Immunization Fee Schedule for Children: Influenza Trivalent (IIV3) – CPT 90656

Louisiana Medicaid has updated the immunization fee schedule for children/adolescents to include coverage of the influenza trivalent (IIV3) vaccine through the Vaccines for Children Program.

Identified by Current Procedure Terminology (CPT) code 90656 (full description below), children ages 6 months through 18 years will be reimbursed at \$0, effective for dates of service on and after August 1, 2024.

90656: “Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage, for intramuscular use.”

Claims with dates of service on and after August 1, 2024 that denied because the vaccine was not on file will be reprocessed for proper reimbursement with no action required by the provider.

Each managed care organization (MCO) shall update their claims processing system to reflect this change within 30 calendar days of the published Medicaid fee schedule update. MCOs must recycle any impacted claims within 15 calendar days after the system update.

For questions related to this information as it pertains to fee-for-service Medicaid claims processing, please contact Gainwell Technologies Provider Services at (800) 473-2783 or (225) 924-5040.

Questions regarding MCO claims should be directed to the appropriate MCO.
