid managed care organizations and PIHPs, and reasonable to include in the consideration of actuarially sound capitation rate ranges. Since this is a cost of doing business in the State, Mercer included consideration for this tax in the rate range development.

The premium tax adjustment is expressed as a percentage of the gross capitation rate (that is, premium). Mercer applied a 2.25% upward adjustment to the rate to account for the premium tax.

Rate Ranges

In order to develop the rate ranges, Mercer varied the trend assumptions outlined above to reflect the potential fluctuations in service utilization growth beyond observed experience. The lower bound trend accounts for mitigation of trend from the observed early 2015 levels, whereas the upper bound reflects higher consideration of trends from 2015 Mercer recognizes that prospective trends can vary based, not only on fluctuations in service utilization but also on the achieved degree of care management. Variation in these trend assumptions results in a rate range of approximately 5.9% below the 50th %-ile rate for the Lower Bound and 5.9% above the 50th %-ile rate for the Upper Bound.

The rate ranges can be found on Appendix B.

Rate Development Overview

To provide additional detail on the rate development, Mercer has provided an overview of the adjustments applied to each rate cell in Appendices B and C. The exhibits present the breakdown of the assumptions used to calculate the 50th %-ile rates within the actuarially sound rate ranges for each region.

Rate Certification

In preparing the rate ranges shown in Appendix B for the December 1, 2015 through January 31, 2016 contract period for the Louisiana BH program, Mercer has used and relied upon enrollment, eligibility, claim, reimbursement level, benefit design, and financial data and information supplied by the State and the PIHP. The State and the PIHP are solely responsible for the validity and completeness of these supplied data and information. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended rate-setting purpose. However, if the data and information are incomplete and/or inaccurate, the values shown in this report may differ significantly from values that would be obtained with accurate and complete information; this may require a later revision to this report.

Because modeling all aspects of a situation or scenario is not possible or practical, Mercer may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. Mercer may also exclude factors or data that are immaterial in our judgment. Use of such simplifying techniques does not, in our judgment, affect the reasonableness, appropriateness, or attainability of the results for the Medicaid program. Actuarial assumptions may also be changed from one certification period to the next because of changes in mandated requirements, program experience, changes in expectations

about the future, and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable, inappropriate, or unattainable when they were made.

Mercer certifies that the rate ranges in Appendix B, were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid-covered populations and services under the managed care contract. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rate ranges developed by Mercer are actuarial projections of future contingent events. All estimates are based upon the information and data available at a point in time, and are subject to unforeseen and random events. Therefore any projection must be interpreted as having a likely, and potentially wide range of variability from the estimate. Any estimate or projection may not be used or relied upon by any other party or for any other purpose than for which it was issued by Mercer. Mercer is not responsible for the consequences of any unauthorized use. Actual MCO costs will differ from these projections. Mercer has developed these rate ranges on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c) and accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by the MCOs for any purpose. Mercer recommends that the MCOs analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with the State.

The State understands that Mercer is not engaged in the practice of law, or in providing advice on taxation matters. This report, which may include commenting on legal or taxation issues or regulations, does not constitute and is not a substitute for legal or taxation advice. 7. Other Rate Development Considerations	
A. All adjustments to the capitation rates, or to any portion of the capitation rates, should reflect reasonable, appropriate, and attainable costs in the actuary's opinion and must be included in the rate certification. CMS notes that adjustments that are performed at the end of the rate setting process without adequate justification might not be considered actuarially sound.	Please see Actuarial soundness definition on page 1, as well as the rate certification section on pages 24-26.
B. The final contracted rates should either match the capitation rates or be within the rate ranges in the actuarial certification. This is required in total and by each rate cell.	This letter certifies the rate range. Rates are being set at the 50th percentile for all rating categories and illustrated on Appendices A and B.

Subject: Louisiana Bayou Health Non-Emergency Medical Transportation (NEMT) Services – Full Risk-Bearing Managed Care Organization (MCO) Rate Range Development and Actuarial Certification for the Period December 1, 2015 through January 31, 2016

Dear Ms. Steele:

The Louisiana Department of Health and Hospitals (DHH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for NEMT services provided under the State of Louisiana's Bayou Health program. NEMT capitation rate ranges were developed for the period December 1, 2015 through January 31, 2016. These rates were developed for individuals that received specialized behavioral health services under the Bayou Health program, but received physical health services under Louisiana fee-for-service (FFS) Medicaid. This population was classified into the following rate cells: Chisholm Class Members (CCM), Home- and Community-Based Services (HCBS) Waiver members, and Other. The Other rate cell is constructed of dually eligible individuals and Long-Term Services and Support (LTSS) recipients who are not in either of the other two NEMT rate cells. This letter provides an overview of the analyses and methodology used in the development of the NEMT rate ranges, as well as a certification to the actuarial soundness of the rate ranges presented.

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and taxes, and the cost of capital. Note: Please see pages 8-9 of the August 2005, Actuarial Certification of Rates for Medicaid Managed Care Programs, from the American Academy of Actuaries, http://www.actuary.org/pdf/practnotes/health_medicaid_05.pdf.

Rate Methodology

Overview

NEMT capitation rate ranges were developed in accordance with rate-setting guidelines established by the Centers for Medicare & Medicaid Services (CMS). Calendar year (CY) 2013 FFS data with runout through March 31, 2015 were used as the base data for December 1, 2015 through January 31, 2016 NEMT rate development.

Mercer applied the following additional adjustments to the base data, which are consistent with the CMS capitated rate-setting checklist:

- Trend factors to forecast expenditures and utilization to the contract period.
- Loading for non-medical expenses.

The various steps used in the development of the rate ranges are described in the following paragraphs.

NEMT Rate Development

Covered Populations

Mercer received eligibility and enrollment data from the State's fiscal agent. The covered populations under the NEMT rate include the Medicaid eligible population excluded from Bayou Health physical health services and the Voluntary Opt-In populations who have not chosen to enroll in Bayou Health physical health services. The excluded populations primarily include dually eligible individuals and nursing facility residents. Mercer assigned rate cells using the following hierarchy:

1. CCM
2. HCBS Waiver Recipients
3. Other

CCM

Chisholm refers to a class action lawsuit (*Chisholm v. Hood*) filed in 1997. CCMs are defined as all current and future recipients of Medicaid in the State of Louisiana, under age 21, who are now or will in the future be placed on the Office of Citizens with Developmental Disabilities' (OCDD) Request for Services Registry.

Members of Louisiana's Chisholm class are permitted to participate in Bayou Health physical health services on a voluntary opt-in basis. The members who choose not to opt into Bayou Health physical health services will have their NEMT services covered under Bayou Health NEMT services.

HCBS Waiver Recipients

HCBS recipients were identified using the eligibility groups shown in Appendix C. HCBS recipients are permitted to participate in Bayou Health physical health services on a voluntary opt-in basis. The members who choose not to opt into Bayou Health physical health services will have their NEMT services covered under Bayou Health NEMT services.

Other

The remaining population covered under the NEMT rate is comprised of dually eligible individuals and LTSS recipients. Some dually eligible individuals are included in either the CCM or HCBS Waiver rate cells as a result of the established hierarchy; however, the majority of dually eligible individuals are included in the Other rate cell. These recipients are excluded from Bayou Health physical health services, but will have their NEMT services covered under Bayou Health NEMT services.

Base Data Development

FFS Data and Base Data Adjustments

Mercer utilized claim line level FFS data incurred from January 1, 2013 through December 31, 2013, paid through March 31, 2015, as the base data. Mercer identified the Bayou Health NEMT services populations and identified their NEMT services to be used as the base data. The NEMT services were identified using the claim category of service field "CLC_Claim_Cat_Serv" with the following codes:

- 23 – Non-Emergency Ambulance Transportation
- 92 – Non-Emergency Non-Ambulance Transportation

Mercer reviewed the FFS data to ensure it appeared reasonable and appropriate but did not audit the data. Specifically, Mercer reviewed the completeness and consistency of incurred claims over time.

Mercer reviewed claim lags and determined the NEMT claims were complete with the given runout and thus no adjustment for incurred but not reported claims was necessary for the FFS data.

The base data used for the NEMT rate development can be found in Appendix A. This appendix includes member months, expenses, units, annualized utilization per 1,000 recipients (util/1,000), unit cost, and base data per member per month (PMPM) rate.

Rating Adjustments

Trend

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the expenses of providing NEMT services in a future period. As part of the rate development, Mercer developed the utilization, unit cost, and PMPM trend rates in the table below and applied them to all rate cells equivalently.

Rate Cell	Low Trend	High Trend
CCM	7.0%	9.0%
HCBS	0.0%	1.0%
Other	15.0%	17.0%
Total	**11.8%**	**13.6%**

The base data were trended 30 months, from the midpoint of the CY 2013 base data to the midpoint of the rating period December 1, 2015 through January 31, 2016. Mercer relied upon FFS experience for these populations in developing trend.

Fraud and Abuse Recoupment

Mercer reviewed fraud and abuse recoupments and determined no adjustment was necessary.

Retroactive Eligibility

Mercer reviewed retroactive eligibility and determined no adjustment was necessary.

Managed Care Contracting and Savings Adjustments

Mercer did not apply an adjustment for managed care contracting because Louisiana Medicaid relied upon a sub-contractor to provide the FFS NEMT services during the base data period. Additionally, due to the limited time period covered by these rates, even if the potential for managed care savings does exist, Mercer does not believe significant managed care savings could be realized during the rating period.

Non-Medical Expense Load

Retention

Retention is expressed as a percentage of the gross capitation rate (i.e., premium). These percentages were developed incorporating the following considerations:

- Administrative requirements specific to the NEMT services section of the Bayou Health physical health services contract.
- Administrative expense benchmarks for other Medicaid NEMT services.

- Underwriting gain of 2.00%.
- Premium tax of 2.25%.

Mercer used a total factor of 12.93% for administration expenses, underwriting gain, and premium tax in the development of the NEMT capitation rates.

Rate Ranges

The final rate ranges represent a "best estimate" of the range of anticipated cost of providing NEMT services during the contract period for the covered populations. The lower end of an actuarially sound rate range attempts to ensure the capitation revenue received provides sufficient margin so that insolvency is not a significant risk for the MCOs participating in Bayou Health. The upper end of an actuarially sound rate range attempts to ensure the capitation revenue is not so large that the State is at risk of paying too much for the provision of NEMT services for eligible recipients. Mercer used CY 2013 annual enrollment to calculate the composite capitation rates.

December 1, 2015 through January 31, 2016 Bayou Health NEMT services rate ranges are displayed in the following table:

Category of Aid (COA)	CY 2013 Member Months	Lower Bound	Upper Bound
CCM	62,148	$7.21	$7.55
HCBS	181,177	$12.74	$13.06
Other	1,029,188	$11.34	$11.84
Composite Total	**1,272,513**	**$11.34**	**$11.80**

Certification

In preparing these actuarially sound capitation rate ranges, Mercer has used and relied upon enrollment, eligibility, FFS claims data, and other various information supplied by the State and its fiscal agent. The State and its fiscal agent are responsible for the validity and completeness of these supplied data and information. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion, they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that these rate ranges were developed in accordance with generally accepted actuarial practices and principles, and are appropriate for the populations and services covered under the managed care contract. The undersigned actuary is a member of the American Academy of Actuaries and meets its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rate ranges developed by Mercer are actuarial projections of future contingent events. Actual results will differ from these projections. Mercer has developed these rate ranges on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c) and accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Providers are advised that the use of these rate ranges may not be appropriate for their particular circumstance, and Mercer disclaims any responsibility for the use of these rate ranges by providers for any purpose. Mercer recommends that any provider considering contracting with the State should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to the rates offered by the State before deciding whether to contract with the State.

This certification letter assumes the reader is familiar with the State's Bayou Health program, Medicaid eligibility rules, and actuarial rating techniques. It is intended for the State and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results. This document should be reviewed only in its entirety.

If you have questions on any of the above, please feel free to contact me at +1 404 442 3358 at your convenience.

Sincerely,

Jaredd Simons, ASA, MAAA
Senior Associate Actuary

1.0 GENERAL INFORMATION

1.1. Background

1.1.1. The mission of the Department of Health and Hospitals (DHH) is to develop and provide health and medical services for the prevention of disease for the citizens of Louisiana, particularly those individuals who are indigent and uninsured, persons with mental illness, persons with developmental disabilities and those with addictive disorders.

1.1.2. DHH is comprised of the Bureau of Health Services Financing (BHSF) which is the single state Medicaid agency, the Office for Citizens with Developmental Disabilities (OCDD), Office of Behavioral Health (OBH), Office of Aging and Adult Services (OAAS), and the Office of Public Health (OPH). Under the general supervision of the Secretary, these principal offices perform the primary functions and duties assigned to DHH.

1.1.3. DHH, in addition to encompassing the program offices, has an administrative office known as the Office of the Secretary (OS), a financial office known as the Office of Management and Finance (OMF), and various bureaus and boards. The Office of the Secretary is responsible for establishing policy and administering operations, programs, and affairs.

1.1.4. BHSF consists of the following Sections: Director's Office, Medicaid Managed Care, Medicaid Benefits & Services, Medicaid Quality Management Statistics and Reporting, Medicaid Management Information Systems (MMIS), Medical Vendor Administration Budget and Contracts, Medical Vendor Payments Budget and Managed Care Finance, Medicaid Health Economics, Medicaid Program Support and Waivers, Medicaid Policy and Compliance, Eligibility Field Operations, Medicaid Member Support, Eligibility Systems Section, Eligibility Supports Section, Recovery and Premium Assistance, and Rate Setting and Audit. The Medicaid Managed Care Section has primary responsibility for implementation, ongoing operations and oversight of Medicaid managed care delivery systems including the delivery system for acute care hereafter referred to as the Bayou Health program.

1.2. Purpose of RFP

1.2.1. The purpose of this Request for Proposals (RFP) is to solicit proposals from qualified Managed Care Organizations (MCOs) to provide healthcare services statewide to Medicaid enrollees participating in the Bayou Health program, utilizing the most cost effective manner and in accordance with the terms and conditions set forth herein.

Through this RFP, DHH will solicit proposals from entities to serve as a Bayou Health MCO, hereafter referred to as "MCO."

1.2.2. DHH anticipates that the Bayou Health Program will achieve the following outcomes:

- Improved coordination of care;
- A patient-centered medical home for Medicaid recipients;

- Better health outcomes;
- Increased quality of care as measured by metrics such as HEDIS;
- Greater emphasis on disease prevention and management of chronic conditions;
- Earlier diagnosis and treatment of acute and chronic illness;
- Improved access to essential specialty services;
- Outreach and education to promote healthy behaviors;
- Increased personal responsibility and self-management;
- A reduction in the rate of avoidable hospital stays and readmissions;
- A decrease in fraud, abuse, and wasteful spending;
- Greater accountability for the dollars spent;
- A more financially sustainable system; and
- Cost savings to the state compared to a fee-for-service Medicaid delivery system.

1.2.3. This RFP solicits proposals, details proposal requirements, defines DHH's minimum service requirements, and outlines the state's process for evaluating proposals and selecting Bayou Health MCOs.

1.2.4. Through this RFP, DHH seeks to contract for the needed services and to give ALL qualified businesses, including those that are owned by minorities, women, persons with disabilities, and small business enterprises, opportunity to do business with the state through either direct ownership of an MCO or by providing services to selected MCOs.

1.2.5. This RFP process is being used so that DHH may selectively contract with at least three (3) and up to five (5) MCO entities but no more than required to meet Medicaid enrollment capacity requirements and assure choice for Medicaid recipients as required by federal statute. Notwithstanding the above, all parties agree that the final number of contracts awarded is within the sole discretion of the Secretary.

1.2.6. A contract is necessary to provide DHH with the ability to ensure accountability while improving access, coordinated care and promoting healthier outcomes.

1.2.7. State authority for the Bayou Health Program is contained in L.R.S. 36:254 which provides the Secretary of DHH with the authority to implement coordinated care requirements of Act 11 of the 2010 Regular Session of the Louisiana Legislature.

1.2.8. Current Federal Authority for the Bayou Health program is contained in Section 1932(a)(1)(A) of the Social Security Act and 42 CFR Part 438. DHH operates its Bayou Health program under the authority of a State Plan Amendment. The Department may pursue a change in federal authority for the Bayou Health Program to 1915(b) of the Social Security Act.

1.3. Invitation to Propose

DHH is inviting qualified proposers to submit proposals to provide specified health care services statewide for Medicaid recipients enrolled in the Bayou Health program in return for a monthly capitation payment made in accordance with the specifications and conditions set forth herein.

5.5.2. Retrospective adjustments to prior capitation payments may occur when it is determined that a member's aid category and/or type case was changed and the member remains MCO eligible.

5.5.3. If the member's aid category and/or type case changed from MCO eligible to MCO excluded, previous capitation payments for excluded months will be recouped from the MCO. The MCO shall initiate recoupments of payments to providers within 60 days of the date DHH notifies the MCO of the change. The MCO shall instruct the provider to resubmit the claim(s) to the Medicaid fee-for-service program (if applicable).

5.5.4. In cases of a retroactive effective date for Medicare enrollment of a member, the MCO will recoup payments made to the providers. 5.5.5. The MCO will refund payments received from DHH for a deceased member after the month of death and an incarcerated member the month after entering involuntary custody. DHH will recoup the payment as specified in the contract.

5.5.6. The entire monthly capitation payment will be paid during the month of birth and month of death and month entry into involuntary custody. Payments shall not be pro-rated to adjust for partial month eligibility as this has been factored into the actuarial rates.

5.6. Risk Sharing

5.6.1. The MCO shall agree to accept, as payment in full, the actuarially sound rate and maternity kick payment established by DHH pursuant to the contract, and shall not seek additional payment from a member, or DHH, for any unpaid cost.

~~5.6.1.~~5.6.2. The MCO shall assume one hundred percent (100%) liability for any expenditure above the monthly capitated~~capitation~~ rate and maternity kick payment.

5.7. Determination of MCO Rates

5.7.1. DHH will develop cost-effective and actuarially sound rates according to all applicable CMS rules and regulations. DHH will not use a competitive bidding process to develop the MCO capitation. DHH will develop monthly capitation rates that will be offered to MCOs on a "take it or leave it" basis.

5.7.2. Rates will be set using fee-for-service claims data, Bayou Health Shared Savings claims experience, Bayou Health MCO encounter data, LBHP encounter data, and financial data and supplemental *ad hoc* data and analyses appropriate for determining actuarially sound rates. Fiscal periods of the base data will be determined based upon the data sources, rate periods and purposes for which the data is used with appropriate adjustments which include the following:

5.7.2.1. Utilization trend and the expected impact of managed care on the utilization of the various types of services applied to varying sources of data, including managed care savings assumptions and managed care efficiency adjustments;

5.7.2.2. Unit cost trend and assumptions regarding managed care pricing and payments;

5.7.2.3. Third Party Liability recoveries; and

5.7.2.4. The expected cost of MCO administration and overhead, including but not limited to premium taxes and the Section 1202 Health Insurer Fee.

5.7.3. DHH reserves the right to adjust the rate in the following instances:

5.7.3.1. Changes to core benefits and services included in the monthly capitation rates;

5.7.3.2. Changes to Medicaid population groups eligible to enroll in an MCO;

5.7.3.3. Legislative appropriations and budgetary constraints; or

5.7.3.4. Changes in federal requirements.

5.7.4. Any adjusted rate must continue to be actuarially sound and consistent with requirements set forth in 42 CFR §438.6(c), and will require an amendment to the Contract that is mutually agreed upon by both parties.

5.7.5. Additional factors determining the rate for an individual member may include: 1) age;~~,~~ 2) gender;~~,~~ 3) Medicaid category of assistance;~~,~~ 4) the geographic location of the member's residence; and 5) Medicare enrollment.

5.7.6. As the MCO Program matures and FFS data and Shared Savings data are no longer available, there will be increasing reliance on encounter data and/or financial data to set future rates, subject to comparable adjustments.

5.7.7. The MCO shall be paid in accordance with the monthly capitated rates specified in Contract Attachment D – **Mercer Certification, Rate Development Methodology and Rates** of this Contract~~RFP~~.

5.7.8. The rates will be reviewed and may be periodically adjusted. Any adjusted rates shall be actuarially sound and consistent with requirements set forth in 42 CFR §438.6(c).

5.7.9. The MCO shall provide in writing any information requested by DHH to assist in the determination of MCO rates. DHH will give the MCO reasonable time to respond to the request and full cooperation by the MCO is required. DHH will make the final determination as to what is considered reasonable.

5.8. Risk Adjustment

5.8.1. Capitated payments for physical and basic behavioral health shall be risk-adjusted.

5.8.1.1. DHH will analyze the risk profile of members enrolled in each MCO using a national risk adjustment model specified by the State.

5.8.1.2. Each member will be assigned to risk categories based on their age, sex and classified disease conditions. This information and the relative cost associated with each risk category reflects the anticipated utilization of health care services relative to the overall population.

5.8.1.2.1. The relative costs will be developed using Louisiana specific historical data from Medicaid fee-for-service claims, Shared Savings claims, and MCO encounter data as determined appropriate.

5.8.1.3. Each MCO's proposed base capitation rates will be risk adjusted based on the MCO's risk score that reflects the expected health care expenditures associated with its enrolled members relative to the applicable total Medicaid population.

5.8.1.4. Risk adjustment scores will be updated following the full annual open process, which includes the period during which members can change MCOs without cause. The updated score will be effective for the month following the end of the process and reviewed semi-annually. Risk adjustment may be completed more than semi-annually if determined warranted by DHH.

5.8.1.5. DHH will provide the MCO with three (3) months advance notice of any major revision to the risk-adjustment methodology. The MCO will be given fourteen (14) calendar days to provide input on the proposed changes. DHH will consider the feedback from the MCOs in the changes to the risk adjustment methodology.

5.8.2. Other capitated payments shall not be risk-adjusted.

5.9.1.1. An MLR shall be reported in the aggregate, including all medical services covered under the contract.

5.9.1.1.1. If the aggregate MLR (cost for health care benefits and services and specified quality expenditures) is less than eighty-five percent (85%), the MCO shall refund DHH the difference. Any unpaid balances after

the refund is due shall be subject to interest at the current Federal Reserve Board lending rate or ten percent (10%) annually, whichever is higher. ~~(See also Appendix H – **Medical Loss Ratio (MLR) Requirements** for MLR calculation methodology and classification of costs.)~~

5.9.1.2. DHH may request MLR reporting that distinguishes physical and basic behavioral health from specialized behavioral health.

5.9.1.2.1. Neither the minimum MLR standard (85%) nor the refund applicable to the aggregate MLR shall apply to distinct MLRs reported.

~~**5.1. Co-payments**~~

~~Any cost sharing imposed on Medicaid members must be in accordance with 42 CFR §447.50 - §447.57 and cannot exceed cost sharing amounts in the Louisiana Medicaid State Plan. DHH reserves the right to amend cost sharing requirements.~~

5.10. Return of Funds

5.10.1. All amounts owed by the MCO to DHH, as identified through routine or investigative reviews of records or audits conducted by DHH or other state or federal agency, are due no later than thirty (30) calendar days following notification to the MCO by DHH unless otherwise authorized in writing by DHH. DHH, at its discretion, reserves the right to collect amounts due by withholding and applying all balances due to DHH to future payments. DHH reserves the right to collect interest on unpaid balances beginning thirty (30) calendar days from the date of initial notification. Any unpaid balances after the refund is due shall be subject to interest at the current Federal Reserve Board lending rate or ten percent (10%) annually, whichever is higher.

5.10.2. The MCO shall reimburse all payments as a result of any federal disallowances or sanctions imposed on DHH as a result of the MCO's failure to abide by the terms of the Contract. The MCO shall be subject to any additional conditions or restrictions placed on DHH by HHS as a result of the disallowance. Instructions for returning of funds shall be provided by written notice.

5.11. Other Payment Terms

~~**5.10.3.**~~**5.11.1.** The MCO shall make payments to its providers as stipulated in the contract.

~~**5.10.4.**~~**5.11.2.** The MCO shall not assign its right to receive payment to any other entity.

5.11.3. Payment for items or services provided under this contract will not be made to any entity located outside of the United States. The term "United States" means the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.

5.11.4. The MCO shall agree to accept payments as specified in this Section and have written policies and procedures for receiving and processing payments and adjustments. Any charges or expenses imposed by financial institutions for transfers or related actions shall be borne by the MCO.

5.12. Cost Sharing

5.12.1. The MCO and its subcontractors are not required to impose any copay or cost sharing requirements on their members.

5.12.2. The MCO and its subcontractors may impose cost sharing on Medicaid members in accordance with 42 CFR §447.50 - §447.57 provided, however, that it does not exceed cost sharing amounts in the Louisiana Medicaid State Plan.

5.12.3. DHH reserves the right to amend cost sharing requirements

5.12.4. An MCO or its subcontractors may not:

5.12.4.1. Deny services to an individual who is eligible for services because of the individual's inability to pay the cost sharing;

~~5.10.4.1.~~**5.12.4.2.** Restrict its members' access to needed drugs and related pharmaceutical products by requiring that members use mail-order pharmacy providers; or

~~5.10.4.2.~~**5.12.4.3.** Impose copayments for the following:

- Family planning services and supplies;
- Emergency services;
- Services provided to:

~~5.11.~~5.13. Third Party Liability (TPL)

~~5.11.1.~~5.13.1. General TPL Information

~~5.11.1.1.~~**5.13.1.1.** Pursuant to federal and state law, the Medicaid program by law is intended to be the payer of last resort. This means all other available Third Party Liability (TPL) resources must meet their legal obligation to pay claims before the MCO pays for the care of an individual eligible for Medicaid.

~~5.11.1.2.~~**5.13.1.2.** The MCO shall take reasonable measures to determine TPL.

~~5.11.1.3.~~**5.13.1.3.** The MCO shall coordinate benefits in accordance with 42 CFR §433.135, et seq. and La. R.S. 46:460.71, so that costs for services otherwise payable by the MCO are cost avoided or recovered from a liable party. The two methods used are cost avoidance and post-payment

recovery. The MCO shall use these methods as described in federal and state law.

~~5.11.1.4.~~5.13.1.4. Establishing TPL takes place when the MCO receives confirmation that another party is, by statute, contract, or agreement, legally responsible for the payment of a claim for a healthcare item or services delivered to a member.

~~5.11.1.5.~~5.13.1.5. If the probable existence of TPL cannot be established the MCO must adjudicate the claim. The MCO must then utilize post-payment recovery if TPL is later determined to exist which is described in further detail below.

~~5.11.1.6.~~5.13.1.6. The term "state" shall be interpreted to mean "MCO" for purposes of complying with the federal regulations referenced above. The MCO may utilize subcontractors to comply with coordination of benefit efforts for services provided pursuant to this contract.

5.13.1.7. For the eligible Medicaid population that is dually enrolled in Medicare, Medicaid-covered specialized behavioral health services that are not covered by Medicare shall be paid by the MCO. For dually eligible individuals, Medicare "crossover" claims (claims for services that are covered by Medicare as the primary payer) are excluded from coverage under the capitated rates. These services will be administered separately by the Fiscal Intermediary from the services covered under the capitation rates effective under this contract. In the event that a dually eligible individual's Medicare benefits have been exhausted as of the date of service on which a Medicare covered behavioral health service was provided, Medicaid will be considered primary. Claims for those services will no longer be considered "crossover" claims, and the MCO shall be responsible for payment. Specific payment mechanisms surrounding these populations shall be determined by DHH in the MCO Systems Companion Guide.

~~5.11.1.7.~~5.13.1.8. MCO must verify and add Medicaid recipient insurance updates for their members to their system within five business days of receipt. If a member is unable to access services or treatment until an update is made, update requests for that member must be verified and added within four business hours. These updates must be submitted to the DHH fiscal intermediary on the daily file load on the day the update is made. This includes updates on coverage, including removal of coverage that existed prior to the members linkage to the MCO that impacts current provider adjudication or member service access (i.e. pharmacy awaiting TPL update to fulfill prescription).

~~5.11.2.~~5.13.2. Cost Avoidance

~~5.11.2.1.~~5.13.2.1. The MCO shall cost-avoid a claim if it establishes the probable existence of TPL at the time the claim is filed.

~~5.11.2.2.~~5.13.2.2. The MCO may "pay and chase" the full amount allowed under the MCO payment schedule for the claim and then seek reimbursement for any liable TPL of legal liability if:

~~5.11.2.3.~~5.13.2.3. The claim is for labor and delivery and postpartum care (cost associated with the inpatient hospital stay for labor and delivery and post-partum care must be cost-avoided);

~~5.11.2.4.~~5.13.2.4. The claim is for prenatal care for pregnant women, or preventive pediatric services (including EPSDT);

~~5.11.2.5.~~5.13.2.5. The claim is for a service that is provided to an individual on whose behalf child support enforcement is being carried out by the state Title IV-D agency. The MCO must seek recovery of reimbursement within sixty (60) days after the end of the month in which the payment was made.

~~5.11.2.6.~~5.13.2.6. If a TPL insurer requires the member to pay any co-payment, coinsurance or deductible, the MCO is responsible for making these payments under the method described below, even if the services are provided outside of the MCO network.

Scenario 1 Professional Claim

Procedure Code	Billed Charge	TPL Paid Amount	Medicaid Allowed Amount	Patient Responsibility Amount	Medicaid Payment
99212	55.00	0.00	24.10	36.00 (Ded)	24.10
83655-QW	30.00	0.00	11.37	28.20 (Ded)	11.37
Totals	85.00	0.00	35.47	64.20 (Ded)	35.47

(Medicaid pays the allowable amount minus TPL payment OR total patient responsibility amount (co-pay, co-insurance, and/or deductible). The Medicaid allowed amount minus the TPL paid amount is LESS than the patient responsibility; thus, the Medicaid allowed amount is the payment.)

Scenario 2 Outpatient Claim

Procedure Code	Billed Charge	TPL Paid Amount	Medicaid Allowed Amount	Patient Responsibility Amount	Medicaid Payment
HR270	99.25	74.44	22.04	0.00	0.00
HR450	316.25	137.19	70.24	100.00	0.00
Total	415.50	211.63	92.28	100.00	0.00

(Medicaid “zero pays” the claim. When cost-compared, the private insurance paid more than Medicaid allowed amount for the procedure. When compared, the lesser of the Medicaid allowed amount minus the TPL payment AND the patient responsibility is the former; thus, no further payment is made by Medicaid. The claim is paid in full.)

Scenario 3 Inpatient Claim

Procedure Code	Billed Charge	TPL Paid Amount	Medicaid Allowed Amount	Patient Responsibility Amount	Medicaid Payment
Multiple HR	12,253.00	2,450.00	5,052.00	300.00	300.00

(The Medicaid allowed amount minus the TPL payment is greater than the patient responsibility; thus, the patient responsibility is paid on this covered service.)

~~5.11.3.~~5.13.3. Post-payment Recoveries

~~5.11.3.1.~~5.13.3.1. Post-payment recovery is necessary in cases where the MCO has not established the probable existence of TPL at the time services were rendered or paid for, or was unable to cost avoid. The following sets forth requirements for MCO recovery:

~~5.11.3.2.~~5.13.3.2. The MCO must seek recovery of reimbursement within sixty (60) days after the end of the month it learns of the existence of the liable third party after a claim is paid.

~~5.11.3.3.~~5.13.3.3. The MCO must have established procedures for recouping post-payments for DHH's review during the Readiness Review process. The MCO must void encounters for claims that are recouped in full. For recoupments that are not recouped in full, the MCO must submit adjusted encounters for the claims.

~~5.11.3.4.~~5.13.3.4. The MCO shall identify the existence of potential TPL to pay for core benefits and services through the use of trauma code edits in accordance with 42 CFR §433.138(e).

~~5.11.3.5.~~5.13.3.5. The MCO shall be required to seek reimbursement in accident/trauma related cases when claims in the aggregate equal or exceed $500 as required by the Louisiana Medicaid State Plan and federal Medicaid guidelines and may seek reimbursement when claims in the aggregate are less than five hundred dollars ($500).

~~5.11.3.6.~~5.13.3.6. The amount of any recoveries collected by the MCO outside of the claims processing system shall be treated by the MCO as offsets to medical expenses for the purposes of reporting.

~~5.11.3.7.~~5.13.3.7. Prior to accepting a TPL settlement on accident/trauma-related claims equal to or greater than twenty-five thousand dollars ($25,000), the MCO shall obtain approval from DHH.

~~5.11.4.~~5.13.4. Distribution of TPL Recoveries

~~5.11.4.1.~~5.13.4.1. The MCO may retain up to 100% of its TPL collections if all of the following conditions exist:

~~5.11.4.2.~~5.13.4.2. Total collections received do not exceed the total amount of the MCO financial liability for the member;

~~5.11.4.3.~~5.13.4.3. There are no payments made by DHH related to fee-for-service, reinsurance or administrative costs (*i.e.,* lien filing, etc.);

~~5.11.4.4.~~5.13.4.4. Such recovery is not prohibited by state or federal law; and

~~5.11.4.5.~~5.13.4.5. DHH will utilize the data in calculating future capitation rates.

~~5.11.5.~~5.13.5. TPL Reporting Requirements

~~5.11.5.1.~~5.13.5.1. The MCO shall provide DHH TPL information in a format and medium described by DHH and shall cooperate in any manner necessary, as requested by DHH, with DHH and/or a cost recovery vendor of DHH.

~~5.11.5.2.~~5.13.5.2. The MCO shall be required to include the collections and claims information in the encounter data submitted to DHH, including any retrospective findings via encounter adjustments.

~~5.11.5.3.~~5.13.5.3. Upon the request of DHH, the MCO must provide information not included in encounter data submissions that may be necessary for the administration of TPL activity. The information must be provided within thirty (30) calendar days of DHH's request. Such information may include, but is not limited to, individual medical records for the express purpose of a TPL resource to determine liability for the services rendered.

~~5.11.5.4.~~5.13.5.4. Upon the request of DHH, the MCO shall demonstrate that reasonable effort has been made to seek, collect and/or report TPL and recoveries. DHH shall have the sole responsibility for determining whether or not reasonable efforts have been demonstrated. Said determination shall take into account reasonable industry standards and practices.

~~5.11.5.5.~~5.13.5.5. The MCO is required to submit an annual report of all health insurance collections for its members plus copies of any Form 1099's received from insurance companies for that period of time.

~~5.11.6.~~5.13.6. DHH Right to Conduct Identification and Pursuit of TPL

~~5.11.6.1.~~5.13.6.1. DHH may invoke its right to pursue recovery if the MCO fails to recover reimbursement from the third party to the limit of legal liability within three hundred sixty-five (365) days from date of service of the claims(s).

~~5.11.6.2.~~5.13.6.2. If DHH determines that the MCO is not actively engaged in cost avoidance activities the MCO shall be subject to monetary penalties in an amount not less than three times the amount that could have been cost avoided.

~~5.12.~~5.14. Coordination of Benefits

~~5.12.1.~~5.14.1. Other Coverage Information

The MCO shall provide TPL information for each member in accordance with Sections 5.12. A weekly file will be sent to DHH reporting additions and updates of TPL information in a format and medium specified by DHH. The MCO shall reconcile the TPL file with the Louisiana Medicaid Fiscal Intermediary and claims shall be adjudicated based off the State's resource file.

~~5.12.2.~~5.14.2. Reporting and Tracking

The MCO's system shall identify and track potential collections. The system should produce reports indicating open receivables, closed receivables, amounts collected, amounts written off and amounts avoided.

~~**Copays/Cost Share**~~

~~The MCO and its subcontractors are not required to impose any copay or cost sharing requirements on their members. The MCO and its subcontractors, however, are not permitted to charge their members fees of any kind or any copay or cost sharing amount above what exists in the Medicaid State Plan.~~

~~An MCO or its subcontractors may not:~~

~~**5.1.1.1.** Deny services to an individual who is eligible for services because of the individual's inability to pay the cost sharing;~~

~~Restrict its members' access to needed drugs and related pharmaceutical products by requiring that members use mail-order pharmacy providers; or~~

~~Impose copayments for the following:~~

~~Family planning services and supplies~~

~~Emergency services;~~

~~Services provided to:~~

~~Individuals younger than 21 years old;~~

~~Pregnant women;~~

~~Individuals who are inpatients in long-term care facilities or other institutions;~~

~~Native Americans; and~~

~~Alaskan Eskimos.~~

~~5.13.~~5.15. Financial Disclosures for Pharmacy Services

The MCO must disclose all financial terms and arrangements for remuneration of any kind that apply between the MCO or the MCO's PBM subcontractor and any prescription drug wholesaler, manufacturer or labeler, including, without limitation, formulary management, educational support, claims processing, pharmacy network fees, drug product sales or pricing agreements, data sales fees, and any other fees. Section 16 of this contract provides that DHH or state auditors may audit such information at any time. DHH agrees to maintain the confidentiality of information disclosed by the MCO pursuant to the contract, to the extent that such information is confidential under Louisiana or federal law.

~~5.14.~~5.16. Health Insurance Provider Fee (HIPF) Reimbursement

If the MCO is identified by the Internal Revenue Service (IRS) as a covered entity and thereby subject to an assessed fee ("Annual Fee") whose final calculation includes an

applicable portion of the MCO's net premiums written from DHH's Medicaid/CHIP lines of business, DHH shall, upon the MCO satisfying completion of the requirements below, make an annual payment to the MCO in each calendar year payment is due to the IRS (the "Fee Year"). This annual payment will be calculated by DHH (and its contracted actuary) as an adjustment to each MCO's capitation rates for the full amount of the Annual Fee allocable to Louisiana Medicaid/CHIP with respect to premiums paid to the MCO for the preceding calendar year (the "Data Year.") The adjustment will be to the capitation rates in effect during the Data Year.

~~5.14.1.~~5.16.1. The MCO shall, at a minimum, be responsible for adhering to the following criteria and reporting requirements:

5.16.1.1. Provide DHH with a copy of the final Form 8963 submitted to the IRS by the deadline to be identified by DHH each year. The MCO shall provide DHH with any adjusted Form 8963 filings to the IRS within 5 business days of any amended filing.

5.16.1.2. Provide DHH Louisiana-specific Medicaid and CHIP-specific premiums included in the premiums reported on Form 8963 (including any adjusted filings) by the deadline to be identified by DHH each year (for the initial Form 8963 filing) of the Fee Year and within 5 business days of any amended filing.

5.16.1.3. If the MCO's Louisiana-specific Medicaid/CHIP premium revenue is not delineated on its Form 8963, provide with its Form 8963 a supplemental delineation of Louisiana-specific Medicaid/CHIP premium revenue that was listed on the MCO's Form 8963 and a methodological description of how its Louisiana-specific Medicaid/CHIP premium revenue (payments to the MCO pursuant to this Contract) was determined. The MCO will indicate for DHH the portion of the Louisiana-specific Medicaid/CHIP premiums that were excluded from the Form 8963 premiums by the MCO as Medicaid long-term care, if applicable, beginning with Data Year 2014.

5.16.1.3.1. The MCO shall also submit a certification regarding the supplemental delineation consistent with 42 CFR 438.604 and 42 CFR 438.606.

5.16.1.3.2. If a portion of the Louisiana-specific Medicaid/CHIP premiums were excluded from the Form 8963 premiums by the MCO as Medicaid long-term care, the MCO shall submit the calculations and methodology for the amount excluded.

5.16.1.4. Provide DHH with the preliminary calculation of the Annual Fee as determined by the IRS by the deadline to be identified by DHH each year.

5.16.1.5. Provide DHH with the final calculation of the Annual Fee as determined by the IRS by the deadline to be identified by DHH each year.

5.16.1.6. Provide DHH with the corporate income tax rates – federal and state (if applicable) -- by the deadlines to be identified by DHH each year. and include a certification regarding the corporate income tax rates consistent with 42 CFR 438.604 and 42 CFR 438.606

5.16.2. For covered entities subject to the HIPF, DHH will perform the following steps to evaluate and calculate the HIPF percentage based on the Contractor's notification of final fee calculation (i.e., HIPF liability) and all premiums for the

Contractor subject to Section 9010, as reported on the Contractor's Form 8963, and agreed reasonable by DHH.

5.16.2.1. Review each submitted document and notify the Contractor of any questions.

5.16.2.2. DHH will check the reasonableness of the MCO's Louisiana-specific Medicaid/CHIP premium revenue included on the MCO's Form 8963/supplemental delineation. This reasonableness check will include, but may not be limited to comparing the MCO's reported Louisiana-specific Medicaid/CHIP premium revenue to DHH's capitation payment records.

5.16.2.3. DHH and its actuary will calculate revised Data Year capitation rates and rate ranges to account for the Louisiana portion (specific to this contract) of the Contractor's HIPF obligation per the IRS HIPF final fee calculation notice (as noted in 5.17.1.5. above). To calculate the capitation payment adjustment, the DHH will:

5.16.2.3.1. Calculate the HIPF obligation as a percentage of the total data year premiums subject to the HIPF (this total will include all of the first $25 million and 50% of the next $25 million of premium deducted by the IRS). This is the "HIPF%", which is unique to each MCO that is subject to the HIPF.

5.16.2.3.2. Calculate Figure A. Figure A is the total premium revenue for coverage in the Data Year from item 5.17.1.2. above. The Figure A amount has no provision for the HIPF obligation.

5.16.2.3.3. Calculate Figure B. Figure B is the portion of Figure A that is for services subject to the HIPF. Capitation revenue for services that are excludable under Section 9010 of the Patient Protection and Affordable Care Act of 2010, such as long-term care services, will not be included in Figure B. The Figure B amount has no provision for the HIPF obligation.

5.16.2.3.4. Calculate Figure C. Figure C is the calculation of total revenue that incorporates provision for the HIPF and applicable taxes. DHH will use the following formula to calculate Figure C. If the Contractor has not provided satisfactory documentation of federal income tax obligations under section 5.17.1.5., then the Average Federal Income Tax Rate (AvgFIT%) in the formula will be zero. If the Contractor has not provided satisfactory documentation of corporate net income tax obligations under section 5.17.1.6. or if state income taxes are not applicable, then the Average State Income Tax Rate (AvgSIT%) in the formula will be zero. The Louisiana Department of Insurance has determined that state premium tax is not applicable to the HIPF payment; as such, no consideration for premium tax will be made. If in the future, however, the applicability of premium tax to the HIPF payments changes, the formula will be modified accordingly.

Figure B

$$1 - (HIPF\% / (1 - AvgSIT\% - AvgFIT\% \times (1 - AvgSIT\%)))$$

5.16.2.3.5. Calculate Figure D. DHH will calculate Figure D by subtracting Figure B from Figure C. This is the final HIPF adjustment amount that will serve as the basis for DHH payment to the impacted contractors.

5.16.2.3.6. DHH will compare Figure D with Figure B to calculate the percentage adjustment to the Data Year capitation rates and rate ranges for submission to CMS for approval.

5.16.3. DHH (and its contract actuary) will compute the change in capitation revenue that is due to the higher capitation rates by multiplying the adjusted capitation rates by the known member months to determine the total supplemental HIPF payment amount for the MCO.

5.16.4. In accordance with a schedule to be provided by DHH each contract year, DHH will make a payment to the MCO that is based on the final Annual Fee amount provided by the IRS and calculated by DHH (and its contracted actuary) as an adjustment to the capitation rates in effect during the Data Year. This payment will only be made to the Contactor if DHH determines that that the reporting requirements under this section have been satisfied.

5.16.5. The MCO shall advise DHH if payment of the final fee payment is less than the amount invoiced by the IRS.

5.16.6. The MCO shall reimburse DHH for any amount applicable to Louisiana Medicaid/CHIP premiums that are not paid towards the fee and/or are reimbursed back to the MCO, at any time and for any reason, by the IRS.

5.16.7. DHH reserves the right to update the calculation and method of payment for the Annual Fee based upon any new or revised requirements established by CMS in regards to this fee.

5.16.8. Payment by DHH is intended to put the MCO in the same position as the MCO would have been in had the MCO's health insurance providers fee tax rate (the final Annual Fee as a portion of the covered entity's premiums filed on Form 8963) and corporate tax rates been known in advance and used in the determination of the Data Year capitation rates.

The obligation outlined in this section shall survive the termination of the contract

5.17. Responsibility for Payment for Specialized Behavioral Health Services Provided to Coordinated System of Care (CSoC) Recipients

5.17.1. The CSoC Contractor shall be responsible for payment to enrolled providers for the provision of specialized behavioral health services, with the exception of Psychiatric Residential Treatment Facility, Therapeutic Group Home, and SUD Residential treatment services (ASAM Levels III.1, III.2D, III.5 and III.7 for children under 21 and Levels III.3 and III.7D for youth aged 21) ~~services~~, for each month during which the recipient has a 1915(c) / 1915(b)(3) segment on the eligibility file with a begin date on or earlier than the first day of that month, or in the event that a recipient transfers between waivers during the month, but the previous segment began on or earlier than the first day of that month.

5.17.2. The CS~~O~~oC Contractor shall be responsible for payment to enrolled providers for the provision of specialized behavioral health services through the last day of

the month which includes the end date of the 1915(c) / 1915(b)(3) segment on the eligibility file.

5.17.3. The MCO shall be responsible for payment to enrolled providers for the provision of specialized behavioral health services for any month during which the recipient has a 1915(c) / 1915(b)(3) segment on the eligibility file with a begin date later than the first day of that month.

5.17.4. The MCO shall be responsible for payment of all PRTF, TGH, and SUD Residential treatment services (ASAM Levels III.1, III.2D, III.5 and III.7 for children under 21 and Levels III.3 and III.7D for youth aged 21) ~~services~~for CSoC enrolled youth.

~~The obligation outlined in this section shall survive the termination of the contract~~

~~Payment by DHH is intended to put the MCO in the same position as the MCO would have been in had the MCO's health insurance providers fee tax rate (the final Annual Fee as a portion of the covered entity's premiums filed on Form 8963) and corporate tax rates been known in advance and used in the determination of the Data Year capitation rates.~~

~~The obligation outlined in this section shall survive the termination of the contract.~~

6.1.3.2. The proposed monetary value of these benefits will be considered a binding contract deliverable. If for some reason, including but not limited to lack of member participation, the aggregated annual per member per month PMPM proposed is not expended the department reserves the right to require the MCO to provide an alternate benefit of equal value and/or may conduct a reconciliation for the amount unexpended.

6.1.6. The MCO shall not arbitrarily deny or reduce the amount, duration, or scope of a required service because of diagnosis, type of illness, or condition of the member.

6.1.7. The MCO may place appropriate limits on a service (a) on the basis of certain criteria, such as medical necessity or best practices; or (b) for the purpose of utilization control, provided the services furnished can reasonably be expected to achieve their purpose.

The MCO may manage coverage and utilization of drugs through the formation of a Formulary or Preferred Drug List. 6.3.2.10. The MCO shall limit negative changes to the formulary (e.g., remove a drug, impose step therapy, etc.) to four times a year, unless urgent circumstances require more timely action, such as drug manufacturer's removal of a drug from the market due to patient safety concerns. The addition of a newly approved generic and removal of the brand equivalent does not constitute a negative formulary change.

6.3.3. Preferred Drug List

6.3.3.1. The PDL is a subset of preferred drug products available on the Formulary and an up-to-date version shall be available to all providers and members through the MCO web site and electronic prescribing tools.

The MCO shall not replace an approved preferred drug on the PDL without prior approval of DHH.

6.3.3.4. The selection of drugs included for each drug class shall be sufficient to ensure enough provider choice and include FDA approved drugs to best serve the medical needs of all enrollees, including those with special needs.

6.3.3.5. The MCO shall authorize the provision of a drug not listed on the PDL requested by a prescriber on behalf of the enrollee, if the approved prescriber provides relevant clinical information to the MCO to support the medical necessity of the drug. The MCO shall take steps to require adoption of the clinical practice guidelines by subcontracted specialized behavioral healthcare providers, and to measure compliance with the guidelines, until such point that ninety percent (90%) or more of the providers consistently achieve eighty percent (80%) compliance, based on MCO measurement findings. The MCO should employ substantive provider motivational incentive strategies, such as financial and non-financial incentives, to improve compliance.

8.1.6. The MCO must identify the source of the medical management criteria used for the review of service authorization requests, including but not limited to:

8.1.6.1. The vendor must be identified if the criteria was purchased;

8.1.6.2. The association or society must be identified if the criteria are developed/recommended or endorsed by a national or state health care provider association or society;

8.1.6.3. The guideline source must be identified if the criteria are based on national best practice guidelines; and

8.1.6.4. The individuals who will make medical necessity determinations must be identified if the criteria are based on the medical training, qualifications, and experience of the MCO medical director or other qualified and trained professionals.

8.1.7. UM Program medical management criteria and practice guidelines shall be disseminated to all affected providers, members and potential members upon request. Decisions for utilization management, enrollee education, coverage of services, and other areas to which the guidelines apply should be consistent with the guidelines.

8.1.8. The MCO shall have written procedures listing the information required from a member or health care provider in order to make medical necessity determinations. Such procedures shall be given verbally to the covered person or health care provider when requested. The procedures shall outline the process to be followed in the event the MCO determines the need for additional information not initially requested.

8.1.9. The MCO shall have written procedures to address the failure or inability of a provider or member to provide all the necessary information for review. In cases where the provider or member will not release necessary information, the MCO may deny authorization of the requested service(s) within two (2) business days.

8.1.10. The MCO shall have sufficient staff with clinical expertise and training to apply service authorization medical management criteria and practice guidelines. The MCO shall provide UM staff specifically assigned to:

8.1.10.1. Specialized behavioral health services, and

8.1.10.2. PSH to ensure appropriate authorization of tenancy services.

8.1.11. The MCO shall use DHH's medical necessity definition as defined in LAC 50:I.1101 (Louisiana Register, Volume 37, Number 1) for medical necessity determinations. The MCO shall make medical necessity determinations that are consistent with the State's definition.

8.1.12. The MCO shall submit written policies and procedures for DHH approval, within thirty (30) days of the contract being signed by the MCO, addressing how the core benefits and services ensure:

8.1.12.1. The prevention, diagnosis, and treatment of health impairments;

8.1.12.2. The ability to achieve age-appropriate growth and development; and

8.1.12.3. The ability to attain, maintain, or regain functional capacity.

8.1.13. The MCO must identify the qualification of staff who will determine medical necessity.

8.1.14. Determinations of medical necessity must be made by qualified and trained practitioners in accordance with state and federal regulations.

8.1.15. The MCO shall ensure that only licensed clinical professionals with appropriate clinical expertise in the treatment of a member's condition or disease shall determine service authorization request denials or authorize a service in an amount, duration or scope that is less than requested.

8.1.16. The individual(s) making these determinations shall have no history of disciplinary action or sanctions; including loss of staff privileges or participation restrictions, that have been taken or are pending by any hospital, governmental agency or unit, or regulatory body that raise a substantial question as to the clinical peer reviewer's physical, mental, or professional or moral character.

8.1.17. The individual making these determinations is required to attest that no adverse determination will be made regarding any medical procedure or service outside of the scope of such individual's expertise.

8.1.18. The MCO shall provide a mechanism to reduce inappropriate and duplicative use of health care services. Services shall be sufficient in an amount, duration, and scope to reasonably be expected to achieve the purpose for which the services are furnished and that are no less than the amount, duration or scope for the same services furnished to eligibles under the Medicaid State Plan. The MCO shall not arbitrarily deny or reduce the amount, duration or scope of required services solely because of diagnosis, type of illness or condition of the member. The MCO may place appropriate limits on a service on the basis of medical necessity or for the purposes of utilization control (with the exception of EPSDT services), provided the services furnished can reasonably be expected to achieve their purpose in accordance with 42 CFR §438.210.

8.1.19.3. Document in the child's health record whether or not (according to CSoC contracted administrator) the child met criteria for CSoC presumed eligibility, when the child was referred to the WAA, and the date on which the Freedom of Choice (FOC) was signed.

8.1.19.4. The MCO shall also document in the child's health record if the child does not become enrolled in CSoC, for the reasons of 1) the youth and family refuse CSoC services, or 2) the youth does not meet clinical eligibility based on the comprehensive CANS, or for any other reason.

8.1.19.5. For youth who screened positively on the initial risk screen, but who do not complete enrollment in CSoC, the MCO shall offer voluntary participation in the Case Management Program, and/or other behavioral health services to meet the child and family's presenting needs.

8.1.20. Upon request, the MCO shall provide the PASRR Level II authority (OBH) with documentation supporting appropriate limits on a service on the basis of medical necessity for individuals determined by the PASRR Level II authority to need specialized behavioral health services.

~~**8.1.19.**~~**8.1.21.** The MCO shall ensure that compensation to individuals or entities that conduct UM activities is not structured to provide incentives for the individual or entity to deny, limit, or discontinue medically necessary covered services to any member in accordance with 42 CFR §438.6(h), 42 CFR §422.208, and 42 CFR §422.210.

~~**8.1.20.**~~**8.1.22.** The MCO shall report fraud and abuse information identified through the UM program to DHH in accordance with 42 CFR §455.1(a)(1).

8.2.2.2. Monitoring the medical appropriateness and necessity of healthcare services provided to its members utilizing provider quality and utilization profiling;

    – Designated staff to perform this duty;

    – The method of case selection;

    – The anticipated number of reviews by practice site;

8.2.5. The MCO shall review a reasonable number of records at each site to determine compliance. Five (5) to ten (10) records per site is a generally accepted target. For large group practices (six or more providers in the group), three record reviews per provider shall be required.

8.2.6. The MCO shall report the results of all medical and treatment record reviews to DHH quarterly with an annual summary.

8.3. Utilization Management Reports

The MCO shall submit utilization management reports as specified by DHH. DHH reserves the right to request additional reports as deemed by DHH. DHH will notify the MCO of additional required reports no less than sixty (60) days prior to due date of those reports

8.4. Service Authorization

8.4.1. Service authorization includes, but is not limited to, prior authorization, concurrent authorization and post authorization. (For Pharmacy Service Authorizations see Section 8.6.)

8.4.2. The MCO UM Program policies and procedures shall include service authorization policies and procedures consistent with 42 CFR §438.210, 42 CFR §441 Subpart D, ~~and~~ state laws and regulations, Medicaid State Plan and waivers, and the court-ordered requirements of *Chisholm v. Kliebert* and *Wells v. Kliebert* for initial and continuing authorization of services that include, but are not limited to, the following:

8.4.2.1. Written policies and procedures for processing requests for initial and continuing authorizations of services, where a service authorization member's request is for the provision of a service if a provider refuses a service or does not request a service in a timely manner;

8.4.2.2. Mechanisms to ensure consistent application of review criteria for authorization decisions and consultation with the requesting provider as appropriate;

8.4.2.3. Requirement that any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested is made by a health care professional who has appropriate clinical expertise in treating the enrollee's condition or disease;

8.4.2.4. Provide a mechanism in which a member may submit, whether oral or in writing, a service authorization request for the provision of services. This process shall be included in its member manual and incorporated in the grievance procedures;

The MCO's service authorization system shall have capacity to electronically store and report the time and date all service authorization requests are received, decisions made by the MCO regarding the service requests, clinical data to support the decision, and time frames for notification of providers and members of decisions.

8.4.3. The MCO shall not deny continuation of higher level services (*e.g.,* inpatient hospital) for failure to meet medical necessity unless the MCO can provide the service through an in-network or out-of-network provider for a lower lever care.

8.4.4. The MCO shall perform prior authorization and concurrent utilization review for admissions to inpatient general hospitals, specialty psychiatric hospitals in Louisiana or out-of-state, or state mental hospitals.

8.4.4.1. The MCO shall ensure that inpatient psychiatric hospital and concurrent utilization reviews are completed by an LMHP for each enrollee referred for psychiatric admissions to general hospitals. The MCO shall comply with the requirements set forth in the Inpatient Psychiatric Services Rule [Louisiana Register, Vol. 21, No. 6, Page 575].

8.4.4.2. Concurrent utilization reviews are administrative in nature and should not be reported to DHH in encounter data. These reviews are not considered prior authorizations because inpatient reimbursement is not edited against the utilization review prior to payment. Also, there are instances where individuals personally presenting at the inpatient psychiatric hospital may be admitted by hospital staff. However, DHH does reserve the right to recoup reimbursement when concurrent utilization reviews fail to document medical necessity for the inpatient psychiatric treatment.

8.4.4.3. Concurrent utilization review includes:

- Provision of Emergency Inpatient Hospital Psychiatric Screen: A concurrent utilization review screening for inpatient services following the sudden onset of severe psychiatric symptoms, which could reasonably be expected to make the individual harmful to self or others if not immediately under psychiatric treatment. The individual is in crisis and not currently in a place of safety. If the individual presents in a hospital, where they will not be hospitalized due to not having a psychiatric unit or trained psychiatric personnel, then the utilization screen would be emergent, as the person needs to be seen right away to determine appropriate treatment. The referral from the MCO for an Emergency Inpatient Psychiatric Hospital Screen shall be made immediately. The screen to determine appropriate treatment shall be completed within one hour after request is received by an emergency room for post-stabilization treatment or three hours after receipt of the request in other circumstances. If psychiatric residential treatment is recommended, in lieu of inpatient psychiatric hospitalization, the procedures specified below should be utilized.

- Provision of an Urgent Inpatient Hospital Psychiatric Screen: A concurrent utilization review screening is initiated if the individual meets one criterion specified on the state approved screening form and is currently in a place of safety. If the member presents in a hospital, where they will not be hospitalized due to not having a psychiatric unit or trained psychiatric personnel, then the utilization screen would be emergent and follow the protocols and timeframes specified above. If the member presents at a hospital with a psychiatric unit or trained psychiatric personnel, and is admitted by the treating physician, then it will be classified as an urgent screen. The referral from the MCO for an Urgent Inpatient Psychiatric Hospital Screen shall be made within 24 hours after the referral and full medical information is received by MCO. The screen to determine appropriate treatment shall be completed within 24 hours of the MCO's referral after the referral and full medical information is received by MCO. If psychiatric residential treatment is recommended, in

lieu of inpatient psychiatric hospitalization, due to concerns regarding the safety of a child/youth, the procedures specified above should be utilized.

- Upon completion of the Inpatient Psychiatric Hospital Concurrent Utilization Review, if the inpatient admission is approved, the MCO shall notify the provider and individual requesting the screen of the results in writing within 48 hours of receipt of the request by the MCO. If denied, the MCO shall notify the individual requesting the screen immediately, and within 48 hours of receipt of the request by the MCO provide written notification of the results to the provider and individual requesting the screen. The notification shall include whether or not an alternative community services plan is appropriate, the right of the member to appeal and the process to do so.

8.4.4.4. Certification of Need for PRTFs

8.4.4.4.1. The MCO shall comply with the requirements set forth at 42 CFR §441 Subpart D.

8.4.4.4.2. The MCO shall ensure LMHPs are included in the team responsible for certification and recertification of PRTF services in Louisiana. This shall include a face-to-face assessment by an LMHP or a telephonic/video consultation with an LMHP who has had a face-to-face interview with the child/youth, in addition to the recommendations of a team specified at 42 CFR §441.154.

8.4.4.4.3. The MCO may use an LMHP/team composed of the MCO's staff or the MCO may subcontract with an LMHP. To ensure the team has knowledge of the ambulatory resources available to the youth and the youth's situation, the MCO shall ensure that the team is assembled by a subcontract in the child's/youth's parish of residence or adjacent parish (if not in state custody) or the child's/youth's parish or adjacent parish of responsibility (if in state custody).

8.4.4.4.4. Recertification shall occur every sixty (60) calendar days. For the PRTF screens to be complete, the team shall meet and rule out other community based options. This does not apply to other inpatient screens.

8.4.4.4.5. In addition to certifying the need, the MCO shall:

- Be responsible for tracking the member's authorization period for PRTF stays and providing notification to the responsible party when a recertification is due.
- Ensure that PRTF certification, including the independent certification, are forwarded to the admitting facility.
    - Upon completion of the certification of need, if the PRTF is approved, within 48 hours, the MCO shall notify in writing, the provider requesting the certification of the results. If denied, the MCO shall notify the provider requesting the certification immediately and, within 48 hours, provide written notification to the provider requesting the certification of the results. The

notification shall include whether or not an alternative community services plan is appropriate, the right of the member to appeal, and the process to do so.

- o Generate a prior authorization for each PRTF admission within 48 hours of completion of the screen.
- o Accurately determine admissions and discharges to PRTFs and perform PRTF-specific eligibility functions.
- o Work with the Medicaid FI to determine retroactive eligibility and assignment, when applicable.
- o Maintain near real time bed utilization/availability and manage a waiting list for PRTF placement including out-of-state replacements.

8.4.5. At such time Therapeutic Foster Care (TFC) is added to the Medicaid benefit, the MCO shall work with DHH to develop prior authorization and concurrent utilization review for that service. MCOs may use the Service Definition Manual or other approved Medical Necessity Criteria for Therapeutic Group Homes and other residential levels of care.

8.5. Timing of Service Authorization Decisions

8.5.1. Standard Service Authorization

8.5.1.1. The MCO shall make eighty percent (80%) of standard service authorization determinations within two (2) business days of obtaining appropriate medical information that may be required regarding a proposed admission, procedure, or service requiring a review determination. Standard service authorization determinations shall be made no later than fourteen (14) calendar days following receipt of the request for service.

8.5.1.2. The MCO shall make ninety-five percent (95%) of concurrent review determinations within one (1) business day and ninety-nine point five percent (99.5%) of concurrent review determinations within two (2) business days of obtaining the appropriate medical information that may be required.

8.5.2. Expedited Service Authorization

In the event a provider indicates, or the MCO determines, that following the standard service authorization timeframe could seriously jeopardize the member's life or health or ability to attain, maintain, or regain maximum function, the MCO shall make an expedited authorization decision and provide notice as expeditiously as the member's health condition requires, but no later than seventy-two (72) hours after receipt of the request for service.

8.5.2.2. The MCO may extend the seventy-two (72) hour time period by up to fourteen (14) calendar days if the member or if the MCO justifies to DHH a need for additional information and how the extension is in the member's best interest.

8.5.3. Post Authorization

8.5.3.1. The MCO shall make retrospective review determinations within thirty (30) days of obtaining the results of any appropriate medical information that may be required, but in no instance later than one hundred, eighty (180) days from the date of service.

8.5.3.2. 8.5.4. Timing of Notice

8.5.4.1. Notice of Action

8.5.4.1.1. Approval

8.5.4.1.1.1. 8.5.4.1.1.2. For service authorization approval for extended stay or additional services, the MCO shall notify the provider rendering the service, whether a health care professional or facility or both, and the member receiving the service, verbally or as expeditiously as the member's health condition requires but not more than one (1) business day of making the initial determination and shall provide documented confirmation of such notification to the provider within two (2) business days of making the initial certification.

8.5.4.1.2. Adverse

8.5.4.1.2.1. The MCO shall notify the member, in writing using language that is easily understood by the member, of decisions to deny a service authorization request, to authorize a service in an amount, duration, or scope that is less than requested, and/or any other action as defined in Section 13 of this RFP. The notice of action to members shall be consistent with requirements in 42 CFR §438.404 and 42 CFR §438.210, Section 12 of this RFP for member written materials, and any agreements that the Department may have entered into relative to the contents of member notices of denial or partial denial of services, regardless of whether such agreements are related to legal proceedings or out-of-court settlements.

8.5.4.1.3.2. In a case involving an initial determination or a concurrent review determination, the MCO should provide the member or a provider acting on behalf of the member and with the member's written consent an opportunity to request an informal reconsideration of an adverse determination by the physician or clinical peer making the adverse determination [§438.402(b)(ii)].

8.5.4.1.3.3. The informal reconsideration should occur within one (1) working day of the receipt of the request and should be conducted between the provider rendering the service and the MCO's physician authorized to make adverse determinations or a clinical peer designated by the medical director if the physician who made the adverse determination cannot be available within one (1) working day.

8.5.4.1.3.4. The Informal Reconsideration will in no way extend the thirty (30) day required timeframe for a Notice of Appeal Resolution.

8.5.4.2. Exceptions to Requirements

- The MCO shall not require hospital service authorization for non-emergency inpatient admissions for normal newborn deliveries.
- The MCO shall not require service authorization or referral for EPSDT screening services.
- The MCO shall not require service authorization for the continuation of medically necessary covered services of a new member transitioning into the MCO, regardless of whether such services are provided by an in-network or out-of-network provider, however, the MCO may require prior authorization of services beyond thirty (30) calendar days.

- The MCO is prohibited from denying prior authorization solely on the basis of the provider being an out-of-network provider for the first 30 days of a newly enrolled members linkage to the plan.

- The MCO may require notification by the provider of Obstetrical admissions exceeding forty-eight (48) hours after vaginal delivery. The MCO is allowed to deny a portion of a claim for payment based solely on lack of notification by the provider of Obstetrical admission exceeding forty-eight (48) hours after vaginal delivery. In this case, the MCO is allowed to deny only the portion of the claim related to the inpatient stay beyond forty-eight (48) hours.

- The MCO may require notification by the provider of Obstetrical admissions exceeding ninety-six (96) hours after Caesarean section. 8.6.4. Any prior approval issued by the MCO shall take into consideration prescription refills related to the original pharmacy service. The MCO must notify the requesting practitioner of the approval or disapproval of the request within 24 hours once relevant medically necessary information is obtained from the prescriber.

8.6.5. The MCO must provide access to a toll-free call center for prescribers to call to request prior authorization for non-preferred drugs or drugs that are subject to clinical edits. The MCO must allow prescribers and pharmacies to submit prior authorization requests by phone, fax or automated process. The pharmacy may fill consecutive 72-hour supplies if the prescriber remains unavailable but the MCO is only required to pay one dispensing fee. The MCO must reimburse the pharmacy for dispensing the temporary supply of medication.

8.6.10. A member, or a provider on Member's behalf, may appeal prior authorization denials in accordance with Section 13 (Grievances and Appeals) of this contract.

These protocols may be applied to either individual drugs or classes of drugs. However, the MCO must provide a clear process for a provider to request an override of such restrictions. An override shall be granted when the prescribing physician can demonstrate, based on sound clinic evidence, that the preferred treatment required under the step therapy or fail first protocol: (1) has been ineffective in the treatment of the Medicaid enrollee's disease or medical condition; (2) will be expected to be ineffective based on the known relevant physical or mental characteristics and medical history of the Medicaid enrollee and known characteristics of the drug regimen; or (3) will cause or will likely cause an adverse reaction or other physical harm to the Medicaid enrollee.

8.8. Medication Therapy Management

9.7.9.2. A network physician assumes responsibility for the member's care through transfer;

9.7.9.3. A representative of the MCO and the treating physician reach an agreement concerning the member's care; or

~~11.3.3.3.~~**11.4.3.3.** If there is no previous MCO relationship, or the member's PCP is not currently in-network, the Enrollment Broker shall use a round robin method to determine the MCO assignment that maximizes the preservation of existing provider-recipient relationships.

~~11.3.3.4.~~11.4.3.4. If an MCO's membership is comprised of forty percent (40%) or more of total statewide membership at the end of any quarter, that plan will be removed from the auto assignment round robin process for the following quarter but members can continue to pro-actively select that plan.

~~11.4.~~11.5. MCO Lock-In Period

However, the MCO may receive new members as a result of: member choice and newborn enrollments; reassignments when a member loses and regains eligibility selection when other family or case members are members of the MCO; need to ensure continuity of care for the member; or determination of just cause by DHH. DHH's evaluation of an MCO's enrollment market share will take place on a calendar quarter.

21.6. Termination of MCO Contract

21.6.1. Nothing in this Section shall limit DHH's right to terminate the Contract or to pursue any other legal or equitable remedies.

Pursuant to 42 CFR §438.708, DHH may terminate the Contract and enroll that MCO's members in other MCOs or provide their benefits through other options included in the state plan if DHH, at its sole discretion, determines that the MCO has failed to: (1) carry out the substantive terms of the Contract, or (2) meet applicable requirements in Sections 1932, 1903(m) or 1905(t) of the Social Security Act.

21.6.3. DHH will provide the MCO with a timely written Notice of Intent to Terminate (Notice) that states the nature and basis of the penalty or sanction and pre-termination hearing rights.

21.6.4. The termination will be effective no less than thirty (30) calendar days from the date of the Notice of Intent to Terminate. The MCO may, at the discretion of DHH, be allowed to correct the deficiencies within the thirty (30) calendar day notice period, unless other provisions in this Section demand otherwise, prior to the issuance of a Notice of Termination.

The audit firm will conduct tests and render an independent opinion on the operating effectiveness of the controls and procedures. When required by DHH, the contractor must provide a quality control

plan, such as third party Quality Assurance (QA), Independent Verification and Validation (IV&V), and other internal project/program reviews and audits.

22.0 PROPOSAL AND EVALUATION

22.1. General Information

22.1.1. DHH shall determine, at its sole discretion, whether or not the requirements have been reasonably met.

22.1.2. Omissions of required information shall be grounds for rejection of the proposal by DHH.

22.2. Blackout Period

The Blackout Period is a specified period of time during a competitive sealed procurement process in which any proposer, bidder, or its agent or representative, is prohibited from communicating with any state employee or contractor of the State involved in any step in the procurement process about the affected procurement. The Blackout Period applies not only to state employees, but also to any contractor of the State. "Involvement" in the procurement process includes but may not be limited to project management, design, development, implementation, procurement management, development of specifications, and evaluation of proposals for a particular procurement. All solicitations for competitive sealed procurements will identify a designated contact person. All communications to and from potential proposers, bidders, vendors and/or their representatives during the Blackout Period must be in accordance with this solicitation's defined method of communication with the designated contact person. The Blackout Period will begin upon posting of the solicitation. The Blackout Period will end when the contract is awarded.

In those instances in which a prospective vendor is also an incumbent vendor, the State and the incumbent vendor may contact each other with respect to the existing contract only. Under no circumstances may the State and the incumbent vendor and/or its representative(s) discuss the blacked-out procurement.

Any bidder, proposer, or state contractor who violates the Blackout Period may be liable to the State in damages and/or subject to any other remedy allowed by law.

Any costs associated with cancellation or termination will be the responsibility of the proposer or bidder.

Notwithstanding the foregoing, the Blackout Period shall not apply to:

- A protest to a solicitation submitted pursuant to La. R.S. 39:1671 or LAC 34:V.145.A.8;
- Duly noticed site visits and/or conferences for bidders or proposers;
- Oral presentations during the evaluation process; and
- Communications regarding a particular solicitation between any person and staff of the procuring agency provided the communication is limited strictly to matters of procedure. Procedural matters include deadlines for decisions or submission of proposals and the proper means of communicating regarding the procurement, but

shall not include any substantive matter related to the particular procurement or requirements of the RFP.

22.3. Rejection and Cancellation

22.3.1. Issuance of this solicitation does not constitute a commitment by DHH to award a contract or contracts. The Department reserves the right to reject all proposals received in response to this solicitation.

In addition, written commitments from any subcontractors or joint ventures shall be included as part of the proposal. All assignments must be approved by DHH.

22.7. Proposer Prohibition

A proposer shall not submit multiple proposals in different forms. Proposers are reminded that while trade secrets and other proprietary information submitted in conjunction with this RFP may not be subject to public disclosure, protections must be claimed by the proposer at the time of submission of its proposal. Proposers should refer to the Louisiana Public Records Act for further clarification.

22.13.3. 22.13.4. Further, to protect such data, each page containing such data shall be specifically identified and marked **"CONFIDENTIAL."**

22.13.5. Proposers must be prepared to defend the reasons why the material should be held confidential. If a competing proposer or other person seeks review or copies of another proposer's confidential data, DHH will notify the owner of the asserted data of the request. 22.16.2. Whenever the terms "can," "may," or "should" are used in this RFP in conjunction with a specification or performance requirement, the specification or performance requirement is a desirable, but not mandatory, requirement. Accordingly, a proposer's failure to address or provide any items so referred to will not be the cause for rejection of the proposal, but will likely result in a less favorable evaluation.

22.17. Proposal Content

22.17.1. The proposal shall address all requirements listed in Appendix KK **MCO Proposal Submission and Evaluation Requirements** of this RFP and should provide, in sequence, the information and documentation as required. 25.25.2 The MCO further agrees that the MCO member shall not be held liable for payment for core benefits and services furnished under a provider contract, referral, or other arrangement, to the extent that those payments would be in excess of the amount that the member would owe if the MCO provided the service directly. 25.26.2 If the MCO performs services, or uses services, in violation of the foregoing paragraph, the MCO shall be in material breach of this Contract and shall be liable to DHH for any costs, fees, damages, claims, or expenses it may incur. Additionally, the MCO shall be required to hold harmless and indemnify DHH pursuant to the indemnification provisions of this Contract.

25.31.2 The MCO shall submit, within twenty-one (21) days of said interpretation, a written request disputing the interpretation directly to the Medicaid Director. The ability to dispute an interpretation does not apply to language in the Contract that is based on federal or state statute, regulation or case law.

25.31.3 The Medicaid Director shall reduce the decision to writing and provide a copy to the MCO. The written decision of the Medicaid Director shall be the final decision

of DHH. The Medicaid Director will render his final decision based upon the written submission of the MCO and the Medicaid MCO Program Director, unless, at the sole discretion of the Medicaid Director, the Medicaid Director allows an oral presentation by the MCO and the Medicaid MCO Program Director or his/her designee. Specific written authorization from DHH is required to reproduce, reprint, or distribute any DHH form, application, or publication for a fee. 25.36 Non-Waiver of Breach

The failure of DHH at any time to require performance by the MCO of any provision of this Contract, or the continued payment of the MCO by DHH, shall in no way affect the right of DHH to enforce any provision of this Contract; nor shall the waiver of any breach of any provision thereof be taken or held to be a waiver of any succeeding breach of such provision or as a waiver of the provision itself. No covenant, condition, duty, obligation, or undertaking contained in or made a part of this Contract shall be waived except by the written agreement of the parties and approval of CMS, if applicable. Waiver of any breach of any term or condition in this Contract shall not be deemed a waiver of any prior or subsequent breach. No term or condition of this Contract shall be held to be waived, modified, or deleted except by an instrument, in writing, signed by the parties hereto.

25.37 Offer of Gratuities

By signing this Contract, the MCO signifies that no member of, or a delegate of, Congress, nor any elected or appointed official or employee of the state of Louisiana, the Government Accountability Office, DHHS, CMS, or any other federal agency has or shall benefit financially or materially from this Contract.
