

**Louisiana Department of Health
Health Plan Advisory 16-14
December 27, 2016**

Mosquito Repellent Coverage as a Pharmacy Benefit

Mosquito repellent shall be covered as a pharmacy benefit when local mosquito-borne transmission of Zika virus has occurred. This coverage began on Aug. 10, 2016.

Each Health Plan must cover at least the following benefit to decrease the risk of exposure to the Zika virus.

Coverage must be provided for Medicaid recipients:

1. Who are pregnant **or**
2. Of childbearing years (women and men ages 14-44) who are trying to conceive

One bottle of mosquito repellent every rolling 30 days will be allowed. A prescription will be required to cover one of the following products:
