

Louisiana Department of Health Informational Bulletin 20-5

Revised March 26, 2020

Due to the COVID-19 emergency declaration, temporary changes in provider policy and managed care practices are reflected herein to respond to the emergency. All other non-COVID-19 related policy remains in effect and shall be followed.

COVID-19 – Provider Update

This bulletin is to inform all providers rendering services to Louisiana Medicaid members, including members of all Medicaid managed care organizations (MCO). This advisory will be updated as new information is available.

On March 11, 2020, Governor Edwards declared a public health emergency in response to COVID-19. For current updates on the status of COVID-19 in Louisiana, please see the Office of Public Health (OPH) COVID-19 website, located at: <http://ldh.la.gov/coronavirus>.

The information below is provided in relation to COVID-19 in Louisiana.

Laboratory Testing of Suspected Patients

For patient selection and testing procedures, please refer to the recent OPH Health Alert Network Messages, located at: <http://ldh.la.gov/index.cfm/page/3865>.

Effective for dates of service on or after March 5, 2020, Louisiana Medicaid covers commercial COVID-19 testing, without restrictions or prior authorization, for members that have symptoms compatible with COVID-19. Reimbursement is provided at Medicare rates and this coverage is provided with no copay. Please note that the laboratory test was recently assigned a permanent CPT code and providers will be advised to change shortly. At this time, the current procedure code is:

- U0002: 2019-nCoV Coronavirus, SARS-CoV-2/2019-nCoV (COVID-19) using any technique, multiple types or subtypes (includes all targets), non-CDC.

Providers should immediately report positive COVID-19 commercial laboratory results to the OPH Infectious Disease Epidemiology Hotline at 1-800-256-2748.

All patients suspected (and undergoing testing) for COVID-19 should remain hospitalized if needed or isolate at home until they receive their test results. If test results are positive, patients should continue to be isolated for seven or more days from the onset of illness, or three or more days after resolution of fever, whichever is longer AND resolution or improvement in respiratory symptoms.

Of note, commercially available respiratory viral panel tests, represented by CPT codes 87631, 87632 and 87633, that do not include specific SARS-CoV-2 targets are not appropriate for diagnosing suspected COVID-19 at this time.

Testing and Treatment Coverage

For all Medicaid members, testing is covered with no copay. In addition, clinic visits, emergency department visits, and hospitalizations related to COVID-19 testing and treatment are covered without copays.

Overall Telemedicine/Telehealth Policy

Louisiana Medicaid encourages the use of telemedicine/telehealth, when appropriate, for any and all healthcare services (i.e., not just those related to COVID-19 symptoms). Louisiana Medicaid, including all Medicaid MCOs, allows for the telemedicine/telehealth mode of delivery for many common healthcare services. When otherwise covered by Louisiana Medicaid, telemedicine/telehealth is allowed for all CPT codes located in Appendix P of the CPT manual (relevant codes listed below).

Permissible Telecommunications Systems:

All services eligible for telemedicine/telehealth may be delivered via an interactive audio/video telecommunications system. A secure, HIPAA-compliant platform is preferred, if available. However, for the duration of the COVID-19 emergency, if a HIPAA-compliant system is not immediately available at the time it is needed, providers may use everyday communications technologies such as cellular phones with widely available audio/video communication software. The Office for Civil Rights at the Department of Health and Human Services maintains a list of software deemed appropriate for use during this event at:

<https://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/notification-enforcement-discretion-telehealth/index.html>.

For the duration of the COVID-19 emergency, in cases where an interactive audio/video system is not immediately available at the time it is needed, an interactive audio-only system (e.g., telephone) without the requirement of video may be employed, unless noted otherwise. For use of an audio-only system, the same standard of care must be met and the need and rationale for employing an audio-only system must be documented in the clinical record. Please note, some telemedicine/telehealth services described below require delivery through an audio/video system due to the clinical nature of these services. Where applicable, this fact is noted explicitly.

Originating Site:

The originating site refers to where the patient is located. There is currently no formal limitation on the originating site and this can include, but is not limited to, the patient's home.

Distant Site:

The distant site refers to where the provider is located. The preferred location of a distant site provider is in a healthcare facility. However, if there is disruption to a healthcare facility or a risk to the personal health and safety of a provider, there is no formal limitation as to where the distant site provider can be located, as long as the same standard of care can be met.

Other Requirements:

As always, providers must maintain the usual medical documentation to support reimbursement of the visit. In addition, providers must adhere to all telemedicine/telehealth-related requirements of their respective professional licensing boards.

Reimbursement:

Reimbursement for services delivered through telemedicine/telehealth is at the same level as reimbursement for in-person services. MCOs with contracts that exclude providers from delivering services via telehealth have been instructed to amend those contracts to allow it, where clinically appropriate.

Billing Instructions (non-FQHC/RHC)

Providers must indicate place of service 02 and must append modifier -95. Services delivered via an audio/video system and via an audio-only system should be coded this same way.

Billing Instructions for FQHCs/RHCs

Providers must indicate place of service 02 and append modifier -95 on the header and on all detailed service lines. Services delivered via an audio/video system and via an audio-only system should be coded this same way. Reimbursement for these services in an FQHC/RHC will be at the all-inclusive prospective payment rate on file for the date of service.

Relevant CPT codes covered in the overall telemedicine/telehealth policy are listed below. In addition, other services are eligible to be delivered via telemedicine/telehealth (e.g., PT/OT/SLT) and these are detailed later in this bulletin.

Category	Service	CPT Code(s)
Behavioral Health	See Medicaid Health Plan Advisories posted at http://ldh.la.gov/index.cfm/page/1198 .	
Dialysis	End-Stage Renal Disease Services	90951, 90952, 90954, 90955, 90957, 90958, 90960, 90961
Cardiovascular	Cardiovascular Monitoring Services	93228, 93268, 93272
Psychological, Neuropsychological Testing	Neurobehavioral Status Examination	96116
Evaluation and Management, Office or Other Outpatient Services	New Patient	99201, 99202, 99203, 99204, 99205
	Established Patient	99212, 99213, 99214, 99215
Hospital Inpatient Services	Subsequent Hospital Care	99231, 99232, 99233
Nursing Facility Services	Subsequent Nursing Facility Care	99307, 99308, 99309, 99310

Telehealth Requirements for Physical, Occupational, and Speech Therapy

Effective for dates of service on or after March 17, 2020, and for the duration of the COVID-19 emergency, Louisiana Medicaid encourages and will reimburse the use of telehealth, when appropriate, for rendering physical therapy, occupational therapy, and speech therapy to members. Telehealth can facilitate the continuation or establishment of these services while complying with the need for social distancing.

Telehealth services can be rendered for the care of new or established patients, or to support the caregivers of new or established patients. For services requiring prior authorization, a new

prior authorization request does not need to meet any additional criteria to be eligible for telehealth delivery and an existing prior authorization does not need an addendum to be eligible for telehealth delivery.

Telehealth services must be rendered by licensed providers for their respective therapies, which include physical therapists, occupational therapists, and speech-language pathologists, subsequently referred to collectively as the “therapy provider.”

Prior to the session, the therapy provider should obtain permission from the member or caregiver to proceed with telehealth and this discussion should be documented in the clinical record. The therapy provider should also assist the member or caregiver in setting up any technology needed. The therapy provider is responsible for all aspects of the respective care provided to a patient, including determining and documenting the extent to which the use of technology is necessary and appropriate in the provision of the rendered therapy. A member’s appropriateness for telehealth should be determined on a case-by-case basis, with selections based on the judgment of the therapy provider, the member’s informed choice, and professional standards of care. The therapy provider should ensure that care is provided in a secure, confidential location.

The therapy provider and member/caregiver must use an interactive audio/video telecommunications system.

Billing Instructions:

Claims processing systems were updated on March 24, 2020. Claims submitted before that date, should be recycled with no action needed by the provider. A list of relevant procedure codes is included below. Providers must indicate place of service 02 and must append modifier -95.

Physical Therapy	Occupational Therapy	Speech/Language Therapy
97161	97165	92507
97162	97166	92508
97163	97167	92521
97164	97168	92522
97110	97530	92523
G0151	G0152	92524
		G0153

Telehealth Requirements for Applied Behavior Analysis (ABA)

Effective for dates of service on or after March 17, 2020, and for the duration of the COVID-19 emergency, Louisiana Medicaid encourages and will reimburse the use of telehealth, when appropriate, for rendering certain ABA services.

Telehealth services are only to be rendered for the care of established patients or to support the caregivers of established patients. An established patient is defined as one who already has an approved and prior authorized treatment plan. An existing prior authorization does not need an addendum to be eligible for telehealth delivery. Requirements for reimbursement are otherwise unchanged from the Applied Behavior Analysis Provider Manual.

Telehealth for Family ABA Treatment Guidance:

Telehealth family guidance based on ABA methodology must be rendered by a Board-Certified Behavior Analyst (BCBA). The family/patient and BCBA must be linked through an interactive audio/visual telecommunications system. If an audio/visual telecommunications system is not available, then the BCBA may use an audio system, without the requirement of video, as long as the same standard of care can be met. The need and rationale for an audio-only service should be documented in the medical record.

The purpose of this service is to provide family adaptive behavior treatment guidance, which helps parents and/or caregivers properly use treatment procedures designed to teach new skills and reduce challenging behaviors. Given the rapidly changing conditions during the COVID-19 emergency, addenda to Behavior Treatment Plans can be made to increase the units approved.

Relevant procedure code:

- 97156 [Family Adaptive Behavior Treatment Guidance, administered by QHP (with or without patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes].

Telehealth Direction of an ABA Technician Delivering In-Home Therapy:

Therapy rendered by an in-home behavior technician (BT) is discouraged while social distancing is necessary for COVID-19 containment. However, if other service delivery options are not available to meet members' needs, then this modality may be employed.

Telehealth supervision of in-home therapy rendered by a BT must utilize a BCBA to provide remote supervision. Each BT must obtain ongoing supervision as approved in the member's plan of care. Supervision may be conducted via an interactive audio/video telecommunications system in lieu of the BCBA being physically present.

The purpose of supervision is to improve and maintain the behavior-analytic, professional, and ethical repertoires of the BT and facilitate and maintain the delivery of high-quality services to his or her clients. Relevant procedure code:

- 97155 (Adaptive Behavior Treatment with Protocol Modification, administered by QHP, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes).

In-home BTs should, where possible, 1) wash their hands when entering the home and prior to leaving; 2) cough into their elbow; and 3) avoid touching their own face or the member's face.

Billing Instructions:

Claims processing systems were updated by March 24, 2020. Provider claims submitted before that date, should be recycled with no action needed by the provider. Providers must indicate place of service 02 and must append modifier -95. Services delivered via an audio/video system and via an audio-only system should be coded this same way.

Pharmacy

Effective March 17, 2020, members may receive early refills and up to a 90-day supply, as appropriate, of medications that are not controlled substances. These include cardiovascular drugs (hypertension, coronary artery disease, thrombosis), diabetes drugs (oral and injectable), respiratory drugs (inhaled and oral), contraceptives, antiretrovirals, direct-acting antivirals for hepatitis C, immunosuppressives, antipsychotics, and antidepressants, among others. Existing prior authorizations on prescribed drugs and physician-administered drugs will also be extended through June 30, 2020, with no action needed by the prescriber. Additionally, member copays for prescribed drugs are waived, effective March 24, 2020.

To reduce exposure, providers should consider encouraging members to use pharmacies that offer free home delivery services or drive-through pickup services. To reduce contact, member signatures are no longer required.

Medication-Assisted Treatment for Substance Use Disorders

Prescribers are encouraged to use existing flexibility provided under federal law to ensure continuity of treatment for members with substance use disorders. Buprenorphine and buprenorphine/naloxone products, for example, are Schedule III controlled substances and prescriptions may be written for up to a 30-day supply with up to two refills. The benefits of ensuring continuity of treatment and resulting overdose prevention will often outweigh the risks of diversion and misuse.

Prescribers are also encouraged to educate members regarding the availability of naloxone for those who may be at risk for overdose. Naloxone is available via a statewide standing order, and naloxone is covered without prior authorization for all Louisiana Medicaid members.

Durable Medical Equipment

Effective March 17, 2020, members may receive up to a 90-day quantity of supplies related to incontinence, diabetes, tracheostomy care, wound care, home dialysis, parenteral and enteral nutrition, apnea/breathing monitors and other respiratory supplies, home oxygen, electric breast pumps, pulse oximeter probes and tape, and intravenous therapy. Where necessary, existing prior authorizations should be extended through June 30, 2020, to accommodate a 90-day supply.

Multifunction Ventilator (E0476)

Effective for dates of services on or after March 23, 2020, Medicaid reimburses for multifunction ventilators through the durable medical equipment benefit. This addition is to allow providers flexibility in the types of ventilators that can be utilized to meet members' needs.

Other Prior Authorized Services

All existing prior authorizations for other services are extended through June 30, 2020.

- Any necessary medical and surgical procedures
- Home health services (EHH)
- EPSDT personal care services (PCS)
- Hospice services
- Therapies (PT/OT/SLT)
- Pediatric Day Health Care

Vaccine

At this time there is no vaccine to prevent COVID-19. When a federally approved vaccine is available, it will be covered for all Medicaid members with no copay.

Quarantine or Isolation Orders

Healthcare services provided as a result of a public health quarantine or isolation order or recommendation, when otherwise covered by Louisiana Medicaid, are always considered medically necessary.

Hospital-Based Utilization Management for Medical Stays

Effective March 17, 2020, and for the duration of the COVID-19 emergency, Medicaid MCOs have been instructed to suspend all hospital-based utilization management for medical hospitalizations including, but not limited to, service authorizations and concurrent reviews.

The purpose of this suspension is to ensure that all available hospital staff with clinical training can be deployed for response efforts. After the emergency period, MCOs have been directed that all efforts to conduct post-payment reviews of medical hospital stays during the emergency period must be approved by, and coordinated with, LDH to minimize disruption to hospitals.

Where possible, hospitals should continue to notify MCOs about admissions so that MCOs can assist with discharge planning. To maximize beds available for patients with COVID-19, MCOs have been directed, to the maximum extent possible, to dedicate their hospital-based staff to facilitating rapid placement and discharge of currently hospitalized patients. MCOs have been directed to lift service authorizations for services necessary to ensure a safe discharge such as home health services and skilled nursing facility services.

Quality and Value-Based Payment Programs

Participation in provider quality incentive programs and value-based payment programs will not be negatively affected by the disruption caused by COVID-19. When determining provider incentives and value-based payment targets, Medicaid MCOs will account for the effects of COVID-19 on the healthcare system.

Personal Protective Equipment

Providers should preserve personal protective equipment for use with patients with suspected or confirmed COVID-19.

ICD-10 Diagnosis Coding

To ensure proper reporting, providers should follow CDC's Official Coding Guideline when selecting a diagnosis code. This guideline is available at:

<https://www.cdc.gov/nchs/icd/icd10cm.htm>.

Hospital Discharge Assistance – Managed Care Organizations

For assistance with resolving hospital discharge problems 24 hours a day, please use the telephone numbers listed below.

<u>MCO</u>	<u>Phone Number</u>
<u>Aetna Better Health</u>	<u>504-473-6430</u>
<u>AmeriHealth Caritas Louisiana</u>	<u>225-300-9588</u>
