Executive Summary

The Louisiana Department of Health (LDH) requires quality assessment and improvement activities to ensure that Healthy Louisiana Medicaid managed care organization (MCO) enrollees receive high-quality health care services (42 CFR Part 438). These activities include surveys of enrollees' experience with health care. Survey results provide important feedback on MCO performance, which is used to identify opportunities for continuous improvement in the care and services provided to members.

LDH requires the MCOs to contract with a National Committee for Quality Assurance (NCQA)-certified Healthcare Effectiveness Data and Information Set (HEDIS®) survey vendor to conduct annual Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Health Plan Surveys. LDH contracted with IPRO to analyze the MCOs' Measurement Year (MY) 2021 survey data and report the results.

This report presents data collected during the MY 2021 CAHPS® administration to child MCO enrollees. The standardized survey instruments administered in MY 2021 were the CAHPS® 5.1H Child Medicaid Health Plan Survey (with the children with chronic conditions [CCC] measurement set). Parents or guardians of Child members from each MCO completed the surveys from February to May 2022. The following five MCOs participated in the MY 2021 CAHPS® Medicaid Health Plan Surveys: AmeriHealth Caritas Louisiana (ACLA); Aetna Better Health of Louisiana (ABHLA); Healthy Blue (HBL); Louisiana Healthcare Connections (LHCC); and UnitedHealthcare Community Plan Louisiana (UHC). Data are also presented for the Healthy Louisiana managed care program as a whole, termed the statewide average (SWA).

CAHPS® survey questions ask about experiences in a variety of areas. Results presented in this report include four global ratings: rating of health plan, rating of all health care, rating of personal doctor, and rating of specialist, as well as individual survey responses for the following domains: Health Plan Ratings, Access to Care, Experience of Care, and Health Status. Responses are summarized as achievement scores from 0 to 100.

Sampling Procedures and Survey Protocol

LDH required the MCOs to administer the MY 2021 CAHPS® Surveys according to NCQA HEDIS® Specifications for Survey Measures.¹ Enrollees eligible for sampling included those who were MCO members at the time the sample was drawn and who were continuously enrolled in the MCO for at least five of the last six months (July through December) of 2021. Child members eligible for sampling included those who were younger than 18 years of age (as of December 31, 2021). A systematic sample of at least 1,650 child enrollees was selected from each participating MCO. Surveys were administered to the parents/caregivers of the children in the sample. Of the responses received, surveys completed for children less likely to have a chronic condition (according to a claims-based prescreen code) were analyzed for this report.

Response Rates

The administration of the CAHPS® surveys is comprehensive and is designed to achieve the highest possible response rate. For MY 2021, a total of 618 child surveys were completed for the non-CCC population enrolled in Louisiana's Medicaid managed care program for a survey response rate of 9.7 percent.

Key Findings

- **Rating of child's health plan:** The overall score for the Healthy Louisiana managed care program was high (88.8) with similar scores among the plans (86.4–91.2). Scores in MY 2021 were similar to scores in MY 2020.
- **Got care believed necessary:** The overall score for the Healthy Louisiana managed care program was high (91.6) with similar scores among the plans (90.2–95.1). Scores in MY 2021 were similar to scores in MY 2020.

¹ National Committee for Quality Assurance. *HEDIS® MY 2021, Volume 3: Specifications for Survey Measures*. Washington, DC: NCQA, 2021.

- **Rating of all child's health care:** The overall score for the Healthy Louisiana managed care program was high (91.2) with similar scores among the plans (80.5–94.6). Scores in MY 2021 were similar to scores in MY 2020.

Q49. Rating of child's plan

Respondents were asked to rate their child's health plan on a scale of 0 to 10, with 0 being the "worst health plan possible" and 10 being the "best health plan possible." For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q10. Usually or always got care, tests, or treatment you thought your child needed

Respondents were asked how often it was easy to get the care, tests, or treatment they thought their child needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q9. Rating of all child's health care

Respondents were asked to rate all their child's health care on a scale of 0 to 10, with 0 being the "worst health care possible" and 10 being the "best health care possible." For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q49. Using any number from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your child's health plan?

Using This Report

This report is designed to identify and describe key opportunities for improving enrollees' experience of care across the Healthy Louisiana managed care program. For this report, LDH selected key indicators of enrollees' experience of care. LDH selected these key indicators based on two criteria: 1) they represent important aspects of health care; and 2) they are influenced directly by MCO policies and operations. Therefore, these results focus on areas where the MCOs have significant potential to improve enrollees' care and experience of care.

About the CAHPS® Survey

The survey questions were obtained from the MY 2021 CAHPS® 5.1H Medicaid Child Survey (with the children with CCC measurement set). The objective of the survey is to capture complete and accurate information about consumer-reported experiences with health care. The survey aims to measure how well MCOs are meeting enrollees' expectations and perceived needs.

Response Rates

The administration of the CAHPS® surveys is comprehensive and is designed to achieve the highest possible response rate. A high response rate facilitates the generalization of the survey responses to an MCO's population. The response rate is the total number of completed surveys divided by all eligible enrollees of the sample. An enrollee's survey was assigned a disposition code of "completed" if at least three of five specified questions were completed. Eligible enrollees included the entire sample minus ineligible members. Ineligible members of the sample met one or more of the following criteria: were deceased, were invalid (did not meet the eligible population criteria), were mentally or physically incapacitated, or had a language barrier.

For MY 2021, a total of 618 child surveys were completed for the non-CCC population enrolled in Louisiana's Medicaid managed care program for a survey response rate of 9.7 percent.

Survey Analysis

Enrollee parent/caregiver responses to survey questions are summarized as achievement scores by MCO and for the program as a whole, termed the statewide average (SWA). An achievement score is computed as the proportion of responses that indicate a positive experience. In general, somewhat positive responses are included with positive responses as achievements. Achievement scores are computed by aggregating the top two or three positive experience responses, and reported for all pertinent survey items (i.e., those items that have a range of response choices from poor experience to positive). The scoring methodology included in this report is derived from the CAHPS® survey scoring guidelines.

Achievement scores for the component questionnaire items are presented in the form of bar charts to facilitate comparison of MCO scores over time. Responses were classified into three categories: Dissatisfied, Neutral, and Satisfied (with the exception of the overall health question, which was classified into two categories: Good/Fair/Poor and Excellent/Very Good). Additional detail on the classification of responses is provided in the narrative above each bar chart. For reference, the bar charts also include scores for the national Medicaid population, as reported in NCQA Quality Compass.²

Statistically significant differences between scores were determined using a 95% confidence interval overlap test. Confidence intervals for each MY 2021 score and each MY 2020 score were calculated and compared. If the intervals for the MY 2021 and MY 2020 scores did not overlap, then the difference was considered to be statistically significant. A similar test was performed to compare each MCO's scores with the SWA scores. If the difference between a MY 2021 score and a MY 2020 score was statistically significant, then a ▲ or ▼ was placed at the end of the appropriate bar. If the difference between an MCO's score and the SWA score was statistically significant, then a ↑ or ↓ was placed at the end of the appropriate bar.

² National Committee for Quality Assurance. *Quality Compass 2022*. Washington, DC: NCQA, 2022.

Interpretation of Results and Conclusions

Results presented here are in a format that is optimized for use in practical decision-making. Specifically, these results can:

1. Assist in identifying strengths and weaknesses in the quality of care and services for the MCOs.
2. Provide a way to assess where resources can best be allocated to improve performance for the MCOs.

Conclusions based on the information presented in this report should be tempered by its limitations. First, for some survey items, relatively small numbers of responses could be collected, due to skip patterns inherent in the instrument and/or a small survey sample size. Conclusions based on analysis of fewer than 100 observations should be viewed with caution. Additionally, in many of the charts and tables presented in this report, differences between MCOs are readily apparent. However, where these differences are not statistically significant they should be evaluated accordingly.

Health Plan Ratings

This section describes enrollees' parents'/caregivers' ratings of their child's health plan by MCO and for the Healthy Louisiana managed care program overall. Enrollees' parents/caregivers were asked to rate different areas related to their child's health plan. The survey questions included the following:

- Q49: Using any number from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your child's health plan?
Responses are on a scale of 0 to 10 with 0 being the worst and 10 the best.
- Q45: In the last 6 months, how often did customer service at your child's health plan give you the information or help you needed?
Responses are Never, Sometimes, Usually, Always.
- Q46: In the last 6 months, how often did customer service staff at your child's health plan treat you with courtesy and respect?
Responses are Never, Sometimes, Usually, Always.
- Q48: In the last 6 months, how often were the forms from your child's health plan easy to fill out?
Responses are Never, Sometimes, Usually, Always.

Key Findings

Results presented in the Health Plan Ratings section are summarized below. Scores are out of 100.

- **Rating of child's health plan:** The overall score for the Healthy Louisiana managed care program was high (88.8) with similar scores among the plans (86.4–91.2). Scores in MY 2021 were similar to scores in MY 2020.
- **Obtained help needed from customer service:** The overall score for the Healthy Louisiana managed care program was high (85.7) with similar scores among the plans (78.9–96.3). Scores in MY 2021 were similar to scores in MY 2020.
- **Customer service treated with courtesy and respect:** The overall score for the Healthy Louisiana managed care program was high (93.1) with similar scores among the plans (81.8–96.4). Scores in MY 2021 were similar to scores in MY 2020.
- **Health plan forms easy to fill out:** The overall score for the Healthy Louisiana managed care program was high (96.4) with similar scores among the plans (93.4–98.5). Scores in MY 2021 were similar to scores in MY 2020.

Q49. Rating of child's plan

Respondents were asked to rate their child's health plan on a scale of 0 to 10, with 0 being the "worst health plan possible" and 10 being the "best health plan possible." For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q45. Child's health plan customer service usually or always gave needed information or help

Respondents were asked how often customer service at their child's health plan gave them the information or help they needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q46. Usually or always treated with courtesy and respect by child's health plan customer service staff

Respondents were asked how often customer service staff at their child's health plan treated them with courtesy and respect. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

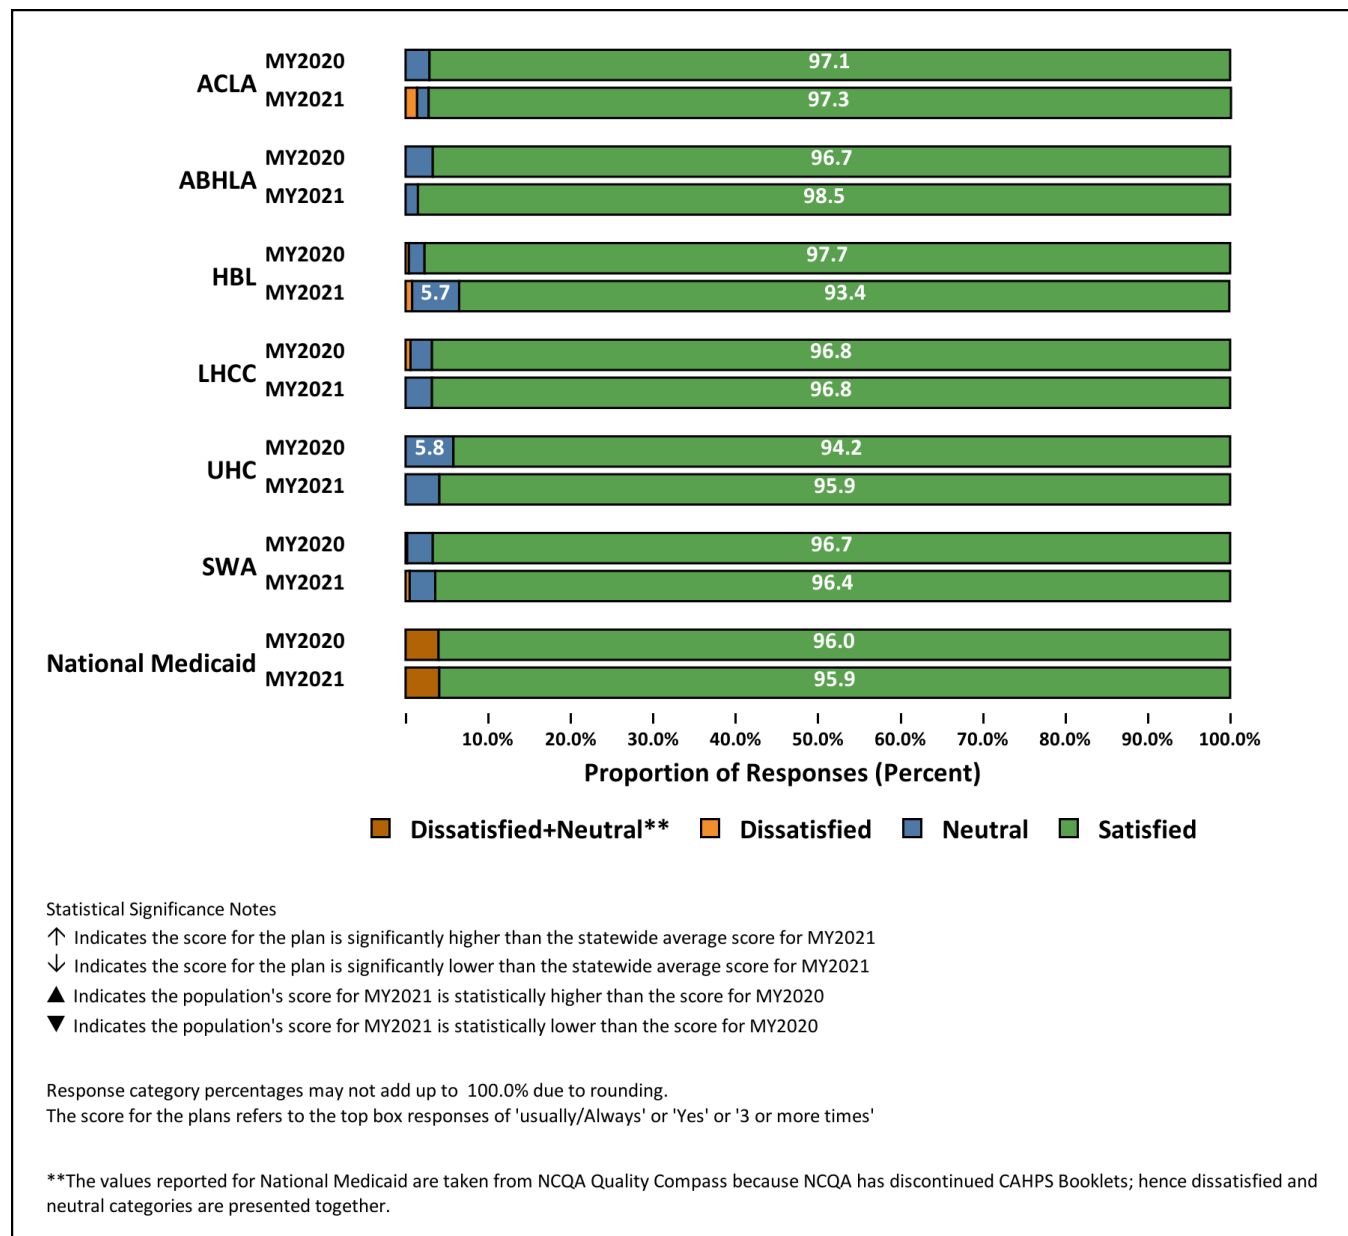

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q48. Forms from your child's health plan usually or always easy to fill out

Respondents were asked how often forms from their child's health plan were easy to fill out. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Access to Care

This section describes enrollees' parents'/caregivers' experiences with access to care for their child by MCO and for the Healthy Louisiana managed care program overall. MCOs can directly influence access to care through their contracted networks and through maintaining accurate and up-to-date provider directories. The survey questions include the following:

- Q10: In the last 6 months, how often was it easy to get the care, tests, or treatment your child needed?
Responses are Never, Sometimes, Usually, Always.
- Q4: In the last 6 months, when your child needed care right away, how often did your child get care as soon as he or she needed?
Responses are Never, Sometimes, Usually, Always.
- Q6: In the last 6 months, how often did you get an appointment for a check-up or routine care for your child as soon as your child needed?
Responses are Never, Sometimes, Usually, Always.
- Q41: In the last 6 months, how often did you get an appointment for your child with a specialist as soon as he or she needed?
Responses are Never, Sometimes, Usually, Always.
- Q51: In the last 6 months, how often was it easy to get prescription medicines for your child through his or her health plan?
Responses are Never, Sometimes, Usually, Always.
- Q15: In the last 6 months, how often was it easy to get special medical equipment or devices for your child?
Responses are Never, Sometimes, Usually, Always.
- Q18: In the last 6 months, how often was it easy to get this therapy for your child?
Responses are Never, Sometimes, Usually, Always.
- Q21: In the last 6 months, how often was it easy to get this treatment or counseling for your child?
Responses are Never, Sometimes, Usually, Always.

Key Findings

Results presented in the Access to Care section are summarized below. Scores are out of 100.

- **Got care believed necessary:** The overall score for the Healthy Louisiana managed care program was high (91.6) with similar scores among the plans (90.2–95.1). Scores in MY 2021 were similar to scores in MY 2020.
- **Received care as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (90.8) with similar scores among the plans (83.3–95.7). Scores in MY 2021 were similar to scores in MY 2020.
- **Received appointment for check-up or routine care as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (82.5) with similar scores among the plans (80.6–86.4). Scores in MY 2021 were similar to scores in MY 2020.
- **Received appointment with a specialist as soon as needed:** The overall score for the Healthy Louisiana managed care program was high (82.1) with similar scores among the plans (66.7–93.8). Scores in MY 2021 varied from scores in MY 2020, but no statistically significant differences were observed.
- **Access to prescription medicines:** The overall score for the Healthy Louisiana managed care program was high (92.1) with similar scores among the plans (85.7–96.8). Scores in MY 2021 were similar to scores in MY 2020.
- **Access to special medical equipment or devices:** The overall score for the Healthy Louisiana managed care program was high (78.6) with scores among the plans ranging from 25.0 to 100.0. Scores in MY 2021 varied from scores in MY 2020, but no statistically significant differences were observed.

- **Access to special therapy:** The overall score for the Healthy Louisiana managed care program was high (71.0) with scores among the plans ranging from 55.6 to 83.3. Scores in MY 2021 were similar to scores in MY 2020.
- **Access to treatment or counseling:** The overall score for the Healthy Louisiana managed care program was 59.5 with scores among the plans ranging from 42.9 to 71.4. Scores in MY 2021 varied from scores in MY 2020, but no statistically significant differences were observed.

*Note the small sample size of respondents for questions pertaining to access to special medical equipment or devices, special therapy, and treatment or counseling.

Q10. Usually or always got care, tests, or treatment you thought your child needed

Respondents were asked how often it was easy to get the care, tests, or treatment they thought their child needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q4. Usually or always got urgent care as soon as your child needed

Respondents were asked how often their child received care as soon as needed when their child needed care right away. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q6. Usually or always got an appointment for check-up or routine care as soon as your child needed

Respondents were asked how often they got an appointment for check-up or routine care for their child as soon as their child needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q41. Usually or always got an appointment for child with a specialist as soon as your child needed

Respondents were asked how often they got an appointment for their child with a specialist as soon as their child needed. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

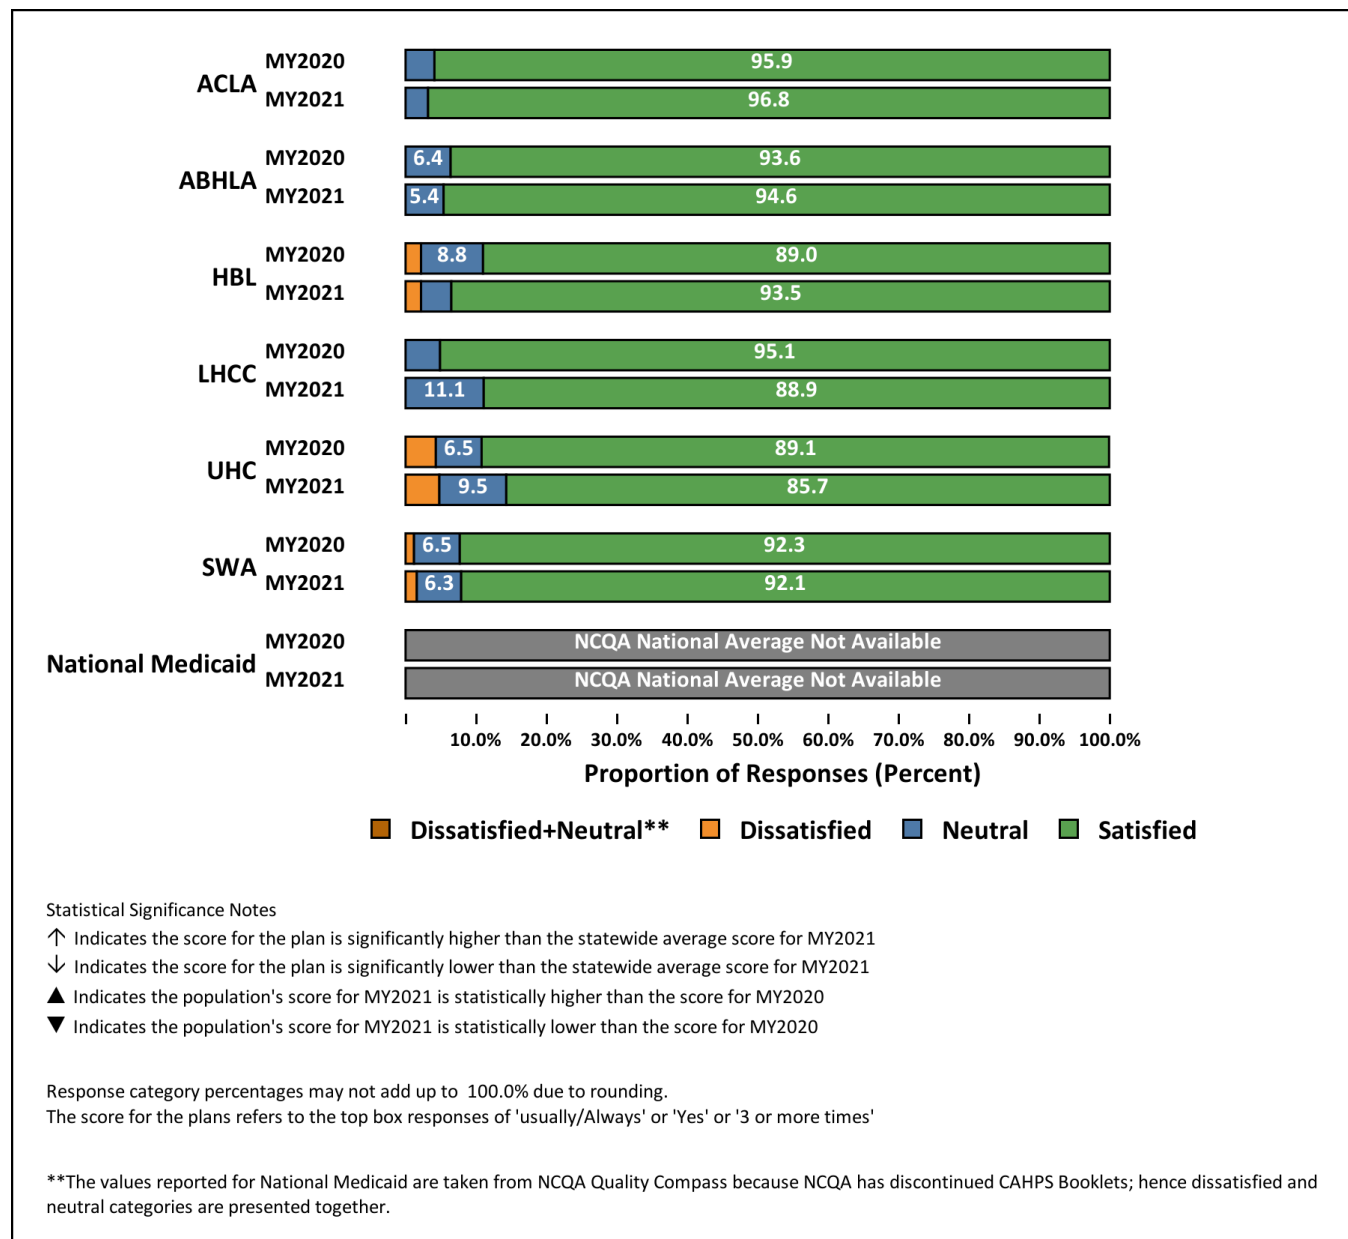

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q51. Usually or always easy to get prescription medicine for child through child's health plan

Respondents were asked how often it was easy to get prescription medicines for their child through their child's health plan. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q15. Usually or always easy to get special medical equipment or devices for your child

Respondents were asked how often it was easy to get special medical equipment or devices for their child. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q18. Usually or always easy to get therapy for your child

Respondents were asked how often it was easy to get special therapy such as physical, occupational, or speech therapy for their child. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q21. Usually or always easy to get treatment or counseling for your child

Respondents were asked how often it was easy to get treatment or counseling for their child for an emotional, developmental, or behavioral problem. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Experience of Care

This section describes enrollees' parents'/caregivers' experiences with their child's doctor by MCO and for the Healthy Louisiana managed care program overall. MCOs can influence this rating by contracting with high quality providers and by giving providers the support and resources they need to take care of enrollees. The survey questions include the following:

- Q36: Using any number from 0 to 10, where 0 is the worst personal doctor possible and 10 is the best personal doctor possible, what number would you use to rate your child's personal doctor?
Responses are on a scale of 0 to 10 with 0 being the worst and 10 the best.
- Q27: In the last 6 months, how often did your child's personal doctor explain things about your child's health in a way that was easy to understand?
Responses are Never, Sometimes, Usually, Always.
- Q28: In the last 6 months, how often did your child's personal doctor listen carefully to you?
Responses are Never, Sometimes, Usually, Always.
- Q29: In the last 6 months, how often did your child's personal doctor show respect for what you had to say?
Responses are Never, Sometimes, Usually, Always.
- Q32: In the last 6 months, how often did your child's personal doctor spend enough time with your child?
Responses are Never, Sometimes, Usually, Always.
- Q35: In the last 6 months, how often did your child's personal doctor seem informed and up-to-date about the care your child got from these doctors or other health providers?
Responses are Never, Sometimes, Usually, Always.

Key Findings

Results presented in the Experience of Care section are summarized below. Scores are out of 100.

- **Rating of child's personal doctor:** The overall score for the Healthy Louisiana managed care program was high (90.9) with similar scores among the plans (86.7–93.4). Scores in MY 2021 were similar to scores in MY 2020. One MCO had a statistically significantly lower score in MY 2021 than in MY 2020 (from 98.4 to 86.7, a decrease of 11.7).
- **Child's personal doctor explained things in a way that was easy to understand:** The overall score for the Healthy Louisiana managed care program was high (95.7) with similar scores among the plans (94.0–97.8). Scores in MY 2021 were similar to scores in MY 2020.
- **Child's personal doctor listened carefully:** The overall score for the Healthy Louisiana managed care program was high (96.8) with similar scores among the plans (95.5–100.0). Scores in MY 2021 were similar to scores in MY 2020.
- **Child's personal doctor showed respect for what you had to say:** The overall score for the Healthy Louisiana managed care program was high (97.1) with similar scores among the plans (95.6–100.0). Scores in MY 2021 were similar to scores in MY 2020.
- **Child's personal doctor spent enough time with child:** The overall score for the Healthy Louisiana managed care program was high (93.1) with similar scores among the plans (92.2–95.6). Scores in MY 2021 were similar to scores in MY 2020.
- **Child's personal doctor seemed informed about care received from other doctors or providers:** The overall score for the Healthy Louisiana managed care program was high (76.6) with scores among the plans ranging from 58.8 to 88.5. Scores in MY 2021 varied from scores in MY 2020, but no statistically significant differences were observed.

Q36. Rating of child's personal doctor

Respondents were asked to rate their child's personal doctor on a scale of 0 to 10, with 0 being the "worst personal doctor possible" and 10 being the "best personal doctor possible." For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

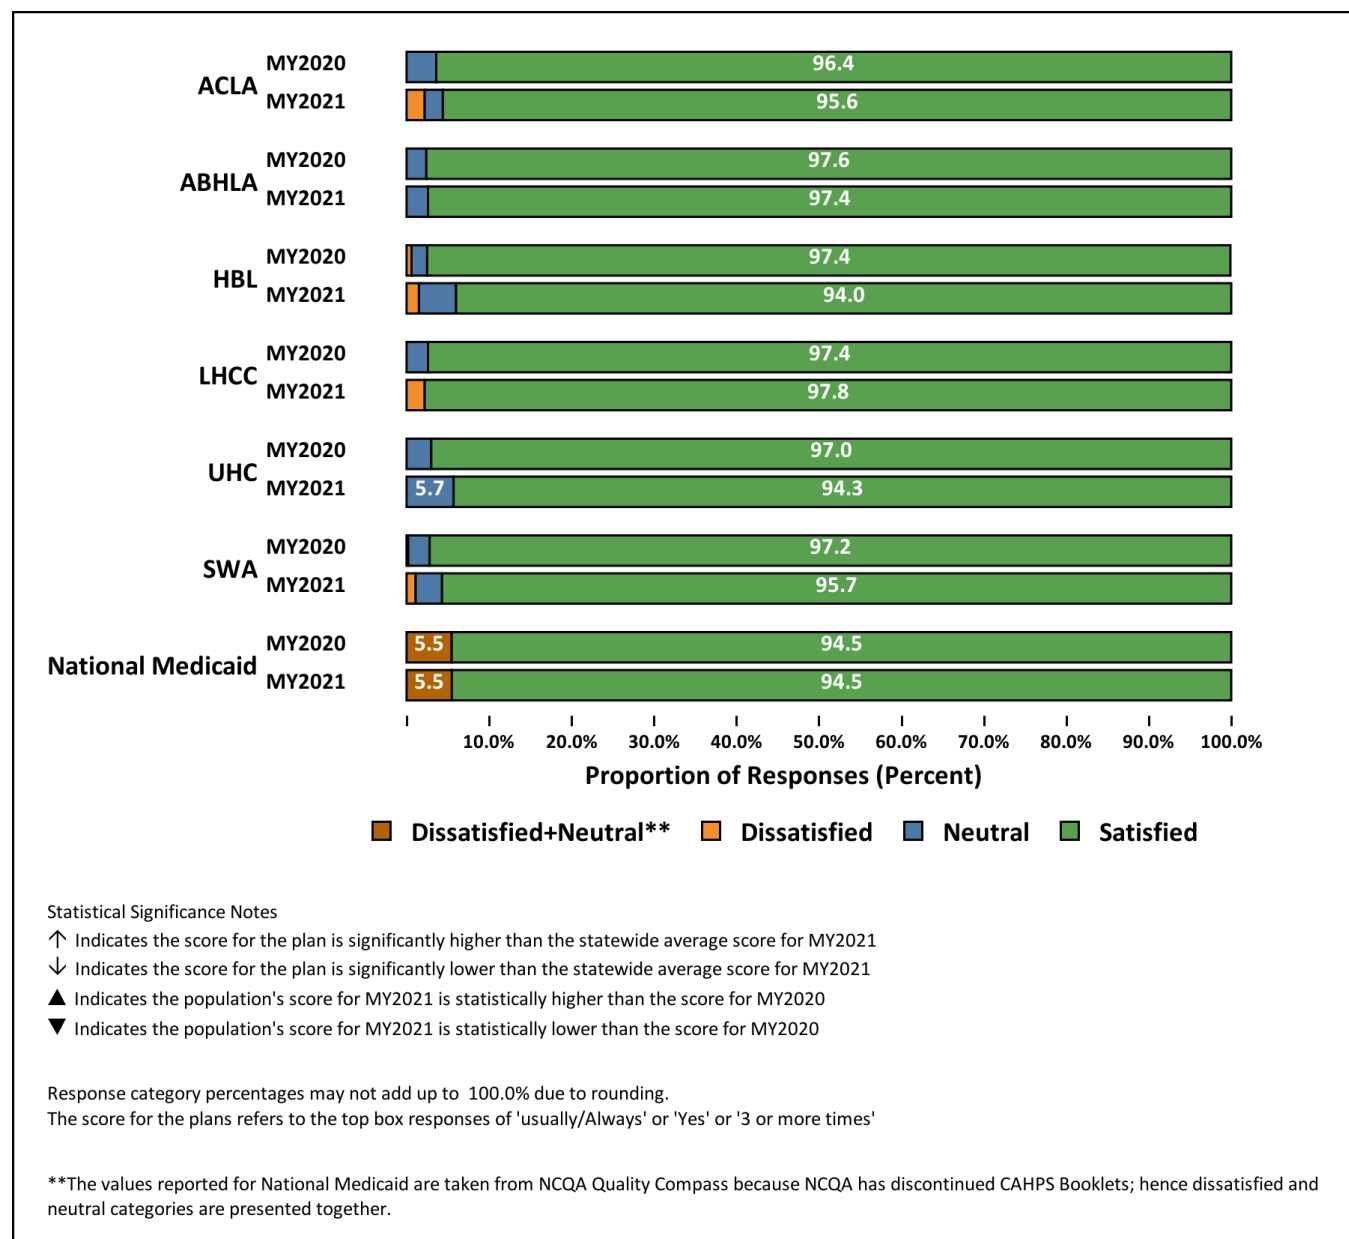

Trending Analysis

Overall, there was one statistically significant difference between scores in MY 2021 and scores in MY 2020 for this measure.

- AmeriHealth Caritas Louisiana's score was significantly lower in MY 2021 than in MY 2020.

Q27. Child's personal doctor usually or always explained things in way that was easy to understand

Respondents were asked how often their child's personal doctor explained things in a way that was easy to understand. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q28. Child's personal doctor usually or always listened carefully to you

Respondents were asked how often their child's personal doctor listened carefully to them. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q29. Child's personal doctor usually or always showed respect for what you had to say

Respondents were asked how often their child's personal doctor showed respect for what they had to say. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q32. Child's personal doctor usually or always spent enough time with your child

Respondents were asked how often their child's personal doctor spent enough time with their child. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q35. Child's personal doctor usually or always seemed informed about care received from other doctors or providers

Respondents were asked how often their child's personal doctor seemed informed and up-to-date about care their child received from other doctors or health providers. For this question, responses were classified into three categories: Dissatisfied (Never), Neutral (Sometimes), and Satisfied (Usually or Always). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Q43. Rating of child's specialist

Respondents were asked to rate their child's specialist on a scale of 0 to 10, with 0 being the "worst specialist possible" and 10 being the "best specialist possible." For this question, responses were classified into three categories: Dissatisfied (0–4), Neutral (5–7), and Satisfied (8–10). The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.

Health Status and Demographics

This section describes information on the enrollees' demographics and overall health as answered by the parent/caregiver. The health status question was the following:

- Q53: In general, how would you rate your child's overall health?
Responses are Excellent, Very Good, Good, Fair, and Poor.

Key Findings

Results presented in the Health Status and Demographics section are summarized below. Scores are out of 100.

- **Rating of child's overall health:** The overall score for the Healthy Louisiana managed care program was 80.9 with similar scores among the plans (71.6–87.9). Scores in MY 2021 were similar to scores in MY 2020.

Q53. Excellent or very good rating of your child's overall health

Respondents were asked to rate their child's overall health. For this question, responses were classified into two categories: Good/Fair/Poor and Excellent/Very Good. The figure below depicts the percentage of respondents in each of the response categories.

Comparative Analysis

Overall, there were no statistically significant differences observed for this measure.

Trending Analysis

Overall, there were no statistically significant differences between scores in MY 2021 and scores in MY 2020 for this measure.
