**Subject:** Healthy Louisiana Program – Full Risk Bearing Managed Care Organization (MCO) Rate Development and Actuarial Certification for the Period January 1, 2019 through December 31, 2019

Dear Ms. Diez:

The Louisiana Department of Health (LDH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound<sup>1</sup> capitation rates for the State of Louisiana's (State) Healthy Louisiana program for the period of January 1, 2019 through December 31, 2019. This certification addresses the development of the Physical Health, Specialized Behavioral Health (SBH) Only, Maternity Kick Payment, Expansion SBH Dual Eligible, Expansion SBH Chisolm, Expansion SBH Other, and the Expansion Maternity Kick Payment rate development. The Healthy Louisiana rates covering the Expansion, All Ages, Male & Female rate cells will be addressed in a separate certification.

This letter presents an overview of the methodology used in Mercer's managed care rate development for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process relied on Medicaid fee-for-service (FFS) medical and pharmacy claims, Healthy Louisiana Shared Savings claims experience, Healthy Louisiana Prepaid encounter data, and Louisiana Behavioral Health Partnership (LBHP) claims experience. It resulted in the development of a range of actuarially sound rates for each rate cell. The final capitation rates and rate ranges are summarized in Appendix A and represent payment in full for the covered services.

---

<sup>1</sup> Actuarially Sound/Actuarial Soundness — Medicaid capitation rates are "actuarially sound" if, for business for which the certification is being prepared and for the period covered by the certification, projected capitation rates and other revenue sources provide for all reasonable, appropriate, and attainable costs. For purposes of this definition, other revenue sources include, but are not limited to, expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income. For purposes of this definition, costs include, but are not limited to, expected health benefits, health benefit settlement expenses, administrative expenses, the cost of capital, and government-mandated assessments, fees, and taxes.

[Reference: http://www.actuarialstandardsboard.org/wp-content/uploads/2015/03/asop049\\_179.pdf](http://www.actuarialstandardsboard.org/wp-content/uploads/2015/03/asop049_179.pdf)

The remainder of this letter is structured as follows:

**Section 1: Medicaid Managed Care Rates**

- Part A: General Information
- Part B: Base Data Development
- Part C: Non-Expansion Capitation Rate Development
  - *Subpart C.1: Projected Benefit Costs*
  - *Subpart C.2: Special Contract Provisions*
  - *Subpart C.3: Projected Non-Benefits Costs*
  - *Subpart C.4: Risk Mitigation*

**Section 2: New Adult Group Capitation Rates**

**Section 3: Certification of Final Rates**

**SECTION 1: MEDICAID MANAGED CARE RATES**

**Part A: General Information**

Capitation rates for the Healthy Louisiana program were developed in accordance with rate-setting guidelines established by CMS. For rate development for the Healthy Louisiana program, Mercer used data from federal fiscal year 2016 (FFY 2016), which spans the period of October 1, 2015 through September 30, 2016 and FFY 2017, which spans the period of October 1, 2016 through September 30, 2017. Data sources included Medicaid FFS medical and pharmacy claims, Healthy Louisiana Prepaid encounter data, Healthy Louisiana MCO financial reports and LBHP claims experience. All data was reported on an incurred basis and included payment dates through March 2018. Restrictions were applied to the enrollment and claims data so that it was appropriate for the populations and benefit package defined in the Healthy Louisiana MCO contract.

Mercer reviewed the data provided by LDH, the Healthy Louisiana MCOs and the LBHP for consistency and reasonableness and determined the data was appropriate for the purpose of setting actuarially sound Medicaid managed care capitation rates. The data reliance attestation shown in Appendix R has been provided by LDH, and its purpose is to certify the accuracy, completeness, and consistency of the base data.

Adjustments were made to the selected base data to align with the covered populations and Healthy Louisiana benefit packages for rating year 2019 (RY 2019). Additional adjustments were then applied to the base data to incorporate:

- Provision for incurred but not reported (IBNR) claims.
- Adjustments to encounter data for under-reporting.
- Prospective and retrospective program changes not fully reflected in the base data.
- Trend factors to forecast the expenditures and utilization to the contract period.
- Changes in benefits covered by managed care.
- Addition of new populations to the Healthy Louisiana program.
- Opportunities for managed care efficiencies.
- Administration and underwriting profit/risk/contingency loading.

In addition to these adjustments, LDH takes two additional steps in the matching of payment to risk:

- Application of maternity kick payments.
- Application of risk-adjusted regional rate.

The final rates for all rate cells were developed net of Graduate Medical Education (GME) payments to teaching hospitals provided in the Louisiana Medicaid State Plan. Appendix P details the development of rates for the Non-Expansion population. For a detailed discussion of the development of the base data, as shown in Appendix P please refer to the Healthy Louisiana Data Book released by LDH on November 20, 2018.

### **Healthy Louisiana Populations**

Effective February 1, 2016, the Healthy Louisiana Non-Expansion program had two major rating categories (RCs):

1. Individuals who meet the eligibility criteria for the Healthy Louisiana PH program; their physical health (PH), SBH and non-emergency medical transportation (NEMT) services are the responsibility of the MCO. This rating group is referred to as the Healthy Louisiana PH program.
2. Individuals, who do not meet the eligibility criteria for the Healthy Louisiana PH program, yet remain eligible for the Legacy LBHP/Medicaid program; only their SBH and NEMT services are the responsibility of the MCO. This rating group is referred to as the Healthy Louisiana SBH program.

## **Physical Health Program**

In general, the Healthy Louisiana PH program includes individuals classified as Supplemental Security Income (SSI), Family & Children (F&C), Foster Care Children (FCC), Breast and Cervical Cancer (BCC), and Louisiana Children's Health Insurance Program (LaCHIP) Affordable Plan (LAP) as mandatory populations. Voluntary opt-in populations include Home- and Community-Based Services (HCBS) waiver participants and Chisholm Class Members (CCM).

### **Mandatory Populations**

Please see Appendix B for detail on which Aid Category and Type Case combinations are considered Mandatory populations for the PH program.

### **Voluntary Opt-In Populations**

Individuals in a voluntary opt-in population group are not automatically enrolled into the Healthy Louisiana PH program, but they may choose to initially enroll at any time. Likewise, they may choose to dis-enroll at any time, effective the earliest possible month the action can be administratively handled. Moreover, a voluntary opt-in individual may re-enroll during the annual, open enrollment period. Such members include the following:

- Individuals receiving services through any 1915(c) HCBS waiver:
  - Adult Day Health Care.
  - New Opportunities waiver.
  - Children's Choice.
  - Residential Options waiver.
  - Supports waiver.
  - Community Choices waiver.
  - Other HCBS waivers as may be approved by CMS.
- Individuals under the age of 21 otherwise eligible for Medicaid who are listed on the Office for Citizens with Developmental Disabilities' Request for Services Registry who are CCM.

### **Excluded Populations**

Please see Appendix B for detail on which Aid Category and Type Case combinations are considered Excluded populations for the PH program.

### **Specialized Behavioral Health Program**

The Healthy Louisiana SBH program includes individuals classified as SBH Dual and SBH Other as mandatory populations. The voluntary opt-in populations that did not choose to opt into Healthy Louisiana

for PH services are automatically included in the SBH program. These populations are denoted as SBH HCBS Waiver participants and SBH CCM.

Effective April 1, 2017, the Louisiana Health Insurance Premium Payment (LaHIPP) program is reinstated. Members that are enrolled in the LaHIPP program will receive SBH and NEMT services only through Healthy Louisiana. A separate adjustment that will be discussed later in this letter was applied to the base data to incorporate the coverage of the LaHIPP population by the SBH program.

#### Mandatory Populations

Please see Appendix B for detail on which Aid Category and Type Case combinations are considered Mandatory populations for the SBH program.

#### Excluded Populations

Please see Appendix B for detail on which Aid Category and Type Case combinations are considered Excluded populations for the SBH program.

#### Rate Cell Structure

##### Physical Health Program

Mercer summarized the PH, SBH and NEMT services data for the Healthy Louisiana PH program RC by rate cell. Historical claim costs vary by age and eligibility category, and separate rate cells were developed accordingly to reflect differences in risk. Fourteen distinct rate cells were established within this RC based on Mercer's review of historical cost and utilization patterns in the available experience. In addition, a Maternity Kick Payment will be paid to the MCOs for each qualifying delivery event that takes place.

**TABLE 1A:**

<b>Maternity Kick Payment</b>	
Maternity Kick Payment	Early Elective Delivery - Kick Payment

### Specialized Behavioral Health Program

Mercer summarized the SBH and NEMT only service data for the Healthy Louisiana SBH program RC by rate cell. Historical SBH costs vary by age and eligibility category and separate rate cells were developed accordingly to reflect differences in risk. Five distinct rate cells were established within this RC based on Mercer's review of historical cost and utilization patterns in the available experience.

SBH program eligible individuals may qualify under more than one rate cell definition therefore the classification of logic is applied in a hierarchical manner in the order presented in Table 1B.

## HEALTHY LOUISIANA BENEFIT PACKAGE

### Covered Services

Appendix C lists the services the Healthy Louisiana MCOs must provide to the members in the Healthy Louisiana PH and SBH programs, respectively. The MCOs also have the ability to develop creative and innovative solutions to care for their members (i.e., provide other cost-effective alternative services), as long as the contractually-required Medicaid services are covered. Costs of alternative services are

expected to be funded through savings on the contractually-required services for which these services are a cost-effective substitute.

### **New Services**

Effective January 1, 2019, LDH will begin covering personal-use, double electric breast pumps for nursing mothers, without prior authorization.

Also effective January 1, 2019, Healthy Louisiana MCOs will be responsible for the coverage of Continuous Glucose Monitors (CGM) for all eligible recipients that meet the following criteria:

- Diagnosis of type 1 diabetes with recurrent, unexplained, severe hypoglycemia (glucose levels <50 mg/dl).
- Impaired hypoglycemia awareness that puts the recipient at risk or Pregnant recipient with poorly controlled type 1 diabetes evident by recurrent, unexplained hypoglycemic episodes, hypoglycemic unawareness, postprandial hyperglycemia or recurrent diabetic ketoacidosis.

Effective February 1, 2019, LDH will begin covering Non-Invasive Prenatal Testing (NIPT) for pregnant females aged 35 and above and under 35 that meet certain high-risk criteria.

Mercer applied three separate adjustments to the rates to incorporate the coverage of the three new services. These adjustments will be discussed later in this letter.

### **Medicare Crossover Claims**

For dually eligible individuals, Medicare “Crossover” claims (claims that include primary payment from Medicare) for Inpatient, Outpatient, Emergency Room (ER) and Professional services are excluded from this Data Book. These services will be paid directly by the State after coordinating with Medicare.

In order to exclude Crossover claims from the Data Book, Mercer identified claims submitted to the State and coded with claim type “14” (Medicare Crossover Institutional), or claim type “15” (Medicare Crossover Professional). This includes claims with a Medicare qualifying Electronic Media Claim submitter ID and claim format 837-I (Institutional) or 837-P (Professional), as well as hard copy claims with an Explanation of Benefits from Medicare attached. For Magellan and Prepaid encounters, Mercer identified records in which the Medicare paid field (CLQ\_Medicare\_Amt) indicated an amount greater than zero dollars. Mercer removed all records fitting the criteria above from our base data.

### **Excluded Services**

Healthy Louisiana MCOs are not responsible for providing PH services and other Medicaid services not identified in Appendix C, including the following services:

- Dental services, with the exception of Early and Periodic Screening and Diagnosis Treatment varnishes provided in a Primary Care setting.
- Intermediate care facilities for the developmentally disabled services.

- Personal Care services 21 and older.
- Institutional Long-Term Care (LTC) Facility/Nursing Home services.
- School-based Individualized services.
- Education Plan services provided by a school district and billed through the intermediate school district, or School-based services funded with certified public expenditures, including school nurses.
- HCBS waiver services.
- Targeted Case Management services.
- Services provided through LDH's Early-Steps program.
- Coordinated System of Care (CSoC) services previously covered under 1915(c) or 1915(b)(3) waiver authority.
- Medicare Crossover services.
- Services covered under a non-CSoC 1915(c) waiver.

For more specific information on covered services, please refer to the Healthy Louisiana Behavioral Health Integration Amendment issued by LDH.

#### HEALTHY LOUISIANA SERVICES ELIGIBLE FOR DIFFERENT FEDERAL MEDICAL ASSISTANCE PERCENTAGE (FMAP)

There are two groups of services for which LDH receives a different FMAP than the regular state FMAP:

- Family Planning services.
- A list of specified preventive services and adult vaccines established under ACA section 4106.

Mercer has analyzed the component of the rates associated with each group of services so that LDH may claim the enhanced FMAP on these services. Specific details on codes used to identify the family planning and preventive services can be found in Appendices D and E, respectively, which contain the per member per months (PMPMs) that are eligible for the enhanced match rate.

#### REGION GROUPINGS

For rating purposes, Louisiana has been split into four different regions. Table 2 lists the associated parishes for each of the four regions. The region groupings are the same in all three programs.

**TABLE 2**

REGION GROUPINGS	
Region Description	Associated Parishes (Counties)
Gulf	Assumption, Jefferson (East Bank), Jefferson (West Bank), Lafourche, New Orleans (Algiers), New Orleans (Downtown), New Orleans (Gentilly), New Orleans (Uptown), Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John, St. Mary and Terrebonne
Capital	Ascension, East Baton Rouge, East Feliciana, Iberville, Livingston, Pointe Coupee, St. Helena, St. Tammany, Tangipahoa, Washington, West Baton Rouge and West Feliciana
South Central	Acadia, Alexandria, Allen, Avoyelles, Beauregard, Calcasieu, Cameron, Catahoula, Concordia, Evangeline, Grant, Iberia, Jefferson Davis, Lafayette, Lasalle, Rapides, St. Landry, St. Martin, Vermilion, Vernon and Winn
North	Bienville, Bossier, Caddo, Caldwell, Claiborne, DeSoto, East Carroll, Franklin, Jackson, Lincoln, Madison, Monroe, Morehouse, Natchitoches, Ouachita, Red River, Richland, Sabine, Shreveport, Tensas, Union, Webster and West Carroll

## PART B: BASE DATA DEVELOPMENT

For rate development for the Healthy Louisiana program, Mercer used FFY 2016 and FFY 2017 data from the following sources:

- Louisiana Medicaid eligibility and enrollment data.
- Encounter data reported from the State's Healthy Louisiana Prepaid program.
- Encounter data reported from the State's LBHP program for adults.
- Claims data from the State's LBHP program for children.
- FFS data for services and populations to be covered under the Healthy Louisiana program, but historically covered under Legacy Medicaid/FFS.

All data was reported on an incurred basis and included payment dates through March 31, 2018. Restrictions were applied to the enrollment and claims data so that it was appropriate for the populations and benefit package defined in the contract.

Mercer reviewed the data provided by LDH, the Healthy Louisiana MCOs and the LBHP for consistency and reasonableness and determined the data was appropriate for the purpose of setting capitation rates for the MCO program. The data reliance attestation shown in Appendix R has been provided by LDH, and its purpose is to certify the accuracy, completeness and consistency of the base data.

Effective February 1, 2015, members were granted retroactive eligibility, based on their eligibility for Healthy Louisiana, for up to 12 months prior to enrollment in an MCO. The MCO selected by these members will then receive one capitation payment per month of retroactive enrollment, and will be liable for all claims incurred during this retroactive eligibility period. Retroactive eligibility and claims are excluded from the base data and handled as a separate adjustment. This adjustment will be discussed later in this letter.

#### INCURRED BUT NOT REPORTED

Capitation rate ranges were developed using claims data for services incurred in FFY 2016 and FFY 2017 and reflects payments processed through March 2018. Mercer deemed claims incurred in FFY 2016 as complete as they have at least 18 months of runout. Mercer developed IBNR factors for FFY 2017 encounter data in order to reflect considerations for any unpaid claims liability. This adjustment, which is detailed in the Healthy Louisiana Data Book, resulted in an overall aggregate increase of 1.80%.

#### UNDER-REPORTING ADJUSTMENTS

Under-reporting adjustments were developed by comparing encounter data from the Medicaid Management Information System (MMIS) to financial information provided by the MCOs and the LBHP Prepaid Inpatient Health Plan (PIHP). This adjustment, which is detailed in the Healthy Louisiana Data Book, was computed and applied on an MCO-specific basis. Table 3 summarizes the overall aggregate increases applied to FFY 2016 and FFY 2017 expenses.

**TABLE 3**

UNDER-REPORTING ADJUSTMENT	FFY 2016		FFY 2017	
Category of Service	PH Program	SBH Program	PH Program	SBH Program
Prescribed Drugs	1.0680		1.0718	
Transportation and SBH	0.9936	0.9227	1.0274	0.9674
All other	1.0365		1.0224	

#### THIRD-PARTY LIABILITIES

All claims are reported net of third-party liability, therefore no adjustment is required.

#### FRAUD AND ABUSE RECOVERIES

LDH provided data related to fraud and abuse recoveries on the LBHP and Legacy FFS programs. The total adjustment applied to the FFS data for PH services was -0.09% for FFY 2016. Healthy Louisiana MCOs included fraud and abuse recoveries in their financial reports. These recoveries were included in the

development of the under-reporting adjustment for PH services. No adjustment was needed for FFY 2017 because only encounter data was used.

## COPAYMENTS

Copayments are only applicable to prescription drugs. Pharmacy claims are reported net of any copayments so no additional adjustment is necessary.

## DISPROPORTIONATE SHARE HOSPITAL (DSH) PAYMENTS

DSH payments are made outside of the MMIS system and have not been included in the capitation rates.

## BASE PROGRAM CHANGE ADJUSTMENTS

Program change adjustments recognize the impact of benefit or eligibility changes occurring during and after the base data period. CMS requires that the rate setting methodology used to determine actuarially sound rates incorporate the results of any program changes that have taken place, or are anticipated to take place, between the start of the base data period and the conclusion of the contract period.

Program changes that occurred during the base data period are referred to as Base Program Change Adjustments.

## Preventive Services

Section 4106(b) of the Affordable Care Act established a one percentage point increase in the FMAP effective January 1, 2013, applied to expenditures for adult vaccines and clinical preventive services to states that cover, without cost-sharing, a full list of specified preventive services and adult vaccines. In order to meet the eligibility requirements for the one percentage point FMAP increase, LDH decided to expand the list of adult vaccines and clinical preventive services covered under the State Plan, effective July 1, 2016. These services are included on the applicable published fee schedules on the Medicaid website [www.lamedicaid.com](http://www.lamedicaid.com). The impact of the change is an increase of 0.01% in FFY 2016 for the PH program. The change has no impact on the SBH program and no impact on FFY 2017.

TABLE 4:

PREVENTIVE SERVICES FEE CHANGE IMPACT				IMPACT AS % OF	
Time Period	All Services Cost	Historical PS Cost	Adjustment Dollar Impact	Historical PS Cost	All Services Cost
FFY16	\$2,938,439,843	\$371,954	\$398,910	107.25%	0.01%
FFY17	\$2,962,971,073	\$756,949		0.00%	0.00%
<b>Total</b>	<b>\$5,901,410,915</b>	<b>\$1,128,904</b>	<b>\$398,910</b>	<b>35.34%</b>	<b>0.01%</b>

## Pediatric Day Health Care (PDHC) Program Change

Effective September 1, 2016, LDH issued three policy changes to PDHC services. These policy changes include changes in the eligibility criteria, per diem requirement and re-evaluation period.

### Eligibility Criteria

Medicaid recipients are required to meet all criteria on the PDHC prior authorization checklist to be eligible for PDHC services. Effective September 1, 2016, LDH issued a more restrictive prior authorization checklist that will reduce the number of PDHC recipients.

### Per Diem Requirement

Prior to September 1, 2016, PDHC providers billed an hourly rate for PDHC stays of up to 4 hours in a day and a per diem rate for stays between 4–12 hours. Effective September 1, 2016, the state fee schedule is changing to an hourly rate for stays up to 6 hours and a per diem rate for stays between 6–12 hours.

### Re-evaluation Period

Effective September 1, 2016, the days between a PDHC recipient's re-evaluations changed from 120 days to 90 days.

Mercer completed a pre/post analysis of the policy changes and adjusted the base data to reflect the impact of the changes.

**TABLE 5:**

PDHC FEE CHANGE IMPACT				IMPACT AS % OF	
Time Period	All Services Cost	Historical PDHC Cost	Adjustment Dollar Impact	Historical PDHC Cost	All Services Cost
FFY16	\$2,938,439,843	\$23,544,066	\$(3,938,979)	-16.73%	-0.13%
FFY17	\$2,962,971,073	\$20,879,428	\$(582,155)	-2.79%	-0.02%
<b>Total</b>	<b>\$5,901,410,915</b>	<b>\$44,423,493</b>	<b>\$(4,521,134)</b>	<b>-10.18%</b>	<b>-0.08%</b>

### ACT 399 (Provider Fee Reimbursement)

Effective December 1, 2015, Act 399 creates an appeal board to review pharmacy reimbursement disputes. It is the obligation of a health insurance issuer or its agent to reimburse a pharmacist or his agent for fees remitted by a pharmacy or pharmacist or his agent in compliance with R.S. 46:2625 or risk being sanctioned. Mercer reviewed this requirement and its underlying details and estimated the impact to the base period data to be approximately 0.01%.

### **Managed Care Savings Adjustment**

A portion of FFY 2016 base expenses was incurred outside of a managed care delivery system by the former voluntary opt-out population which became mandatory enrolled effective December 1, 2015. For those expenses incurred outside of a full-risk managed care delivery system, Mercer adjusted the capitation rates to reflect areas for managed care efficiency. Managed care is able to generate savings by:

- Encouraging the use of preventive services so that acute conditions are not exacerbated to the point that requires a visit to the ER or hospitalization.
- Using alternatives to the ER for conditions that are non-emergent in nature.
- Increasing access and providing member education.
- Minimizing duplication of services.
- Hospital discharge planning to ensure a smooth transition from facility-based care to community resources and minimize readmissions.

Appendix F summarizes the managed care savings adjustments that were applied to the Legacy Medicaid FFS data.

### **Efficiency Adjustments**

Mercer distinguishes efficiency adjustments (which are applied to managed care-enrolled populations) from managed care savings adjustments (which are applied to previously unmanaged populations). Efficiency adjustments are intended to reflect improved efficiency in the hospital inpatient, emergency department (ED) and pharmacy settings, and are consistent with LDH's goal that the Healthy Louisiana program be operated in an efficient, high-quality manner.

## **CLINICAL EFFICIENCY ADJUSTMENTS**

### **Inpatient Hospital Efficiency Adjustment**

Illness prevention is an important medical care element for all health care providers. LDH expects the MCOs to help their members stay healthy by preventing diseases or preventing complications of existing diseases. Since hospital expense represents a significant portion of all medical expenditures, Mercer performed a retrospective data analysis of the MCOs' FFY 2016 and FFY 2017 encounter data using indicators developed by the Agency for Healthcare Research and Quality (AHRQ). These conditions are collectively referred to as Prevention Quality Indicators (PQI) and Pediatric Quality Indicators (PDI), respectively. Mercer utilized 13 adults and five pediatric PQIs as part of the analysis. Evidence suggests that hospital admissions for these conditions could have been avoided through high-quality outpatient care and/or the conditions could have been less severe if treated early and appropriately. AHRQ's technical specifications provide specific criteria that define each PQI and PDI that Mercer utilized in the analysis of the MCOs' inpatient hospital encounter data. Although AHRQ acknowledges that there are factors outside of the direct control of the health care system that can result in a hospitalization (e.g., environmental, patient compliance), AHRQ does recognize these analyses can be utilized to benchmark health care system efficiency between facilities and across geographies.

While the AHRQ technical specifications include exclusionary criteria specific to each PQI and PDI, Mercer also considered clinically-based global exclusion criteria that removed a member's inpatient admissions from all inpatient efficiency analyses. The global exclusion criteria were utilized to identify certain conditions and situations (e.g., indications of trauma, burns, HIV/AIDS) that may require more complex treatment for members. Based on a review of the FFY 2016 and FFY 2017 inpatient encounter data, any member identified as having indications of any of the qualifying criteria resulted in all of that member's admissions being removed from the analyses. Once all clinical global exclusions data was removed from the analysis, the embedded AHRQ exclusions, by PQI/PDI were then applied.

Additionally, even though the AHRQ technical specifications do not explicitly mention enrollment duration, Mercer considered enrollment duration as one of the contributing factors to review that would be associated with the applicability of a PQI/PDI-based adjustment. Enrollment duration was used as a proxy for issues such as patient compliance, health plan outreach and education, time to intervene, and other related concepts. A variable-month enrollment duration ranging from two to twelve months, depending on PQI or PDI condition, was applied to the RY 2019 rates. This assumption meant that an individual had to be enrolled with the same plan for a minimum number of consecutive months prior to that individual's PQI or PDI hospital admission to be considered subject to the adjustment. Only the dollars associated with the PQI and PDI hospital admissions that met these enrollment duration criteria were included in the base data adjustment. Recipient eligibility data supplied by the State provided the information to make this duration test assessment.

### **ED Efficiency Adjustment**

Mercer performed a retrospective analysis of the MCOs' FFY 2016 and FFY 2017 ED encounter data to identify ED visits that were considered preventable/pre-emptible. For the RY 2019 rate development, Mercer analyzed preventable/pre-emptible Low Acuity Non-Emergent (LANE) visits. This analysis was not intended to imply that members should be denied access to EDs or that the MCOs should deny payment for the ED visits. Instead, the analysis was designed to reflect the State's objective that more effective, efficient, and innovative managed care could have prevented or pre-empted the need for some members to seek care in the ED setting in the first place.

The criteria used to define LANE ED visits was based on publicly available studies, input from Mercer's clinical staff, as well as review by practicing ED and primary care physicians (PCPs). ICD-9 primary diagnosis code information was the basis for identifying an ED visit. A limited set of diagnosis codes was agreed upon by all physicians involved in developing the methodology for the analysis. Preventable percentages ranging from 5.0% to 90.0% were assigned to each diagnosis code to account for external factors that can influence and impact variation in ED use. Using procedure code information, the ED visits were evaluated from low complexity clinical decision making to high complexity clinical decision making. In addition, LANE ED visits that resulted in an inpatient admission or observation stay (observation revenue code 0762) were excluded. No adjustment was made for any possible up coding by providers.

For the RY 2019, Mercer excluded low unit cost visits from the LANE analysis to account for improvements in the MCOs' use of triage fees and/or more appropriate health services management. A hierarchical process was used for the remaining LANE visits to identify those that could have been prevented or pre-empted. Beginning with the lowest acuity visits, data was accumulated until the percentage of

preventable/pre-emptible visits was achieved for each respective diagnosis code. Regardless of the targeted percentage, no LANE ED visit/dollars associated with the most complex clinical decision making procedure codes (99284–99285) were included in the final adjustment. In addition, a replacement cost amount (average cost physician visit) was made for the majority of LANE visits that were deemed preventable/pre-emptible. To reflect its desire for value-focused purchasing, the final LANE efficiency adjustment reflects a 50.0% targeted efficiency level applied to the final adjustment identified.

## PHARMACY EFFICIENCY ADJUSTMENTS

### Appropriate Diagnosis for Selected Drug Classes (DxRx)

The DxRx efficiency adjustment is used to ensure appropriate utilization of selected drug classes in historical claims data, based on supporting diagnosis information in the recipient's medical history. The selected drug classes were identified based on high cost, safety concerns, and/or high potential for abuse or misuse. Diagnosis information from 30 months (24 months prior to date of service, six months after date of service) of medical, professional, pharmacy and inpatient data is reviewed for each recipient. Appropriate drug-diagnosis pairs are reviewed annually by Mercer's team of clinicians, and include consideration for:

- Food and Drug Administration Approved Indications (both drug specific, and by drug class).
- Clinically-accepted, off-label utilization as identified by published literature and clinical/ professional expertise.
- Industry standard practices.

In consideration of limitations related to the MCOs ability to prior authorize HIV drugs and provider enrollment issues that may impact the ability of the DxRx algorithm to identify opiate dependence diagnoses, the HIV and Opiate Dependence categories were not used in developing the DxRx efficiency adjustment.

### Retrospective Pharmacy Claims Analysis

The clinical edits efficiency adjustment used a retrospective pharmacy claims analysis to identify inappropriate prescribing and/or dispensing patterns using a customized series of pharmacy utilization management edits that are clinically based on rules. Edits were developed by Mercer's managed pharmacy practice based on:

- Published literature.
- Industry standard practices.
- Clinical appropriateness review.
- Professional expertise.
- Information gathered during the review of several Medicaid FFS and managed care pharmacy programs across the country.

### **Pharmacy Healthcare Common Procedure Coding System (HCPCS)**

The HCPCS efficiency adjustment benchmarks each MCOs' reimbursement for clinician-administered drugs (billed via HCPCS) to determine if the plans per unit reimbursement is efficient compared to the national rate established by Medicare.

The State decided that to reflect its response for value-focused purchasing, the final retrospective pharmacy claims analysis efficiency adjustment should reflect a 75.0% targeted efficiency level applied to the final adjustment identified.

The overall impact of the Inpatient, ED and Pharmacy efficiency adjustments was a decrease of \$3.31 PMPM to the PH program.

### **Contralateral Breast Reduction (CBR) Services**

Effective February 1, 2017, the Healthy Louisiana program will cover breast reconstruction post mastectomy of the contralateral unaffected breast to achieve symmetry for patients diagnosed with breast cancer. The added CBR services will result in a 1.93% increase to the BCC rate cell, as shown in Appendix G.

### **Reinstatement of LaHIPP Program**

Effective April 1, 2017, the LaHIPP program is reinstated. Members that are enrolled in the LaHIPP program will receive PH services through FFS and will receive SBH and NEMT services through Healthy Louisiana. The LaHIPP members will be included in the SBH Dual and LaHIPP rate cell (f/k/a SBH Dual Eligible). As shown in Appendix H, the addition of the LaHIPP members results in a decrease of 0.50% to the SBH Dual Eligible and LaHIPP rate cell.

### **DATA SMOOTHING**

In forming the base data, Mercer combined the FFY 2016 and FFY 2017 base data by region and rate cell in order to ensure sufficient credibility to develop actuarially sound capitation rates.

In some instances, however, Mercer determined that certain rate cells were not sufficiently credible at the regional. For rate cells, which are identified below, Mercer calculated a single statewide capitation rate.

- SSI newborns 0–1 years of age.
- BCC, All Ages.
- LAP, All Ages.
- HCBS, All Ages.
- CCM, All Ages.
- SBH – CCM, All Ages.
- SBH – HCBS, All Ages.

- SBH – Other, All Ages.

## PROSPECTIVE RATING ADJUSTMENTS

Program change adjustments that occurred after the base data period, but before the conclusion of the rating period are referred to as Prospective Rating Adjustments.

### Fee Schedule Changes

The capitation rates reflect changes in covered services' fee schedules and unit costs, between the base period and the contract period.

Beginning in April 2014, LDH implemented a series of program changes to ensure consistent pricing in the Medicaid program for hospital services, including inpatient hospital, outpatient hospital, hospital-based physician and ambulance services. This change required the use of Full Medicaid Pricing (FMP) in the calculation of PMPM payments to MCOs. LDH expects this rate increase will lead to increased payments to those providers contracting with the MCOs to maintain and increase access to inpatient hospital, outpatient hospital, hospital-based physician and ambulance services to the enrolled Medicaid populations. Mercer and LDH reviewed the aggregate funding levels for these services between the base period and the contract period and determined that an addition to the historical data was necessary in order to ensure the capitation rate ranges reflect adequate statewide pricing levels. Separate adjustments were made to each of the four services to capture the full impact of statewide funding. FMP adjustments were implemented for inpatient and outpatient services effective April 2014. Physician and ambulance FMP adjustments were implemented effective July 2015.

For the non-FMP fee schedule changes discussed in this section, the fee schedule changes are expected to impact MCO costs as MCOs usually contract with providers at rates that are proportional to the Medicaid fee schedule for these services.

### Inpatient Services

Inpatient claims were adjusted to reflect changes in the fee schedule between the base period and the contract period, using the fee schedule effective July 1, 2018. The non-GME part of the per diems were used in this fee adjustment process to be consistent with LDH's intention to continue paying GME amounts directly to the teaching hospitals.

Mercer relied upon an analysis of Medicare Diagnosis Related Group (DRG) equivalent pricing of Medicaid services provided by LDH for the FMP adjustment. FFY 2016 and FFY 2017 encounter data was analyzed and compared the adjusted Medicare payments to the Medicaid payment on a per discharge basis at each hospital. The Medicare payments were adjusted to reflect the treatment of Medicaid patients and reflected the reimbursement level applicable to the rate period. The FFY 2016 Medicaid payments were adjusted to reflect applicable fee changes and payments made outside of the claims system (outlier payments). The Medicaid payments were also trended to the rate period and the ratio between the projected Medicare and Medicaid payments was calculated. Mercer applied the ratio between the two payments to the base data at a hospital specific level.

The total impact of the inpatient fee changes is summarized below in Table 6A below.

**TABLE 6A:**

INPATIENT FMP IMPACT					IMPACT AS % OF
Time Period	Historical Cost	Fee Change Impact	Adjusted Cost	FMP Impact	Adjusted Cost
FFY16	\$644,618,678	\$80,300,366	\$724,919,044	\$323,050,961	44.56%
FFY17	\$601,925,950	\$50,856,124	\$652,782,073	\$342,011,916	52.39%
<b>Total</b>	<b>\$1,246,544,628</b>	<b>\$131,156,490</b>	<b>\$1,377,701,117</b>	<b>\$665,062,877</b>	<b>48.27%</b>

#### Outpatient Services

Outpatient claims were adjusted to reflect the most recent cost-to-charge ratios (CCRs) available. The CCRs were reported on hospital fiscal year bases, which varied by hospital from June 30, 2015 to December 31, 2017. The adjustment also included estimation of cost settlements and reflected the most up-to-date cost settlement percentages for each facility.

Effective January 1, 2019 House Concurrent Resolution (HCR) 6 adjusted reimbursement rates for outpatient services for all hospitals except rural hospitals, state-owned hospitals, and Our Lady of the Lake. The rates for the effected facilities increased by 11.56% except for Children's Hospital where reimbursement for outpatient services increased by 5.26%. Additionally, cost settlement percentages for most non-rural, non-state facilities were increased to 83.18% effective January 1, 2019. Rural facilities are cost settled at 110%.

The outpatient FMP was developed according to the State Plan using the CCRs and the billed charges from the base data. The calculation was completed at a hospital level.

The total impact of the outpatient fee changes is summarized in Table 6B below.

**TABLE 6B:**

OUTPATIENT FMP IMPACT					IMPACT AS % OF
Time Period	Historical Cost	Fee Change Impact	Adjusted Cost	FMP Impact	Adjusted Cost
FFY16	\$430,965,113	\$65,199,300	\$496,164,413	\$96,737,804	19.50%
FFY17	\$451,323,323	\$69,917,384	\$521,240,707	\$108,207,391	20.76%
<b>Total</b>	<b>\$882,288,436</b>	<b>\$135,116,684</b>	<b>\$1,017,405,120</b>	<b>\$204,945,195</b>	<b>20.14%</b>

### Specialized Behavioral Health Fee Schedule Change

Effective July 1, 2018, LDH issued new Therapeutic Group Home (TGH) and Psychiatric Residential Treatment Facility (PRTF) per diems. The new fee schedule can be found on LDH's fee schedules website<sup>2</sup>. Mercer identified the affected services and estimated the impact of the fee schedule changes to develop adjustments to the capitation rates. The total impact of the TGH/PRTF fee changes is summarized in Table 6C below.

**TABLE 6C:**

TGH/PRTF FEE CHANGE IMPACT			IMPACT AS % OF	
Time Period	Historical Cost	Fee Change Impact	Historical Cost	All Services Cost
FFY16	\$4,849,121	\$1,059,774	21.85%	0.04%
FFY17	\$5,099,744	\$804,087	15.77%	0.03%
<b>Total</b>	<b>\$9,948,864</b>	<b>\$1,863,861</b>	<b>18.73%</b>	<b>0.03%</b>

### Physician-Administered Drugs (PAD) Fee Schedule Change

Effective July 1, 2018, LDH made changes to the PAD reimbursement rates. The new rates will be posted on LDH's fee schedule website<sup>3</sup>. Mercer identified the affected services and estimated the impact of the fee schedule changes to develop adjustments to the capitation rates. The total impact of the PAD fee changes is summarized in Table 6D below.

**TABLE 6D:**

PHYSICIAN-ADMINISTERED DRUGS FEE CHANGE IMPACT			IMPACT AS % OF	
Time Period	Historical Cost	Fee Change Impact	Historical Cost	All Services Cost
FFY16	\$2,834,321	\$598,717	21.12%	0.02%
FFY17	\$2,642,827	\$310,473	11.75%	0.01%
<b>Total</b>	<b>\$5,477,148</b>	<b>\$909,190</b>	<b>16.60%</b>	<b>0.02%</b>

### Hospital-Based Physician Services

Mercer calculated the FMP payments for hospital-based physician services provided at participating facilities by participating physicians according to the State Plan methodology. This methodology is designed to bring the payments for the physician services up to the community rate level. The community rate is defined as the rates paid by commercial payers for the same service. For state-owned or operated entities, Mercer calculated the FMP payments according to the State plan using the billed charges from the

<sup>2</sup> [https://www.lamedicaid.com/provweb1/fee\\_schedules/feeschedulesindex.htm](https://www.lamedicaid.com/provweb1/fee_schedules/feeschedulesindex.htm)

<sup>3</sup> See note 2 above.

base data and the commercial charges-to-paid conversion factors provided by LDH. For non-state owned or operated entities, Mercer calculated the FMP payments according to the State plan using the units of service from the base data, the most currently available Medicare fees and the Medicare-to-commercial conversion factors provided by LDH. The conversion factors are maintained by LDH and updated periodically. For state-owned or operated entities, the conversion factors are updated annually. For non-state owned or operated entities, the factors are updated every three years.

LDH provided the latest available factors, which were last updated as of October 2018. Table 6E below shows the impact of FMP on the adjusted base cost of hospital-based physician services meeting the State Plan's criteria for FMP.

**TABLE 6E:**

HOSPITAL-BASED PHYSICIAN FMP IMPACT					IMPACT AS % OF
Time Period	Historical Cost	Fee Change Impact	Adjusted Cost	FMP Impact	Adjusted Cost
FFY16	\$148,488,878		\$148,488,878	\$198,229,094	133.50%
FFY17	\$148,596,790		\$148,596,790	\$198,946,347	133.88%
<b>Total</b>	<b>\$297,085,668</b>		<b>\$297,085,668</b>	<b>\$397,175,442</b>	<b>133.69%</b>

#### **Ambulance Services**

Mercer calculated the ambulance FMP payments according to the State Plan using Medicare fee schedules and average commercial rates as a percentage of Medicare. Ambulance providers were classified as either Large Urban Governmental (LUG) or non-LUGs. LUGs have historically received 100.0% of the gap between average commercial rate and the Medicaid fee schedule while non-LUGs have historically received 17.35% of the gap. Mercer developed increases using these assumed funding levels. Average commercial rates as a percentage of Medicare were provided by LDH for RY 2019. According to the State Plan, average commercial rates are updated every three years. Table 6F below shows the impact of FMP on the adjusted base cost of ambulance services meeting the State Plan's criteria for FMP.

**TABLE 6F:**

AMBULANCE FMP IMPACT					IMPACT AS % OF
Time Period	Historical Cost	Fee Change Impact	Adjusted Cost	FMP Impact	Adjusted Cost
FFY16	\$32,407,395		\$32,407,395	\$23,332,560	72.00%
FFY17	\$30,991,690		\$30,991,690	\$22,904,377	73.90%
<b>Total</b>	<b>\$63,399,085</b>		<b>\$63,399,085</b>	<b>\$46,236,937</b>	<b>72.93%</b>

### Aggregate Fee Schedule Adjustments

Overall, as shown in Table 7, the combined effect of all the prospective fee adjustments was a 21.29% increase in the base data.

**TABLE 7:**

AGGREGATE FEE SCHEDULE CHANGES IMPACT					IMPACT AS % OF
Time Period	Historical Cost	Fee Change Impact	Adjusted Cost	FMP Impact	Adjusted Cost
FFY16	\$2,938,439,843	\$147,158,157	\$3,085,598,000	\$641,350,419	20.79%
FFY17	\$2,962,971,073	\$121,888,068	\$3,084,859,140	\$672,070,031	21.79%
<b>Total</b>	<b>\$5,901,410,915</b>	<b>\$269,046,225</b>	<b>\$6,170,457,140</b>	<b>\$1,313,420,450</b>	<b>21.29%</b>

### Pharmacy Rebates

More so than most services covered in the Healthy Louisiana program, the pharmacy benefit is subject to frequent, rapid evolution. Furthermore, LDH expects that Healthy Louisiana MCOs will negotiate and maintain competitive purchasing agreements with pharmaceutical manufacturers, which includes maintaining competitive market share/supplemental rebate agreements.

In order to determine an appropriate pharmacy rebate adjustment, Mercer analyzed historical utilization patterns, as reported in the encounter data, by rate cell and therapeutic class. The historical experience was projected to the rating period and rebate adjustments were developed, by rate cell, in consideration of Healthy Louisiana MCO generic dispensing rates and current rebate levels within each therapeutic class. The resulting revised pharmacy rebate adjustments are shown in Table 8 below.

**TABLE 8:**

NON-EXPANSION PHARMACY REBATES				
Category of Aid	Base Expenses	Rx Adjustment Dollars	Adjusted Expenses	Adj %
SSI	\$672,177,235	\$(26,214,912)	\$645,962,322	-3.9%
Family & Children	\$614,013,334	\$(19,034,413)	\$594,978,921	-3.1%
Foster Care Children	\$17,455,454	\$(331,654)	\$17,123,801	-1.9%
BCC	\$5,980,484	\$(107,649)	\$5,872,835	-1.8%
LAP	\$2,782,324	\$(105,728)	\$2,676,596	-3.8%
HCBS	\$12,182,135	\$(341,100)	\$11,841,036	-2.8%

NON-EXPANSION PHARMACY REBATES				
Category of Aid	Base Expenses	Rx Adjustment Dollars	Adjusted Expenses	Adj %
CCM	\$5,935,736	\$(106,843)	\$5,828,893	-1.8%
<b>Statewide Non-Expansion</b>	<b>\$1,330,526,702</b>	<b>\$(46,242,299)</b>	<b>\$1,284,284,403</b>	<b>-3.5%</b>

### Outliers

As part of the State Plan, inpatient hospitals receive an additional payment for high-cost stays for children under six, called outliers. These payments are for inpatient stays with a total cost to the hospital in excess of \$150,000, where the cost is determined based on the hospital's Neonatal Intensive Care Unit (NICU) or Pediatric Intensive Care Unit (PICU)-specific CCR. LDH makes payments to a maximum of \$10 million annually. As payment of outlier liability is the responsibility of Healthy Louisiana MCOs, this additional \$10 million was built into the rates based on the distribution by rate cell observed in state fiscal year (SFY) 2017 payments. Outliers added an average cost of \$0.89 PMPM to the base data used in rate setting. Table 9 details the impact of outliers on the rates by rate cell.

TABLE 9:

OUTLIERS ADJUSTMENT				
Category of Aid	Rate Cell	Projected MMs	Outlier PMPM	Outliers Total Adjustment
SSI	Newborn, 0-2 Months	678	\$1,618.23	\$1,096,939
SSI	Newborn, 3-11 Months	6,101	\$125.94	\$768,358
SSI	Child, 1-20 Years	424,104		
Family and Children	Newborn, 0-2 Months	123,687	\$59.53	\$7,362,552
Family and Children	Newborn, 3-11 Months	416,371	\$1.28	\$534,282
Family and Children	Child, 1-20 Years	7,881,855	\$0.03	\$237,870
<b>Total</b>		<b>8,852,796</b>	<b>\$1.13</b>	<b>\$10,000,000</b>
<b>Total PH COAs*</b>		<b>11,259,539</b>	<b>\$0.89</b>	<b>\$10,000,000</b>

\*Outlier distribution is based on SFY 2017 experience.

### Early Elective Delivery (EED)

Beginning February 2015, facility and delivering physician costs for EEDs will not be covered under the Healthy Louisiana program. MCOs receive an EED Kick Payment for deliveries that occur prior to

39 weeks for reasons that are not medically indicated in the Louisiana Electronic Event Registration System (LEERS) maintained by the Office of Public Health/Vital Records. Deliveries that occur prior to 39 weeks for reasons that are medically indicated in LEERS will receive the Maternity Kick Payment. Mercer identified the average facility and delivering physician costs embedded in the Maternity Kick Payment by region and excluded those costs to arrive at the EED Kick Payment. The EED Kick Payment is calculated by applying the EED adjustment, a reduction of percentage of 19.68%, to the regular Maternity Kick Payment.

### Maternity Adjustment

Historically, Mercer has set the maternity kick payment exclusively based on Non-Expansion experience. In light of the fact that Expansion maternity data was available for the rating cycle and that the Maternity Kick Payment applies to birth event for both Non-Expansion and Expansion enrollees, Mercer developed an acuity adjustment to reflect the Expansion maternity experience. The Expansion maternity acuity adjustment was developed based on the relative costs of maternity events for the two populations. The impact of this adjustment on the Maternity Kick Payment, by region, is summarized in Table 10.

**TABLE 10:**

MATERNITY ADJUSTMENT	
Region	% Impact
Gulf	2.15%
North	3.85%
South Central	4.08%
Capital	4.20%
<b>Statewide</b>	<b>3.43%</b>

### Positron Emission Tomography (PET) Scans

Effective February 1, 2018, Healthy Louisiana will cover PET scans for cancer-related purposes. This is a new State Plan service and is considered a physical health service. Therefore, only the physical health program is affected for Healthy Louisiana.

Mercer developed a projection of the Healthy Louisiana PET scan costs using fee schedule information provided by LDH and an estimate of expected PET scan utilization. As PET scans are a new State Plan service and encounter data is limited, the projected utilization was developed based on experience in Louisiana for a Commercial population (Blue Cross Blue Shield of Louisiana – Individual line of business), emerging utilization experience in the data and PET scan utilization in other Medicaid managed care programs covering similar populations and services in other states. The overall impact on the Non-Expansion rates due to the addition of the PET scan benefit was \$0.33 PMPM. Please see Appendix I for more details.

### **Applied Behavioral Analysis (ABA)**

Effective February 1, 2018, Healthy Louisiana will cover ABA services for all populations under the age of 21 for both the PH and SBH programs. During the two base years (FFY 2016 and FFY 2017), ABA services were provided in FFS.

ABA FFS experience for populations who are eligible to receive services through the Healthy Louisiana program was used to develop the ABA adjustment. Mercer also worked closely with LDH to understand how factors affecting rates could reasonably be expected to change between the base years and RY 2019. The ABA adjustment added \$3.34 to the Non-Expansion PMPM. Please see Appendix J for more details.

### **Managed Care Linkage for Long-Term Care Users**

Effective August 1, 2018, the State implemented changes that impact the managed care enrollment date for Healthy Louisiana enrollees who become eligible for LTC services. Specifically, the effective date of B-linkage (i.e., Behavioral Health Only coverage) enrollment status when a member enrolled in managed care with a P-linkage (i.e., Acute and Behavioral Health coverage), is certified as eligible for LTC services, will be the first day of the month following the member's LTC certification. Prior to August 1, 2018, the member was enrolled with a B-linkage effective the first day of the month that member was admitted to LTC. Disenrollment from the P-linkage will continue to happen on the last day of the month the member is admitted to LTC.

During the transitional month where a member is both enrolled with a P-linkage and certified for LTC, the MCO will have additional responsibility for services covered under the managed care contract that are not the responsibility of the nursing facility.

Mercer identified individuals within the base data whose eligibility would be impacted by this change, as well as the cost of the additional services that will become the responsibility of the MCO. This data was utilized to develop adjustments for each region and rate cell. The overall impact of this program change is a \$0.36 PMPM increase to the Non-Expansion rate. Appendix K shows the impact on the claims PMPM by rate cell for the Non-Expansion rates.

### **Non Invasive Prenatal Testing (NIPT) Adjustment**

Effective February 1, 2019, NIPT will be a covered service in the Healthy Louisiana program. NIPT is a genetic test, which uses maternal blood that contains cell-free fetal deoxyribonucleic acid (DNA) from the placenta. NIPT is considered a medical necessity once per pregnancy to pregnant women over the age of 35, and for women under age 35 who meet one or more of certain high-risk criteria.

Although NIPT was not a contractually required covered service historically, some Healthy Louisiana MCOs have paid for NIPT screenings in certain cases. Mercer relied on the available experience to estimate the NIPT program change adjustment. The impact of the NIPT adjustment on the Maternity Kick Payment is summarized in Table 11.

**TABLE 11:**

NIPT ADJUSTMENT				
Category of Aid	Historical Cost	24-Mo Dollar Impact	11/12 of 24-Mo Impact	Impact %
Maternity Kick Payment	\$405,372,925	\$1,047,314	\$960,038	0.24%
Total Program	\$5,901,410,915	\$1,047,314	\$960,038	0.02%

#### Continuous Glucose Monitoring Adjustment

Effective January 1, 2019, Healthy Louisiana MCOs will be responsible for the coverage of continuous glucose monitors for all eligible recipients that meet the following criteria:

- Diagnosis of type 1 diabetes with recurrent, unexplained, severe hypoglycemia (glucose levels <50 mg/dl).
- Impaired hypoglycemia awareness that puts the recipient at risk or Pregnant recipient with poorly controlled type 1 diabetes evident by recurrent, unexplained hypoglycemic episodes, hypoglycemic unawareness or postprandial hyperglycemia, or recurrent diabetic ketoacidosis.

Mercer developed a projection of the Healthy Louisiana CGM costs using fee schedule information provided by LDH and an estimate of expected CGM utilization based on clinical expertise. As CGMs are a new State Plan service, the projected utilization was developed based on the SFY17 utilization of recipients with Type I diabetes and insulin dependence. The overall impact on the Non-Expansion rates due to the addition of the CGM benefit was an increase of \$0.34 PMPM. Please see Appendix L for more details.

#### Federally Qualified Health Center/Rural Health Clinic (FQHC/RHC)

##### Long-acting reversible contraceptive (LARC)

Effective January 1, 2019, and with the date of service forward, Louisiana Department of Health will reimburse for LARC devices and diagnosis separate from the prospective payment system (PPS) rate to FQHC and RHC providers. The Actual Acquisition Cost (AAC) to the FQHC will determine the reimbursement for LARC devices.

### Same Day Billing

Effective for dates of service on or after April 1, 2019, the Medicaid program shall establish an alternative payment methodology for behavioral health services provided in RHCs by one of the following practitioners:

- Physicians with a psychiatric specialty.
- Nurse practitioners or clinical nurse specialist with a psychiatric specialty.
- Licensed clinical social workers.
- Clinical psychologist.

The reimbursement for behavioral health services will equal the all-inclusive encounter PPS rate on file for fee for service on the date of service. This reimbursement will be in addition to any all-inclusive PPS rate on the same date for a medical visit.

Mercer developed the projection of these two changes by using updated fee schedules and supplemental information provided by LDH in conjunction with historical Healthy Louisiana data. Table 12 below summarizes the projected impact to the rates related to these FQHC/RHC reimbursement methodology changes.

**TABLE 12:**

FQHC/RHC ADJUSTMENT					
Category of Aid	Rate Cell	[A]	[B]	[C]	[D] = [B]+[C]
		RY19 Projected MMs	LARC PMPM	Same Day Billing PMPM	Total FQHC/RHC PMPM
SSI	Newborn, 0-2 Months	678		\$0.06	\$0.06
SSI	Newborn, 3-11 Months	6,101		\$0.01	\$0.01
SSI	Child, 1-20 Years	424,104	\$0.00	\$0.29	\$0.29

<b>Total (All COAs)</b>		<b>13,874,252</b>	<b>\$0.00</b>	<b>\$0.11</b>	<b>\$0.12</b>

### Breast Pump Adjustment

Effective January 1, 2019, the Healthy Louisiana program will cover personal-use, double electric breast pumps for nursing mothers, without prior authorization. Hospital grade, manual or single breast pumps will

not be covered, and, therefore, are not part of Mercer's estimation. Nursing mothers will be eligible for one breast pump per delivery.

Although LDH is adding this service to the State Plan, some Healthy Louisiana MCOs have historically paid for personal-use, double electric breast pumps. Mercer used this historical experience to estimate the cost of program-wide coverage of these breast pumps. Table 13 below summarizes the impact of the addition of this new service to the non-Expansion cost-per-delivery for FFY16–17.

**TABLE 13**

BREAST PUMP ADJUSTMENT			
Category of Aid	Historical Cost	Dollar Impact	Impact %
Maternity Kick Payment	\$405,372,925	\$1,191,774	0.29%
Total Program	\$5,901,410,915	\$1,191,774	0.02%

## PART C: NON-EXPANSION CAPITATION RATE DEVELOPMENT

Mercer followed rate development standards related to base data and described in Part B of this letter to develop an adjusted base data. To obtain the final projected benefit costs, the base data was further adjusted to account for trends and other contract provisions.

### SUBPART C.1: PROJECTED BENEFIT COSTS

#### Trend

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the cost of providing health care services in a future period. Mercer studied historical cost and utilization data for each of the three data sources incorporated in the capitation rates: Healthy Louisiana encounters, Healthy Louisiana MCO financial reports and FFS. Trends were selected based on Louisiana experience, as well as national trend information.

Prospective trends were applied to the blended base data. The trend factors by population are shown in Appendix M.

### IN-LIEU OF SERVICES

The costs in the base data reflect costs for State Plan services delivered in a managed care environment. In some cases, for the adult population, the MCOs provided an approved service in lieu of a State plan service. The utilization and unit costs of the in-lieu-of services were taken into account in developing the projected benefit costs of the covered services (as opposed to utilization and unit costs of the State plan services or settings) with the exception of the Inpatient Psychiatric Institutions for Mental Diseases (IMD) stays for which utilization was repriced at the cost of the same services through providers included under the state plan. Additional detail regarding the repricing of the Inpatient Psychiatric IMD stays is described in more detail in the section below. Please refer to Appendix N for a summary of these costs and the percentage of cost that the in-lieu-of services represent in each category of service.

## INSTITUTIONS FOR MENTAL DISEASES

On May 6, 2016, CMS published the Medicaid and CHIP Programs Final Rule. Provision §438.6(e) states the following, "...the State may make a monthly capitation payment to an MCO or PIHP for adults receiving inpatient treatment in an IMD, so long as the facility is a hospital providing psychiatric or substance use disorder inpatient care or a sub-acute facility providing psychiatric or substance use disorder (SUD) crisis residential services, and length of stay in the IMD is for a short-term stay of no more than 15 days during the period of the monthly capitation payment." This requirement was effective as of July 6, 2016.

No adjustments were made in rate development to IMD SUD services as they were approved as covered services via Louisiana's 1115 Waiver effective February 1, 2018.

For Inpatient Psychiatric IMD stays, Mercer received a list of IMD facilities that existed during the base data period (FFY 2016 and FFY 2017). Using this list of IMD facilities, Mercer identified all individuals within the base data who had an overnight stay in an IMD and sorted them into short stays (15 cumulative days or less in a given month) versus long stays (16 or more cumulative days in a given month). Table 14 below shows user-month counts and costs within the base associated with IMD users by FFY.

Please note that to the extent there were IMDs in the base period that were not included on the IMD facilities list utilized by Mercer for this analysis and/or that there were overnight IMD stays paid for an entity other than Medicaid, the methodology described in this section would not have been able to identify them. If new or better data becomes available, it may be necessary to refine the IMD adjustments described below accordingly.

For Inpatient Psychiatric IMD long stays, adjustment factors were developed by region, rate cell and year to remove all costs and user months incurred during the IMD long-stay. This includes the member months and costs for the IMD itself as well as non-IMD services incurred during the days in which the individual was in the IMD during the month of the IMD long stay. In aggregate, the impact of these adjustments on the base were a 0.06% reduction to the FFY 2016 PMPM and a 0.07% reduction to the FFY 2017 PMPM.

Another component of §438.6(e) requires that States "must price utilization at the cost of the same services through providers included under the State Plan." Mercer evaluated the average cost per diem of IMD stays and compared this to the average cost per diem of Inpatient Psychiatric stays in non-IMD hospitals. Repricing the short stay Inpatient Psychiatric IMD utilization at the non-IMD per diem resulted in an increase to SBH inpatient services of 3.8% in FFY 2016 and 5.1% in FFY 2017, respectively.

**TABLE 14A:**

IMD INPATIENT PSYCHIATRIC SHORT STAYS							
Time Period	User Months	IP Psych Overnight Stay Service		Non-IP Psych Service		All Services	
		Cost	Cost Per User Month	Cost	Cost Per User Month	Cost	Cost Per User Month
FFY 2016	8,351	\$19,730,149	\$2,362.61	\$16,159,033	\$1,934.98	\$35,889,182	\$4,297.59

IMD INPATIENT PSYCHIATRIC SHORT STAYS							
Time Period	User Months	IP Psych Overnight Stay Service		Non-IP Psych Service		All Services	
		Cost	Cost Per User Month	Cost	Cost Per User Month	Cost	Cost Per User Month
FFY 2017	8,045	\$19,645,943	\$2,442.01	\$17,267,711	\$2,146.39	\$36,913,654	\$4,588.40
<b>Total</b>	<b>16,396</b>	<b>\$39,376,092</b>	<b>\$2,401.57</b>	<b>\$33,426,744</b>	<b>\$2,038.71</b>	<b>\$72,802,836</b>	<b>\$4,440.28</b>

**TABLE 14B:**

IMD INPATIENT PSYCHIATRIC LONG STAYS							
Time Period	User Months	IP Psych Overnight Stay Service		Non-IP Psych Service		All Services	
		Cost	Cost Per User Month	Cost	Cost Per User Month	Cost	Cost Per User Month
FFY 2016	383	\$1,702,017	\$4,443.91	\$229,999	\$600.52	\$1,932,017	\$5,044.43
FFY 2017	390	\$1,776,513	\$4,555.16	\$285,826	\$732.89	\$2,062,340	\$5,288.05
<b>Total</b>	<b>773</b>	<b>\$3,478,531</b>	<b>\$4,500.04</b>	<b>\$515,826</b>	<b>\$667.30</b>	<b>\$3,994,357</b>	<b>\$5,167.34</b>

The most recent (July 2018–June 2019) rate development guide (RDG) requests certain metrics regarding IMD usage. As stated above, SUD services are considered covered due to the approved 1115 waiver. Therefore, we only reviewed mental health overnight services in IMDs. Further, these MH overnight stays were reviewed on a monthly basis, per the Final Rule. Therefore, the maximum stay that occurs in our summarized data (in a month) is 31 days. The two tables below display the metrics requested by the RDG.

**TABLE 15A:**

MONTH STATISTICS FOR ENROLLEES WHO RECEIVED MH OVERNIGHT SERVICES IN AN IMD					
Time Period	Unique Enrollees	Minimum	Maximum	Mean	Median
FFY 2016	5,336	1	10	2	1
FFY 2017	5,210	1	12	2	1

**TABLE 15B:**

LENGTH OF STAY STATISTICS BY MONTH FOR MH OVERNIGHT SERVICES IN AN IMD					
Time Period	Unique Enrollees	Minimum	Maximum	Mean	Median
FFY 2016	5,336	1	31	7	6
FFY 2017	5,210	1	31	7	6

#### RETROACTIVE ELIGIBILITY ADJUSTMENT

MCOs are liable for all claims incurred during a retroactive eligibility period. Eligible members are granted retroactive eligibility, based on their eligibility for Healthy Louisiana, for up to 12 months prior to enrollment in an MCO. The MCO selected by these members receive one capitation payment per month of retroactive enrollment.

Mercer reviewed the retroactive eligibility and claims experience data and developed adjustment factors that were applied to the projected benefit costs. For this rating cycle, the only rate cell for which a retroactive eligibility adjustment was deemed necessary was the BCC, All Ages rate cell. BCC, All Ages rates were increased by 1.40% in consideration of the observed cost relativities. Additional detail related to this adjustment is presented in Appendix O.

#### Subpart C.2: Special Contract Provisions

##### Withhold Arrangement

Effective February 1, 2018, a withhold of the monthly capitated payment shall be applied to incentivize quality, health outcomes and value-based payments. The withhold amount will be equal to 2% of the monthly capitated payment for physical and basic behavioral health for all MCO members, exclusive of maternity kick payments and the FMP component of the monthly capitated payment. Quality and health outcomes, along with value-based payments will each account for 1% (half of the withhold) and are intended to incentivize the MCOs to meet all requirements.

Based on recent Healthy Louisiana MCO performance, Mercer determined that two of the 16 quality or health outcome measures were deemed not reasonably attainable. These two measures are ED visits per 1,000 and Controlling High Blood Pressure. All other measures for quality and health outcomes were deemed reasonably attainable. All value-based payments were deemed reasonably attainable.

Due to two quality and health outcomes being deemed not reasonably attainable, there will be an adjustment to the actuarially sound lower bound. For those rate cells impacted by the withhold, a factor of 1.00125 ( $1\% \times 2/16 = 0.125\%$ ) will be applied to all impacted rate cells prior to the application of the FMP adjustment in order to comply with the relevant actuarial standards of practice.

## SUBPART C.3: PROJECTED NON-BENEFIT COSTS

### Non-Medical Expense Load

#### Administrative Expense Load

The actuarially sound capitation rates developed include a provision for MCO administration and other non-medical expenses. Mercer reviewed line item detail of each MCO's administrative expenses, which tied back to the MCO financial reports as well as relied on its professional experience in working with numerous State Medicaid programs to develop the administrative load. This process included consideration for increases in expenses including items such as additional case management due to claims volume, increases in staff compensation over time, and consideration for enrollment growth. Administrative Expense Load assumptions are summarized by program in Table 16.

**TABLE 16:**

ADMIN PMPM BY PROGRAM		
Program	Lower Bound	Upper Bound
PH program	\$27.81	\$30.12
SBH program	\$5.24	\$5.68
Maternity	\$315.46	\$341.75

The load for each rate cell was determined using a fixed and variable cost model. Under this model, a fixed administrative expense is attributed to each rate cell, which reflects program requirements, such as state-mandated staffing, and other indirect operational expenses. Added to this is a variable administrative amount, based on claims volume. This methodology results in administrative expense loads that vary as a percentage by rate cell. The resulting variance in administrative expense determined using this methodology results in a higher allocation of administrative expenses on the rate cells with higher utilization, which Mercer believes is more accurate in reflecting the drivers of plan administration requirements.

#### Underwriting Gain Load

A provision was made in the final rates for underwriting gain. The lower bound reflects an assumption of 1.50% and the upper bound reflects an assumption of 2.50%; the underwriting gain load is calculated prior to the application of FMP adjustments.

#### Premium-based Taxes

Final rates also include a provision for Louisiana's 5.50% premium tax.

## FEDERAL HEALTH INSURANCE PROVIDER FEE

Section 9010 of the ACA established a health insurance provider fee (HIPF), which applies to certain for-profit/tax-paying health insurers. For-profit Medicaid health plans are not exempt from the HIPF, which will become a cost of doing business that is appropriate to recognize in actuarially sound capitation rates.

At the time of this certification, many aspects of the calculation and application of this fee remain uncertain. The HIPF fees associated with calendar year 2019 experience will be calculated and become payable sometime during the third quarter of 2020. As these fees are not yet defined by insurer and by marketplace, no adjustment has been made in the rate range development for the Healthy Louisiana program. An adjustment and revised certification will be considered when the fee amount and impacted entities applicable to this rate period are announced.

## SUBPART C.4: RISK MITIGATION

### Risk Adjustment

Risk adjustment will be applied to the rates in Appendix A to reflect differences in health status of the members served in each MCO using the Adjusted Clinical Groups (ACG) model. The ACG model uses diagnostic information along with member demographics (age and sex categories) to classify members into mutually exclusive ACG categories, which are indicative of health care resource usage in terms of cost consumption. The State typically updates risk scores semi-annually, but the update timing and frequency may change to account for key program changes and data availability.

The application of the ACG model was tailored to the Healthy Louisiana program by using Louisiana cost experience to determine the relative costs associated with each ACG category. This step produces Louisiana-specific cost weights which assign a risk score to each member with sufficient experience (six or more months of enrollment with a MCO). An age/gender risk assumption is made for members without an ACG assignment. These member-level risk scores will be aggregated by MCO, producing MCO risk scores, which are adjusted for budget neutrality. The risk adjustment process does not increase nor decrease the overall cost of the program, but can change the distribution across the various Healthy Louisiana MCOs according to the relative risk of their enrolled members. This is consistent with the budget neutrality requirements outlined in 42 CFR 438.5(g). The FMP component of the rates will not be risk adjusted. The FMP component is added to the risk adjusted rate to produce the final rate. Table 17 shows the rate cells that will be risk adjusted.

**TABLE 17:**

RISK-ADJUSTED RATE CELLS	
<b>SSI</b>	
Child, 1–20 Years, Male & Female	Adult, 21+ Years, Male & Female
<b>Family and Children (TANF)</b>

<b>FCC</b>	
All Ages, Male & Female	
<b>LAP</b>	
All Ages, Male & Female	

Separate sets of risk scores are developed for each rate cells and region, except for FCC and LAP where the risk scores are developed on a statewide basis.

For more detail regarding the risk adjustment process, please reference the separate risk-adjustment methodology letter that corresponds with each risk adjustment update.

### **Non-Expansion Minimum Medical Loss Ratio (MLR)**

In accordance with the MCO Financial Reporting Guide published by LDH, each MCO shall provide an annual MLR report following the end of the MLR reporting year, which shall be a calendar year. An MLR shall be reported in the aggregate, including all medical services covered under the contract. If the aggregate MLR (cost for health care benefits and services and specified quality expenditures) is less than 85%, the MCO shall refund LDH the difference.

### **INCENTIVE ARRANGEMENT**

The CMS RDG defines incentive arrangements as “any payment mechanism under which a health plan may receive additional funds over and above the capitation rate it was paid for meeting targets specified in the contract.”

Effective February 1, 2018, MCOs may earn incentive payments up to 5%, in total, above the approved capitation payment attributable to the enrollees or services covered by the incentive arrangements implemented by LDH. These incentive payments will support the activities, targets, performance measures, or quality-based outcomes specified in LDH’s quality strategy. Mercer will work with LDH to ensure the incentive arrangement is consistently administered such that it complies with the regulations at 42 CFR 438.6(b)(2).

### **SECTION 2: EXPANSION CAPITATION RATE DEVELOPMENT**

This certification covers rates for four of LDH’s five Medicaid Expansion rate cells: Expansion SBH Dual Eligible, Expansion SBH Chisolm, Expansion SBH Other and the Expansion Maternity Kick Payment. In each of these instances, a Non-Expansion analog exists for these rate cells. Furthermore, the nature of the benefits provided by the Healthy Louisiana MCOs for individuals in these rate cells are not expected to vary significantly between the Non-Expansion and Expansion populations. Accordingly, it is Mercer’s opinion that the rates developed and certified as actuarially sound for the Non-Expansion SBH Dual Eligible, SBH Chisolm, SBH Other and Maternity Kick Payment are also actuarially sound for the for the corresponding Expansion rate cells.

Please refer back to Part C: Non-Expansion Capitation Rate Development for a description of the rate development of the Non-Expansion SBH and Maternity Kick Payment rates.

### **SECTION 3: CERTIFICATION OF FINAL RATES**

This certification assumes items in the Medicaid State Plan or Waiver, as well as the Healthy Louisiana MCO contract, have been approved by CMS.

In preparing the rates shown in Appendix A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by LDH and its fiscal

agent. LDH, its fiscal agent, and the Healthy Louisiana MCOs are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended purposes. However, if the data and information are incomplete/inaccurate, the values shown in this report may differ significantly from values that would be obtained with accurate and complete information; this may require a later revision to this report.

Because modeling all aspects of a situation or scenario is not possible or practical, Mercer may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. Mercer may also exclude factors or data that are immaterial in our judgment. Use of such simplifying techniques does not, in our judgment, affect the reasonableness, appropriateness, or attainability of the results for the Medicaid program. Actuarial assumptions may also be changed from one certification period to the next because of changes in mandated requirements, program experience, changes in expectations about the future, and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable, inappropriate, or unattainable when they were made.

Mercer certifies the rates in Appendix A, including any risk-sharing mechanisms, were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the Healthy Louisiana MCO contract. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. All estimates are based upon the information and data available at a point in time, and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely, and potentially wide, range of variability from the estimate. Any estimate or projection may not be used or relied upon by any other party or for any other purpose than for which it was issued by Mercer. Mercer is not responsible for the consequences of any unauthorized use. Actual Healthy Louisiana MCO costs will differ from these projections. Mercer has developed these rates on behalf of LDH to demonstrate compliance with the CMS requirements under 42 CFR 438.4 and accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Healthy Louisiana MCOs are advised that the use of these rates may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rates by Healthy Louisiana MCOs for any purpose. Mercer recommends that any MCO considering contracting with LDH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with LDH.

LDH understands that Mercer is not engaged in the practice of law, or in providing advice on taxation matters. This report, which may include commenting on legal or taxation issues or regulations, does not constitute and is not a substitute for legal or taxation advice. Accordingly, Mercer recommends that LDH secure the advice of competent legal and taxation counsel with respect to any legal or taxation matters related to this report or otherwise.

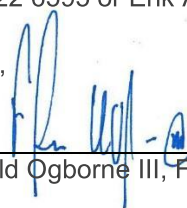

This certification letter assumes the reader is familiar with the Healthy Louisiana Program, Medicaid eligibility rules, and actuarial rate-setting techniques. It has been prepared exclusively for LDH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results. Mercer is not responsible for, and expressly disclaims liability for, any reliance on this report by third parties.

LDH agrees to notify Mercer within 30 days of receipt of this report if it disagrees with anything contained in this report or is aware of any information or data that would affect the results of this report that has not been communicated or provided to Mercer or incorporated herein. The report will be deemed final and acceptable to LDH if nothing is received by Mercer within such 30-day period.

If you have any questions on any of the above, please feel free to contact Ron Ogborne at +1 602 522 6595 or Erik Axelsen at +1 404 442 3517 at your convenience.

Sincerely,

---

\* Individuals under the age of 21 otherwise eligible for Medicaid who are listed on the OCDD's Request for Services Registry who are CCM.

\*\* Dual eligibles included in Healthy Louisiana for SBH and NEMT services must be in a mandatory, voluntary opt-in or SBH and NEMT population listed above in Attachment C. They must also be eligible for Medicare, which is identified based on the Medicare Duals Eligibility table supplied by the State's fiscal agent. Dually eligible individuals are represented by Dual Status code 02, 04, and 08.

## APPENDIX D: FAMILY PLANNING ADDENDUM

The Louisiana Department of Health (LDH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Healthy Louisiana program for the period of January 1, 2019 through December 31, 2019. As part of this work, Mercer was asked to develop the family planning component of the capitation rates using the same data that was used to develop the capitation rate ranges. Appendix D presents an overview of the analyses and methodology used in Mercer's family planning rate development for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS), in order for LDH to receive the 90.0% federal match for eligible family planning services. This addendum should be read in conjunction with the rate certification letter.

### BASE DATA

The capitation rates were developed using the medical expenses incurred from October 1, 2015 through September 30, 2017 with runout through March 2018, as reported through the Medicaid Management Information Systems (MMIS). All family planning services were assigned to the appropriate rate cells (RCs). Please see the rate certification letter for more details.

### METHODOLOGY FOR IDENTIFYING FAMILY PLANNING SERVICES

Using data from the State's MMIS, a multi-step process was followed to measure the amount of family planning for the calendar year, region, and rate tier. Each of these steps is described below.

#### 1. Family Planning Service Identification

Family planning can be identified through procedure codes that are specifically indicative of a family planning service. Tables 1 and 2 contain the lists of procedure codes that were used to identify family planning services, solely on a procedure code match basis. Table 1 contains sterilization services and Table 2 contains contraception services.

**TABLE 1: STERILIZATION SERVICES ALWAYS REIMBURSABLE AT THE 90.0% FEDERAL MATCH RATE**

Family planning can also be identified with other procedure codes if the family planning service can be confirmed through the use of contraceptive management diagnosis codes in the V25 series and Z30 series for ICD-9 and ICD-10, respectively. Table 3 contains the list of procedure codes that require a V25 series and Z30 series diagnosis code to be present in order to classify a service as family planning.

**TABLE 3: PROCEDURE CODES THAT REQUIRE A V25 SERIES (ICD-9) OR Z30 SERIES (ICD-10) DIAGNOSES CODE**

CPT/HCPCS CODES THAT MAY OR MAY NOT REPRESENT CONTRACEPTION/STERILIZATION FAMILY PLANNING SERVICES

76857	99056	99233	99282	A4931	T1015	

\* Also included: 80047–88189 (except 82143)

\*\* Used to indicate SubQ Depro Provera

Professional service claims were classified as family planning if the service contained a procedure code from Table 1 or Table 2, or a procedure code from Table 3 accompanied by a V25 (ICD-9) or Z30 (ICD-10) diagnosis code in either the primary or the secondary position.

## 2. Identification of Family Planning Prescription Drug Claims

In identifying eligible family planning claims from prescription drug data, Mercer identified all drug claims containing one of the HIC3 codes listed in Table 4. These codes have been determined by Mercer's pharmacy team to represent those drugs eligible for the enhanced federal match rate.

**TABLE 4: DRUGS ELIGIBLE FOR THE ENHANCED FEDERAL MATCH RATE**

HIC3	HIC3 DESCRIPTION
G8A	Contraceptives, oral
G8B	Contraceptives, implantable
G8C	Contraceptives, injectable
G8D	Abortifacient, progesterone receptor, antagonist type
G8F	Contraceptives, transdermal
G9A	Contraceptives, intravaginal
G9B	Contraceptives, intravaginal, systemic
X1A	Condoms
X1B	Diaphragms/cervical cap
X1C	Intrauterine devices

## PROCESS OF DEVELOPING FAMILY PLANNING PORTION OF RATE

The methodology used to develop the percentage of the capitation rates attributable to family planning consisted of the following steps:

- Pull encounter and fee-for-service (FFS) data for the family planning services by region, category of aid (COA), RC, and category of service (COS) based on the logic detailed in the above section.
- Summarize the per member per month (PMPM) values for all family planning services at the region, COA, RC, and COS level.
- Develop projected rate year (RY) 2019 family planning service PMPMs by applying appropriate program change adjustments and trend factors to the family planning service base data PMPMs.
- Develop projected RY 2019 family planning service Full Medicaid Pricing (FMP) PMPM add-on by calculating a base FMP PMPM add-on and applying appropriate program change adjustments and trend factors.
- Summarize total projected RY 2019 family planning PMPMs by adding together the claims cost and FMP add-on PMPMs at the region, COA, and RC level.
- Calculate the percentage of the capitation rates attributable to family planning services by dividing the family planning service projected PMPM by the capitation rate PMPM at the region, COA, and RC level.

### Base Data

As stated earlier, Mercer used medical expense data incurred from October 1, 2015 through September 30, 2017 processed through March 2018. The data selected for the family planning PMPM calculations follows the criteria outlined in the above section.

Consistent with RY 2019 Healthy Louisiana rate development, the following adjustments are reflected in the family planning base data:

- Provision for incurred but not reported (IBNR) claims
- Financial adjustments to encounter data for under-reporting

### Program Changes

Program change adjustments recognize the impact of benefit or eligibility changes occurring during or after the base data period. CMS requires the rate setting methodology used to determine actuarially sound rates incorporates the results of any programmatic changes that have taken place, or are anticipated to take place, between the start of the base period and the conclusion of the contract period. Mercer reviewed the program change adjustments applied in RY 2019 Healthy Louisiana rate setting and determined the following applied to family planning base data:

- Inpatient Hospital fee schedule changes
- Outpatient Hospital fee schedule changes

### **Trend**

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the expenses of providing services in a future period. Using historical plan experience, industry trends, and consideration for commercial health care trends, Mercer developed trend ranges to project the base data to the RY 2019 contract period. The trends applied in the development of family planning PMPMs are consistent with those applied to the populations in RY 2019 Healthy Louisiana rate development.

The annual PMPM trend for all family planning services was 2.8%.

Mercer reviewed the population and benefit packages and determined that no adjustments outside of those mentioned above were required for family planning services.

### **FMP**

Mercer calculated the FMP add-on for eligible Inpatient hospital, Outpatient hospital, Ambulance, and Physician services that satisfy the family planning service logic. We then applied provisions for IBNR claims and financial adjustments to encounter data for under-reporting. We trended these dollars to the RY 2019 contract period using the trends applied in the RY 2019 Healthy Louisiana rate development. For full detail on the FMP calculation, please refer to the RY 2019 Healthy Louisiana rate certification.

### **Development of the Percentage of the Capitation Rates Attributable to Family Planning**

The projected family planning claims cost and FMP add-on PMPMs were added together to produce the total family planning PMPM LDH could claim at the enhanced rate. This total projected family planning PMPM was divided by the RY 2019 capitation rate to determine the percent of the capitation rate attributable to family planning. The calculation was performed at the region, COA, and RC level.

Attachment A within this addendum displays the percent of the capitation rates that are attributable to family planning services. These percentages should be applied directly to capitation rates to determine the family planning amount. The resulting family planning amount does not include load for premium tax, administration, or underwriting gain.

Note that the family planning component of the Healthy Louisiana Expansion rates was not calculated due to the fact that Expansion population is already at a Federal medical assistance percentage rate greater than 90.0%.

### **Limitations and Considerations**

In preparing these calculations, Mercer has used and relied upon enrollment, FFS claims, encounter data, and other information supplied by LDH and its fiscal intermediary. LDH and its fiscal intermediary are responsible for the validity and completeness of the data supplied. We have reviewed that data and

information for internal consistency and reasonableness but we did not audit it. In our opinion, it is appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in the attached exhibits may need to be revised accordingly. Use of this information for any purposes beyond that stated may not be appropriate.

## APPENDIX E: PREVENTIVE SERVICES ADDENDUM

The Louisiana Department of Health (LDH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Healthy Louisiana program for the period of January 1, 2019 through December 31, 2019. As part of this work, Mercer was asked to develop the preventive services component of the capitation rates using the same data that was used to develop the capitation rate ranges. Authorized by Section 4106 of the Patient Protection and Affordable Care Act of 2010 (Pub. L. 111-152), clinical preventive services recommended with a grade of A or B by the United States Preventive Services Task Force (USPSTF) and adult immunizations recommended by the Advisory Committee on Immunization Practices will receive a one percentage point increase in their Federal Medical Assistance Percentage (FMAP) for those services. This Appendix presents an overview of the analyses and methodology used in Mercer's preventive services rate development for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS), in order for LDH to receive the +1.0% Federal match for eligible preventive services. This addendum should be read in conjunction with the rate certification letter.

### BASE DATA

The capitation rates were developed using the medical expenses incurred during October 1, 2015 through September 30, 2017 with runout through March 2018, as reported through the Medicaid Management Information Systems (MMIS). All preventive services were assigned to the appropriate rate cells. Please see the rate certification letter for more details.

### METHODOLOGY FOR IDENTIFYING PREVENTIVE SERVICES

Using data from the State's MMIS, a multi-step process was followed to measure the amount of preventive services for the calendar year, region, and rate tier. Each of these steps is described below.

#### 1. Grades A and B Preventive Services Identification

Preventive services can be identified through the list of recommended services by the USPSTF. Mercer and LDH cooperated in identifying corresponding criteria for each service listed by the USPSTF. Attachment A contains the list of these services and agreed upon criteria that were used to identify preventive services based on a procedure code, diagnosis code, age, and gender criteria match basis.

#### 2. Adult Immunization Preventive Services Identification

According to the USPSTF, immunizations for adults (aged 19 and above) and the administration of those immunizations are eligible for the additional 1.0% Federal match. In identifying eligible preventive services claims from the data, Mercer identified procedure codes related to immunizations

listed by the USPSTF. Table 1 shows the procedure codes determined by Mercer’s clinical team to identify those immunizations eligible for the enhanced federal match rate.

The administration costs of the immunizations are not directly linked to the procedure codes in Table 1. Therefore, the administration costs were estimated using the units administered, Louisiana’s Medicaid Fee schedule, and the weighted average of the administration procedure codes utilized for people aged 19 and above. Administration procedure codes used include the following: 90471, 90472, 90473, and 90474.

**TABLE 1: PROCEDURE CODES IDENTIFYING ELIGIBLE IMMUNIZATIONS**

CPT/HCPCS CODES FOR ELIGIBLE IMMUNIZATIONS				
90645	90748	90661	90688	90718

90740	90654	90668	90670	
90746	90656	90672	90732	
90747	90658	90673	90714	
90636	90660	90686	90715	

### Process of Developing Preventive Services Portion of Rate

At a high level, the methodology used to develop the percentage of the capitation rates attributable to preventive services consisted of the following steps:

- Pull encounter and fee-for-service (FFS) data for each preventive service separately by region, category of aid (COA), rate cell (RC), and category of service (COS) based on logic detailed in the above section.
- Using these dollars, summarize the per member per month (PMPM) values for all preventive services in aggregate at the region, COA, RC, and COS level.
- Develop projected rate year (RY) 2019 preventive services PMPMs by applying appropriate program change adjustments and trend factors to the preventive services base data PMPMs.

- Develop projected RY 2019 preventive services Full Medicaid Pricing (FMP) PMPM add-on by calculating a base FMP PMPM add-on and applying appropriate program change adjustments and trend factors.
- Summarize total projected RY 2019 preventive services PMPMs by adding together the claims cost and FMP add-on PMPMs at the region, COA, and RC level.
- Calculate the percentage of the capitation rates attributable to preventive services by dividing the preventive services projected PMPM by the capitation rate PMPMs at the region, COA, and RC level.

### **Base Data**

As stated earlier, Mercer used expense data incurred from October 1, 2015 through September 30, 2017 processed through March 2018. The data selected for the preventive service PMPM calculations satisfied the criteria detailed in the above section.

Since the additional 1% FMAP does not apply to Title XXI enrollees, Mercer removed preventive services expenses associated with these members from our preventive services base data.

Consistent with RY 2019 Healthy Louisiana rate development, the following adjustments are reflected in the base data:

- Provision for incurred but not reported claims
- Financial adjustments to encounter data for under-reporting

### **Program Changes**

Program change adjustments recognize the impact of benefit or eligibility changes occurring during and after the base data period. Centers for Medicare & Medicaid Services (CMS) requires the rate-setting methodology used to determine actuarially sound rates incorporates the results of any programmatic changes that have taken place, or are anticipated to take place, between the start of the base period and the conclusion of the contract period. Mercer reviewed the program change adjustments applied in RY 2019 Healthy Louisiana rate setting and determined the following applied to the preventive services base:

- Inpatient Hospital fee schedule changes
- Outpatient Hospital fee schedule changes

These adjustments were applied to be consistent with the adjustments applied in RY 2019 Healthy Louisiana rate setting. For a complete discussion of these program change adjustments, please refer to the Healthy Louisiana RY 2019 rate certification letter.

### **Trend**

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the expenses of providing services in a future period. Using historical plan experience, industry trends, and consideration for commercial health care trends, Mercer developed trend ranges to project the base data to the RY 2019 time period. The trends applied in the development of preventive services PMPMs are consistent with those that were applied to the populations in RY 2019 Healthy Louisiana rate development.

The annual PMPM trend for all services for the preventive services was 3.0%.

Mercer reviewed the population and benefit packages and determined that no adjustments outside of those mentioned above were required for preventive services.

### **FMP**

Mercer calculated FMP add-on for eligible Inpatient hospital, Outpatient hospital, Ambulance, and Physician services that satisfy the preventive service logic. We then applied provisions for IBNR claims and financial adjustments to encounter data for under-reporting. We trended these dollars to the RY 2019 time period using the trends applied in the RY 2019 Healthy Louisiana rate development. For full detail on the FMP calculation, please refer to the RY 2019 Healthy Louisiana rate certification.

### **Development of the Percentage of the Capitation Rates Attributable to Preventive Services**

The projected preventives services claims cost and FMP add-on PMPMs were added together to generate the total preventive services PMPM LDH could claim at the enhanced rate. This total projected preventive services PMPM was divided by the RY 2019 capitation rate to determine the percent of the capitation rate attributable to preventive services. The calculation was performed at the region, COA, and RC level.

Attachment B within this addendum displays the percent of the capitation rates that are attributable to preventive services. These percentages should be applied directly to capitation rates to determine the preventive services amount. The resulting preventive services amount does not include load for premium tax, administration, or underwriting gain.

### **Limitations and Considerations**

In preparing these calculations, Mercer has used and relied upon enrollment, FFS claims, encounter data, and other information supplied by LDH and its fiscal intermediary. LDH and its fiscal intermediary are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit it. In our opinion, it is appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in the attached exhibits may need to be revised accordingly. Use of this information for any purposes beyond that stated may not be appropriate.

**Subject:** Capitation Rate Certification for the Healthy Louisiana Program –  
Implementation Year (January 1, 2019 through December 31, 2019)

Dear Ron:

I, Pam Diez, Medicaid Deputy Director for the Louisiana Department of Health (LDH), hereby affirm that the data prepared and submitted to Mercer Government Human Services Consulting (Mercer) for the purpose of certifying the January 1, 2019 through December 31, 2019 Healthy Louisiana Rates were prepared under my direction and, to the best of my knowledge and belief, are accurate, complete, and consistent with the data used to develop the capitation rates. This data includes federal fiscal years 2016 and 2017 fee-for-service (FFS) data files, managed care organization submitted encounter data, prepaid inpatient health plans-submitted encounter data, and supplemental information on payments made outside of Louisiana's Medicaid Management Information Systems.

**Subject:** Healthy Louisiana Expansion Program – Full Risk-Bearing Managed Care Organization (MCO)  
Rate Development and Actuarial Certification for the Period Effective January 1, 2019 through  
March 31, 2019

Dear Ms. Diez:

The Louisiana Department of Health (LDH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound<sup>1</sup> capitation rates for the State of Louisiana's (State) Healthy Louisiana Expansion program for the period of January 1, 2019 through March 31, 2019. This certification amends and extends the previous certification originally issued March 5, 2018 and amended on June 19, 2018, August 24, 2018 and December 18, 2018; it applies to the period of January 1, 2019 through March 31, 2019. The extension includes updates for new programmatic changes implemented by the State effective January 1, 2019 and updates to certain rating assumptions to reflect more recent data. The Healthy Louisiana Expansion rates covering the period of April 1, 2019 through December 31, 2019 will be addressed in a subsequent certification.

This letter presents an overview of the analyses and methodology used to support the revised rating adjustments, and the resulting capitation rates effective January 1, 2019 through March 31, 2019 for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Healthy

---

<sup>1</sup> Actuarially Sound/Actuarial Soundness — Medicaid capitation rates are "actuarially sound" if, for business for which the certification is being prepared and for the period covered by the certification, projected capitation rates and other revenue sources provide for all reasonable, appropriate, and attainable costs. For purposes of this definition, other revenue sources include, but are not limited to, expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income. For purposes of this definition, costs include, but are not limited to, expected health benefits, health benefit settlement expenses, administrative expenses, the cost of capital, and government-mandated assessments, fees, and taxes.

Page 2  
January 28, 2019  
Ms. Pam Diez  
Louisiana Department of Health

Louisiana Shared Savings claims experience, Healthy Louisiana Prepaid encounter data, and Louisiana Behavioral Health Partnership claims experience. It resulted in the development of a range of actuarially sound rates for each rate cell. The final capitation rates and rate ranges are summarized in Appendix A and represent payment in full for the covered services.

## BASE DATA DEVELOPMENT

Unless otherwise noted, the base data used for rates developed for the January 1, 2019 through March 31, 2019 period was unchanged from prior certifications.

### Pharmacy Rebates

More so than most services covered in the Healthy Louisiana program, the pharmacy benefit is subject to frequent, rapid evolution. Furthermore, LDH expects that Healthy Louisiana MCOs will negotiate and maintain competitive purchasing agreements with pharmaceutical manufacturers, which includes maintaining competitive market share/supplemental rebate agreements. Accordingly, Mercer determined that it was appropriate to review and adjust the pharmacy rebate adjustment made to the base data in prior rate certifications.

In order to determine an appropriate pharmacy rebate adjustment, Mercer analyzed historical Expansion utilization patterns, as reported in the encounter data for the Expansion population, by therapeutic class. The historical experience was projected to the rating period and rebate adjustments were developed in consideration of Healthy Louisiana MCO generic dispensing rates and current rebate levels within each therapeutic class. The resulting revised pharmacy rebate adjustment was a decrease of 4.6%.

## PROSPECTIVE RATING ADJUSTMENTS

Unless otherwise noted, the prospective rating adjustments used for rates developed for the January 1, 2019 through March 31, 2019 period were unchanged from prior certifications.

### Fee Schedule Changes

Effective January 1, 2019, LDH made changes to its FFS inpatient fee schedule, which can be found on LDH's fee schedules website<sup>2</sup>. Outpatient claims were adjusted to reflect the most recent cost-to-charge ratios (CCRs) available. The CCRs were reported on hospital fiscal year bases, which varied by hospital from June 30, 2015 to December 31, 2017. The adjustment also included estimation of cost settlements and reflected the most up-to-date cost settlement percentages for each facility.

Effective January 1, 2019 House Concurrent Resolution 6 adjusted reimbursement rates for outpatient services for all hospitals except rural hospitals, state-owned hospitals and Our Lady of the Lake. The rates

---

<sup>2</sup> [http://www.lamedicaid.com/provweb1/fee\\_schedules/feeschedulesindex2.htm](http://www.lamedicaid.com/provweb1/fee_schedules/feeschedulesindex2.htm)

for the effected facilities increased by 11.56% except for Children's Hospital where reimbursement for outpatient services increased by 5.26%. Additionally, cost settlement percentages for most non-rural, non-state facilities were increased to 83.18% effective January 1, 2019. Rural facilities are cost settled at 110%.

Although MCOs are not required to change their reimbursement to providers based on changes in the Medicaid fee schedules, the fee schedule changes will still affect reimbursement for hospital services as MCOs usually contract with providers at rates that are proportional to the Medicaid fee schedule. In accordance with actuarial standards of practice, the capitation rates have been adjusted to reflect the percentage change in the Medicaid fee schedules. Tables 1 and 2 show the impacts of the fee schedule change. The tables include the impacts on both Limited Medicaid Pricing and Full Medicaid Pricing (FMP) of the hospital services.

Table 1: Inpatient Fee Change Impact				Impact as % of	
Time Period	Historical Cost	Fee Change Impact	FMP Impact	Historical Cost	All Services Cost
CY16	\$263,934,947	\$1,690,154	\$(1,690,154)	0.64%	0.11%

Table 2: Outpatient Fee Change Impact				Impact as % of	
Time Period	Historical Cost	Fee Change Impact	FMP Impact	Historical Cost	All Services Cost
CY16	\$228,223,525	\$11,077,701	\$(11,736,256)	4.85%	0.72%

### Physician Full Medicaid Pricing

The list of qualified providers with available average community rates (ACRs) as well as the ACRs for existing providers on the list was updated effective January 1, 2019. Mercer also updated the Medicare physician fee schedule used in the FMP calculation. Mercer evaluated the impact of these updates and adjusted the capitation rates accordingly.

The table below shows the impact on the FMP base gap cost of physician services meeting the State Plan's criteria for FMP.

Page 4  
 January 28, 2019  
 Ms. Pam Diez  
 Louisiana Department of Health

**Table 3: Physician FMP Adjustment**

Time Period	CY 2016 Adjusted Base Cost Underlying Full Rate
Effective 7/1/2018 <sup>1</sup>	\$341,895,713
Effective 1/1/2019	\$349,978,661
Percent Change	2.4%

**Note:**

1. From table on page 3 of the July 2018–January 2019 certification letter dated December 18, 2018.

### Ambulance Services Full Medicaid Pricing

The list of qualified providers with available ACRs as well as the ACRs for existing providers on the list was updated effective January 1, 2019. Mercer also updated the Medicare fee schedule used in the FMP calculation. Mercer evaluated the impact of these updates and adjusted the capitation rates accordingly.

The table below shows the impact on the FMP base gap cost of ambulance services meeting the State Plan's criteria for FMP.

**Table 4: Ambulance FMP Adjustment**

Time Period	CY 2016 Adjusted Base Cost Underlying Full Rate
Effective 7/1/2018 <sup>1</sup>	\$51,526,674
Effective 1/1/2019	\$56,006,760
Percent Change	8.7%

**Note:**

1. From Table 9 of the February 2018–January 2019 certification letter dated March 5, 2018.

### Continuous Glucose Monitors

Effective January 1, 2019, Healthy Louisiana MCOs will be responsible for the coverage of Continuous Glucose Monitors (CGM) for all eligible recipients that meet the following criteria:

- Diagnosis of type 1 diabetes with recurrent, unexplained, severe hypoglycemia (glucose levels <50 mg/dl).
- Impaired hypoglycemia awareness that puts the recipient at risk or Pregnant recipient with poorly controlled type 1 diabetes evident by recurrent, unexplained hypoglycemic episodes, hypoglycemic unawareness, postprandial hyperglycemia or recurrent diabetic ketoacidosis.

Mercer developed a projection of the Healthy Louisiana CGM costs using fee schedule information provided by LDH and estimated CGM utilization. As CGMs are a new State Plan service, the projected

utilization was developed based on the SFY17 utilization of recipients with type 1 diabetes and insulin dependence. The overall impact on the Expansion rates due to the addition of the CGM benefit was an increase of \$0.47 per member per month (PMPM). Please see Appendix C for additional details.

### **Federally Qualified Health Center/Rural Health Clinics**

Long-acting reversible contraceptive Effective January 1, 2019, LDH will reimburse for long-acting reversible contraceptive (LARC) devices separate from the prospective payment system rate to FQHC and Rural Health Clinics (RHC) providers. The Actual Acquisition Cost to the FQHC will determine the reimbursement for LARC devices. Mercer has reviewed the projected costs associated with this service and estimated an increase of 0.02% to the FQHC/RHC PMPM.

### **Trend**

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the cost of providing health care services in a future period. Mercer studied historical cost and utilization data for each of the three data sources incorporated in the capitation rates: Healthy Louisiana encounters, Healthy Louisiana financial reports and FFS. Trends were selected based on Louisiana experience, as well as national trend information.

The trend factors reflected in the prior rate certifications were updated to reflect emerging Expansion experience as reported in the Healthy Louisiana MCO financial reports and, for the first time, Expansion population encounter data. Specifically, eligibility and encounter data for dates of service through December 31, 2017 with paid runout through June 30, 2018 were summarized and analyzed by Mercer. Based on these analyses, as well as more recent national trend information, updated annualized trend factors were selected. The updated trends were applied to the blended base data. The trend factors are shown in Appendix D.

### **Non-Medical Expense Load**

#### **Administrative Expense Load**

The actuarially sound capitation rates developed include a provision for MCO administration and other non-medical expenses. Mercer reviewed line item detail of each MCO's administrative expenses, which tied back to the Healthy Louisiana financial reports as well as relied on its professional experience in working with numerous State Medicaid programs to develop the administrative load. The development included consideration for increases in expenses including items such as additional case management due to claims volume, increases in staff compensation over time, and consideration for enrollment growth. The administrative expense load assumptions reflected in prior rate certifications were updated to reflect additional Expansion experience as reported in the Health Louisiana MCO financial reports.

The administrative expense load for each Healthy Louisiana rate cell was determined using a fixed and variable cost model. Under this model, a fixed administrative expense is attributed to each rate cell, which

Page 6  
January 28, 2019  
Ms. Pam Diez  
Louisiana Department of Health

reflects program requirements, such as state-mandated staffing, and other indirect operational expenses. Added to this is a variable administrative amount, based on projected claims cost. This methodology results in administrative expense loads that vary by rate cell. The resulting variance in administrative expense determined using this methodology results in a higher allocation of administrative expenses on the rate cells with higher utilization, which Mercer believes is more accurate in reflecting the drivers of plan administration requirements. The final administrative expense load PMPM increased by 7.2% from prior certifications.

### **Underwriting Gain Load**

Additionally, the provision for underwriting gain has been updated relative to the prior rate certifications. The revised adjustment ranges from 1.5% at the lower bound to 2.5% at the upper bound, prior to the application of FMP adjustments. This was done to ensure consistency with January 1, 2019 through December 31, 2019 Healthy Louisiana Non-Expansion rates, which will be addressed in a separate certification.

### **Risk Adjustment**

Risk adjustment will be applied to the rates in Appendix A to reflect differences in health status of the members served in each MCO using the Adjusted Clinical Groups (ACG) model. The ACG model uses diagnostic information along with member demographics (age and sex categories) to classify members into mutually exclusive ACG categories, which are indicative of health care resource usage in terms of cost consumption. The State typically updates risk scores semi-annually, but the update timing and frequency may change to account for key program changes and data availability.

The application of the ACG model was tailored to the Healthy Louisiana program by using Louisiana cost experience to determine the relative costs associated with each ACG category. This step produces Louisiana-specific cost weights which assign a risk score to each member with sufficient experience (six or more months of enrollment with a MCO). An age/gender risk assumption is made for members without an ACG assignment. These member-level risk scores will be aggregated by MCO, producing MCO risk scores, which are adjusted for budget neutrality. The risk adjustment process does not increase nor decrease the overall cost of the program, but can change the distribution across the various Healthy Louisiana MCOs according to the relative risk of their enrolled members. This is consistent with the budget neutrality requirements outlined in 42 CFR 438.5(g). The FMP component of the rates will not be risk adjusted. The FMP component is added to the risk adjusted rate to produce the final rate.

The risk scores applied to the Medicaid Expansion, All Ages, Male & Female rate cell vary by region.

For more detail regarding the risk adjustment process, please reference the separate risk-adjustment methodology letter that corresponds with each risk adjustment update.

## CERTIFICATION OF FINAL RATE RANGES

This certification assumes items in the Medicaid State Plan or Waiver, as well as the Healthy Louisiana MCO contract, have been approved by CMS. In preparing the rate ranges shown in Appendix A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by LDH and its fiscal agent. LDH, its fiscal agent, and the Healthy Louisiana MCOs are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended purposes. However, if the data and information are incomplete/inaccurate, the values shown in this report may differ significantly from values that would be obtained with accurate and complete information; this may require a later revision to this report.

Because modeling all aspects of a situation or scenario is not possible or practical, Mercer may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. Mercer may also exclude factors or data that are immaterial in our judgment. Use of such simplifying techniques does not, in our judgment, affect the reasonableness, appropriateness, or attainability of the results for the Medicaid program. Actuarial assumptions may also be changed from one certification period to the next because of changes in mandated requirements, program experience, changes in expectations about the future, and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable, inappropriate, or unattainable when they were made.

Mercer certifies the rate ranges in Appendix A, including any risk-sharing mechanisms, were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the Healthy Louisiana MCO contract. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. All estimates are based upon the information and data available at a point in time, and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely, and potentially wide, range of variability from the estimate. Any estimate or projection may not be used or relied upon by any other party or for any other purpose than for which it was issued by Mercer. Mercer is not responsible for the consequences of any unauthorized use. Actual Healthy Louisiana MCO costs will differ from these projections. Mercer has developed these rates on behalf of LDH to demonstrate compliance with the CMS requirements under 42 CFR 438.4 and accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Healthy Louisiana MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Healthy Louisiana MCOs for any purpose. Mercer recommends that any MCO considering contracting with LDH

Page 8  
January 28, 2019  
Ms. Pam Diez  
Louisiana Department of Health

should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with LDH.

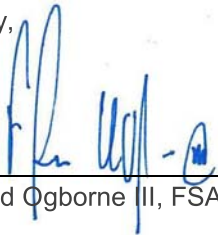

LDH understands that Mercer is not engaged in the practice of law, or in providing advice on taxation matters. This report, which may include commenting on legal or taxation issues or regulations, does not constitute and is not a substitute for legal or taxation advice. Accordingly, Mercer recommends that LDH secure the advice of competent legal and taxation counsel with respect to any legal or taxation matters related to this report or otherwise.

This certification letter assumes the reader is familiar with the Healthy Louisiana Program, Medicaid eligibility rules, and actuarial rate-setting techniques. It has been prepared exclusively for LDH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results. Mercer is not responsible for, and expressly disclaims liability for, any reliance on this report by third parties.

LDH agrees to notify Mercer within 30 days of receipt of this report if it disagrees with anything contained in this report or is aware of any information or data that would affect the results of this report that has not been communicated or provided to Mercer or incorporated herein. The report will be deemed final and acceptable to LDH if nothing is received by Mercer within such 30-day period.

If you have any questions on any of the above, please feel free to contact Ron Ogborne at +1 602 522 6595 or Erik Axelsen at +1 404 442 3517, at your convenience.

Sincerely,

---

1. Where applicable, final rates have been adjusted to account for the portion of contractual withholdings that Mercer has determined to be reasonably attainable.

# JULY 2017–JUNE 2018 MEDICAID MANAGED CARE RATE DEVELOPMENT GUIDE

Louisiana — February 1, 2018– January 31, 2019

## Documentation Reference

The Medicaid Managed Care Rate Development Guide below documents 5 rate certifications for the period February 1, 2018 through January 31, 2019. Due to the rate revision, the previously issued certification (certification #1) may need to be referenced for the requested documentation. Below is a list of certifications applicable to the time period of February 1, 2018 through January 31, 2019. Items not marked in Certifications #2, #3, #4, and #5 are not altered by the revision. Please note Certification #5 revises the Healthy Louisiana Expansion rates only.

- Certification #1 – Rate Certification dated March 5, 2018 for effective period February 1, 2018 through January 31, 2019. This certification was revised by certification #2 for the entire period of February 1, 2018 through January 31, 2019.
- Certification #2 – Rate Certification dated April 30, 2018 for effective period February 1, 2018 through January 31, 2019.
- Certification #3 – Rate Certification dated June 19, 2018 for effective period May 1, 2018 through January 31, 2019.
- Certification #4 – Rate Certification dated, December 18, 2018 for effective period July 1, 2018 through January 31, 2019.
- Certification #5 – Rate Certification dated, January 28, 2018 for effective period January 1, 2019 through March 31, 2019.

SECTION III. NEW ADULT GROUP CAPITATION RATES		DOCUMENTATION REFERENCE				
		Certification Issued 3/5/2018	Certification Issued 4/30/2018	Certification Issued 6/19/2018	Certification Issued 12/18/2018	Certification Issued 1/28/2019
<b>1. Data</b>						
A.	In addition to the expectations for all Medicaid managed care rate certifications, as supported by assurances from the State, described in Section I, the rate certification must describe any data used to develop new adult group rates.	<ul style="list-style-type: none"> <li>Mercer Rate Certification               <ul style="list-style-type: none"> <li>Section 2: Expansion Capitation Rate Development, pages 26–29</li> </ul> </li> </ul>				
B.	For states that have covered the new adult group in Medicaid managed care plans in previous rating periods (i.e. starting in 2014, 2015, 2016, and/or January through June 2017), CMS expects the rate certification, as supported by assurances from the State, to describe: <ul style="list-style-type: none"> <li>i. Any new data that is available for use in this rate setting.</li> </ul>	<ul style="list-style-type: none"> <li>Mercer Rate Certification               <ul style="list-style-type: none"> <li>Section 2: Expansion Capitation Rate Development, pages 26–29</li> </ul> </li> </ul>				

SECTION III. NEW ADULT GROUP CAPITATION RATES	DOCUMENTATION REFERENCE				
	Certification Issued 3/5/2018	Certification Issued 4/30/2018	Certification Issued 6/19/2018	Certification Issued 12/18/2018	Certification Issued 1/28/2019
1. Data					
ii. How the state and the actuary followed through on any plans to monitor costs and experience for newly eligible adults.					
iii. How actual experience and costs in previous rating periods have differed from assumptions and expectations in previous rate certifications.					
iv. How differences between projected and actual experience in previous rating periods have been used to adjust these rates.					

SECTION III. NEW ADULT GROUP CAPITATION RATES	DOCUMENTATION REFERENCE				
	Certification Issued 3/5/2018	Certification Issued 4/30/2018	Certification Issued 6/19/2018	Certification Issued 12/18/2018	Certification Issued 1/28/2019
2. Projected Benefit Costs					
A. In addition to the guidance for all Medicaid managed care rate certifications described in Section I, states should include in the rate					

SECTION III. NEW ADULT GROUP CAPITATION RATES	DOCUMENTATION REFERENCE				
	Certification Issued 3/5/2018	Certification Issued 4/30/2018	Certification Issued 6/19/2018	Certification Issued 12/18/2018	Certification Issued 1/28/2019
<b>2. Projected Benefit Costs</b>					
certification submission and supporting documentation a description of the following issues related to the projected benefit costs for the new adult group:					
i. For states that covered the new adult group in previous rating periods:					
a. any data and experience specific to newly eligible adults covered in previous rating periods that was used to develop projected benefits costs for capitation rates.	<ul style="list-style-type: none"> <li>Mercer Rate Certification               <ul style="list-style-type: none"> <li>Section 2: Expansion Capitation Rate Development, pages 26–29</li> </ul> </li> </ul>				<ul style="list-style-type: none"> <li>Mercer Rate Certification               <ul style="list-style-type: none"> <li>Prospective Rating Adjustments, pages 2–5</li> </ul> </li> </ul>
b. any changes in data sources, assumptions, or methodologies used to develop projected benefits costs for	<ul style="list-style-type: none"> <li>Mercer Rate Certification</li> </ul>				<ul style="list-style-type: none"> <li>Mercer Rate Certification</li> </ul>

iii. Any relevant experience, results, or preliminary information available related to the risk mitigation strategy used during previous rating periods.					

## Performance Measures

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source	<u>2020 (2019 data measurement year) and Subsequent Years Target for Improvement</u>
PTB \$\$	Initiation of Injectable Progesterone for Preterm Birth Prevention	The percentage of women 15-45 years of age with evidence of a previous preterm singleton birth event (24-36 weeks completed gestation) who received one or more progesterone injections between the 16th and 24th week of gestation for deliveries during the measurement year.	State	None	Children's and Maternal Health	Perinatal and Reproductive Health	Section V	<u>24.08</u>
AWC \$\$	Adolescent Well Care Visit	The percentage of enrolled members 12-21 years of age who had at least one comprehensive well-care visit with a PCP or OB/GYN practitioner during the measurement year.	NCQA	CHIPRA	Children's Health	Utilization	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
ADD \$\$	Follow-up Care for Children Prescribed ADHD Medication-Initiation Phase	The percentage of children 6-12 years of age as of the index period start date with a newly prescribed ambulatory prescription dispensed for attention-deficit /hyperactivity disorder (ADHD) medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase.	NCQA	CHIPRA, MU2	Children's Health	Behavioral Health	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
ADD \$\$	Follow-up Care for Children Prescribed ADHD Medication-Continuation Phase	The percentage of children 6-12 years of age as of the index period start date with a newly prescribed ambulatory prescription dispensed for attention-deficit /hyperactivity disorder (ADHD) medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	NCQA	CHIPRA, MU2	Children's Health	Behavioral Health	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source	<u>2020 (2019 data measurement year) and Subsequent Years Target for Improvement</u>
AMB-ED \$\$	Ambulatory Care-ED Visits	This measure summarizes utilization of ambulatory care ED Visits per 1,000 member months.	NCQA	CHIPRA	Population Health	Utilization	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
PPC \$\$	Prenatal and Postpartum Care - Timeliness of Prenatal Care	The percentage of deliveries of live births on or between November 6 of the year prior to the measurement year and November 5 of the measurement year that received a prenatal care visit as a member of the organization in the first trimester, on the enrollment start date or within 42 days of enrollment in the organization.	NCQA	MEDICAID ADULT	Maternal Health	Perinatal and Reproductive Health	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
PPC \$\$	Prenatal and Postpartum Care – Postpartum Care (PPC Numerator 2)	The percentage of deliveries that had a postpartum visit on or between 21 and 56 days after delivery.	NCQA	MEDICAID ADULT	Maternal Health	Perinatal and Reproductive Health	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
FUH \$\$	Follow-Up After Hospitalization for Mental Illness - Within 30 days of discharge	The percentage of discharges for members 6 years of age and older who were hospitalized for treatment of selected mental illness diagnoses and who had a follow-up visit with a mental health practitioner within 30 days of discharge.	NCQA	MEDICAID ADULT	Behavioral Health	Behavioral Health	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source	<u>2020 (2019 data measurement year) and Subsequent Years Target for Improvement</u>
CBP \$\$	Controlling High Blood Pressure - Total	The percentage of members 18-85 years of age who had a diagnosis of hypertension (HTN) and whose blood pressure (BP) was adequately controlled (<140/90) during the measurement year based on the following criteria: <ul style="list-style-type: none"> <li>Members 18-59 whose BP was &lt;140/90</li> <li>Members 60-85 with diagnosis of diabetes who BP was 150-90</li> <li>Members 60-85 without a diagnosis of diabetes whose BP was 150/90</li> </ul>	NCQA	MEDICAID ADULT, MU2, CMS HEALTH HOMES	Chronic Disease	Cardiovascular Care	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
CDC \$\$	Comprehensive Diabetes Care - Hemoglobin A1c (HbA1c) testing	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with a Hemoglobin A1c (HbA1c) test.	NCQA	MEDICAID ADULT	Chronic Disease	Diabetes	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
CDC \$\$	Comprehensive Diabetes Care - Eye exam (retinal) performed	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with an eye exam (retinal) performed.	NCQA	MEDICAID ADULT	Chronic Disease	Diabetes	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
CDC \$\$	Comprehensive Diabetes Care - Medical attention for nephropathy	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with medical attention for nephropathy.	NCQA	CHIPRA	Chronic Disease	Diabetes	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source	<u>2020 (2019 data measurement year) and Subsequent Years Target for Improvement</u>
W15 \$\$	Well-Child Visits in the First 15 Months of Life - Six or more well-child visits.	The percentage of members who turned 15 months old during the measurement year and who had six or more well-child visits with a PCP during their first 15 months of life.	NCQA	CHIPRA	Children's Health	Utilization	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
W34 \$\$	Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life	The percentage of members 3-6 years of age who had one or more well-child visits with a PCP during the measurement year.	NCQA	CHIPRA	Children's Health	Utilization	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
CPA \$\$	CAHPS Health Plan Survey 5.0H, Adult (Rating of Health Plan, 8+9+10)	This measure provides information on the experiences of Medicaid members with the organization and gives a general indication of how well the organization meets members' expectations.	NCQA	MEDICAID ADULT	Adult	Member Satisfaction	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year
CPC \$\$	CAHPS Health Plan Survey 5.0H, Child (Rating of Health Plan-General Population, 8+9+10)	This measure provides information on parents' experience with their child's Medicaid organization.	NCQA	MEDICAID, CHIPRA	Child	Member Satisfaction	HEDIS	NCQA Quality Compass Medicaid National 50th percentile [All LOBs (Excluding PPOs and EPOs): Average] for the year prior to the measurement year

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
<b>HEDIS Measures</b>							
CIS	Childhood Immunization Status	The percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and nine separate combination rates.	NCQA	CHIPRA, MU2	Children's Health	Prevention	HEDIS
IMA	Immunization Status for Adolescents	Percentage of adolescents that turned 13 years old during the measurement year and had specific vaccines by their 13th birthday. Report all individual vaccine numerators and combinations.	NCQA	CHIPRA	Children's Health	Prevention	HEDIS
WCC	Weight Assessment and Counseling for Nutrition and Physical Activity for Children/ Adolescents: Body Mass Index Assessment for Children/ Adolescents	Percentage of children ages 3 to 17 that had an outpatient visit with a primary care practitioner (PCP) or obstetrical/ gynecological (OB/GYN) practitioner and whose weight is classified based on body mass index percentile for age and gender. The percentage of children ages 3 to 17 that had an outpatient visit with a primary care practitioner (PCP) or obstetrical/ gynecological (OB/GYN) practitioner, with evidence of : <ul style="list-style-type: none"> <li>• BMI percentile documentation</li> <li>• Counseling for nutrition</li> <li>• Counseling for physical activity</li> </ul>	NCQA	CHIPRA, MU2	Children's Health	Prevention	HEDIS

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
SAA	Adherence to Antipsychotic Medications for Individuals with Schizophrenia	The measure calculates the percentage of individuals 19 years of age or greater as of the beginning of the measurement year with schizophrenia or schizoaffective disorder who are prescribed an antipsychotic medication, with adherence to the antipsychotic medication [defined as a Proportion of Days Covered (PDC)] of at least 0.8 during the measurement year (12 consecutive months).	NCQA	MEDICAID ADULT	Population Health	Behavioral Health	HEDIS
MPM	Annual Monitoring for Patients on Persistent Medications	The percentage of members 18 years of age and older who received at least 180 treatment days of ambulatory medication therapy for a select therapeutic agent during the measurement year and at least one therapeutic monitoring event for the therapeutic agent in the measurement year. <del>For each product line, report each of the four rates separately and as a total rate.</del> <u>For each product line, report each of the two rates separately and as a total rate.</u>	NCQA	MEDICAID ADULT	Chronic Disease	Prevention	HEDIS
ABA	Adult BMI Assessment	The percentage of members 18-74 years of age who had an outpatient visit and whose body mass index (BMI) was documented during the measurement or the year prior to the measurement year.	NCQA	MEDICAID ADULT, CMS HEALTH HOMES	Population Health	Prevention	HEDIS
AMM	Antidepressant Medication Management	The percentage of members 18 years of age and older with a diagnosis of major depression and were newly treated with antidepressant medication, and who remained on an antidepressant medication treatment. Two rates are reported.	NCQA	MEDICAID ADULT, MU2	Population Health	Behavioral Health	HEDIS

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
CCS	Cervical Cancer Screening	Percentage of women 21–64 years of age who were screened for cervical cancer: <ul style="list-style-type: none"> <li>Women 21-64 who had cervical cytology performed every 3 years</li> <li>Women 30-64 who had cervical cytology/HPV co-testing performed every 5 years</li> </ul>	NCQA	MEDICAID ADULT, MU2	Population Health	Prevention	HEDIS
AMR	Asthma Medication Ratio	The percentage of patients 5–64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year.	NCQA	MEDICAID	Population Health	Pulmonary/ Critical Care	HEDIS
FVA	Flu Vaccinations for Adults Ages 18 to 64	The percentage of adults 18 years of age and older who self-report receiving an influenza vaccine within the measurement period.	NCQA	MEDICAID ADULT	Population Health	Prevention	HEDIS/CAHPS
MSC	Medical Assistance With Smoking and Tobacco Use Cessation	Assesses different facets of providing medical assistance with smoking and tobacco use cessation.  MCOs will report three components (questions): <ul style="list-style-type: none"> <li>Advising Smokers and Tobacco Users to Quit</li> <li>Discussing Cessation Medications</li> <li>Discussing Cessation Strategies</li> </ul>	NCQA	MEDICAID ADULT	Population Health	Prevention	HEDIS/CAHPS
MMA	Medication Management for People with Asthma	The percentage of patients 5-64 years of age during the measurement year who were identified as having persistent asthma and were dispensed appropriate medications that they remained on during the treatment period. Two rates are reported.	NCQA	CHIPRA	Population Health	Pulmonary/ Critical Care	HEDIS

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
CHL	Chlamydia Screening in Women	The percentage of women 16–24 years of age who were identified as sexually active and who had at least one test for Chlamydia during the measurement year.	NCQA	CHIPRA, MEDICAID ADULT	Population Health, Maternal Health	Perinatal and Reproductive Health, Sexually Transmitted Infectious Diseases	HEDIS
BCS	Breast Cancer Screening	Percentage of women 50-74 years of age who had a mammogram to screen for breast cancer.	NCQA	MEDICAID ADULT, MU2	Senior Care	Prevention	HEDIS
CAP	Child and Adolescents' Access to Primary Care Practitioners	Percentage of children ages 12 months – 19 years who had a visit with a PCP. The MCO reports four separate percentages: <ul style="list-style-type: none"> <li>Children 12-24 months and 25 months – 6 years who had a visit with a PCP in the measurement year</li> <li>Children 7-11 years and adolescents 12-19 years who had a visit with a PCP in the measurement year or the year prior to the measurement year.</li> </ul>	NCQA	CHIPRA	Children's Health	Access/ Availability of Care	HEDIS
COL	Colorectal screening	The percentage of members 50-75 years of age who had appropriate screening for colorectal cancer.	NCQA	MEDICAID ADULT	Population Health	Prevention	HEDIS
SSD	Diabetes screening for people with Schizophrenia or Bipolar who are using Antipsychotic medications	The percentage of members 18-64 years of age with schizophrenia or bipolar disorder, who were dispensed an antipsychotic medication and had a diabetes screening test during the measurement year.	NCQA	MEDICAID ADULT	Population Health	Behavioral Health	HEDIS

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
SPC	Statin Therapy for Patients with Cardiovascular Disease	<ul style="list-style-type: none"> <li>The percentage of males 21-75 years of age and females 40-75 years of age during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and who received statin therapy (were dispensed at least one high or moderate-intensity statin medication during the measurement year.)</li> <li>The percentage of males 21-75 years of age and females 40-75 years of age during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and who had statin adherence of at least 80% (who remained on a high or moderate-intensity statin medication for at least 80% of the treatment period.)</li> </ul>	NCQA	MEDICAID ADULT	Population Health	Cardiovascular Care	HEDIS
CDC	Comprehensive Diabetes Care - HbA1c poor control (>9.0%)	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with HbA1c poor control (>9.0%).	NCQA	MEDICAID ADULT	Chronic Disease	Diabetes	HEDIS
CDC	Comprehensive Diabetes Care - HbA1c control (<8.0%)	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with HbA1c control (<8.0%).	NCQA	MEDICAID ADULT	Chronic Disease	Diabetes	HEDIS
CDC	Comprehensive Diabetes Care - BP control (<140/90 mm Hg).	The percentage of members 18-75 years of age with diabetes (type 1 and type 2) with BP control (<140/90 mm Hg).	NCQA	MEDICAID ADULT	Chronic Disease	Diabetes	HEDIS
PCR	Plan All-Cause Readmissions	For members 18 -64 years of age, the risk-adjusted rate of acute inpatient stays during the measurement year that were followed by an unplanned acute readmission for any diagnosis within 30 days.	NCQA	MEDICAID ADULT	Population Health	All Cause Readmissions	HEDIS

Identifier	Measure	Measure Description	Measure Steward	Federal Reporting Program	Target Population	Condition	Specification Source
