**This rating includes all measures in the report card as well as an Accreditation bonus for those MCOs that are NCQA Accredited.*

Insufficient Data indicates that the plan was missing the majority of data for the composite.

This report card is reflective of data collected between January 2024 and December 2024.

The categories and measures included in this report card are based on the 2025 National Committee for Quality Assurance (NCQA) Health Plan Ratings and LDH required measures lists. When feasible, categories and measures were kept consistent with the prior year's health plan report card, but some measures and categories were removed due to data availability. The Risk-Adjusted Utilization category was removed because changes in the way the data were calculated and reported prevented comparisons to national data. Any analysis, interpretation, and conclusions based on the data is solely that of the author. Anyone desiring to use or reproduce the materials must obtain approval from LDH.
