Description

This policy describes the medical necessity criteria for Lantidra (donislecel), an allogeneic pancreatic islet cellular therapy, used for the treatment of type 1 diabetes in those who are unable to reach target hemoglobin A1c (HbA1c).¹

Policy/Criteria

- I. It is the policy of Louisiana Healthcare Connections that Lantidra (donislecel) is **medically necessary** when all of the following criteria are met:
 - A. Member/enrollee is ≥ 18 years of age ~~and~~ ~~< 65 years of age~~;
 - B. Diagnosis of type 1 diabetes;
 - C. Member/enrollee is unable to approach target HbA1c due to current repeated episodes of severe hypoglycemia, despite intensive diabetes management and education;
 - D. Therapy will be used in conjunction with concomitant immunosuppression;
 - E. No more than three infusions will be given;
 - F. Member/enrollee does not have concomitant diseases or conditions, including pregnancy, that contraindicate the procedure for Lantidra infusion or immunosuppression.

Background

Type 1 diabetes is a chronic autoimmune disease, characterized by the destruction of pancreatic beta cells, causing insulin deficiency.^{2,3} Intensive diabetes management is the standard of care for type 1 diabetes, and includes coordinating frequent blood glucose monitoring and insulin replacement with meals and activity.³ Type 1 diabetes requires lifelong insulin treatment, but some people have difficulty managing hyperglycemia without causing hypoglycemia, especially in those who develop hypoglycemia unawareness.² Insulin dosing becomes challenging in these situations, but Lantidra is a possible treatment option.²

In June 2023, the U.S. Food and Drug Administration (FDA) approved Lantidra, an allogeneic pancreatic islet cellular therapy.² Lantidra is produced from deceased donor pancreatic islet cells that include beta cells, which have the ability to produce and secrete insulin.¹ Lantidra is infused in the hepatic portal vein so that the infused cells are able to produce enough insulin to regulate blood glucose levels, eliminating the need for additional insulin administration.² The product is intended to be used in adult patients with type 1 diabetes who cannot reach target HbA1c due to having recurrent severe hypoglycemic episodes, despite intensive diabetes management and education.^{1,2} Additionally, immunosuppressive medicine is required to be taken before receiving Lantidra and needs to be continued after the infusion to keep the transplanted islet cells viable.¹

Two non-randomized, single-arm studies evaluated the safety and effectiveness of Lantidra and included a total of 30 enrollees with type 1 diabetes and hypoglycemic unawareness who received a minimum of one infusion and a maximum of three infusions. The studies found that 21 participants did not require insulin administration for one year or longer, 11 participants did not require insulin administration for one to

five years, and 10 participants did not require insulin administration for over five years. Additionally, five of the total participants continued to require insulin administration without any resulting days of insulin independence.²

Coding Implications

This clinical policy references Current Procedural Terminology (CPT®). CPT® is a registered trademark of the American Medical Association. All CPT codes and descriptions are copyrighted ~~2022~~2023, American Medical Association. All rights reserved. CPT codes and CPT descriptions are from the current manuals and those included herein are not intended to be all-inclusive and are included for informational purposes only. Codes referenced in this clinical policy are for informational purposes only and may not support medical necessity. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

HCPCS Codes	Description
J3490	Unclassified drugs
J3590	Unclassified biologics

policy; and other available clinical information. LHCC makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions, and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable LHCC administrative policies and procedures.

This clinical policy is effective as of the date determined by LHCC. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. LHCC retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment, or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care and are solely responsible for the medical advice and treatment of members/enrollees. This clinical policy is not intended to recommend treatment for members/enrollees. Members/enrollees should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom LHCC has no control or right of control. Providers are not agents or employees of LHCC.

This clinical policy is the property of LHCC. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members/enrollees, and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members/enrollees and their representatives agree to be bound by such terms and conditions by providing services to members/enrollees and/or submitting claims for payment for such services.
