Program Updates from Louisiana Medicaid

November 26, 2018

The conference call scheduled for Monday, November 26 has been cancelled and will be rescheduled for later this week.

The purpose of the call is to address any questions or concerns regarding a [draft](#) state plan amendment shared with stakeholders last week. The draft represents LDH's commitment to addressing provider concerns with how Medicaid pays for pharmacy services, including ingredient cost and professional dispensing fee, together with single PDL implementation.

LDH intends to begin the process of seeking federal approval of the proposed changes in early December.
