I. POLICY STATEMENT

It is the policy of Louisiana Department of Health (LDH) and all offices under its jurisdiction to make a reasonable effort to return injured employees to gainful employment as soon as medically possible after a job-related injury or illness. LDH cannot guarantee placement and is under no obligation to offer, create or encumber any specific position for purposes of offering placement.

The transitional return to work program is based on medical prognosis and recovery. An employee on transitional work duty shall continue on such duty until he or she is able to resume full duty or up to six months from the date the employee was assigned transitional duty. (For transitional duty that lasts beyond six months, the appointing authority must request the approval of the Civil Service Director to continue transitional duty beyond six months). As soon as an employee is released by his or her physician to resume full duty, he or she shall be allowed to return to his or her regular employment with no restrictions.

The transitional return to work program is economically beneficial to LDH and the State of Louisiana, and assists injured employees in regaining the economic, health and emotional benefits of full employment.

II. PURPOSE

This policy provides procedures to provide a safe return to work for injured employees, give employees return to work options and assure that appropriate documentation is maintained regarding transitional return to work activities.

III. APPLICABILITY

This policy is applicable to employees of LDH who are off duty as a result of work related injuries or illnesses, and receiving Workers' Compensation benefits.

IV. EFFECTIVE DATE

The effective date of this revised policy is December 12, 2017.
