

Childhood Immunizations Checklist

CHILD'S NAME: _____

Your baby is born with the ability to fight most germs, but there are some serious and potentially deadly diseases that their immune systems can't handle. Childhood immunizations help strengthen your child's immune system and protect them against 14 potentially dangerous diseases by the time they reach two years old.

If planning for pregnancy in advance, talk with your doctor or healthcare provider about any immunizations you may need.

DISEASE	IMMUNIZATION	RECEIVED
PREGNANCY		
Measles, Mumps & Rubella	MMR	<input type="checkbox"/> one dose before pregnancy (unless already protected)
Tetanus, Diphtheria & Pertussis (Whooping Cough)	Tdap	<input type="checkbox"/> one dose (during third trimester)
Influenza (Flu)	Flu	<input type="checkbox"/> one dose (before end of October)
Other (if needed - talk with your doctor)	<input type="checkbox"/> _____	<input type="checkbox"/> _____
NEWBORN		
Hepatitis B	HepB	<input type="checkbox"/> 1st dose (within 12-24 hours of birth)
Respiratory Syncytial Virus	RSV	<input type="checkbox"/> 1st dose (within 1 week of birth)
1-2 MONTHS OLD		
Hepatitis B	HepB	<input type="checkbox"/> 2nd dose
Diphtheria, Tetanus & Pertussis (Whooping Cough)	DTaP	<input type="checkbox"/> 1st dose
Haemophilus Influenzae Type B (Hib)	Hib	<input type="checkbox"/> 1st dose
Polio	IPV	<input type="checkbox"/> 1st dose
Pneumococcal Disease (PCV15, PCV20)	PCV	<input type="checkbox"/> 1st dose
Rotavirus	RV	<input type="checkbox"/> 1st dose

DISEASE	IMMUNIZATION	RECEIVED
4 MONTHS OLD		
Diphtheria, Tetanus & Pertussis (Whooping Cough)	DTaP	<input type="checkbox"/> 2nd dose
Haemophilus Influenzae Type B (Hib)	Hib	<input type="checkbox"/> 2nd dose
Polio	IPV	<input type="checkbox"/> 2nd dose
Pneumococcal Disease (PCV15, PCV20)	PCV	<input type="checkbox"/> 2nd dose
Rotavirus	RV	<input type="checkbox"/> 2nd dose
6 MONTHS OLD		
Diphtheria, Tetanus & Pertussis (Whooping Cough)	DTaP	<input type="checkbox"/> 3rd dose
Haemophilus Influenzae Type B (Hib)	Hib	<input type="checkbox"/> 3rd dose
Pneumococcal Disease (PCV15, PCV20)	PCV	<input type="checkbox"/> 3rd dose
Rotavirus	RV	<input type="checkbox"/> 3rd dose
Influenza (Flu)	Flu	<input type="checkbox"/> 1st dose (age 6-11 months)
7-11 MONTHS OLD		
Influenza (Flu)	Flu	<input type="checkbox"/> 2nd dose (4 weeks later)

*To enter Daycare, child must be up to date on all recommended routine vaccines for their age.

KEY: █ Required Vaccines to Enter Kindergarten and All Subsequent Grades Thereafter █ Required Vaccines to Enter 6th Grade and All Subsequent Grades Thereafter █ Required Vaccines to Enter 11th Grade and All Subsequent Grades Thereafter

Childhood Immunizations Checklist

KEY: █ Required Vaccines to Enter Kindergarten and All Subsequent Grades Thereafter █ Required Vaccines to Enter 6th Grade and All Subsequent Grades Thereafter █ Required Vaccines to Enter 11th Grade and All Subsequent Grades Thereafter

DISEASE	IMMUNIZATION	RECEIVED
12-23 MONTHS		
Chickenpox	Varicella	<input type="checkbox"/> 1st dose
Diphtheria, Tetanus & Pertussis (Whooping Cough)	DTaP	<input type="checkbox"/> 4th dose
Haemophilus Influenzae Type B (Hib)	Hib	<input type="checkbox"/> 4th dose
Measles, Mumps & Rubella	MMR	<input type="checkbox"/> 1st dose
Polio	IPV	<input type="checkbox"/> 3rd dose (6-18 months old)
Pneumococcal Disease (PCV15, PCV20)	PCV	<input type="checkbox"/> 4th dose
Hepatitis A	HepA	<input type="checkbox"/> 1st dose <input type="checkbox"/> 2nd dose (6 months after first)
Hepatitis B	HepB	<input type="checkbox"/> 3rd dose (6-18 months old)
Influenza (Flu)	Flu	<input type="checkbox"/> 1 year old
2-3 YEARS OLD		
Influenza (Flu)	Flu	<input type="checkbox"/> 2 years old <input type="checkbox"/> 3 years old
4-6 YEARS OLD		
Diphtheria, Tetanus & Pertussis (Whooping Cough)	DTaP	<input type="checkbox"/> 5th dose
Polio	IPV	<input type="checkbox"/> 4th dose
Measles, Mumps & Rubella	MMR	<input type="checkbox"/> 2nd dose

DISEASE	IMMUNIZATION	RECEIVED
4-6 YEARS OLD CONT.		
Chickenpox	Varicella	<input type="checkbox"/> 2nd dose
Influenza (Flu)	Flu	<input type="checkbox"/> 4 years old <input type="checkbox"/> 5 years old <input type="checkbox"/> 6 years old
7-10 YEARS OLD		
Influenza (Flu)	Flu	<input type="checkbox"/> 7 years old <input type="checkbox"/> 9 years old <input type="checkbox"/> 8 years old <input type="checkbox"/> 10 years old
11-12 YEARS OLD		
Meningococcal Disease	MenACWY	<input type="checkbox"/> 1st dose
Human Papillomavirus	HPV	<input type="checkbox"/> 1st dose (given as early as age 9) <input type="checkbox"/> 2nd dose
Tetanus, Diphtheria & Pertussis (Whooping Cough)	Tdap	<input type="checkbox"/> 1st dose
Influenza (Flu)	Flu	<input type="checkbox"/> 11 years old <input type="checkbox"/> 12 years old
13-18 YEARS OLD		
Meningococcal Disease	MenACWY	<input type="checkbox"/> 2nd dose (given at age 16)
Serogroup B Meningococcal Disease	MenB	<input type="checkbox"/> 1st dose (preferably 16-18 years old) <input type="checkbox"/> 2nd dose
Influenza (Flu)	Flu	<input type="checkbox"/> 13 years old <input type="checkbox"/> 16 years old <input type="checkbox"/> 14 years old <input type="checkbox"/> 17 years old <input type="checkbox"/> 15 years old <input type="checkbox"/> 18 years old
