Executive Summary

The Louisiana Department of Health (LDH) requires quality assessment and improvement activities to ensure that Healthy Louisiana Medicaid managed care organization (MCO) enrollees receive high-quality health care services (42 CFR Part 438). These activities include surveys of enrollees' experience with health care. Survey results provide important feedback on MCO performance, which is used to identify opportunities for continuous improvement in the care and services provided to members.

LDH requires the MCOs to contract with a National Committee for Quality Assurance (NCQA)-certified Healthcare Effectiveness Data and Information Set (HEDIS®) survey vendor to conduct annual Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Health Plan Surveys. LDH contracted with IPRO to analyze the MCOs' Measurement Year (MY) 2020 survey data and report the results.

This report presents data collected during the MY 2020 CAHPS® administration to adult MCO enrollees. The standardized survey instruments administered in MY 2020 were the CAHPS® 5.1H Adult Medicaid Health Plan Survey. Adult members from each MCO completed the surveys from February to May 2021. The following five MCOs participated in the MY 2020 CAHPS® Medicaid Health Plan Surveys: AmeriHealth Caritas Louisiana (ACLA); Aetna Better Health of Louisiana (ABHLA); Healthy Blue (HBL); Louisiana Healthcare Connections (LHCC); and UnitedHealthcare Community Plan Louisiana (UHC). Data are also presented for the Healthy Louisiana managed care program as a whole, termed the statewide average (SWA).

CAHPS® survey questions ask about experiences in a variety of areas. Results presented in this report include three global ratings: rating of health plan, rating of all health care, and rating of personal doctor, as well as individual survey responses for the following domains: Health Plan Ratings, Access to Care, Experience of Health Care Services, Preventive Care, and Health Status. Responses are summarized as achievement scores from 0 to 100.

Sampling Procedures and Survey Protocol

LDH required the MCOs to administer the MY 2020 CAHPS® Surveys according to NCQA HEDIS® Specifications for Survey Measures.¹ Enrollees eligible for sampling included those who were MCO members at the time the sample was drawn and who were continuously enrolled in the MCO for at least five of the last six months (July through December) of 2020. Adult members eligible for sampling included those who were 18 years of age or older (as of December 31, 2020). A systematic sample of at least 1,350 adult enrollees was selected from each participating MCO for the MY 2020 adult sample administration.

Response Rates

The administration of the CAHPS® surveys is comprehensive and is designed to achieve the highest possible response rate. For MY 2020, a total of 1,191 adult surveys were completed for Louisiana's Medicaid managed care program with a survey response rate of 12.8 percent.

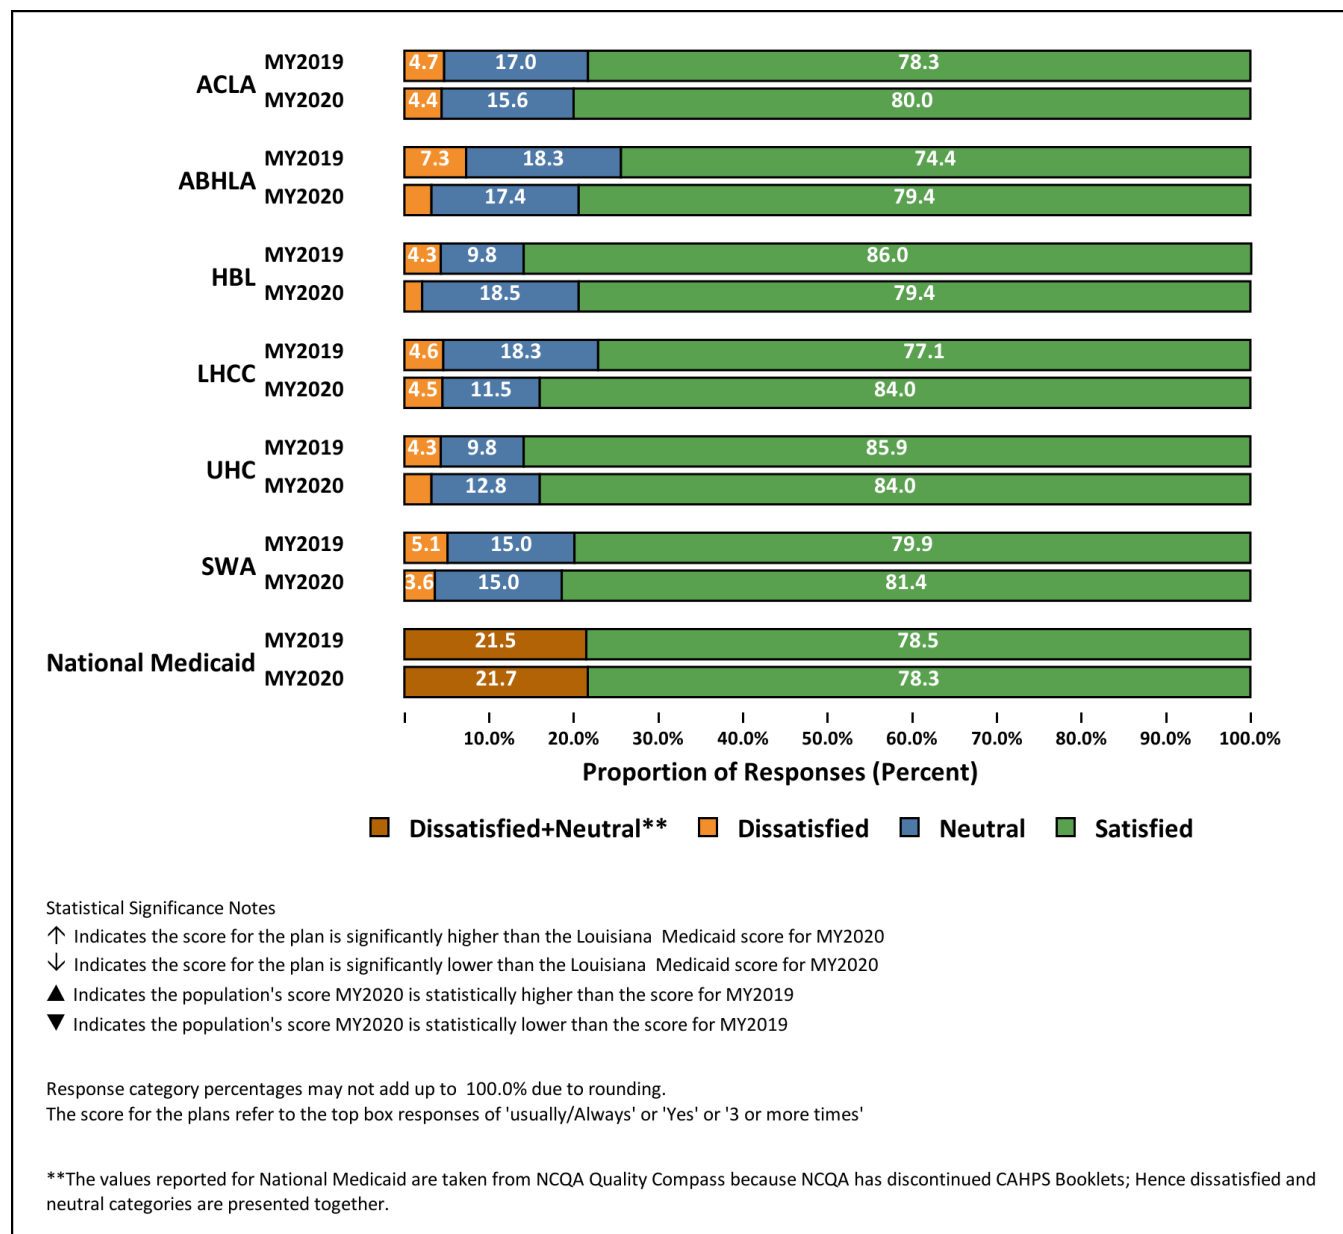

Key Findings

- **Rating of health plan:** The overall score for the Healthy Louisiana managed care program was high (81.4) with similar scores among the plans (79.4–84.0). Scores in MY 2020 were similar to scores in MY 2019.
- **Got care believed necessary:** The overall score for the Healthy Louisiana managed care program was high (85.7) with similar scores among the plans (84.7–86.7). Scores in MY 2020 were similar to scores in MY 2019.
- **Rating of all health care:** The overall score for the Healthy Louisiana managed care program was high (81.2) with similar scores among the plans (78.7–83.6). Scores in MY 2020 were similar to scores in MY 2019.

¹ National Committee for Quality Assurance. *HEDIS® MY 2020, Volume 3: Specifications for Survey Measures*. Washington, DC: NCQA, 2020.

Q28. Rating of plan

Respondents were asked to rate their health plan on a scale of 0 to 10, with 0 being the “worst health plan possible” and 10 being the “best health plan possible.” For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

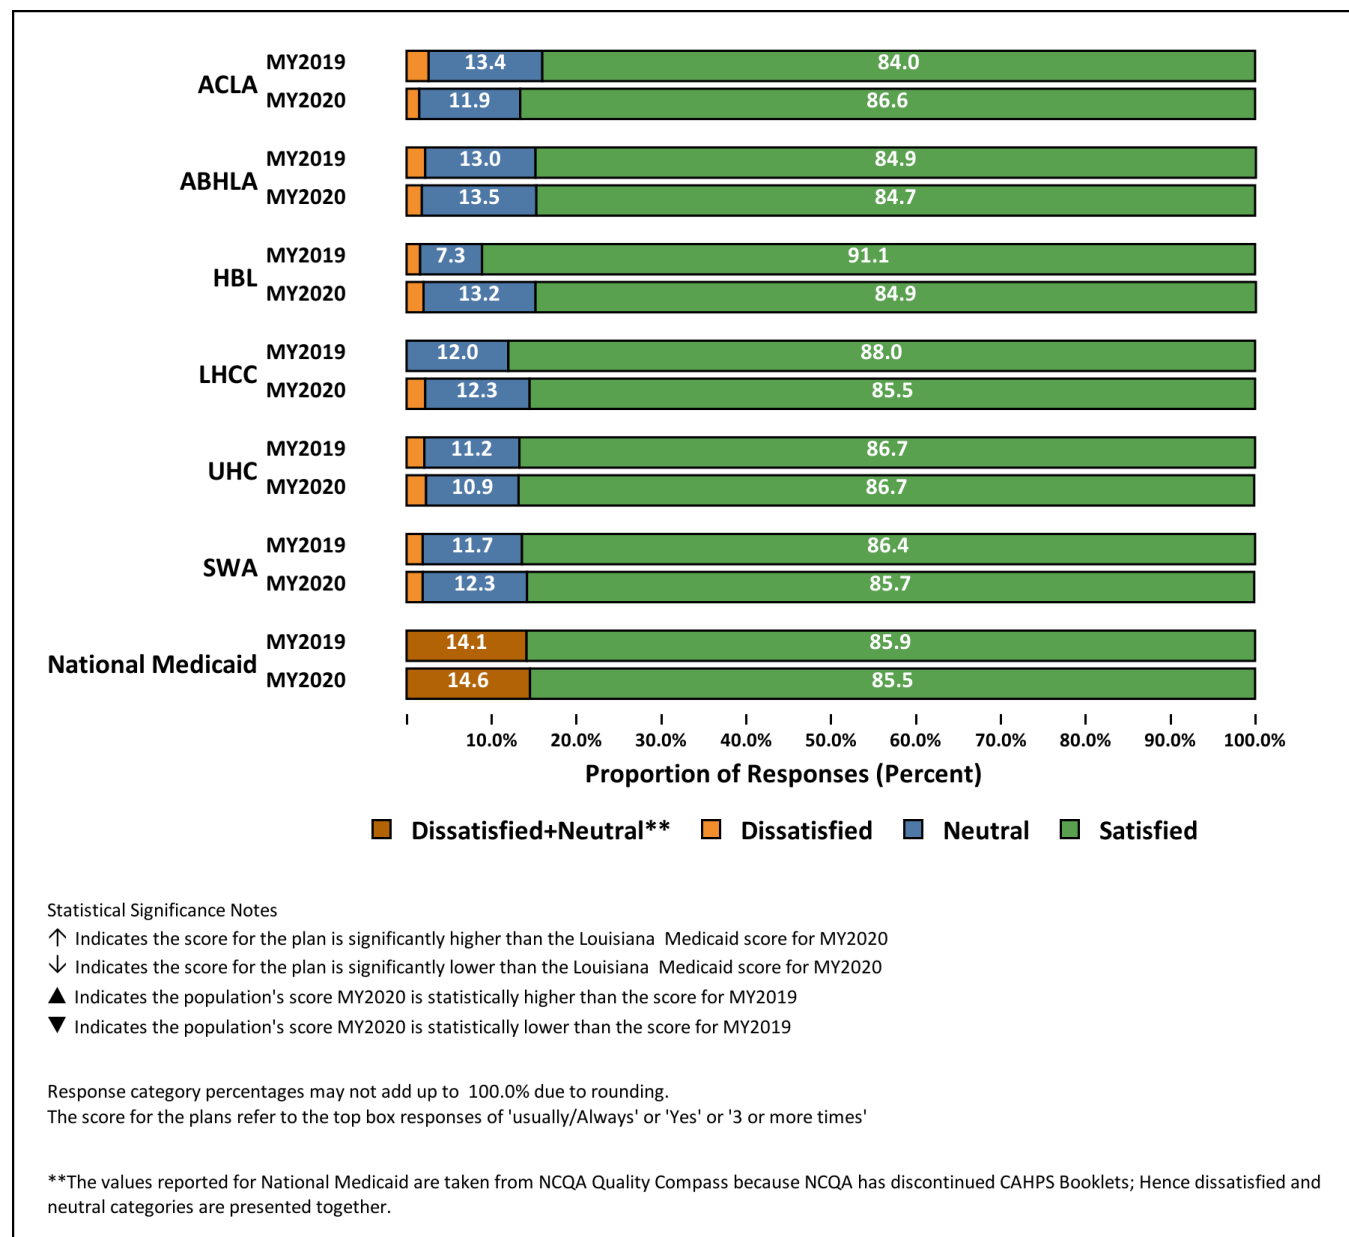

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q9. Usually or always got care, tests, or treatment you thought you needed

Respondents were asked how often it was easy for them to get the care, tests, or treatment they thought they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

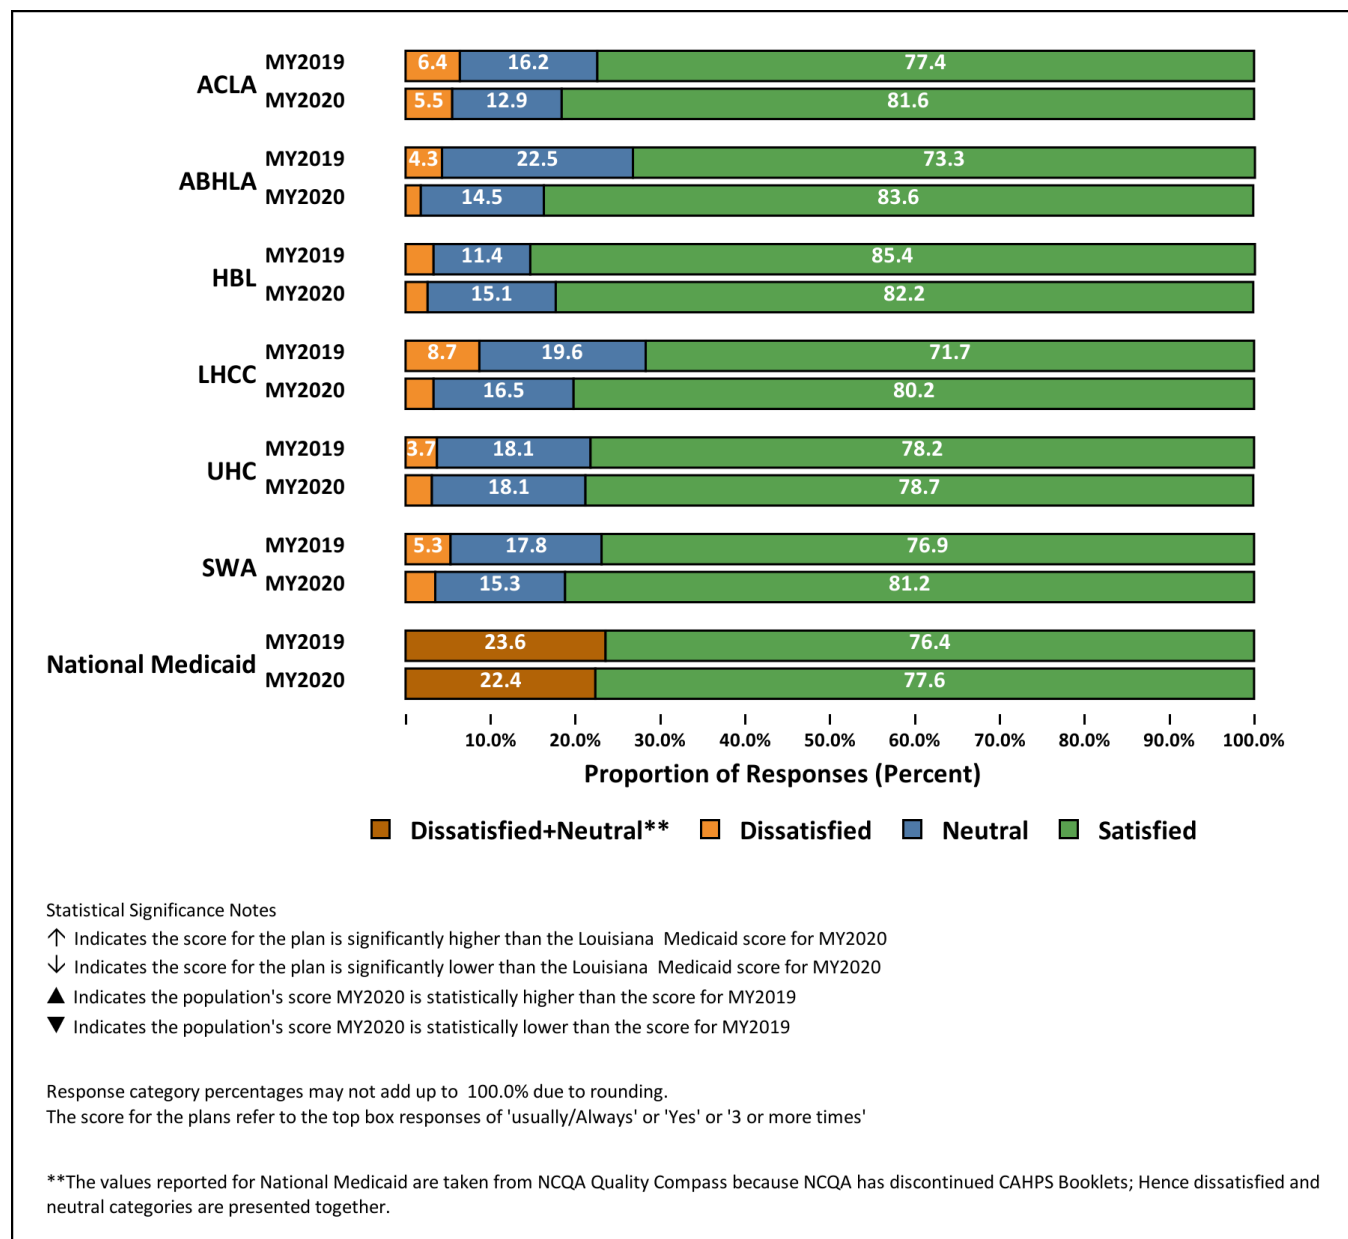

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q8. Rating of all health care

Respondents were asked to rate all their health care on a scale of 0 to 10, with 0 being the “worst health care possible” and 10 being the “best health care possible.” For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q28. Using any number from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your health plan?

Using This Report

This report is designed to identify and describe key opportunities for improving enrollees' experience of care across the Healthy Louisiana managed care program. For this report, LDH selected key indicators of enrollees' experience of care. LDH selected these key indicators based on two criteria: 1) they represent important aspects of health care; and 2) they are influenced directly by MCO policies and operations. Therefore, these results focus on areas where the MCOs have significant potential to improve enrollees' care and experience of care.

About the CAHPS® Survey

The survey questions were obtained from the MY 2020 CAHPS® 5.1H Medicaid Adult Survey. The objective of the survey is to capture complete and accurate information about consumer-reported experiences with health care. The survey aims to measure how well MCOs are meeting enrollees' expectations and perceived needs.

Response Rates

The administration of the CAHPS® surveys is comprehensive and is designed to achieve the highest possible response rate. A high response rate facilitates the generalization of the survey responses to an MCO's population. The response rate is the total number of completed surveys divided by all eligible enrollees of the sample. An enrollee's survey was assigned a disposition code of "completed" if at least three of five specified questions were completed. Eligible enrollees included the entire sample minus ineligible members. Ineligible members of the sample met one or more of the following criteria: were deceased, were invalid (did not meet the eligible population criteria), were mentally or physically incapacitated, or had a language barrier.

For MY 2020, a total of 1,191 adult surveys were completed for Louisiana's Medicaid managed care program with a survey response rate of 12.8 percent.

Survey Analysis

Enrollee responses to survey questions are summarized as achievement scores by MCO and for the program as a whole, termed the statewide average (SWA). An achievement score is computed as the proportion of responses that indicate a positive experience. In general, somewhat positive responses are included with positive responses as achievements. Achievement scores are computed by aggregating the top two or three positive experience responses, and reported for all pertinent survey items (i.e., those items that have a range of response choices from poor experience to positive). The scoring methodology included in this report is derived from the CAHPS® survey scoring guidelines.

Achievement scores for the component questionnaire items are presented in the form of bar charts to facilitate comparison of MCO scores over time. Responses were classified into three categories: Dissatisfied, Neutral, and Satisfied (with the exception of the smoking and flu questions, which were classified into two categories: Yes and No; and the overall health question, which was classified into two categories: Good/Fair/Poor and Excellent/Very Good). Additional detail on the classification of responses is provided in the narrative above each bar chart. For reference, the bar charts also include scores for the national Medicaid population, as reported in NCQA Quality Compass.²

Statistically significant differences between scores were determined using a 95% confidence interval overlap test. Confidence intervals for each MY 2020 score and each MY 2019 score were calculated and compared. If the intervals for the MY 2020 and MY 2019 scores did not overlap, then the difference was considered to be statistically significant. A similar test was performed to compare each MCO's scores with the SWA scores. If the difference between a MY 2020 score and a MY 2019 score was statistically significant, then a ▲ or ▼ was placed at the end of the appropriate bar. If the difference between an MCO's score and the SWA score was statistically significant, then a ↑ or ↓ was placed at the end of the appropriate bar.

² National Committee for Quality Assurance. *Quality Compass 2021*. Washington, DC: NCQA, 2021.

Interpretation of Results and Conclusions

Results presented here are in a format that is optimized for use in practical decision-making. Specifically, these results can:

1. Assist in identifying strengths and weaknesses in the quality of care and services for the MCOs.
2. Provide a way to assess where resources can best be allocated to improve performance for the MCOs.

Conclusions based on the information presented in this report should be tempered by its limitations. First, for some survey items, relatively small numbers of responses could be collected, due to skip patterns inherent in the instrument and/or a small survey sample size. Conclusions based on analysis of fewer than 100 observations should be viewed with caution. Additionally, in many of the charts and tables presented in this report, differences between MCOs are readily apparent. However, where these differences are not statistically significant they should be evaluated accordingly.

Health Plan Ratings

This section describes enrollees' ratings of their health plan by MCO and for the Healthy Louisiana managed care program overall. Enrollees were asked to rate different areas related to their health plan. The survey questions included the following:

- Q28: Using any number from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your health plan?
Responses are on a scale of 0 to 10 with 0 being the worst and 10 the best.
- Q24: In the last 6 months, how often did your health plan's customer service give you the information or help you needed?
Responses are Never, Sometimes, Usually and Always.
- Q25: In the last 6 months, how often did your health plan's customer service staff treat you with courtesy and respect?
Responses are Never, Sometimes, Usually and Always.
- Q27: In the last 6 months, how often were the forms from your health plan easy to fill out?
Responses are Never, Sometimes, Usually and Always.

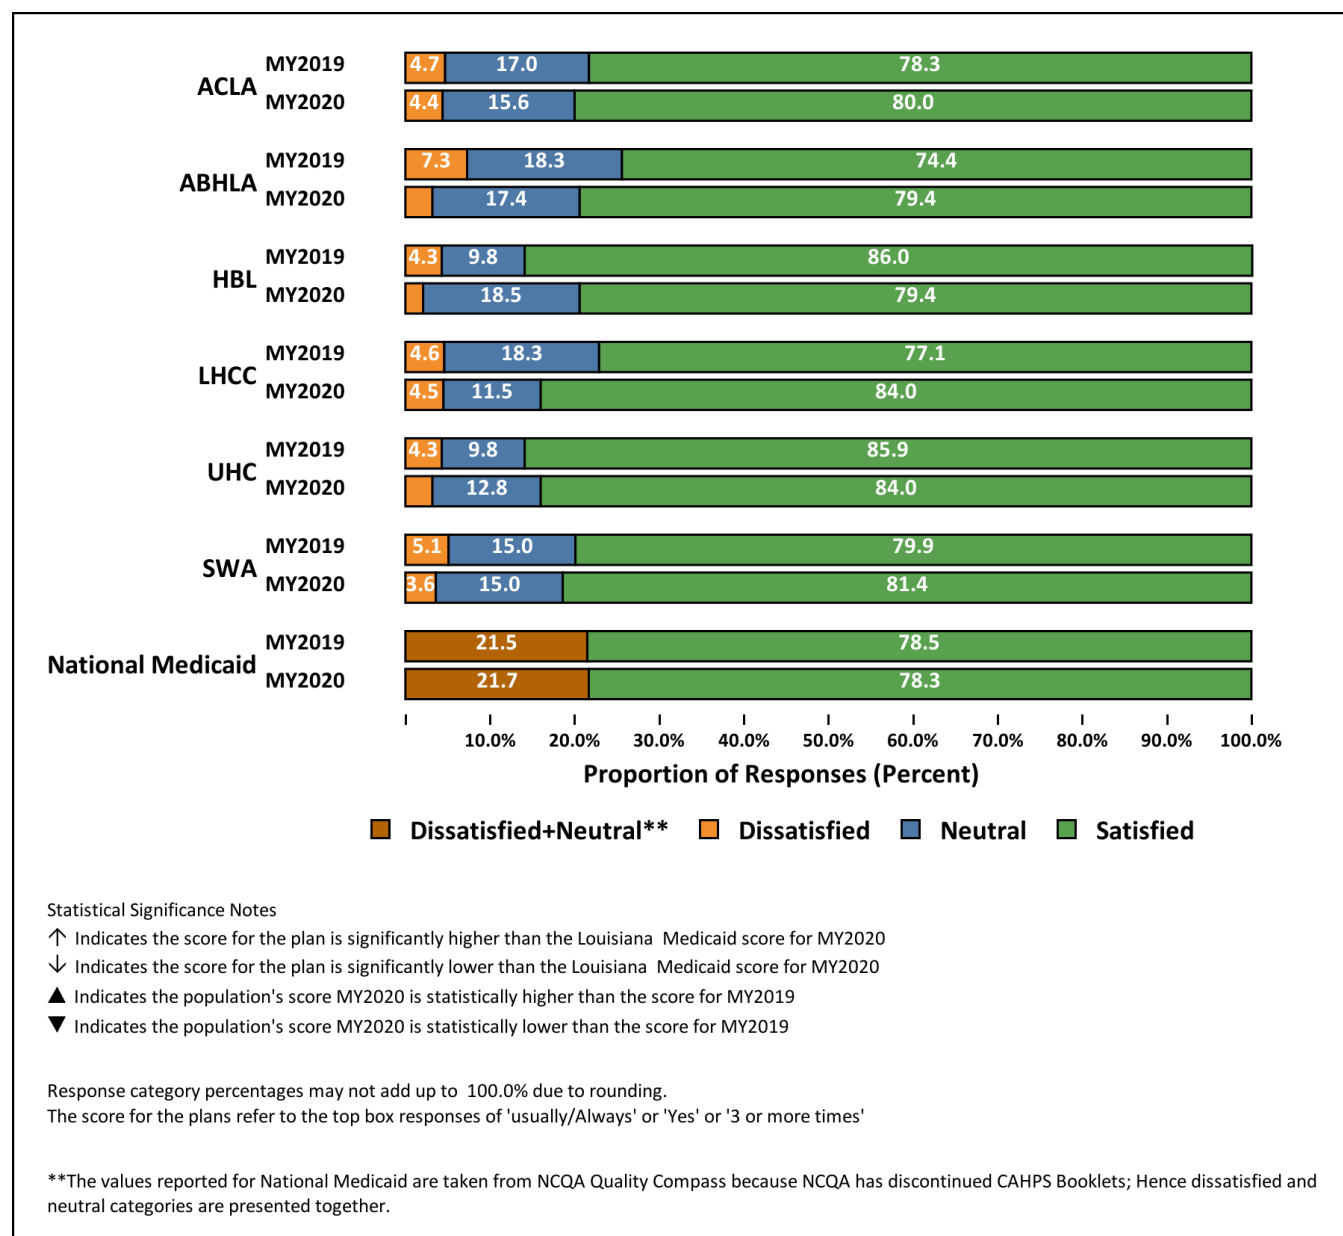

Key Findings

Results presented in the Health Plan Ratings section are summarized below. Scores are out of 100.

- **Rating of health plan:** The overall score for the Healthy Louisiana managed care program was high (81.4) with similar scores among the plans (79.4–84.0). Scores in MY 2020 were similar to scores in MY 2019.
- **Obtained help needed from customer service:** The overall score for the Healthy Louisiana managed care program was high (85.9) with similar scores among the plans (80.3–90.0). Scores in MY 2020 were similar to scores in MY 2019.
- **Customer service treated with courtesy and respect:** The overall score for the Healthy Louisiana managed care program was high (94.3) with similar scores among the plans (92.2–96.2). Scores in MY 2020 were similar to scores in MY 2019.
- **Health plan forms easy to fill out:** The overall score for the Healthy Louisiana managed care program was high (96.5) with similar scores among the plans (94.5–98.7). Scores in MY 2020 were similar to scores in MY 2019.

Q28. Rating of plan

Respondents were asked to rate their health plan on a scale of 0 to 10, with 0 being the “worst health plan possible” and 10 being the “best health plan possible.” For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

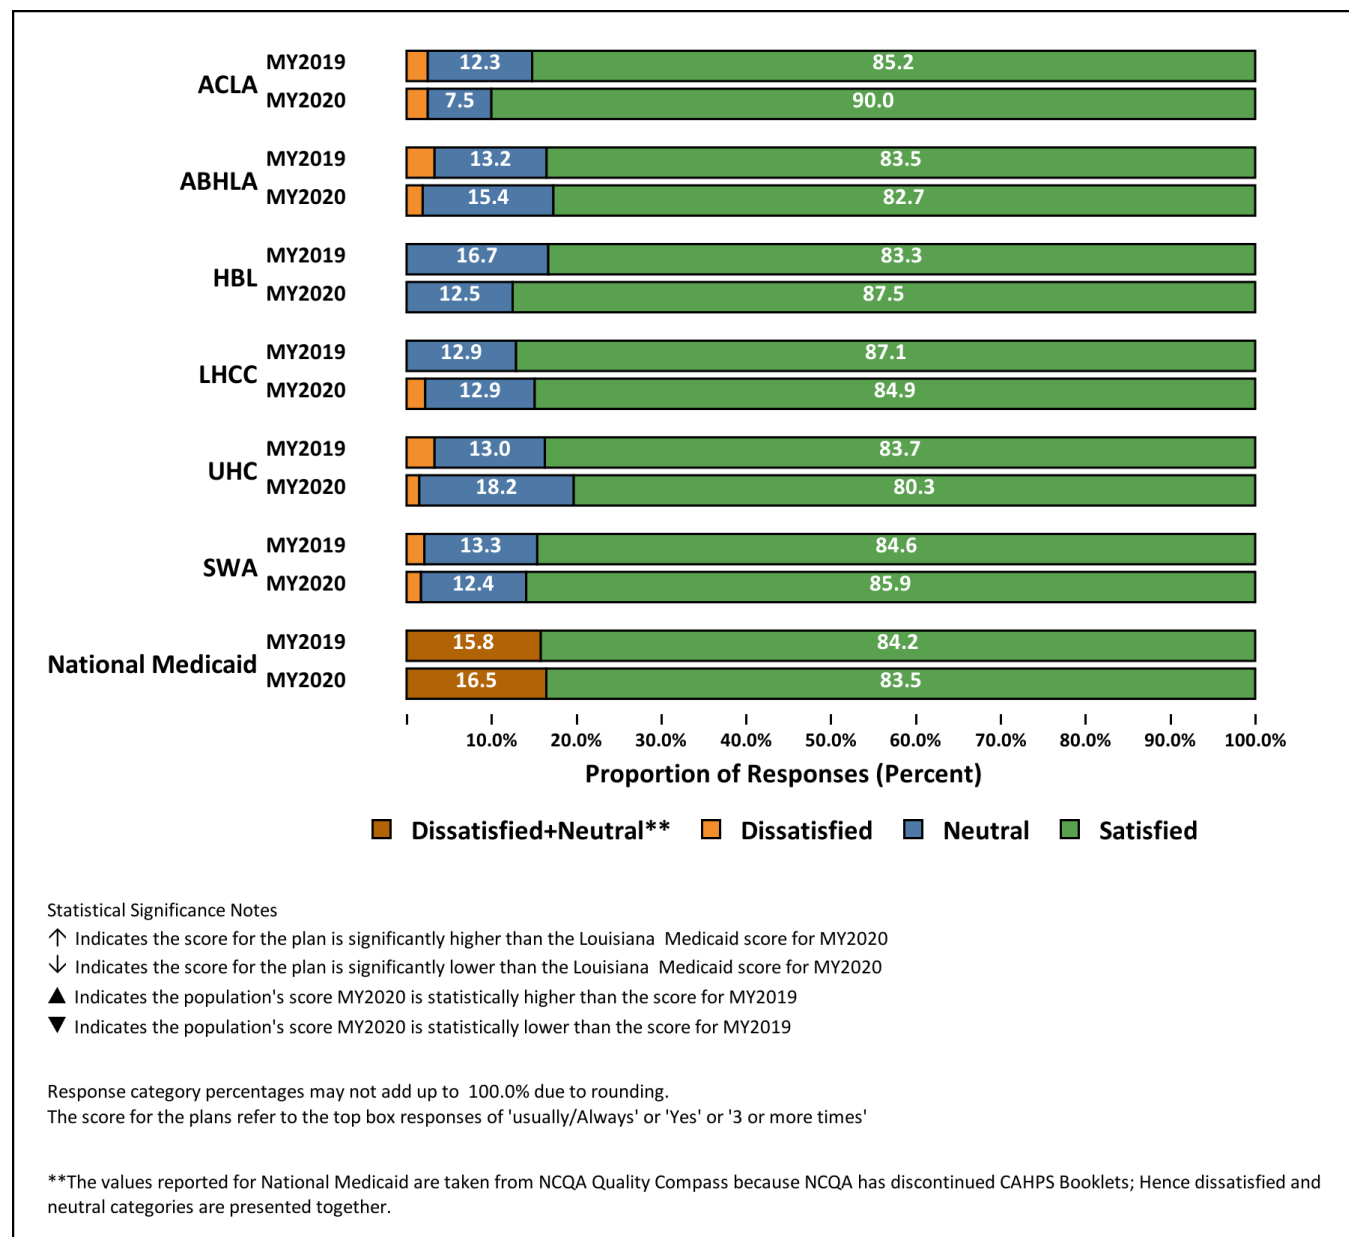

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q24. Health plan's customer service usually or always gave needed information or help

Respondents were asked how often their health plan's customer service gave them the information or help they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

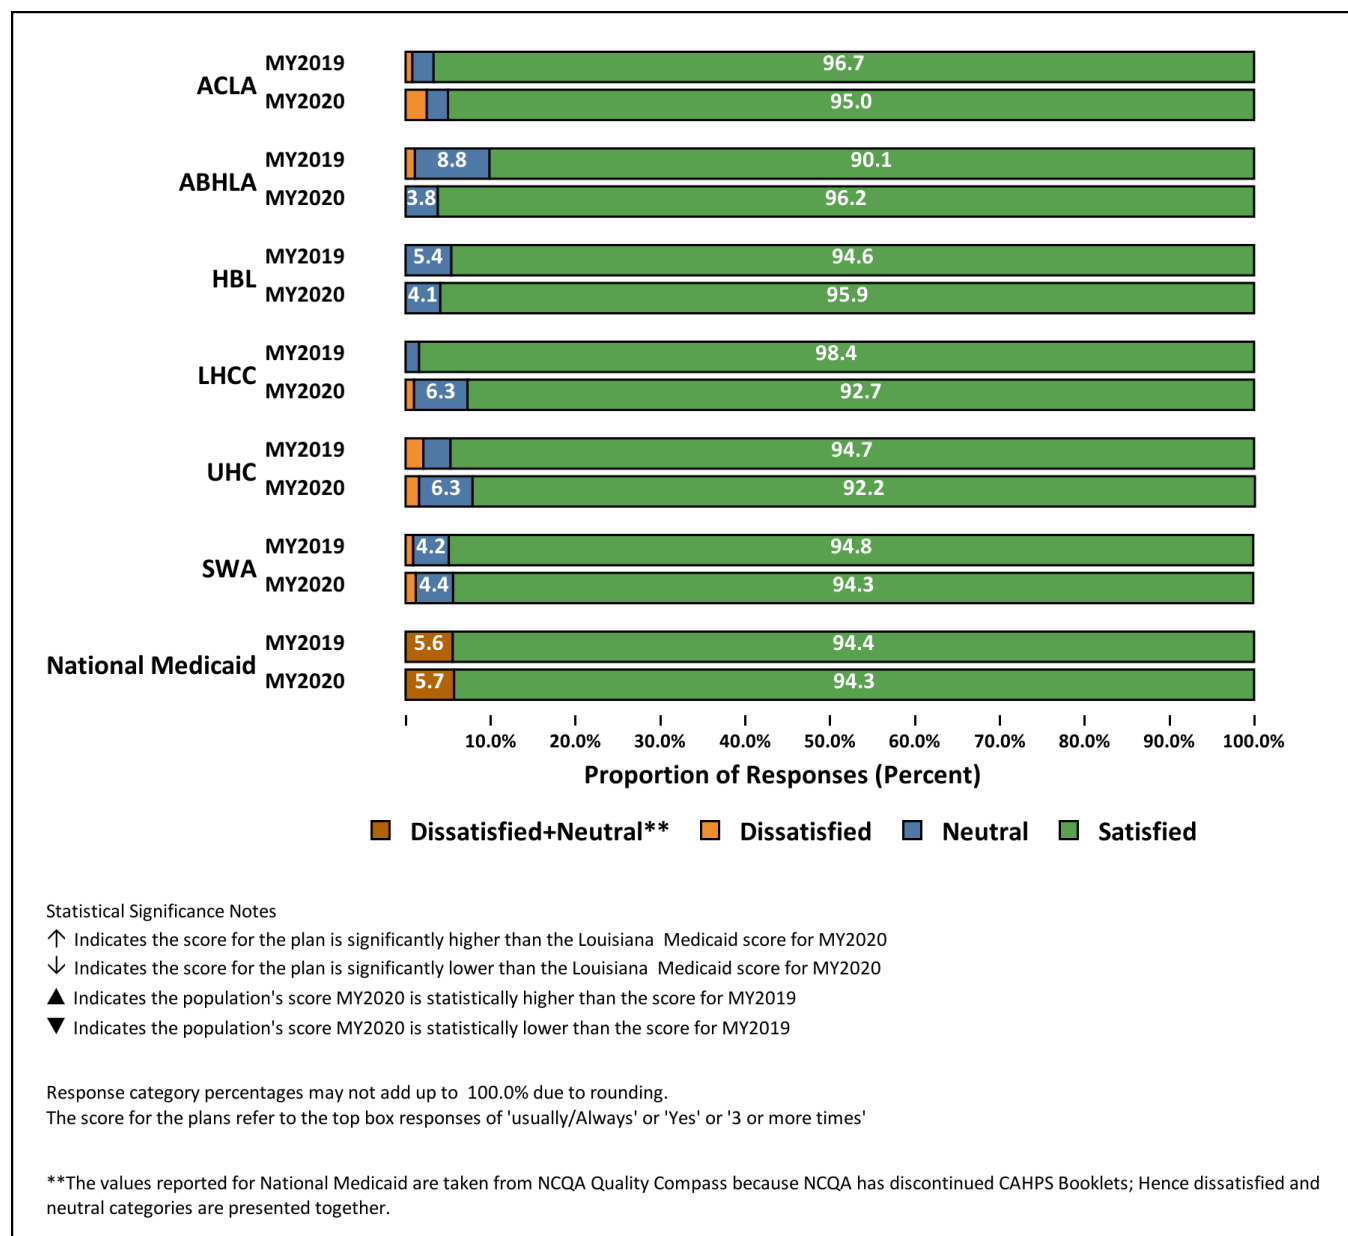

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q25. Usually or always treated with courtesy and respect by health plan's customer service staff

Respondents were asked how often their health plan's customer service staff treated them with courtesy and respect. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

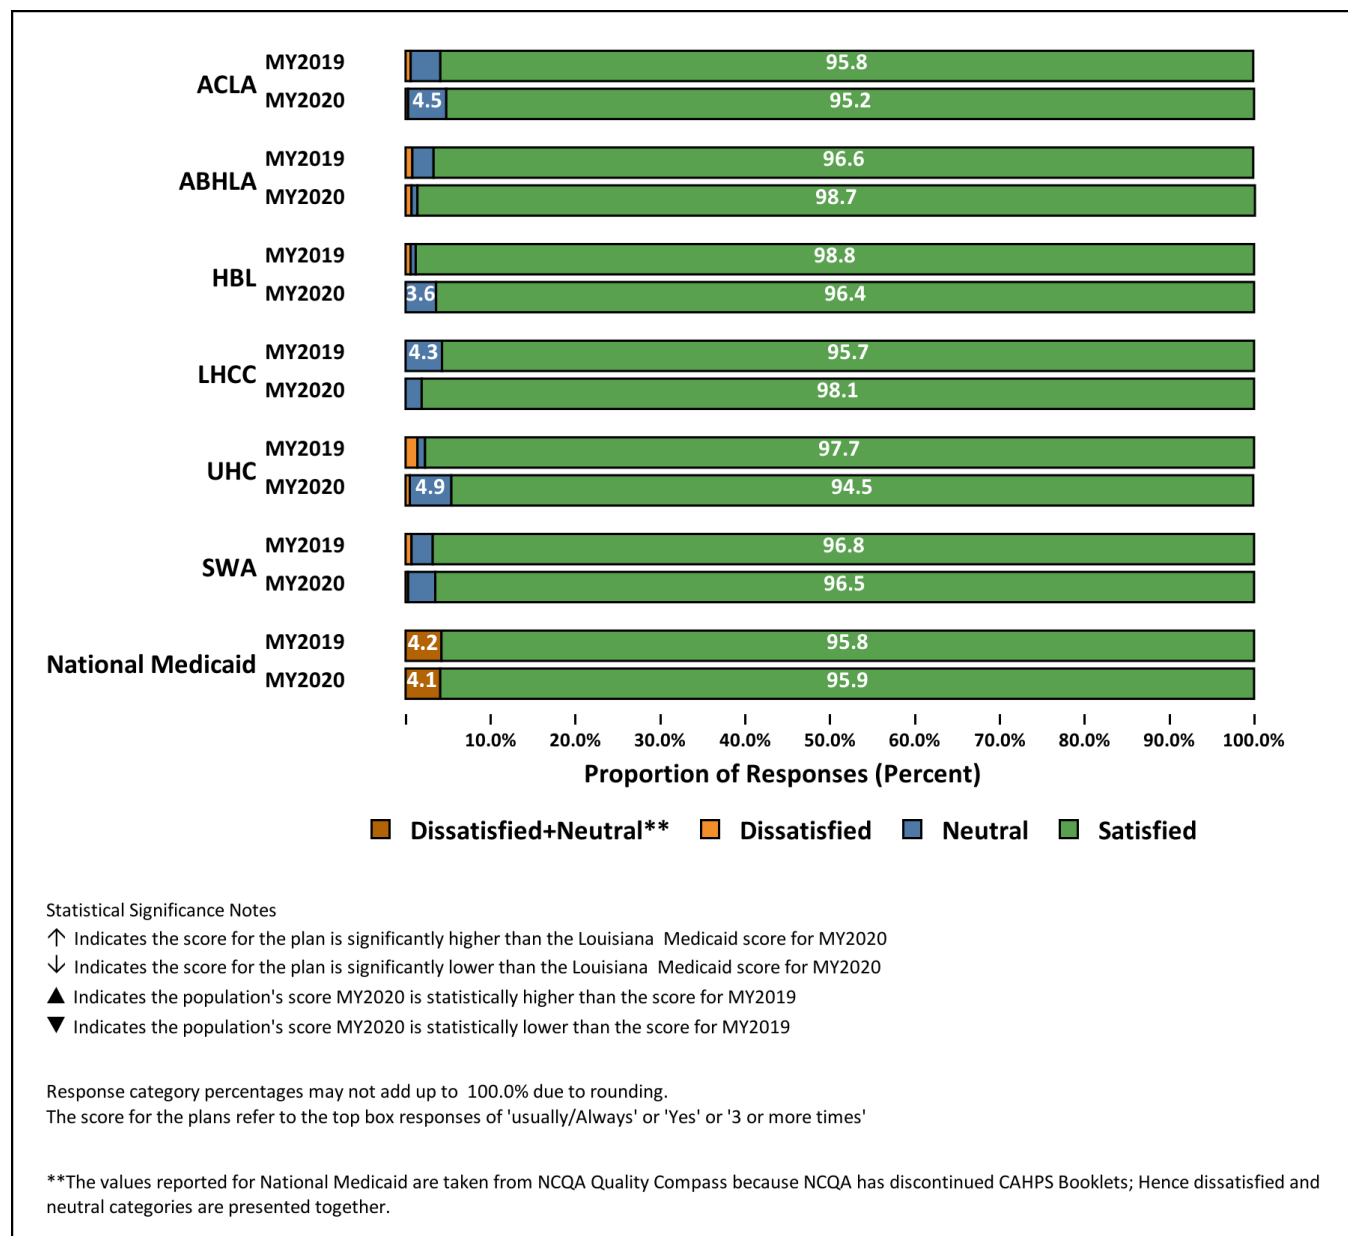

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q27. Forms from your health plan usually or always easy to fill out

Respondents were asked how often forms from their health plan were easy to fill out. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Access to Care

This section describes enrollees' experiences with access to care by MCO and for the Healthy Louisiana managed care program overall. MCOs can directly influence access to care through their contracted networks and through maintaining accurate and up-to-date provider directories. The survey questions include the following:

- Q9: In the last 6 months, how often was it easy to get the care, tests, or treatment you needed?
Responses are Never, Sometimes, Usually and Always.
- Q4: In the last 6 months, when you needed care right away, how often did you get care as soon as you needed?
Responses are Never, Sometimes, Usually and Always.
- Q6: In the last 6 months, how often did you get an appointment for a check-up or routine care as soon as you needed?
Responses are Never, Sometimes, Usually and Always.
- Q20: In the last 6 months, how often did you get an appointment with a specialist as soon as you needed?
Responses are Never, Sometimes, Usually and Always.

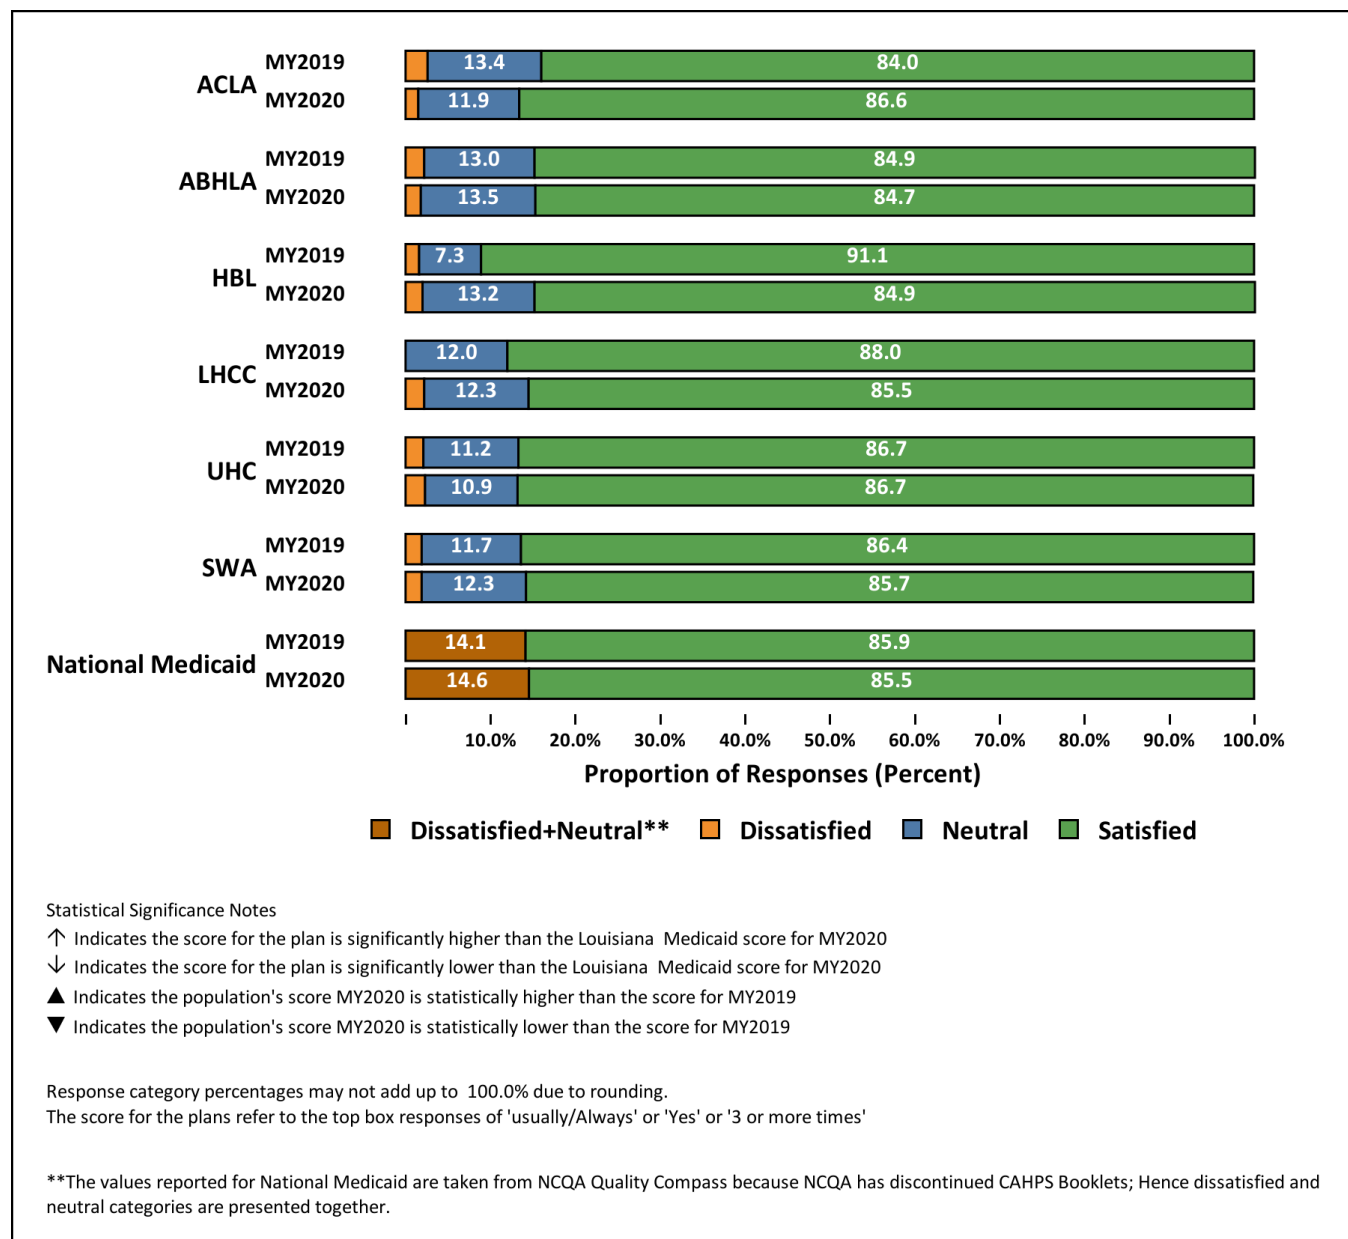

Key Findings

Results presented in the Access to Care section are summarized below. Scores are out of 100.

- **Got care believed necessary:** The overall score for the Healthy Louisiana managed care program was high (85.7) with similar scores among the plans (84.7–86.7). Scores in MY 2020 were similar to scores in MY 2019.
- **Received care as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (81.2) with similar scores among the plans (77.3–87.5). Scores in MY 2020 were similar to scores in MY 2019.
- **Received appointment for check-up or routine care as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (80.3) with similar scores among the plans (78.4–86.5). Scores in MY 2020 were similar to scores in MY 2019.
- **Received appointment with a specialist as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (82.4) with similar scores among the plans (80.4–85.9). Scores in MY 2020 were similar to scores in MY 2019.

Q9. Usually or always got care, tests, or treatment you thought you needed

Respondents were asked how often it was easy for them to get the care, tests, or treatment they thought they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

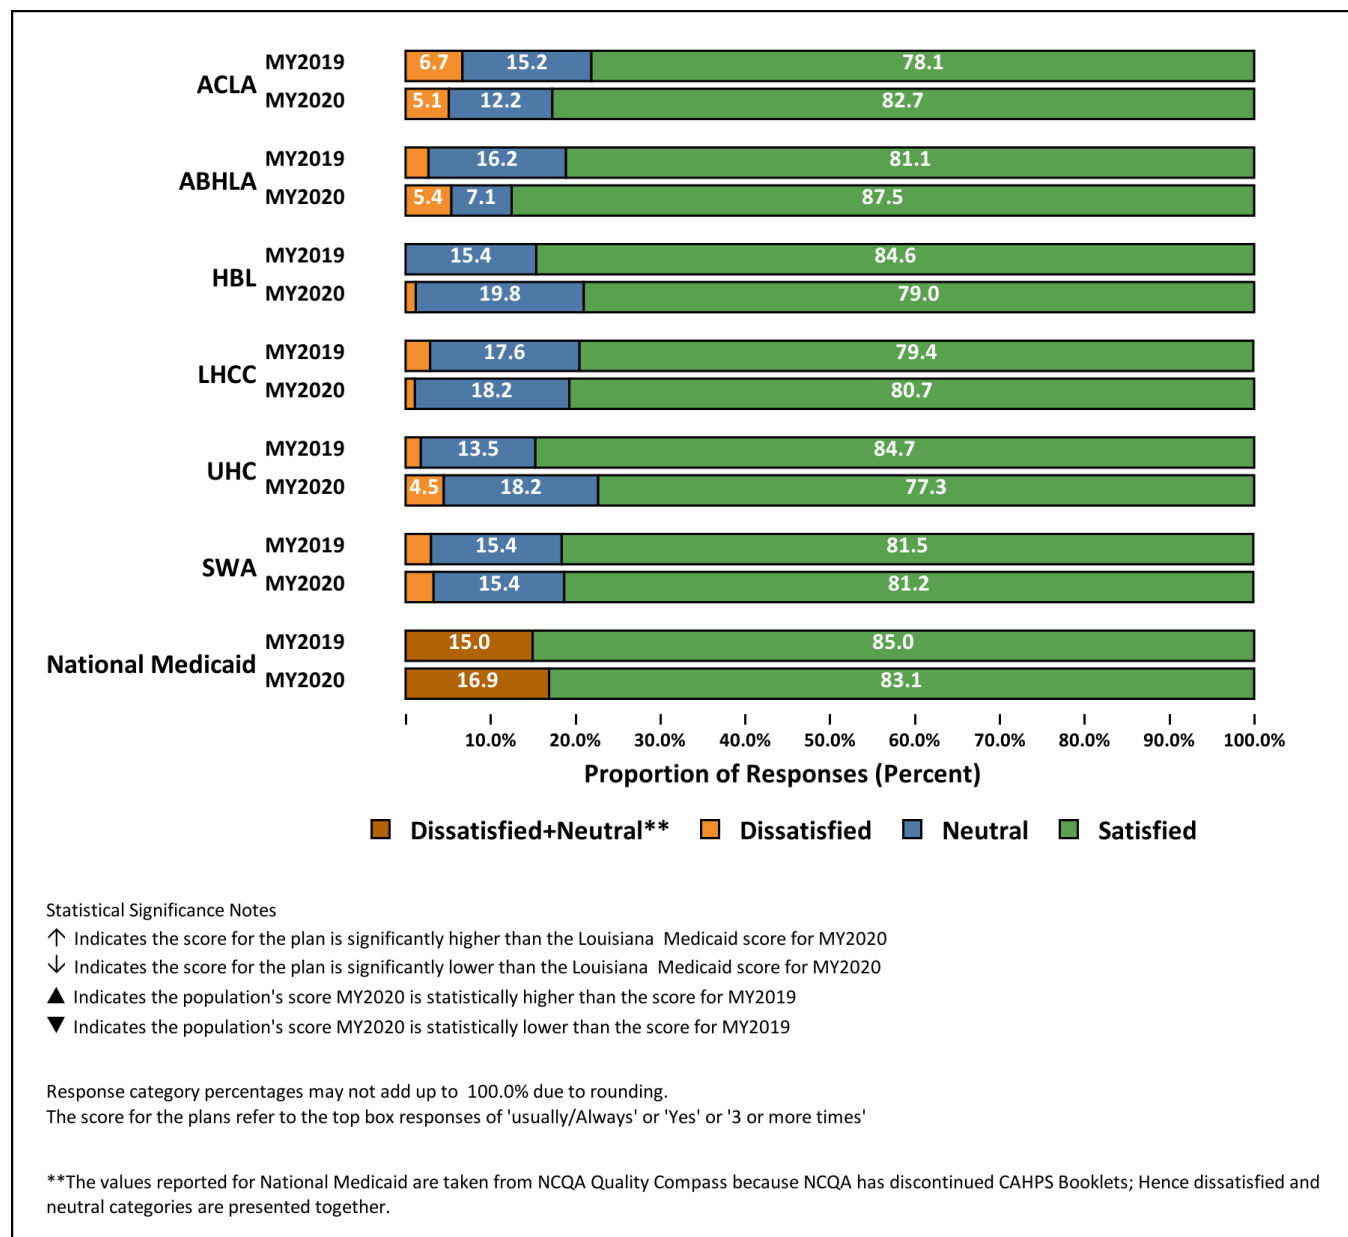

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q4. Usually or always got urgent care as soon as you needed

Respondents were asked how often they received care as soon as they needed when they needed care right away. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

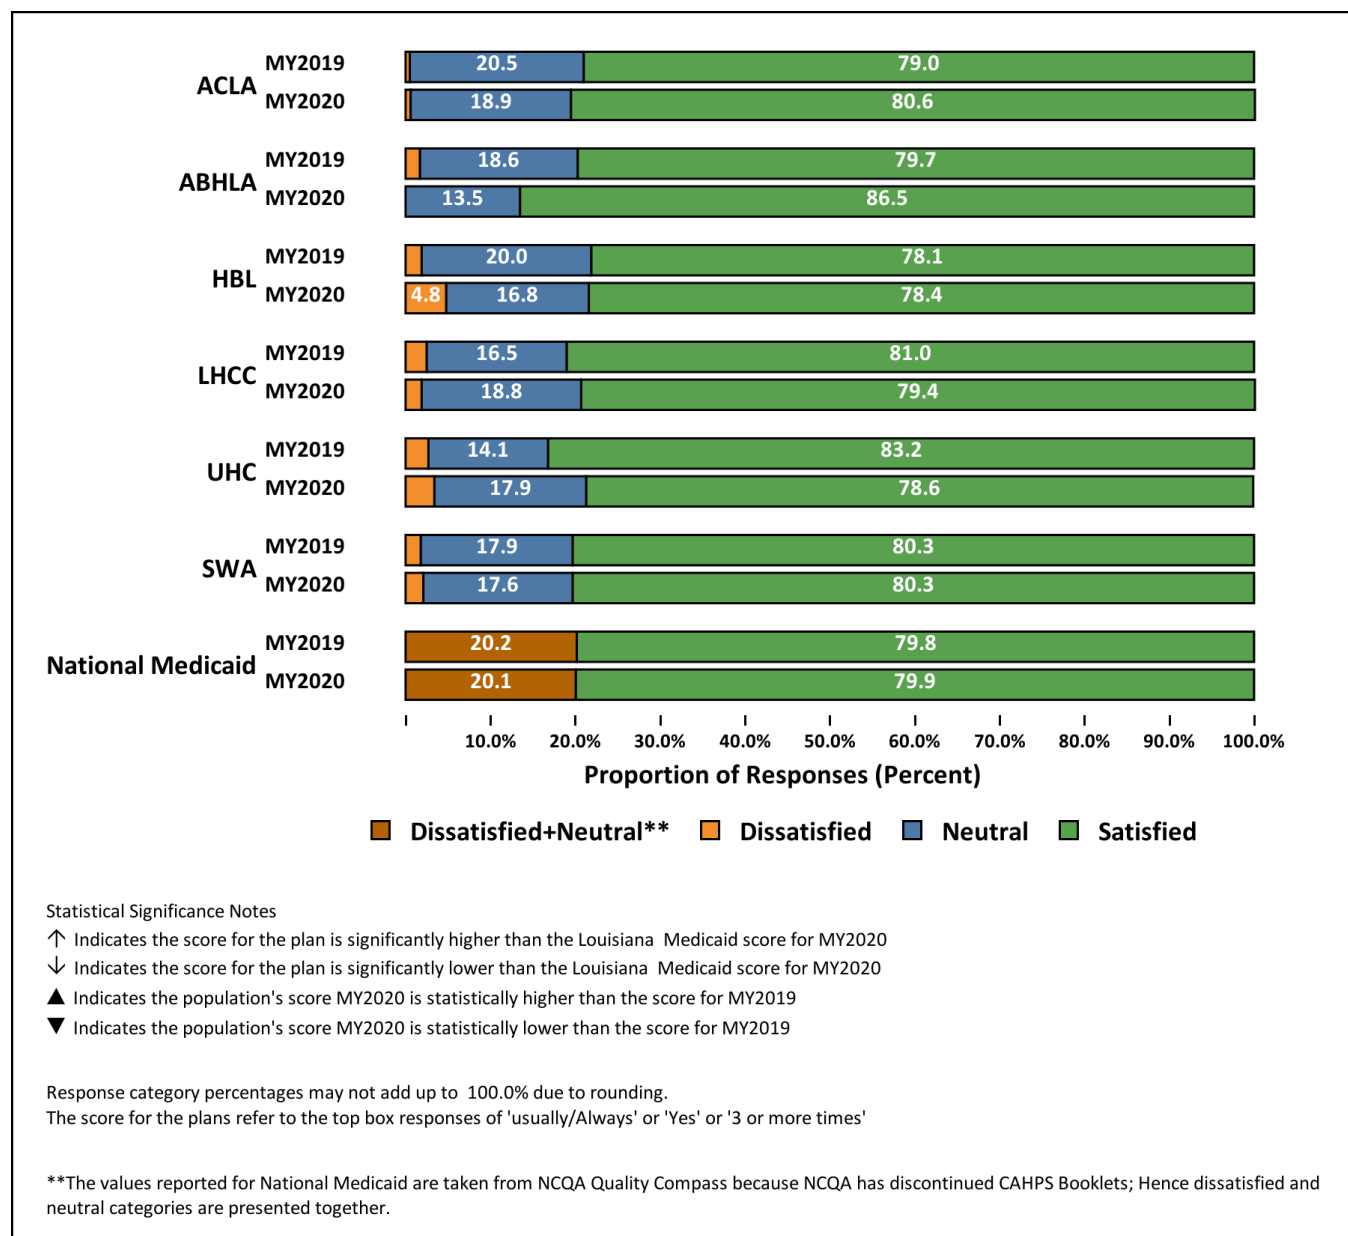

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q6. Usually or always got an appointment for check-up or routine care as soon as you needed

Respondents were asked how often they got an appointment for check-up or routine care as soon as they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

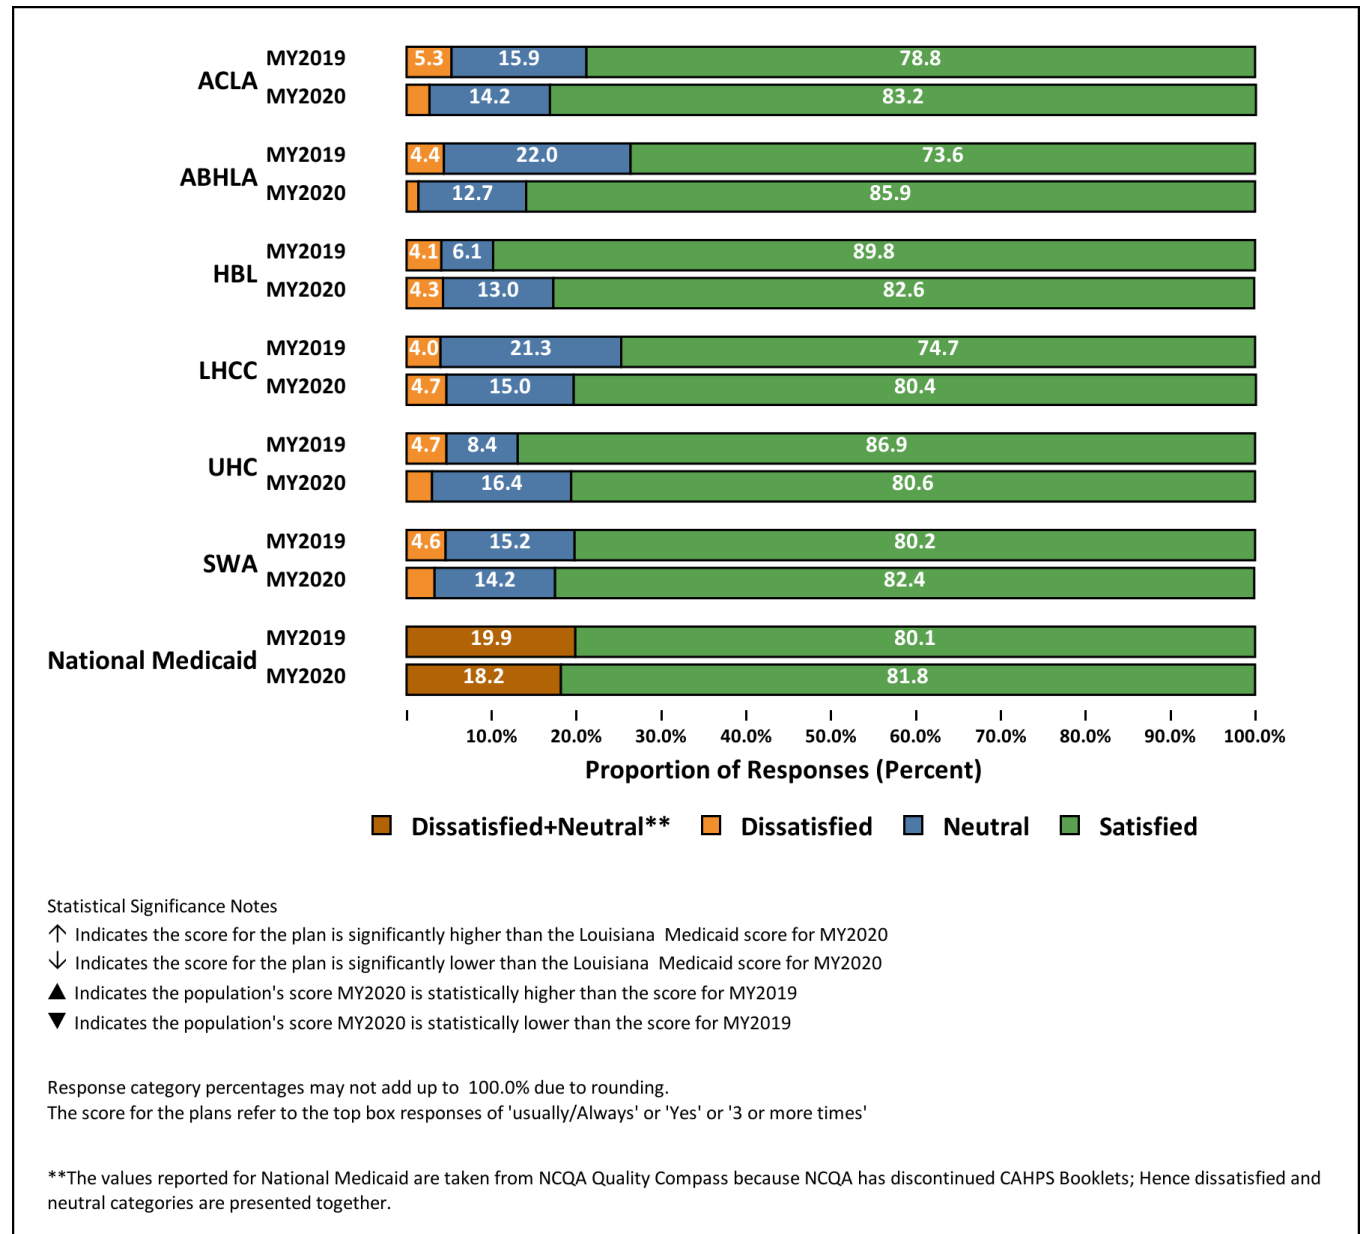

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q20. Usually or always got an appointment with a specialist as soon as you needed

Respondents were asked how often they got an appointment with a specialist as soon as they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Experience of Health Care Services

This section describes enrollees' experiences with their doctor by MCO and for the Healthy Louisiana managed care program overall. MCOs can influence this rating by contracting with high quality providers and by giving providers the support and resources they need to take care of enrollees. The survey questions include the following:

- Q18: Using any number from 0 to 10, where 0 is the worst personal doctor possible and 10 is the best personal doctor possible, what number would you use to rate your personal doctor?
Responses are on a scale of 0 to 10 with 0 being the worst and 10 the best.
- Q12: In the last 6 months, how often did your personal doctor explain things in a way that was easy to understand?
Responses are Never, Sometimes, Usually and Always.
- Q13: In the last 6 months, how often did your personal doctor listen carefully to you?
Responses are Never, Sometimes, Usually and Always.
- Q14: In the last 6 months, how often did your personal doctor show respect for what you had to say?
Responses are Never, Sometimes, Usually and Always.
- Q15: In the last 6 months, how often did your personal doctor spend enough time with you?
Responses are Never, Sometimes, Usually and Always.
- Q17: In the last 6 months, how often did your personal doctor seem informed and up-to-date about the care you got from these doctors or other health providers?
Responses are Never, Sometimes, Usually and Always.

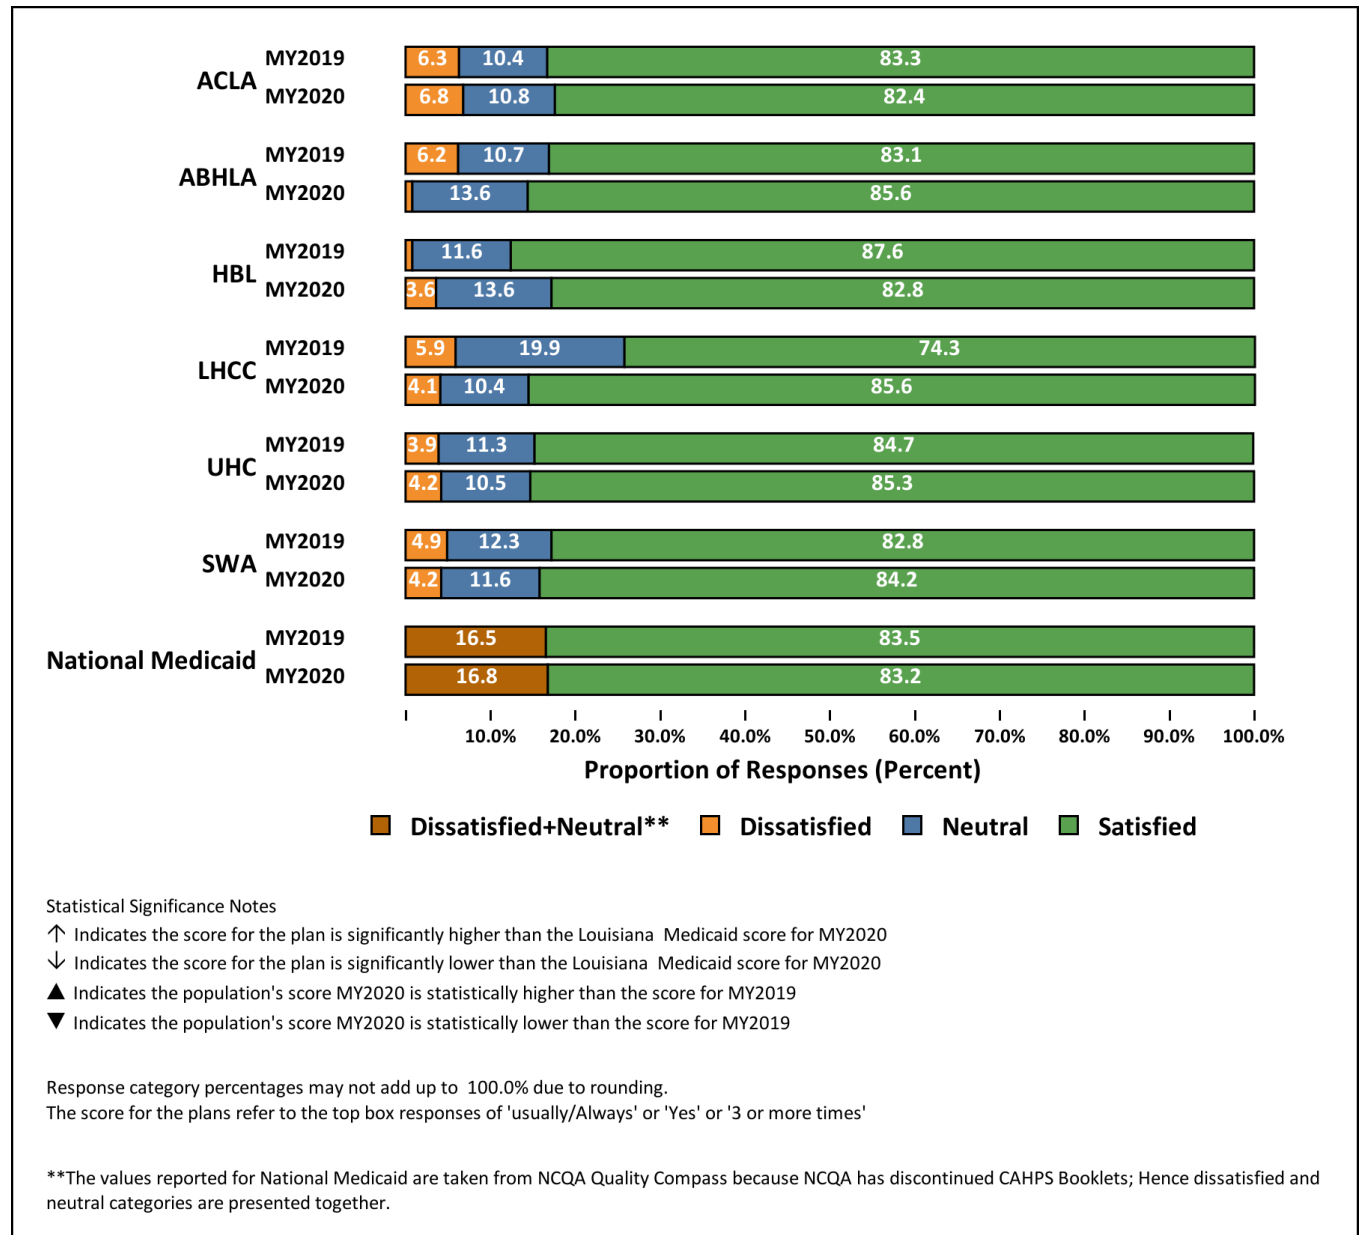

Key Findings

Results presented in the Experience of Health Care Services section are summarized below. Scores are out of 100.

- **Rating of personal doctor:** The overall score for the Healthy Louisiana managed care program was high (84.2) with similar scores among the plans (82.4–85.6). Scores in MY 2020 were similar to scores in MY 2019.
- **Personal doctor explained things in a way that was easy to understand:** The overall score for the Healthy Louisiana managed care program was high (92.8) with similar scores among the plans (88.6–95.9). Scores in MY 2020 were similar to scores in MY 2019. One MCO had a statistically significantly lower score in MY 2020 than in MY 2019 (from 100.0 to 92.9, a decrease of 7.1).
- **Personal doctor listened carefully:** The overall score for the Healthy Louisiana managed care program was high (92.6) with similar scores among the plans (91.4–93.5). Scores in MY 2020 were similar to scores in MY 2019.
- **Personal doctor showed respect for what patient had to say:** The overall score for the Healthy Louisiana managed care program was high (92.3) with similar scores among the plans (90.5–94.6). Scores in MY 2020 were similar to scores in MY 2019.
- **Personal doctor spent enough time with patient:** The overall score for the Healthy Louisiana managed care program was high (90.3) with similar scores among the plans (87.1–92.2). Scores in MY 2020 were similar to scores in MY 2019.
- **Personal doctor seemed informed about care received from other doctors or providers:** The overall score for the Healthy Louisiana managed care program was high (85.2) with similar scores among the plans (81.0–88.3). Scores in MY 2020 were similar to scores in MY 2019.

Q18. Rating of personal doctor

Respondents were asked to rate their personal doctor on a scale of 0 to 10, with 0 being the “worst personal doctor possible” and 10 being the “best personal doctor possible.” For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

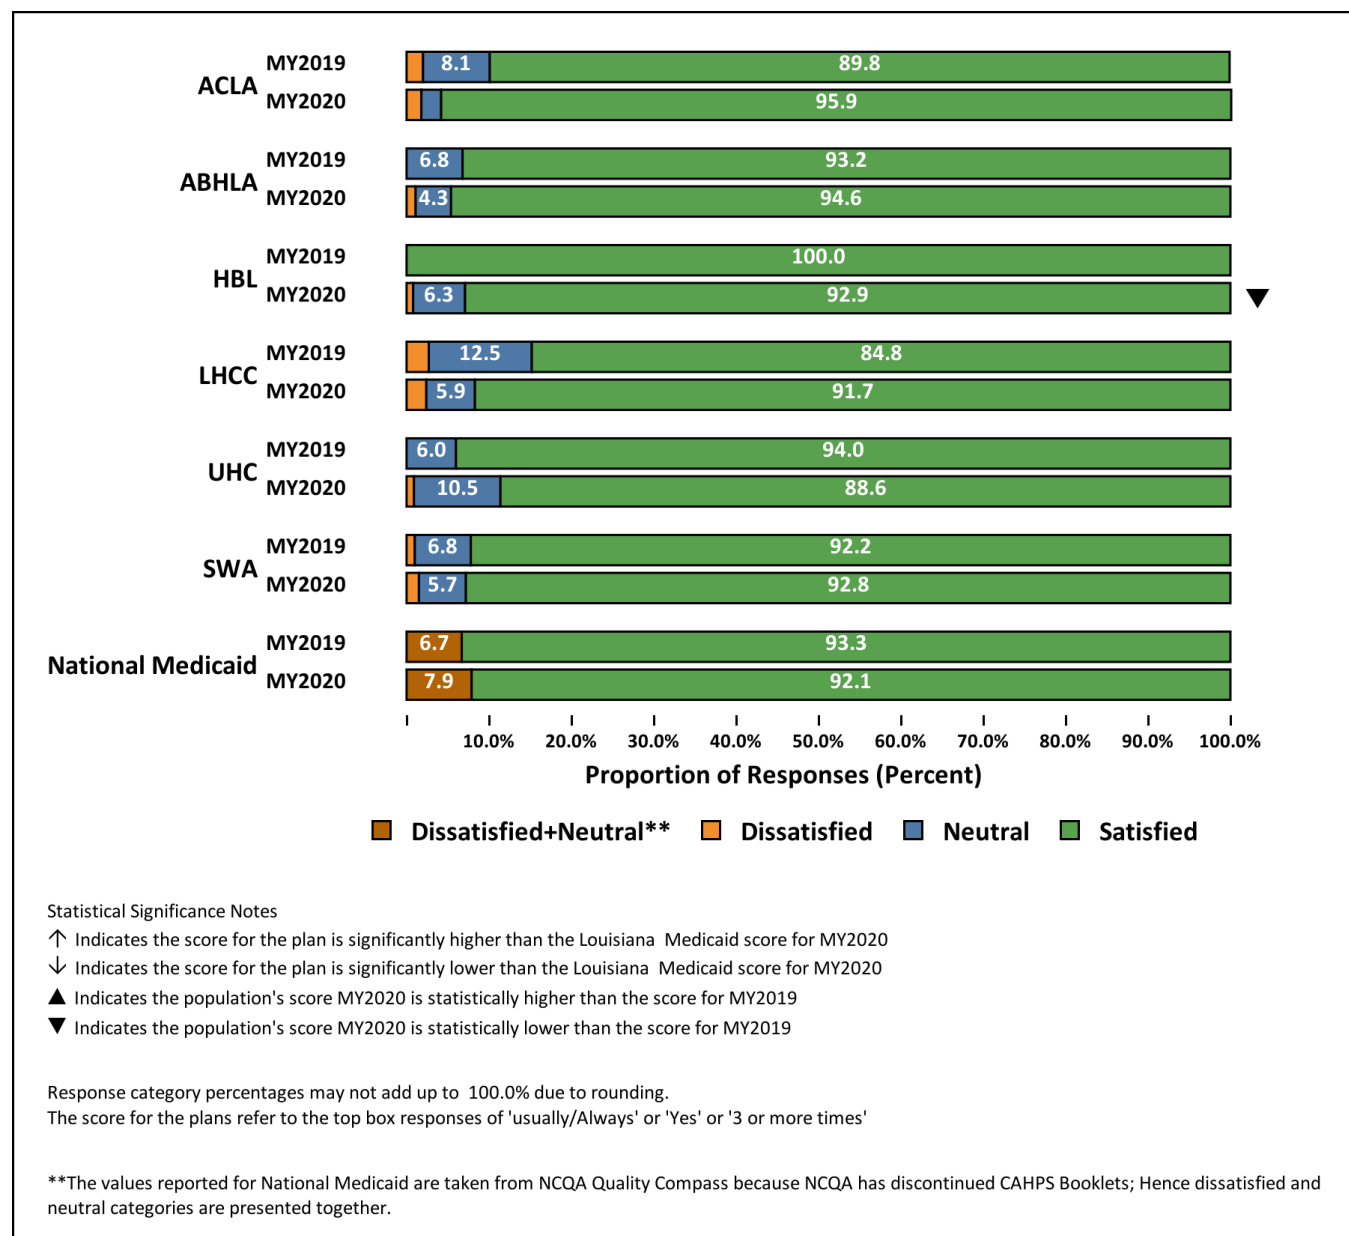

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q12. Personal doctor usually or always explained things in way that was easy to understand

Respondents were asked how often their personal doctor explained things in a way that was easy for them to understand. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there was one statistically significant difference between scores in MY 2020 and scores in MY 2019 for this measure.

- Healthy Blue's score was significantly lower in MY 2020 than in MY 2019.

Q13. Personal doctor usually or always listened carefully to you

Respondents were asked how often their personal doctor listened carefully to them. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

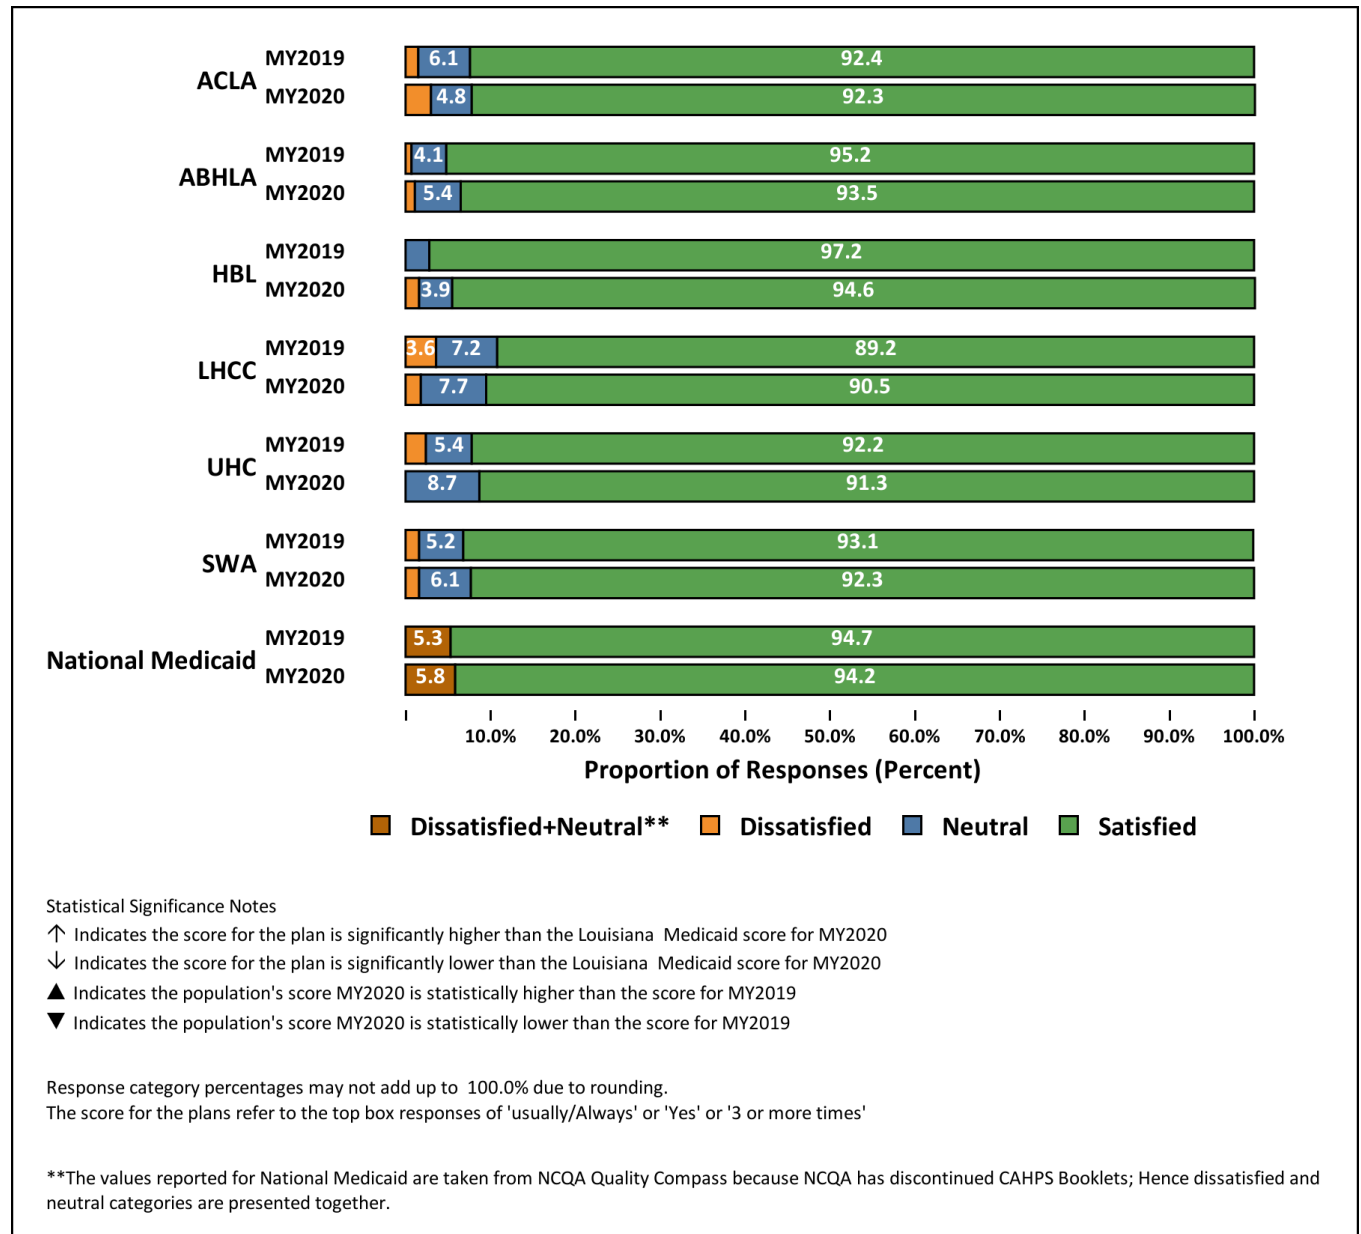

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q14. Personal doctor usually or always showed respect for what you had to say

Respondents were asked how often their personal doctor showed respect for what they had to say. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

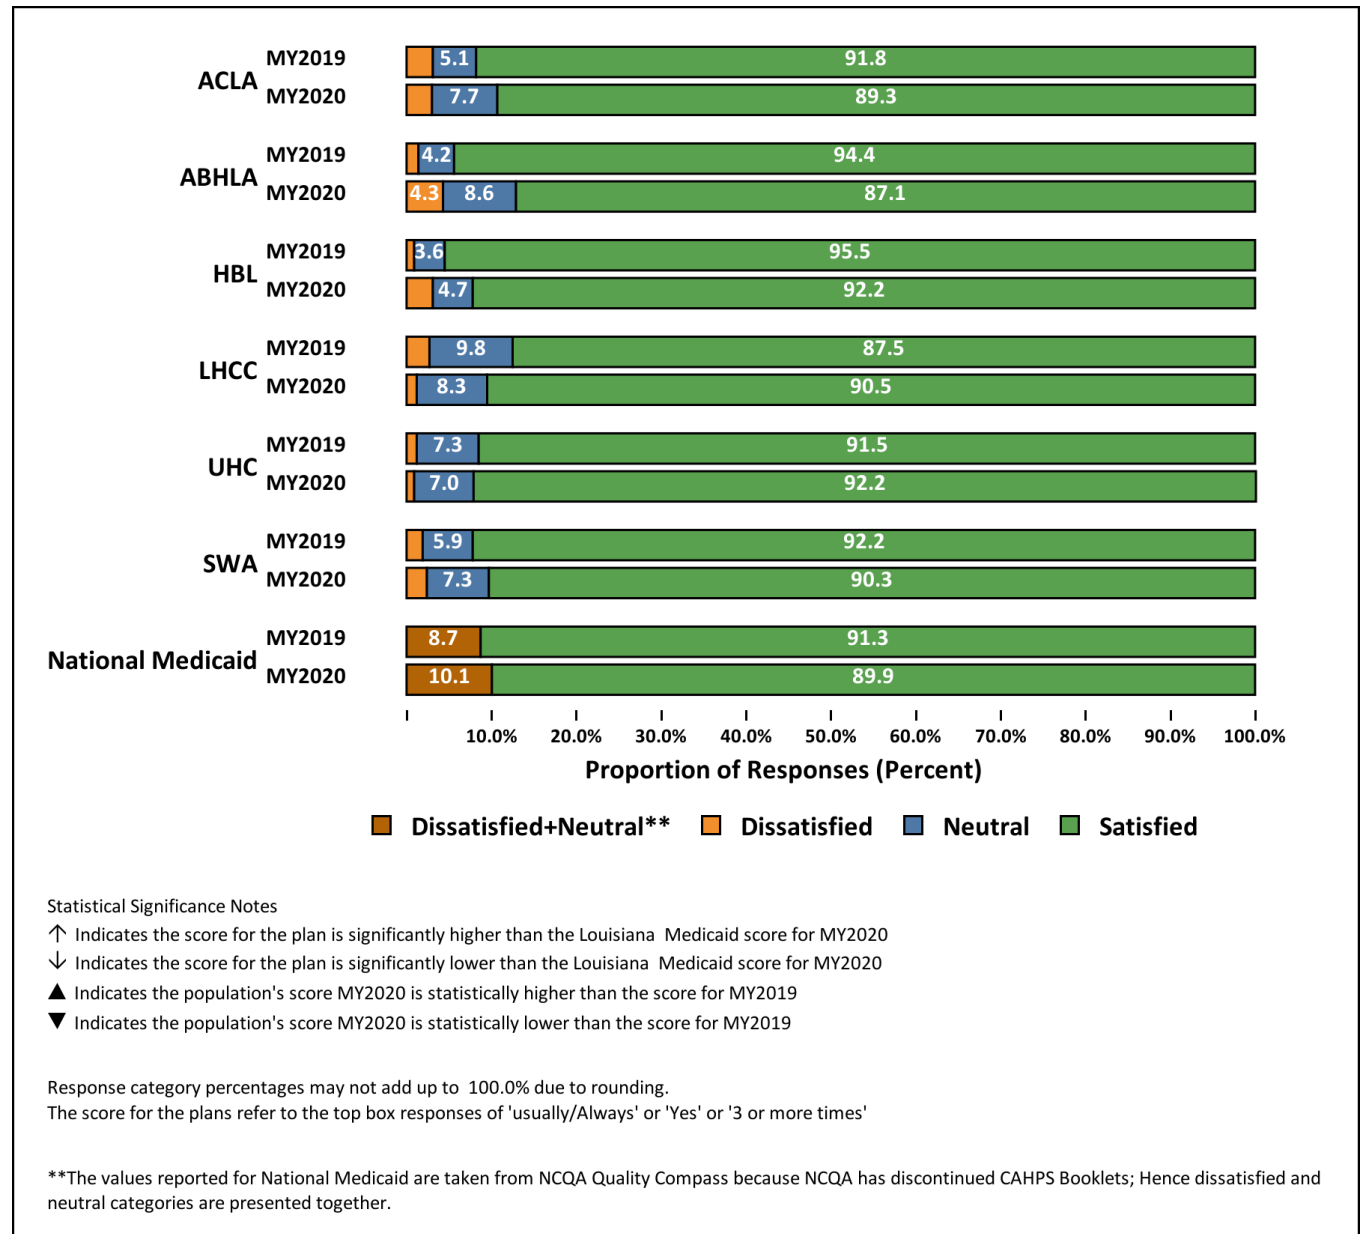

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q15. Personal doctor usually or always spent enough time with you

Respondents were asked how often their personal doctor spent enough time with them. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

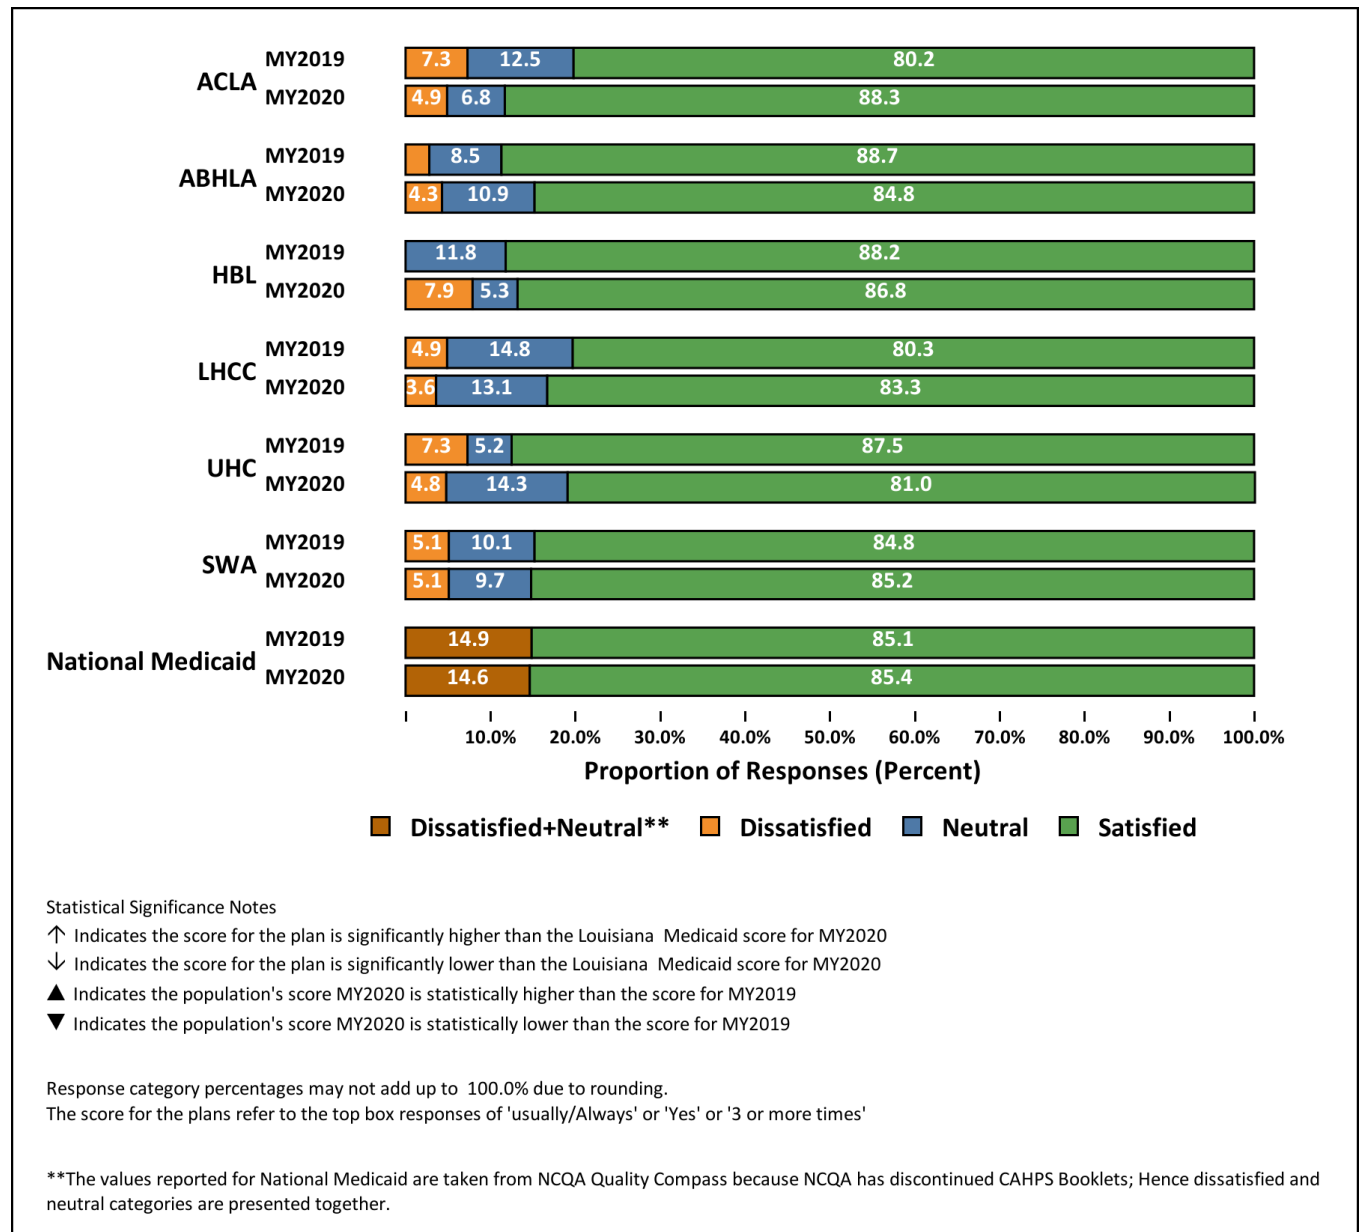

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q17. Personal doctor usually or always seemed informed about care received from other doctors or providers

Respondents were asked how often their personal doctor seemed informed and up-to-date about care they received from other doctors or health providers. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Preventive Care

This section describes enrollees' reported use of two key preventive services: the influenza vaccine and smoking cessation. These results are described by MCO and for the Healthy Louisiana managed care program overall. MCOs can influence these ratings by contracting with providers who offer these services, supporting providers with resources and tools to deliver these services, or by directly offering these key services to enrollees. The survey questions include the following:

- Q31: Have you had either a flu shot or flu spray in the nose since July 1, 2020?
Responses are Yes, No, Don't know
- Q33: In the last 6 months, how often were you advised to quit smoking or using tobacco by a doctor or other health provider in your plan?
Responses are Never, Sometimes, Usually and Always.
- Q34: In the last 6 months, how often was medication recommended or discussed by a doctor or health provider to assist you with quitting smoking or using tobacco? Examples of medication are: nicotine gum, patch, nasal spray, inhaler, or prescription medication.
Responses are Never, Sometimes, Usually and Always.
- Q35: In the last 6 months, how often did your doctor or health provider discuss or provide methods and strategies other than medication to assist you with quitting smoking or using tobacco? Examples of methods and strategies are: telephone helpline, individual or group counseling, or cessation program.
Responses are Never, Sometimes, Usually and Always.

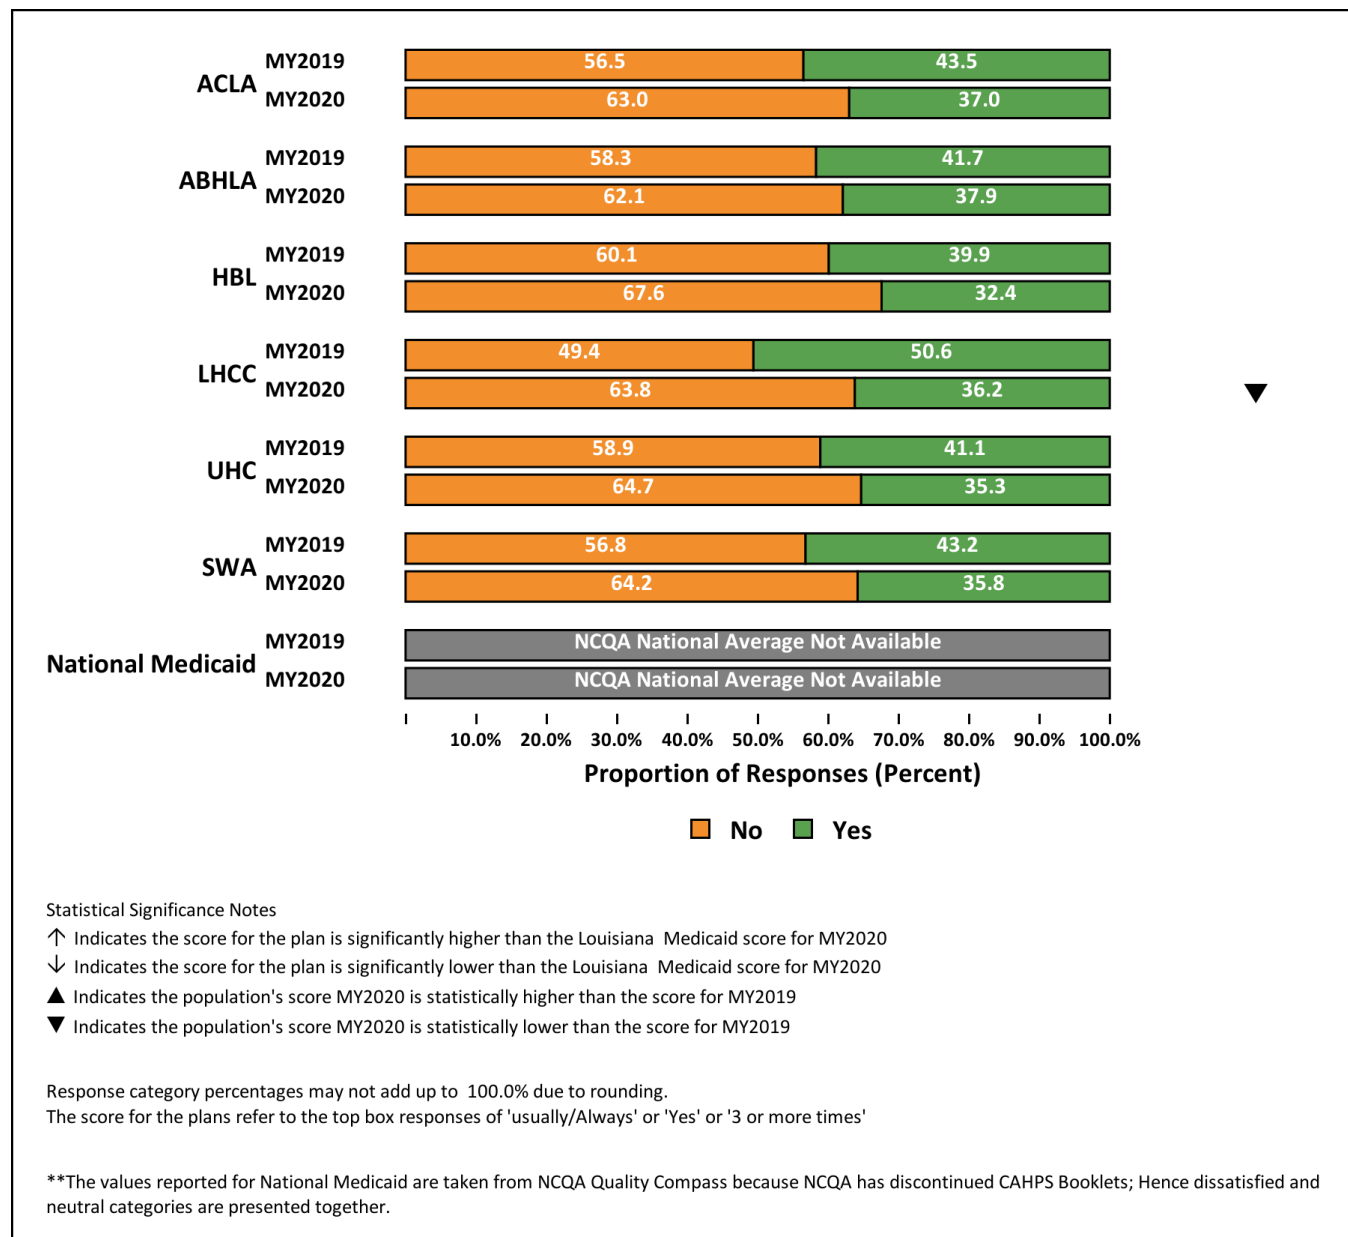

Key Findings

Results presented in the Preventive Care section are summarized below. Scores are out of 100.

- **Received flu shot or spray:** The overall score for the Healthy Louisiana managed care program was 35.8 with similar scores among the plans (32.4–37.9). Scores in MY 2020 were slightly lower than scores in MY 2019 for all MCOs.
- **Advised by doctor to quit smoking/tobacco use:** The overall score for the Healthy Louisiana managed care program was high (72.6) with similar scores among the plans (69.5–75.8). Scores in MY 2020 were similar to scores in MY 2019.
- **Doctor or other provider recommended or discussed smoking/tobacco cessation medication:** The overall score for the Healthy Louisiana managed care program was 50.3 with similar scores among the plans (41.4–55.8). Scores in MY 2020 were similar to scores in MY 2019.
- **Doctor or other provider discussed or provided smoking/tobacco cessation strategies:** The overall score for the Healthy Louisiana managed care program was 45.8 with similar scores among the plans (42.2–51.5). Scores in MY 2020 were similar to scores in MY 2019.

Q31. Received a flu shot or flu spray in the nose since July 1, 2020

Respondents were asked whether they had received either a flu shot or flu spray in the nose since July 1, 2020. The figure below depicts the percentage of respondents in each of the response categories (Yes or No).

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

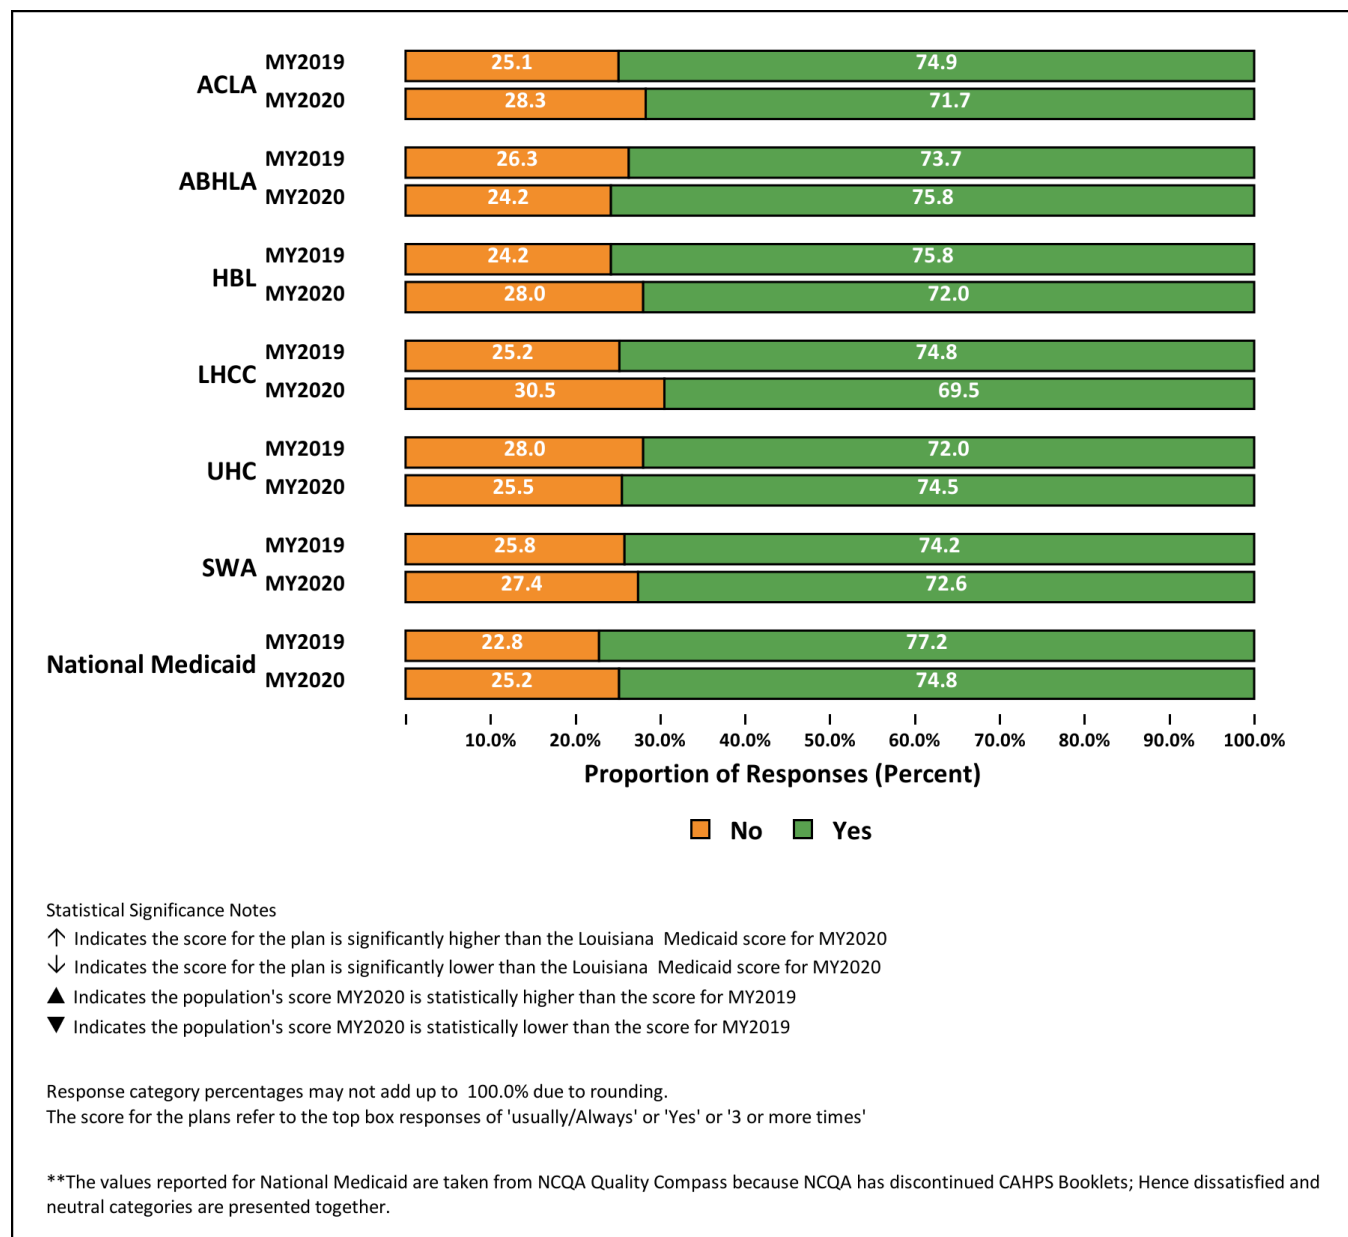

Trending Analysis

Overall, there was one statistically significant difference between scores in MY 2020 and scores in MY 2019 for this measure.

- Louisiana Healthcare Connection's score was significantly lower in MY 2020 than in MY 2019.

Q33. Sometimes, usually or always advised by doctor/provider to quit smoking or using tobacco

Respondents were asked how often a doctor or health provider advised them to quit smoking or using tobacco. For this question, responses were classified into two categories: No (Never) and Yes (Sometimes, Usually, or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

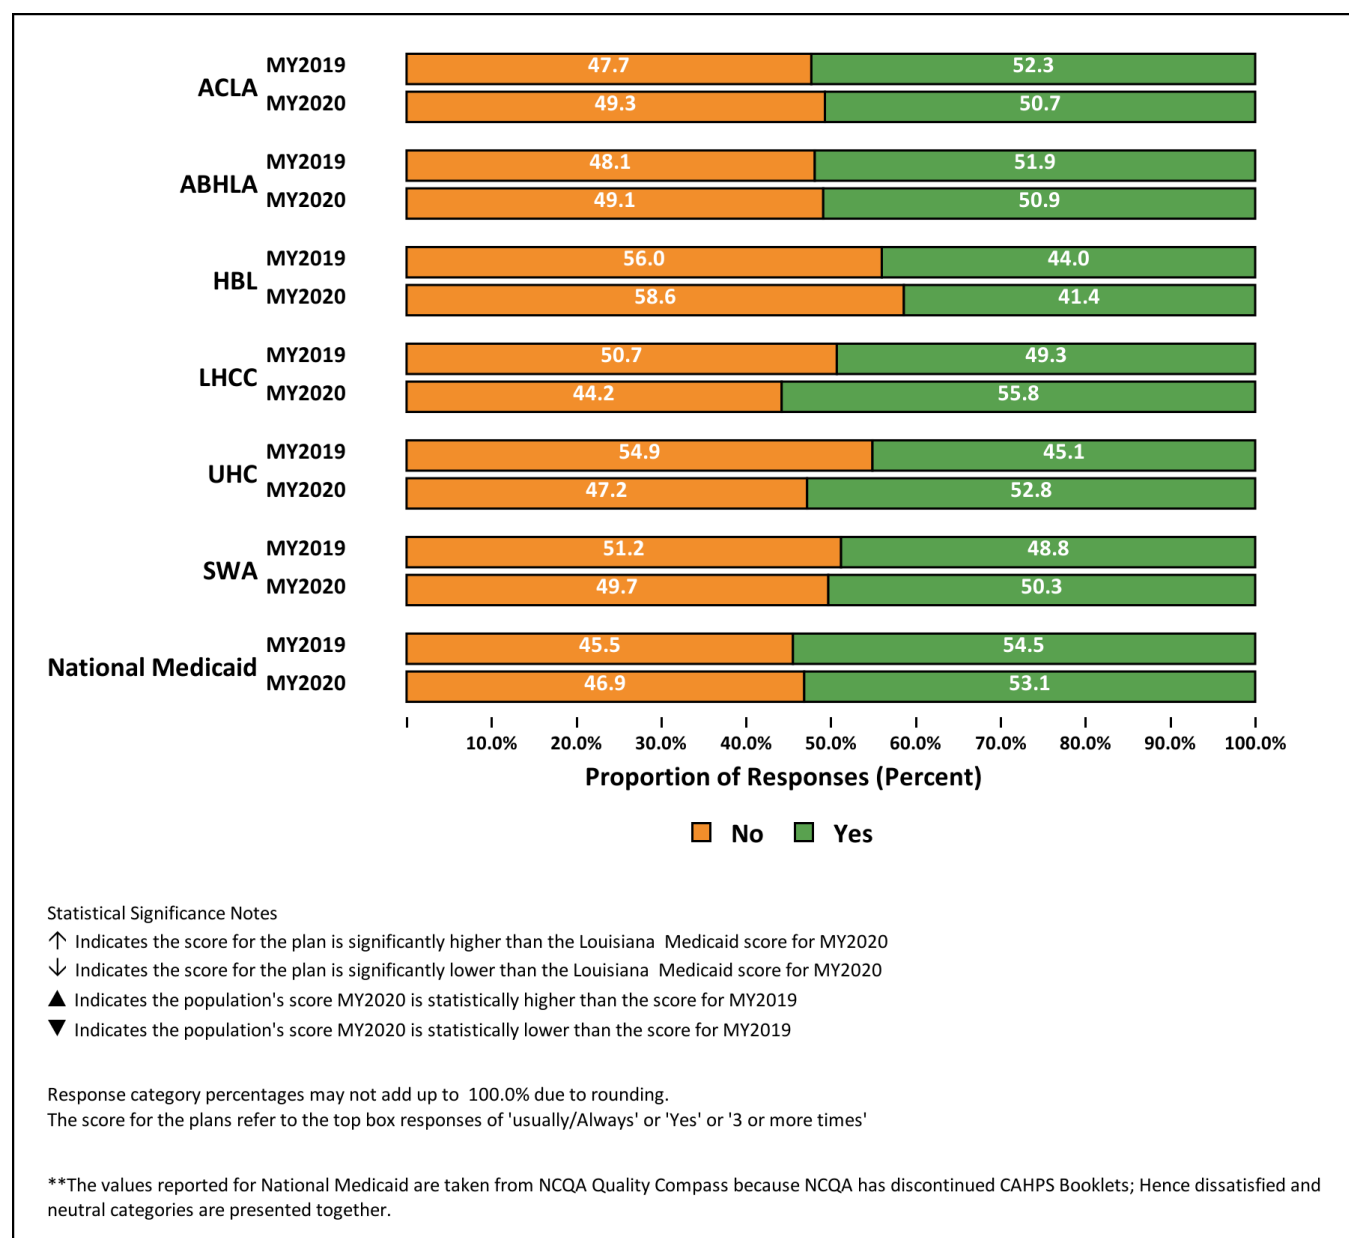

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q34. Doctor/provider sometimes, usually or always recommended or discussed medication to assist with quitting smoking or using tobacco

Respondents were asked how often a doctor or health provider recommended or discussed medications to assist with quitting smoking or using tobacco (e.g., nicotine gum, patch, nasal spray, inhaler, prescription medication). For this question, responses were classified into two categories: No (Never) and Yes (Sometimes, Usually, or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

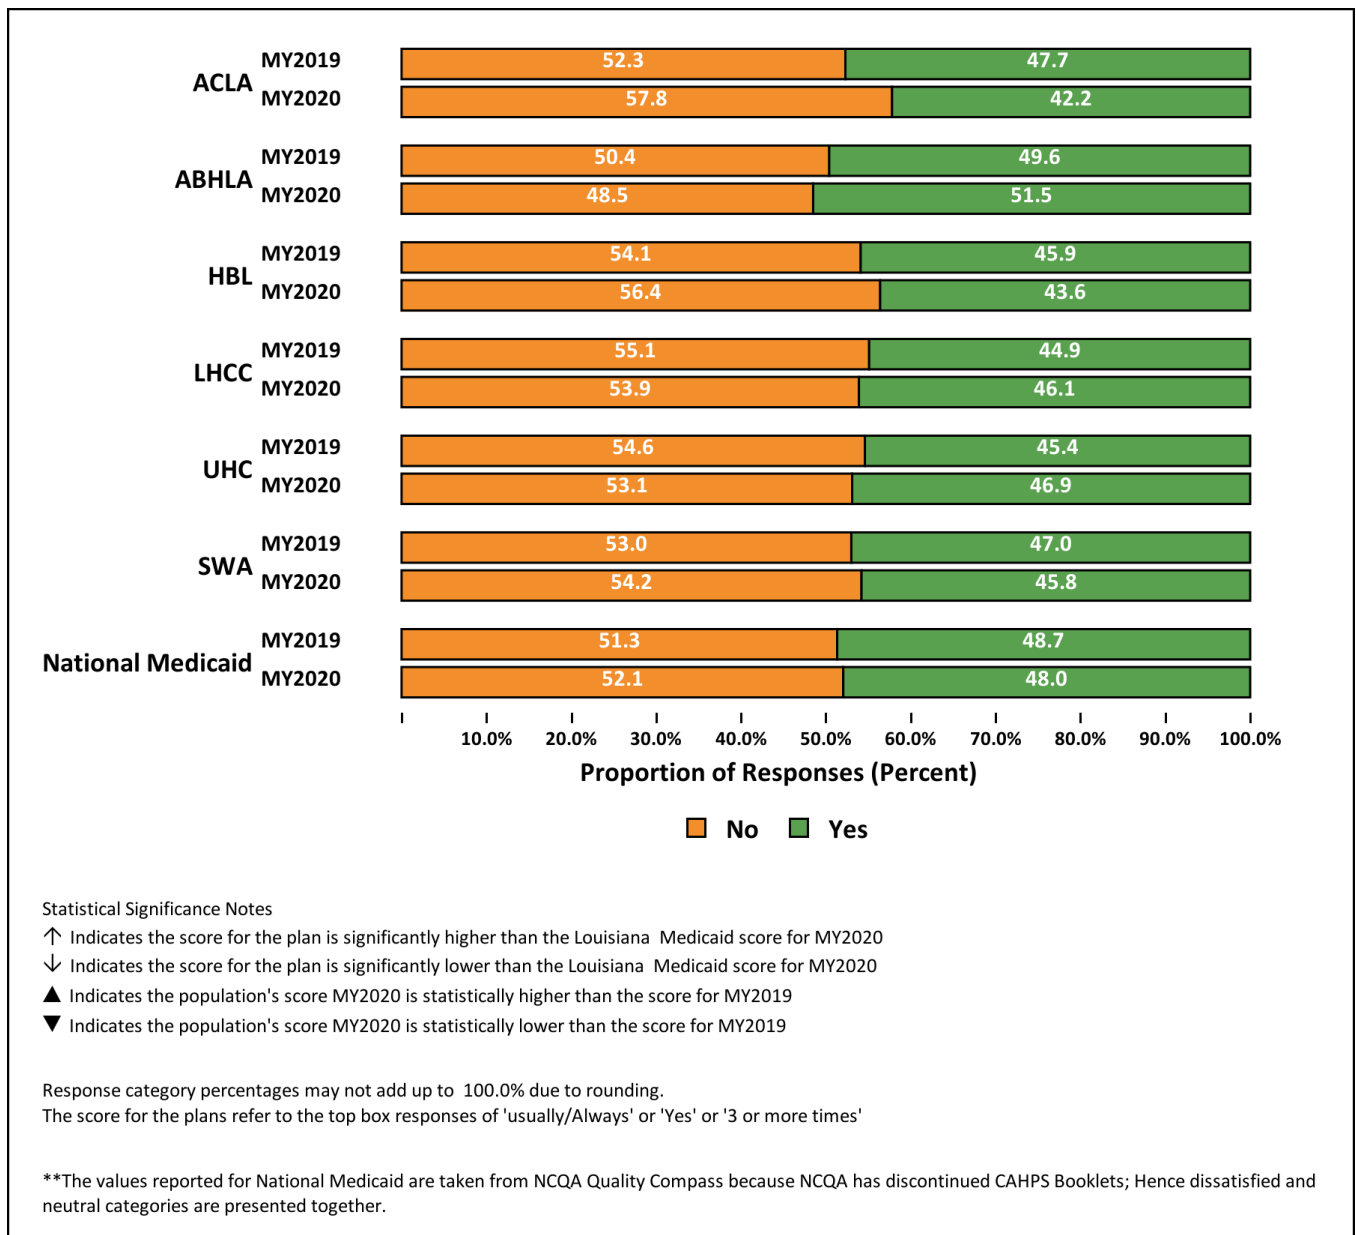

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Q35. Doctor/provider sometimes, usually or always discussed or provided methods and strategies to assist with quitting smoking or using tobacco

Respondents were asked how often a doctor or health provider discussed or provided methods and strategies, other than medication, to assist with quitting smoking or using tobacco (e.g., telephone helpline, individual or group counseling, cessation program). For this question, responses were classified into two categories: No (Never) and Yes (Sometimes, Usually, or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.

Health Status and Demographics

This section describes information on the enrollee respondents' demographics and overall health. The health status question was the following:

- Q29: In general, how would you rate your overall health?
Responses are Excellent, Very Good, Good, Fair, and Poor.

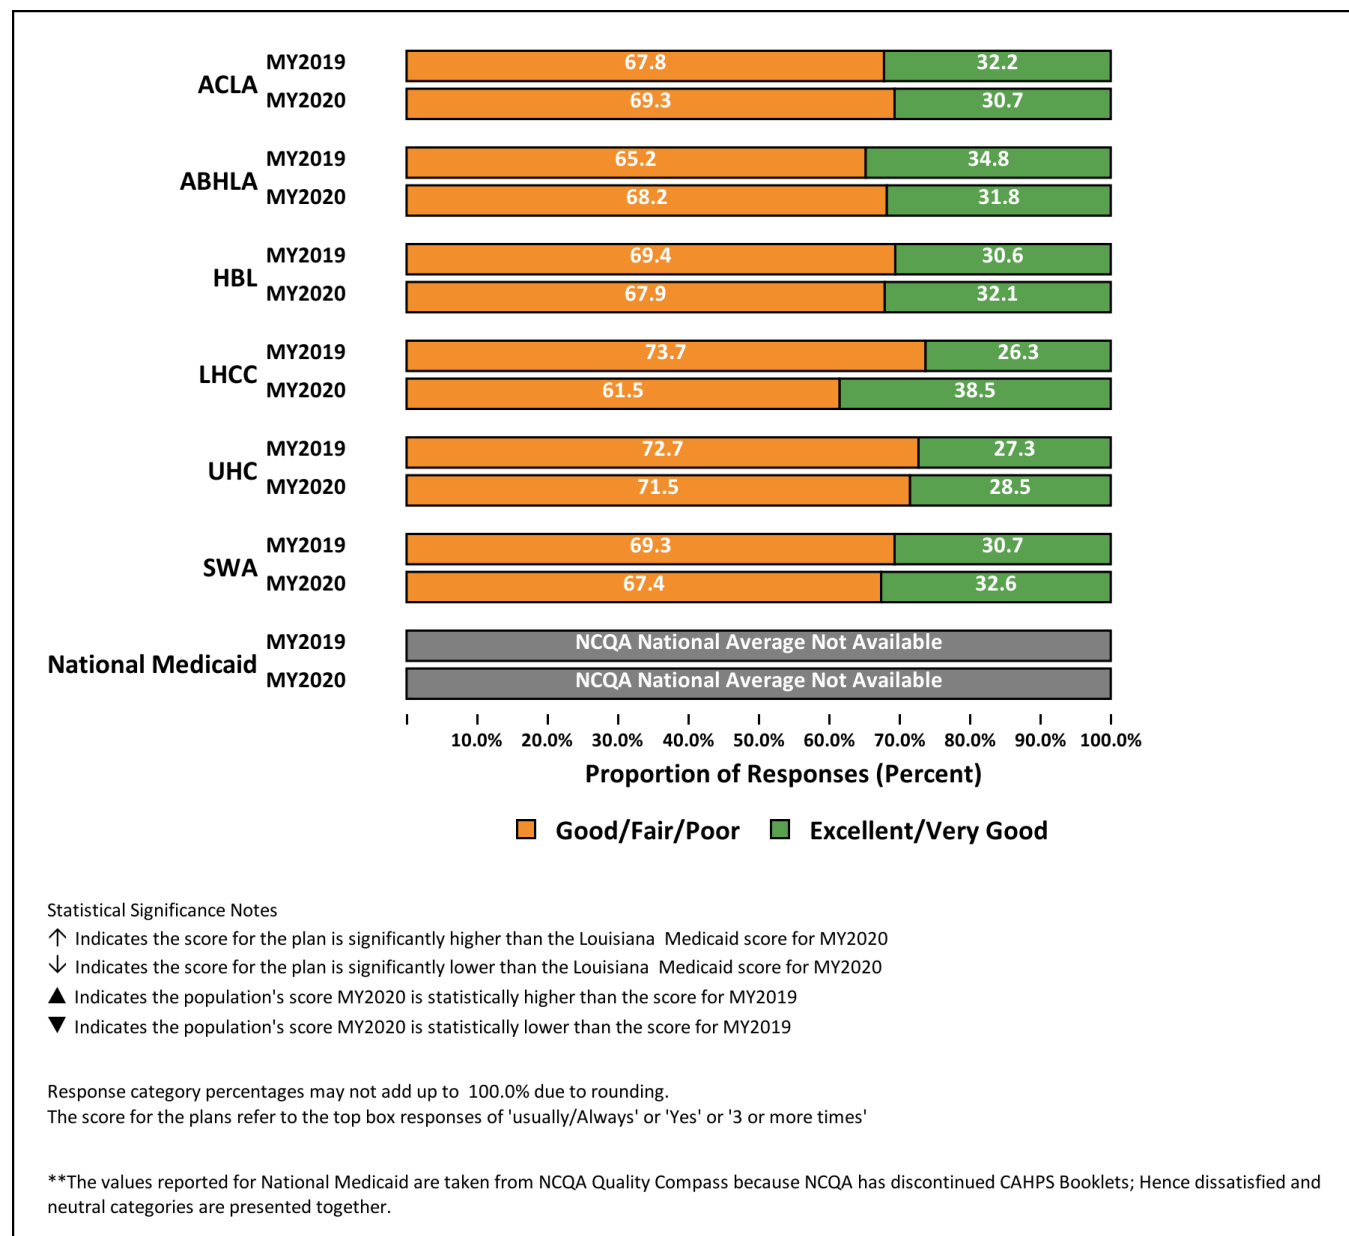

Key Findings

Results presented in the Health Status and Demographics section are summarized below. Scores are out of 100.

- **Rating of overall health:** The overall score for the Healthy Louisiana managed care program was 32.6 with similar scores among the plans (28.5–38.5). Scores in MY 2020 were similar to scores in MY 2019.

Q29. Excellent or very good rating of your overall health

Respondents were asked to rate their overall health. For this question, responses were classified into two categories: Good/Fair/Poor and Excellent/Very Good. The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2020 and scores in MY 2019 for this measure.
