

Local Reporting: Louisiana Part C Annual Performance Report 2024-2025

The Individuals with Disabilities Education Improvement Act (IDEA) requires that each state has a State Performance Plan (SPP) to evaluate the state's efforts in meeting the requirements and purposes of IDEA and to report annually on its performance. Louisiana's statewide performance on the 11 indicators which are used to measure performance is available on the EarlySteps website at www.earlysteps.dhh.louisiana.gov. In addition, The U.S. Department of Education, Office of Special Education Programs requires that all States report annually to the public on the performance of its local early intervention programs. Louisiana defines "local program" as the programs in the 10 Louisiana Department of Health regions which include family support coordination agencies and the System Point of Entry Offices (SPOEs). In most cases, reporting periods through 2024-25 are shown together for comparison across fiscal years where possible. The results are presented compared to national and state data as well as by region.

Monitoring Priority: Indicator 1--Early Intervention Services Received in a Timely Manner

This indicator is calculated as the percentage of infants and a toddler with IFSPs who receive the early intervention services on their IFSPs in a timely manner. *Timely* is defined as within 30 days of parent consent for services on the IFSP. Data is collected in the first quarter of each fiscal year. IFSPs for each family support coordination agency from all regions of the State were reviewed and results are averaged to report regional results.

State target: 100%
2020-2021: State Actual: 95.69%
2021-2022: State Actual: 94.25%
2022 – 2023: State Actual: 95.93%
2023 – 2024: State Actual: 92.81%
2024 -2025 State Actual: 94%

Regional Indicator 1 Results:

The percentages exclude delays due to family reasons for a delay. Agencies with less than 100% performance receive findings of noncompliance and may be placed under corrective action. Prior to 2022, agencies in Regions 1 & 10 serve children in both regions and previous data was reported together.

**Monitoring Priority: Indicator 2--Early Intervention Services
in the Natural Environment**

This indicator is calculated as a percentage of infants and toddlers with IFSPs who primarily receive early intervention services in the home or in community settings. Louisiana has consistently exceeded its target since 2018.

**Monitoring Priority: Indicator 3--
Percent of infants and toddlers with
IFSPs who demonstrate improved
development:**

As part of Louisiana’s system improvement, the outcome measurement process for calculating child outcomes was changed in 2017. New state targets for the measures were “reset” for the new measures for 2019 and 2020 (indicated with ^).

Outcome A: Positive Social Emotional Skills

Summary Statement 1 (SS1) Of those children who entered or exited the program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 3 years of age or exited the program.

Summary Statement 2 (SS2) The percent of children who were functioning within age expectations in Outcome A by the time they turned 3 years of age or exited the program

**Indicator 3:
Outcome C: Use behavior to meet needs**

Summary Statement 1 (SS1) Of those children who entered or exited the program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they reached 3 years of age or exited the program—"greater than expected growth."

Summary Statement 2 (SS2) The percent of children who were functioning within age expectations in Outcome B by the time they reached 3 years of age or exited the program—"exited within age expectations."

Monitoring Priority: Indicator 4—Percent of Families participating in Part C who report that early intervention services have helped the family:

- a. Know their rights**
- b. Effectively communicate their child’s needs**
- c. Help their children develop and learn**

Louisiana performance exceeded the targets in a .Rights; met the target for c. Help child develop and learn; and did meet its target for b Address child’s needs.

The results from this indicator are determined from surveys with families exiting early intervention between Jan. to June of 2025.

Monitoring Priority: Indicator 5—Number of infants ages birth to one year with IFSP’s.

This indicator is calculated as the percentage of infants and toddlers ages birth to 1 with IFSP’s compared to:

- A. National Data
- B. Annual State Results

Indicator 5: Regional Results

The table below shows the birth to age one year child count by region for the December 1, 2024 child count. The estimated population is the number of children in the birth to three age range for 2024. The count may not compare exactly with the regional percentages and count from 2023, since the data sources for population ages are taken from different sources. *National average not available at time of posting.

Monitoring Priority: Indicator 7—Evaluation and assessment and IFSP developed within the 45-day timeline

This indicator is calculated as the percentage of eligible infants and toddlers with IFSP’s for whom an evaluation and assessment and an initial IFSP meeting were conducted within the required 45-day timeline. The State Actual amounts include all delayed IFSPs: those delayed due to family reasons and due to system reasons. Family delay reasons are not counted against compliance with the requirements. Agencies who achieve less than 100% for this indicator receive findings of noncompliance and may be placed under corrective action. There were 10 delays due to system reasons.

Monitoring Priority: Indicator 8—Children Exit EarlySteps with timely Transition

This indicator is calculated as the percentage of all children exiting Part C who receive timely transition planning to support the child’s transition to preschool and other appropriate community services by their third birthday including:

- A. IFSP’s with transition steps and services;
- B. Notification sent to LEA if child is potentially eligible for Part B services—this target is 100%
- C. Transition conference, if child is potentially eligible for Part B.

Data for A. and C. was collected through of monitoring of IFSP’s and 8B. is collected through the data system.

A. Percentage of children who have an IFSP with transition steps and services at least 90 days, and at the discretion of all parties, not more than 9 months prior to the toddler’s third birthday

Louisiana achieved 100% for this indicator. This is accomplished through a report sent by the EarlySteps State office to the Louisiana Department of Education monthly. The report provides notice of the children in Part C that are potentially eligible for Part B services from all areas of the state. The report is then sent to the school systems by the Department of Education.
