

Louisiana Department of Health
Health Plan Advisory 20-6
Revised March 18, 2020

Response to COVID-19

The directives below should be considered as continuing until rescinded by LDH.

Laboratory Testing

Effective for dates of service on or after March 5, 2020, Louisiana Medicaid covers commercial COVID-19 laboratory testing, without restrictions or prior authorization, for members that have symptoms compatible with COVID-19.

The relevant procedure code is:

U0002: 2019-nCoV Coronavirus, SARS-CoV-2/2019-nCoV (COVID-19) using any technique, multiple types or subtypes (includes all targets)

This code has been added to the Medicaid procedure file.

Overall Telemedicine/Telehealth Policy

Louisiana Medicaid encourages the use of telemedicine/telehealth with an interactive audio/video telecommunications system, when appropriate, to decrease the potential for patient-to-patient transmission in shared spaces (e.g., waiting rooms) and patient-to-provider transmission. Generally, when an interactive audio/video system is not available, an interactive audio-only system (e.g., telephone), without the requirement of video, may be employed unless service-specific policy indicates that only an audio/video system is permissible. For use of an audio-only system, the same standard of care must be met and the need and rationale for employing an audio-only system must be documented in the clinical record.

Telemedicine/telehealth may be used to evaluate patients who report respiratory and systemic symptoms, for example, in a non-emergency situation when a face-to-face visit is not necessary. Further, telemedicine/telehealth may be used to provide routine care for older patients, or those with chronic illnesses, for the purpose of reducing their exposure to healthcare facilities.

Louisiana Medicaid, including all Healthy Louisiana MCOs, allows for the telemedicine/telehealth mode of delivery for many common healthcare services. When otherwise covered by Louisiana Medicaid, telemedicine/telehealth is allowed for all CPT codes located in Appendix P of the CPT manual. These codes include, but are not limited to, new and established outpatient office visit codes.

There is currently no formal limitation on the originating site (i.e., where the patient is located) and this can include, but is not limited to, a healthcare facility, school, or the patient's home. Regardless of the originating site, providers must maintain adequate medical documentation to support reimbursement of the visit.

Providers offering services via telemedicine/telehealth must use a secure, HIPAA-compliant platform and adhere to all telemedicine/telehealth-related requirements of their professional licensing board.

Several service-specific policies are detailed below:

- Billing instructions (non-FQHC/RHC): Providers must indicate place of service 02 and must append modifier -95. Reimbursement for visits delivered via telemedicine is similar to face-to-face visits, subject to any terms and conditions in provider contracts with Healthy Louisiana MCOs.
- Providers should contact their contracted MCO for information that may affect billing procedures and reimbursement rates.
- Billing instructions for FQHCs/RHCs: Providers must indicate place of service 02 and append modifier -95 on the header and on all detailed service lines. Reimbursement for these services in an FQHC/RHC will be at the all-inclusive prospective payment rate on file for the date of service.

Telephone-only Evaluation and Management

Effective for dates of service on or after March 13, 2020, Louisiana Medicaid reimburses telephonic evaluation and management services to members who are actively experiencing symptoms consistent with COVID-19.

Telephonic evaluation and management services must be rendered by a physician, nurse practitioner, or physician assistant actively enrolled in fee-for-service Medicaid or with one of the Healthy Louisiana managed care organizations (MCOs). Services are only to be rendered for the care of established patients or the caregiver of an established patient.

Telephonic evaluation and management services are not to be billed if clinical decision-making dictates a need to see the patient for an office visit within 24 hours or at the next available appointment. In those circumstances, the telephone service shall be considered a part of the

subsequent office visit. If the telephone call follows an office visit performed and reported within the past seven calendar days for the same diagnosis, then the telephone services are considered part of the previous office visit and are not separately billed.

Relevant procedure codes are:

- 99441: Telephone evaluation and management service; 5-10 minutes of medical discussion
- 99442: 11-20 minutes of medical discussion
- 99443: 21-30 minutes of medical discussion

The ICD-10 diagnosis code to be reported is Z20.828: Contact with and (suspected) exposure to other viral communicable disease.

These codes have been added to the Medicaid procedure file.

Telehealth Requirements for Physical, Occupational, and Speech Therapy

Effective for dates of service on or after March 17, 2020, and for the duration of the COVID-19 emergency, Louisiana Medicaid encourages and will reimburse the use of telehealth, when appropriate, for rendering physical therapy, occupational therapy, and speech therapy to members. Telehealth can facilitate the continuation or establishment of these services while complying with the need for social distancing.

Telehealth services can be rendered for the care of new or established patients, or to support the caregivers of new or established patients. For services requiring prior authorization, a new prior authorization request does not need to meet any additional criteria to be eligible for telehealth delivery and an existing prior authorization does not need an addendum to be eligible for telehealth delivery.

Telehealth services must be rendered by licensed providers for their respective therapies, which include physical therapists, occupational therapists and speech-language pathologists, subsequently referred to collectively as the “therapy provider.”

Prior to the session, the therapy provider should obtain permission from the member or caregiver to proceed with telehealth and this discussion should be documented in the clinical record. The therapy provider should also assist the member or caregiver in setting up any technology needed. The therapy provider is responsible for all aspects of the respective care provided to a patient, including determining and documenting the extent to which the use of technology is necessary and appropriate in the provision of the rendered therapy. A member’s appropriateness for telehealth should be determined on a case-by-case basis, with selections based on the judgment of the therapy provider, the member’s informed choice, and

professional standards of care. The therapy provider should ensure that care is provided in a secure, confidential location.

The therapy provider and member/caregiver must use an interactive audio/video telecommunications system.

Billing instructions: Claims processing systems will be updated by March 24, 2020. Before that date, providers should continue to submit claims and they will be recycled with no action needed by the provider. A list of relevant procedure codes is included below. Providers must indicate place of service 02 and must append modifier -95.

<u>Physical Therapy</u>	<u>Occupational Therapy</u>	<u>Speech/Language Therapy</u>
<u>97161</u>	<u>97165</u>	<u>92507</u>
<u>97162</u>	<u>97166</u>	<u>92508</u>
<u>97163</u>	<u>97167</u>	<u>92521</u>
<u>97164</u>	<u>97168</u>	<u>92522</u>
<u>97110</u>	<u>97530</u>	<u>92523</u>
<u>G0151</u>	<u>G0152</u>	<u>92524</u>
	-	<u>G0153</u>

Telehealth Requirements for Applied Behavior Analysis (ABA)

Effective for dates of service on or after March 17, 2020, and for the duration of the COVID-19 emergency, Louisiana Medicaid encourages and will reimburse the use of telehealth, when appropriate, for rendering certain ABA services.

Telehealth services are only to be rendered for the care of established patients or to support the caregivers of established patients. An established patient is defined as one who already has an approved and prior authorized treatment plan. An existing prior authorization does not need an addendum to be eligible for telehealth delivery. Requirements for reimbursement are otherwise unchanged from the Applied Behavior Analysis Provider Manual.

Telehealth for Family ABA Treatment Guidance: Telehealth family guidance based on ABA methodology must be rendered by a Board-Certified Behavior Analyst (BCBA). The family/patient and BCBA must be linked through an interactive audio/visual telecommunications system. If an audio/visual telecommunications system is not available, then the BCBA may use an audio system, without the requirement of video, as long as the same standard of care can be met. The need and rationale for an audio-only service should be documented in the medical record.

The purpose of this service is to provide family adaptive behavior treatment guidance, which helps parents and/or caregivers to properly use treatment procedures designed to teach new skills and reduce challenging behaviors.

Relevant procedure code:

- 97156 (Family Adaptive Behavior Treatment Guidance, administered by QHP (with or without patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes).

Telehealth Direction of an ABA Technician Delivering In-Home Therapy: Therapy rendered by an in-home behavior technician (BT) is discouraged while social distancing is necessary for COVID-19 containment. However, if other service delivery options are not available to meet members' needs, then this modality may be employed.

Telehealth supervision of in-home therapy rendered by a BT must utilize a BCBA to provide remote supervision. Each BT must obtain ongoing supervision for a minimum of 10% of the hours spent providing applied behavior-analytic services per visit. Supervision may be conducted via an interactive audio/video telecommunications system in lieu of the BCBA being physically present.

The purpose of supervision is to improve and maintain the behavior-analytic, professional, and ethical repertoires of the BT and facilitate and maintain the delivery of high-quality services to his or her clients. Relevant procedure code:

- 97155 (Adaptive Behavior Treatment with Protocol Modification, administered by QHP, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes).

In-home BTs should, where possible, 1) wash their hands when entering the home and prior to leaving; 2) cough into their elbow; and 3) avoid touching their own face or the member's face.

Billing instructions: Claims processing systems will be updated by March 24, 2020. Before that date, providers should continue to submit claims and they will be recycled with no action needed by the provider. Providers must indicate place of service 02 and must append modifier - 95.

Pharmacy

Effective March 17, 2020, members may receive early refills and up to a 90-day supply, as appropriate, of medications that are not controlled substances. These include cardiovascular drugs (hypertension, coronary artery disease, thrombosis), diabetes drugs (oral and injectable), respiratory drugs (inhaled and oral), contraceptives, antiretrovirals, direct-acting antivirals for hepatitis C, immunosuppressives, antipsychotics, and antidepressants, among others. MCOs have been provided with a list of applicable drugs, by NDC. To reduce exposure, providers should consider encouraging members to use pharmacies that offer free home delivery services or drive-through pickup services.

Durable Medical Equipment

Effective March 17, 2020, members may receive up to a 90-day quantity of supplies related to: incontinence, diabetes, tracheostomy care, wound care, home dialysis, parenteral and enteral nutrition, apnea/breathing monitors and other respiratory supplies, home oxygen, electric breast pumps, pulse oximeter probes and tape, and intravenous therapy. A list of applicable HCPCS codes is provided at the end of this advisory. Where necessary, existing prior authorizations should be extended through June 30, 2020 to accommodate a 90-day supply.

Acute Care Hospital-based Utilization Management for Medical Stays

Effective March 17, 2020, and for the duration of the COVID-19 emergency, Healthy Louisiana MCOs have been instructed to suspend all acute care hospital-based utilization management for medical hospitalizations including, but not limited to, service authorizations and concurrent reviews. The purpose of this suspension is to ensure that all available hospital staff with clinical training can be deployed for response efforts. After the emergency period, Healthy Louisiana MCOs have been directed that all efforts to conduct post-payment reviews of medical hospital stays during the emergency period must be approved by and coordinated with LDH to minimize disruption to hospitals.

To maximize beds available for patients with COVID-19, Healthy Louisiana MCOs have been directed, to the maximum extent possible, to dedicate their hospital-based staff to facilitating rapid placement and discharge of currently hospitalized patients. MCOs have been directed to lift service authorizations for services necessary to ensure a safe discharge such as home health services and skilled nursing facility services.

Quarantine/Isolation

When otherwise covered in Louisiana Medicaid, a public health quarantine or isolation order or recommendation establishes medical necessity of healthcare services. For hospital-based quarantine or isolation stays, MCOs shall not downgrade inpatient days to an outpatient level of care, and shall not deny claims for physician services, on the basis of medical necessity. In these cases, the level of care determination is at the discretion of the hospital.

Quality Programs and Value-Based Payment Programs

Participation in provider quality incentive programs and value-based payment programs will not be negatively affected by the disruption caused by COVID-19. When determining provider incentives and value-based payment targets, Healthy Louisiana MCOs will account for the effects of COVID-19 on the healthcare system.

Provider Visits and Case Management

All face-to-face provider visits by MCO staff should be discontinued. All face-to-face member case management should be transitioned to telephonic or audio/visual encounters.

Social Distancing

MCOs shall protect their staff, and support ongoing continuity of operations, through implementing social distancing policies within their offices.

Submission of MCO Policies

Only policy changes reducing administrative burden, removing service authorizations, or increasing access to care should be sent to mcopolicies@la.gov for the duration of the COVID-19 event.

Any policies that are deemed to meet the imminent peril exception in Act 319 will be immediately posted and can be enacted upon posting.
