Subject: Louisiana Coordinated Care Networks – Prepaid (CCN-P) Program Rate  
Development and Actuarial Certification for Contract Periods ending December 31, 2012

Dear Ruth:

The Louisiana Department of Health and Hospitals (DHH) contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for Prepaid Coordinated Care Networks (CCN-P) covering contract periods from program startup, which varies by geographical area, through December 31, 2012. The CCN-P program will be implemented in 3 phases and the rates for each phase will be effective through December 31, 2012. The regions implemented in each phase are as follows:

Phase 1 (January 1, 2012 through December 31, 2012)

- New Orleans
- North Shore (formerly known as Mandeville)

Phase 2 (March 1, 2012 through December 31, 2012)

- Baton Rouge
- Thibodaux
- Lafayette

Phase 3 (May 1, 2012 through December 31, 2012)

- Lake Charles
- Alexandria
- Shreveport
- Monroe

# MERCER

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

This letter presents an overview of the methodology used in Mercer's managed care rate development for the purpose of satisfying the requirements of the Centers for Medicare and Medicaid Services (CMS). This rate development process was based on Medicaid fee-for-service (FFS) medical claims and resulted in development of a range of actuarially sound rates for each rate cell. We then worked with DHH to develop a single proposed set of actuarially sound rates for each region and rate cell combination which are attached to and certified within this letter.

## Rate Methodology

### Overview

Capitation rate ranges for the CCN-P program were developed in accordance with rate-setting guidelines established by CMS. One of the key considerations in the rate range development was the base data. Mercer worked with DHH to obtain Medicaid FFS data from State Fiscal Year (SFY) 2009 and SFY 2010. Louisiana's SFY runs from July 1st through June 30th of the following year. Restrictions were applied to the enrollment and FFS claims data so that it matched the populations and benefit package defined in the Contract.

To develop capitation rates, adjustments were applied to the base data consistent with the CMS Capitated Rate-Setting Checklist:

- removal of enrollment and claims during periods of retroactive eligibility (AA.3.4);
- completion factors to account for unpaid claims at the time of the data submission (AA.3.14);
- adjustment to reflect amounts paid outside of the Louisiana Medicaid Management Information System (MMIS), including but not limited to inpatient outlier stays, inpatient and outpatient cost reconciliations, fraud and abuse recoupments (AA.3.0);
- trend factors to forecast the expenditures and utilization to the appropriate contract period (AA.3.10);
- prospective and historic program changes not reflected in the base data (AA.3.1);
- data smoothing (AA.5.0); and
- administration loading, including projected underwriting gain (AA.3.2).

The resulting rate ranges for each individual rate cell were gross of graduate medical education (GME) payments to teaching hospitals provided in the Louisiana Medicaid State Plan. Mercer then worked with DHH to develop a single, actuarially sound, rate, gross of GME for each rate

# MERCER

Page 3

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

cell. Finally, Mercer developed a GME adjustment for each rate cell designed to reduce the gross rates to net rates consistent with DHH's decision to continue paying exactly the same GME amounts as in the State Plan directly to the teaching hospitals. The resulting net rates are certified actuarially sound later in this letter.

## Base Data Development

Mercer was provided with Medicaid FFS enrollment and claims data from SFY09 and SFY10 with runout through August 2010 to develop the capitation rates. Mercer was also provided with supplemental data files containing information on outlier claims paid outside of the MMIS system, fraud and abuse recoupments, GME payments, and Inpatient and Outpatient hospital cost settlements. These payments/recoupments outside of the MMIS system have been added to or subtracted from the base claims data as appropriate so that the relevant cost for the population eligible for enrollment in the CCN-P program is replicated.

Mercer reviewed the data for consistency and reasonableness and determined that the data appears appropriate for the purpose of setting capitation rates for the CCN-P program.

### ***Enrollment Data***

The enrollment file supplied by DHH's fiscal agent provided all enrollment records for each member for each month. Therefore, if a member's eligibility status was retroactively changed, both the old and the new records were present. Most often this occurred because a recipient was retroactively categorized as SSI from Family and Children. In this case, the enrollment file would have included both the SSI enrollment record and the Family and Children record for the same month. Mercer worked with DHH to develop a hierarchy to determine which was the appropriate unique enrollment record to use – typically the SSI record. This treatment is consistent with DHH's proposed policy to recoup the prior capitation payments and re-pay the corrected rates for up to twelve months when status changes retroactively.

### ***Claims Data***

Mercer used fiscal year July 1, 2008 through June 30, 2009 (SFY09) and July 1, 2009 through June 30, 2010 (SFY10) fee-for-service (FFS) data as the data source. The FFS data reflects the actual medical expenses to DHH of providing healthcare coverage for the CCN-P eligible population. The expenses are net Third Party Liability and subrogation. Mercer reviewed the FFS data to ensure it appeared reasonable and appropriate but did not audit the data. Specifically, Mercer reviewed the following issues:

- completeness and consistency of incurred claims over time;

# MERCER

Page 4

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- consistency between FFS claims data and DHH published reports;
- all payments outside of the MMIS claims system appeared to be properly accounted for; and
- the data appeared to have been properly restricted to those services and populations to be covered under the CCN-P program.

Adjustments were made to the FFS data to reflect the complete cost of an actuarially equivalent population for the CCN-P contract.

**Outlier Claims for Children Under 6 Years** – DHH makes payments for outlier claims incurred during an Inpatient admission for children under 6 years old outside of the MMIS. Adding outlier claims to the base data resulted in an increase to cost of 2.61% in SFY09 and 2.59% in SFY10. The cost of outlier claims has been reflected in the databook Mercer has prepared for the CCNs.

**Incurred-but-not-Reported Claims Adjustments** – Mercer estimated and adjusted for the remaining liability associated with incurred-but-not-reported claims for SFY09 and SFY10. The overall adjustments for SFY09 and SFY10 using paid claims data through August 2010 were -0.07% and 3.61% respectively.

**Fraud-and-Abuse Recoupments** – Adjustments were made for recoupments due to fraud-and-abuse recoveries. Those adjustments were -0.20% in SFY09 and -0.10% in SFY10.

**Graduate Medical Education (GME) (AA.3.8)** – DHH will be making payments for GME outside of the capitation rates. Therefore, after developing the gross rates, Mercer made adjustments to remove GME payments from the net rates.

**Inpatient, Outpatient Hospital Cost Settlements, and Supplemental Payments to High Medicaid Community Hospitals** – LSU state hospitals and other hospitals receive settlements based on cost reports. Certain “High Medicaid Community Hospitals” also receive supplemental payments that are provided for in the State plan. CCNs are required to pay at least the FFS Medicaid rate when contracting with the hospitals including the impact of cost settlements. Mercer applied adjustments of 3.60% in SFY09 and 1.30% in SFY10 to capture the impact of cost settlements made outside of the MMIS.

**Retroactive eligibility (AA.3.4)** – Individuals will not enroll with a health plan until Medicaid eligible. Even after receiving Medicaid eligibility, it may take 30 days to become enrolled in a health plan. Therefore, enrollment and claims incurred during the retroactive period and those

# MERCER

Page 5

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

during the first month of Medicaid eligibility have been removed from our calculations. Infants are an exception because they will be covered under the mother's plan from the date of birth.

**Non-covered populations (AA.2.1, AA.2.2)** – In general, the CCN-P program includes individuals classified as SSI, Family and Children, Foster Children and Breast and Cervical Cancer. The following individuals are excluded from participation in the CCN-P program:

- Medicare Dually Eligible Individuals
- Home and Community Based Services Waiver Recipients
- *Chisholm* Class Members
- Individuals Receiving Medicaid Hospice Services
- Individuals Residing in Long Term Care Facilities (Nursing Home, ICF/DD)
- Individuals Receiving Services for Three Months or Less (Medically Needy Spend-down)
- Undocumented Immigrants Eligible for Emergency Services Only
- Enrollees receiving single service (family planning only)
- LaCHIP Affordable Plan

**Non-covered services (AA.2.4)** – The CCN-P rates are based on services covered under the provider agreement. The following services have been excluded in the determination of the capitation rates:

- Services provided through DHH's Early-Steps Program
- Dental Services
- ICF/DD Services
- Hospice
- Personal Care Services (EPSDT and LT-PCS)
- Nursing Facility Services
- Pharmacy
- School-based Individualized Education Plan Services provided by a school district and billed through the intermediate school district, or school-based services funded with certified public expenditures

# MERCER

Page 6

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- Home and Community-Based Waiver Services
- Specialized Behavioral Health
- Targeted Case Management Services

**Client participation amounts (AA.2.3, AA.3.13)** – Costs associated with “spenddown” and post-eligibility treatment of income are not included in the base data.

**Third-Party Liability (AA.3.6)** – Recoveries associated with Third Party Liability and subrogation have been removed from claims.

**DSH Payments (AA.3.5)** – DSH payments are made outside of the MMIS system and have not been included in the capitation rates. These payments will continue to be made outside of the capitation rates by DHH after implementation of the CCN-P program.

**FQHC and RHC Reimbursement (AA.3.9)** – DHH requires that all health plans reimburse FQHCs and RHCs at the Prospective Payment System (PPS) rate so that cash flows will be improved to these facilities. DHH will perform reconciliation quarterly to ensure that the PPS rate has been paid. In the unlikely event of a shortfall, the plans will pay the amount necessary to bring reimbursements to these facilities up to the PPS rate.

**Co-payments (AA.3.7)** – Co-pays are only applicable to prescription drugs. Since prescription drugs have been carved out of the CCN-P program, no additional adjustment is necessary for co-pays.

**Primary Case Care Management (PCCM) Fee (AA.3.0)** – Historically, Louisiana has paid a PCCM fee for members assigned to a primary care provider under the PCCM program. Since the PCCM fee is not allowed to be included in the capitation rates, Mercer has excluded the PCCM fee by excluding payments associated with procedure code CC001.

## Rate Category Groupings

Rates will vary by the major categories of eligibility. Furthermore, where appropriate, the rates within a particular category of eligibility are subdivided into different age and gender bands to reflect differences in risk due to age and gender and during child bearing ages. In addition, due to the high cost associated with pregnancies, DHH will pay a maternity kickpayment to the plans

# MERCER

Page 7

April 8, 2011

for each delivery that takes place. The following is a list of the different rate cells for each eligibility category including the maternity kickpayment.

SSI	
<ul style="list-style-type: none"> <li>▪ 0 – 2 Months, Male and Female</li> <li>▪ 3 – 11 Months, Male and Female</li> <li>▪ 1 – 5 Years, Male and Female</li> <li>▪ 6 – 13 Years, Male and Female</li> </ul>	<ul style="list-style-type: none"> <li>▪ 14 – 18 Years, Male and Female</li> <li>▪ 19 – 44 Years, Male and Female</li> <li>▪ 45+ Years, Male and Female</li> </ul>

Foster Care Children, All Ages	Breast and Cervical Cancer, All Ages
Maternity Kickpayment	

## Trend Development

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the expenses of providing health care services in a future period. Mercer reviewed a variety of sources to develop the trend assumptions. These sources included, but were not limited to:

- health care economic indices such as Consumer Price Index for the South-Atlantic region,
- Mercer’s regression analysis applied to trends exhibited in the FFS claims data,
- trends in other State Medicaid programs for similar populations, and
- judgment regarding economic outlook balancing a variety of sources.

Mercer developed individual trends for each category of eligibility and service category. Mercer’s target trend can be found in the following table.

The overall annualized PMPM trend assumption for the CCN-P program is 3.67%.

## Programmatic Changes/Rate Issues

Programmatic change adjustments recognize the impact of benefit or eligibility changes that took place during or after the base year. Mercer applied programmatic change adjustments to incorporate factors not fully reflected in the base data. These adjustments were mutually exclusive and made only once in the rate-setting process.

**Changes to Inpatient Hospital Reimbursement** – Various changes have been made to hospital per diem rates. Most recently, effective for dates of service on or after January 1, 2011, the inpatient per diem rates paid to non-State and non-Rural hospitals were reduced by 2 percent of the per diem rate on file as of December 31, 2010. The rural and state hospitals have been excluded from the rate reductions. The per diem rates for state hospitals have increased significantly since the base data period however this primarily affects the relative weights of the per diems versus cost settlements and has little impact on the total payment.

**Changes to the Laboratory/Radiology Fee Schedule** – There have been various changes to fee schedules. Most recently, effective for dates of service on or after January 1, 2011, the reimbursement rates for laboratory services was reduced by 2 percent of the fee amounts on file as of December 31, 2010.

## Outpatient Hospital Fee Schedule Changes

### Children's Specialty Hospital

Effective for dates of service on or after January 1, 2011, the reimbursement paid to Children's Specialty Hospitals for outpatient surgery is reduced by 2 percent of the fee schedule on file as of December 31, 2010.

From July 1, 2008 through February 19, 2009, Children's Specialty Hospitals were cost settled at 86.20% of cost. From February 20, 2009 through August 3, 2009, these hospitals were cost settled at 83.18% of cost. From August 4, 2009 through August 31, 2009, these hospitals were

# MERCER

Page 11

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

cost settled at 78.48% of cost. From September 1, 2009 through February 2, 2010, these hospitals were cost settled at 97.00% of cost. From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 92.15% of cost. Reimbursement going forward of 87.91% (August 1, 2010 – December 31, 2010) of allowable cost as calculated through the cost report settlement process will be reduced by 2%, making final reimbursement 86.15% (January 1, 2011 going forward).

## Non-State and Non-Rural Outpatient Hospitals

Again, there have been various changes to fee schedules. Most recently, effective for dates of service on or after January 1, 2011, the reimbursement paid to non-rural, non-state hospitals for outpatient surgery was reduced by 2 percent of the fee schedule on file as of December 31, 2010.

From July 1, 2008 through February 19, 2009, Non-Rural and Non-State outpatient hospitals (other than Children's) were cost settled at 86.20% of cost. From February 20, 2009 through August 3, 2009, these hospitals were cost settled at 83.18% of cost. From August 4, 2009 through February 2, 2010, these hospitals were cost settled at 78.48% of cost. From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 74.56% of cost. Reimbursement going forward of 71.13% (August 1, 2010 – December 31, 2010) of allowable cost as calculated through the cost report settlement process will be reduced by 2%, making final reimbursement 69.71% (January 1, 2011 going forward).

## **Physician Fee Schedule Changes**

### Members 16 years or older

Effective January 22, 2010, in general, the reimbursement for physician services rendered to recipients 16 years of age or older shall be reduced to 75% of the 2009 Louisiana Medicare Region 99 allowable or billed charges, whichever is lesser amount. Exceptions to the general rule are Prenatal E&M services (99201-99215 w/TH Modifier), Preventive E&M services (99381-99397), and Obstetrical Delivery Services (59400-59622). The Vaginal Delivery Services will be paid at 90% of the 2009 Louisiana Medicare Region 99 allowable or billed charges, whichever is lesser amount.

### Members under 16 years

Effective January 22, 2010, the reimbursement for physician services rendered to recipients under 16 years of age shall be reduced to 90% of the 2009 Louisiana Medicare Region 99

# MERCER

Page 12  
April 8, 2011  
Ms. Ruth Kennedy  
Louisiana Department of Health and Hospitals

allowable or billed charges, whichever is lesser amount. In addition, effective August 1, 2010, DHH is no longer paying an enhanced fee for preventive services for members under 16 years.

## Physician Injectibles

Effective January 22, 2010, Physician injectibles are paid at 90% of the 2009 Medicare Average Sale Price (ASP).

## **Clinical Services-End Stage Renal Disease Facilities Non-Medicare Claims Reimbursement Rate Reduction**

Various changes, most recently, effective for dates of service on or after January 1, 2011, the reimbursement to ESRD facilities shall be reduced by 2 percent of the rates in effect on December 31, 2010.

**Non-Emergency Medical Transportation** – Most recently, effective for dates of service on or after January 1, 2011, the reimbursement rates for non-emergency, non-ambulance medical transportation services shall be reduced by 2 percent of the rates in effect on December 31, 2010.

**Emergency Medical Transportation** – Most recently, effective on or after January 1, 2011, the reimbursement rates for emergency ambulance transportation services shall be reduced by 2% of the rate on file as of December 31, 2010.

The compounded effect of all of the fee schedule changes by category of aid and category of service can be found in the table below. Overall, the fee schedule changes since the base data period reduced cost by approximately 7.87% for SFY09 and 5.39% for SFY10.

## Data Smoothing

As part of the rate development process, Mercer blended data from SFY09 and SFY10 to arrive at the overall data source for rate setting. The goal of the blending process is to obtain a set of base data that has sufficient credibility and reasonableness to develop actuarially-sound capitation rates. Mercer applied weights of 60% and 40% to the SFY10 and SFY09 data respectively.

Beyond blending data from multiple years, Mercer also used Statewide figures where particular rate cells within a region had small enrollment. The cost per member per month for a small rate cell is subject to large fluctuations from one year to the next, thus rendering it less effective at predicting future cost. Using Statewide figures results in greater data credibility and reduces the impact of random fluctuations exhibited by the data.

Some categories of eligibility such as the Foster Children and Breast and Cervical Cancer population are too small to have separate rate cells due to data credibility concerns. Therefore, Statewide figures are used for these populations and the data has been combined across all age and sex cells in determining the capitation rate.

## Managed Care Assumptions

Mercer and DHH discussed areas for improvements in managed care efficiency. Prior studies of savings achieved in transitioning from fee-for-service to Managed Care showed savings of 2%-19%<sup>1</sup>.

Managed Care is able to generate savings by:

- Encouraging the use of preventive services so that acute conditions are not exacerbated to the point that requires a visit to the emergency room or hospitalization.
- Use of alternatives to the emergency room (ER) for conditions that are non-emergent in nature. Some Louisiana Medicaid recipients make very frequent use of the ER and ERs are much more expensive than other viable alternatives. Those alternatives, such as extended hours for doctor's offices, after-hours urgent care clinics, or even nurse advice lines, may result in significantly more pleasant experiences than the hospital ER as well.

---

<sup>1</sup> The Lewin Group – Medicaid Capitation Expansion's Potential Cost Savings.

# MERCER

Page 17

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

- By increasing access and providing member education, CCNs can steer some of the members away from the more costly emergency room setting when the condition is not emergent in nature.
- Minimizing duplication of services. When a recipient doesn't have a "medical home" or care coordinator, they often seek care from different providers, sometimes at different locations, each time they need care. The new provider must get to know them and their history over again and may order duplicative tests that have already been done by another provider. The provider that knows them may more easily focus in on their needs and provide more targeted care.
- Hospital discharge planning to ensure a smooth transition from facility-based care to community resources, and minimize readmissions.

Mercer has performed a study of the potentially preventable hospital admissions using the method prescribed by the Agency for Healthcare Research and Quality (AHRQ). The study confirmed that there were significant opportunities for savings due to hospital admissions associated with low birth weight babies, congestive heart failure, bacterial pneumonia, and other conditions which AHRQ has determined to be avoidable.

The table below illustrates the savings applied by category of aid and categories of service.

The overall impact of managed care assumptions was a reduction of 14.69% to the rates.

## Commercial Reinsurance

To provide protection against the risk of catastrophic claims, the CCN-P plans are encouraged to purchase reinsurance to insure against large claims incurred by an individual member. Currently, under the FFS system, when the claims for members under 6 years exceed the expense threshold, an outlier payment is made outside of the MMIS system. To ensure sufficient consideration has been built into the rates so that plans can purchase reinsurance, outlier claims have been built into the capitation rates.

## Administration and Profit Load

Mercer and DHH reviewed the components of the administrative allowance to evaluate the administrative rates paid to the CCNs. The review focused on the reporting and organizational requirements detailed in the CCN provider agreement. Mercer modeled the cost structure for these requirements to determine the administrative load necessary for an average plan in this program. Based on the analysis and comparisons with other state Medicaid programs' administrative allowances, Mercer assumed an overall administration load of approximately 10.0% for the final premium rates.

In addition, Mercer included profit and margin considerations in the rate development explicitly through a load of 1.8% of premium. This is an acceptable rate consideration per AA.3.2 of the CMS Rate-Setting Checklist.

# MERCER

Page 21

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

In total, the overall load applied to the rates for administration and profit/contingencies was approximately 12%. We applied this as a load of 6.4% on the Maternity Kickpayment and a load of 12.7% on all other rate cells, which approximates the desired 12% aggregate loading.

## Risk Adjustment

Risk adjustment will be applied to the rates in exhibit A to reflect differences in health status of the members served in each plan using the ACG model. The risk adjustment process does not increase or decrease the overall cost of the program but can change the distribution across the various CCNs according to the relative risk of their enrolled members. Actuarially sound risk adjustment protocols have been developed so as to be appropriate to rates that have been developed by underlying age and gender cells.

## Rate Ranges

Mercer developed actuarially-sound rate ranges for DHH to use in determining the appropriate rates to pay the CCNs. Mercer specifically priced the upper and lower bound of the rate ranges by varying the assumptions outlined above. Mercer varied the trend assumptions and the financial data adjustments to account for different levels of managed care efficiency and potential risk selection. As a result, the lower bound of the rate range represents a rate for a very efficient CCN and the upper bound represents the least amount of efficiency DHH is willing to purchase. The final rates to be paid by DHH are within the ranges and are included as Attachment A to this letter.

## Rate Development Overview

To provide additional detail on the rate development, Mercer has also provided an overview of the adjustments applied to each rate cell in Attachment B. This exhibit presents the breakdown of the assumptions used to calculate the Target rate within the actuarially sound rate range.

## Family Planning Portion of the Rates

Mercer has analyzed the component of the rates associated with Family Planning services so that DHH may claim the enhanced federal match of 90% on these services. CMS issued a guide in June 2009 to assist States in determining which services are allowed to be claimed at the enhanced federal match rate. Specific details on codes used to identify family planning services can be found in the document accompanying this letter.

# MERCER

Page 22

April 8, 2011

Ms. Ruth Kennedy

Louisiana Department of Health and Hospitals

Attachment C below contains the PMPMs associated with Family Planning that will be claimed at the enhanced match rate. Please note that these Family Planning PMPMs do not include load for administration and profit.

## Certification of Final Rate Ranges

In preparing the rate ranges underlying the rates shown in Attachment A, Mercer has used and relied upon enrollment, FFS claims, reimbursement level, benefit design, and information supplied by the Department of Health and Hospitals (DHH) and its fiscal agent. The DHH and its fiscal agent are responsible for the validity and completeness of this supplied data and information. We have reviewed the data and information for internal consistency and reasonableness but we did not audit it. In our opinion it is appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that the rates in Attachment A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual CCN costs will differ from these projections. Mercer has developed these rates on behalf of DHH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c) and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

CCNs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by CCNs for any purpose. Mercer recommends that any CCN considering contracting with the DHH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with the DHH.

This certification letter assumes the reader is familiar with the CCN program, Medicaid eligibility rules, and actuarial rating techniques. It is intended for DHH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified
