Subject: REVISED Louisiana Coordinated Care Networks – Shared Savings Model (CCN-S)
Program Benchmark Development for Contract Periods ending December 31, 2012

Dear Ruth:

The Louisiana Department of Health and Hospitals (DHH) contracted with Mercer Government Human Services Consulting (Mercer) to develop benchmark costs for the purpose of measuring savings achieved by Shared Savings Model Coordinated Care Networks (CCN-S) covering contract periods from program start-up, which varies by geographical area, through December 31, 2012. Based on discussions with DHH, Mercer has revised the benchmark costs contained in our original April 8, 2011 letter to reflect the following changes:

- DHH has reduced hospital payments to all Louisiana State University (LSU) hospitals, except for E. A. Conway Medical Center (EA Conway), by approximately 40% effective October 16, 2010 (State Plan Amendment Transmittal Number 10-56 (SPA TN 10-56), approved May 2, 2011).
- DHH has reduced the Cost Settlement basis for inpatient care at LSU hospitals other than EA Conway (SPA TN 10-56). Settlement will now be 60% of cost rather than 100%.
- DHH has negotiated new and higher per diem amounts at many non-LSU hospitals and has eliminated all outlier provisions and/or cost settlement arrangements for inpatient care, except for LSU hospitals and Children's Hospital-New Orleans and a residual \$10 million statewide pool designated for catastrophic outliers.
- For certainty, none of the changes described above affect the arrangements for outpatient care in any way.
- In recognition of the full Prospective Payment System (PPS) rates for FQHCs, the unit cost price trend for FQHCs has been increased to 2.0% annually, based on broad discussion in the financial media of the Federal Reserve's inflation targets.

MERCER

Page 2

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- All other provisions and assumptions remain unchanged from the April 8, 2011 certification but are repeated here for completeness.

The CCN-S program will be implemented in 3 phases and the benchmarks for each phase will be effective through December 31, 2012. The regions implemented in each phase are as follows:

Phase 1 (January 1, 2012 through December 31, 2012)

- New Orleans
- North Shore (formerly known as Mandeville)

Phase 2 (March 1, 2012 through December 31, 2012)

- Baton Rouge
- Thibodaux
- Lafayette

Phase 3 (May 1, 2012 through December 31, 2012)

- Lake Charles
- Alexandria
- Shreveport
- Monroe

This letter presents an overview of the methodology used in Mercer's benchmark development process. Although there are no specific requirements of the Centers for Medicare and Medicaid Services (CMS) concerning benchmark development, nor any requirement that the benchmarks be actuarially certified, we anticipate that CMS will have a significant interest in understanding how the benchmarks were developed. This rate development process was based on Medicaid fee-for-service (FFS) medical claims and resulted in development of a single set of proposed benchmarks for each region and rate cell combination which are attached to this letter.

Rate Methodology

Overview

Benchmark costs for the CCN-S program were developed in an actuarially sound manner. Where parallels can be drawn to the rate-setting guidelines established by CMS, we used consistent approaches and methods wherever this could appropriately be done. One of the key considerations was the base data. Mercer worked with DHH to obtain Medicaid FFS data from

MERCER

Page 3

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

State Fiscal Year (SFY) 2009 and SFY 2010. Louisiana's SFY runs from July 1st through June 30th of the following year. Restrictions were applied to the enrollment and FFS claims data so that it matched the populations and benefit package defined in the Contract.

To develop benchmarks, adjustments were applied to the base data. These adjustments were all consistent with those provided for in capitated rate development under the CMS Capitated Rate-Setting Checklist:

- removal of enrollment and claims during periods of retroactive eligibility;
- completion factors to account for unpaid claims at the time of the data submission;
- adjustment to reflect amounts paid outside of the Louisiana Medicaid Management Information System (MMIS), including but not limited to inpatient outlier stays, inpatient and outpatient cost reconciliations, fraud and abuse recoupments;
- trend factors to forecast the expenditures and utilization to the appropriate contract period;
- prospective and historic program changes not reflected in the base data;
- prescription drug rebates; and
- data smoothing.

The Graduate Medical Education (GME) component of teaching hospital per diems were not removed from the cost basis so as to develop a benchmark appropriate for reconciling against CCN-S costs that will include inpatient cost including the GME element of the per diems. Since the costs coordinated by the CCN-S will be paid using FFS Medicaid rates, the per diems paid will include exactly the same GME amounts as in the Louisiana Medicaid State Plan.

Using prescription drug costs net of rebates in both benchmark and actual costs guards against sharing too large of a saving but does suggest that benchmarks be updated in the event of any material changes in the State's rebate structure or results.

Since DHH will not include costs over \$100,000 per year for any recipient in the reconciliation, an appropriate adjustment was made to the benchmark costs.

The resulting benchmarks were expressed as per member per month (PMPM) amounts by rate cell. Risk adjustment will be applied to the resulting targets in a manner comparable to that to be used for CCN-P rates to account for health risk differences between the various CCN-S and

MERCER

Page 4

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

between the CCN-S as a group and the CCN-P networks. This will allow for any selection for or against each of the models.

Base Data Development

Mercer was provided with Medicaid FFS enrollment and claims data from SFY09 and SFY10 with runout through August 2010. Mercer was also provided with supplemental data files containing information on outlier claims paid outside of the MMIS system, fraud and abuse recoupments, prescription drug rebates, and inpatient and outpatient hospital cost settlements. These payments/recoupments outside of the MMIS system have been added to or subtracted from the base claims data as appropriate so that the relevant cost for the population eligible for enrollment in the CCN-S program is replicated.

Mercer reviewed the data for consistency and reasonableness and determined that the data appears appropriate for the purpose of setting benchmarks for the CCN-S program.

Enrollment Data

The enrollment file supplied by DHH's fiscal agent provided all enrollment records for each member for each month. Therefore, if a member's eligibility status was retroactively changed, both the old and the new records were present. Most often this occurred because a recipient was retroactively categorized as SSI from Family and Children. In this case, the enrollment file would have included both the SSI enrollment record and the Family and Children record for the same month. Mercer worked with DHH to develop a hierarchy to determine which was the appropriate unique enrollment record to use – typically the SSI record.

Claims Data

Mercer used SFY09 and SFY10 FFS data as the data source. The FFS data reflects the actual medical expenses to DHH of providing healthcare coverage for the CCN-S eligible population. The expenses are net Third Party Liability and subrogation. Mercer reviewed the FFS data to ensure it appeared reasonable and appropriate but did not audit the data. Specifically, Mercer reviewed the following issues:

- completeness and consistency of incurred claims over time;
- consistency between FFS claims data and DHH published reports;
- all payments outside of the MMIS claims system appeared to be properly accounted for; and

MERCER

Page 5

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- the data appeared to have been properly restricted to those services and populations to be covered under the CCN-S program.

Adjustments were made to the FFS data to reflect the complete cost of an actuarially equivalent population for the CCN-S contract. The most significant adjustments are discussed below. In each case, the adjustments were calculated and applied at the rate cell level. The discussion below summarizes the overall impact of each adjustment expressed as a percentage of the total program cost.

Outlier Claims for Children Under 6 Years – DHH makes payments for outlier claims incurred during an inpatient admission for children under 6 years old outside of the MMIS. Adding outlier claims with a cap of \$10 million per year to the base data resulted in an increase to cost of 0.45% in SFY09 and 0.43% in SFY10. Please note the outlier claims in the databook Mercer has prepared for the CCNs are not capped at \$10 million per year.

Incurred-but-not-Reported Claims Adjustments – Mercer estimated and adjusted for the remaining liability associated with incurred-but-not-reported claims for SFY09 and SFY10. The overall adjustments for SFY09 and SFY10 using paid claims data through August 2010 were -0.14% and 2.37% respectively.

Fraud-and-Abuse Recoupments – Adjustments were made for recoupments due to fraud-and-abuse recoveries. Those adjustments were -0.10% in SFY09 and -0.10% in SFY10.

Graduate Medical Education (GME) – Hospital per diem rates used to make payments for care coordinated by the CCN-S networks include the same GME elements as under the state plan. No adjustment was therefore needed.

Pharmacy Rebates – Adjustments were made to reflect pharmacy rebates. The overall adjustments were -9.36% in SFY09 and -9.60% in SFY10.

Inpatient, Outpatient Hospital Cost Settlements, and Supplemental Payments to High Medicaid Community Hospitals – LSU state hospitals and outpatient hospitals receive settlements based on cost reports. Certain “High Medicaid Community Hospitals” also receive supplemental payments that are provided for in the State plan. Mercer applied adjustments of 1.75% in SFY09 and 0.61% in SFY10 to capture the impact of cost settlements made outside of the MMIS.

MERCER

Page 6

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

Retroactive eligibility – Individuals will not enroll with a CCN-S until Medicaid eligible. Even after receiving Medicaid eligibility, it may take 30 days to become enrolled in a CCN. Therefore, enrollment and claims incurred during the retroactive period and those during the first month of Medicaid eligibility have been removed from our calculations. Infants are an exception because they will be covered under the mother's plan from the date of birth.

Non-covered populations – In general, the CCN-S program includes individuals classified as SSI, Family and Children, Foster Children and Breast and Cervical Cancer. The following individuals are excluded from participation in the CCN-S program:

- Medicare Dually Eligible Individuals
- Home and Community Based Services Waiver Recipients
- *Chisholm* Class Members
- Individuals Receiving Medicaid Hospice Services
- Individuals Residing in Long Term Care Facilities (Nursing Home, ICF/DD)
- Individuals Receiving Services for Three Months or Less (Medically Needy Spend-down)
- Undocumented Immigrants Eligible for Emergency Services Only
- Enrollees receiving single service (family planning only)
- LaCHIP Affordable Plan

Non-covered services – The CCN-S rates are based on services covered under the provider agreement. The following services have been excluded in the determination of the benchmarks:

- Specified Services provided through DHH's Early-Steps Program
- Dental Services
- ICF/DD Services
- Hospice
- Personal Care Services (EPSDT and LT-PCS)
- Nursing Facility Services

MERCER

Page 7

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- School-based Individualized Education Plan Services provided by a school district and billed through the intermediate school district, or school-based services funded with certified public expenditures including school nurses
- Home and Community-Based Waiver Services
- Specialized Behavioral Health Services (e.g. mental health rehabilitation)
- Targeted Case Management Services
- Durable Medical Equipment (DME)
- Orthotics and Prosthetics
- Non-emergency transportation
- Specialized Behavioral Health drugs

Client participation amounts – Costs associated with “spenddown” and post-eligibility treatment of income are not included in the base data.

Third-Party Liability – Recoveries associated with Third Party Liability and subrogation have been removed from claims.

DSH Payments – DSH payments are made outside of the MMIS system and have not been included in the benchmarks. These payments will continue to be made after implementation of the CCN-S program.

Co-payments – Co-pays are only applicable to prescription drugs. Since co-pays will remain in place unchanged, no adjustment is necessary.

Primary Case Care Management (PCCM) Fee – Historically, Louisiana has paid a PCCM fee for members assigned to a primary care provider under the PCCM program. This portion of the case management fee paid to the CCN-S networks will be required to be passed through to primary care providers so no adjustment is needed.

PMPM Category Groupings

Benchmarks are developed using PMPM amounts that vary by the major categories of eligibility. Furthermore, where appropriate, the PMPMs within a particular category of eligibility are subdivided into different age and gender bands to reflect differences in risk due to age and

MERCER

Page 8

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

gender and during child bearing ages. In addition, due to the high cost associated with pregnancies, DHH will include a maternity cost allowance in the benchmark for each delivery that takes place (kick allowance). The following is a list of the different PMPM cells for each eligibility category including the maternity kick allowance.

SSI	
<ul style="list-style-type: none"> ▪ 0 – 2 Months, Male and Female ▪ 3 – 11 Months, Male and Female ▪ 1 – 5 Years, Male and Female ▪ 6 – 13 Years, Male and Female 	<ul style="list-style-type: none"> ▪ 14 – 18 Years, Male and Female ▪ 19 – 44 Years, Male and Female ▪ 45+ Years, Male and Female
Family & Children	
<ul style="list-style-type: none"> ▪ 0 – 2 Months, Male and Female ▪ 3 – 11 Months, Male and Female ▪ 1 – 5 Years, Male and Female ▪ 6 – 13 Years, Male and Female ▪ 14 – 18 Years, Female 	<ul style="list-style-type: none"> ▪ 14 – 18 Years, Male ▪ 19 – 44 Years, Female ▪ 19 – 44 Years, Male ▪ 45+ Years, Female ▪ 45+ Years, Male
Foster Care Children, All Ages	Breast and Cervical Cancer, All Ages
Maternity Kick Allowance	

Trend Development

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the expenses of providing health care services in a future period. Mercer reviewed a variety of sources to develop the trend assumptions. These sources included, but were not limited to:

- health care economic indices such as Consumer Price Index for the South-Atlantic region;
- Mercer’s regression analysis applied to trends exhibited in the FFS claims data;
- trends in other State Medicaid programs for similar populations; and
- judgment regarding economic outlook balancing a variety of sources.

Mercer developed individual trends for each category of eligibility and service category. Mercer’s target trend can be found in the following table.

Maternity Kickpayment	Maternity Kickpayment	0.00%	0.00%	0.00%

The overall annualized PMPM trend assumption for the CCN-S program is 3.50%.

Programmatic Changes/Rate Issues

Programmatic change adjustments recognize the impact of benefit or eligibility changes that took place during or after the base year. Mercer applied programmatic change adjustments to incorporate factors not fully reflected in the base data. These adjustments were mutually exclusive and made only once in the benchmark setting process.

Changes to Inpatient Hospital Reimbursement – Various changes have been made to hospital per diem rates. Most recently, effective for dates of service on or after January 1, 2011, the inpatient per diem rates paid to non-state and non-rural hospitals were reduced by 2 percent of the per diem rate on file as of December 31, 2010. The rural and state hospitals have been excluded from the rate reductions. The per diem rates for state hospitals have increased significantly since the base data period; however, this primarily affects the relative weights of the per diems versus cost settlements and has little impact on the total payment. Significant additional changes are just going into effect and are described at the beginning of this revised certification letter.

Changes to the Laboratory/Radiology Fee Schedule – There have been various changes to fee schedules. Most recently, effective for dates of service on or after January 1, 2011, the reimbursement rates for laboratory services was reduced by 2 percent of the fee amounts on file as of December 31, 2010.

Outpatient Hospital Fee Schedule Changes

Children's Specialty Hospital

Effective for dates of service on or after January 1, 2011, the reimbursement paid to Children's Specialty Hospitals for outpatient surgery is reduced by 2 percent of the fee schedule on file as of December 31, 2010.

From July 1, 2008 through February 19, 2009, Children's Specialty Hospitals were cost settled at 86.20% of cost. From February 20, 2009 through August 3, 2009, these hospitals were cost

MERCER

Page 12

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

settled at 83.18% of cost. From August 4, 2009 through August 31, 2009, these hospitals were cost settled at 78.48% of cost. From September 1, 2009 through February 2, 2010, these hospitals were cost settled at 97.00% of cost. From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 92.15% of cost. Reimbursement going forward of 87.91% (August 1, 2010 – December 31, 2010) of allowable cost as calculated through the cost report settlement process will be reduced by 2%, making final reimbursement 86.15% (January 1, 2011 going forward).

Non-State and Non-Rural Outpatient Hospitals

Again, there have been various changes to fee schedules. Most recently, effective for dates of service on or after January 1, 2011, the reimbursement paid to non-rural, non-state hospitals for outpatient surgery was reduced by 2 percent of the fee schedule on file as of December 31, 2010.

From July 1, 2008 through February 19, 2009, non-rural and non-state outpatient hospitals (other than Children's) were cost settled at 86.20% of cost. From February 20, 2009 through August 3, 2009, these hospitals were cost settled at 83.18% of cost. From August 4, 2009 through February 2, 2010, these hospitals were cost settled at 78.48% of cost. From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 74.56% of cost. Reimbursement going forward of 71.13% (August 1, 2010 – December 31, 2010) of allowable cost as calculated through the cost report settlement process will be reduced by 2%, making final reimbursement 69.71% (January 1, 2011 going forward).

Physician Fee Schedule Changes

Members 16 years or older

Effective January 22, 2010, in general, the reimbursement for physician services rendered to recipients 16 years of age or older shall be reduced to 75% of the 2009 Louisiana Medicare Region 99 allowable or billed charges, whichever is lesser amount. Exceptions to the general rule are Prenatal E&M services (99201-99215 w/TH Modifier), Preventive E&M services (99381-99397), and Obstetrical Delivery Services (59400-59622). The Vaginal Delivery Services will be paid at 90% of the 2009 Louisiana Medicare Region 99 allowable or billed charges, whichever is lesser amount.

Members under 16 years

Effective January 22, 2010, the reimbursement for physician services rendered to recipients under 16 years of age shall be reduced to 90% of the 2009 Louisiana Medicare Region 99

MERCER

Page 13
June 15, 2011
Ms. Ruth Kennedy
Louisiana Department of Health and Hospitals

allowable or billed charges, whichever is lesser amount. In addition, effective August 1, 2010, DHH is no longer paying an enhanced fee for preventive services for members under 16 years.

Physician Injectibles

Effective January 22, 2010, Physician injectibles are paid at 90% of the 2009 Medicare Average Sale Price (ASP).

Clinical Services-End Stage Renal Disease Facilities Non-Medicare Claims Reimbursement Rate Reduction

Various changes, most recently, effective for dates of service on or after January 1, 2011, the reimbursement to ESRD facilities shall be reduced by 2 percent of the rates in effect on December 31, 2010.

Non-Emergency Medical Transportation – Most recently, effective for dates of service on or after January 1, 2011, the reimbursement rates for non-emergency, non-ambulance medical transportation services shall be reduced by 2 percent of the rates in effect on December 31, 2010.

Emergency Medical Transportation – Most recently, effective on or after January 1, 2011, the reimbursement rates for emergency ambulance transportation services shall be reduced by 2% of the rate on file as of December 31, 2010.

The compounded effect of all of the fee schedule changes by category of aid and category of service can be found in the table below. Overall, the fee schedule changes since the base data period reduced cost by approximately 6.94% for SFY09 and 5.33% for SFY10.

Data Smoothing

As part of the benchmark development process, Mercer blended data from SFY09 and SFY10 to arrive at the overall data source. The goal of the blending process is to obtain a set of base data that has sufficient credibility and reasonableness to develop appropriate benchmarks. Mercer applied weights of 60% and 40% to the SFY10 and SFY09 data respectively.

Beyond blending data from multiple years, Mercer also used state wide figures where particular PMPM cells within a region had small enrollment. The cost PMPM for a small cell is subject to large fluctuations from one year to the next, thus rendering it less effective at predicting future

MERCER

Page 14

June 15, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

cost. Using state wide figures results in greater data credibility and reduces the impact of random fluctuations exhibited by the data.

Some categories of eligibility such as the Foster Children and Breast and Cervical Cancer population are too small to have separate PMPM cells due to data credibility concerns. Therefore, state wide figures are used for these populations and the data has been combined across all age and sex cells in determining the benchmark cost.

Risk of Large Claims

To provide protection against the risk of catastrophic claims, the cost for any recipient that is over \$100,000 in any year will not be considered in reconciling cost savings for CCN-S plans. The benchmarks have been reduced consistently.

Risk Adjustment

Risk adjustment will be applied to the cost benchmarks in exhibit A to reflect differences in health status of the members served in each plan using the ACG model. The risk adjustment process does not increase or decrease the overall benchmark cost of the program but can change the benchmark for the various CCNs according to the relative risk of their enrolled members, and where the CCN-S networks as a group enroll a more or less costly population than the parallel CCN-P program. Actuarially sound risk adjustment protocols have been developed for this purpose.

Benchmark Development Overview

To provide additional detail on the benchmark development, Mercer has also provided an overview of the adjustments applied to each PMPM cell in Attachment B. This exhibit presents the breakdown of the assumptions used to calculate the benchmark PMPM.

Actuarial Soundness

In preparing the benchmark PMPMs shown in Attachment A, Mercer has used and relied upon enrollment, FFS claims, reimbursement level, benefit design, and information supplied by the DHH and its fiscal agent. The DHH and its fiscal agent are responsible for the validity and completeness of this supplied data and information. We have reviewed the data and information for internal consistency and reasonableness but we did not audit it. In our opinion it is appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

MERCER

Page 15
June 15, 2011
Ms. Ruth Kennedy
Louisiana Department of Health and Hospitals

The benchmark PMPMs in Attachment A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the CCN-S contract.

The benchmarks are actuarial projections of future contingent events. Actual CCN costs will differ from these projections. Mercer has developed these benchmarks on behalf of DHH to form a basis for calculating sharable savings under the CCN-S program. Use of these rate ranges for any purpose beyond that stated may not be appropriate. Furthermore, adjustment should be considered in the event that FFS cost are observed to trend differently than expected during the period leading up to CCN-S implementation such that the benchmarks may become, in retrospect, either excessive or overly difficult to achieve.

CCNs are advised that the use of these benchmarks may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of them by CCNs for any purpose. Mercer recommends that any CCN considering contracting with the DHH should carefully analyze its own projected medical expense before deciding whether to contract with the DHH.

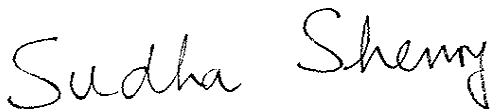

This letter assumes the reader is familiar with the CCN program, Medicaid eligibility rules, and actuarial techniques. It is intended for DHH, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial projections to understand the technical nature of these results.

If you have any questions on any of the information provided, please feel free to call Nick Simmons at 404 442 3196 and/or Sudha Shenoy at 404 442 3249.

Sincerely,

Nicholas J Simmons, FIA, FSA, MAAA

Sudha Shenoy, FSA, MAAA, CERA
