Several statistical and other factors that attempt to anticipate future events are used in calculating the expense, liability and asset values related to our pension plans. These factors include assumptions we make about the discount rate, expected return on plan assets, the rate of future compensation increases and mortality. In calculating the expected return on the plan asset component of our net periodic pension cost, we apply our estimate of the long-term rate of return on the plan assets that support our pension obligations.

The expected rate of return on plan assets is the long-term rate of return we expect to earn on plan assets. When estimating the expected rate of return, in addition to assessing recent performance, we consider the historical returns earned on plan assets, the rates of return expected in the future, and our investment strategy and asset mix with respect to the plans' funds. The expected rate of return on plan assets is reviewed annually and revised, as necessary, to reflect changes in financial markets and our investment strategy.

The discount rate is used to present value our future anticipated benefit obligations. The discount rate reflects the current rate at which benefit liabilities could be effectively settled considering the timing of expected payments for plan participants. In estimating our discount rate, we consider rates of return on high-quality fixed-income investments adjusted to eliminate the effects of call provisions, as well as the expected timing of pension and other benefit payments.

Each year, the difference between the actual return on plan assets and the expected return on plan assets, as well as increases or decreases in the benefit obligation as a result of changes in the discount rate and other actuarial assumptions, are added to or subtracted from any cumulative actuarial gain or loss from prior years. This amount is the net actuarial gain or loss recognized in Accumulated other comprehensive loss. We amortize net actuarial gains and losses as a component of net pension cost for a year if, as of the beginning of the year, that net gain or loss (excluding asset gains or losses that have not been recognized in market-related value) exceeds 10% of the greater of the projected benefit obligation or the market-related value of plan assets (the "corridor" method). This determination is made on a plan-by-plan basis. If amortization is required for a particular plan, we amortize the applicable net gain or loss in excess of the 10% threshold on a straight-line basis in net periodic pension cost over the remaining service period of the employees participating in that pension plan. In plans where substantially all participants are inactive, the amortization period for the excess is the average remaining life expectancy of the plan participants.

Refer to Note 13 - Employee Benefit Plans for further information regarding our Pension Benefit Obligations.

Income Taxes

Income taxes are recorded based on amounts refundable or payable and include the results of any difference between U.S. GAAP accounting and tax reporting, recorded as deferred tax assets or liabilities. We estimate deferred tax assets and liabilities based on current tax laws, regulations and rates. Changes in tax laws,
regulations and rates may affect recorded deferred tax assets and liabilities in the future.

Management establishes valuation allowances on deferred tax assets when it is determined “more-likely-than-not” that some portion or all of the deferred tax assets may not be realized. Management considers positive and negative evidence in evaluating the ability of the Company to realize its deferred tax assets, including its historical results and forecasts of future ability to realize its deferred tax assets, including projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies.

We are subject to ongoing tax examinations and assessments in various jurisdictions. We have unrecognized tax benefits for uncertain tax positions. We follow U.S. GAAP which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results.

Refer to Note 14—Income Taxes for further discussion.

Foreign Currency Translation and Re-measurement

The functional currency for most foreign operations is the local currency. Net assets are translated at current rates of exchange and income, expense and cash flow items are translated at average exchange rates for the applicable period. The translation adjustments are recorded in Accumulated other comprehensive loss.

The U.S. Dollar is used as the functional currency for certain foreign subsidiaries that conduct their business in U.S. Dollars. A combination of current and historical exchange rates is used in re-measuring the local currency transactions of these subsidiaries and the resulting exchange adjustments are recorded in Currency (gains) and losses within Other expenses, net together with other foreign currency re-measurements.

Note 2 – Segment Reporting

Our reportable segments correspond to how we organize and manage the business, as defined by our CEO who is also our Chief Operating Decision Maker, and are aligned to the industries in which our clients operate. All of our segments involve the delivery of business process services and include service arrangements where we manage a customer's business activity or process. We report our financial performance based on the following three primary reportable segments.

- Commercial Industries
- Healthcare
- Public Sector

Commercial Industries: Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries (other than healthcare). Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include customer care, human resource management and finance and accounting services. These services are complemented by innovative industry-specific services such as personalized product information for the automotive industry; digitized source-to-pay solutions for clients in the manufacturing industry; customer experience and marketing services for clients in the retail industry; mortgage and consumer loan processing for clients in the financial services industry; and customized workforce learning solutions for clients in the aerospace industry.

Healthcare: Our Healthcare segment provides innovative industry-centric business process services and subject matter expertise to clients across the healthcare industry, including providers, payers, employers, pharmaceutical and life science companies and government agencies. We strive to enable our healthcare clients to focus on improving the patient care experience, lowering total costs and enabling better long-term health outcomes.

Public Sector: Our Public Sector segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.

Other: Other includes our Government Health Enterprise Medicaid Platform business, where we are limiting our focus to implementing and maintaining systems for our current Health Enterprise clients, and our Student Loan business, which is in run-off. Other also includes non-allocated expenses as well as inter-segment eliminations.

Selected financial information for our reportable segments was as follows:

	Year Ended December 31,				
	Commercial Industries	Healthcare	Public Sector	Other[1]	Total
2016					
Revenue	$ 2,622	$ 1,681	$ 1,727	$ 328	$ 6,358
Related party revenue	48	2	1	(1)	50
Inter-segment revenue	20	3	3	(26)	—
Total Segment Revenue	$ 2,690	$ 1,686	$ 1,731	$ 301	$ 6,408
Depreciation and amortization[2]	$ 117	$ 66	$ 81	$ 69	$ 333
Segment profit (loss)	59	159	223	(245)	196
2015					
Revenue	$ 2,822	$ 1,746	$ 1,723	$ 318	$ 6,609
Related party revenue	51	2	—	—	53
Inter-segment revenue	23	2	4	(29)	—
Total Segment Revenue	$ 2,896	$ 1,750	$ 1,727	$ 289	$ 6,662
Depreciation and amortization[2]	$ 119	$ 64	$ 84	$ 83	$ 350
Segment profit (loss)	69	157	200	(489)	(63)
2014					
Revenue	$ 2,881	$ 1,738	$ 1,763	$ 502	$ 6,884
Related party revenue	51	3	—	—	54
Inter-segment revenue	21	2	4	(27)	—
Total Segment Revenue	$ 2,953	$ 1,743	$ 1,767	$ 475	$ 6,938
Depreciation and amortization[2]	$ 126	$ 101	$ 79	$ 71	$ 377
Segment profit (loss)	152	138	206	(49)	447

(1) Other results for 2016 includes a charge of $161 related to our NY MMIS project. $83 was recorded as a reduction to revenue and the remainder of $78 was recorded to Cost of outsourcing. Other results for 2015 include a charge of $389 related to our Health Enterprise platform implementations in California and Montana. $116 of the charge was recorded as a reduction to revenues and the remainder of $273 was recorded to Cost of outsourcing.

(2) Depreciation and amortization excludes amortization of intangible assets - see reconciliation below for amounts - as well as depreciation and amortization associated with Discontinued Operations. Refer to Note 4 - Divestitures for amounts.

The following is a reconciliation of segment (loss) profit to pre-tax (loss) income:

	Year Ended December 31,		
Segment (Loss) Profit Reconciliation to Pre-tax (Loss) Income	2016	2015	2014
Total Segment Profit (Loss)	$ 196	$ (63)	$ 447
Reconciling items:			
Goodwill impairment	(935)	—	—
Amortization of intangible assets	(280)	(250)	(250)
Restructuring and related costs[1]	(101)	(159)	(21)
Related party interest	(26)	(61)	(107)
Separation costs	(44)	—	—
Business transformation costs[2]	(3)	(3)	(14)
Other expenses, net	(34)	(38)	(45)
Pre-tax (Loss) Income	$ (1,227)	$ (574)	$ 10

(1) Restructuring and asset impairment charges were $73, $159, and $21 for each of the three years ended December 31, 2016, 2015 and 2014, respectively and Strategic transformation costs were $28 for the year ended December 31, 2016.

(2) Business transformation costs represent incremental costs incurred directly in support of our business transformation and restructuring initiatives such as compensation costs for overlapping staff, consulting costs and training costs.

Geographic area data is based upon the location of the subsidiary reporting the revenue or long-lived assets and is as follows for each of the years ended December 31:

	Revenues			Long-Lived Assets [1]	
	2016	2015	2014	2016	2015
United States	$ 5,686	$ 5,849	$ 5,923	$ 325	$ 393
Europe	547	616	786	38	42
Other areas	175	197	229	73	71
Total Revenues and Long-Lived Assets	$ 6,408	$ 6,662	$ 6,938	$ 436	$ 506

(1) Long-lived assets are comprised of (i) Land, buildings and equipment, net, (ii) Internal use software, net and (iii) Product software, net.

Our methodology to disclose revenue on a geographic basis changed to reflect where the work is contracted. All prior years have been adjusted to reflect this change in methodology.

Note 3 – Acquisitions

2016 Acquisitions
We did not make any acquisitions in 2016.

2015 Acquisitions
In September 2015 we acquired **RSA Medical LLC (RSA Medical)** for approximately $141 in cash. RSA Medical is a leading provider of health assessment and risk management for members interacting with health and life insurance companies. The acquisition of RSA Medical expands our portfolio of healthcare service offerings to payers and life insurers using predictive analytics to enhance member outreach services aimed at improving overall population health. RSA Medical is included in our Healthcare segment. In 2016, we recorded accelerated amortization of intangible assets of $16 as a result of the loss of a large contract.

In September 2015, we acquired **inVentive Patient Access Solutions (iPAS)**, an inVentiv Health company, for approximately $15 in cash. This acquisition expands our portfolio of pharmaceutical services with an offering to help pharmaceutical companies drive product adoption and support patients in minimizing and eliminating financial and reimbursement hurdles. iPAS is included in our Healthcare segment.

In May 2015, we acquired **Healthy Communities Institute Corporation (HCI)**, for approximately $13 in cash. HCI provides a leading cloud platform that puts socioeconomic and community health information at the fingertips of hospitals, public health agencies and community coalitions. HCI is included in our Healthcare segment.

In January 2015 we acquired **Intellinex LLC** (Intellinex), formerly Intrepid Learning Solutions, Inc., a Seattle-based company, for $28 in cash. Intellinex provides outsourced learning services primarily in the aerospace manufacturing and technology industries. The acquisition of Intellinex solidifies our position as a leading provider of end-to-end outsourced learning services, and adds key vertical market expertise in the aerospace industry. Intellinex is included in our Commercial Industries segment.

2015 Summary
All of our 2015 acquisitions resulted in 100% ownership of the acquired companies. The operating results of the acquired companies described above were not material to our consolidated financial statements and were included within our results from their respective acquisition dates. Our 2015 acquisitions contributed aggregate revenues of approximately $57 and $40 to our 2016 and 2015, respectively, total revenues from their respective acquisition dates. The purchase prices for all acquisitions were primarily allocated to intangible assets and goodwill based on third-party valuations and management's estimates. The primary elements that generated the goodwill are the value of synergies and the acquired assembled workforce. Approximately 60% of the goodwill recorded in 2015 is expected to be deductible for tax purposes.

2014 Acquisitions
In September 2014, we acquired **Consilience Software, Inc. (Consilience)** for approximately $25 in cash. Consilience provides case management and workflow automation software solutions to the public sector.

Consilience's proprietary Maven Case Management software system uses data and process analytics to help government agencies extract more value from their information. The intelligent case management system automates workflows for document- and labor-intensive processes and integrates previously siloed legacy systems for accelerated decision-making. Consilience is included in our Public Sector segment.

In May 2014, we acquired **ISG Holdings, Inc. (ISG)** for approximately $225 in cash. The acquisition of ISG enhances our Healthcare segment by providing a comprehensive workers' compensation suite of offerings to the property and casualty sector. In addition, the acquisition expands our services to property and casualty insurance carriers, third-party administrators, managed care services providers, governments and self-administered employers who require comprehensive reviews of medical bills and implementation of care management plans stemming from workers' compensation claims. ISG is included in our Healthcare segment.

In January 2014, we acquired **Invoco Holding GmbH (Invoco)**, a German company, for approximately $54 (€40 million) in cash. The acquisition of Invoco expands our European customer care services and provides our global customers immediate access to German-language customer care services and provides Invoco's existing customers access to our broad business process outsourcing capabilities. Invoco is included on our Commercial Industries segment.

We also acquired one additional business in 2014 for $2 in cash, primarily related to customer care and software support.

2014 Summary

All of our 2014 acquisitions resulted in 100% ownership of the acquired companies. The operating results of the acquired companies described above were not material to our consolidated financial statements and were included within our results from the respective acquisition dates. Our 2014 acquisitions contributed aggregate revenues of approximately $181, $183 and $130 to our 2016, 2015 and 2014 total revenues, respectively, from their respective acquisition dates. The purchase prices for all acquisitions were primarily allocated to intangible assets and goodwill based on third-party valuations and management's estimates.

Contingent Consideration

In connection with certain acquisitions, we are obligated to make contingent payments if specified contractual performance targets are achieved. Contingent consideration obligations are recorded at their respective fair value. In December 2016, we reversed approximately $12 related to a settlement of a previous years acquisition contingency. As of December 31, 2016, the maximum aggregate amount of outstanding contingent obligations to former owners of acquired entities was approximately $13, of which $11 was accrued representing the estimated fair value of this obligation.

Refer to Note 7 - Goodwill and Intangible Assets, Net for additional information regarding Acquisitions.

Note 4 – Divestitures

Information Technology Outsourcing (ITO)

In December 2014, we announced an agreement to sell our ITO business to Atos and began reporting it as a Discontinued Operation. All prior periods were accordingly revised to conform to this presentation. The sale was completed on June 30, 2015. The final sale price of approximately $940 ($930 net of cash sold) reflects closing adjustments, including an adjustment for changes in net asset values and additional proceeds for the condition of certain assets at the closing. Atos also assumed approximately $85 of capital lease obligations and pension liabilities. Net after-tax proceeds are estimated to be approximately $850, which reflects expected cash taxes as well as our transaction and transition costs associated with the disposal. The ITO business included approximately 9,600 employees in 42 countries, who were transferred to Atos upon closing.

In 2014, we recorded a net pre-tax loss of $181 related to the pending sale, reflecting the write-down of the carrying value of the ITO disposal group, inclusive of goodwill, to its estimated fair value less costs to sell. In 2015, we recorded an additional net pre-tax loss of $77 primarily at closing related to an adjustment of the sales price and related expenses associated with the disposal, as well as reserves for certain obligations and indemnifications we retained as part of the final closing negotiations. In addition, we recorded additional tax expense of $52 primarily related to the difference between the book basis and tax basis of allocated goodwill, which could only be recorded upon final disposal of the business.

In February 2016, we reached an agreement with Atos on the final adjustments to the closing balance of net assets sold as well as the settlement of certain indemnifications and recorded an additional pre-tax loss on the disposal in 2015 of $24 ($14 after-tax). The additional loss was recorded in 2015 as the financial statements had not yet been issued when the agreement was reached with Atos. We made a payment in 2016 to Atos of approximately $52, representing a $28 adjustment to the final sales price as a result of this agreement and a payment of $24 due from closing. The payment is reflected in Investing cash flows as an adjustment of the sales proceeds.

Other Discontinued Operations

In May 2014 we sold our **Truckload Management Services, Inc. (TMS)** business for $15 and recorded a net pre-tax loss on disposal of $1. TMS provided document capture and submission solutions as well as campaign management, media buying and digital marketing services to the long haul trucking and transportation industry.

Summarized financial information for our Discontinued Operations is as follows:

	Year Ended December 31,				
	2015		2014		
	ITO	Total	ITO	TMS	Total
Revenues	$ 619	$ 619	$ 1,320	$ 18	$ 1,338
Income (loss) from operations [1],[2]	$ 104	$ 104	$ 74	$ —	$ 74
Loss on disposal	(101)	(101)	(181)	(1)	(182)
Net income (loss) before income taxes	$ 3	$ 3	$ (107)	$ (1)	$ (108)
Income tax expense	(81)	(81)	(5)	(2)	(7)
Loss from discontinued operations, net of tax	$ (78)	$ (78)	$ (112)	$ (3)	$ (115)

(1) ITO income from operations for the year ended December 31, 2015, excludes approximately $80 of depreciation and amortization expense (including $14 for intangible amortization) since the business was held for sale.

(2) ITO Income from operations for the year ended December 31, 2014 includes approximately $160 of depreciation and amortization expense (including $27 for intangible amortization).

The following is a summary of selected financial information of the ITO business for the two years ended December 31,:

	Year Ended December 31,	
	2015	2014
Expenses:		
Depreciation of buildings and equipment[1]	$ —	$ 98
Amortization of internal use software[1]	—	9
Amortization of acquired intangible assets[1]	—	27
Amortization of customer contract costs[1]	—	26
Operating lease rent expense	130	258
Defined contribution plans	4	8
Interest expense [2]	2	4
Expenditures:		
Cost of additions to land, buildings and equipment	$ 41	$ 105
Cost of additions to internal use software	1	2
Customer-related deferred set-up/transition and inducement costs	10	26

(1) ITO income from operations for the year ended December 31, 2015, excludes approximately $80 of depreciation and amortization expense (including $14 for intangible amortization) since the business was held for sale.

(2) Interest expense is related to capital lease obligations, which were assumed by the purchaser of the ITO business.

Note 5 – Accounts Receivable, Net

Accounts receivable, net were as follows:

	December 31,	
	2016	2015
Amounts billed or billable	$ 1,014	$ 963
Unbilled amounts	279	289
Allowance for doubtful accounts	(7)	(6)
Accounts Receivable, Net	$ 1,286	$ 1,246

Unbilled amounts include amounts associated with percentage-of-completion accounting and other earned revenues not currently billable due to contractual provisions. Amounts to be invoiced in subsequent months for current services provided are included in amounts billable, and at December 31, 2016 and 2015 were approximately $429 and $443, respectively.

We perform ongoing credit evaluations of our customers and adjust credit limits based upon customer payment history and current creditworthiness. The allowance for uncollectible accounts receivables is determined principally on the basis of past collection experience as well as consideration of current economic conditions and changes in our customer collection trends.

Accounts Receivable Sales Arrangements

Accounts receivable sales arrangements were utilized in the normal course of business as part of our cash and liquidity management. We have facilities in the U.S. and Europe that enable us to sell certain accounts receivable without recourse to third-parties. The accounts receivables sold are generally short-term trade receivables with payment due dates of less than 60 days. All of our arrangements involve the sale of our entire interest in groups of accounts receivable for cash.

Under most of the agreements, we continue to service the sold accounts receivable. When applicable, a servicing liability is recorded for the estimated fair value of the servicing. The amounts associated with the servicing liability were not material.

Of the accounts receivables sold and derecognized from our balance sheet, zero remained as uncollected as of December 31, 2016 and $136 remained uncollected as of December 31, 2015. Accounts receivable sales were as follows:

	Year Ended December 31,		
	2016	2015	2014
Accounts receivable sales	$ 250	$ 325	$ 343
Estimated increase (decrease) to operating cash flows[1]	(136)	58	(4)

_____

(1) Represents the difference between current and prior year fourth quarter receivable sales adjusted for the effects of: (i) deferred proceeds, (ii) collections prior to the end of the year and (iii) currency.

Note 6 - Land, Buildings, Equipment and Software, Net

Land, buildings and equipment, net were as follows:

	Estimated Useful Lives	December 31,	
	(Years)	2016	2015
Land		$ 10	$ 10
Building and building equipment	25 to 50	20	28
Leasehold improvements	Varies	236	208
Office furniture and equipment	3 to 15	719	689
Other	4 to 20	1	3
Construction in progress		54	26
Subtotal		1,040	964
Accumulated depreciation		(757)	(684)
Land, Buildings and Equipment, Net		$ 283	$ 280

Depreciation expense and operating lease rent expense were as follows:

	Year Ended December 31,		
	2016	2015	2014
Depreciation expense	$ 130	$ 126	$ 145
Operating lease rent expense	$ 378	$ 389	$ 385

We lease buildings and equipment, substantially all of which are accounted for as operating leases. Certain leases were accounted for as capital leases and the remaining net book value of those assets, included in Land, Buildings and Equipment, Net were approximately $42 and $57 at December 31, 2016 and 2015, respectively.

Future minimum operating lease commitments that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2016 were as follows:

2017	2018	2019	2020	2021	Thereafter
$ 176	$ 127	$ 89	$ 56	$ 36	$ 46

Internal Use and Product Software[1]

Additions to Internal Use and Product Software as well as year-end balances for these assets were as follows:

	Year Ended December 31,		
Additions to:	2016	2015	2014
Internal use software	$ 39	$ 27	$ 27
Product software	10	19	23

	December 31,	
Capitalized Costs, Net	2016	2015
Internal use software	$ 115	$ 119
Product software	38	107

Useful lives of our internal use and product software generally vary from three to seven years.

Included within product software at December 31, 2016 and 2015 is $3 and $53, respectively, of capitalized costs associated with software system platforms developed for use in certain of our government services businesses.

During 2016 we determined that it is probable that we will not fully complete our NY MMIS project in its current form. As a result of this decision an impairment charge of approximately $28 was recorded in Cost of outsourcing. We also recorded an additional impairment charge in 2016 related to the 2015 HE charge of approximately $9 in Restructuring and asset impairment. In 2015 we decided to discontinue certain future implementations of these software system platforms, and recorded an impairment charge of $160 ($14 in Cost of outsourcing and $146 in Restructuring and asset impairments).

_____

(1) *Balances included in Other Long-term assets, refer to Note 9 - Supplementary Financial Information for additional information.*

Note 7 - Goodwill and Intangible Assets, Net

Goodwill

The following table presents the changes in the carrying amount of goodwill, by reportable segment:

	Commercial Industries	Healthcare	Public Sector	Total
Balance at December 31, 2014	$ 1,939	$ 1,123	$ 1,722	$ 4,784
Foreign currency translation	(30)	(9)	(18)	(57)
Acquisitions:				
RSA Medical	—	107	—	107
Intellinex	19	—	—	19
Consilience	—	12	—	12
Reclassifications[(1)]	(61)	61	—	—
Other	—	7	—	7
Balance at December 31, 2015	$ 1,867	$ 1,301	$ 1,704	$ 4,872
Foreign currency translation	(22)	(8)	(14)	(44)
Acquisitions: RSA Medical	—	(2)	—	(2)
Disposition: Nuova Karel Solutions	(2)	—	—	(2)
Impairment	(935)	—	—	(935)
Balance at December 31, 2016	$ 908	$ 1,291	$ 1,690	$ 3,889

_____

(1) Represents the reclassification of certain Healthcare contracts from our Commercial Industries segment to our Healthcare segment.

2016 Impairment Charge

As required by ASC 350 Intangibles - Goodwill and Other, we annually test the goodwill of our reporting units for impairment. For Step 1 of the test, as in prior years, we determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach to calculate fair value for each reporting unit. We then compare the fair value of each reporting unit to its carrying value. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. We apply a two-thirds and one-third weighting to the results of the Income Approach and the Market Approach, respectively, to calculate the fair value of each reporting unit's equity.

In 2016, based on the declining operating results of our Commercial Industries reporting unit, including a weak fourth quarter, we determined to proceed to the quantitative assessment of the recoverability of our goodwill balances for each of our reporting units in performing our annual impairment test. Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value by approximately 53%, indicating an impairment. Accordingly, based on Step 2 of the impairment process, we recorded a pre-tax goodwill impairment charge of $935 during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). After the charge, the goodwill of the Commercial Industries reporting unit approximates fair value. Our Healthcare and Public Sector reporting units passed Step 1 of the impairment test with fair value exceeding carrying value by approximately 19% and 14%, respectively.

Intangible Assets, Net

Net intangible assets were $1,144 at December 31, 2016 of which $458, $264 and $422 relate to our Commercial Industries, Healthcare and Public Sector segments, respectively. Intangible assets were comprised of the following:

		December 31, 2016			December 31, 2015		
	Weighted Average Amortization	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Customer relationships	12 years	$ 2,924	$ 1,788	$ 1,136	$ 2,927	$ 1,528	$ 1,399
Trademarks	9 years	—	—	—	22	4	18
Technology, patents and non-compete	4 years	11	3	8	13	5	8
Total Intangible Assets		$ 2,935	$ 1,791	$ 1,144	$ 2,962	$ 1,537	$ 1,425

Amortization expense related to intangible assets was $280, $250, and $250 for the years ended December 31, 2016, 2015 and 2014, respectively. 2016 included $14 of accelerated amortization of Trademarks related to our re-branding to Conduent and $16 related to the accelerated amortization of RSA due to the loss of a large customer in customer relationships. Excluding the impact of additional acquisitions, amortization expense is expected to approximate $243 in 2017, $242 in 2018, $241 in 2019, $238 in 2020 and $136 in 2021.

Note 8 – Restructuring Programs and Asset Impairment Charges

We engage in a series of restructuring programs related to downsizing our employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce our cost structure and improve productivity. These initiatives primarily consist of severance actions and impact all major geographies and segments. Management continues to evaluate our business, therefore, in future years, there may be additional provisions for new plan initiatives as well as changes in previously recorded estimates as payments are made or actions are completed. Asset impairment charges were also incurred in connection with these restructuring actions for those assets sold, abandoned or made obsolete as a result of these programs.

Costs associated with restructuring, including employee severance and lease termination costs are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of our restructuring program activity during the three years ended December 31, 2016 is as follows:

	Severance and Related Costs	Lease Cancellation and Other Costs	Asset Impairments[1]	Total
Balance at December 31, 2013	$ 14	$ 3	$ —	$ 17
Restructuring provision	28	2	2	32
Reversals of prior accruals	(10)	(1)	—	(11)
Net current period charges - continuing operations[2]	18	1	2	21
Discontinued operations[3]	2	—	—	2
Total Net Current Period Charges	20	1	2	23
Charges against reserve and currency	(26)	(1)	(2)	(29)
Balance at December 31, 2014	8	3	—	11
Restructuring provision	20	1	146	167
Reversals of prior accruals	(6)	(2)	—	(8)
Net current period charges - continuing operations[2]	14	(1)	146	159
Charges against reserve and currency	(18)	(2)	(146)	(166)
Balance at December 31, 2015	4	—	—	4
Restructuring provision	67	7	12	86
Reversals of prior accruals	(13)	—	—	(13)
Net current period charges - continuing operations[2]	54	7	12	73
Charges against reserve and currency	(43)	(2)	(11)	(56)
Balance at December 31, 2016	$ 15	$ 5	$ 1	$ 21

(1) Charges associated with asset impairments represent the write-down of the related assets to their new cost basis and are recorded concurrently with the recognition of the provision.
(2) Represents amount recognized within the Consolidated Statements of Income for the years shown.
(3) Refer to Note 4 - Divestitures for additional information regarding Discontinued Operations.

We also recorded costs related to professional support services associated with the implementation of the strategic transformation program of $28 during the year ended December 31, 2016.The following table summarizes the reconciliation to the Consolidated Statements of Cash Flows:

	Year Ended December 31,		
	2016	2015	2014
Charges against reserve	$ (56)	$ (166)	$ (29)
Asset impairments	11	146	2
Effects of foreign currency and other non-cash items	(1)	1	4
Restructuring Cash Payments	$ (46)	$ (19)	$ (23)

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Year Ended December 31,		
	2016	2015	2014
Commercial Industries	$ 41	$ 8	$ 11
Healthcare	19	3	4
Public Sector	9	2	4
Other[1]	4	146	2
Total Net Restructuring Charges	$ 73	$ 159	$ 21

(1) Refer to Note 6 - Land, Buildings, Equipment and Software, Net for additional information regarding the asset impairment in 2015.

Note 9 - Supplementary Financial Information

The components of Other assets and liabilities were as follows:

	December 31,	
	2016	2015
Other Current Assets		
Prepaid/deferred costs	$ 87	$ 92
Income taxes receivable	14	10
Value-added tax (VAT) receivable	18	16
Restricted cash	22	16
Inventories[1]	41	41
Advances and deposits	29	28
Other	30	37
Total Other Current Assets	$ 241	$ 240
Other Current Liabilities		
Income taxes payable	$ 5	$ 9
Other taxes payable	14	21
Consulting payable	12	11
Restructuring reserves	18	4
Legal settlements	78	57
Acquisition reserves	2	9
Due to customers	13	19
Software and hardware accruals	20	35
Servicer liabilities	—	10
Due to Atos[2]	—	52
Health Enterprise settlement	48	216
NY MMIS wind down cost accrual	46	—
Other	355	402
Total Other Current Liabilities	$ 611	$ 845
Other Long-term Assets		
Deferred taxes	$ 14	$ 13
Income taxes receivable	17	—
Prepaid pension costs	—	9
Internal use software, net	115	119
Product software, net	38	107
Customer contract costs, net	137	170
Deferred compensation plan investments	109	113
Unbilled contract receivables	14	53
Other	32	23
Total Other Long-term Assets	$ 476	$ 607
Other Long-term Liabilities		
Income taxes payable	17	24
Unearned income	74	100
Other	82	77
Total Other Long-term Liabilities	$ 173	$ 201

_____

(1) Represents Finished goods inventory.
(2) Refer to Note 4 - Divestitures for additional information.

Restricted Cash

As more fully discussed in Note 5 - Accounts Receivable, Net, we continue to service the receivables sold under most of our receivable sale agreements. As servicer, we may collect cash related to sold receivables prior to year-end that will be remitted to the purchaser the following year. Since we are acting on behalf of the purchaser in our capacity as servicer, such cash collected is reported as restricted cash. Restricted cash amounts are classified in our Consolidated Balance Sheets based on when the cash will be contractually or judicially released.

Restricted cash amounts were as follows:

	December 31,	
	2016	2015
Escrow and cash collections related to receivable sales	$ —	$ 10
Restricted cash - related party[1]	18	—
Other restricted cash	4	6
Total Restricted Cash	$ 22	$ 16

(1) *Represents restricted cash associated with former parent guarantees of our contractual performance. Amounts will be held in escrow until the parent guarantees have been removed from the underlying customer, vendor or lease contracts.*

NY MMIS and Health Enterprise

Due to a number of factors with the implementation of the Health Enterprise platform in New York ("NY MMIS"), we believe that it is probable that we will not fully complete the implementation; therefore, in the fourth quarter of 2016, we recorded a charge of approximately $161 reflecting estimated asset impairments, wind down costs and other impacts from this project. The charge included $83 for write-off of contract receivables, $28 related to the non-cash impairment of software, $14 for the write-off of customer contract costs and $36 for other related assets and liabilities. The balance of wind down costs of $46 expected to be cash outflows in future quarters.

Late in third quarter 2015, discussions took place with our Medicaid clients in California and Montana regarding the status and scope of our current Health Enterprise platform projects in those states. Based on those discussions, we determined that we would not fully complete the implementation of the platform in these states.

As a result of the determination that we would not complete these platform implementations, we recorded a pre-tax charge of $389 reflecting write-offs and estimated settlement costs as well as other impacts from this determination. The charge included $116 for the write-off of contract receivables (primarily non-current), $34 related to the non-cash impairment of the Health Enterprise software and deferred contract set-up and transition costs and $23 for other related assets and liabilities. The balance of settlement costs, including payments to subcontractors, was $48 at December 31, 2016, and is expected to be cash outflows in future quarters.

Note 10 – Debt

Short-term borrowings were as follows:

	December 31,	
	2016	2015
Related party notes payable[(1)]	$ —	$ 1,132
Current maturities of long-term debt	28	24
Total Short-term Debt	$ 28	$ 1,156

(1) Refer to Note 20 - Related Party Transactions and Former Parent Company Investment for additional information.

We classify our debt based on the contractual maturity dates of the underlying debt instruments or as of the earliest put date available to the debt holders. We defer costs associated with debt issuance over the applicable term. These costs are amortized as interest expense in our Consolidated Statements of Income.

Long-term debt was as follows:

	Weighted Average Interest Rates at December 31, 2016[1]	December 31, 2016	December 31, 2015
Term loan A due 2021	2.99%	$ 694	$ —
Term loan B due 2023	6.81%	750	—
Senior notes due 2024	10.51%	510	—
Capital lease obligations	3.89%	43	61
Principal Debt Balance		$ 1,997	$ 61
Debt issuance costs and unamortized discounts		(56)	—
Less: current maturities		(28)	(24)
Total Long-term Debt		$ 1,913	$ 37

(1) Represents weighted average effective interest rate which includes the effect of discounts and premiums on issued debt.

Scheduled principal payments due on our long-term debt for the next five years and thereafter are as follows:

2017[1]	2018	2019	2020	2021	Thereafter	Total
$ 28	$ 72	$ 67	$ 79	$ 528	$ 1,223	$ 1,997

(1) Quarterly long-term debt maturities for 2017 are $7, $7, $7 and $7 for the first, second, third and fourth quarters, respectively.

Credit Facility

On December 7, 2016, we entered into a $2.2 billion senior secured credit agreement (Credit Agreement) among the Company, its subsidiaries Xerox Business Services, LLC (XBS), Affiliated Computer Services International B.V. and Conduent Finance, Inc. (CFI), the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains senior secured credit facilities (Senior Credit Facilities) consisting of:

(i) Senior Secured Term Loan A (Term Loan A) due 2021 with an aggregate principal amount of $700;
(ii) Senior Secured Term Loan B (Term Loan B) due 2023 with an aggregate principal amount of $750;
(iii) Senior Revolving Credit Facility (Revolving Credit Facility) due 2021 with an aggregate available amount of $750 including a sublimit for up to $300 available for the issuance of letters of credit.

Borrowings under the Term Loan A Facility and the Revolving Credit Facility will bear interest at a rate equal to either the sum of a base rate plus a margin ranging from 1.00% and 1.50% or the sum of a Eurocurrency rate plus an applicable rate ranging from 2.00% to 2.50%, with either such margin varying according to the total net leverage ratio of XBS. Borrowing under Term Loan B Facility will bear interest at a rate equal to the sum of a base rate plus 4.5%, or the sum of a Eurocurrency rate plus 5.5%. XBS is required to pay a quarterly commitment fee under the Revolving Credit Facility at a rate ranging from 0.35% to 0.40% per annum, with such rate varying according to the total net leverage ratio of XBS and the actual daily unused portion of the commitments during the applicable quarter. XBS is also required to pay a fee equal to the adjusted LIBOR on the aggregate face amount of outstanding letters of credit under the Revolving Credit Facility.

The Credit Agreement permits us to incur incremental term loan borrowings and /or increase commitments under the Revolving Credit Facility, subject to certain limitations and satisfaction of certain conditions, in an aggregate amount not to exceed (i) $300 plus, (ii) if the senior secured net leverage ratio of XBS and its subsidiaries does not exceed 2.25 to 1.00 on a pro forma basis (without giving effect to any incurrence under clause (i) that is incurred substantially simultaneously with amounts incurred under clause (ii)), an unlimited amount.

All obligations under the Senior Credit Facilities are unconditionally guaranteed by the Company, XBS, CFI and the existing and future direct and indirect wholly owned domestic subsidiaries of XBS (subject to certain exceptions). All obligations under the Senior Credit Facilities, and the guarantees of those obligations, are secured, subject to certain exceptions, by substantially all of the assets of XBS and the guarantors under the Senior Credit Facilities (other than the Company and CFI), including a first-priority pledge of all the capital stock of XBS and the subsidiaries of XBS directly held by XBS or the guarantors (other than the Company and CFI) under the Senior

Credit Facilities (which pledge, in the case of any foreign subsidiary, will be limited to 65% of the capital stock of any first-tier foreign subsidiary).

The Credit Facility contains certain customary affirmative and negative covenants, restrictions and events of default. XBS is required to maintain a total net leverage ratio not to exceed 4.25 to 1.00 (a quarterly test) for each quarter through September 30, 2018 and 3.75 to 1.00 for each quarter thereafter.

The net proceeds of the borrowings under the Term Loan A of $700 (approximately $278 borrowed in Euros) and Term Loan B of $750, were used to purchase our international subsidiaries from Xerox Corporation, to pay a distribution to Xerox Corporation and for working capital and other general corporate purposes. At December 31, 2016 we had $1,444 outstanding borrowings under our Credit Facility and had utilized $17 of our Revolving Credit Facility capacity to issue letters of credit. Discounts and debt issuance costs of $39 were deferred.

Senior Notes

On December 7, 2016, XBS and CFI, each a wholly owned subsidiary of the Company, issued $510 Senior Unsecured Notes due 2024 bearing interest at 10.5% (the "Senior Notes"). Interest is payable semi-annually, beginning on June 15, 2017. Discounts and debt issuance costs of $17 were deferred.

At the option of the Issuers, the Senior Notes are redeemable in whole or in part, at any time prior to December 15, 2020, at a price equal to 100% of the aggregate principal amount of the Senior Notes plus accrued and unpaid interest, if any, to, but excluding, the redemption date plus a “make-whole” premium. The Issuers may also redeem the Senior Notes, in whole or in part, at any time on or after December 15, 2020, at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to but excluding the redemption date. Additionally, at any time prior to December 15, 2019, the Issuers may redeem up to 35% of the aggregate principal amount of the Senior Notes with the net cash proceeds from certain equity offerings at a price equal to 110.50% of the principal amount of the Senior Notes, plus accrued and unpaid interest, if any, to, but excluding, the redemption date.

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or XBS that guarantee the obligations under the Senior Credit Facilities.

Proceeds from the issuance were used to fund a portion of the transfer of cash to Xerox Corporation in connection with the Spin-Off.

Interest

Interest paid on our short-term and long-term debt amounted to $6, $9 and $13 for the years ended December 31, 2016, 2015 and 2014, respectively.

Interest expense and interest income was as follows:

	Year Ended December 31,		
	2016	2015	2014
Interest expense	$ 14	$ 8	$ 11
Interest income	3	3	1

Note 11 – Financial Instruments

We are exposed to market risk from changes in foreign currency exchange rates and interest rates, which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We enter into limited types of derivative contracts to manage foreign currency exposures. Our primary foreign currency market exposures include the Philippine Peso, Indian Rupee and Mexican Peso. The fair market values of all our derivative contracts change with fluctuations in interest rates or currency exchange rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. Derivative financial instruments are held solely as risk management tools and not for trading or speculative purposes. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

We do not believe there is significant risk of loss in the event of non-performance by the counterparty associated with our derivative instruments because these transactions are executed with a major financial institution. Further, our policy is to deal only with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties.

Summary of Foreign Exchange Hedging Positions

At December 31, 2016, we had outstanding forward exchange with gross notional values of $139, which is typical of the amounts that are normally outstanding at any point during the year.

Approximately 61% of these contracts mature within three months, 15% in three to six months, 18% in six to twelve months and less than 6% in greater than 12 months.

The following is a summary of the primary hedging positions and corresponding fair values as of December 31, 2016:

Currencies Hedged (Buy/Sell)	Gross Notional Value	Fair Value Asset (Liability)[1]
Philippine Peso/U.S. Dollar	$ 52	$ (1)
Indian Rupee/U.S. Dollar	33	—
Mexican Peso/U.S. Dollar	18	(1)
Euro/U.S. Dollar	10	—
All Other	26	—
Total Foreign Exchange Hedging	$ 139	$ (2)

(1) Represents the net receivable (payable) amount included in the Consolidated Balance Sheet at December 31, 2016.

Foreign Currency Cash Flow Hedges

We designate a portion of our foreign currency derivative contracts as cash flow hedges of our foreign currency-denominated expenses. The net liability fair value of these contracts were $3 and $3 as of December 31, 2016 and December 31, 2015, respectively.

Summary of Derivative Instruments Fair Value

The following table provides a summary of the fair value amounts of our derivative instruments:

		December 31,	
Designation of Derivatives	Balance Sheet Location	2016	2015
Derivatives Designated as Hedging Instruments			
Foreign exchange contracts – forwards	Other current liabilities	$ (3)	$ (3)
Derivatives NOT Designated as Hedging Instruments			
Foreign exchange contracts – forwards	Other current assets	$ 1	$ —

Summary of Derivative Instruments Gains (Losses)

Derivative gains and (losses) affect the income statement based on whether such derivatives are designated as hedges of underlying exposures. The following is a summary of derivative gains and (losses).

Designated Cash Flow Derivative Instruments Gains (Losses)

The following tables provide a summary of gains (losses) on derivative instruments:

	Year Ended December 31,						
	Derivative Gain (Loss) Recognized in OCI (Effective Portion)			Location of Derivative Gain (Loss) Reclassified from AOCI into Income (Effective Portion)	Gain (Loss) Reclassified from AOCI to Income (Effective Portion)		
Derivatives in Cash Flow Hedging Relationships	2016	2015	2014		2016	2015	2014
Foreign exchange contracts – forwards	$ (2)	$ (4)	$ —	Cost of outsourcing	$ (2)	$ (5)	$ 3

No amount of ineffectiveness was recorded in the Consolidated Statements of Income (Loss) for these designated cash flow hedges and all components of each derivative's gain or (loss) were included in the assessment of hedge effectiveness. In addition, no amount was recorded for an underlying exposure that did not occur or was not expected to occur.

As of December 31, 2016, net after-tax losses of $1 were recorded in accumulated other comprehensive loss associated with our cash flow hedging activity. The entire balance is expected to be reclassified into net income within the next 12 months, providing an offsetting economic impact against the underlying anticipated transactions.

Non-Designated Derivative Instruments Losses

Non-designated derivative instruments are primarily instruments used to hedge foreign currency-denominated assets and liabilities. They are not designated as hedges since there is a natural offset for the re-measurement of the underlying foreign currency-denominated asset or liability.

The following table provides a summary of losses on non-designated derivative instruments:

		Year Ended December 31,		
Derivatives NOT Designated as Hedging Instruments	Location of Derivative Loss	2016	2015	2014
Foreign exchange contracts – forwards	Other expense – Currency losses, net	$ 1	$ 3	$ 2

During each of the three years ended December 31, 2016, 2015 and 2014, we recorded Currency gains (losses), net of $1, $(4) and $1, respectively. Currency gains (losses), net, includes the mark-to-market adjustments of the derivatives not designated as hedging instruments and the related cost of those derivatives, as well as the re-measurement of foreign currency-denominated assets and liabilities.

Note 12 – Fair Value of Financial Assets and Liabilities

The following table represents assets and liabilities fair value measured on a recurring basis. The basis for the measurement at fair value in all cases is Level 2 – Significant Other Observable Inputs.

	As of December 31,	
	2016	2015
Assets:		
Foreign exchange contracts - forwards	$ 1	$ —
Deferred compensation investments in cash surrender life insurance	99	92
Deferred compensation investments in mutual funds	10	21
Total	$ 110	$ 113
Liabilities:		
Foreign exchange contracts - forwards	$ 3	$ 3
Deferred compensation plan liabilities	113	110
Total	$ 116	$ 113

We utilize the income approach to measure the fair value for our derivative assets and liabilities. The income approach uses pricing models that rely on market observable inputs such as yield curves, currency exchange rates and forward prices, and therefore are classified as Level 2.

Fair value for our deferred compensation plan investments in company-owned life insurance is reflected at cash surrender value. Fair value for our deferred compensation plan investments in mutual funds is based on quoted market prices for actively traded investments similar to those held by the plan. Fair value for deferred compensation plan liabilities is based on the fair value of investments corresponding to employees' investment selections, based on quoted prices for similar assets in actively traded markets.

Summary of Other Financial Assets and Liabilities Fair Value Measured on a Nonrecurring Basis

The estimated fair values of our other financial assets and liabilities fair value measured on a nonrecurring basis were as follows:

	December 31, 2016		December 31, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	$ 390	$ 390	$ 140	$ 140
Restricted cash - related party	18	18	—	—
Accounts receivable, net	1,286	1,286	1,246	1,246
Short-term debt	28	28	24	24
Long-term debt	1,913	1,933	37	37

The fair value amounts for Cash and cash equivalents, Restricted cash - related party and Accounts receivable, net, approximate carrying amounts due to the short maturities of these instruments. The fair value of Short and Long-term debt was estimated based on the current rates offered to us for debt of similar maturities (Level 2). The difference between the fair value and the carrying value represents the theoretical net premium or discount we would pay or receive to retire all debt at such date.

The fair value of the Goodwill impairment charge of $935 recorded in 2016, was estimated based on a determination of the implied fair value of goodwill, leveraging discounted cash flows (Level 3). Refer to Note 7 - Goodwill and Intangible Assets for additional information regarding this impairment.

Note 13 – Employee Benefit Plans

Our defined benefit pension plans are primarily associated with certain employees in our Human Resources and Consulting business located in the U.S., Canada and the United Kingdom (U.K.). Prior to an amendment to freeze future service benefits, these defined benefit pension plans had provided benefits for participating employees based on years of service and average compensation for a specified period before retirement (see Plan Amendment below for further information).

Certain of our employees participate in post-employment medical plans. These plans are not material to our results of operations or financial position and are not included in the disclosures below.

December 31 is the measurement date for all of our defined benefit pension plans.

	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
	2016	2015	2016	2015
Change in Benefit Obligation:				
Benefit obligation, January 1	$ 74	$ 74	$ 157	$ 177
Service cost	—	—	2	3
Interest cost	3	3	5	6
Actuarial (gain) loss	13	(2)	27	(13)
Currency exchange rate changes	—	—	(19)	(14)
Benefits paid/settlements	(1)	(1)	(8)	(5)
Other	—	—	—	3
Benefit Obligation, December 31	$ 89	$ 74	$ 164	$ 157
Change in Plan Assets:				
Fair value of plan assets, January 1	$ 47	$ 45	$ 150	$ 158
Actual return on plan assets	2	(2)	15	3
Employer contribution	4	4	2	4
Currency exchange rate changes	—	—	(19)	(12)
Benefits paid/settlements	(1)	(1)	(8)	(5)
Other	—	1	—	2
Fair Value of Plan Assets, December 31	$ 52	$ 47	$ 140	$ 150
Net Funded Status at December 31[1]	$ (37)	$ (27)	$ (24)	$ (7)
Amounts Recognized in the Consolidated Balance Sheets:				
Other long-term assets	$ —	$ —	$ —	$ 9
Accrued compensation and benefit costs	—	—	(2)	(1)
Pension and other benefit liabilities	(37)	(27)	(22)	(15)
Net Amounts Recognized	$ (37)	$ (27)	$ (24)	$ (7)

(1) Includes under-funded and un-funded plans.

Benefit plans pre-tax amounts recognized in Accumulated other comprehensive loss (AOCL) at December 31:

	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
	2016	2015	2016	2015
Net actuarial loss	$ 31	$ 18	$ 42	$ 29
Accumulated Benefit Obligation	$ 89	$ 74	$ 157	$ 154

Aggregate information for pension plans with an Accumulated benefit obligation in excess of plan assets is presented below:

	December 31, 2016			December 31, 2015		
	Projected benefit obligation	Accumulated benefit obligation	Fair value of plan assets	Projected benefit obligation	Accumulated benefit obligation	Fair value of plan assets
Underfunded Plans:						
U.S.	$ 89	$ 89	$ 52	$ 74	$ 74	$ 46
Non U.S.	162	156	140	50	48	36
Unfunded Plans:						
Non U.S.	2	1	—	2	1	—
Total Underfunded and Unfunded Plans:						
U.S.	$ 89	$ 89	$ 52	$ 74	$ 74	$ 46
Non U.S.	164	157	140	52	49	36
Total	$ 253	$ 246	$ 192	$ 126	$ 123	$ 82

Our pension plan assets and benefit obligations at December 31, 2016 were as follows:

	Fair Value of Pension Plan Assets	Pension Benefit Obligations	Net Funded Status
U.S.	$ 52	$ 89	$ (37)
U.K.	98	107	(9)
Canada	39	49	(10)
Other	3	8	(5)
Total	$ 192	$ 253	$ (61)

The components of Net periodic benefit cost and other changes in plan assets and benefit obligations were as follows:

	Year Ended December 31,					
	U.S. Plans			Non-U.S. Plans		
	2016	2015	2014	2016	2015	2014
Components of Net Periodic Benefit Costs:						
Service cost	$ —	$ —	$ 5	$ 2	$ 3	$ 6
Interest cost	3	3	3	5	6	7
Expected return on plan assets	(4)	(4)	(3)	(8)	(9)	(10)
Recognized net actuarial loss	—	—	—	1	2	—
Defined Benefit Plans	(1)	(1)	5	—	2	3
Defined contribution plans	28	28	27	7	6	4
Net Periodic Benefit Cost	27	27	32	7	8	7
Other changes in plan assets and benefit obligations recognized in Other Comprehensive Income:						
Net actuarial (gain) loss	13	4	9	18	(9)	34
Amortization of net actuarial loss	—	—	—	(1)	(2)	—
Total Recognized in Other Comprehensive Income	13	4	9	17	(11)	34
Total Recognized in Net Periodic Benefit Cost and Other Comprehensive Income	$ 40	$ 31	$ 41	$ 24	$ (3)	$ 41

The net actuarial loss for the defined benefit pension plans that will be amortized from AOCL into net periodic benefit cost over the next fiscal year is $2.

Plan Amendments

Pension Plan Freezes

In 2015, we amended several of our major defined benefit pension plans to freeze current benefits and eliminate benefits accruals for future service, including our plans in the U.S., Canada and the U.K. The freeze of current benefits is the primary driver of the reduction in pension service costs since 2015. In certain Non-U.S. plans, we are required to continue to consider salary increases and inflation in determining the benefit obligation related to prior service.

Plan Assets

Current Allocation

As of the 2016 and 2015 measurement dates, the global pension plan assets were $192 and $197, respectively. These assets were invested among several asset classes.

The following tables presents the defined benefit plans assets measured at fair value and the basis for that measurement:

	December 31, 2016									
	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 3	$ —	$ —	$ 3	6%	$ —	$ —	$ —	$ —	—%
Equity Securities	9	24	—	33	63%	—	61	—	61	44%
Fixed Income Securities	10	6	—	16	31%	—	60	—	60	43%
Other	—	—	—	—	—%	—	11	8	19	13%
Total Fair Value of Plan Assets	$ 22	$ 30	$ —	$ 52	100%	$ —	$ 132	$ 8	$ 140	100%

	December 31, 2015									
	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 3	$ —	$ —	$ 3	6%	$ 1	$ —	$ —	$ 1	1%
Equity Securities	17	8	—	25	53%	—	61	—	61	40%
Fixed Income Securities	—	19	—	19	41%	—	73	—	73	49%
Other	—	—	—	—	—%	—	4	11	15	10%
Total Fair Value of Plan Assets	$ 20	$ 27	$ —	$ 47	100%	$ 1	$ 138	$ 11	$ 150	100%

Valuation Method

Our primary Level 3 assets are Real Estate and Guaranteed Investment Contract investments which are individually immaterial. The fair value of our real estate investment funds are based on the Net Asset Value (NAV) of our ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for our Guaranteed Investment Contract investments have been determined based on the higher of the surrender value of the contract or the present value of the cash flow of the related pension obligations. The valuation techniques and inputs for our Level 3 assets have been consistently applied for all periods presented.

Investment Strategy

The target asset allocations for our worldwide defined benefit pension plans were:

	2016		2015	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Equity investments	55%	41%	55%	55%
Fixed income investments	25%	45%	25%	36%
Real estate	—%	4%	—%	4%
Other	20%	10%	20%	5%
Total Investment Strategy	100%	100%	100%	100%

We employ a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by exceeding the interest growth in long-term plan liabilities. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. This consideration involves the use of long-term measures that address both return and risk. The investment portfolio contains a diversified blend of equity and fixed income investments. Furthermore, equity investments are diversified across U.S. and non-U.S. stocks, as well as growth, value and small and large capitalizations. Other assets such as real estate, are used to improve portfolio diversification. Derivatives may be used to hedge market exposure in an efficient and timely manner; however, derivatives may not be used to leverage the portfolio beyond the market value of the underlying investments. Investment risks and returns are measured and monitored on an ongoing basis through annual liability measurements and quarterly investment portfolio reviews.

Contributions

In 2016, we made cash contributions of $6 ($4 U.S. and $2 Non-U.S.) to our defined benefit pension plans.

In 2017, based on current actuarial calculations, we expect to make contributions of approximately $10 ($4 U.S. and $6 non-U.S.) to our defined benefit pension plans.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid during the following years:

	Pension Benefits		
	U.S.	Non-U.S.	Total
2017	$ 1	$ 4	$ 5
2018	2	4	6
2019	2	4	6
2020	2	4	6
2021	2	5	7
Years 2022-2025	16	27	43

Assumptions

Weighted-average assumptions used to determine benefit obligations at the plan measurement dates:

	Pension Benefits					
	2016		2015		2014	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	4.2%	3.2%	4.3%	3.9%	4.0%	3.4%
Rate of compensation increase	—%	1.0%	—%	1.0%	—%	1.1%

Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:

	Pension Benefits							
	2017		2016		2015		2014	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	4.2%	3.9%	4.3%	3.9%	4.0%	3.4%	4.9%	4.4%
Expected return on plan assets	7.8%	5.7%	7.8%	5.7%	7.8%	5.8%	7.8%	6.6%
Rate of compensation increase	—%	1.0%	—%	1.0%	—%	1.1%	3.0%	3.5%

Defined Contribution Plans

We have post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals (see "Plan Amendments" for additional information) were transitioned to an enhanced defined contribution plan. In these plans employees are allowed to contribute a portion of their salaries and bonuses to the plans, and we match a portion of the employee contributions. We recorded charges related to our defined contribution plans of $35 in 2016, $34 in 2015 and $31 in 2014.

Note 14 - Income Taxes

Prior to the Separation, Conduent's operating results were included in Xerox Corporation's various consolidated U.S. federal and state income tax returns, as well as non-U.S. tax filings. For the purposes of the Company's Consolidated and Combined Financial Statements for periods prior to the Separation, income tax expense and deferred tax balances have been recorded as if the Company filed tax returns on a standalone basis separate from Xerox. The Separate Return Method applies the accounting guidance for income taxes to the standalone financial statements as if the Company was a separate taxpayer and a standalone enterprise for fiscal 2016 and prior.

(Loss) income before income taxes (pre-tax (loss) income) was as follows:

	Year Ended December 31,		
	2016	2015	2014
Domestic (loss) income	$ (1,329)	$ (654)	$ (45)
Foreign (loss) income	102	80	55
(Loss) Income Before Income Taxes	$ (1,227)	$ (574)	$ 10

(Benefit) provision for income taxes were as follows:

	Year Ended December 31,		
	2016	2015	2014
Federal Income Taxes			
Current	$ (116)	$ (130)	$ 59
Deferred	(132)	(99)	(108)
Foreign Income Taxes			
Current	31	24	26
Deferred	(3)	6	1
State Income Taxes			
Current	1	(17)	14
Deferred	(25)	(22)	(16)
Total Benefit	$ (244)	$ (238)	$ (24)

A reconciliation of the U.S. federal statutory income tax rate to the consolidated effective income tax rate is as follows:

	Year Ended December 31,		
	2016	2015	2014
U.S. federal statutory income tax rate	35.0 %	35.0 %	35.0 %
Nondeductible expenses[1]	(19.0)%	(1.3)%	81.0 %
Effect of tax law changes	— %	0.9 %	(51.6)%
Change in valuation allowance for deferred tax assets	0.1 %	(1.0)%	35.3 %
State taxes, net of federal benefit	1.8 %	4.2 %	42.0 %
Audit and other tax return adjustments	1.4 %	0.1 %	(87.5)%
Tax-exempt income, credits and incentives	0.7 %	0.7 %	(63.9)%
Foreign rate differential adjusted for U.S. taxation of foreign profits[2]	0.7 %	2.4 %	(228.8)%
Other	(0.8)%	0.5 %	(1.5)%
Effective Income Tax Rate	19.9 %	41.5 %	(240.0)%

(1) In 2016, Nondeductible expenses primarily related to the nondeductible portion of the book goodwill impairment charge.
(2) The "U.S. taxation of foreign profits" represents the U.S. tax, net of foreign tax credits, associated with actual and deemed repatriations of earnings from our non-U.S. subsidiaries.

On a consolidated basis, we paid/(received) a total of $(123), $194 and $66 in income taxes to federal, foreign and state jurisdictions during the three years ended December 31, 2016, respectively.

Total income tax expense (benefit) was allocated as follows:

	Year Ended December 31,		
	2016	2015	2014
Pre-tax income	$ (244)	$ (238)	$ (24)
Discontinued operations[1]	—	81	7
Common shareholders' equity:			
Changes in defined benefit plans	8	2	(11)
Stock option and incentive plans, net	—	(6)	(10)
Cash flow hedges	—	—	(1)
Total Income Tax Benefit	$ (236)	$ (161)	$ (39)

(1) Refer to Note 4 - Divestitures for additional information regarding discontinued operations.

Unrecognized Tax Benefits and Audit Resolutions

We recognize tax liabilities when, despite our belief that our tax return positions are supportable, we believe that certain positions may not be fully sustained upon review by tax authorities. Each period we assess uncertain tax positions for recognition, measurement and effective settlement. Benefits from uncertain tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Where we have determined that our tax return filing position does not satisfy the more-likely-than-not recognition threshold, we have recorded no tax benefits.

We are also subject to ongoing tax examinations in numerous jurisdictions due to the extensive geographical scope of our operations. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can increase or decrease our effective tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain. As of December 31, 2016, we do not believe that there are any positions for which it is reasonably possible that the total amount of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2016	2015	2014
Balance at January 1	$ 24	$ 32	$ 41
Additions related to current year	1	3	5
Additions related to prior years positions	—	—	1
Reductions related to prior years positions	(5)	(10)	(13)
Settlements with taxing authorities[1]	(5)	—	(2)
Currency	(1)	(1)	—
Balance at December 31	$ 14	$ 24	$ 32

(1) 2016 settlement results in $(5) cash paid; 2014 settlement of $(2) results in no cash paid.

Included in the balances at December 31, 2016, 2015 and 2014 are $0, $8 and $10, respectively, of tax positions that are highly certain of realization but for which there is uncertainty about the timing. Because of the impact of deferred tax accounting, other than for the possible incurrence of interest and penalties, the disallowance of these positions would not affect the annual effective tax rate. In addition, for other uncertain tax positions, we maintain offsetting benefits from other jurisdictions of $16, $14 and $16, at December 31, 2016, 2015 and 2014, respectively.

We recognized interest and penalties accrued on unrecognized tax benefits, as well as interest received from favorable settlements within income tax expense. We had $6, $14 and $14 accrued for the payment of interest and penalties associated with unrecognized tax benefits at December 31, 2016, 2015 and 2014, respectively.

In the U.S., we are no longer subject to U.S. federal income tax examinations for years before 2005. With respect to our major foreign jurisdictions, the years remain open generally back to 2006.

Deferred Income Taxes

The Company is in the position of having tax basis in excess of book basis in its U.S. investment in foreign subsidiaries. Nonetheless, the Company is indefinitely reinvested in its foreign subsidiaries which have undistributed earnings of $460. Despite having tax basis in excess of book basis in these foreign subsidiaries for which deferred taxes have not been provided, the repatriation of these earnings could give rise to a U.S. tax liability. Calculating the tax that would be due upon repatriation is not practical at this time.

The tax effects of temporary differences that give rise to significant portions of the deferred taxes were as follows:

	December 31,	
	2016	2015
Deferred Tax Assets		
Net operating losses	$ 42	$ 71
Operating reserves, accruals and deferrals	155	184
Deferred compensation	101	83
Pension	18	11
Other	44	65
Subtotal	360	414
Valuation allowance	(24)	(38)
Total	$ 336	$ 376
Deferred Tax Liabilities		
Unearned income	$ 217	$ 230
Intangibles and goodwill	680	808
Depreciation	15	61
Other	29	28
Total	$ 941	$ 1,127
Total Deferred Taxes, Net	$ (605)	$ (751)

As discussed in Note 1 - Basis of Presentation and Summary of Significant Accounting Policies, we early adopted **ASU 2015-17**, *Income Taxes: Balance Sheet Classification of Deferred Taxes*, which requires that deferred tax

liabilities and assets be classified as non-current in a classified statement of financial position. Adoption of this update resulted in a reclassification of our net current deferred tax asset and liabilities to the net non-current deferred tax asset and liabilities in our Consolidated Balance Sheet as of December 31, 2015. Prior periods were not retrospectively adjusted.

The deferred tax assets for the respective periods were assessed for recoverability and, where applicable, a valuation allowance was recorded to reduce the total deferred tax asset to an amount that will, more-likely-than-not, be realized in the future. The net change in the total valuation allowance for the years ended December 31, 2016 and 2015 was a decrease of $14 and an increase of $3, respectively. The valuation allowance relates primarily to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Although realization is not assured, we have concluded that it is more-likely-than-not that the deferred tax assets, for which a valuation allowance was determined to be unnecessary, will be realized in the ordinary course of operations based on the available positive and negative evidence, including scheduling of deferred tax liabilities and projected income from operating activities. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if actual future income or income tax rates are lower than estimated, or if there are differences in the timing or amount of future reversals of existing taxable or deductible temporary differences.

At December 31, 2016, we had tax credit carryforwards of $12 available to offset future income taxes which will expire 2017 through 2037 if not utilized. We also had net operating loss carryforwards for income tax purposes of $402 that will expire 2017 through 2037, if not utilized, and $38 available to offset future taxable income indefinitely.

Note 15 – Contingencies and Litigation

As more fully discussed below, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. We assess our potential liability by analyzing our litigation and regulatory matters using available information. We develop our views on estimated losses in consultation with outside counsel handling our defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. We believe that we have recorded adequate provisions for any such matters and, as of December 31, 2016, it was not reasonably possible that a material loss had been incurred in connection with such matters in excess of the amounts recognized in our financial statements.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and nonconsolidated affiliates when we undertake an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters, and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the consolidated financial position or liquidity. As of December 31, 2016, we have accrued our estimate of liability incurred under our indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Xerox State Healthcare, LLC, and ACS State Healthcare, LLC: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Xerox Corporation, Xerox State Healthcare, LLC and ACS State Healthcare (collectively, the "Xerox Defendants") violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”). The State

alleges that the Xerox Defendants made false representations of material facts regarding the processes, procedures, implementation and results regarding the prior authorization of orthodontic claims. The State seeks recovery of actual damages, two times the amount of any overpayments made as a result of unlawful acts, civil penalties, pre- and post-judgment interest and all costs and attorneys' fees. The State references the amount in controversy as exceeding hundreds of millions of dollars. The Xerox Defendants filed their Answer in June, 2014 denying all allegations. The Xerox Defendants will continue to vigorously defend themselves in this matter. We do not believe it is probable that we will incur a material loss in excess of the amount accrued for this matter. In the course of litigation, we periodically engage in discussions with plaintiff's counsel for possible resolution of the matter. Should developments cause a change in our determination as to an unfavorable outcome, or result in a final adverse judgment or settlement for a significant amount, there could be a material adverse effect on our results of operations, cash flows and financial position in the period in which such change in determination, judgment or settlement occurs.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck") for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court. Buck entered into a stay agreement with plaintiffs that essentially postpones this litigation pending the outcome of parallel litigation between plaintiffs and StanCERA. Buck will continue to aggressively defend these lawsuits.

Other Matters:

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB commence an action, it may seek restitution, civil monetary penalties, injunctive relief or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. This notice stems from an inquiry that commenced in 2014 when XES received and responded to a Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the Department of Education and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB and the Department of Education, as well as certain states' attorney general offices and other regulatory agencies, began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies, and XES has submitted its NORA response. We cannot provide assurance that the CFPB or another party will not ultimately commence a legal action against XES in this matter nor are we able to predict the likely outcome of the investigations into this matter.

Guarantees, Indemnifications and Warranty Liabilities

Indemnifications Provided as Part of Contracts and Agreements

Acquisitions/Divestitures:

We have indemnified, subject to certain deductibles and limits, the purchasers of businesses or divested assets for the occurrence of specified events under certain of our divestiture agreements. In addition, we customarily agree to hold the other party harmless against losses arising from a breach of representations and covenants, including such matters as adequate title to assets sold, intellectual property rights, specified environmental matters and certain income taxes arising prior to the date of acquisition. Where appropriate, an obligation for such indemnifications is

recorded as a liability at the time of the acquisition or divestiture. Since the obligated amounts of these types of indemnifications are often not explicitly stated or are contingent on the occurrence of future events, the overall maximum amount of the obligation under such indemnifications cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, we have not historically made significant payments for these indemnifications. Additionally, under certain of our acquisition agreements, we have provided for additional consideration to be paid to the sellers if established financial targets are achieved post-closing. We have recognized liabilities for these contingent obligations based on an estimate of the fair value of these contingencies at the time of acquisition. Contingent obligations related to indemnifications arising from our divestitures and contingent consideration provided for by our acquisitions are not expected to be material to our financial position, results of operations or cash flows.

Other Agreements:

We are also party to the following types of agreements pursuant to which we may be obligated to indemnify the other party with respect to certain matters:

- Guarantees on behalf of our subsidiaries with respect to real estate leases. These lease guarantees may remain in effect subsequent to the sale of the subsidiary.
- Agreements to indemnify various service providers, trustees and bank agents from any third-party claims related to their performance on our behalf, with the exception of claims that result from the third-party's own willful misconduct or gross negligence.
- Guarantees of our performance in certain services contracts to our customers and indirectly the performance of third parties with whom we have subcontracted for their services. This includes indemnifications to customers for losses that may be sustained as a result of our performance of services at a customer's location.

In each of these circumstances, our payment is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract and such procedures also typically allow us to challenge the other party's claims. In the case of lease guarantees, we may contest the liabilities asserted under the lease. Further, our obligations under these agreements and guarantees may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments we made.

Intellectual Property Indemnifications

We do not own most of the software that we use to run our business. Instead, we license this software from a small number of primary vendors. We indemnify certain software providers against claims that may arise as a result of our use or our subsidiaries', customers' or resellers' use of their software in our services and solutions. These indemnities usually do not include limits on the claims, provided the claim is made pursuant to the procedures required in the services contract.

Indemnification of Officers and Directors

Our corporate by-laws require that, except to the extent expressly prohibited by law, we must indemnify our officers and directors against judgments, fines, penalties and amounts paid in settlement and reasonable expenses, including attorneys' fees, incurred in connection with civil or criminal action or proceedings or any appeal, as it relates to their services to our Company and our subsidiaries. Although the by-laws provide no limit on the amount of indemnification, we may have recourse against our insurance carriers for certain payments made by us. However, certain indemnification payments (such as those related to "clawback" provisions in certain compensation arrangements) may not be covered under our directors' and officers' insurance coverage. We also indemnify certain fiduciaries of our employee benefit plans for liabilities incurred in their service as fiduciary whether or not they are officers of the Company. Finally, in connection with our acquisition of businesses, we may become contractually obligated to indemnify certain former and current directors, officers and employees of those businesses in accordance with pre-acquisition by-laws or indemnification agreements or applicable state law.

Other Contingencies

Certain contracts, primarily in our Public Sector segment, require us to provide a surety bond or a letter of credit as a guarantee of performance. As of December 31, 2016, we had $613 for outstanding surety bonds used to secure our performance of contractual obligations with our clients, and we had $133 of outstanding letters of credit issued to secure our performance of contractual obligations to our clients as well as other corporate obligations.

In general, we would only be liable for the amount of these guarantees in the event of default in our performance of

our obligations under each contract; the probability of which we believe is remote. We believe we have sufficient capacity in the surety markets and liquidity from our cash flow and our various credit arrangements (including our Credit Facility) to allow us to respond to future requests for proposals that require such credit support.

We have service arrangements where we service third-party student loans in the Federal Family Education Loan program (FFEL) on behalf of various financial institutions. We service these loans for investors under outsourcing arrangements and do not acquire any servicing rights that are transferable by us to a third-party. At December 31, 2016, we serviced a FFEL portfolio of approximately 1.3 million loans with an outstanding principal balance of approximately $21.0 billion. Some servicing agreements contain provisions that, under certain circumstances, require us to purchase the loans from the investor if the loan guaranty has been permanently terminated as a result of a loan default caused by our servicing error. If defaults caused by us are cured during an initial period, any obligation we may have to purchase these loans expires. Loans that we purchase may be subsequently cured, the guaranty reinstated and the loans repackaged for sale to third parties. We evaluate our exposure under our purchase obligations on defaulted loans and establish a reserve for potential losses, or default liability reserve, through a charge to the provision for loss on defaulted loans purchased. The reserve is evaluated periodically and adjusted based upon management’s analysis of the historical performance of the defaulted loans. As of December 31, 2016, other current liabilities include reserves which we believe to be adequate. At December 31, 2016, other current liabilities include reserves of approximately $3 for losses on defaulted loans purchased. In addition to potential purchase obligations arising from servicing errors, various laws and regulations applicable to student loan borrowers could give rise to fines, penalties and other liabilities associated with loan servicing errors.

Note 16 - Preferred Stock

Series A Preferred Stock

In connection with the Spin-Off Transaction, we issued 120 thousand shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 and an initial fair value of $142. The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393 thousand shares (reflecting an initial conversion price of approximately $22.250 per share of common stock), subject to customary anti-dilution adjustments.

If the closing price of our common stock exceeds 137% of the initial conversion price for 20 out of 30 trading days, we have the right to cause any or all of the convertible preferred stock to be converted into shares of common stock at the then applicable conversion rate. The convertible preferred stock is also convertible, at the option of the holder, upon a change in control, at the applicable conversion rate plus an additional number of shares determined by reference to the price paid for our common stock upon such change in control. In addition, upon the occurrence of certain fundamental change events, including a change in control or the delisting of Conduent's common stock, the holder of convertible preferred stock has the right to require us to redeem any or all of the convertible preferred stock in cash at a redemption price per share equal to the liquidation preference and any accrued and unpaid dividends to, but not including, the redemption date. The convertible preferred stock is classified as temporary equity (i.e., apart from permanent equity) as a result of the contingent redemption feature.

Note 17 – Shareholders' Equity

Preferred Stock

As of December 31, 2016, we had one class of preferred stock outstanding. See Note 16 - Preferred Stock for further information. We are authorized to issue approximately 100 million shares of cumulative preferred stock, $0.01 par value per share.

Common Stock

We have 1 billion authorized shares of common stock, $0.01 par value per share. At December 31, 2016, 26 million shares were reserved for issuance under our incentive compensation plans and 5.4 million shares were reserved for conversion of the Series A convertible preferred stock.

Stock Compensation Plans

Certain of our employees participate in a long-term incentive plan. Our long-term incentive plan authorizes the issuance of restricted stock units (RSU's), performance shares (PSs) and non-qualified stock options to employees. All awards for these plans prior to 2017, were made in Xerox stock and therefore converted into Conduent stock effective upon separation. Using a formula designed to preserve the value of the award immediately prior to the Separation, all of these awards will be settled and are reflected in Conduent's Consolidated Statements of Stockholders' Equity. Stock-based compensation expense includes expense based on the awards and terms previously granted to the employees.

Stock-based compensation expense was as follows:

	Year Ended December 31,		
	2016	2015	2014
Stock-based compensation expense, pre-tax	$ 23	$ 19	$ 28
Income tax benefit recognized in earnings	9	7	11

Restricted Stock Units: Compensation expense is based upon the grant date market price. The compensation expense is recorded over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest.

Performance Shares: Our former parent company granted PSs that vest contingent upon our achievement of certain specified financial performance criteria over a three-year period. If the three-year actual results exceed the stated targets, then the plan participants have the potential to earn additional shares of common stock, which could not exceed 50% of the original grant.

The fair value of PSs is based upon the market price of Conduent's common stock on the date of the grant and then converted to Conduent's common stock upon company separation. Compensation expense is recognized over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest. If the stated targets are not met, any recognized compensation cost would be reversed.

Employee Stock Options: Stock options were issued by a former parent company and were converted to Conduent's common stock upon company separation. These options generally expire within the next 2 years. Other than these options, Conduent has not issued any new stock options.

Summary of Stock-based Compensation Activity

(shares in thousands)	2016 Shares	2016 Weighted Average Grant Date Fair Value	2015 Shares	2015 Weighted Average Grant Date Fair Value	2014 Shares	2014 Weighted Average Grant Date Fair Value

(1) Stock-based compensation was converted from former parent stock into Conduent common stock at Spin-off.

In 2013, our former parent company deferred the annual grant of RSUs and PSs from July 1, 2013 to January 1, 2014. RSUs granted in 2013 represent off-cycle awards while PSs granted in 2013 represent over-achievement shares associated with the 2010 PSs grant, which vested in 2013. On January 1, 2014, we granted 2,771 thousand PSs with a grant date fair value of $12.17 per share (the deferral of the 2013 annual grant) and on July 1, 2014, we granted 2,903 thousand PSs with a grant date fair value of $12.38 per share (the 2014 annual grant).

We have 857 thousand stock options outstanding as of December 31, 2016 at strike prices ranging from $10.15 to $13.38. These stock options are fully vested and exercisable.

The total unrecognized compensation cost related to non-vested stock-based awards at December 31, 2016 was as follows:

Awards	Unrecognized Compensation	Remaining Weighted-Average Vesting Period (Years)
Restricted Stock Units	$ 19	2.3
Performance Shares	22	1.9
Total	$ 41	

The aggregate intrinsic value of outstanding RSUs and PSs awards was as follows:

Awards	December 31, 2016
Restricted Stock Units	$ 27
Performance Shares	69

Information related to stock options outstanding and exercisable at December 31, 2016 was as follows:

	Options	
	Outstanding	Exercisable
Aggregate intrinsic value	$ 3	$ 3
Weighted-average remaining contractual life (years)	2.0	2.0

The total intrinsic value and actual tax benefit realized for vested and exercised stock-based awards was as follows:

	December 31, 2016			December 31, 2015			December 31, 2014		
Awards	Total Intrinsic Value	Cash Received	Tax Benefit	Total Intrinsic Value	Cash Received	Tax Benefit	Total Intrinsic Value	Cash Received	Tax Benefit
Restricted Stock Units	$ 1	$ —	$ —	$ 30	$ —	$ 11	$ 19	$ —	$ 7
Performance Shares	—	—	—	7	—	2	5	—	2
Stock Options	3	9	1	14	19	5	42	55	15

Note 18 – Other Comprehensive Loss

Other Comprehensive Loss is comprised of the following:

	Year Ended December 31,					
	2016		2015		2014	
	Pre-tax	Net of Tax	Pre-tax	Net of Tax	Pre-tax	Net of Tax
Translation Adjustments Losses	$ (135)	$ (135)	$ (60)	$ (60)	$ (44)	$ (44)
Unrealized Gains (Losses):						
Changes in fair value of cash flow hedges gains (losses)	(2)	(1)	(4)	(2)	—	—
Changes in cash flow hedges reclassed to earnings[1]	2	1	5	3	(3)	(2)
Net Unrealized Gains (Losses)	—	—	1	1	(3)	(2)
Defined Benefit Plans (Losses) Gains						
Net actuarial/prior service (losses) gains	(31)	(23)	5	4	(43)	(32)
Actuarial loss amortization/settlement[2]	1	1	2	2	—	—
Other gains (losses)[3]	3	2	2	1	7	7
Changes in Defined Benefit Plans (Losses) Gains	(27)	(20)	9	7	(36)	(25)
Other Comprehensive Loss	$ (162)	$ (155)	$ (50)	$ (52)	$ (83)	$ (71)

(1) Reclassified to Cost of sales - refer to Note 11 - Financial Instruments for additional information regarding our cash flow hedges.
(2) Reclassified to Total Net Periodic Benefit Cost - refer to Note 13 - Employee Benefit Plans for additional information.
(3) Primarily represents currency impact on cumulative amount of benefit plan net actuarial losses and prior service credits in AOCL.

Accumulated Other Comprehensive Loss (AOCL)

AOCL is comprised of the following:

	December 31,		
	2016	2015	2014
Cumulative translation adjustments[1]	$ (472)	$ (147)	$ (87)
Other unrealized losses, net	(1)	(1)	(2)
Benefit plans net actuarial losses and prior service credits	(53)	(33)	(40)
Total Accumulated Other Comprehensive Loss	$ (526)	$ (181)	$ (129)

(1) 2016 includes $190 of AOCL transfered from former parent as part of the Spin-off.

Note 19 – Earnings per Share

We did not declare any common or preferred stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock (shares in thousands):

	Year Ended December 31,		
	2016	2015	2014
Basic Earnings per Share:			
Net Income From Continuing Operations Available to Common Shareholders	$ (983)	$ (336)	$ 34
Net (loss) income from discontinued operations attributable Conduent	—	(78)	(115)
Adjusted Net Income Available to Common Shareholders	$ (983)	$ (414)	$ (81)
Weighted-average common shares outstanding	202,875	202,875	202,875
Basic Earnings (Loss) per Share:			
Continuing operations	$ (4.85)	$ (1.65)	$ 0.17
Discontinued operations	—	(0.39)	(0.57)
Basic Earnings per Share	$ (4.85)	$ (2.04)	$ (0.40)
Diluted Earnings per Share:			
Adjusted Net Income From Continuing Operations Available to Common Shareholders	$ (983)	$ (336)	$ 34
Net (loss) income from discontinued operations attributable to Conduent	—	(78)	(115)
Adjusted Net Income Available to Common Shareholders	$ (983)	$ (414)	$ (81)
Weighted-average common shares outstanding	202,875	202,875	202,875
Diluted Earnings (Loss) per Share:			
Continuing operations	$ (4.85)	$ (1.65)	$ 0.17
Discontinued operations	—	(0.39)	(0.57)
Diluted Earnings per Share	$ (4.85)	$ (2.04)	$ (0.40)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):			
Stock Options	857	—	—
Restricted stock and performance shares	5,719	—	—
Convertible preferred stock	5,393	—	—
Total Securities	11,969	—	—

Note 20 – Related Party Transactions and Former Parent Company Investment

Allocation of Corporate Expenses

The Consolidated Statements of Income (Loss), Consolidated Statements of Comprehensive Loss and Consolidated Statements of Cash Flows include an allocation of general corporate expenses from Xerox, the Company's former parent. The financial information in these Consolidated Financial Statements does not necessarily include all the expenses that would have been incurred or held had we been a separate, standalone company and it is not practicable to estimate actual costs that would have been incurred had we been a separate, standalone company during the periods presented. Management considers these allocations to be a reasonable reflection of the utilization of services by, or the benefits provided. Allocations for management costs and corporate support services provided totaled $165, $170 and $175 for each of the three years ended December 31, 2016, 2015 and 2014, respectively. These amounts include costs for corporate functions including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology and other shared services. Where possible, these costs were allocated based on direct usage, with the remainder allocated on a basis of costs, headcount or other measures we have determined as reasonable.

	Year Ended December 31,		
	2016	2015	2014
Research and development	$ 25	$ 43	$ 40
Selling, administrative and general	140	127	135
Total Allocated Corporate Expenses	$ 165	$ 170	$ 175

Final Cash Allocation To Former Parent

In January 2017, in connection with the Separation, we paid Xerox $161 for settlement of the management and support services received.

The components of Net transfers to former parent and the reconciliation to the corresponding amount presented on the Combined Statements of Cash Flows are as follows:

	Year Ended December 31,		
	2016	2015	2014
Cash pooling and general financing activities	$ (466)	$ (396)	$ (525)
Corporate cost allocations	165	170	175
Income taxes	(157)	168	44
Divestitures and acquisitions, net	54	(742)	290
Capitalization of related party notes payable	—	1,017	—
Total net transfers (to) from former parent	(404)	217	(16)
Stock-based compensation	(23)	(19)	(28)
Capitalization of related party notes payable	—	(1,017)	—
Other, net	(161)	147	8
Total Net transfers to former parent per Consolidated Statements of Cash Flows	$ (588)	$ (672)	$ (36)

Related Party Notes Receivable/Payable

Certain operating units of the Company had various interest bearing notes under contractual agreements to and from Xerox Corporation and other related parties. The purpose of these notes was to provide funds for certain working capital or other capital and operating requirements of the business. Net interest expense on these notes with related party companies was recorded net in Related Party Interest in the Consolidated Statements of Income and was $26, $61 and $107 for each of the three years ended December 31, 2016, 2015 and 2014, respectively. These notes had fixed interest rates that ranged from 1% to 8%. The balances were settled as part of the separation transaction.

Related Party Revenue and Purchases

We provide various services to Xerox Corporation including those related to human resources, accounting and finance and customer care, which are reported as Related party revenue in the Consolidated Statements of Income (Loss). The costs related to these services are reported as Related party cost of services in the Consolidated Statements of Income (Loss).

We also leased equipment and received related services, supplies and parts from Xerox and Xerox subsidiaries in the amount of $21, $24 and $24, for each of the three years ended December 31, 2016, 2015 and 2014, respectively. The costs related to these services, supplies and parts are reported in Cost of outsourcing and Selling, administrative and general expenses in the Consolidated Statements of Income (Loss).

Note 21 – Subsequent Events

NY MMIS

On February 16, 2017, after discussions with the State of New York regarding the status and scope of the Health Enterprise platform project, we determined that it was probable that we would not fully complete the implementations of this platform in New York. As a result of this development, we recorded a pre-tax charge of approximately $161 ($98 after-tax) in the fourth quarter 2016 reflecting the estimated asset impairments, wind down costs and other impacts from this project.

Other Events

Subsequent to December 31, 2016, we entered into favorable legal settlements with two former customers that will result in a net gain of $19 during the first quarter of 2017, $14 of which will be recorded in Other expenses, net in our Consolidated Statement of Income (Loss) and $7 of which will be recorded to discontinued operations.

QUARTERLY RESULTS OF OPERATIONS (Unaudited)

(in millions, except per-share data)	First Quarter[1]	Second Quarter[1]	Third Quarter	Fourth Quarter	Full Year
2016					
Revenues	$ 1,685	$ 1,613	$ 1,596	$ 1,514	$ 6,408
Costs and Expenses	1,739	1,647	1,594	2,655	7,635

Net (Loss) Income	$ (23)	$ (10)	$ 1	$ (951)	$ (983)
Basic (Loss) Earnings per Share[2]:	$ (0.12)	$ (0.05)	$ 0.01	$ (4.69)	$ (4.85)
Diluted (Loss) Earnings per Share[2]:	$ (0.12)	$ (0.05)	$ 0.01	$ (4.69)	$ (4.85)
2015					
Revenues	$ 1,678	$ 1,683	$ 1,571	$ 1,730	$ 6,662
Costs and Expenses	1,698	1,855	1,961	1,722	7,236
(Loss) Income before Income Taxes	(20)	(172)	(390)	8	(574)
Income tax expense	(14)	(69)	(154)	(1)	(238)
(Loss) Income from Continuing Operations	(6)	(103)	(236)	9	(336)
Income (loss) from discontinued operations, net of tax	34	(95)	(3)	(14)	(78)
Net Income (Loss)	$ 28	$ (198)	$ (239)	$ (5)	$ (414)
Basic Earnings (Loss) per Share[2]:					
Continuing operations	$ (0.03)	$ (0.50)	$ (1.17)	$ 0.05	$ (1.65)
Discontinued operations	0.17	(0.47)	(0.01)	(0.08)	(0.39)
Total Basic Earnings(Loss) per Share:	$ 0.14	$ (0.97)	$ (1.18)	$ (0.03)	$ (2.04)
Diluted Earnings (Loss) per Share[2]:					
Continuing operations	$ (0.03)	$ (0.50)	$ (1.17)	$ 0.05	$ (1.65)
Discontinued operations	0.17	(0.47)	(0.01)	(0.08)	(0.39)
Total Diluted Earnings (Loss) per Share	$ 0.14	$ (0.97)	$ (1.18)	$ (0.03)	$ (2.04)

(1) *During the second quarter 2016 closing process, we determined that the first quarter 2016 income tax benefit of $25 million should have been $6 million higher. This additional income tax benefit was adjusted for and included in the six month results ended June 30, 2016. The Company concluded that this correction was not material to the Condensed Combined Financial Statements for the three months ended March 31, 2016.*

(2) *The sum of quarterly earnings per share may differ from the full-year amounts due to rounding, or in the case of diluted earnings per share, because securities that are anti-dilutive in certain quarters may not be anti-dilutive on a full-year basis.*

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.
The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent auditors, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent auditors. The independent auditors and internal auditors have access to the Audit Committee.

Disclosure Controls and Procedures

The Company’s management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company’s management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

This annual report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of the company's registered public accounting firm due to a transition period established by rules of the Securities and Exchange Commission for newly public companies.

Changes in Internal Control over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding directors is incorporated herein by reference to the section entitled “Proposal 1 - Election of Directors” in our definitive Proxy Statement (2017 Proxy Statement) to be filed pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, for our Annual Meeting of Stockholders to be held on May 25, 2017. The Proxy Statement will be filed within 120 days after the end of our fiscal year ended December 31, 2016.

The information regarding compliance with Section 16(a) of the Securities and Exchange Act of 1934 is incorporated herein by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” of our 2017 Proxy Statement.

The information regarding the Audit Committee, its members and the Audit Committee financial experts is incorporated by reference herein from the subsection entitled “Committee Functions, Membership and Meetings” in the section entitled “Proposal 1 - Election of Directors” in our 2017 Proxy Statement.

We have adopted a code of ethics applicable to our principal executive officer, principal financial officer and principal accounting officer. The Finance Code of Conduct can be found on our website at: http://www.conduent.com/investor and then clicking on Corporate Governance. Information concerning our Finance Code of Conduct can be found under "Corporate Governance" in our 2017 definitive Proxy Statement and is incorporated here by reference.

Executive Officers of Conduent

The following is a list of the executive officers of Conduent, their current ages, their present positions and the year appointed to their present positions.

Each officer is elected to hold office until the meeting of the Board of Directors held on the day of the next annual meeting of shareholders, subject to the provisions of the By-Laws.

Name	Age	Present Position	Year Appointed to Present Position	Conduent Officer Since
David Amoriell	60	Executive Vice President & President, Public Sector	2017	2017
Jay Chu	58	Vice President & Chief Accounting Officer	2017	2017
Jeffrey Friedel	52	Executive Vice President & Chief People Officer	2017	2017
James Michael Peffer	55	Executive Vice President, General Counsel & Secretary	2017	2017
Ashok Vemuri*	48	Chief Executive Officer	2017	2017
Brian J. Webb-Walsh	41	Executive Vice President & Chief Financial Officer	2017	2017

* Member of Conduent Board of Directors

Each officer named above, with the exception of the following, has been an officer or an executive of Conduent or its subsidiaries for at least the past five years.

Mr. Amoriell served as the chief operating officer of the Public Sector for Business Group for Xerox Services. He was named to this position in June 2014 and appointed a corporate vice president of Xerox in February 2012. Prior to that, Amoriell was the chief operating officer for the Government & Transportation Sector (GTS).

Mr. Chu has served as Senior Vice President and Chief Accountant for Xerox Services since 2013. In this role, Mr. Chu is responsible for Xerox Services’ accounting, internal controls, contract accounting support and international statutory accounting. Since joining Xerox Corporation in 1984, Mr. Chu has held various positions including Director Field Accounting and Internal Controls, Developing Markets Chief Financial Officer, Chief Financial Officer of Xerox Brazil, Controller of Xerox Canada and a variety of accounting, financing, marketing and sales roles.

Prior to joining Conduent, Mr. Friedel served as Vice President and Head of the Office of Integrity and Compliance at Infosys, a global leader in technology services and consulting, where he oversaw SEC compliance, internal investigations, code of conduct, whistleblower, anti-bribery and export regulations. Friedel has also previously

served as Senior Vice President and General Counsel at IGATE, an IT services and business process outsourcing company which was acquired by CapGemini.

Mr. Peffer has served as Vice President, General Counsel and Secretary for Xerox Corporation from August 2016 to December 2016. Prior to this role, Mr. Peffer served as Associate General Counsel of Xerox Corporation and Executive Vice President of Xerox Business Services, LLC. since 2010. Prior to 2010, Mr. Peffer was Senior Vice President and Deputy General Counsel of ACS from 2007 until 2009.

Mr. Vemuri served as Chief Executive Officer of Xerox Business Services, LLC and an Executive Vice President of Xerox Corporation since July 2016. Mr. Vemuri previously was President, Chief Executive Officer and a member of the Board of Directors of IGATE Corporation. Prior to IGATE, Mr. Vemuri spent 14 years at Infosys Limited, a multinational consulting and IT services company, in a variety of leadership and business development roles.

Mr. Webb-Walsh has served as the Chief Financial Officer of Xerox Services since January 2016. Prior to this role, Mr. Webb-Walsh was Senior Vice President of Finance for the Government Healthcare Group and the Platform Development and Systems Integration Group. Mr. Webb-Walsh joined Xerox Corporation in 1997 and has held a variety of leadership positions.

ITEM 11. EXECUTIVE COMPENSATION

The information included under the following captions under “Proposal 1 - Election of Directors” in our 2017 definitive Proxy Statement is incorporated herein by reference: “Compensation Discussion and Analysis”, “Summary Compensation Table”, “Grants of Plan-Based Awards in 2016”, “Outstanding Equity Awards at 2016 Fiscal Year-End”, “Option Exercises and Stock Vested in 2016”, “Pension Benefits for the 2016 Fiscal Year”, “Nonqualified Deferred Compensation for the 2016 Fiscal Year”, “Potential Payments upon Termination or Change in Control”, “Summary of Director Annual Compensation, "Compensation Committee Interlocks and Insider Participation” and “Compensation Committee”. The information included under the heading “Compensation Committee Report” in our 2017 definitive Proxy Statement is incorporated herein by reference; however, this information shall not be deemed to be “soliciting material” or to be “filed” with the Commission or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act of 1934, as amended.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information regarding security ownership of certain beneficial owners and management and securities authorized for issuance under equity compensation plans is incorporated herein by reference to the subsections entitled “Ownership of Company Securities,” and “Equity Compensation Plan Information” under “Proposal 1 - Election of Directors” in our 2017 definitive Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information regarding certain relationships and related transactions is incorporated herein by reference to the subsection entitled “Certain Relationships and Related Person Transactions” under “Proposal 1 - Election of Directors” in our 2017 definitive Proxy Statement. The information regarding director independence is incorporated herein by reference to the subsections entitled “Corporate Governance” and “Director Independence” in the section entitled “Proposal 1 - Election of Directors” in our 2017 definitive Proxy Statement.

ITEM 14. PRINCIPAL AUDITOR FEES AND SERVICES

The information regarding principal auditor fees and services is incorporated herein by reference to the section entitled “Proposal 2 - Ratification of Election of Independent Registered Public Accounting Firm” in our 2017 definitive Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) (1) Index to Financial Statements and Financial Statement Schedule, incorporated by reference or filed as part of this report:

- Report of Independent Registered Public Accounting Firm including Report on Financial Statement Schedule;
- Consolidated Statements of Income (Loss) for each of the years in the three-year period ended December 31, 2016;
- Consolidated Statements of Comprehensive Loss for each of the years in the three-year period ended December 31, 2016;
- Consolidated Balance Sheets as of December 31, 2016 and 2015;
- Consolidated Statements of Cash Flows for each of the years in the three-year period ended December 31, 2016;
- Consolidated Statements of Shareholders' Equity for each of the years in the three-year period ended December 31, 2016;
- Notes to the Consolidated Financial Statements;
- Schedule II - Valuation and Qualifying Accounts for the three years ended December 31, 2016; and
- All other schedules are omitted as they are not applicable, or the information required is included in the financial statements or notes thereto.

(2) Supplementary Data:

- Quarterly Results of Operations (unaudited); and
- Five Years in Review.

(3)The exhibits filed herewith or incorporated herein by reference are set forth in the Index of Exhibits included herein.

(b) The management contracts or compensatory plans or arrangements listed in the “Index of Exhibits” that are applicable to the executive officers named in the Summary Compensation Table which appears in Registrant's 2017 Proxy Statement or to our directors are preceded by an asterisk (*).

SCHEDULE II
VALUATION AND QUALIFYING ACCOUNTS
For the three years ended December 31, 2016

(in millions)	Balance at beginning of period	Additions charged to expense[1]	Amounts (credited) charged to other income statement accounts [2]	Deductions and other, net of recoveries [3][4]	Balance at end of period
Allowance for Losses:					
2016 Accounts Receivable	$ 6	$ 4	$ —	$ (3)	$ 7
2015 Accounts Receivable	6	4	—	(4)	6
2014 Accounts Receivable	6	3	—	(3)	6
Tax Valuation Allowance:					
2016 Tax Valuation	38	—	—	(14)	24
2015 Tax Valuation	35	—	5	(2)	38
2014 Tax Valuation	41	—	7	(13)	35

(1) Account Receivables: additions charged to expense represent bad debt provisions relate to estimated losses due to credit and similar collectibility issues.
(2) Account Receivables: Other charges (credits) relate to adjustments to reserves necessary to reflect events of non-payment such as customer accommodations and contract terminations.
(3) Account Receivables: Deductions and other, net of recoveries primarily relates to receivable write-offs, but also includes the impact of foreign currency translation adjustments and recoveries of previously written off receivables.
(4) Tax Valuation: Reductions to tax valuation allowance are primarily related to the transfer of balances to the Xerox Corporation due to separation of the companies.

INDEX OF EXHIBITS
Document and Location

2.1	Separation and Distribution Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 2.1 to Registrant's Current Report on Form 8-K dated December 29, 2016. (See SEC File Number 001-37817).

EXHIBIT 10.1(b)
EXECUTION VERSION

FIRST INCREMENTAL AGREEMENT

This FIRST INCREMENTAL AGREEMENT, dated as of January 3, 2017 (this "First Incremental Agreement"), by and among JPMORGAN CHASE BANK, N.A., as the Administrative Agent (the "Administrative Agent"), XEROX BUSINESS SERVICES, LLC, a Delaware limited liability company (the "U.S. Borrower"), the other Loan Parties party hereto and the initial lenders party hereto (the "Initial Lenders").

RECITALS:

WHEREAS, reference is hereby made to the Credit Agreement, dated as of December 7, 2016 (as amended, restated, supplemented or otherwise modified from time to time, the "Credit Agreement"), among Conduent Incorporated, a New York corporation ("Holdings"), the U.S. Borrower, Affiliated Computer Services International B.V., a private limited company (*besloten vennootschap met beperkte aansprakelijkheid*) organized under the laws of the Netherlands, having its official seat in Amsterdam, the Netherlands and registered in the Trade Register of the Dutch Chamber of Commerce under number 34160388 (the "Dutch Borrower" and, together with the U.S. Borrower, the "Borrowers"), Conduent Finance, Inc., a Delaware corporation, the Lenders or other financial institutions or entities from time to time party thereto and the Administrative Agent (capitalized terms used but not defined herein having the meaning provided in the Credit Agreement);

WHEREAS, subject to the terms and conditions of the Credit Agreement, the Borrowers may obtain Incremental Term Loans by, among other things, entering into one or more Additional Credit Extension Amendments (with this First Incremental Agreement constituting an Additional Credit Extension Amendment);

WHEREAS, it is intended that the U.S. Borrower will obtain $100.0 million of incremental term loans (the "Incremental Term Loans") to be used for general corporate purposes and to pay fees and expenses in connection therewith, in each case, pursuant to the terms of this First Incremental Agreement (the transactions set forth in this clause, the "Transactions"); and

WHEREAS, the Borrower intends to incur the Incremental Term Loans pursuant to Section 2.19 of the Credit Agreement.

NOW, THEREFORE, in consideration of the premises and agreements, provisions and covenants herein contained, the parties hereto agree as follows:

Subject to the terms and conditions set forth herein and pursuant to the provisions of Section 2.19 of the Credit Agreement, the Initial Lenders hereby agree to provide the Incremental Term Loans on the Closing Date (as defined below) as set forth on Schedule A annexed hereto.

Each Initial Lender (i) confirms that it has received a copy of the Credit Agreement and the other Loan Documents and the exhibits thereto, together with copies of the financial statements referred to therein and such other documents and information as it has deemed appropriate to make its own credit analysis and decision to enter into this First Incremental Agreement, (ii) agrees that it will, independently and without reliance upon the Administrative Agent or any other Lender and based on such documents and information as it shall deem appropriate at the time, continue to make its own credit decisions in taking or not taking action under the Credit Agreement, (iii) appoints and authorizes the Administrative Agent to take such actions as agent on its behalf and to exercise such powers under the

Credit Agreement and the other Loan Documents as are delegated to the Administrative Agent by the terms thereof, together with such powers as are reasonably incidental thereto and (iv) agrees that it will perform in accordance with their terms all of the obligations which by the terms of the Credit Agreement are required to be performed by it as an Initial Lender.

The Initial Lenders hereby agree that the Incremental Term Loans will be made on the following terms and conditions:

1. **Initial Drawing of Incremental Term Loans**. The Incremental Term Loans shall be denominated in Dollars and shall be made in a single drawing on the Closing Date.

2. **LIBOR Floor and Applicable Rate for Incremental Term Loans**.

Clause (ii) of the second proviso of the definition of "Eurocurrency Rate" shall apply to the Incremental Term Loans and the "Applicable Rate" for the Incremental Term Loans shall mean, as of any date of determination, the applicable percentage per annum as set forth below.

Incremental Term Loans	
Eurocurrency Incremental Term Loans	**Base Rate Incremental Term Loans**
5.50%	4.50%

3. **Principal Payments of the Incremental Term Loans**. The (i) scheduled amortization payments under Section 2.09(d) of the Credit Agreement shall be automatically increased to reflect the aggregate principal amount of the Incremental Term Loans and (ii) the Administrative Agent shall take any and all action as may be reasonably necessary to ensure that the Incremental Term Loans are included in each repayment of the Term B Loans on a pro rata basis (with the Incremental Term Loans being fungible with the Term B Loans) based upon the original principal amount of the Term B Loans and the Incremental Term Loans. Any remaining outstanding amount of the Term B Loans (including the Incremental Term Loans) shall be repaid in full on the Term B Loan Maturity Date.

4. **Incremental Term Loans Voluntary and Mandatory Prepayments; Incremental Term Loans Prepayment Fees**. Scheduled installments of principal of the Incremental Term Loans set forth above shall be reduced in connection with any voluntary or mandatory prepayments of the Incremental Term Loans in accordance with Sections 2.09 and 2.10 of the Credit Agreement, respectively, as if such Incremental Term Loans were (and on a pro rata basis with) Term B Loans. Without duplication of the obligations of the U.S. Borrower under Section 2.09(a)(iii) of the Credit Agreement, in the event that, on or prior to December 7, 2017, the U.S. Borrower (x) prepays, repays, refinances, substitutes or replaces any Term B Loans or Incremental Term Loans in connection with a Repricing Transaction (including, for the avoidance of doubt, any prepayment made pursuant to Section 2.10(b)(iii) of the Credit Agreement that constitutes a Repricing Transaction), or (y) effects any amendment, waiver or other modification of, or consent under, the Credit Agreement resulting in a Repricing Transaction, the U.S. Borrower shall pay to the Administrative Agent, for the ratable account of each of the applicable Term B Lenders and Initial Lenders, (A) in the case of clause (x), a premium of 1.00% of the aggregate principal amount of the Term B Loans or Incremental Term Loans so prepaid, repaid, refinanced, substituted or replaced and (B) in the case of clause (y), a fee equal to 1.00% of the aggregate principal amount of the Term B Loans or Incremental Term Loans outstanding immediately prior

to such amendment, waiver, modification or consent that are the subject of such Repricing Transaction. If, on or prior to December 7, 2017, all or any portion of the Term B Loans or Incremental Term Loans held by any Lender are prepaid, repaid, refinanced, substituted or replaced pursuant to Section 2.18 of the Credit Agreement as a result of, or in connection with, such Lender not consenting with respect to any amendment, waiver, modification or consent referred to in clause (y) above (or otherwise in connection with a Repricing Transaction), such prepayment, repayment, refinancing, substitution or replacement will be made at 101% of the principal amount so prepaid, repaid, refinanced, substituted or replaced. All such amounts shall be due and payable on the date of effectiveness of such Repricing Transaction.

5. **Use of Proceeds of the Incremental Term Loans**. The U.S. Borrower shall use the proceeds of the Incremental Term Loans for general corporate purposes and to pay fees and expenses related to the Transactions.

6. **Terms Generally for Incremental Term Loans**. Other than as set forth herein, for all purposes under the Credit Agreement and the other Loan Documents, the Incremental Term Loans shall have the same terms as the Term B Loans and shall be treated for purposes of voluntary and mandatory prepayments (including any applicable prepayment fees and for scheduled principal payments) and all other terms as the same Class of Term Loans as the Term B Loans. The Incremental Term Loans shall, to the extent permitted by applicable tax rules and regulations, be structured as an increase to the Term B Loans that will trade fungibly with such Term B Loans. Upon the funding of the Incremental Term Loans on the Closing Date, the Incremental Term Loans shall automatically and without further action by any Person constitute Term B Loans and Loans and the Initial Lenders shall be Lenders for all purposes of the Credit Agreement and the other Loan Documents. In furtherance of the foregoing, on the Closing Date, there shall commence an initial Interest Period with respect to the Incremental Term Loans, which Interest Period shall end on the last day of the Interest Period applicable to the Term B Loans as in effect immediately prior to the Closing Date.

7. **[Reserved]**

8. **Initial Lenders**. Each Initial Lender acknowledges and agrees that upon its execution of this First Incremental Agreement it shall become a "Lender" under, and for all purposes of, the Credit Agreement and the other Loan Documents, and shall be subject to and bound by the terms thereof, and shall perform all the obligations of and shall have all rights of a Lender thereunder. For all purposes of this First Incremental Agreement, the Credit Agreement and the other Loan Documents, the term "Initial Lender" shall include each Lender with a commitment to make an Incremental Term Loan or an outstanding Incremental Term Loan.

9. **Credit Agreement Governs**. Except as set forth in this First Incremental Agreement, the Incremental Term Loans shall otherwise be subject to the provisions of the Credit Agreement and the other Loan Documents. This First Incremental Agreement shall not by implication or otherwise limit, impair, constitute a waiver of or otherwise affect the rights and remedies of the Lenders under the Credit Agreement or any other Loan Document. This First Incremental Agreement shall not constitute a novation of the Credit Agreement or any of the other Loan Documents

10. **Closing Date Conditions**. The effectiveness of this First Incremental Agreement and the initial borrowing of the Incremental Term Loans shall become effective on the date upon which all of

the following shall have been satisfied (the "Closing Date"; provided that such date shall be no later than January 15, 2017):

(i) the Administrative Agent (or its counsel) shall have received either (A) counterparts of this First Incremental Agreement or (B) written evidence reasonably satisfactory to the Administrative Agent (which may include facsimile or electronic mail transmission in accordance with Section 9.01 of the Credit Agreement) that such party has signed a counterpart of this First Incremental Agreement that, when taken together, bear the signatures of the U.S. Borrower, the Guarantors, the Administrative Agent and the Initial Lenders; all reasonable and documented or invoiced out-of-pocket costs and expenses (including the reasonable fees, charges and disbursements of Cahill Gordon & Reindel LLP, as counsel to the Initial Lenders) of the Initial Lenders and the Administrative Agent incurred in connection with the transactions contemplated hereby for which invoices have been presented at least three Business Days prior to the Closing Date shall, to the extent required to be reimbursed or paid by the U.S. Borrower, have been paid;

(ii) the fees set forth in the Engagement Letter dated as of December 14, 2016, among Holdings, the U.S. Borrower, JPMorgan Chase Bank, N.A. and Merrill Lynch, Pierce, Fenner & Smith Incorporated, that are required to be paid on the Closing Date shall have been paid;

(iii) the Administrative Agent (or its counsel) shall have received the executed legal opinions, each in form reasonably satisfactory to the Administrative Agent, of (i) Cravath, Swaine & Moore LLP, special counsel to Holdings and the Guarantors organized under the laws of New York, (ii) Richards, Layton & Finger, P.A., special counsel to the U.S. Borrower and the Guarantors organized under the laws of Delaware, (iii) Kolesar and Leatham, special counsel to the Guarantors organized under the laws of Nevada, (iv) Morgan, Lewis & Bockius LLP, special counsel to the Guarantors organized under the laws of Pennsylvania and (v) Taft Stettinius & Hollister LLP, special counsel to the Guarantors organized under the laws of Indiana, or, in each case, such other legal counsel as may be reasonably acceptable to the Administrative Agent;

(iv) the Administrative Agent shall have received such customary closing documents and certificates as the Administrative Agent or its counsel may reasonably request relating to the organization, existence and good standing of the Loan Parties (to the extent such concept is applicable in the relevant jurisdiction) and the authorization of the Transactions, all in form and substance reasonably satisfactory to the Administrative Agent and its counsel (it being understood and agreed that no secretary certificates shall be required to the extent a Responsible Officer of the U.S. Borrower certifies that the secretary certificates delivered on the Closing Date (as defined in the Credit Agreement) remain true and complete in all material respects);

(v) the Administrative Agent shall have received a certificate attesting to the Solvency of the U.S. Borrower and its Subsidiaries (taken as a whole on a consolidated basis) on the Closing Date after giving effect to the Transactions to occur on the Closing Date, from a Financial Officer of the U.S. Borrower;

(vi) the Administrative Agent shall have received a certificate from an officer of the U.S. Borrower dated the Closing Date certifying that (a) the representations and warranties of each Loan Party set forth in Section 11 of this First Incremental Agreement are true and correct in all material respects (except that any representation and warranty that is qualified by materiality shall be true and correct in all respects) on and as of the Closing Date before and after giving effect to this First Incremental Agreement except where any representation and warranty is expressly made as of a specific earlier date, such representation and warranty shall be true in all material respects as of any such earlier date and (b) no Default or Event of Default has occurred and is continuing;

(vii) the Administrative Agent and the Initial Lenders shall have received a Borrowing Request in respect of the Incremental Term Loans; and

(viii) the Initial Lenders shall have received, at least three Business Days prior to the Closing Date, all documentation and other information reasonably requested in writing by them at least ten Business Days prior to the Closing Date in order to allow the Initial Lenders to comply with the Act.

11. **Representations and Warranties**. By its execution of this First Incremental Agreement, each Loan Party party hereto hereby represents and warrants to the Administrative Agent, the Initial Lenders and the Lenders that:

(i) This First Incremental Agreement has been duly authorized, executed and delivered by such Loan Party and constitutes the legal, valid and binding obligation of the Loan Parties party hereto, enforceable against such Loan Parties in accordance with its terms, subject to applicable bankruptcy, insolvency, reorganization, moratorium or other laws affecting creditors' rights generally and subject to general principles of equity, regardless of whether considered in a proceeding in equity or at law.

(ii) The execution, delivery and performance by such Loan Party of this First Incremental Agreement is within such Loan Party's corporate, limited liability company or partnership powers, has been duly authorized by all necessary corporate or other organizational action, and does not and will not (a) violate (i) any applicable law or regulation or order of any Governmental Authority or (ii) the charter, by-laws or other organizational documents of any Loan Party, (b) violate or result in a default under any indenture, agreement or other instrument binding upon any Loan Party or its assets, or give rise to a right thereunder to require any payment to be made by any Loan Party, and (c) will not result in the creation or imposition of any Lien on any material asset of any Loan Party (other than pursuant to the Loan Documents and Liens permitted by Section 6.02 of the Credit Agreement); except with respect to any violation or default referred to in clause (a)(i) or (b) above, to the extent that such violation or default could not reasonably be expected to have a Material Adverse Effect.

(iii) The representations and warranties of the U.S. Borrower and each other Loan Party contained in Article III of the Credit Agreement or any other Loan Document shall be true and correct in all material respects (except that any representation and warranty that is qualified by materiality shall be true and correct in all respects) on and as of the date hereof except where any representation and warranty is expressly made as of a specific earlier date, such representation and warranty shall be true in all material respects as of any such earlier date.

12. **Notice**. For purposes of the Credit Agreement, the initial notice address of the Initial Lenders shall be as separately identified to the Administrative Agent.

13. **Tax Forms**. For the Initial Lenders, delivered herewith to the Administrative Agent are such forms, certificates or other evidence with respect to United States federal income tax withholding matters as the Initial Lenders may be required to deliver to the Administrative Agent pursuant to the Credit Agreement.

14. **Recordation of the Incremental Term Loans**. Upon execution and delivery hereof, the Administrative Agent will record the Incremental Term Loans made by the Initial Lenders in the Register.

15. **Amendment, Modification and Waiver**. This First Incremental Agreement may not be amended, modified or waived except by an instrument or instruments in writing signed and delivered on behalf of each of the parties hereto. This First Incremental Agreement, the Credit Agreement and the other Loan Documents constitute the entire agreement among the parties with respect to the subject matter hereof and thereof and supersede all other prior agreements and understandings, both written and verbal, among the parties or any of them with respect to the subject matter hereof.

16. **GOVERNING LAW. THIS FIRST INCREMENTAL AGREEMENT SHALL BE CONSTRUED IN ACCORDANCE WITH AND GOVERNED BY THE LAW OF THE STATE OF NEW YORK (WITHOUT REGARD TO THE CONFLICT OF LAW PRINCIPLES THEREOF TO THE EXTENT THAT THE APPLICATION OF THE LAWS OF ANOTHER JURISDICTION WOULD BE REQUIRED THEREBY)**.

17. **Severability**. Any term or provision of this First Incremental Agreement held to be invalid, illegal or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such invalidity, illegality or unenforceability without affecting the validity, legality and enforceability of the remaining provisions hereof; and the invalidity of a particular provision in a particular jurisdiction shall not invalidate such provision in any other jurisdiction.

18. **Counterparts**. This First Incremental Agreement may be executed in counterparts (including by facsimile or other electronic transmission), each of which shall be deemed to be an original, but all of which shall constitute one and the same agreement.

19. **WAIVER OF JURY TRIAL**. EACH PARTY HERETO HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN ANY LEGAL PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS FIRST INCREMENTAL AGREEMENT OR ANY OTHER LOAN DOCUMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY (WHETHER BASED ON CONTRACT, TORT OR ANY OTHER THEORY). EACH PARTY HERETO (A) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PERSON HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PERSON WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER AND (B) ACKNOWLEDGES THAT IT AND THE OTHER PARTIES HERETO HAVE BEEN INDUCED TO ENTER INTO THIS AGREEMENT AND THE OTHER LOAN DOCUMENTS BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

20. **Loan Document**. On and after the Closing Date, this First Incremental Agreement shall constitute a "Loan Document" for all purposes of the Credit Agreement and the other Loan Documents (it being understood that for the avoidance of doubt this First Incremental Agreement may be amended or waived solely by the parties hereto as set forth in Section 15 above).

21. **Consent and Affirmation of the Guarantors**. Each of the Guarantors, in its capacity as a guarantor under the Guarantee Agreement and a Pledgor under the Security Agreement or the Holdings Pledge Agreement, as the case may be, and as a party to each other Loan Document to which it is a party, hereby (i) consents to the execution, delivery and performance of this First Incremental Agreement and agrees that each of the Loan Documents to which it is a party is, and shall continue to be, in full force and effect and is hereby in all respects ratified and confirmed on the Closing Date, except that, on and after the Closing Date, each reference to the "Credit Agreement", "thereunder", "thereof", "therein" or words of like import referring to the Credit Agreement shall mean and be a reference to the Credit Agreement as amended and otherwise modified by this First Incremental Agreement and (ii) affirms and confirms its guarantee of the Obligations and its pledge/or grant of a security interest in its assets as Collateral to secure the Obligations with all such security interests continuing in full force and effect after giving effect to this First Incremental Agreement and that the Loan Documents to which each of the Guarantors is a party and all of the Collateral described therein do, and shall continue to, secure the payment of all of the Obligations, including the Incremental Term Loans.

22. **Affirmation of the Borrower**. The U.S. Borrower hereby (i) agrees that each of the Loan Documents to which it is a party is, and shall continue to be, in full force and effect and is hereby in all respects ratified and confirmed on the Closing Date, except that, on and after the Closing Date, each reference to the "Credit Agreement", "thereunder", "thereof", "therein" or words of like import referring to the Credit Agreement shall mean and be a reference to the Credit Agreement as amended and otherwise modified by this First Incremental Agreement and (ii) affirms and confirms its pledge/or grant of a security interest in its assets as Collateral to secure the Obligations with all such security interests continuing in full force and effect after giving effect to this First Incremental Agreement and that the Loan Documents to which it is a party and all of the Collateral described therein do, and shall continue to, secure the payment of all of the Obligations, including the Incremental Term Loans.

[signature pages to follow]

IN WITNESS WHEREOF, each of the undersigned has caused its duly authorized officer to execute and deliver this First Incremental Agreement as of the date first set forth above.

Agreement for Non-Employee Directors - Equity Compensation Plan for Non-Employee Directors; DSUs Only

AGREEMENT PURSUANT TO
CONDUENT INCORPORATED
EQUITY COMPENSATION PLAN FOR NON-EMPLOYEE DIRECTORS

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"). dated as of the date which appears as the "Date of Agreement and Award" in the Award Summary attached hereto (the "Award Summary") in favor of the individual whose name appears on the Award Summary, a non-employee Director of the Company (the "Director").

In accordance with the provisions of the "Conduent Incorporated Equity Compensation Plan for Non-Employee Directors," as amended and restated (the "Plan"), the Board of Directors of the Company (the "Board") has authorized the execution and delivery of this Agreement.

Terms used herein which are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration the Company agrees as follows:

AWARD OF DEFERRED STOCK UNITS

1. Award of Deferred Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Director on the date indicated on the Award Summary the number of Deferred Stock Units (individually, the "DSU") as shown on the Award Summary.

TERMS OF THE DEFERRED STOCK UNIT

2. Deferral Period and Entitlement to Shares. Upon the lapse of the Deferral Period indicated on the Award Summary in connection with the DSU, which shall be the earlier of: (1) one year following termination of Board service, (2) the date of death or (3) the date determined by the Board to the extent necessary for any Federal officer or employee in the executive branch to comply with an ethics agreement with the Federal government, the Company shall deliver to such person a certificate or certificates for a number of shares of Common Stock equal to the number of DSUs as to which a Deferral Period has lapsed. No fractional shares shall be issued. If service as a Director of the Company ends prior to the sixth month anniversary of the first day of the month of the date of this Agreement, the number of shares issuable at the end of the Deferral Period will be prorated in the following manner. For each month of Board service following the date of the award, Director or his or her estate, as the case may be, will receive a prorated number of shares of one-sixth of the total award provided pursuant to this Agreement. Termination of Board service prior to the end of a month will be treated as though Director served on the Board for the entire month for purposes of the award.

3. Dividend Equivalents. Director shall be entitled to receive from the Company dividend equivalents, which are credited in the form of additional DSUs payable in Common Stock following the lapse of the Deferral

EXHIBIT

10.6(b)(ii)

Agreement for Non-Employee Directors - Equity Compensation Plan for Non-Employee Directors; DSUs Only

Period, at the same time and in the same amounts that the holder of record of a number of shares of Common Stock equal to the number of DSUs covered by the Agreement would be entitled to receive as dividends on such Common Stock. Such right to dividend equivalents on a DSU covered hereby shall apply to all dividends the record date for which occurs at any time dung the period commencing on the date hereof and ending on the date that Director becomes a shareholder of record with respect to such DSU as a result of the lapse of a Deferral Period as provided under Paragraph 2.

OTHER TERMS

4. Rights of a Shareholder. Director shall have no rights as a shareholder with respect to any shares covered by this Agreement until the date of issuance of a stock certificate to him for such shares. Except as otherwise provided herein, no adjustment shall be made for dividends or other rights for which the record date is prior to the date such stock certificate is issued.

5. Non-Assignability. This Agreement shall not be assignable or transferable by Director except by will or by the laws of descent and distribution except pursuant to a domestic relations order entered by a court of competent jurisdiction. During the lifetime of Director the shares of Common Stock issued in connection with DSUs shall be delivered only to Director.

6. General Restrictions. If at any time the Chief Executive Officer of the Company ("CEO") shall determine, in his discretion, that the listing, registration or qualification of any shares subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of or the issuance of DSUs or shares hereunder, the DSUs or shares may not be awarded or issued unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the CEO and any delay caused thereby shall in no way affect the date of termination of the award.

7. Tax Withholding and Information Reporting. Whenever the Plan provides that shares of Common Stock are to be delivered following the lapse of the Deferral Period, the Company shall have the right to require Director to remit to the Company an amount sufficient to satisfy any federal, state, and/or local withholding tax requirements prior to the delivery of such certificates. In addition, the Company shall have the right to satisfy any withholding requirements by withholding shares of Common Stock from the shares of Common Stock otherwise deliverable to Director, provided, however, that no shares of Common Stock are to be withheld with a value exceeding the minimum amount of tax required to be withheld by law. The Company will report income to Director on IRS Form 1099, 1042-S, or other appropriate information form or return.

8. Amendment of this Agreement. With the consent of Director, the Board may amend this Agreement in a manner not inconsistent with the Plan.

9. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Drive, Suite 200E, Florham Park, New Jersey 07932, addressed to the attention of Office of Corporate Secretary, and if to Director shall be delivered personally or mailed to Director at the address as the same appears on the records of the Company.

EXHIBIT 10.6(b)(ii)

Agreement for Non-Employee Directors - Equity Compensation Plan for Non-Employee Directors; DSUs Only

10. Interpretation of This Agreement. The Board shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Board in its or his sole good faith judgment shall be determined to be advisable. All decisions, interpretations and administrative actions made by the Board hereunder or under the Plan shall be binding and conclusive on the Company and Director. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

11. Successors and Assigns. This Agreement shall be binding and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Paragraph 5 to the personal representatives, legatees and heirs of Director.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CEO CERTIFICATIONS

I, Ashok Vemuri, certify that:

1. I have reviewed this Annual Report on Form 10-K of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (c) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Cautionary Note Regarding Forward-Looking Statements

For purposes of this 2018 Form 10-K, the terms "HMS," "Company," "we, "us, and "our" refer to HMS Holdings Corp. and its consolidated subsidiaries unless the context clearly indicates otherwise. Included in this 2018 Form 10-K are "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Such statements relate to our current expectations, projections and assumptions about our business, the economy and future events or conditions. They do not relate strictly to historical or current facts.

We have tried to identify forward-looking statements by using words such as "aim," "anticipate," "believe," "estimate," "expect," "forecast," "future," "intend," "likely," "may," "plan," "project," "seek," "strategy," "target," "will," "would," "could," "should," and similar expressions and references to guidance, although some forward-looking statements may be expressed differently. These statements include, among other things, information concerning our future growth, business strategy, strategic or operational initiatives, our future operating or financial performance, our ability to invest in and utilize our data and analytics capabilities to expand our capabilities, the benefits and synergies to be obtained from completed and future acquisitions, the future performance of companies we have acquired, our future expenses, interest rates and tax rates, our ability to meet our future liquidity requirements, the impact of changes to U.S. healthcare legislation or healthcare spending affecting Medicare, Medicaid or other publicly funded or subsidized health programs, and other statements regarding our possible future actions, business plans, objectives and prospects.

Forward-looking statements are not guarantees and involve risks, uncertainties and assumptions that are difficult to predict. Actual results may differ materially from past results and from those indicated by such forward-looking statements if known or unknown risks or uncertainties materialize, or if underlying assumptions prove inaccurate. These risks and uncertainties include, among other things:

- *our ability to execute our business plans or growth strategy;*
- *our ability to innovate, develop or implement new or enhanced solutions or services;*
- *the nature of investment and acquisition opportunities we are pursuing, and the successful execution of such investments and acquisitions;*
- *our ability to successfully integrate acquired businesses and realize synergies;*
- *significant competition for our solutions and services;*
- *variations in our results of operations;*
- *our ability to accurately forecast the revenue under our contracts and solutions;*
- *our ability to protect our systems from damage, interruption or breach, and to maintain effective information and technology systems and networks;*
- *our ability to protect our intellectual property rights, proprietary technology, information processes and know-how;*
- *our failure to maintain a high level of customer retention or the unexpected reduction in scope or termination of key contracts with major customers;*
- *customer dissatisfaction or our non-compliance with contractual provisions or regulatory requirements;*
- *our failure to meet performance standards triggering significant costs or liabilities under our contracts;*
- *our inability to manage our relationships with data sources and suppliers;*
- *our reliance on subcontractors and other third party providers and parties to perform services;*
- *our ability to continue to secure contracts and favorable contract terms through the competitive bidding process;*
- *pending or threatened litigation;*
- *unfavorable outcomes in legal proceedings;*
- *our success in attracting and retaining qualified employees and members of our management team;*
- *our ability to generate sufficient cash to cover our interest and principal payments under our credit facility;*
- *unexpected changes in tax laws, regulations or guidance and unexpected changes in our effective tax rate;*
- *unanticipated increases in the number or amount of claims for which we are self-insured;*
- *changes in the U.S. healthcare environment or healthcare financing system, including regulatory, budgetary or political actions that affect healthcare spending or the practices and operations of healthcare organizations;*
- *our failure to comply with applicable laws and regulations governing individual privacy and information security or to protect such information from theft and misuse;*
- *our ability to comply with current and future legal and regulatory requirements;*

- *negative results of government or customer reviews, audits or investigations;*
- *state or federal limitations related to outsourcing of certain government programs or functions;*
- *restrictions on bidding or performing certain work due to perceived conflicts of interests;*
- *the market price of our common stock and lack of dividend payments; and*
- *anti-takeover provisions in our corporate governance documents.*

These and other risks are discussed under the headings "Part I, Item 1. Business," "Part I, Item 1A. Risk Factors," "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk" of this 2018 Form 10-K and in other documents we file with the SEC.

Any forward-looking statements made by us in this 2018 Form 10-K speak only as of the date on which they are made. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law. We caution readers not to place undue reliance upon any of these forward-looking statements. You are advised, however, to consult any further disclosures we make on related subjects in our Form 10-Q and Form 8-K reports and our other filings with the SEC.

Market and Industry Data

This 2018 Form 10-K contains market, industry and government data and forecasts that have been obtained from publicly available information, various industry publications and other published industry sources. We have not independently verified the information and cannot make any representation as to the accuracy or completeness of such information. None of the reports and other materials of third party sources referred to in this 2018 Form 10-K were prepared for use in, or in connection with, this 2018 Form 10-K.

Trademarks and Trade Names

We have a number of registered trademarks, including HMS®, as well as the corresponding HMS + logo design mark, HMS IntegritySource®, Eliza®, Essette® and Elli®. These and other trademarks of ours appearing in this 2018 Form 10-K are our property. Solely for convenience, trademarks and trade names of ours referred to in this 2018 Form 10-K may appear without the ® or ™ symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the right of the applicable licensor to these trademarks and trade names. This 2018 Form 10-K contains additional trade names and trademarks of other companies. We do not intend our use or display of other companies' trade names or trademarks to imply an endorsement or sponsorship of us by such companies, or any relationship with any of these companies.

PART I

Item 1. Business

Founded in 1974, HMS is an industry-leading provider of cost containment solutions in the healthcare marketplace. We use healthcare data technology, analytics and related services to deliver coordination of benefits, payment integrity, population risk intelligence, care management and consumer engagement solutions to help payers reduce costs, improve healthcare outcomes and enhance member experiences. We provide coordination of benefits services to government and commercial healthcare payers to ensure that the correct party pays a claim, and payment integrity services to ensure the correct amount is paid. Our total population management solutions provide risk-bearing organizations with reliable intelligence across their member populations to identify risks and improve patient engagement and outcomes. Together these services help move the healthcare system forward for our customers and contribute to bending the healthcare cost curve for the nation.

HMS began its operations as Health Management Systems, Inc., which became our wholly owned subsidiary in March 2003 when we assumed its business in connection with the adoption of a holding company structure. In recent years HMS has grown both organically and through targeted acquisitions of businesses that helped expand our solution suite, including IntegriGuard, LLC (doing business as HMS Federal) in 2009; HealthDataInsights, Inc. ("HDI") in 2011; Essette, Inc. ("Essette") in 2016; and Eliza Holding Corp. ("Eliza") in 2017. We currently operate as one business segment with a single management team that reports to the Chief Executive Officer.

We were originally incorporated in the State of New York in October 2002 and reincorporated in the State of Delaware in July 2013. Our principal executive offices are located at 5615 High Point Drive, Irving, Texas 75038, and our telephone number is (214) 453-3000. As of December 31, 2018, we had approximately 2,500 employees. Additional information about HMS is available on our website at www.hms.com.

Copies of our recent Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and Proxy Statements, as well as amendments to these reports or statements, are available free of charge on our website through the Investor Relations page, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. These materials, as well as similar materials for SEC registrants, may be obtained directly from the SEC through their website at http://www.sec.gov.

The content of any website referred to in this 2018 Form 10-K is not incorporated by reference into this filing unless expressly noted. References to the URLs for these websites are intended to be inactive textual references only.

Our Solutions

We provide solutions that apply broadly across Medicaid, Medicare, commercial at-risk, and employer self-insured populations. Our services span the payment and care continuum from an individual's enrollment in a program before medical service is rendered, to pre-payment review of a claim, through recovery where identification of improper payments is made via audit, and back to the individual where our consumer-driven solutions allow health plans to manage their members on a personal level, and at scale, by using actionable analytics that drive patients to take action to improve health outcomes. Our coordination of benefits and payment integrity services ensure payment accuracy by addressing a wide spectrum of payment errors, including eligibility and coordination of benefits errors, the identification and investigation of potential fraud, and the review of claims on a pre-payment and post-payment basis. Our total population management services assist customers in managing quality, risk, cost and compliance across all lines of business by engaging members, providing the tools to manage their care, and identifying existing or emerging health risk among members. As a result of these services, our customers saved billions of dollars in 2018 through the prevention of erroneous payments, improved clinical outcomes for their members, and reduced enrollment turnover; and they received billions more in cash recoveries for improperly paid claims.

Our comprehensive solutions offer value throughout the healthcare continuum and include the following:

Coordination of Benefits (COB)

Our COB services are provided primarily for state governments and Medicaid managed care plans, pursuant to Federal law which mandates that Medicaid is the payer of last resort, and draw principally upon proprietary information management and data mining techniques designed to ensure the correct party pays a healthcare claim. We offer cost avoidance services, which include providing validated insurance coverage information that is used by payers to coordinate benefits properly for future claims. With validated insurance information, Medicaid payers can avoid unnecessary costs by ensuring they pay only after all other insurance coverage available has been exhausted. Nevertheless, due to a variety of factors, many Medicaid claims are paid even when there is a known responsible third party. Our customers rely on us to identify Medicaid eligibility, before a claim is submitted, and retrospectively, for those claims that were paid in error, and then recover these payments from the liable third party. We

also provide services to assist customers in identifying other third-party insurance and recovering medical expenses where a member is involved in a casualty or tort incident. Lastly, for Medicaid agencies exclusively, we provide estate recovery services to identify and recover Medicaid expenditures from the estates of deceased Medicaid members in accordance with state policies. For the years ended December 31, 2018, 2017 and 2016, our COB services represented 66.4%, 73.4% and 72.2% of our total revenue, respectively.

Analytical services

Analytical services consists of our payment integrity and total population management solutions.

Payment Integrity (PI)

Our PI services ensure healthcare payments are accurate and appropriate. These services are applicable to all customers HMS serves, including federal and state governments, commercial health plans and other at-risk or self-insured entities. Our solutions verify that healthcare services are utilized, billed and paid appropriately. We combine data analytics, clinical expertise and proprietary algorithms and technology to identify and prevent improper payments on submitted claims to optimize savings before a claim is even paid, and on a post-payment basis, to identify and recover overpayments and correct underpayments; detect and prevent fraud, waste and abuse; and identify process improvements. For the years ended December 31, 2018, 2017 and 2016, our PI services represented 24.1%, 20.0% and 27.6% of our total revenue, respectively.

Total Population Management (TPM)

Our TPM services consist of population risk analytics, consumer engagement and care management solutions, which are the result of internal product development and our acquisitions of Essette in 2016 and Eliza in 2017. These solutions help customers better manage quality, cost, compliance and patient outcomes and improve their members' experience. The services span across the care continuum. Our flexible, scalable architecture and modular platform integrates early risk identification, advanced analytics, multi-channel outreach, social engagement and care management components to address our customers' increased focus on consumer engagement, performance management and program design—all key components of an effective population health management program. Our Elli, Eliza and Essette solutions leverage HMS data and advanced analytics to support population risk management, member engagement and care management, respectively, and provide customers with a tailored, integrated platform that addresses core healthcare industry challenges on an enterprise scale. For the years ended December 31, 2018, 2017 and 2016, our TPM services represented 9.5%, 6.6% and 0.2%, of our total revenue, respectively.

Intellectual Property

Our ability to develop and maintain the proprietary aspects of our technology and operate without infringing the proprietary rights of others is important to our business and competitive position. We establish and protect our proprietary technology and intellectual property through a combination of patents, patent applications, trademarks, copyrights, domain names and trade secrets, as well as through contractual rights, including confidentiality, non-disclosure and invention assignment agreements, and other security measures.

As of December 31, 2018, our patent portfolio is comprised of approximately 60 domestic and international patents, and we are currently pursuing several patent applications in the United States and around the world. Our principal trademarks are HMS®, and the corresponding HMS + logo design mark, HMS IntegritySource®, Eliza®, Essette®, and Elli®. We also hold copyrights relating to certain aspects of our solutions and services. While we consider all of our intellectual and proprietary rights important to HMS, we believe our business as a whole is not materially dependent on any particular patent, trademark, license or other intellectual property right.

Customers

We provide our solutions to customers across a broad range of entities within the healthcare industry, including health plans, state agencies, federal programs, private employers and other risk-bearing healthcare organizations. For the years ended December 31, 2018, 2017 and 2016, our total revenue was $598.3 million, $521.2 million and $489.7 million, respectively. No single customer accounted for 10% or more of our total revenue during any period presented.

The composition of our 10 largest customers changes periodically. For the years ended December 31, 2018, 2017 and 2016, our 10 largest customers represented 41.4%, 39.5% and 40.6% of our total revenue, respectively. We provide services under contracts (or subcontracts) that contain various revenue structures, including contingent revenue and to a lesser extent fixed-fee arrangements. The current terms of many of our federal and state government contracts range from one to five years, including renewal terms at the option of the customer. In many instances, we provide our services pursuant to agreements that are subject to periodic reprocurements. Several of our contracts, including those with some of our largest customers, may be terminated for convenience, in whole or in part, by the customer. Because we provide our services pursuant to agreements that are open to competition from various businesses in the U.S. healthcare arena, we cannot provide assurance that our contracts, including those with our largest customers, will not be terminated for convenience or awarded to other parties. Additionally, we cannot provide assurance that any contracts that are renewed will have the same fee structures as the expiring contracts or otherwise be on satisfactory terms. The early termination of key contracts with significant customers, or the inability to renew such contracts on favorable terms or at all, may have an adverse effect on our financial condition, results of operations and cash flows.

In providing solutions and services to our customers, we rely heavily upon our technology systems and networks, as well as on those of third-party providers, to process, transmit, maintain, store and host the confidential, proprietary and sensitive information and data we receive from our customers and other data suppliers, including private insurance plans and financial institutions. The secure processing and maintenance of this information is critical to our operations and business strategy. Although we have spent significant resources to implement security and privacy programs and controls, train our workforce and augment our security measures with the implementation of new technologies and processes, our information technology and infrastructure, and those of third parties on which we rely could continue to be potentially subject to various forms of cyber-attacks, as further discussed under the heading “Part I, Item 1A. Risk Factors.”

Healthcare Landscape

The market for cost containment solutions is large and growing, driven by increasing healthcare costs, rising program enrollment and payment complexities. Established in 1965 under the Social Security Act, Medicaid provides health insurance and long-term care services and support to low-income families and individuals with disabilities in the United States. Medicaid is funded jointly by the federal and state governments and administered by the states. The Balanced Budget Act of 1997 created CHIP to help states expand coverage primarily to children whose families earned too much to qualify for Medicaid, yet not enough to afford private health insurance. Medicare is a federal program that is administered by CMS, and provides eligible persons age 65 and over and some disabled persons with a variety of hospital, medical insurance and prescription drug benefits. All three of these programs have opted to contract with managed care organizations in whole or in part as a means of delivering quality healthcare to program beneficiaries and controlling costs.

By law, Medicaid programs serve as the payer of last resort and all other sources of coverage must pay for medical costs incurred by a Medicaid-eligible individual. The TPL rules of the Medicaid statute require, among other things, that states take reasonable measures to identify potentially liable third parties and process claims accordingly. Since 1985, we have provided state Medicaid agencies with services to identify third parties with primary liability for paying claims for Medicaid members, and since 2005, we have provided similar services to Medicaid managed care plans.

The Deficit Reduction Act enacted by Congress in 2006 contained provisions to strengthen the TPL rules and created the Medicaid Integrity Program under the Social Security Act to increase the government’s capacity to prevent, detect and address fraud, waste and abuse in the Medicaid program. Later that year, Congress passed the Tax Relief and Health Care Act of 2006, which established the Medicare RAC program. These measures, at both the federal and state level, have strengthened our ability to identify and recover erroneous payments on behalf of our customers. We also serve as a Medicaid RAC to certain states pursuant to provisions of the ACA and became the Medicare RAC for Region D with our acquisition of HDI. We again were awarded a region under the new Medicare RAC contracts in October 2016. Following the implementation of the new Medicare RAC contracts and completion of contract closeout activities for RAC Region D, our original Medicare RAC contract expired on January 31, 2018.

The ACA, generally referred to as Obamacare, was signed into law in 2010 and has made broad-based changes to the U.S. healthcare system, including many provisions impacting healthcare delivery and payment programs, such as employer-sponsored health coverage, Medicaid, Health Insurance Exchanges with premium subsidies and payment integrity efforts. The ACA also further expanded the recovery audit contractor program to states. CMS and various states have proposed Medicaid program design alternatives and changes to enrollment criteria which could impact future Medicaid enrollment. As ACA-related changes develop or are enacted, we will assess their potential impact, including opportunities they may present for our customers and for us.

Industry Trends and Opportunities

U.S. healthcare expenditures continue to escalate and consume an increasingly larger proportion of the U.S. GDP, presenting challenges for payers who wish to contain costs and promote quality healthcare outcomes. For 2019, Medicare and Medicaid are projected to pay approximately 37.9% of the nation's healthcare expenditures and serve over 136.3 million beneficiaries. Many of these beneficiaries are enrolled in managed care plans, which have the responsibility for both patient care and claims adjudication. The dual aims of cost containment and quality healthcare outcomes are the same across all at-risk entities, including commercial health plans and government healthcare programs, such as Medicaid and Medicare.

Within the commercial market, health plans sell policies directly to individuals (on the open market or via health insurance exchanges), contract with employers to underwrite their employees' care, or contract with self-insured employers to oversee benefit administration for their employees. This market also includes a growing number of risk bearing provider-sponsored plans that operate and market health plan benefits. According to CMS NHE projections, private health insurance covered approximately 197.5 million individuals at a cost of approximately $1.24 trillion in 2018.

Several commercial health plans also offer government-sponsored lines of business, including partnering with Medicare, Medicaid and CHIP to oversee care delivery for beneficiaries enrolled in those programs. States continue to focus on improving value, quality and outcomes through arrangements with MCOs. At the end of state fiscal year 2018, 47 states and the District of Columbia operated with some form of managed care, and Alaska reported plans to implement a managed care program in 2019. Comprehensive risk-based managed care continues to be the predominant delivery system for Medicaid services in the US. Among the 39 Medicaid programs with comprehensive risk-based MCOs, 33 reported that 75% or more of their Medicaid beneficiaries were enrolled in MCOs as of July 1, 2018. Of the 32 states that had implemented Medicaid expansion pursuant to the ACA, 27 were using MCOs to cover newly eligible adults as of July 1, 2018. Managed care health plans also continue to assume risk for a growing number of Medicare lives. Approximately 34% of all Medicare beneficiaries, or 20 million lives, were enrolled in Medicare Advantage plans in 2018.

HMS continues to serve government agency fee-for-service programs at the state and federal level. These plans are generally reliant on and susceptible to the government appropriations process that determines their budget and governs the number of beneficiaries they serve. According to the CMS NHE projections, Medicare programs in 2018 covered approximately 59 million people at a cost of approximately $748 billion and Medicaid/CHIP covered approximately 81.2 million people, costing approximately $641 billion. Altogether, it is projected that the government programs we serve covered approximately 140.2 million people at a total cost of nearly $1.39 trillion in 2018.

CMS projects that Medicare enrollment growth will increase by 3.03% in 2019, with expenditures to increase by 7.95% in 2019 compared to 2018; and Medicaid/CHIP enrollment growth will increase by 1.97% in 2019, with expenditures to increase by 5.5% in 2019 compared to 2018. As commercial and government health plans focus on strategies to contain costs across their different lines of business, HMS will continue offering solutions to meet their evolving needs.

Competitors

The U.S. healthcare marketplace is a dynamic industry with a range of businesses currently offering cost containment services, both directly or indirectly (through subcontracting), to some or all of the various healthcare payers, providers, employers and consumers. In addition, with improvements in technology and the growth in healthcare spending, new businesses are incentivized to enter this marketplace. Many customers also have the ability to perform some or all of the needed cost containment services themselves and choose to exercise that option to varying degrees. Therefore, competition is robust as customers have many alternatives available to them in their effort to contain healthcare costs.

We compete based on a variety of factors, including our ability to provide a broad range of solutions that span the entire healthcare claims payment and services continuum. These include payment accuracy solutions focused on COB and PI related functions, as well as TPM solutions which support the ability of payers to better understand and engage consumers, perform effective outreach, and impact both costs and health outcomes.

We have a proven record of delivering results that optimize savings and recoveries, enabled by:

- in-depth government and commercial healthcare program experience;
- clinical staff expertise;
- expansive data resources;

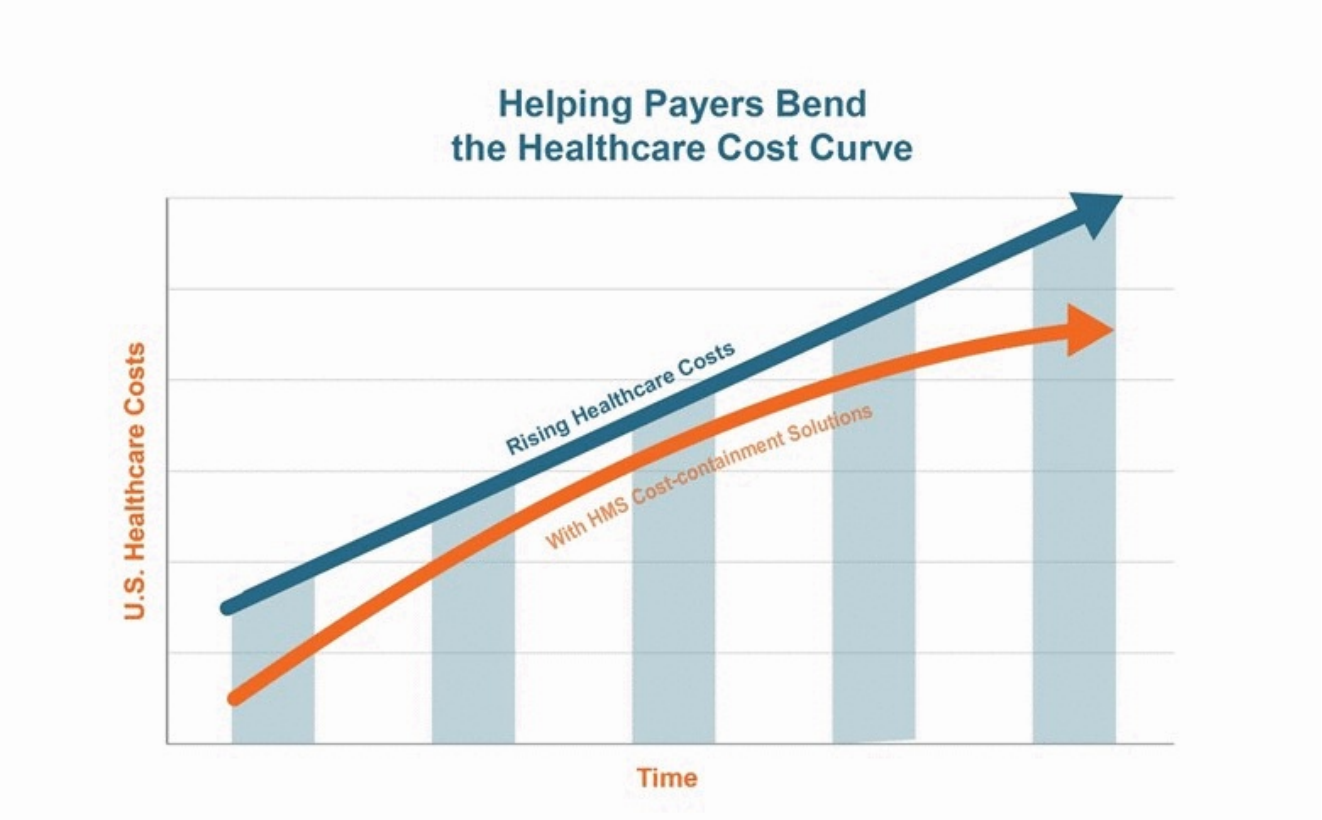
- innovative technology;
- enterprise analytics;
- an extensive insurance eligibility database;
- extensive relationships with customers and other industry stakeholders; and
- an ability to provide customers with actionable intelligence to improve clinical outcomes, optimize patient engagement, and better manage costs.

Our competitors range in size from large, diversified national companies, to small, specialized firms. Some of these competitors have significantly greater financial and technical resources, and others have longer operating histories and greater name recognition than we do in certain markets. Within our payment accuracy portfolio of products and services, we compete primarily with large business outsourcing and technology firms, claims processors and PBMs, clearinghouses, healthcare consulting firms, and other vendors who provide some or all of these solutions to payers. In addition, we frequently work with customers who may elect to perform some or all of their cost avoidance and recovery functions in-house. Within the population health management sector, we compete primarily with vendors who provide care management, consumer engagement, and related technology services. Companies with whom we compete across our offerings include:

- Accenture plc
- Cotiviti Corporation
- EXL Service Holdings, Inc.
- LexisNexis
- Performant Financial Corporation
- CaseNet LLC
- DXC Technology Company
- Experian Health
- MedHok, Inc.
- Welltok, Inc.
- Change Healthcare
- Equian, LLC
- IBM Watson Health
- Optum (subsidiary of UnitedHealthGroup)
- ZeOmega LLC

Business Strategy

We believe that the steadily increasing enrollment and rising expenditures for Medicare and Medicaid, with most new enrollees entering managed care plans; an aging U.S. population with an increasing concentration of individuals with high cost chronic conditions and often co-morbidities; and the overall complexity of the healthcare claims payment system in the U.S. all combine to create substantial growth opportunities for the suite of cost containment solutions we offer.



We also believe these factors present growth opportunities for our TPM services. We are focused on growing our business over the course of 2019 and beyond, both organically and inorganically, by leveraging existing key assets (e.g., our data, analytics, in-house expertise, and distribution channel) and pursuing a number of strategic objectives or initiatives, including:

- *Expanding the scope of our relationship with existing customers* – by selling additional solutions and services, including those designed to improve member engagement and improve clinical outcomes.
- *Adding new customers* – by marketing to commercial health plans, including Medicaid managed care and Medicare Advantage plans, at-risk group and individual health lines of business and ASOs; government healthcare payers, including Medicaid agencies, state employee health benefit plans and CHIPs; at-risk provider organizations and ACOs; and commercial self-insured employers.
- *Introducing new innovative solutions and services* – through internal development initiatives designed to enhance or expand our existing suite of cost containment solutions.
- *Utilizing technology tools to leverage a big data environment* – to create a more nimble operating environment, create operating efficiencies, improve the yield on our existing solution suite and identify new revenue opportunities within our current service delivery models.
- *Promoting automation and innovation to improve the efficiency and effectiveness of our services* – by continuing to implement new technology and process improvements designed to increase recovery yields, increase customer satisfaction and achieve greater operating efficiencies.
- *Prudent deployment of capital* – by investing in internal growth initiatives; selectively investing in capabilities, technologies, and assets to complement our core cost-containment expertise; building care management and care coordination adjacencies to complement the Essette and Eliza acquisitions and our internally developed Elli risk intelligence product; and expanding our data analytics capabilities. Our focus may include acquisitions that represent long-term growth potential, target high-growth areas, are accretive to earnings, enhance our technological capabilities and fill a strategic need in our business portfolio as we seek to provide increasingly comprehensive solutions to our customers. We may also repurchase our shares, pursuant to a two-year $50 million authority granted by our Board of Directors in November 2017, which has a remaining unused authority of approximately $29.9 million.

Item 1A. Risk Factors

Our business is subject to significant risks, including the risks and uncertainties described below. You should carefully consider these risks, as well as the other information in this 2018 Form 10-K, including our Consolidated Financial Statements and the related Notes. The occurrence of any of these risks could adversely affect our business, financial condition, results of operations, and cash flows in a material way.

Risks Relating to Our Company

Our ability to expand our business will be adversely affected if we fail to implement our growth strategy.

The size and scope of our business operations have expanded over the past several years, and we currently intend to continue our growth and expansion into new healthcare areas and markets, however, our growth and expansion strategy carries costs and risks that, if not properly managed, could adversely affect our business. Our future growth will depend on, among other things, our ability to successfully execute our business plans, which includes penetrating new markets, broadening and deepening our customer relationships, identifying and executing future acquisitions and strategic partnerships, and increasing the speed and scale at which we deliver our services, all while remaining competitive. We must also be flexible and responsive to customers' needs and changes in the political, economic and regulatory environment in which we operate. The greater size and complexity of our expanding business may put additional strain on our administrative, operational and financial resources and can make optimal resource allocation more difficult to determine. It is possible that we may not be able to maintain or accelerate our growth. A failure to anticipate or properly address the demands and challenges that our growth strategy and potential diversification may have on our resources and existing infrastructure may result in unanticipated costs and inefficiencies that could negatively impact our ability to execute on our business plans and growth goals, which may have a material adverse effect on our business, financial condition, results of operations and cash flows.

If we fail to innovate and develop new or enhanced solutions and services, or if these solutions and services are not adopted by our customers, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Part of our growth strategy depends on our ability to respond to the evolving healthcare landscape with new and enhanced solutions and services that our existing and potential customers are willing to adopt. The development, marketing and implementation of these solutions and services may require that we make substantial financial and resource investments. We face risks that our new or modified solutions and services may not be responsive to customer preferences or industry changes, and that the solution and service development initiatives that we prioritize may not yield the gains that we anticipate, if any. If we are unable to predict market preferences or healthcare industry changes, or if we are unable to develop or adapt solutions and services that are responsive to existing and potential customers' needs, we may fail to expand our business, which could constrain our future revenue growth and materially adversely affect our business, financial condition, results of operations and cash flows.

Our acquisition strategy may subject us to considerable business and financial risk.

Historically, to achieve our strategic goals, we have made a significant number of acquisitions that have expanded the solutions and services we offer, provided a presence in complementary business lines, or expanded our geographic presence and/or customer base. We intend to pursue future acquisitions that will continue to expand and complement our business and to periodically engage in discussions regarding such possible acquisitions. We are subject to risks and uncertainties relating to our ability to identify suitable potential acquisition candidates, to consummate additional acquisitions that will be advantageous to us, and to successfully integrate future acquisitions. Future and potential business acquisitions involve a number of risk factors that could affect our operations, including, but not limited to:

- diversion of management's attention and other resources;
- our ability to successfully and timely integrate operational, accounting and technology functions, policies, processes, systems and controls, and to implement these functions, policies, processes, systems and controls, without incurring substantial expenses, delays, difficulties or other issues;
- our ability to integrate personnel and human resource systems as well as the cultures of the acquired business;
- our ability to retain or replace the key personnel of the acquired business;
- our ability to maintain relationships with the customers of the acquired business;
- our ability to expand and further develop the acquired business;
- our ability to cross-sell our solutions and the solutions of the acquired business to our respective customers;
- customer dissatisfaction or performance problems with the acquired business;
- our ability to comply with regulatory requirements and avoid potential conflicts of interest in markets that we serve;
- the misuse of intellectual property by the personnel of the acquired business;
- our ability to successfully enter into unfamiliar markets or manage new business lines;
- assumption of unanticipated legal or financial liabilities and/or negative publicity related to prior acts by the acquired business;
- we may become subject to litigation or other claims in connection with the acquired business, including claims from terminated employees, customers, former shareholders or third parties;
- we may become significantly leveraged as a result of incurring debt to finance an acquisition;
- the acquired business may not perform as projected which could negatively impact earnings or contingent consideration;
- we may suffer impairment of goodwill and other acquired intangible assets; and
- we may suffer dilution to our earnings per share.

If we fail to adequately address these risks, or to successfully integrate the businesses that we acquire, we may not realize cost efficiencies, synergies or other benefits that we anticipated when selecting our acquisition candidates, and our reputation, business, financial condition, results of operations and cash flows could be materially adversely affected.

We face significant competition for our solutions and services and we expect competition to increase, which could materially adversely affect our business, financial condition, results of operations and cash flows.

The market for healthcare cost containment solutions is intensely competitive, driven by rapidly changing technologies, evolving industry standards and customer demands to become more efficient. Our competitors range in size from large, diversified national companies (some of which have emerged as a result of industry consolidation), to small, specialized firms. Some of our competitors may include current or former subcontractors or teaming partners seeking to establish direct relationships with our customers and provide similar services as the prime contractor, as well as current and prospective customers that elect to perform recovery and cost avoidance functions in-house or to develop in-house capacities for solutions and services that we provide or seek to provide. Consolidation among vendors and healthcare providers, as well as the merging of some of our competitors or formation of business alliances with other competitors, have contributed to the increasingly competitive environment. For example, certain state customers have combined or "bundled" TPL services under large-scale IT procurements, as they shift to implementing modular Medicaid Enterprise Systems. As part of this modular approach, they may select a new or less experienced vendor to provide the TPL module based on preferred relationships or favorable pricing. In addition, companies that have invested in proprietary technology different from our own service offerings, such as front-end analytics, have emerged as new competitors due to the rapidly evolving healthcare landscape. There is also increasing sophistication in the solutions and services that our competitors are developing that may become more efficient or appealing to our customers. In order to remain competitive, we may need to quickly develop and market new and enhanced solutions and services responsive to emerging technologies and changes in the healthcare industry, which may require that we make substantial financial and resource investments.

We may not be able to compete successfully against our existing or future competitors. Some of these competitors have significantly greater financial and technical resources, and others have longer operating histories and greater name recognition than we do in certain markets. They may be able to (i) offer lower prices or negotiate fee reductions on our current solutions and services, (ii) respond more quickly than we can to new and emerging technologies and changing customer requirements, (iii) devote greater resources to the sale of their products and the development and implementation of new and improved systems, solutions and services for customers that we serve, and (iv) pursue various acquisitions that allow them to rapidly amass a wide array of capabilities. We may be forced to lower our pricing, unexpectedly increase or enhance our technological or data capabilities, or modify our solution or service offerings. Notwithstanding any changes we make in response to increased competition, the demand for our solutions and services may decrease as a result of increased competition. A failure to be responsive to our existing and potential customers' needs or the changing industry landscape could hinder our ability to maintain or expand our customer base, hire and retain new employees, pursue new business opportunities, complete future acquisitions and operate our business effectively. Any inability to compete effectively could materially adversely affect our business, financial condition, results of operations and cash flows.

You will not be able to rely on our operating results in any particular period as an indication of our future performance because they are subject to significant fluctuation which may cause the market price of our common stock to decrease significantly.

Our revenue and operating results may fail to match our past or projected performance and could vary significantly from period-to-period as a result of a number of factors, some of which are outside of our control. We have experienced fluctuations in our revenue and operating results in the past and they may vary in the future for reasons that include, but are not limited to:

- fluctuations in sales activity given our sales cycle;
- the length of contract and implementation periods;
- the commencement, completion or termination of contracts during any particular quarter;
- contract costs and expenses, which may be incurred in periods prior to revenue being recognized;
- the timing of period revenue recovery projects and third party payers' claim adjudication;
- the billing and budgeting cycles of our customers;
- the timing of government procurement activities, including when contract awards are announced and the time required to resolve bid protests;
- contract renewal discussions, which may result in delayed payments for services already performed;
- changes in the pricing structure or other significant terms in our contract, or the scope of services we perform;
- technological and operational issues affecting our customers, including delays in payment receipt for previously recognized revenue due to certain customers delayed processing of our findings through their systems, and restrictions on our ability to use or access certain data or a lack of integrity or quality in the data or information we receive from certain data sources;
- adjustments to age/quality of receivables and accruals as a result of factors such as delays involving contract limitations or changes, subcontractor performance deficiencies or managerial decisions not to pursue identified claim revenue from customers;
- the impact of service disruptions or delays in the systems or operations of subcontractors, partners, vendors and other third party providers on which we rely on to deliver a single-source solution or service to our customers;
- changes in applicable laws;

- changes in accounting policies or guidelines concerning the timing of recognition of revenue; and
- regulatory changes or general economic conditions as they affect healthcare providers and payers.

We cannot predict the extent to which future variations could occur due to these or other factors. In addition, occasionally our state and federal customers are requested by third party payers to refund payments that we previously recovered for our customers. If our state and federal customers choose to refund money in response to these requests, regardless of whether an error actually occurred in connection with the payments, we may also be required to return contingent revenue which we were previously paid associated with such refunded payment. Consequently, our operating results are subject to significant fluctuation for any particular quarter, fiscal year, or other period, and may not be indicative of future periods. Our business is also subject to seasonal patterns resulting from increased efforts at year-end by certain customers to generate additional savings, complete compliance obligations and close gaps in care. However, taken as a whole, we do not consider our operations to be seasonal to any material degree. Due to all of these factors, our revenue and operating results are difficult to predict and are subject to significant fluctuation, which may cause the market price of our common stock to decrease significantly.

We face challenges associated with forecasting the revenue under our contracts, and any failure to accurately forecast such revenue could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to accurately estimate the factors upon which we base our contract pricing, or the costs and timing for implementing and completing our contracts. For a majority of our customer contracts, the payment of our fee is contingent upon the recoveries received by our customers. We also have cost-plus or time-and-materials based contracts with the federal government where our revenue is recognized based on costs incurred plus an estimate of the negotiated fee earned. Our ability to earn a profit on these contracts requires that we accurately estimate the costs involved with these contracts and assess the probability of achieving certain outcomes or milestones within the contracted time period. In addition, we cannot predict with certainty the costs or the period in which implementation or contracts may be completed when we introduce new solutions into the marketplace. For our coordination of benefits and payment integrity services, we may face a long implementation period with a new customer or a new contract with an existing customer, making it difficult to reliably forecast revenue under those contracts. If we do not accurately estimate the costs and timing for completing projects, or if we encounter increased or unexpected costs, delays, failures, liabilities or risks, including those outside of our control, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. Although we believe that we have recorded adequate provisions in our financial statements for losses on our fixed price and cost-plus contracts where applicable, as required under U.S. GAAP, our contract loss provisions may not be adequate to cover all actual future losses.

System interruptions or failures could expose us to liability and harm our business.

Our data and operation centers are essential to our business and our operations depend on our ability to maintain and protect our information systems. We attempt to mitigate the potential adverse effects of a disruption, relocation or change in operating environment; however, the situations we plan for and the amount of insurance coverage that we maintain may not be adequate in every case. Despite systems redundancy and security measures, our systems and operations are vulnerable to damage or interruption from, among other sources:

- power loss, transmission cable cuts and telecommunications failures;
- fire, flood, earthquake and other natural disasters;
- hardware failures or software defects;
- operator error;
- cyber security breaches; and
- physical break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond our control.

In addition, while there are backup systems in many of our facilities, an extended outage of utility or network services supplied by third party IT vendors may delay or disrupt the delivery or performance of the services we provide for our customers. We also utilize third-party cloud service providers to help us efficiently scale certain cloud-based solutions. If we or our cloud service providers encounter a lengthy business interruption, or in the event our business continuity plans and business interruption insurance coverage are not adequate or fail to compensate us on a timely basis, we could suffer operational disruptions, disputes with customers, civil or criminal penalties, regulatory problems, increases in administrative expenses, loss of our ability to produce timely and accurate financial and other reports, damage to our reputation or customer relationships or other adverse consequences, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our systems and networks and those of third parties on which we rely may be subject to cyber security breaches and other disruptions that could compromise our information and harm our business.

In the ordinary course of our business, we rely heavily upon our technology systems and networks, as well as on those of third-party providers, to process, transmit, maintain, store and host the confidential, proprietary and sensitive information and data we receive from our customers and other data suppliers, including private insurance plans and financial institutions. In addition, subcontractors, teaming partners or other third-party vendors may receive or utilize this information on our behalf in support of the services we perform for our customers. The secure processing and maintenance of this information is critical to our operations and business strategy. Although we have spent significant resources to implement security and privacy programs and controls, train our workforce and augment our security measures with the implementation of new technologies and processes, our information technology and infrastructure, and those of third parties on which we rely, could continue to be subject to computer hacking or phishing efforts, acts of vandalism or theft, introduction of malware, computer viruses or other malicious codes, employee error or malfeasance issues, catastrophes, unforeseen events or other cyber-attacks. We may be unable to implement adequate preventive measures to protect against such compromises in the future or to effectively adapt our security measures to evolving security risks. As a result, our technology systems, including our data and our customers' data, could be accessed improperly, made unavailable, improperly modified, corrupted or otherwise breached or compromised, or we could suffer system disruptions, shutdowns and denials of service. Similarly, we could be materially adversely affected by the loss of proprietary, trade secret or confidential technical and financial data if our internal networks are compromised. The occurrence of any of these events could harm the market perception of the effectiveness of our security measures, lead to reputational damage or the loss of our customers' confidence in our solutions, negatively affect our ability to attract new customers, cause existing customers to terminate or not renew their existing contracts with us, or deter them from using our solutions or services in the future, all of which could reduce our revenue, increase our expenses and expose us to potential liability under privacy, security or other applicable laws and regulations. We could also be forced to expend significant resources in response to a security breach, including investigating the cause of the breach, repairing system damage, remediating vulnerabilities in our security procedures, increasing cyber security protection costs by deploying additional personnel and protection technologies, paying regulatory fines and penalties imposed by government regulatory agencies, and damages and other substantial costs associated with litigation, indemnification obligations as well as increased cybersecurity insurance premiums, and undertaking additional remediation efforts such as credit monitoring, all of which could increase our expenses, divert the attention of our management and key personnel away from our business operations and materially adversely affect our business, financial condition, results of operations and cash flows.

Any failure to maintain effective information processing systems and the integrity of the data in, and operations of, those systems could materially adversely affect our business, financial condition, results of operations and cash flows.

Our ability to conduct our operations and accurately report our financial results depends on the integrity of the data in our information systems and the processes performed by those systems. As a result of the services we provide, we process a number of complex transactions that require us to access, store, retrieve, manipulate, manage and transmit the information and data of our customers' and external third parties, as well as our own data. Although we have invested a great deal of time and resources in developing systems, processes and controls that protect the integrity of the data, such measures cannot provide absolute security. It is possible that failures or errors in hardware and software, including those in third-party technology, or technical deficiencies in our systems could result in data loss or corruption, or cause the data that we collect, utilize or disseminate to be incomplete or contain inaccuracies that our customers regard as significant. In addition, these information systems and applications require continual maintenance, upgrading and enhancement to meet our operational needs, satisfy customer requests and handle our expansion and growth. Despite our testing and quality control measures, we cannot be certain that errors or system deficiencies will be found and that remediation can be done in a timeframe that is acceptable to our customers, or that customer relationships will not be impaired by the occurrence of errors or the need for remediation. In addition, implementation of upgrades and enhancements may cost more, take longer or require more testing than originally expected. Situations may also arise in which the accuracy of our data analysis or the content and quality of our work product is central to the disposition of claims, controversies or litigation between our customers and third parties that would require us to allocate significant resources to fulfilling our contractual obligations to provide our customers with full and complete access to records, analysis and back-up documentation of our work. Assuring our capacity to fulfill these obligations as well as actually fulfilling them could impose significant burdens on our infrastructure for data storage, maintenance and processing, and require us to incur increased costs to supplement our personnel, data storage and computing resources, which could materially and negatively impact other business operations.

If we are unable to protect our proprietary technology, information, processes, know-how, and other intellectual property and intellectual property rights, or become subject to claims of infringing or misappropriating the intellectual property of third parties, the value of our solutions and services may be diminished and our business may be materially adversely affected.

Our success as a company depends in part upon our ability to protect our core technology and intellectual property. Our expanding operations and efforts to develop new solutions and services also make protection of our intellectual property more critical. We seek to protect our intellectual property and other proprietary information through a combination of patent, trademark, copyright, trade secret and unfair competition laws, confidentiality agreements and invention assignment agreements with employees, consultants and other third parties, as well as through the terms of our agreements with customers and vendors, and other security measures. However, the steps we have taken to deter misappropriation of intellectual property may be insufficient to protect our proprietary information. We may not always be successful at obtaining government registrations for our patents, trademarks, or copyrights that we seek to register. Third parties may also attempt to misuse our company name or trademarks to engage in improper or illegal conduct such as cyber-squatting or other cybercrimes using our marks, and we may not always be successful at quickly obtaining relief from agencies tasked with enforcing parties' rights, or stopping such conduct before harm to third parties occurs. Similarly, misappropriation of our other intellectual property by third parties, or any disclosure or dissemination of our confidential and proprietary trade secrets, business intelligence, queries, algorithms and other similar information by any means, could undermine any competitive advantage we currently derive or may derive from that intellectual property. For example, our current or former employees, consultants or other third parties may unintentionally or willfully disclose our trade secrets, know-how or other confidential and proprietary information to competitors. Competitors have also attempted to use state and/or federal open records laws (such as the federal Freedom of Information Act and analogous state laws) to obtain our proposal responses and other documents we provide to our government customers. We cannot be certain that our efforts to protect the confidential and proprietary trade secret information or intellectual property in these proposals or other documents will always be successful, due to the many factors underlying the various state and federal decisions to release information in response to open records requests (even in spite of our objections and efforts to protect such information). In addition, there remains the possibility that others will independently develop competing technologies that may be equivalent or superior to ours. If our efforts to protect our intellectual property and other proprietary rights are inadequate to prevent unauthorized use or appropriation by third parties or our employees, the value of our brand and other intangible assets may be diminished and others may be able to more effectively compete with our business by offering solutions or concepts that are substantially similar to ours, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, third parties may claim that we are infringing upon or misappropriating their intellectual property, or assert other legal challenges to our intellectual property. Our exposure to risks related to the use of intellectual property may also increase as a result of acquisitions because third parties may make infringement and similar or related claims after we have acquired technology. Any of these situations could cause us to expend significant time and resources and to incur substantial costs associated with litigation or legal proceedings that may be necessary to defend ourselves or to enforce our intellectual property rights, in which we may not ultimately prevail, and could result in our being prevented from furnishing certain solutions and services.

Our business could be materially adversely affected if we fail to maintain a high level of customer retention, if our customers elect to reduce the scope of our contracts or terminate them before their scheduled expiration dates or if we fail to meet performance standards under our customer contracts.

We historically have derived and expect to continue to generate a significant portion of our revenue from a limited number of large customers at the federal and state level. Our contracts with these customers are subject to periodic renewal and some permit them to terminate their contracts on short notice, with or without cause. If a customer is dissatisfied with the quality of our work or if we fail to meet performance standards under our contracts, or if our solutions, technical infrastructure or services do not comply with the provisions of our contractual agreements or applicable regulatory requirements, customers might seek to reduce the scope of the services we perform or prematurely terminate their agreements with us, or we could incur additional costs that may impair the profitability of a contract and damage our ability to obtain additional work from that customer, or other current or prospective customers. For example, some of our contracts contain liquidated damages provisions and financial penalties related to performance failures, which if triggered, could materially adversely affect our reputation, business, financial condition, results of operations and cash flows. We also may be required to disclose such liquidated damages or other financial penalties assessed against us in connection with future bids for services with other customers.

In addition, government customers are subject to financial pressures or pressure from stakeholders that may cause them to terminate contracts for our services that may be regarded as non-essential or to redefine or reduce the scope of our contracts by, for example, significantly reducing the volume of data that we are permitted to audit or renewing the contract at lower performance fee levels. Despite our right to prompt and full payment under the terms of our contracts, we could face challenges in obtaining timely or full payments for our properly provided services from our customers. If there is a substantial reduction in the scope of our services under, or a termination of, any of our key contracts with our major customers, or if we are exposed to significant costs, liabilities or negative publicity, our ability to compete for new contracts with current or prospective customer could be damaged and our business, financial condition, reputation, results of operations and cash flows could be materially adversely affected.

We depend on many different entities to supply information and an inability to successfully manage our relationships with a number of these suppliers may harm the quality and availability of our solutions and services.

We obtain the data used in our solutions and services from many sources, including commercial health insurance plans, financial institutions, managed care organizations, government entities and non-government entities. From time to time, challenges arise in managing and maintaining our relationships with data sources that are not our customers and that furnish information to us pursuant to a combination of voluntary cooperation and legal obligations under laws and regulations that are often subject to differing interpretations. If a number of our information sources become unable or unwilling to provide us with certain data under terms and conditions of receipt, processing or use that are acceptable to us and our customers, or if laws and regulations for use and protection of this data changes in a way that disincentivizes our suppliers, or imposes unacceptable or unreasonable conditions, costs, or risks on us, we may not be able to obtain new or favorable agreements with alternative data suppliers. In addition, our ability to normalize and fully utilize the information we receive from various data sources to enhance and improve current services for our customers is an important component of our growth strategy. Although we believe that we have the legal and contractual rights necessary to normalize and use the data we have obtained from these sources for potential or contemplated solution and service offerings, we cannot provide assurance that these entities will permit the use of their data for these purposes. If we lose a number of our data sources or our access to their data, and fail to identify and reach the requisite agreements with suitable alternative suppliers or to successfully integrate their data into our solutions and services, or if there is a lack of accuracy or integrity in the data that current or future suppliers provide, we could experience service disruptions, increased costs, reduced quality of our solutions and services, or performance penalties under our customer contracts, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may rely on subcontractors and other third party providers to provide customers with a single-source solution or service or we may serve as a subcontractor to a third party prime contractor. If these parties fail to satisfy their obligations to us or if we are unable to maintain these relationships, our business, financial condition, results of operations and cash flows could be materially adversely affected.

In some areas of our business we may engage subcontractors, teaming partners, vendors or other third party providers to provide our customers with a single-source solution for a broader range of service needs. These third parties include software vendors, utility and network providers, cloud service providers and other information technology service providers and solution partners. Our ability to deliver and implement solutions and serve our customers effectively depends on these third parties meeting our service standards in both timeliness and quality, and in certain instances, on our ability to obtain customer approval for the use of these third party subcontractors. While we believe that we perform appropriate due diligence on these third parties and take adequate measures to ensure that they comply with the appropriate laws and regulations, we cannot guarantee that they will comply with the terms set forth in their agreements with us. Performance deficiencies or misconduct by subcontractors, teaming partners, vendors or other third party providers may be perceived as inadequacies in our solutions or services or cause us to fail to fulfill our contractual obligations to our customers, which could materially adversely affect our customer relationships and reputation, result in termination of a customer contract, and subject us to a dispute with our customer. In addition, if our third party service providers terminate or refuse to renew their relationships with us or offer their products to us in the future on less advantageous terms, we may not be able to perform or deliver solutions or services for existing customers as expected.

Similarly, we are and may in the future be engaged as a subcontractor to a third party prime contractor. Subcontracting arrangements where we are not the prime contractor pose unique risks to us because we do not have control over the customer relationship, and our ability to generate revenue under such subcontracts is dependent on the prime contractor, its performance and relationship with the customer, and its relationship with us. We cannot be certain that the prime contractor will provide adequate and timely services to the customer, comply with the terms of its prime contract with the customer or its subcontract agreement with us, or that it will construe its contractual rights and obligations in a reasonable way, act appropriately in dealing with us or customers, and remain in compliance with the relevant laws, rules or regulations. Any failure of the prime contractor to adequately perform its obligations under the prime contractor to comply with applicable laws, rules and regulations could materially adversely affect our reputation and subject us to a dispute with the prime contractor or the customer. In the event a prime contract is terminated, whether for non-performance by the prime contractor or otherwise, our subcontract will similarly terminate, and the resulting contract loss could materially adversely affect our business, financial condition, results of operations and cash flows.

We obtain a portion of our business through competitive bidding in response to government requests for proposals. Reprocurements and future contracts may not be awarded through this process on the same level or our contract awards may be challenged by interested parties which could materially adversely affect our business, financial condition, results of operations and cash flows.

In order to market our solutions and compete for contracts with existing and potential state and federal customers, we are often required to respond to government-issued RFPs. These responses typically require us to assemble and submit a large volume of information within a rigid timetable, and to accurately estimate our cost structure for servicing the proposed contract, the time required to establish operations and the likely terms of proposals submitted by our competitors. We may also be required to disclose the occurrence of certain negative events suffered by our business, such as customer disputes, a government inquiry or an adverse judgment or settlement in litigation or a legal proceeding, which could impair our ability to win the contract at issue or have a material adverse effect on our reputation in the industry.

Even if we win these contracts, we may fail to secure favorable contract terms and conditions, or a government's determination to award us the contract may be challenged by an interested party. Under the state and federal laws and regulations governing procurements of goods and services, challenges and award protests may be filed even if there are no valid legal grounds on which to base the protest. The filing of such challenges could potentially delay the start or implementation of the contract if the government agency determines to withhold a contract award or suspend contract performance while the protest is being considered, or to take corrective action on its own, such as soliciting new bids or terminating the contract award or current procurement. In the event of irregularities, we perceive or learn of in the award or bidding process, we also may be forced to file protests in response to RFP awards to other bidders. Resolution of a protest, even in our favor, could force us to expend considerable funds in disputing the potential award or to incur additional expenses to maintain our ability to timely start implementation, which may cause our actual results to differ materially and adversely from those anticipated. In addition, if we are unable to win reprocurements or protests of particular contracts, we may be precluded from entering certain customer markets for the term of the contract awarded to another party. Any failure to continue to obtain contracts in response to government RFPs, to design proposals that result in profitable contracts, to win new contracts or re-procure current contracts after they expire or to prevail in protests or challenges of contract awards could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Adverse judgments or settlements in legal proceedings could materially harm our business, financial condition, operating results and cash flows.

We are subject and may be a party to legal proceedings and claims that arise from time to time in the ordinary course of our business, which may include, but are not limited to, those related to, claims brought by our customers in connection with billing and contractual disputes, subcontracts and teaming agreements, protection of confidential information or trade secrets, claims relating to pending, terminated or completed acquisitions or dispositions, adversary proceedings arising from customer bankruptcies, employment of our workforce and immigration requirements or compliance with any of a wide array of state and federal statutes, rules and regulations that pertain to different aspects of our business. We may also be required to initiate expensive litigation or other proceedings to protect our business interests. There is a risk that we will not be successful or otherwise be able to satisfactorily resolve any pending or future litigation. In addition, litigation and other legal claims are subject to inherent uncertainties and management's view of currently pending legal matters may change in the future. Those uncertainties include, but are not limited to, litigation costs and attorneys' fees, unpredictable judicial or jury decisions and the differing laws and judicial proclivities regarding damage awards among the states in which we operate. Resolution may also require that HMS accept some amount of loss or liability in order to avoid customer abrasion, negative marketplace perceptions and other disadvantageous results. Unexpected outcomes in such legal proceedings, or changes in management's evaluation or predictions of the likely outcomes of such proceedings (possibly resulting in changes in established reserves), could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to deliver our solutions and perform services efficiently if we are unable to attract and retain qualified employees.

Our successful delivery of solutions and services and ability to maintain our productivity and profitability is dependent on our ability to identify, recruit, employ, train and retain skilled personnel. The success of recruitment and retention strategies depend on a number of factors, including the competitive demands for employees having the skills we need and the level of compensation required to hire and retain such employees. Customers or competitors may seek to hire away qualified and seasoned employees, which could reduce our ability to innovate and operate effectively. We may not be able to recruit or maintain the personnel necessary to efficiently operate and support our business in the future, and even if our recruitment and retention strategies are successful, our labor costs may increase significantly. Our inability to hire sufficient personnel on a timely basis without significantly increasing our labor costs could materially adversely affect our business, financial condition, results of operations and cash flows.

Our future success depends, in part, on the continued service of members of our management team.

Our ability to execute on our business plans and future success requires that we attract, develop, motivate and retain experienced and innovative executive officers and senior leaders who have successfully managed, designed, implemented and led government services programs or information technology initiatives, or have relevant experience in other healthcare sectors, including data management and analytics. These individuals are in great demand and are likely to remain a limited resource in our industry. The loss of services of one or more members of our management team could adversely affect our business, financial condition, results of operations and cash flows. In addition, to the extent we lose an executive officer or senior leader, we may incur increased expenses in connection with the hiring, promotion or replacement of these individuals and the transition of leadership and critical knowledge.

Our outstanding indebtedness could materially adversely affect our financial condition and our ability to operate our business, and we may not be able to generate sufficient cash flows to meet our debt service obligations or capital requirements.

As of December 31, 2018, the outstanding principal balance under our Credit Agreement was $240.0 million. Our Credit Agreement provides for a senior secured revolving credit facility in an aggregate principal amount equal to $500 million and is secured, subject to certain customary carve-outs and exceptions, by a first priority lien and security interest in substantially all of our tangible and intangible assets. Our outstanding indebtedness and any additional indebtedness we incur may have important consequences for us, including, without limitation, that:

- we may be required to use a substantial portion of our cash flow to pay the principal of and interest on our indebtedness;
- our indebtedness and leverage may increase our vulnerability to adverse changes in general economic and industry conditions, as well as to competitive pressures;
- our indebtedness may expose us to the risk of increased interest rates because certain of our borrowings are and will be at variable interest rates;
- our ability to obtain additional financing for working capital, capital expenditures, acquisitions and for general corporate and other purposes may be limited;
- our indebtedness and leverage may prevent us from taking advantage of business opportunities as they arise or successfully carrying out our plans to expand our business; and
- our flexibility in planning for, or reacting to, changes in our business and our industry may be limited.

Under the Credit Agreement, we are also required to comply with specified financial and operating covenants, which may limit our ability to operate our business as we otherwise might operate it. The Credit Agreement also contains (i) certain affirmative covenants that impose certain reporting and/or performance obligations on us and our restricted subsidiaries, (ii) certain negative covenants that generally limit, subject to various exceptions, us and our restricted subsidiaries from taking certain actions, including, without limitation, incurring indebtedness, creating liens, engaging in mergers and consolidations, disposing of certain assets or property, making certain investments and acquisitions, entering into certain transactions with affiliates, swap agreements or sale-leasebacks, making certain restricted payments, including dividends and share repurchases, changing our fiscal year or the lines of business that we or our restricted subsidiaries conduct to a material extent, and prepaying certain junior indebtedness, (iii) financial covenants consisting of a maximum consolidated leverage ratio and a minimum interest coverage ratio, and (iv) customary events of default for financings of this type.

Our obligations under the Credit Agreement may be declared due and payable upon the occurrence and during the continuance of an event of default, which includes, without limitation: non-payment of principal or reimbursement obligation when due; non-payment of interest, fees and other amounts for a period of five business days after the due date; material inaccuracies of representations and warranties; failure to perform or observe covenants, conditions or agreements (subject to any applicable grace periods); cross-defaults to certain indebtedness; inability to pay debts; certain acts of bankruptcy or insolvency; certain ERISA events; failure to pay certain material judgments; and a change of control as defined in the Credit Agreement. If not cured, an event of default could result in any amounts outstanding, including any accrued interest and unpaid fees, becoming immediately due and payable, and would give our lenders the right to proceed against the collateral granted to them to secure the debt, which would require us to, among other things, seek additional financing in the debt or equity markets, refinance or restructure all

or a portion of our indebtedness, sell selected assets, and/or reduce or delay planned capital or operating expenditures. Such measures might not be sufficient to enable us to service our debt, and any such financing or refinancing might not be available on economically favorable terms or at all. Our ability to make payments of principal and interest on our outstanding credit facility depends upon our future performance and our ability to generate cash flows. If we are unable to generate sufficient cash flows to meet our debt service obligations or are forced to take additional measures to be able to service our indebtedness, our business, financial condition and results of operations could be materially and adversely affected.

Changes in, or interpretations of, tax rules and regulations may materially adversely affect our effective tax rates.

We are a United States-based company subject to various federal, state, U.S. Territory and local tax laws and regulations in multiple U.S. jurisdictions that govern numerous aspects of our business. As we expand our business, we may perform services for new customers located outside of the United States or in a U.S. Territory, which may subject us to foreign tax laws and regulations that could increase our exposure to additional tax liabilities. Our future effective tax rates could be materially affected by various factors, including changes in tax rates of jurisdictions in which we do business, changes in relevant tax and accounting rules, regulations and interpretations, increases in expenses not deductible for tax purposes, including impairments of goodwill, and changes in the valuation of our deferred tax assets and liabilities. For example, in December 2017, Congress enacted the 2017 Tax Act which, among other things, reduced the U.S. corporate tax rate, modified limitations on certain deductions for executive compensation, placed new limitations on interest deductions, repealed the Section 199 Deduction and certain capital investment deductions, and shifted U.S. taxation of multinational corporations from a tax on worldwide income to a territorial system. Any unanticipated changes in our tax rates could affect our future results of operations.

In addition, we are subject to the continual examination of our income tax returns by the IRS and other tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result. The final determination of any of these examinations could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our health insurance coverage and self-insurance reserves may not cover future claims, which could materially adversely affect our business, financial condition, results of operations and cash flows.

We maintain various insurance policies for company employee health, workers' compensation, general liability and property damage. We are self-insured for our health plans, and have purchased a fully-insured stop loss policy to help offset our liability for both individual and aggregate claim costs. We are also responsible for losses up to a certain limit for workers' compensation, general liability and property damage insurance.

For policies under which we are responsible for losses, we record a liability that represents our estimated cost of claims incurred and unpaid as of the balance sheet date. Our estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions and economic conditions, and is closely monitored and adjusted when warranted by changing circumstances. Our prior growth could affect the accuracy of estimates based on historical experience. Should a greater amount of claims occur compared to what was estimated or medical costs increase beyond what was expected, our accrued liabilities might not be sufficient and we may be required to record additional expense. Unanticipated changes may also produce materially different amounts of expense than reported under these programs, which could materially adversely affect our business, financial condition, results of operations and cash flows.

Risks Relating to Our Industry

Our business could be materially adversely affected by changes in the U.S. healthcare environment or in laws relating to healthcare programs and policies, particularly as they relate to the ACA and the Medicare and Medicaid programs.

The healthcare industry in which we operate is subject to changing political, economic and regulatory influences that directly affect the practices and operations of federal, state and commercial healthcare organizations in the United States. When the ACA was passed, its emphasis on program integrity, cost containment and expansion of Medicaid created new opportunities to grow our business and our service offerings. However, certain provisions of the ACA have yet to be implemented and there have been a number of judicial and legal challenges to certain aspects of the ACA. In February 2018, 20 states filed suit in the U.S. District Court for the Northern District of Texas alleging that the ACA is unconstitutional in light of the repeal of the penalties associated with the individual mandate. On December 14, 2018, the Court issued a ruling that the mandate was no longer permissible under Congress's taxing power and was thus unconstitutional. As such, the Court further found that the entire ACA is deemed to be invalid because the individual mandate is "essential" and inseverable from the ACA. Although, a stay and partial final judgment has been issued, ensuring that the ACA remains in full effect for the foreseeable future, we cannot predict the outcome of the litigation that has been filed relating to the constitutionality of the ACA. Additionally, since its adoption into law in 2010, there have been continued efforts by Congress to amend, repeal or replace all or part of the ACA. For example, under the 2017 Tax Act, the "individual mandate" introduced by the ACA was repealed effective January 1, 2019. Congress has introduced several other bills to delay, defund or repeal implementation or amend significant provisions of the ACA, though none of these other bills have passed the House and Senate. There have also been a number of proposed and adopted legislative initiatives and healthcare reform proposals from the federal and state governments. These include (i) measures that would fundamentally change the financial structure of the Medicaid program (currently funded jointly by the states and the U.S. Federal Government), which could result in early termination, reduced scopes or non-renewal of our contracts with certain state government customers, and (ii) changes at the federal level that would reduce reimbursement rates to states, establish new payment models, further limit the Medicare RAC program, or otherwise change the operating environment for our customers and transform the government's involvement in healthcare. In addition to these legislative proposals, the President has taken several steps to limit the functionality of the ACA and advocate for its repeal and replacement since taking office. During 2017, the President signed two executive orders and other directives designed to waive, defer, grant exemptions from or delay

the implementation of certain requirements mandated by the ACA.

Another variable that impacts our business will be how state programs, commercial health plans, private employers and other healthcare payers will respond to changes during this continued period of uncertainty surrounding the ACA. These organizations may react to such changed circumstances and financial pressures by taking actions to ramp up, curtail or defer their retention of cost containment providers like us, which could impact the demand for our solutions and services and our ability to increase or maintain sales of our existing solutions and services. While certain changes may present new opportunities to us, our business, financial condition, results of operations and cash flows could be materially adversely affected if we are unable to adapt our solutions and services to meet changing requirements or expand service delivery into new areas, or if the demand for our solutions and services is reduced as a result of future legislative changes affecting Medicare, Medicaid or other publicly funded or subsidized health programs, or efforts to waive, modify or otherwise change or invalidate the ACA. Although we will continue to evaluate the effect that the ACA and its possible invalidation or repeal and replacement may have on our business, it is difficult to predict the full impact and influence that the ACA and the varying healthcare reform measures may have on the U.S. healthcare industry or policy, and any resulting changes may take time to unfold.

Healthcare spending fluctuations, simplification of the healthcare payment process or other aspects of the healthcare financing system, budgetary pressures and/or programmatic changes diminishing the scope of program benefits, or limiting payment integrity initiatives, could reduce the need for and the price of our solutions and services, which would have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our projections and expectations are premised, in part, upon consistent growth rates in the Medicare and Medicaid programs and government spending on these programs, and the impact on the current healthcare financing system overall and need for our solutions and services within that existing framework. Our continued success as a company is based in large part on offering solutions and services that improve the ability of our customers to identify and recover revenue that would otherwise be lost often as a result of procedural inefficiencies and complexities in the healthcare delivery and payment system. However, the need for our solutions and services, the price customers are willing to pay for them and the scope and profitability of our contracts could be negatively affected by a number of factors, including, but not limited to:

- a lower than projected growth in Medicare and Medicaid program enrollment and expenditures;
- changes in the level of federal government spending due to budgetary or deficit considerations, including the continuance of existing programs, as well as budgetary pressures that may drive changes at the state level;
- unanticipated reductions in the scope of healthcare program benefits (such as, for example, state decisions to eliminate coverage of optional Medicaid populations or services or shifting lives into managed care plans);
- the transition of healthcare beneficiaries from fee-for-service plans to value-based plans;
- modifications in provider billing behavior and habits, often in response to the success of our solutions and services or to changes that reduce healthcare spending;
- the adoption of healthcare plans with significantly higher deductibles;

- customer improvements and enhancements to their internal healthcare claims and billing processes;
- the simplification of the healthcare benefit and payment system through legislative or regulatory changes at the federal or state level (for example, legislative changes impacting the scope of mandatory audits, including limits on the look-back period for review in areas where we conduct audits);
- limits placed on ongoing program integrity initiatives, including the Medicare RAC program and state Medicaid RAC programs (for example, limitations or reductions in the amount of reviewable claims we audit, such as the modified ADR limits and sliding scale policy implemented by CMS for the current Medicare RAC contracts, which have a significant impact on the volumes of claims that Medicare RACs are permitted to review for inpatient providers and reduce their ability to identify overpayments and underpayments); and
- legislative healthcare reforms and developments, including the absence of near-term compliance deadlines effected by the ACA, the possible repeal or modification of the ACA, and other legislative actions to reduce program eligibility or services, or reform Medicaid spending.

The occurrence of any of these events, or other changes to the funding of the Medicare and Medicaid programs or limitations in the scope of program eligibility, benefits, initiatives and healthcare spending that materially reduce our revenue or profitability with such programs may have an adverse effect on our future business, financial condition, results of operations and cash flows.

A failure to comply with the laws and regulations that apply to companies in our industry regarding individual privacy and information security could subject us to legal actions, fines and penalties and negatively impact our reputation and operations.

As a cost containment service provider, we often receive, process, transmit and store sensitive data, including PHI and personally identifiable information of individuals, as well as other financial, confidential and proprietary information belonging to our customers, subcontractors, government agencies, data suppliers and other third parties from whom we obtain information. The use and disclosure of that information is regulated at the federal, state, international and industry levels. For example, we are subject to federal regulation under HIPAA, as amended by HITECH, and the Final Omnibus Privacy, Security, Breach Notification, and Enforcement Rule, as well as various state laws. HIPAA also imposes standards and requirements on our business associates (as defined under HIPAA). We are also obligated by our contractual requirements with customers, which may require that we comply with additional privacy regulations imposed upon certain types of customers, such as the federal Gramm-Leach-Bliley Act and other laws.

Even though we take measures to comply with all applicable regulations and to ensure our business associates and subcontractors comply with these laws, regulations and rules, we have less than complete control over our business associates' and subcontractors' actions and practices. We may be exposed to data breach risk if there is unauthorized access to one of our or our subcontractors' secure facilities, or to third-party enterprise cloud storage and cloud computing application services that we use, or from lost or stolen laptops or other portable media from current or former employee theft of data containing PHI, from computer hacking, malware, computer viruses or other malicious codes, phishing or other cyber-attacks, from misdirected mailings containing PHI, or other forms of administrative or operational error. If we or our subcontractors fail to comply with applicable laws; if unauthorized parties gain physical access to one of our facilities and steal or misuse confidential information; if we erroneously use or disclose data in a way that is inconsistent with our granted rights; or if such information is misdirected, lost or stolen during transmission or transport, we may suffer damage to our reputation, potential loss of existing customers and difficulty attracting new customers. We could also be exposed to, among other things, unfavorable publicity, governmental inquiry and oversight, allegations by our customers that we have not performed our contractual obligations, costs to provide notifications or remediation (such as credit monitoring) to affected individuals, fines or other penalties imposed by government regulatory agencies, or litigation by affected parties and possible financial obligations for damages or indemnification obligations related to the theft or misuse of such information, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, laws, rules and regulations concerning the protection of personal information are subject to frequent change by legislation, regulatory issuances or administrative interpretation. As regulatory focus on privacy issues continues to increase and these laws and regulations continue to expand and become more complex, these potential risks to our business could intensify. Changes in laws or regulations associated with the enhanced protection of certain types of sensitive data, such as healthcare data or other personally identifiable information, along with increased customer demands for enhanced data security infrastructure, could greatly increase our cost of providing our solutions and services, and may subject us to additional liabilities.

We are subject to extensive government regulation, including government and customer audits and investigations relating to our compliance with the laws and regulations applicable to companies in our industry, and a negative finding or other adverse determination could have a material adverse effect on our reputation, business, financial condition, results of operations and cash flows.

A significant portion of our business is regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect individual citizens, including government program beneficiaries, health plan members and their dependents. The federal and state governmental agencies administering these laws and regulations have broad latitude to enforce them. As such, we are subject, on an ongoing basis, to various governmental and customer reviews, audits and investigations to verify our compliance with our contracts and applicable laws and regulations, as well as legal actions and enforcement proceedings. For example, because we receive payments from federal and state governmental agencies, we are subject to laws, such as the Federal Acquisition Regulations, the U.S. Foreign Corrupt Practices Act, federal and state employment, equal opportunity and affirmative action laws, federal and state prompt pay statutes, healthcare fraud, waste and abuse laws and similar legislation. We are also subject to the Federal False Claims Act and similar state statutes, which permit government law enforcement agencies to institute suits against us for violations and, in some cases, to seek double or treble damages, penalties and assessments. In addition, private citizens, acting as whistleblowers, can sue on behalf of the government under the "*qui tam*" provisions of the Federal False Claims Act and similar statutory provisions in many states.

As we expand into new areas of the healthcare industry, we may develop new or enhanced solutions that may further expose us to requirements under additional statutes and legislative schemes that have previously not been relevant to our business, such as the Fair Debt Collection Practices Act and other banking and credit reporting statutes. For example, in connection with our acquisition of Eliza, we became subject to the Telephone Consumer Protection Act of 1991, state and federal audio and telephone recording laws, and other consumer laws and regulations as a result of the member engagement services that we perform. Our increased involvement in population health services and penetration into new markets, such as ACOs, PBMs and commercial self-insured employers, could increase the likelihood and incidence of our being subjected to regulatory scrutiny or legal actions by third parties other than our customers, which may impose significant costs and strain on our resources.

These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer and how we interact with customers, providers, other healthcare payers and the public. If the government discovers improper or illegal activities in the course of audits or investigations, we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions and debarment from doing business with the government. Similarly, if our customers assert that we have failed to properly perform or comply with our contractual obligations, or if the carriers to which we send billings assert that we have failed to properly comply with applicable federal or state billing rules and regulations, we may be required to provide refunds or make payments to resolve such issues. If we are found to be in violation of any applicable law or regulation, or if we receive an adverse review, audit or investigation from a government agency or customer related to our compliance with such laws or regulations or the terms of our government contracts, any resulting negative publicity, penalties or sanctions could have an adverse effect on our reputation in the industry, impair our ability to compete for new contracts or bid in response to RFPs in one or more jurisdictions, and have a material adverse effect on our business, financial condition, results of operations and cash flows.

Federal and state governments may limit or prohibit outsourcing of certain programs or functions, refuse to grant consents or waivers necessary to permit private entities to perform such work, or impose other limitations on outsourcing or certain vendors that may obstruct cost-effective performance of our contracts.

Federal or state governments could limit or prohibit private contractors like us from operating or performing elements of certain government functions or programs. As a condition of receiving federal funding, state, and local governments may be required to operate such programs with government employees. Under current law, in order to privatize certain functions of government programs, the federal government must grant a consent and/or waiver to the petitioning state or local agency. If the federal government does not grant a necessary consent or waiver, the state or local agency will be unable to outsource that function to a commercial entity. Such a situation could eliminate a contracting opportunity or reduce the value of an existing contract.

Similarly, other state or federal limitations on outsourcing certain types of work to vendors that supplement our workforce could make it more difficult for us to fulfill our contracts in a cost-effective manner. Certain areas of our operations use or involve vendor or subcontractor personnel located outside of the United States, who may (under carefully controlled circumstances) access certain PHI in the course of assisting us with various elements of the services we provide to our customers. The federal government and a number of states have considered laws or issued rules, regulations, and orders that would limit, restrict or wholly prohibit the use of offshore labor in performance of government contracts, or impose sanctions for the use of such resources. Some of our customers have already chosen to contractually limit or restrict our ability to use offshore resources. Intensified restrictions of this type or associated penalties could raise our costs of doing business, expose us to unexpected fines or penalties, increase the prices we must charge to customers to realize a profit and eliminate or significantly reduce the value of existing contracts or potential contract opportunities, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may be precluded from bidding on or performing certain work due to work we currently perform, which could materially adversely affect our business, financial condition, results of operations and cash flows.

Various laws, regulations and administrative policies prohibit companies from performing work for government agencies in capacities that might be viewed to create an actual or perceived conflict of interest. In particular, CMS has stringent conflict of interest rules, which can limit our bidding for specific work for CMS, or for other contracts that might conflict, or be perceived by CMS to conflict, with contractual work for CMS. State governments and managed care organizations also have conflict of interest restrictions that could limit our ability to bid for certain work and impede our overall sales strategy. As we continue to expand and diversify our business operations, the likelihood that customers or potential customers will perceive conflicts of interest between our various subsidiaries, solutions, services, activities and customer relationships may increase. Such conflicts, whether real or perceived, could result in a loss of contracts or additional internal structural barriers that delay operational efficiency. We may also need to divest certain existing businesses or reorganize our current management and personnel structure, as well as our corporate organization and entity structure, in order to qualify for new contract awards or to appropriately mitigate conflicts and otherwise accommodate the increasing complexity of our business. Our failure to devote sufficient care, attention and resources to managing these adjustments may result in technical or administrative errors that could expose us to potential liability or adverse regulatory action. In addition, conflict of interest rules and standards change frequently, and are subject to varying interpretations and varying degrees and consistency of enforcement. We may not be successful in navigating these restrictions. If we are prevented from expanding our business or are unable to effectively implement our strategic initiatives due to real or perceived conflicts of interest, our business, financial condition, results of operations and cash flows could be materially adversely affected.

Risks Related to Our Common Stock

The market price of our common stock may be volatile, and fluctuations in the price of our common stock may materially adversely affect our business, financial condition, results of operations and cash flows and materially adversely affect our shareholders.

The market price of our common stock has fluctuated widely and may continue to do so. During the 52-week period ended December 31, 2018, our common stock traded on the Nasdaq Global Select Market as high as $37.38 per share and as low as $15.06 per share. Our stock price is subject to fluctuation as a result of a variety of factors, including factors beyond our control, such as the risk factors described above and those which are related to:

- quarterly or annual earnings results or those of other companies in our industry;
- changes in estimates of our performance or recommendations by securities analysts or in the operating and stock price performance of other companies that investors deem comparable to our company;
- news reports relating to trends, concerns and other issues in the healthcare industry, including perceptions in the marketplace regarding us and our competitors;
- the financial projections we publicly provide and any changes in or failure to meet those projections;
- future sales of shares of common stock in the public market by our executive officers or directors;
- any changes in the number of our outstanding shares, including as a result of share repurchases;
- actual or proposed changes in federal or state laws affecting the healthcare industry;
- changes in accounting principles;
- the public's response to our press releases, or other public announcements, including our filings with the SEC;
- securities class actions, shareholder lawsuits or other litigation; and
- market conditions in the industry and the economy as a whole.

In addition, the stock market often experiences significant price and volume fluctuations. These broad market fluctuations may materially adversely affect the market price of our common stock regardless of our operating performance. When the market price of a company's stock drops significantly, shareholders may institute securities class action litigation against that company. Any litigation against us could cause us to incur substantial costs, divert the time and attention of our management and other resources or otherwise harm our business.

Because we do not intend to pay dividends, you will benefit from an investment in our common stock only if it appreciates in value.

We have not paid or declared cash dividends on any of our capital stock to date and currently intend to retain our future earnings, if any, to fund the development and continued growth of our business and repurchase shares opportunistically from time to time. As a result, we do not expect to pay any cash dividends in the foreseeable future. The success of your investment in our common stock will likely depend entirely upon any future appreciation. There is no guarantee that our common stock will appreciate in value or even maintain the price at which you purchased your shares.

Certain provisions of our certificate of incorporation and bylaws could discourage unsolicited takeover attempts, which could depress the market price of our common stock.

Our certificate of incorporation authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by our Board of Directors. Accordingly, our Board of Directors is empowered, without shareholder approval, to issue preferred stock with dividend, liquidation, conversion, voting or other rights, that could adversely affect the voting power or other rights of holders of our common stock. In the event of issuance, preferred stock could be utilized, under certain circumstances, as a method of discouraging, delaying, or preventing a change in control. Although we have no present intention to issue any shares of preferred stock, it is possible that we will do so in the future. In addition, our bylaws currently require advance notice of shareholder proposals for business to be conducted at meetings of our shareholders and for nominations of candidates for election to our Board of Directors and provide for Delaware as an exclusive forum for certain disputes with our shareholders, all of which could also have the effect of discouraging a change of control.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our corporate headquarters and other material leased properties as of December 31, 2018 are shown in the following table:

Location	Approximate Square Footage	Owned/Leased
Irving, TX (corporate headquarters)	242,260	Owned
Las Vegas, NV (office space)	63,593	Leased
Danvers, MA (office space)	38,868	Leased
New York , NY (office space)	34,759	Leased
Westerville, OH (office space)	25,212	Leased
All other locations (23)	80,759	Leased

All other locations consist principally of office space and also include data centers, which are all located in the United States. The above locations have expiration dates through 2026. A portion of the above Las Vegas, NV and New York, NY office spaces are sub-leased. In general, we believe our facilities are suitable to meet our current and reasonably anticipated future needs. See "Lease Commitments" in Note 15 to the Consolidated Financial Statements in Part II, Item 8 for additional information.

Item 3. Legal Proceedings

The information set forth under the caption "Litigation" in Note 15 to the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is listed on the Nasdaq Global Select Market under the symbol "HMSY".

Holders

As of the close of business on February 15, 2019, there were 252 holders of record of our common stock.

Dividends

We have not paid or declared any cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. Our current intention is to retain future earnings to support the continued growth of our business and possibly for the repurchase of shares from time to time. Our Board of Directors will evaluate various factors, including, without limitation, our future earnings, operating cash flows, financial condition, results of operations and capital requirements in determining whether to pay any cash dividends in the future. In addition, our Credit Agreement generally limits, subject to certain exceptions, our ability to make certain payments or distributions with respect to our capital stock, including cash dividends to our shareholders. These restrictions are described in more detail under the heading "Liquidity and Capital Resources" in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and in Note 10 to the Consolidated Financial Statements in Part II, Item 8.

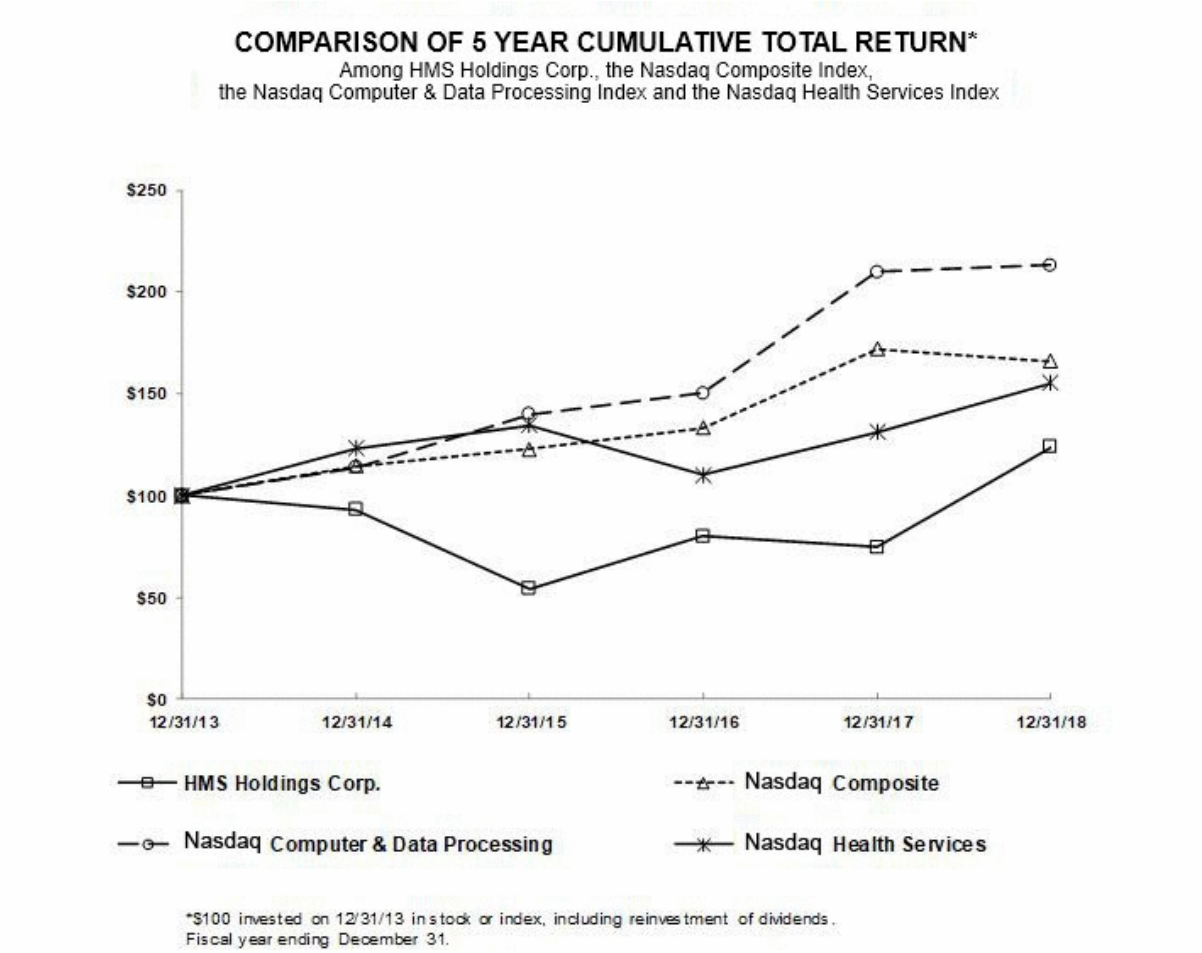
See Part III, Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters for information relating to securities authorized for issuance under our equity compensation plans.

Repurchases of Shares of Common Stock

On November 1, 2017, the Board of Directors of the Company approved a share repurchase program authorizing the Company to repurchase up to $50.0 million of shares of its common stock from time to time on the open market or in privately negotiated or other transactions. We publicly announced the program in November 2017. The repurchase program is authorized for a period of up to two years, and may be suspended or discontinued at any time. In order to facilitate repurchases, the Company may enter into a Rule 10b5-1 plan from time to time, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws or because of a self-imposed trading blackout period. All repurchases were made under the program and using cash resources. See "Equity" in Note 11 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding share repurchases. There were no repurchases of shares of common stock in the fourth quarter of 2018.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
October 1, 2018 to October 31, 2018	-	$ -	-	$ -
November 1, 2018 to November 30, 2018	-	-	-	-
December 1, 2018 to December 31, 2018	-	-	-	-
Total	**-**	**$ -**	**-**	**$ 29,933,055**

Comparative Stock Performance Graph



The graph below compares the cumulative total shareholder return on our common stock with the cumulative total shareholder returns of the Nasdaq Composite Index, the Nasdaq Computer & Data Processing Index and the Nasdaq Health Services Index assuming an investment of $100 on December 31, 2013 and the reinvestment of dividends through the year ended December 31, 2018.

	12/31/13	12/31/14	12/31/15	12/31/16	12/31/17	12/31/18

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis is intended to help the reader understand the results of operations and financial condition of HMS. You should read this discussion and analysis in conjunction with the other sections of this 2018 Form 10-K, including the Cautionary Note Regarding Forward-Looking Statements appearing prior to Part I, the information in Part I, Item 1A, and the Consolidated Financial Statements and Notes thereto in Part II, Item 8. The historical results set forth in Part II, Item 6, Item 7 and Item 8 of this 2018 Form 10-K should not be taken as necessarily indicative of our future operations or financial results.

Business Overview

HMS provides a broad range of cost containment solutions to help healthcare payers and at-risk providers reduce costs, improve health outcomes and enhance member experiences. Using industry-leading technology, analytics and engagement solutions, we deliver coordination of benefits, payment integrity and total population management solutions through our operating subsidiaries to move the healthcare system forward for our customers. We are managed and operate as one business segment with a single management team that reports to the Chief Executive Officer.

We serve state Medicaid programs, commercial health plans, federal government health agencies, government and private employers, CHIPs and other healthcare payers. We also serve as a subcontractor for certain business outsourcing and technology firms. As of December 31, 2018, our customer base included the following:

- over 40 state Medicaid programs;
- more than 325 health plans, including 23 of the top 25 health plans nationally (based on membership) in support of their multiple lines of business, including Medicaid managed care, Medicare Advantage and group and individual health;
- over 150 private employers;
- CMS, the Centers for Disease Control and Prevention, and the Department of Veterans Affairs; and
- PBMs, third-party administrators and other risk-bearing entities, including independent practice associations, hospital systems, ACOs and specialty care organizations.

Outlook

We have grown our business both organically, through internal innovation and the development of new solutions and services, as well as by acquisition of businesses whose core services strengthened our overall mission to help our customers contain healthcare costs. Our largest growth during 2018 was with commercial health plan customers and we currently expect this market to present the greatest opportunity for continued growth in the year ahead. In addition to cross-sales of our total population management solutions and other internal growth initiatives in 2019, various factors related to the macro healthcare environment are expected to contribute to our expected growth, including:

- an aging U.S. population with high-cost, chronic conditions and often co-morbidities;
- projected growth in Medicare enrollment from 2018 to 2026 is estimated by CMS to be at 24%, with a projected increase in spending of 83% during this same time period;
- Medicaid expenditures are projected to grow 60% from 2018 to 2026 based on CMS NHE projections;
- government program payment error rates remain high at approximately 9%;
- more than half of the U.S. population is projected by CMS to remain covered by employer-sponsored plans;
- continued support for moving the focus of U.S. reimbursement models away from volume of service to quality outcomes; and
- increased healthcare industry focus on improved population health, enhanced consumer outcomes and experience, and reduced costs.

We plan to drive our future growth by leveraging our expertise to expand solution offerings, attracting new customers and broadening our relationships with current customers through the introduction of new services, audit strategies and claim types. Our goal is to develop and build on existing partnerships with our state, federal and commercial health plan customers to provide services that better address their business needs and promote consumer engagement and satisfaction in the constantly evolving healthcare marketplace. We also expect to continue increasing recovery yields from our current services by enhancing our operating and organizational efficiency and by implementing new technologies that will improve the quality, effectiveness and profitability of our service offerings.

We are subject to a number of significant risks in the operation of our business, including operational, strategic, financial and regulatory risks. These include risks related to legal compliance, financial performance and condition, protection of our information technology networks and systems and intellectual property, and other risks. With respect to cybersecurity, the effective operation of our information technology networks and systems, and the secure processing and maintenance of the confidential, proprietary and sensitive information and data we receive from our customers and other data suppliers are critical to our operations and business strategy. Although we have processes and procedures to attempt to mitigate many of the risks that we face, there can be no assurance that such processes or procedures will be successful. For a discussion of certain risks relating to the Company, see the information under the heading “Part I, Item 1A. Risk Factors.”

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates. The accounting policies that we believe to be the most critical to an understanding of our financial condition and results of operations and that require the most complex and subjective management judgments are below:

Revenue Recognition

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
The Company recognizes revenue when our customers realize economic benefits from our services when our services are completed.	Due to the range of solutions and services that HMS provides and the differing fee structures associated with each type of contract, revenue may be recognized in irregular increments. A portion of our revenue is recorded net of an estimate of future revenue adjustments, with an offsetting entry to accounts receivable allowance, based on historical patterns of billing adjustments, length of operating and collection cycle and customer negotiations, behaviors and payment patterns. Changes in these estimates are recorded to revenue in the period of change.	If we were to enter any new contracts with differing fee structures or performance obligations or if we were to change any of the judgments or estimates related to estimated future revenue adjustments, it could cause a material increase or decrease in the amount of revenue we report in a particular period.

Estimated Liability for Appeals

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Under our contracts with certain commercial health plan customers and our Medicare RAC contracts with CMS, we recognize revenue when HMS claim findings are sent to the Company's customers for offset against future claim payments to providers. These contracts permit providers the right to appeal HMS claim findings and to pursue additional appeals if the initial appeal is found in favor of HMS's customer. The total estimated liability for appeals balance was $21.7 million and $30.8 million as of December 31, 2018 and December 31, 2017, respectively. The Company's original Medicare RAC contract with CMS expired on January 31, 2018.	The appeal process established under the Medicare RAC contract with CMS includes five levels of appeals and resolution of appeals can take substantial time to resolve. HMS records (i) a liability for findings which have been adjudicated in favor of providers and (ii) an estimated liability based on the amount of revenue that is subject to appeals and which is probable of being adjudicated in favor of providers following their successful appeal. Our estimated liability is based on the Company's historical experience. As a result of the original Medicare RAC contract expiration, the Company's contractual obligation with respect to any appeals resolved in favor of providers subsequent to the expiration date have ceased and therefore the Company released its estimated return obligation liability and increased revenue by $8.4 million during the first quarter of 2018.	To the extent the amount to be returned to providers following a successful appeal exceeds or is less than the amount recorded, revenue in the applicable period would be reduced or increased by such amount. Any future changes to any of our customer contracts, including modifications to Medicare RAC contracts, may require us to apply different assumptions that could materially affect both the Company's revenue and estimated liability for appeals in future periods.

Business Combinations

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
We record assets acquired and liabilities assumed in a business combination based upon their acquisition date fair values. Goodwill is the excess of acquisition costs over the fair values of assets and liabilities of acquired businesses. During the measurement period, which is up to one year from the acquisition date, we may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to earnings.	In most instances there is not a readily defined or listed market price for individual assets and liabilities acquired in connection with a business, including intangible assets. We determine fair value through various valuation techniques including discounted cash flow models, quoted market values and third party independent appraisals, as considered necessary. Significant assumptions used in those techniques include, but are not limited to, growth rates, discount rates, customer attrition rates, expected levels of revenues, earnings, cash flows and tax rates.	The use of different valuation techniques and assumptions are highly subjective and inherently uncertain and, as a result, actual results may differ materially from estimates.

Impairment of Goodwill

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Goodwill is subject to a periodic assessment for impairment. We assess goodwill for impairment on an annual basis as of June 30th of each year or more frequently if an event occurs or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Assessment of goodwill impairment is at the HMS Holdings Corp. entity level as we operate as a single reporting unit. The Company's carrying amount of goodwill was $487.6 million as of December 31, 2018.	We have the option to perform a qualitative or quantitative assessment to determine if impairment is more likely than not to have occurred. The Company completed the annual impairment test as of June 30, 2018 electing to perform the quantitative assessment of which the first step is to compare the fair value of the reporting unit with its carrying value, including goodwill. In calculating the fair value of the reporting unit, the Company utilized a weighting across three commonly accepted valuation approaches: an income approach, a guideline public company approach, and a merger and acquisition approach. The income approach to determining fair value computes projections of the cash flows that the reporting unit is expected to generate converted into a present value equivalent through discounting. Significant assumptions in the income approach include income projections, a discount rate and a terminal growth value which are all level 3 inputs. The income projections include assumptions for revenue and expense growth which are based on internally developed business plans and largely reflect recent historical revenue and expense trends. The discount rate was based on a risk free rate plus a beta adjusted equity risk premium and specific company risk premium. The terminal growth value is Company specific and was determined analyzing inputs such as historical inflation and the GDP growth rate. The guideline public company approach and merger and acquisition approach are based on pricing multiples observed for similar publicly traded companies or similar market companies that were sold.	The results of the annual impairment assessment provide that the fair value of the reporting unit was significantly in excess of the Company's carrying value, including goodwill; therefore, no impairment was indicated. If actual results are not consistent with our estimates or assumptions, the Company may be exposed to an impairment charge that could materially adversely impact our consolidated financial position and results of operations. There were no impairment charges related to goodwill during the years ended December 31, 2018, 2017, or 2016.

Impairment of Long-Lived and Intangible Assets

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Long-lived assets, including property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets.	We use significant judgment in assessing events or changes in circumstances which indicate that the carrying amount of the asset may not be recoverable.	The Company's carrying amount of long-lived assets, including property and equipment and intangible assets was $161.6 million as of December 31, 2018. The Company did not recognize any impairment charges related to long-lived and intangible assets during the years ended December 31, 2018, 2017 or 2016. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to an impairment charge that could materially adversely impact our consolidated financial position and results of operations.

Valuation of Stock-Based Compensation

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
The determination of the fair value of the options on the grant date using the Black-Scholes pricing model and/or the Monte Carlo Simulation is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. Certain key variables include: the Company's expected stock price volatility over the expected term of the awards; a risk-free interest rate; and any expected dividends. The fair value of all awards also includes an estimate of expected forfeitures.	We estimate stock price volatility based on the historical volatility of the Company's common stock and estimate the expected term of the awards based on the Company's historical option exercises for similar types of stock option awards. The assumed risk-free interest rate is based on the yield on the measurement date of a zero-coupon U.S. Treasury bond with a maturity period equal to the option's expected term. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore, uses an expected dividend yield of zero in the option valuation models. Forfeitures are estimated based on historical experience.	If we were to change any of these judgments or estimates, it could cause a material increase or decrease in the amount of stock compensation expense we report in a particular period. For example, if actual forfeitures vary from estimates, a difference in compensation expense will be recognized in the period the actual forfeitures occur.

Income Taxes

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. This method also requires the recognition of future tax benefits for net operating loss carry-forwards.	Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance is provided against deferred tax assets to the extent their realization is not more likely than not. Uncertain income tax positions are accounted for by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. We make adjustments to these reserves in accordance with the income tax accounting guidance when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate.	To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made, and could have a material impact on our financial condition and operating results. Although the Company believes that it has adequately reserved for uncertain tax positions (including interest and penalties), it can provide no assurance that the final tax outcome of these matters will not be materially different.

Contingencies

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
From time to time, we are involved in legal proceedings in the ordinary course of business. We assess the likelihood of any adverse judgments or outcomes to these contingencies as well as potential ranges or probable losses and establish reserves accordingly.	We record accruals for outstanding legal matters when we believe it is probable that a loss will be incurred and the amount can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount. We review these provisions at least quarterly and adjust the provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel and updated information.	Litigation is inherently unpredictable and is subject to significant uncertainties, some of which are beyond the Company's control. The amount of reserves required may change in future periods due to new developments in each matter or changes in approach to a matter such as a change in settlement strategy which could have a material impact on our financial condition and operating results.

For further information on these critical accounting policies and all other significant accounting policies refer to the discussion under "Business and Summary of Significant Accounting Policies" in our Note 1 to the Consolidated Financial Statements in Part II, Item 8.

Results of Operations

2018 Highlights

- Revenue growth of 14.8%
- Operating income growth of 25.4%
- Cash flow from operations of $96.5 million
- Repurchased approximately 384,000 shares of common stock for $6.0 million
- Net income growth of 37.2%

Comparison of 2018 to 2017 and 2017 to 2016

dollars in millions	Year Ended December 31,			$ Change	% Change	$ Change	% Change
	2018	2017	2016	2018 vs 2017		2017 vs 2016	
Revenue	$ 598.3	$ 521.2	$ 489.7	$ 77.1	14.8%	$ 31.5	6.4%

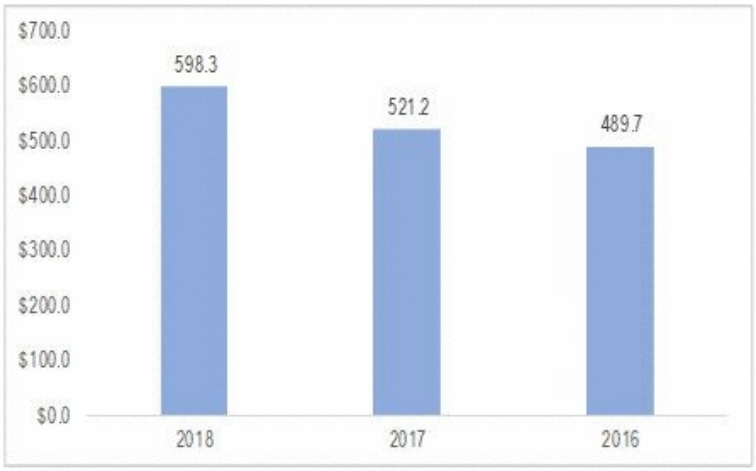
Revenue



Revenue in Millions

2018 vs. 2017

During the year ended December 31, 2018, revenue was $598.3 million, an increase of $77.1 million or 14.8% compared to $521.2 million for the year ended December 31, 2017.

- By solution, which consists of coordination of benefits and analytical services, and included in analytical services are our payment integrity and total population management solutions:
  - Coordination of benefits product revenue increased $14.4 million or 3.8% which was attributable to yield improvements and the addition of Medicaid enrollees which entered our customer eligibility files in 2018.
  - Payment integrity revenue increased $39.7 million or 38.0% which was attributable to expanded commercial health plan scopes, including the addition of health plans to current contracts and yield improvements. Within payment integrity, Medicare RAC revenue increased $17.8 million which includes an $8.4 million reserve release during the first quarter of 2018 as compared to prior year.
  - Total population management revenue increased $23.0 million or 67.4% of which $21.4 million is due to Eliza (acquired in April 2017). Additionally, Essette revenue increased $1.6 million as compared to prior year.

- By market:
  - Commercial health plan market revenue increased $54.0 million or 20.1% which includes increases of $21.4 million from Eliza (acquired in April 2017) as compared to the prior year and $1.6 million from Essette as compared to prior year. The increases are due to expanded commercial health plan scopes, including the addition of health plans to current contracts and yield improvements.
  - State government market revenue increased $6.9 million or 3.0%, which was attributable to expanded scopes and yield improvements.
  - Federal government market and other revenue increased $16.2 million or 64.8% which includes an $8.4 million Medicare RAC reserve release.

2017 vs. 2016

During the year ended December 31, 2017, revenue was $521.2 million, an increase of $31.5 million or 6.4% compared to $489.7 million for the year ended December 31, 2016.

- By solution, which consists of coordination of benefits and analytical services, and included in analytical services are our payment integrity and total population management solutions:
  - Coordination of benefits service revenue increased $29.0 million or 8.2% which was attributable to yield improvements and the addition of Medicaid enrollees which entered our customer eligibility files in 2017.
  - Payment integrity revenue decreased $30.7 million or 22.8% which was attributable to a $14.7 million decrease in Medicare RAC revenue because the Medicare RAC Region D program ceased generating revenue in late 2016, as expected, and a $16.1 million decrease due to various contract completions and expirations.
  - Total population management revenue increased $33.3 million or 3746.8% almost all of which is due to the Eliza acquisition in April 2017.

- By market:
  - Commercial health plan market revenue increased $39.0 million or 17.0% which was attributable to Eliza contributing revenue of $30.4 million since its acquisition in April 2017, Essette increasing revenue $2.9 million as compared to prior year and expanded commercial health plan scopes, including the addition of health plans to current contracts and yield improvements.
  - State government market revenue increased by $7.9 million or 3.6%, which was attributable to expanded scopes and yield improvements.
  - Federal government market and other revenue decreased $15.4 million, which was primarily attributable to a reduction of Medicare RAC revenue because the Medicare RAC D Region D program ceased generating new claims for active auditing in 2016, as expected.

Cost of Services

Cost of Services in millions

2018 vs. 2017

During the year ended December 31, 2018, total cost of services was $401.6 million, an increase of $36.5 million or 10.0% compared to $365.1 million for the year ended December 31, 2017. This change resulted primarily from increases in compensation expense of $22.9 million, information technology expense of $7.7 million, other operating costs of $3.0 million and amortization of intangibles expense of $2.6 million.

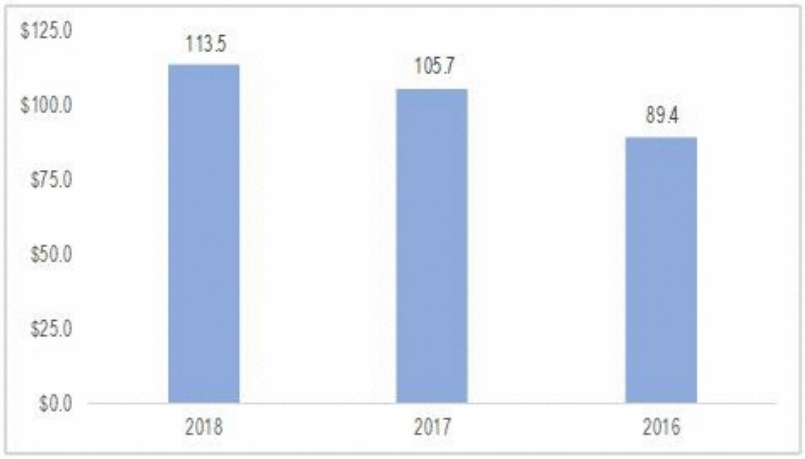
- The increase in total cost of services relating to Eliza (acquired in April 2017) represented $14.4 million of the increase.
- Excluding Eliza, total cost of services increased by $22.1 million which was primarily related to increases in compensation expenses of $17.0 million related to the overall performance of the Company and information technology expenses of $4.2 million.

2017 vs. 2016

During the year ended December 31, 2017, total cost of services was $365.1 million, an increase of $22.4 million or 6.5% compared to $342.7 million for the year ended December 31, 2016. This change resulted primarily from increases in compensation expense of $12.7 million, information technology expense of $8.4 million, and amortization of intangibles expense of $2.4 million.

- The Eliza acquisition and the related compensation, data processing, occupancy and amortization of intangibles expenses incurred since its acquisition in April 2017 represented $23.4 million of the increase.
- Excluding Eliza, total cost of services decreased by $1.0 million which was primarily related to a reduction in direct project costs partially offset by increases in data processing and compensation expenses.

Selling, General and Administrative Expenses



SG&A in millions

2018 vs. 2017

During the year ended December 31, 2018, SG&A expense was $113.5 million, an increase of $7.8 million or 7.4% compared to $105.7 million for the year ended December 31, 2017.

- Eliza (acquired in April 2017) represented $1.9 million of the increase.
- Excluding Eliza, expenses increased by $5.9 million primarily related to increased variable compensation expense due to the overall performance of the Company.

2017 vs. 2016

During the year ended December 31, 2017, SG&A expense was $105.7 million, an increase of $16.3 million or 18.2% compared to $89.4 million for the year ended December 31, 2016.

- The Eliza acquisition and related transaction fees and other SG&A expenses incurred since its acquisition in April 2017 represented $8.7 million of the increase.
- Excluding Eliza, stock compensation expense also increased by $7.3 million primarily due to stock compensation expense for retirement eligible employees.

Income Taxes

2018 vs. 2017

During the year ended December 31, 2018, we recorded an income tax benefit of ($2.0) million, an increased benefit of $1.8 million compared to an income tax benefit of ($0.2) million for the year ended December 31, 2017.

- On December 22, 2017, the 2017 Tax Act was signed into law and includes provisions reducing the federal tax rate for years beginning in 2018 from 35% to 21%.
- Our effective tax rate was (3.7%) for the year ended December 31, 2018 compared to an effective tax rate of (0.5%) for the year ended December 31, 2017. The low 2018 effective tax rate is primarily due to favorable tax benefits related to current year credits, equity compensation, subsidiary basis write off, prior year state tax apportionment changes, uncertain tax position releases, and acquisition adjustments.
- Our normalized effective tax rate of 25.8% for 2018 decreased from our normalized effective tax rate of 36.1% for 2017 primarily due to a lower federal tax rate. The normalized effective tax rate excludes prior years' expense and benefit adjustments recognized in the respective fiscal year.

2017 vs. 2016

During the year ended December 31, 2017, we recorded an income tax benefit of ($0.2) million, a decrease of $12.0 million compared to the year ended December 31, 2016.

- Our effective tax rate was (0.5%) for the year ended December 31, 2017 compared to an effective tax rate of (23.9%) for the year ended December 31, 2016. The decrease is primarily due to the revaluation of our deferred tax liabilities based on the reduced federal tax rate described above.
- Our normalized effective tax rate of 36.1% for 2017 is comparable to our normalized effective tax rate of 36.2% for 2016. The normalized effective tax rate excludes prior years expense and benefit adjustments recognized in the respective fiscal year.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Liquidity and Capital Resources

The following tables should be read in conjunction with the Consolidated Financial Statements and Notes thereto, in Part II, Item 8 of this 2018 Form 10-K.

Our cash and cash equivalents, working capital and available borrowings under our credit facility (based upon the borrowing base and financial covenants in our Credit Agreement) were as follows *(in thousands)*:

	Years ended December 31,	
	2018	2017
Cash and cash equivalents	$ 178,946	$ 83,313
Working capital	$ 328,684	$ 199,967
Available borrowings under credit facility	$ 253,500	$ 254,600

A summary of our cash flows was as follows *(in thousands)*:

	Years ended December 31,		
	2018	2017	2016
Net cash provided by operating activities	$ 96,457	$ 86,464	$ 88,639
Net cash used in investing activities	(30,413)	(204,364)	(39,201)
Net cash provided by/(used in) financing activities	29,589	25,214	(19,049)
Net increase / (decrease) in cash and cash equivalents	$ 95,633	$ (92,686)	$ 30,389

Our cash and cash equivalents and working capital increased as of December 31, 2018 as compared to December 31, 2017, primarily as a result of the cash generated by our operating activities as discussed below.

Our principal source of cash has been our cash flow from operations and our $500 million five-year revolving credit facility. Other sources of cash include proceeds from exercise of stock options and tax benefits associated with stock option exercises. The primary uses of cash are capital investments, compensation expenses, data processing, direct project costs, SG&A expenses and acquisitions. We may also use available cash to repurchase shares of our common stock.

We believe that expected cash flows from operations, available cash and cash equivalents, and funds available under our revolving credit facility will be sufficient to meet our liquidity requirements for the following year, which include:

- the working capital requirements of our operations;
- investments in our business;
- business development activities;
- repurchases of common stock; and
- repayment of our revolving credit facility.

Any projections of future earnings and cash flows are subject to substantial uncertainty. We may need to access debt and equity markets in the future if unforeseen costs or opportunities arise, to meet working capital requirements, fund acquisitions or repay our indebtedness under the Credit Agreement. If we need to obtain new debt or equity financing in the future, the terms and availability of such financing may be impacted by economic and financial market conditions as well as our financial condition and results of operations at the time we seek additional financing.

Cash Flows from Operating Activities

Net cash provided by operating activities for the year ended December 31, 2018 was $96.5 million, a $10.0 million increase from net cash provided by operating activities of $86.5 million for the year ended December 31, 2017. The increase was primarily due to a $14.9 million increase in net income and increases in reconciling items of $14.3 million as compared to prior year. These increases were offset by decreases in operating assets and liabilities of approximately $19.2 million.

Net cash provided by operating activities for the year ended December 31, 2017 was $86.5 million, a $2.1 million decrease from net cash provided by operating activities of $88.6 million for the year ended December 31, 2016. The decrease was primarily due to a decrease in deferred income taxes of $13.0 million related to our revaluation of the Company's deferred tax balances from the federal tax rate of 35% to 21% under the 2017 Tax Act, offset by an increase in stock based compensation expense of $10.9 million primarily related to retirement eligible employees. The decrease was also impacted by changes in operating assets and liabilities and offset by increases in net income, and depreciation and amortization expenses.

Our DSO calculation can be derived by dividing total net accounts receivable at the end of period, by the daily average of the current quarter's annualized revenue. For the year ended December 31, 2018, revenue was $598.3 million, an increase of $77.1 million compared to revenue of $521.2 million for the year ended December 31, 2017. DSO increased by 4 days to 119 days as of December 31, 2018, as compared to 115 days as of December 31, 2017. The change was due to timing delays in certain clients processing our findings through their systems. We do not currently anticipate collection issues with our accounts receivable, however, nor do we currently expect that any extended collections will materially impact our liquidity.

The majority of our customer relationships have been in place for several years. Our future operating cash flows could be adversely affected by a decrease in a demand for our services, delayed payments from customers or if one or more contracts with our largest customers is terminated or not renewed.

Cash Flows from Investing Activities

Net cash used in investing activities for the year ended December 31, 2018 was $30.4 million, a $174.0 million decrease compared to net cash used in investing activities of $204.4 million for the year ended December 31, 2017. This decrease was primarily due to the use of approximately $171.3 million for the Eliza acquisition in April 2017. Purchases of property and equipment and investment in capitalized software also decreased by $2.7 million year over year.

Net cash used in investing activities for the year ended December 31, 2017 was $204.4 million, a $165.2 million increase compared to net cash used in investing activities of $39.2 million for the year ended December 31, 2016. This increase was primarily due to the use of approximately $171.3 million for the Eliza acquisition in April 2017 as compared to the use of approximately $20.7 million for the Essette acquisition in September 2016. Purchases of property and equipment and investment in capitalized software also increased by $12.0 million year over year.

We currently expect to incur capital expenditures of $35-$40 million during the year ended December 31, 2019.

Cash Flows from Financing Activities

Net cash provided by financing activities for the year ended December 31, 2018 was $29.6 million, a $4.4 million increase from net cash provided by financing activities of $25.2 million for the year ended December 31, 2017. This increase was primarily attributable to an increase of $36.0 million of proceeds from exercise of stock options over prior year and an $8.2 million decrease in repurchases of common stock as compared to prior year. Additionally, there was a $39.8 million decrease in proceeds from our credit facility net of deferred financing cost payments.

Net cash provided by financing activities for the year ended December 31, 2017 was $25.2 million, a $44.2 million increase from net cash used in financing activities of $19.0 million for the year ended December 31, 2016. This increase was primarily attributable to $42.2 million of proceeds from additional borrowings under our amended credit facility.

Share Repurchase Program

During the year ended December 31, 2018, we repurchased 0.4 million shares of our common stock for approximately $6.0 million using cash resources. See the discussion under "Repurchases of Shares of Common Stock" under Part II, Item 5 and "Equity" in Note 11 to the Consolidated Financial Statements under Part II, Item 8 for additional information regarding share repurchases.

Credit Agreement

In May 2013, we entered into the Credit Agreement with certain lenders and Citibank, N.A. as administrative agent. The Credit Agreement originally provided for an initial $500 million five-year revolving credit facility maturing on May 3, 2018. On December 19, 2017, we entered into an amendment to the Credit Agreement that, among other things, provided for an extension of the maturity date of our then-existing senior secured revolving credit facility to December 19, 2022, which includes a $50 million sublimit for the issuance of letters of credit and a $25 million sublimit for swingline loans. In addition, the Credit Agreement includes an accordion feature that permits us to increase the revolving credit facility up to the sum of (a) the greater of $120 million and 100% of Consolidated EBITDA (as defined in the Credit Agreement) and (b) additional amounts so long as our first lien leverage ratio (as defined in the Credit Agreement) on a pro forma basis is not greater than 3.00:1.00, in each case subject to obtaining commitments from lenders therefor and meeting certain other conditions.

The obligations and amounts due under the Credit Agreement are secured by a first security priority interest in all or substantially all of our tangible and intangible assets and our material 100% owned subsidiaries' assets. The Credit Agreement contains customary representations and warranties, affirmative and negative covenants, including financial covenants, and events of default.

As of December 31, 2018, the outstanding principal balance under our revolving credit facility was $240.0 million.

As part of a contractual agreement with a customer, the Company has an outstanding irrevocable letter of credit for $6.5 million, which is issued against our revolving credit facility and expires June 30, 2019.

As of December 31, 2018, we were in compliance with all terms of the Credit Agreement.

See Note 10 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding our Credit Agreement.

Contractual Obligations

The following table represents the scheduled maturities of our contractual cash obligations and other commitments:

	Payments Due by Period (*in thousands*)				
Contractual Obligations [1]	Total	Less than 1 year	1 - 3 years	3 -5 years	More than 5 years
Operating leases [2]	$ 22,654	$ 5,778	$ 9,162	$ 4,767	$ 2,947
Revolving credit facility [3]	240,000	-	-	240,000	-
Interest expense [4]	41,687	10,494	21,016	10,177	-
Commitment fee [5]	2,610	651	1,320	639	-
Capital leases [6]	8	8	-	-	-
Letter of Credit fee [7]	49	49	-	-	-
Purchase obligations and commitments [8]	26,966	10,180	13,970	2,816	-
Total	$ 333,974	$ 27,160	$ 45,468	$ 258,399	$ 2,947

(1) The Company has excluded long-term unrecognized tax benefits, net of interest and penalties, of $4.8 million from the amounts presented as the timing of these obligations is uncertain.

(2) Represents the future minimum lease payments under non-cancelable operating leases.

(3) Represents scheduled repayments of principal on the revolving credit facility under the terms of our Credit Agreement. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(4) Represents estimates of amounts due on the revolving credit facility based on the interest rate as of December 31, 2018 and on scheduled repayments of principal. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(5) Represents the commitment fee due on the revolving credit facility. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(6) Represents the future minimum lease payments under capital leases.

(7) Represents the fees for the letter of credit issued against the revolving credit facility. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(8) Represents future purchases related to outstanding purchase orders and supplier requisitions.

Recently Issued Accounting Pronouncements

The information set forth under the caption “Summary of Significant Accounting Policies” in Note 1 to the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

At December 31, 2018, we were not a party to any derivative financial instruments. We conduct all of our business in U.S. currency and hence do not have direct foreign currency risk. We are exposed to changes in interest rates, primarily with respect to our revolving credit facility under our Credit Agreement. If the effective interest rate for all of our variable rate debt were to increase by 100 basis points (1%), our annual interest expense would increase by a maximum of $2.4 million based on our debt balances outstanding at December 31, 2018. Further, we currently invest substantially all of our excess cash in short-term investments, primarily money market accounts, where returns effectively reflect current interest rates. As a result, market interest rate changes may impact our interest income or expense. The impact will depend on variables such as the magnitude of rate changes and the level of borrowings or excess cash balances. We do not consider this risk to be material. We manage such risk by continuing to evaluate the best investment rates available for short-term, high quality investments.

Item 8. Consolidated Financial Statements and Supplementary Data

The information required by Item 8 is found under Item 15 of this 2018 Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We are responsible for maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures

As required by Rule 13a-15(b) under the Exchange Act, management, with the participation of our Chief Executive Officer and Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2018. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by the 2018 Form 10-K.

(b) Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by Rule 13a-15(f) under the Exchange Act, internal control over financial reporting is a process designed by, or under the supervision of our Chief Executive Officer and our Chief Financial Officer and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with U.S. GAAP.

Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the consolidated financial statements in accordance with generally accepted accounting principles and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

In connection with the preparation of our annual consolidated financial statements, management has undertaken an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2018, based on criteria established in the Internal Control-Integrated Framework issued by COSO. Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of those controls. Based on that assessment, we believe that the Company's internal control over financial reporting was effective based on those criteria as of December 31, 2018.

Our independent registered public accounting firm, Grant Thornton LLP, audited our consolidated financial statements and has issued an attestation report on the effectiveness of our internal control over financial reporting as of December 31, 2018, a copy of which is included with this 2018 Form 10-K.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(c) Changes in Internal Control Over Financial Reporting

There have been no changes to the Company's internal control over financial reporting during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item 10 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2019 Annual Meeting of Shareholders under the captions "*Proposal One: Election of Class II Directors,*" "*Executive Officers,*" "*Section 16(a) Beneficial Ownership Reporting Compliance*," "*Director Nomination Process*," "*Additional Information—Shareholder Proposals and Director Nominations for 2020 Annual Meeting,*" and "*Board Committees and Related Matters*."

Our Board of Directors has adopted a Code of Conduct applicable to all of our directors, officers and employees, including all employees, officers, directors, contractors, contingent workers and business affiliates of HMS subsidiaries. The Code of Conduct is publicly available on our website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate-governance.cfm and can also be obtained free of charge by sending a written request to our Corporate Secretary. To the extent permissible under the Nasdaq Marketplace Rules, we intend to disclose amendments to our Code of Conduct, as well as waivers of the provisions thereof, that relate to our principal executive officer, principal financial officer, principal accounting officer, controller or persons performing similar functions on the Company's website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate-governance.cfm.

Item 11. Executive Compensation

The information required by this Item 11 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2019 Annual Meeting of Shareholders under the captions "*Executive Compensation,*" "*Director Compensation,*" *and "Compensation Committee Interlocks and Insider Participation.*"

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

Except as provided below, the information required by this Item 12 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2019 Annual Meeting of Shareholders under the caption "*Ownership of HMS Common Stock.*"

Equity Compensation Plan Information

The following table summarizes information about our equity compensation plans as of December 31, 2018. For additional information about our equity compensation plans see the discussion set forth under the caption "Stock-Based Compensation" in Note 13 to the Consolidated Financial Statements in Part II, Item 8.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by shareholders	5,825,734(1)	$ 17.07	4,758,398
Equity compensation plans not approved by shareholders	19,004(2)	$ 12.00	—
Total	5,844,738		

(1) This includes stock options and restricted stock units granted under our 2006 Stock Plan and 2016 Omnibus Plan.

(2) This includes stock options granted under the 2011 HDI Plan, which was assumed in connection with our acquisition of HDI and approved by the Compensation Committee of our Board.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by this Item 13 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2019 Annual Meeting of Shareholders under the captions "*Certain Relationships and Related Transactions*" and "*Director Independence*."

Item 14. Principal Accounting Fees and Services

The information required by this Item 14 is incorporated herein by reference to the applicable disclosure from the proposal captioned "*Ratification of the Selection of Independent Registered Public Accounting Firm*" found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2019 Annual Meeting of Shareholders.

PART IV

Item 15. Exhibits and Financial Statement Schedules

1. *Financial Statements.*

The financial statements are listed in the Index to Consolidated Financial Statements on page 52.

2. *Financial Statement Schedules.*

Financial Statement Schedule II-Valuation and Qualifying Accounts is set forth on page 82. All other financial statement schedules have been omitted as they are either not required, not applicable or the information is otherwise included.

3. *Exhibits.*

The Exhibits include agreements to which the Company is a party or has a beneficial interest. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other actual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties, and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties, and covenants in the agreements may have been used for the purpose of allocating risk between parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.

Where an exhibit is filed by incorporation by reference to a previously filed registration statement or report, such registration statement or report is identified after the description of the exhibit.

Exhibit Number	Description
2.1	Agreement and Plan of Merger, dated December 16, 2002, among Health Management Systems, Inc., HMS Holdings Corp. and HMS Acquisition Corp. (incorporated by reference to Exhibit A to the Company's Prospectus and Proxy Statement (Reg No. 333-100521) as filed with the SEC on January 24, 2003)
2.2	Agreement and Plan of Merger, dated July 17, 2013, by and between HMS Holdings Corp., a Delaware corporation, and HMS Holdings Corp., a New York corporation (incorporated by reference to Exhibit 2.1 to the Company's Current Report on Form 8-K/12g-3 (File No. 000-50194) as filed with the SEC on July 23, 2013)
2.3	Agreement and Plan of Merger, dated March 10, 2017, by and among HMS Holdings Corp., Echo Acquisition Sub, Inc., Eliza Holding Corp., and Parthenon Investors III, L.P., solely in its capacity as the representative for equity holders of Eliza Holding Corp. (incorporated by reference to Exhibit 2.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on June 6, 2017)
3.1	Conformed copy of Certificate of Incorporation of HMS Holdings Corp., as amended through May 23, 2018 (incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on August 6, 2018)

Exhibit Number	Description
3.2	Second Amended and Restated Bylaws of HMS Holdings Corp. dated May 23, 2018 (incorporated by reference to Exhibit 3.2 to the Company's Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on May 25, 2018)
4.1	Specimen Common Stock Certificate (incorporated by reference to Exhibit 4.1 to the Company's Current Report on Form 8-K/12g-3 (File No. 000-50194) as filed with the SEC on July 23, 2013)
10.1.1	HMS Holdings Corp. Fourth Amended and Restated 2006 Stock Plan (incorporated by reference to Exhibit 99.2 to the Company's Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on July 12, 2011)†
10.1.2	Amendment No. 1 to the HMS Holdings Corp. Fourth Amended and Restated 2006 Stock Plan (incorporated by reference to Exhibit 10.6 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2012)†
10.1.3	Form of 2012 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.20 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)†
10.1.4	Form of 2012 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.22 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)†
10.1.5	Form of 2013 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.24 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)†
10.1.6	Form of 2013 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)†
10.1.7	Form of 2013 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.3 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)†
10.1.8	Form of March 2014 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.4 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)†
10.1.9	Form of November 2014 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 10, 2014)†
10.1.10	Form of 2014 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.26 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 2, 2015)†
10.1.11	Form of 2014 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.28 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 2, 2015)†
10.1.12	Form of March 2015 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 11, 2015)†
10.1.13	Form of March 2015 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.2 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 11, 2015)†

Exhibit Number	Description
10.1.14	Form of 2015 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.21 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2016)†
10.1.15	Form of 2015 Director Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.22 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2016)†
10.1.16	Form of November 2015 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.23 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2016)†
10.1.17	Form of 2016 Executive and Senior Vice President Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 10, 2016)†
10.1.18	Form of 2016 Executive and Senior Vice President Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.2 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 10, 2016)†
10.2.1	HMS Holdings Corp. 2016 Omnibus Incentive Plan (incorporated by reference to Exhibit 10.2 to the Company's Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on June 27, 2016)†
10.2.2	Form of Non-Qualified Stock Option Award Agreement for Employees under the 2016 Omnibus Plan (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 9, 2016)†
10.2.3	Form of Restricted Stock Unit Award Agreement for Employees under the 2016 Omnibus Plan (incorporated by reference to Exhibit 10.2 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 9, 2016)†
10.2.4	Form of Non-Qualified Stock Option Award Agreement for Non-Employee Directors under the 2016 Omnibus Plan (incorporated by reference to Exhibit 10.3 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 9, 2016)†
10.2.5	Form of Restricted Stock Unit Award Agreement for Non-Employee Directors under the 2016 Omnibus Plan (incorporated by reference to Exhibit 10.4 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 9, 2016)†
10.3.1	Executive Employment Agreement, dated March 1, 2013, by and between William C. Lucia and HMS Holdings Corp. (incorporated by reference to Exhibit 10.29 to the Company's Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)†
10.3.2	Letter of Amendment to Executive Employment Agreement, dated April 30, 2013, by and between William C. Lucia and HMS Holdings Corp. (incorporated by reference to Exhibit 10.1 to Amendment No. 1 to the Company's Annual Report on Form 10-K/A (File No. 000-50194) as filed with the SEC on April 30, 2013)†

Exhibit Number	Description
10.3.3	Second Amendment to Executive Employment Agreement, dated January 20, 2015, by and between HMS Holdings Corp. and William C. Lucia (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on January 23, 2015)†
10.3.4	Third Amendment to Executive Employment Agreement, dated February 21, 2018, by and between William C. Lucia and HMS Holdings Corp. (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on February 23, 2018)†
10.4	Amended and Restated Employment Agreement, dated April 2, 2018, by and between Jeffrey S. Sherman and HMS Holdings Corp. (incorporated by reference to Exhibit 10.2 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 7, 2018)†
10.5	Amended and Restated Employment Agreement, dated March 29, 2018, by and between Meredith W. Bjorck and HMS Holdings Corp. (incorporated by reference to Exhibit 10.3 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 7, 2018)†
10.6	Amended and Restated Employment Agreement, dated March 29, 2018, by and between Douglas M. Williams, Jr. and HMS Holdings Corp. (incorporated by reference to Exhibit 10.5 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 7, 2018)†
10.7	Amended and Restated Employment Agreement, dated April 2, 2018, by and between Emmet O' Gara and HMS Holdings Corp.†
10.8	Amended and Restated Employment Agreement, dated April 2, 2018, by and between Semone Neuman and HMS Holdings Corp. (incorporated by reference to Exhibit 10.4 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 7, 2018)†
10.9	Separation, Waiver and General Release Agreement, dated January 9, 2019, by and between Semone Neuman and HMS Holdings Corp.†
10.10	Form of Indemnification Agreement (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on August 6, 2018)†
10.11	HMS Holdings Corp. Director Deferred Compensation Plan, as amended through June 29, 2016 (incorporated by reference to Exhibit 10.3 to the Company's Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on August 9, 2016)†

HMS HOLDINGS CORP. AND SUBSIDIARIES
INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
HMS Holdings Corp.

Opinion on the financial statements
We have audited the accompanying consolidated balance sheets of HMS Holdings Corp. (a Delaware corporation) and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2018, and the related notes and financial statement schedule included under Item 15 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), and our report dated February 25, 2019 expressed an unqualified opinion.

Basis for opinion
These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Company's auditor since 2017.

Dallas, Texas
February 25, 2019

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
HMS Holdings Corp.:

We have audited the accompanying consolidated balance sheet of HMS Holdings Corp. and subsidiaries as of December 31, 2016, and the related consolidated statements of income, shareholders' equity, and cash flows for the year ended December 31, 2016. In connection with our audit of the consolidated financial statements, we also have audited financial statement schedule II as it relates to the year ended December 31, 2016. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of HMS Holdings Corp. and subsidiaries as of December 31, 2016, and the results of their operations and their cash flows for the year ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule as it relates to the year ended December 31, 2016, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
HMS Holdings Corp.

Opinion on internal control over financial reporting
We have audited the internal control over financial reporting of HMS Holdings Corp. (a Delaware corporation) and subsidiaries (the "Company") as of December 31, 2018, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated financial statements of the Company as of and for the year ended December 31, 2018, and our report dated February 25, 2019 expressed an unqualified opinion on those financial statements.

Basis for opinion
The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and limitations of internal control over financial reporting
A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

HMS HOLDINGS CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Business and Summary of Significant Accounting Policies

(a) Business

HMS is an industry-leading provider of cost containment solutions in the healthcare marketplace. We use healthcare technology, analytics and engagement solutions, to deliver coordination of benefits, payment integrity, population risk analytics, and care management and consumer engagement solutions to help payers reduce costs, improve healthcare outcomes and enhance member experiences. We provide coordination of benefits services to government and commercial healthcare payers to ensure that the correct party pays the claim. Our payment integrity services promote accuracy by fighting fraud, waste and abuse, and our total population management solutions provide risk-bearing organizations with reliable intelligence across their member populations to identify risks and improve patient engagement and outcomes. Together these various services help move the healthcare system forward for our customers. We currently operate as one business segment with a single management team that reports to the Chief Executive Officer.

(b) Summary of Significant Accounting Policies

For certain accounting topics, the description of the accounting policy may be found in the related Note.

(i) Principles of Consolidation

The consolidated financial statements include the Company's accounts and transactions and those of the Company's wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

(ii) Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(iii) Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents consist of deposits that are readily convertible into cash.

(iv) Concentration of Credit Risk

The Company's policy is to limit credit exposure by placing cash in accounts which are exposed to minimal interest rate and credit risk. HMS maintains cash and cash equivalents in cash depository accounts with large financial institutions with a minimum credit rating of A1/P1 or better, as defined by Standard and Poor's. The balance at these institutions generally exceeds the maximum balance insured by the Federal Deposit Insurance Corporation of up to $250,000 per entity. HMS has not experienced any losses in cash and cash equivalents and believes these cash and cash equivalents do not expose the Company to any significant credit risk.

The Company is subject to potential credit risk related to changes in economic conditions within the healthcare market. However, HMS believes that the billing and collection policies are adequate to minimize the potential credit risk. The Company performs ongoing credit evaluations of customers and generally does not require collateral.

(v) Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is provided over the estimated useful lives of the assets utilizing the straight-line method. HMS amortizes leasehold improvements on a straight-line basis over the shorter of (i) the term of the lease or (ii) the estimated useful life of the improvement. Equipment leased under capital leases is depreciated over the shorter of (i) the term of the lease or (ii) the estimated useful life of the equipment. Capitalized software costs relate to software that is acquired or developed for internal use while in the application development stage. All other costs to develop software for internal use, either in the preliminary project stage or post-implementation stage, are expensed as incurred. Amortization of capitalized software is calculated on a straight-line basis over the expected economic life. Land is not depreciated.

Estimated useful lives are as follows:

Property and Equipment	Useful Life (in years)		
Equipment	2	to	5
Leasehold improvements	5	to	10
Furniture and fixtures		5	
Capitalized software	3	to	10
Building and building improvements		up to 39	

Property and equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets. The Company did not recognize any impairment charges related to property and equipment during the years ended December 31, 2018, 2017 or 2016.

(vi) Intangible assets

The Company records assets acquired and liabilities assumed in a business combination based upon their acquisition date fair values. In most instances there is not a readily defined or listed market price for individual assets and liabilities acquired in connection with a business, including intangible assets. The Company determines fair value through various valuation techniques including discounted cash flow models, quoted market values and third party independent appraisals, as considered necessary. Significant assumptions used in those techniques include, but are not limited to, growth rates, discount rates, customer attrition rates, expected levels of revenues, earnings, cash flows and tax rates. The use of different valuation techniques and assumptions are highly subjective and inherently uncertain and, as a result, actual results may differ materially from estimates.

All of the Company's intangible assets are subject to amortization and are amortized using the straight-line method over their estimated period of benefit. Estimated useful lives are as follows:

Intangible Assets	Useful Life (in years)		
Customer relationships	7	to	15
Restrictive covenants	1	to	3
Trade names	1.5	to	7
Intellectual property	4	to	6

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets. The Company did not recognize any impairment charges related to intangible assets during the years ended December 31, 2018, 2017 or 2016.

(vii) Goodwill

Goodwill is the excess of acquisition costs over the fair values of assets and liabilities of acquired businesses. During the measurement period, which is up to one year from the acquisition date, the Company may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to earnings.

Goodwill is subject to a periodic assessment for impairment. The Company assesses goodwill for impairment on an annual basis as of June 30th of each year or more frequently if an event occurs or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Assessment of goodwill impairment is at the HMS Holdings Corp. entity level as the Company operates as a single reporting unit. We have the option to perform a qualitative or quantitative assessment to determine if impairment is more likely than not to have occurred. The Company completed the annual impairment test as of June 30, 2018 electing to perform the quantitative assessment of which the first step is to compare the fair value of the reporting unit with its carrying value, including goodwill. In calculating the fair value of the reporting unit, the Company utilized a weighting across three commonly accepted valuation approaches: an income approach, a guideline public company approach, and a merger and acquisition approach. The income approach to determining fair value computes projections of the cash flows that the reporting unit is expected to generate converted into a present value equivalent through discounting. Significant assumptions in the income approach include income projections, a discount rate and a terminal growth value which are all level 3 inputs. The income projections include assumptions for revenue and expense growth which are based on internally developed business plans and largely reflect recent historical revenue and expense trends. The discount rate was based on a risk free rate plus a beta adjusted equity risk premium and specific company risk premium. The terminal growth value is Company specific and was determined analyzing inputs such as historical inflation and the GDP growth rate. The guideline public company approach and merger and acquisition approach are based on pricing multiples observed for similar publicly traded companies or similar market companies that were sold. The results of the annual impairment assessment provide that the fair value of the reporting unit was significantly in excess of the Company's carrying value, including goodwill; therefore, no impairment was indicated. There were no impairment charges related to goodwill during the years ended December 31, 2018, 2017 or 2016. There were no changes in the carrying amount of goodwill for the year ended December 31, 2018.

(viii) Income Taxes

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. This method also requires the recognition of future tax benefits for net operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance is provided against deferred tax assets to the extent their realization is not more likely than not. Uncertain income tax positions are accounted for by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. Although the Company believes that it has adequately reserved for uncertain tax positions (including interest and penalties), it can provide no assurance that the final tax outcome of these matters will not be materially different. The Company makes adjustments to these reserves in accordance with the income tax accounting guidance when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made, and could have a material impact on our financial condition and operating results.

(ix) Expense Classifications

HMS cost of services is presented in the categories set forth below. Each category within cost of services excludes expenses relating to SG&A functions, which are presented separately as a component of total operating costs. A description of the primary expenses included in each category is as follows:

Cost of Services:

- *Compensation:* Salary, fringe benefits, bonus and stock-based compensation.
- *Information technology:* Hardware, software and data communication costs.
- *Occupancy:* Rent, utilities, depreciation, office equipment and repair and maintenance costs.
- *Direct project expense:* Variable costs incurred from third party providers that are directly associated with specific revenue generating projects and employee travel expenses.
- *Other operating expenses:* Professional fees, temporary staffing, travel and entertainment, insurance and local and property tax costs.
- *Amortization of acquisition related software and intangible assets:* Amortization of the cost of acquisition related software and intangible assets.

SG&A:

- Expenses related to general management, marketing and administrative activities.

(x) Estimating Valuation Allowances and Accrued Liabilities

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reported period. In particular, management must make estimates of the probability of collecting accounts receivable. When evaluating the adequacy of the accounts receivable allowance, management reviews the accounts receivable based on an analysis of historical revenue adjustments, bad debts, customer concentrations, customer credit-worthiness, current economic trends and changes in customer payment terms. As of December 31, 2018 and 2017, the accounts receivable balance was $206.8 million and $189.5 million, net of allowance of $13.7 million and $14.8 million, respectively.

(xi) Stock-Based Compensation

Long-Term Incentive Award Plans

The Company grants stock options and restricted stock units ("equity awards") to HMS employees and non-employee directors under the 2016 Omnibus Plan, as approved by the Company's shareholders on June 23, 2016. The 2016 Omnibus Plan replaced and superseded the Company's 2006 Stock Plan and 2011 HDI Plan. As of December 31, 2018, the number of securities remaining available for future issuance under equity compensation plans, excluding securities to be issued upon exercise of outstanding options and vesting of restricted stock units, is 4,758,398 shares. All of the Company's employees as well as HMS non-employee directors are eligible to participate in the 2016 Omnibus Plan. Awards granted under the 2016 Omnibus Plan generally vest over one to four years. The exercise price of stock options granted under the 2016 Omnibus Plan may not be less than the fair market value of a share of stock on the grant date, as measured by the closing price of the Company's common stock on the Nasdaq Global Select Market and the term of a stock option may not exceed ten years. Prior to 2018, the Company granted two types of equity awards: 1) equity awards with service conditions and 2) equity awards with market and service conditions. The market condition is based on the Company's common stock price during the applicable measurement period. In 2018, the Company only issued equity awards with service conditions.

Stock-Based Compensation Expense

The Company recognizes stock-based compensation expense equal to the grant date fair value of the award on a straight-line basis over the requisite service period.

The fair value of each option grant with only service-based conditions is estimated using the Black-Scholes pricing model. The fair value of each option grant with market and service-based conditions is estimated using a Monte Carlo simulation model. The fair value of each restricted stock unit is calculated based on the closing sale price of the Company's common stock on the grant date.

The determination of the fair value of the options on the grant date using the Black-Scholes pricing model and/or the Monte Carlo simulation model is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. Certain key variables include: the Company's expected stock price volatility over the expected term of the awards; a risk-free interest rate; and any expected dividends. The Company estimates stock price volatility based on the historical volatility of the Company's common stock and estimates the expected term of the awards based on the Company's historical option exercises for similar types of stock option awards. The assumed risk-free interest rate is based on the yield on the measurement date of a zero-coupon U.S. Treasury bond with a maturity period equal to the option's expected term. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore, uses an expected dividend yield of zero in the option valuation models. The fair value of all awards also includes an estimate of expected forfeitures. Forfeitures are estimated based on historical experience. If actual forfeitures vary from estimates, a difference in compensation expense will be recognized in the period the actual forfeitures occur. Upon the exercise of stock options or the vesting of restricted stock units, the resulting excess tax benefits or deficiencies, if any, are recognized as income tax expense or benefit.

(xii) Fair Value of Financial Instruments

Financial instruments are categorized into a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. In the event the fair value is not readily available or determinable, the financial instrument is carried at cost and referred to as a cost method investment. The fair value hierarchy is as follows:

- *Level 1:* Observable inputs such as quoted prices in active markets;
- *Level 2*: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- *Level 3:* Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

(xiii)Leases

HMS accounts for lease agreements as either operating or capital leases, depending on certain defined criteria. Lease costs are amortized on a straight-line basis without regard to deferred payment terms, such as rent holidays, that defer the commencement date of required payments. Additionally, incentives such as tenant improvement allowances, are capitalized and are treated as a reduction of rental expense over the term of the lease agreement.

(xiv) Recent Accounting Guidance

Recently Adopted Accounting Guidance

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606) ("ASU 2014-09"), which is the new comprehensive revenue recognition standard that supersedes all existing revenue recognition guidance under U.S. GAAP. The Company adopted ASU 2014-09 on January 1, 2018 using the modified retrospective method and the Company recognized the cumulative effect of initially applying the new revenue standard as an adjustment to the opening balance of retained earnings. The financial information for comparative prior periods has not been restated and continues to be reported under the accounting standards in effect for those periods. The effect of adopting ASU 2014-09 in the current annual reporting period as compared with the guidance that was in effect before the change is immaterial. The Company's internal control framework did not materially change, but existing internal controls were modified due to certain changes to business processes and systems to support the new revenue recognition standard as necessary. The Company continues to expect the impact of the adoption of the new standard to be immaterial to its net income and its internal control framework on an ongoing basis.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation – Stock Compensation* (Topic 718): *Improvements to Employee Share-Based Payment Accounting*, ("ASU 2016-09") that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when stock awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows companies to repurchase more of an employee's vesting shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made to tax authorities on an employee's behalf for withheld shares should be presented as a financing activity on the cash flows statement and provides an accounting policy election to account for forfeitures as they occur. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within such annual reporting periods with early adoption permitted. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2016 which requires us to reflect any adjustments as of January 1, 2016, the beginning of the annual period that includes the interim period of adoption. The primary impact of adoption was the recognition of excess tax benefits in the provision for income taxes rather than paid-in capital for all periods in fiscal year 2016. Additional amendments to the accounting for income taxes and minimum statutory withholding tax requirements had no impact to retained earnings as of January 1, 2016, where the cumulative effect of these changes are required to be recorded. The Company elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. Adoption of the new standard resulted in the recognition of net excess tax benefits in the provision for income taxes rather than paid-in capital of $1.9 million for the year ended December 31, 2016. The presentation requirements for cash flows related to employee taxes paid for withheld shares had no impact to any of the 2016 periods presented on the consolidated statements of cash flow since such cash flows have historically been presented as a financing activity.

In August 2016, the FASB issued ASU No. 2016-15, *Statements of Cash Flows* (Topic 230): *Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"). ASU 2016-15 clarifies where certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments are effective for annual reporting periods beginning after December 15, 2017, and for interim reporting periods within such annual periods. The Company adopted this guidance on January 1, 2018. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-01, *Business Combinations* (Topic 805) – *Clarifying the Definition of a Business* ("ASU 2017-01"). ASU 2017-01 finalizes previous proposals regarding shareholder concerns that the definition of a business is applied too broadly. The guidance assists entities with evaluating whether transactions should be accounted for as acquisitions of assets or of businesses. The amendments are effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The Company adopted this guidance on January 1, 2018. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In May 2017, the FASB issued ASU No. 2017-09, *Compensation – Stock Compensation* (Topic 718): *Scope of Modification Accounting*, ("ASU 2017-09"). ASU 2017-09 requires entities to apply modification accounting to changes made to a share-based payment award. The new guidance specifies that entities will apply modification accounting to changes to a share-based payment award only if any of the following are not the same immediately before and after the change: 1) The award's fair value (or calculated value or intrinsic value, if those measurement methods are used), 2) the award's vesting conditions, and 3) the award's classification as an equity or liability instrument. ASU 2017-09 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within such annual periods, with early adoption permitted. The Company adopted this guidance on January 1, 2018. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, *Goodwill and Other* (Topic 350): *Simplifying the Test for Goodwill Impairment* ("ASU 2017-04"). This amendment simplifies the manner in which an entity is required to test for goodwill impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. The amendment simplifies this approach by having the entity (1) perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount, and (2) recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, with the understanding that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2018. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

On August 17, 2018 the SEC issued SEC Final Rule Release No. 33-10532, *Disclosure Update and Simplification* ("Final Rule"). The Final Rule amends certain disclosure requirements to facilitate the disclosure of information to investors and simplify compliance without significantly altering the total mix of information provided to investors. The Final Rule was effective for public entities that are SEC filers on November 5, 2018. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

Recent Accounting Guidance Not Yet Adopted

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) ("ASU 2016-02"). ASU 2016-02 will require most lessees to recognize a majority of the company's leases on the balance sheet, which will increase reported assets and liabilities. ASU 2016-02 was subsequently amended by ASU No. 2018-01, Land Easement Practical Expedient for Transition to Topic 842; ASU No. 2018-10, Codification Improvements to Topic 842, Leases; and ASU No. 2018-11, Targeted Improvements. The new standard establishes a right-of-use model (ROU) that requires a lessee to recognize a ROU asset and lease liability on the balance sheet for all leases with a term longer than 12 months. Leases will be classified as finance or operating, with classification affecting the pattern and classification of expense recognition in the income statement. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018 including interim periods within such annual reporting periods with early adoption permitted. The Company has not early adopted this guidance, and therefore is adopting this guidance on January 1, 2019 and will use the effective date as our date of initial application. Consequently, financial information will not be updated and the disclosures required under the new standard will not be provided for dates and periods prior to the date of adoption. The Company developed a preliminary implementation plan and reviewed historical lease agreements in order to quantify the impact of adoption. Based upon the preliminary implementation plan, the Company expects the adoption of ASU 2016-02 will have a material impact on the consolidated balance sheet due to the recognition of the ROU assets and lease liabilities. The adoption of ASU 2016-02 is not expected to have a material impact on the consolidated statement of income or consolidated statement of cash flow. However, the Company continues to perform the necessary reviews and other implementation considerations, including an evaluation of the incremental borrowing rate, in order to appropriately quantify the changes. While we continue to assess all of the effects of adoption, we currently believe the most significant effects relate to (1) the recognition of new ROU assets and lease liabilities on our balance sheet for our real estate operating leases and (2) financial statement disclosures. We do not expect a significant change in our leasing activities between now and adoption. A range of undiscounted ROU assets and lease liabilities at January 1, 2019 is $28 million to $31 million. We expect to recognize operating lease ROU assets and lease liabilities that reflect the present value of these future payments. The Company plans adopt this guidance using the optional transition method. The new standard also provides practical expedients for an entity's existing and ongoing accounting and we expect to adopt the package of practical expedients as well as the practical expedient to not separate lease and non-lease components of our leases and the short-term lease practical expedient.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses* ("ASU 2016-13"). ASU 2016-13 introduces the current expected credit losses methodology ("CECL") for estimating allowances for credit losses. ASU 2016-13 applies to all financial instruments carried at amortized cost and off-balance-sheet credit exposures not accounted for as insurance, including loan commitments, standby letters of credit, and financial guarantees. The new accounting standard does not apply to trading assets, loans held for sale, financial assets for which the fair value option has been elected, or loans and receivables between entities under common control. ASU 2016-13 is effective for public entities for fiscal year beginning after December 15, 2019, including interim periods within that fiscal year. Early adoption is permitted. The Company is currently evaluating the impact on the Company's financial statements of adopting this guidance but this guidance is not expected to have a material impact on the Company's financial position, results of operations or internal control framework.

In June 2018, the FASB issued ASU No. 2018-07, *Compensation – Stock Compensation* (Topic 718) – *Improvements to Nonemployee Share Based Payment Accounting*, ("ASU 2018-07"). ASU 2018-07 requires entities to apply similar accounting for share-based payment transactions with non-employees as with share-based payment transactions with employees. ASU 2018-07 is effective for public entities for fiscal year beginning after December 15, 2018, including interim periods within that fiscal year. Early adoption is permitted. The Company is currently evaluating the impact on the Company's financial statements of adopting this guidance but this guidance is not expected to have a material impact on the Company's financial position, results of operations or internal control framework.

2. Revenue

The Company's revenue disaggregated by service for the year ended December 31, 2018 is as follows (*in thousands*):

Coordination of Benefits	$ 397,095
Payment Integrity	144,063
Total Population Management	57,132
Total	$ 598,290

Coordination of benefits revenue is derived from contracts with state governments and Medicaid managed care plans that typically span 1 to 5 years with the option to renew. Types of service contracts could include: (a) the identification of erroneously paid claims; (b) the delivery of verified commercial insurance coverage information; (c) the identification of paid claims where another third party is liable; and (d) the identification and enrollment of Medicaid members who have access to employer insurance. Most of these types of service contracts contain multiple promises, all of which are not distinct within the context of the contract. Therefore, the promises represent a single, distinct performance obligation for the types of services we offer. Revenue derived from these performance obligations is largely based on variable consideration where, based on the number of claims or amount of findings the Company identified, a contingent or fixed transaction price/recovery percentage is allocated to each distinct performance obligation. The Company utilizes the expected value method to estimate the variable consideration related to the transaction price for its service contracts. Key inputs and assumptions in determining variable consideration includes identified pricing and expected recoveries and/or savings. The expected recoveries and/or savings are based on historical experience of information received from our customers. Revenue is primarily recognized at a point in time when our customers realize economic benefits from our services when our services are completed. However, we have a limited number of fixed fee arrangements where revenue is recognized over time as performance obligations are satisfied within one to three years. Generally, coordination of benefit contract payment terms are not standardized within the respective contract; however, payment is typically due on demand and there is a clear and distinct history of customers making consistent payments.

Analytical services consists of payment integrity services and total population management.

Payment integrity services revenue is derived from contracts with federal and state governments, commercial health plans and other at-risk entities that can span several years with the option to renew. Types of service contracts could include: (a) services designed to ensure that healthcare payments are accurate and appropriate; and (b) the identification of over/(under)payments or inaccurate charges based on a review of medical records. Most of these types of service contracts contain multiple promises, all of which are not distinct within the context of the contract. Therefore, the promises represent a single, distinct performance obligation for the types of services we offer. Revenue derived from these performance obligations is largely based on variable consideration where, based on the number of claims or amount of findings the Company identified, a contingent or fixed transaction price/recovery percentage is allocated to each distinct performance obligation. The Company utilizes the expected value method to estimate the variable consideration related to the transaction price for its service contracts. Key inputs and assumptions in determining variable consideration includes identified pricing and expected recoveries and/or savings. The expected recoveries and/or savings are based on historical experience of information received from our customers. Revenue is primarily recognized at a point in time when our customers realize economic benefits from our services when our services are completed. However, we have a limited number of fixed fee arrangements where revenue is recognized over time as performance obligations are satisfied within one to three years. Generally, payment integrity contract payment terms are not standardized within the respective contract; however, payment is typically due on demand and there is a clear and distinct history of customers making consistent payments.

Total population management revenue is derived from contracts with health plans and other risk-bearing entities that can span several years with the option to renew. Types of service contracts could include: (a) programs designed to improve member engagement; and (b) outreach services designed to improve clinical outcomes. Most of these types of service contracts contain multiple promises, all of which are not distinct within the context of the contract. Therefore, the promises represent a single, distinct performance obligation for the types of services we offer. Revenue derived from these services is largely based on consideration associated with prices per order/transfer and PMPM/PMPY fees. The Company believes the output method is a reasonable measure of progress for the satisfaction of our performance obligations, which are satisfied over time, as it provides a faithful depiction of (1) our performance toward complete satisfaction of the performance obligation under the contract and (2) the value transferred to the customer of the services performed under the contract. The Company has elected the right to invoice practical expedient for recognition of revenue related to its performance obligations when the amount we have the right to invoice the customer corresponds directly with the value to the customer. Additionally, certain total population management contracts have distinct performance obligations related to software license and implementation fees which have historically been recognized as revenue ratably over the life of the contract. Lastly, we have a limited number of fixed fee arrangements where revenue is recognized over time as performance obligations are satisfied within one to three years. Upon adoption of ASC 606, revenue for software licenses is recognized at the beginning of the license period when control is transferred as the license is installed and revenue for implementation fees is recognized when control is transferred over time as the implementation is being performed. As the performance obligation is deemed to have been satisfied and control transferred to our customers for software licenses and implementation fees on or before December 31, 2017, the Company recorded a decrease to deferred revenue and an increase to opening retained

earnings of $1.1 million, net of tax, as of January 1, 2018 for the cumulative impact of adopting ASC 606. Generally, total population management contract payment terms are stated within the contract and are due within an explicitly stated time period (e.g., 30, 45, 60 days) from the date of invoice. A portion of the payment received may relate to future performance obligations and will result in an increase to deferred revenue until the obligation has been met.

The Company's revenue disaggregated by market for the year ended December 31, 2018 is as follows (*in thousands*):

Commercial	$ 323,150
State	233,921
Federal	41,219
Total	$ 598,290

A portion of the Company's services are deferred and revenue is recognized at a later time. Deferred revenue was approximately $6.4 million as of December 31, 2017; $1.1 million, net of tax, was recorded as a decrease to deferred revenue as of January 1, 2018 as discussed above; and $5.3 million of this amount was recognized as revenue during the year ended December 31, 2018. Deferred revenue was approximately and $5.6 million as of December 31, 2018. Deferred revenue is included in Accounts payable, accrued expenses and other liabilities in the Consolidated Balance Sheets.

Contract modifications are routine in nature and often done to account for changes in the contract specifications or requirements. In most instances, contract modifications are for services that are not distinct, and, therefore, modifications are accounted for as part of the existing contract. The Company has elected to use the practical expedient to expense the incremental costs of obtaining a contract if the amortization period of the asset that the Company would have otherwise recognized is one year or less.

3. Fair Value of Financial Instruments

Financial instruments (principally cash and cash equivalents, accounts receivable, accounts payable and accrued expenses) are carried at cost, which approximates fair value due to the short-term maturity of these instruments. The Company's long-term credit facility is carried at cost, which due to the variable interest rate associated with the revolving credit facility, cost approximates its fair value. The Company has no Level 1 or Level 2 financial instruments and there were no transfers between Level 1 or Level 2 financial instruments. Included in Other liabilities on the Consolidated Balance Sheet is a contingent consideration liability of $0 and $35 thousand at December 31, 2018 and 2017, respectively, is valued using a Monte Carlo simulation and includes unobservable inputs such as expected levels of revenues and discount rates. The liability was classified as level 3 within the fair value hierarchy. Changes in the unobservable inputs in the fair value measurement of this instrument could result in a significant change in the fair value measurement. There were no sales, settlements, purchases, issuances and/or transfers related to this level 3 instrument in 2018 or 2017. There were no other level 3 instruments.

4. Acquisitions

(a) Eliza Holding Corp.

On April 17, 2017, the Company completed the acquisition of 100% of the outstanding capital stock of Eliza, for a purchase price of $171.6 million funded with available liquidity of approximately 75% cash on hand and 25% from the Company's existing credit line.

The allocation of the purchase price to the fair value of the assets acquired and the liabilities assumed as of April 17, 2017, the effective date of the acquisition, is as follows (*in thousands*):

Cash and cash equivalents	$	435
Accounts receivable		8,902
Prepaid expenses		1,427
Property and equipment		1,146
Intangible assets		76,240
Goodwill		107,754
Other assets		63
Accounts payable		(2,620)
Deferred tax liability		(19,681)
Other liabilities		(2,057)
Total purchase price	**$**	**171,609**

The purchase price allocated to the intangibles acquired was as follows (*in thousands*):

	Useful Life (in years)		
Customer relationships	15	$	56,200
Intellectual property	6		19,600
Trade name	1.5		310
Restrictive covenants	1		130
Fair value of intangibles acquired		**$**	**76,240**

Acquisition costs recorded to selling, general and administrative expenses were as follows (*in thousands*):

Other operating expenses - consulting fees	$	3,515
Other operating expenses - legal fees		832
Other operating expenses - transaction costs		185
Acquisition-related costs	**$**	**4,532**

The financial results of Eliza's operations since April 17, 2017 have been included in the Company's consolidated financial statements. Eliza contributed $51.9 million and $30.4 million in revenue to HMS results of operations in the years ended December 31, 2018 and 2017, respectively.

(b) *Essette*

On September 2, 2016, the Company acquired the outstanding capital stock of Essette for a purchase price of $24.2 million funded by cash on hand. The immaterial results of Essette's operations since September 2, 2016 have been included in the Company's consolidated financial statements.

5. Property and Equipment

Property and equipment consisted of the following (*in thousands*):

	December 31, 2018	December 31, 2017
Equipment	$ 95,350	$ 106,768
Leasehold improvements	7,547	8,357
Building	8,624	8,624
Building improvements	14,825	14,546
Land	2,769	2,769
Furniture and fixtures	9,404	10,352
Capitalized software	131,819	125,655
	270,338	277,071
Less: accumulated depreciation and amortization	(175,903)	(178,490)
Property and equipment, net	$ 94,435	$ 98,581

	December 31, 2018	2017	2016
Depreciation and amortization expenses related to property and equipment	$ 33,254	$ 27,515	$ 24,882

6. Intangible Assets

Intangible assets consisted of the following (*in thousands*):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Amortization Period in Years
December 31, 2018				
Customer relationships	$ 156,790	$ (104,740)	$ 52,050	12.8
Trade names	16,246	(16,215)	31	0.7
Intellectual property	21,700	(6,670)	15,030	4.1
Restrictive covenants	263	(234)	29	0.7
Total	$ 194,999	$ (127,859)	$ 67,140	

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Amortization Period in Years
December 31, 2017				
Customer relationships	$ 159,290	$ (89,106)	$ 70,184	11.3
Trade names	16,246	(13,916)	2,330	1.0
Intellectual property	21,700	(2,874)	18,826	5.2
Restrictive covenants	263	(121)	142	1.3
Total	$ 197,499	$ (106,017)	$ 91,482	

Amortization expense of intangible assets is expected to approximate the following (*in thousands*):

Year ending December 31,	Amortization
2019	$ 9,195
2020	7,664
2021	7,197
2022	7,197
2023	4,822
Thereafter	31,065
Total	$ 67,140

For the years ended December 31, 2018, 2017 and 2016, amortization expense related to intangible assets was $24.3 million, $22.6 million, and $20.2 million, respectively. In addition, during the year ended December 31, 2018, some of the intangible assets became fully amortized.

7. Accounts Payable, Accrued Expenses and Other Liabilities

Accounts payable, accrued expenses and other liabilities consisted of the following (*in thousands*):

	December 31, 2018	December 31, 2017
Accounts payable, trade	$ 12,394	$ 19,330
Accrued compensation and other	42,833	24,072
Accrued operating expenses	19,675	18,498
Total accounts payable, accrued expenses and other liabilities	$ 74,902	$ 61,900

8. Income Taxes

Income tax expense is as follows (*in thousands*):

	December 31,		
	2018	2017	2016
Current tax expense:			
Federal	$ 2,965	$ 17,008	$ 16,274
State	(1,433)	3,201	2,929
Total current tax expense:	1,532	20,209	19,203
Deferred tax expense (benefit):			
Federal	(2,650)	(19,425)	(7,115)
State	(854)	(983)	(253)
Total deferred tax benefit:	(3,504)	(20,408)	(7,368)
Total income tax expense (benefit)	$ (1,972)	$ (199)	$ 11,835

A reconciliation of the income tax expense calculated using the applicable federal statutory rate to the actual income tax expense is as follows (*in thousands*):

	December 31,					
	2018	%	2017	%	2016	%
Computed at federal statutory rate	$ 11,134	21.0	$ 13,949	35.0	$ 17,315	35.0
State and local tax expense, net of federal benefit	2,367	4.5	2,226	5.6	2,448	5.0
Net permanent deduction and credit tax benefits from current year	(1,143)	(2.2)	(1,513)	(3.8)	(1,509)	(3.1)
Net permanent deduction and credit tax benefits from prior years	-	-	-	-	(6,213)	(12.6)
Net uncertain tax positions excluding current permanent deduction and credit benefits	(3,756)	(7.0)	(373)	(0.9)	-	-
Subsidiary basis write off	(3,423)	(6.5)	-	-	-	-
Equity compensation net tax windfall	(2,890)	(5.5)	-	-	-	-
State tax apportionment changes	(3,737)	(7.0)	-	-	-	-
Disallowed executive compensation	682	1.3	-	-	-	-
Tax Reform - revaluation of deferrals	-	-	(15,130)	(38.0)	-	-
Acquisition adjustments	(1,226)	(2.3)	(1,003)	(2.5)	-	-
Acquisition costs	-	-	697	1.7	203	0.4
Other, net	20	-	948	2.4	(409)	(0.8)
Total income tax expense	$ (1,972)	(3.7)	$ (199)	(0.5)	$ 11,835	23.9

The Company's effective tax rate decreased to (3.7%) for the year ended December 31, 2018 from (0.5%) for the year ended December 31, 2017, primarily from favorable tax benefits relating to current year credits, equity compensation, subsidiary basis write-off, prior year state apportionment changes, uncertain tax position releases and acquisition adjustments. The Company has no adjustments, to any previously recorded provisional amounts, relating to the Tax Cuts and Jobs Act which was enacted on December 22, 2017. During the year ended December 31, 2018 and in conjunction with the Settlement Agreement in Note 15 to the Consolidated Financial Statements, the Company determined that the common stock of its wholly owned subsidiary, Allied Management Group Special Investigation Unit, Inc. was worthless, resulting in the write off of basis for federal income tax purposes.

As a result of an analysis performed during 2016, the Company determined certain activities it performs qualify for (i) R&D Credits provided in IRC Section 41 and (ii) the Section 199 Deduction provided in IRC Section 199. As a result, the Company recognized net tax benefits during the year ended December 31, 2016 of $6.2 million for federal and state R&D Credits and the Section 199 Deduction relating to tax years 2012 through 2015.

Deferred income taxes are recognized for the future tax consequences of temporary differences between the financial statement and tax bases of assets and liabilities. The tax effect of temporary differences that give rise to a significant portion of the deferred tax assets and deferred tax liabilities are as follows *(in thousands*):

	December 31,	
	2018	**2017**
Deferred tax assets:		
Stock-based compensation	$ 9,545	$ 9,980
Goodwill and intangible assets	5,874	6,524
Allowance for doubtful accounts	3,537	3,822
Deferred rent	696	909
Tenant improvements	569	669
Estimated liability for appeals	5,632	7,775
Net operating loss carry-forwards	1,527	3,358
Tax credit carry-forwards	4,076	3,667
Property and equipment	49	256
Accrued expenses and other	7,839	3,615
Total deferred tax assets	39,344	40,575
Deferred tax liabilities:		
Goodwill and intangible assets	43,400	48,186
Section 481(a) adjustment	5,073	7,413
Prepaid expenses	668	624
Capitalized software cost	8,688	6,341
Total deferred tax liabilities	57,829	62,564
Total net deferred tax liabilities	$ 18,485	$ 21,989

Included in Other liabilities on the Consolidated Balance Sheets, are the total amount of unrecognized tax benefits of approximately $4.8 million and $8.2 million as of December 31, 2018 and 2017, respectively, net of the federal benefit for state issues that, if recognized, would favorably affect the Company's future effective tax rate. Also included in Other Liabilities on the Consolidated Balance Sheets, are accrued liabilities for interest expense and penalties related to unrecognized tax benefits of $0.7 million and $0.6 million as of December 31, 2018 and 2017, respectively. HMS includes interest expense and penalties in the provision for income taxes in the Consolidated Statements of Income. The amount of interest expense, net of federal and state income tax benefits, and penalties in the Consolidated Statements of Income for the years ended December 31, 2018, 2017, and 2016 was $0.1 million, $0.02 million and $0.2 million, respectively. The Company believes it is reasonably possible the amount of unrecognized tax benefits may decrease by $1.7 million during 2019, due to the expiration of the statute of limitations in various jurisdictions.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits are as follows (*in thousands*):

	2018	**2017**
Unrecognized tax benefits at January 1	$ 8,234	$ 7,433
Additions for tax positions taken during prior periods	399	599
Additions for tax positions taken during current period including amended prior years	360	1,174
Reductions relating to settlements with taxing authorities	(2,227)	-
Reductions related to the expiration of statutes of limitations	(1,927)	(972)
Unrecognized tax benefits at December 31	$ 4,839	$ 8,234

The Company increased the provision for unrecognized tax benefits by $0.4 million during the year ended December 31, 2018, related to tax benefits recognized for current period R&D Credits. At December 31, 2018, HMS had federal and state pre-tax net operating loss and tax credit carryforwards of approximately $24.3 million and $4.1 million, respectively, which will be available to offset future taxable income. If not used, these net operating loss and tax credit carryforwards will begin to expire in 2020 and 2019, respectively. The Company files income tax returns with the U.S. Federal government and various state, territory, and local jurisdictions. HMS is no longer subject to U.S. Federal income tax examinations for years before 2013. The Company settled an audit by the Internal Revenue Service for years 2013 and 2014 which resulted in immaterial assessments and recognition of prior unrecognized tax benefits. HMS operates in a number of state, territory and local jurisdictions. Accordingly, HMS is subject to state, territory and local income tax examinations based upon the various statutes of limitations in each jurisdiction. Previously recognized Texas refund claims were examined by the state and resulted in a favorable apportionment method change for all open tax years.

9. Estimated Liability for Appeals

Under the Company's contracts with certain commercial health plan customers and its Medicare RAC contracts with CMS (included within the Company's PI services revenue), providers have the right to appeal HMS claim findings and to pursue additional appeals if the initial appeal is found in favor of HMS's customer. The appeal process established under the Medicare RAC contracts with CMS includes five levels of appeals, and resolution of appeals can take substantial time to resolve. HMS records a) an actual return obligation liability for findings which have been previously adjudicated in favor of providers and b) an estimated return obligation liability based on the amount of revenue that is subject to appeals and which are probable of being adjudicated in favor of providers following their successful appeal. The Company's estimate is based on the Company's historical experience. To the extent the amount to be returned to providers following a successful appeal exceeds or is less than the amount recorded, revenue in the applicable period would be reduced or increased by such amount.

A roll-forward of the activity in the estimated liability for appeals is as follows (*in thousands*):

	Original RAC contract	RAC 4 contract	Commercial contracts	Total
Balance at December 31, 2016	$ 28,427	$ -	$ 2,328	$ 30,755
Provision	2,054	-	2,729	4,783
Appeals found in providers favor	(2,665)	-	(2,086)	(4,751)
Balance at December 31, 2017	$ 27,816	$ -	$ 2,971	$ 30,787
Provision	108	20	2,038	2,166
Appeals found in providers favor	(108)	-	(2,686)	(2,794)
Release of estimated liability	(8,436)	-	-	(8,436)
Balance at December 31, 2018	$ 19,380	$ 20	$ 2,323	$ 21,723

The Company's original Medicare RAC contract with CMS expired on January 31, 2018. As a result of the original contract expiration, the Company's contractual obligation with respect to any appeals resolved in favor of providers subsequent to the expiration date have ceased and therefore the Company released its estimated return obligation liability and increased revenue by $8.4 million during the first quarter of 2018.

The Company continues to assess the remaining CMS liability for the original Medicare RAC contract to determine management's best estimate of liability for any findings which have been previously adjudicated prior to the expiration of the contract. Any future changes or modifications to the Medicare RAC contracts or to the Company's commercial customer contracts may require the Company to apply different assumptions that could materially affect both the Company's revenue and estimated liability for appeals in future periods.

10. Credit Agreement

In May 2013, we entered into the Credit Agreement with certain lenders and Citibank, N.A. as administrative agent. The Credit Agreement originally provided for an initial $500 million five-year revolving credit facility maturing on May 3, 2018.

On December 19, 2017, the Company entered into an amendment to the Credit Agreement, which, among other things, extended the maturity of its then existing revolving credit facility by five years to December 2022. The availability of funds under the amended revolving credit facility includes sublimits for (a) up to $50 million for the issuance of letters of credit and (b) up to $25 million for swingline loans. In addition, the Company may increase the commitments under its revolving credit facility and/or add one or more incremental term loan facilities, provided that such incremental facilities do not exceed in the aggregate the sum of (i) the greater of $120 million and 100% of Consolidated EBITDA (as defined in the Credit Agreement) and (ii) an additional amount so long as our first lien leverage ratio (as defined in the Credit Agreement) on a pro forma basis is not greater than 3.00:1.00, subject to obtaining commitments from lenders therefor and meeting certain other conditions.

During the year ended December 31, 2018, no principal payments were made against the Company's then existing revolving credit facility. As of December 31, 2018, the outstanding principal balance under the amended revolving credit facility was $240.0 million.

Borrowings under the Credit Agreement will bear interest at a rate equal to, at the Company's election (except with respect to swingline borrowings, which will accrue interest based only at the base rate), either:

- a base rate determined by reference to the greatest of (a) the prime or base commercial lending rate of the administrative agent as in effect on the relevant date, (b) the federal funds effective rate plus 0.50% and (c) the one-month LIBO Rate plus 1.00%, plus an interest margin ranging from 0.50% to 1.00% based on the Company's consolidated leverage ratio for the applicable period; or

- an adjusted LIBO Rate, equal to the LIBO Rate for the applicable interest period multiplied by the statutory reserve rate (equal to (x) one divided by (y) one minus the aggregate of the maximum reserve percentage (including any marginal, special, emergency or supplemental reserves) established by the Board of Governors of the Federal Reserve System of the United States), plus an interest margin ranging from 1.50% to 2.00% based on the Company's consolidated leverage ratio for the applicable period.

In addition to paying interest on the outstanding principal, the Company is required to pay unused commitment fees on the revolving credit facility during the term of the Credit Agreement ranging from 0.375% to 0.250% per annum based on the Company's consolidated leverage ratio and letter of credit fees equal to 0.125% per annum on the aggregate face amount of each letter of credit, as well as customary agency fees.

The Company's obligations under the Credit Agreement are secured, subject to certain customary carve-outs and exceptions, by a first priority lien and security interest in substantially all tangible and intangible assets of the Company and certain subsidiaries of the Company. The Credit Agreement contains certain restrictive covenants, which affect, among other things, the ability of the Company and its subsidiaries to incur indebtedness, create liens, make investments, sell or otherwise dispose of assets, engage in mergers or consolidations with other entities, and pay dividends or repurchase stock. The Company is also required to comply, on a quarterly basis, with two financial covenants: (i) a minimum interest coverage ratio of 3:00:1:00, and (ii) a maximum consolidated leverage ratio of 4.75:1.00 through December 2019 and 4.25:1.00 from and after January 2020. The consolidated leverage ratio is subject to a step-up to 5.25:1.00 for four full consecutive fiscal quarters following a permitted acquisition or similar investment. As of December 31, 2018, the Company was in compliance with all terms of the Credit Agreement.

Interest expense and the commitment fees on the unused portion of the Company's revolving credit facility are as follows *(in thousands*):

	Years ended December 31,		
	2018	**2017**	**2016**
Interest expense	$ 9,294	$ 7,170	$ 4,837
Commitment fees	1,189	1,359	1,518

The Company deferred $2.3 million of financing fees associated with the amendment. At December 31, 2018 and 2017, the unamortized balance of deferred financing costs was $2.2 million and $2.8 million, respectively. The Company amortized deferred financing costs of $0.6 million, $2.3 million and $2.1 million in the years ended December 31, 2018, 2017 and 2016.

As part of a contractual agreement with a customer, the Company has an outstanding irrevocable letter of credit for $6.5 million, which is issued against its revolving credit facility and expires June 30, 2019.

11. Equity

(a) Share Repurchase

Following are the Company's quarterly repurchases of shares of common stock for fiscal year 2018, all of which were made as part of publicly announced plans or programs:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
January 1, 2018 to March 31, 2018	383,801	$ 15.50	383,801	$ 29,933,055
April 1, 2018 to June 30, 2018	-	-	-	-
July 1, 2018 to September 30, 2018	-	-	-	-
October 1, 2018 to December 31, 2018	-	-	-	-
Total	**383,801**	**$ 15.50**	**383,801**	**$ 29,933,055**

(b) Preferred Stock

The Company's certificate of incorporation, as amended, authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by the Company's Board of Directors. As of December 31, 2018, no preferred stock had been issued.

12. Employee Benefit Plan

The Company sponsors the 401(k) Plan for eligible employees. Eligible employees must complete 90 days of service in order to enroll in the 401(k) Plan. Participants may make voluntary contributions to the 401(k) Plan of up to 60% of their annual base pre-tax compensation not to exceed the federally determined maximum allowable contribution. In addition, the 401(k) Plan permits the Company to make discretionary contributions. During 2018, HMS matched 100% of the first 4% of pay contributed by each eligible employee and 50% of the next 1% of pay contributed. During 2017 and 2016, HMS matched 100% of the first 3% of pay contributed by each eligible employee and 50% on the next 2% of pay contributed. These matching contributions vest immediately and are not in the form of the Company's common stock.

For the years ended December 31, 2018, 2017 and 2016, HMS contributed $7.3 million, $5.9 million and $4.8 million, respectively, to the 401(k) Plan in the form of matching contributions.

13. Stock-Based Compensation

Stock-Based Compensation Expense

Total stock-based compensation expense in the Company's Consolidated Statements of Income related to the Company's long-term incentive award plans was as follows (*in thousands*):

	Years ended December 31,		
	2018	2017	2016
Cost of services-compensation	$ 7,421	$ 7,354	$ 3,805
Selling, general and administrative	14,086	16,789	9,472
Total	$ 21,507	$ 24,143	$ 13,277

The total tax benefits recognized on stock-based compensation for the years ended December 31, 2018, 2017 and 2016 was $9.1 million, $4.0 million and $4.1 million, respectively.

Stock Options

Stock-based compensation expense related to stock options was approximately $9.6 million, $10.3 million and $6.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Presented below is a summary of stock option activity for the year ended December 31, 2018 (*in thousands except for weighted average exercise price and weighted average remaining contractual terms*):

	Number of Options	Weighted Average Exercise Price	Weighted Average-Remaining Contractual Terms	Aggregate-Intrinsic Value
Outstanding balance at December 31, 2017	5,554	$ 17.35		
Granted	1,010	19.58		
Exercised	(2,017)	19.14		
Forfeitures	(114)	17.74		
Expired	(31)	22.34		
Outstanding balance at December 31, 2018	4,402	17.07	5.80	$ 48,339
Expected to vest at December 31, 2018	1,481	$ 18.60	8.22	$ 14,119
Exercisable at December 31, 2018	2,370	$ 15.87	3.83	$ 29,068

As of December 31, 2018 and 2017, the Company had 1,999,069 and 2,372,682, respectively, in unvested options with a weighted-average-grant-date fair value of $7.27 and $6.39, respectively. The weighted-average-grant-date fair value per share of the stock options granted during the years ended December 31, 2018, 2017 and 2016 was $7.52, $7.66 and $5.55, respectively. The weighted-average-grant-date fair value per share of stock options vested during the year ended December 31, 2018 was $6.18. The weighted-average-grant-date fair value per share of the stock options forfeited during the years ended December 31, 2018, 2017 and 2016 was $6.86, $5.24 and $6.26, respectively.

HMS estimated the fair value of each stock option grant on the date of grant using a Black-Scholes option pricing model. Weighted–average assumptions are set forth in the following table:

	Year ended December 31,		
	2018	2017	2016
Expected dividend yield	-	-	-
Risk-free interest rate	2.7%	1.8%	1.2%
Expected volatility	42.4%	44.2%	44.0%
Expected life (years)	6.0	5.0	4.9

HMS estimated the fair value of 2017 and 2016 market condition option grants on the date of grant using a Monte-Carlo simulation model. There were no market condition awards granted in 2018. Assumptions are set forth in the following table:

	Year ended December 31,		
	2018	2017	2016
Expected dividend yield	-	-	-
Risk-free interest rate	-	2.2%	1.6%
Expected volatility	-	52.5%	40.5%
Expected life (years)	-	6.5	4.9

During the years ended December 31, 2018, 2017 and 2016, the Company issued 2,017,442, 172,326 and 510,512 shares, respectively, of the Company's common stock upon the exercise of outstanding stock options and received proceeds of $38.3 million, $2.7 million and $2.9 million, respectively. The total intrinsic value of stock options exercised during the years ended December 31, 2018, 2017 and 2016 was $27.6 million, $0.5 million and $6.3 million, respectively.

As of December 31, 2018, there was approximately $5.5 million of total unrecognized compensation cost related to stock options outstanding, which is expected to be recognized over a weighted average period of 0.9 years.

Restricted Stock Units

Stock-based compensation expense related to restricted stock units was $11.9 million, $13.8 million and $6.4 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Presented below is a summary of restricted stock units activity for the year ended December 31, 2018 (*in thousands, except for weighted average grant date fair value per unit*):

	Number of Units	Weighted Average Grant Date Fair Value per Unit
Outstanding balance at December 31, 2017	1,346	$ 17.65
Granted	766	16.80
Vesting of restricted stock units, net of units withheld for taxes	(371)	17.06
Units withheld for taxes	(163)	17.06
Forfeitures	(90)	17.31
Outstanding balance at December 31, 2018	1,488	$ 17.60

As of December 31, 2018, 1,259,003 restricted stock units remained unvested and there was approximately $9.2 million of unrecognized compensation cost related to restricted stock units, which is expected to be recognized over a weighted average vesting period of 0.87 years. During the years ended December 31, 2018, 2017 and 2016, the Company's vested restricted stock units had a fair value $9.9 million, $9.5 million, and $6.8 million, respectively. The weighted average grant date fair value per share of the restricted stock units vested during the years ended December 31, 2018, 2017 and 2016 was $17.06, $15.39 and $18.64, respectively. The weighted average grant date fair value per share of the restricted stock units forfeited during the years ended December 31, 2018, 2017 and 2016 was $17.31, $15.37 and $16.95, respectively.

14. Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share *(in thousands, except per share amounts)*:

	Years ended December 31,		
	2018	2017	2016
Net income	$ 54,989	$ 40,054	$ 37,636
Weighted average common shares outstanding-basic	83,625	83,821	84,221
Plus: net effect of dilutive stock options and restricted stock units	2,519	1,808	2,766
Weighted average common shares outstanding-diluted	86,144	85,629	86,987
Net income per common share-basic	$ 0.66	$ 0.48	$ 0.45
Net income per common share-diluted	$ 0.64	$ 0.47	$ 0.43

For the years ended December 31, 2018, 2017 and 2016: (i) 804,959, 2,646,100 and 2,070,771 stock options, respectively, and (ii) restricted stock units representing 0, 31,155 and 46,651 shares of common stock, respectively, were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive.

15. Commitments and Contingencies

(a) Lease Commitments

The Company primarily leases office space but also leases information technology equipment and software licenses under operating leases that expire on various dates through 2026. Additionally, the Company has nominal capital leases. Total lease expense, net of office space sublease income for the years ended December 31, 2018, 2017 and 2016 was $3.6 million, $5.1 million and $5.0 million, respectively.

Minimum annual lease payments to be made under operating leases, net of $8.3 million office space sublease payments to be received, for each of the next five years ending December 31 and thereafter are as follows (*in thousands*):

	Operating Lease Payments
2019	$ 5,778
2020	5,420
2021	3,742
2022	2,531
2023	2,236
Thereafter	2,947
Total	$ 22,654

(b) Litigation

In July 2012, Dennis Demetre and Lori Lewis (the "Plaintiffs"), filed an action in the Supreme Court of the State of New York against HMS Holdings Corp., claiming an undetermined amount of damages alleging that various actions by HMS unlawfully deprived the Plaintiffs of the acquisition earn-out portion of the purchase price for Allied Management Group Special Investigation Unit, Inc. ("AMG") under the applicable Stock Purchase Agreement (the "SPA") and that HMS had breached certain contractual provisions under the SPA. The Plaintiffs filed a second amended complaint with two causes of action for breach of contract and one cause of action for breach of implied covenant of good faith and fair dealing. HMS asserted a counterclaim against Plaintiffs for breach of contract based on contractual indemnification costs, including attorneys' fees arising out of the Company's defense of AMG in Kern Health Systems v. AMG, Dennis Demetre and Lori Lewis (the "California Action"), which are recoverable under the SPA. In June 2016, Kern Health Systems and AMG entered into a settlement agreement that resolved all claims in the California Action. In July 2017, the Court issued a decision on the Company's motion for partial summary judgment and granted the motion in part, dismissing one of Plaintiffs' breach of contract causes of action against HMS. On November 3, 2017, following a jury trial, a verdict was returned in favor of the Plaintiffs on a breach of contract claim, and the jury awarded $60 million in damages to the Plaintiffs. On March 14, 2018, the Court held a hearing on the Company's post-trial motion for an order granting it judgment notwithstanding the verdict or, alternatively, setting aside the jury's award of damages. On June 27, 2018, prior to the Court issuing a decision on the motion, the Company entered into a Settlement Agreement (the "Settlement Agreement") with the Plaintiffs, John Alfred Lewis and Christopher Brandon Lewis. Pursuant to the terms of the Settlement Agreement, the Company paid $20 million to resolve all matters in controversy pertaining to the lawsuit. On July 5, 2018, the Court entered an order to

discontinue the lawsuit pursuant to the Stipulation of Discontinuance with Prejudice filed by the parties.

In February 2018, the Company received a Civil Investigative Demand ("CID") from the Texas Attorney General, purporting to investigate possible unspecified violations of the Texas Medicaid Fraud Prevention Act. The Company provided certain documents and information in March 2018 in response to the CID. HMS has not received any further requests for information in connection with this CID.

In September 2018, a former employee filed an action in the New York County Supreme Court entitled Christopher Frey v. Health Management Systems, Inc. alleging retaliation under New York law. The complaint seeks recovery of an unspecified amount of monetary damages, including back pay and other compensatory and equitable relief. The Company has moved to dismiss the complaint and the motion is currently under consideration by the Court. The Company continues to believe that this claim is without merit and intends to vigorously defend this matter.

From time to time, HMS may be subject to investigations, legal proceedings and other disputes arising in the ordinary course of the Company's business, including but not limited to regulatory audits, billing and contractual disputes, employment-related matters and post-closing disputes related to acquisitions. Due to the Company's contractual relationships, including those with federal and state government entities, HMS's operations, billing and business practices are subject to scrutiny and audit by those entities and other multiple agencies and levels of government, as well as to frequent transitions and changes in the personnel responsible for oversight of the Company's contractual performance. HMS may have contractual disputes with its customers arising from differing interpretations of contractual provisions that define the Company's rights, obligations, scope of work or terms of payment, and with associated claims of liability for inaccurate or improper billing for reimbursement of contract fees, or for sanctions or damages for alleged performance deficiencies. Resolution of such disputes may involve litigation or may require that HMS accept some amount of loss or liability in order to avoid customer abrasion, negative marketplace perceptions and other disadvantageous results that could affect the Company's business, financial condition, results of operations and cash flows.

HMS records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, HMS does not establish an accrued liability.

16. Customer Concentration

(a) Geographic Information

The Company operates within the United States.

(b) Major Customers

For the years ended December 31, 2018, 2017 and 2016 no one individual Company customer accounted for more than 10% of the Company's total revenue.

(c) Concentration of Revenue

The composition of the Company's ten largest customer's changes periodically. For the years ended December 31, 2018, 2017 and 2016, the Company's ten largest customers represented 41.4%, 39.5% and 40.6% of HMS' total revenue, respectively. Excluding those contracts that contain automatic renewal provisions or evergreen terms, the Company's agreements with the ten current largest customers generally expire between 2019 and 2026. In many instances, HMS provides services pursuant to agreements that may be renewed or subject to a competitive reprocurement process. Several of the Company's contracts, including those with some of its largest customers, may be terminated for convenience.

17. Subsequent Events

Annual Grants to Employees

On February 14, 2019, the Compensation Committee of the Board of Directors approved approximately $21.3 million in stock option and restricted stock unit awards to employees. The awards generally will vest over three years and will be issued three business days subsequent to the filing of this 2018 Form 10-K.

In connection with the preparation of our consolidated financial statements, an evaluation of subsequent events was performed through the date of filing and there were no other events that have occurred that would require adjustments to the financial statements or disclosure.

18. Quarterly Financial Data (Unaudited)

The table below summarizes the Company's unaudited quarterly operating results for the last two fiscal years (*in thousands, except per share amounts*):

2018	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year Ended
Revenue	$ 141,425	$ 146,791	$ 154,246	$ 155,828	$ 598,290
Operating income	$ 11,922	$ (763)	$ 24,231	$ 27,848	$ 63,238
Net income	$ 6,391	$ (3,367)	$ 18,574	$ 33,391	$ 54,989
Net income per common share - basic	$ 0.08	$ (0.04)	$ 0.22	$ 0.40	$ 0.66
Net income per common share - diluted	$ 0.07	$ (0.04)	$ 0.22	$ 0.38	$ 0.64

2017	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year Ended
Revenue	$ 113,733	$ 133,313	$ 125,673	$ 148,493	$ 521,212
Operating income	$ 3,943	$ 14,361	$ 12,861	$ 19,266	$ 50,431
Net income	$ 1,442	$ 6,517	$ 6,372	$ 25,723	$ 40,054
Net income per common share - basic	$ 0.02	$ 0.08	$ 0.08	$ 0.30	$ 0.48
Net income per common share - diluted	$ 0.02	$ 0.08	$ 0.07	$ 0.30	$ 0.47

(1) Second quarter 2018 results include the Company's entry into the Settlement Agreement for the payment of $20.0 million, as described in Note 15.

(2) Fourth quarter 2017 results include a non-cash tax benefit of $15.1 million due to the revaluation of the Company's deferred tax balances pursuant to the tax rate reduction included in the 2017 Tax Act.

SCHEDULE II – VALUATION AND QUALIFYING ACCOUNTS
For the years ended December 31, 2018, 2017 and 2016

Accounts receivable allowance and Estimated liability for appeals as of December 31, 2018, 2017 and 2016 are as follows:

Accounts receivable allowance *(in thousands)*:

	Balance at Beginning of Year	Provision	Recoveries	Charge-offs	Balance at End of Year
Year ended December 31, 2016	$ 11,464	$ 21,583	$ 108	$ (22,383)	$ 10,772
Year ended December 31, 2017	10,772	20,233	-	(16,206)	14,799
Year ended December 31, 2018	14,799	20,453	-	(21,569)	13,683

Estimated liability for appeals *(in thousands)*:

	Balance at Beginning of Year	Provision	Appeals found in providers favor	Release of estimated liability	Balance at End of Year
Year ended December 31, 2016	$ 12,801	$ 721	$ (2,396)	$ -	$ 11,126
Year ended December 31, 2017	11,126	83	(2,665)	-	8,544
Year ended December 31, 2018	8,544	-	(108)	(8,436)	-

The above chart represents the CMS estimated reserve liability only.

Exhibit 10.7

AMENDED AND RESTATED EXECUTIVE EMPLOYMENT AGREEMENT

THIS AMENDED AND RESTATED EXECUTIVE EMPLOYMENT AGREEMENT (the "***Agreement***") is effective April 2, 2018 (the "***Effective Date***"), and is by and between HMS Holdings Corp., a Delaware corporation ("***HMS***"), and Emmet O'Gara, an individual ("***you***") (and, together with HMS, the "***Parties***") to provide services, as directed, to the entities comprising the "***Company***" (HMS and its respective subsidiaries and affiliates). This Agreement amends, restates and supersedes the Employment Agreement between you and the Company dated January 2, 2018 in its entirety (the "***Prior Agreement***").

WHEREAS, the Company wishes to continue to employ you, and you wish to continue to be employed by the Company.

NOW THEREFORE, in consideration of your acceptance of employment pursuant to the terms set forth in this Agreement, the Parties agree to be bound by the terms contained in this Agreement as follows:

1. ***Engagement.*** As of the Effective Date, HMS will continue to employ you as Executive Vice President, Total Population Management. You acknowledge that the Company organizes itself across multiple entities, and that assigning you to work directly for HMS or for one of its subsidiaries or affiliates will not, in and of itself, breach this Agreement. You will report directly to the Chief Executive Officer, or his or her designee ("***Supervisor***"). You will have the responsibilities, duties, and authorities specified from time to time by your Supervisor, which will generally be commensurate with executives, at a similar level, of entities of similar size and character to the Company. You also agree, if so requested, to serve as an officer and director of subsidiaries of HMS.

2. ***Commitment.*** During the Employment Period (as defined in Section 3 below), you must devote your full working time and attention to the Company. During the Employment Period, you must not engage in any employment, occupation, consulting or other similar activity without your Supervisor's prior written consent; *provided, however,* that you may (i) serve in any capacity with any professional, community, industry, civic (including governmental boards), educational, charitable, or other non-profit organization, (ii) serve on any for-profit entity board, with your Supervisor's prior written consent, and (iii) subject to the Company's conflict of interest policies, make investments in other businesses and manage your and your family's personal investments and legal affairs; *provided* that any such activities described in clauses (i)-(iii) above do not materially interfere with the performance of your duties for the Company and do not otherwise violate this Agreement or any other written agreement between the Company and you. You will perform your services under this Agreement primarily at the Company's offices in Danvers, Massachusetts, or at such place or places as you and the Company may agree. You understand and agree that your employment will require travel from time to time in a manner consistent with Company policy.

3. ***Employment Period.*** The Company hereby agrees to continue to employ you and you hereby accept continued employment with the Company upon the revised terms set forth in this Agreement, for the period commencing on the Effective Date and ending when and as provided in Section 6 (the "***Employment Period***").

4. ***Compensation.***

(a) ***Base Salary.*** You will receive an annual base salary at a monthly rate of $33,333.33, annualizing to $400,000.00 (as may be adjusted under this Agreement, the "***Base Salary***"). The Company will pay your Base Salary periodically in arrears not less frequently than monthly in accordance with the Company's regular payroll practices as in effect from time to time (which currently provide for bi-weekly payments). The Board of Directors of HMS (the "***Board***") or its Compensation Committee (the "***Compensation Committee***") will review your Base Salary periodically and may adjust your Base Salary at that time.

(b) ***Bonus.*** You will be eligible to receive bonus compensation (the "***Bonus***") from the Company in respect of each fiscal year (or portion thereof) during the Employment Period, in each case as the Compensation Committee may determine in its sole discretion on the basis of such performance-based or other criteria as it determines appropriate. The target bonus for your position for 2018 is 65% of Base Salary, which will not be prorated. You must be an employee of the Company at the time bonuses are paid to receive a Bonus. The Compensation Committee will review your target bonus periodically and may adjust your target bonus at that time. The Bonus, if any, will be paid when other executives receive their bonuses under comparable arrangements.

(c) ***Sign-On Bonus.*** Within 30 days after April 1, 2018, you will also receive a special bonus of $50,000.00 (the "Sign-On Bonus"). You agree that you will repay the Sign-On Bonus within 10 days after your employment ends if your employment ends before the first anniversary of the date you receive the Sign-On Bonus because of a termination for Cause, as defined below, or your resignation without Good Reason, as defined below.

5. ***Employee Benefits.***

(a) ***Employee Welfare, Equity Compensation, and Retirement Plans.*** You will, to the extent eligible, be entitled to participate at a level commensurate with your position in all employee equity compensation plans and welfare benefit and retirement plans and programs the Company provides to its executives in accordance with the terms thereof as in effect from time to time. The Company may change or terminate the benefits at any time.

(b) ***Business Expenses.*** Upon submission of appropriate documentation in accordance with Company policies, the Company will promptly pay, or reimburse you for, all reasonable business expenses that you incur in performing your duties under this Agreement, including travel, entertainment, professional dues and subscriptions, as long as such expenses are reimbursable under the Company's policies. Any payments or expenses provided in this Section 5(b) will be paid in accordance with Section 7(c).

(c) ***Paid Time Off.*** You will accrue paid time off (**"*PTO*"**) at the rate of 18 hours per month (annualized to 27 days per year), or such greater number as the Company determines from time to time for its senior executive officers, provided that any accrual caps, carryover from year to year, and payment for accrued and unused PTO upon termination of employment will be subject to the Company's generally applicable policies.

6. Termination of Employment.

(a) ***General.*** Subject in each case to the provisions of this Section 6 and the other provisions of this Agreement relating to the Company's respective rights and obligations upon termination of your employment, nothing in this Agreement interferes with or limits in any way the Company's or your right to terminate your employment at any time, for any reason or no reason, with or without notice, and nothing in this Agreement confers on you any right or obligation to continue in the Company's employ. If your employment ceases for any or no reason, you (or your estate, as applicable) will be entitled to receive (in addition to any compensation and benefits you may be entitled to receive under Section 6(b), (d) or (e) below): (i) any earned but unpaid Base Salary and, to the extent consistent with general Company policy, accrued but unused PTO through and including the date of termination of your employment, to be paid in accordance with the Company's regular payroll practices and with applicable law, but no later than the next regularly scheduled pay period, (ii) unreimbursed business expenses in accordance with the Company's policies for which expenses you have provided appropriate documentation, to be paid in accordance with Section 7(c), and (iii) any amounts or benefits to which you are then entitled under the terms of the benefit plans then sponsored by the Company in accordance with their terms (and not accelerated to the extent acceleration does not satisfy Section 409A of the Internal Revenue Code of 1986, as amended ("***Section 409A***" of the "***Code***")). Notwithstanding any other provision in this Agreement to the contrary, you will be entitled to severance, if any, solely through the terms of this Section 6, unless another Board (or Compensation Committee) approved written agreement between you and the Company expressly provides otherwise.

(b) ***Termination Without Cause or Resignation With Good Reason.*** If, during the Employment Period, the Company terminates your employment without Cause (defined below) or you resign with Good Reason (defined below), in addition to the amounts described in Section 6(a), the Company will pay to you the following, subject to compliance with Section 6(b)(iii):

(i) *Cash Severance*. The Company will pay to you in cash an amount equal to 12 times your monthly Base Salary, paid ratably in equal installments over a 12 month period beginning in the first payroll period following the Release Effective Date (as defined below) (or such later date required by Section 7) in accordance with the Company's standard payroll policies and procedures and in a manner consistent with Section 7;

(ii) *Benefits*. The Company will pay you a lump sum amount equal to 12 times the difference between the monthly COBRA coverage premium for the same type of medical and dental coverage (single, family, or other) in which you are enrolled as of the date your employment ends and your then-monthly employee contribution. This payment will be taxable and subject to withholding. You may use the amount received for any purpose.

(iii) *Release*. To receive any severance benefits provided for under this Agreement or otherwise, you must deliver to the Company a separation agreement and general release of claims in the form the Company provides (releasing all releasable claims other than to payments under Section 6 or outstanding equity and including obligations to cooperate with the Company and reaffirming your obligations under the Restrictive Covenants Agreement (as defined below)), which agreement and release must become irrevocable within 60 days (or such earlier date as the release provides) following the date of your termination of employment. Benefits under Section 6(b)(i) and (ii) will be paid or commence in the first regular payroll beginning after the release becomes effective, subject to any delays required by Section 7; *provided, however*, that if the last day of the 60-day period for an effective release falls in the calendar year following the year of your date of termination, the severance payments will be paid or begin no earlier than January 1 of such subsequent calendar year. The date on which your release of claims becomes effective is the "***Release Effective Date***." You must continue to comply with the Restrictive Covenants Agreement to continue to receive severance benefits.

(c) ***Termination for Cause, Resignation without Good Reason.***

(i) *General*. If, during the Employment Period, the Company terminates your employment for Cause or you resign from your employment (other than for Good Reason), you will be entitled only to the payments described in Section 6(a), unless applicable law otherwise requires payment. You may resign from your employment (other than for Good Reason), at any time, by giving at least 30 days' prior written notice to the Company (the "***Notice Period***"). The Company may choose to respond to such notice of resignation by limiting your access and reducing your duties during the Notice Period, in which event you would remain an employee of the Company through the remainder of the Notice Period and continue to receive your Base Salary, less applicable deductions, and continue vesting under any outstanding equity grants through the end of the Notice Period. You will have no further right to receive any other compensation or benefits after such termination or resignation of employment, except as determined in accordance with the terms of the employee benefit plans or programs of the Company or as required by law.

(ii) *Cause*. For purposes of this Agreement, "***Cause***" means any of the following: your (i) fraud with respect to the Company; (ii) material misrepresentation to any regulatory agency, governmental authority, outside or internal auditors, internal or external Company counsel, or the Board concerning the operation or financial status of the Company; (iii) theft or embezzlement of assets of the Company; (iv) your conviction, or plea of guilty or nolo contendere to any felony (or to a felony charge reduced to a misdemeanor), or, with respect to your employment, to any misdemeanor (other than a traffic violation); (v) material failure to follow the Company's conduct and ethics policies that have been provided or made available to you; (vi) material breach of this Agreement or the Restrictive Covenants Agreement; and/or (vii) continued failure to attempt in good faith to perform your duties as reasonably assigned by your Supervisor at the time. Before terminating your employment for Cause under clauses (v) – (vii) above, the Company will specify in writing to you the nature of the act, omission, refusal, or failure that it deems to constitute Cause and, if the Company reasonably considers the situation to be correctable, give you 30 days after you receive such notice to correct the situation (and thus avoid termination for Cause), unless the Company agrees to further extend the time for correction. You agree that the Company will have discretion exercised in a reasonable manner to determine whether your correction is sufficient. Nothing in this definition prevents the Company from removing you from your position with the Company at any time and for any reason.

(iii) *Good Reason*. For purposes of this Agreement, "***Good Reason***" means, the occurrence, without your prior written consent, of any of the following events: (i) any material diminution in your authority, duties or responsibilities with the Company; (ii) a requirement that you report to an officer other than your then current Supervisor if the result is that your new Supervisor has materially diminished authority, duties, or responsibilities in comparison with your prior supervisor; (iii) a material reduction in your Base Salary; (iv) the Company requiring you to perform your principal services primarily in a geographic area more than 50 miles from the Company's offices in Danvers, Massachusetts (or such other place of primary employment for you at which you have agreed to provide such services); or (v) a material breach by the Company of any material provision of this Agreement. No resignation will be treated as resignation for Good Reason unless (x) you have given written notice to the Company of your intention to terminate your employment for Good Reason, describing the grounds for such action, no later than 90 days after the first occurrence of such circumstances, (y) you have provided the Company with at least 30 days in which to cure the circumstances, and (z) if the Company is not successful in curing the circumstance, you end your employment within 30 days following the cure period in (y). If the Company informs you that it will not treat your resignation as for Good Reason, you may withdraw the resignation and remain employed (provided that you do so before the original notice of resignation becomes effective) or may proceed and dispute the Company's decision.

(d) ***Death or Disability.*** Your employment hereunder will terminate immediately upon your death or Disability. "***Disability***" means the Chief Executive Officer, in consultation with the Chairman of the Compensation Committee or the Board, based upon appropriate medical evidence, determines you have become physically or mentally incapacitated so as to render you incapable of performing your usual and customary duties, with or without a reasonable accommodation, for 180 or more days, whether or not consecutive, during any 12 month period. You are also disabled if you are found to be disabled within the meaning of the Company's long-term disability insurance coverage as then in effect (or would be so found if you applied for the coverage or benefits). Employment termination under this subsection is not covered by Section 6(b) or 6(c), and you or your heirs will receive only the benefits and compensation in Section 6(a) (together, as applicable, with any life or disability insurance payments). Nothing in this Section 6(d) prevents the Company from removing you from your position with the Company or, under Section 6(b) or 6(c), from terminating your employment at any time, subject to compliance with those subsections.

(e) ***Change in Control.*** If, within 24 months following a Change in Control, the Company terminates your employment without Cause or you resign for Good Reason, in addition to the benefits described in Section 6(b)(ii) and subject to the release required under Section 6(b)(iii), you will receive the cash severance described in Section 6(b)(i), paid in a single lump sum on the Release Effective Date in accordance with the Company's standard payroll policies and procedures (or such later date as either Section 6(b)(iii) or 7(a) requires). For purposes of this Agreement, "***Change in Control*"** means:

(i) the acquisition by an individual, entity or group (within the meaning of Section 13(d)(3) or 14(d)(2) of the Securities Exchange Act of 1934 (the "***Exchange Act***") (a "***Person***") of beneficial ownership of any capital stock of HMS if, after such acquisition, such Person beneficially owns (within the meaning of Rule 13d-3 under the Exchange Act) 50.01% or more of either (x) the then-outstanding shares of common stock of HMS (the "***Outstanding Company Common Stock***") or (y) the combined voting power of the then-outstanding securities of HMS entitled to vote generally in the election of directors (the "***Outstanding Company Voting Securities***"); *provided, however,* that for purposes of this subsection (i) any acquisition directly from the Company will not be a Change in Control, nor will any acquisition by any individual, entity, or group pursuant to a Business Combination (as defined below) that complies with subclauses (x) and (y) of clause (ii) of this definition;

(ii) the consummation of a merger, consolidation, reorganization, recapitalization or share exchange involving HMS or a sale or other disposition of all or substantially all (i.e., in excess of 85%) of the assets of HMS (a "***Business Combination***"), unless, immediately following such Business Combination, each of the following two conditions is satisfied: (x) all or substantially all of the individuals and entities who were the beneficial owners of the Outstanding Company Common Stock and Outstanding Company Voting Securities immediately prior to such Business Combination beneficially own, directly or indirectly, more than 50% of the then-outstanding shares of common stock and the combined voting power of the then- outstanding securities entitled to vote generally in the election of directors, respectively, of the resulting or acquiring corporation in such Business Combination (which shall include a corporation that as a result of such transaction owns HMS or substantially all of HMS's assets either directly or through one or more subsidiaries (such resulting or acquiring corporation is referred to herein as the "***Acquiring Corporation***") in substantially the same proportions as their ownership of the Outstanding Company Common Stock and Outstanding Company Voting Securities, respectively, immediately prior to such Business Combination and (y) no Person beneficially owns, directly or indirectly, 50.01% or more of the then-outstanding shares of common stock of the Acquiring Corporation, or of the combined voting power of the then-outstanding securities of such corporation entitled to vote generally in the election of directors (except to the extent that such ownership existed prior to the Business Combination); or

(iii) a change in the composition of the Board that results, during any one year period, in the Continuing Directors (as defined below) no longer constituting a majority of the Board (or, if applicable, the Board of Directors of a successor corporation to HMS), where the term "***Continuing Director***" means at any date a member of the Board (x) who was a member of the Board on the Effective Date or (y) who was nominated or elected subsequent to such date by at least a majority of the directors who were Continuing Directors at the time of such nomination or election or whose election to the Board was recommended or endorsed by at least a majority of the directors who were Continuing Directors at the time of such nomination or election; *provided, however,* that there shall be excluded from this clause (y) any individual whose initial assumption of office after the Effective Date occurred as a result of an actual or threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents, by or on behalf of a person other than the Board; *provided* that, where required by Section 409A, the event that occurs is also a "change in the ownership or effective control of a corporation, or a change in the ownership of a substantial portion of the assets of a corporation" as defined in Treasury Reg. § 1.409A-3(i)(5).

(f) ***Further Effect of Termination on Board and Officer Positions.*** If your employment ends for any reason, you agree that you will cease immediately to hold any and all officer or director positions you then have with the Company, absent a contrary direction from the Board (which may include either a request to continue such service or a direction to cease serving upon notice). You hereby irrevocably appoint the Company to be your attorney-in-fact to execute any documents and do anything in your name to effect your ceasing to serve as a director and officer of the Company, should you fail to resign following a request from the Company to do so. You will not be required to sign, and the Company will not sign on your behalf without your consent, documents effecting your ceasing to serve as a director that characterize your cessation of employment differently than the manner in which it is effected through Section 6 above. A written notification signed by a director or duly authorized officer of the Company that any instrument, document, or act falls within the authority conferred by this subsection will be conclusive evidence that it does so. The Company will prepare any documents, pay any filing fees, and bear any other expenses related to this Section 6(f).

7. ***Effect of Section 409A of the Code.***

(a) ***Six Month Delay.*** If and to the extent any portion of any payment, compensation or other benefit provided to you in connection with your employment termination is determined to constitute "nonqualified deferred compensation" within the meaning of Section 409A and you are a specified employee as defined in Section 409A(a)(2)(B)(i), as determined by the Company in accordance with its procedures, by which determination you hereby agree that you are bound, such portion of the payment, compensation or other benefit shall not be paid before the earlier of (i) the expiration of the six month period measured from the date of your "separation from service" (as determined under Section 409A) or (ii) the tenth day following the date of your death following such separation from service (the "***New Payment Date***"). The aggregate of any payments that otherwise would have been paid to you during the period between the date of separation from service and the New Payment Date shall be paid to you in a lump sum in the first payroll period beginning after such New Payment Date, and any remaining payments will be paid on their original schedule.

(b) ***General 409A Principles.*** For purposes of this Agreement, a termination of employment will mean a "separation from service" as defined in Section 409A. For purposes of this Agreement, each amount to be paid or benefit to be provided will be construed as a separate identified payment for purposes of Section 409A, and any payments that are due within the "short term deferral period" as defined in Section 409A or are paid in a manner covered by Treas. Reg. Section 1.409A-1(b)(9)(iii) will not be treated as deferred compensation unless applicable law requires otherwise. Neither the Company nor you will have the right to accelerate or defer the delivery of any such payments or benefits except to the extent specifically permitted or required by Section 409A. This Agreement is intended to comply with the provisions of Section 409A and this Agreement shall, to the extent practicable, be construed in accordance therewith. Terms defined in this Agreement will have the meanings given such terms under Section 409A if and to the extent required to comply with Section 409A. In any event, the Company makes no representations or warranty and will have no liability to you or any other person if any provisions of or payments under this Agreement are determined to constitute deferred compensation subject to Code Section 409A but not to satisfy the conditions of that section.

(c) ***Expense Timing.*** Payments with respect to reimbursements of business expenses will be made in the ordinary course in accordance with the Company's procedures (generally within 45 days after you have submitted appropriate documentation) and, in any case, on or before the last day of the calendar year following the calendar year in which the relevant expense is incurred. The amount of expenses eligible for reimbursement, or in-kind benefits provided, during a calendar year may not affect the expenses eligible for reimbursement, or in-kind benefits to be provided, in any other calendar year. The right to reimbursement or in-kind benefits is not subject to liquidation or exchange for another benefit.

8. ***Restrictive Covenants.*** You have previously signed a Noncompetition, Nonsolicitation, Proprietary and Confidential Information and Developments Agreement (the "***Restrictive Covenants Agreement***"), which addresses your responsibilities to the Company in connection with confidentiality, transfer and protection of intellectual property, noncompetition, nonsolicitation of employees and customers, and nondisparagement. You agree that the Restrictive Covenants Agreement remains in effect and shall survive the termination of this Agreement and termination of your employment with the Company.

9. ***Cooperation.*** Following your separation of employment from the Company, you agree to cooperate with the Company in regard to the transition of the business matters you handled on behalf of the Company. You also agree to reasonably cooperate with the Company and its counsel in the defense or prosecution of any claims or actions now in existence or which may be brought in the future against or on behalf of the Company which relate in any way to events or occurrences that transpired while you were employed by the Company, subject to your right to initiate communications with, or participate or cooperate in any investigation conducted by, any Federal, State or Local government agency or regulatory authority. Your cooperation in connection with such claims or actions will include, but not be limited to, participating in interviews and discussions with the Company and/or its counsel, meeting with the Company's counsel to prepare for discovery, trial, or any legal proceeding, appearing and preparing for deposition or testimony at trial, and otherwise cooperating with HMS and its legal counsel, as requested. Nothing in this Agreement is to be construed as instructing you to testify in any particular manner, other than truthfully. To the extent possible, the Company will provide you with reasonable advance notice of the request for your cooperation. The Company will reimburse you for all reasonable, pre-approved out-of-pocket costs and expenses (but not including attorneys' fees and costs) that you incur, and compensate you at an hourly rate based on the base salary paid to you at the time of your separation (which is intended to be a fair and reasonable estimate of the total value of your lost time) in connection with your performance of your obligations under this paragraph of the Agreement, to the extent permitted by law.

10. ***Miscellaneous.***

(a) ***Notices.*** All notices required or permitted under this Agreement must be in writing and will be deemed effective upon personal delivery or three business days following deposit in a United States Post Office, by certified mail, postage prepaid, or one business day after it is sent for next-business day delivery via a reputable nationwide overnight courier service in the case of notice to the Company at its then principal headquarters, and in the case of notice to you to the current address on file with the Company. Notice to the Company must include a separate notice to the General Counsel of HMS. Either Party may change the address to which notices are to be delivered by giving notice of such change to the other Party in the manner set forth in this Section 10(a).

(b) ***No Mitigation.*** You are not required to seek other employment or otherwise mitigate the value of any severance benefits contemplated by this Agreement, nor will any such benefits be reduced by any earnings or benefits that you may receive from any other source. Notwithstanding any other provision of this Agreement, any sum or sums paid under this Agreement will be in lieu of any amounts to which you may otherwise be entitled under the terms of any severance plan, policy, program, agreement or other arrangement sponsored by the Company or an affiliate of the Company.

(c) ***Waiver of Jury Trial.*** TO THE EXTENT NOT PROHIBITED BY APPLICABLE LAW THAT CANNOT BE WAIVED, THE PARTIES HEREBY WAIVE, AND COVENANT THAT THEY WILL NOT ASSERT (WHETHER AS PLAINTIFF, DEFENDANT OR OTHERWISE), ANY RIGHT TO TRIAL BY JURY IN ANY ACTION, SUIT OR OTHER PROCEEDING ARISING IN WHOLE OR IN PART UNDER OR IN CONNECTION WITH THIS AGREEMENT OR THE RELEASE IT CONTEMPLATES, WHETHER NOW EXISTING OR HEREAFTER ARISING, AND WHETHER SOUNDING IN CONTRACT, TORT OR OTHERWISE, THE PARTIES AGREE THAT ANY PARTY MAY FILE A COPY OF THIS PARAGRAPH WITH ANY COURT AS WRITTEN EVIDENCE OF THE KNOWING, VOLUNTARY AND BARGAINED-FOR AGREEMENT AMONG THE PARTIES IRREVOCABLY TO WAIVE THEIR RIGHTS TO TRIAL BY JURY IN ANY PROCEEDING WHATSOEVER BETWEEN THEM RELATING TO THIS AGREEMENT OR TO ANY OF THE MATTERS CONTEMPLATED UNDER THIS AGREEMENT, RELATING TO YOUR EMPLOYMENT, OR COVERED BY THE CONTEMPLATED RELEASE.

(d) ***Severability.*** Each provision of this Agreement must be interpreted in such manner as to be effective and valid under applicable law, but if any provision of this Agreement is held to be prohibited by or invalid under applicable law, such provision will be ineffective only to the extent of such prohibition or invalidity, without invalidating the remainder of such provision or the remaining provisions of this Agreement. Moreover, if an arbitrator or a court of competent jurisdiction determines any of the provisions contained in this Agreement to be unenforceable because the provision is excessively broad in scope, whether as to duration, activity, geographic application, subject or otherwise, it will be construed, by limiting or reducing it to the extent legally permitted, so as to be enforceable to the extent compatible with then applicable law to achieve the intent of the Parties.

(e) ***Assignment.*** This Agreement will be binding upon and will inure to the benefit of (i) your heirs, beneficiaries, executors and legal representatives upon your death and (ii) any successor of the Company. Any such successor of the Company will be treated as substituted for the Company under the terms of this Agreement for all purposes. The Company may assign this Agreement without your consent, and such an assignment will not terminate your employment for purposes of triggering your entitlement to severance; *provided, however,* that if such an assignment provides a basis for you to resign for Good Reason after a Change in Control, you may resign for Good Reason, and you will be entitled to severance, if any, subject to the terms of Section 6. You specifically agree that any assignment may include rights under the Restrictive Covenants Agreement without requiring your consent; *provided*, *however*, that an assignment that occurs after the termination of your employment will not expand in any manner the scope of the Restrictive Covenants Agreement. As used herein, "successor" will mean any person, firm, corporation or other business entity that at any time, whether by purchase, merger or otherwise, directly or indirectly acquires all or substantially all of the assets or business of the Company. Any attempted assignment, transfer, conveyance or other disposition of any interest in your rights to receive any form of compensation hereunder will be null and void.

(f) ***No Oral Modification, Waiver, Cancellation or Discharge.*** This Agreement may only be amended, canceled or discharged or any obligations thereunder waived through a writing signed by you and any executive officer of the Company (other than you) duly authorized either by the Board or the Compensation Committee.

(g) ***No Conflict of Interest.*** You confirm that you have fully disclosed to the Company, to the best of your knowledge, all circumstances under which you, your immediate family and other persons who reside in your household have or may have a conflict of interest with the Company. You further agree to fully disclose to the Company any such circumstances that might arise during your employment upon your becoming aware of such circumstances.

(h) ***Other Agreements.*** You hereby represent that your performance of all the terms of this Agreement and the performance of your duties as an employee of the Company does not and will not breach any agreement to keep in confidence proprietary information, knowledge or data acquired by you in confidence or in trust prior to your employment with the Company. You also represent that you are not a party to or subject to any restrictive covenants, legal restrictions, policies, commitments or other agreements in favor of any entity or person that would in any way preclude, inhibit, impair or limit your ability to perform your obligations under this Agreement, including noncompetition agreements or nonsolicitation agreements, and you further represent that your performance of the duties and obligations under this Agreement does not violate the terms of any agreement to which you are a party. You agree that you will not enter into any agreement or commitment or agree to any policy that would prevent or hinder your performance of duties and obligations under this Agreement.

(i) ***Disclosure of this Agreement.*** You acknowledge that the Company may provide persons or entities who may employ or engage you with a copy of the Restrictive Covenants Agreement (or portions thereof) to highlight your continuing obligations to the Company. You also acknowledge that the Company may be obligated to disclose the entire Agreement, or any portion thereof, to satisfy applicable laws and regulations.

(j) ***Survivorship.*** The respective rights and obligations of the Company and you hereunder will survive any termination of your employment to the extent necessary to preserve the intent of such rights and obligations.

(k) ***Withholding.*** The Company will be entitled to withhold, or cause to be withheld, any amount of federal, state, city or other withholding taxes or other amounts either required by law or authorized by you with respect to payments made to you in connection with your employment or the termination of your employment.

(l) ***Company Policies.*** References in this Agreement to Company policies and procedures are to those policies and procedures in effect at the Effective Date, as the Company may amend them from time to time.

(m) ***Governing Law; Dispute Resolution.*** The Parties agree that the enforcement of this Agreement shall be governed by the Federal Arbitration Act ("FAA"), 9 U.S.C. §1 et seq. The laws of the State of Texas and the National Rules (as defined below) shall apply to the interpretation of this Agreement, pursuant to section 2 of the FAA. The laws of the State of Texas shall govern the substantive merits of any legal dispute set forth herein, without regard to conflicts of law provisions. In case of any controversy or claim arising out of or related to this Agreement or relating to your employment or the termination of your employment (including claims relating to employment discrimination), except as expressly excluded herein, each Party agrees to give the other Party notice of an intent to seek arbitration under this Agreement and 10 days to reach a resolution. Should resolution of any controversy or claim not be reached following provision of notice and a reasonable opportunity to cure, then the dispute (including the arbitrability of the dispute itself, and the formation or enforceability of this Agreement) shall be settled by arbitration under the American Arbitration Association's Employment Arbitration Rules and Mediation Procedures (the "***National Rules***"). A single arbitrator shall be selected in accordance with the National Rules. The dispute will be arbitrated in Danvers, Massachusetts, absent mutual agreement of the Parties to another venue. Any claim or controversy not submitted to arbitration in accordance with this Section 10(m) (other than as provided under the Restrictive Covenants Agreement) will be waived, and thereafter no arbitrator, arbitration panel, tribunal, or court will have the power to rule or make any award on any such claim or controversy. In determining a claim or controversy under this Agreement and in making an award, the arbitrator must consider the terms and provisions of this Agreement, as well as all applicable federal, state, or local laws. The award rendered in any arbitration proceeding held under this Section 10(m) shall be final and binding and judgment upon the award may be entered in any court having jurisdiction thereof. The following claims are not covered by this Section 10(m): (1) claims for workers' compensation or unemployment compensation benefits; (2) administrative charges to any federal, state or local equal opportunity or fair employment practices agency; (3) administrative charges to the National Labor Relations Board; (4) agency charges or complaints to exhaust an administrative remedy; or (5) any other charges filed with or communication to a federal, state or local government office, official or agency. Also not covered by this Section 10(m) are claims by the Company or by you for temporary restraining orders, preliminary injunctions or permanent injunctions ("equitable relief") in cases in which such equitable relief would be otherwise authorized by law or pursuant to the Restrictive Covenants Agreement. The Company will be responsible for paying any filing fee of the sponsoring organization and the fees and costs of the arbitrator; provided, however, that if you initiate the claim, you will contribute an amount equal to the filing fee you would have incurred to initiate a claim in the court of general jurisdiction in the State of Texas. Each party will pay for its own costs and attorneys' fees, if any, provided that the arbitrator or court, as applicable, may award reasonable costs and expenses in favor of the prevailing party. The Company and you agree that the decision as to whether a party is the prevailing party in an arbitration, or a legal proceeding that is commenced in connection therewith will be made in the sole discretion of the arbitrator or, if applicable, the court.

Any action, suit or other legal proceeding with respect to equitable relief that is excluded from arbitration above must be commenced only in a court of the State of Texas (or, if appropriate, a federal court located within the State of Texas), and the Company and you each consent to the jurisdiction of such a court. With respect to any such court action, the Parties hereto (a) submit to the personal jurisdiction of such courts; (b) consent to service of process by the means specified under Section 10(a); and (c) waive any other requirement (whether imposed by statute, rule of court, or otherwise) with respect to personal jurisdiction, inconvenient forum, or service of process.

(n) ***Interpretation.*** The parties agree that this Agreement will be construed without regard to any presumption or rule requiring construction or interpretation against the drafting party. References in this Agreement to "include" or "including" should be read as though they said "without limitation" or equivalent forms.

(o) ***Entire Agreement.*** This Agreement and any documents referred to herein, including, but not limited to, the Restrictive Covenants Agreement referenced in Section 8, represent the entire agreement of the Parties and will supersede any and all previous contracts, arrangements or understandings between the Company and you, including, without limitation, the Prior Agreement.

(p) ***Counterparts.*** This Agreement may be executed in counterparts, and all so executed shall constitute one agreement which shall be binding upon all Parties hereto, notwithstanding that all Parties' signatures do not appear on the same page.

[Signatures on Following Page(s)]

IN WITNESS WHEREOF, the Parties have executed this Agreement to be effective as of the Effective Date set forth above.

HMS Holdings Corp.

Exhibit 10.9

SEPARATION, WAIVER AND GENERAL RELEASE AGREEMENT

This Separation, Waiver and General Release Agreement (referred to herein as "*Agreement*" or *"Release"*) is entered into by and between Semone Neuman (referred to herein as "*You*" or "*Releasor*") and HMS Holdings Corp. For purposes of this Agreement, the term "*Company*" shall refer to HMS Holdings Corp. and its corporate affiliates and their respective direct and indirect subsidiaries and successors and assigns. The Company, together with its past and present parents, subsidiaries, affiliates, shareholders, owners, partners, members, officers, directors, representatives, employees, agents, counsel, successors and assigns, benefit plans, benefit plan trustees and administrators are referred to collectively herein as the "*Releasees.*" You and the Releasees shall be referred to collectively herein as the "*Parties*" and individually as a "*Party.*"

WHEREAS, the Parties previously entered into that certain Amended and Restated Executive Employment Agreement, effective April 2, 2018 (the "*Employment Agreement*"), pursuant to which the Company has employed you as its Executive Vice President, Coordination of Benefits;

WHEREAS, your employment with the Company will end as of March 16, 2019 (the "*Separation Date*"); and

WHEREAS, in accordance with Section 6(b) of the Employment Agreement, the Company desires to offer you this Agreement in exchange for certain agreements, warranties, representations and releases on your part contained in this Agreement;

NOW, THEREFORE, in consideration of the mutual promises and covenants contained herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Nature of Agreement and Non-Admission of Liability

This is an agreement of settlement and compromise, and by entering into this Agreement none of the Parties agree or concede in any manner whatsoever that they violated any law or statute of any jurisdiction, breached any duty, responsibility or contract, or acted improperly in any manner. It is understood and agreed that nothing in this Agreement shall be interpreted or construed as the admission of any wrongdoing by any or all the Releasees or by any person or entity acting for or on behalf of any or all of the Releasees.

2. End of Releasor's Employment

You agree that, effective as of January 9, 2019, you will resign from your position as Executive Vice President, Coordination of Benefits of the Company and from all other employee, officer, director, manager, and other positions and associations of any kind with the Company; provided, however, that your employment with the Company shall not terminate until the Separation Date. You agree to execute all documents and to take such further steps as may be required to effectuate such resignation(s). You agree that during the period commencing on the Effective Date (as defined in paragraph 14 below) and ending on the Separation Date, you shall assist with the transition of your current duties and responsibilities, to the extent requested by the Company's Chief Executive Officer. The Company shall continue to employ you until the Separation Date, and your salary and all benefits will remain unchanged until such date; provided, however, that you shall no longer have any leadership or decision-making authority or take any actions, execute any documents, or make any representations on behalf of the Company. You agree that your services shall be available to the Company as needed through the Separation Date and will be subject to the same policies, standards of conduct and performance applicable to all officers and managers of the Company. From the date hereof and until the Separation Date, you shall serve as a senior advisor to the Company, and you agree to (a) cooperate fully and provide assistance, at the request of the Company and upon reasonable notice, in the orderly transitioning of your duties and responsibilities to such other persons as the Company shall designate and (b) thoroughly and diligently perform those duties and actions which are necessary or appropriate to cause such orderly transition. You acknowledge and agree that you shall receive no additional compensation for time spent assisting the Company pursuant to this paragraph 2 other than the compensation and benefits provided for in this Agreement. You agree that this Agreement fully supersedes any and all prior agreements relating to your employment with the Company, including, without limitation, the Employment Agreement (other than the Surviving Provisions and other than the Restrictive Covenant Agreement (each as defined below)).

3. No Further Monies are Due to You; Non-Waiver of Certain Rights

Other than the monies to be paid pursuant to paragraph 4, there are no other monies that you claim are owed to you which relate in any way to your employment with the Company. This includes, but is not limited to, salaries, bonuses, commissions, wages, reimbursable business expenses or contributions to employee benefit plans, vacation or severance pay. Nothing herein shall be construed or interpreted in any way to: (a) limit or deny your right to receive any vested employee benefit under a plan of the Company for which you were or are a participant; (b) alter your right to elect continued coverage of benefits pursuant to the Consolidated Omnibus Budget Reconciliation Act of 1985 ("*COBRA*") or any state equivalent law; or (c) limit your ability to seek and/or collect unemployment insurance benefits (assuming you otherwise qualify for such benefits).

4. Consideration

A. Prior to the Separation Date, you shall continue to receive your base salary, less all applicable payroll taxes and withholdings, in accordance with the Company's normal payroll practices, and other benefits as in effect immediately prior to the Effective Date, including, without limitation, continued eligibility to receive a bonus pursuant to the Company's annual bonus plan with respect to the 2018 performance period.

B. Provided that you comply with this Agreement, the Restrictive Covenant Agreement and the Surviving Provisions, do not revoke your signature on this Agreement (as discussed in paragraph 15), and execute the attached Exhibit B on (but not before) the Separation Date, or within seven (7) days following the Separation Date, and do not revoke it, the Company shall (on behalf of the Releasees) provide you with the following consideration after your termination of employment:

(i) The Company will pay you an amount equal to twelve (12) times your monthly base salary (the "*Separation Payment*"), provided you have not secured another position with the Company. The Separation Payment shall be paid to you in bi-weekly payments, beginning on the first full payroll period after the expiration of the revocation period set forth in paragraph 15 of this Agreement. Payments of the Separation Payment will be made on the Company's normal payroll cycle in accordance with the Company's regular payroll practices, and are subject to all statutory deductions required by federal, state and/or local law. Payments will be reported on a tax Form W-2.

(ii) The Company will pay you a lump-sum amount equal to the difference between the COBRA coverage premium for the same type of medical, dental and vision coverage (single, family or other) in which you are enrolled as of the Separation Date and your employee contribution, which represents the amount the Company would allocate for such coverage had your coverage remained active for twelve (12) months. This payment will be made within sixty (60) days of the termination of your employment and will be taxable and subject to withholding for all required federal, state and/or local income and employment taxes. You will be responsible for ensuring the timely payment of your COBRA coverage premiums.

The Company shall have no obligation to pay the amounts or to provide the benefits described in this paragraph 4(B) unless you execute and do not revoke this Agreement and Exhibit B. The amounts payable pursuant to this paragraph 4(B) shall not be treated as compensation under the Company's 401(k) or other retirement plan. You acknowledge and agree that you are not otherwise entitled to the amounts and benefits set forth in this paragraph 4(B).

C. Even if you choose not to sign this Agreement, or if you sign this Agreement and then revoke your signature (as explained below), you will still be paid your regular salary through the Separation Date and your accrued but unused PTO, if any, for the calendar year in which the Separation Date occurs.

5. Return of Company Property

On or before the Separation Date, you shall return to the Company all Company property in your possession, custody or control, including all keys, files, records, equipment (including computer hardware, software, printers, wireless handheld devices, cellular phones, etc.), and Company Confidential Information (as defined in paragraph 10(E)) and have left intact with, or delivered intact to, the Company all electronic Company documents, including those that you developed or helped to develop during your employment, none of which you will retain in any form or medium.

6. Release

In exchange for the consideration provided by the Company under the terms of this Agreement in paragraph 4(B), you irrevocably and unconditionally release and discharge the Releasees jointly and severally, from any and all debts, claims, liabilities, demands and causes of action of every kind, nature and description, in law, or in equity, which against the Releasees, you, your heirs, executors, administrators, successors and assigns ever had, now have or hereafter can, shall or may have for, upon or by reason of any matter, cause or thing whatsoever, from the beginning of time to the date you sign this Agreement. You represent that you have not assigned or otherwise transferred any interest in any claim that is the subject of this Agreement.

This Release covers, without limitation, any claims of harassment and/or discrimination on the basis of sex, sexual orientation, gender identification, pregnancy, disability (including claims concerning a history or record of a disability, predisposing genetic condition, and claims that you were regarded as having a disability), handicap, genetic information, race, color, religion, creed, national origin, ancestry, age, citizenship, ethnic characteristics, marital status or military/veteran status and also includes, no matter how denominated or described, any claims under any federal, Texas, South Carolina (or other state) state or local law, statute, rule, regulation, ordinance or executive order of discrimination and/or retaliation and non-payment of wages, bonuses, commissions or other compensation, including, without limitation, the Age Discrimination in Employment Act of 1967 ("*ADEA*"), Older Workers Benefit Protection Act, Employee Retirement Income Security Act of 1974, Title VII of the Civil Rights Act of 1964, Civil Rights Act of 1866, The Civil Rights Act of 1991, Rehabilitation Act of 1973, Executive Order 11246, Executive Order 11141, Genetic Information Nondiscrimination Act of 2008, Americans with Disabilities Act of 1990 ("*ADA*"), ADA Amendments Act, Family and Medical Leave Act, Occupational Safety and Health Act, Fair Labor Standards Act, Worker Adjustment and Retraining Notification Act, Fair Credit Reporting Act, Texas Labor Code Annotated § 21.001 *et seq*. (Texas civil rights law), Texas Labor Code Annotated § 21.055 *et seq*. (Texas whistleblower protection law), Texas Commission on Human Rights Act, Texas Law on Communicable Diseases, Texas Breast-Feeding Rights and Policies Law, the South Carolina Human Affairs Law, as amended, the South Carolina Payment of Wages Law, as amended, and all other federal, state and local laws, including without any limitation, any claims of wrongful or tortious discharge or termination, breach of contract, breach of the implied covenant of good faith and fair dealing, written or oral, express or implied, breach of promise, public policy, negligence, intentional infliction of emotional distress, negligent infliction of emotional distress, assault, battery, false imprisonment, defamation, libel, slander, invasion of privacy, impairment of economic opportunity, loss of business opportunity, fraud, misrepresentation, and whistleblower activities, and any claim or damage arising out of your employment with and/or separation from the Company (including a claim for retaliation) under any common law theory or any federal, state or local law, statute, rule, regulation, ordinance or executive order not expressly referenced above.

This Release does not apply to any claims or rights that may arise after the date you sign this Release. Excluded from this Release are any claims which cannot be waived by law, including but not limited to, the right to participate in an investigation conducted by certain government agencies. You do, however, waive your right to any monetary recovery from the Company or the Releasees should any agency (*e.g.*, the Equal Employment Opportunity Commission) pursue any claims on your behalf, unless otherwise prohibited by law. You represent and warrant that you have not filed any complaint, charge, or lawsuit against the Company with any government agency or any court.

You agree never to sue the Company or the Releasees in any forum for any claim covered by the above waiver and release language, except that you may bring a claim against the Company under the ADEA to challenge this Release. If you violate this Release by suing the Company or the Releasees, other than under the ADEA or as otherwise set forth above, you shall be liable to the Company and/or the Releasees for their reasonable attorneys' fees and other litigation costs incurred in defending against such a suit. Nothing in this Release is intended to reflect any party's belief that your waiver of claims under ADEA is invalid or unenforceable, it being the interest of the Company and you that such claims are waived.

The Parties intend this Release to be construed and interpreted to the fullest extent permitted by law as a general release. The terms of this Agreement are accepted by you as full and complete resolution, accord and satisfaction of any and all claims, demands or grievances you have made against, and/or could have made against any of the Releasees.

7. Acknowledgements

You acknowledge that you have no knowledge of any violations by the Company of the Health Insurance Portability and Accountability Act of 1996 ("*HIPAA*"), the Fair Debt Collection Practices Act, the civil or criminal provisions of the federal False Claims Act, the Civil Monetary Penalties Statute, Titles XVIII and XIX of the Social Security Act (the Medicare and Medicaid statutes), the Health Care Benefit Program False Statements Statute, the Health Care Fraud Statute, any and all of the statutory provisions referenced in the Federal Health Care Offense Definitions Statute, or any other federal or state laws relating to negligence, fraud and abuse in health care (collectively, the "*Health Care Laws*"), or the Sarbanes Oxley Act. You have received instruction from the Company on how to report claims or violations under the Health Care Laws and the Sarbanes Oxley Act, and as of the date of executing this Agreement, have no claims to report under the Health Care Laws or the Sarbanes Oxley Act. You further certify that you have not reported to any government authority or other entity any such healthcare compliance concerns, issues, and/or violations or potential violations, which remain unanswered or unresolved. Furthermore, in connection with the foregoing acknowledgements, you have signed the Corporate Compliance Statement - Return of Company Property & Information document, attached to this agreement as Exhibit A, and hereby affirm the representations therein.

8. Non-Waiver or Release of Subsequent Rights or Claims

Nothing contained herein is intended to or shall constitute a waiver or release of any rights or claims that arise after the date you sign this Agreement.

9. Non-Waiver of Rights Under this Agreement

Nothing herein is intended to or constitutes a waiver of any rights the Parties may have under this Agreement.

10. Representations and Warranties

As a material part of this Agreement, you make the following representations and warranties:

A. You have not commenced or asserted an administrative charge or complaint, and you have not commenced or asserted, and shall not commence or assert, any lawsuit, arbitration, claim or legal proceeding, against any or all of the Releasees that is designed to remedy or seek redress for any right or rights waived and/or released by this Agreement.

B. You agree to keep confidential all information relating to this Agreement, including its negotiation, terms and existence. You may communicate or publish any information relating to this Agreement to your immediate family (defined herein as parents, siblings, parents-in-law, spouse, domestic partner or children), legal and financial representatives, and tax preparer. Before such information is disclosed by you to any such person(s), however, you shall advise such person(s) that the information they will receive is to be kept confidential, and such person(s) must agree to maintain the confidentiality of the information they receive.

C. You are not aware of any facts or circumstances suggesting that the Company has engaged in any wrongful or unlawful conduct.

D. Non-Disparagement

You will not make or cause to be made or published any statement, written or oral, directly or indirectly, which is intended to or has the effect of having any negative impact on the Company, its business or reputation in the marketplace or otherwise, subject to your rights in paragraph 10(G).

E. Surviving Provisions; Confidentiality

You acknowledge and agree to honor and abide by your obligations under Section 8, Section 9, and Section 10 of the Employment Agreement (such sections of the Employment Agreement are referred to herein as, the "*Surviving Provisions*", and shall survive the termination of your employment with the Company and the Employment Agreement and shall remain in full force and effect). You further acknowledge that as a condition of your employment with the Company, you previously entered into a Noncompetition, Nonsolicitation, Proprietary and Confidential Information and Developments Agreement (the "*Restrictive Covenant Agreement*"), a copy of which is being provided to you with this Agreement, and the provisions of which are incorporated herein by reference. You agree that the terms of the Restrictive Covenant Agreement and the Surviving Provisions shall continue by their own terms in full force and effect. You agree that the terms of the Restrictive Covenant Agreement and the Surviving Provisions are reasonable and that the consideration set forth in this Agreement shall also be considered additional consideration for your ratification of the Restrictive Covenant Agreement and the Surviving Provisions. In addition, you acknowledge your duty to keep confidential Protected Health Information within the meaning of federal HIPAA regulations, including, but not limited to, any patient-specific information derived from medical or financial records or from electronic data files used in Company's business operations. Under the terms of this Agreement, the restrictive covenants and confidentiality obligations to the Company survive the execution of this Agreement. You acknowledge that your adherence to the terms of the Restrictive Covenant Agreement, the Surviving Provisions, and compliance with your above-referenced obligations to keep confidential Protected Health Information within the meaning of federal HIPAA regulations is important to the Company's business. You agree to familiarize yourself with the provisions of the Restrictive Covenant Agreement, the Surviving Provisions, and the federal HIPAA regulations, as your violation of these confidentiality obligations may subject you to liability.

You further acknowledge and agree that you have a common law duty of confidentiality to the Company that prevents you from using the Company's confidential information during or after employment, except on the Company's behalf. You agree that you will not disclose to any person or entity any Confidential Information relating to the Company or its past or present partners, shareholders, owners, officers, directors or employees. For the purposes of this Agreement, the term Confidential Information shall mean information not in the public domain relating to the Company's past or present clients, business processes or methods, its trade secrets, marketing, promotional, public relations or other plans, or other information involving the Company; the Company's financial, payroll or wage information; or any personal matters of any partner, shareholder, owner, officer, director or employee of the Company.

F. Nothing in this Agreement, including paragraphs 10(A) through 10(E), shall be construed to prevent you (or any of the Releasees) from testifying truthfully, under oath, about any matter, if required to do so in any legal proceeding.

G. Nothing in this Agreement shall be construed to limit your right to initiate communications with, or participate or cooperate in any investigation conducted by, any federal, state or local government agency or regulatory authority, even if the subject matter of the communication or investigation concerns a right, claim or matter waived or released by this Agreement.

H. Nothing in this Agreement prohibits you from reporting possible violations of state or federal law or regulation to any government agency, regulator, or legal authority, or making other disclosures that are protected under the whistleblower provisions of state or federal law or regulation. You are not required to notify the Company that you have made any such reports or disclosures; provided, however, that nothing herein authorizes the disclosure of information you obtained through a communication that was subject to the attorney-client privilege, unless disclosure of the information would otherwise be permitted by an applicable law or rule. Further, pursuant to the Defend Trade Secrets Act: "An individual shall not be held criminally or civilly liable under any Federal or State trade secret law for the disclosure of a trade secret as defined in the Economic Espionage Act that (A) is made (i) in confidence to a Federal, State, or local government official, either directly or indirectly, or to an attorney; and (ii) solely for the purpose of reporting or investigating a suspected violation of law; or (B) is made in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal. An individual who files a lawsuit for retaliation by an employer for reporting a suspected violation of law may disclose the trade secret to the attorney of the individual and use the trade secret information in the court proceeding, if the individual (A) files any document containing the trade secret under seal; and (B) does not disclose the trade secret, except pursuant to court order."

I. Nothing in this Agreement shall be construed to release or waive any claim that may not be released or waived by law.

J. You understand and agree that you shall not after your Separation Date contact or communicate with employees of the Company, other than the Company's Executive Vice President, General Counsel, its Executive Vice President, Chief Administrative & Human Resources Officer, or a member of the Company's Human Resources department, with regard to the subject matter of this Agreement. Nothing herein shall preclude you from discussing in general terms your duties and responsibilities while at the Company.

K. You acknowledge that you have no entitlement to severance pay or any benefit resulting from your termination. You further understand that your receiving the consideration set forth in this Agreement is conditional upon your signing this Agreement. You acknowledge that the Separation Payment to be made to you under this Agreement is in addition to anything of value to which you are already entitled.

11. Cooperation

Following the Separation Date, you agree to cooperate with the Company in regard to the transition of the business matters you handled on behalf of the Company. You also agree to reasonably cooperate with the Company and its counsel in the defense or prosecution of any claims or actions now in existence or which may be brought in the future against or on behalf of the Company which relate in any way to events or occurrences that transpired while you were employed by the Company, subject to your rights in paragraph 10(G) above. Your cooperation in connection with such claims or actions will include, but not be limited to, being available to meet with the Company's counsel to prepare for discovery, trial, or any legal proceeding, and to act as a witness on behalf of the Company at mutually convenient times. The Company will reimburse you for all reasonable, pre-approved out-of-pocket costs and expenses (but not including attorneys' fees and costs) that you incur and compensate you at an hourly rate based on the base salary paid to you at the time of your separation (which is intended to be a fair and reasonable estimate of the total value of your lost time and is not intended to influence or in any way alter the substance of any testimony you may provide) in connection with your performance of your obligations under this paragraph of the Agreement, to the extent permitted by law.

12. Remedy in the Event of a Breach

In the event you breach any portion of this Agreement, you shall immediately, upon written demand, return to the Company all monies paid to you pursuant to this Agreement (except the payment(s) set forth in paragraphs 4(A) and (C)), and the Company shall retain all rights to pursue legal and equitable remedies to: (a) enforce the terms of this Agreement, and/or (b) seek damages for any breach.

13. Additional Representations

By signing this Agreement, you further acknowledge, understand, and agree that by signing this Agreement, you are knowingly and voluntarily agreeing to waive and release, among other claims, any and all claims under the ADEA and the Older Workers Benefit Protection Act you have had or may have against the Company and/or the Releasees. Further, you understand and agree that:

A. You will have a period of twenty-one (21) calendar days from the date you receive this Agreement to review and deliberate whether or not to sign it, any or all of which period you may waive;

B. You are hereby advised to consult with an attorney before executing this Agreement;

C. You have carefully read and understand the terms of this Agreement, and have had a full and fair opportunity to review this Agreement with an attorney of your choice;

D. You have signed this Agreement freely and voluntarily and without fraud, duress or coercion and with full knowledge and understanding of its terms and of its significance and consequences and of the rights relinquished, surrendered, released and discharged hereunder; and

E. The only consideration for signing this Agreement is stated herein, and no other promise, agreement or representation of any kind has been made to you by any person or entity whatsoever to cause you to sign this Agreement.

14. Manner of Acceptance

In order to accept the terms of this Agreement, you must return a signed copy to the Company (at the address set forth in paragraph 16 hereof) by the twenty-first (21st) calendar day after the date you receive this Agreement. In the event a timely acceptance is made, and you do not revoke your signature pursuant to paragraph 15, the Company shall provide the consideration described in paragraph 4(B).

In the event the twenty-first (21st) day falls on a Saturday, Sunday or on a day that the Company's office is closed, your time to accept the terms of this Agreement shall be extended until the next regular business day that the Company's office is open.

If you do not revoke your signature to this Agreement, the eighth (8th) day after your date of acceptance will be the effective date of this Agreement (the "*Effective Date*").

15. Right to Revoke

You may revoke your signature (thereby rescinding your acceptance of the terms of this Agreement) within seven (7) calendar days from the date on which you sign this Agreement. If the seventh (7th) day falls on a Saturday, Sunday or on a day that the Company's office is closed, your time to revoke your signature shall be extended until the next regular business day that the Company's office is open. In the event you wish to revoke your signature, you must give written notice to that effect pursuant to paragraph 16 hereof. If you timely revoke your signature on this Agreement, or if you do not timely sign and return this Agreement to the Company (pursuant to paragraph 14), this Agreement shall be null, void and of no effect, and you shall not be entitled to any of the consideration described in paragraph 4(B).

16. Addresses for Notices

Any notice required pursuant to this Agreement shall be sent via registered mail, return receipt requested, or overnight mail with delivery confirmation to the following addresses:

If to the Company: HMS, 5615 High Point Drive, Irving, Texas 75038, Attention: Tracy South, Human Resources Department.

If to You:

Any Notice sent in accordance with this paragraph shall be deemed effective upon receipt. Notwithstanding anything to the contrary contained herein, at any time after the execution of this Agreement any Party may modify the address(es) (including telephone number(s)) to which it desires notices to be sent by advising the other, in writing as provided in this paragraph. Such modification shall be deemed effective upon receipt.

17. General Legal Matters

A. The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of any other provision hereof. In the event any provision of this Agreement is determined by a court of competent jurisdiction to be invalid, unlawful or unenforceable, it shall be severed from the Agreement, and the court shall be permitted to redraft the language so as to conform the severed language to the Parties' intent. If any provision, or portion thereof, of this Agreement is determined to be invalid under applicable statute or rule of law, only such provision, and only to the extent determined to be invalid, shall be deemed omitted from this Agreement, the remainder of which shall remain in full force and effect. In the event the general release provisions of this Agreement are determined to be invalid, you shall immediately execute a modified general release that is valid that shall be effective as of the date this Agreement becomes effective.

B. This Agreement (including the exhibits attached hereto), the Restrictive Covenant Agreement, and the Surviving Provisions reflect the entire agreement among the parties relating to the matters set forth herein and relating to your employment. With the exception of the agreements described in paragraph 10(E) and any Non-Qualified Stock Option/Restricted Stock Unit Agreement that you may have received during your employment, which agreements shall remain in full force and effect in accordance with their respective terms and conditions, any other agreements, understandings, promises or commitments among the Parties are superseded by this Agreement. This Agreement (including the exhibits attached hereto) has been negotiated, drafted and reviewed by the Parties and/or their designated counsel. No language herein shall be construed for or against the interests of any Party on the ground that either Party was the proponent or draftsperson thereof. This Agreement may not be changed unless the change is in writing and signed by you and the Company.

C. This Agreement will be governed by and construed as a sealed instrument under and in accordance with the laws of the State of Texas without regard to conflicts of law provisions. Any action, suit or other legal proceeding that is commenced to resolve any matter arising under or relating to any provision of this Agreement must be commenced only in a court of the State of Texas (or, if appropriate, a federal court located within the State of Texas) and the Company and you each consents to the jurisdiction of such a court. With respect to any such court action, the Company and you (a) submit to the personal jurisdiction of such courts; (b) consent to service of process by the means specified under paragraph 16; and (c) waive any other requirement (whether imposed by statute, rule of court, or otherwise) with respect to personal jurisdiction, inconvenient forum, or service of process. ***THE COMPANY AND YOU EACH HEREBY IRREVOCABLY WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY ACTION, SUIT OR OTHER LEGAL PROCEEDING ARISING UNDER OR RELATING TO ANY PROVISION OF THIS AGREEMENT.***

D. Paragraph headings used in this Agreement are for informational purposes only and shall not be construed or interpreted as part of this Agreement. Usage of the singular shall include the plural and vice versa. Use of male pronouns shall be read to include the female and vice versa.

E. This Agreement is intended to comply with Section 409A of the Internal Revenue Code of 1986, as amended (the "*Code*"), if and to the extent applicable, and will be interpreted and applied in a manner consistent with that intention. Toward that end, unless permitted sooner by Section 409A of the Code, severance amounts otherwise payable within six (6) months after termination of employment will be deferred until and become payable on the first (1st) day of the seventh (7th) month following termination of employment. Further, to the extent Section 409A of the Code is applicable, the phrase "termination of employment" shall have the same meaning as a "separation from service" as defined in Section 409A of the Code and its accompanying regulations. Notwithstanding any provision of this Agreement, to the extent required by Section 409A, if the time period in which this Agreement may be signed and revoked spans two (2) taxable years, the Separation Payments shall be made or commence in the latter year.

F. This Agreement can be executed in any number of counterparts, each of which shall be effective only upon delivery and thereafter shall be deemed an original, and all of which shall be taken to be one and the same instrument for the same effect as if all Parties hereto had signed the same signature page. A facsimile or e-mail copy of any Party's signature shall be deemed as legally binding as the original signature.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

I hereby provide this Separation, Waiver and General Release Agreement as of the date set forth below and acknowledge that my execution of this Separation, Waiver and General Release Agreement is in further consideration of the separation benefits that I acknowledge I would not be entitled to if I did not sign it. I intend this Separation, Waiver and General Release Agreement to become a binding agreement between the Company and me if I do not revoke my acceptance within seven (7) days of the date set forth next to my signature below.

Corporate Compliance Statement—Return of Property and Information

Upon hire, I pledged that I would return all HMS company property and all confidential information belonging to HMS, its subsidiaries, affiliates and clients, including protected health information (PHI) in my possession, at such time as my employment by, or business relationship with, HMS ended.

I hereby declare and attest that I have returned to the Company all HMS property previously in my possession or to which I had been granted access, including but not limited to computer, computer equipment, software and peripherals, electronic devices, electronic and paper files, and documents (in paper or electronic form). I also declare and attest that I have returned all confidential information belonging to HMS, its subsidiaries, affiliates and clients, including PHI and/or other confidential information pertaining to individuals or to the Company or its business, along with any and all copies thereof.

I hereby agree not to use, publish, or otherwise disclose any sensitive HMS data or processes, which HMS is obligated to maintain in confidence under applicable law or contract provision. I further attest that I have not maintained any proprietary, sensitive, or protected health information in any medium on my personal electronic devices.

I acknowledge that my authorization to access or possess HMS company property and any PHI or other confidential personal information obtained, used, maintained, or stored in connection with business activities of the Company ceased with the termination of employment by, or business relationship with, HMS.

Further, with respect to confidential medical or health information:

1. I understand that unauthorized disclosure of that information in violation of state or federal law, including but not limited to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and regulations promulgated to implement that statute, may result in civil or criminal penalties.

2. I acknowledge that in receiving, storing, processing, using, or taking any other action with respect to that information, I have been and remain fully bound by federal and state laws and regulations concerning the confidentiality of medical and financial records, including but not limited to applicable federal regulations governing the Medicare and Medicaid programs (42 C.F.R . §§ 431.300 - 431.307; 42 C.F.R. §§ 401.101 - 401.152, and 42 C.F.R § 482.24), the HIPAA Privacy Rule (45 C.F.R. Parts 160 and 164) and applicable state laws and regulations protecting the confidentiality of confidential information.

Finally, I affirm that there are no privacy, compliance or security issues of which I am aware that have not been reported to the respective Chief Compliance Officer and/or Chief Security Officer.

I declare under penalty of perjury that the foregoing is true and correct.

EXHIBIT B

Waiver and General Release Agreement

This Waiver and General Release Agreement ("*Release*"), entered into by and between Semone Neuman (referred to herein as "*You" or "Releasor"*) and HMS Holdings Corp. For purposes of this Release, the term "*Company*" shall refer to HMS Holdings Corp and its corporate affiliates and their respective direct and indirect subsidiaries and successors and assigns. Terms used in this Release with initial capital letters that are not otherwise defined herein shall have the meanings ascribed to such terms in the Separation, Waiver and General Release Agreement, dated _____ ___, 2019, by and between you and the Company (the "*Agreement*"). The Company, together with its past and present parents, subsidiaries, affiliates, shareholders, owners, partners, members, officers, directors, representatives, employees, agents, counsel, successors and assigns, benefit plans, benefit plan trustees and administrators are referred to collectively herein as the "*Releasees.*" You and the Releasees shall be referred to collectively herein as the "*Parties*" and individually as a "*Party.*"

WHEREAS, you and the Company are parties to the Agreement; and

WHEREAS, paragraph 4(B) of the Agreement provides that you will be entitled to certain payments and benefits if you sign a release of claims agreement;

NOW, THEREFORE, in consideration of the mutual promises and covenants contained herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Nature of Agreement and Non-Admission of Liability

This is an agreement of settlement and compromise, and by entering into this Release none of the Parties agree or concede in any manner whatsoever that they violated any law or statute of any jurisdiction, breached any duty, responsibility or contract, or acted improperly in any manner. It is understood and agreed that nothing in this Release shall be interpreted or construed as the admission of any wrongdoing by any or all the Releasees or by any person or entity acting for or on behalf of any or all of the Releasees.

2. Release

In exchange for the consideration provided by the Company under the terms of the Agreement in paragraph 4(B), you irrevocably and unconditionally release and discharge the Releasees jointly and severally, from any and all debts, claims, liabilities, demands and causes of action of every kind, nature and description, in law, or in equity, which against the Releasees, you, your heirs, executors, administrators, successors and assigns ever had, now have or hereafter can, shall or may have for, upon or by reason of any matter, cause or thing whatsoever, from the beginning of time to the date you sign this Release. You represent that you have not assigned or otherwise transferred any interest in any claim that is the subject of this Release.

This Release covers, without limitation, any claims of harassment and/or discrimination on the basis of sex, sexual orientation, gender identification, pregnancy, disability (including claims concerning a history or record of a disability, predisposing genetic condition, and claims that you were regarded as having a disability), handicap, genetic information, race, color, religion, creed, national origin, ancestry, age, citizenship, ethnic characteristics, marital status or military/veteran status and also includes, no matter how denominated or described, any claims under any federal, Texas, South Carolina (or other state) state or local law, statute, rule, regulation, ordinance or executive order of discrimination and/or retaliation and non-payment of wages, bonuses, commissions or other compensation, including, without limitation, the Age Discrimination in Employment Act of 1967 ("*ADEA*"), Older Workers Benefit Protection Act, Employee Retirement Income Security Act of 1974, Title VII of the Civil Rights Act of 1964, Civil Rights Act of 1866, The Civil Rights Act of 1991, Rehabilitation Act of 1973, Executive Order 11246, Executive Order 11141, Genetic Information Nondiscrimination Act of 2008, Americans with Disabilities Act of 1990 ("*ADA*"), ADA Amendments Act, Family and Medical Leave Act, Occupational Safety and Health Act, Fair Labor Standards Act, Worker Adjustment and Retraining Notification Act, Fair Credit Reporting Act, Texas Labor Code Annotated § 21.001 *et seq*. (Texas civil rights law), Texas Labor Code Annotated § 21.055 *et seq*. (Texas whistleblower protection law), Texas Commission on Human Rights Act, Texas Law on Communicable Diseases, Texas Breast-Feeding Rights and Policies Law, the South Carolina Human Affairs Law, as amended, the South Carolina Payment of Wages Law, as amended, and all other federal, state and local laws, and including without any limitation, any claims of wrongful or tortious discharge or termination, breach of contract, breach of the implied covenant of good faith and fair dealing, written or oral, express or implied, breach of promise, public policy, negligence, intentional infliction of emotional distress, negligent infliction of emotional distress, assault, battery, false imprisonment, defamation, libel, slander, invasion of privacy, impairment of economic opportunity, loss of business opportunity, fraud, misrepresentation, and whistleblower activities, and any claim or damage arising out of your employment with and/or separation from the Company (including a claim for retaliation) under any common law theory or any federal, state or local law, statute, rule, regulation, ordinance or executive order not expressly referenced above.

This Release does not apply to any claims or rights that may arise after the date you sign this Release. Excluded from this Release are any claims which cannot be waived by law, including but not limited to, the right to participate in an investigation conducted by certain government agencies. You do, however, waive your right to any monetary recovery from the Company or the Releasees should any agency (*e.g.*, the Equal Employment Opportunity Commission) pursue any claims on your behalf, unless otherwise prohibited by law. You represent and warrant that you have not filed any complaint, charge, or lawsuit against the Company with any government agency or any court.

You agree never to sue the Company or the Releasees in any forum for any claim covered by the above waiver and release language, except that you may bring a claim against the Company under the ADEA to challenge this Release. If you violate this Release by suing the Company or the Releasees, other than under the ADEA or as otherwise set forth above, you shall be liable to the Company and/or the Releasees for their reasonable attorneys' fees and other litigation costs incurred in defending against such a suit. Nothing in this Release is intended to reflect any party's belief that your waiver of claims under ADEA is invalid or unenforceable, it being the interest of the Company and you that such claims are waived.

The Parties intend this Release to be construed and interpreted to the fullest extent permitted by law as a general release. The terms of this Release are accepted by you as full and complete resolution, accord and satisfaction of any and all claims, demands or grievances you have made against, and/or could have made against any of the Releasees.

3. Acknowledgements

You acknowledge that you have no knowledge of any violations by the Company of the Health Insurance Portability and Accountability Act of 1996 ("*HIPAA*"), the Fair Debt Collection Practices Act, the civil or criminal provisions of the federal False Claims Act, the Civil Monetary Penalties Statute, Titles XVIII and XIX of the Social Security Act (the Medicare and Medicaid statutes), the Health Care Benefit Program False Statements Statute, the Health Care Fraud Statute, any and all of the statutory provisions referenced in the Federal Health Care Offense Definitions Statute, or any other federal or state laws relating to negligence, fraud and abuse in health care (collectively, the "*Health Care Laws*"), or the Sarbanes Oxley Act. You have received instruction from the Company on how to report claims or violations under the Health Care Laws and the Sarbanes Oxley Act, and as of the date of executing this Release, have no claims to report under the Health Care Laws or the Sarbanes Oxley Act. You further certify that you have not reported to any government authority or other entity any such healthcare compliance concerns, issues, and/or violations or potential violations, which remain unanswered or unresolved. Furthermore, in connection with the foregoing acknowledgements, you have signed the Corporate Compliance Statement - Return of Company Property & Information document, attached to the Agreement as Exhibit A, and hereby reaffirm the representations therein.

4. Non-Waiver or Release of Subsequent Rights or Claims

Nothing contained herein is intended to or shall constitute a waiver or release of any rights or claims that arise after the date you sign this Release.

5. Non-Waiver of Rights Under this Release

Nothing herein is intended to or constitutes a waiver of any rights the Parties may have under this Release.

6. Representations and Warranties

As a material part of this Release, you make the following representations and warranties:

A. You have not commenced or asserted an administrative charge or complaint, and you have not commenced or asserted, and shall not commence or assert, any lawsuit, arbitration, claim or legal proceeding, against any or all of the Releasees that is designed to remedy or seek redress for any right or rights waived and/or released by this Release.

B. You agree to keep confidential all information relating to this Release, including its negotiation, terms and existence. You may communicate or publish any information relating to this Release to your immediate family (defined herein as parents, siblings, parents-in-law, spouse, domestic partner or children), legal and financial representatives, and tax preparer. Before such information is disclosed by you to any such person(s), however, you shall advise such person(s) that the information they will receive is to be kept confidential, and such person(s) must agree to maintain the confidentiality of the information they receive.

C. You are not aware of any facts or circumstances suggesting that the Company has engaged in any wrongful or unlawful conduct.

7. Remedy in the Event of a Breach

In the event you breach any portion of this Release, you shall immediately, upon written demand, return to the Company all monies paid to you pursuant to paragraph 4(B) of the Agreement, and the Company shall retain all rights to pursue legal and equitable remedies to: (a) enforce the terms of this Release, and/or (b) seek damages for any breach.

8. Additional Representations

By signing this Release, you further acknowledge, understand, and agree that by signing this Release, you are knowingly and voluntarily agreeing to waive and release, among other claims, any and all claims under the ADEA and the Older Workers Benefit Protection Act you have had or may have against the Company and/or the Releasees. Further, you understand and agree that:

A. You may not sign this Release until after the close of business on the Separation Date;

B. You are hereby advised to consult with an attorney before executing this Release;

C. You have carefully read and understand the terms of this Release, and have had a full and fair opportunity to review this Release with an attorney of your choice;

D. You have signed this Release freely and voluntarily and without fraud, duress or coercion and with full knowledge and understanding of its terms and of its significance and consequences and of the rights relinquished, surrendered, released and discharged hereunder; and

E. The only consideration for signing this Release is stated herein, and no other promise, agreement or representation of any kind has been made to you by any person or entity whatsoever to cause you to sign this Release.

9. Manner of Acceptance

In order to accept the terms of this Release, you must return a signed copy to the Company (at the address set forth in paragraph 11 hereof) on or within seven (7) calendar days after the Separation Date (provided that you may not sign this Release until after the close of business on the Separation Date). In the event a timely acceptance is made, and you do not revoke your signature pursuant to paragraph 10, the Company shall provide the consideration described in paragraph 4(B) of the Agreement.

In the event the seventh (7^{th}) day falls on a Saturday, Sunday or on a day that the Company's office is closed, your time to accept the terms of this Release shall be extended until the next regular business day that the Company's office is open.

If you do not revoke your signature to this Release, the eighth (8^{th}) day after your date of acceptance will be the effective date of this Release.

10. Right to Revoke

You may revoke your signature (thereby rescinding your acceptance of the terms of this Release) within seven (7) calendar days from the date on which you sign this Release. If the seventh (7^{th}) day falls on a Saturday, Sunday or on a day that the Company's office is closed, your time to revoke your signature shall be extended until the next regular business day that the Company's office is open. In the event you wish to revoke your signature, you must give written notice to that effect pursuant to paragraph 11 hereof. If you timely revoke your signature on this Release, or if you do not timely sign and return this Release to the Company (pursuant to paragraph 9), this Release shall be null, void and of no effect, and you shall not be entitled to any of the consideration described in paragraph 4(B) of the Agreement.

11. Addresses for Notices

Any notice required pursuant to this Release shall be sent via registered mail, return receipt requested, or overnight mail with delivery confirmation to the following addresses:

If to the Company: HMS, 5615 High Point Drive, Irving, Texas 75038, Attention: Tracy South, Human Resources Department.

If to You:

Any Notice sent in accordance with this paragraph shall be deemed effective upon receipt. Notwithstanding anything to the contrary contained herein, at any time after the execution of this Release any Party may modify the address(es) (including telephone number(s)) to which it desires notices to be sent by advising the other, in writing as provided in this paragraph. Such modification shall be deemed effective upon receipt.

12. General Legal Matters

A. The invalidity or unenforceability of any provision of this Release shall not affect the validity or enforceability of any other provision hereof. In the event any provision of this Release is determined by a court of competent jurisdiction to be invalid, unlawful or unenforceable, it shall be severed from the Release, and the court shall be permitted to redraft the language so as to conform the severed language to the Parties' intent. If any provision, or portion thereof, of this Release is determined to be invalid under applicable statute or rule of law, only such provision, and only to the extent determined to be invalid, shall be deemed omitted from this Release, the remainder of which shall remain in full force and effect. In the event the general release provisions of this Release are determined to be invalid, you shall immediately execute a modified general release that is valid that shall be effective as of the date this Release becomes effective.

B. This Release, together with the Agreement, reflects the entire agreement among the parties relating to the matters set forth herein and relating to your employment. With the exception of the Agreement, the agreements described in paragraph 10(E) of the Agreement and any Non-Qualified Stock Option/Restricted Stock Unit Agreement that you may have received during your employment, which agreements shall remain in full force and effect in accordance with their respective terms and conditions, any other agreements, understandings, promises or commitments among the Parties are superseded by this Release. This Release, together with the Agreement, has been negotiated, drafted and reviewed by the Parties and/or their designated counsel. No language herein shall be construed for or against the interests of any Party on the ground that either Party was the proponent or draftsperson thereof. This Release may not be changed unless the change is in writing and signed by you and the Company.

C. This Release will be governed by and construed as a sealed instrument under and in accordance with the laws of the State of Texas without regard to conflicts of law provisions. Any action, suit or other legal proceeding that is commenced to resolve any matter arising under or relating to any provision of this Release must be commenced only in a court of the State of Texas (or, if appropriate, a federal court located within the State of Texas) and the Company and you each consents to the jurisdiction of such a court. With respect to any such court action, the Company and you (a) submit to the personal jurisdiction of such courts; (b) consent to service of process by the means specified under paragraph 11; and (c) waive any other requirement (whether imposed by statute, rule of court, or otherwise) with respect to personal jurisdiction, inconvenient forum, or service of process. ***THE COMPANY AND YOU EACH HEREBY IRREVOCABLY WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY ACTION, SUIT OR OTHER LEGAL PROCEEDING ARISING UNDER OR RELATING TO ANY PROVISION OF THIS RELEASE.***

D. Paragraph headings used in this Release are for informational purposes only and shall not be construed or interpreted as part of this Release. Usage of the singular shall include the plural and vice versa. Use of male pronouns shall be read to include the female and vice versa.

E. This Release is intended to comply with Section 409A of the Internal Revenue Code of 1986, as amended (the "*Code*"), if and to the extent applicable, and will be interpreted and applied in a manner consistent with that intention. Toward that end, unless permitted sooner by Section 409A of the Code, severance amounts otherwise payable within six (6) months after termination of employment will be deferred until and become payable on the first (1st) day of the seventh (7th) month following termination of employment. Further, to the extent Section 409A of the Code is applicable, the phrase "termination of employment" shall have the same meaning as a "separation from service" as defined in Section 409A of the Code and its accompanying regulations. Notwithstanding any provision of this Release, to the extent required by Section 409A, if the time period in which this Release may be signed and revoked spans two (2) taxable years, the Separation Payments shall be made or commence in the latter year.

F. This Release can be executed in any number of counterparts, each of which shall be effective only upon delivery and thereafter shall be deemed an original, and all of which shall be taken to be one and the same instrument for the same effect as if all Parties hereto had signed the same signature page. A facsimile or e-mail copy of any Party's signature shall be deemed as legally binding as the original signature.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

I hereby provide this Waiver and General Release Agreement as of the date set forth below and acknowledge that my execution of this Waiver and General Release Agreement is in further consideration of the separation benefits that I acknowledge I would not be entitled to if I did not sign it. I intend this Waiver and General Release Agreement to become a binding agreement between the Company and me if I do not revoke my acceptance within seven (7) days of the date set forth next to my signature below.

CERTIFICATION

I, William C. Lucia, certify that:

1. I have reviewed this Annual Report on Form 10-K of HMS Holdings Corp.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d- 15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Cautionary Note Regarding Forward-Looking Statements

For purposes of this 2017 Form 10-K, the terms "HMS," "Company," "we, "us, and "our" refer to HMS Holdings Corp. and its consolidated subsidiaries unless the context clearly indicates otherwise. Included in this 2017 Form 10-K are "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Such statements relate to our current expectations, projections and assumptions about our business, the economy and future events or conditions. They do not relate strictly to historical or current facts.

We have tried to identify forward-looking statements by using words such as "aim," "anticipate," "believe," "estimate," "expect," "forecast," "future," "intend," "likely," "may," "plan," "project," "seek," "strategy," "target," "will," "would," "could," "should," and similar expressions and references to guidance, although some forward-looking statements may be expressed differently. These statements include, among other things, information concerning our future growth, business strategy, strategic or operational initiatives, our future operating or financial performance, our ability to invest in and utilize our data and analytics capabilities to expand our capabilities, the benefits and synergies to be obtained from completed and future acquisitions, the future performance of companies we have acquired, the future effect of different accounting determinations or remediation activities, the sufficiency of our sources of funding for working capital, capital expenditures, acquisitions, stock repurchases, debt repayments and other matters, our future expenses, interest rates, tax rates and financial results, the impact of changes to U.S. healthcare legislation or healthcare spending affecting Medicare, Medicaid or other publicly funded or subsidized health programs, and other statements regarding our possible future actions, business plans, objectives and prospects.

Forward-looking statements are not guarantees and involve risks, uncertainties and assumptions that are difficult to predict. Actual results may differ materially from past results and from those indicated by such forward-looking statements if known or unknown risks or uncertainties materialize, or if underlying assumptions prove inaccurate. These risks and uncertainties include, among other things:

- *our ability to execute our business plans or growth strategy;*
- *our ability to innovate, develop or implement new or enhanced solutions or services;*
- *the nature of investment and acquisition opportunities we are pursuing, and the successful execution of such investments and acquisitions;*
- *our ability to successfully integrate acquired businesses and realize synergies;*
- *variations in our results of operations;*
- *our ability to accurately forecast the revenue under our contracts and solutions;*
- *our ability to protect our systems from damage, interruption or breach, and to maintain effective information and technology systems and networks;*
- *our ability to protect our intellectual property rights, proprietary technology, information processes and know-how;*
- *significant competition for our solutions and services;*
- *our failure to maintain a high level of customer retention or the unexpected reduction in scope or termination of key contracts with major customers;*
- *customer dissatisfaction, our non-compliance with contractual provisions or regulatory requirements;*
- *our failure to meet performance standards triggering significant costs or liabilities under our contracts;*
- *our inability to manage our relationships with information and data sources and suppliers;*
- *reliance on subcontractors and other third party providers and parties to perform services;*
- *our ability to continue to secure contracts and favorable contract terms through the competitive bidding process;*
- *pending or threatened litigation;*
- *unfavorable outcomes in legal proceedings;*
- *our success in attracting qualified employees and members of our management team;*
- *our ability to generate sufficient cash to cover our interest and principal payments under our credit facility, or to borrow or use credit;*
- *unexpected changes in tax laws, regulations or guidance and unexpected changes in our effective tax rate;*
- *unanticipated increases in the number or amount of claims for which we are self-insured;*

- *our ability to develop, implement and maintain effective internal control over financial reporting;*
- *changes in the U.S. healthcare environment or healthcare financing system, including regulatory, budgetary or political actions that affect healthcare spending or the practices and operations of healthcare organizations;*
- *our failure to comply with applicable laws and regulations governing individual privacy and information security or to protect such information from theft and misuse;*
- *our ability to comply with current and future legal and regulatory requirements;*
- *negative results of government or customer reviews, audits or investigations;*
- *state or federal limitations related to outsourcing or certain government programs or functions;*
- *restrictions on bidding or performing certain work due to perceived conflicts of interests;*
- *the market price of our common stock and lack of dividend payments; and*
- *anti-takeover provisions in our corporate governance documents.*

These and other risks are discussed under the headings "Part I, Item 1. Business," "Part I, Item 1A. Risk Factors," "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk" of this 2017 Form 10-K and in other documents we file with the SEC.

Any forward-looking statements made by us in this 2017 Form 10-K speak only as of the date on which they are made. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law. We caution readers not to place undue reliance upon any of these forward-looking statements. You are advised, however, to consult any further disclosures we make on related subjects in our Form 10-Q and Form 8-K reports and our other filings with the SEC.

Market and Industry Data

This 2017 Form 10-K contains market, industry and government data and forecasts that have been obtained from publicly available information, various industry publications and other published industry sources. We have not independently verified the information and cannot make any representation as to the accuracy or completeness of such information. None of the reports and other materials of third party sources referred to in this 2017 Form 10-K were prepared for use in, or in connection with, this report.

Trademarks and Tradenames

We have a number of registered trademarks, including HMS®, as well as the corresponding HMS + logo design mark, HMS IntegritySource®, Eliza® and Essette®. These and other trademarks of ours appearing in this report are our property. Solely for convenience, trademarks and trade names of ours referred to in this 2017 Form 10-K may appear without the ® or ™ symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the right of the applicable licensor to these trademarks and trade names. This report contains additional trade names and trademarks of other companies. We do not intend our use or display of other companies' trade names or trademarks to imply an endorsement or sponsorship of us by such companies, or any relationship with any of these companies.

PART I

Item 1. Business

Founded in 1974, HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. We use innovative technology, extensive data services and powerful analytics, to deliver coordination of benefits, payment integrity and care management and consumer engagement solutions to help healthcare payers improve financial performance and clinical outcomes. We provide coordination of benefits services to government and commercial healthcare payers and sponsors to ensure that the responsible party pays healthcare claims. Our payment integrity services ensure healthcare claims billed are accurate and appropriate, and our care management and consumer engagement technology helps risk-bearing organizations to better engage with and manage the care delivered to their members. Together these various services help customers recover erroneously paid amounts from liable third parties; prevent future improper payments; reduce fraud, waste and abuse; better manage the care their members receive; engage healthcare consumers to improve clinical outcomes while increasing member satisfaction and retention; and achieve regulatory compliance. We currently operate as one business segment with a single management team that reports to the Chief Executive Officer.

HMS began its operations as Health Management Systems, Inc., which became our wholly owned subsidiary in March 2003 when we assumed its business in connection with the adoption of a holding company structure. In recent years HMS has grown both organically and through targeted acquisitions of businesses that helped expand our product suite, including IntegriGuard, LLC (2009), HealthDataInsights, Inc.("HDI") (2011), Essette, Inc. ("Essette") (2016), Eliza Holding Corp. ("Eliza") (2017) and others. The acquisitions of Essette and Eliza significantly expanded the breadth of solutions we offer entities taking risk, creating a new care management and consumer engagement vertical for HMS.

We were originally incorporated in the State of New York in October 2002 and reincorporated in the State of Delaware in July 2013. Our principal executive offices are located at 5615 High Point Drive, Irving, Texas 75038, and our telephone number is (214) 453-3000. As of December 31, 2017, we had approximately 2,500 employees. Additional information about HMS is available on our website at www.hms.com.

Copies of our recent Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and Proxy Statements, as well as amendments to these reports or statements, are available free of charge on our website through the Investor Relations page, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. These materials, as well as similar materials for SEC registrants, may be obtained directly from the SEC through their website at http://www.sec.gov. You may also read and copy materials we furnish to or file with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

The content of any website referred to in this 2017 Form 10-K is not incorporated by reference into this filing unless expressly noted. References to the URLs for these websites are intended to be inactive textual references only.

Our Solutions

Our services are applicable to federal, state and commercial health plans and other healthcare entities taking payment risk. Our coordination of benefits and payment integrity services are designed to address errors across the payment continuum, beginning with an individual's enrollment in a program before any medical service is rendered, to pre-payment review of a claim by a payer, through recovery where identification of an improper payment is made via audit. Our services address a wide spectrum of payment errors, including eligibility and coordination of benefits errors, the identification and investigation of potential fraud, and determinations that claim amounts paid were improper and our services extend to most claim types. Our care management and consumer engagement services also assist customers in managing quality, risk, cost and compliance across all lines of business. As a result of these services, customers received billions of dollars in cash recoveries in 2017, and saved billions more through the prevention of erroneous payments, improved clinical outcomes for their members, and reduced enrollment turnover.

In general, our range of products and services include the following:

COB SERVICES

Coordination of Benefits

Our coordination of benefits services are provided primarily for state governments and Medicaid managed care plans and draw principally upon proprietary information management and data mining techniques designed to ensure that the correct party pays a healthcare claim. We offer cost avoidance services, which include providing validated insurance coverage information that is used by payers to coordinate benefits properly for future claims. With validated insurance information, Medicaid payers can avoid unnecessary costs by ensuring that they pay only after all other insurance coverage available has been exhausted, thereby complying with federal regulations that require Medicaid to be the payer of last resort. Nevertheless, due to a variety of factors, some Medicaid claims are paid even when there is a known responsible third party. Our government-sponsored program customers rely on us to identify those claims that were paid in error and recover these payments from the liable third party. Further, we also provide services to assist customers in identifying other third-party insurance and recovering medical expenses where a member is involved in a casualty or tort incident. Lastly, for Medicaid agencies exclusively, we provide estate recovery services to identify and recover Medicaid expenditures from the estates of deceased Medicaid members in accordance with state policies. For the years ended December 31, 2017, 2016 and 2015, our coordination of benefit services represented 73.4%, 72.2% and 71.2% of our total revenue, respectively.

ANALYTICAL SERVICES

Payment Integrity

Our payment integrity services are designed to ensure that healthcare payments are accurate and appropriate. These services are applicable to all customers that HMS serves, including federal and state governments, commercial health plans and other at-risk entities. Our solutions are designed to verify that medical services are utilized, billed and paid appropriately. We combine data analytics, clinical expertise and proprietary algorithms and technology to identify improper payments on both a pre-payment and post-payment basis; identify and recover overpayments/underpayments; detect and prevent fraud, waste and abuse; and identify process improvements. For the years ended December 31, 2017, 2016 and 2015, our payment integrity services represented 20.0%, 27.6% and 28.8% of our total revenue, respectively.

Care Management and Consumer Engagement

Our care management and consumer engagement solutions help our customers manage the care delivered to their members with a focus on improving clinical outcomes and patient engagement. We offer a broad foundation of technology and service solutions to support a health engagement management framework, which enable health plans and other risk-bearing entities to better manage costs and clinical outcomes and improve their member experience. Our care management and consumer engagement vertical leverages HMS data and analytics with a combination of Essette and Eliza solutions currently aimed at care management, risk management and member engagement in order to provide customers with a tailored, integrated platform that addresses core healthcare industry challenges on an enterprise scale. For the years ended December 31, 2017 and 2016, our care management and consumer engagement services represented 6.6% and 0.2%, of our total revenue, respectively.

Intellectual Property

Our ability to develop and maintain the proprietary aspects of our technology and operate without infringing the proprietary rights of others are important to our business and competitive position. We establish and protect our proprietary technology and intellectual property through a combination of patents, patent applications, trademarks, copyrights, domain names, and trade secrets, including know-how, confidentiality and invention assignment agreements, security measures, non-disclosure agreements with third parties, and other contractual rights.

We own a number of patents and trademarks that are important to HMS. As of December 31, 2017, our patent portfolio is comprised of approximately 50 domestic and international patents, and we are currently pursuing numerous patent applications in the United States and around the world. We have a number of registered trademarks, including HMS®, and the corresponding HMS + logo design mark, HMS IntegritySource®, Eliza®, Essette® and other registered and common law trademarks. We also hold copyrights relating to certain aspects of our products and services. While we consider all of these proprietary rights important in the operation of our business, we do not believe any one individual technology is essential to our business.

Customers

We provide our solutions to customers across a broad range of entities within the healthcare industry, including health plans, state agencies, federal programs, private employers and other at-risk providers. For the years ended December 31, 2017, 2016 and 2015, our total revenue was $521.2 million, $489.7 million and $474.2 million, respectively. No single customer accounted for 10% or more of our total revenue during any period presented.

The composition of our 10 largest customers changes periodically. For the years ended December 31, 2017, 2016 and 2015, our 10 largest customers represented 39.5%, 40.6% and 44.0% of our total revenue, respectively. The current terms of our agreements with these customers have expiration dates ranging between 2018 and 2023. Several of our contracts, including those with some of our largest customers, may be terminated for convenience. The early termination of a contract with one of our significant customers may have an adverse effect on our financial condition, results of operations and cash flows.

We provide products and services under contracts (or subcontracts) that contain various revenue structures, including contingent revenue and to a lesser extent fixed-fee arrangements. Many of our state government contracts have terms ranging from three to five years, including renewal terms at the option of the customer. In many instances, we provide our services pursuant to agreements that are subject to periodic reprocurements. Because we provide our services pursuant to agreements that are open to competition from various businesses in the U.S. healthcare insurance benefit cost containment arena, we cannot provide assurance that our contracts, including those with our largest customers, will not be terminated for convenience, awarded to other parties, or renewed. Additionally, we cannot provide assurance that our contracts, if renewed, will have the same fee structures or otherwise be on satisfactory terms.

Industry Trends and Opportunities

U.S. healthcare expenditures continue to escalate and consume a large proportion of the U.S. GDP, presenting challenges for payers who wish to contain and reduce costs while also promoting quality healthcare outcomes. These aims are the same across all at-risk entities, including commercial health plans and government healthcare programs, such as Medicaid and Medicare.

Within the commercial market, health plans sell policies directly to individuals (on the open market or via health insurance exchanges), contract with employers to underwrite their employees' care, or contract with self-insured employers to oversee benefit administration to their employees. This market also includes a growing number of risk bearing provider-sponsored plans that operate and market health plan benefits. According to CMS NHE projections, private health insurance covered approximately 200.1 million individuals at a cost of $1.2 trillion in 2017.

Several commercial health plans also offer government-sponsored lines of business, including partnering with Medicare, Medicaid and CHIP to oversee care delivery for beneficiaries enrolled in those programs. Government managed care grew out of pressures to contain the growth of state and federal program spending and to address general concerns about healthcare access. In most states, managed care is currently the predominant delivery system for Medicaid. As of July 2017, all states except three had some form of managed care in place, including the District of Columbia. Among the 39 Medicaid programs (38 states plus the District of Columbia) with comprehensive risk-based MCOs, 29 states reported that 75% or more of their Medicaid beneficiaries were enrolled in MCOs as of July 1, 2017. More states continue to carve-out complex populations as well as behavioral health services into MCO contracts. Of the 32 Medicaid programs (31 states plus the District of Columbia) that opted to expand Medicaid eligibility levels pursuant to the ACA, 27 states were using MCOs to cover newly eligible adults as of July, 2017. Of those 27 states, 24 states covered more than 75% of beneficiaries in this group through risk-based managed care. It is unclear at this time how, if at all, efforts in Congress to "repeal and replace" the ACA could affect any of the state expansions or potential future growth of Medicaid lives and expenditures. As Congress continues to debate proposals to repeal major portions of the ACA, including the ACA's Marketplace and Medicaid coverage expansions, as well as other proposals to fundamentally restructure Medicaid's financing structure, the implications of these proposals remain unclear.

Similarly, managed care health plans also continue to assume risk for Medicare lives, with the Kaiser Family Foundation estimating that 33% of all Medicare beneficiaries, or 19.0 million lives, were enrolled in a Medicare Advantage Plan in 2017. HMS also continues to serve government-sponsored agencies' legacy fee-for-service programs at the state and federal level. These plans are generally reliant on and susceptible to the government appropriations process that determines their budget and governs the number of beneficiaries they serve.

According to the CMS NHE projections, Medicare programs in 2017 covered approximately 57.7 million people at a cost of approximately $718.7 billion and Medicaid/CHIP covered approximately 79.9 million people, costing approximately $604.1 billion. Altogether, it is projected that the government programs we serve covered approximately 137.6 million people at a total cost of approximately $1.32 trillion in 2017.

CMS projects Medicaid spending and enrollment will grow 6.0% and 1.7%, respectively in 2018 over 2017. CHIP spending is expected to grow 6.7% in 2018 over 2017, and CHIP enrollment is expected to increase 3.5% in 2018 over 2017. As commercial and government health plans continue to focus on strategies to contain costs across their different lines of business, we will continue to focus on serving them and meeting their evolving needs. Regardless of the program, coordinating benefits among a growing number of healthcare payers and ensuring that claims are paid appropriately represents an enormous challenge for our customers and an ongoing opportunity for us.

Regulatory Environment

The market for cost containment solutions is large and growing, driven by increasing healthcare costs and payment complexities. For 2018, Medicare and Medicaid are projected to pay approximately 45.3% of the nation's healthcare expenditures and serve over 140.7 million beneficiaries. Many of these beneficiaries are enrolled in managed care plans, which have the responsibility for both patient care and claim adjudications. Since 1985, we have provided state Medicaid agencies with services to identify third parties with primary liability for Medicaid claims, and since 2005, we have provided similar services to Medicaid managed care plans.

In 2006, Congress enacted the DRA and created the Medicaid Integrity Program under the Social Security Act to increase the government's capacity to prevent, detect and address fraud, waste and abuse in the Medicaid program. Later that year, Congress passed the Tax Relief and Health Care Act of 2006, which established the Medicare RAC program. HDI was awarded one of the first contracts under the program. In October 2016, CMS made a new round of awards and we again were awarded a region. These measures, at both the federal and state level, have strengthened our ability to identify and recover erroneous payments on behalf of our customers.

The ACA was signed into law in 2010. It included many provisions impacting healthcare delivery and payment programs, including employer-sponsored health coverage, expansion of the Medicaid program, health insurance exchanges with premium subsidies, and payment integrity efforts. In 2017, Congress considered the revision or repeal of some or all of the ACA. Options that have been considered include issuing block grants or establishing per capita caps for state Medicaid populations, and looking at program design alternatives for future enrollment criteria. We will monitor ACA-related changes as they develop and assess their potential impact, as well as any opportunities they may present for our customers and for us.

Competition

The U.S. healthcare insurance benefit cost containment marketplace is a dynamic industry with a range of businesses currently able to offer cost containment services, both directly or indirectly (through subcontracting), to some or all of the various healthcare payers. In addition, with improvements in technology and the growth in healthcare spending, new businesses are incentivized to enter this marketplace. Many healthcare payers also have the ability to perform some or all of these cost containment services themselves and choose to exercise that option. Competition is therefore robust as customers have many alternatives available to them in their effort to contain healthcare costs.

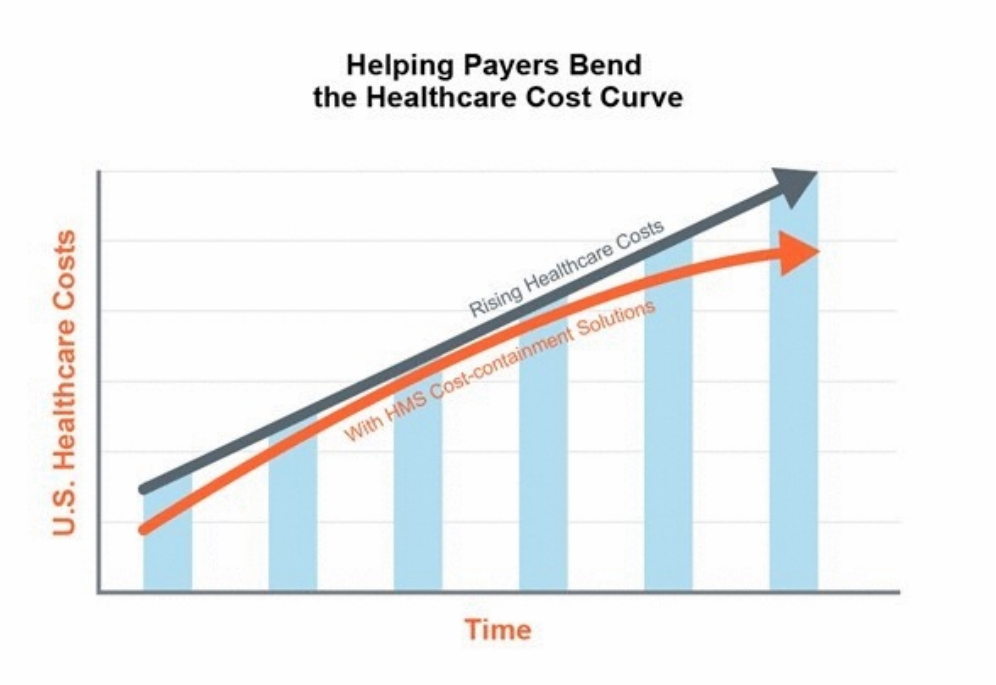
We compete based on a variety of factors, including our ability to perform a wide range of coordination of benefits and payment integrity related functions; proven results to maximize recoveries and cost avoidance; our in-depth government healthcare program experience; clinical staff expertise; extensive insurance eligibility database; proprietary systems and processes; existing relationships with various customers and other industry stakeholders; and our ability to provide customers with actionable intelligence to improve clinical outcomes and patient engagement.

Within our core coordination of benefits services, we compete primarily with large business outsourcing and technology firms, claims processors and PBMs, clearinghouses, healthcare consulting firms, smaller regional vendors and other TPL service providers. In addition, we frequently work with customers who may elect to perform some or all of their recovery and cost avoidance functions in-house. The competitive environment for payment integrity services includes some of the same companies that provide coordination of benefits services. Within the care management and risk analytics sector, we compete primarily with vendors who provide these and other population health management technology services. Companies with whom we compete across our product offerings include:

- Accenture
- CaseNet
- Change Healthcare
- Cognizant/TriZetto Healthcare Products
- Cotiviti Corporation
- Equian, LLC
- Experian Health
- Optum
- IBM Watson Health
- Inovalon
- LexisNexis
- MedHok
- DXC Technology Solutions
- Performant Financial Corp.
- SCIO Health Analytics
- Verscend Technologies, Inc.
- Welltok
- Conduent
- ZeOmega

Business Strategy

We believe that the steadily increasing enrollment and rising expenditures for Medicare and Medicaid, with most new enrollees entering managed care plans; an aging U.S. population with an increasing concentration of individuals with high cost chronic conditions and often co-morbidities; and the overall complexity of the healthcare claims payment system in the U.S. all combine to create substantial growth opportunities for the suite of cost containment solutions we offer.



We also believe these factors present growth opportunities for our care management and consumer engagement solutions. We expect to grow our business over the course of 2018 and beyond, both organically and inorganically, by leveraging existing key assets (e.g., our data, analytics, in-house expertise, and distribution channel) and pursuing a number of strategic objectives or initiatives, including:

- *Expanding the scope of our relationship with existing customers* – by selling additional products and services, including those designed to improve member engagement and improve clinical outcomes.
- *Adding new customers* – by marketing to commercial health plans, including Medicaid managed care and Medicare Advantage plans, at-risk group and individual health lines of business and ASO; government healthcare payers, including Medicaid agencies, state employee health benefit plans and CHIP; at-risk provider organizations and ACOs; and commercial employers.
- *Introducing new "homegrown" products and services* – through internal development initiatives designed to enhance or expand our existing suite of cost containment solutions.
- *Utilizing big data* – to create a more nimble operating environment, create operating efficiencies, improve the yield on our existing product suite and identify new revenue opportunities within our current service delivery models.

- *Promoting automation and innovation to improve the efficiency and effectiveness of our services* – by continuing to implement new technology and process improvements designed to increase recovery yields, increase customer satisfaction, and achieve greater operating efficiencies.

- *Building out our new care management and consumer engagement technology platform* – by continuing to grow a broad foundation of technology and service solutions to help customers better manage quality, cost and compliance across all lines of business. Our first steps in this strategy were the acquisition of Essette and Eliza.

- *Prudent deployment of capital* – by investing in internal growth initiatives; selectively investing in capabilities, technologies, and assets to complement our core cost-containment expertise; building care management and care coordination adjacencies to complement the Essette and Eliza acquisitions; and expanding our data analytics capabilities. Our focus may include acquisitions that represent long-term growth potential, target high-growth areas, are accretive to earnings, and fill a strategic need in our business portfolio as we seek to provide increasingly comprehensive solutions to our customers. We may also repurchase our shares, pursuant to a two-year $50 million authority granted by our Board of Directors in November 2017.

Item 1A. Risk Factors

Our business is subject to significant risks, including the risks and uncertainties described below. You should carefully consider these risks, as well as the other information in this 2017 Form 10-K, including our Consolidated Financial Statements and the related Notes. The occurrence of any of these risks could adversely affect our business, financial condition, results of operations, and cash flows in a material way.

Risks Relating to Our Company

Our ability to expand our business will be adversely affected if we fail to implement our growth strategy.

The size and the scope of our business operations have expanded over the past several years, and we currently intend to continue to grow and expand into new areas of the healthcare industry; however, such growth and expansion carries costs and risks that, if not properly managed, could adversely affect our business. Our future growth will depend on, among other things, our ability to successfully execute our business plans, which includes retaining existing customers, attracting new customers and improving our operations, all while remaining competitive. We must also be flexible and responsive to our customers' needs and to changes in the political, economic and regulatory environment in which we operate. The greater size and complexity of our expanding business puts additional strain on our administrative, operational and financial resources and can make optimal resource allocation more difficult to determine. We may not be able to maintain or accelerate our growth. A failure to anticipate or properly address the demands and challenges that our growth strategy and potential diversification may have on our resources and existing infrastructure may result in unanticipated costs and inefficiencies and could negatively impact our ability to execute on our business plans and growth goals, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If we fail to innovate and develop new or enhanced solutions and services, or if these solutions and services are not adopted by our customers, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Part of our growth strategy depends on our ability to respond to the evolving healthcare landscape with new and enhanced solutions and services that our existing and potential customers are willing to adopt. The development, marketing and implementation of these solutions and services may require that we make substantial financial and resource investments. We face risks that our new or modified solutions and services may not be responsive to customer preferences or industry changes, and that the solution and service development initiatives that we prioritize may not yield the gains that we anticipate, if any. If we are unable to predict market preferences or healthcare industry changes, or if we are unable to develop or adapt solutions and services that are responsive to existing and potential customers' needs, we may fail to expand our business, which could constrain our future revenue growth and materially adversely affect our business, financial condition, results of operations and cash flows.

Our acquisition strategy may subject us to considerable business and financial risk.

Historically, to achieve our strategic goals, we have made a significant number of acquisitions that have expanded the solutions and services we offer, provided a presence in complementary business lines, or expanded our geographic presence and/or customer base. For example, we acquired IntegriGuard, LLC in September 2009; Verify Solutions, Inc. in December 2009; Allied Management Group-Special Investigation Unit in June 2010; Chapman Kelly, Inc. in August 2010; HDI in December 2011; MedRecovery Management, LLC in December 2012; Essette in September 2016; and Eliza in April 2017.

We intend to pursue future acquisitions that will continue to expand and diversify our business and to periodically engage in discussions regarding such possible acquisitions. We are subject to risks and uncertainties relating to our ability to identify suitable potential acquisition candidates, to consummate additional acquisitions that will be advantageous to us, and to successfully integrate future acquisitions. Future and potential business acquisitions involve a number of risk factors that could affect our operations, including, but not limited to:

- diversion of management's attention and other resources;
- our ability to successfully and timely integrate operational, accounting and technology functions, policies, processes, systems and controls, and to implement these functions, policies, processes, systems and controls, without incurring substantial expenses, delays, difficulties or other issues;
- our ability to integrate personnel and human resource systems as well as the cultures of the acquired business;
- our ability to retain or replace the key personnel of the acquired business;
- our ability to maintain relationships with the customers of the acquired business and further develop the acquired business;
- our ability to cross-sell our solutions and services and the solutions and services of the acquired business to our respective customers;
- customer dissatisfaction or performance problems with the acquired business;
- our ability to comply with regulatory requirements and avoid potential conflicts of interest in markets that we serve;
- the misuse of intellectual property by the personnel of the acquired business;
- our ability to successfully enter into unfamiliar markets;
- assumption of unanticipated legal or financial liabilities and/or negative publicity related to prior acts by the acquired business;
- we may become subject to litigation or other claims in connection with the acquired business, including claims from terminated employees, customers, former shareholders or third parties;
- we may become significantly leveraged as a result of incurring debt to finance an acquisition;
- the acquired business may not perform as projected which could negatively impact earnings or contingent consideration;
- we may suffer impairment of goodwill and other acquired intangible assets; and
- we may suffer dilution to our earnings per share.

If we fail to adequately address these risks, or to successfully integrate the businesses that we acquire, we may not realize cost efficiencies, synergies or other benefits that we anticipated when selecting our acquisition candidates, and our reputation, business, financial condition, results of operations and cash flows could be materially adversely affected.

You will not be able to rely on our operating results in any particular period as an indication of our future performance because they are subject to significant fluctuation which may cause the market price of our common stock to decrease significantly.

Our revenue and operating results may fail to match our past or projected performance and could vary significantly from period-to-period as a result of a number of factors, some of which are outside of our control. We have experienced fluctuations in our revenue and operating results in the past and they may vary in the future for reasons that include, but are not limited to:

- fluctuations in sales activity given our sales cycle;
- the length of contract and implementation periods;
- the commencement, completion or termination of contracts during any particular quarter;
- contract costs and expenses, which may be incurred in periods prior to revenue being recognized;
- the timing of period revenue recovery projects and third party payers' claim adjudication;
- the billing and budgeting cycles of our customers;
- the timing of government procurement activities, including when contract awards are announced and the time required to resolve bid protests;
- contract renewal discussions, which may result in delayed payments for services already performed;
- changes in the pricing structure or other significant terms in our contract, or the scope of services we perform;
- technological and operational issues affecting our customers, including delays in payment receipt for previously recognized revenue due to delays in certain customers processing our findings through their systems, and restrictions on our ability to use or access certain data or a lack of integrity or quality in the data or information we receive from certain data sources;
- adjustments to age/quality of receivables and accruals as a result of factors such as delays involving contract limitations or changes, subcontractor performance deficiencies or internal managerial decisions not to pursue identified claim revenue from customers;

- the impact of service disruptions or delays in the systems or operations of subcontractors, partners, vendors and other third party providers on which we rely on to deliver a single-source solution or service to our customers;
- changes in applicable laws;
- changes in accounting policies or guidelines concerning the timing of recognition of revenue; and
- regulatory changes or general economic conditions as they affect healthcare providers and payers.

We cannot predict the extent to which future variations could occur due to these or other factors. In addition, occasionally our state and federal customers are requested by third party payers to refund payments that we previously recovered for our customers. If our state and federal customers choose to refund money in response to these requests, regardless of whether an error actually occurred in connection with the payments, we may also be required to return contingent revenue which we were previously paid associated with such refunded payment. Consequently, our operating results are subject to significant fluctuation for any particular quarter, fiscal year, or other period, and may not be indicative of future periods. Our business is also subject to seasonal patterns resulting from increased efforts at year-end by certain customers to generate additional savings, complete compliance obligations and close gaps in care. However, taken as a whole, we do not consider our operations to be seasonal to any material degree. Due to all of these factors, our revenue and operating results are difficult to predict and are subject to significant fluctuation, which may cause the market price of our common stock to decrease significantly.

We face challenges associated with forecasting the revenue under our contracts, and any failure to accurately forecast such revenue could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to accurately estimate the factors upon which we base our contract pricing, or the costs and timing for implementing and completing contracts. For a majority of our customer contracts, the payment of our fee is contingent upon the recoveries received by our customers. We also have cost-plus or time-and-material based contracts with the federal government where our revenue is recognized based on costs incurred plus an estimate of the negotiated fee earned. Our ability to earn a profit on these contracts requires that we accurately estimate the costs involved with these contracts and assess the probability of achieving certain outcomes or milestones within the contracted time period. In addition, we cannot predict with certainty the costs or the period in which implementation or contracts may be completed when we introduce new solutions or services into the marketplace. We may also face a long implementation period with a new customer or a new contract with an existing customer, making it difficult to reliably forecast revenue under those contracts. If we do not accurately estimate the costs and timing for completing projects, or if we encounter increased or unexpected costs, delays, failures, liabilities or risks, including those outside of our control, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. Although we believe that we have recorded adequate provisions in our financial statements for losses on our fixed-price and cost-plus contracts where applicable, as required under U.S. GAAP, our contract loss provisions may not be adequate to cover all actual future losses.

System interruptions or failures could expose us to liability and harm our business.

Our data and operation centers are essential to our business and our operations depend on our ability to maintain and protect our information systems. We attempt to mitigate the potential adverse effects of a disruption, relocation or change in operating environment; however, the situations we plan for and the amount of insurance coverage that we maintain may not be adequate in every case. Despite systems redundancy and security measures, our systems and operations are vulnerable to damage or interruption from, among other sources:

- power loss, transmission cable cuts and telecommunications failures;
- fire, flood, earthquake and other natural disasters;
- hardware failures or software defects;
- operator error;
- cyber security breaches; and
- physical break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond our control.

In addition, while there are backup systems in many of our operating facilities, an extended outage of utility or network services supplied by third party IT vendors or providers may delay or disrupt the delivery or performance of the solutions and services we provide for our customers. If we encounter a lengthy business interruption, or in the event our business continuity plans and business interruption insurance coverage are not adequate or fail to compensate us on a timely basis, we could suffer operational disruptions, disputes with customers, civil or criminal penalties, regulatory problems, increases in administrative expenses, loss of our ability to produce timely and accurate financial and other reports, damage to our reputation or customer relationships or other adverse consequences, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our systems and networks and those of third parties on which we rely may be subject to cyber security breaches and other disruptions that could compromise our information and harm our business.

In the ordinary course of our business, we rely heavily upon our technology systems and networks, as well as on the products and services of third-party providers, to input, transmit, maintain and communicate the confidential and proprietary data we receive from our customers and other data suppliers (e.g. private insurance plans, financial institutions, etc.). In addition, subcontractors, teaming partners or other third-party vendors may receive or utilize this information on our behalf in support of the services we perform for our customers. The secure processing and maintenance of this information is critical to our operations and business strategy. Although we have spent significant resources to implement security and privacy programs and controls, train our workforce and augment our security measures with the implementation of new technologies and processes, our information technology and infrastructure, and those of third parties on which we rely, have been, and will likely continue to be subject to computer hacking, acts of vandalism or theft, malware, computer viruses or other malicious codes, phishing, employee error or malfeasance, catastrophes, unforeseen events or other cyber-attacks. To date, we have seen no material impact on our business or operations from these attacks, however, we may be unable to implement adequate preventive measures to protect against such compromises in the future or to effectively adapt our security measures to evolving security risks. As a result, our technology systems, including our data and our customers' data, could be accessed improperly, made unavailable, improperly modified, corrupted or otherwise breached or compromised, or we could suffer system disruptions, shutdowns and denials of service. Similarly, we could be materially adversely affected by the loss of proprietary, trade secret or confidential technical and financial data if our internal networks are compromised. The occurrence of any of these events could harm the market perception of the effectiveness of our security measures, lead to reputational damage or the loss of our customers' confidence in our solutions and services, negatively affect our ability to attract new customers, cause existing customers to terminate or not renew our solutions and services, or to deter them from using our solutions or services in the future, all of which could reduce our revenue, increase our expenses and expose us to potential liability under privacy, security or other applicable laws and regulations. We could also be forced to expend significant resources in response to a security breach, including investigating the cause of the breach, repairing system damage, remediating vulnerabilities in our security procedures, increasing cyber security protection costs by deploying additional personnel and protection technologies, paying regulatory fines and litigation costs, and resolving legal claims and regulatory actions, all of which could increase our expenses, divert the attention of our management and key personnel away from our business operations and materially adversely affect our business, financial condition, results of operations and cash flows.

If we are unable to protect our proprietary technology, information, processes, know-how, and other intellectual property and intellectual property rights, or become subject to claims of infringing or misappropriating the intellectual property of third parties, the value of our solutions and services may be diminished and our business may be materially adversely affected.

Our success as a company depends in part upon our ability to protect our core technology and intellectual property. Our expanding operations and efforts to develop new solutions and services also make protection of our intellectual property more critical. We seek to protect our intellectual property and other proprietary information through a combination of patent, trademark, copyright, trade secret and unfair competition laws, confidentiality agreements and invention assignment agreements with employees, consultants and other third parties, as well as through the terms of our agreements with customers and vendors, and other security measures. However, the steps we have taken to deter misappropriation of intellectual property may be insufficient to protect our proprietary information. Misappropriation of our intellectual property by third parties, or any disclosure or dissemination of our confidential and proprietary business intelligence, queries, algorithms and other similar information by any means, could undermine any competitive advantage we currently derive or may derive from that intellectual property. For example, our current or former employees, consultants or other third parties may unintentionally or willfully disclose our trade secrets, know-how or other confidential and proprietary information to competitors. Competitors have also attempted to use state open records and/or federal Freedom of Information Act laws to obtain our proposal responses and other documents we provide to our government customers. We cannot be certain that our efforts to protect the confidential and proprietary trade secret information or intellectual property in these proposals or other documents will always be successful, due to the many factors underlying the various state and federal decisions to release information in response to open records requests (even in spite of our objections and efforts to protect such information). In addition, there remains the possibility that others will independently develop competing technologies that may be equivalent or superior to ours. If our efforts to protect our intellectual property and other proprietary rights are inadequate to prevent unauthorized use or appropriation by third parties or our employees, the value of our brand and other intangible assets may be diminished and others may be able to more effectively compete with our business by offering solutions or concepts that are substantially similar to ours, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, third parties may claim that we are infringing upon or misappropriating their intellectual property, or assert other legal challenges to our intellectual property. Our exposure to risks related to the use of intellectual property may also increase as a result of acquisitions because third parties may make infringement and similar or related claims after we have acquired technology. Any of these situations could cause us to expend significant time and resources and to incur substantial costs associated with litigation or legal proceedings that may be necessary to defend ourselves or to enforce our intellectual property rights, in which we may not ultimately prevail, and could result in our being prevented from furnishing certain solutions and services.

We face significant competition for our solutions and services and we expect competition to increase, which could materially adversely affect our business, financial condition, results of operations and cash flows.

The market for healthcare cost containment solutions is intensely competitive, driven by rapidly changing technologies, evolving industry standards and customer demands to become more efficient. Our competitors range in size from large, diversified national companies to small, specialized firms, and could include current or former subcontractors or teaming partners seeking to establish direct relationships with our customers in order to perform similar services as the prime contractor, as well as current and prospective customers that elect to perform recovery and cost avoidance functions in-house or to develop in-house capacities for solutions and services that we provide or hope to provide. Consolidation among vendors and healthcare providers, as well as the merging of some of our competitors or formation of business alliances with other competitors, have contributed to the increasingly competitive environment. For example, certain state customers have combined or "bundled" TPL services under large-scale IT procurements, allowing MMIS vendors to partner with less experienced TPL identification vendors based on preferred relationships or favorable pricing. In addition, companies that have invested in proprietary technology different from our own solution and service offerings, such as front-end analytics, have emerged as new competitors due to the rapidly evolving healthcare landscape. There is also increasing sophistication in the solutions and services that our competitors are developing that may become more efficient or appealing to our customers. In order to remain competitive, we may need to quickly develop and market new and enhanced solutions and services responsive to emerging technologies and changes in the healthcare industry, which may require that we make substantial financial and resource investments.

We may not be able to compete successfully against our existing or future competitors. Some of these competitors have significantly greater financial and technical resources, and others have longer operating histories and greater name recognition than we do in certain markets. They may be able to (i) offer lower prices or negotiate fee reductions on our current solutions and services, (ii) respond more quickly than we can to new and emerging technologies and changing customer requirements, (iii) devote greater resources to the sale of their products and the development and implementation of new and improved systems, solutions and services for customers that we serve, and (iv) pursue various acquisitions that allow them to rapidly amass a wide array of capabilities. We may be forced to lower our pricing, unexpectedly increase or enhance our technological or data capabilities, or modify our solution or service offerings. Notwithstanding any changes we make in response to increased competition, the demand for our solutions and services may decrease as a result of increased competition. A failure to be responsive to our existing and potential customers' needs or the changing industry landscape could hinder our ability to maintain or expand our customer base, hire and retain new employees, pursue new business opportunities, complete future acquisitions and operate our business effectively. Any inability to compete effectively could materially adversely affect our business, financial condition, results of operations and cash flows.

Our business could be materially adversely affected if we fail to maintain a high level of customer retention, if our customers elect to reduce the scope of our contracts or terminate them before their scheduled expiration dates or if we fail to meet performance standards under our customer contracts.

We historically have derived and expect to continue to generate a significant portion of our revenue from a limited number of large customers at the federal and state level. Our contracts with these customers are subject to periodic renewal and some permit them to terminate their contracts on short notice, with or without cause. If a customer is dissatisfied with the quality of our work or if we fail to meet performance standards under our contracts, or if our solutions, technical infrastructure or services do not comply with the provisions of our contractual agreements or applicable regulatory requirements, customers might seek to reduce the scope of the services we perform or prematurely terminate their agreements with us, or we could incur additional costs that may impair the profitability of a contract and damage our ability to obtain additional work from that customer, or other current or prospective customers. For example, some of our contracts contain liquidated damages provisions and financial penalties related to performance failures, which if triggered, could materially adversely affect our reputation, business, financial condition, results of operations and cash flows. We also may be required to disclose such liquidated damages or other financial penalties assessed against us in connection with future bids for services with other customers.

In addition, government customers are subject to financial pressures or pressure from stakeholders that may cause them to terminate contracts for our services that may be regarded as non-essential or to redefine or reduce the scope of our contracts by, for example, significantly reducing the volume of data that we are permitted to audit or renewing the contract at lower performance fee levels. Despite our right to prompt and full payment under the terms of our contracts, we could face challenges in obtaining timely or full payments for our properly provided services from our customers. If there is a substantial reduction in the scope of our services under, or a termination of, any of our key contracts with our major customers, or if we are exposed to significant costs, liabilities or negative publicity, our ability to compete for new contracts with current or prospective customer could be damaged and our business, financial condition, reputation, results of operations and cash flows could be materially adversely affected.

Any failure to maintain effective information processing systems and the integrity of the data in, and operations of, those systems could materially adversely affect our business, financial condition, results of operations and cash flows.

Our ability to conduct our operations and accurately report our financial results depends on the integrity of the data in our information systems and the processes performed by those systems. As a result of the services we provide, we process a number of complex transactions that require us to access, store, retrieve, manipulate, manage and transmit our customers' information and data, external data, as well as our own data. Although we have invested a great deal of time and resources in developing systems, processes and controls that protect the integrity of the data, such measures cannot provide absolute security. It is possible that failures or errors in hardware and software, including those in third-party technology, or technical deficiencies in our systems could result in data loss or corruption, or cause the data that we collect, utilize or disseminate to be incomplete or contain inaccuracies that our customers regard as significant. In addition, these information systems and applications require continual maintenance, upgrading and enhancement to meet our operational needs, satisfy customer requests and handle our expansion and growth. Despite our testing and quality control measures, we cannot be certain that errors or system deficiencies will not be found and that remediation can be done in a timeframe that is acceptable to our customers, or that customer relationships will not be impaired by the occurrence of errors or the need for remediation. In addition, implementation of upgrades and enhancements may cost more, take longer or require more testing than originally expected. Situations may also arise in which the accuracy of our data analysis or the content and quality of our work product is central to the disposition of claims, controversies or litigation between our customers and third parties that would require us to allocate significant resources to fulfilling our contractual obligations to provide our customers with full and complete access to records, analysis and back-up documentation of our work. Assuring our capacity to fulfill these obligations as well as actually fulfilling them could impose significant burdens on our infrastructure for data storage, maintenance and processing, and require us to incur increased costs to supplement our personnel, data storage and computing resources, which could materially and negatively impact other business operations.

We depend on many different entities to supply information and an inability to successfully manage our relationships with a number of these suppliers may harm the quality and availability of our solutions and services.

We obtain the data used in our solutions and services from many sources, including commercial health insurance plans, financial institutions, managed care organizations, government entities and non-government entities. From time to time, challenges arise in managing and maintaining our relationships with data sources that are not our customers and that furnish information to us pursuant to a combination of voluntary cooperation and legal obligations under laws and regulations that are often subject to differing interpretation. For example, data suppliers could seek to limit or end our access to and use of their data if they determine that certain uses of data for our customers are not permitted by our agreements, or such suppliers may make errors in compiling, transmitting or accurately characterizing data or have technological limitations that interfere with our receipt or use of the data we rely on them to provide. If a number of our information sources become unable or unwilling to provide us with certain data under terms of use that are acceptable to us and our customers, or if laws and regulations for use and protection of this data changes in a way that disincentivizes our suppliers, or imposes unacceptable or unreasonable conditions or risks on us, we may not be able to obtain new or favorable agreements with alternative data suppliers. In addition, our ability to normalize and fully utilize the information we have received from various data sources in order to enhance and improve current solutions for our customers is an important component of our growth strategy. Although we believe that we have the legal and contractual rights necessary to normalize and use the data we have obtained from these sources for potential or contemplated products and service offerings, we cannot provide assurance that these entities will permit the use of their data for these purposes. If we lose a number of our data sources or access to certain data and are unable to identify and reach the requisite agreements with suitable alternative suppliers or fail to successfully integrate them into our solutions and services, or if there is a lack of accuracy or integrity in the data that current or future suppliers provide, we could experience service disruptions, increased costs, reduced quality of our solutions and services, or performance penalties under our customer contracts, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may rely on subcontractors and other third party providers to provide customers with a single-source solution or service or we may serve as a subcontractor to a third party prime contractor. If these parties fail to satisfy their obligations to us or if we are unable to maintain these relationships, our business, financial condition, results of operations and cash flows could be materially adversely affected.

In some areas of our business we may engage subcontractors, teaming partners, vendors or other third party providers to provide our customers with a single-source solution or service for a broader range of service needs. These third parties include software vendors, utility and network providers and other information technology service providers. Our ability to deliver and implement solutions and serve our customers effectively depends on these third parties meeting our service standards in both timeliness and quality, and in certain instances, on our ability to obtain customer approval for the use of these third party subcontractors. While we believe that we perform appropriate due diligence on these third parties and take adequate measures to ensure that they comply with the appropriate laws and regulations, we cannot guarantee that they will comply with the terms set forth in their agreements with us. Performance deficiencies or misconduct by subcontractors, teaming partners, vendors or other third party providers may be perceived as inadequacies in our solutions or services or cause us to fail to fulfill our contractual obligations to our customers, which could materially adversely affect our customer relationships and reputation, result in termination of a customer contract, and subject us to a dispute with our customer. In addition, if our third party service providers terminate or refuse to renew their relationships with us or offer their products to us in the future on less advantageous terms, we may not be able to perform or deliver solutions or services for existing customers as expected.

Similarly, we are and may in the future be engaged as a subcontractor to a third party prime contractor. Subcontracting arrangements where we are not the prime contractor pose unique risks to us because we do not have control over the customer relationship, and our ability to generate revenue under such subcontracts is dependent on the prime contractor, its performance and relationship with the customer, and its relationship with us. We cannot be certain that the prime contractor will provide adequate and timely services to the customer, comply with the terms of its prime contract with the customer or its subcontract agreement with us, or that it will construe its contractual rights and obligations in a reasonable way, act appropriately in dealing with us or customers, and remain in compliance with the relevant laws, rules or regulations. Any failure of the prime contractor to adequately perform its obligations under the prime contract or to comply with applicable laws, rules and regulations could materially adversely affect our reputation and subject us to a dispute with the prime contractor or the customer. In the event a prime contract is terminated, whether for non-performance by the prime contractor or otherwise, our subcontract will similarly terminate, and the resulting contract loss could materially adversely affect our business, financial condition, results of operations and cash flows.

We obtain a portion of our business through competitive bidding in response to government requests for proposals. Reprocurements and future contracts may not be awarded through this process on the same level or our contract awards may be challenged by interested parties which could materially adversely affect our business, financial condition, results of operations and cash flows.

In order to market our solutions and compete for contracts with existing and potential state and federal customers, we are often required to respond to government-issued RFPs. These RFP responses typically require us to assemble and submit a large volume of information within a rigid timetable, and to accurately estimate our cost structure for servicing the proposed contract, the time required to establish operations and the likely terms of any proposals submitted by our competitors. We may also be required to disclose the occurrence of any negative events suffered by our business, such as customer disputes, a government inquiry or an adverse judgment or settlement in litigation or a legal proceeding, which could impair our ability to win the contract at issue or have a material adverse effect on our reputation in the industry.

Even if we win these contracts, we may fail to secure favorable contract terms and conditions, or a government's determination to award us the contract may be challenged by an interested party. Under the state and federal laws and regulations governing procurements of goods and services, challenges and award protests may be filed even if there are no valid legal grounds on which to base the protest. The filing of such challenges could potentially delay the start or implementation of the contract if the government agency determines to withhold a contract award or suspend contract performance while the protest is being considered, or to take corrective action on its own, such as soliciting new bids or terminating the contract award or current procurement. In the event of irregularities, we perceive or learn of in the award or bidding process, we also may be forced to file protests in response to RFP awards to other bidders. Resolution of a protest, even in our favor, could force us to expend considerable funds in disputing the potential award or to incur additional expenses to maintain our ability to timely start implementation, which may cause our actual results to differ materially and adversely from those anticipated. In addition, if we are unable to win reprocurements or protests of particular contracts, we may be precluded from entering certain customer markets for the term of the contract awarded to another party. Any failure to continue to obtain contracts in response to government RFPs, to design proposals that result in profitable contracts, to win new contracts or re-procure current contracts after they expire or to prevail in protests or challenges of contract awards could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Adverse judgments or settlements in legal proceedings could materially harm our business, financial condition, operating results and cash flows.

We are subject and may be a party to legal proceedings and claims that arise from time to time in the ordinary course of our business, which may include those related to, for example, claims brought by our customers in connection with billing and contractual disputes, subcontracts and teaming agreements, protection of confidential information or trade secrets, claims relating to pending, terminated or completed acquisitions or dispositions, adversary proceedings arising from customer bankruptcies, employment of our workforce and immigration requirements or compliance with any of a wide array of state and federal statutes, rules and regulations that pertain to different aspects of our business. We may also be required to initiate expensive litigation or other proceedings to protect our business interests. There is a risk that we will not be successful or otherwise be able to satisfactorily resolve any pending or future litigation. In addition, litigation and other legal claims are subject to inherent uncertainties and management's view of currently pending legal matters may change in the future. Those uncertainties include, but are not limited to, litigation costs and attorneys' fees, unpredictable judicial or jury decisions and the differing laws and judicial proclivities regarding damage awards among the states in which we operate. Resolution may also require that HMS accept some amount of loss or liability in order to avoid customer abrasion, negative marketplace perceptions and other disadvantageous results. Unexpected outcomes in such legal proceedings, or changes in management's evaluation or predictions of the likely outcomes of such proceedings (possibly resulting in changes in established reserves), could have a material adverse effect on our business, financial condition, results of operations and cash flows.

As previously reported, in November 2017, the Company was the subject of an adverse verdict in a breach of contract claim against the Company arising out of an acquisition in 2010. The adverse verdict resulted in a jury award of $60 million in damages to the plaintiffs. The Company intends to appeal the verdict and believes that strong grounds exist to overturn or greatly reduce the damages awarded by the jury. See the information under "Litigation" in Note 13 to the Consolidated Financial Statements in Part II, Item 8 for further discussion about this proceeding.

We may not be able to deliver our solutions and services efficiently if we are unable to attract and retain qualified employees.

Our successful delivery of solutions and services and ability to maintain our productivity and profitability is dependent on our ability to identify, recruit, employ, train and retain skilled personnel. The success of recruitment and retention strategies depend on a number of factors, including the competitive demands for employees having the skills we need and the level of compensation required to hire and retain such employees. As our business expands and undergoes change, we may also find it difficult to preserve our corporate culture, which could reduce our ability to innovate and operate effectively or result in a loss of experienced personnel. In addition, customers or competitors may hire away our qualified employees. We may not be able to recruit or maintain the personnel necessary to efficiently operate and support our business in the future, and even if our recruitment and retention strategies are successful, our labor costs may increase significantly. Our inability to hire sufficient personnel on a timely basis without significantly increasing our labor costs could materially adversely affect our business, financial condition, results of operations and cash flows.

Our future success depends, in part, on the continued service of members of our management team.

Our ability to execute on our business plans and future success requires that we attract, develop, motivate and retain experienced and innovative executive officers and senior managers who have successfully managed, designed or implemented government services programs or information technology projects, or have relevant experience in other sectors of data management or the healthcare industry. These individuals are in great demand and are likely to remain a limited resource in our industry. The loss of services of one or more members of our management team could adversely affect our business, financial condition, results of operations and cash flows. In addition, to the extent we lose an executive officer or senior manager, we may incur increased expenses in connection with the hiring, promotion or replacement of these individuals and the transition of leadership and critical knowledge.

Our outstanding indebtedness could materially adversely affect our financial condition and our ability to operate our business, and we may not be able to generate sufficient cash flows to meet our debt service obligations or capital requirements.

On December 19, 2017, HMS and certain subsidiaries entered into Amendment No. 2 to Amended and Restated Credit Agreement (the "Amendment"), which amends our existing Credit Agreement. Among other things, the Amendment provides for a senior secured revolving facility in an aggregate principal amount equal to $500 million and extends the maturity date of the revolving facility to December 19, 2022 (the "Amended Revolving Facility"). The Amended Revolving Facility is secured, subject to certain customary carve-outs and exceptions, by a first priority lien and security interest in substantially all of our tangible and intangible assets.

As of December 31, 2017, the outstanding principal balance due under our Credit Agreement was $240.0 million. Our outstanding indebtedness and any additional indebtedness we incur may have important consequences for us, including, without limitation, that:

- we may be required to use a substantial portion of our cash flow to pay the principal of and interest on our indebtedness;
- our indebtedness and leverage may increase our vulnerability to adverse changes in general economic and industry conditions, as well as to competitive pressures;
- our indebtedness may expose us to the risk of increased interest rates because certain of our borrowings are and will be at variable interest rates;
- our ability to obtain additional financing for working capital, capital expenditures, acquisitions and for general corporate and other purposes may be limited;
- our indebtedness and leverage may prevent us from taking advantage of business opportunities as they arise or successfully carrying out our plans to expand our business; and
- our flexibility in planning for, or reacting to, changes in our business and our industry may be limited.

Under the Credit Agreement, we are also required to comply with specified financial and operating covenants, which may limit our ability to operate our business as we otherwise might operate it. The Amended Revolving Facility contains (i) certain affirmative covenants that impose certain reporting and/or performance obligations on us and our restricted subsidiaries, (ii) certain negative covenants that generally limit, subject to various exceptions, us and our restricted subsidiaries from taking certain actions, including, without limitation, incurring indebtedness, creating liens, engaging in mergers and consolidations, disposing of certain assets or property, making certain investments and acquisitions, entering into certain transactions with affiliates, swap agreements or sale-leasebacks, making certain restricted payments, including dividends and share repurchases, changing our fiscal year or the lines of business that we or our restricted subsidiaries conduct to a material extent, and prepaying certain junior indebtedness, (iii) financial covenants consisting of a maximum consolidated leverage ratio and a minimum interest coverage ratio, and (iv) customary events of default for financings of this type.

Our obligations under the Amended Revolving Facility may be declared due and payable upon the occurrence and during the continuance of an event of default, which includes, without limitation: non-payment of principal or reimbursement obligation when due; non-payment of interest, fees and other amounts for a period of five business days after the due date; material inaccuracies of representations and warranties; failure to perform or observe covenants, conditions or agreements (subject to any applicable grace periods); cross-defaults to certain indebtedness; inability to pay debts; certain acts of bankruptcy or insolvency; certain ERISA events; failure to pay certain material judgments; and a change of control as defined in the Credit Agreement. If not cured, an event of default could result in any amounts outstanding, including any accrued interest and unpaid fees, becoming immediately due and payable, and would give our lenders the right to proceed against the collateral granted to them to secure the debt, which would require us to, among other things, seek additional financing in the debt or equity markets, refinance or restructure all or a portion of our indebtedness, sell selected assets, and/or reduce or delay planned capital or operating expenditures. Such measures might not be sufficient to enable us to service our debt, and any such financing or refinancing might not be available on economically favorable terms or at all. Our ability to make payments of principal and interest on our outstanding credit facility depends upon our future performance and our ability to generate cash flows, and if we are unable to generate sufficient cash flows to meet our debt service obligations or are forced to take additional measures to be able to service our indebtedness, our business, financial condition and results of operations could be materially and adversely affected.

Changes in, or interpretations of, tax rules and regulations may materially adversely affect our effective tax rates.

We are a United States-based company subject to various federal, state and local tax laws and regulations in multiple U.S. jurisdictions that govern numerous aspects of our business. As we expand our business, we may perform services for new customers located outside of the United States or in a U.S. Territory, which may subject us to foreign tax laws and regulations that could increase our exposure to additional tax liabilities. Our future effective tax rates could also be materially affected by changes in the tax rates in jurisdictions where our income is earned and taxed, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by increases in expenses not deductible for tax purposes including impairments of goodwill, by changes in U.S. GAAP or by changes in the valuation of our deferred tax assets and liabilities. The 2017 Tax Act was enacted on December 22, 2017 and is generally effective for tax years beginning after December 31, 2017. The 2017 Tax Act, among other things, includes a reduction to the U.S. corporate tax rate, modifications to the limitations on certain deductions for executive compensation, new limitations on interest deductions, repeal of the section 199 Deduction, and capital investment deductions in certain circumstances, and a shift of the U.S. taxation of multinational corporations from a tax on worldwide income to a territorial system. We are currently in the process of analyzing the effects of this new legislation on our business, and although we believe that the impact of the new legislation might be beneficial to us at this time, the ultimate outcome of the new legislation on our business and financial condition is uncertain. Any unanticipated changes in our tax rates could affect our future results of operations.

In addition, we are subject to the continual examination of our income tax returns by the IRS and other domestic tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result. The final determination of any of these examinations could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our health insurance coverage and self-insurance reserves may not cover future claims, which could materially adversely affect our business, financial condition, results of operations and cash flows.

We maintain various insurance policies for company employee health, workers' compensation, general liability and property damage. We are self-insured for our health plans, and have purchased a fully-insured stop loss policy to help offset our liability for both individual and aggregate claim costs. We are also responsible for losses up to a certain limit for workers' compensation, general liability and property damage insurance.

For policies under which we are responsible for losses, we record a liability that represents our estimated cost of claims incurred and unpaid as of the balance sheet date. Our estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions and economic conditions, and is closely monitored and adjusted when warranted by changing circumstances. Our prior growth could affect the accuracy of estimates based on historical experience. Should a greater amount of claims occur compared to what was estimated or medical costs increase beyond what was expected, our accrued liabilities might not be sufficient and we may be required to record additional expense. Unanticipated changes may also produce materially different amounts of expense than reported under these programs, which could materially adversely affect our business, financial condition, results of operations and cash flows.

Although we believe that we have remediated previously identified material weaknesses in our internal control over financial reporting, our financial statements could be materially misstated if we fail to remedy other material weaknesses that we may identify in the future, or if we are unable to develop, implement and maintain effective internal control over financial reporting in future periods.

In connection with management's assessment of our internal control over financial reporting for the December 31, 2016 reporting period, we identified material weaknesses related to the calculation of the estimated liability for appeals balance in connection with our CMS reserve and the valuation of our accounts receivable allowance. As further described under the heading "Changes in Internal Control Over Financial Reporting" in Part II, Item 9A of this 2017 Form 10-K, we have implemented measures to address these material weaknesses and have successfully completed the testing necessary to conclude that the material weaknesses have been remediated.

In future periods, these remedial measures may not operate effectively, or we may fail to design or implement effective controls or to otherwise maintain effective internal control over financial reporting, and additional material weaknesses or significant deficiencies in our internal control over financial reporting may occur or be discovered. As a result, we may fail to meet our future reporting obligations on a timely basis, our financial statements may contain material misstatements or our operating results or financial condition may otherwise be negatively impacted, and we may be subject to litigation and regulatory actions, any of which may cause us to incur substantial costs, adversely affect investor perceptions and potentially result in a decline in the market price of our common stock. In addition, these failures may also cause us to incur substantial additional costs in future periods relating to the implementation of remedial measures or limit our ability to obtain financing under our Credit Agreement, which could adversely impact our business, financial condition, results of operations and cash flows.

Risks Relating to Our Industry

Our business could be materially adversely affected by changes in the U.S. healthcare environment or in laws relating to healthcare programs and policies, particularly as they relate to the ACA and the Medicare and Medicaid programs.

The healthcare industry in which we operate is subject to changing political, economic and regulatory influences that directly affect the practices and operations of federal, state and commercial healthcare organizations in the United States. In March 2010, the ACA was passed, and its emphasis on program integrity and cost containment, along with its expansion of Medicaid, created new opportunities to grow our business and our service offerings. However, some of the provisions of the ACA have yet to be implemented and there have been a number of judicial and legal challenges to certain aspects of the ACA. Since January 2017, the President has signed two executive orders and other directives designed to waive, defer, grant exemptions from or delay the implementation of certain requirements mandated by the ACA. Concurrently, Congress has considered legislation that would repeal or repeal and replace all or part of the ACA. In December 2017, the Tax Act was enacted and signed into law, one part of which repeals the "individual mandate" introduced by the ACA effective January 1, 2019. There have also been a number of proposed and adopted legislative initiatives and healthcare reform proposals from state and federal governments, including, (i) initiatives and proposals that would fundamentally change the financial structure of the Medicaid program (currently funded jointly by the states and the U.S. Federal Government) that could result in early termination or non-renewal of our contracts with certain state government customers, and (ii) initiatives and proposals at the federal level that may reduce reimbursement rates to states, establish new payment models, increase or decrease government involvement in healthcare, decrease the Medicare RAC Program, or otherwise change the operating environment for our customers. Healthcare organizations may react to such changed circumstances and financial pressures by taking actions to ramp up, curtail or defer their retention of cost containment providers like us, which could impact the demand for our solutions and services and our ability to increase or maintain sales of our existing solutions and services. While certain changes may present new opportunities to us, our business, financial condition, results of operations and cash flows could be materially adversely affected if we are unable to adapt our solutions and services to meet changing requirements or expand service delivery into new areas, or if the demand for our solutions and services is reduced as a result of efforts to waive, modify or otherwise change the ACA, in whole or in part, and as a result of other future legislative changes affecting Medicare, Medicaid or other publicly funded or subsidized health programs. Although we will continue to evaluate the effect that the ACA and its possible repeal and replacement may have on our business, it is difficult to predict the full impact and influence that the ACA and the varying healthcare reform measures may have on the U.S. healthcare industry or policy, and any resulting changes may take time to unfold.

Healthcare spending fluctuations, simplification of the healthcare payment process or other aspects of the healthcare financing system, budgetary pressures and/or programmatic changes diminishing the scope of program benefits, or limiting payment integrity initiatives, could reduce the need for and the price of our solutions and services, which would have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our projections and expectations are premised, in part, upon consistent growth rates in the Medicare and Medicaid programs and in government spending on these programs, and in the current healthcare financing system and the need for our solutions and services within that existing framework. Our success as a company is based on offering solutions and services that improve the ability of our customers to identify and recover revenue that would otherwise be lost often as a result of procedural inefficiencies and complexities in the healthcare delivery and payment system. However, the need for our solutions and services, the price customers are willing to pay for them and the scope and profitability of our contracts could be negatively affected by a number of factors, including, but not limited to:

- a lower than projected growth in Medicare and Medicaid programs and expenditures;
- the simplification of the healthcare benefit and payment system through legislative or regulatory changes at the federal or state level (for example, legislative changes impacting the scope of mandatory audits; limiting or reducing the amount of reviewable claims and/or the look-back period for review in areas where we conduct audits);
- changes in the level of federal government spending due to budgetary or deficit considerations, including the continuance of existing programs, as well as budgetary pressures that may drive changes at the state level;
- the transition of healthcare beneficiaries from fee-for-service plans to value-based plans;

- unanticipated reductions in the scope of healthcare program benefits (such as, for example, state decisions to eliminate coverage of optional Medicaid populations or services or shifting lives into managed care plans);
- modifications in provider billing behavior and habits, often in response to the success of our solutions and services or to changes that reduce healthcare spending;
- customer improvements and enhancements to their internal healthcare claims and billing processes;
- the adoption of healthcare plans with significantly higher deductibles;
- limits placed on ongoing program integrity initiatives, including the Medicare RAC program; and
- legislative healthcare reforms and developments, including the absence of near-term compliance deadlines effected by the ACA, the possible repeal or modification of the ACA, and other legislative actions to reduce program eligibility or services, or reform Medicaid spending.

For example, during 2014 and 2015, our recovery audit services under HDI's Medicare RAC contract were limited because of significant delays in procurement activities for the new Medicare RAC contract awards, resulting from, in part, the cancellation of the original and second procurements following the denial of pre-award protests and ongoing litigation regarding certain payment terms proposed by CMS as part of the new Medicare RAC proposals. In response to the delays, CMS allowed the Medicare RAC contractors, including HDI, to perform active recovery auditing through July 2016 and certain limited administrative activities, including collections, related to findings through January 31, 2018.

In October 2016, CMS announced the new Medicare RAC contract awards, including the award of RAC Region 4 to our wholly owned subsidiary. Under the new Medicare RAC contracts, CMS implemented modified ADR limits that reduces the ADR requirement to 0.5%. The modified ADR limits, which CMS first announced in January 2016, is a 75% reduction from the 2.0% ADR limit established for the HDI Medicare RAC contract. In addition, in April 2016, CMS instituted a sliding scale policy adjusting ADR limits based on provider denial rate after three 45-day ADR cycles. In January 2018, CMS further modified this methodology, indicating that underpayments identified by the RAC would be precluded from the sliding scale policy. These changes have significant impact on the volumes of claims that Medicare RACs are permitted to review for inpatient providers and reduces their ability to identify overpayments and underpayments under the new Medicare RAC contracts. HMS is currently waiting for CMS to operationalize the sliding scale under the new Medicare RAC contract, which is expected to increase the current ADR limit to a requirement less than the 2.0% limit that was previously set under the prior contracts.

Further, in connection with our first Medicare RAC contract, CMS announced in 2014 that it would settle with hospitals willing to withdraw inpatient status claims currently pending in the RAC appeals process by offering to pay hospitals 68% for all eligible claims they had billed to Medicare. In June 2015, CMS notified HDI that based on the initial lists of finalized settlements, HDI owed CMS approximately $28.6 million due to adjustments in contingency fees under our existing Medicare RAC contract. HDI previously advised CMS that it disagrees with CMS' interpretation of the contract and that CMS does not have the contractual right, among other things, to require refunding fees already paid. In addition, in September 2016, CMS announced that it would extend an opportunity for another round of settlements for hospitals that were eligible for but did not choose to participate in the 2014 settlement, with CMS offering to pay 66% for all eligible claims they had billed to Medicare. The implication of these settlements related to the claims for which HDI already has been paid remains uncertain.

Although we do not anticipate that our new Medicare RAC contract will represent a significant portion of our business going forward, our Medicare RAC contract still represents a future business opportunity for us. However, there could be a material negative impact on our future revenue to the extent that (i) any final determination of amounts owed by us to CMS under HDI's Medicare RAC contract materially exceeds our accrued reserves for such appeals, (ii) we are required to increase or decrease our contractually required reserves with respect to pending appeals due to changes in appeal performance, changes in data provided to us from other entities in the RAC process, or other related factors, (iii) we are required to repay a portion of prior fees associated with the hospital settlements, (iv) we are unable to obtain full payments for properly provided services, or (v) future fees payable to us by CMS are reduced. The occurrence of any of these events or other changes to the Medicare RAC program that materially reduce our revenue or profitability with such program may have an adverse effect on our future business, financial condition, results of operations and cash flows.

A failure to comply with the laws and regulations that apply to companies in our industry regarding individual privacy and information security could subject us to legal actions, fines and penalties and negatively impact our reputation and operations.

As a service provider, we often receive, process, transmit and store sensitive data, including PHI and personally identifiable information of individuals, as well as other financial, confidential and proprietary information belonging to our customers, subsidiaries, data supplies and other third parties from which we obtain information. The use and disclosure of that information is regulated at the federal, state, international and industry levels and we are also obligated by our contractual requirements with customers. For example, we are subject to federal regulation under HIPAA, as amended by HITECH, and the Final Omnibus Privacy, Security, Breach Notification, and Enforcement Rule, as well as various state laws. HIPAA also imposes standards and requirements on our business associates (as defined under HIPAA).

Even though we take measures to comply with all applicable regulations and to ensure our business associates and subcontractors comply with these laws, regulations and rules, we have less than complete control over our business associates' and subcontractors' actions and practices. We may be exposed to data breach risk if there is unauthorized access to one of our or our subcontractors' secure facilities or from lost or stolen laptops or other portable media from current or former employee theft of data containing PHI, from computer hacking, malware, computer viruses or other malicious codes, phishing or other cyber-attacks, from misdirected mailings containing PHI, or other forms of administrative or operational error. If we or our subcontractors fail to comply with applicable laws; if unauthorized parties gain physical access to one of our facilities and steal or misuse confidential information; if we erroneously use or disclose data in a way that is inconsistent with our granted rights; or if such information is misdirected, lost or stolen during transmission or transport, we may suffer damage to our reputation, potential loss of existing customers and difficulty attracting new customers. We could also be exposed to, among other things, unfavorable publicity, governmental inquiry and oversight, allegations by our customers that we have not performed our contractual obligations, costs to provide notifications to affected individuals, fines or other penalties imposed by government regulatory agencies, or litigation by affected parties and possible financial obligations for damages or indemnification obligations related to the theft or misuse of such information, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, laws, rules and regulations concerning the protection of personal information are subject to frequent change by legislation, regulatory issuances or administrative interpretation. As regulatory focus on privacy issues continues to increase and these laws and regulations continue to expand and become more complex, these potential risks to our business could intensify. Changes in laws or regulations associated with the enhanced protection of certain types of sensitive data, such as healthcare data or other personally identifiable information, along with increased customer demands for enhanced data security infrastructure, could greatly increase our cost of providing our solutions and services, and may subject us to additional liabilities.

We are subject to extensive government regulation, including government and customer audits and investigations relating to our compliance with the laws and regulations applicable to companies in our industry, and a negative finding or other adverse determination could have a material adverse effect on our reputation, business, financial condition, results of operations and cash flows.

Much of our business is regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect individual citizens, including government program beneficiaries, other health plan members and providers, and the federal and state governmental agencies administering these laws and regulations have broad latitude to enforce them. As such, we are subject, on an ongoing basis, to various governmental and customer reviews, audits and investigations to verify our compliance with our contracts and applicable laws and regulations, as well as legal actions and enforcement proceedings. For example, because we receive payments from federal and state governmental agencies, we are subject to laws, such as the Federal Acquisition Regulations, the U.S. Foreign Corrupt Practices Act, federal and state employment, equal opportunity and affirmative action laws, and federal and state prompt pay statutes. We are also subject to the Federal False Claims Act and similar state statutes, which permit government law enforcement agencies to institute suits against us for violations and, in some cases, to seek double or treble damages, penalties and assessments. In addition, private citizens, acting as whistleblowers, can sue on behalf of the government under the "*qui tam*" provisions of the Federal False Claims Act and similar statutory provisions in many states.

As we expand into new areas of the healthcare industry, we may develop new or enhanced solutions that may further expose us to requirements under additional statutes and legislative schemes that have previously not been relevant to our business, such as banking and credit reporting statutes. For example, in connection with our acquisition of Eliza, we became subject to the Telephone Consumer Protection Act of 1991, state and federal audio and telephone recording laws, and other related state and federal laws and regulations as a result of the member engagement services that we perform. Increased involvement in analytic or audit work that can have an impact on the eligibility of individuals for medical coverage or specific benefits, or payments made by our customers to providers, could increase the likelihood and incidence of our being subjected to scrutiny or legal actions by parties other than our customers, based on alleged mistakes or deficiencies in our work, with significant resulting costs and strain on our resources.

These laws and regulations, along with the terms of our government contracts, regulate how we do business, what solutions and services we offer and how we interact with customers, providers, other healthcare payers and the public. If the government discovers improper or illegal activities in the course of audits or investigations, we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions and debarment from doing business with the government. Similarly, if our customers assert that we have failed to properly perform or comply with our contractual obligations, or if the carriers to which we send billings assert that we have failed to properly comply with applicable federal or state billing rules and regulations, we may be required to provide refunds or make payments to resolve such issues. If we are found to be in violation of any applicable law or regulation, or if we receive an adverse review, audit or investigation from a government agency or customer related to our compliance with such laws or regulations or the terms of our government contracts, any resulting negative publicity, penalties or sanctions could have an adverse effect on our reputation in the industry, impair our ability to compete for new contracts or bid in response to RFPs in one or more jurisdictions and have a material adverse effect on our business, financial condition, results of operations and cash flows.

Federal and state governments may limit or prohibit outsourcing of certain programs or functions, refuse to grant consents or waivers necessary to permit private entities to perform such work, or impose other limitations on outsourcing or certain vendors that may obstruct cost-effective performance of our contracts.

Federal or state governments could limit or prohibit private contractors like us from operating or performing elements of certain government functions or programs. As a condition of receiving federal funding, state, and local governments may be required to operate such programs with government employees. Under current law, in order to privatize certain functions of government programs, the federal government must grant a consent and/or waiver to the petitioning state or local agency. If the federal government does not grant a necessary consent or waiver, the state or local agency will be unable to outsource that function to a commercial entity. Such a situation could eliminate a contracting opportunity or reduce the value of an existing contract.

Similarly, other state or federal limitations on outsourcing certain types of work to vendors that supplement our workforce could make it more difficult for us to fulfill our contracts in a cost-effective manner. Certain areas of our operations use or involve vendor or subcontractor personnel located outside of the United States, who may (under carefully controlled circumstances) access certain PHI in the course of assisting us with various elements of the services we provide to our customers. The federal government and a number of states have considered laws or issued rules, regulations, and orders that would limit, restrict or wholly prohibit the use of offshore labor in performance of government contracts, or impose sanctions for the use of such resources. Some of our customers have already chosen to contractually limit or restrict our ability to use offshore resources. Intensified restrictions of this type or associated penalties could raise our costs of doing business, expose us to unexpected fines or penalties, increase the prices we must charge to customers to realize a profit and eliminate or significantly reduce the value of existing contracts or potential contract opportunities, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may be precluded from bidding on or performing certain work due to work we currently perform, which could materially adversely affect our business, financial condition, results of operations and cash flows.

Various laws, regulations and administrative policies prohibit companies from performing work for government agencies in capacities that might be viewed to create an actual or perceived conflict of interest. In particular, CMS has stringent conflict of interest rules, which can limit our bidding for specific work for CMS, or for other contracts that might conflict, or be perceived by CMS to conflict, with contractual work for CMS. State governments and managed care organizations also have conflict of interest restrictions that could limit our ability to bid for certain work and impede our overall sales strategy. As we continue to expand and diversify our business operations, the likelihood that customers or potential customers will perceive conflicts of interest between our various subsidiaries, solutions, services, activities and customer relationships may increase. Such conflicts, whether real or perceived, could result in a loss of contracts or additional internal structural barriers that delay operational efficiency. We may also need to divest certain existing businesses or reorganize our current management and personnel structure, as well as our corporate organization and entity structure, in order to qualify for new contract awards or to appropriately mitigate conflicts and otherwise accommodate the needs as a company that is expanding in complexity. Our failure to devote sufficient care, attention and resources to managing these adjustments may result in technical or administrative errors that could expose us to potential liability or adverse regulatory action. In addition, conflict of interest rules and standards change frequently, and are subject to varying interpretations and varying degrees and consistency of enforcement. We may not be successful in navigating these restrictions. If we are prevented from expanding our business or are unable to effectively implement our strategic initiatives due to real or perceived conflicts of interest, our business, financial condition, results of operations and cash flows could be materially adversely affected.

Risks Related to Our Common Stock

The market price of our common stock may be volatile, and fluctuations in the price of our common stock may materially adversely affect our business, financial condition, results of operations and cash flows and materially adversely affect our shareholders.

The market price of our common stock has fluctuated widely and may continue to do so. During the 52-week period ended December 31, 2017, our common stock intra-day traded on the Nasdaq Global Select Market as high as $20.90 per share and as low as $11.01 per share. Our stock price is subject to fluctuation as a result of a variety of factors, including factors beyond our control, such as the risk factors described above and those which are related to:

- quarterly or annual earnings results or those of other companies in our industry;
- changes in estimates of our performance or recommendations by securities analysts or in the operating and stock price performance of other companies that investors deem comparable to our company;
- news reports relating to trends, concerns and other issues in the healthcare industry, including perceptions in the marketplace regarding us and our competitors;
- the financial projections we publicly provide and any changes in or failure to meet those projections;
- future sales of shares of common stock in the public market by our executive officers or directors;
- any other changes in the amount of our outstanding shares, including as a result of share repurchases;
- actual or proposed changes in federal or state laws affecting the healthcare industry;
- changes in accounting principles;
- the public's response to our press releases, or other public announcements, including our filings with the SEC;
- securities class actions, shareholder lawsuits or other litigation; and
- market conditions in the industry and the economy as a whole.

In addition, the stock market often experiences significant price and volume fluctuations. These broad market fluctuations may materially adversely affect the market price of our common stock regardless of our operating performance. When the market price of a company's stock drops significantly, shareholders may institute securities class action litigation against that company. Any litigation against us could cause us to incur substantial costs, divert the time and attention of our management and other resources or otherwise harm our business.

Because we do not intend to pay dividends, you will benefit from an investment in our common stock only if it appreciates in value.

We have not paid or declared cash dividends on any of our capital stock to date and currently intend to retain our future earnings, if any, to fund the development and continued growth of our business and repurchase shares opportunistically from time to time. As a result, we do not expect to pay any cash dividends in the foreseeable future. The success of your investment in our common stock will likely depend entirely upon any future appreciation. There is no guarantee that our common stock will appreciate in value or even maintain the price at which you purchased your shares.

Certain provisions of our certificate of incorporation and bylaws could discourage unsolicited takeover attempts, which could depress the market price of our common stock.

Our certificate of incorporation authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by our Board of Directors. Accordingly, our Board of Directors is empowered, without shareholder approval, to issue preferred stock with dividend, liquidation, conversion, voting or other rights, that could adversely affect the voting power or other rights of holders of our common stock. In the event of issuance, preferred stock could be utilized, under certain circumstances, as a method of discouraging, delaying, or preventing a change in control. Although we have no present intention to issue any shares of preferred stock, it is possible that we will do so in the future. In addition, our bylaws currently provide for a classified Board of Directors, require advance notice of shareholder proposals for business to be conducted at meetings of our shareholders and for nominations of candidates for election to our Board of Directors and provide for Delaware as an exclusive forum for certain disputes with our shareholders, all of which could also have the effect of discouraging a change of control.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Location	Approximate Square Footage	Owned/Leased
Irving, TX	242,260	Owned
Las Vegas, NV	63,593	Leased
Westerville, OH	25,212	Leased
Irvine, CA	23,790	Leased
New York , NY	12,259	Leased
Charlestown, MA	13,628	Leased
All Other Locations	77,914	Leased

As of December 31, 2017, we leased approximately 111,000 square feet of office space in 20 other locations throughout the United States, the leases for which have expiration dates through 2024. See "Lease Commitments" in Note 13 to the Consolidated Financial Statements in Part II, Item 8 for additional information. In general, we believe our facilities are suitable to meet our current and reasonably anticipated future needs.

Item 3. Legal Proceedings

The information set forth under the caption "Litigation" in Note 13 to the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is included in the Nasdaq Global Select Market, under the symbol HMSY. The table below summarizes the high and low closing sales prices per share for our common stock for the periods indicated, as reported on the Nasdaq Global Select Market.

Quarter Ended	March 31,	June 30,	September 30,	December 31,
Fiscal Year 2017				
High	$ 20.33	$ 20.68	$ 20.15	$ 20.32
Low	$ 17.76	$ 17.91	$ 17.36	$ 15.55
Fiscal Year 2016				
High	$ 14.42	$ 18.38	$ 23.46	$ 22.03
Low	$ 10.22	$ 13.67	$ 17.44	$ 16.18

Repurchases of Shares of Common Stock

See "Equity' in Note 9 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding share repurchases. The following are our monthly stock repurchases for the fourth quarter of fiscal year 2017, all of which were made as part of publicly announced plans or programs:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program[1]	Maximum Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
October 1, 2017 to October 31, 2017	—	$ —	—	$ —
November 1, 2017 to November 30, 2017	674,813	16.23	674,813	39,044,882
December 1, 2017 to December 31, 2017	190,502	16.61	190,502	35,880,666
October 1, 2017 to December 31, 2017	**865,315**	**$ 16.33**	**865,315**	

(1) On November 1, 2017, the Board of Directors of the Company approved a share repurchase program authorizing the Company to repurchase up to $50.0 million of shares of its common stock from time to time on the open market or in privately negotiated or other transactions. We publicly announced the program in November 2017. The repurchase program is authorized for a period of up to two years, and may be suspended or discontinued at any time. In order to facilitate repurchases, the Company may enter into a Rule 10b5-1 plan from time to time, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws or because of a self-imposed trading blackout period. All repurchases for the periods presented were made under the program and using cash resources.

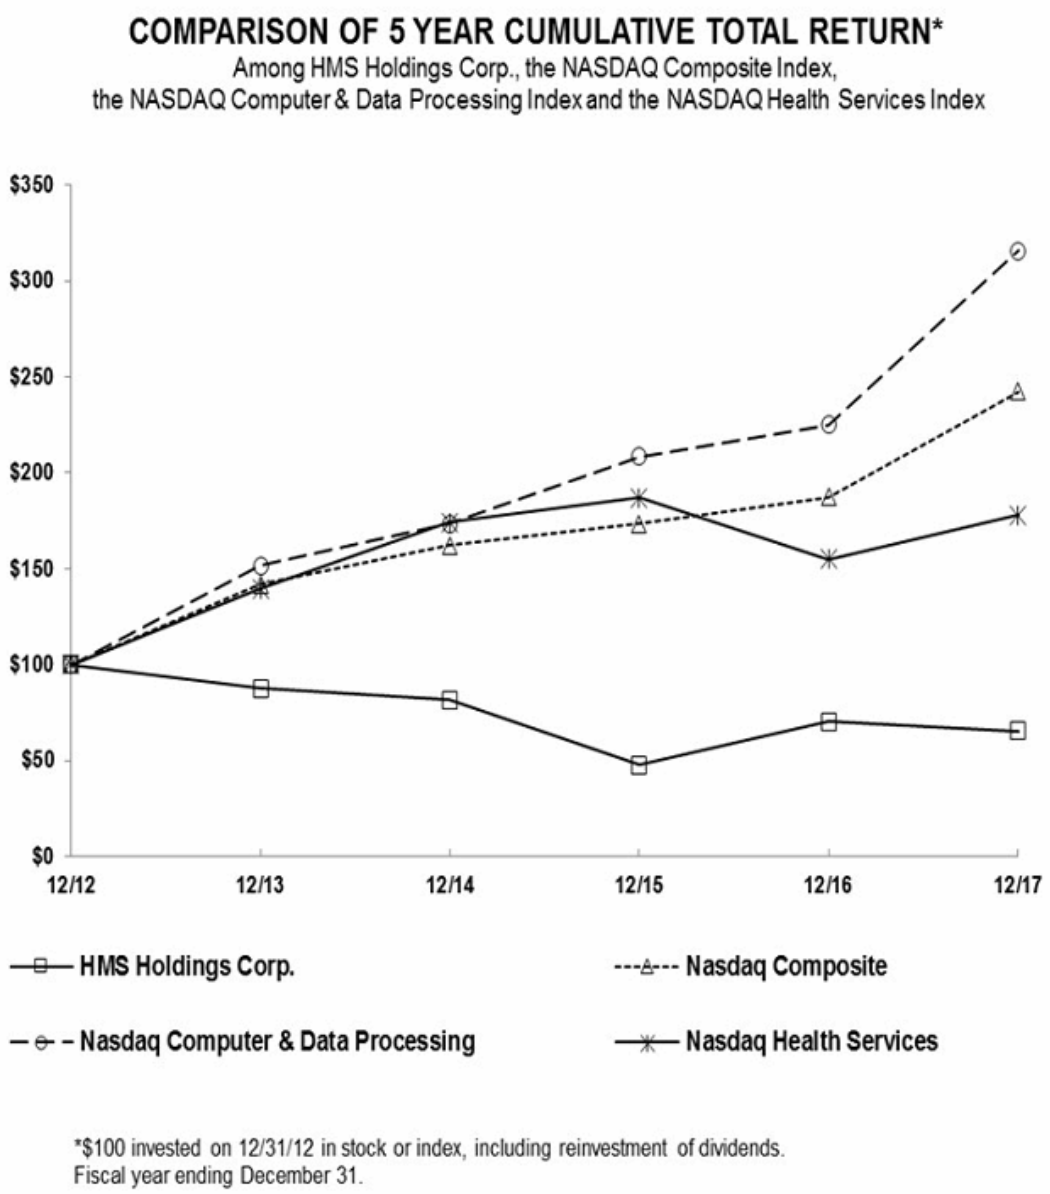
Holders

As of the close of business on February 16, 2018, there were 263 holders of record of our common stock.

Dividends

We have not paid or declared any cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. Our current intention is to retain future earnings to support the continued growth of our business and possibly for the repurchase of shares from time to time. Our Board of Directors will evaluate various factors, including, without limitation, our future earnings, operating cash flows, financial condition, results of operations and capital requirements in determining whether to pay any cash dividends in the future. In addition, our Credit Agreement generally limits, subject to certain exceptions, our ability to make certain payments or distributions with respect to our capital stock, including cash dividends to our shareholders. These restrictions are described in more detail under the headings “Credit Agreement” and “Liquidity and Capital Resources” in Part II, Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations, and in Note 8 to the Consolidated Financial Statements in Part II, Item 8.

Comparative Stock Performance Graph



The graph below compares the cumulative total shareholder return on our common stock with the cumulative total shareholder returns of the Nasdaq Composite Index, the Nasdaq Computer & Data Processing Index and the Nasdaq Health Services Index assuming an investment of $100 on December 31, 2012 and the reinvestment of dividends through the year ended December 31, 2017.

	12/31/12	12/31/13	12/31/14	12/31/15	12/31/16	12/31/17
HMS Holdings Corp.	$ 100.00	$ 87.58	$ 81.56	$ 47.61	$ 70.06	$ 65.39
Nasdaq Composite	$ 100.00	$ 141.63	$ 162.09	$ 173.33	$ 187.19	$ 242.29
Nasdaq Computer & Data Processing	$ 100.00	$ 151.54	$ 173.50	$ 208.25	$ 224.83	$ 315.58
Nasdaq Health Services	$ 100.00	$ 139.64	$ 173.97	$ 187.09	$ 155.05	$ 177.93

Notwithstanding anything to the contrary set forth in any of our previous or future filings under the Securities Act or the Exchange Act that might incorporate by reference this 2017 Form 10-K or future filings made by us under those statutes, the Comparative Stock Performance Graph is not deemed filed with the SEC, is not deemed soliciting material and shall not be deemed incorporated by reference into any of those prior filings or into any future filings we make under those statutes, except to the extent that we specifically incorporate such information by reference into a previous or future filing, or specifically request that

such information be treated as soliciting material, in each case under those statutes.

Item 6. Selected Financial Data

The following table sets forth selected consolidated financial amounts at and for each of the five fiscal years in the period ended December 31, 2017. It should be read in conjunction with Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and the Consolidated Financial Statements and Notes thereto, in Part II, Item 8 of this 2017 Form 10-K.

Statement of Operations Data

	Years ended December 31,				
(in thousands, except per share amounts)	**2017**	**2016**	**2015**	**2014**	**2013**

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis is intended to help the reader understand the results of operations and financial condition of HMS. You should read this discussion and analysis in conjunction with the other sections of this 2017 Form 10-K, including the Cautionary Note Regarding Forward-Looking Statements appearing prior to Part I, the information in Part I, Item 1A, and the Consolidated Financial Statements and Notes thereto in Part II, Item 8. The historical results set forth in Part II, Item 6, Item 7 and Item 8 of this 2017 Form 10-K should not be taken as necessarily indicative of our future operations or financial results.

Business Overview

HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. Using innovative technology as well as extensive data services and powerful analytics, we deliver coordination of benefits, payment integrity and care management and consumer engagement solutions through our operating subsidiaries to help healthcare payers improve performance and outcomes. We are managed and operate as one business segment with a single management team that reports to the Chief Executive Officer. Together our various services help our customers recover improper payments; prevent future improper payments; reduce fraud, waste and abuse; better manage the care that members receive; engage healthcare consumers to improve outcomes and increase retention; and achieve regulatory compliance.

We serve state Medicaid programs, commercial health plans, federal government health agencies, government and private employers, CHIPs and other healthcare payers and sponsors. We also serve as a subcontractor for certain business outsourcing and technology firms. As of December 31, 2017, our customer base included the following:

- over 40 state Medicaid programs;
- approximately 325 health plans, including 23 of the top 25 health plans nationally (based on membership) in support of their multiple lines of business, including Medicaid managed care, Medicare Advantage and group and individual health;
- over 225 private employers;
- CMS, the Centers for Disease Control and Prevention, and the Department of Veterans Affairs; and
- PBMs, third-party administrators and other risk-bearing entities, including independent practice associations, hospital systems, ACOs and specialty care organizations.

Outlook

We have grown our business both organically, through internal innovation and the development of new products and services, as well as by acquisition of businesses whose core services strengthened our overall mission to help our customers contain healthcare costs. Our largest growth during 2017 was with commercial health plan customers, both organically and via the acquisition of Eliza, and we currently expect this marketplace to present the greatest opportunity for growth in the year ahead. In addition to cross-sales of care management and consumer engagement solutions and other internal growth initiatives in 2018, various factors related to the macro healthcare environment are expected to contribute to our expected growth, including:

- an aging U.S. population with high-cost, chronic conditions and often co-morbidities.
- projected growth in Medicare enrollment from 2016 to 2025 is estimated by CMS to be at 28%, with a projected increase in spending of 88% during this same time period;
- Medicaid expenditures are projected to grow 64% from 2016 to 2025 based on CMS NHE projections;
- government program payment error rates remain high at approximately 10%;

- more than half of the U.S. population is projected by CMS to remain covered by employer-sponsored plans; and
- increased healthcare industry focus on improved population health, enhanced consumer outcomes and experience, and reduced costs.

We plan to drive our future growth by leveraging our expertise to expand product offerings, attracting new customers and broadening our relationships with current customers through the introduction of new services, audit strategies and claim types. Our goal is to develop and build on existing partnerships with our state, federal and commercial health plan customers to provide services that better address their business needs and promote consumer engagement and satisfaction in the constantly evolving healthcare marketplace. We also expect to continue increasing recovery yields from our current products by enhancing our operating and organizational efficiency and by implementing new big data technologies that will improve the quality and effectiveness of our service offerings.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates. The accounting policies that we believe to be the most critical to an understanding of our financial condition and results of operations and that require the most complex and subjective management judgments are below:

Revenue Recognition

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
We provide services under contracts that contain various fee structures, including contingency fee and fixed fee arrangements. Revenue is recognized when a contract exists, services have been provided to the customer, the fee is fixed and determinable, and collectability is reasonably assured. In addition, the Company has a limited number of contracts with the federal government which are generally cost-plus or time and materials based. Revenue on cost-plus contracts is recognized based on costs incurred plus the negotiated fee earned. Revenue on time and materials contracts is recognized based on hours worked and expenses incurred. In addition, some of our contracts may include customer acceptance provisions.	Formal customer sign-off is not always necessary to recognize revenue, provided we objectively demonstrate that the criteria specified in the acceptance provision are satisfied. Due to the range of products and services that HMS provides and the differing fee structures associated with each type of contract, revenue may be recognized in irregular increments. A portion of our revenue is recorded net of an estimate of future revenue adjustments, with an offsetting entry to accounts receivable allowance, based on historical patterns of billing adjustments, length of operating and collection cycle and customer negotiations, behaviors and payment patterns. Changes in these estimates are recorded to revenue in the period of change.	If we were to change any of these judgments or estimates, it could cause a material increase or decrease in the amount of revenue we report in a particular period.

Estimated Liability for Appeals

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Under our contracts with certain commercial health plan customers and our Medicare RAC contracts with CMS, we recognize revenue when HMS claim findings are sent to the Company's customers for offset against future claim payments to providers. These contracts permit providers the right to appeal HMS claim findings and to pursue additional appeals if the initial appeal is found in favor of HMS's customer. The total estimated liability for appeals balance was $30.8 million as of each of December 31, 2017 and December 31, 2016.	The appeal process established under the Medicare RAC contract with CMS includes five levels of appeals and resolution of appeals can take substantial time to resolve. HMS records (i) a liability for findings which have been adjudicated in favor of providers and (ii) an estimated liability based on the amount of revenue that is subject to appeals and which is probable of being adjudicated in favor of providers following their successful appeal. Our estimate is based on the Company's historical experience.	To the extent the amount to be returned to providers following a successful appeal exceeds or is less than the amount recorded, revenue in the applicable period would be reduced or increased by such amount. Any future changes to any of our customer contract, including modifications to the Medicare RAC contract, may require us to apply different assumptions that could materially affect both the Company's revenue and estimated liability for appeals in future periods.

Business Combinations

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
We record assets acquired and liabilities assumed in a business combination based upon their acquisition date fair values. Goodwill is the excess of acquisition costs over the fair values of assets and liabilities of acquired businesses. During the measurement period, which is up to one year from the acquisition date, we may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to earnings.	In most instances there is not a readily defined or listed market price for individual assets and liabilities acquired in connection with a business, including intangible assets. We determine fair value through various valuation techniques including discounted cash flow models, quoted market values and third party independent appraisals, as considered necessary. Significant assumptions used in those techniques include, but are not limited to, growth rates, discount rates, customer attrition rates, expected levels of revenues, earnings, cash flows and tax rates.	The use of different valuation techniques and assumptions are highly subjective and inherently uncertain and, as a result, actual results may differ materially from estimates.

Impairment of Goodwill

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Goodwill is subject to a periodic assessment for impairment. We assess goodwill for impairment on an annual basis as of June 30th of each year or more frequently if an event occurs or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Assessment of goodwill impairment is at the HMS Holdings Corp. entity level as we operate as a single reporting unit.	We have the option to perform a qualitative assessment to determine if impairment is more likely than not to have occurred. When the optional qualitative assessment of goodwill impairment is performed, significant judgment is required in the assessment of qualitative factors including but not limited to an evaluation of macroeconomic conditions as they relate to our business, industry and market trends, as well as the overall future financial performance of our reporting units and future opportunities in the markets in which they operate. If we can support the conclusion that it is more likely than not that the fair value of a reporting unit is greater than its carrying amount using the optional qualitative assessment, then the Company would not need to perform the two-step impairment test. If the Company cannot support such a conclusion, or the Company does not elect to perform the qualitative assessment, then the first step of the goodwill impairment test is used to identify potential impairment by comparing the fair value of the reporting unit with its carrying amount, including goodwill.	We completed the annual impairment test as of June 30, 2017 using the optional qualitative assessment and determined no impairment existed. The Company's carrying amount of goodwill was $487.6 million as of December 31, 2017. There were no impairment charges related to goodwill during the years ended December 31, 2017, 2016 or 2015. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to an impairment charge that could materially adversely impact our consolidated financial position and results of operations.

Impairment of Long-Lived and Intangible Assets

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Long-lived assets, including property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets.	We use significant judgment in assessing events or changes in circumstances which indicate that the carrying amount of the asset may not be recoverable.	The Company's carrying amount of Long-lived assets, including property and equipment and intangible assets was $190.1 million as of December 31, 2017. The Company did not recognize any impairment charges related to long-lived and intangible assets during the years ended December 31, 2017, 2016 or 2015. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to an impairment charge that could materially adversely impact our consolidated financial position and results of operations.

Valuation of Stock-Based Compensation

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
The determination of the fair value of the options on the grant date using the Black-Scholes pricing model and/or the Monte Carlo Simulation is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. Certain key variables include: the Company's expected stock price volatility over the expected term of the awards; a risk-free interest rate; and any expected dividends. The fair value of all awards also includes an estimate of expected forfeitures.	We estimate stock price volatility based on the historical volatility of the Company's common stock and estimate the expected term of the awards based on the Company's historical option exercises for similar types of stock option awards. The assumed risk-free interest rate is based on the yield on the measurement date of a zero-coupon U.S. Treasury bond with a maturity period equal to the option's expected term. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore, uses an expected dividend yield of zero in the option valuation models. Forfeitures are estimated based on historical experience.	If we were to change any of these judgments or estimates, it could cause a material increase or decrease in the amount of stock compensation expense we report in a particular period. For example, if actual forfeitures vary from estimates, a difference in compensation expense will be recognized in the period the actual forfeitures occur.

Income Taxes

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. This method also requires the recognition of future tax benefits for net operating loss carry-forwards.	Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance is provided against deferred tax assets to the extent their realization is not more likely than not. Uncertain income tax positions are accounted for by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. We make adjustments to these reserves in accordance with the income tax accounting guidance when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate.	To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made, and could have a material impact on our financial condition and operating results. Although the Company believes that it has adequately reserved for uncertain tax positions (including interest and penalties), it can provide no assurance that the final tax outcome of these matters will not be materially different.

Contingencies

Description	Judgments and Uncertainties	Effect if Actual Results Differ from Assumptions
From time to time, we are involved in legal proceedings in the ordinary course of business. We assess the likelihood of any adverse judgments or outcomes to these contingencies as well as potential ranges or probable losses and establish reserves accordingly.	We record accruals for outstanding legal matters when we believe it is probable that a loss will be incurred and the amount can be reasonable estimated. Significant judgment is required to determine both probability and the estimated amount. We review these provisions at least quarterly and adjusts the provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel and updated information.	Litigation is inherently unpredictable and is subject to significant uncertainties, some of which are beyond the Company's control. The amount of reserves required may change in future periods due to new developments in each matter or changes in approach to a matter such as a change in settlement strategy which could have a material impact on our financial condition and operating results.

For further information on these critical accounting policies and all other significant accounting policies refer to the discussion under "Business and Summary of Significant Accounting Policies" in our Note 1 to the Consolidated Financial Statements in Part II, Item 8.

Results of Operations

2017 Highlights

- Significantly expanded market penetration with the acquisition of Eliza;
- Amended our existing Credit Agreement; and
- Repurchased approximately 865,000 shares of common stock for $14.1 million.

Comparison of 2017 to 2016 and 2016 to 2015

Dollars in millions	Year ended December 31,			$ Change	% Change	% Change	% Change
	2017	2016	2015	2017 vs 2016		2016 vs 2015	
Revenue	$ 521.2	$ 489.7	$ 474.2	$ 31.5	6.4%	$ 15.5	3.3%
Cost of Services :							
Compensation	202.0	189.3	178.3	12.7	6.7	11.0	6.2
Data Processing	45.7	37.3	40.9	8.4	22.5	(3.6)	(8.8)
Occupancy	17.2	14.0	15.8	3.2	22.9	(1.8)	(11.4)
Direct project costs	41.4	46.3	51.5	(4.9)	(10.6)	(5.2)	(10.1)
Other operating costs	28.4	27.8	28.9	0.6	2.2	(1.1)	(3.8)
Amortization of acquisition related software and intangible assets	30.4	28.0	28.1	2.4	8.6	(0.1)	(0.4)
Total Cost of Services	365.1	342.7	343.5	22.4	6.5	(0.8)	(0.2)
Selling, general and administrative expenses	105.7	89.4	83.1	16.3	18.2	6.3	7.6
Total Operating Expenses	470.8	432.1	426.6	38.7	9.0	5.5	1.3

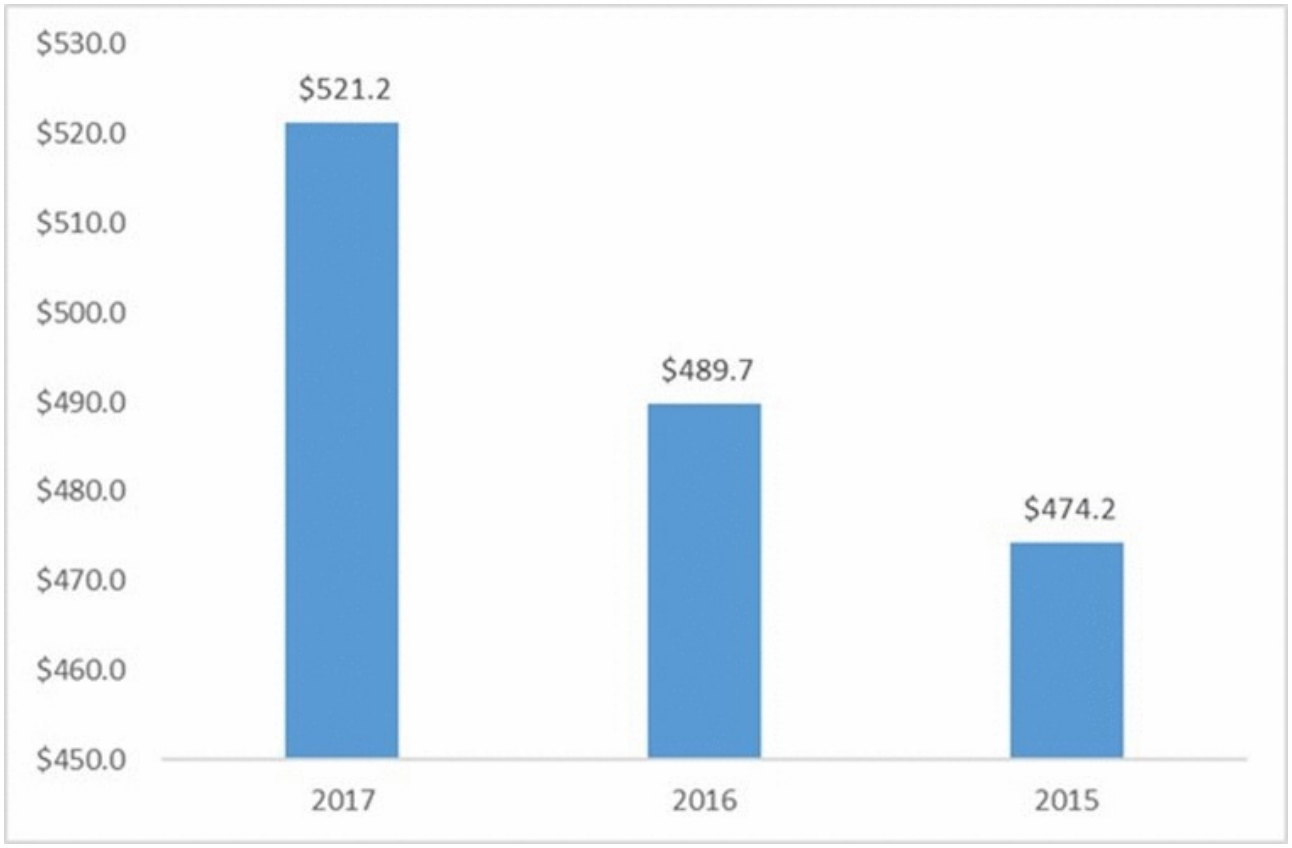
Net Income	$ 40.1	$ 37.6	$ 24.5	$ 2.5	6.6%	$ 13.1	53.5%

Revenue



Revenue in Millions

2017 vs. 2016

During the year ended December 31, 2017, revenue was $521.2 million, an increase of $31.5 million or 6.4% compared to $489.7 million for the year ended December 31, 2016.

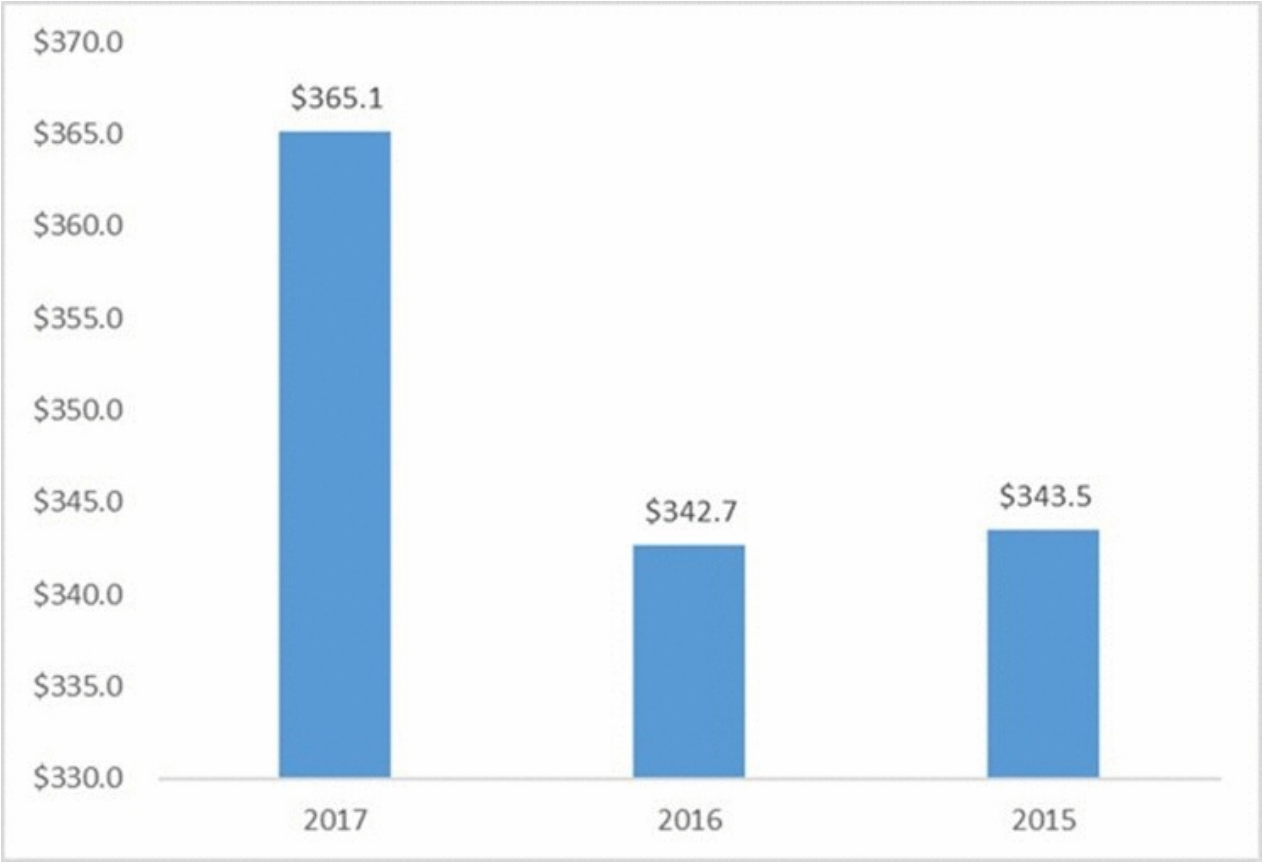
- By product:
  - Coordination of benefits product revenue increased $29.0 million or 8.2% which was attributable to yield improvements and the addition of Medicaid enrollees which entered our customer eligibility files in 2017.
  - Analytical services product revenue increased $2.5 million or 1.9% which was attributable to Eliza contributing revenue of $30.4 million since its acquisition in April 2017 and revenue from Essette increasing $2.9 million as compared to prior year. These increases were offset by decreases totaling $30.8 million comprised of Medicare RAC revenue of $14.7 million because the Medicare RAC D program ceased generating revenue in late 2016, as expected, and program integrity revenue of $16.1 million due to various contract completions and expirations.
- By market:
  - Commercial health plan market revenue increased $39.0 million or 17.0% which was attributable to Eliza contributing revenue of $30.4 million since its acquisition in April 2017, Essette increasing revenue $2.9 million as compared to prior year and expanded commercial health plan scopes, including the addition of health plans to current contracts and yield improvements.
  - State government market revenue grew by $7.9 million or 3.6%, which was attributable to expanded scopes and yield improvements.
  - Federal government market revenue decreased $15.4 million, which was primarily attributable to a reduction of Medicare RAC revenue because the Medicare RAC D program ceased generating revenue in late 2016, as expected.

2016 vs. 2015

During the year ended December 31, 2016, revenue was $489.7 million, an increase of $15.5 million or 3.3% compared to $474.2 million for the year ended December 31, 2015.

- By product:
  - Coordination of benefits product revenue increased $16.2 million or 4.8% which was primarily attributable to an increase in subrogation revenue.
  - Analytical services product revenue decreased $0.7 million or 0.5% which was attributable to decreases in Medicare RAC revenue of $3.4 million, employer services revenue of $1.8 million due to various contract completions and expirations and eligibility services revenue of $0.5 million. These decreases were offset by a $4.1 million increase in our program integrity revenue which was attributable to expanded scopes and yield improvements and $0.9 million of revenue contributed by Essette in 2016 after the date of its acquisition.
- By market:
  - Commercial health plan market revenue increased $27.2 million or 13.4%, which was attributable to expanded scopes, including adding additional health plans to current customer contracts, and yield improvements.
  - State government market revenue decreased $7.0 million or 3.1%, which was attributable to a reduction in revenue from certain customers.
  - Federal government market revenue decreased $4.7 million or 10.3%, which was primarily attributable to a reduction of Medicare RAC activity due to delays in contract reprocurement.

Cost of Services



Cost of Services in millions

2017 vs. 2016

During the year ended December 31, 2017, total cost of services was $365.1 million, an increase of $22.4 million or 6.5% compared to $342.7 million for the year ended December 31, 2016. This change resulted primarily from increases in compensation expense of $12.8 million, data processing expense of $8.4 million, and amortization of intangibles expense of $2.4 million.

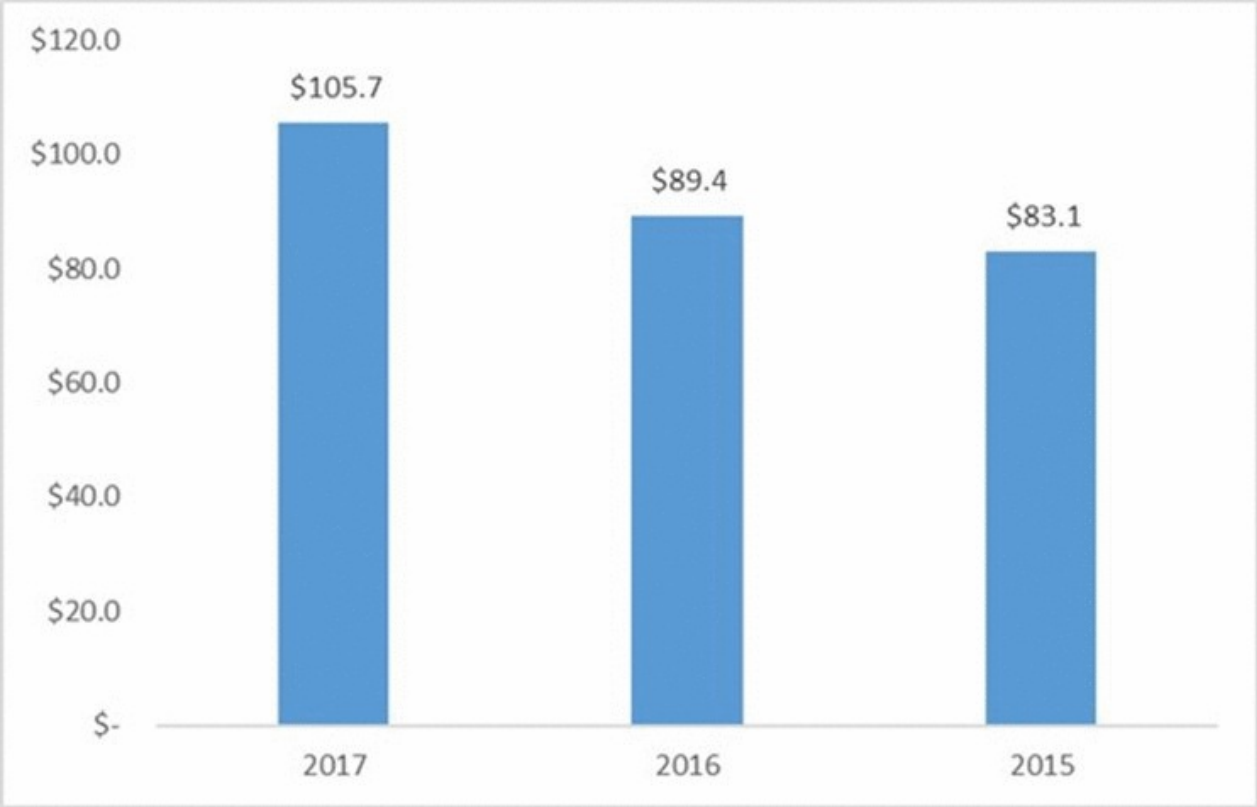
- The Eliza acquisition and the related compensation, data processing, occupancy and amortization of intangibles expenses incurred since the transaction represents $23.4 million of the increase.
- Excluding Eliza, total cost of services decreased by $1.0 million which was primarily related to a reduction in direct project costs partially offset by increases in data processing and compensation expenses.

2016 vs. 2015

During the year ended December 31, 2016, total cost of services was $342.7 million, a decrease of $0.8 million or 0.2% compared to $343.5 million for the year ended December 31, 2015.

- Direct project costs decreased by $5.2 million primarily related to the reduction of Medicare RAC activity.
- Data processing expense decreased by $3.6 million primarily related to a reduction in depreciation expense.
- Occupancy expense decreased by $1.8 million related to the closure of an office in 2015.
- Other operating expenses decreased by $1.1 million related to net decreases of temporary staff, subcontractors and consulting fees.
- Compensation expense increased by $11.1 million related to additional salaries, variable compensation and fringe benefits expenses partially offset by a decrease in stock-based compensation expense.

Selling, General and Administrative expenses



SG&A in millions

2017 vs. 2016

During the year ended December 31, 2017, SG&A expense was $105.7 million, an increase of $16.3 million or 18.2% compared to $89.4 million for the year ended December 31, 2016.

- The Eliza acquisition and related transaction fees and other SG&A expenses incurred since its acquisition represented $8.7 million of the increase.
- Excluding Eliza, stock compensation expense also increased by $7.3 million primarily due to stock compensation expense for retirement eligible employees.

2016 vs. 2015

During the year ended December 31, 2016, SG&A expense was $89.4 million, an increase of $6.3 million or 7.6% compared to $83.1 million for the year ended December 31, 2015.

- Increases totaling $14.1 million were comprised of compensation costs of $6.1 million, consulting expense of $4.0 million, fringe benefits expense of $1.6 million, and other expenses of $2.4 million.
- These increases were partially offset by a $7.8 million reduction in legal fees and settlements.

Income Taxes

2017 vs. 2016

During the year ended December 31, 2017, we recorded an income tax benefit of ($0.2) million, a decrease of $12.0 million compared to the year ended December 31, 2016.

- On December 22, 2017, the 2017 Tax Act was signed into law and includes provisions reducing the federal tax rate for years beginning in 2018 from 35% to 21%.
- Our effective tax rate was (0.5%) for the year ended December 31, 2017 compared to an effective tax rate of 23.9% for the year ended December 31, 2016. The decrease is primarily due to the revaluation of our deferred tax liabilities based on the reduced federal tax rate described above.
- Our normalized effective tax rate of 36.1% for 2017 is comparable to our normalized effective tax rate of 36.2% for 2016.

2016 vs. 2015

During the year ended December 31, 2016, we recorded income tax expense of $11.8 million, a decrease of $3.5 million compared to the year ended December 31, 2015.

- Our effective tax rate decreased from 38.4% to 23.9%, which reflects a $6.2 million tax benefit recognized in the third quarter of 2016 that was related to prior period R&D Credits and Section 199 Deductions.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Credit Agreement

In May 2013, we entered into the Credit Agreement with certain lenders and Citibank, N.A. as administrative agent. The Credit Agreement originally provided for an initial $500 million five-year revolving credit facility maturing on May 3, 2018. The obligations and amounts due under the original revolving credit facility were secured by a first security priority interest in all or substantially all of our and our material 100% owned subsidiaries' assets. The original revolving credit facility contained customary representations and warranties, affirmative and negative covenants, including financial covenants, and events of default.

In March 2017, we amended the Credit Agreement to allow, among other things, an extension of our requirement to furnish to Citibank, N.A., as administrative agent, and the lenders party to the Credit Agreement, copies of financial statements and other information within 90 days of the fiscal year-end to 180 days for the fiscal year-ended December 31, 2016. We furnished the required financial statements, which included our audited consolidated balance sheet and related statements of income, stockholders' equity and cash flows, within the extended time period.

Amended Revolving Facility

On December 19, 2017, we entered into an amendment to the Credit Agreement that, among other things, provides for an extension of the maturity date of our existing senior secured revolving credit facility, which includes a $50 million sublimit for the issuance of letters of credit and a $25 million sublimit for swingline loans. In addition, the Amended Revolving Facility includes an accordion feature that permits us to increase the revolving facility up to the sum of (a) the greater of $120 million and 100% of Consolidated EBITDA (as defined in the Credit Agreement) and (b) additional amounts so long as our first lien leverage ratio (as defined in the Credit Agreement) on a pro forma basis is not greater than 3.00:1.00, in each case subject to obtaining commitments from lenders therefor and meeting certain other conditions. The Amended Revolving Facility will mature on December 19, 2022.

As of December 31, 2017, the outstanding principal balance due on the Amended Revolving Facility was $240.0 million.

Our obligations under the Amended Revolving Facility are secured, subject to certain customary carve-outs and exceptions, by a first priority lien and security interest in substantially all of our tangible and intangible assets and our material restricted subsidiaries'. The Amended Revolving Facility contains customary representations and warranties, affirmative and negative covenants, including financial covenants and restrictions on share repurchases, and events of default applicable to us and our restricted subsidiaries. We are required to comply, on a quarterly basis, with two financial covenants:(i) a minimum interest coverage ratio of 3:00:1:00, and (ii) a maximum consolidated leverage ratio of 4.75:1.00 through December 2019 and 4.25:1.00 from and after January 2020 (in each case, as such ratios are defined in the Credit Agreement). The consolidated leverage ratio is subject to a step-up to 5.25:1.00 for four full consecutive fiscal quarters following a permitted acquisition or similar investment.

Borrowings under the Amended Revolving Facility bear interest at a rate equal to either (a) a base rate plus an interest margin ranging from 0.50% to 1.00% or (b) an adjusted LIBO rate, plus an interest margin ranging from 1.50% to 2.00% based on the Company's consolidated leverage ratio for the applicable period.

We paid lender, legal and other fees of $2.3 million and accrued interest of $1.5 million. Proceeds of the Amended Revolving Facility may be used to provide working capital from time to time for the Company, and for other general corporate purposes and activities permitted by the Credit Agreement.

As of December 31, 2017, we were in compliance with all terms of the Credit Agreement.

As part of a contractual agreement with a customer, the Company has an outstanding irrevocable letter of credit for $5.4 million, which is issued against the Amended Revolving Facility and expires April 26, 2018.

See Note 8 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding our Credit Agreement.

Liquidity and Capital Resources

The following tables should be read in conjunction with the Consolidated Financial Statements and Notes thereto, in Part II, Item 8 of this 2017 Form 10-K.

Our cash and cash equivalents, working capital and available borrowings under our credit facility (based upon the borrowing base and financial covenants in our Credit Agreement) were as follows:

	Years Ended December 31,	
(In thousands)	**2017**	**2016**
Cash and cash equivalents	$ 83,313	$ 175,999
Working capital	$ 199,967	$ 277,478
Available borrowings under credit facility	$ 254,600	$ 183,881

A summary of our cash flows was as follows:

	Years Ended December 31,		
(In thousands)	**2017**	**2016**	**2015**
Net cash provided by operating activities	$ 86,464	$ 88,639	$ 72,285
Net cash used in investing activities	(204,364)	(39,201)	(11,817)
Net cash provided by / (used in) financing activities	25,214	(19,049)	(47,974)
Net (decrease) / increase in cash and cash equivalents	$ (92,686)	$ 30,389	$ 12,494

Our cash and cash equivalents and working capital were lower as of December 31, 2017 as compared to December 31, 2016, primarily as a result of cash used for our acquisition of Eliza on April 17, 2017. Our available borrowings were higher as of December 31, 2017 as compared to December 31, 2016 as a result of the Amended Revolving Facility as described above.

Our principal source of cash has been our cash flow from operations and our $500 million five-year revolving credit facility. Other sources of cash include proceeds from exercise of stock options and tax benefits associated with stock option exercises. The primary uses of cash are capital investments, compensation expenses, data processing, direct project costs and SG&A expenses and acquisitions. We may also use available cash to repurchase shares of our common stock.

We believe that expected cash flows from operations, available cash and cash equivalents, and funds available under our revolving credit facility will be sufficient to meet our liquidity requirements for the following year, which include:

- the working capital requirements of our operations;
- investments in our business;
- business development activities;
- repurchases of common stock; and
- repayment of our revolving credit facility.

Any projections of future earnings and cash flows are subject to substantial uncertainty. We may need to access debt and equity markets in the future if unforeseen costs or opportunities arise, to meet working capital requirements, fund acquisitions or repay our indebtedness under the Credit Agreement. If we need to obtain new debt or equity financing in the future, the terms and availability of such financing may be impacted by economic and financial market conditions as well as our financial condition and results of operations at the time we seek additional financing.

Cash Flows from Operating Activities

Net cash provided by operating activities for the year ended December 31, 2017 was $86.5 million, a $2.1 million decrease from net cash provided by operating activities of $88.6 million for the year ended December 31, 2016. The decrease was primarily due to a decrease in deferred income taxes of $13.0 million related to our revaluation of the Company's deferred tax balances from the federal tax rate of 35% to 21% under the 2017 Tax Act, offset by an increase in stock based compensation expense $10.9 million primarily related to retirement eligible employees. The decrease was also impacted by changes in operating assets and liabilities and offset by increases in net income, and depreciation and amortization expenses.

Net cash provided by operating activities for the year ended December 31, 2016 was $88.6 million, a $16.3 million increase from net cash provided by operating activities of $72.3 million for the year ended December 31, 2015. The increase was primarily due to an increase in net income as adjusted for non-cash items including decreased stock-based compensation expense and deferred income taxes, as well as an increase in accounts payable and other liabilities.

Net cash provided by operating activities for the year ended December 31, 2015 was $72.3 million, a $28.3 million decrease from net cash provided by operating activities of $100.6 million for the year ended December 31, 2014. This decrease was primarily due to an increase in accounts receivable and a decrease in our net deferred tax liabilities and accounts payable, partially offset by an increase in net income.

Our DSO calculation can be derived by dividing total net accounts receivable at the end of period, by the daily average of the current quarter's annualized revenue. For the year ended December 31, 2017, revenue was $521.2 million, an increase of $31.5 million compared to revenue of $489.7 million for the year ended December 31, 2016. DSO decreased by 9 days to 115 days as of December 31, 2017, as compared to 124 days as of December 31, 2016. The change was due to strong cash collections as well as an increase in revenue in the fourth quarter of the current year as compared to the fourth quarter of the prior year. We do not currently anticipate collection issues with our accounts receivable, however, nor do we currently expect that any extended collections will materially impact our liquidity.

The majority of our customer relationships have been in place for several years. Our future operating cash flows could be adversely affected by a decrease in a demand for our services, delayed payments from customers or if one or more contracts with our largest customers is terminated or not renewed.

Cash Flows from Investing Activities

Net cash used in investing activities for the year ended December 31, 2017 was $204.4 million, a $165.2 million increase compared to net cash used in investing activities of $39.2 million for the year ended December 31, 2016. This increase was primarily due to the use of approximately $171.2 million for the Eliza acquisition in April 2017 as compared to the use of approximately $20.7 million for the Essette acquisition in September 2016. Purchases of property and equipment and investment in capitalized software also increased by $12.0 million year over year.

Net cash used in investing activities for the year ended December 31, 2016 was $39.2 million, a $27.4 million increase compared to net cash used in investing activities of $11.8 million for the year ended December 31, 2015. This increase was primarily due to the use of approximately $20.7 million for the Essette acquisition in September 2016. Purchases of property and equipment and investment in capital software also increased by $9.2 million. These increases were partially offset by the receipt of proceeds from the sale of a cost basis investment of approximately $2.5 million.

Net cash used in investing activities for the year ended December 31, 2015 was $11.8 million, a $14.4 million decrease compared to net cash used in investing activities of $26.2 million for the year ended December 31, 2014. The decrease was primarily related to a $14.1 million decrease in purchase of property and equipment and a $0.3 million decrease in investment in capitalized software.

We currently expect to incur capital expenditures of $33.0 million during the year ended December 31, 2018.

Cash Flows from Financing Activities

Net cash provided by financing activities for the year ended December 31, 2017 was $25.2 million, a $44.2 million increase from net cash used in financing activities of $19.0 million for the year ended December 31, 2016. This increase was primarily attributable to $42.2 million of proceeds from additional borrowings under our amended credit facility.

Net cash used in financing activities for the year ended December 31, 2016 was $19.0 million, a $29.0 million decrease from net cash used in financing activities of $48.0 million for the year ended December 31, 2015. This decrease was primarily attributable to a decrease in share repurchases of $20.5 million as compared to the prior year of $50.0 million.

Net cash used in financing activities for the year ended December 31, 2015 was $48.0 million, a $13.4 million increase from net cash used in financing activities of $34.6 million for the year ended December 31, 2014. This increase was primarily attributable to $50.0 million used in 2015 for share repurchases, partially offset by a $35.0 million reduction in payments toward the principal outstanding on our revolving credit facility.

Share Repurchase Program

During the year ended December 31, 2017, we repurchased 0.9 million shares of our common stock for approximately $14.1 million using cash resources. See the discussion under “Repurchases of Shares of Common Stock” under Part II, Item 5 and “Equity” in Note 9 to the Consolidated Financial Statements under Part II, Item 8 for additional information regarding share repurchases.

Contractual Obligations

The following table represents the scheduled maturities of our contractual cash obligations and other commitments:

	Payments Due by Period (*in thousands*)				
Contractual Obligations [8]	Total	Less than 1 year	1 - 3 years	3 -5 years	More than 5 years
Operating leases [1]	$ 19,938	$ 6,393	$ 8,773	$ 4,772	$ -
Revolving credit facility [2]	240,000	-	-	240,000	-
Interest expense [3]	40,633	8,212	24,636	7,785	-
Commitment fee [4]	4,789	968	2,904	917	-
Capital leases [5]	198	190	8	-	-
Letter of Credit fee [6]	34	34	-	-	-
Purchase obligations and commitments [7]	2,476	2,476	-	-	-
Total	$ 308,068	$ 18,273	$ 36,321	$ 253,474	$ -

(1) Represents the future minimum lease payments under non-cancelable operating leases. In addition to minimum rent, certain leases require the payment for insurance, maintenance and other costs. These additional amounts are not included in the table of contractual obligations as the timing and/or amounts of such payments are unknown.

(2) Represents scheduled repayments of principal on the revolving credit facility under the terms of our Credit Agreement. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(3) Represents estimates of amounts due on revolving credit facility based on the interest rate as of December 31, 2017 and on scheduled repayments of principal. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(4) Represents the commitment fee due on the revolving credit facility. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(5) Represents the future minimum lease payments under capital leases.

(6) Represents the fees for the letter of credit issued against the revolving credit facility. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 for additional information regarding the Credit Agreement.

(7) Represents future purchases related to outstanding purchase orders and supplier requisitions.

(8) The Company has excluded long-term unrecognized tax benefits, net of interest and penalties, of $8.2 million from the amounts presented as the timing of these obligations is uncertain.

Recently Issued Accounting Pronouncements

The information set forth under the caption “Summary of Significant Accounting Policies” in Note 1 to the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

At December 31, 2017, we were not a party to any derivative financial instruments. We conduct all of our business in U.S. currency and hence do not have direct foreign currency risk. We are exposed to changes in interest rates, primarily with respect to our revolving credit facility under our Credit Agreement. If the effective interest rate for all of our variable rate debt were to increase by 100 basis points (1%), our annual interest expense would increase by a maximum of $2.4 million based on our debt balances outstanding at December 31, 2017. Further, we currently invest substantially all of our excess cash in short-term investments, primarily money market accounts, where returns effectively reflect current interest rates. As a result, market interest rate changes may impact our interest income or expense. The impact will depend on variables such as the magnitude of rate changes and the level of borrowings or excess cash balances. We do not consider this risk to be material. We manage such risk by continuing to evaluate the best investment rates available for short-term, high quality investments.

Item 8. Consolidated Financial Statements and Supplementary Data

The information required by Item 8 is found on pages 61 to 64 of this 2017 Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We are responsible for maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures

As required by Rule 13a-15(b) under the Exchange Act, management, with the participation of our Chief Executive Officer and Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2017. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by the 2017 Form 10-K.

(b) Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by Rule 13a-15(f) of the Exchange Act, internal control over financial reporting is a process designed by, or under the supervision of our Chief Executive Officer and our Chief Financial Officer and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with U.S. GAAP.

Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the consolidated financial statements in accordance with generally accepted accounting principles and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

In connection with the preparation of our annual consolidated financial statements, management has undertaken an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2017, based on criteria established in the Internal Control-Integrated Framework issued by COSO. Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of those controls. Based on that assessment, we believe that the Company's internal control over financial reporting was effective based on those criteria as of December 31, 2017.

On April 17, 2017, we completed our acquisition of Eliza. We are in the process of evaluating the existing controls and procedures of Eliza and integrating Eliza into our internal control over financial reporting. In accordance with SEC Staff guidance permitting a company to exclude an acquired business from management's assessment of the effectiveness of internal control over financial reporting for the year in which the acquisition is completed, we have excluded the Eliza business acquired in 2017 from our assessment of the effectiveness of internal control over financial reporting as of December 31, 2017. Eliza represented twenty percent of the Company's total assets as of December 31, 2017, and six percent of the Company's revenues for the year ended December 31, 2017. The scope of management's assessment of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2017 includes all of the Company's consolidated operations except for those disclosure controls and procedures of Eliza that are subsumed by internal control over financial reporting.

Our independent registered public accounting firm, Grant Thornton LLP, audited our consolidated financial statements and has issued an attestation report on the effectiveness of our internal control over financial reporting as of December 31, 2017, a copy of which appears on page 60 of this filing.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(c) Changes in Internal Control Over Financial Reporting

During the quarter ended December 31, 2016, management identified material weaknesses in our internal control over financial reporting related to (i) the calculation our estimated liability for appeals associated with our contract with CMS (the "CMS Reserve") and (ii) the valuation of our accounts receivable allowance (the "Allowance"). A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement in our annual or interim financial statements will not be prevented or detected on a timely basis.

As described in Management's Report on Internal Control Over Financial Reporting in Item 9A of our 2016 Form 10-K, management determined that we did not maintain an effective control environment based on lack of established reporting lines and defined authorities and responsibilities for financial reporting at our wholly owned subsidiary, HDI, and did not have an effective risk assessment process on a periodic basis to assess the effects of changes in business operations and turnover of our employees that significantly impact our financial processes and internal control over financial reporting related to (i) our estimated liability for appeals associated with our contract with CMS (the "CMS Reserve") and (ii) the valuation of our accounts receivable allowance (the "Allowance"). As a result, we did not design and implement effective process level control activities, specifically management review controls over the measurement and disclosure of the CMS Reserve and the Allowance and controls over the completeness and accuracy of data used to calculate the CMS Reserve and the Allowance.

To remediate the material weaknesses described above we:

- clarified our risk assessment process in regards to external factors, such as conditions in the Company's industry and environment, and internal factors, such as personnel who may lack the necessary financial reporting competencies, information systems that may fail to accurately capture business transactions, or financial reporting processes that may not be adequately aligned with the requirements in the applicable financial reporting framework;
- restructured and redefined certain individuals' responsibilities in regards to internal control over financial reporting and have added additional full time personnel which we believe will continue to strengthen internal control over financial reporting specifically related to our risk assessment process;
- realigned existing subsidiary and corporate reporting lines which we believe will clarify existing subsidiary authorities and responsibilities for financial reporting and will enhance corporate-level oversight of the subsidiary activities;
- engaged an independent third party professional services firm to assist in enhancing and clarifying process flows and the underlying process level controls around the CMS Reserve and the Allowance;
- implemented additional process level controls surrounding the completeness and accuracy of the underlying data and reports;
- trained personnel with respect to supporting documentation used in process level controls;
- enhanced and clarified existing review control procedures over our models for the CMS Reserve and the Allowance including adding additional specific review criteria utilized; and
- implemented additional layers of review controls specifically over the CMS Reserve and the Allowance, including the review by more experienced personnel.

Management completed testing during the quarter ended December 31, 2017 and determined that the measures described above were effectively designed and demonstrated effective operation for a sufficient period of time to enable the Company to conclude that the material weaknesses have been remediated.

Except as noted above, there have been no changes to the Company's internal control over financial reporting as of December 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item 10 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2018 Annual Meeting of Shareholders under the captions "*Proposal One: Election of Class I Directors,*" "*Executive Officers,*" "*Section 16(a) Beneficial Ownership Reporting Compliance*," "*Director Nomination Process*," "*Additional Information—Shareholder Proposals and Director Nominations for 2019 Annual Meeting,*" and "*Board Committees and Related Matters*."

Our Board of Directors has adopted a Code of Conduct applicable to all of our directors, officers and employees, including all employees, officers, directors, contractors, contingent workers and business affiliates of HMS subsidiaries. The Code of Conduct is publicly available on our website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate governance.cfm and can also be obtained free of charge by sending a written request to our Corporate Secretary. To the extent permissible under the Nasdaq Marketplace Rules, we intend to disclose amendments to our Code of Conduct, as well as waivers of the provisions thereof, that relate to our principal executive officer, principal financial officer, principal accounting officer, controller or persons performing similar functions on the Company's website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate-governance.cfm.

Item 11. Executive Compensation

The information required by this Item 11 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2018 Annual Meeting of Shareholders under the captions "*Executive Compensation,*" "*Director Compensation,*" "*Compensation Committee Interlocks and Insider Participation,*" and "*Compensation Committee Report*."

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

Except as provided below, the information required by this Item 12 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2018 Annual Meeting of Shareholders under the caption "*Ownership of HMS Common Stock.*"

Equity Compensation Plan Information

The following table summarizes information about our equity compensation plans as of December 31, 2017. For additional information about our equity compensation plans see the discussion set forth under the caption "Stock-Based Compensation" in Note 11 to the Consolidated Financial Statements in Part II, Item 8.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by shareholders	6,869,758(1)	$ 17.42	6,031,544
Equity compensation plans not approved by shareholders	31,300(2)	$ 17.89	—
Total	6,901,058		

(1) This includes stock options and restricted stock units granted under our 2006 Stock Plan and 2016 Omnibus Plan.

(2) This includes stock options granted under the 2011 HDI Plan, which was assumed in connection with our acquisition of HDI and approved by the Compensation Committee of our Board.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by this Item 13 is incorporated herein by reference to the applicable disclosure found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2018 Annual Meeting of Shareholders under the captions "*Certain Relationships and Related Transactions*" and "*Director Independence*."

Item 14. Principal Accounting Fees and Services

The information required by this Item 14 is incorporated herein by reference to the applicable disclosure from the proposal captioned "*Ratification of the Selection of Independent Registered Public Accounting Firm*" found in our definitive proxy statement to be filed with the SEC pursuant to Regulation 14A under the Exchange Act in connection with HMS Holdings Corp.'s 2018 Annual Meeting of Shareholders.

PART IV

Item 15. Exhibits and Financial Statement Schedules

1. *Financial Statements.*

The financial statements are listed in the Index to Consolidated Financial Statements on page 58.

2. *Financial Statement Schedules.*

Financial Statement Schedule II-Valuation and Qualifying Accounts is set forth on page 88. All other financial statement schedules have been omitted as they are either not required, not applicable or the information is otherwise included.

3. *Exhibits.*

The Exhibits include agreements to which the Company is a party or has a beneficial interest. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other actual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties, and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties, and covenants in the agreements may have been used for the purpose of allocating risk between parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.

Where an exhibit is filed by incorporation by reference to a previously filed registration statement or report, such registration statement or report is identified after the description of the exhibit.

Exhibit Number	Description
2.1	Agreement and Plan of Merger, dated December 16, 2002, among Health Management Systems, Inc., HMS Holdings Corp. and HMS Acquisition Corp. (incorporated by reference to Exhibit A to the Company's Prospectus and Proxy Statement (Reg No. 333-100521) as filed with the SEC on January 24, 2003)

HMS HOLDINGS CORP. AND SUBSIDIARIES
INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
HMS Holdings Corp.

Opinion on the financial statements
We have audited the accompanying consolidated balance sheet of HMS Holdings Corp. (a Delaware corporation) and subsidiaries (the "Company") as of December 31, 2017, the related consolidated statements of income, changes in shareholders' equity, and cash flows for the year ended December 31, 2017 and the related notes and schedule (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017, and the results of its operations and its cash flows for the year ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), and our report dated February 27, 2018 expressed an unmodified opinion.

Basis for opinion
These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

The Board of Directors and Shareholders
HMS Holdings Corp.:

We have audited the accompanying consolidated balance sheets of HMS Holdings Corp. and subsidiaries as of December 31, 2016, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2016. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule II. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of HMS Holdings Corp. and subsidiaries as of December 31, 2016, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
HMS Holdings Corp.

Opinion on internal control over financial reporting

We have audited the internal control over financial reporting of HMS Holdings Corp. (a Delaware corporation) and subsidiaries (the "Company") as of December 31, 2017, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated financial statements of the Company as of and for the year ended December 31, 2017, and our report dated February 27, 2018 expressed an unqualified opinion on those financial statements.

Basis for opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control and Financial Reporting ("Management's Report"). Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Our audit of, and opinion on, the Company's internal control over financial reporting does not include the internal control over financial reporting of Eliza Holding Corp., a wholly-owned subsidiary, whose financial statements reflect total assets and revenues constituting twenty and six percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2017. As indicated in the accompanying Management's Report, Eliza Holding Corp. was acquired during 2017. Management's assertion on the effectiveness of the Company's internal control over financial reporting excluded internal control over financial reporting of Eliza Holding Corp.

Definition and limitations of internal control over financial reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

HMS HOLDINGS CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Business and Summary of Significant Accounting Policies

(a) Business

HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. We use innovative technology, extensive data services and powerful analytics to deliver coordination of benefits, payment integrity and care management and consumer engagement solutions to help healthcare payers improve financial performance and clinical outcomes. We provide coordination of benefits services to government and commercial healthcare payers and sponsors to ensure that the responsible party pays healthcare claims. Our payment integrity services ensure healthcare claims billed are accurate and appropriate, and our care management and consumer engagement technology helps risk-bearing organizations to better engage with and manage the care delivered to their members. Together these various services help customers recover erroneously paid amounts from liable third parties; prevent future improper payments; reduce fraud, waste and abuse; better manage the care their members receive; engage healthcare consumers to improve clinical outcomes while increasing member satisfaction and retention; and achieve regulatory compliance. We currently operate as one business segment with a single management team that reports to the Chief Executive Officer.

(b) Summary of Significant Accounting Policies

(i) Principles of Consolidation

The consolidated financial statements include the Company's accounts and transactions and those of the Company's wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

(ii) Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(iii) Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents consist of deposits that are readily convertible into cash.

(iv) Concentration of Credit Risk

The Company's policy is to limit credit exposure by placing cash in accounts which are exposed to minimal interest rate and credit risk. HMS maintains cash and cash equivalents in cash depository accounts with large financial institutions with a minimum credit rating of A1/P1 or better, as defined by Standard and Poor's. The balance at these institutions generally exceeds the maximum balance insured by the Federal Deposit Insurance Corporation of up to $250,000 per entity. HMS has not experienced any losses in cash and cash equivalents and believes these cash and cash equivalents do not expose the Company to any significant credit risk.

The Company is subject to potential credit risk related to changes in economic conditions within the healthcare market. However, HMS believes that the billing and collection policies are adequate to minimize the potential credit risk. The Company performs ongoing credit evaluations of customers and generally does not require collateral.

(v) Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is provided over the estimated useful lives of the assets utilizing the straight-line method. HMS amortizes leasehold improvements on a straight-line basis which is typically five to ten years. Equipment leased under capital leases is depreciated over the shorter of (i) the term of the lease and (ii) the estimated useful life of the equipment. Capitalized software costs relate to software that is acquired or developed for internal use while in the application development stage. All other costs to develop software for internal use, either in the preliminary project stage or post-implementation stage, are expensed as incurred. Amortization of capitalized software is calculated on a straight-line basis over the expected economic life. Land is not depreciated.

Estimated useful lives are as follows:

Property and Equipment	Useful Life (in years)		
Equipment	2	to	3
Leasehold improvements	5	to	10
Furniture and fixtures		5	
Capitalized software	3	to	10
Building and building improvements		up to 39.5	

Property and equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets. The Company did not recognize any impairment charges related to property and equipment during the years ended December 31, 2017, 2016 or 2015.

(vi) Intangible assets

The Company records assets acquired and liabilities assumed in a business combination based upon their acquisition date fair values. In most instances there is not a readily defined or listed market price for individual assets and liabilities acquired in connection with a business, including intangible assets. The Company determines fair value through various valuation techniques including discounted cash flow models, quoted market values and third party independent appraisals, as considered necessary. Significant assumptions used in those techniques include, but are not limited to, growth rates, discount rates, customer attrition rates, expected levels of revenues, earnings, cash flows and tax rates. The use of different valuation techniques and assumptions are highly subjective and inherently uncertain and, as a result, actual results may differ materially from estimates.

All of the Company's intangible assets are subject to amortization and are amortized using the straight-line method over their estimated period of benefit. Estimated useful lives are as follows:

Intangible Assets	Useful Life (in years)		
Customer relationships	5	-	15
Restrictive covenants	1	-	3
Trade names	1.5	-	7
Intellectual property	3	-	5

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized and charged to earnings is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets. The Company did not recognize any impairment charges related to intangible assets during the years ended December 31, 2017, 2016 or 2015.

(vii) Goodwill

Goodwill is the excess of acquisition costs over the fair values of assets and liabilities of acquired businesses. During the measurement period, which is up to one year from the acquisition date, the Company may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to earnings.

Goodwill is subject to a periodic assessment for impairment. The Company assesses goodwill for impairment on an annual basis as of June 30th of each year or more frequently if an event occurs or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Assessment of goodwill impairment is at the HMS Holdings Corp. entity level as the Company operates as a single reporting unit. The Company has the option to perform a qualitative assessment to determine if impairment is more likely than not to have occurred. When the optional qualitative assessment of goodwill impairment is performed, significant judgment is required in the assessment of qualitative factors including but not limited to an evaluation of macroeconomic conditions as they relate to our business, industry and market trends, as well as the overall future financial performance of our reporting units and future opportunities in the markets in which they operate. If the Company can support the conclusion that it is more likely than not that the fair value of a reporting unit is greater than its carrying amount using the optional qualitative assessment, then the Company would not need to perform the two-step impairment test. If the Company cannot support such a conclusion, or the Company does not elect to perform the qualitative assessment, then the first step of the goodwill impairment test is used to identify potential impairment by comparing the fair value of the reporting unit with its carrying amount, including goodwill. The Company completed the annual impairment test as of June 30, 2017 using the optional qualitative assessment and determined no impairment existed. There were no impairment charges related to goodwill during the years ended December 31, 2017, 2016 or 2015.

(viii) Income Taxes

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. This method also requires the recognition of future tax benefits for net operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance is provided against deferred tax assets to the extent their realization is not more likely than not. Uncertain income tax positions are accounted for by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. Although the Company believes that it has adequately reserved for uncertain tax positions (including interest and penalties), it can provide no assurance that the final tax outcome of these matters will not be materially different. The Company makes adjustments to these reserves in accordance with the income tax accounting guidance when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made, and could have a material impact on our financial condition and operating results.

(ix) Revenue Recognition

The Company provides services under contracts that contain various fee structures, including contingency fee and fixed fee arrangements. Revenue is recognized when a contract exists, services have been provided to the customer, the fee is fixed and determinable, and collectability is reasonably assured. In addition, the Company has contracts with the federal government which are generally cost-plus or time and material based. Revenue on cost-plus contracts is recognized based on costs incurred plus the negotiated fee earned. Revenue on time and materials contracts is recognized based on hours worked and expenses incurred. In addition, some of the Company's contracts may include customer acceptance provisions. Formal customer sign-off is not always necessary to recognize revenue, provided HMS objectively demonstrates that the criteria specified in the acceptance provision are satisfied. Due to the range of products and services that HMS provides and the differing fee structures associated with each type of contract, revenue may be recognized in irregular increments. A portion of our revenue is recorded net of an estimate of future revenue adjustments, with an offsetting entry to accounts receivable allowance, based on historical patterns of billing adjustments, length of operating and collection cycle and customer negotiations, behaviors and payment patterns. Changes in these estimates are recorded to revenue in the period of change.

(x) Estimated Liability for Appeals

Under the Company's contracts with certain commercial health plan customers and its Medicare RAC contracts with CMS, HMS recognizes revenue when HMS claim findings are sent to the Company's customers for offset against future claim payments to providers. These contracts permit providers the right to appeal HMS claim findings and to pursue additional appeals if the initial appeal is found in favor of HMS's customer. The appeal process established under the Medicare RAC contract with CMS includes five levels of appeals, and resolution of appeals can take substantial time to resolve. HMS records a) a liability for findings which have been adjudicated in favor of providers and b) an estimated liability based on the amount of revenue that is subject to appeals and which are probable of being adjudicated in favor of providers following their successful appeal. The Company's estimate is based on the Company's historical experience.

The total estimated liability for appeals balance of $30.8 million as of December 31, 2017 and December 31, 2016, respectively, includes $19.3 million and $17.3 million, respectively, of Medicare RAC claim findings which have been adjudicated in favor of providers, and $8.5 million and $11.1 million, respectively, of the Company's estimate of the potential amount of Medicare RAC repayments that are probable of being adjudicated in favor of providers following a successful appeal. Additionally, the total estimated liability for appeals balance includes $3.0 million and $2.4 million related to commercial customers claim appeals. The provision included in the estimated liability for appeals is an offset to revenue in the Company's Consolidated Statements of Income.

To the extent the amount to be returned to providers following a successful appeal exceeds or is less than the amount recorded, revenue in the applicable period would be reduced or increased by such amount. Any future changes to any of the Company's customer contracts, including modifications to the Medicare RAC contract, may require the Company to apply different assumptions that could materially affect both the Company's revenue and estimated liability for appeals in future periods.

(xi) Expense Classifications

HMS cost of services is presented in the categories set forth below. Each category within cost of services excludes expenses relating to SG&A functions, which are presented separately as a component of total operating costs. A description of the primary expenses included in each category is as follows:

Cost of Services:

- *Compensation:* Salary, fringe benefits, bonus and stock-based compensation.
- *Data processing:* Hardware, software and data communication costs.
- *Occupancy:* Rent, utilities, depreciation, office equipment and repair and maintenance costs.
- *Direct project expense:* Variable costs incurred from third party providers that are directly associated with specific revenue generating projects and employee travel expenses.
- *Other operating expenses:* Professional fees, temporary staffing, travel and entertainment, insurance and local and property tax costs.
- *Amortization of acquisition related software and intangible assets:* Amortization of the cost of acquisition related software and intangible assets.

SG&A:

- Expenses related to general management, marketing and administrative activities.

(xii) Estimating Valuation Allowances and Accrued Liabilities

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reported period. In particular, management must make estimates of the probability of collecting accounts receivable. When evaluating the adequacy of the accounts receivable allowance, management reviews the accounts receivables based on an analysis of historical revenue adjustments, bad debts, customer concentrations, customer credit-worthiness, current economic trends and changes in customer payment terms. As of December 31, 2017 and 2016, the accounts receivable balance was $189.5 million and $173.6 million, net of allowance of $14.8 million and $10.8 million, respectively.

(xiii) Stock-Based Compensation

Long-Term Incentive Award Plans

The Company grants stock options and restricted stock units ("equity awards") to HMS employees and non-employee directors under the 2016 Omnibus Plan, as approved by the Company's shareholders on June 23, 2016. The 2016 Omnibus Plan replaced and superseded the Company's 2006 Stock Plan and 2011 HDI Plan. The number of securities remaining available for future issuance under equity compensation plans, excluding securities to be issued upon exercise of outstanding options and vesting of restricted stock units, is 6,031,554 shares. All of the Company's employees as well as HMS non-employee directors are eligible to participate in the 2016 Omnibus Plan. Awards granted under the 2016 Omnibus Plan generally vest over one to four years. The exercise price of stock options granted under the 2016 Omnibus Plan may not be less than the fair market value of a share of stock on the grant date, as measured by the closing price of the Company's common stock on the Nasdaq Global Select Market and the term of a stock option may not exceed ten years. The Company currently grants two types of equity awards: 1) equity awards with service conditions and 2) equity awards with market and service conditions. The market condition is based on the Company's common stock price during the applicable measurement period.

Stock-Based Compensation Expense

The Company recognizes stock-based compensation expense equal to the grant date fair value of the award on a straight-line basis over the requisite service period.

The fair value of each option grant with only service-based conditions is estimated using the Black-Scholes pricing model. The fair value of each option grant with market and service-based conditions is estimated using a Monte Carlo simulation model. The fair value of each restricted stock unit is calculated based on the closing sale price of the Company's common stock on the grant date.

The determination of the fair value of the options on the grant date using the Black-Scholes pricing model and/or the Monte Carlo simulation model is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. Certain key variables include: the Company's expected stock price volatility over the expected term of the awards; a risk-free interest rate; and any expected dividends. The Company estimates stock price volatility based on the historical volatility of the Company's common stock and estimates the expected term of the awards based on the Company's historical option exercises for similar types of stock option awards. The assumed risk-free interest rate is based on the yield on the measurement date of a zero-coupon U.S. Treasury bond with a maturity period equal to the option's expected term. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore, uses an expected dividend yield of zero in the option valuation models. The fair value of all awards also includes an estimate of expected forfeitures. Forfeitures are estimated based on historical experience. If actual forfeitures vary from estimates, a difference in compensation expense will be recognized in the period the actual forfeitures occur. Upon the exercise of stock options or the vesting of restricted stock units, the resulting excess tax benefits or deficiencies, if any, are recognized as income tax expense or benefit.

(xiv) Fair Value of Financial Instruments

Financial instruments are categorized into a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. In the event the fair value is not readily available or determinable, the financial instrument is carried at cost and referred to as a cost method investment. The fair value hierarchy is as follows:

- *Level 1:* Observable inputs such as quoted prices in active markets;
- *Level 2*: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- *Level 3:* Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

(xv) Leases

HMS accounts for lease agreements as either operating or capital leases, depending on certain defined criteria. Lease costs are amortized on a straight-line basis without regard to deferred payment terms, such as rent holidays, that defer the commencement date of required payments. Additionally, incentives such as tenant improvement allowances, are capitalized and are treated as a reduction of rental expense over the term of the lease agreement.

(xvi) Contingencies

From time to time, HMS is involved in legal proceedings in the ordinary course of business. The Company assesses the likelihood of any adverse judgments or outcomes to these contingencies as well as potential ranges or probable losses and establishes reserves accordingly. HMS records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonable estimated. Significant judgment is required to determine both probability and the estimated amount. HMS reviews these provisions at least quarterly and adjusts the provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel and updated information. Litigation is inherently unpredictable and is subject to significant uncertainties, some of which are beyond the Company's control. The amount of reserves required may change in future periods due to new developments in each matter or changes in approach to a matter such as a change in settlement strategy.

(xvii) Recent Accounting Guidance

Recently Adopted Accounting Guidance

In April 2015, the FASB issued ASU No. 2015-05, Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement ("ASU 2015-05"). ASU 2015-05 provides explicit guidance to help companies evaluate the accounting for fees paid by a customer in a cloud computing arrangement and clarifies that if a cloud computing arrangement includes a software license, the customer should account for the license consistent with its accounting for other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. ASU 2015-05 is effective for annual reporting periods beginning after December 15, 2015, including interim periods within such annual reporting periods with early adoption permitted. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In September 2015, the FASB issued ASU No. 2015-16, Simplifying the Accounting for Measurement-Period Adjustments, ("ASU 2015-16"). ASU 2015-16 eliminates the requirement to restate prior period financial statements for business combination measurement period adjustments. ASU 2015-16 requires the cumulative impact of a measurement period adjustment, including the impact of prior periods, be recognized in the reporting period in which the adjustment is identified. The guidance requires an acquirer to present separately on the face of the income statement, or disclose in the notes, the portion of the adjustment recorded in current-period earnings by line item that would have been recorded in previous reporting periods, if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 is applied prospectively and is effective for public business entities for interim and annual periods beginning after December 15, 2015. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes ("ASU 2015-17"). ASU 2015-17 simplifies the current presentation of separately classifying deferred tax assets and deferred tax liabilities as current and noncurrent in a classified balance sheet by requiring companies to present them as noncurrent. ASU 2015-17, as amended, is effective for annual reporting periods beginning after December 15, 2016, including interim periods within such annual reporting periods with early adoption permitted. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2016. The Company elected to apply the presentation requirements for the balance sheet retrospectively to all periods presented which resulted in a decrease to total current assets and total long term liabilities of $7.5 million at December 31, 2015.

In March 2016, the FASB issued ASU No. 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, ("ASU 2016-09") that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when stock awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows Companies to repurchase more of an employee's vesting shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made to tax authorities on an employee's behalf for withheld shares should be presented as a financing activity on the cash flows statement and provides an accounting policy election to account for forfeitures as they occur. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within such annual reporting periods with early adoption permitted. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2016 which requires us to reflect any adjustments as of January 1, 2016, the beginning of the annual period that includes the interim period of adoption. The primary impact of adoption was the recognition of excess tax benefits in the provision for income taxes rather than paid-in capital for all periods in fiscal year 2016. Additional amendments to the accounting for income taxes and minimum statutory withholding tax requirements had no impact to retained earnings as of January 1, 2016, where the cumulative effect of these changes are required to be recorded. The Company elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. The Company elected to apply the presentation requirements for cash flows related to excess tax benefits retrospectively to all periods presented which resulted in an increase to both net cash from operations and net cash used in financing of $1.6 million for the year ended December 31, 2015. Adoption of the new standard resulted in the recognition of net excess tax benefits in the provision for income taxes rather than paid-in capital of $1.9 million for the year ended December 31, 2016. The presentation requirements for cash flows related to employee taxes paid for withheld shares had no impact to any the 2016 and 2015 periods presented on the consolidated statements of cash flow since such cash flows have historically been presented as a financing activity.

Recent Accounting Guidance Not Yet Adopted

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606) ("ASU 2014-09"), which is the new comprehensive revenue recognition standard that will supersede all existing revenue recognition guidance under U.S. GAAP. The FASB has recently issued several amendments to the standard. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within such annual reporting periods with early adoption permitted. The Company does not plan to early adopt this guidance and therefore will adopt on January 1, 2018. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective method). The Company will adopt ASU 2014-09 using the modified retrospective method. The Company, with the assistance of external consultants, developed and followed a formal implementation program, which included analyzing the standard's impact on our contract portfolio, comparing our historical accounting policies and practices to the requirements of the new standard, and identifying differences from applying the requirements of the new standard to our contracts, We also developed transitional internal controls to ensure the adequate implementation of this guidance including, reporting on the progress of the implementation to those in charge of governance on a regular basis during the project's duration. We have completed our assessment and contract review. Based on the analysis, the Company believes the impact of adopting the new guidance is not material to the results of operations; however, adoption of this guidance will require changes to business processes and systems to support the new revenue recognition accounting and additional required disclosures. The Company does not anticipate that our internal control framework will materially change, but rather that existing internal controls will be modified and augmented as necessary.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) ("ASU 2016-02"). ASU 2016-02 will require most lessees to recognize a majority of the company's leases on the balance sheet, which will increase reported assets and liabilities. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018 including interim periods within such annual reporting periods with early adoption permitted. The Company has not early adopted this guidance and is currently evaluating the impact on the Company's consolidated financial statements of adopting this guidance. The Company does not expect this guidance to have a material impact to the Company's results of operations.

In August 2016, the FASB issued ASU No. 2016-15, Statements of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments ("ASU 2016-15"). ASU 2016-15 clarifies where certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments are effective for annual reporting periods beginning after December 15, 2017, and for interim reporting periods within such annual periods. The adoption of this guidance is not expected to have a material effect on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805) – Clarifying the Definition of a Business ("ASU 2017-01"). ASU 2017-01 finalizes previous proposals regarding shareholder concerns that the definition of a business is applied too broadly. The guidance assists entities with evaluating whether transactions should be accounted for as acquisitions of assets or of businesses. The amendments are effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The adoption of this guidance is not expected to have a material effect on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment ("ASU 2017-04"). This amendment simplifies the manner in which an entity is required to test for goodwill impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. The amendment simplifies this approach by having the entity (1) perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount, and (2) recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, with the understanding that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The amendment is effective in fiscal years beginning after December 15, 2019. Early adoption is permitted for all entities for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company does not expect this guidance to have a material impact to the Company's financial position or results of operations.

In May 2017, the FASB issued ASU No. 2017-09, Compensation – Stock Compensation (Topic 718): Scope of Modification Accounting, ("ASU 2017-09"). ASU 2017-09 requires entities to apply modification accounting to changes made to a share-based payment award. The new guidance specifies that entities will apply modification accounting to changes to a share-based payment award only if any of the following are not the same immediately before and after the change: 1) The award's fair value (or calculated value or intrinsic value, if those measurement methods are used), 2) the award's vesting conditions, and 3) the award's classification as an equity or liability instrument. ASU 2017-09 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within such annual periods, with early adoption permitted. The Company does not plan to early adopt this guidance and therefore will adopt on January 1, 2018. The Company does not expect this guidance to have a material impact to the Company's financial position or results of operations.

2. Fair Value of Financial Instruments

Financial instruments (principally cash and cash equivalents, accounts receivable, accounts payable and accrued expenses) are carried at cost, which approximates fair value due to the short-term maturity of these instruments. The Company's long-term credit facility is carried at cost, which due to the variable interest rate associated with the revolving credit facility, cost approximates its fair value. The Company has no Level 1 or Level 2 financial instruments and there were no transfers between Level 1 or Level 2 financial instruments. Included in Other liabilities on the Consolidated Balance Sheets at December 31, 2017 is a $35,000 contingent consideration liability classified as Level 3. The liability is valued using a Monte Carlo simulation and includes unobservable inputs such as expected levels of revenues and discount rates. Changes in the unobservable inputs in the fair value measurement of this instrument could result in a significant change in the fair value measurement.

The following table summarizes the changes in fair value for all financial instruments measured at fair value on a recurring basis using significant unobservable inputs (Level 3) (in thousands):

Beginning balance as of January 1, 2016		-
Sales		-
Settlements		-
Purchases		-
Issuances		2,900
Net (gains)/losses included in selling, general and administrative expenses		-
Transfers into Level 3		-
Transfers out of Level 3		-
Ending balance as of December 31, 2016	$	2,900
Sales		-
Settlements		-
Purchases		-
Issuances		-
Net (gains)/losses included in selling, general and administrative expenses		(2,865)
Transfers into Level 3		-
Transfers out of Level 3		-
Ending balance as of December 31, 2017	$	35

3. Acquisitions

(a) Eliza Holding Corp.

On April 17, 2017, the Company completed the acquisition of 100% of the outstanding capital stock of Eliza, for a preliminary purchase price of $171.6 million funded with available liquidity of approximately 75% cash on hand and 25% from the Company's existing credit line. Eliza is a cloud based technology platform which provides comprehensive and personalized health engagement solutions designed to improve clinical outcomes and reduce costs. Eliza reaches and engages members through a proprietary, scalable technology solution that leverages a multi-channel communications platform incorporating consumer and proprietary data sources, analytics, and behavior-driven program design to help clients achieve desired outcomes.

The purchase price was subject to certain post-closing purchase price adjustments and the initial purchase price allocation as of the date of acquisition was based on a preliminary valuation. Estimates and assumptions for which the Company is still obtaining or evaluating information are subject to change up to one year from the acquisition date as additional information becomes available and adjustments may require a change in the amounts allocated to goodwill during the periods in which the adjustments are determined. The intangible assets are valued using various methods which requires several judgments, including growth rates, discount rates, customer attrition rates, and expected levels of revenues, earnings, cash flows and tax rates. The intangible assets are amortized over their estimated useful lives on a straight-line basis and are not expected to be deductible for taxable purposes. As such, the Company recorded a net deferred tax liability which is comprised of deferred tax liabilities recognized in connection with the acquired intangible assets partially offset by deferred tax assets associated with acquired net operating loss carryforwards and credits. Goodwill was determined based on the difference between the purchase price and the fair values of the tangible and intangible assets acquired. Goodwill recognized from the acquisition was a result of synergies to be realized from future revenue growth is not deductible for tax purposes, has an indefinite useful life and will be included in the Company's annual impairment testing or between annual tests if an indicator of impairment exists.

During the third and fourth quarters of fiscal 2017, the Company made adjustments to the preliminary purchase price allocation which resulted in an increase of $8.9 million to the fair value of acquired intangible assets, a decrease of $1.8 million to the fair value of the acquired tangible assets, an increase of $3.6 million to the deferred tax liability associated with the acquired intangible assets and a decrease of $3.5 million to goodwill. The Company also changed the estimated useful life of the acquired customer relationships intangible asset from 36 years to 15 years. The updated allocation of the purchase price to the fair value of the assets acquired and the liabilities assumed as of April 17, 2017, the effective date of the acquisition, is as follows *(in thousands)*:

Cash and cash equivalents	$	435
Accounts receivable		8,902
Prepaid expenses		1,427
Property and equipment		1,146
Intangible assets		76,240
Goodwill		107,754
Other assets		63
Accounts payable		(2,620)
Deferred tax liability		(19,681)
Other liabilities		(2,057)
Total purchase price	**$**	**171,609**

The purchase price allocated to the intangibles acquired was as follows *(in thousands):*

	Useful Life (in years)		
Customer relationships	15	$	56,200
Intellectual property	6		19,600
Trade name	1.5		310
Restrictive covenants	1		130
Fair value of intangibles acquired		**$**	**76,240**

Acquisition costs recorded to selling, general and administrative expenses were as follows *(in thousands)*:

Other operating expenses - consulting fees	$	3,515
Other operating expenses - legal fees		832
Other operating expenses - transaction costs		185
Acquisition-related costs	**$**	**4,532**

The financial results of Eliza have been included in the Company's consolidated financial statements since the date of acquisition. Eliza contributed approximately $30.4 million in revenue to HMS results of operations from the date of acquisition through December 31, 2017.

(b) Essette

On September 2, 2016, the Company acquired the outstanding capital stock of Essette, a care management technology company which helps risk-bearing organizations manage the care delivered to their members, for aggregate consideration of $24.2 million, which is primarily comprised of cash payments of $21.3 million. To fund the purchase price, the Company utilized cash on hand. The purchase price was subject to adjustment based upon the final amount of adjusted working capital of Essette at closing.

The Company allocated the purchase price, net of cash acquired, to a) at their acquisition date fair values, the following tangible assets: net deferred tax assets of $0.9 million and other net assets of $0.9 million and b) at their acquisition date fair values, the following amortizing intangible assets: intellectual property of $2.1 million, customer relationships of $1.3 million, restrictive covenants of $0.1 million, and trade name of $0.1 million. Goodwill of $18.2 million represents the excess purchase price over the net identifiable tangible and intangible assets. The intangible assets are valued using various methods which requires several judgments, including growth rates, discount rates, customer attrition rates, and expected levels of revenues, earnings, cash flows and tax rates. The intangible assets are amortized over their estimated useful lives on a straight-line basis and are not expected to be deductible for tax purposes. The goodwill recognized from the acquisition was a result of expected synergies to be realized from future revenue growth, is not expected to be deductible for tax purposes, has an indefinite useful life and will be included in the Company's annual impairment testing. Contingent consideration, up to an aggregate maximum of $12.0 million, will be payable in calendar years 2017, 2018, or 2019, respectively, should Essette achieve certain revenue targets as defined in the stock purchase agreement. The contingent consideration is valued using a method which requires several judgments but primarily include discount rates and expected levels of revenues. In the fourth quarter 2016, purchase accounting adjustments included a $1.1 million increase to total transaction consideration and to goodwill, a $0.7 million increase to other net assets, and a $0.2 million increase in the customer relationship intangible. In the second quarter of 2017, the Company recorded a final working capital adjustment of $147,000 to goodwill.

The immaterial results of Essette's operations since September 2, 2016 have been included in the Company's consolidated financial statements.

As a result of the Eliza acquisition and subsequent adjustment related to Essette, the changes in the carrying amount of goodwill were as follows *(in thousands)*:

Balance at December 31, 2017	$	487,617
Eliza acquisition		107,754
Essette adjustment		147
Balance at December 31, 2016	$	379,716
Essette acquisition		18,248
Balance at December 30, 2015	$	361,468

4. Property and Equipment

Property and equipment consisted of the following (*in thousands*):

	December 31,	
	2017	**2016**
Equipment	$ 106,768	$ 94,345
Leasehold improvements	8,357	8,637
Building	8,624	8,624
Building improvements	14,546	12,671
Land	2,769	2,769
Furniture and fixtures	10,352	10,728
Capitalized software	125,655	110,696
	277,071	248,470
Less: accumulated depreciation and amortization	(178,490)	(156,303)
Property and equipment, net	$ 98,581	$ 92,167

	December 31,		
(in thousands)	**2017**	**2016**	**2015**
Depreciation and amortization expense related to property and equipment	$ 27,515	$ 24,882	$ 30,328

5. Intangible Assets

Intangible assets consisted of the following (*in thousands*):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Amortization Period (in years)
December 31, 2017				
Customer relationships	$ 159,290	$ (89,106)	$ 70,184	11.3
Trade names	16,246	(13,916)	2,330	1
Intellectual property	21,700	(2,874)	18,826	5.2
Restrictive covenants	263	(121)	142	1.3
Total	$ 197,499	$ (106,017)	$ 91,482	18.6

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Amortization Period (in years)
December 31, 2016				
Customer relationships	$ 103,090	$ (71,914)	$ 31,176	11.3
Trade names	15,936	(11,393)	4,543	1
Intellectual property	2,100	(140)	1,960	5.2
Restrictive covenants	133	(15)	118	1.3
Total	$ 121,259	$ (83,462)	$ 37,797	18.6

Amortization expense of intangible assets is expected to approximate the following (*in thousands*):

Year ending December 31,	
2018	$ 23,858
2019	9,258
2020	7,804
2021	7,477
2022	7,197
Thereafter	35,888
Total	$ 91,482

For the years ended December 31, 2017, 2016 and 2015, amortization expense related to intangible assets was $22.6 million, $20.2 million and $20.3 million, respectively.

6. Accounts Payable, Accrued Expenses and Other Liabilities

Accounts payable, accrued expenses and other liabilities consisted of the following (*in thousands*):

	December 31, 2017	December 31, 2016
Accounts payable, trade	$ 19,330	$ 13,847
Accrued compensation and other	24,072	28,507
Accrued operating expenses	18,498	17,048
Total accounts payable, accrued expenses and other liabilities	$ 61,900	$ 59,402

7. Income Taxes

Income tax expense is as follows (*in thousands*):

	December 31,		
	2017	2016	2015
Current tax expense:			
Federal	$ 17,008	$ 16,274	$ 25,852
State	3,201	2,929	3,450
Total current tax expense:	20,209	19,203	29,302
Deferred tax expense (benefit):			
Federal	(19,425)	(7,115)	(12,571)
State	(983)	(253)	(1,449)
Total deferred tax benefit:	(20,408)	(7,368)	(14,020)
Total income tax expense	$ (199)	$ 11,835	$ 15,282

A reconciliation of the income tax expense calculated using the applicable federal statutory rate to the actual income tax expense is as follows (*in thousands*):

	December 31,					
	2017	%	2016	%	2015	%
Computed at federal statutory rate	$ 13,949	35.0	$ 17,315	35.0	$ 13,934	35.0
State and local tax expense, net of federal benefit	2,226	5.6	2,448	5.0	1,038	2.6
Net permanent deduction and credit tax benefits from prior years	-	-	(6,213)	(12.6)	-	-
Net permanent deduction and credit tax benefits from current year	(1,513)	(3.8)	(1,509)	(3.1)	-	-
Tax Reform - Revaluation of Deferrals	(15,130)	(38.0)	-	-	-	-
Acquisition adjustments	(1,003)	(2.5)	-	-	-	-
Acquisition costs	697	1.7	203	0.4	-	-
Other, net	575	1.5	(409)	(0.8)	310	0.8
Total income tax expense	$ (199)	(0.5)	$ 11,835	23.9	$ 15,282	38.4

The Company's effective tax rate decreased to (0.5%) for the year ended December 31, 2017 from 23.9% for the year ended December 31, 2016, primarily due to the revaluation of the Company's deferred tax balances from the federal tax rate reduction of 35% to 21% under the 2017 Tax Act which was signed into law on December 22, 2017. The net benefits for the 2017 Tax Act as recorded as provisional amounts as of December 31, 2017, represent the Company's best estimate using information available to the Company as of February 27, 2018. The Company anticipates U.S. regulatory agencies will issue further regulations over the next year which may alter this estimate. The Company is still evaluating, among other things, the application of limitations for executive compensation related to contracts existing prior to November 2, 2017. The Company will refine its estimates to incorporate new or better information as it comes available through the filing date of its 2017 U.S. income tax returns in the fourth quarter of 2018.

As a result of an analysis performed during 2016, the Company determined certain activities it performs qualify for (i) R&D Credits provided in IRC Section 41 and (ii) the Section 199 Deduction provided in IRC Section 199. As a result, the Company recognized net tax benefits during the year ended December 31, 2016 of $6.2 million for federal and state R&D Credits and the Section 199 Deduction relating to tax years 2012 through 2015.

Deferred income taxes are recognized for the future tax consequences of temporary differences between the financial statement and tax bases of assets and liabilities. The tax effect of temporary differences that give rise to a significant portion of the deferred tax assets and deferred tax liabilities are as follows (in thousands):

	December 31,	
	2017	2016
Deferred tax assets:		
Stock-based compensation	$ 9,980	$ 10,373
Goodwill and intangible assets	6,524	10,711
Allowance for doubtful accounts	3,822	4,108
Deferred rent	909	1,120
Tenant improvements	669	1,226
Estimated liability for appeals	7,775	11,596
Net operating loss carry-forwards	3,358	2,141
Tax credit carry-forwards	3,667	-
Property and equipment	256	79
Accrued expenses and other	3,615	7,811
Total deferred tax assets	40,575	49,165
Deferred tax liabilities:		
Goodwill and intangible assets	48,186	52,729
Section 481(a) adjustment	7,413	14,757
Prepaid expenses	624	-
Capitalized software cost	6,341	4,396
Total deferred tax liabilities	62,564	71,882
Total net deferred tax liabilities	$ 21,989	$ 22,717

Included in Other liabilities on the Consolidated Balance Sheets, are the total amount of unrecognized tax benefits of approximately $8.2 million and $7.4 million as of December 31, 2017 and 2016, respectively, net of the federal benefit for state issues that, if recognized, would favorably affect the Company's future effective tax rate. Also included in Other Liabilities on the Consolidated Balance Sheets, are accrued liabilities for interest expense and penalties related to unrecognized tax benefits of $0.6 million at both December 31, 2017 and 2016. HMS includes interest expense and penalties in the provision for income taxes in the Consolidated Statements of Income. The amount of interest expense, net of federal and state income tax benefits, and penalties in the Consolidated Statements of Income for the years ended December 31, 2017, 2016 and 2015 was $0.02 million, $0.2 million and $0.6 million, respectively. The Company believes it is reasonably possible the amount of unrecognized tax benefits may decrease by $1.8 million during 2018, due to the expiration of the statute of limitations in various jurisdictions.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits are as follows *(in thousands)*:

	December 31,	
	2017	2016
Unrecognized tax benefits at January 1	$ 7,433	$ 1,329
Additions for tax positions taken during prior periods	599	763
Additions for tax positions taken during current period including amended prior years	1,174	5,931
Reductions related to the expiration of statutes of limitations	(972)	(590)
Unrecognized tax benefits at December 31	$ 8,234	$ 7,433

The Company increased the provision for unrecognized tax benefits by $1.2 million during the year ended December 31, 2017, related to tax benefits recognized associated with R&D Credits and the Section 199 Deduction for all open tax years.

At December 31, 2017, HMS had federal and state pre-tax net operating loss and tax credit carryforwards of approximately $34.1 million and $3.7 million, respectively, which will be available to offset future taxable income. If not used, these net operating loss and tax credit carryforwards will begin to expire in 2021 and 2019, respectively. The Company files income tax returns with the U.S. Federal government and various state jurisdictions. HMS is no longer subject to U.S. Federal income tax examinations for years before 2012. The Company is currently under audit by the Internal Revenue Service for years 2013 and 2014 and no assessments have been received. HMS operates in a number of state and local jurisdictions. Accordingly, HMS is subject to state and local income tax examinations based upon the various statutes of limitations in each jurisdiction. Previously recognized Texas refund claims are currently being examined by the state. The Company is currently being examined by the State of Illinois and has received preliminary assessments of an immaterial amount which the Company is reviewing.

8. Credit Agreement

On December 19, 2017, the Company entered into an amendment to the Credit Agreement, which, among other things, extended the maturity of its then existing revolving credit facility by five years to December 2022. The availability of funds under the Amended Revolving Facility includes sublimits for (a) up to $50 million for the issuance of letters of credit and (b) up to $25 million for swingline loans. In addition, the Company may increase the commitments under the Amended Revolving Facility and/or add one or more incremental term loan facilities, provided that such incremental facilities do not exceed in the aggregate the sum of (i) the greater of $120 million and 100% of Consolidated EBITDA (as defined in the Credit Agreement) and (ii) an additional amount so long as our first lien leverage ratio (as defined in the Credit Agreement) on a pro forma basis is not greater than 3.00:1.00, subject to obtaining commitments from lenders therefor and meeting certain other conditions.

During the year ended December 31, 2016, no principal payments were made against the Company's then existing revolving credit facility. As of December 31, 2017, the outstanding principal balance due on the Amended Revolving Facility was $240.0 million.

Borrowings under the Amended Revolving Facility will bear interest at a rate equal to, at the Company's election (except with respect to swingline borrowings, which will accrue interest based only at the base rate), either:

- a base rate determined by reference to the greatest of (a) the prime or base commercial lending rate of the administrative agent as in effect on the relevant date, (b) the federal funds effective rate plus 0.50% and (c) the one-month LIBO rate plus 1.00%, plus an interest margin ranging from 0.50% to 1.00% based on the Company's consolidated leverage ratio for the applicable period; or
- an adjusted LIBO rate, equal to the LIBO rate for the applicable interest period multiplied by the statutory reserve rate (equal to (x) one divided by (y) one minus the aggregate of the maximum reserve percentage (including any marginal, special, emergency or supplemental reserves) established by the Board of Governors of the Federal Reserve System of the United States), plus an interest margin ranging from 1.50% to 2.00% based on the Company's consolidated leverage ratio for the applicable period.

In addition to paying interest on the outstanding principal, the Company is required to pay unused commitment fees on the revolving credit facility during the term of the Credit Agreement ranging from 0.375% to 0.250% per annum based on the Company's consolidated leverage ratio and letter of credit fees equal to 0.125% per annum on the aggregate face amount of each letter of credit, as well as customary agency fees.

The Amended Revolving Facility is secured, subject to certain customary carve-outs and exceptions, by a first priority lien and security interest in substantially all tangible and intangible assets of the Company and certain subsidiaries of the Company. The Amended Revolving Facility contains certain restrictive covenants, which affect, among other things, the ability of the Company and its subsidiaries to incur indebtedness, create liens, make investments, sell or otherwise dispose of assets, engage in mergers or consolidations with other entities, and pay dividends or repurchase stock. The Company is also required to comply, on a quarterly basis, with two financial covenants: (i) a minimum interest coverage ratio of 3:00:1:00, and (ii) a maximum consolidated leverage ratio of 4.75:1.00 through December 2019 and 4.25:1.00 from and after January 2020. The consolidated leverage ratio is subject to a step-up to 5.25:1.00 for four full consecutive fiscal quarters following a permitted acquisition or similar investment. As of December 31, 2017, the Company was in compliance with all terms of the Credit Agreement.

Interest expense and the commitment fees on the unused portion of the Company's revolving credit facility are as follows (*in thousands*):

	December 31,		
	2017	2016	2015
Interest expense	$ 7,170	$ 4,837	$ 4,117
Commitment fees	$ 1,359	$ 1,518	$ 1,513

The Company deferred $2.3 million of financing fees associated with the amendment. At December 31, 2017 and 2016, the unamortized balance of deferred financing costs was $2.8 million, in both periods. The Company amortized deferred financing costs of $2.3 million in in the year ended December 31, 2017 and $2.1 million in in the years ended December 31, 2016 and 2015.

As part of a contractual agreement with a customer, the Company has an outstanding irrevocable letter of credit for $5.4 million, which is issued against the Amended Revolving Facility and expires April 26, 2018.

9. Equity

(a) Share Repurchase

On November 1, 2017, the Board of Directors of the Company approved a share repurchase program authorizing the Company to repurchase up to $50.0 million in shares of its common stock from time to time on the open market or in privately negotiated or other transactions. The repurchase program is authorized for a period of up to two years, and may be suspended or discontinued at any time. Repurchased shares will be available for use in connection with reissuance under the Company's stock plans and for other corporate purposes. The timing and amount of any shares repurchased under the program will be determined by the Company's management based on its evaluation of market conditions, share price and other factors. In order to facilitate repurchases, the Company may enter into a Rule 10b5-1 plan from time to time, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws or because of a self-imposed trading blackout period. All repurchases in fiscal year 2017 were made in the fourth quarter. All repurchases for the periods presented were made under the program and using cash resources.

Following are the Company's monthly stock repurchases for the fourth quarter of fiscal year 2017, all of which were made as part of publicly announced plans or programs:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program[(1)]	Maximum Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
October 1, 2017 to October 31, 2017	—	$ —	—	$ —
November 1, 2017 to November 30, 2017	674,813	16.23	674,813	39,044,882
December 1, 2017 to December 31, 2017	190,502	16.61	190,502	35,880,666
October 1, 2017 to December 31, 2017	**865,315**	**$ 16.33**	**865,315**	

(1) Represents shares repurchased through the Company's Share Repurchase Program publicly announced in November 2017.

(b) Preferred Stock

The Company's certificate of incorporation, as amended, authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by the Company's Board of Directors. As of December 31, 2017, no preferred stock had been issued.

10. Employee Benefit Plan

The Company sponsors the 401(k) Plan for eligible employees. Eligible employees must complete 90 days of service in order to enroll in the 401(k) Plan. Participants may make voluntary contributions to the 401(k) Plan of up to 60% of their annual base pre-tax compensation not to exceed the federally determined maximum allowable contribution. In addition, the 401(k) Plan permits the Company to make discretionary contributions. During 2017, 2016 and 2015, HMS matched 100% of the first 3% of pay contributed by each eligible employee and 50% on the next 2% of pay contributed. These matching contributions vest immediately and are not in the form of the Company's common stock.

For the years ended December 31, 2017, 2016 and 2015, HMS contributed $5.9 million, $4.8 million and $4.8 million, respectively, to the 401(k) Plan in the form of matching contributions.

11. Stock-Based Compensation

Stock-Based Compensation Expense

Total stock-based compensation expense in the Company's Consolidated Statements of Income related to the Company's long-term incentive award plans was as follows *(in thousands)*:

	December 31,		
	2017	**2016**	**2015**
Cost of services-compensation	$ 7,354	$ 3,805	$ 6,242
Selling, general and administrative	16,789	9,472	8,055
Total	$ 24,143	$ 13,277	$ 14,297

Stock Options

Stock-based compensation expense related to stock options was approximately $10.3 million, $6.9 million and $6.4 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Presented below is a summary of stock option activity for the year ended December 31, 2017 (*in thousands except for weighted average exercise price and weighted average remaining contractual terms*):

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Terms	Aggregate Intrinsic Value
Outstanding balance at December 31, 2016	5,191	$ 17.35		
Granted	1,003	18.91		
Exercised	(172)	15.96		
Forfeitures	(146)	16.09		
Expired	(322)	22.34		
Outstanding balance at December 31, 2017	5,554	17.35	5.00	$ 8,274
Expected to vest at December 31, 2017	1,543	16.14	6.64	2,489
Exercisable at December 31, 2017	3,180	$ 18.24	3.77	$ 4,663

As of December 31, 2017 and 2016, the company had 2,372,682 and 3,039,844, respectively, in unvested options with a weighted-average-grant-date fair value of $6.39 and $5.70, respectively. The weighted average grant date fair value per share of the stock options granted during the years ended December 31, 2017, 2016 and 2015 was $7.66, $5.55 and $5.37, respectively. HMS estimated the fair value of each stock option grant on the date of grant using a Black-Scholes option pricing model. Weighted–average assumptions are set forth in the following table:

	December 31,		
	2017	2016	2015
Expected dividend yield	-	-	-
Risk-free interest rate	1.8%	1.2%	1.5%
Expected volatility	44.2%	44.0%	40.6%
Expected life (years)	5.0	4.9	4.9

HMS estimated the fair value of market condition option grants on the date of grant using a Monte-Carlo simulation model. Assumptions are set forth in the following table:

	December 31,		
	2017	2016	2015
Expected dividend yield	-	-	-
Risk-free interest rate	2.2%	1.6%	2.0%
Expected volatility	52.5%	40.5%	39.6%
Expected life (years)	6.5	4.9	4.9

During the years ended December 31, 2017, 2016 and 2015, the Company issued 172,326, 510,512 and 577,559 shares, respectively, of the Company's common stock upon the exercise of outstanding stock options and received proceeds of $2.7 million, $2.9 million and $4.2 million, respectively. The total intrinsic value of stock options exercised during the years ended December 31, 2017, 2016 and 2015 was $0.5 million, $6.3 million and $5.9 million, respectively.

As of December 31, 2017, there was approximately $8.4 million of total unrecognized compensation cost related to stock options outstanding, which is expected to be recognized over a weighted average period of 2.11 years.

The total tax benefits recognized on stock-based compensation for the years ended December 31, 2017, 2016 and 2015 was $4.0 million, $4.1 million and $3.4 million, respectively.

Restricted Stock Units

Stock-based compensation expense related to restricted stock units was $13.8 million, $6.4 million and $7.9 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Presented below is a summary of restricted stock units activity for the year ended December 31, 2017 *(in thousands, except for weighted average grant date fair value per unit):*

	Number of Units	Weighted Average Grant Date Fair Value per Unit
Outstanding balance at December 31, 2016	1,413	$ 16.44
Granted	612	18.86
Vesting of restricted stock units, net of units withheld for taxes	(397)	15.39
Units withheld for taxes	(172)	15.39
Forfeitures	(110)	15.37
Outstanding balance at December 31, 2017	1,346	$ 17.65

As of December 31, 2017, approximately 1,117,245 restricted stock units remained unvested and there was approximately $10.0 million of unrecognized compensation cost related to restricted stock units, which is expected to be recognized over a weighted average vesting period of 0.83 years.

12. Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share *(in thousands, except per share data)*:

	Years ended December 31,		
	2017	2016	2015
Net income	$ 40,054	$ 37,636	$ 24,527
Weighted average common shares outstanding-basic	83,821	84,221	87,881
Plus: net effect of dilutive stock options and restricted stock units	1,267	2,766	480
Weighted average common shares outstanding-diluted	85,088	86,987	88,361
Net income per common share-basic	$ 0.48	$ 0.45	$ 0.28
Net income per common share-diluted	$ 0.47	$ 0.43	$ 0.28

For the years ended December 31, 2017, 2016 and 2015: (i) 2,646,100, 2,070,771 and 3,480,458 stock options, respectively, and (ii) restricted stock units representing 31,155, 46,651 and 305,999 shares of common stock, respectively, were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive.

13. Commitments and Contingencies

(a) Lease Commitments

The Company leases office space, data processing equipment and software licenses under operating leases that expire on various dates through 2024. The lease agreements provide for rent escalations. Lease expense, exclusive of immaterial sublease income, for the years ended December 31, 2017, 2016 and 2015 was $5.1 million, $5.0 million and $5.4 million, respectively.

Minimum annual lease payments to be made under operating leases, net of nominal sublease payments to be received and exclusive nominal capital leases, for each of the next five years ending December 31 and thereafter are as follows (*in thousands*):

	Operating Lease Payments
2018	$ 6,393
2019	3,509
2020	3,183
2021	2,081
2022	1,836
Thereafter	2,936
Total	$ 19,938

(b) Litigation

In July 2012, Dennis Demetre and Lori Lewis (the "Plaintiffs"), filed an action in the Supreme Court of the State of New York against HMS Holdings Corp., claiming an undetermined amount of damages alleging that various actions by HMS unlawfully deprived the Plaintiffs of the acquisition earn-out portion of the purchase price for Allied Management Group Special Investigation Unit ("AMG") under the applicable Stock Purchase Agreement (the "SPA") and that HMS had breached certain contractual provisions under the SPA. The Plaintiffs filed a second amended complaint with two causes of action for breach of contract and one cause of action for breach of implied covenant of good faith and fair dealing. HMS asserted a counterclaim against Plaintiffs for breach of contract based on contractual indemnification costs, including attorneys' fees arising out of the Company's defense of AMG in *Kern Health Systems v. AMG, Dennis Demetre and Lori Lewis* (the "California Action"), which are recoverable under the SPA. In June 2016, Kern Health Systems and AMG entered into a settlement agreement that resolved all claims in the California Action. In July 2017, the Court issued a decision on the Company's motion for partial summary judgment and granted the motion in part, dismissing one of Plaintiffs' breach of contract causes of action against HMS. On November 3, 2017, following a jury trial, a verdict was returned in favor of the Plaintiffs on a breach of contract claim, and the jury awarded $60 million in damages to the Plaintiffs. On November 20, 2017, the Company filed a post-trial motion for an order granting it judgment notwithstanding the verdict or, alternatively, setting aside the jury's award of damages. A hearing on the motion is set for March 2018. The Company continues to believe that strong grounds exist to overturn or greatly reduce the damages awarded by the jury. In light of the Company's belief that the jury award was unsupportable as a matter of law, the Company has not recorded a reserve for this pending litigation. HMS will continue to monitor developments in assessing the probability and measurability of any related loss contingency.

In February 2018, the Company received a Civil Investigative Demand from the Texas Attorney General, purporting to investigate possible unspecified violations of the Texas Medicaid Fraud Prevention Act. HMS intends to cooperate with the investigation.

From time to time, HMS may be subject to investigations, legal proceedings and other disputes arising in the ordinary course of the Company's business, including but not limited to regulatory audits, billing and contractual disputes, employment-related matters and post-closing disputes related to acquisitions. Due to the Company's contractual relationships, including those with federal and state government entities, HMS's operations, billing and business practices are subject to scrutiny and audit by those entities and other multiple agencies and levels of government, as well as to frequent transitions and changes in the personnel responsible for oversight of the Company's contractual performance. HMS may have contractual disputes with its customers arising from differing interpretations of contractual provisions that define the Company's rights, obligations, scope of work or terms of payment, and with associated claims of liability for inaccurate or improper billing for reimbursement of contract fees, or for sanctions or damages for alleged performance deficiencies. Resolution of such disputes may involve litigation or may require that HMS accept some amount of loss or liability in order to avoid customer abrasion, negative marketplace perceptions and other disadvantageous results that could affect the Company's business, financial condition, results of operations and cash flows.

HMS records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, HMS does not establish an accrued liability.

14. Customer Concentration

(a) Geographic Information

The Company operates within the United States.

(b) Major Customers

For the years ended December 31, 2017, 2016 and 2015 no one individual Company customer accounted for more than 10% of the Company's total revenue.

(c) Concentration of Revenue

The composition of the Company's ten largest customer's changes periodically. For the years ended December 31, 2017, 2016 and 2015, the Company's ten largest customers represented 39.5%, 40.6% and 44.0% of HMS' total revenue, respectively. The Company's agreements with the ten current largest customers expire between 2018 and 2023. In many instances, HMS provides services pursuant to agreements that may be renewed or subject to a competitive reprocurement process. Several of the Company's contracts, including those with some of its largest customers, may be terminated for convenience.

15. Subsequent Events

Annual Grants to Employees

On February 15, 2018, the Compensation Committee of the Board of Directors approved approximately $18.6 million in stock option and restricted stock unit awards to employees. The awards generally will vest over three years and will be issued three business days subsequent to the filing of this 2017 Form 10-K.

In connection with the preparation of our consolidated financial statements, an evaluation of subsequent events was performed through the date of filing and there were no events that have occurred that would require adjustments to the financial statements or disclosure.

16. Quarterly Financial Data (Unaudited)

The table below summarizes the Company's unaudited quarterly operating results for the last two fiscal years (*in thousands, except per share amounts*):

2017	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year Ended
Revenue	$ 113,733	$ 133,313	$ 125,673	$ 148,493	$ 521,212
Operating income	$ 3,943	$ 14,361	$ 12,861	$ 19,266	$ 50,431
Net income	$ 1,442	$ 6,517	$ 6,372	$ 25,723	$ 40,054
Net income per common share - basic	$ 0.02	$ 0.08	$ 0.08	$ 0.30	$ 0.48
Net income per common share - diluted	$ 0.02	$ 0.08	$ 0.07	$ 0.30	$ 0.47

2016	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year Ended
Revenue	$ 119,763	$ 123,550	$ 124,604	$ 125,590	$ 489,720
Operating income	$ 9,909	$ 16,352	$ 12,650	$ 18,758	$ 57,669
Net income	$ 4,570	$ 9,869	$ 14,046	$ 9,151	$ 37,636
Net income per common share - basic	$ 0.05	$ 0.12	$ 0.17	$ 0.11	$ 0.45
Net income per common share - diluted	$ 0.05	$ 0.11	$ 0.16	$ 0.11	$ 0.43

SCHEDULE II – VALUATION AND QUALIFYING ACCOUNTS
For the years ended December 31, 2017, 2016 and 2015

Accounts receivable allowance and Estimated liability for appeals as of December 31, 2017, 2016 and 2015 are as follows:

Accounts receivable allowance *(in thousands)*:

	Balance at Beginning of Year	Provision	Recoveries	Charge-offs	Balance at End of Year
Year ended December 31, 2015	$ 9,359	8,046	(100)	(5,841)	$ 11,464
Year ended December 31, 2016	$ 11,464	21,583	108	(22,383)	$ 10,772
Year ended December 31, 2017	$ 10,772	20,233	-	(16,206)	$ 14,799

Estimated liability for appeals *(in thousands)*:

	Balance at Beginning of Year	Provision	Appeals found in providers favor	Balance at End of Year
Year ended December 31, 2015	$ 19,314	2,610	(9,123)	$ 12,801
Year ended December 31, 2016	$ 12,801	721	(2,396)	$ 11,126
Year ended December 31, 2017	$ 11,126	83	(2,665)	$ 8,544

The above chart represents the CMS estimated reserve liability only.

Certification

I, William C. Lucia, certify that:

1. I have reviewed this Annual Report on Form 10-K of HMS Holdings Corp.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Cautionary Note Regarding Forward-Looking Statements

This Annual Report on Form 10-K of HMS Holdings Corp. (together with its subsidiaries, "HMS," the "Company," "we," "our" or "us") contains "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Such statements reflect our current expectations, projections and assumptions about our business, the economy and future events or conditions. They do not relate strictly to historical or current facts.

We have tried to identify forward-looking statements by using words such as "aim," "anticipate," "believe," "estimate," "expect," "forecast," "intend," "likely," "may," "plan," "project," "seek," "target," "will," "would," "could," "should," and similar expressions and references to guidance, although some forward-looking statements may be expressed differently. These statements include, among other things, information concerning our possible future actions, business plans, objectives and prospects, our future operating or financial performance, sales efforts and results of current and anticipated services, the benefits and synergies to be obtained from completed and future acquisitions, the future performance of companies we have acquired, sufficiency of our appeals reserves, the future effect of different accounting determinations or remediation activities, our ability to successfully remediate material weaknesses in our internal control over financial reporting, our future expenses, interest rates and financial results, and the impact of changes to U.S. healthcare legislation or healthcare spending affecting Medicare, Medicaid or other publicly funded or subsidized health programs.

Forward-looking statements are not guarantees and involve risks, uncertainties and assumptions that are difficult to predict. Actual results may differ materially from past results and forward-looking statements if known or unknown risks or uncertainties materialize, or if underlying assumptions prove inaccurate. These risks and uncertainties include, among other things,

- *our ability to execute our business plans or growth strategy;*
- *our ability to innovate, develop or implement new or enhanced solutions or services;*
- *the nature of investment and acquisition opportunities we are pursuing, and the successful execution of such investments and acquisitions;*
- *our ability to successfully integrate acquired businesses and realize synergies;*
- *variations in our results of operations;*
- *our ability to accurately forecast the revenue under our contracts and solutions;*
- *our ability to protect our systems from damage, interruption or breach, and to maintain effective information and technology systems and networks;*
- *our ability to protect our intellectual property rights, proprietary technology, information processes, and know-how;*
- *significant competition for our solutions and services;*
- *our failure to maintain a high level of customer retention or the unexpected reduction in scope or termination of key contracts with major customers;*
- *customer dissatisfaction, our non-compliance with contractual provisions or regulatory requirements;*
- *our failure to meet performance standards triggering significant costs or liabilities under our contracts;*
- *our inability to manage our relationships with information and data sources and suppliers;*
- *reliance on sub-contractors and other third party providers and parties to perform services;*
- *our ability to continue to secure contracts and favorable contract terms through the competitive bidding process and to prevail in protests or challenges to contract awards;*
- *pending or threatened litigation;*
- *unfavorable outcomes in legal proceedings;*
- *our success in attracting qualified employees and members of our management team;*
- *our ability to generate sufficient cash to cover our interest and principal payments under our credit facility or to borrow or use credit;*
- *unexpected changes in our effective tax rates;*
- *unanticipated increases in the number or amount of claims for which we are self-insured;*
- *changes in the U.S. healthcare environment or healthcare financing system, including regulatory, budgetary or political actions that affect procurement practices and healthcare spending;*
- *our failure to comply with applicable laws and regulations governing individual privacy and information security or to protect such information from theft and misuse;*

- *negative results of government or customer reviews, audits or investigations;*
- *state or federal limitations related to outsourcing or certain government programs or functions;*
- *restrictions on bidding or performing certain work due to perceived conflicts of interests;*
- *the market price of our common stock and lack of dividend payments; and*
- *anti-takeover provisions in our corporate governance documents.*

These and other risks are discussed under the headings "Part I. Item 1. Business," "Part I. Item 1A, Risk Factors," "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk" of this 2016 Form 10-K and in other documents we file with the SEC.

Any forward-looking statements made by us in this 2016 Form 10-K speak only as of the date on which they are made. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law. We caution readers not to place undue reliance upon any of these forward-looking statements. You are advised, however, to consult any further disclosures we make on related subjects in our Form 10-Q and Form 8-K reports and our other filings with the SEC.

Market and Industry Data

This 2016 Form 10-K contains market, industry and government data and forecasts that have been obtained from publicly available information, various industry publications and other published industry sources. We have not independently verified the information and cannot make any representation as to the accuracy or completeness of such information. None of the reports and other materials of third party sources referred to in this 2016 Form 10-K were prepared for use in, or in connection with, this report.

PART I

Item 1. Business

Founded in 1974, HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. We use innovative technology, extensive data services and powerful analytics, to deliver coordination of benefits, payment integrity and health management and engagement solutions to help healthcare payers improve performance and outcomes. We provide coordination of benefits services to government and commercial healthcare payers and sponsors to ensure that the responsible party pays healthcare claims. Our payment integrity services ensure healthcare claims billed are accurate and appropriate; and our care management technology helps risk-bearing organizations manage the care delivered to their members. Together these various services help customers recover amounts from liable third parties; prevent future improper payments; reduce fraud, waste and abuse; better manage the care that members receive; and ensure regulatory compliance.

HMS began its operations as Health Management Systems, Inc., which became our wholly owned subsidiary in March 2003 when we assumed its business in connection with the adoption of a holding company structure. Since then HMS has grown both organically and through targeted acquisitions of businesses that helped expand our product suite, including IntegriGuard, LLC (2009), HealthDataInsights, Inc.("HDI") (2011), Essette, Inc. (2016), Eliza Holding Corp. (2017) and others.

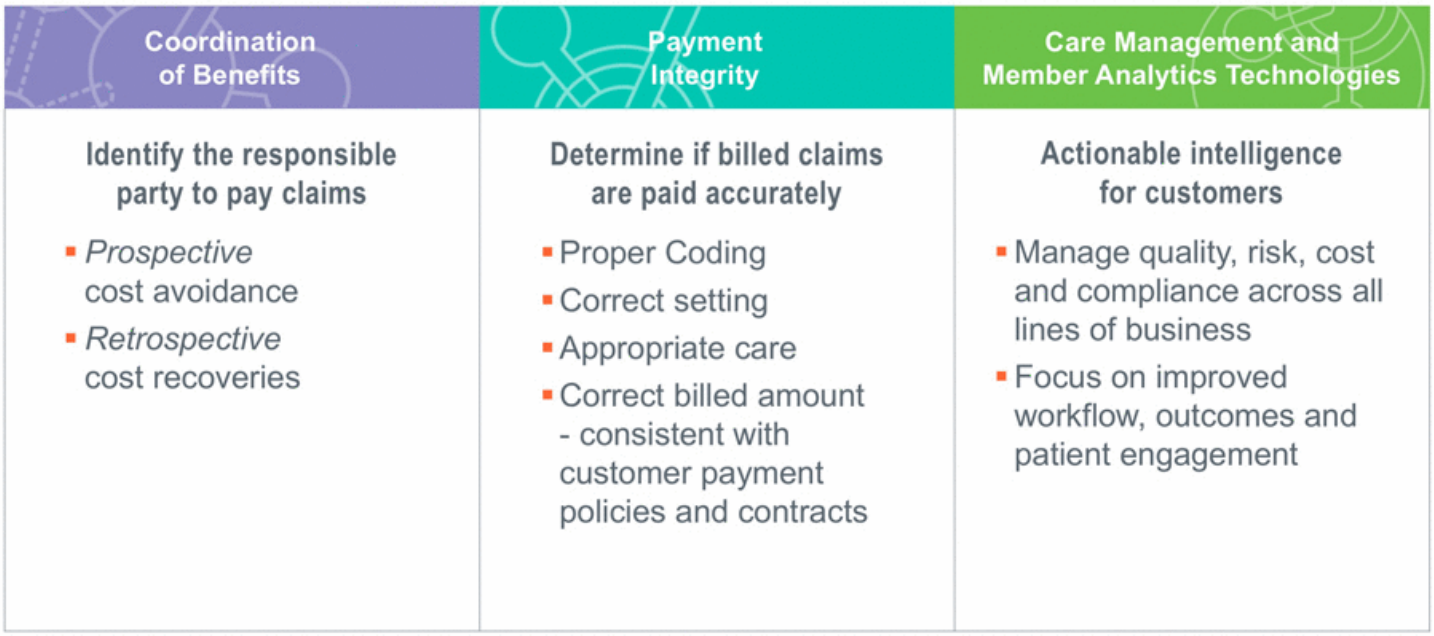
We were originally incorporated in the State of New York in October 2002 and reincorporated in the State of Delaware in July 2013. Our principal executive offices are located 5615 High Point Drive, Irving, Texas 75038 and our telephone number is (214) 453-3000.

We operate as one business segment with a single management team that reports to the Chief Executive Officer.

Our Solutions

Our coordination of benefits services draw principally upon proprietary information management and data mining techniques designed to ensure that the correct party pays a healthcare claim. Our payment integrity services are designed to ensure that healthcare billings and/or payments are accurate and appropriate. As a result of these services, customers received billions of dollars in cash recoveries in 2016, and saved billions more through the prevention of erroneous payments. In addition, our care management solutions help risk-bearing organizations manage the care delivered to their members with a focus on improving outcomes and patient engagement.

Our services are applicable to federal, state and commercial health plans and prevent and address errors across the payment continuum, from an individual's enrollment in a program before any medical service is rendered, to pre-payment review of a claim by a payer, through recovery where discovery of an improper payment is made via audit. Our services address a wide spectrum of payment errors, from eligibility and coordination of benefits errors, to the identification and investigation of potential fraud, and extend to most claim types. Our services also assist customers in managing quality, risk, cost and compliance across all lines of business.



In general, our range of services includes the following:

- *Coordination of benefits services*
  We provide cost avoidance services, which include providing validated insurance coverage information that is used by government-sponsored payers to coordinate benefits properly for future claims. With validated insurance information, Medicaid payers can avoid unnecessary costs by ensuring that they pay only after all other benefits available have been exhausted, thereby complying with federal regulations that require Medicaid to be the payer of last resort. Nevertheless, due to a variety of factors, some Medicaid claims are paid even when there is a known responsible third party. Our government-sponsored program customers rely on us to identify those claims that were paid in error and recover these payments from the liable third party. Further, we also provide services to assist customers in identifying other third-party insurance and recovering medical expenses where a member is involved in a casualty or tort incident. Lastly, for Medicaid agencies exclusively, we provide estate recovery services to identify and recover Medicaid expenditures from the estates of deceased Medicaid members in accordance with state policies. For the years ended December 31, 2016, 2015 and 2014, our coordination of benefits services represented 72.3%, 71.2% and 70.5% of our total revenue, respectively.

- *Payment integrity services*
  Our payment integrity services are applicable to all markets that HMS serves, including the federal and state governments, commercial health plans and other at-risk entities. Our solutions are designed to verify that medical services are utilized, billed and paid appropriately. Our services combine data analytics, clinical expertise and proprietary technology to identify improper payments on both a pre-payment and post-payment basis; identify and recover overpayments/underpayments; detect and prevent fraud, waste and abuse; and identify process improvements. For the years ended December 31, 2016, 2015 and 2014, our payment integrity services represented 24.3%, 24.5% and 24.5% of our total revenue, respectively.

- *Care management and member analytics technologies*
  We offer a web-based care management platform which helps risk-bearing healthcare organizations identify, engage, and manage at-risk patient populations to improve outcomes while managing costs.

Customers

For each of the years ended December 31, 2016, 2015 and 2014 no one individual Company customer accounted for more than 10% of our total revenue.

The composition of our 10 largest customers changes periodically. For the years ended December 31, 2016, 2015 and 2014, our 10 largest customers represented 40.6%, 44.0% and 40.1% of our total revenue, respectively. The current terms of our agreements with these customers have expiration dates ranging between 2017 and 2020. Several of our contracts, including those with some of our largest customers, may be terminated for convenience. The early termination of a contract with one of our significant customers may have an adverse effect on our financial condition, results of operations and cash flows.

We provide products and services under contracts (or sub-contracts) that contain various revenue structures, including contingent revenue and fixed-fee arrangements. Most of our contracts have terms ranging from three to five years, including renewal terms at the option of the customer. In many instances, we provide our services pursuant to agreements that are subject to periodic reprocurements. Because we provide our services pursuant to agreements that are open to competition from various businesses in the U.S. healthcare insurance benefit cost containment marketplace, we cannot provide assurance that our contracts, including those with our largest customers, will not be terminated for convenience, awarded to other parties, or renewed. Additionally, we cannot provide assurance that our contracts, if renewed, will have the same fee structures or otherwise be on satisfactory terms.

Industry Trends and Opportunities

U.S. healthcare expenditures continue to escalate and consume a large proportion of our GDP, presenting challenges for payers who wish to contain and reduce costs while also promoting quality healthcare outcomes. These aims are the same across all at-risk entities, including commercial health plans and government healthcare programs, such as Medicaid and Medicare.

Within the commercial market, health plans sell policies directly to individuals (on the open market or via health insurance exchanges), contract with employers to underwrite their employees' care, or contract with self-insured employers to oversee benefit administration to their employees. This market also includes a growing number of risk bearing provider-sponsored plans that operate and market health plan benefits. According to CMS NHE projections, private health insurance covered 195 million individuals in 2016 at a cost of $1.09 trillion.

Several commercial health plans also offer government-sponsored lines of business, including partnering with Medicare, Medicaid and CHIP to oversee care delivery for beneficiaries enrolled in those programs. Government managed care grew out of pressures to contain the growth of state and federal program spending and to address general concerns about healthcare access. Commercial health plan-related partnerships with government programs include the following:

- Within the Medicaid program, 38 states and the District of Columbia presently contract with managed care organizations to provide care to some or all of their Medicaid beneficiaries. In addition, many states have expanded the use of managed care organizations to new regions or to serve beneficiaries with more complex conditions. Of the 32 states and the District of Columbia that opted to expand Medicaid eligibility levels pursuant to the ACA, all except 5 use Medicaid managed care organizations. The majority of new lives that have entered the Medicaid program as a result of the ACA are enrolled in managed care plans. It is unclear at this time how, if at all, efforts in Congress to "repeal and replace" the ACA could affect any of the state expansions or future growth of Medicaid lives and expenditures.

- Similarly, managed care health plans also continue to assume risk for Medicare lives, with the Kaiser Family Foundation estimating that in 2016, nearly one-third of all Medicare recipients were enrolled in a Medicare Advantage plan.

HMS also continues to serve government-sponsored agencies' legacy fee-for-service programs at the state and federal level. These plans are generally reliant on and susceptible to the government appropriations process that determines their budget and governs the number of beneficiaries they serve.

According to the CMS NHE projections, Medicare programs in 2016 covered approximately 56 million people at a cost of approximately $681 billion and Medicaid/CHIP covered approximately 77 million people, costing approximately $593 billion. Altogether, it is projected that the government programs we serve covered approximately 130 million people at a total cost of approximately $1.3 trillion in 2016. Based on the CMS NHE Projections, Medicare spending is projected to grow 5.8% in 2017 over 2016, and CMS projects Medicaid enrollment will grow by 1.7% in 2017 over 2016. Total Medicaid spending is projected to increase at a rate of 4.8% in 2017 over 2016.

As commercial and government health plans continue to focus on strategies to contain costs across their different lines of business, we will continue to focus on serving them and meeting their evolving needs. Regardless of the program, coordinating benefits among a growing number of healthcare payers and ensuring that claims are paid appropriately represents an enormous challenge for our customers and an ongoing opportunity for us.

Regulatory Environment

The market for cost containment solutions is large and growing, driven by increasing healthcare costs and payment complexities. For 2017, Medicare and Medicaid are projected to pay approximately 45.9% of the nation's healthcare expenditures and serve over 130 million beneficiaries. Many of these beneficiaries are enrolled in managed care plans, which have the responsibility for both patient care and claim adjudications. Since 1985, we have provided state Medicaid agencies with services to identify third parties with primary liability for Medicaid claims, and since 2005, we have provided similar services to Medicaid managed care plans.

In 2006, Congress enacted the DRA and created the Medicaid Integrity Program under the Social Security Act to increase the government's capacity to prevent, detect and address fraud, waste and abuse in the Medicaid program. Later that year, Congress passed the Tax Relief and Health Care Act of 2006, which established the Medicare RAC program. HDI was awarded one of the first contracts under the program. In October 2016, CMS made a new round of awards and we again were awarded a region.

These measures, at both the federal and state level, have strengthened our ability to identify and recover erroneous payments on behalf of our customers.

The ACA was signed into law in 2010. It included many provisions impacting healthcare delivery and payment programs, including employer-sponsored health coverage, expansion of the Medicaid program, health insurance exchanges with premium subsidies, and payment integrity efforts. Following the 2016 Presidential and Congressional elections, some or all of the ACA provisions may be revised or repealed, although the scope and timing of such Congressional efforts are yet to be defined. Options that have been discussed include issuing block grants or establishing per capita caps for state Medicaid populations, and looking at program design alternatives for future enrollment criteria. We will monitor ACA-related changes as they develop and assess their potential impact, as well as any opportunities they may present for our customers and for us.

Competition

The U.S. healthcare insurance benefit cost containment marketplace is a dynamic industry with a range of businesses currently able to offer cost containment services, both directly or indirectly (through sub-contracting), to some or all of the various healthcare payers. In addition, with improvements in technology and the growth in healthcare spending, new businesses are incentivized to enter this marketplace. Many healthcare payers also have the ability to perform some or all of these cost containment services themselves and choose to exercise that option. Competition is therefore robust as customers have many alternatives available to them in their effort to contain healthcare costs.

We compete based on a variety of factors, including our ability to perform a wide range of coordination of benefits and payment integrity related functions; proven results to maximize recoveries and cost avoidance; our in-depth government healthcare program experience; clinical staff expertise; extensive insurance eligibility database; proprietary systems and processes; existing relationships with various customer and other industry shareholders; and our ability to provide customers with actionable intelligence to improve outcomes and patient engagement.

Within our core coordination of benefits services, we compete primarily with large business outsourcing and technology firms, claims processors and PBMs, clearinghouses, healthcare consulting firms, smaller regional vendors and other TPL service providers. In addition, we frequently work with customers who may elect to perform some or all of their recovery and cost avoidance functions in-house. The competitive environment for payment integrity services includes some of the same companies that provide coordination of benefits services. Within the care management and risk analytics sector, we compete primarily with vendors who provide these and other population health management technology services. Companies with whom we compete across our product offerings include:

- ChangeHealthcare
- Cotiviti
- HP
- Optum, Inc.
- Xerox
- Experian Health
- IBM/Truven
- LexisNexis
- Performant Financial Corp.
- SCIO Health Analytics
- Verscend Technologies
- CaseNet
- MedHok
- Trizetto
- ZeOmega

Business Strategy

We believe that the steadily increasing enrollment and rising expenditures for Medicare and Medicaid, with most new enrollees entering managed care plans; an aging U.S. population with an increasing concentration of individuals with high cost chronic conditions; and the overall complexity of the healthcare claims payment system in the U.S. all combine to create substantial growth opportunities for the suite of cost containment solutions which we offer. We also believe that these factors similarly present growth opportunities for our care management solutions. We expect to grow our business over the course of 2017 and beyond, both organically and inorganically, by leveraging existing key assets (e.g., our data, analytics and in-house expertise, and distribution channel) and pursuing a number of strategic objectives or initiatives, including:

- *Expanding the scope of our relationship with existing customers* – by selling additional products and services.
- *Adding new customers* – by marketing to commercial health plans, including Medicaid managed care and Medicare Advantage plans, at-risk group and individual health lines of business and ASO; government healthcare payers, including Medicaid agencies, state employee health benefit plans and CHIP; at-risk provider organizations and ACOs; and commercial employers.
- *Introducing new "homegrown" products and services* – through internal development initiatives designed to enhance or expand our existing suite of cost containment products.
- *Utilizing big data* – to create a more nimble operating environment and to identify new revenue opportunities within our current service delivery models.
- *Promoting automation and innovation to improve the efficiency and effectiveness of our services* – by continuing to implement new technology and process improvements designed to increase recovery yields and increase customer satisfaction.
- *Building out our new health management and member engagement technology platform* – by establishing a broad foundation of technology and service solutions to help customers better manage quality, cost and compliance across all lines of business. Our first step in this strategy was the acquisition of Essette Inc., a care management platform, in September 2016. More recently, we acquired Eliza Holding Corp., which provides comprehensive and personalized outreach and health engagement solutions, in April 2017.

- *Continuing opportunistic growth via acquisition* – by selectively seeking assets to complement our core cost-containment expertise; build care management and care coordination adjacencies to complement the Essette and Eliza acquisitions; and expand our data analytics capabilities. Our focus is on acquisitions that have long-term growth potential; target high-growth areas; are accretive to earnings; and fill a strategic need in our business portfolio as we seek to provide increasingly comprehensive solutions to our customers.

Employees

As of December 31, 2016, we had 2,315 employees, of which 2,287 were full-time. Of our total employees, 253 support SG&A activities.

Intellectual Property

Our ability to develop and maintain the proprietary aspects of our technology and operate without infringing the proprietary rights of others are important to our business and competitive position. We establish and protect our proprietary technology and intellectual property through a combination of patents, patent applications, trademarks, copyrights, domain names, trade secrets, including know-how, confidentiality and invention assignment agreements, security measures, non-disclosure agreements with third parties, and other contractual rights. As a result of acquiring Eliza Holding Corp. on April 17, 2017, we now own a patent portfolio comprised of approximately 55 domestic and international patents and patent applications. We do not believe that any one individual technology is essential to our business.

Available Information

Additional information about HMS is available on our website at www.hms.com. The content on our website, or any website referred to in this Annual Report on Form 10-K, is not incorporated by reference into this Annual Report, unless expressly noted.

Copies of our recent Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and Proxy Statements, as well as amendments to these reports or statements, are available free of charge on our website through the Investor Relations page, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. These materials, as well as similar materials for SEC registrants, may be obtained directly from the SEC through their website at www.sec.gov. You may also read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

Item 1A. Risk Factors

Our business is subject to significant risks, including the risks and uncertainties described below. You should carefully consider these risks, as well as the other information in this 2016 Form 10-K, including our Consolidated Financial Statements and the related Notes. The occurrence of any of these risks could adversely affect our business, financial condition, results of operations, and cash flows in a material way.

Risks Relating to Our Company

Our ability to expand our business will be adversely affected if we fail to implement our growth strategy.

The size and the scope of our business operations have expanded over the past several years, and we currently intend to continue to grow and expand into new areas within the government and commercial healthcare space; however, such growth and expansion carries costs and risks that, if not properly managed, could adversely affect our business. Our future growth will depend, among other things, on our ability to successfully execute our business plans and continued efforts to improve our operations, all while remaining competitive. We must also be flexible and responsive to our customers' needs and to changes in the political, economic and regulatory environment in which we operate. The greater size and complexity of our expanding business puts additional strain on our administrative, operational and financial resources and can make optimal resource allocation more difficult to determine. We may not be able to maintain or accelerate our growth. A failure to anticipate or properly address the demands and challenges that our growth strategy and potential diversification may have on our resources and existing infrastructure may result in unanticipated costs and inefficiencies and could negatively impact our ability to execute on our business plans and growth goals, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If we fail to innovate and develop new or enhanced solutions and services, or if these solutions and services are not adopted by our customers, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Part of our growth strategy depends on our ability to respond to the evolving healthcare landscape with new and enhanced solutions and services that our existing and potential customers are willing to adopt. The development, marketing and implementation of these solutions and services may require that we make substantial financial and resource investments. We face risks that our new or modified solutions and services may not be responsive to customer preferences or industry changes, and that the solution and service development initiatives that we prioritize may not yield the gains that we anticipate, if any. If we are unable to predict market preferences or healthcare industry changes, or if we are unable to develop or adapt solutions and services that are responsive to existing and potential customers' needs, we may fail to expand our business, which could constrain our future revenue growth and materially adversely affect our business, financial condition, results of operations and cash flows.

Our acquisition strategy may subject us to considerable business and financial risk.

Historically, to achieve our strategic goals, we have made a significant number of acquisitions that have expanded the solutions and services we offer, provided a presence in complementary business lines, or expanded our geographic presence and/or customer base. For example, we acquired IntegriGuard, LLC in September 2009; Verify Solutions, Inc. in December 2009; Allied Management Group-Special Investigation Unit in June 2010; Chapman Kelly, Inc. in August 2010; HDI in December 2011; MedRecovery Management, LLC in December 2012; Essette, Inc. in September 2016; and Eliza Holding Corp. in April 2017.

We intend to pursue future acquisitions that will continue to expand and diversify our business and to periodically engage in discussions regarding such possible acquisitions. We are subject to risks and uncertainties relating to our ability to identify suitable potential acquisition candidates, to consummate additional acquisitions that will be advantageous to us, and to successfully integrate future acquisitions. Future and potential business acquisitions involve a number of risk factors that could affect our operations, including, but not limited to:

- diversion of management's attention and other resources;
- our ability to integrate operational, accounting and technology functions, policies, processes, systems and controls, and to implement these functions, policies, processes, systems and controls, without incurring substantial expenses, delays or other issues;
- our ability to integrate personnel and human resource systems as well as the cultures of the acquired business;
- our ability to retain or replace the key personnel of the acquired business;
- our ability to maintain relationships with the customers of the acquired business and further develop the acquired business;
- our ability to cross-sell our solutions and services and the solutions and services of the acquired business to our respective customers;

- customer dissatisfaction or performance problems with the acquired business;
- our ability to comply with regulatory requirements and avoid potential conflicts of interest in markets that we serve;
- the misuse of intellectual property by the personnel of the acquired business;
- our ability to successfully enter into unfamiliar markets;
- assumption of unanticipated legal or financial liabilities and/or negative publicity related to prior acts by the acquired business;
- we may become subject to litigation or other claims in connection with the acquired business, including claims from terminated employees, customers, former shareholders or third parties;
- we may become significantly leveraged as a result of incurring debt to finance an acquisition;
- we may encounter unanticipated operating, accounting or management difficulties in connection with the acquired business;
- the acquired business may not perform as projected which could negatively impact earnings or contingent consideration;
- we may suffer impairment of goodwill and other acquired intangible assets; and
- we may suffer dilution to our earnings per share.

If we fail to adequately address these risks, or to successfully integrate the businesses that we acquire, we may not realize cost efficiencies, synergies or other benefits that we anticipated when selecting our acquisition candidates, and our reputation, business, financial condition, results of operations and cash flows could be materially adversely affected.

You will not be able to rely on our operating results in any particular period as an indication of our future performance because they are subject to significant fluctuation which may cause the market price of our common stock to decrease significantly.

Our operating results may fail to match our past or projected performance. We have experienced significant variations in our revenue between reporting periods due to the timing of periodic revenue recovery projects, the timing and delays in third party payers' claim adjudication and ultimate payment to our customers where our revenue is contingent upon such collections and delays in receiving payment for our services. Our revenue and operating results have also been impacted from period to period as a result of a number of factors, some of which are outside of our control, including, but not limited to:

- fluctuations in sales activity given our sales cycle;
- the commencement, completion or termination of contracts during any particular quarter;
- expenses related to certain contracts which may be incurred in periods prior to revenue being recognized;
- the timing of government contract awards;
- the time required to resolve bid protests;
- contract renewal discussions, which result in delayed payments for services already performed;
- technological and operational issues affecting our customers, including delays in payment receipt for previously recognized revenue due to delays in certain customers processing our findings through their systems;
- adjustments to age/quality of receivables and accruals as a result of delays involving contract limitations and changes or sub-contractor performance deficiencies or internal managerial decision not to pursue identified claim revenue from customers; and
- regulatory changes or general economic conditions as they affect healthcare providers and payers.

Occasionally our state and federal customers are requested by third party payers to refund payments that we previously recovered for our customers. If our state and federal customers choose to refund money in response to these requests, regardless of whether an error actually occurred in connection with the payments, we may also be required to return contingent revenue which we were previously paid associated with such refunded payments. We also typically face a long implementation period with a new customer or a new contract with an existing customer and may not be able to estimate with certainty the period in which implementation may be completed.

We cannot predict the extent to which future variations could occur due to these or other factors. Although we have experienced some seasonal trends in our operational volume, we do not consider our operations to be seasonal to any material degree. Consequently, our operating results are subject to significant fluctuation for any particular quarter, fiscal year, or other period, and may not be indicative of future periods. Significant fluctuations in our operating results may cause the market price of our common stock to decrease significantly.

We face challenges associated with forecasting the revenue under our contracts and solutions, and any failure to accurately forecast such revenue could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to accurately estimate the factors upon which we base our contract pricing, or the costs and timing for implementing and completing contracts. For a majority of our customer contracts, the payment of our fee is contingent upon the recoveries received by our customers. We also have cost-plus or time-and-material based contracts with the federal government where our revenue is recognized based on costs incurred plus an estimate of the negotiated fee earned. Our ability to earn a profit on these contracts requires that we accurately estimate the costs involved with these contracts and assess the probability of achieving certain outcomes or milestones within the contracted time period. In addition, we cannot predict with certainty the costs or the period in which implementation or contracts may be completed when we introduce new solutions or services into the marketplace. We may also face a long implementation period with a new customer or a new contract, making it difficult to reliably forecast revenue under those contracts. If we do not accurately estimate the costs and timing for completing projects, or if we encounter increased or unexpected costs, delays, failures, liabilities or risks, including those outside of our control, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. Although we believe that we have recorded adequate provisions in our financial statements for losses on our fixed-price and cost-plus contracts where applicable, as required under U.S. GAAP, our contract loss provisions may not be adequate to cover all actual future losses.

System interruptions or failures could expose us to liability and harm our business.

Our data and operation centers are essential to our business and our operations depend on our ability to maintain and protect our information systems. We attempt to mitigate the potential adverse effects of a disruption, relocation or change in operating environment; however, the situations we plan for and the amount of insurance coverage that we maintain may not be adequate in every case. Despite systems redundancy and security measures, our systems and operations are vulnerable to damage or interruption from, among other sources:

- power loss, transmission cable cuts and telecommunications failures;
- damage or interruption caused by fire, earthquake and other natural disasters;
- software defects;
- cyber security breaches; and
- physical break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond our control.

In addition, while there are backup systems in many of our operating facilities, an extended outage of utility or network services supplied by third party IT vendors or providers may delay or disrupt the delivery or performance of the solutions and services we provide for our customers. If we encounter a business interruption, or in the event our business continuity plans and business interruption insurance coverage are not adequate or fail to compensate us on a timely basis, we could suffer operational disruptions, disputes with customers, civil or criminal penalties, regulatory problems, increases in administrative expenses, loss of our ability to produce timely and accurate financial and other reports or other adverse consequences, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our systems and networks and those of third parties on which we rely may be subject to cyber security breaches and other disruptions that could compromise our information and harm our business.

In the ordinary course of our business, we rely heavily upon our technology systems and networks to input, maintain and communicate the confidential and proprietary data we receive on behalf of our customers, as well as third-party products and services. In addition, sub-contractors, teaming partners or other third-party vendors may receive or utilize this information on our behalf. The secure processing and maintenance of this information is critical to our operations and business strategy. Our security measures or those of third parties on which we rely could be compromised or breached as a result of computer hacking, acts of vandalism or theft, malware, computer viruses, employee error or malfeasance, catastrophes or other unforeseen events. As a result, our data, customers' data, information technology or infrastructure could be accessed improperly, made unavailable, improperly modified, or corrupted or we could suffer system disruptions, shutdowns and denials of service. The occurrence of any of these events could cause our solutions and services to be perceived as vulnerable, cause our customers to lose confidence in our solutions and services, negatively affect our ability to attract new customers, cause existing customers to terminate or not renew our solutions and services and damage our reputation, all of which could reduce our revenue, increase our expenses and expose us to legal claims and regulatory actions. Similarly, we could be materially adversely affected by the loss of proprietary, trade secret or confidential technical and financial data if our internal networks are compromised. We may be unable to implement adequate preventive measures to protect against such compromises. We could also be forced to expend significant resources in response to a cyber-security breach, including repairing system damage, increasing cyber security protection costs by deploying additional personnel and protection technologies, paying regulatory fines and litigating and resolving legal claims and regulatory actions, all of which could increase our expenses, divert the attention of our management and key personnel away from our business operations and materially adversely affect our results of operations.

If we are unable to protect our proprietary technology, information, processes, know-how, and other intellectual property and intellectual property rights, or become subject to claims of infringing or misappropriating the intellectual property of third parties, the value of our solutions and services may be diminished and our business may be materially adversely affected.

Our success as a company depends in part upon our ability to protect our core technology and intellectual property. Our expanding operations and efforts to develop new solutions and services also make protection of our intellectual property more critical. We seek to protect trade secrets and other proprietary information through confidentiality agreements and invention assignment agreements with employees, consultants and other third parties, as well as through the terms of our agreements with customers and vendors, and other security measures. However, the steps we have taken to deter misappropriation of intellectual property may be insufficient to protect our proprietary information. Misappropriation of our intellectual property by third parties, or any disclosure or dissemination of our confidential and proprietary business intelligence, queries, algorithms and other similar information by any means, could undermine any competitive advantage we currently derive or may derive from that intellectual property. For example, our current or former employees, consultants or other third parties may unintentionally or willfully disclose our trade secrets, know-how or other confidential and proprietary information to competitors. Competitors have also attempted to use state open records and/or federal Freedom of Information Act laws to obtain our proposal responses and other documents we provide to our government customers. We cannot be certain that our efforts to protect the confidential and proprietary trade secret information or intellectual property in these proposals or other documents will always be successful, due to the many factors underlying the various state and federal decisions to release information in response to open records requests (even in spite of our objections and efforts to protection information). On the other hand, third parties may claim that we are infringing upon or misappropriating their intellectual property. Our exposure to risks related to the use of intellectual property may also increase as a result of acquisitions because third parties may make infringement and similar or related claims after we have acquired technology. Any of these situations could cause us to expend significant time and resources and to incur substantial costs associated with litigation or legal proceedings that may be necessary to defend ourselves or to enforce our intellectual property rights, in which we may not ultimately prevail, and could result in our being prevented from furnishing certain solutions and services. If the protection of our proprietary rights is inadequate to prevent unauthorized use or appropriation by third parties or our employees, the value of our brand and other intangible assets may be diminished and others may be able to more effectively compete with our business by offering solutions or concepts that are substantially similar to ours, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We face significant competition for our solutions and services and we expect competition to increase, which could materially adversely affect our business, financial condition, results of operations and cash flows.

The market for healthcare cost containment solutions and services is intensely competitive, driven by rapidly changing technologies, evolving industry standards and customer demands to become more efficient. Our competitors range in size from large, diversified national companies to small, specialized firms, and could include current or former sub-contractors or teaming partners seeking to establish direct relationships with our customers in order to perform similar services as the prime contractor, as well as current and prospective customers that elect to perform recovery and cost avoidance functions in-house or to develop in-house capacities for solutions and services that we provide or hope to provide. Consolidation among vendors and healthcare providers, as well as the merging of some of our competitors or formation of business alliances with other competitors, have contributed to the increasingly competitive environment. For example, certain state customers have combined or “bundled” TPL services under large-scale IT procurements, allowing MMIS vendors to partner with less experienced TPL identification vendors based on preferred relationships or favorable pricing. In addition, companies that have invested in proprietary technology different from our own solution and service offerings, such as front-end analytics, have emerged as new competitors due to the rapidly evolving healthcare landscape. There is also increasing sophistication in the solutions and services that our competitors are developing that may become more efficient or appealing to our customers. In order to remain competitive, we may need to quickly develop and market new and enhanced solutions and services responsive to emerging technologies and changes in the healthcare industry, which may require that we make substantial financial and resource investments.

We may not be able to compete successfully against our existing or future competitors. Some of these competitors have significantly greater financial and technical resources and market recognition than we do. They may be able to (i) offer lower prices or negotiate fee reductions on our current solutions and services, (ii) respond more quickly than we can to new and emerging technologies and changing customer requirements, (iii) devote greater resources to the sale of their solutions and services and the development and implementation of new and improved systems, solutions and services for customers that we serve, and (iv) pursue various acquisitions that allow them to rapidly amass a wide array of capabilities. We may be forced to lower our pricing, unexpectedly increase or enhance our technological or data capabilities, or modify our solution or service offerings. Notwithstanding any changes we make in response to increased competition, the demand for our solutions and services may decrease as a result of increased competition. A failure to be responsive to our existing and potential customers' needs or the changing industry landscape could hinder our ability to maintain or expand our customer base, hire and retain new employees, pursue new business opportunities, complete future acquisitions and operate our business effectively. Any inability to compete effectively could materially adversely affect our business, financial condition, results of operations and cash flows.

Our business could be materially adversely affected if we fail to maintain a high level of customer retention, if our customers elect to reduce the scope of our contracts or terminate them before their scheduled expiration dates or if we fail to meet performance standards under our customer contracts.

We historically have derived and expect to continue to generate a significant portion of our revenue from a limited number of large customers at the federal and state level. Our contracts with these customers are subject to periodic renewal and some permit them to terminate their contracts on short notice, with or without cause. If a customer is dissatisfied with the quality of our work or if we fail to meet performance standards under our contracts, or if our solutions, technical infrastructure or services do not comply with the provisions of our contractual agreements or applicable regulatory requirements, customers might seek to reduce the scope of the services we perform or prematurely terminate their agreements with us, or we could incur additional costs that may impair the profitability of a contract and damage our ability to obtain additional work from that customer, or other current or prospective customers. For example, some of our contracts contain liquidated damages provisions and financial penalties related to performance failures, which if triggered, could materially adversely affect our reputation, business, financial condition, results of operations and cash flows. We also may be required to disclose such liquidated damages or other financial penalties assessed against us in connection with future bids for services with other customers.

In addition, government customers are subject to financial pressures or pressure from stakeholders that may cause them to terminate contracts for our services that may be regarded as non-essential or to redefine or reduce the scope of our contracts by, for example, significantly reducing the volume of data that we are permitted to audit. Despite our right to prompt and full payment under the terms of our contracts, we could face challenges in obtaining timely or full payments for our properly provided services from our customers. If there is a substantial reduction in the scope of our services under, or a termination of, any of our key contracts with our major customers, or if we are exposed to significant costs, liabilities or negative publicity, our ability to compete for new contracts with current or prospective customers could be damaged and our business, financial condition, reputation, results of operations and cash flows could be materially adversely affected.

Any failure to maintain effective information processing systems and the integrity of the data in, and operations of, those systems could materially adversely affect our business, financial condition, results of operations and cash flows.

Our ability to conduct our operations and accurately report our financial results depends on the integrity of the data in our information systems and the processes performed by those systems. These information systems and applications require continual maintenance, upgrading and enhancement to meet our operational needs, satisfy customer requests and handle our expansion and growth. Despite our testing and quality control measures, we cannot be certain that errors or system deficiencies will not be found and that remediation can be done in a timeframe that is acceptable to our customers, or that customer relationships will not be impaired by the occurrence of errors or the need for remediation. In addition, implementation of upgrades and enhancements may cost more, take longer or require more testing than originally expected. Given the large amount of data we collect and manage, it is possible that hardware failures or errors or technical deficiencies in our systems could result in data loss or corruption or cause the information that we collect, utilize or disseminate to be incomplete or contain inaccuracies that our customers regard as significant. Situations may also arise in which the accuracy of our data analysis or the content and quality of our work product is central to the disposition of claims, controversies or litigation between our customers and third parties that would require us to allocate significant resources to fulfilling our contractual obligations to provide our customers with full and complete access to records, analysis and back-up documentation of our work. Assuring our capacity to fulfill these obligations as well as actually fulfilling them could impose significant burdens on our infrastructure for data storage, maintenance and processing, and require us to incur increased costs to supplement our personnel, data storage and computing resources, which could materially and negatively impact other business operations.

We depend on many different entities to supply information and an inability to successfully manage our relationships with a number of these suppliers may harm the quality and availability of our solutions and services.

We obtain the data used in our solutions and services from many sources, including commercial health insurance plans, financial institutions, managed care organizations, government entities and non-government entities. From time to time, challenges arise in managing and maintaining our relationships with data sources that are not our customers and that furnish information to us pursuant to a combination of voluntary cooperation and legal obligations under laws and regulations that are often subject to differing interpretation. For example, data suppliers could seek to limit or end our access to and use of their data if they determine that certain uses of data for our customers are not permitted by our agreements, or such suppliers may make errors in compiling, transmitting or accurately characterizing data or have technological limitations that interfere with our receipt or use of the data we rely on them to provide. If a number of our information sources become unable or unwilling to provide us with certain data under terms of use that are acceptable to us and our customers, or if laws and regulations for use and protection of this data changes in a way that disincentivizes our suppliers, or imposes unacceptable or unreasonable conditions or risks on us, we may not be able to obtain new or favorable agreements with alternative data suppliers. In addition, our ability to normalize and fully utilize the information we have received from various data sources in order to enhance and improve current solutions for our customers is an important component of our growth strategy. Although we believe that we have the legal and contractual rights necessary to normalize and use the data we have obtained from these sources for potential or contemplated solution and service offerings, we cannot provide assurance that these entities will permit the use of their data for these purposes. If we lose a number of our data sources or access to certain data and are unable to identify and reach the requisite agreements with suitable alternative suppliers or fail to successfully integrate them into our solution and service offerings, or if there is a lack of integrity in the data that current or future suppliers provide, we could experience service disruptions, increased costs, reduced quality of our solutions and services, or performance penalties under our customer contracts, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may rely on sub-contractors and other third party providers to provide customers with a single-source solution or service or we may serve as a sub-contractor to a third party prime contractor. If these parties fail to satisfy their obligations to us or if we are unable to maintain these relationships, our business, financial condition, results of operations and cash flows could be materially adversely affected.

In some areas of our business we may engage sub-contractors, teaming partners, vendors or other third party providers to provide our customers with a single-source solution or service for a broader range of service needs. These third parties include software vendors, utility and network providers and other information technology service providers. Our ability to deliver and implement solutions and serve our customers effectively depends on our ability to obtain permissions from our customers, when necessary, to use these third party sub-contractors, or on these third parties meeting our service standards in both timeliness and quality. Similarly, we are and may in the future be engaged as a sub-contractor to a third party prime contractor. Sub-contracting arrangements where we are not the prime contractor pose unique risks to us because we do not have control over the customer relationship, and our ability to generate revenue under such sub-contracts is dependent on the prime contractor, its performance and relationship with the customer, and its relationship with us. While we believe that we perform appropriate due diligence on these parties and take adequate measures to ensure that they comply with the appropriate laws and regulations, we cannot guarantee that they will comply with the terms set forth in their agreements with us or in the case of a prime contractor, their agreement with the customer or that they will provide adequate and timely services, construe their contractual rights and obligations in a reasonable way, act appropriately in dealing with us or customers, and remain in compliance with the relevant laws, rules or regulations. As a result, we may have disputes with these parties arising from these or other matters. Performance deficiencies or misconduct by our prime contractors or sub-contractors may be perceived as inadequacies in our solutions or services or cause us to fail to fulfill our contractual obligations to our customers, which could materially adversely affect our customer relationships and reputation, result in termination of a customer contract or the sub-contractor or partner, and subject us to a dispute with our customer or such third party. In addition, if our third party service providers terminate or refuse to renew their relationships with us or offer their products to us in the future on less advantageous terms, we may not be able to perform or deliver solutions or services for existing customers as expected. Likewise, we could suffer losses in the event a prime contract, under which we serve as a sub-contractor, is terminated, whether for non-performance by the prime contractor or otherwise. Upon any such termination of the prime contract, our sub-contract will similarly terminate, and the resulting contract loss could materially adversely affect our business, financial condition, results of operations and cash flows.

We obtain a significant portion of our business through competitive bidding in response to government requests for proposals. Reprocurements and future contracts may not be awarded through this process on the same level or our contract awards may be challenged by interested parties which could materially adversely affect our business, financial condition, results of operations and cash flows.

In order to market our solutions and services and compete for contracts with existing and potential state and federal customers, we are often required to respond to government-issued RFPs. These RFP responses typically require us to assemble and submit a large volume of information within a rigid timetable, and to accurately estimate our cost structure for servicing the proposed contract, the time required to establish operations and the likely terms of any proposals submitted by our competitors. We may also be required to disclose the occurrence of any negative events suffered by our business, such as customer disputes, a government inquiry or an adverse judgment or settlement in litigation or a legal proceeding, which could impair our ability to win the contract at issue or have a material adverse effect on our reputation in the industry.

Even if we win these contracts, we may fail to secure favorable contract terms and conditions, or a government's determination to award us the contract may be challenged by an interested party. Under the state and federal laws and regulations governing procurements of goods and services, challenges and award protests may be filed even if there are no valid legal grounds on which to base the protest. The filing of such challenges could potentially delay the start or implementation of the contract if the government agency determines to withhold a contract award or suspend contract performance while the protest is being considered, or to take corrective action on its own, such as soliciting new bids or terminating the contract award or current procurement. In the event of irregularities, we perceive or learn of in the award or bidding process, we also may be forced to file protests in response to RFP awards to other bidders. Resolution of a protest, even in our favor, could force us to expend considerable funds in disputing the potential award or to incur additional expenses to maintain our ability to timely start implementation, which may cause our actual results to differ materially and adversely from those anticipated. In addition, if we are unable to win reprocurements or protests of particular contracts, we may be precluded from entering certain customer markets for the term of the contract awarded to another party. Any failure to continue to obtain contracts in response to government RFPs, to design proposals that result in profitable contracts, to win new contracts or re-procure current contracts after they expire or to prevail in protests or challenges of contract awards could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Adverse judgments or settlements in legal proceedings could materially harm our business, financial condition, operating results and cash flows.

We are subject and may be a party to lawsuits and other claims that arise from time to time in the ordinary course of our business, which may include those related to, for example, contracts, sub-contracts, teaming agreements, protection of confidential information or trade secrets, adversary proceedings arising from customer bankruptcies, employment of our workforce and immigration requirements or compliance with any of a wide array of state and federal statutes, rules and regulations that pertain to different aspects of our business. We may also be required to initiate expensive litigation or other proceedings to protect our business interests. There is a risk that we will not be successful or otherwise be able to satisfactorily resolve any pending or future litigation. In addition, litigation and other legal claims are subject to inherent uncertainties and management's view of currently pending legal matters may change in the future. Those uncertainties include, but are not limited to, litigation costs and attorneys' fees, unpredictable judicial or jury decisions and the differing laws and judicial proclivities regarding damage awards among the states in which we operate. Unexpected outcomes in such legal proceedings, or changes in management's evaluation or predictions of the likely outcomes of such proceedings (possibly resulting in changes in established reserves), could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to deliver our solutions and services efficiently if we are unable to attract and retain qualified employees.

Our successful delivery of services and solutions is dependent upon our ability to recruit, employ, train and retain skilled personnel. Our ability to maintain our productivity and profitability is limited by our ability to attract and retain the skilled personnel necessary to sustain our business and operations. The success of recruitment and retention strategies depend on a number of factors, including the competitive demands for employees having the skills we need and the level of compensation required to hire and retain such employees. As our business expands and undergoes change, we may also find it difficult to preserve our corporate culture, which could reduce our ability to innovate and operate effectively or result in a loss of experienced personnel. In addition, our customers or competitors may hire away our qualified employees. We may not be able to recruit the appropriate personnel or maintain the personnel necessary to efficiently operate and support our business, and even if our recruitment and retention strategies are successful, our labor costs may increase significantly. Our inability to hire sufficient personnel on a timely basis without significantly increasing our labor costs could materially adversely affect our business, financial condition, results of operations and cash flows.

Our future success depends, in part, on the continued service of members of our management team.

Our ability to execute on our business plans and future success requires that we attract, develop, motivate and retain experienced and innovative executive officers and senior managers who have successfully managed, designed or implemented government services programs or information technology projects, or have relevant experience in other sectors of data management or the healthcare industry. These individuals are in great demand and are likely to remain a limited resource in our industry. The loss of services of one or more members of our management team could materially adversely affect our business, financial condition, results of operations and cash flows. In addition, to the extent we lose an executive officer or senior manager, we may incur increased expenses in connection with the hiring, promotion or replacement of these individuals and the transition of leadership and critical knowledge.

Our outstanding indebtedness could materially adversely affect our financial condition and our ability to operate our business, and we may not be able to generate sufficient cash flows to meet our debt service obligations.

As of December 31, 2016, the outstanding principal balance due under our Credit Agreement was $197.8 million. Our outstanding indebtedness and any additional indebtedness we incur may have important consequences for us, including, without limitation, that: (i) we may be required to use a substantial portion of our cash flow to pay the principal of and interest on our indebtedness; (ii) our indebtedness and leverage may increase our vulnerability to adverse changes in general economic and industry conditions, as well as to competitive pressures; (iii) our ability to obtain additional financing for working capital, capital expenditures, acquisitions and for general corporate and other purposes may be limited; and (iv) our flexibility in planning for, or reacting to, changes in our business and our industry may be limited.

In addition, our ability to make payments of principal and interest on our outstanding revolving credit facility depends upon our future performance and our ability to generate cash flows. Under the terms of the Credit Agreement, we are required to comply with specified financial and operating covenants, which may limit our ability to operate our business as we otherwise might operate it. For example, our obligations may be accelerated upon the occurrence of an event of default, including, without limitation, payment defaults, failure to perform affirmative covenants, failure to refrain from actions or omissions prohibited by negative covenants, the inaccuracy of representations or warranties, cross-defaults, bankruptcy and insolvency related defaults, defaults relating to judgments, defaults due to certain ERISA related events and a change of control default. If not cured, an event of default would result in any amounts outstanding, including any accrued interest and unpaid fees, becoming immediately due and payable, which would require us to, among other things: seek additional financing in the debt or equity markets, refinance or restructure all or a portion of our indebtedness, sell selected assets, and/or reduce or delay planned capital or operating expenditures. Such measures might not be sufficient to enable us to service our debt, and any such financing or refinancing might not be available on economically favorable terms or at all. If we are not able to generate sufficient cash flows to meet our debt service obligations or are forced to take additional measures to be able to service our indebtedness, our business, financial condition and results of operations could be materially and adversely affected.

Changes in, or interpretations of, tax rules and regulations may materially adversely affect our effective tax rates.

We are a United States-based company subject to various federal, state and local tax laws and regulations in multiple U.S. jurisdictions that govern numerous aspects of our business. As we expand our business, we may perform services for new customers located outside of the United States or in a U.S. Territory, which may subject us to foreign tax laws and regulations that could increase our exposure to additional tax liabilities. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned and taxed, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by providing services in new jurisdictions, by increases in expenses not deductible for tax purposes including impairments of goodwill, by changes in U.S. GAAP or by changes in the valuation of our deferred tax assets and liabilities. Furthermore, the results of the 2016 elections create uncertainty regarding future potential tax law reform.

In addition, we are subject to the continual examination of our income tax returns by the IRS and other domestic tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result. The final determination of any of these examinations could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our health insurance coverage and self-insurance reserves may not cover future claims, which could materially adversely affect our business, financial condition, results of operations and cash flows.

We maintain various insurance policies for company employee health, workers' compensation, general liability and property damage. We are self-insured for our health plans, and have purchased a fully-insured stop loss policy to help offset our liability for both individual and aggregate claim costs. We are also responsible for losses up to a certain limit for workers' compensation, general liability and property damage insurance.

For policies under which we are responsible for losses, we record a liability that represents our estimated cost of claims incurred and unpaid as of the balance sheet date. Our estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions and economic conditions, and is closely monitored and adjusted when warranted by changing circumstances. Our prior growth could affect the accuracy of estimates based on historical experience. Should a greater amount of claims occur compared to what was estimated or medical costs increase beyond what was expected, our accrued liabilities might not be sufficient and we may be required to record additional expense. Unanticipated changes may also produce materially different amounts of expense than reported under these programs, which could materially adversely affect our business, financial condition, results of operations and cash flows.

We identified material weaknesses in our internal control over financial reporting, and if we fail to remedy them or other material weaknesses that we may identify in the future, our financial statements could be materially misstated.

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting, as defined in Rule 13a-15(f) under the Exchange Act. As described in Part II, Item 9A of this Annual Report on Form 10-K, management identified material weaknesses in our internal control over financial reporting as of December 31, 2016 related to the calculation of the estimated liability for appeals balance in connection with our CMS reserve and the valuation of our accounts receivable allowance. These material weaknesses resulted in an immaterial reclassification error in revenue and selling, general and administrative expenses that was corrected prior to issuance of the consolidated financial statements. Until remediated, these material weaknesses could result in misstatements of account balances or disclosures that would result in a material misstatement to the annual or interim consolidated financial statements that will not be prevented or detected on a timely basis.

We are actively revising and supplementing our control environment and our risk assessment process and the design of our process level controls in order to remediate these material weaknesses, including a set of compensating controls in the near term. We are enhancing and revising the design of controls and procedures to ensure the calculations of the CMS reserve and the accounts receivable allowance properly utilize historical information to derive the period-end balances. Additionally, management will be supplementing the review controls over the CMS reserve and the accounts receivable allowance, and controls over the completeness and accuracy of the data used to calculate the balances, with additional levels of review involving senior members of our accounting department and will assess the need for additional remediation steps.

We cannot predict the outcome of our assessment and that of our independent registered public accounting firm in future periods. If our remedial measures are insufficient to address the material weaknesses, or if additional material weaknesses or significant deficiencies in our internal controls are discovered or occur in the future, we may fail to meet our future reporting obligations on a timely basis, our financial statements may contain material misstatements, our operating results or financial condition may be negatively impacted, and we may be subject to litigation and regulatory actions, causing investor perceptions to be adversely affected and potentially resulting in a decline in the market price of our common stock.

Risks Relating to Our Industry

Our business could be materially adversely affected by changes in the U.S. healthcare environment or in laws relating to healthcare programs and policies, particularly as they relate to the ACA and the Medicare and Medicaid programs.

The healthcare industry in the United States is subject to changing political, economic and regulatory influences that may affect the procurement practices and operations of federal, state and commercial healthcare organizations and agencies. The ACA's emphasis on program integrity and cost containment, along with its expansion of Medicaid, created new opportunities to grow our business and our service offerings. However, due to a wide range of factors contributing to uncertainty of the healthcare landscape, including, among other factors, the results of the 2016 elections, Congressional activity to repeal the ACA, and the numerous, varying ACA replace measures that may encompass Medicaid, Medicare and commercial insurance, it is difficult to predict its full impact and influence on future changes to healthcare policy. Policies that fundamentally change the financial structure of the Medicaid program, currently funded jointly by the states and the U.S. Federal Government, could result in early termination or non-renewal of our contracts with certain state government customers. Federal changes may also reduce reimbursement rates to states, establish new payment models, increase or decrease government involvement in healthcare, decrease the Medicare RAC Program, or otherwise change the operating environment for our customers. Healthcare organizations may react to such changed circumstances and financial pressures by taking actions to ramp up, curtail or defer their retention of cost containment providers like us, which could impact the demand for our solutions and services. While certain changes may present new opportunities to us, our business, financial condition, results of operations and cash flows could be materially adversely affected if efforts to waive, modify or otherwise change the ACA, in whole or in part, are successful, if we are unable to adapt our solutions and services to meet changing requirements or expand service delivery into new areas, or if the demand for our solutions and services is reduced.

Healthcare spending fluctuations, simplification of the healthcare payment process or other aspects of the healthcare financing system, budgetary pressures and/or programmatic changes diminishing the scope of program benefits, or limiting payment integrity initiatives, could reduce the need for and the price of our solutions and services, which would have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our projections and expectations are premised, in part, upon consistent growth rates in spending in the Medicare and Medicaid programs, the current healthcare financing system and the need for our solutions and services within that existing framework. Our success as a company is based on offering solutions and services that improve the ability of our customers to identify and recover revenue that would otherwise be lost often as a result of procedural inefficiencies and complexities in that system. However, the need for our solutions and services, the price customers are willing to pay for them or the scope and profitability of our contracts could be negatively affected by a number of factors, including a lower than projected growth in Medicare and Medicaid programs due to developments such as the possible repeal of or modification to the ACA, and any action taken to reduce eligibility or services, or reform Medicaid spending. The absence of near-term compliance deadlines effected by the ACA and other legislation could additionally cause our revenue to decline. There can be no certainty that additional incentives will be created in regard to our solutions and services, or that any legislation or regulations that may be adopted would favorably impact our business.

Modifications in provider billing behavior and habits, often in response to the success of our solutions and services or to changes that reduce healthcare spending, could also reduce the profitability of our contracts and reduce the need for our solutions and services. Compounding this are budgetary pressures that may drive changes at the state level. The demand for our solutions and services could also be impacted by other changes in government healthcare programs or in the level of government spending, such as:

- the simplification of the healthcare benefit and payment system through legislative or regulatory changes at the federal or state level (for example, legislative changes impacting the scope of mandatory audits; limiting or reducing the amount of reviewable claims and/or the look-back period for review in areas where we conduct audits);
- unanticipated reductions in the scope of program benefits (such as, for example, state decisions to eliminate coverage of optional Medicaid populations or services or shifting lives into managed care plans); or
- limits placed on ongoing program integrity initiatives.

For example, during 2014 and 2015, our recovery audit services under HDI's existing Medicare RAC contract were limited because of significant delays in procurement activities for the new Medicare RAC contract awards, resulting from, in part, the cancellation of the original and second procurements following the denial of pre-award protests and ongoing litigation regarding certain payment terms proposed by CMS as part of the new Medicare RAC proposals. In October 2016, CMS announced the new awards, including the award of RAC Region 4 to our wholly owned subsidiary. These new Medicare RAC contracts are currently being implemented and we currently expect that audits will begin in Q2 2017. Our existing Medicare RAC contract ends on January 31, 2018, and we are required to maintain certain reserves related to pending appeals for this contract through at least this date. In addition, CMS has shifted the responsibility for initial medical reviews of short inpatient stays from the Medicare RACs to Quality Improvement Organizations, further restricting the Medicare RACs review to a small subset of claims for potential payment inaccuracies. CMS has also implemented new ADR limits for inpatient providers that reduces the ADR requirement to 0.5% under the new contract, down from the 2.0% ADR requirement under the prior contract. This change significantly impacts the volumes of claims Medicare RACs are permitted to review for inpatient providers and reduces their ability to identify overpayments and underpayments under their Medicare RAC contracts. For the new contract, CMS has continued to maintain the previously established ADR limits for institutional providers, originally established in January 2016, which reduced the ADR requirement to 0.5%. In April 2016, CMS instituted a new policy adjusting ADR limits based on provider denial rate after three (3) 45-day ADR cycles. This change significantly impacts the volumes of claims Medicare RACs are permitted to review for inpatient providers, and reduces their ability to identify overpayments and underpayments under their Medicare RAC contracts in the near term, pending the adjustment of ADR limits based on provider denial rates established following the first three (3) cycles of RAC reviews.

Further, in August 2014, CMS announced it would settle with hospitals willing to withdraw inpatient status claims currently pending in the RAC appeals process by offering to pay hospitals 68% for all eligible claims they had billed to Medicare. In June 2015, CMS notified HDI that based on the initial lists of finalized settlements, HDI owed CMS approximately $28.6 million due to adjustments in contingency fees under our existing Medicare RAC contract. HDI previously advised CMS that it disagrees with CMS' interpretation of the contract and that CMS does not have the contractual right, among other things, to require repayment of fees already paid. The amount ultimately payable to CMS by HDI remains uncertain. In addition, in September 2016, CMS announced that it would extend an opportunity for another round of settlements for hospitals that were eligible for but did not choose to participate in the 2014 settlement, with CMS offering to pay 66% for all eligible claims they had billed to Medicare. We believe this settlement will be processed and evaluated by CMS over the course of 2017, and the number and amount of claims that will be subject to the 2016 settlement remains uncertain. There could be a material negative impact on our future revenue to the extent that (i) any final determination of amounts owed by us to CMS under the current Medicare RAC contract materially exceeds our accrued reserves for such appeals, (ii) we are required to increase or decrease our contractually required reserves with respect to pending appeals due to changes in appeal performance, changes in data provided to us from other entities in the RAC process, or other related factors, (iii) we are required to repay a portion of prior fees associated with the hospital settlement program, (iv) we are unable to obtain full payments for properly provided services, or (v) future fees payable to us by CMS are reduced. Although we do not anticipate our Medicare RAC contract will represent a significant portion of our business going forward, our Medicare RAC contract still represents a future business opportunity for us and any of these factors or other changes to the Medicare RAC program that materially reduce our revenue or profitability with such program could have a material adverse effect on our business, financial condition, results of operations and cash flows.

A failure to comply with the laws and regulations that apply to companies in our industry regarding individual privacy and information security could subject us to legal actions, fines and penalties and negatively impact our reputation and operations.

As a service provider, we often receive, process, transmit and store sensitive data, including PHI and personally identifiable information of individuals, as well as other financial, confidential and proprietary information belonging to our customers, subsidiaries, data supplies and other third parties from which we obtain information. The use and disclosure of that information is regulated at the federal, state, international and industry levels and we are also obligated by our contractual requirements with customers. For example, we are subject to federal regulation under HIPAA, as amended by the HITECH Act, the Final Omnibus Privacy, Security, Breach Notification, and Enforcement Rule, which modified and supplemented many of the standards and regulations under HIPAA and the HITECH Act, and various state laws. HIPAA also imposes standards and requirements on our business associates as defined under HIPAA.

Even though we take measures to comply with all applicable regulations and to ensure our business associates and sub-contractors comply with these laws, regulations and rules, we have less than complete control over our business associates' and sub-contractors' actions and practices. We may be exposed to data breach risk if there is unauthorized access to one of our or our sub-contractors' secure facilities or from lost or stolen laptops, other portable media from current or former employee theft of data containing PHI, from misdirected mailings containing PHI, or other forms of administrative or operational error. If we or our sub-contractors fail to comply with applicable laws; if unauthorized parties gain physical access to one of our facilities and steals or misuses confidential information; if we erroneously use or disclose data in a way that is inconsistent with our granted rights; or if such information is misdirected, lost or stolen during transmission or transport, we may suffer damage to our reputation, potential loss of existing customers and difficulty attracting new customers. We could also be exposed to, among other things, unfavorable publicity, governmental inquiry and oversight, allegations by our customers that we have not performed our contractual obligations, costs to provide notifications to affected individuals, or litigation by affected parties and possible financial obligations for damages or indemnification obligations related to the theft or misuse of such information, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, laws, rules and regulations concerning the protection of personal information are subject to frequent change by legislation, regulatory issuances or administrative interpretation. As regulatory focus on privacy issues continues to increase and these laws and regulations continue to expand and become more complex, these potential risks to our business could intensify. Changes in laws or regulations associated with the enhanced protection of certain types of sensitive data, such as healthcare data or other personally identifiable information, along with increased customer demands for enhanced data security infrastructure, could greatly increase our cost of providing our solutions and services.

We are subject to extensive government regulation, including government audits and investigations relating to our compliance with the laws and regulations applicable to companies in our industry, and a negative finding or other adverse determination could have a material adverse effect on our reputation, business, financial condition, results of operations and cash flows.

Much of our business is regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect individual citizens, including government program beneficiaries, health plan members and providers, rather than shareholders, and the government agencies administering these laws and regulations have broad latitude to enforce them. As such, we are subject, on an ongoing basis, to various governmental reviews, audits and investigations to verify our compliance with our contracts and applicable laws and regulations, as well as legal actions and enforcement proceedings. For example, because we receive payments from federal and state governmental agencies, we are subject to various laws, including the Federal Acquisition Regulations, the Foreign Corrupt Practices Act, federal and state employment, equal opportunity and affirmative action laws, federal and state prompt pay statutes. We are also subject to Federal False Claims Act and similar state statutes, which permit government law enforcement agencies to institute suits against us for violations and, in some cases, to seek double or treble damages, penalties and assessments. In addition, private citizens, acting as whistleblowers, can sue on behalf of the government under the "*qui tam*" provisions of the Federal False Claims Act and similar statutory provisions in many states.

The expansion of our operations into new solutions and services may further expose us to requirements and potential liabilities under additional statutes and legislative schemes that have previously not been relevant to our business, such as banking and credit reporting statutes, that may both increase demands on our resources for compliance activities and subject us to potential penalties for noncompliance with statutory and regulatory standards. Increased involvement in analytic or audit work that can have an impact on the eligibility of individuals for medical coverage or specific benefits, or payments made by our customers to providers, could increase the likelihood and incidence of our being subjected to scrutiny or legal actions by parties other than our customers, based on alleged mistakes or deficiencies in our work, with significant resulting costs and strain on our resources.

These laws and regulations, along with the terms of our government contracts, regulate how we do business, what solutions and services we offer and how we interact with our customers, providers, other healthcare payers and the public. If the government discovers improper or illegal activities in the course of audits or investigations, we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions and debarment from doing business with the government. Similarly, if our customers assert that we have failed to properly perform or comply with our contractual obligations, or if the carriers to which we send billings assert that we have failed to properly comply with applicable federal or state billing rules and regulations, we may be required to provide refunds or make payments to resolve such issues. The risks to which we are subject, particularly under the Federal False Claims Act and similar state fraud statutes, have also increased in recent years due to legislative changes that have (among other amendments) expanded the definition of a false claim to include, potentially, any unreimbursed overpayment received from, or other monetary debt owed to, a government agency. This subjects us to potential liability for a false claim, for example, where we may be overcharged for services by a sub-contractor and may pass that charge on to a government customer, or where we may have a good faith disagreement with a government agency's view of whether an overpayment has occurred. If we are found to be in violation of any applicable law or regulation, or if we receive an adverse review, audit or investigation, any resulting negative publicity, penalties or sanctions could have an adverse effect on our reputation in the industry, impair our ability to compete for new contracts or bid in response to RFPs in one or more jurisdictions and have a material adverse effect on our business, financial condition, results of operations and cash flows.

Federal and state governments may limit or prohibit outsourcing of certain programs or functions, refuse to grant consents or waivers necessary to permit private entities to perform such work, or impose other limitations on outsourcing or certain vendors that may obstruct cost-effective performance of our contracts.

The federal government or a state could limit or prohibit private contractors like us from operating or performing elements of certain government functions or programs. State or local governments could be required to operate such programs with government employees as a condition of receiving federal funding. Moreover, under current law, in order to privatize certain functions of government programs, the federal government must grant a consent and/or waiver to the petitioning state or local agency. If the federal government does not grant a necessary consent or waiver, the state or local agency will be unable to outsource that function to a commercial entity. Such a situation could eliminate a contracting opportunity or reduce the value of an existing contract.

Similarly, other state or federal limitations on outsourcing certain types of work to vendors that supplement our own workforce could make it more difficult for us to fulfill our contracts in a cost-effective manner. Certain segments of our operations use or involve vendor or sub-contractor personnel located outside of the United States, who may (under carefully controlled circumstances) access certain PHI in the course of assisting us with various elements of the services we provide to our customers. There is, however, increasing pressure from an expanding number of sources to prohibit the use of off-shore labor, particularly on government contracts. The federal government and a number of states have considered laws or issued rules, regulations, and orders that would limit, restrict or wholly prohibit the use of off-shore labor in performance of government contracts, or impose sanctions for the use of such resources. Some of our customers have already chosen to contractually limit or restrict our ability to use off-shore resources. Intensified restrictions of this type or associated penalties could raise our costs of doing business, expose us to unexpected fines or penalties, increase the prices we must charge to customers to realize a profit and eliminate or significantly reduce the value of existing contracts or potential contract opportunities, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may be precluded from bidding on or performing certain work due to work we currently perform, which could materially adversely affect our business, financial condition, results of operations and cash flows.

Various laws, regulations and administrative policies prohibit companies from performing work for government agencies in capacities that might be viewed to create an actual or perceived conflict of interest. In particular, CMS has stringent conflict of interest rules, which can limit our bidding for specific work for CMS, or for other contracts that might conflict, or be perceived by CMS to conflict, with contractual work for CMS. State governments and managed care organizations also have conflict of interest restrictions that could limit our ability to bid for certain work and impede our overall sales strategy. As we continue to expand and diversify our business operations, the likelihood that customers or potential customers will perceive conflicts of interest between our various subsidiaries, solutions, services, activities and customer relationships may increase. Such conflicts, whether real or perceived, could result in a loss of contracts or additional internal structural barriers that delay operational efficiency, or may require that we divest ourselves of certain existing businesses or reorganize our current management and personnel structure, as well as our corporate organization and entity structure, in order to qualify for new contract awards or to appropriately mitigate conflicts and otherwise accommodate the needs as a company that is expanding in complexity. Our failure to devote sufficient care, attention and resources to managing these adjustments may result in technical or administrative errors that could expose us to potential liability or adverse regulatory action. In addition, conflict of interest rules and standards change frequently, and are subject to varying interpretations and varying degrees and consistency of enforcement at the federal, state and municipal levels, and we may not be successful in navigating these restrictions. If we are prevented from expanding our business or are unable to effectively implement our strategic initiatives due to real or perceived conflicts of interest, our business, financial condition, results of operations and cash flows could be materially adversely affected.

Risks Related to Our Common Stock

The market price of our common stock may be volatile, and fluctuations in the price of our common stock may materially adversely affect our business, financial condition, results of operations and cash flows and materially adversely affect our shareholders.

The market price of our common stock has fluctuated widely and may continue to do so. During the 52-week period ended May 31, 2017, the closing price of our common stock on the NASDAQ Global Select market ranged from a high of $23.46 per share, to a low of $16.18 per share. Our stock price is subject to fluctuation as a result of a variety of factors, including factors beyond our control including the risk factors described above and those which are related to:

- changes in estimates of our performance or recommendations by securities analysts and operating and stock price performance of other companies that investors deem comparable to our company;
- news reports relating to trends, concerns and other issues in the healthcare industry, including perceptions in the marketplace regarding us and our competitors;
- the financial projections we publicly provide and any changes in or failure to meet those projections;
- future sales of shares of common stock in the public market by our executive officers or directors;
- any other changes in the amount of our outstanding shares, including as a result of share repurchases;
- the public's response to our press releases, or other public announcements, including our filings with the SEC;
- securities class actions, shareholder lawsuits or other litigation; and
- market conditions in the industry and the economy as a whole.

In addition, the stock market often experiences significant price and volume fluctuations. These fluctuations are often unrelated to the operating performance of particular companies. These broad market fluctuations may materially adversely affect the market price of our common stock. When the market price of a company's stock drops significantly, shareholders may institute securities class action litigation against that company. Any litigation against us could cause us to incur substantial costs, divert the time and attention of our management and other resources or otherwise harm our business.

Because we do not intend to pay dividends, you will benefit from an investment in our common stock only if it appreciates in value.

We have paid no cash dividends on any of our capital stock to date and currently intend to retain our future earnings, if any, to fund the development and growth of our business. As a result, we do not expect to pay any cash dividends in the foreseeable future. The success of your investment in our common stock will likely depend entirely upon any future appreciation. There is no guarantee that our common stock will appreciate in value or even maintain the price at which you purchased your shares.

Certain provisions of our certificate of incorporation and bylaws could discourage unsolicited takeover attempts, which could depress the market price of our common stock.

Our certificate of incorporation authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by our Board of Directors. Accordingly, our Board of Directors is empowered, without shareholder approval, to issue preferred stock with dividend, liquidation, conversion, voting or other rights, that could adversely affect the voting power or other rights of holders of our common stock. In the event of issuance, preferred stock could be utilized, under certain circumstances, as a method of discouraging, delaying, or preventing a change in control. Although we have no present intention to issue any shares of preferred stock, it is possible that we will do so in the future. In addition, our bylaws provide for a classified Board of Directors, require advance notice of shareholder proposals for business to be conducted at meetings of our shareholders and for nominations of candidates for election to our Board of Directors and provide for Delaware as an exclusive forum for certain disputes with our shareholders, all of which could also have the effect of discouraging a change of control.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Location	Approximate Square Footage	Owned/Leased
Irving, TX	242,260	Owned
Las Vegas, NV	64,736	Leased
Westerville, OH	25,212	Leased
Irvine, CA	23,790	Leased
New York City, NY	22,500	Leased
Charlestown, MA	13,628	Leased
All Other Locations	77,914	Leased

As of December 31, 2016, we leased approximately 78,000 square feet of office space in 21 other locations throughout the United States, the leases for which have expiration dates starting late 2017 through 2024. See Note 12 - "Commitments and Contingencies" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding our lease commitments. In general, we believe our facilities are suitable to meet our current and reasonably anticipated future needs.

Item 3. Legal Proceedings

The information set forth under the caption "Litigation" in Note 12 of the Notes to the Consolidated Financial Statements included in Part II, Item 8. Consolidated Financial Statements and Supplementary Data is incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is included in the NASDAQ Global Select Market, under the symbol HMSY. The table below summarizes the high and low sales prices per share for our common stock for the periods indicated, as reported on the NASDAQ Global Select Market.

Quarter Ended	March 31,	June 30,	September 30,	December 31,
Fiscal Year 2016				
High	$ 14.42	$ 18.38	$ 23.46	$ 22.03
Low	$ 10.22	$ 13.67	$ 17.44	$ 16.18
Fiscal Year 2015				
High	$ 21.73	$ 18.18	$ 17.10	$ 13.05
Low	$ 15.32	$ 15.44	$ 8.24	$ 8.64

Repurchases of Shares of Common Stock

See Note 8 – Equity, in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding share repurchases. The following are our monthly stock repurchases for the fourth quarter of fiscal year 2016, all of which were made as part of publicly announced plans or programs:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program[1]	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
October 1, 2016 to October 31, 2016	—	$ —	—	$ —
November 1, 2016 to November 30, 2016	570,717	17.61	570,717	15,000,000
December 1, 2016 to December 31, 2016	569,615	18.25	569,615	5,000,000
October 1, 2016 to December 31, 2016	**1,140,332**	**$ 17.93**	**1,140,332**	**$ 5,000,000**

(1) On July 30, 2015, the Company's Board of Directors approved a share repurchase program authorizing the repurchase of up to $75 million of the Company's common stock from time to time on the open market or in privately negotiated transactions, and the Company publicly announced the program in August 2015. The repurchase program is authorized through July 30, 2017, and may be suspended or discontinued at any time. Repurchases may also be made under a Rule 10b5-1 plan. All repurchases for the periods presented were made under the program and using cash resources.

Holders

As of the close of business on May 31, 2017, there were 262 holders of record of our common stock.

Dividends

We have not paid any cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. Our current intention is to retain earnings to support the future growth of our business.

In addition, our Credit Agreement restricts our ability to make certain payments or distributions with respect to our capital stock, including cash dividends to our shareholders. These restrictions are described in more detail in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, under "Liquidity and Capital Resources" and in Note 7 – "Credit Agreement", in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data.

Comparative Stock Performance Graph

The graph below compares the cumulative total shareholder return on our common stock with the cumulative total shareholder returns of the NASDAQ Composite Index, the NASDAQ Computer & Data Processing Index and the NASDAQ Health Services Index assuming an investment of $100 on December 31, 2011 and the reinvestment of dividends through the year ended December 31, 2016.

	12/31/11	12/31/12	12/31/13	12/31/14	12/31/15	12/31/16
HMS Holdings Corp.	$ 100.00	$ 81.05	$ 70.98	$ 66.10	$ 38.59	$ 56.79
NASDAQ Composite	$ 100.00	$ 116.41	$ 165.47	$ 188.69	$ 200.32	$ 216.54
NASDAQ Computer & Data Processing	$ 100.00	$ 107.40	$ 164.63	$ 189.15	$ 223.06	$ 242.34
NASDAQ Health Services	$ 100.00	$ 115.47	$ 167.94	$ 204.39	$ 220.44	$ 188.28

Notwithstanding anything to the contrary set forth in any of our previous or future filings under the Securities Act or the Exchange Act that might incorporate by reference this Annual Report on Form 10-K or future filings made by us under those statutes, the Comparative Stock Performance Graph is not deemed filed with the SEC, is not deemed soliciting material and shall not be deemed incorporated by reference into any of those prior filings or into any future filings we make under those statutes, except to the extent that we specifically incorporate such information by reference into a previous or future filing, or specifically request that such information be treated as soliciting material, in each case under those statutes.

Item 6. Selected Financial Data

The following table sets forth selected consolidated financial amounts at and for each of the five fiscal years in the period ended December 31, 2016. It should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, included in Item 7 of this Annual Report on Form 10-K and the Consolidated Financial Statements and Supplementary Data thereto, included in Item 8 of this Annual Report.

Statement of Operations Data

	Years ended December 31,				
(in thousands, except per share amounts)	**2016**	**2015**	**2014**	**2013**	**2012**

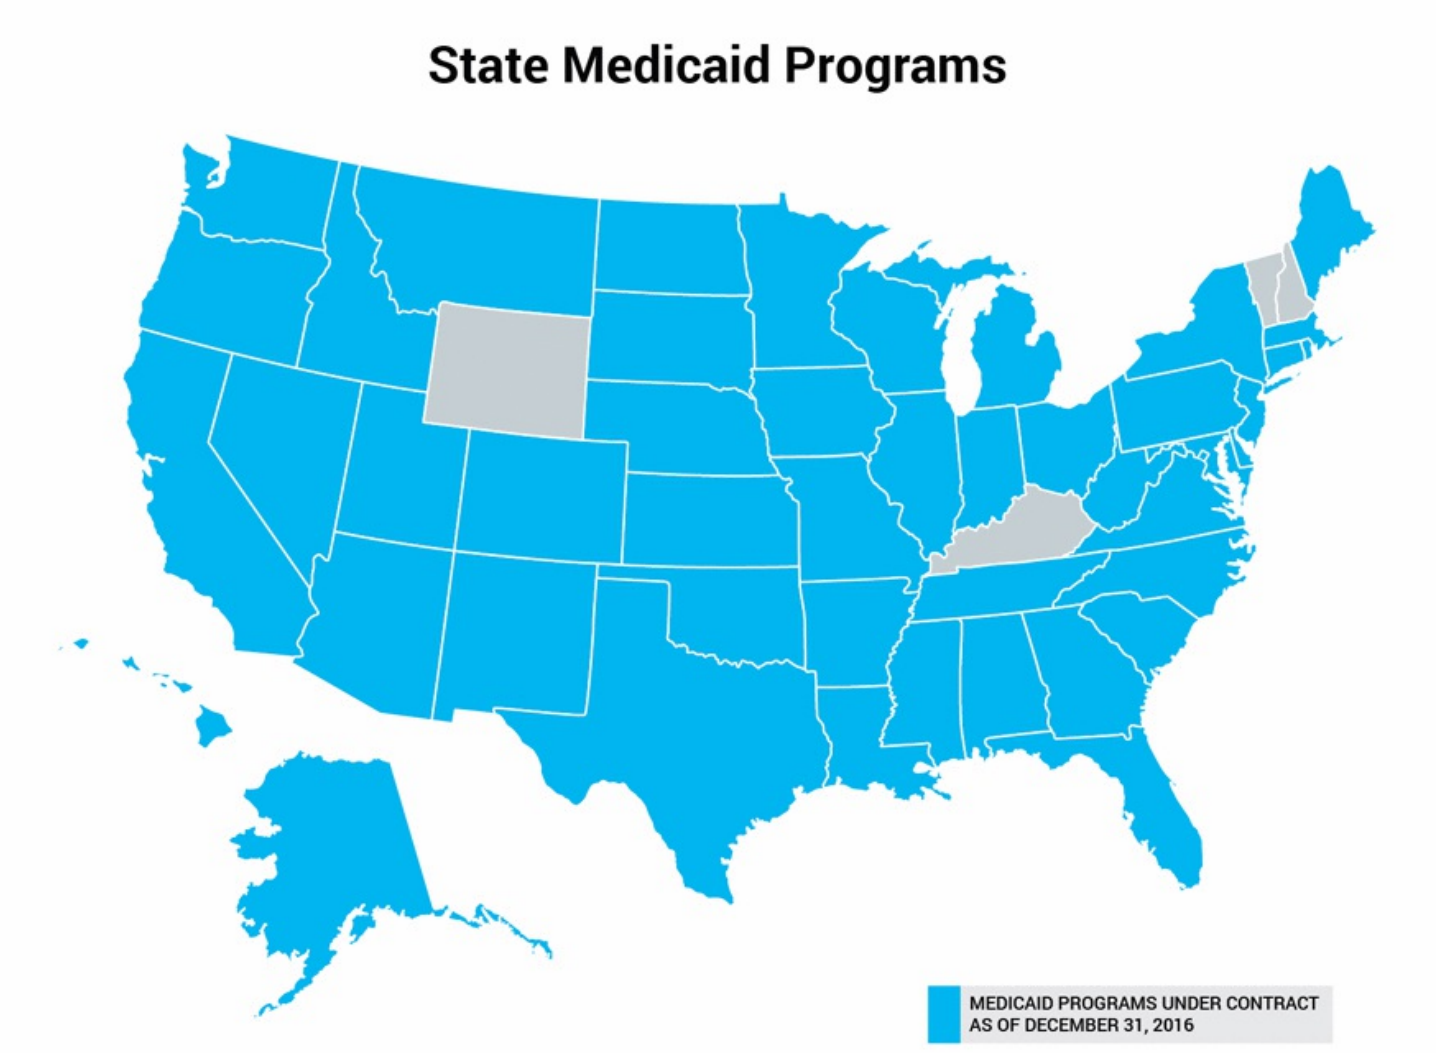
Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis is intended to help the reader understand the results of operations and financial condition of HMS Holdings Corp. You should read this discussion and analysis in conjunction with the other sections of this Annual Report on Form 10-K, including the Cautionary Note Regarding Forward-Looking statements appearing prior to Part I, the Risk Factors appearing in Part I, Item 1A, and the Consolidated Financial Statements and Supplemental Data thereto appearing in Part II, Item 8. The historical results set forth in Part II, Item 6, Item 7, and Item 8 of this Annual Report should not be taken as necessarily indicative of our future operations.

Business Overview

HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. Using innovative technology as well as extensive data services and powerful analytics, we deliver coordination of benefits, payment integrity and health management and engagement solutions through our operating subsidiaries to help healthcare payers improve performance and outcomes. We are managed and operate as one business segment with a single management team that reports to the Chief Executive Officer. We serve state Medicaid programs, commercial health plans, federal government health agencies, government and private employers, child support agencies, and other healthcare payers and sponsors. Together our various services help our customers recover improper payments; prevent future improper payments; reduce fraud, waste and abuse; better manage the care that members receive; and ensure regulatory compliance.



As of December 31, 2016:

- We serve 46 state Medicaid programs and the District of Columbia, CMS and the VHA;
- We provide services to approximately 255 health plans in support of their multiple lines of business, including Medicaid managed care, Medicare Advantage and group and individual health; and
- We also serve as a sub-contractor for certain business outsourcing and technology firms.

2016 Highlights

- Revenue increased $15.5 million, or 3.3% to $489.7 million
- Operating income increased $10.1 million, or 21.2% to $57.7 million
- Net income increased $13.1 million, or 53.5% to $37.6 million
- Diluted earnings per share increased $0.15 or 53.6% to $0.43 per share
- Shareholders' equity increased $31.9 million, or 6.1% to $556.6 million
- Cash flow from operations increased $16.7 million, or 23.1% to $89.0 million

Outlook

To date, we have grown our business organically through internal innovation and the development of new products and services, as well as by acquisition of businesses whose core services strengthen our overall mission to help our customers contain healthcare costs. Our largest growth during 2016 was with commercial health plan customers and we expect this marketplace to present the greatest opportunity for growth in the year ahead, particularly with the factors related to the macro healthcare environment including:

- Growth of Medicare enrollment, particularly Medicare Advantage plans;
- An aging U.S. population with a growing concentration of individuals with chronic conditions; and
- The continued dominance of employee sponsored health insurance for a majority of working individuals and the demand by large self-insured employers for cost savings.

We plan to drive our future growth by leveraging our expertise to expand product offerings, attracting new customers and broadening our relationships with current customers through the introduction of new services, audit strategies and claim types. Our goal is to develop and build on existing partnerships with our state, federal and commercial health plan customers to provide services that better address their business needs and promote customer satisfaction in the constantly evolving healthcare marketplace, particularly as potentially significant changes to the ACA are considered by Congress. We also expect to continue increasing recovery yields from our current products by enhancing our operating and organizational efficiency and by implementing new technology that will improve the quality and effectiveness of our service offerings.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, if different estimates reasonably could have been used, or if changes in the estimate that are reasonably possible could materially impact the financial statements. We believe that the assumptions and estimates associated with revenue recognition, estimated liability for appeals, income taxes, share-based compensation, loss contingencies, and goodwill and intangible assets have the greatest potential impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting policies and estimates. For further information on these critical accounting policies and all other significant accounting policies refer to Note 1 – "Business and Summary of Significant Accounting Policies" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data.

Results of Operations

Comparison of 2016 to 2015 and 2015 to 2014

	% of Revenue		
Years Ended December 31,	**2016**	**2015**	**2014**
Revenue	100%	100%	100%
Cost of Services:			
Compensation	38.6	37.6	40.9

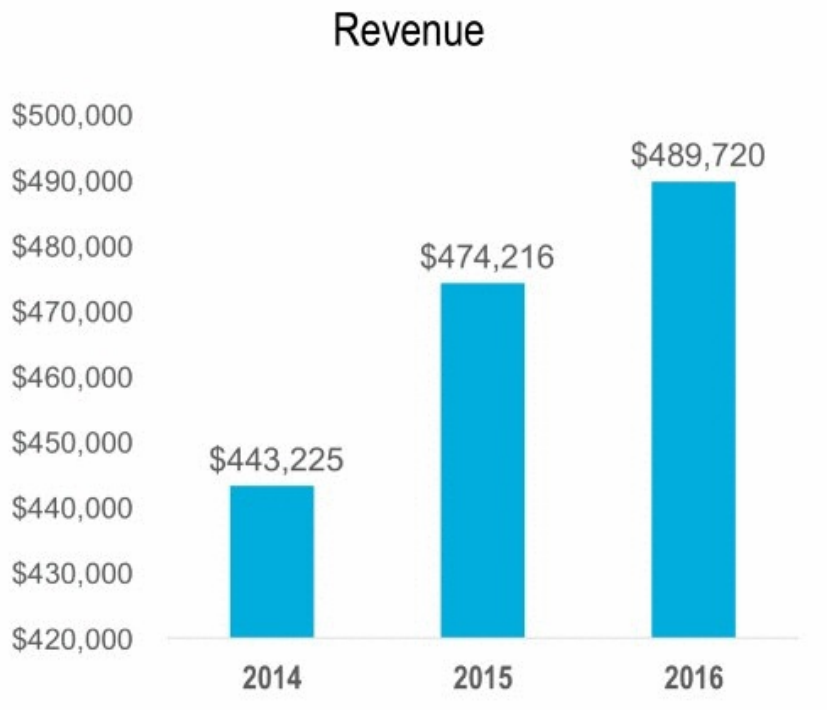
Income taxes	2.5	3.2	2.8
Net income	7.6%	5.2%	3.1%

(in thousands)

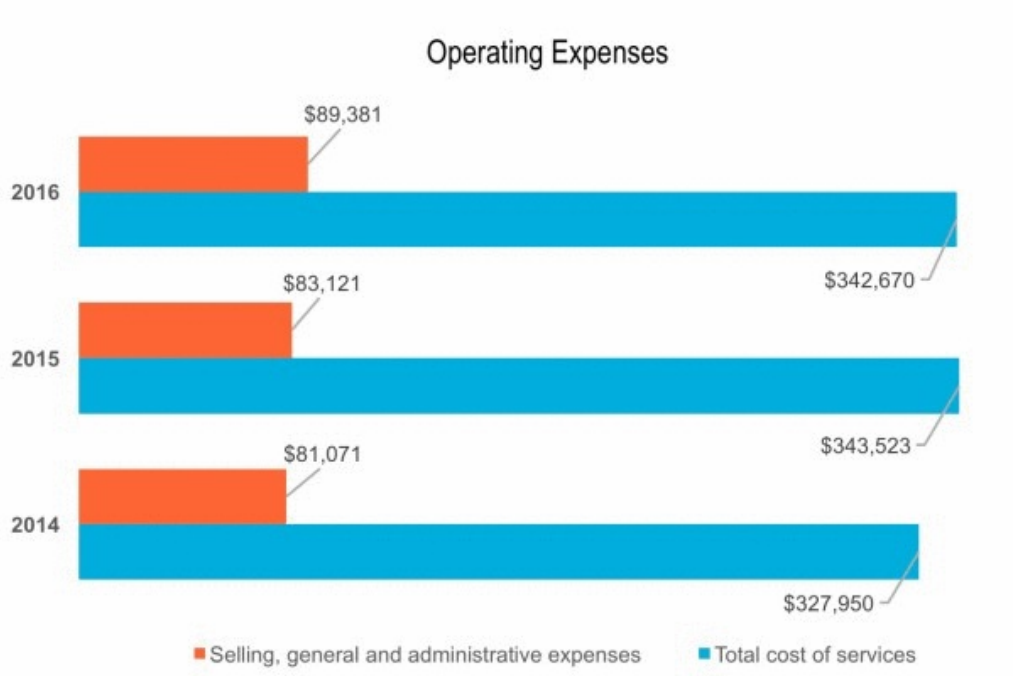


Revenue

2016 vs. 2015
During the year ended December 31, 2016, revenue was $489.7 million, an increase of $15.5 million or 3.3% compared to prior year revenue of $474.2 million. The increase was primarily due to commercial health plan revenue growth of $27.2 million or 13.4% partially offset by decreases in both state government revenue of $7.0 million or 3.1%, and federal government revenue of $4.5 million or 11.7%. The reduction in federal government revenue includes a $3.4 million decrease related to the reduction of Medicare RAC activity.

2015 vs. 2014
During the year ended December 31, 2015, revenue was $474.2 million, an increase of $31.0 million, or 7.0%, compared to prior year revenue of $443.2 million. This increase was primarily due to commercial health plan revenue growth of $32.2 million or 18.8% partially offset by a decrease in federal government revenue of $1.2 million or 3.1%, primarily related to the reduction of Medicare RAC activity.

(In thousands)



Total Cost of Services

Total cost of services consists of compensation, data processing, occupancy, direct project expenses, other operating expenses, and amortization of acquisition related software and intangible assets.

2016 vs. 2015
During the year ended December 31, 2016, total cost of services as a percentage of revenue was 70.0% compared to 72.4% for the year ended December 31, 2015. Total cost of services for the year ended December 31, 2016 was $342.7 million, a decrease of $0.8 million compared to $343.5 million for the year ended December 31, 2015. This change resulted primarily from decreases in direct project costs, data processing costs, occupancy costs and other operating expenses. These decreases were partially offset by increases in compensation expense.

2015 vs. 2014
During the year ended December 31, 2015, total cost of services as a percentage of revenue was 72.4% compared to 74.0% for the year ended December 31, 2014. Total cost of services for the year ended December 31, 2015 was $343.5 million, an increase of $15.5 million compared to $328.0 million for the year ended December 31, 2014. This change resulted primarily from increases in direct project costs and other operating expenses. These increases were partially offset by decreases in compensation expense.

Compensation

Compensation expense is primarily composed of salaries and wages, which include overtime, health benefits, stock option expense, performance awards, commissions, employers share of FICA and fringe benefits.

2016 vs. 2015
During the year ended December 31, 2016, compensation expense as a percentage of revenue was 38.7% compared to 37.6% for the year ended December 31, 2015. Compensation expense for the year ended December 31, 2016 was $189.3 million, an increase of $11.0 million compared to $178.3 million for the year ended December 31, 2015. This change resulted from a $13.1 million total increase in salaries, variable compensation expense, and fringe benefit expense, partially offset by a $2.1 million decrease in stock-based compensation expense. For the year ended December 31, 2016, we averaged 2,030 employees, a 1.1% increase from the year ended December 31, 2015, during which we averaged 2,007 employees.

2015 vs. 2014
During the year ended December 31, 2015, compensation expense as a percentage of revenue was 37.6% compared to 40.9% for the year ended December 31, 2014. Compensation expense for the year ended December 31, 2015 was $178.3 million, a decrease of $3.0 million compared to $181.3 million for the year ended December 31, 2014. This change resulted primarily from a $4.9 million decrease in salary, severance and overtime expense partially offset by a $1.9 million increase in variable compensation expense, stock compensation expense, and fringe benefit expense. For the year ended December 31, 2015, we averaged 2,007 employees, a 7.4% decrease from the year ended December 31, 2014, during which we averaged 2,167 employees.

Data Processing

2016 vs. 2015
During the year ended December 31, 2016, data processing expense as a percentage of revenue was 7.6% compared to 8.6% for the year ended December 31, 2015. Data processing expense for the year ended December 31, 2016 was $37.3 million, a decrease of $3.6 million compared to $40.9 million for the year ended December 31, 2015. This change resulted primarily from a $4.0 million decrease in depreciation expense partially offset by an increase in software expenses.

2015 vs. 2014
During the year ended December 31, 2015, data processing expense as a percentage of revenue was 8.6% compared to 8.9% for the year ended December 31, 2014. Data processing expense for the year ended December 31, 2015 was $40.9 million, an increase of $1.2 million compared to $39.7 million for the year ended December 31, 2014. This change resulted primarily from a $3.0 million total increase in software and data expenses, partially offset by a decrease in depreciation expense.

Occupancy

2016 vs. 2015
During the year ended December 31, 2016, occupancy expense as a percentage of revenue was 2.9% compared to 3.3% for the year ended December 31, 2015. Occupancy expense for the year ended December 31, 2016 was $14.0 million, a decrease of $1.8 million compared to $15.8 million for the year ended December 31, 2015. This decrease was primarily related to the closure of one of our office locations in 2016. Additional savings were realized due to reductions in utilities and equipment rental expense.

2015 vs. 2014

During the year ended December 31, 2015, occupancy expense as a percentage of revenue was 3.3% compared to 3.8% for the year ended December 31, 2014. Occupancy expense for the year ended December 31, 2015 was $15.8 million, a decrease of $1.2 million compared to $17.0 million for the year ended December 31, 2014. This decrease was primarily related to downsizing office space and relocation of our offices in Omaha, Nebraska and Albany, New York. Additional savings were realized after closing several of our smaller field offices in 2014 and 2015.

Direct Project Expenses

2016 vs. 2015

During the year ended December 31, 2016, direct project expense as a percentage of revenue was 9.4% compared to 10.9% for the year ended December 31, 2015. Direct project expense for the year ended December 31, 2016 was $46.3 million, a decrease of $5.2 million compared to $51.5 million for the year ended December 31, 2015. The reduction of Medicare RAC activity resulted in a $3.5 million decrease in sub-contractor fees from the prior year.

2015 vs. 2014

During the year ended December 31, 2015, direct project expense as a percentage of revenue was 10.9% compared to 8.3% for the year ended December 31, 2014. Direct project expense for the year ended December 31, 2015 was $51.5 million, an increase of $14.6 million compared to $36.9 million for the year ended December 31, 2014. This increase was partially due to a $9.6 million increase related to the transition of operational processes to sub-contractors. Additionally, data costs increased by $2.9 million in connection with an increase in the volume of patient charts we reviewed for our commercial health plan customers. The volume increase also resulted in a $1.4 million increase in key punch and data conversion due to the increase in reformatting electronic and hard copy remittance data.

Other Operating Expenses

2016 vs. 2015

During the year ended December 31, 2016, other operating expenses as a percentage of revenue were 5.7% compared to 6.1% for the year ended December 31, 2015. Other operating expenses for the year ended December 31, 2016 were $27.8 million, a decrease of $1.1 million compared to $28.9 million for the year ended December 31, 2015. This decrease primarily resulted from a $2.3 million decrease in temporary staffing and sub-contractor fees, partially offset by a $0.9 million increase in consulting fees.

2015 vs. 2014

During the year ended December 31, 2015, other operating expenses as a percentage of revenue were 6.1% compared to 5.6% for the year ended December 31, 2014. Other operating expenses for the year ended December 31, 2015 were $28.9 million, an increase of $4.3 million compared to $24.6 million for the year ended December 31, 2014. This increase primarily resulted from a $3.6 million increase in temporary staffing and consulting expense.

Amortization of Acquisition Related Software and Intangible Assets

2016 vs. 2015

During the year ended December 31, 2016, amortization of acquisition related software and intangibles as a percentage of revenue was 5.7% compared to 5.9% for the year December 31, 2015. Amortization of acquisition related software and intangible assets for 2016 was $28.0 million, a decrease of $0.1 million compared to $28.1 million for the year ended December 31, 2015. This decrease resulted from intangibles becoming fully amortized in 2016, partially offset by additional expense related to the Essette acquisition.

2015 vs. 2014
During the year ended December 31, 2015, amortization of acquisition related software and intangibles as a percentage of revenue was 5.9% compared to 6.5% for the year December 31, 2014. Amortization of acquisition related software and intangible assets for 2015 was $28.1 million, a decrease of $0.5 million compared to $28.6 million for the year ended December 31, 2014. This decrease resulted from the completion of amortization in 2014 on restrictive covenants for our Verify Solutions, Inc. and MedRecovery Management, LLC acquisitions.

Selling, General and Administrative expenses

2016 vs. 2015
During the year ended December 31, 2016, SG&A expense as a percentage of revenue was 18.3% compared to 17.6% for the year December 31, 2015. SG&A expense for 2016 was $89.4 million, an increase of $6.3 million compared to $83.1 million for the year ended December 31, 2015. Increases totaling $14.1 million were comprised of consulting expense of $4.0 million, fringe benefits expense of $1.6 million, compensation costs of $6.1 million, and other expenses $2.4 million. These increases were partially offset by a $7.8 million reduction in legal fees and settlements. During the year ended December 31, 2016, we averaged 236 employees in the SG&A group, an 8.3% increase over our average of 218 employees in that group during the year ended December 31, 2015.

2015 vs. 2014
During the year ended December 31, 2015, SG&A expense as a percentage of revenue was 17.6% compared to 18.3% for the year December 31, 2014. SG&A expense for 2015 was $83.1 million, an increase of $2.0 million compared to $81.1 million for the year ended December 31, 2014. This increase was primarily due to a $2.8 million increase in salary expense which was partially offset by a $0.9 million decrease in software-related costs. During the year ended December 31, 2015, we averaged 218 employees in the SG&A group, a 1.4% decrease over our average of 221 employees in that group during the year ended December 31, 2014.

Operating Income

2016 vs. 2015
Operating income for the year ended December 31, 2016 was $57.7 million, or 11.8% of revenue, compared to $47.6 million or 10.0% of revenue, for the prior year.

2015 vs. 2014
Operating income for the year ended December 31, 2015 was $47.6 million, or 10.0% of revenue, compared to $34.2 million, or 7.7% of revenue, for the prior year.

Interest Expense

Interest expense represents interest on borrowings under our revolving credit facility, amortization of deferred financing costs, commitment fees for our revolving credit facility and issuance fees for our letter of credit.

2016 vs. 2015
During the year ended December 31, 2016, interest expense was $8.5 million, an increase of $0.7 million compared to the prior year. This increase resulted from an increase on the variable interest rate on our outstanding debt. Amortization of deferred financing costs of $2.1 million in both periods is included within interest expense.

2015 vs. 2014
During the year ended December 31, 2015, interest expense was $7.8 million, a decrease of $0.1 million compared to the prior year. The decrease primarily relates to a reduction in interest on capital leases. Amortization of deferred financing costs of $2.1 million in both periods is included within interest expense.

Income Taxes

2016 vs. 2015
During the year ended December 31, 2016, we recorded income tax expense of $11.8 million, a decrease of $3.5 million compared to the prior year. Net income before taxes of $49.5 million increased $9.7 million year-over-year, while income tax expense decreased $3.5 million. Our effective tax rate decreased from 38.4% to 23.9%, which reflects a $6.2 million tax benefit recognized in the third quarter of 2016 that was related to R&D Credits and Section 199 Deductions. Excluding that tax benefit would result in a normalized effective tax rate of 36.2%. The principal differences between the statutory rate and our effective rate were the R&D Credits, the Section 199 Deduction, other permanent items, unrecognized tax benefits and state taxes.

2015 vs. 2014
During the year ended December 31, 2015, we recorded income tax expense of $15.3 million, an increase of $2.9 million compared to the prior year. Net income before taxes of $39.8 million increased $13.5 million year-over-year. Our effective tax rate decreased from 47.0% to 38.4% primarily due to a change in unitary state apportionments and permanent differences. The principal differences between the statutory rate and our effective rate were state taxes and permanent differences.

Net Income

2016 vs. 2015
During the year ended December 31, 2016, net income was $37.6 million which represents a $13.1 million increase compared to net income of $24.5 million for 2015.

2015 vs. 2014
During the year ended December 31, 2015, net income was $24.5 million which represents a $10.6 million increase compared to net income of $13.9 million for 2014.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Liquidity and Capital Resources

The following tables should be read in conjunction with the Consolidated Financial Statements and Supplementary Data thereto, included in Item 8 of this Annual Report on Form 10-K.

Our cash and cash equivalents, working capital and available borrowings under our credit facility (based upon the borrowing base and financial covenants in our Credit Agreement) were as follows:

	Years Ended December 31,	
(In thousands)	**2016**	**2015**
Cash and cash equivalents	$ 175,999	$ 145,610
Working capital	$ 277,478	$ 240,456
Available borrowings under credit facility	$ 183,913	$ 121,204

A summary of our cash flows is as follows:

(In thousands)	Years Ended December 31, 2016	2015	2014
Net cash provided by operating activities	$ 88,639	$ 72,285	$ 100,556
Net cash used in investing activities	(39,201)	(11,817)	(26,201)
Net cash used in financing activities	(19,049)	(47,974)	(34,605)
Net increase in cash and cash equivalents	$ 30,389	$ 12,494	$ 39,750

Our principal source of cash has been our cash flow from operations and our $500 million five-year revolving credit facility. Other sources of cash include proceeds from exercise of stock options and tax benefits associated with stock option exercises. The primary uses of cash are compensation expenses, data processing, direct project costs and SG&A expenses and acquisitions.

We believe that expected cash flows from operations, available cash and cash equivalents, and funds available under our revolving credit facility will be sufficient to meet our liquidity requirements for the following year, which include:

- the working capital requirements of our operations;
- investments in our business;
- business development activities;
- repurchases of common stock; and
- repayment of our revolving credit facility.

Any projections of future earnings and cash flows are subject to substantial uncertainty. We may need to access debt and equity markets in the future if unforeseen costs or opportunities arise, to fund acquisitions or to repay indebtedness under the Credit Agreement, which matures in May 2018. If we need to obtain new debt or equity financing in the future, the terms and availability of such financing may be impacted by economic and financial market conditions as well as our financial condition and results of operations at the time we seek additional financing.

Cash Flows from Operating Activities

Net cash provided by operating activities for the year ended December 31, 2016 was $89.0 million, a $16.7 million increase from net cash provided by operating activities of $72.3 million for the year ended December 31, 2015. The increase was primarily due to an increases in net income as adjusted for non-cash items including decreased stock-based compensation expense and deferred income taxes, as well as increase in accounts payable and other liabilities.

Net cash provided by operating activities for the year ended December 31, 2015 was $72.3 million, a $28.3 million decrease from net cash provided by operating activities of $100.6 million for the year ended December 31, 2014. This decrease was primarily due to an increase in accounts receivable and a decrease in our net deferred tax liabilities and accounts payable, partially offset by an increase in net income.

Net cash provided by operating activities for the year ended December 31, 2014 was $100.6 million, a $0.6 million decrease from net cash provided by operating activities of $101.2 million for the year ended December 31, 2013. This decrease was driven primarily by a decrease in net income and the net changes in the estimated allowance for unbilled receivables, accounts receivable, accounts payable, accrued expenses and other liabilities and the provision for the accounts receivable allowance.

Our DSO calculation can be derived by dividing total net accounts receivable at the end of period, by the daily average of the current quarter's annualized revenue. For the year ended December 31, 2016, revenue was $489.7 million, an increase of $15.5 million compared to revenue of $474.2 million for the year ended December 31, 2015. DSO increased by 6 days to 124 days as of December 31, 2016, as compared to 118 days as of December 31, 2015. The change was primarily due to delays in invoicing and receipt of payment for previously recognized revenue as a result of timing delays; offset by accelerated cash collections of invoiced balances; and a decrease in various operational issues including missing Explanation of Benefits which delay invoicing.

Higher accounts receivable balances and higher DSOs in future periods would reduce net cash from operating activities in those periods. We do not currently anticipate collection issues with our accounts receivable, however, nor do we currently expect that any extended collections will materially impact our liquidity.

The majority of our customer relationships have been in place for several years. Our future operating cash flows could be adversely affected by a decrease in a demand for our services, delayed payments from customers or if one or more contracts with our largest customers is terminated or not re-awarded.

Cash Flows from Investing Activities

Net cash used in investing activities for the year ended December 31, 2016 was $39.5 million, a $27.7 million increase compared to net cash used in investing activities of $11.8 million for the year ended December 31, 2015. This increase was primarily due to the use of approximately $20.7 million in the Essette acquisition during the third quarter of 2016. Purchases of property and equipment and investment in capital software also increased by $9.2 million. These increases were partially offset by the receipt of proceeds from the sale of a cost basis investment of approximately $2.5 million.

Net cash used in investing activities for the year ended December 31, 2015 was $11.8 million, a $14.4 million decrease compared to net cash used in investing activities of $26.2 million for the year ended December 31, 2014. The decrease was primarily related to a $14.1 million decrease in purchase of property and equipment and a $0.3 million decrease in investment in capitalized software.

Net cash used in investing activities for the year ended December 31, 2014 was $26.2 million, a $0.1 million decrease compared to net cash used in investing activities of $26.3 million for the year ended December 31, 2013. This decrease was primarily related to a $0.5 million decrease in investments in common stock and a $0.1 million decrease in investment in capitalized software, which were offset by a $0.5 million increase in purchases of property and equipment.

We currently expect to incur capital expenditures of $28 million during the year ended December 31, 2017.

Cash Flows from Financing Activities

Net cash used in financing activities for the year ended December 31, 2016 was $19.0 million, a $29.0 million decrease from net cash used in financing activities of $48.0 million for the year ended December 31, 2015. This decrease was primarily attributable to a decrease in share repurchases as compared to the prior year. Approximately $20.5 million was used for share repurchases of 1,140,332 of our shares of common stock at a weighted average price of $17.93 per share pursuant to an authorized share repurchase program as more fully described in Note 8 – “Equity” in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data.

Net cash used in financing activities for the year ended December 31, 2015 was $48.0 million, a $13.4 million increase from net cash used in financing activities of $34.6 million for the year ended December 31, 2014. This increase was primarily attributable to $50.0 million used in 2015 for share repurchases of 4,747,441 of our shares of common stock at a weighted average price of $10.51 per share pursuant to an authorized share repurchase program, partially offset by a $35.0 million reduction in payments toward the principal outstanding on our revolving credit facility and. No share repurchases were made during the year ended December 31, 2014.

Net cash used in financing activities for the year ended December 31, 2014 was $34.6 million, an $82.2 million decrease from net cash used in financing activities of $116.8 million for the year ended December 31, 2013. This decrease was primarily attributable to a $60.0 million reduction in payments toward the principal outstanding on our revolving credit facility and a $25.0 million reduction for share repurchases. No share repurchases were made for the year ended December 31, 2014.

Credit Agreement

In May 2013, we entered into the Credit Agreement with certain financial institutions and Citibank, N.A. as Administrative Agent. The Credit Agreement has a five-year term, provides for an initial $500 million revolving credit facility, and contains customary representations and warranties, affirmative and negative covenants, including financial covenants, and events of default. Our obligations and any amounts due under the Credit Agreement are guaranteed by our material 100% owned subsidiaries and secured by a security interest in all or substantially all of our and our subsidiaries' physical assets. See Note 7 – "Credit Agreement" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding our Credit Agreement.

As of December 31, 2016, the Company was in compliance with all the terms of the Credit Agreement.

Share Repurchase Program

During the year ended December 31, 2016, we repurchased 1.1 million shares of our common stock for approximately $20.5 million using cash resources. See Note 8 – "Equity" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding share repurchases.

Contractual Obligations

The following table represents the scheduled maturities of our contractual cash obligations and other commitments (*in thousands*):

	Payments Due by Period				
Contractual Obligations [7]	Total	Less than 1 year	1 - 3 years	3 -5 years	More than 5 years
Operating leases [1]	$ 38,568	$ 16,077	$ 10,598	$ 7,041	$ 4,852
Revolving credit facility [2]	197,796	-	197,796	-	-
Interest expense [3]	7,368	5,511	1,857	-	-
Commitment fee [4]	2,028	1,517	511	-	-
Capital leases [5]	4	4	-	-	-
Letter of Credit fee [6]	26	26	-	-	-
Total	$ 245,790	$ 23,135	$ 210,762	$ 7,041	$ 4,852

(1) Represents the future minimum lease payments under non-cancelable operating leases. In addition to minimum rent, certain leases require the payment for insurance, maintenance and other costs. These costs have historically represented approximately 3% to 6% of the minimum rent amount. These additional amounts are not included in the table of contractual obligations as the timing or amounts of such payments are unknown.

(2) Represents scheduled repayments of principal on the revolving credit facility under the terms of our Credit Agreement. See Note 7 - "Credit Agreement" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the Credit Agreement.

(3) Represents estimates of amounts due on revolving credit facility based on the interest rate as of December 31, 2016 and on scheduled repayments of principal. See Note 7 - "Credit Agreement" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the Credit Agreement.

(4) Represents the commitment fee due on the revolving credit facility. See Note 7 - "Credit Agreement" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the Credit Agreement.

(5) Represents the future minimum lease payments under capital leases.

(6) Represents the fees for the letter of credit established against the revolving credit facility. See Note 7 - "Credit Agreement" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the Credit Agreement.

(7) The Company has excluded long-term unrecognized tax benefits, including interest and penalties, of $7.4 million from the amounts presented as the timing of these obligations is uncertain.

As part of our contractual agreement with a customer, we have an outstanding irrevocable letter of credit for $3.0 million, which we established against our existing revolving credit facility. On May 1, 2017, the expiration date of the letter of credit was extended to April 26, 2018.

Recently Issued Accounting Pronouncements

The information set forth under the caption "Summary of Significant Accounting Policies" in Note 1 of the Notes to the Consolidated Financial Statements included in Part II, Item 8. Consolidated Financial Statements and Supplementary Data is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

At December 31, 2016, we were not a party to any derivative financial instruments. We conduct all of our business in U.S. currency and hence do not have direct foreign currency risk. We are exposed to changes in interest rates, primarily with respect to our revolving credit facility under our Credit Agreement. If the effective interest rate for all of our variable rate debt were to increase by 100 basis points (1%), our annual interest expense would increase by a maximum of $2.0 million based on our debt balances outstanding at December 31, 2016. Further, we currently invest substantially all of our excess cash in short-term investments, primarily money market accounts, where returns effectively reflect current interest rates. As a result, market interest rate changes may impact our interest income or expense. The impact will depend on variables such as the magnitude of rate changes and the level of borrowings or excess cash balances. We do not consider this risk to be material. We manage such risk by continuing to evaluate the best investment rates available for short-term, high quality investments.

Item 8. Consolidated Financial Statements and Supplementary Data

The information required by Item 8 is found on pages 101 to 123 of this Annual Report on Form 10-K

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We are responsible for maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure.

As required by Rule 13a-15(b) under the Exchange Act, management, with the participation of our Chief Executive Officer and Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2016. Based on our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of December 31, 2016 due to the identification of material weaknesses in our internal control over financial reporting as described in Management's Report on Internal Control Over Financial Reporting below.

(b) Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by Rule 13a-15(f) of the Exchange Act, internal control over financial reporting is a process designed by, or under the supervision of our Chief Executive Officer and our Chief Financial Officer and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with U.S. GAAP.

Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the consolidated financial statements in accordance with generally accepted accounting principles and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement in our annual or interim financial statements will not be prevented or detected on a timely basis.

In connection with the preparation of our annual consolidated financial statements, management has undertaken an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2016, based on criteria established in the Internal Control-Integrated Framework issued by COSO. Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of those controls.

Based on that assessment, management identified the following material weaknesses:

> We did not maintain an effective control environment based on lack of established reporting lines and defined authorities and responsibilities for financial reporting at our wholly owned subsidiary, HDI, and did not have an effective risk assessment process on a periodic basis to assess the effects of changes in business operations and turnover of our employees that significantly impact our financial processes and internal control over financial reporting related to (i) our estimated liability for appeals associated with our contract with CMS (the "CMS Reserve") and (ii) the valuation of our accounts receivable allowance (the "Allowance"). As a result, we did not design and implement effective process level control activities, specifically management review controls over the measurement and disclosure of the CMS Reserve and the Allowance and controls over the completeness and accuracy of data used to calculate the CMS Reserve and the Allowance.

The material weaknesses identified above resulted in an immaterial reclassification error in revenue and selling, general and administrative expenses that was corrected prior to the issuance of the consolidated financial statements. These material weaknesses create a reasonable possibility as of December 31, 2016 that a material misstatement to the consolidated financial statements will not be prevented or detected on a timely basis; therefore, we concluded that our internal control over financial reporting was not effective as of December 31, 2016.

KPMG LLP, the independent registered public accounting firm that audited our consolidated financial statements included in this Annual Report on Form 10-K, has issued an adverse opinion in their report on the effectiveness of our internal control over financial reporting, a copy of which appears on page 99.

(c) Changes in Internal Control Over Financial Reporting

Except as relating to the material weaknesses identified in the current period and described under "Management's Report on Internal Control Over Financial Reporting," there have been no changes in our internal control over financial reporting identified in connection with the evaluation of our controls performed during the quarter ended December 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(d) Remediation

Management is currently revising and supplementing our control environment and our risk assessment process and the design of our process level controls in order to remediate the material weaknesses described above, including a set of compensating controls in the near term. We are enhancing and revising the design of controls and procedures to ensure the calculations of the CMS Reserve and the Allowance properly utilize historical information to derive the period-end balances. Additionally, management will be supplementing the review controls over the CMS Reserve and the Allowance, and controls over the completeness and accuracy of the data used to calculate the balances with additional levels of review involving senior members of our accounting department and will assess the need for additional remediation steps. We believe that the steps identified should remediate the control weaknesses identified.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

BOARD OF DIRECTORS

The Board of Directors is currently composed of nine members, eight of whom are non-employee directors. Pursuant to our Bylaws, our Board of Directors is currently divided into two classes, Class I and Class II, with one class standing for election each year for a term of two years. The following table sets forth certain information with respect to each of our directors.

Name	Age	Has Served as a Director Since	Position with HMS
Class II Directors (Terms expire at the 2017 Annual Meeting)			
William F. Miller III	67	2000	Class II Director
Ellen A. Rudnick	66	1997	Class II Director
Richard H. Stowe	73	1989	Class II Director and Lead Independent Director
Cora M. Tellez	67	2012	Class II Director
Class I Directors (Terms expire at the 2018 Annual Meeting)			
Alex M. Azar II(1)	49	2016	Class I Director
Robert Becker(2)	63	2016	Class I Director
Craig R. Callen	61	2013	Class I Director
William C. Lucia	59	2009	Chairman, President and Chief Executive Officer, and Class I Director
Bart M. Schwartz	70	2010	Class I Director

(1) In October 2016, the Board of Directors increased the size of the board to nine members and appointed Mr. Azar as a Class I director.

(2) The Board of Directors appointed Mr. Becker as a Class I director in January 2016 to fill a vacancy on the Board.

Detailed biographical information of each director, as well as a description of the specific experience, qualifications, attributes and skills that led our Board to conclude that each director should serve as a member of our Board of Directors, is below.

CLASS II DIRECTORS (TERMS EXPIRE AT THE 2017 ANNUAL MEETING)

William F. Miller III

Mr. Miller has served as one of our directors since October 2000. In 2013, Mr. Miller joined KKR Advisors, a global investment firm, as a healthcare industry advisor. From 2006 to 2013, Mr. Miller was a partner at Highlander Partners, a private equity group in Dallas, Texas focused on investments in healthcare products, services and technology. From October 2000 to April 2005, Mr. Miller served as our Chief Executive Officer and from December 2000 to April 2006, Mr. Miller served as our Chairman. From 1983 to 1999, Mr. Miller served as President and Chief Operating Officer of EmCare Holdings, Inc., a national healthcare services firm focused on the provision of emergency physician medical services. From 1980 to 1983, Mr. Miller served as Administrator/Chief Operating Officer of Vail Mountain Medical. From 1997 to 2012, Mr. Miller served as a director of Lincare Holdings, Inc.

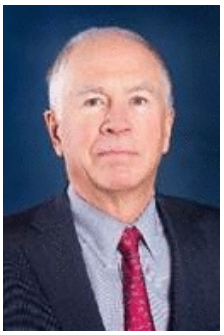
Mr. Miller brings to the Board of Directors both a thorough understanding of our business and the healthcare industry and extensive experience in the financial markets. His significant operational experience, both at HMS and at EmCare Holdings, makes him well-positioned to provide HMS with insight on financial, operational and strategic issues and to serve as a member of the Compliance and Ethics Committee.

Ellen A. Rudnick

Ms. Rudnick has served as one of our directors since 1997. Since 1999, Ms. Rudnick has served in various roles at the Polsky Center for Entrepreneurship and Innovation, University of Chicago Booth School of Business, including her current role as Senior Advisor for Entrepreneurship, adjunct faculty, and her prior role as Executive Director and Clinical Professor from 1999 through July 2016. From 1993 to 1999, Ms. Rudnick served as Chairman of Pacific Biometrics, Inc., a publicly held healthcare biodiagnostics company and its predecessor, Bioquant, which she co-founded. From 1990 to 1992, she served as President and Chief Executive Officer of Healthcare Knowledge Resources (HKR), a privately held healthcare information technology corporation and subsequently served as President of HCIA, Inc. (HCIA) following the acquisition of HKR by HCIA. From 1975 to 1990, Ms. Rudnick served in various positions at Baxter Health Care Corporation, including Corporate Vice President and President of its Management Services Division. Ms. Rudnick also serves as a director of Patterson Companies, Inc. and First Midwest Bancorp, Inc.

Ms. Rudnick brings to the Board of Directors extensive business understanding and demonstrated management expertise, having served in key leadership positions at a number of healthcare companies. Ms. Rudnick has a comprehensive understanding of the operational, financial and strategic challenges facing companies and knows how to make businesses work effectively and efficiently. Her management experience and service on other public company boards has provided her with a thorough understanding of the financial and other issues facing large companies, making her particularly valuable as the Chair of our Audit Committee and as a member of our Compliance and Ethics Committee and Nominating and Governance Committee.

Richard H. Stowe



Mr. Stowe has served as one of our directors since 1989 and as Lead Independent Director of the Board since July 2015. Mr. Stowe has served as a general partner of Health Enterprise Partners LP, a private equity firm, since 2005. From 1999 to 2005, Mr. Stowe was a private investor, a senior advisor to the predecessor funds to Health Enterprise Partners, and a senior advisor to Capital Counsel LLC, an asset management firm. From 1979 until 1998, Mr. Stowe was a general partner of Welsh, Carson, Anderson & Stowe. Prior to 1979, he was a Vice President in the venture capital and corporate finance groups of New Court Securities Corporation (now Rothschild, Inc.).

Mr. Stowe brings over 46 years of financial, capital markets and investment experience to our Board of Directors. Mr. Stowe's background and extensive experience make him well-positioned to serve as the Chair of the Compensation Committee, a member of the Nominating and Governance Committee and as our Lead Independent Director. Mr. Stowe has effectively carried out his responsibilities as a Chair for several of our Board committees and is well-respected by the independent directors. The Board believes that Mr. Stowe is highly qualified and continues to be in the best position to serve as Lead Independent Director.

Cora M. Tellez

Ms. Tellez has served as one of our directors since October 2012. Ms. Tellez is the President and Chief Executive Officer of Sterling HSA, an independent health savings accounts administrator which she founded in 2004. Prior to starting Sterling HSA, Ms. Tellez served as President of the health plans division of Health Net, Inc., an insurance provider. She later served as President of Prudential's western health care operations, CEO of Blue Shield of California, Bay Region and Regional Manager for Kaiser Permanente of Hawaii. Ms. Tellez also serves as Chief Executive Officer of Amazing CARE Network, Inc., a company she founded in January 2015. Ms. Tellez serves on the boards of directors of Pacific Premier Bancorp, Inc. and CorMedix Inc., as well as on the boards of various nonprofit organizations such as the Institute for Medical Quality and UC San Diego's Center for Integrative Medicine.

Ms. Tellez brings over 25 years of healthcare policy and operations experience to the Board. Her public company operational, financial and corporate governance experience is a valuable resource for our Board and makes her well-positioned to serve as the Chair of the Nominating and Governance Committee, a member of the Audit and Compensation Committees and as an audit committee financial expert.

CLASS I DIRECTORS (TERMS EXPIRE AT THE 2018 ANNUAL MEETING)

Alex M. Azar II

Mr. Azar has served as one of our directors since October 2016. Mr. Azar is currently Chairman of Seraphim Strategies, LLC, a firm he founded in 2017, which provides strategic consulting and counsel on the biopharmaceutical and health insurance industries, including biopharmaceutical pricing, reimbursement, access, and distribution, as well as federal and state healthcare policy. From January 2012 to January 2017, Mr. Azar served as President of Lilly USA, LLC, the largest affiliate of global biopharmaceutical company Eli Lilly & Co. (Lilly), where he was responsible for directing the sales and marketing operations of Lilly's U.S. commercial business and also directly led the U.S. Biomedicines division. From April 2009 to December 2011, he served as Lilly's Vice President of Managed Healthcare Services and Puerto Rico, and from June 2007 to April 2009 as its Senior Vice President of Corporate Affairs and Communications responsible for the company's global communications, government affairs, public policy, advocacy, and pricing, reimbursement and access organizations. Prior to joining Lilly, Mr. Azar served as the Deputy Secretary of the U.S. Department of Health and Human Services (HHS) from 2005 to 2007, where he was the Chief Operating Officer of the largest civilian cabinet department in the U.S. government. Mr. Azar supervised all operations of HHS, including the regulation of food and drugs, Medicare, Medicaid, medical research, public health, welfare, child and family services, disease prevention, Indian health, mental health services, and others. Mr. Azar served as General Counsel of HHS from 2001 to 2005. Prior to his service at HHS, Mr. Azar was in private legal practice. He also served as a Law Clerk to U.S. Supreme Court Justice Antonin Scalia. Mr. Azar serves on the boards of the American Council on Germany and the Indianapolis Symphony Orchestra.

Mr. Azar brings an important blend of government and healthcare industry experience to our Board of Directors. He has an informed perspective on healthcare policy and extensive experience with big data, which is particularly relevant to us as we expand into the care management and data analytics field.

Robert Becker

Mr. Becker has served as one of our directors since January 2016. Mr. Becker most recently served as President and CEO of Wolters Kluwer Health, a provider of information and point of care solutions to the healthcare industry, from December 2008 until his retirement in May 2015. In his role at Wolters Kluwer Health, Mr. Becker reported to the Chairman of the Executive Board and had global responsibility for Wolters Kluwer's $1.2 billion Health division. From August 2003 to November 2008, he served as CEO of Wolters Kluwer Law & Business. Mr. Becker led the transformation of both the Health and Law & Business divisions from traditional publishers to world class providers of digital content and software solutions through a combination of organic growth and mergers and acquisitions. Prior to joining Wolters Kluwer, Mr. Becker served as President and CEO of Jupiter Media Metrix, a provider of comprehensive research and measurement products and services designed to assist companies in utilizing Internet technologies to more effectively operate their businesses. Mr. Becker also spent 13 years with The Thomson Corporation, 10 years as a CEO and three as a CFO of several global businesses. Mr. Becker, who is a CPA, began his career at PriceWaterhouse auditing numerous public and privately held companies. Mr. Becker previously served on the board of directors of Symphony Health, a privately held portfolio company of Symphony Technology Group providing pharmacy claims and patient longitudinal health records to the pharmaceutical industry.

Mr. Becker's executive leadership experience and strong background in technology and data analytics provide valuable insight into strategic planning and operations to the Board. Among other qualifications, Mr. Becker brings to the Board extensive financial expertise, including budgeting, forecasting and mergers and acquisitions, making him well-positioned to serve as a member of the Audit Committee and an audit committee financial expert, as well as a member of the Nominating and Governance Committee.

Craig R. Callen

Mr. Callen has served as one of our directors since October 2013. Mr. Callen was a Senior Advisor at Crestview Partners, a private equity firm, from 2009 through 2016. From 2004 to 2007, Mr. Callen was Senior Vice President and Head of Strategic Planning and Business Development and a member of the Executive Committee for Aetna, Inc. In his role at Aetna, Mr. Callen reported directly to the Chairman and CEO and was responsible for oversight and development of Aetna's corporate strategy, including mergers and acquisitions. During his tenure, Mr. Callen and his team led the acquisitions of seven companies, investing over $2.0 billion, broadening Aetna's revenue, global presence, product line, targeted markets and participation in government programs. Prior to joining Aetna, Mr. Callen was a Managing Director and Head of U.S. Healthcare Investment Banking at Credit Suisse First Boston and Co-Head of Healthcare Investment Banking at Donaldson, Lufkin & Jenrette. Mr. Callen serves on the board of directors of Omega Healthcare Investors, Inc.

Mr. Callen brings over 20 years of healthcare investment banking experience and corporate development expertise to our Board, which are invaluable to us as we evaluate, develop and implement new solutions for clients. His extensive experience in a corporate setting and as an advisor to public/private healthcare companies positions him well to serve on the Compensation and Nominating and Governance Committees.

William C. Lucia

Mr. Lucia has served as our President and Chief Executive Officer since March 2009. He has been a member of our Board of Directors since May 2008 and was appointed Chairman of the Board in July 2015. From May 2005 to March 2009, Mr. Lucia served as our President and Chief Operating Officer. Since joining us in 1996, Mr. Lucia has held several positions with us, including: President of our subsidiary, Health Management Systems, Inc., from 2002 to 2009; President of our Payor Services Division from 2001 to 2002; Vice President and General Manager of our Payor Services Division from 2000 to 2001; Vice President of our Business Office Services from 1999 to 2000; Chief Operating Officer of our former subsidiary Quality Medical Adjudication, Incorporated (QMA) and Vice President of West Coast Operations from 1998 to 1999; Vice President and General Manager of QMA from 1997 to 1998; and Director of Information Systems for QMA from 1996 to 1997. Prior to joining us, Mr. Lucia served in various executive positions including Senior Vice President, Operations and Chief Information Officer for Celtic Life Insurance Company, and Senior Vice President, Insurance Operations for North American Company for Life and Health Insurance. Mr. Lucia is a Fellow of the Life Management Institute Program through LOMA, an international association through which insurance and financial services companies around the world engage in research and educational activities to improve company operations.

With over 20 years of experience with HMS working across multiple divisions and his prior experience in the insurance industry, Mr. Lucia brings to our Board in-depth knowledge of HMS and the healthcare and insurance industries, the evolving healthcare landscape and the array of challenges to be faced and demonstrates an ability to formulate and implement key strategic initiatives, making him well-positioned to lead our management team and provide essential insight and leadership to the Board.

Bart M. Schwartz

Mr. Schwartz has served as one of our directors since July 2010. Mr. Schwartz currently serves as the Chairman and Chief Executive Officer of SolutionPoint International, LLC, which provides an integrated array of business intelligence, security and compliance, identity assurance and situational awareness solutions. In 2003, Mr. Schwartz founded his own law firm, which specializes in, among other areas, conducting independent investigations, monitoring and Independent Private Sector Inspector General engagements and developing, auditing and implementing compliance programs. From 1991 to 2003, Mr. Schwartz served as the Chief Executive Officer of Decision Strategies, an internationally recognized investigative and security firm, which was sold to SPX Corporation in 2001. Mr. Schwartz has over 30 years' experience managing domestic and international investigations, prosecutions and assessments for clients in both the public and private sectors. He currently serves as the federally appointed Monitor of GM and as Chairman of the Board of Kadmon Holdings, Inc.

Mr. Schwartz brings extensive legal and compliance experience to our Board, which is particularly valuable as we continue to expand our business. Mr. Schwartz's background makes him well-positioned to serve as the Chair of the Compliance and Ethics Committee and as a member of the Audit and Nominating and Governance Committees.

EXECUTIVE OFFICERS

The following table sets forth certain information with respect to each person who currently serves as one of our executive officers as of the date of this Annual Report on Form 10-K. Our executive officers are elected annually by our Board of Directors and generally serve at the discretion of our Board of Directors. There are no arrangements or understandings between any of our executive officers and any other person pursuant to which they were selected as an officer. None of our directors or executive officers are related to any other director or executive officer of HMS or any of its subsidiaries by blood, marriage or adoption.

Name	Age	Position
William C. Lucia	59	Chairman, President and Chief Executive Officer
Meredith W. Bjorck	41	Executive Vice President, General Counsel and Corporate Secretary
Semone Neuman	53	Executive Vice President, Operations and Information Technology
Cynthia Nustad	46	Executive Vice President, Chief Strategy Officer
Jeffrey S. Sherman	51	Executive Vice President, Chief Financial Officer and Treasurer
Tracy A. South	58	Executive Vice President, Human Resources and Chief Administrative Officer
Douglas M. Williams	58	President, Markets and Product

The principal occupations for the last five years, as well as certain other biographical information, for each of our current executive officers who are not directors are set forth below. See “Class I Directors” above for biographical information for Mr. Lucia.

Meredith W. Bjorck

Ms. Bjorck has served as our Executive Vice President, General Counsel and Corporate Secretary since April 2016. Ms. Bjorck previously served as Senior Vice President, General Counsel and Corporate Secretary for Tuesday Morning Corporation, a national off-price retailer, from January 2013 to March 2016. From April 2008 until January 2013, Ms. Bjorck served in various capacities for CEC Entertainment, Inc., an international restaurant chain, including as Deputy General Counsel, Chief Compliance Officer and Corporate Secretary. Prior to joining CEC Entertainment, Ms. Bjorck was an attorney at Fulbright & Jaworski L.L.P. (now Norton Rose Fulbright) and Vinson & Elkins L.L.P., where she specialized in corporate securities and mergers and acquisitions.

Semone Neuman

Ms. Neuman has served as our Executive Vice President, Operations and Information Technology since December 2016, responsible for our operations for coordination of benefits, premium protection and subrogation services and information technology. From April 2013 to December 2016, she served as our Executive Vice President of Operations. Ms. Neuman has extensive experience in healthcare claims processing, operations and reengineering. She has a track record for leading change, driving quality performance and reducing unit costs in complex operating environments. Prior to joining HMS, Ms. Neuman served as Senior Vice President of Claim Operations at United HealthCare (UHC), from 2009 to 2013, where she oversaw the operations for all business lines and major platforms processing over 500 million claims annually. Under her leadership, UHC achieved industry-leading performance levels, earning the American Medical Association designation for the industry’s best claim operation in 2011 and 2012.

Cynthia Nustad

Ms. Nustad has served as our Executive Vice President, Chief Strategy Officer since December 2016, and is responsible for strategy development, evolution and growth of our technology and analytics software and services and care management solutions. From February 2011 to December 2016, she served as our Executive Vice President, Chief Information Officer. Prior to joining HMS, Ms. Nustad served as Vice President of Architecture and Technology for Regence Blue Cross Blue Shield (now Cambia Health Solutions), where she was responsible for servicing a large corporation across multiple sites and states from January 2005 to January 2011. Ms. Nustad has over 20 years of management experience in the healthcare information technology industry, including executive experience in enterprise technology, business transformation, product development and innovation. Ms. Nustad and her teams have earned numerous industry awards, including the Computerworld Premier 100 IT Leader award in 2013.

Jeffrey S. Sherman

Mr. Sherman has served as our Executive Vice President, Chief Financial Officer and Treasurer since September 2014, and is also responsible for corporate development, investor relations, risk management and corporate security. Mr. Sherman has over 25 years of experience in healthcare operations, strategic planning and financial performance in senior financial executive positions. Prior to joining HMS, Mr. Sherman served as Executive Vice President and Chief Financial Officer of AccentCare, a healthcare delivery organization, from September 2013 to August 2014. From April 2009 to September 2013, he served as Executive Vice President and Chief Financial Officer of Lifepoint Hospitals, Inc. From September 2005 until April 2009, Mr. Sherman served as Vice President and Treasurer of Tenet Healthcare, where he managed all aspects of corporate finance, including cash flow management and capital structure, and was also responsible for risk management. Mr. Sherman served in various capacities for Tenet Healthcare and its predecessor company since 1990, including as a hospital chief financial officer and regional vice president.

Tracy A. South

Ms. South has served as our Executive Vice President, Human Resources and Chief Administrative Officer since May 2014. She served as our Senior Vice President of Human Resources from December 2011 to May 2014. Ms. South has over 21 years of executive-level human resources experience, including at national healthcare organizations. From 2003 to 2011, Ms. South served as the Senior Vice President, Chief Human Resources Officer at Mosaic Sales Solutions, a privately-held full-service marketing agency in Irving, Texas. During her tenure at Mosaic, she built the company's North America Human Resources department, focusing on attracting and training a dispersed workforce of over 10,000 employees hired to represent world class brands at retail, in the community and online. In her role, Ms. South oversaw Talent Acquisition, HR Services and Organizational Effectiveness. Ms. South has also served in HR leadership roles at Tenet Healthcare and Aetna US Healthcare.

Douglas M. Williams

Mr. Williams has served as our President, Markets and Product since December 2016, with responsibility for leading sales and marketing, product management and payment integrity solutions. From January 2015 to December 2016, he served as our Division President of Markets with responsibility for leading the state and federal government and commercial markets, sales and marketing. From December 2013 to January 2015, he served as our Division President of Commercial Solutions, responsible for leading our commercial product and business development strategy. Prior to joining HMS, Mr. Williams served as Chief Information Officer of Aveta Inc. (now part of Optum, Inc.), a provider of managed healthcare services, from 2010 to 2013. Mr. Williams has over 25 years of experience in healthcare information technology, sales, and operations.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Pursuant to Section 16(a) of the Exchange Act our executive officers, directors and persons owning more than 10% of a registered class of our equity securities are required to file reports of ownership and changes in ownership of common stock with the SEC. Copies of such reports are required to be furnished to us.

Based solely on a review of the copies of such reports furnished to us, or written representations that no other reports were required, we believe that during fiscal 2016, all of the reporting persons complied with the requirements of Section 16(a).

CORPORATE GOVERNANCE

BOARD COMMITTEES AND RELATED MATTERS

The Board of Directors has the following standing committees: Audit Committee, Compensation Committee, Compliance and Ethics Committee and Nominating and Governance Committee, each of which operates pursuant to a separate charter that has been approved by the Board of Directors. A current copy of each charter is available on our website under the "Investors—Corporate Governance" tabs at http://investor.hms.com/corporate-governance.cfm. Each committee reviews the appropriateness of its charter on an annual basis, as required by its charter, and recommends any changes to the Board of Directors for approval.

The Board of Directors makes committee and committee chair assignments annually at its meeting following the annual meeting of shareholders, although further changes to committee assignments are made from time to time as deemed appropriate by the Board of Directors. The membership of each standing committee as of the date of this Annual Report on Form 10-K and the number of meetings held by each committee during 2016 are summarized in the table below.

Director	Board	Committee			
		Audit[2]	Compensation[3]	Compliance and Ethics	Nominating and Governance
Alex M. Azar II[1][4]	●				
Robert Becker[1][5]	●	●			●
Craig R. Callen[1]	●		●		●
William C. Lucia	Chairman				
William F. Miller III[1][6]	●			●	
Ellen A. Rudnick[1]	●	Chair		●	●
Bart M. Schwartz[1]	●	●		Chair	●
Richard H. Stowe[1]	Lead Independent Director		Chair		●
Cora M. Tellez[1][7]	●	●	●		Chair
Number of Meetings in 2016	**8**	**6**	**7**	**5**	**7**

(1) The Board has determined that the director is independent as defined in the NASDAQ Marketplace Rules.

(2) The Board has determined that each member of the Audit Committee meets NASDAQ's financial knowledge and sophistication requirements. In addition, the Board has determined that Mr. Becker and Ms. Tellez each qualify as an "audit committee financial expert," as such term is defined in Item 407(d)(5)(ii) of Regulation S-K.

(3) The Board has determined that each member of the Compensation Committee is an independent director, as independence for compensation committee members is defined in the NASDAQ Marketplace Rules. Each of Messrs. Callen and Stowe and Ms. Tellez also qualifies as an "outside director" within the meaning of Section 162(m) of the Internal Revenue Code of 1986 (the "Code") and as a "non-employee" director under Rule 16b-3 of the Exchange Act.

(4) Mr. Azar was appointed as an independent member of the Board of Directors in October 2016.

(5) Mr. Becker was appointed as a member of the Audit Committee and the Nominating and Governance Committee effective as of February 19, 2016.

(6) Mr. Miller was appointed as a member of the Compliance and Ethics Committee effective as of July 28, 2016.

(7) Ms. Tellez stepped down from the Compliance and Ethics Committee and was appointed as a member of the Compensation Committee effective as of July 28, 2016.

CODE OF CONDUCT

Our Board of Directors has adopted a Code of Conduct applicable to all of our directors, officers and employees, including all employees, officers, directors, contractors, contingent workers and business affiliates of HMS subsidiaries. The Code of Conduct is publicly available on our website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate-governance.cfm and can also be obtained free of charge by sending a written request to our Corporate Secretary. To the extent permissible under NASDAQ Marketplace Rules, we intend to disclose amendments to our Code of Conduct, as well as waivers of the provisions thereof, that relate to our principal executive officer, principal financial officer, principal accounting officer, controller or persons performing similar functions on the Company's website under the "Investors—Corporate Governance" tab at http://investor.hms.com/corporate-governance.cfm.

Item 11. Executive Compensation

EXECUTIVE COMPENSATION

COMPENSATION DISCUSSION AND ANALYSIS

This Compensation Discussion and Analysis ("CD&A"), describes our 2016 executive compensation program and certain actions with respect to our 2017 executive compensation program and should be read in conjunction with the compensation tables that follow this CD&A. In particular, this CD&A explains how the Compensation Committee of the Board of Directors made its compensation decisions for our named executive officers for fiscal 2016.

For 2016, our named executive officers are:

- William C. Lucia, Chairman, President and Chief Executive Officer ("CEO");
- Jeffrey S. Sherman, Executive Vice President, Chief Financial Officer and Treasurer;
- Semone Neuman, Executive Vice President, Operations and Information Technology;
- Cynthia Nustad, Executive Vice President, Chief Strategy Officer; and
- Douglas Williams, President, Markets and Product.

2016 Say-on-Pay Vote

At our 2016 Annual Meeting of Shareholders, over 97% of the votes cast on the say-on-pay proposal were in favor of our 2015 executive compensation program described in our 2016 Proxy Statement. The Compensation Committee believes that this vote, and the consistent high level of support from our shareholders of our executive compensation program year over year, affirms our shareholders' strong support of HMS's general approach to executive compensation. Therefore, the Compensation Committee did not change its compensation philosophy as it made decisions for 2016. As market practices on executive compensation policies evolve, the Compensation Committee will continue to evaluate and, if needed, make changes to our executive compensation program to ensure that the program continues to reflect our pay-for-performance compensation philosophy and objectives. The Compensation Committee will also continue to consider the outcome of HMS's say-on-pay votes when making future compensation decisions for executive officers.

Executive Summary

2016 FINANCIAL PERFORMANCE OVERVIEW

Our full year 2016 financial performance included solid growth in revenue, operating income and adjusted EPS, margin expansion, higher adjusted EBITDA, strong operating cash flow and prudent capital deployment – including the Essette acquisition and share repurchases.

The following is an overview of our financial performance for the year ended December 31, 2016.

- We reported total revenue of $489.7 million, a 3.3% increase compared to total revenue for fiscal 2015 of $474.2 million.
- We reported net income of $37.6 million or $0.43 per diluted share, a 53.6% increase compared to net income for fiscal 2015 of $24.5 million or $0.28 per diluted share.
- We reported adjusted earnings before interest, income taxes, depreciation and amortization, stock-based compensation and non-recurring legal expense ("adjusted EBITDA") of $117.4 million, a 4.4% increase compared to adjusted EBITDA for fiscal 2015 of $112.5 million.
- We reported adjusted earnings per diluted share ("adjusted EPS") of $0.75, a 31.6% increase compared to adjusted EPS for fiscal 2015 of $0.57.

- Our stock price increased by 47.2% for the one-year period ending December 30, 2016, from $12.34 per share to $18.16 per share.

A reconciliation of the non-GAAP financial measures (adjusted EBITDA and adjusted EPS) to the most directly comparable GAAP measures is set forth below under the heading "Non-GAAP Financial Measures".

KEY 2016 COMPENSATION ACTIONS

The following highlights key decisions and actions of the Compensation Committee with respect to executive compensation for 2016. These decisions and actions were made with the advice of the Compensation Committee's independent consultant, Frederic W. Cook & Co., Inc. ("FW Cook") (see "Role of the Independent Compensation Consultant" below), and are discussed in greater detail later in this CD&A.

- Executive Compensation Peer Group. In January 2016, the Compensation Committee approved certain changes to its executive compensation peer group, resulting in a new 14 company peer group.

- Merit-Based Salary Increases. In February 2016, the Compensation Committee approved merit-based salary increases for the named executive officers, other than the CEO.

- Annual Short-Term Incentive Plan Performance Metrics. In February 2016, the Compensation Committee introduced a fourth performance metric, adjusted EPS, under the 2016 Short-Term Incentive Plan (the "2016 STIP"), in addition to the metrics used under the prior year's short-term incentive plan of revenue, adjusted EBITDA, and corporate strategic performance.

- Performance-Based Long-Term Incentive Awards. In February 2016, in light of our strong shareholder support evidenced by the results of the say-on-pay vote at our 2015 Annual Meeting of Shareholders, the Compensation Committee continued to grant annual long-term incentive awards to our executive officers consisting, on a substantially equal value basis, of 50% non-qualified stock options and 50% restricted stock units, half of which are subject to stock price performance conditions.

- Earned and Unearned Performance Awards. The Compensation Committee determined that the performance conditions for the long-term incentive awards granted on March 4, 2015, May 13, 2015 and March 2, 2016 had been achieved during 2016 (within the 3-year award period), and therefore, the awards have been earned subject only to any remaining time-based vesting and other terms applicable to the awards. In addition, the Compensation Committee determined that the performance conditions for the long-term incentive awards granted on November 15, 2013 had not been achieved within the 3-year award period and therefore, the awards were forfeited during 2016.

KEY COMPENSATION PRACTICES AND GOVERNANCE FEATURES

Our executive compensation program reflects a number of best practices used by the Compensation Committee and the Board of Directors.

What We Do	What We Don't Do
Pay-for-Performance. Payment of a significant amount of our executives' total direct compensation is contingent upon satisfaction of certain pre-determined financial and non-financial objectives.	**No Repricing.** We have not reduced the exercise price, repriced or provided cash payment for underwater stock options.
Annual Say-on-Pay Votes. We have annual say-on-pay votes and recommend continued annual votes.	**No Hedging or Pledging.** We do not permit pledging of our securities as collateral for a loan or entering into hedging and derivative transactions with respect to our securities by employees or directors.
Independent Compensation Consultant. The Compensation Committee retains a compensation consultant that is independent from management to provide advice to the committee on executive and director compensation, as well as other compensation and benefits matters.	**No Evergreen Equity Plans.** Our equity plan does not permit evergreen share authorizations or liberal share recycling.
Limited Use of Executive Perquisites. We offer limited executive perquisites in order to attract and retain top executive talent and to maintain competitiveness.	**No Pensions or Supplemental Executive Retirement Plans.** We only provide retirement benefits to executives that are generally available to all other employees.
Stock Ownership Guidelines. Our CEO is required to hold five times his base salary in our common stock and all other executive officers are required to hold two times their base salary in our common stock, aligning the executive officer's interests with those of our shareholders and mitigating the risk of focusing only on short-term goals.	**No Change-in-Control-Related Excise Tax Gross-ups.** We do not include change-in-control excise tax gross-up provisions in employment agreements.
Compensation Recovery (Clawback Policy). We are permitted to recover from any of HMS's current or former executive officers any incentive bonus and equity compensation gains attributable to such executive officer's misconduct occurring after January 1, 2015, that causes a subsequent restatement of our financial statements.	**No Single Trigger Change-in-Control Compensation.** We provide double trigger change-in-control compensation.
Employment Agreements. Each of our executive officers has entered into an employment agreement and restrictive covenant agreement with HMS.	
CEO Compensation. All of our independent directors as a group approve the compensation of our CEO, taking into account the recommendation of the Compensation Committee.	

Philosophy, Objectives and Principles of Our Executive Compensation Program

Our mission is to make the healthcare system work better for everyone. In order to support that mission and Board-approved strategic objectives, while providing adequate returns to our shareholders, we must compete for, attract, develop, motivate and retain top quality executive talent at the corporate and operating business unit levels during periods of both favorable and unfavorable business conditions.

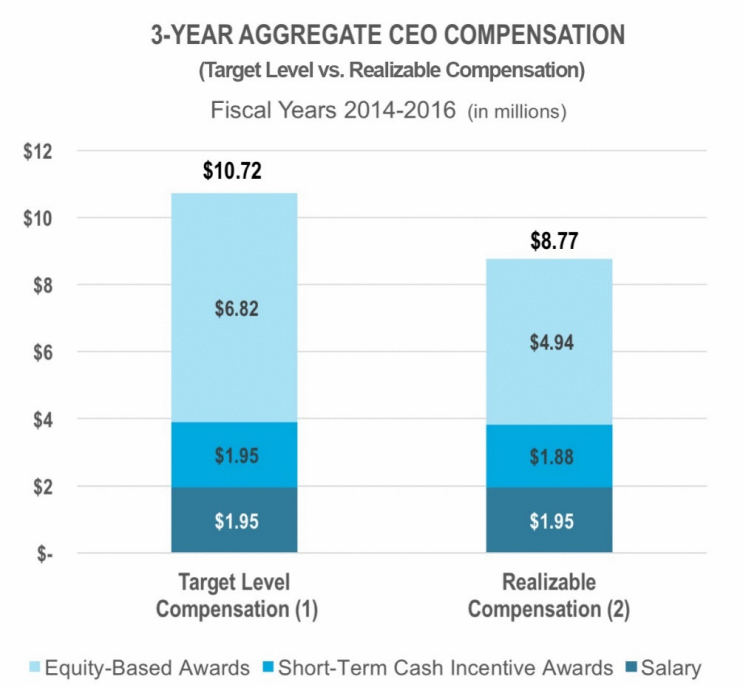
Our executive compensation program is a critical management tool in achieving these objectives. “Pay-for-performance” is the underlying philosophy for our executive compensation program. The program is designed and administered to:

- reward performance that drives the achievement of our short and long-term goals;
- align the interests of our senior executives with the interests of our shareholders, thus rewarding individual and team achievements that contribute to the attainment of our business goals;
- foster teamwork and encourage our senior executives to work together with key personnel in the interest of company performance;
- attract, develop, motivate and retain high-performing senior executives by providing a balance of total compensation opportunities, including salary and short and long-term incentives that are competitive with similarly situated companies and reflective of our performance;
- maximize the financial efficiency of the overall compensation program from tax, accounting and cash flow perspectives; and
- motivate our senior executives to pursue objectives that create long-term shareholder value and discourage behavior that could lead to excessive risk, by balancing our fixed and at-risk pay (both short and long-term incentives) and choosing multiple financial metrics for our short and long-term incentives.

PAY-FOR-PERFORMANCE

We design our compensation programs to make a meaningful amount of target total direct compensation (salary, plus target annual incentive compensation, plus target annual long-term incentive compensation) dependent on the achievement of performance objectives.

To illustrate this, in the chart that follows, we compare the aggregate target total direct compensation for our CEO for the last three fiscal years to the aggregate compensation for the last three fiscal years that had been earned or that may be considered realizable (based on the methodology described below) as of December 31, 2016. The chart illustrates that our annual and long-term incentive programs over the past three fiscal years have been designed to make a meaningful amount of our CEO’s target total direct compensation dependent on the achievement of performance objectives and have resulted in actual compensation significantly less than the target amount.



(1) "Target Level Compensation" equals the sum of (i) annual base salary paid in each of the last three fiscal years, (ii) the target value of short-term cash incentive awards for each of the last three fiscal years and (iii) stock awards and option awards granted in each of the last three fiscal years valued at the grant date fair value, the same value at which such awards are required to be reflected in the Summary Compensation Table included in this Annual Report on Form 10-K, under applicable SEC regulations. Target Level Compensation does not include amounts under All Other Compensation in the Summary Compensation Table.

(2) "Realizable Compensation" equals the sum of (i) annual base salary paid in each of the last three fiscal years, (ii) actual short-term cash incentive awards earned in each of the last three fiscal years, (iii) the value as of their vesting date of any portion of stock awards granted in each of the last three fiscal years that vested prior to December 31, 2016, (iv) an assumed realizable value for any portion of stock awards granted in each of the last three fiscal years that remained unvested on December 31, 2016, based on the closing market price per share of our common stock on December 30, 2016, the last trading day in 2016, of $18.16 per share and (v) the intrinsic value of option awards granted during fiscal 2015 and 2016 based on the difference between the option exercise prices of $16.77 per share and $13.94 per share, respectively, and the closing market price per share of our common stock on December 30, 2016 of $18.16 per share. For purposes of this table, the intrinsic value of the option award granted during 2014 is zero because the award has an exercise price per share that is greater than the closing market price per share of our common stock on December 30, 2016. For purposes of this table, all performance-based stock awards and option awards are considered earned and all option awards (whether time-based or performance-based) are considered fully vested. The value that may be realized by our CEO on such stock awards and option awards in the future, if any, will depend on the extent to which the performance-based stock awards and option awards are earned and vest, the extent to which time-based stock awards and option awards vest, the market price of our common stock on the vesting date for stock awards and the extent to which there is appreciation in the market price of our common stock over the respective exercise price per share of stock options at the time such options are exercised.

How We Determine Executive Compensation

ROLE OF MANAGEMENT

Our CEO, together with our Chief Financial Officer and Executive Vice President of Human Resources, develop recommendations regarding the design of our executive compensation program. In addition, they are involved in setting the financial and strategic objectives that, subject to the approval of the Board and the Compensation Committee, are used as the performance measures for the short and long-term incentive plans. Both the CEO and the Chief Financial Officer provide the Compensation Committee with information relevant to determining the achievement of financial and non-financial performance objectives and related funding levels under our short-term cash incentive plan. Also, as part of its review process in determining executive compensation, the Compensation Committee receives from our CEO an assessment of each other executive officer's performance against individual objectives and compensation recommendations for such officer, including base salary and short and long-term incentives.

ROLE OF THE COMPENSATION COMMITTEE

Our executive compensation program is administered by the Compensation Committee, which is composed entirely of independent directors. The Compensation Committee is responsible for designing our executive compensation program, including each element of the program, and determining and approving total executive remuneration. Each year, the Compensation Committee reviews a competitive analysis and assessment of the compensation provided to executive officers and approves executive compensation based on this review, as well as an evaluation of recommendations presented by our CEO with respect to the other executive officers and the advice of FW Cook. Our CEO does not participate in the Compensation Committee's deliberations or decisions with regard to his own compensation, and the Compensation Committee's decisions with respect to our CEO's compensation are reviewed and approved by the independent members of the Board of Directors as a group.

ROLE OF THE INDEPENDENT COMPENSATION CONSULTANT

The Compensation Committee is authorized to engage its own independent advisors to assist in carrying out its responsibilities. The Compensation Committee has retained FW Cook as its independent compensation consultant. Representatives of FW Cook regularly attend Compensation Committee meetings and communicate with the Chair of the Compensation Committee outside of meetings. FW Cook reports directly to the Compensation Committee and the Compensation Committee oversees the fees paid for its services. FW Cook provides the Compensation Committee with independent and objective guidance on a variety of matters related to our executive and director compensation programs and general compensation and benefits matters. In addition, FW Cook provides objective guidance regarding management's executive compensation recommendations, with the instruction that FW Cook is to advise the Compensation Committee independent of management and to provide such advice for the benefit of HMS and its shareholders. FW Cook does not provide any consulting services to HMS beyond its role as a consultant to the Compensation Committee. The Compensation Committee conducts an assessment of the independence of its compensation consultant annually, pursuant to SEC rules and, following its most recent assessment in April 2017, concluded that no conflict of interest exists that would prevent FW Cook from serving as an independent consultant to the Compensation Committee.

During fiscal 2016, FW Cook provided the following services to the Compensation Committee:

- assisted in the design and development of all elements of the 2016 executive and director compensation program;
- consulted on the composition of the peer group and provided competitive benchmarking and market data analysis based on the peer group;
- evaluated management's compensation recommendations and proposals;
- consulted on the design of the 2016 Omnibus Incentive Plan and amendments to the Annual Incentive Compensation Plan in light of best practices, industry trends and voting policies of proxy advisory firms;
- reviewed and provided advice on the design of the 2016 Short-Term Incentive Plan;
- reviewed agendas for the Compensation Committee meetings held in 2016;

- reviewed HMS's 2016 compensation risk assessment;
- consulted on compliance with Section 162(m) of the Code;
- provided updates regarding evolving regulatory requirements, emerging trends and best practices in executive compensation; and
- reviewed and provided advice on HMS's executive compensation-related disclosures in the 2016 Proxy Statement and reviewed the compensation-related disclosures and proposals in the 2017 Proxy Statement.

Competitive Pay Positioning and Peer Group Analyses

The Compensation Committee believes that competitive pay positioning is a key factor in helping to achieve our executive compensation program objectives. As part of our annual pay-setting process, the Compensation Committee uses benchmarking data to evaluate each executive officer's target compensation levels compared to similarly situated executives at peer group companies.

The Compensation Committee does not target the level of total direct compensation (or any specific element of compensation) for our executive officers to a specific percentile of our peer group. Instead, the Compensation Committee exercises its discretion in setting target compensation levels annually based on a variety of factors to achieve our compensation objectives:

- each executive's competitive pay positioning relative to similarly situated executives among our peer companies,
- each executive's scope of responsibilities, individual performance and expected contributions going forward,
- tenure,
- relative internal pay levels,
- recommendations by the CEO for the other executive officers, and
- prior year target and actual compensation levels.

Our peer group companies are selected by the Compensation Committee based on their similarity to us in size, financial profile and scope of operations, as well as potential to compete for executive talent. The Compensation Committee's general practice is to select companies that position HMS at approximately the peer group median across these metrics. The Compensation Committee reviews the peer group annually with guidance from FW Cook and may make modifications from time to time to ensure that it continues to provide an appropriate benchmark for competitive pay analyses.

In January 2016, the Compensation Committee, with guidance from FW Cook, reviewed and modified the peer group used to benchmark executive compensation for 2016. The peer group established by the Compensation Committee for 2016 consists of the 14 companies listed below, grouped by sub-industry (the "2016 Peer Group").

2016 Peer Group Companies		
Heath Care Technology	**Application Software**	**Data Processing and Outsourced Services**
Allscripts Healthcare Solutions, Inc.	Blackbaud, Inc.	ExlService Holdings, Inc.
athenahealth, Inc.	Bottomline Technologies (de), Inc.	MAXIMUS, Inc.
Computer Programs & Systems, Inc.	RealPage, Inc.	WEX Inc.
HealthStream, Inc.	Tyler Technologies, Inc.	
Medidata Solutions, Inc.		
Omnicell, Inc.		
Quality Systems, Inc.		

The Compensation Committee made the changes listed below to the peer group at the time of its review.

Peers Added		Peers Removed	
Company	**Rationale**	**Company**	**Rationale**
Blackbaud, Inc.	▪ Comparably-sized ▪ Application software industry ▪ Peer of peers	Dealertrack Technologies	▪ Acquired by Cox Automotive
Computer Programs & Systems, Inc.	▪ Health care technology industry ▪ Peer of peers	MedAssets	▪ Acquired by Pamplona Capital Management

		NeuStar	▪ Not comparably sized

The chart below compares our revenue, net income, EBITDA (income before interest, income taxes, depreciation and amortization) and market capitalization to the median of those four measures for our 2016 Peer Group at the time the 2016 Peer Group was established in January 2016, and at the time it was subsequently reviewed in October 2016. In January 2016, our revenue, net income and market capitalization were below the 2016 Peer Group median, and our EBITDA was above the median. Increases in our stock price between January 2016 and October 2016 repositioned HMS's market capitalization considerably closer to the peer median and net income increased above the peer median.

	January 2016 Review			October 2016 Review		
(in millions)	HMS ($)	2016 Peer Group Median ($)	HMS Percentile Rank (%)	HMS ($)	2016 Peer Group Median ($)	HMS Percentile Rank (%)
Revenue[(1)]	458	529	32	490	633	30
Net Income[(1)(2)]	13	23	34	29	12	69
EBITDA[(1)]	85	68	60	94	78	57
Market Capitalization[(3)]	1,061	2,244	20	1,872	2,260	42

(1) Based on most recently reported four quarters as of January 25, 2016 and October 31, 2016 for the January 2016 review and the October 2016 review, respectively.

(2) Before extraordinary items and discontinued operations.

(3) As of December 31, 2015 and September 30, 2016 for the January 2016 review and the October 2016 review, respectively.

During the first quarter of 2016, the Compensation Committee evaluated competitive market data from our 2016 Peer Group with guidance from FW Cook. The analysis included benchmarking data on several factors:

- target total direct compensation (comprised of base salary, target bonus and recommended long-term incentive awards) for our executive officers relative to the compensation of similarly situated executives in the 2016 Peer Group based on the most recent proxy data,

- equity usage (shares granted in equity plans as a percentage of weighted average shares outstanding), and
- equity allocation, in both absolute dollar value and percentage of annual equity granted, among (i) the CEO, (ii) the next four most highly paid executives, (iii) the remaining executives and (iv) all other employees.

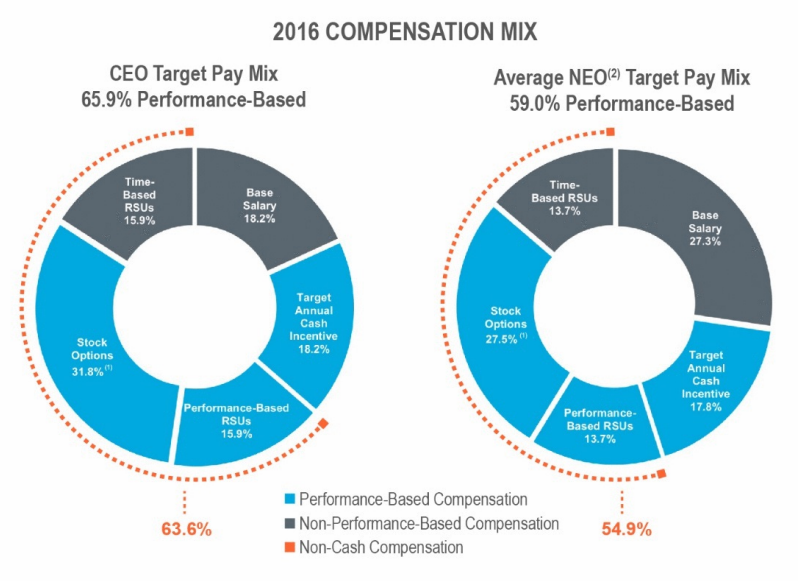
2016 Executive Compensation Elements

The elements of our executive compensation program for 2016 are summarized in the table below.

Element	Type	Objective
Annual Base Salary	Fixed cash compensation for performing day-to-day responsibilities	Recognizes skills, experience, knowledge and responsibilities
Annual Short-Term Incentive Compensation	Performance-based cash compensation awards based on the achievement of short-term financial goals and strategic objectives measured over a specific year	Promotes and rewards short-term corporate performance based on achievement of both financial and non-financial objectives
Annual Long-Term Incentive Compensation	Restricted stock units, 50% performance-based Nonqualified stock options, 50% performance-based	Builds executive stock ownership, retains executives and aligns compensation with the achievement of our long-term financial goals of creating shareholder value and our strategic objectives as measured over multi-year periods
Limited Executive Perquisites	Executive disability income insurance Executive financial consulting services	Maintains competitiveness in the market among our peer companies for both retention and recruitment purposes
Other Elements of Compensation	Broad-based benefits available to all employees Severance and change-in-control benefits	Attractive benefits package attracts and retains talent Supports executive retention and encourages executive independence and objectivity in considering a potential change in control transaction

Compensation Mix

The Compensation Committee does not have a formal or informal policy or target for allocating target total compensation between short-term and long-term compensation, performance and non-performance-based compensation, cash and non-cash compensation, or among the different forms of non-cash compensation. In allocating compensation between the different forms of compensation, we, with guidance from FW Cook, determine what we believe in our business judgment is the appropriate level with respect to each element of total direct compensation to achieve the objectives of our executive compensation program. The allocation of the primary elements of compensation for 2016 at target levels for both our CEO and the average of our other named executive officers is shown below.



(1) For purposes of this illustration, we include all stock options as performance-based compensation. One half of the stock options are subject to additional, predetermined performance-based vesting criteria based on stock price performance. See "Grants of Plan Based Awards for the Year Ended December 31, 2016" for a description of the vesting and other terms of the option awards granted on March 2, 2016.

(2) Includes named executive officers other than the CEO.

Annual Base Salary

Base salary is used to recognize the experience, skills, knowledge and responsibilities of our employees, including our named executive officers, and to provide a competitive level of fixed compensation to balance performance-based risks. The key factors in determining base salary are individual and Company performance, job responsibilities, the competitive rate among our peers for positions of like responsibility and internal pay equity among our employees with similar responsibilities and tenure. As noted above, the Compensation Committee does not target the amount of base salary or other components of compensation for our executive officers to a specific percentile of our peer group, but rather considers the peer group analysis together with a variety of factors in determining compensation.

The Compensation Committee reviews base salaries annually and, if appropriate, makes adjustments to reflect market levels generally every two years after taking into account individual responsibilities, performance and experience, the recommendations of the CEO and the benchmarking data provided by FW Cook. The Compensation Committee also reviews salaries on an interim basis as it determines appropriate based on significant changes in an executive's scope of responsibilities.

In February 2016, the Compensation Committee approved merit-based increases in base salary for each of our named executive officers, other than the CEO. The table below shows the annual base salaries for 2014 through 2016 for our named executive officers.

Named Executive Officer	2014 Year End Salary ($)	Increase (%)	2015 Year End Salary ($)	Increase [1] (%)	2016 Salary [1] ($)
Lucia	650,000	0	650,000	0	650,000
Sherman	500,000	0	500,000	3.0	515,000
Neuman	475,000	0	475,000	5.3	500,000
Nustad	425,000	0	425,000	3.0	437,750
Williams	400,000	18.8	475,000	5.3	500,000

(1) Effective February 29, 2016

Annual Short-Term Incentive Compensation

The Compensation Committee awards annual short-term cash incentive compensation to our named executive officers that reflects financial and strategic achievements based on both objective and subjective criteria, as well as individual performance. Our annual short-term incentive compensation is at-risk compensation. The Compensation Committee believes that this element of our executive compensation program promotes our performance-based compensation philosophy by providing named executive officers with direct financial incentives to achieve specific short-term performance goals intended to increase shareholder value and rewards both overall short-term corporate performance and individual contributions to attaining such performance. Our annual short-term cash incentive awards are paid in a lump sum during the first quarter following the completion of the fiscal year.

Each of our named executive officers was eligible to participate in the 2016 STIP. The target incentive opportunity for each of the named executive officers under the 2016 STIP, as approved by the Compensation Committee, is shown in the table below expressed as a percentage of base salary. The target incentive opportunities were determined based upon a number of factors, including salary levels, job responsibilities and the appropriate targeted level of short-term incentive opportunity for each named executive officer.

Named Executive Officer	Target Incentive Opportunity (as a % of base salary)
Lucia	100%
Sherman	65%
Neuman	65%
Nustad	65%
Williams	65%

2016 PERFORMANCE GOALS

Bonus payouts under the 2016 STIP were subject to the achievement of pre-determined performance goals based on the following financial and non-financial measures and relative weights:

Financial Measures	Non-Financial Measures
Revenue (25%)	Strategic Objectives (25%)
Adjusted EBITDA (25%)	
Adjusted EPS (25%)	

We chose revenue, adjusted EBITDA and adjusted EPS as financial measures under the 2016 STIP because we believe each is a strong indicator of our overall financial performance, a key indicator used by industry analysts to evaluate our operating performance and motivates our executives to drive company growth and profitability. Adjusted EPS was introduced as an additional financial metric for 2016 to further diversify the performance measures and further align the performance metrics with the interest of shareholders. Consistent with 2015, the Committee determined that payout of 50% of the bonus pool should be based on performance against earnings targets (by lowering the relative weighting of the adjusted EBITDA measure compared to 2015 and adding adjusted EPS) in order to drive profitability and long-term shareholder value.

We define adjusted EBITDA, which is a non-GAAP measure, as earnings before interest, income taxes, depreciation and amortization, stock-based compensation and non-recurring legal expense.

We define adjusted EPS, which is a non-GAAP measure, as earnings per share adjusted for stock-based compensation expense, non-recurring legal expense, amortization of acquisition related software and intangible assets and for the related taxes.

In addition, we chose to include strategic objectives under the 2016 STIP that are designed to enhance profitability and create long-term shareholder value.

Financial Objectives. Financial objectives are established based on the annual financial plan approved by the Board of Directors during the first quarter of the year and are intended to be challenging. For 2016, the revenue target was set higher than 2015 performance based on expectations of increased growth in our commercial health plan market, while the adjusted EBITDA and adjusted EPS targets were set at levels higher than 2015 performance after normalizing for anticipated changes in Medicare RAC and state revenues.

A threshold level of performance against each of the financial targets is required in order for the respective portion of the bonus pool to be funded. If the threshold level is met, the actual payout amount is calculated based on the funding curves below, which provide for funding greater than the target level only if results exceed 105% of target.

Adjusted EBITDA (25%) & Adjusted EPS (25%) Funding Curve	
Percent of Target Achieved	**% Funding of Bonus Pool**
<85%	—
85%	50%
86% - 94%	Payout is straight line from 50% to 100%
95 - 105%	100%
106% - 130%	Payout is straight line from 100% to 200%

Revenue (25%) Funding Curve	
Percent of Target Achieved	**% Funding of Bonus Pool**
<90%	—
90%	50%
91% - 94%	Payout is straight line from 50% to 100%
95 - 105%	100%
106% - 120%	Payout is straight line from 100% to 200%

The 2016 STIP authorized the Compensation Committee, in its discretion, to include or exclude the impact of acquisitions and/or dispositions of businesses during the performance period that would distort HMS's 2016 financial results; however, the Compensation Committee did not make any such adjustments in 2016.

Non-financial Objectives. The Compensation Committee established the following strategic objectives under the 2016 STIP: (i) achieve revenue growth by product and market; (ii) increase customer loyalty and retention; (iii) achieve certain growth objectives; (iv) achieve certain margin objectives; and (v) increase employee engagement. The level of achievement of the strategic objectives is determined in the Compensation Committee's sole discretion based on its review of the measured results.

RESULTS UNDER THE 2016 SHORT-TERM INCENTIVE PLAN

For fiscal 2016, we reported the following results under the financial performance measures that are used in determining payouts under our 2016 STIP.

For purposes of calculating the funding percentage under the 2016 STIP, the reported adjusted EBITDA and adjusted EPS results were reduced to include the impact of certain non-recurring legal fees, which resulted in lower payouts under the 2016 STIP. In addition, based on its evaluation of performance against the 2016 strategic objectives measures shown above, the Compensation Committee determined that a 90% payout for the strategic objectives was appropriate based on slightly lower than expected results in revenue growth in certain markets and products. The table below sets forth the calculated funding level under the 2016 STIP.

Performance Objectives	Performance Objective Weighting	Performance Target	Results under 2016 STIP	Achievement of Performance Objective	2016 STIP Funding Percentage[1]
Revenue	25%	$477.9M	$489.7M	102.5%	100.0%
Adjusted EBITDA	25%	$109.5M	$115.9M	105.8%	103.4%
Adjusted EPS	25%	$ 0.57	$ 0.74	129.8%	199.3%
Strategic Objectives	25%	100%	90.0%	90.0%	90.0%
Total	100%				123.2%

(1) Based on the funding curves shown above with respect to revenue, adjusted EBITDA and adjusted EPS.

2016 BONUS PAYOUTS

Bonus payouts for 2016 reflect the Company's strong financial performance for fiscal 2016 and above-target achievement of key financial metrics under the 2016 STIP.

Each of the named executive officers' short-term incentive awards for 2016 were determined by applying the formula set forth below, which, as provided under the 2016 STIP, includes the Committee's ability to use discretion to modify the calculated payout based on individual performance.

Base Salary	x	**Target Incentive Opportunity**	x	**2016 STIP funding percentage of 123.2% based on achievement of:** • 25% Adjusted EBITDA Target • 25% Adjusted EPS Target • 25% Revenue Target • 25% Strategic Objectives	=	**Cash Incentive Award** **(may be modified based on individual performance)**

The Compensation Committee considered the CEO's recommendations regarding individual bonus amounts for the named executive officers (other than himself) based on both corporate performance (as determined by the level of achievement under the 2016 STIP) and the officers' individual performance and determined to modify the awards for Mses. Neuman and Nustad and Messrs. Sherman and Williams based on performance within their respective business units. Mr. Lucia's bonus amount was determined solely based on corporate performance under the 2016 STIP, and all of the independent members of the Board as a group approved and ratified the Compensation Committee's decision with respect to the CEO's bonus amount. The table below compares target bonus amounts to actual bonus amounts paid to the named executive officers under the 2016 STIP.

Named Executive Officer	Target Bonus ($)	Actual Percentage of Target Bonus Paid (%)	Actual Bonus ($)
Lucia	650,000	123.2	800,800
Sherman	334,750	130.0	435,175
Neuman	325,000	120.0	390,000
Nustad	284,538	120.0	341,445
Williams	325,000	120.0	390,000

OTHER CONSIDERATIONS

The 2016 STIP operates as a sub-plan under our Annual Incentive Compensation Plan as amended and restated (the "AIP"), which was adopted by the Board and approved by our shareholders in order to qualify incentive awards as performance-based compensation that is intended to be deductible (to the extent possible) for federal income tax purposes under the Code. Each of the named executive officers was a participant in the AIP for 2016 and was eligible to receive a maximum bonus award of $2,000,000 for the 2016 performance period, subject to the Compensation Committee's authority to use negative discretion, if the predetermined objective goal for the fiscal year was met. This limit is in addition to the limit on performance-based cash awards under the 2016 Omnibus Plan. EBITDA was selected as the performance metric under the AIP for fiscal 2016 because it is one of the primary metrics used to measure our operating performance and although it is a non-GAAP financial measure, its components are calculated based on U.S. GAAP. EBITDA is defined as income before interest, income taxes, depreciation and amortization. The Compensation Committee establishes an initial performance requirement under the AIP, pursuant to which an executive may earn the initial right to receive the maximum bonus under the AIP. The performance requirement for fiscal 2016 was established at $50 million in EBITDA. The 2016 STIP then establishes a second performance requirement, consisting of the performance goals and objectives described above. The potentially achievable incentive compensation under this second performance requirement is less than or equal to the maximum possible bonus specified in the AIP which was approved by the shareholders.

Annual Long-Term Incentive Compensation

We believe that equity awards provide our named executive officers with a strong link to our long-term performance in order to create an ownership culture and help to align their interests with those of our shareholders. Annual long-term incentive awards are granted pursuant to our 2016 Omnibus Incentive Plan, which replaced and superseded the 2006 Stock Plan, upon approval by our shareholders on June 23, 2016. The 2016 Omnibus Plan, which is administered by the Compensation Committee, is intended to furnish a material incentive to employees by making available to them the benefits of a larger common stock ownership in HMS through stock options and other awards. The Board of Directors and the Compensation Committee believe that these increased incentives align compensation with the achievement of our long-term financial goal of creating shareholder value and our strategic objectives as measured over multi-year periods, as well as assist in the retention of employees.

TYPES OF LONG-TERM INCENTIVE AWARDS

For 2016, the Compensation Committee granted 50% of the total annual long-term incentive award value to our named executive officers in nonqualified stock options (50% of which are subject to stock price performance conditions) and 50% in restricted stock units (50% of which are subject to stock price performance conditions), pursuant to the 2006 Stock Plan. We believe that the mix of performance-based and non-performance-based stock options and restricted stock units is appropriate because it represents a balanced approach that reinforces our emphasis on pay-for-performance while retaining, incentivizing and compensating named executive officers for achievement of long-term goals intended to increase shareholder value.

Time-Based Stock Options. We believe stock options strongly support our objective of ensuring that pay is aligned with changes in shareholder value. We set the exercise price of all stock options equal to or above the closing price of our common stock on the NASDAQ Global Select Market on the day of the grant. Accordingly, a stock option is intended to provide a return to the executive only if the market price of our common stock appreciates from the exercise price of the stock option and the executive remains employed during the vesting period. To foster retention and long-term performance, time-based stock options vest in one-third increments on the first, second and third anniversaries of the date of grant.

Time-Based Restricted Stock Units. We believe restricted stock unit grants support the goal of retaining our named executive officers and further align the interests of our executives with shareholders by increasing their stock ownership. Because these restricted stock units vest in installments over time, these awards will provide a return to the executive only if the executive remains employed during the vesting period. The value of restricted stock unit awards increases or decreases as the market price of our common stock increases or decreases, further supporting our objective of ensuring that pay is aligned with changes in shareholder value. In addition, restricted stock units generally are perceived as more valuable than stock options during periods of stock price volatility. Time-based restricted stock units vest in one-third increments on the first, second and third anniversaries of the date of grant.

Performance-Based Awards. To drive long-term performance and shareholder value, we establish performance conditions with respect to 50% of the stock option awards and 50% of the restricted stock unit awards granted to the named executive officers. Performance-based awards are earned only to the extent pre-established performance goals are met, and, if earned, are subject to the time-based vesting requirements described above. For awards granted in 2016, both the performance-based stock options and performance-based restricted stock units will be earned only if our average closing price per share for the trading days during any 30-day calendar period preceding the first, second and/or third anniversaries of the date of grant is at least 25% higher than the closing price per share on the date of grant. If the performance condition is met prior to the first anniversary of the grant date, one-third of the performance-based stock options and restricted stock units will vest in three equal installments on the first, second and third anniversaries of the grant date; if the performance condition is met after the first anniversary but prior to the second anniversary of the grant date, two-thirds of the performance-based stock options and restricted stock units will vest on the second anniversary of the grant date and one-third will vest on the third anniversary of the grant date; if the performance condition is met after the second anniversary but prior to the third anniversary of the grant date, 100% of the performance-based stock options and restricted stock units will vest on the third anniversary of the grant date. If the performance condition is not achieved before the third anniversary of the grant date, the performance-based stock options and restricted stock units will be forfeited. The named executive officer must remain employed by the Company as of each vesting date.

The table below includes certain information regarding performance-based awards previously granted to our named executive officers that, during 2016, were either (i) earned at the target level, following the Compensation Committee's certification of the achievement of the respective performance goals (and are subject to time-based vesting according to the previously-approved award terms) or (ii) forfeited, following the Compensation Committee's determination that the performance goal had not been achieved during the 3-year award period.

Name	Award Type	Grant Date	Performance-Based Awards Earned in 2016 (#)	Performance-Based Awards Forfeited in 2016 (#)	Exercise Price of Options ($/Sh)	Grant Date Fair Value of Performance-Based Awards ($)
Lucia	Stock Options	11/15/2013	—	86,083	21.36	599,387
	Stock Options	3/4/2015	96,488	—	16.77	568,749

	Restricted Stock Units	3/2/2016	17,934	—	—	250,000

2016 ANNUAL LONG-TERM INCENTIVE COMPENSATION

The 2016 annual long-term incentive awards for the named executive officers were determined based upon the Compensation Committee's subjective evaluation of the factors set forth below and guidance from FW Cook:

- competitive positioning among our peer group companies;
- corporate performance;
- relative shareholder return (for CEO's evaluation);
- recommendations of the CEO, based on individual performance, expected contributions going forward and appropriateness of the grant depending upon the level of responsibility (for executives other than the CEO);
- perceived retention value of the award;
- comparative share ownership and outstanding equity awards of HMS executives;
- awards granted to each executive in prior years; and
- potential wealth creation.

No mathematical weighting was applied to any individual factor. All of the independent directors as a group approved and ratified the 2016 annual long-term incentive award for the CEO.

The following long-term incentive awards were granted to our named executive officers, effective March 2, 2016:

Named Executive Officer	Value of Options Granted ($)	Number of Options Granted [1][2] (#)	Value of Restricted Stock Units Granted ($)	Number of Restricted Stock Units Granted [1][2] (#)
Lucia	1,137,500	208,333	1,137,500	81,600
Sherman	560,000	102,564	560,000	40,172
Neuman	500,000	91,575	500,000	35,868
Nustad	402,500	73,718	402,500	28,874
Williams	500,000	91,575	500,000	35,868

(1) See “Grants of Plan Based Awards For the Year Ended December 31, 2016” for a description of the vesting and other terms of the option and restricted stock unit awards.

(2) The options have an exercise price of $13.94 per share.

Limited Executive Perquisites

In order to enhance our ability to recruit and retain highly qualified executive talent, we offer Guaranteed Standard Issue, or individual disability income insurance, to employees earning more than $300,000 in annualized base salary, and financial counseling services to the CEO and any officers who report directly to the CEO. In addition, beginning in 2017, we also offer preventative health program benefits to our CEO and executives who report directly to the CEO. The Compensation Committee believes these benefits are reasonable and comparable to benefits offered by companies of a similar size to ours and better enable us to maintain competitiveness by providing high-performing executives with benefits that will facilitate strong, focused performance, while optimizing physical health. The cost of these perquisites constitutes a small percentage of each executive’s total compensation. Each of the named executive officers is eligible to receive these benefits. Mr. Williams opted not to receive financial counseling services during 2016, as reflected in the Summary Compensation Table.

Other Elements of Compensation

BENEFITS AND OTHER COMPENSATION

We maintain broad-based benefits that are provided to all employees, including health and dental insurance, life and disability insurance and a 401(k) plan. Our named executive officers are eligible to participate in all of our employee benefit plans, in each case on the same basis as other employees.

SEVERANCE AND CHANGE-IN-CONTROL BENEFITS

To enable us to offer competitive total compensation packages to our senior executives, as well as to ensure the ongoing retention of these individuals when considering transactions that may create uncertainty as to their future employment with us, in 2011, the Compensation Committee approved standardizing the terms of employment of our senior executives, which included providing consistent separation and change-in-control protection.

Based on information provided by FW Cook, the Compensation Committee believes that the protection afforded by the revised terms of employment described above provides a level of benefits that are estimated to be within a reasonable range based on competitive practices with respect to comparable positions. We believe that the benefits provided under these agreements are consistent with our objective of attracting and retaining highly qualified executives and provide reasonable assurance so that our senior executives are not distracted from their duties during the uncertainty that may accompany a possible change in control and as well as encourage executive independence and objectivity in considering any such transaction. The agreements and equity plans provide a "double trigger" for the payment of benefits upon a change of control, so that vesting occurs if a qualifying termination event occurs in connection with the change-in-control. The Compensation Committee believes that a “double trigger” is more appropriate than a “single trigger” because a double trigger prevents the unnecessary payment of benefits to an executive officer in the event that the change in control does not result in a qualifying termination event with respect to the executive's employment.

We have provided detailed information about Mr. Lucia's employment agreement and our agreements with the other named executive officers and the benefits provided to Mr. Lucia and the other named executive officers under their respective agreements, along with estimates of the value of such benefits under various circumstances, under the heading "Potential Payments Upon Termination of Employment or Change in Control" below.

EQUITY AWARD GRANT PRACTICES

Annual equity awards to eligible employees, including the named executive officers, are considered by the Compensation Committee at its regularly scheduled meeting held in the first quarter of each year. At this meeting, the Compensation Committee meets with management and FW Cook to discuss and consider annual long-term incentive awards and to approve individual award amounts and terms for the executive officers and other employees subject to Section 16 of the Exchange Act. The grant date for the 2016 annual equity awards was established as the second business day after the date that HMS filed its annual report on Form 10-K with the SEC.

The Compensation Committee also approves off-cycle initial equity grants to attract and retain key new hires. Generally, the grant value and equity mix is based on management's negotiations with new hire candidates. If the Company is in a blackout period when an individual is hired, then the grant date is established as the third trading day following the Company's public announcement of material non-public information. If the Company is not in a blackout period when an individual is hired, then the grant date is established on the date of the new hire's commencement of employment. Equity grants to new hires are subject to service-based vesting over four years. The Compensation Committee has delegated authority to the CEO to grant new hire awards, subject to certain limitations, on terms pre-established by the Compensation Committee to employees who are not subject to Section 16 of the Exchange Act. Grants approved by the CEO pursuant to this delegation are reviewed at the Compensation Committee's next regularly scheduled meeting.

The grant date for other off-cycle equity grants that may be approved by the Compensation Committee from time to time is established as the second business day after the date that HMS files its next annual or quarterly report with the SEC.

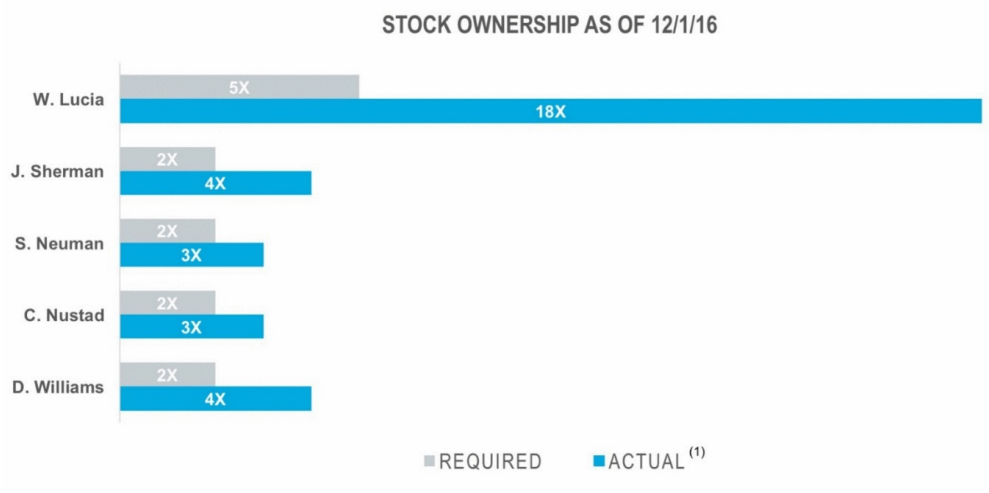
STOCK OWNERSHIP GUIDELINES FOR EXECUTIVE OFFICERS

The Board of Directors has established significant stock ownership guidelines for our executive officers to encourage them to own and hold a meaningful equity stake in HMS in order to further align their interests and actions with the interests of HMS and its shareholders. The guidelines for executive officers are based on a multiple of the executive's base salary.

Title	Value of Shares Required to be Owned
CEO	5 X Annual Base Salary
Other Executive Officers	2 X Annual Base Salary

For purposes of satisfying these guidelines, an executive officer's shares owned outright, directly or indirectly, and restricted stock and restricted stock units, whether or not vested, are counted in determining the executive's stock ownership. Each executive is required to meet his or her respective ownership guideline within five years after election (or promotion to a covered position), or in the case of executives in office at the time the guidelines were adopted, within five years of the date of adoption. To mitigate the impact of stock price fluctuation, the number of shares required to be held by each executive to satisfy the guidelines remains fixed through December 1, 2019. The Compensation Committee monitors compliance with these guidelines on an annual basis.

The following graph summarizes the stock ownership of each of our named executive officers as of December 1, 2016, as a multiple of base salary in effect as of December 1, 2016, pursuant to our Stock Ownership Guidelines.



(1) Rounded down to the nearest multiple

CLAWBACK POLICY

The Board of Directors has adopted a clawback policy that covers each of our current and former executive officers and applies to all forms of executive incentive compensation. Our clawback policy provides that the Board of Directors (or a Board committee) is authorized to recover from any current or former executive officer any bonus, incentive compensation or equity-based compensation gains resulting from certain misconduct occurring after January 1, 2015 that causes a restatement of our financial statements. The Board is required to review all circumstances and actions causing such restatement and to take action as it deems appropriate. We are monitoring this policy to ensure that it is consistent with applicable laws, and to the extent that the SEC adopts rules for clawback policies, we will revise our policy to reflect any necessary changes.

PROHIBITION ON HEDGING AND PLEDGING

Our Insider Trading Policy prohibits our employees and directors from, among many other actions, purchasing our securities on margin, borrowing against our securities held in a margin account, pledging our securities as collateral for a loan and entering into hedging and derivative transactions with respect to our securities.

TAX CONSIDERATIONS

Section 162(m) of the Code prohibits us from deducting from taxable income any compensation in excess of $1 million paid to our CEO and the three other most highly compensated named executive officers employed at the end of the year (other than our Chief Financial Officer), except to the extent that such compensation is paid pursuant to a shareholder approved plan upon the attainment of specified performance objectives. The Compensation Committee believes that tax deductibility is an important factor, but not the sole factor, to be considered in setting executive compensation policy. Accordingly, the Compensation Committee periodically reviews the potential consequences of Section 162(m) of the Code and generally intends to take such reasonable steps as are required to avoid the loss of a tax deduction due to Section 162(m) of the Code. However, the Compensation Committee may, in its judgment, authorize compensation payments or arrangements that do not comply with the exemptions in Section 162(m) of the Code when it believes that such payments are appropriate to attract and retain executive talent. In addition, because of the uncertainties associated with the application and interpretation of Section 162(m) of the Code and the regulations issued thereunder, there can be no assurance that compensation intended to satisfy the requirements for deductibility under Section 162(m) of the Code will in fact be deductible. We obtained shareholder approval of the AIP, as amended and restated, and the 2016 Omnibus Plan in 2016 in order to qualify awards under such plans, to the extent structured to comply with Section 162(m) of the Code, as performance-based compensation that is tax deductible under Section 162(m) of the Code.

EARLY 2017 COMPENSATION ACTIONS

The following is a brief summary of certain changes to the compensation of the named executive officers for fiscal 2017, which is intended to provide additional information to shareholders in their review of our compensation program for fiscal 2016. A more detailed description of compensation for fiscal 2017 will be included in the proxy statement for the 2018 Annual Meeting of Shareholders.

2017 Annual Base Salary

In February 2017, the Compensation Committee increased Mr. Lucia's annual base salary to $700,000, effective February 27, 2017, following its annual review of executive compensation. The Compensation Committee did not increase the annual base salary of any other named executive officer for 2017.

2017 Short-Term Incentive Plan Design

In February 2017, the Compensation Committee established the 2017 Short-Term Incentive Plan ("2017 STIP") for eligible employees, including our named executive officers. The 2017 STIP is substantially similar to the 2016 STIP with respect to the performance criteria and funding curves, and provides additional items for which the Compensation Committee may make adjustments in determining the level of achievement of the financial objectives. To ensure a minimum amount of earnings is achieved before bonuses are paid and to further align the plan design with shareholder interests, the Committee determined that if either the adjusted EBITDA or adjusted EPS results for fiscal 2017 do not meet the minimum threshold for funding under the 2017 STIP, the Committee may use negative discretion to reduce the entire bonus plan funding from the calculated amount. For a discussion of the performance goals under the 2016 STIP, see "2016 Performance Goals" earlier in this CD&A. Payouts under the 2017 STIP generally are capped at 200% of target and will be determined in early 2018.

2017 Long-Term Incentive Awards

In April 2017, the Compensation Committee approved the grant of annual long-term incentive awards to the named executive officers in the form of non-qualified stock options and restricted stock units, on a substantially equal value basis, pursuant to the 2016 Omnibus Plan. Due to the delay in filing the Company's annual report on Form 10-K for the year-ended December 31, 2016 with the SEC, the Committee determined to make the awards effective on the third business day following the filing of our quarterly report on Form 10-Q for the period ended March 31, 2017, with the SEC. One-half of the stock options and one-half of the restricted stock units are subject to stock price performance conditions.

Named Executive Officer	Grant Date Fair Value of Options Granted (1) ($)	Grant Date Fair Value of RSUs Granted (1) ($)
Lucia	1,500,000	1,500,000
Sherman	850,000	850,000
Neuman	600,000	600,000
Nustad	350,000	350,000
Williams	600,000	600,000

(1) The non-qualified stock options and restricted stock units vest as follows: 50% vest in three equal installments on the first, second and third anniversaries of the grant date, and the remaining 50% are earned upon the Company's achievement of the following performance condition and vest as set forth below: the Company's average closing price per share must be at least 25% higher than the closing price on the grant date for a period of 30 consecutive trading days preceding the first, second or third anniversaries of the grant date. If the performance condition is met prior to the first anniversary of the grant date, one-third of the performance-based stock options and restricted stock units will vest in three equal installments on the first, second and third anniversaries of the grant date; if the performance condition is met after the first anniversary but prior to the second anniversary of the grant date, two-thirds of the performance-based stock options and restricted stock units will vest on the second anniversary of the grant date and one-third will vest on the third anniversary of the grant date; if the performance condition is met after the second anniversary but prior to the third anniversary of the grant date, 100% of the performance-based stock options and restricted stock units will vest on the third anniversary of the grant date. If the performance condition is not achieved before the third anniversary of the grant date, the performance-based stock options and restricted stock units will be forfeited. The named executive officer must remain employed by the Company as of each vesting date.

NON-GAAP FINANCIAL MEASURES

The Company believes that the non-GAAP financial measures presented in this CD&A provide useful information to the Company's management, investors, and other interested parties about the Company's operating performance because they allow them to understand and compare the Company's operating results during the current periods to the prior year periods in a more consistent manner. The non-GAAP measures presented in this CD&A may not be comparable to similarly titled measures used by other companies. These non-GAAP financial measures are used in addition to and in conjunction with results presented in accordance with GAAP and reflect an additional way of viewing aspects of the Company's operations that, when viewed with GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, provides a more complete understanding of the results of operations and trends affecting the Company's business. These non-GAAP financial measures should be considered as a supplement to, and not as a substitute for, or superior to financial measures calculated in accordance with GAAP.

Reconciliation of Net Income to EBITDA and Adjusted EBITDA
(in thousands)

	FY 2016	FY 2015
Net income	$ 37,636	$ 24,527
Net interest expense	8,198	7,763
Income taxes	11,835	15,282
Depreciation and amortization, net of deferred financing costs, included in net interest expense	44,930	50,598
Earnings before interest, taxes, depreciation and amortization (EBITDA)	$ 102,599	$ 98,170
Stock based compensation expense	13,277	14,297
Non-recurring legal fees (1)	1,563	-
Adjusted EBITDA	$ 117,439	$ 112,467

(1) In periods prior to 2016, legal fees related to disputes involving PCG were not included in adjusted earnings because they were not considered non-recurring at the time. For the twelve months ended December 31, 2015, related legal fees were $5.5 million.

Reconciliation of Net Income to GAAP EPS and Adjusted EPS
(in thousands, except per share amounts)

	FY 2016	FY 2015
Net Income	$ 37,636	$ 24,527
Stock-based compensation expense	13,277	14,297
Non-recurring legal fees [1]	1,563	-
Amortization of acquisition related software and intangible assets	28,030	28,148
Income tax related to adjustments	(15,536)	(16,295)
Sub-total	$ 64,970	$ 50,677
Weighted average common shares, diluted	86,987	88,361
Diluted GAAP EPS	0.43	$ 0.28
Diluted adjusted EPS	0.75	$ 0.57

(1) Related legal fees were not considered non-recurring in 2015. For the twelve months ended December 31, 2015, related legal fees were approximately $5.5 million and income taxes on related legal fees were approximately $2.1 million or the equivalent of $0.04 per diluted Adjusted EPS.

COMPENSATION COMMITTEE REPORT

The Compensation Committee of the Board of Directors of HMS Holdings Corp. has reviewed and discussed the Compensation Discussion and Analysis required by Item 402(b) of Regulation S-K with management. Based on this review and discussion, the Compensation Committee recommended to the Board of Directors that the Compensation Discussion and Analysis be included in this Annual Report on Form 10-K.

By the Compensation Committee of the Board of Directors of HMS Holdings Corp.

Richard H. Stowe, *Chair*
Craig R. Callen
Cora M. Tellez

The information contained in the Compensation Committee Report shall not be deemed to be "soliciting material" or to be "filed" with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, except to the extent that we specifically incorporate it by reference in such filing.

SUMMARY COMPENSATION TABLE

The following table sets forth the cash and non-cash compensation awarded to or earned by our named executive officers for the fiscal years ended December 31, 2016, 2015 and 2014.

Name and Principal Position	Year	Salary [1] ($)	Bonus [2] ($)	Stock Awards [3] ($)	Option Awards [4] ($)	Non-Equity Incentive Plan Compen-sation [5] ($)	All Other Compen-sation [6] ($)	Total Compen-sation ($)
William C. Lucia	2016	650,000	—	1,137,504	1,137,498	800,800	33,421	3,759,223
Chairman, President	2015	650,000	—	1,137,493	1,137,498	606,385	31,491	3,562,867
and CEO	2014	650,000	—	1,412,490	737,497	468,000	10,400	3,278,387
Jeffrey S. Sherman	2016	512,115	—	559,998	559,999	435,175	28,391	2,095,678
EVP, Chief Financial	2015	500,000	—	949,997	1,933,332	303,193	28,194	3,714,716
Officer and Treasurer	2014	136,538[7]	355,000	337,493	1,087,493	—	—	1,916,524
Semone Neuman	2016	495,192	—	500,000	500,000	390,000	28,773	1,913,965
EVP, Operations and	2015	475,000	—	849,998	1,833,332	288,033	29,893	3,476,256
Information Technology	2014	470,192	—	787,480	287,494	265,000	13,677	1,823,843
Cynthia Nustad	2016	435,298	—	402,504	402,500	341,445	27,826	1,609,573
EVP, Chief	2015	425,000	—	499,997	1,237,501	257,714	29,387	2,449,599
Strategy Officer	2014	421,731	—	649,996	249,994	200,000	10,400	1,532,121
Douglas M. Williams	2016	495,192	—	500,000	500,000	390,000	13,595	1,898,787
President, Markets	2015	469,231	—	849,998	1,833,332	288,033	12,646	3,453,240
and Product	2014	396,923	50,000	499,980	274,994	230,000	8,885	1,460,782

(1) The amounts in this column consist of base salary earned for the fiscal year.

(2) The amounts in this column consist of (i) with respect to Mr. Sherman, a sign-on bonus of $200,000 paid in 2014 and a bonus payment of $155,000 ($150,000 of which was guaranteed) earned for 2014 and paid in 2015 and (ii) with respect to Mr. Williams, a sign-on bonus of $50,000 paid in 2014, pursuant to the terms of their respective employment agreements.

(3) The amounts in this column represent the aggregate grant date fair value of the restricted stock unit awards computed in accordance with FASB guidance on stock-based compensation. The grant date fair value of restricted stock units is determined based on the number of units awarded and the fair value of our common stock on the grant date, which is the closing sales price per share of our common stock reported on the NASDAQ Global Select Market on that date.

(4) The amounts in this column represent the aggregate grant date fair value of the stock option awards computed in accordance with FASB guidance on stock-based compensation. The relevant assumptions made in the valuations for the 2016, 2015 and 2014 stock option awards may be found in (i) Note 1 of the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K for the fiscal year ended December 31, 2016, (ii) Note 10 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 and (iii) Note 11 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, respectively. The grant date fair value of stock options is determined based on the number of options awarded and the fair value of the stock option on the grant date based upon the Black Scholes pricing model.

(5) The amounts in this column consist of amounts earned pursuant to the short-term (cash) incentive plan for the fiscal year reported, which are paid in the following fiscal year.

(6) The table below shows the components of “All Other Compensation” for the named executive officers for 2016.

(7) The amount reported consists of base salary earned by Mr. Sherman, prorated from his date of employment on September 8, 2014.

FISCAL 2016 ALL OTHER COMPENSATION TABLE

Name	401(k) Savings Plan Employer Matching Contributions[1] ($)	Executive Disability Insurance[2] ($)	Financial Counseling[3] ($)	Other[4] ($)	Tax Gross-ups[5] ($)	Total All Other Compensation ($)
Lucia	10,600	3,003	15,000	3,356	1,462	33,421
Sherman	10,600	2,791	15,000	—	—	28,391
Neuman	10,600	2,849	15,000	316	8	28,773
Nustad	10,600	2,226	15,000	—	—	27,826
Williams	10,600	2,995	—	—	—	13,595

(1) These amounts represent Company matching contributions to our named executive officers in the Company's 401(k) savings plan.

(2) These amounts represent the premiums paid by the Company on behalf of our named executive officers for executive disability insurance.

(3) These amounts represent the amounts paid on behalf of our named executive officers for financial counseling services.

(4) These amounts represent the cost of Company gifts given to the named executive officer in celebration of certain events.

(5) These amounts represent the amounts paid to the named executive officer for taxes incurred on Company gifts.

GRANTS OF PLAN-BASED AWARDS FOR THE YEAR ENDED DECEMBER 31, 2016

The following table provides information concerning each grant of an award made to our named executive officers in fiscal 2016 under our AIP, 2016 STIP and 2006 Stock Plan.

Name	Award Type	Grant Date	Compensation Committee Approval Date	Estimated Possible Payouts Under Non-Equity Incentive Plan Awards[1]		Estimated Future Payouts Under Equity Incentive Plan Awards [2]	All Other Stock Awards: Number of Shares of Stock or Units[3] (#)	All Other Option Awards: Number of Securities Underlying Options[4] (#)	Exercise or Base Price of Options[5] ($/Sh)	Grant Date Fair Value of Stock and Option Awards[6] ($)

Nustad	AIP/2016 STIP	—	—	284,538	2,000,000	—	—	—	—	—
	Stock Options [7]	3/2/2016	2/18/2016	—	—	36,859	—	36,859	13.94	402,500
	RSUs [7]	3/2/2016	2/18/2016	—	—	14,437	14,437	—	—	402,504
Williams	AIP/2016 STIP	—	—	325,000	2,000,000	—	—	—	—	—

Stock Options [7]	3/2/2016	2/18/2016	—	—	45,787	—	45,788	13.94	500,000
RSUs [7]	3/2/2016	2/18/2016	—	—	17,934	17,934	—	—	500,000

(1) Amounts represent the target and maximum short-term (cash) incentive compensation payouts that could be earned by the named executive officers for 2016. The target amount shown is 100% of the individual's target annual award opportunity and assumes that the named executive officer achieves all related pre-determined financial and non-financial objectives. The maximum amount shown is the shareholder-approved maximum payout under the AIP. There are no threshold amounts under the 2016 STIP or the AIP. The actual short-term (cash) incentive compensation paid for 2016 is shown in the Summary Compensation Table in the "Non-Equity Incentive Plan Compensation" column. The AIP and our 2016 STIP are described in the Compensation Discussion and Analysis, under the heading "Annual Short-Term Incentive Compensation." For 2016, Mr. Lucia's target award opportunity was 100% of his base salary. The target award opportunity for Messrs. Sherman and Williams and Mses. Neuman and Nustad was 65% of his/her base salary.

(2) Amounts represent the portion of the award made to each named executive officer in 2016 that is dependent on certain pre-defined performance conditions and continued service for both non-qualified stock options and restricted stock units. These grants are discussed in the Compensation Discussion and Analysis under the heading "Annual Long-Term Incentive Compensation."

(3) Amounts represent the portion of the restricted stock unit award made to each named executive officer in 2016 that is conditioned on continued service. These restricted stock unit awards are discussed in the Compensation Discussion and Analysis under the heading "Annual Long-Term Incentive Compensation."

(4) Amounts represent the portion of the non-qualified stock option award made to the named executive officers in 2016 that is conditioned on continued service. These stock option awards are discussed in the Compensation Discussion and Analysis under the heading "Annual Long-Term Incentive Compensation."

(5) Represents the closing price of our common stock on the date of the grant.

(6) Amounts in this column represent the grant date fair value of each stock option grant and each restricted stock unit grant computed in accordance with FASB guidance on stock-based compensation, and exclude the impact of estimated forfeitures related to service-based vesting conditions. The relevant assumptions made in the valuations may be found in Note 1 of the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

(7) The non-qualified stock options and restricted stock units vest as follows: 50% vests in three equal installments on the first, second and third anniversaries of the grant date, and the remaining 50% vests upon the Company's achievement of the following performance condition: the Company's average closing price per share must be at least 25% higher than the closing price on the grant date for a period of 30 consecutive trading days preceding the first, second or third anniversaries of the grant date. If the performance condition is met prior to the first anniversary of the grant date, one-third of the performance-based stock options and restricted stock units will vest in three equal installments on the first, second and third anniversaries of the grant date; if the performance condition is met after the first anniversary but prior to the second anniversary of the grant date, two-thirds of the performance-based stock options and restricted stock units will vest on the second anniversary of the grant date and one-third will vest on the third anniversary of the grant date; if the performance condition is met after the second anniversary but prior to the third anniversary of the grant date, 100% of the performance-based stock options and restricted stock units will vest on the third anniversary of the grant date. If the performance condition is not achieved before the third anniversary of the grant date, the performance-based stock options and restricted stock units will be forfeited. The named executive officer must remain employed by the Company as of each vesting date. The non-qualified stock options are exercisable over a term of ten years.

(1) The market value of shares or units of stock that have not vested is calculated by multiplying the closing market price per share of our common stock on December 30, 2016, the last trading day in 2016, of $18.16 per share by the number of shares or units of stock that have not vested.

(2) Represents stock options and restricted stock units granted on November 12, 2014. The remaining stock options and restricted stock units are scheduled to vest on November 12, 2017.

(3) Represents performance-based stock options and restricted stock units granted on November 12, 2014 that have not been earned. The stock options and restricted stock units are scheduled to vest on November 12, 2017, subject to satisfaction of the following performance condition: an increase in the average closing price per share of our common stock during the applicable trading days in any consecutive 30 calendar day period preceding the third anniversary of the grant date of at least 25% over the option exercise price.

(4) Represents stock options and restricted stock units granted on March 4, 2015. One-half of the stock options and restricted stock units granted are subject to time-based vesting in one-third increments. Of the remaining two-thirds that were unexercisable or that had not vested as of December 30, 2016, one-third vested on March 4, 2017, and one-third is scheduled to vest on March 4, 2018. One-half of the stock options and restricted stock units granted were subject to performance-based conditions that have been satisfied and subject to time-based vesting conditions. Two-thirds of these performance-based stock options and restricted stock units vested on March 4, 2017, and one-third is scheduled to vest on March 4, 2018.

(5) Represents restricted stock units granted on February 27, 2013 that were subject to performance-based conditions that have been satisfied and subject to time-based vesting conditions. Of the remaining restricted stock units that had not vested as of December 30, 2016, one-half vested on February 27, 2017, and one-half is scheduled to vest on February 27, 2018.

(6) Represents restricted stock units granted on March 5, 2014 that were subject to performance-based conditions that have been satisfied and subject to time-based vesting conditions. Of the remaining restricted stock units that had not vested as of December 30, 2016, one-half vested on March 5, 2017, and one-half is scheduled to vest on March 5, 2018.

(7) Represents stock options granted on September 8, 2014. One-half of the remaining stock options are scheduled to vest on September 8, 2017, and one-half are scheduled to vest on September 8, 2018.

(8) Represents restricted stock units granted on April 1, 2013. All of the remaining restricted stock units vested on April 1, 2017.

(9) Represents stock options and restricted stock units granted on May 13, 2015. One-half of the stock options and restricted stock units granted are subject to time-based vesting in one-third increments. Of the remaining two-thirds that were unexercisable or that had not vested as of December 30, 2016, one-third is scheduled to vest on May 13, 2017, and one-third is scheduled to vest on May 13, 2018. One-half of the stock options and restricted stock units granted were subject to performance-based conditions that have been satisfied and subject to time-based vesting conditions. Two-thirds of these performance-based stock options and restricted stock units are scheduled to vest on May 13, 2017, and one-third are scheduled to vest on May 13, 2018.

(10) Represents stock options granted on November 11, 2015. Of the remaining two-thirds that were unexercisable as of December 30, 2016, one-third is scheduled to vest on November 11, 2017, and one-third is scheduled to vest on November 11, 2018.

(11) Represents stock options granted on December 9, 2013. All of the remaining stock options are scheduled to vest on December 9, 2017.

(12) Represents stock options and restricted stock units granted on March 2, 2016. One-half of the stock options and restricted stock units granted are subject to time-based vesting in one-third increments. One-third of the time-based stock options and restricted stock units vested on March 2, 2017, and one-third is scheduled to vest on each of March 2, 2018 and March 2, 2019. One-half of the stock options and restricted stock units granted were subject to performance-based conditions that have been satisfied and subject to time-based vesting conditions. One-third of these performance-based stock options and restricted stock units vested on March 2, 2017, and one-third is scheduled to vest on each of March 2, 2018 and March 2, 2019.

OPTION EXERCISES AND STOCK VESTED IN 2016

The following table sets forth certain information concerning the stock options exercised and stock awards that vested for our named executive officers during the year ended December 31, 2016.

	Option Awards		Stock Awards	
Name	Number of Shares Acquired on Exercise (#)	Value Realized on Exercise[1] ($)	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting[2] ($)
Lucia	339,328	4,504,336	44,906	604,649
Sherman	—	—	12,060	179,971
Neuman	—	—	21,417	310,316
Nustad	—	—	16,192	227,287
Williams	—	—	13,369	197,093

(1) The value realized on the exercise of stock options is based on the difference between the exercise price and the market price (used for tax purposes) of our common stock on the date of exercise.

(2) The value realized on vesting represents the number of shares acquired on vesting multiplied by the market value of shares of our common stock on the vesting date, which is the closing price of our common stock on:

(i) February 18, 2016 of $11.61 for Mr. Lucia (13,697 shares);

(ii) February 27, 2016 of $12.99 for Mr. Lucia (5,872 shares) and Ms. Nustad (4,349 shares);

(iii) March 4, 2016 of $14.01 for Messrs. Lucia (11,304 shares), Sherman (6,956 shares) and Williams (5,963 shares) and Mses. Neuman (5,963 shares) and Nustad (4,969 shares);

(iv) March 5, 2016 of $14.01 for Messrs. Lucia (8,350 shares) and Williams (2,783 shares) and Mses. Neuman (6,185 shares) and Nustad (4,948 shares);

(v) April 1, 2016 of $14.06 for Ms. Neuman (4,550 shares);

(vi) May 13, 2016 of $15.78 for Messrs. Sherman (2,504 shares) and Williams (2,504 shares) and Ms. Neuman (2,504 shares); and

(vii) November 12, 2016 of $16.54 for Messrs. Lucia (5,683 shares), Sherman (2,600 shares) and Williams (2,119 shares) and Mses. Neuman (2,215 shares) and Nustad (1,926 shares).

POTENTIAL PAYMENTS UPON TERMINATION OF EMPLOYMENT OR CHANGE IN CONTROL

The information and table in this section summarize the estimated compensation payable to each of our named executive officers in the event of termination of employment or a change in control. This compensation is payable pursuant to (i) the terms of the employment agreement with each of our named executive officers, and (ii) the terms of our equity incentive plans and related award agreements. Regardless of the manner in which the named executive officer's employment terminates, each executive is generally entitled to receive earned, unpaid salary and accrued but unused paid time off through the date of termination under his or her employment agreement. Each named executive officer is also entitled to receive any earned, unpaid bonus for the calendar year preceding the calendar year in which his or her employment ends unless such termination is for Cause. The definitions of "Cause," Change in Control," "Disability," and "Good Reason" appear at the end of the next section under the heading "Key Terms."

In addition to the compensation discussed above, the following table reflects the compensation and benefits that would have been paid to the named executive officers had their employment terminated on December 31, 2016 under the termination scenarios shown below, and assumes a closing price of our common stock as of December 30, 2016, the last trading day in 2016 ($18.16). The table also assumes that each named executive officer executes a separation agreement and general release, as required under the terms of their employment agreements, and complies with certain restrictive covenants and confidentiality provisions contained in their employment agreements and Restrictive Covenants Agreements (as defined and described under the heading "Restrictive Covenants Agreements"). The table does not include any amounts due for unused paid time off for 2016 or the value of immediately exercisable stock options at the date of termination (where vesting was not accelerated as a result of the termination). Due to a number of factors that may affect the availability, nature and amount of compensation upon termination, any actual amounts paid or distributed to named executive officers may be different from the amounts provided in this section. In addition, in connection with any actual termination or change in control situation, we may determine to enter into agreements or establish arrangements that alter the terms below.

Named Executive Officer and Type of Payment	Termination without Cause[1] ($)	Resignation for Good Reason[2] ($)	Termination without Cause following a Change in Control[3] ($)	Resignation for Good Reason following a Change in Control[3] ($)	Disability[4] ($)	Death or Retirement[5] ($)

Total	516,407	—	3,490,960	3,490,960	2,974,553	2,974,553

(1) Assuming involuntary termination without Cause, Messrs. Sherman and Williams and Mses. Neuman and Nustad would be entitled to cash severance in an amount equal to 12 times their monthly base salary paid ratably in equal installments over a 12 month period, and a lump sum amount equal to 12 times the difference between the monthly COBRA coverage premium for the same type of medical and dental coverage they are receiving as of the date their employment ends and their monthly employee contribution. Mr. Lucia would be entitled to cash severance in an amount equal to 24 times his monthly base salary paid ratably in equal installments over a 24-month period, continued health coverage for 24 months or until he becomes eligible for health coverage from another employer, whichever is earlier, and twice his bonus component. The bonus component varies depending upon whether the bonus for the year of termination is intended to be "performance-based" compensation and performance is satisfied, in which case it will be paid when bonuses are paid to our other senior executive officers, or whether the bonus is under a different program, in which case it will be his target bonus. In addition, Mr. Lucia would be treated as continuing in service for purposes of the vesting of any equity award under the terms of his employment agreement.

(2) The amounts in this column represent the amounts payable to the named executive officer in the event he resigns for Good Reason, as defined in his employment Agreement, which will be paid on the same schedule as if he were terminated without Cause.

(3) If within 24 months following a Change in Control, the named executive officer's employment is terminated without cause or the named executive officer resigns for Good Reason, Messrs. Sherman and Williams and Mses. Neuman and Nustad would receive the amount of cash severance equal to 12 times their monthly base salary in a single lump sum, and Mr. Lucia would receive the amount of his cash severance equal to 24 times his monthly base salary and twice his bonus component in a single lump sum. In addition, if Mr. Lucia is terminated without Cause or resigns for Good Reason within six months prior to a Change in Control, Mr. Lucia would receive a lump sum cash payment equal to the excess of the amount he would have received for any equity awards outstanding or deemed to be outstanding, or canceled or forfeited, as a result of termination or Change in Control, over the amount he actually received. The named executive officers would also be entitled to continued health coverage, and accelerated vesting of stock awards and option awards pursuant to the terms of the applicable agreements. Since the employment agreements of named executive officers and the equity awards have double-trigger Change in Control provisions (except with respect to equity awards not assumed by the acquiring entity), the table assumes that both a Change in Control and a subsequent termination of employment has occurred.

(4) In the event the employment of Messrs. Sherman or Williams, or Mses. Neuman or Nustad is terminated due to the executive's Disability, all outstanding stock awards will immediately vest and all option awards will become vested and fully exercisable pursuant to the terms of the applicable award agreements. A termination of Mr. Lucia's employment due to Disability would be treated as a termination without Cause pursuant to his employment agreement.

(5) The amounts in this column represent the amounts payable to the named executive officer if his or her employment is terminated upon death or Retirement. If the named executive officer's employment is terminated as a result of death, all outstanding stock awards will immediately vest and all option awards will become vested and fully exercisable upon termination pursuant to the terms of the applicable award agreements. If the named executive officer's employment is terminated as a result of Retirement, the named executive officer will be treated as continuing in service for vesting purposes and the vested portion of options shall remain exercisable until the second anniversary of such executive's Retirement, or until the last applicable vesting date or option expiration date under the applicable award agreement, whichever is sooner. Under the award agreements, "Retirement" means cessation of employment on or after attaining the age of 60 and having at least 5 years of continuous service with the Company. None of the named executive officers qualified for Retirement as of December 31, 2016.

(6) Amounts represent the target annual short-term (cash) incentive compensation that Mr. Lucia would be entitled to receive under his employment agreement as of the date his employment ends, and not the amount that the Compensation Committee determined to pay Mr. Lucia as set forth in the Non-Equity Incentive Plan Compensation" column of the Summary Compensation Table.

(7) Except for the amounts reported for Mr. Lucia in the columns entitled Termination Without Cause or Resignation for Good Reason, the amounts reported represent the estimated market value of unvested restricted stock units (including any performance-based restricted stock units) that would have vested as of December 31, 2016 under the termination scenarios in the table, calculated based on the aggregate number of accelerated restricted stock units multiplied by the closing market price per share of our common stock on December 30, 2016, the last trading day in 2016, of $18.16 per share.

(8) Except for the amounts reported for Mr. Lucia in the columns entitled Termination Without Cause or Resignation for Good Reason, the amounts reported represent the estimated market value of outstanding stock options, which are not then exercisable (including any performance-based stock options), that would have become exercisable as of December 31, 2016 under the termination scenarios in the table, calculated based on the difference between the aggregate exercise price of all accelerated options and the aggregate market value of the underlying shares as of December 30, 2016, the last trading day in 2016, based on the closing market price per share of our common stock on December 30, 2016 of $18.16 per share.

(9) The amounts reported for Mr. Lucia in the columns entitled Termination Without Cause or Resignation for Good Reason represent the estimated market value of his (i) unvested restricted stock units (including any performance-based restricted stock units) as of December 31, 2016, calculated based on the aggregate number of restricted stock units multiplied by the closing market price per share of our common stock on December 30, 2016, the last trading day in 2016, of $18.16 per share and (ii) and outstanding stock options, which are not then exercisable (including any performance-based stock options) as of December 31, 2016, calculated based on the difference between the aggregate exercise price of such options and the aggregate market value of the underlying shares as of December 30, 2016, the last trading day in 2016, based on the closing market price per share of our common stock on December 30, 2016 of $18.16 per share, which would continue to vest under these termination scenarios pursuant to the terms of his employment agreement. The amounts reported assume that these restricted stock units and stock options are earned, to the extent such awards are performance-based, and fully vest.

Executive Employment Agreements

EMPLOYMENT AGREEMENT WITH MR. LUCIA

HMS and Mr. Lucia entered into the second amendment to his executive employment agreement, effective March 1, 2015, extending the term of his agreement to February 28, 2018. Under his employment agreement, Mr. Lucia is entitled to a minimum annual base salary of $650,000, subject to increase from time to time by the Board of Directors or the Compensation Committee, and a targeted annual short-term (cash) incentive award opportunity of 100% of his base salary. If we terminate Mr. Lucia's employment without Cause, in connection with a Change in Control or otherwise, or if his employment ceases because of his disability or if he terminates his employment with Good Reason, then provided that Mr. Lucia executes and does not revoke a separation agreement and release, and complies with his Restrictive Covenants Agreement, (i) he will be entitled to receive cash severance in an amount equal to (A) 24 times his monthly base salary paid ratably in equal installments over a 24 month period (unless his termination/resignation is in connection with a Change in Control, in which case the payment will be in a single lump sum), and (B) twice his bonus component that will vary depending upon whether the bonus for the year of termination is intended to be "performance-based" compensation and performance is satisfied, in which case it will be paid when bonuses are paid to our other senior executive officers, or whether the bonus is under a different program, in which case it will be his target bonus and will be paid on the same schedule as (A) above (unless his termination/resignation is in connection with a Change in Control, in which case the payment will be in a single lump sum), (ii) he will be entitled to continued health coverage for 24 months or until he becomes eligible for health coverage from another employer, whichever is earlier, and (iii) he will be treated as continuing in service for purposes of the vesting of any equity award until the earliest of: (x) the end of the Noncompetition Period (as defined in Mr. Lucia's Restrictive Covenants Agreement), (y) the last of the applicable vesting dates under such awards, or (z) the termination or violation of the Restrictive Covenants Agreement.

In addition, if we terminate Mr. Lucia's employment without Cause or Mr. Lucia resigns for Good Reason, and such termination occurs within a six-month period before a Change in Control, Mr. Lucia will receive a cash payment equal to the excess of the amount he would have received for such equity awards if he were continuing in service as of the date of the Change in Control and terminated immediately thereafter over the amount actually received, paid in a single lump sum payment at the time provided in the agreement. In the event that any payments and benefits, including any benefits provided to Mr. Lucia or for Mr. Lucia's benefit under the agreement or any other company plan or agreement, become subject to the excise tax under Section 4999 of the Code, such payments and benefits will be "cut-back" to an amount that is less than such amount that would cause the excise tax to the extent that such reduction would result in Mr. Lucia retaining a larger amount on an after-tax basis.

EMPLOYMENT AGREEMENTS WITH OTHER NAMED EXECUTIVE OFFICERS

We have employment agreements that are at-will, subject to certain notice and/or severance provisions, with Mr. Sherman, Ms. Neuman, Ms. Nustad and Mr. Williams. These employment agreements set forth the named executive officer's initial annualized base salary as follows: (i) Mr. Sherman at $500,000, (ii) Ms. Neuman at $450,000, (iii) Ms. Nustad at $350,000 and (iv) Mr. Williams at $400,000, subject to increase from time to time by the Board of Directors or the Compensation Committee. In addition, under the terms of these agreements, the named executive officers are eligible to receive bonus compensation from us in respect of each fiscal year (or portion thereof) during the term of their employment, in each case as may be determined by our Compensation Committee in its sole discretion on the basis of such performance-based or other criteria as it determines appropriate. For 2016, the targeted annual short-term (cash) incentive award opportunity for each other named executive was 65% of his/her base salary.

In the event any of these named executive officers is terminated without Cause, in connection with a Change in Control or otherwise, then provided that such named executive officer executes and does not revoke a separation agreement and release, and complies with the Restrictive Covenants Agreement, the executive will be entitled to receive (i) cash severance in an amount equal to 12 times the executive's monthly base salary paid ratably in equal installments over a 12 month period, (ii) a lump sum amount equal to 12 times the difference between the monthly COBRA coverage premium for the same type of medical and dental coverage (single, family, or other) the executive is receiving as of the date employment ends and then monthly employee contribution, which amount may be used for any purpose, and (iii) any earned but unpaid annual bonus for the calendar year preceding the calendar year in which employment ends. If within 24 months following a Change in Control, Mr. Williams' or Mses. Neuman's or Nustad's employment is terminated without Cause or resigns for Good Reason, provided that the executive executes a separation agreement and release, and complies with the Restrictive Covenants Agreement, he or she will receive the amounts set forth in (i) above in a single lump sum payment, rather than in installments as applies outside of a Change in Control.

Restrictive Covenants Agreements

We also have entered into a Noncompetition, Nonsolicitation, Proprietary and Confidential Information and Developments Agreement (the "Restrictive Covenants Agreement") with each of our named executive officers. Under the terms of the Restrictive Covenants Agreements, in Mr. Lucia's case, for the 24 months following the termination of his employment for any reason, and in the case of the other named executive officers, for the 12 months following the termination of employment for any reason, the named executive officer is generally prohibited from (i) engaging or assisting others to engage in any business or enterprise in the United States that competes with HMS's business, products or services, (ii) soliciting or diverting, or attempting to solicit or divert, the business of any of HMS's current or prospective clients, (iii) soliciting, recruiting or inducing or attempting to solicit, recruit or induce any company employee or independent contractor to leave HMS's employ (or, in some situations, hire any such company employee or independent contractor), and (iv) disclosing or utilizing for the benefit of any entity other than HMS, any system or product development ideas discussed or explored, even if not implemented, during the named executive officer's employment with HMS. The Restrictive Covenants Agreements also set forth certain obligations with respect to proprietary and confidential information and developments and inventions.

Equity Incentive Plans

All named executive officers participated in the Company's equity plans in 2016.

With respect to stock awards and option awards under the 2006 Stock Plan, the 2016 Omnibus Plan, and the related award agreements, such awards generally require that the named executive officer remain employed by the Company (or continue to serve on the Board of Directors if no longer employed by the Company) during the period designated by the Compensation Committee, subject to acceleration of vesting or continued vesting of equity awards in the termination scenarios described in the table under "Potential Payments Upon Termination of Employment or Change in Control." If the named executive officer's employment or Board membership ends before the designated period for any reason (other than upon death, Disability, Retirement, termination without Cause or resignation for Good Reason following a Change in Control, or as otherwise specified in the executive's employment agreement), all unvested restricted stock units will be forfeited and all unexercisable portions of option awards will expire immediately. If we terminate the named executive officer's employment or Board membership for Cause, all stock awards and option awards will immediately terminate without regard to whether such awards are vested or exercisable, respectively.

In general, the treatment of equity upon a Change in Control depends on if the awards are assumed by the successor company. Upon a Change in Control, and unless provided otherwise in the terms of an award agreement or employment agreement, awards granted under the 2006 Stock Plan and the 2016 Omnibus Plan vest on an accelerated basis only if a qualifying termination occurs within 24 months after a Change in Control. In this case, restricted stock unit awards will immediately vest and become free of restrictions, and any outstanding option awards will become fully vested and immediately exercisable. Such options will remain exercisable for 12 months following the qualifying termination, but not beyond the option expiration date set forth in the applicable award agreement. To the extent an award under the 2016 Omnibus Plan is not assumed in a Change in Control, accelerated vesting generally occurs upon a Change in Control.

Key Definitions

The capitalized terms used in the sections under the headings "Potential Payments Upon Termination of Employment or Change in Control" and "Executive Employment Agreements" are defined as below. These definitions are subject to further limitations if necessary to conform to Section 409A of the Code.

"CAUSE"

- Under the employment agreements for each of the named executive officers, "Cause" means: (i) fraud with respect to HMS or any of its subsidiaries and affiliates; (ii) material misrepresentation to any regulatory agency, governmental authority, outside or internal auditors, internal or external company counsel, or the Board of Directors concerning the operation or financial status of HMS or of any of its subsidiaries and affiliates; (iii) theft or embezzlement of assets of HMS or any of its subsidiaries or affiliates; (iv) conviction, or plea of guilty or nolo contendere to any felony (or to a felony charge reduced to a misdemeanor), or, with respect to the named executive officer's employment, to any misdemeanor (other than a traffic violation); (v) material failure to follow HMS's conduct and ethics policies that have been provided or made available to the named executive officer; (vi) a material breach of the named executive officer's employment agreement or Restrictive Covenants Agreement; and/or (vii) continued failure to attempt in good faith to perform his/her duties as reasonably assigned by the Board, in Mr. Lucia's case, or by his/her supervisor in the case of the other named executive officers. Certain of the foregoing definitions permit the named executive officer to attempt to cure the grounds for Cause prior to termination.

- Under the 2006 Stock Plan and the related award agreements, "Cause" is equated with "gross misconduct," and is determined by the Compensation Committee or our Board of Directors.

- During fiscal 2016, we adopted forms of Non-Qualified Stock Option Award Agreement and Restricted Stock Unit Award Agreement for awards under the 2016 Omnibus Plan, under which, "Gross Misconduct" is equated with "Cause" as defined in the employment agreements for the named executive officers. For participants that have not entered into employment agreements with HMS, "Gross Misconduct" means, for purposes of these awards, a conviction of any felony, or a misdemeanor with respect to the participant's employment, or the entering of a plea guilty or nolo contendere to such charge, the embezzlement or theft of HMS property, or a violation of a restrictive covenants or similar agreement with HMS.

"CHANGE IN CONTROL"

- Under the employment agreements and the terms of the 2006 Stock Plan and the 2016 Omnibus Plan, a "Change in Control" generally occurs, subject to specific exceptions, when:

  - a person or group beneficially owns 50.01% or more of our outstanding shares of common stock or the combined voting power of outstanding company securities entitled to vote in the election of directors;

  - there is a merger, consolidation, reorganization, recapitalization or share exchange involving HMS or a sale or other disposition of all or substantially all of HMS's assets, unless, immediately after the transaction (i) all or substantially all of the beneficial owners of HMS's outstanding common stock and outstanding voting securities prior to the transaction own, directly or indirectly, more than 50% of such securities after the transaction in substantially the same proportions as their initial ownership and (ii) no person beneficially owns 50.01%, or more of the outstanding shares of common stock or voting securities of the acquiring corporation (unless such ownership level existed prior to the transaction); or

  - during any one year-period, the individuals who are the continuing directors (as determined under the 2016 Omnibus Plan) cease for any reason to constitute a majority of the Board of Directors or the Board of a successor corporation.

"DISABILITY"

- Under the employment agreements, "Disability" exists when the Company determines that based upon appropriate medical evidence, the named executive officer has become physically or mentally incapacitated so as to render such executive incapable of performing the executive's usual and customary duties, with or without a reasonable accommodation, for at least 180 days (or in Mr. Sherman's case, for at least 120 days), whether or not consecutive, during any 12-month period, or if the named executive officer is found to be disabled within the Company's long-term disability insurance as then in effect.

- Under the related award agreements to the 2006 Stock Plan and the 2016 Omnibus Plan, "Disability" means permanent and total disability as defined by Section 22(e)(3) of the Code.

"GOOD REASON"

- Under the employment agreements, "Good Reason" means, the occurrence, without the named executive officer's prior written consent, of any of the following events: (i) a material diminution in his/her authority, duties or responsibilities (in Mr. Lucia's case, other than in connection with a portion of his authority, duties or responsibilities being assigned to or carried out by a President); (ii) a requirement that, in Mr. Lucia's case, he report to an officer rather than to the Board, and in the case of the other named executive officers, that they report to a new supervisor who has materially diminished authority, duties or responsibilities in comparison to his/her previous supervisor; (iii) a material reduction in the named executive officer's base salary (or, in Mr. Sherman's case, his base salary or target bonus percentage); (iv) HMS's requiring, (a) in the case of Messrs. Lucia and Sherman, that they perform their principal services in a geographic area more than 50 miles from HMS's offices in Irving, Texas, or such other place at which they have agreed to provide such services, and (b) in the case of Mses. Neuman and Nustad and Mr. Williams, that they perform their principal services primarily in a geographic area more than 50 miles from HMS's offices in Dallas, Texas and New York, New York, or such other place of primary employment at which they have agreed to provide such services; or (v) a material breach by HMS of any material provision of the named executive officer's employment agreement. Good Reason is also subject to certain timing restrictions and our ability to cure the proposed Good Reason.

COMPENSATION-RELATED RISK

We regularly assess risks related to our compensation programs for all employees, including non-executive officers. In February 2017, HMS's management and Compensation Committee, with the assistance of FW Cook, conducted a comprehensive assessment of the risks associated with our compensation policies and practices as they relate to risk management practices and risk-taking incentives. The Compensation Committee took into consideration our current compensation structure and the possible risks and mitigation factors associated with each compensation element, including the mix of cash, equity and fixed compensation with short- and long-term incentives, the use of multi-year vesting periods and performance criteria for equity awards, clawback provisions that apply to long-term incentive awards, stock ownership guidelines for executive officers and a cap on bonus pool funding and individual payouts for all short-term incentive awards. Based on the results of this assessment, the Compensation Committee does not believe our compensation policies and practices for employees create risks that are reasonably likely to have a material adverse effect on our company.

As discussed in more detail under the heading "Compensation Discussion and Analysis" above, the Compensation Committee reviews and approves executive compensation programs that focus on having the appropriate balance of features that mitigate compensation-related risk without diminishing the incentive nature of the compensation.

COMPENSATION COMMITTEE INTERLOCKS AND INSIDER PARTICIPATION

None of the persons who served on the Compensation Committee during 2016 (Messrs. Stowe (Chair) and Callen and Ms. Tellez) were or are an officer or employee of HMS or had a related person transaction involving HMS requiring disclosure under Item 404 of Regulation S-K. During 2016, none of our executive officers (i) served as a member of the board of directors or compensation committee (or equivalent entity) of any other entity that had one or more of its executive officers serving as a member of our Compensation Committee or (ii) served as a member of the compensation committee (or equivalent entity) of any other entity that had one or more of its executive officers serving as a member of our Board of Directors.

DIRECTOR COMPENSATION

The Compensation Committee has the responsibility for recommending to the Board of Directors the form and amount of compensation for directors, which are subject to review and adjustment by the Board of Directors from time to time. Directors who are employed by HMS do not receive compensation for their service on the Board of Directors. Directors who are not our employees (non-employee directors) receive cash and equity-based compensation for their services as a director. All of our directors are reimbursed for reasonable expenses incurred in connection with attendance at meetings of the Board of Directors or its committees.

STANDARD COMPENSATION ARRANGEMENTS FOR NON-EMPLOYEE DIRECTORS

Our standard compensation arrangements for non-employee directors for fiscal 2016 are summarized in the table below. Amounts effective during the periods from January 1, 2016 through October 31, 2016, and November 1, 2016 through December 31, 2016, are shown separately to illustrate certain changes approved by the Board of Directors that became effective on November 1, 2016, as discussed in more detail below. Other than the meeting fees, the amounts shown in the table below are per annum.

		Effective 1/1/16-10/31/16 ($)	Effective 11/1/16-12/31/16 ($)
Cash Compensation			
Board Cash Retainer(1)	Board Member	50,000	60,000
Committee Chair Cash Retainer(1)(2)	Audit	20,000	20,000
	Compensation	15,000	15,000
	Compliance and Ethics	15,000	15,000
	Nominating and Governance	15,000	15,000
Committee Member Cash Retainer(1)	Audit	7,000	7,000
	Compensation	5,000	5,000
	Compliance and Ethics	5,000	5,000
	Nominating and Governance	5,000	5,000
Additional Cash Retainer(1)	Lead Independent Director	25,000	25,000
Meeting Fees	Per meeting fee for board meetings in excess of eight during fiscal year; does not include committee meetings	2,000	2,000
Equity-Based Compensation			
Annual Equity Retainer(3)	Board Member	130,000	165,000

(1) All cash retainer fees, unless deferred by a director pursuant to the Director Deferred Compensation Plan, are paid in quarterly installments in arrears. Cash retainer fees are pro-rated for partial periods of service.

(2) Committee chair cash retainers are paid in lieu of the respective committee member cash retainer.

(3) The annual equity retainer to non-employee directors is in the form of a substantially equal number of non-qualified stock options and restricted stock units. See "2016 Non-Employee Director Compensation Decisions" below for a discussion of the 2016 annual equity retainer awards.

2016 Non-Employee Director Compensation Decisions

In October 2016, the Compensation Committee reviewed the design and competitive positioning of our non-employee director compensation program in relation to our peer group. For a discussion regarding our peer group, see "Competitive Pay Position and Peer Group Analyses" under the subsection entitled "Compensation Discussion and Analysis." The peer group analysis included benchmarking data on total director compensation (taking into account our board and committee structure, board leadership structure, and number of meetings held during 2016), as well as pay mix, cash compensation and equity compensation levels, and general practices such as committee chair and member retainers and stock ownership guidelines. With guidance from FW Cook, the Compensation Committee recommended, and the Board approved, certain changes to our non-employee director compensation, effective as of November 1, 2016, as reflected in the table above under the heading "Standard Compensation Arrangements for Non-Employee Directors." These changes resulted in our total non-employee director compensation approximating the median level of our peer group companies.

Based on the recommendation of the Compensation Committee, in November 2016 the Board of Directors determined to change the timing of the annual non-employee director equity grant, which is typically granted during the fourth quarter, to the date of the annual meeting of shareholders beginning in 2017, primarily to align the vesting of the award with the directors' year of service. To compensate the non-employee directors for their board membership from November 2016 through the anticipated date of our 2017 annual meeting of shareholders, the Board approved a pro-rated grant, effective as of November 11, 2016, for each non-employee director (other than Mr. Azar), pursuant to the 2016 Omnibus Incentive Plan, or the 2016 Omnibus Plan, with an aggregate grant date fair value of $87,450. In connection with Mr. Azar's appointment to the Board in October 2016, Mr. Azar received an initial equity grant with an aggregate grant date fair value of $165,000, effective November 11, 2016, pursuant to the 2016 Omnibus Plan. In addition, in connection with Mr. Becker's appointment to the Board in January, 2016, Mr. Becker received an initial equity grant with an aggregate grant date fair value of $130,000, effective as of March 2, 2016, pursuant to the then-effective Fourth Amended and Restated 2006 Stock Plan, as amended (the "2006 Stock Plan"). For additional information regarding the 2016 non-employee director equity awards, see "2016 Director Compensation" below.

Equity-Based Compensation

Equity compensation provided to our non-employee directors consists of a substantially equal number of stock options and restricted stock units granted pursuant to the 2016 Omnibus Plan. Notwithstanding the changes in director grant timing that were approved in November 2016 for grants to be awarded beginning in 2017 (described above), equity grants to our non-employee directors historically have been approved annually in the fourth quarter of the fiscal year, are effective two business days following the filing of our next quarterly report on Form 10-Q with the SEC and vest in four equal installments, with 25% vesting on the last day of the calendar quarter in which the grant was effective and 25% vesting on the last day of each of the next three calendar quarters, provided that the non-employee director remains a member of our Board of Directors through each vesting date. Equity grants for new directors joining the Board are approved by the Compensation Committee at its next meeting following the director's appointment or election and are effective two business days following the filing of our next quarterly report on Form 10-Q or annual report on Form 10-K, as applicable, with the SEC.

Director Compensation Limits

Under the terms of the 2016 Omnibus Plan, the maximum number of shares subject to awards granted during a single fiscal year to any non-employee director, taken together with any cash fees paid to such non-employee director during the fiscal year, is limited to $500,000 in total value (calculating the value of any such awards based on the grant date fair value of such award for financial reporting purposes). The Compensation Committee may make exceptions to this limit for a non-executive chair of the Board or, in extraordinary circumstances, for other individual non-employee directors, as the Committee may determine in its discretion, provided that the non-employee director receiving such additional compensation may not participate in the decision to award such compensation.

Deferred Compensation

Each of our non-employee directors is eligible to participate in our Director Deferred Compensation Plan, under which the non-employee director may elect annually to defer payment of all or a portion of his or her cash retainer fees and annual restricted stock unit grants until the termination of his or her service as a member of the Board. The amount of any cash compensation deferred by a non-employee director is converted into a number of deferred stock units, determined based upon the closing price of our common stock on the NASDAQ Global Select Market on the date such fees would otherwise have been payable, and credited to a deferred compensation account maintained in his or her name. Any restricted stock units that are deferred by a non-employee director are credited to the non-employee director's account in the form of deferred stock units on a share-for-share basis on the date such restricted stock units would otherwise have been payable. The account will be credited with additional deferred stock units on the payment date for any dividends declared on our common stock, calculated based on the closing price of our common stock on the payment date. On the tenth business day of January of the year following a director's termination of service for any reason, the amounts accumulated in the deferred compensation account will be paid in a lump sum in shares of our common stock under the 2016 Omnibus Plan equal to the number of whole deferred stock units in the account and cash in lieu of any fractional shares.

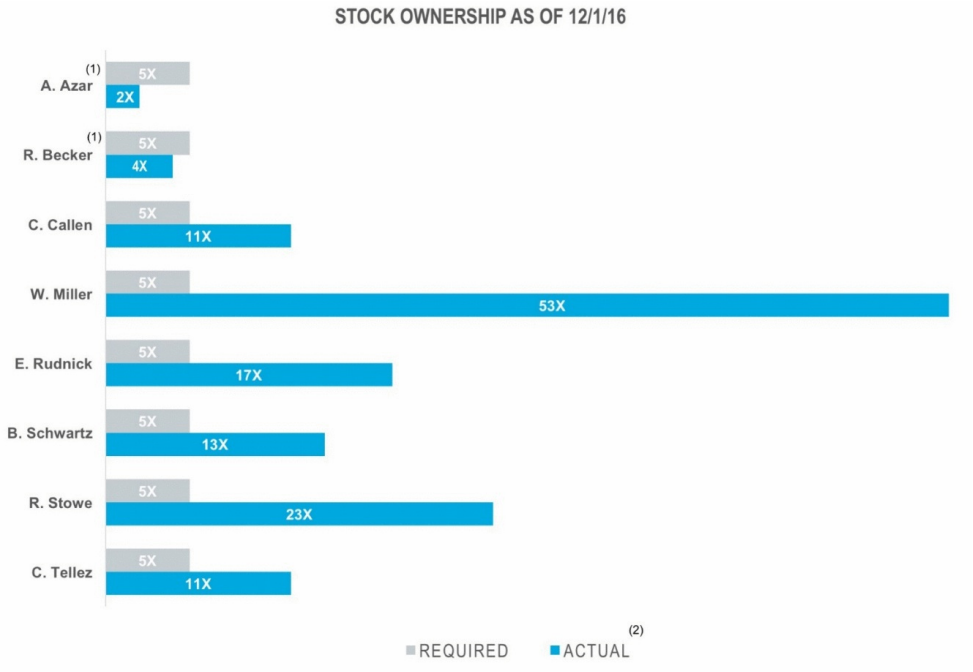
The following table sets forth the number of deferred stock units credited to the accounts of our non-employee directors as of December 31, 2016.

Name	Deferred Stock Units (#)
Azar	7,785
Becker	10,441
Callen	19,041
Holster	35,213
Miller	4,058
Rudnick	13,490
Schwartz	23,592
Stowe	50,381
Tellez	35,948

STOCK OWNERSHIP GUIDELINES FOR NON-EMPLOYEE DIRECTORS

The Board of Directors has established significant stock ownership guidelines for our non-employee directors to encourage non-employee directors to own and hold a meaningful ownership stake in HMS in order to further align their interests and actions with the interests of HMS and its shareholders. Our non-employee directors are required to own shares of HMS common stock equal in value to at least five times their annual cash retainer. For purposes of satisfying these guidelines, a non-employee director's shares owned outright, directly or indirectly, restricted stock and restricted stock units, whether or not vested, and deferred stock units are counted in determining the non-employee director's stock ownership. Each non-employee director is required to achieve his or her respective ownership guidelines within five years after election to the Board of Directors, or in the case of non-employee directors serving at the time the guidelines were adopted (July 28, 2016), within five years of the date of adoption. To mitigate the impact of stock price fluctuation, the number of shares required to be held by each non-employee director to satisfy the guidelines remains fixed through December 1, 2019. The Compensation Committee monitors compliance with these guidelines on an annual basis.

The following graph summarizes the stock ownership of each of our non-employee directors as of December 1, 2016, as a multiple of annual cash retainer in effect as of December 1, 2016, pursuant to our Stock Ownership Guidelines.



(1) Messrs. Azar and Becker joined the Board on October 11, 2016 and January 29, 2016, respectively. Pursuant to our stock ownership guidelines, Mr. Azar has until October 11, 2021 to achieve the ownership guideline, and Mr. Becker has until July 28, 2021 to achieve the ownership guideline.

(2) Rounded down to the nearest multiple.

2016 DIRECTOR COMPENSATION

The following table sets forth compensation earned by each of our non-employee directors for services as a director during fiscal 2016.

Name	Fees Earned or Paid in Cash[1] ($)	Stock Awards[2] [3] ($)	Option Awards[2][4] ($)	Total ($)
Alex M. Azar	13,217	116,723	48,270	178,210
Robert Becker	41,039	155,272	62,169	258,480
Craig R. Callen	61,720	61,860	25,582	149,162
Robert M. Holster [5]	24,038	—	—	24,038
William F. Miller	54,860	61,860	25,582	142,302
Ellen A. Rudnick	81,720	61,860	25,582	169,162
Bart M. Schwartz	78,720	61,860	25,582	166,162
Richard H. Stowe	96,720	61,860	25,582	184,162
Cora M. Tellez	79,360	61,860	25,582	166,802

(1) The amounts in this column include the value of fully vested deferred stock units received under our Director Deferred Compensation Plan in lieu of all or a specified portion of the non-employee director's cash retainer fees, calculated based on the fair market value of the underlying shares on the dates the cash retainer fees would otherwise have been paid. The aggregate number of deferred stock units credited to non-employee directors in lieu of all or a specified portion of the non-employee director's cash retainer fees for 2016, pursuant to each director's election, and the aggregate fair market value (calculated as of the date the units were credited to the non-employee director) of such deferred stock units are shown in Figure 1 below.

(2) The number of outstanding stock options and unvested restricted stock units, whether or not deferred under the Director Deferred Compensation Plan, held by the non-employee directors as of December 31, 2016 is shown in Figure 2 below.

(3) The amounts in this column represent the grant date fair value of the restricted stock units granted to the non-employee directors during fiscal 2016, whether or not deferred, computed in accordance with FASB guidance on stock-based compensation. The relevant assumptions made in the valuations may be found in Note 1 of the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K for the fiscal year ended December 31, 2016. The number of restricted stock units granted to each non-employee director during fiscal 2016 and the number of such restricted stock units that were deferred under our Director Deferred Compensation Plan, pursuant to each director's election, are shown in Figure 3 below. The restricted stock units, whether or not deferred, vest in four equal increments, with the first 25% vesting on the last day of the calendar quarter of the date of grant, and 25% vesting on the last day of each of the next three calendar quarters.

(4) The amounts in this column represent the grant date fair value of the nonqualified stock options granted to the non-employee directors during fiscal 2016, computed in accordance with FASB guidance on stock-based compensation. The relevant assumptions made in the valuations may be found in Note 1 of the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K for the fiscal year ended December 31, 2016. The number of nonqualified stock options granted to each non-employee director during fiscal 2016 is shown in Figure 4 below. The stock options vest in four equal increments, with the first 25% vesting on the last day of the calendar quarter of the date of grant, and 25% vesting on the last day of each of the next three calendar quarters.

(5) Mr. Holster retired from the Board of Directors effective as of the 2016 Annual Meeting held on June 23, 2016, and therefore did not receive an equity grant during fiscal 2016.

FIGURE 1 – DEFERRED STOCK UNITS RECEIVED IN LIEU OF CASH DURING FISCAL 2016

Name	Deferred Stock Units Received in Lieu of 2016 Cash Compensation (#)	Fair Market Value ($)
Azar	728	13,220
Schwartz	2,229	39,362
Stowe	5,478	96,728
Tellez	4,486	79,352

Azar	7,057
Becker	10,441
Callen	3,740
Miller	3,740
Rudnick	3,740
Schwartz	3,740
Stowe	3,740
Tellez	3,740

(1) The amount shown represents the number of nonqualified stock options granted to each non-employee director (other than Mr. Becker) on November 11, 2016. The amount shown for Mr. Becker represents the aggregate number of nonqualified stock options granted on March 2, 2016 (6,701) and November 11, 2016 (3,740).

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

Equity Compensation Plan Information

The following table summarizes information about our equity compensation plans as of December 31, 2016. For additional information about our equity compensation plans see Note 10 – "Stock-Based Compensation" in our Notes to the Consolidated Financial Statements in Item 8. Consolidated Financial Statements and Supplemental Data.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by shareholders	6,515,239(1)	$ 17.35	7,142,562
Equity compensation plans not approved by shareholders	52,140(2)	$ 22.58	—
Total	6,567,379		

(1) This includes stock options and restricted stock units granted under our 2006 Stock Plan and 2016 Omnibus Plan.

(2) This includes stock options granted under the 2011 HDI Plan, which was assumed in connection with our acquisition of HDI and approved by the Compensation Committee of our Board.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following tables set forth information known to us with respect to the beneficial ownership of our common stock as of May 15, 2017 by (i) each of our directors, (ii) each of Messrs. Lucia, Sherman and Williams and Mses. Neuman and Nustad, our named executive officers for fiscal 2016, (iii) all of our directors and current executive officers as a group and (iv) each person (or group of affiliated persons) known by us to be the beneficial owner of more than 5% of our common stock.

The tables are based upon information supplied to us by directors, executive officers and principal shareholders and filings under the Exchange Act. We have based our calculation of the percentage of beneficial ownership on 83,909,845 shares of our common stock outstanding as of May 15, 2017, unless otherwise noted. The beneficial ownership reported in the following tables is determined in accordance with the applicable rules of the SEC and does not necessarily indicate beneficial ownership for any other purpose. For purposes of the following tables, an entity or individual is considered the beneficial owner of shares of common stock if the entity or individual directly or indirectly has or shares voting power or investment power, as defined in the rules of the SEC, with respect to such shares or has the right to acquire beneficial ownership of such shares within 60 days of May 15, 2017.

Unless otherwise noted and subject to applicable community property laws, to our knowledge each shareholder named in the following table possesses sole voting and investment power over the shares listed. The address of each person listed in the table is c/o HMS Holdings Corp., 5615 High Point Drive, Irving, Texas 75038. To our knowledge, as of May 15, 2017, none of our officers or directors has pledged any of the shares that they respectively beneficially own as security.

SECURITY OWNERSHIP OF MANAGEMENT

Name of Beneficial Owner	Number of Outstanding Shares of Common Stock	Number of Shares Underlying Options Exercisable Within 60 Days[1]	Number of Shares Underlying Restricted Stock Units that will Vest Within 60 Days[2][3]	Percent of Class
Directors (who are not officers):				
Alex M. Azar II	—	5,292	—	*
Robert Becker	5,000	9,506	—	*
Craig R. Callen	19,000	18,106	—	*
William F. Miller III	164,940[4]	26,048	935	*
Ellen A. Rudnick	42,980	26,048	467	*
Bart M. Schwartz	20,306	26,048	467	*

* Less than 1% of outstanding shares

(1) Includes the number of shares that could be purchased by exercise of options exercisable at May 15, 2017 or within 60 days thereafter. The amounts reported in this column are excluded from the amounts reported in the column "Number of Outstanding Shares of Common Stock."

(2) Includes the number of shares underlying restricted stock units that are not subject to outstanding performance conditions and vest within 60 days of May 15, 2017, and excludes vested and unvested deferred stock units acquired pursuant to the Director Deferred Compensation Plan. Restricted stock units do not have voting power and are payable solely in shares of HMS common stock. The amounts reported in this column are excluded from the amounts reported in the column "Number of Outstanding Shares of Common Stock."

(3) Excludes deferred stock units (whether or not vested) held by non-employee directors pursuant to the Director Deferred Compensation Plan as follows: Mr. Azar (8,523), Mr. Becker (10,441), Mr. Callen (19,041), Mr. Miller (4,058), Ms. Rudnick (13,490), Mr. Schwartz (24,127), Mr. Stowe (51,672), and Ms. Tellez (37,018).

(4) Includes 9,000 shares of common stock held in trusts for the benefit of Mr. Miller's family. Mr. Miller disclaims beneficial ownership of the shares of common stock held by the trusts.

(5) Includes 522,092 shares of common stock held by the William C. Lucia Family Trust, a revocable trust for which Mr. Lucia serves as trustee.

(6) Includes 10,760 shares of common stock held by a revocable family trust for the benefit of Mr. Sherman's children and for which Mr. Sherman and his spouse serve as trustees.

(7) Includes the named executive officers, the current directors and Mses. Bjorck and South.

(8) Includes the shares reported in footnotes (4), (5) and (6).

Based on a review of filings with the SEC, the following entities hold more than 5% of our outstanding shares of common stock as of the date indicated on the respective filing.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS

Name and Address of Beneficial Owner	Number of Outstanding Shares of Common Stock (#)	Percent of Class (%)
BlackRock, Inc.(1)	9,836,431	11.6
The Vanguard Group(2)	7,907,910	9.3
T. Rowe Price Associates, Inc.(3)	6,819,568	8.0

(1) Based solely on a Schedule 13G/A filed with the SEC on January 12, 2017. According to the Schedule 13G/A, BlackRock, Inc., in its capacity as a parent holding company or control person of subsidiaries that acquired the reported securities, has sole voting power over 9,442,892 shares and sole dispositive power over 9,836,431 shares. The Schedule 13G/A was filed on BlackRock's behalf and on behalf of its subsidiaries BlackRock (Netherlands) B.V.; BlackRock Advisors, LLC; BlackRock Asset Management Canada Limited; BlackRock Asset Management Ireland Limited; BlackRock Asset Management Schweiz AG; BlackRock Financial Management, Inc.; BlackRock Fund Advisors; BlackRock Institutional Trust Company, N.A.; BlackRock Investment Management (Australia) Limited; BlackRock Investment Management (UK) Ltd and BlackRock Investment Management, LLC. BlackRock Fund Advisors beneficially owns 5% or greater of the outstanding shares of the class. BlackRock's principal business address is 55 East 52nd Street, New York, NY 10055.

(2) Based solely on a Schedule 13G/A filed with the SEC on February 13, 2017. According to the Schedule 13G/A, The Vanguard Group, a registered investment advisor, has sole voting power over 167,345 shares, shared voting power over 12,078 shares, sole dispositive power over 7,732,809 shares and shared dispositive power over 175,101 shares. Vanguard Fiduciary Trust Company, a wholly-owned subsidiary of The Vanguard Group, Inc., is the beneficial owner of 163,023 shares as a result of its serving as investment manager of collective trust accounts. Vanguard Investments Australia, Ltd., a wholly-owned subsidiary of The Vanguard Group, Inc., is the beneficial owner of 16,400 shares as a result of its serving as investment manager of Australian investment offerings. The Vanguard Group's principal business address is 100 Vanguard Boulevard, Malvern, PA 19355.

(3) Based solely on a Schedule 13G filed with the SEC on February 2, 2017. According to the Schedule 13G, T. Rowe Price Associates, Inc., a registered investment advisor ("Price Associates"), has sole voting power over 957,740 shares and sole dispositive power over 6,819,568 shares. Price Associates does not serve as custodian of the assets of any of its clients; accordingly, in each instance only the client or the client's custodian or trustee bank has the right to receive dividends paid with respect to, and proceeds from the sale of, such securities. The ultimate power to direct the receipt of dividends paid with respect to, and the proceeds from the sale of, such securities, is vested in the individual and institutional clients which Price Associates serves as investment adviser. Any and all discretionary authority which has been delegated to Price Associates may be revoked in whole or in part at any time. Price Associates' principal business address is 100 E. Pratt Street, Baltimore, MD 21202.

Item 13. Certain Relationships and Related Transactions and Director Independence

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Related Person Transaction Policy

The Audit Committee is responsible for reviewing all transactions with related persons on an ongoing basis for potential conflict of interest situations, and all such transactions must be approved by the Audit Committee. Our Board of Directors has adopted a written Related Person Transaction Policy to assist the Audit Committee in reviewing proposed transactions between HMS and certain individuals deemed to be "related persons." The policy applies to our executive officers, directors, director nominees and 5% shareholders (and their immediate family members),

each of whom we refer to as a "related person," and governs the review of any transaction, arrangement or relationship in which we are a participant, the amount involved exceeds $120,000 and a related person has a direct or indirect material interest. We refer to such a transaction, arrangement or relationship as a "related person transaction."

Review and Approval of Related Person Transactions

Pursuant to our Related Person Transaction Policy, a related person must notify the Corporate Secretary of any plan to enter into, extend or modify any transaction with HMS or its affiliates that could be a related person transaction. The proposed transaction is reviewed and, if deemed appropriate, approved by the Audit Committee prior to entry into the transaction. Under the policy, any related person transactions that are ongoing in nature and previously approved by the Audit Committee will be reviewed annually. A transaction with a related person reviewed under the policy will be considered approved or ratified if it is authorized by the Audit Committee after full disclosure of the related person's interest in the transaction. The Audit Committee will review and consider all relevant information regarding the transaction, including the impact on a director's independence or a Board committee's composition in the event the related person is a director, as it deems appropriate under the circumstances.

The Audit Committee may approve or ratify the transaction only if the Audit Committee determines that, under all of the circumstances, the transaction is in, or is not inconsistent with, the best interests of HMS. In connection with approving a transaction with a related person, the Audit Committee may impose any conditions on the transaction that it deems appropriate. All related person transactions will be disclosed in applicable SEC filings to the extent required by the Securities Act and the Exchange Act and related rules and regulations. There have been no transactions with related persons since the beginning of fiscal 2016 reportable pursuant to applicable SEC rules.

DIRECTOR INDEPENDENCE

A majority of our Board of Directors must be comprised of "independent directors" in accordance with the NASDAQ Marketplace Rules. Under Rule 5605(a)(2) of the NASDAQ Marketplace Rules, a director will only qualify as an "independent director" if, in the opinion of our Board of Directors, that person does not have a relationship which would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. Based on its review of the applicable independence standards and answers to annual questionnaires completed by the directors, our Board of Directors has determined that each of Messrs. Azar, Becker, Callen, Miller, Schwartz and Stowe and Mses. Rudnick and Tellez is an "independent director" as defined under the NASDAQ Marketplace Rules. The Board of Directors previously determined that Mr. Robert M. Holster, who retired from our Board of Directors effective at the 2016 annual meeting of shareholders, was an independent director during the time he served on the Board in 2016.

Item 14. Principal Accounting Fees and Services

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP ("KPMG") has served as our (and our predecessor's) independent registered public accounting firm since 1981. The aggregate fees for the services rendered by KPMG during the past two fiscal years are set forth in the table below.

Audit and Non-Audit Fees

Type of Fee	2016 ($)	2015 ($)
Audit Fees[1]	1,600,000	945,000
Audit-Related Fees[2]	—	—
Tax Fees[3]	1,757,388	320,000
All Other Fees[4]	—	—
Total Fees for Services Provided[5]	**3,357,388**	**1,265,000**

(1) Audit fees consist of fees for professional services rendered for the audit of our consolidated financial statements, review of interim financial statements and services normally provided by the independent registered public accounting firm in connection with regulatory filings, including registration statements. The amount shown for fiscal 2016 represents the aggregate fees estimated to be billed by KPMG for the services rendered.

(2) Audit-related fees may consist of fees for audits of benefit plans and due diligence related to mergers and acquisitions. KPMG did not perform any audit-related services during fiscal years 2015 and 2016.

(3) Tax fees consist of fees for permissible tax services, including tax compliance, tax analysis and tax implementation provided during the ordinary course of operations.

(4) All other fees consist of services not included in the categories above. KPMG did not perform any other services during fiscal years 2015 and 2016.

(5) All audit and non-audit services disclosed in the table were pre-approved by the Audit Committee prior to the provision of the services.

Audit Committee Pre-Approval Policies and Procedures

In accordance with its Charter, the Audit Committee pre-approves all audit and permissible non-audit services provided by our independent registered public accounting firm. At the time of the annual engagement of our independent registered public accounting firm or as soon as practicable thereafter, the Audit Committee pre-approves specific services and/or categories of services that may be provided during the year by the independent registered public accounting firm and the estimated fees for such services. During the year, circumstances may arise when it may become necessary or appropriate to engage the independent registered public accounting firm for additional services not contemplated in the original pre-approval. In such circumstances, our senior management seeks approval from the Audit Committee to engage the independent registered public accounting firm for such additional services. A description of any proposed non-audit services is provided to the Audit Committee along with the estimated fees for its pre-approval. For each proposed service, the independent registered public accounting firm is required to provide detailed supporting documentation at the time of approval to permit the Audit Committee to make a determination whether the performance of such services would impair the auditor's independence. The Audit Committee is regularly informed of any non-audit services provided by the independent auditor pursuant to this pre-approval process.

PART IV

Item 15. Exhibits and Financial Statement Schedules

1. *Financial Statements.*

   The financial statements are listed in the Index to Consolidated Financial Statements on page 100.

2. *Financial Statement Schedules.*

   Financial Statement Schedule II-Valuation and Qualifying Accounts is set forth on page 124. All other financial statement schedules have been omitted as they are either not required, not applicable or the information is otherwise included.

3. *Exhibits.*

   The Exhibits are set forth on the Exhibit Index on page 125 and incorporated herein by reference. The Exhibits include agreements to which the Company is a party or has a beneficial interest. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other actual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties, and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties, and covenants in the agreements may have been used for the purpose of allocating risk between parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.

Item 16. Form 10-K Summary

None.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused this Annual Report on Form 10-K to be signed on its behalf by the undersigned, thereunto duly authorized on June 6, 2017.

HMS HOLDINGS CORP. AND SUBSIDIARIES
INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
HMS Holdings Corp.:

We have audited the accompanying consolidated balance sheets of HMS Holdings Corp. and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2016. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule II. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of HMS Holdings Corp. and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), HMS Holdings Corp.'s internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 6, 2017 expressed an adverse opinion on the effectiveness of the Company's internal control over financial reporting.

KPMG LLP
Dallas, Texas
June 6, 2017

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
HMS Holdings Corp.:

We have audited HMS Holdings Corp.'s internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). HMS Holdings Corp.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. Material weaknesses existed related to the Company not maintaining an effective control environment based on a lack of established reporting lines and defined authorities and responsibilities for financial reporting, and not conducting an effective risk assessment process on a periodic basis to assess the effects of changes in business operations and turnover of its employees that significantly impacts its financial processes and internal control over financial reporting. As a result, the Company did not design and implement effective control activities and management review controls over the estimated liability of appeals and the accounts receivable allowance, including controls over the completeness and accuracy of data used to calculate the respective account balances. These material weaknesses have been identified and included in management's assessment. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of HMS Holdings Corp. and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2016. These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2016 consolidated financial statements, and this report does not affect our report dated June 6, 2017, which expressed an unqualified opinion on those consolidated financial statements.

In our opinion, because of the effect of the aforementioned material weaknesses on the achievement of the objectives of the control criteria, HMS Holdings Corp. has not maintained effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

HMS HOLDINGS CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Business and Summary of Significant Accounting Policies

(a) Business

HMS is a leading provider of cost containment solutions in the U.S. healthcare marketplace. Using innovative technology as well as extensive data services and powerful analytics, the Company delivers coordination of benefits, payment integrity and care management solutions through its operating subsidiaries to help healthcare payers improve performance and outcomes. The Company is managed and operates as one business segment with a single management team that reports to the Chief Executive Officer. The Company serves state Medicaid programs, commercial health plans, federal government health agencies, government and private employers, child support agencies, and other healthcare payers and sponsors. Together the various services help the Company's customers recover improper payments; prevent future improper payments; reduce fraud, waste and abuse; and ensure regulatory compliance.

(b) Summary of Significant Accounting Policies

(i) Principles of Consolidation

The consolidated financial statements include the Company's accounts and transactions and those of the Company's wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

(ii) Use of Estimates

The preparation of the consolidated financial statements in conformity with United States Generally Accepted Accounting Principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(iii) Reclassifications

In the 2015 Consolidated Balance Sheets, the Company reported Accounts Receivable, net of allowance for doubtful accounts and estimated allowance for appeals. In the 2016 Consolidated Balance Sheets, Accounts Receivable, net of allowance includes the allowance for doubtful accounts, revenue adjustments and the estimated allowance for appeals.

(iv) Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents consist of deposits that are readily convertible into cash.

(v) Concentration of Credit Risk

The Company's policy is to limit credit exposure by placing cash in accounts which are exposed to minimal interest rate and credit risk. HMS maintains cash and cash equivalents in cash depository accounts with large financial institutions with a minimum credit rating of A1/P1 or better, as defined by Standard and Poor's. The balance at these institutions generally exceeds the maximum balance insured by the Federal Deposit Insurance Corporation of up to $250,000 per entity. HMS has not experienced any losses in cash and cash equivalents and believes these cash and cash equivalents do not expose the Company to any significant credit risk.

The Company is subject to potential credit risk related to changes in economic conditions within the healthcare market. However, HMS believes that the billing and collection policies are adequate to minimize the potential credit risk. The Company performs ongoing credit evaluations of customers and generally does not require collateral.

(vi) Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is provided over the estimated useful lives of the assets utilizing the straight-line method. HMS amortizes leasehold improvements on a straight-line basis over the term of the related lease which is typically five years, including any anticipated renewal periods, or the life of the leasehold improvement, whichever is shorter. Equipment leased under capital leases is depreciated over the shorter of (i) the term of the lease and (ii) the estimated useful life of the equipment. Capitalized software costs related to software that is acquired or developed for internal use while in the application development stage. All other costs to develop software for internal use, either in the preliminary project stage or post-implementation stage, are expensed as incurred. Amortization of capitalized software is calculated on a straight-line basis over the expected economic life. Land is not depreciated.

Estimated useful lives are as follows:

Property and Equipment	Useful Life (in years)
Equipment	2 - 3
Leasehold improvements	3 - 10
Furniture and fixtures	3 - 5
Capitalized software	3 - 10
Building and building improvements	up to 39.5

Property and equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets, which amount is charged to earnings. Fair value is based on a projection of the estimated discounted future net cash flows expected to result from the asset group, using a discount rate reflective of the Company's cost of funds. The Company did not recognize any impairment charges related to property and equipment during the years ended December 31, 2016, 2015 or 2014.

(vii) Intangible assets

The Company records assets acquired and liabilities assumed in a business combination based upon their acquisition date fair values. In most instances there is not a readily defined or listed market price for individual assets and liabilities acquired in connection with a business, including intangible assets. The determination of fair value for individual assets and liabilities in many instances requires a high degree of estimation and the valuation of intangible assets, in particular, is subjective. Significant estimates in intangible assets include, but are not limited to, growth rates, discount rates, customer attrition rates, expected levels of revenues, earnings, cash flows and tax rates. The use of different valuation techniques and assumptions are inherently uncertain and unpredictable and, as a result, actual results may differ from estimates. All of the Company's intangible assets are subject to amortization and are amortized using the straight-line method over their estimated period of benefit. Estimated useful lives are as follows:

Intangible Assets	Useful Life (in years)
Customer relationships	5 - 10
Restrictive covenants	3 - 7
Trade name	3 - 5
Intellectual property	5

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. When indicators exist, recoverability of assets is measured by a comparison of the carrying value of the asset group to the estimated undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying value of the asset group exceeds the fair value of the assets, which amount is charged to earnings. Fair value is based on a projection of the estimated discounted future net cash flows expected to result from the asset group, using a discount rate reflective of the Company's cost of funds. The Company did not recognize any impairment charges related to intangible assets during the years ended December 31, 2016, 2015 or 2014.

(viii) Goodwill

Goodwill is the excess of acquisition costs over the fair values of assets and liabilities of acquired businesses. During the measurement period, which is up to one year from the acquisition date, the Company may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to earnings.

Goodwill is subject to a periodic assessment for impairment. HMS assesses goodwill for impairment on an annual basis as of June 30th of each year or more frequently if an event occurs or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Assessment of goodwill impairment is at the HMS Holdings Corp. entity level as the Company operates as a single reporting unit. The Company has the option to perform a qualitative assessment to determine if impairment is more likely than not to have occurred. If the Company can support the conclusion that it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then HMS would not need to perform the two-step impairment test for that reporting unit. If the Company cannot support such a conclusion, or the Company does not elect to perform the qualitative assessment, then the first step of the goodwill impairment test is used to identify potential impairment by comparing the fair value of a reporting unit with its carrying amount, including goodwill. HMS completed the annual impairment test as of June 30, 2016 using the optional qualitative assessment and determined no impairment existed. There were no impairment charges related to goodwill during the years ended December 31, 2016, 2015 or 2014.

(ix) Income Taxes

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. This method also requires the recognition of future tax benefits for net operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance is provided against deferred tax assets to the extent their realization is not more likely than not. Uncertain income tax positions are accounted for by prescribing a minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. Although the Company believes that it has adequately reserved for uncertain tax positions (including interest and penalties), it can provide no assurance that the final tax outcome of these matters will not be materially different. The Company makes adjustments to these reserves in accordance with the income tax accounting guidance when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made, and could have a material impact on our financial condition and operating results.

(x) Revenue Recognition

The Company provides services under contracts that contain various fee structures, including contingency fee and fixed fee arrangements. Revenue is recognized when a contract exists, services have been provided to the customer, the fee is fixed and determinable, and collectability is reasonably assured. In addition, the Company has contracts with the federal government which are generally cost-plus or time and material based. Revenue on cost-plus contracts is recognized based on costs incurred plus the negotiated fee earned. Revenue on time and materials contracts is recognized based on hours worked and expenses incurred. In addition, some of the Company's contracts may include customer acceptance provisions. Formal customer sign-off is not always necessary to recognize revenue, provided HMS objectively demonstrates that the criteria specified in the acceptance provision are satisfied. Due to the range of products and services that HMS provides and the differing fee structures associated with each type of contract, revenue may be recognized in irregular increments. A portion of our revenue is recorded net of an estimate of future revenue adjustments, with an offsetting entry to accounts receivable allowance, based on historical patterns of billing adjustments, length of operating and collection cycle and customer negotiations, behaviors and payment patterns. Changes in these estimates are recorded to revenue in the period of change.

(xi) Estimated Liability for Appeals

Under the Company's Recovery Audit Contractor ("RAC") contract with Centers for Medicare and Medicaid Services ("CMS"), the Medicaid RAC contracts with various states, and similar contracts for commercial health plan customers, HMS recognizes revenue when findings are sent to the customer for offset against future claims payments. Providers have the right to appeal a finding and may pursue additional appeals if the initial appeal is found in favor of the customer. HMS records a) a liability for findings which have been adjudicated in favor of providers and b) an estimated liability for findings that are probable of being returned to providers following a successful appeal. Resolution of appeals can take substantial time to resolve as there is a significant backlog in the system for resolving appeals, as over the course of the Company's existing RAC contract, healthcare providers have increased their pursuit of appeals beyond the first and second levels of appeals to the third level of appeal, where cases are heard by Administrative Law Judges ("ALJs"). In the Company's experience, decisions at the third level of appeal are the least favorable as ALJs exercise greater discretion and there is less predictability in the ALJ decisions as compared to appeals for the first or second levels. The estimated liability is based on the amount of revenue that is subject to appeals, closures or other adjustments and the Company's historical experience with appeals. The liability for appeals is an offset to revenue to the Company's Consolidated Statements of Income. The total liability for appeals balance of $30.8 million and $33.1 million as of December 31, 2016 and 2015, respectively, includes $17.3 million and $15.9 million, respectively, of CMS liabilities which represents findings which have been adjudicated in favor of providers and $11.1 million and $12.8 million, respectively, of CMS liabilities which represents an estimate of findings that are probable of being returned to providers following a successful appeal. To the extent the amount to be returned to providers following a successful appeal, closure or other adjustment exceeds or is less than the amount recorded, revenue in the applicable period would be reduced or increased by such amount. Any future changes to any of the Company's customer contracts, including further modifications to the transition plan for incumbent Medicare RACs may require the Company to apply different assumptions that could materially affect the Company's liability for future periods.

(xii) Expense Classifications

HMS cost of services is presented in the categories set forth below. Each category within cost of services excludes expenses relating to Selling, general and administrative expenses ("SG&A") functions, which are presented separately as a component of total operating costs. A description of the primary expenses included in each category is as follows:

Cost of Services:

- *Compensation:* Salary, fringe benefits, bonus and stock-based compensation.
- *Data processing:* Hardware, software and data communication costs.
- *Occupancy:* Rent, utilities, depreciation, office equipment and repair and maintenance costs.
- *Direct project expense:* Variable costs incurred from third party providers that are directly associated with specific revenue generating projects and employee travel expenses.
- *Other operating expense:* Professional fees, temporary staffing, travel and entertainment, insurance and local and property tax costs.
- *Amortization of acquisition related software and intangible assets:* Amortization of the cost of acquisition related software and intangible assets.

SG&A:

- Expenses related to general management, marketing and administration activities.

(xiii) Estimating Valuation Allowances and Accrued Liabilities

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reported period. In particular, management must make estimates of the probability of collecting accounts receivable. When evaluating the adequacy of the accounts receivable allowance, management reviews the accounts receivables based on an analysis of historical revenue adjustments, bad debts, customer concentrations, customer credit-worthiness, current economic trends and changes in customer payment terms. As of December 31, 2016 and 2015, the accounts receivable balance was $173.6 million and $169.1 million, net of allowance of $10.8 million and $11.5 million, respectively.

(xiv) Stock-Based Compensation

Long-Term Incentive Award Plans

The Company grants equity-based compensation awards, including stock options and restricted stock units, to HMS employees and non-employee directors under the 2016 Omnibus Plan, which was approved by the Company's shareholders on June 23, 2016. The 2016 Omnibus Plan replaced and superseded the Company's 2006 Stock Plan and 2011 HDI Plan. All of the Company's employees as well as HMS non-employee directors are eligible to participate in the 2016 Omnibus Plan. Awards granted under the 2016 Omnibus Plan generally vest over one to four years. The exercise price of stock options granted under the 2016 Omnibus Plan may not be less than the fair market value of a share of stock on the grant date, as measured by the closing price of the Company's common stock on the NASDAQ Global Select Market and the term of a stock option may not exceed ten years. Certain stock option and restricted stock unit awards granted to senior executives are subject to performance-based vesting conditions. The performance-based awards are market condition awards as the performance condition is based on the Company's common stock price over the applicable performance period.

Stock-Based Compensation Expense

For awards subject to service-based vesting conditions, the Company recognizes stock-based compensation expense equal to the grant date fair value of the award on a straight-line basis over the requisite service period, which is generally the vesting term. For the performance-based awards subject to market conditions, the Company recognizes stock-based compensation expense equal to the grant date fair value of the stock options on a straight-line basis over the requisite service period.

The fair value of each option grant with service-based conditions is estimated using the Black-Scholes pricing model. The fair value of each option grant with market-based conditions is estimated using a Monte Carlo simulation model. The fair value of each restricted stock unit is calculated based on the closing sale price of the Company's common stock on the grant date.

The determination of the fair value of the stock options on the grant date using the models above is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. Certain key variables include: the Company's expected stock price volatility over the expected term of the awards; a risk-free interest rate; and any expected dividends. The Company estimates stock price volatility based on the historical volatility of the Company's common stock and estimates the expected term of the awards based on the Company's historical option exercises for similar types of stock option awards. The assumed risk-free interest rate is based on the yield on the measurement date of a zero-coupon U.S. Treasury bond with a maturity period equal to the option's expected term. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore, uses an expected dividend yield of zero in the option valuation models. The fair value of all awards also includes an estimate of expected forfeitures. Forfeitures are estimated based on historical experience. If actual forfeitures vary from estimates, a difference in compensation expense will be recognized in the period the actual forfeitures occur. Upon the exercise of stock options or the vesting of restricted stock units, the resulting excess tax benefits or deficiencies, if any, are recognized as income tax expense or benefit. Additionally, excess tax benefits are required to be reflected as a cash flow operating activity.

(xv) Fair Value of Financial Instruments

Financial instruments are categorized into a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. In the event the fair value is not readily available or determinable, the financial instrument is carried at cost and referred to as a cost method investment. The fair value hierarchy is as follows:

- *Level 1*: Observable inputs such as quoted prices in active markets;
- *Level 2:* Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- *Level 3:* Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Financial instruments (principally cash and cash equivalents, accounts receivable, accounts payable and accrued expenses) are carried at cost, which approximates fair value due to the short-term maturity of these instruments. The Company's long-term credit facility is carried at cost. Due to the variable interest rate associated with the revolving credit facility and the variable interest margin based upon the Company's consolidated leverage ratio, cost approximates its fair value. The fair value of the contingent consideration liability is determined using Level 3 inputs. See Note 4 – "Acquisitions" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the fair value of financial instruments.

(xvi) Leases

HMS accounts for the lease agreements as either operating or capital leases, depending on certain defined criteria. Lease costs are amortized on a straight-line basis without regard to deferred payment terms, such as rent holidays, that defer the commencement date of required payments. Additionally, incentives such as tenant improvement allowances, are capitalized and are treated as a reduction of rental expense over the term of the lease agreement.

(xvii) Contingencies

From time to time, HMS is involved in legal proceedings in the ordinary course of business. The Company assesses the likelihood of any adverse judgments or outcomes to these contingencies as well as potential ranges or probable losses and establish reserves accordingly. HMS records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonable estimated. Significant judgment is required to determine both probability and the estimated amount. HMS reviews these provisions at least quarterly and adjusts the provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel and updated information. Litigation is inherently unpredictable and is subject to significant uncertainties, some of which are beyond the Company's control. The amount of reserves required may change in future periods due to new developments in each matter or changes in approach to a matter such as a change in settlement strategy.

(xviii) Recent Accounting Guidance

Recently Adopted Accounting Guidance

In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-05, *Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement* ("ASU 2015-05"). ASU 2015-05 provides explicit guidance to help companies evaluate the accounting for fees paid by a customer in a cloud computing arrangement and clarifies that if a cloud computing arrangement includes a software license, the customer should account for the license consistent with its accounting for other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. ASU 2015-05 is effective for annual reporting periods beginning after December 15, 2015, including interim periods within such annual reporting periods with early adoption permitted. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* ("ASU 2015-17"). ASU 2015-17 simplifies the current presentation of separately classifying deferred tax assets and deferred tax liabilities as current and noncurrent in a classified balance sheet by requiring companies to present them as noncurrent. ASU 2015-17, as amended, is effective for annual reporting periods beginning after December 15, 2016, including interim periods within such annual reporting periods with early adoption permitted. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2016. The Company elected to apply the presentation requirements for the balance sheet retrospectively to all periods presented which resulted in a decrease to total current assets and total long term liabilities of $7.5 million at December 31, 2015.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*, ("ASU 2016-09") that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when stock awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows Companies to repurchase more of an employee's vesting shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made to tax authorities on an employee's behalf for withheld shares should be presented as a financing activity on the cash flows statement and provides an accounting policy election to account for forfeitures as they occur. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within such annual reporting periods with early adoption permitted. The Company elected to early adopt the new guidance in the fourth quarter of fiscal year 2016 which requires us to reflect any adjustments as of January 1, 2016, the beginning of the annual period that includes the interim period of adoption. The primary impact of adoption was the recognition of excess tax benefits in the provision for income taxes rather than paid-in capital for all periods in fiscal year 2016. Additional amendments to the accounting for income taxes and minimum statutory withholding tax requirements had no impact to retained earnings as of January 1, 2016, where the cumulative effect of these changes are required to be recorded. The Company elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. We elected to apply the presentation requirements for cash flows related to excess tax benefits retrospectively to all periods presented which resulted in an increase to both net cash from operations and net cash used in financing of $1.6 million and $1.8 million for the years ended December 31, 2015 and 2014, respectively. Adoption of the new standard resulted in the recognition of net excess tax benefits in the provision for income taxes rather than paid-in capital of $1.9 million for the year ended December 31, 2016. The presentation requirements for cash flows related to employee taxes paid for withheld shares had no impact to any of the periods presented on the consolidated statements of cash flow since such cash flows have historically been presented as a financing activity.

Recent Accounting Guidance Not Yet Adopted

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) ("ASU 2014-09"), which is the new comprehensive revenue recognition standard that will supersede all existing revenue recognition guidance under U.S. GAAP. The FASB has recently issued several amendments to the standard, including: principal versus agent considerations; clarification on accounting for licenses of intellectual property and identifying performance obligations; narrow scope-improvements and practical expedients; and technical corrections and improvements. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within such annual reporting periods with early adoption permitted. The Company does not plan to early adopt this guidance and therefore will adopt on January 1, 2018. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective method). The Company is in the process of determining the adoption method but preliminarily expects to use the modified retrospective method. The Company, with the assistance of external consultants, has developed and is currently following a preliminary implementation plan. One major element of this plan involves reviewing historical contracts to quantify the impact that adoption will have on the Company's operations. Depending on the results of the Company's review, there could be material changes to the timing and recognition of revenues and certain associated expenses. The Company expects to complete the review of historical contracts and the overall assessment process, including selecting a transition plan and an assessment of the overall impact to the results of operations by the end of the third quarter of 2017.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* ("ASU 2016-02"). ASU 2016-02 will require most lessees to recognize a majority of the Company's leases on the balance sheet, which will increase reported assets and liabilities. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018 including interim periods within such annual reporting periods with early adoption permitted. The Company has not early adopted this guidance and is currently evaluating the impact on the Company's consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *Statements of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"). The amendment clarifies where certain cash receipts and cash payments are presented and classified in the statement of cash flows. Current guidance does not include specific guidance on the eight classification issues presented in the amendments, which are intended to reduce diversity in practice with respect to classification and presentation of such cash receipts and payments. The amendments are effective for annual reporting periods beginning after December 15, 2017, and for interim reporting periods within such annual periods. The Company is currently evaluating the impact on the Company's financial statements.

In January 2017, the FASB issued ASU No. 2017-01, *Business Combinations (Topic 805) – Clarifying the Definition of a Business* ("ASU 2017-01"). ASU 2017-01 finalizes previous proposals regarding shareholder concerns that the definition of a business is applied too broadly. The guidance assists entities with evaluating whether transactions should be accounted for as acquisitions of assets or of businesses. The amendments are effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The Company is currently evaluating the impact on the Company's financial statements of adopting this guidance.

In January 2017, the FASB issued ASU No. 2017-04, *Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment (* "ASU 2017-04"). This amendment simplifies the manner in which an entity is required to test for goodwill impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. The amendment simplifies this approach by having the entity (1) perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount, and (2) recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, with the understanding that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The amendment is effective for public entities that are U.S. Securities and Exchange Commission ("SEC") filers prospectively for their annual, or any interim, goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted for all entities for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company is currently evaluating the impact on the Company's financial statements of adopting this guidance.

Other new pronouncements issued but not effective until after December 31, 2016, if any, are not expected to have a material impact on the Company's financial position, results of operations or liquidity.

2. Property and Equipment

Property and equipment consisted of the following (*in thousands*):

	December 31, 2016	December 31, 2015
Equipment	$ 94,345	$ 90,496
Leasehold improvements	8,637	8,512
Building	8,624	8,624
Building improvements	12,671	11,367
Land	2,769	2,769
Furniture and fixtures	10,728	10,858
Capitalized software	110,696	104,266
	248,470	236,892
Less: accumulated depreciation and amortization	(156,303)	(140,341)
Property and equipment, net	92,167	96,551

	December 31,		
(in millions)	2016	2015	2014
Depreciation and amortization expense related to property and equipment	$ 24.9	$ 30.3	$ 32.9

Net capital leases included as part of equipment were approximately $4,000 and $51,000 at December 31, 2016 and 2015, respectively. Accumulated depreciation for equipment under capital leases was approximately $6.1 million and $6.0 million for the years ended December 31, 2016 and 2015. Depreciation expense for equipment under capital leases for the years ended December 31, 2016, 2015 and 2014 was approximately $40,000, $1.2 million, and $1.6 million, respectively.

3. Intangible Assets

Intangible assets consisted of the following (*in thousands*):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
December 31, 2016			
Customer relationships	$ 103,090	$ (71,914)	$ 31,176
Trade name	15,936	(11,393)	4,543
Intellectual property	2,100	(140)	1,960
Restrictive covenants	133	(15)	118
Total	$ 121,259	$ (83,462)	$ 37,797
December 31, 2015			
Customer relationships	$ 101,806	$ (57,497)	$ 44,309
Trade name	17,000	(10,221)	6,779
Restrictive covenants	16,800	(13,580)	3,220
Total	$ 135,606	$ (81,298)	$ 54,308

In 2016, the Company wrote-off approximately $16.8 million of fully amortized restrictive covenant intangibles and $1.2 million of fully amortized trade name intangibles.

Amortization expense of intangible assets is expected to approximate the following (*in thousands*):

Year ending December 31,	
2017	$ 17,306
2018	16,685
2019	2,245
2020	791
2021	463
Thereafter	307

For the years ended December 31, 2016, 2015 and 2014, amortization expense related to intangible assets was $20.2 million, $20.3 million and $20.7 million, respectively.

4. Acquisitions

On September 2, 2016, the Company acquired the outstanding capital stock of Essette, a care management technology company which helps risk-bearing organizations manage the care delivered to their members, for aggregate consideration of $24.2 million, which is primarily comprised of cash payments of $21.3 million. To fund the purchase price, the Company utilized cash on hand. The acquisition is subject to adjustment based upon the final amount of adjusted working capital of Essette at closing.

The Company allocated the purchase price, net of cash acquired, to a) at their acquisition date fair values, the following tangible assets: net deferred tax assets of $0.9 million and other net assets of $0.9 million and b) at their acquisition date fair values, the following amortizing intangible assets: intellectual property of $2.1 million, customer relationships of $1.3 million, restrictive covenants of $0.1 million, and trade name of $0.1 million. Goodwill of $18.2 million represents the excess purchase price over the net identifiable tangible and intangible assets. The intangible assets are valued using various methods which requires several judgments, including growth rates, discount rates, customer attrition rates, and expected levels of revenues, earnings, cash flows and tax rates. The intangible assets are amortized over their estimated useful lives on a straight-line basis and are not expected to be deductible for tax purposes. The goodwill recognized from the acquisition was a result of expected synergies to be realized from future revenue growth, is not expected to be deductible for tax purposes, has an indefinite useful life and will be included in the Company's annual impairment testing. Contingent consideration, up to an aggregate maximum $12.0 million, will be payable in calendar years 2017, 2018, or 2019, respectively, should Essette achieve certain revenue targets as defined in the stock purchase agreement. The contingent consideration is valued using a method which requires several judgments but primarily include discount rates and expected levels of revenues. In the fourth quarter 2016, purchase accounting adjustments included a $1.1 million increase to total transaction consideration and to goodwill, a $0.7 million increase to other net assets, and a $0.2 million increase in the customer relationship intangible. The amounts shown above may change in the near term as management continues to assess the fair value of acquired assets and liabilities.

The acquisition was not significant to the Company's consolidated financial statements; therefore, pro forma results of the operations related to this business acquisition for the year ended December 31, 2015 have not been presented. The immaterial results of Essette's operations since September 2, 2016 have been included in the Company's consolidated financial statements.

There were no changes in the carrying amount of goodwill for the years ended December 31, 2015 and 2014.

5. Accounts Payable, Accrued Expenses and Other Liabilities

Accounts payable, accrued expenses and other liabilities consisted of the following (*in thousands*):

	December 31, 2016	December 31, 2015
Accounts payable, trade	$ 13,847	$ 7,790
Accrued compensation and other	28,507	21,948
Accrued operating expenses	17,048	21,923
Total accounts payable, accrued expenses and other liabilities	$ 59,402	$ 51,661

6. Income Taxes

Income tax expense is as follows (*in thousands*):

	December 31,		
	2016	2015	2014
Current tax expense:			
Federal	$ 16,274	$ 25,852	$ 20,244
State	2,929	3,450	4,429
Total current tax expense:	19,203	29,302	24,673
Deferred tax expense (benefit):			
Federal	(7,115)	(12,571)	(12,421)
State	(253)	(1,449)	131
Total deferred tax benefit:	(7,368)	(14,020)	(12,290)
Total income tax expense	$ 11,835	$ 15,282	$ 12,383

A reconciliation of the income tax expense calculated using the applicable federal statutory rate to the actual income tax expense is as follows (*in thousands*):

	December 31,					
	2016	%	2015	%	2014	%
Computed at federal statutory rate	$ 17,315	35.0	$ 13,934	35.0	$ 9,215	35.0
State and local tax expense, net of federal benefit	2,448	5.0	1,038	2.6	2,973	11.3
Net perm deduction and credit tax benefits from prior years	(6,213)	(12.6)	-	-	-	-
Net perm deduction and credit tax benefits from current year	(1,509)	(3.1)	-	-	-	-
Other, net	(206)	(0.4)	310	0.8	195	0.7
Total income tax expense	$ 11,835	23.9	$ 15,282	38.4	$ 12,383	47.0

The Company's effective tax rate decreased to 23.9% for the year ended December 31, 2016 from 38.4% for the year ended December 31, 2015, primarily due to the Company's recognition of tax benefits for R&D Credits and the Section 199 Deduction, as discussed below.

As a result of an analysis performed during 2016 the Company determined certain activities it performs qualify for (i) Research and Development Tax Credits ("R&D Credits") provided in Internal Revenue Code ("IRC") Section 41 and (ii) the U.S. Production activities deduction ("Section 199 Deduction") provided in IRC Section 199. During the third quarter of 2016, the Company determined it was economically viable to claim the R&D Credits and the Section 199 Deduction for all open tax years. As a result, the Company recognized net tax benefits during the year ended December 31, 2016 of $2.2 million and $5.7 million for federal and state R&D Credits and the Section 199 Deduction, respectively, relating to tax years 2012 through 2016.

Deferred income taxes are recognized for the future tax consequences of temporary differences between the financial statement and tax bases of assets and liabilities. The tax effect of temporary differences that give rise to a significant portion of the deferred tax assets and deferred tax liabilities are as follows (in thousands):

	December 31, 2016	December 31, 2015
Deferred tax assets:		
Stock-based compensation	$ 10,373	$ 9,059
Goodwill and intangible assets	10,711	10,449
Allowance for doubtful accounts	4,108	1,766
Deferred rent	1,120	1,119
Tenant improvements	1,226	1,392
Estimated liability for appeals	11,596	-
Net operating loss carry-forwards	2,141	113
Property and equipment	79	-
Accrued expenses and other	7,811	6,298
Total deferred tax assets	49,165	30,196
Deferred tax liabilities:		
Goodwill and intangible assets	52,729	56,790
Section 481(a) adjustment	14,757	-
Property and equipment	-	894
Capitalized software cost	4,396	3,473
Total deferred tax liabilities	71,882	61,157
Total net deferred tax liabilities	$ 22,717	$ 30,961

Included in Other liabilities on the Consolidated Balance Sheets, are the total amount of unrecognized tax benefits of approximately $7.4 million and $1.3 million as of December 31, 2016 and 2015, respectively, (net of the federal benefit for state issues) that, if recognized, would favorably affect the Company's future effective tax rate. Also included in Other Liabilities on the Consolidated Balance Sheets, are accrued liabilities for interest expense and penalties related to unrecognized tax benefits of $0.6 million and $0.4 million as of December 31, 2016 and 2015, respectively. HMS includes interest expense and penalties in the provision for income taxes in the Consolidated Statements of Income. The amount of interest expense (net of federal and state income tax benefits) and penalties in the Consolidated Statements of Income for the years ended December 31, 2016, 2015 and 2014 was $0.2 million, $0.6 million and $0.4 million, respectively. The Company believes it is reasonably possible the amount of unrecognized tax benefits may decrease by $0.9 million during 2017, due to the expiration of the statute of limitations in various state jurisdictions.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits are as follows *(in thousands)*:

	December 31, 2016	December 31, 2015
Unrecognized tax benefits at January 1	$ 1,329	$ 1,329
Additions for tax positions taken during prior periods	763	565
Additions for tax positions taken during current period including amended prior years	5,931	-
Reductions related to the expiration of statutes of limitations	(590)	(565)
Unrecognized tax benefits at December 31	$ 7,433	$ 1,329

The Company increased the provision for unrecognized tax benefits by $5.9 million during the year ended December 31, 2016, related to tax benefits recognized associated with R&D Credits and the Section 199 Deduction for all open tax years.

At December 31, 2016, HMS had federal and state pre-tax net operating loss carryforwards of approximately $13.8 million, which will be available to offset future taxable income. If not used, these carryforwards will expire between 2020 and 2036.The Company files income tax returns with the U.S. Federal government and various state jurisdictions. HMS is no longer subject to U.S. Federal income tax examinations for years before 2012. The Company received notification the Internal Revenue Service intends to audit years 2013 and 2014. HMS operates in a number of state and local jurisdictions, most of which have never audited the Company's records. Accordingly, HMS is subject to state and local income tax examinations based upon the various statutes of limitations in each jurisdiction. The Company is currently being examined by the State of New York.

7. Credit Agreement

During the years ended December 31, 2016 and 2015, no principal payments were made against the Company's revolving credit facility. The $197.8 million principal balance of the revolving credit facility is due in May 2018. The Company has commenced discussions to extend or refinance the revolving credit facility.

The Credit Agreement provides for an initial $500 million revolving credit facility, and, under specified circumstances, the revolving credit facility can be increased or one or more incremental term loan facilities can be added, provided that the incremental credit facilities do not exceed in the aggregate the sum of (a) $75 million plus (b) an additional amount not less than $25 million, so long as the total secured leverage ratio, calculated giving pro forma effect to the requested incremental borrowing and other customary and appropriate pro forma adjustment events, including any permitted acquisitions, is no greater than 2.5:1.0. The Company's obligations and any amounts due under the Credit Agreement are guaranteed by the Company's material 100% owned subsidiaries and secured by a security interest in all or substantially all of the Company's and the Company's subsidiaries' physical assets.

The Credit Agreement requires the Company to comply with certain principal financial covenants and other covenants, including a maximum consolidated leverage ratio reducing from 3.50:1.00 to 3.25:1.00 over the next five years and a minimum interest coverage ratio of 3.00:1.00. See Note 14 – "Subsequent Events" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the amendment to our Credit Agreement.

The interest rates applicable to the revolving credit facility are, at the Company's option, either:

a) the LIBOR multiplied by the statutory reserve rate plus an interest margin ranging from 1.50% to 2.25% based on the Company's consolidated leverage ratio, or
b) a base rate (which is equal to the greatest of (i) Citibank's prime rate, (ii) the federal funds effective rate plus 0.50% and (iii) the one-month LIBOR plus 1.00% plus an interest margin ranging from 0.50% to 1.25% based on the Company's consolidated leverage ratio.

HMS pays an unused commitment fee on the revolving credit facility during the term of the Credit Agreement ranging from 0.375% to 0.50% per annum based on the consolidated leverage ratio.

Interest expense and the commitment fees on the unused portion of the Company's revolving credit facility are as follows (*in thousands*):

	December 31,		
	2016	2015	2014
Interest expense	$ 4,837	$ 4,117	$ 4,186
Commitment fees	$ 1,518	$ 1,513	$ 1,465

At December 31, 2016 and 2015, the unamortized balance of deferred financing costs was $2.8 million and $4.9 million, respectively. HMS amortized $2.1 million in December 31, 2016, 2015 and 2014, respectively, of interest expense related to the Company's deferred financing costs.

As part of a contractual agreement with a customer, the Company has an outstanding irrevocable letter of credit for $3.0 million, which was established against the existing revolving credit facility. On May 1, 2017, the expiration date of the letter of credit was extended to April 26, 2018.

8. Equity

(a) Share Repurchase

On July 30, 2015, the Company's Board of Directors approved a share repurchase program authorizing the repurchase of up to $75 million of the Company's common stock from time to time on the open market or in privately negotiated transactions. The repurchase program is authorized through July 30, 2017, and may be suspended or discontinued at any time. Repurchased shares will be available for use in connection with issuance under the Company's stock plans and for other corporate purposes. Repurchases may also be made under a Rule 10b5-1 plan, which would permit shares to be repurchased when HMS might otherwise be precluded from doing so under insider trading laws. The timing and amount of any shares repurchased under the program will be determined by management based on its evaluation of market conditions and other factors. During the year ended December 31, 2016, the Company repurchased $20 million of the Company's common stock pursuant to this authorization and 10b5-1 plans. All repurchases were made using cash resources.

Following are the Company's monthly stock repurchases for the fourth quarter of fiscal year 2016, all of which were made as part of publicly announced plans or programs:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program[1]	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
October 1, 2016 to October 31, 2016	—	$ —	—	$ —
November 1, 2016 to November 30, 2016	570,717	17.61	570,717	15,000,000
December 1, 2016 to December 31, 2016	569,615	18.25	569,615	5,000,000
October 1, 2016 to December 31, 2016	**1,140,332**	**$ 17.93**	**1,140,332**	**$ 5,000,000**

(1) Represents shares repurchased through the Company's Share Repurchase Program publicly announced in August 2015.

(b) Preferred Stock

The Company's certificate of incorporation, as amended, authorizes the issuance of up to 5,000,000 shares of "blank check" preferred stock with such designations, rights and preferences as may be determined by the Company's Board of Directors. As of December 31, 2016, no preferred stock had been issued.

9. Employee Benefit Plan

The Company sponsors the 401(k) Plan for eligible employees. Eligible employees must complete 90 days of service in order to enroll in the 401(k) Plan. Participants may make voluntary contributions to the 401(k) Plan of up to 60% of their annual base pre-tax compensation not to exceed the federally determined maximum allowable contribution. In addition, the 401(k) Plan permits the Company to make discretionary contributions. During 2016, 2015 and 2014 HMS matched 100% of the first 3% of pay contributed by each eligible employee and 50% on the next 2% of pay contributed. These matching contributions vest immediately and are not in the form of the Company's common stock.

For the years ended December 31, 2016, 2015 and 2014, HMS contributed $4.8 million, $4.8 million and $5.0 million, respectively, to the 401(k) Plan in the form of matching contributions.

10. Stock-Based Compensation

Stock-Based Compensation Expense

Total stock-based compensation expense in the Company's Consolidated Statements of Income related to the Company's long-term incentive award plans was as follows *(in thousands)*:

	December 31,		
	2016	2015	2014
Cost of services-compensation	$ 3,805	$ 6,242	$ 5,075
Selling, general and administrative	9,472	8,055	8,280
Total	$ 13,277	$ 14,297	$ 13,355

Stock Options

Stock-based compensation expense related to stock options was approximately $6.9 million, $6.4 million and $7.6 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Presented below is a summary of stock option activity for the year ended December 31, 2016 (*in thousands except for weighted average exercise price and weighted average remaining contractual terms*):

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Terms	Aggregate Intrinsic Value
Outstanding at December 31, 2015	5,030	$ 17.37		
Granted	1,078	14.07		
Exercised	(511)	7.03		
Forfeitures	(67)	17.76		
Expired	(339)	22.67		
Outstanding at December 31, 2016	5,191	17.35	5.00	$ 12,854
Expected to vest at December 31, 2016	2,207	15.22	5.72	7,219
Exercisable at December 31, 2016	2,150	$ 20.25	4.02	$ 3,042

The weighted-average grant-date fair value per share of the stock options granted during the years ended December 31, 2016, 2015 and 2014 was $5.55, $5.37 and $7.59, respectively. HMS estimated the fair value of each stock option grant on the date of grant using a Black-Scholes option pricing model and weighted–average assumptions set forth in the following table:

	December 31,		
	2016	2015	2014
Expected dividend yield	0%	0%	0%
Risk-free interest rate	1.20%	1.54%	1.57%
Expected volatility	44.01%	40.62%	38.18%
Expected life (years)	4.90	4.89	4.82

During the years ended December 31, 2016, 2015 and 2014, the Company issued 510,512, 577,559 and 516,552 shares, respectively, of the Company's common stock upon the exercise of outstanding stock options and received proceeds of $2.9 million, $4.2 million and $4.1 million, respectively. The total intrinsic value of stock options exercised during the years ended December 31, 2016, 2015 and 2014 was $6.3 million, $5.9 million and $6.5 million, respectively.

As of December 31, 2016, there was approximately $12.7 million of total unrecognized compensation cost related to stock options outstanding, which is expected to be recognized over a weighted average period of 1.05 years.

The excess tax benefit from the exercise of stock options for the years ended December 31, 2016, 2015 and 2014 was $1.9 million, $1.6 million and $1.8 million, respectively.

Restricted Stock Units

Stock-based compensation expense related to restricted stock units was $6.4 million, $7.9 million and $5.7 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Presented below is a summary of restricted stock units activity for the year ended December 31, 2016 *(in thousands, except for weighted average grant date fair value per unit):*

	Number of Units	Weighted Average Grant Date Fair Value per Unit
Outstanding balance at December 31, 2015	1,154	$ 18.85
Granted	637	14.26
Vesting of restricted stock units, net of units withheld for taxes	(193)	18.64
Units withheld for taxes	(102)	18.64
Forfeitures	(83)	16.95
Outstanding balance at December 31, 2016	1,413	$ 16.44

As of December 31, 2016, 1,231,736 restricted stock units remained unvested and there was approximately $14.1 million of unrecognized compensation cost related to restricted stock units, which is expected to be recognized over a weighted average vesting period of 0.92 years.

11. Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share *(in thousands, except per share data)*:

	Years ended December 31,		
	2016	2015	2014
Net income	$ 37,636	$ 24,527	$ 13,947
Weighted average common shares outstanding-basic	84,221	87,881	87,673
Plus: net effect of dilutive stock options and restricted common shares	2,766	480	491
Weighted average common shares outstanding-diluted	86,987	88,361	88,164
Net income per common share-basic	$ 0.45	$ 0.28	$ 0.16
Net income per common share-diluted	$ 0.43	$ 0.28	$ 0.16

For the years ended December 31, 2016, 2015 and 2014, 2,070,771, 3,480,458 and 2,442,628 stock options, respectively, were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive. For the years ended December 31, 2016, 2015 and 2014, restricted stock units representing 46,651, 305,999 and 90,905 shares of common stock, respectively, were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive.

12. Commitments and Contingencies

(a) Lease Commitments

The Company leases office space, data processing equipment and software licenses under operating leases that expire on various dates through 2024. The lease agreements provide for rent escalations. Lease expense, exclusive of sublease income, for the year ended December 31, 2016, 2015 and 2014 was $5.0 million, $5.4 million and $6.9 million, respectively. Lease and sublease income was approximately $27,000, $25,000 and $42,000 for the years ended December 31, 2016, 2015 and 2014, respectively.

Minimum annual lease payments to be made both under capital leases and operating leases, net of nominal sublease payments to be received for each of the next five years ending December 31 and thereafter are as follows (*in thousands*):

	Capital Lease Payments	Operating Lease Payments
2017	$ 4	$ 16,077
2018	-	6,304
2019	-	4,294
2020	-	3,815
2021	-	3,226
Thereafter	-	4,852
Total	4	$ 38,568
Less: Interest	-	
Total	$ 4	

(b) Litigation

Dennis Demetre and Lori Lewis: In July 2012, Dennis Demetre and Lori Lewis (the "Plaintiffs"), filed an action in the Supreme Court of the State of New York against HMS Holdings Corp., claiming an undetermined amount of damages alleging that various actions by HMS unlawfully deprived the Plaintiffs of the acquisition earn-out portion of the purchase price for Allied Management Group Special Investigation Unit ("AMG") under the applicable Stock Purchase Agreement (the "SPA") and that HMS had breached certain contractual provisions under the SPA. The Plaintiffs filed a second amended complaint with two causes of action for breach of contract and one cause of action for breach of implied covenant of good faith and fair dealing. HMS asserted a counterclaim against Plaintiffs for breach of contract based on contractual indemnification costs, including attorneys' fees arising out of the Company's defense of AMG in *Kern Health Systems v. AMG, Dennis Demetre and Lori Lewis* (the "California Action"), which are recoverable under the SPA. Mediation took place in September 2014 but the matter was not resolved. In June 2016, Kern Health Systems and AMG entered into a settlement agreement that resolved all claims in the California Action.

In January 2016, HMS moved for summary judgment on its counterclaim for breach of contract and for summary judgment on the Plaintiffs' breach of contract causes of action against HMS (HMS did not move for summary judgment on Plaintiffs' breach of implied covenant of good faith and fair dealing claim). The motions were argued on June 22, 2016. A decision on the motions has not yet been issued by the Court and a trial date has not been set. HMS continues to believe that the Plaintiffs' claims are without merit and will continue to vigorously defend against them.

Shareholder Proceedings: On March 3, 2017, a putative securities class action was filed in the Federal District Court for the District of New Jersey, entitled *Danahar v. HMS Holdings Corp., et al*. The complaint names the Company, its Chief Executive Officer, and its Chief Financial Officer as defendants and arises out of the Company's disclosure on March 2, 2017 that the filing of its 2016 Form 10-K would be delayed in order to permit the Company to complete the Company's previously disclosed review of its estimated liability for appeals and related internal control over financial reporting, and that the Company's auditor had informed the Company that it had identified what it believed was a material weakness in the Company's internal control over financial reporting related to the CMS reserves. The complaint alleges that the Company's Form 10-K for the period ended December 31, 2015 and its quarterly reports on Form 10-Q for the period January 1, 2016 to September 30, 2016 were false and misleading for failing to disclose the matters set forth above. On May 19, 2017, the New Jersey District Court granted the defendants' motion to transfer the action to the United States District Court for the Northern District of Texas. The action is at its early stages, and the Company has not yet responded to the complaint.

From time to time, HMS may be subject to investigations, legal proceedings and other disputes arising in the ordinary course of the Company's business, including but not limited to regulatory audits, billing and contractual disputes, employment-related matters and post-closing disputes related to acquisitions. Due to the Company's contractual relationships, including those with federal and state government entities, HMS's operations, billing and business practices are subject to scrutiny and audit by those entities and other multiple agencies and levels of government, as well as to frequent transitions and changes in the personnel responsible for oversight of the Company's contractual performance. HMS may have contractual disputes with its customers arising from differing interpretations of contractual provisions that define the Company's rights, obligations, scope of work or terms of payment, and with associated claims of liability for inaccurate or improper billing for reimbursement of contract fees, or for sanctions or damages for alleged performance deficiencies. Resolution of such disputes may involve litigation or may require that HMS accept some amount of loss or liability in order to avoid customer abrasion, negative marketplace perceptions and other disadvantageous results that could affect the Company's business, financial condition, results of operations and cash flows.

HMS records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, HMS does not establish an accrued liability.

13. Customer Concentration

(a) Geographic Information

The Company operates within the United States.

(b) Major Customers

For the years ended December 31, 2016, 2015 and 2014 no one individual Company customer accounted for more than 10% of the Company's total revenue.

(c) Concentration of Revenue

The composition of the Company's ten largest customer's changes periodically. For the years ended December 31, 2016, 2015 and 2014, the Company's ten largest customers represented 40.6%, 44.0% and 40.1% of HMS' total revenue, respectively. The Company's agreements with the ten current largest customers expire between 2017 and 2020. In many instances, HMS provides services pursuant to agreements that may be renewed or subject to a competitive reprocurement process. Several of the Company's contracts, including those with some of its largest customers, may be terminated for convenience.

14. Subsequent Events

(a) Credit Agreement

On March 8, 2017, Amendment No. 1 to the Credit Agreement was executed which amended, among other things, the Company's requirement to furnish to Citibank, N.A., as administrative agent, and the lenders party to the Credit Agreement, financial statements and other information within 90 days of the fiscal year end to 180 days for the fiscal year ended December 31, 2016. These financial statements include the audited consolidated balance sheet and related statements of income, stockholders' equity and cash flows of the Company and its subsidiaries.

(b) Eliza Holding Corp. Acquisition

On April 17, 2017, the Company completed its previously announced acquisition of Eliza Holding Corp. ("Eliza"), a Delaware Company, pursuant to an Agreement and Plan of Merger dated March 10, 2017 (the "Merger Agreement"), for a cash purchase price of approximately $172.0 million, after adjustments for working capital, cash, transaction expenses and indebtedness. The acquisition was funded with available liquidity, consisting of approximately 75% cash on hand and approximately 25% of borrowings under the Company's credit facility. The purchase price is subject to certain post-closing purchase price adjustments.

The Merger Agreement was entered into by and among the Company, Echo Acquisition Sub, Inc., a Delaware corporation and an indirect wholly owned subsidiary of the Company (the "Merger Sub"), Eliza, and Parthenon Investors III, L.P., a Delaware limited partnership, solely in its capacity as the representative for equity holders of Eliza. Under the terms of the Merger Agreement, the Merger Sub merged with and into Eliza (the "Merger") and Eliza continued as the surviving corporation becoming an indirect wholly owned subsidiary of the Company.

The Merger Agreement contains customary representations, warranties and covenants. The Merger Agreement also contains indemnification provisions that are subject to specified limitations, including recourse to a representation and warranty insurance policy for certain losses.

In connection with the preparation of these audited consolidated financial statements, an evaluation of subsequent events was performed through the date these audited consolidated financial statements were issued and, other than the events above, there are no other events that have occurred that would require adjustments or disclosure to the Company's audited consolidated financial statements.

15. Quarterly Financial Data (Unaudited)

The table below summarizes the Company's unaudited quarterly operating results for the last two fiscal years (*in thousands, except per share amounts*):

Year ended December 31, 2016	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Revenue	$ 119,763	$ 123,550	$ 124,604	$ 125,590
Operating income	$ 9,909	$ 16,352	$ 12,650	$ 18,758
Net income	$ 4,560	$ 8,566	$ 13,508	$ 11,002
Net income per common share - basic	$ 0.05	$ 0.10	$ 0.16	$ 0.14
Net income per common share - diluted	$ 0.05	$ 0.10	$ 0.16	$ 0.12
Revenue, as reported	$ 119,763	$ 123,550	$ 124,604	$ 125,590
Revenue, as revised	$ 119,758	$ 121,512	$ 122,860	
Selling, general and administrative expenses, as reported	$ 22,930	$ 22,227	$ 24,875	$ 23,136
Selling, general and administrative expenses, as revised	$ 22,925	$ 20,189	$ 23,131	

During the fourth quarter of 2016, the Company identified a material weakness in accounting for its accounts receivable allowance, resulting in overstatements of revenue and of selling, general and administrative expenses for the quarters ended March 31, 2016 of $5,050, June 30, 2016 of $2,038,000, and September 30, 2016 of $1,744,244. Due to the immaterial nature of the error, the Company revised the quarterly financial information above, and will revise the quarterly information for 2016 when it is presented in future filings.

Year ended December 31, 2015	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Revenue	$ 110,324	$ 116,934	$ 118,444	$ 128,514
Operating income	$ 7,981	$ 11,752	$ 13,016	$ 14,823
Net income	$ 3,522	$ 5,418	$ 6,862	$ 8,725
Net income per common share - basic	$ 0.04	$ 0.06	$ 0.08	$ 0.10
Net income per common share - diluted	$ 0.04	$ 0.06	$ 0.08	$ 0.10

SCHEDULE II – VALUATION AND QUALIFYING ACCOUNTS
For the years ended December 31, 2016, 2015 and 2014

Accounts receivable allowance and Estimated liability for appeals as of December 31, 2016, 2015 and 2014 are as follows:

Accounts receivable allowance *(in thousands)*:

	Balance at Beginning of Year	Provision	Recoveries	Charge-offs	Balance at End of Year
Year ended December 31, 2014	$ 15,899	12,861	(17)	(19,384)	$ 9,359
Year ended December 31, 2015	$ 9,359	8,046	(100)	(5,841)	$ 11,464
Year ended December 31, 2016	$ 11,464	21,583	108	(22,383)	$ 10,772

Estimated liability for appeals *(in thousands)*:

	Balance at Beginning of Year	Provision	Appeals found in providers favor	Balance at End of Year
Year ended December 31, 2014	$ 19,853	1,459	(1,998)	$ 19,314
Year ended December 31, 2015	$ 19,314	2,610	(9,123)	$ 12,801
Year ended December 31, 2016	$ 12,801	721	(2,396)	$ 11,126

The above chart represents the CMS estimated reserve liability only. See Note 1 - "Business and Summary of Significant Accounting Policies" in our Notes to the Consolidated Financial Statements under Item 8. Consolidated Financial Statements and Supplementary Data for additional information regarding the estimated liability for appeals.

HMS HOLDINGS CORP. AND SUBSIDIARIES
Exhibit Index

Where an exhibit is filed by incorporation by reference to a previously filed registration statement or report, such registration statement or report is identified after the description of the exhibit.

Exhibit Number	Description
2.1	Agreement and Plan of Merger among Health Management Systems, Inc., HMS Holdings Corp. and HMS Acquisition Corp. dated December 16, 2002 (incorporated by reference to Exhibit A to HMS Holdings Corp.'s Prospectus and Proxy Statement (Reg No. 333-100521) as filed with the SEC on January 24, 2003)
2.2	Agreement and Plan of Merger, between the HMS Holdings Corp., a Delaware corporation and HMS Holdings Corp., a New York corporation dated July 17, 2013 (incorporated by reference to Exhibit 2.1 to HMS Holding Corp.'s Current Report on Form 8-K/12g-3 (File No. 000-50194) as filed with the SEC on July 23, 2013)
3.1	Conformed copy of Certificate of Incorporation of HMS Holdings Corp., as amended through July 9, 2015 (incorporated by reference to Exhibit 3.1 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on August 10, 2015)
3.2	Amended and Restated Bylaws of HMS Holdings Corp. dated May 4, 2016 (incorporated by reference to Exhibit 3.2 to HMS Holdings Corp.'s Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on May 5, 2016)
4.1	Specimen Common Stock Certificate (incorporated by reference to Exhibit 4.1 to HMS Holding Corp.'s Current Report on Form 8-K/12g-3 (File No. 000-50194) as filed with the SEC on July 23, 2013)
4.2	See Exhibits 3.1 and 3.2 for provisions defining the rights of holders of common stock of HMS Holdings Corp.
10.1†	HMS Holdings Corp. Fourth Amended and Restated 2006 Stock Plan (the "2006 Stock Plan") (incorporated by reference to Exhibit 3.1 to HMS Holdings Corp.'s Current Report on Form 8-K (File No. 000-50194) as filed with the SEC on July 12, 2011)
10.2†	Amendment No. 1 to the 2006 Stock Plan (incorporated by reference to Exhibit 10.6 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2012)
10.3†	Form of 2010 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.2 to HMS Holdings Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 8, 2010)
10.4†	Form 2010 Employee Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.4 to HMS Holdings Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) filed with the SEC on November 8, 2010)
10.5†	Form of 2011 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.16 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2012)
10.6†	Form of 2011 Employee Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.18 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on February 29, 2012)
10.7†	Form of 2012 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.20 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)
10.8†	Form of 2012 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.22 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)

Exhibit Number	Description
10.9†	Form of 2013 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.24 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2013)
10.10†	Form of 2013 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)
10.11†	Form of 2013 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.3 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)
10.12†	Form of March 2014 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.4 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 12, 2014)
10.13†	Form of November 2014 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on November 10, 2014)
10.14†	Form of 2014 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.26 to HMS Holding Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 2, 2015)
10.15†	Form of 2014 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.28 to HMS Holding Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 2, 2015)
10.16†	Form of March 2015 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference Exhibit 10.1 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 11, 2015)
10.17†	Form of March 2015 Executive Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference Exhibit 10.2 to HMS Holding Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 11, 2015)
10.18†	Form of 2015 Director Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.21 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2016)
10.19†	Form of 2015 Director Restricted Stock Unit Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.22 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2016)
10.20†	Form of November 2015 Executive Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.23 to HMS Holdings Corp.'s Annual Report on Form 10-K (File No. 000-50194) as filed with the SEC on March 1, 2016)
10.21†	Form of 2016 Executive and Senior Vice President Non-Qualified Stock Option Agreement under the 2006 Stock Plan (incorporated by reference to Exhibit 10.1 to HMS Holdings Corp.'s Quarterly Report on Form 10-Q (File No. 000-50194) as filed with the SEC on May 10, 2016)

Exhibit 23.1

Consent of Independent Registered Public Accounting Firm

The Board of Directors
HMS Holdings Corp.:

We consent to the incorporation by reference in the registration statements (Nos. 333-161415, 333-149836, 333-139025, 333-178752, 333-183361 and 333-212319) on Form S-8 of HMS Holdings Corp. of our reports dated June 6, 2017, with respect to the consolidated balance sheets of HMS Holdings Corp. as of December 31, 2016 and 2015, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2016, and the related financial statement schedule, and the effectiveness of internal control over financial reporting as of December 31, 2016, which reports appear in the December 31, 2016 annual report on Form 10-K of HMS Holdings Corp.

Our report dated June 6, 2017, on the effectiveness of internal control over financial reporting as of December 31, 2016, expresses our opinion that HMS Holdings Corp. did not maintain effective internal control over financial reporting as of December 31, 2016 because of the effect of material weaknesses on the achievement of the objectives of the control criteria and contains an explanatory paragraph that states the Company did not maintain an effective control environment based on a lack of established reporting lines and defined authorities and responsibilities for financial reporting, or conduct an effective risk assessment process on a periodic basis to assess the effects of changes in business operations and turnover of its employees that significantly impacts its financial processes and internal control over financial reporting. As a result, the Company did not design and implement effective control activities and management review controls over the estimated liability of appeals or the accounts receivable allowance, including controls over the completeness and accuracy of data used to calculate the respective account balances.

Certification

I, William C. Lucia, certify that:

1. I have reviewed this Annual Report on Form 10-K of HMS Holdings Corp.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Such proxy statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

UNITEDHEALTH GROUP

Table of Contents

PART I

ITEM 1. BUSINESS

INTRODUCTION

Overview

UnitedHealth Group is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone. The terms "we," "our," "us," "its," "UnitedHealth Group," or the "Company" used in this report refer to UnitedHealth Group Incorporated and its subsidiaries.

Through our diversified family of businesses, we leverage core competencies in data and health information; advanced technology; and clinical expertise. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

UnitedHealthcare provides health care benefits to an array of customers and markets. UnitedHealthcare Employer & Individual serves employers ranging from sole proprietorships to large, multi-site and national employers, public sector employers and individual consumers. UnitedHealthcare Medicare & Retirement delivers health and well-being benefits for Medicare beneficiaries and retirees. UnitedHealthcare Community & State manages health care benefit programs on behalf of state Medicaid and community programs and their participants. UnitedHealthcare Global includes the provision of health and dental benefits and hospital and clinical services to employer groups and individuals in South America, and other diversified global health businesses.

Optum is a health services business serving the broad health care marketplace, including payers, care providers, employers, governments, life sciences companies and consumers, through its OptumHealth, OptumInsight and OptumRx businesses. These businesses have dedicated units that help improve overall health system performance through optimizing care quality, reducing costs and improving consumer experience and care provider performance, leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations.

Through UnitedHealthcare and Optum, in 2018, we processed more than three-quarters of a trillion dollars in gross billed charges and we managed more than $250 billion in aggregate health care spending on behalf of the customers and consumers we serve. Our revenues are derived from premiums on risk-based products; fees from management, administrative, technology and consulting services; sales of a wide variety of products and services related to the broad health care industry; and investment and other income. Our two business platforms have four reportable segments:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

UnitedHealthcare

Through its health benefits offerings, UnitedHealthcare is enabling better health, helping to control rising health care costs and creating a better health care experience for its customers. UnitedHealthcare's market position is built on:

- strong local-market relationships;

- the breadth of product offerings, which are responsive to many distinct market segments in health care;
- service and advanced technology, including digital consumer engagement;
- competitive medical and operating cost positions;
- effective clinical engagement;
- extensive expertise in distinct market segments; and
- innovation for customers and consumers.

UnitedHealthcare utilizes Optum's capabilities to help coordinate patient care, improve affordability of medical care, analyze cost trends, manage pharmacy benefits, work with care providers more effectively and create a simpler consumer experience.

In the United States, UnitedHealthcare arranges for discounted access to care through networks that include 1.3 million physicians and other health care professionals and more than 6,000 hospitals and other facilities.

UnitedHealthcare is subject to extensive government regulation. See further discussion of our regulatory environment below under "Government Regulation" and in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

UnitedHealthcare Employer & Individual

UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services nationwide for large national employers, public sector employers, mid-sized employers, small businesses, and individual consumers. UnitedHealthcare Employer & Individual provides access to medical services for 27 million people on behalf of our customers and alliance partners, including employer customers serving people across all 50 states, the District of Columbia and most U.S. territories. Products are offered through affiliates that are licensed as insurance companies, health maintenance organizations (HMOs), or third-party administrators (TPAs). Large employer groups typically use self-funded arrangements where UnitedHealthcare Employer & Individual earns a service fee. Smaller employer groups and individuals are more likely to purchase risk-based products because they are less willing or unable to bear a greater potential liability for health care expenditures.

Through its risk-based product offerings, UnitedHealthcare Employer & Individual assumes the risk of both medical and administrative costs for its customers in return for a monthly premium, which is typically a fixed rate per individual served for a one-year period. When providing administrative and other management services to customers that elect to self-fund the health care costs of their employees and employees' dependents, UnitedHealthcare Employer & Individual receives a fixed monthly service fee per individual served. These customers retain the risk of financing medical benefits for their employees and employees' dependents, while UnitedHealthcare Employer & Individual provides services such as coordination and facilitation of medical and related services to customers, consumers and health care professionals, administration of transaction processing and access to a contracted network of physicians, hospitals and other health care professionals, including dental and vision.

The consolidated purchasing capacity represented by the individuals served by UnitedHealth Group makes it possible for UnitedHealthcare Employer & Individual to contract for cost-effective access to a large number of conveniently located care professionals and facilities. UnitedHealthcare Employer & Individual has relationships with network care providers that integrate data and analytics, implement value-based payments and care management programs, and enable us to jointly better manage health care and improve quality across populations.

UnitedHealthcare Employer & Individual typically distributes its products through consultants or direct sales in the larger employer and public sector segments. In the smaller group segment of the commercial marketplace,

UnitedHealthcare Employer & Individual's distribution system consists primarily of direct sales and sales through collaboration with brokers and agents. UnitedHealthcare Employer & Individual also distributes products through wholesale agents or agencies that contract with health insurance carriers to distribute individual or group benefits and provide other related services to their customers. In addition, UnitedHealthcare Employer & Individual distributes its products through professional employer organizations, associations and through both multi-carrier and its own proprietary private exchange marketplaces.

UnitedHealthcare Employer & Individual's diverse product portfolio offers employers a continuum of benefit designs, price points and approaches to consumer engagement, which provides the flexibility to meet a full spectrum of their coverage needs.

UnitedHealthcare Employer & Individual's major product families include:

Traditional Products. Traditional products include a full range of medical benefits and network options, and offer a spectrum of covered services, including preventive care, direct access to specialists and catastrophic protection.

Consumer Engagement Products. Consumer engagement products couple plan design with financial accounts to increase individuals' responsibility for their health and well-being. This suite of products includes high-deductible consumer-driven benefit plans, which include health reimbursement accounts (HRAs), health savings accounts (HSAs) and consumer engagement services such as personalized behavioral incentive programs, consumer education and other digital offerings.

Clinical and Pharmacy Products. UnitedHealthcare Employer & Individual offers a comprehensive suite of clinical and pharmacy care services products, which complement its service offerings by improving quality of care, engaging consumers and providing cost-saving options. Consumers served by UnitedHealthcare Employer & Individual can access clinical products that help them make better health care decisions and better use of their medical benefits, which contribute to improved health and lowered medical expenses.

Each medical plan has a core set of clinical programs embedded in the offering, with additional services available depending on offering type (risk-based or self-funded), line of business (e.g., small business, key accounts, public sector, national accounts or individual consumers) and clinical need. UnitedHealthcare Employer & Individual's clinical programs include:

- wellness programs;
- decision support;
- utilization management;
- case and disease management;
- complex condition management;
- on-site programs, including biometrics and flu shots;
- incentives to reinforce positive behavior change;
- mental health/substance use disorder management; and
- employee assistance programs.

UnitedHealthcare Employer & Individual's comprehensive and integrated pharmacy care services promote lower costs by using formulary programs to produce better unit costs, encouraging consumers to use drugs that offer improved value and outcomes, helping consumers take actions to improve their health and supporting the appropriate use of drugs based on clinical evidence through physician and consumer education programs.

Specialty Offerings. Through its broad network, UnitedHealthcare Employer & Individual delivers dental, vision, hearing, life, transportation, critical illness and disability product offerings using an integrated approach in private and retail settings.

UnitedHealthcare Medicare & Retirement

UnitedHealthcare Medicare & Retirement provides health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services, as well as services dealing with chronic disease and other specialized issues common among older people. UnitedHealthcare Medicare & Retirement is fully dedicated to serving this growing senior market segment, providing products and services in all 50 states, the District of Columbia and most U.S. territories. UnitedHealthcare Medicare & Retirement has distinct pricing, underwriting, clinical program management and marketing capabilities dedicated to health products and services in this market.

UnitedHealthcare Medicare & Retirement offers a selection of products that allow people to obtain the health coverage and services they need as their circumstances change. UnitedHealthcare Medicare & Retirement is positioned to serve seniors who find that affordable, network-based care provided through Medicare Advantage plans meets their unique health care needs. For those who prefer traditional fee-for-service Medicare, UnitedHealthcare Medicare & Retirement offers both Medicare Supplement and Medicare Prescription Drug Benefit (Medicare Part D) prescription drug programs that supplement their government-sponsored Medicare by providing additional benefits and coverage options. UnitedHealthcare Medicare & Retirement services include care management and clinical management programs, a nurse health line service, 24-hour access to health care information, access to discounted health services from a network of care providers and administrative services.

UnitedHealthcare Medicare & Retirement has extensive distribution capabilities and experience, including direct marketing to consumers on behalf of its key clients, including AARP, the nation's largest membership organization dedicated to the needs of people age 50 and over, and state and U.S. government agencies. Products are also offered through employer groups and agent channels.

UnitedHealthcare Medicare & Retirement's major product categories include:

Medicare Advantage. UnitedHealthcare Medicare & Retirement provides health care coverage for seniors and other eligible Medicare beneficiaries primarily through the Medicare Advantage program administered by the Centers for Medicare & Medicaid Services (CMS), including Medicare Advantage HMO plans, preferred provider organization (PPO) plans, Point-of-Service plans, Private-Fee-for-Service plans and Special Needs Plans (SNPs). Under the Medicare Advantage program, UnitedHealthcare Medicare & Retirement provides health insurance coverage in exchange for a fixed monthly premium per member from CMS plus, in some cases, monthly consumer premiums. Premium amounts received from CMS vary based on the geographic areas in which individuals reside; demographic factors such as age, gender and institutionalized status; and the health status of the individual. Medicare Advantage plans are designed to compete at the local level, taking into account consumer and care provider preferences, competitor offerings, our quality and cost initiatives, our historical financial results and the long-term payment rate outlook for each geographic area. UnitedHealthcare Medicare & Retirement served 4.9 million people through its Medicare Advantage products as of December 31, 2018.

Built on more than 20 years of experience, UnitedHealthcare Medicare & Retirement's senior-focused care management model operates at a medical cost level below that of traditional Medicare, while helping seniors live healthier lives. Through our HouseCalls program, nurse practitioners performed 1.5 million in-home preventive care visits in 2018 to address unmet care opportunities and close gaps in care. Our Navigate4Me program provides a single point of contact and a direct line of support for individuals as they go through their health care experiences. For high-risk patients in certain care settings and programs, UnitedHealthcare Medicare & Retirement uses proprietary, automated medical record software that enables clinical care teams to capture and track patient data and clinical encounters, creating a comprehensive set of care information that bridges across

home, hospital and nursing home care settings. Proprietary predictive modeling tools help identify people at high risk and enable care managers to create individualized care plans that help them obtain the right care, in the right place, at the right time.

Medicare Part D. UnitedHealthcare Medicare & Retirement provides Medicare Part D benefits to beneficiaries throughout the United States and its territories through its Medicare Advantage and stand-alone Medicare Part D plans. The stand-alone Medicare Part D plans address a large spectrum of people's needs and preferences for their prescription drug coverage, including low-cost prescription options. Each of the plans includes the majority of the drugs covered by Medicare and provides varying levels of coverage to meet the diverse needs of Medicare beneficiaries. As of December 31, 2018, UnitedHealthcare enrolled 9.0 million people in the Medicare Part D programs, including 4.7 million individuals in the stand-alone Medicare Part D plans, with the remainder in Medicare Advantage plans incorporating Medicare Part D coverage.

Medicare Supplement. UnitedHealthcare Medicare & Retirement is currently serving 4.9 million seniors nationwide through various Medicare Supplement products in association with AARP. UnitedHealthcare Medicare & Retirement offers a full range of supplemental products at a diversity of price points. These products cover various levels of coinsurance and deductible gaps that seniors are exposed to in the traditional Medicare program.

Premium revenues from CMS represented 30% of UnitedHealth Group's total consolidated revenues for the year ended December 31, 2018, most of which were generated by UnitedHealthcare Medicare & Retirement.

UnitedHealthcare Community & State

UnitedHealthcare Community & State is dedicated to serving state programs that care for the economically disadvantaged, the medically underserved and people without the benefit of employer-funded health care coverage, in exchange for a monthly premium per member from the state program. In some cases, these premiums are subject to experience or risk adjustments. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, including Temporary Assistance to Needy Families (TANF), Children's Health Insurance Programs (CHIP), Dual SNPs (DSNPs), Aged, Blind and Disabled and other federal, state and community health care programs. As of December 31, 2018, UnitedHealthcare Community & State participated in programs in 30 states and the District of Columbia, and served 6.5 million people; including 1 million people through Medicaid expansion programs in 15 states under the Patient Protection and Affordable Care Act (ACA).

States using managed care services for Medicaid beneficiaries select health plans by using a formal bid process or by awarding individual contracts. A number of factors are considered by UnitedHealthcare Community & State when choosing programs for participation, including the state's commitment and consistency of support for its Medicaid managed care program in terms of service, innovation and funding; the eligible population base, both immediate and long term; and the structure of the projected program. UnitedHealthcare Community & State works with its state customers to advocate for actuarially sound rates, commensurate with medical cost trends.

These health plans and care programs are designed to address the complex needs of the populations they serve, including the chronically ill, people with disabilities and people with a higher risk of medical, behavioral and social conditions. UnitedHealthcare Community & State administers benefits for the unique needs of children, pregnant women, adults, seniors and those who are institutionalized or are nursing home eligible. These individuals often live in areas that are medically underserved and are less likely to have a consistent relationship with the medical community or a care provider. They also often face significant social and economic challenges.

UnitedHealthcare Community & State leverages the national capabilities of UnitedHealth Group locally, supporting effective care management, strong regulatory partnerships, greater administrative efficiency, improved clinical outcomes and the ability to adapt to a changing national and local market environment. UnitedHealthcare Community & State coordinates resources among family, physicians, other health care

providers, and government and community-based agencies and organizations to facilitate continuous and effective care and often addresses other social determinants that can affect people's health status and health system usage.

Approximately 75% of the people in state Medicaid programs are served by managed care, but this population represents only 50% of total Medicaid spending. UnitedHealthcare Community & State's business development opportunities include entering fee-for-service markets converting to managed care, which represents a population of nearly 8 million people; and growing in existing managed care markets, including state expansions to populations with more complex needs requiring more sophisticated models of care. This expansion includes integrated care management of physical, behavioral, long-term care services and supports, and social services by applying strong data analytics and community-based collaboration.

UnitedHealthcare Community & State continues to evolve its clinical model to enhance quality and the clinical experience for the people it serves. The model enables UnitedHealthcare Community & State to quickly identify the people who could benefit most from more highly coordinated care; typically, the 5% who are most at risk drive over 50% of states' medical costs.

UnitedHealthcare Global

UnitedHealthcare Global serves 6.2 million people with medical benefits, residing principally in Brazil, Chile, Colombia and Peru but also in more than 130 other countries. UnitedHealthcare Global owns and operates more than 300 hospitals, specialty centers, primary care and emergency services clinics in South America and Portugal. UnitedHealthcare Global provides a comprehensive range of health and mobilization capabilities and supports the health systems of individual nations with support for improving health care financing and delivery. Clients include multi-national and local businesses, governments and individual consumers around the world.

Global Markets. UnitedHealthcare Global serves local populations in select markets around the world, primarily in Brazil; Chile; Colombia; Peru; and Portugal, by touching nearly every aspect of health care and leveraging expertise in clinical care management and health care data to improve outcomes, raise quality and constrain costs.

In Brazil, Amil provides health benefits to 4.1 million people through a broad network of owned and affiliated clinics, hospitals and care providers. Dental benefits are also provided to 2.2 million people. Amil's members have access to a provider network of physicians and other health care professionals, hospitals, laboratories and diagnostic imaging centers. Americas Serviços Médicos offers health care delivery in Brazil through hospitals, ambulatory clinics and surgery centers to Amil members and consumers served by the external payer market.

Empresas Banmédica provides health benefits and health care services to 2.1 million people in Chile, Colombia and Peru through a network of owned and affiliated clinics, hospitals and care providers. Empresas Banmédica owns and operates hospitals, clinics and outpatient centers.

Lusíadas Saúde provides clinical services to people in Portugal through an owned network of hospitals and outpatient clinics.

Global Solutions. UnitedHealthcare Global includes other diversified global health services with a variety of offerings for international customers.

Optum

Optum is a technology-enabled health services business serving the broad health care marketplace, including:

- Those who need care: the consumers who need the right support, information, resources and products to achieve their health goals.

- Those who provide care: pharmacies, hospitals, physicians, practices and other health care facilities seeking to modernize the health system and support the best possible patient care and experiences.
- Those who pay for care: employers, health plans, and state, federal and municipal agencies devoted to ensuring the populations they sponsor receive high-quality care, administered and delivered efficiently and effectively.
- Those who innovate for care: global life sciences organizations dedicated to developing more effective approaches to care, enabling technologies and medicines that improve care delivery and health outcomes.

Optum operates three business segments leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations:

- OptumHealth focuses on care delivery, care management, wellness and consumer engagement, and health financial services;
- OptumInsight specializes in data and analytics and other health care information technology services, and delivers operational services and support; and
- OptumRx provides pharmacy care services.

OptumHealth

OptumHealth is a diversified health and wellness business serving the physical, emotional and health-related financial needs of 93 million unique individuals. OptumHealth enables population health through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth products and services deliver value by improving quality and patient satisfaction while lowering cost. OptumHealth builds high-performing networks and centers of excellence across the care continuum, by working directly with physicians to advance population health and by coordinating care for the most medically complex patients.

OptumHealth serves patients and care providers through its local ambulatory care services business and delivers care through a physician-led, patient-centric and data-driven organization comprised of more than 35,000 employed, managed or contracted physicians. OptumHealth also enables care providers' transition from traditional, fee-for-service care delivery to performance- based delivery and payment models that improve the focus on patient health and outcomes, such as those emerging through accountable care organizations (ACOs) and local care provider partnerships. Through strategic partnerships, alliances and ownership arrangements, OptumHealth helps care providers adopt new approaches and technologies that improve the coordination of care across all providers involved in patient care. MedExpress' neighborhood care centers provide urgent and walk-in care services with a consumer-friendly approach and Surgical Care Affiliates' independent ambulatory surgical centers and surgical hospitals provide high-value surgical services at a substantially lower cost than a traditional in-patient hospital setting.

OptumServe provides a wide range of health services specifically tailored to active military and veterans and the agencies that support them.

OptumHealth serves people through population health services that meet both the preventive care and health intervention needs of consumers across the care continuum—physical health and wellness, mental health, complex medical conditions, disease management, hospitalization and post-acute care. This includes offering access to proprietary networks of provider specialists in many clinical specialties, including behavioral health, organ transplant, chiropractic and physical therapy. OptumHealth engages consumers in managing their health, including guidance, tools and programs that help them achieve their health goals and maintain healthy lifestyles.

Optum Financial Services, through Optum Bank, a wholly-owned subsidiary, serves consumers through 5.2 million health savings and other accounts approaching $10 billion in assets under management as of

December 31, 2018. During 2018, Optum Bank processed nearly $160 billion in digital medical payments to physicians and other health care providers. Organizations across the health system rely on Optum to manage and improve payment flows through its highly automated, scalable, digital payment systems.

OptumHealth offers its products on a risk basis, where it assumes responsibility for health care costs in exchange for a monthly premium per individual served, on an administrative fee basis, under which it manages or administers delivery of the products or services in exchange for a fixed monthly fee per individual served, or on a fee-for-service basis, where it delivers medical services to patients in exchange for a contracted fee. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds.

OptumHealth sells its products primarily through its direct sales force, strategic collaborations and external producers in three markets: employers (which includes the sub-markets of large, mid-sized and small employers), payers (which includes the sub-markets of health plans, TPAs, underwriter/stop-loss carriers and individual market intermediaries) and government entities (which includes states, CMS, the Department of Defense, the Veterans Administration and other federal procurement agencies).

OptumInsight

OptumInsight provides services, technology and health care expertise to major participants in the health care industry. OptumInsight's capabilities are focused on technology, research and consulting and managed services that help improve the quality of care and drive greater efficiency in the health care system. Technology includes population health and risk analytics, administrative and clinical technology for claims editing, risk adjustment and payment integrity, health information and electronic data exchange and technology strategy and management. Research and consulting helps organizations reduce administrative costs and implement best practices to improve clinical performance. Managed services provides solutions such as revenue cycle management, risk analytics, payment integrity outsourcing and state Medicaid data and technology management. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, advance quality, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.

Many of OptumInsight's software and information products and professional services are delivered over extended periods, often several years. OptumInsight maintains an order backlog to track unearned revenues under these long-term arrangements. The backlog consists of estimated revenue from signed contracts, other legally binding agreements and anticipated contract renewals based on historical experience with OptumInsight's customers. OptumInsight's aggregate backlog at December 31, 2018 was $17.0 billion, of which $8.6 billion is expected to be realized within the next 12 months. The aggregate backlog includes $6.2 billion related to intersegment agreements. OptumInsight's aggregate backlog at December 31, 2017, was $15.0 billion. OptumInsight cannot provide any assurance that it will be able to realize all of the revenues included in the backlog due to uncertainties with regard to the timing and scope of services and the potential for cancellation, non-renewal or early termination of service arrangements.

OptumInsight's products and services are sold primarily through a direct sales force. OptumInsight's products are also supported and distributed through an array of alliances and business partnerships with other technology vendors, who integrate and interface OptumInsight's products with their applications.

OptumInsight believes it is well positioned to address the needs of four primary market segments: care providers (e.g., physicians and hospital systems), health plans, governments and life sciences companies.

Care Providers. Serving more than four out of five U.S. hospitals and more than 100,000 physicians, OptumInsight assists care providers in meeting their challenge to improve patient outcomes and care amid changing payment models and pressures. OptumInsight brings a broad array of solutions to help care providers

meet these challenges, with particular focus on clinical performance and quality improvement, population health, data management and analytics, revenue management, cost containment, compliance, cloud-enabled collaboration and consumer engagement.

Health Plans. OptumInsight serves three out of four U.S. health plans through cost-effective, technology-enabled solutions that help them improve efficiency, understand and optimize growth while managing risk, deliver on clinical performance and compliance goals, and build and manage strong networks of care.

Governments. OptumInsight provides services tailored to government payers, including data and analytics technology, claims management and payment accuracy services, and strategic consulting.

Life Sciences. OptumInsight provides services to global life sciences companies. These companies look to OptumInsight for data, analytics and expertise in core areas of health economics and outcomes research, market access consulting, integrated clinical and health care claims data and informatics services, epidemiology and drug safety, and patient reported outcomes.

OptumRx

OptumRx provides a full spectrum of pharmacy care services to 65 million people in the United States through its network of more than 67,000 retail pharmacies, multiple home delivery, specialty and compounding pharmacies and through the provision of home infusion services. In 2018, OptumRx added capabilities in managing limited and ultra-limited distribution drugs in oncology, HIV, pain management and ophthalmology as well as capabilities to serve the growing pharmacy needs of people with behavioral health and substance use disorders, particularly Medicare and Medicaid beneficiaries.

OptumRx's comprehensive whole-person approach to pharmacy care services integrates demographic, medical, laboratory, pharmaceutical and other clinical data and applies analytics to drive clinical care insight to support care treatments and compliance, benefiting clients and individual consumers through enhanced services, elevated clinical quality and cost trend management.

In 2018, OptumRx managed $91 billion in pharmaceutical spending, including $40 billion in specialty pharmaceutical spending.

OptumRx provides pharmacy care services to a number of health plans, including a substantial majority of UnitedHealthcare members, large national employer plans, unions and trusts and government entities. OptumRx's distribution system consists primarily of health insurance brokers and other health care consultants and direct sales.

OptumRx offers multiple clinical programs and services to help clients manage overall pharmacy and health care costs in a clinically appropriate manner, which are designed to promote good health outcomes, and to help target inappropriate utilization and non-adherence to medication, each of which may result in adverse medical events that affect member health and client pharmacy and medical spend. OptumRx provides various utilization management, medication management, quality assurance, adherence and counseling programs to complement the client's plan design and clinical strategies. OptumRx offers a distinctive approach to integrating the management of medical and pharmaceutical care, using data and advanced analytics to help improve comprehensive decision-making, elevate quality, close gaps in care and reduce costs for customers and members.

As of December 31, 2018, OptumRx operated four home delivery pharmacies in the United States, which provide patients with access to maintenance medications and enables OptumRx to manage clients' drug costs through operating efficiencies and economies of scale. As of December 31, 2018, OptumRx's specialty pharmacy operations included more than 70 specialty and infusion pharmacies located throughout the United States that are used for delivery of advanced medications to people with chronic or genetic diseases and disorders. OptumRx also operates community mental health facility pharmacies, which help align benefits, care management and pharmacy services for those living with complex, chronic medical and behavioral health issues.

GOVERNMENT REGULATION

Our businesses are subject to comprehensive federal, state and international laws and regulations. We are regulated by federal, state and international regulatory agencies that generally have discretion to issue regulations and interpret and enforce laws and rules. The regulations can vary significantly from jurisdiction to jurisdiction and the interpretation of existing laws and rules also may change periodically. Domestic and international governments continue to enact and consider various legislative and regulatory proposals that could materially impact certain aspects of the health care system. New laws, regulations and rules, or changes in the interpretation of existing laws, regulations and rules, including as a result of changes in the political climate, could adversely affect our business.

If we fail to comply with, or fail to respond quickly and appropriately to changes in, applicable laws, regulations and rules, our business, results of operations, financial position and cash flows could be materially and adversely affected. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to our compliance with federal, state and international laws and regulations.

Federal Laws and Regulation

We are subject to various levels of U.S. federal regulation. For example, when we contract with the federal government, we are subject to federal laws and regulations relating to the award, administration and performance of U.S. government contracts. CMS regulates our UnitedHealthcare businesses and certain aspects of our Optum businesses. Payments by CMS to our businesses are subject to regulations, including those governing fee-for-service and the submission of information relating to the health status of enrollees for purposes of determining the amounts of certain payments to us. CMS also has the right to audit our performance to determine our compliance with CMS contracts and regulations and the quality of care we provide to Medicare beneficiaries. Our commercial business is further subject to CMS audits related to medical loss ratios (MLRs) and risk adjustment data.

UnitedHealthcare Community & State has Medicaid and CHIP contracts that are subject to federal regulations regarding services to be provided to Medicaid enrollees, payment for those services and other aspects of these programs. There are many regulations affecting Medicare and Medicaid compliance and the regulatory environment with respect to these programs is complex. We are also subject to federal law and regulations relating to the administration of contracts with federal agencies. In addition, our business is subject to laws and regulations relating to consumer protection, anti-fraud and abuse, anti-kickbacks, false claims, prohibited referrals, inappropriately reducing or limiting health care services, anti-money laundering, securities and antitrust compliance.

The Tax Cuts and Jobs Act. In December 2017, the U.S. federal government enacted a tax bill (Tax Cuts and Jobs Act or Tax Reform). The Tax Cuts and Jobs Act changed existing United States tax law and included numerous provisions that affected our results of operations, financial position and cash flows. For instance, Tax Reform reduced the U.S. corporate income tax rate and changed business-related exclusions and deductions and credits.

Privacy, Security and Data Standards Regulation. The administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996, as amended (HIPAA), apply to both the group and individual health insurance markets, including self-funded employee benefit plans. Federal regulations related to HIPAA contain minimum standards for electronic transactions and code sets and for the privacy and security of protected health information.

The Health Information Technology for Economic and Clinical Health Act (HITECH) imposed requirements on uses and disclosures of health information; included contracting requirements for HIPAA business associate agreements; extended parts of HIPAA privacy and security provisions to business associates; added federal data

breach notification requirements for covered entities and business associates and reporting requirements to the U.S. Department of Health and Human Services (HHS) and the Federal Trade Commission (FTC) and, in some cases, to the local media; strengthened enforcement and imposed higher financial penalties for HIPAA violations and, in certain cases, imposed criminal penalties for individuals, including employees. In the conduct of our business, depending on the circumstances, we may act as either a covered entity or a business associate. Federal consumer protection laws may also apply in some instances to privacy and security practices related to personally identifiable information.

The use and disclosure of individually identifiable health data by our businesses is also regulated in some instances by other federal laws, including the Gramm-Leach-Bliley Act (GLBA) or state statutes implementing GLBA. These federal laws and state statutes generally require insurers to provide customers with notice regarding how their non-public personal health and financial information is used and the opportunity to "opt out" of certain disclosures before the insurer shares such information with a third party, and generally prescribe safeguards for the protection of personal information. Neither the GLBA nor HIPAA privacy regulations preempt more stringent state laws and regulations that may apply to us, as discussed below.

ERISA. The Employee Retirement Income Security Act of 1974, as amended (ERISA), regulates how our services are provided to or through certain types of employer-sponsored health benefit plans. ERISA is a set of laws and regulations that is subject to periodic interpretation by the U.S. Department of Labor (DOL) as well as the federal courts. ERISA sets forth standards on how our business units may do business with employers who sponsor employee health benefit plans, particularly those that maintain self-funded plans. Regulations established by the DOL subject us to additional requirements for administration of benefits, claims payment and member appeals under health care plans governed by ERISA.

State Laws and Regulation

Health Care Regulation. Our insurance and HMO subsidiaries must be licensed by the jurisdictions in which they conduct business. All of the states in which our subsidiaries offer insurance and HMO products regulate those products and operations. The states require periodic financial reports and establish minimum capital or restricted cash reserve requirements. The National Association of Insurance Commissioners (NAIC) has adopted model regulations that, where adopted by states, require expanded governance practices and risk and solvency assessment reporting. Most states have adopted these or similar measures to expand the scope of regulations relating to corporate governance and internal control activities of HMOs and insurance companies. We are required to maintain a risk management framework and file a confidential self-assessment report with state insurance regulators. We file reports annually with Connecticut, our lead regulator, and with New York, as required by that state's regulation. Certain states have also adopted their own regulations for minimum MLRs with which health plans must comply. In addition, a number of state legislatures have enacted or are contemplating significant reforms of their health insurance markets, either independent of or to comply with or be eligible for grants or other incentives in connection with the ACA, which may affect our operations and our financial results.

Health plans and insurance companies are regulated under state insurance holding company regulations. Such regulations generally require registration with applicable state departments of insurance and the filing of reports that describe capital structure, ownership, financial condition, certain intercompany transactions and general business operations. Most state insurance holding company laws and regulations require prior regulatory approval of acquisitions and material intercompany transfers of assets, as well as transactions between the regulated companies and their parent holding companies or affiliates. These laws may restrict the ability of our regulated subsidiaries to pay dividends to our holding companies.

Some of our business activity is subject to other health care-related regulations and requirements, including PPO, Managed Care Organization (MCO), utilization review (UR), TPA, pharmacy care services, durable medical equipment or care provider-related regulations and licensure requirements. These regulations differ from state to

state and may contain network, contracting, product and rate, licensing and financial and reporting requirements. There are laws and regulations that set specific standards for delivery of services, appeals, grievances and payment of claims, adequacy of health care professional networks, fraud prevention, protection of consumer health information, pricing and underwriting practices and covered benefits and services. State health care anti-fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services and improper marketing. Certain of our businesses are subject to state general agent, broker and sales distribution laws and regulations. UnitedHealthcare Community & State and certain of our Optum businesses are subject to regulation by state Medicaid agencies that oversee the provision of benefits to our Medicaid and CHIP beneficiaries and to our dually eligible (for Medicare and Medicaid) beneficiaries. We also contract with state governmental entities and are subject to state laws and regulations relating to the award, administration and performance of state government contracts.

State Privacy and Security Regulations. A number of states have adopted laws and regulations that may affect our privacy and security practices, such as state laws that govern the use, disclosure and protection of social security numbers and protected health information or that are designed to implement GLBA or protect credit card account data. State and local authorities increasingly focus on the importance of protecting individuals from identity theft, with a significant number of states enacting laws requiring businesses to meet minimum cyber-security standards and notify individuals of security breaches involving personal information. State consumer protection laws may also apply to privacy and security practices related to personally identifiable information, including information related to consumers and care providers. Different approaches to state privacy and insurance regulation and varying enforcement philosophies in the different states may materially and adversely affect our ability to standardize our products and services across state lines. See Part I, Item 1A, “Risk Factors” for a discussion of the risks related to compliance with state privacy and security regulations.

Corporate Practice of Medicine and Fee-Splitting Laws. Certain of our businesses function as direct medical service providers and, as such, are subject to additional laws and regulations. Some states have corporate practice of medicine laws that prohibit specific types of entities from practicing medicine or employing physicians to practice medicine. Moreover, some states prohibit certain entities from engaging in fee-splitting practices that involve sharing in the fees or revenues of a professional practice. These prohibitions may be statutory or regulatory, or may be imposed through judicial or regulatory interpretation. The laws, regulations and interpretations in certain states have been subject to limited judicial and regulatory interpretation and are subject to change.

Pharmacy and Pharmacy Benefits Management (PBM) Regulations

OptumRx’s businesses include home delivery, specialty and compounding pharmacies, as well as clinic-based pharmacies that must be licensed as pharmacies in the states in which they are located. Certain of our home delivery, specialty and compounding pharmacies must also register with the U.S. Drug Enforcement Administration (DEA) and individual state controlled substance authorities to dispense controlled substances. In addition to adhering to the laws and regulations in the states where our home delivery, specialty and compounding pharmacies are located, we also are required to comply with laws and regulations in some non-resident states where we deliver pharmaceuticals, including those requiring us to register with the board of pharmacy in the non-resident state. These non-resident states generally expect our home delivery, specialty and compounding pharmacies to follow the laws of the state in which the pharmacies are located, but some states also require us to comply with the laws of that non-resident state when pharmaceuticals are delivered there. Additionally, certain of our pharmacies that participate in programs for Medicare and state Medicaid providers are required to comply with the applicable Medicare and Medicaid provider rules and regulations. Other laws and regulations affecting our home delivery and specialty pharmacies include federal and state statutes and regulations governing the labeling, packaging, advertising and adulteration of prescription drugs and dispensing of controlled substances. See Part I, Item 1A, “Risk Factors” for a discussion of the risks related to our pharmacy care services businesses.

Federal and state legislation of PBM activities affect both our ability to limit access to a pharmacy provider network or remove network providers. Additionally, many states limit our ability to manage and establish maximum allowable costs for generic prescription drugs. With respect to formulary services, a number of government entities, including CMS, HHS and state departments of insurance, regulate the administration of prescription drug benefits offered through federal or state exchanges. Many states also regulate the scope of prescription drug coverage, as well as the delivery channels to receive such prescriptions, for insurers, MCOs and Medicaid managed care plans. These regulations could limit or preclude (i) certain plan designs, (ii) limited networks, (iii) requirements to use particular care providers or distribution channel, (iv) copayment differentials among providers and (v) formulary tiering practices.

Legislation seeking to regulate PBM activities introduced or enacted at the federal or state level could impact our business practices with others in the pharmacy supply chain, including pharmaceutical manufacturers and network providers. Additionally, organizations like the NAIC periodically issue model regulations and credentialing organizations, like the National Committee for Quality Assurance (NCQA) and the Utilization Review Accreditation Commission (URAC), may establish standards that impact PBM pharmacy activities. While these model regulations and standards do not have the force of law, they may influence states to adopt their recommendations and impact the services we deliver to our clients.

Consumer Protection Laws

Certain of our businesses participate in direct-to-consumer activities and are subject to regulations applicable to on-line communications and other general consumer protection laws and regulations such as the Federal Tort Claims Act, the Federal Postal Service Act and the FTC's Telemarketing Sales Rule. Most states also have similar consumer protection laws.

Certain laws, such as the Telephone Consumer Protection Act, give the FTC, Federal Communications Commission ("FCC") and state attorneys general the ability to regulate, and bring enforcement actions relating to, telemarketing practices and certain automated outbound contacts such as phone calls, texts or emails. Under certain circumstances, these laws may provide consumers with a private right of action. Violations of these laws could result in substantial statutory penalties and other sanctions.

Banking Regulation

Optum Bank is subject to regulation by federal banking regulators, including the Federal Deposit Insurance Corporation, which performs annual examinations to ensure that the bank is operating in accordance with federal safety and soundness requirements, and the Consumer Financial Protection Bureau, which may perform periodic examinations to ensure that the bank is in compliance with applicable consumer protection statutes, regulations and agency guidelines. Optum Bank is also subject to supervision and regulation by the Utah State Department of Financial Institutions, which carries out annual examinations to ensure that the bank is operating in accordance with state safety and soundness requirements and performs periodic examinations of the bank's compliance with applicable state banking statutes, regulations and agency guidelines. In the event of unfavorable examination results from any of these agencies, the bank could become subject to increased operational expenses and capital requirements, enhanced governmental oversight and monetary penalties.

International Regulation

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes vary from jurisdiction to jurisdiction. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the Foreign Corrupt Practices Act (FCPA), which prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage.

COMPETITION

As a diversified health care company, we operate in highly competitive markets across the full expanse of health care benefits and services, including organizations ranging from startups to highly sophisticated Fortune 50 global enterprises, for-profit and non-profit companies, and private and government-sponsored entities. New entrants and business combinations also contribute to a dynamic and competitive environment. We compete fundamentally on the quality and value we provide to those we serve, which can include elements such as product and service innovation; use of technology; consumer and provider engagement and satisfaction; sales, marketing and pricing. See Part I, Item 1A, "Risk Factors" for additional discussion of our risks related to competition.

INTELLECTUAL PROPERTY RIGHTS

We have obtained trademark registration for the UnitedHealth Group, UnitedHealthcare and Optum names and logos. We own registrations for certain of our other trademarks in the United States and abroad. We hold a portfolio of patents and have patent applications pending from time to time. We are not substantially dependent on any single patent or group of related patents.

Unless otherwise noted, trademarks appearing in this report are trademarks owned by us. We disclaim any proprietary interest in the marks and names of others.

EMPLOYEES

As of December 31, 2018, we employed 300,000 individuals.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following sets forth certain information regarding our executive officers as of February 12, 2019, including the business experience of each executive officer during the past five years:

Name	Age	Position
Stephen J. Hemsley	66	Executive Chair of the Board
David S. Wichmann	56	Chief Executive Officer
Steven H. Nelson	59	Executive Vice President; Chief Executive Officer of UnitedHealthcare
Andrew P. Witty	54	Executive Vice President; Chief Executive Officer of Optum
John F. Rex	56	Executive Vice President; Chief Financial Officer
Thomas E. Roos	46	Senior Vice President; Chief Accounting Officer
Marianne D. Short	67	Executive Vice President; Chief Legal Officer
D. Ellen Wilson	61	Executive Vice President; Chief Human Resources Officer

Our Board of Directors elects executive officers annually. Our executive officers serve until their successors are duly elected and qualified, or until their earlier death, resignation, removal or disqualification.

Mr. Hemsley is Executive Chair of the Board of UnitedHealth Group and has served in that capacity since September 2017. Mr. Hemsley previously served as Chief Executive Officer from 2006 to August 2017. He has been a member of the Board of Directors since 2000.

Mr. Wichmann is Chief Executive Officer of UnitedHealth Group and a member of the Board of Directors and has served in that capacity since September 2017. Mr. Wichmann previously served as President of UnitedHealth

Group from November 2014 to August 2017. Mr. Wichmann also served as Chief Financial Officer of UnitedHealth Group from January 2011 to June 2016. From April 2008 to November 2014, Mr. Wichmann served as Executive Vice President of UnitedHealth Group and President of UnitedHealth Group Operations.

Mr. Nelson is Executive Vice President of UnitedHealth Group and Chief Executive Officer of UnitedHealthcare and has served in that capacity since August 2017. Mr. Nelson served as Chief Executive Officer of UnitedHealthcare's Medicare & Retirement, from March 2014 to August 2017. He served as Chief Executive Officer of UnitedHealthcare Community & State from August 2012 to March 2014. From January 2008 to July 2012 he served as President of UnitedHealthcare Community & State and then as Chief Executive Officer of UnitedHealthcare Employer & Individual's West Region business.

Mr. Witty is Executive Vice President of UnitedHealth Group and Chief Executive Officer of Optum and has served in that capacity since July 2018. He previously served as a UnitedHealth Group director from August 2017 to March 2018. Prior to joining UnitedHealth Group, Mr. Witty was CEO and a board member of GlaxoSmithKline, a global pharmaceutical company, from 2008 to April 2017.

Mr. Rex is Executive Vice President and Chief Financial Officer of UnitedHealth Group and has served in that capacity since June 2016. From March 2012 to June 2016, Mr. Rex served as Executive Vice President and Chief Financial Officer of Optum. Prior to joining Optum in 2012, Mr. Rex spent over a decade at JP Morgan, a global financial services firm, and its predecessors, concluding his tenure as a Managing Director.

Mr. Roos is Senior Vice President and Chief Accounting Officer of UnitedHealth Group and has served in that capacity since August 2015. Prior to joining UnitedHealth Group, Mr. Roos was a Partner at Deloitte & Touche LLP, an independent registered public accounting firm, from September 2007 to August 2015.

Ms. Short is Executive Vice President and Chief Legal Officer of UnitedHealth Group and has served in that capacity since January 2013. Prior to joining UnitedHealth Group, Ms. Short served as the Managing Partner at Dorsey & Whitney LLP, an international law firm, from January 2007 to December 2012.

Ms. Wilson is Executive Vice President and Chief Human Resources Officer of UnitedHealth Group and has served in that capacity since June 2013. From January 2012 to May 2013, Ms. Wilson served as Chief Administrative Officer of Optum. Prior to joining Optum, Ms. Wilson served for 17 years at Fidelity Investments, concluding her tenure there as head of Human Resources.

Additional Information

UnitedHealth Group Incorporated was incorporated in January 1977 in Minnesota. On July 1, 2015, UnitedHealth Group Incorporated changed its state of incorporation from Minnesota to Delaware pursuant to a plan of conversion. Our executive offices are located at UnitedHealth Group Center, 9900 Bren Road East, Minnetonka, Minnesota 55343; our telephone number is (952) 936-1300.

You can access our website at *www.unitedhealthgroup.com* to learn more about our company. From that site, you can download and print copies of our annual reports to shareholders, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, along with amendments to those reports. You can also download from our website our certificate of incorporation, bylaws and corporate governance policies, including our Principles of Governance, Board of Directors Committee Charters and Code of Conduct. We make periodic reports and amendments available, free of charge, on our website, as soon as reasonably practicable after we file or furnish these reports to the Securities and Exchange Commission (SEC). We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: UnitedHealth Group Incorporated, 9900 Bren Road East, Minnetonka, MN 55343, Attn: Corporate Secretary. Information on or linked to our website is neither part of nor incorporated by reference into this Annual Report on Form 10-K or any other SEC filings.

Our transfer agent, Equiniti (EQ), can help you with a variety of shareholder-related services, including change of address, lost stock certificates, transfer of stock to another person and other administrative services. You can write to our transfer agent at: EQ Shareowner Services, P.O. Box 64854, St. Paul, Minnesota 55164-0854, or telephone (800) 401-1957 or (651) 450-4064.

ITEM 1A. RISK FACTORS

CAUTIONARY STATEMENTS

The statements, estimates, projections or outlook contained in this Annual Report on Form 10-K include forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). When used in this Annual Report on Form 10-K and in future filings by us with the SEC, in our news releases, presentations to securities analysts or investors, and in oral statements made by or with the approval of one of our executive officers, the words "believe," "expect," "intend," "estimate," "anticipate," "forecast," "outlook," "plan," "project," "should" or similar words or phrases are intended to identify such forward-looking statements. These statements are intended to take advantage of the "safe harbor" provisions of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. Any forward-looking statement in this report speaks only as of the date of this report and, except as required by law; we undertake no obligation to update any forward-looking statement to reflect events or circumstances, including unanticipated events, after the date of this report.

The following discussion contains cautionary statements regarding our business that investors and others should consider. We do not undertake to address in future filings or communications regarding our business or results of operations how any of these factors may have caused our results to differ from discussions or information contained in previous filings or communications. In addition, any of the matters discussed below may have affected past, as well as current, forward-looking statements about future results. Any or all forward-looking statements in this Annual Report on Form 10-K and in any other public filings or statements we make may turn out to be wrong. Our forward-looking statements can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. Many factors discussed below will be important in determining our future results. By their nature, forward-looking statements are not guarantees of future performance or results and are subject to risks, uncertainties and assumptions that are difficult to predict or quantify.

If we fail to estimate, price for and manage our medical costs in an effective manner, the profitability of our risk-based products and services could decline and could materially and adversely affect our results of operations, financial position and cash flows.

Through our risk-based benefit products, we assume the risk of both medical and administrative costs for our customers in return for monthly premiums. Premium revenues from risk-based benefits products comprise nearly 80% of our total consolidated revenues. We generally use approximately 80% to 85% of our premium revenues to pay the costs of health care services delivered to these customers. The profitability of our products depends in large part on our ability to predict, price for and effectively manage medical costs. In addition, our OptumHealth business negotiates capitation arrangements with commercial third-party payers. Under the typical capitation arrangement, the health care provider receives a fixed percentage of a third-party payer's premiums to cover all or a defined portion of the medical costs provided to the capitated member. If we fail to predict accurately, or effectively price for or manage the costs of providing care to our capitated members, our results of operations could be materially and adversely affected.

We manage medical costs through underwriting criteria, product design, negotiation of favorable provider contracts and care management programs. Total medical costs are affected by the number of individual services rendered, the cost of each service and the type of service rendered. Our premium revenue on commercial policies and Medicaid contracts are typically based on a fixed monthly rate per individual served for a 12-month period

and is generally priced one to six months before the contract commences. Our revenue on Medicare policies is based on bids submitted to CMS in June the year before the contract year. Although we base the commercial and Medicaid premiums we charge and our Medicare bids on our estimates of future medical costs over the fixed contract period, many factors may cause actual costs to exceed those estimated and reflected in premiums or bids. These factors may include medical cost inflation, increased use of services, increased cost of individual services, large-scale medical emergencies, the introduction of new or costly drugs, treatments and technology, new treatment guidelines, new mandated benefits (such as the expansion of essential benefits coverage) or other regulatory changes and insured population characteristics. Relatively small differences between predicted and actual medical costs or utilization rates as a percentage of revenues can result in significant changes in our financial results. For example, if our 2018 medical costs for commercial insured products had been 1% higher than our actual medical costs, without proportionally higher revenues from such products, our annual net earnings for 2018 would have been reduced by approximately $305 million, excluding any offsetting impact from risk adjustment or from reduced premium rebates due to minimum MLRs.

In addition, the financial results we report for any particular period include estimates of costs that have been incurred for which claims are still outstanding. These estimates involve an extensive degree of judgment. If these estimates prove inaccurate, our results of operations could be materially and adversely affected.

Our business activities are highly regulated and new laws or regulations or changes in existing laws or regulations or their enforcement or application could materially and adversely affect our business.

We are regulated by federal, state and local governments in the United States and other countries where we do business. Our insurance and HMO subsidiaries must be licensed by and are subject to regulation in the jurisdictions in which they conduct business. For example, states require periodic financial reports and enforce minimum capital or restricted cash reserve requirements. Health plans and insurance companies are also regulated under state insurance holding company regulations and some of our activities may be subject to other health care-related regulations and requirements, including those relating to PPOs, MCOs, UR and TPA-related regulations and licensure requirements. Under state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. Any such assessment could expose our insurance entities and other insurers to the risk that they would be required to pay a portion of an impaired or insolvent insurance company’s claims through state guaranty associations.

Certain of our businesses provide products or services to various government agencies. For example, some of our UnitedHealthcare and Optum businesses hold government contracts or provide services related to government contracts and are subject to U.S. federal and state and non U.S. self-referral, anti-kickback, medical necessity, risk adjustment, false claims and other laws and regulations governing government contractors and the use of government funds. Our relationships with these government agencies are subject to the terms of contracts that we hold with the agencies and to laws and regulations regarding government contracts. Among others, certain laws and regulations restrict or prohibit companies from performing work for government agencies that might be viewed as an actual or potential conflict of interest. These laws may limit our ability to pursue and perform certain types of work, thereby materially and adversely affecting our results of operations, financial position and cash flows.

Certain of our Optum businesses are also subject to regulations that are distinct from those faced by our insurance and HMO subsidiaries, including, for example, state telemedicine regulations; debt collection laws; banking regulations; distributor and producer licensing requirements; state corporate practice of medicine doctrines; fee-splitting rules; and health care facility licensure and certificate of need requirements, some of which could impact our relationships with physicians, hospitals and customers. These risks and uncertainties may materially and adversely affect our ability to market or provide our products and services, or to do so at targeted operating margins, or may increase the regulatory burdens under which we operate.

The laws and rules governing our businesses and interpretations of those laws and rules are subject to frequent change. For example, legislative, administrative and public policy changes to the ACA are being considered, and we cannot predict if the ACA will be further modified or repealed or replaced. Litigation challenges have been brought seeking to invalidate the ACA in whole or in part; and a federal district court struck down the ACA in its entirety as unconstitutional in 2018. That opinion has been stayed and appealed. Further, the integration into our businesses of entities that we acquire may affect the way in which existing laws and rules apply to us, including by subjecting us to laws and rules that did not previously apply to us. The broad latitude given to the agencies administering, interpreting and enforcing current and future regulations governing our businesses could force us to change how we do business, restrict revenue and enrollment growth, increase our health care and administrative costs and capital requirements, or expose us to increased liability in courts for coverage determinations, contract interpretation and other actions.

We also must obtain and maintain regulatory approvals to market many of our products and services, increase prices for certain regulated products and services and complete certain acquisitions and dispositions or integrate certain acquisitions. For example, premium rates for our health insurance and managed care products are subject to regulatory review or approval in many states and by the federal government. Additionally, we must submit data on all proposed rate increases on many of our products to HHS for monitoring purposes. Geographic and product expansions may be subject to state and federal regulatory approvals. Delays in obtaining necessary approvals or our failure to obtain or maintain adequate approvals could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes encompass, among other matters, local and cross-border taxation, licensing, tariffs, intellectual property, investment, capital (including minimum solvency margin and reserve requirements), management control, labor, anti-fraud, anti-corruption and privacy and data protection regulations (including requirements for cross-border data transfers) that vary by jurisdiction. We currently operate outside of the United States and in the future may acquire or commence additional businesses based outside of the United States, increasing our exposure to non-U.S. regulatory regimes. For example, our UnitedHealthcare Global business subjects us to Brazilian laws and regulations affecting hospitals, managed care and insurance industries and to regulation by Brazilian regulators, including the national regulatory agency for private health insurance and plans, the Agência Nacional de Saúde Suplementar, while the Banmédica business is subject to Chilean, Colombian and Peruvian laws, regulations and regulators applicable to hospitals and private insurance. Any international regulator may take an approach to the interpretation, implementation and enforcement of industry regulations that could differ from the approach taken by U.S. regulators. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the FCPA, which prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage. Our failure to comply with U.S. or non-U.S. laws and regulations governing our conduct outside the United States or to establish constructive relations with non-U.S. regulators could adversely affect our ability to market our products and services, or to do so at targeted operating margins, which may have a material adverse effect on our business, financial condition and results of operations.

The health care industry is regularly subject to negative publicity, including as a result of governmental investigations, adverse media coverage and political debate surrounding industry regulation. Negative publicity may adversely affect our stock price and damage our reputation in various markets.

As a result of our participation in various government health care programs, both as a payer and as a service provider to payers, we are exposed to additional risks associated with program funding, enrollments, payment adjustments, audits and government investigations that could materially and adversely affect our business, results of operations, financial position and cash flows.

We participate in various federal, state and local government health care benefit programs, including as a payer in Medicare Advantage, Medicare Part D, various Medicaid programs and CHIP, and receive substantial

revenues from these programs. Certain of our Optum businesses also provide services to payers participating in government health care programs. A reduction or less than expected increase, or a protracted delay, in government funding for these programs or change in allocation methodologies, or termination of the contract at the option of the government, may materially and adversely affect our results of operations, financial position and cash flows.

The government health care programs in which we participate generally are subject to frequent changes, including changes that may reduce the number of persons enrolled or eligible for coverage, reduce the amount of reimbursement or payment levels, reduce our participation in certain service areas or markets, or increase our administrative or medical costs under such programs. Revenues for these programs depend on periodic funding from the federal government or applicable state governments and allocation of the funding through various payment mechanisms. Funding for these government programs depends on many factors outside of our control, including general economic conditions and budgetary constraints at the federal or applicable state level. For example, CMS has in the past reduced or frozen Medicare Advantage benchmarks, and additional cuts to Medicare Advantage benchmarks are possible. In addition, from time to time, CMS makes changes to the way it calculates Medicare Advantage risk adjustment payments. Although we have adjusted members' benefits and premiums on a selective basis, ceased to offer benefit plans in certain counties, and intensified both our medical and operating cost management in response to the benchmark reductions and other funding pressures, these or other strategies may not fully address the funding pressures in the Medicare Advantage program. In addition, payers in the Medicare Advantage program may be subject to reductions in payments from CMS as a result of decreased funding or recoupment pursuant to government audit.

Under the Medicaid managed care program, state Medicaid agencies seek bids from eligible health plans to continue their participation in the acute care Medicaid health programs. If we are not successful in obtaining renewals of state Medicaid managed care contracts, we risk losing the members that were enrolled in those Medicaid plans. Under the Medicare Part D program, to qualify for automatic enrollment of low income members, our bids must result in an enrollee premium below a regional benchmark, which is calculated by the government after all regional bids are submitted. If the enrollee premium is not below the government benchmark, we risk losing the members who were auto-assigned to us and will not have additional members auto-assigned to us. In general, our bids are based upon certain assumptions regarding enrollment, utilization, medical costs and other factors. If any of these assumptions is materially incorrect, either as a result of unforeseen changes to the programs on which we bid, or submission by our competitors at lower rates than our bids, our results of operations, financial position and cash flows could be materially and adversely affected.

Many of the government health care coverage programs in which we participate are subject to the prior satisfaction of certain conditions or performance standards or benchmarks. For example, as part of the ACA, CMS has a system that provides various quality bonus payments to Medicare Advantage plans that meet certain quality star ratings at the individual plan or local contract level. The star rating system considers various measures adopted by CMS, including, among others, quality of care, preventive services, chronic illness management and customer satisfaction. Plans must have a rating of four stars or higher to qualify for bonus payments. If we do not maintain or continue to improve our star ratings, our plans may not be eligible for quality bonuses and we may experience a negative impact on our revenues and the benefits that our plans can offer, which could materially and adversely affect the marketability of our plans, our membership levels, results of operations, financial position and cash flows. Any changes in standards or care delivery models that apply to government health care programs, including Medicare and Medicaid, or our inability to improve our quality scores and star ratings to meet government performance requirements or to match the performance of our competitors could result in limitations to our participation in or exclusion from these or other government programs, which in turn could materially and adversely affect our results of operations, financial position and cash flows.

CMS uses various payment mechanisms to allocate funding for Medicare programs, including adjustment of monthly capitation payments to Medicare Advantage plans and Medicare Part D plans according to the predicted health status of each beneficiary as supported by data from health care providers for Medicare Advantage plans,

as well as, for Medicare Part D plans, risk-sharing provisions based on a comparison of costs predicted in our annual bids to actual prescription drug costs. Some state Medicaid programs utilize a similar process. For example, our UnitedHealthcare Medicare & Retirement and UnitedHealthcare Community & State businesses submit information relating to the health status of enrollees to CMS or state agencies for purposes of determining the amount of certain payments to us. CMS and the Office of Inspector General for HHS periodically perform risk adjustment data validation (RADV) audits of selected Medicare health plans to validate the coding practices of and supporting documentation maintained by health care providers. Certain of our local plans have been selected for such audits, which have in the past resulted and could in the future result in retrospective adjustments to payments made to our health plans, fines, corrective action plans or other adverse action by CMS.

We have been and may in the future become involved in routine, regular and special governmental investigations, audits, reviews and assessments. For example, various governmental agencies have conducted investigations into certain PBM practices, which have resulted in other PBMs agreeing to civil penalties, including the payment of money and corporate integrity agreements. Additionally, such investigations, audits or reviews sometimes arise out of, or prompt claims by private litigants or whistleblowers that, among other allegations, we failed to disclose certain business practices or, as a government contractor, submitted false or erroneous claims to the government. Governmental investigations, audits, reviews and assessments could lead to government actions, which could result in adverse publicity, the assessment of damages, civil or criminal fines or penalties, or other sanctions, including restrictions or changes in the way we conduct business, loss of licensure or exclusion from participation in government programs, any of which could have a material adverse effect on our business, results of operations, financial position and cash flows.

If we sustain cyber-attacks or other privacy or data security incidents that result in security breaches that disrupt our operations or result in the unintended dissemination of protected personal information or proprietary or confidential information, we could suffer a loss of revenue and increased costs, exposure to significant liability, reputational harm and other serious negative consequences.

We routinely process, store and transmit large amounts of data in our operations, including protected personal information as well as proprietary or confidential information relating to our business or third parties. Some of the data we process, store and transmit may be outside of the United States due to our information technology systems and international business operations. We are regularly the target of attempted cyber-attacks and other security threats and may be subject to breaches of the information technology systems we use. We have programs in place that are intended to detect, contain and respond to data security incidents and that provide employee awareness training regarding phishing, malware and other cyber risks to protect against cyber risks and security breaches. However, because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or implement adequate preventive measures. Experienced computer programmers and hackers may be able to penetrate our security controls and access, misappropriate or otherwise compromise protected personal information or proprietary or confidential information or that of third-parties, create system disruptions or cause system shutdowns that could negatively affect our operations. They also may be able to develop and deploy viruses, worms and other malicious software programs that attack our systems or otherwise exploit any security vulnerabilities. Hardware, software, or applications we develop or procure from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Our facilities and services may also be vulnerable to security incidents or security attacks; acts of vandalism or theft; coordinated attacks by activist entities; misplaced or lost data; human error; malicious social engineering; or other events that could negatively affect our systems, our customers' data, proprietary or confidential information relating to our business or third parties, or our operations. In certain circumstances we may rely on third party vendors to process, store and transmit large amounts of data for our business whose operations are subject to similar risks.

The costs to eliminate or address the foregoing security threats and vulnerabilities before or after a cyber-incident could be material. Our remediation efforts may not be successful and could result in interruptions, delays, or

cessation of service and loss of existing or potential customers. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information, proprietary information or confidential information about us or our customers or other third-parties, could expose our customers' private information and our customers to the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in litigation and potential liability, including regulatory penalties, for us, damage our brand and reputation, or otherwise harm our business.

If we fail to comply with applicable privacy, security and data laws, regulations and standards, including with respect to third-party service providers that utilize protected personal information on our behalf, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

The collection, maintenance, protection, use, transmission, disclosure and disposal of protected personal information is regulated at the federal, state, international and industry levels and requirements are imposed on us by contracts with customers. These laws, rules and requirements are subject to change. Compliance with new privacy and security laws, regulations and requirements may result in increased operating costs, and may constrain or require us to alter our business model or operations. For example, the HITECH amendments to HIPAA imposed further restrictions on our ability to collect, disclose and use protected personal information and imposed additional compliance requirements on our business.

Internationally, many of the jurisdictions in which we operate have established their own data security and privacy legal framework with which we or our customers must comply. We expect that there will continue to be new proposed laws, regulations and industry standards concerning privacy, data protection and information security in the European Union, Brazil, Chile, India and other jurisdictions, and we cannot yet determine the impacts such future laws, regulations and standards may have on our businesses or the businesses of our customers. For example, effective May 2018, the European Union's General Data Protection Regulation (GDPR) overhauled data protection laws in the European Union. The new regulation superseded prior European Union privacy and data protection legislation, imposed more stringent European Union data protection requirements on us or our customers, and prescribed greater penalties for noncompliance. Brazilian privacy legislation, similar in certain respects to GDPR, goes into effect in 2020.

Many of our businesses are also subject to the Payment Card Industry Data Security Standard, which is a multifaceted security standard that is designed to protect credit card account data.

HIPAA requires business associates as well as covered entities to comply with certain privacy and security requirements. While we provide for appropriate protections through our contracts with our third-party service providers and in certain cases assess their security controls, we have limited oversight or control over their actions and practices. Several of our businesses act as business associates to their covered entity customers and, as a result, collect, use, disclose and maintain protected personal information in order to provide services to these customers. HHS has announced that it will continue its audit program to assess HIPAA compliance efforts by covered entities and expand it to include business associates. An audit resulting in findings or allegations of noncompliance could have a material adverse effect on our results of operations, financial position and cash flows.

Through our Optum businesses, including our Optum Labs business, we maintain a database of administrative and clinical data that is statistically de-identified in accordance with HIPAA standards. Noncompliance or findings of noncompliance with applicable laws, regulations or requirements, or the occurrence of any privacy or security breach involving the misappropriation, loss or other unauthorized disclosure of protected personal information, whether by us or by one of our third-party service providers, could have a material adverse effect on our reputation and business and, among other consequences, could subject us to mandatory disclosure to the media, loss of existing or new customers, significant increases in the cost of managing and remediating privacy or security incidents and material fines, penalties and litigation awards. Any of these consequences could have a material and adverse effect on our results of operations, financial position and cash flows.

Our businesses providing pharmacy care services face regulatory and operational risks and uncertainties that may differ from the risks of our other businesses.

We provide pharmacy care services through our OptumRx and UnitedHealthcare businesses. Each business is subject to federal and state anti-kickback, beneficiary inducement and other laws that govern the relationships of the business with pharmaceutical manufacturers, physicians, pharmacies, customers and consumers. As a provider of pharmacy benefit management services, OptumRx is also subject to an increasing number of licensure, registration and other laws and accreditation standards that impact the business practices of a pharmacy benefit manager. OptumRx also conducts business through home delivery, specialty and compounding pharmacies, pharmacies located in community mental health centers and home infusion, which subjects it to extensive federal, state and local laws and regulations, including those of the DEA and individual state controlled substance authorities, the FDA and Boards of Pharmacy. In addition, federal and state legislatures regularly consider new regulations for the industry that could materially affect current industry practices, including potential new legislation and regulations regarding the receipt or disclosure of rebates and other fees from pharmaceutical companies, the development and use of formularies and other utilization management tools, the use of average wholesale prices or other pricing benchmarks, pricing for specialty pharmaceuticals, limited access to networks and pharmacy network reimbursement methodologies.

We could face potential claims in connection with purported errors by our home delivery, specialty or compounding or clinic-based pharmacies or the provision of home infusion services, including as a result of the risks inherent in the packaging and distribution of pharmaceuticals and other health care products. Disruptions from any of our home delivery, specialty pharmacy or home infusion services could materially and adversely affect our results of operations, financial position and cash flows.

In addition, our pharmacy care services businesses provide services to sponsors of health benefit plans that are subject to ERISA. A private party or the DOL, which is the agency that enforces ERISA, could assert that the fiduciary obligations imposed by the statute apply to some or all of the services provided by our pharmacy care services businesses even where those businesses are not contractually obligated to assume fiduciary obligations. If a court were to determine that fiduciary obligations apply, we could be subject to claims for breaches of fiduciary obligations or claims that we entered into certain prohibited transactions.

If we fail to compete effectively to maintain or increase our market share, including maintaining or increasing enrollments in businesses providing health benefits, our results of operations, financial position and cash flows could be materially and adversely affected.

Our businesses compete throughout the United States, South America and other foreign markets and face significant competition in all of the geographic markets in which we operate. In particular markets, our competitors, compared to us, may have greater capabilities, resources or market share; a more established reputation; superior supplier or health care professional arrangements; better existing business relationships; lower profit margin or financial return expectations; or other factors that give such competitors a competitive advantage. Our competitive position may also be adversely affected by significant merger and acquisition activity that has occurred in the industries in which we operate, both among our competitors and suppliers (including hospitals, physician groups and other health care professionals). Consolidation may make it more difficult for us to retain or increase our customer base, improve the terms on which we do business with our suppliers, or maintain or increase profitability.

In addition, our success in the health care marketplace will depend on our ability to develop and deliver innovative and potentially disruptive products and services to satisfy evolving market demands. If we do not continue to innovate and provide products and services that are useful and relevant to consumers, we may not remain competitive, and we risk losing market share to existing competitors and disruptive new market entrants. For example, new direct-to-consumer business models from competing businesses may make it more difficult for us to directly engage consumers in the selection and management of their health care benefits and health care

usage, and we may face challenges from new technologies and market entrants that could affect our existing relationship with health plan enrollees in these areas. Our business, results of operations, financial position and cash flows could be materially and adversely affected if we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets, if we do not design and price our products properly and competitively, if we are unable to innovate and deliver products and services that demonstrate value to our customers, if we do not provide a satisfactory level of services, if membership or demand for other services does not increase as we expect or declines, or if we lose accounts with more profitable products while retaining or increasing membership in accounts with less profitable products.

If we fail to develop and maintain satisfactory relationships with physicians, hospitals and other service providers, our business could be materially and adversely affected.

Our results of operations and prospects are substantially dependent on our continued ability to contract with physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and other service providers at competitive prices. Any failure by us to develop and maintain satisfactory relationships with health care providers, whether in-network or out-of-network, could materially and adversely affect our business, results of operations, financial position and cash flows. In addition, certain activities related to network design, provider participation in networks and provider payments could result in disputes that may be costly, divert management's attention from our operations and result in negative publicity.

In any particular market, physicians and health care providers could refuse to contract, demand higher payments, or take other actions that could result in higher medical costs, less desirable products for customers or difficulty meeting regulatory or accreditation requirements. In some markets, certain health care providers, particularly hospitals, physician and hospital organizations or multi-specialty physician groups, may have significant market positions or near monopolies that could result in diminished bargaining power on our part. In addition, ACOs; practice management companies (which aggregate physician practices for administrative efficiency); and other organizational structures adopted by physicians, hospitals and other care providers may change the way in which these providers do business with us and may change the competitive landscape. Such organizations or groups of physicians may compete directly with us, which could adversely affect our business, and our results of operations, financial position and cash flows by impacting our relationships with these providers or affecting the way that we price our products and estimate our costs, which might require us to incur costs to change our operations. In addition, if these providers refuse to contract with us, use their market position to negotiate favorable contracts or place us at a competitive disadvantage, our ability to market products or to be profitable in those areas could be materially and adversely affected.

Our health care benefits businesses have capitation arrangements with some physicians, hospitals and other health care providers. Capitation arrangements limit our exposure to the risk of increasing medical costs, but expose us to risk related to the adequacy of the financial and medical care resources of the health care provider. To the extent that a capitated health care provider organization faces financial difficulties or otherwise is unable to perform its obligations under the capitation arrangement, we may be held responsible for unpaid health care claims that should have been the responsibility of the capitated health care provider and for which we have already paid the provider, under the capitation arrangement. Further, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts could result in a disruption in the provision of services to our members or a reduction in the services available to our members. Health care providers with which we contract may not properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events could have a material adverse effect on the provision of services to our members and our operations.

Some providers that render services to our members do not have contracts with us. In those cases, we do not have a pre-established understanding about the amount of compensation that is due to the provider for services rendered to our members. In some states, the amount of compensation due to these out-of-network providers is defined by law or regulation, but in most instances the amount is either not defined or is established by a standard

that does not clearly specify dollar terms. In some instances, providers may believe that they are underpaid for their services and may either litigate or arbitrate their dispute with us or try to recover from our members the difference between what we have paid them and the amount they charged us.

The success of some of our businesses, including OptumHealth and UnitedHealthcare Global, depend on maintaining satisfactory relationships with physicians as our employees, independent contractors or joint venture partners. The physicians that practice medicine or contract with our affiliated physician organizations could terminate their provider contracts or otherwise become unable or unwilling to continue practicing medicine or contracting with us. There is and will likely be heightened competition in the markets where we operate to acquire or manage physician practices or to employ or contract with individual physicians. If we are unable to maintain or grow satisfactory relationships with physicians, or to acquire, recruit or, in some instances, employ physicians, or to retain enrollees following the departure of a physician, our revenues could be materially and adversely affected. In addition, our affiliated physician organizations contract with competitors of UnitedHealthcare. Our businesses could suffer if our affiliated physician organizations fail to maintain relationships with these companies, or fail to adequately price their contracts with these third-party payers.

In addition, physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and certain health care providers are customers of our Optum businesses. Physicians also provide medical services at facilities owned by our Optum businesses. Given the importance of health care providers and other constituents to our businesses, failure to maintain satisfactory relationships with them could materially and adversely affect our results of operations, financial position and cash flows.

We are routinely subject to various legal actions due to the nature of our business, which could damage our reputation and, if resolved unfavorably, could result in substantial penalties or monetary damages and materially and adversely affect our results of operations, financial position and cash flows.

We are routinely made party to a variety of legal actions related to, among other matters, the design, management and delivery of our product and service offerings. These matters have included or could in the future include matters related to health care benefits coverage and payment claims (including disputes with enrollees, customers and contracted and non-contracted physicians, hospitals and other health care professionals), tort claims (including claims related to the delivery of health care services, such as medical malpractice by staff at our affiliates' facilities, or by health care practitioners who are employed by us, have contractual relationships with us, or serve as providers to our managed care networks), whistleblower claims (including claims under the False Claims Act or similar statutes), contract and labor disputes, tax claims and claims related to disclosure of certain business practices. We are also party to certain class action lawsuits brought by health care professional groups and consumers. In addition, we operate in jurisdictions outside of the United States where contractual rights, tax positions and applicable regulations may be subject to interpretation or uncertainty to a greater degree than in the United States, and therefore subject to dispute by customers, government authorities or others. We are largely self-insured with regard to litigation risks. While we maintain excess liability insurance with outside insurance carriers for claims in excess of our self-insurance, certain types of damages, such as punitive damages in some circumstances, are not covered by insurance. Although we record liabilities for our estimates of the probable costs resulting from self-insured matters, it is possible that the level of actual losses will significantly exceed the liabilities recorded.

We cannot predict the outcome of significant legal actions in which we are involved and are incurring expenses in resolving these matters. The legal actions we face or may face in the future could further increase our cost of doing business and materially and adversely affect our results of operations, financial position and cash flows. In addition, certain legal actions could result in adverse publicity, which could damage our reputation and materially and adversely affect our ability to retain our current business or grow our market share in some markets and businesses.

Any failure by us to manage successfully our strategic alliances or complete, manage or integrate acquisitions and other significant strategic transactions or relationships domestically or outside the United States could materially and adversely affect our business, prospects, results of operations, financial position and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures and outsourcing transactions and often enter into agreements relating to such transactions. For example, we have a strategic alliance with AARP under which we provide AARP-branded Medicare Supplement insurance to AARP members and other AARP-branded products and services to Medicare beneficiaries. If we fail to meet the needs of our alliance or joint venture partners, including by developing additional products and services, providing high levels of service, pricing our products and services competitively or responding effectively to applicable federal and state regulatory changes, our alliances and joint ventures could be damaged or terminated, which in turn could adversely impact our reputation, business and results of operations. Further, if we fail to identify and successfully complete transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally, we may be placed at a competitive disadvantage or we may be adversely affected by negative market perceptions, any of which may have a material adverse effect on our results of operations, financial position or cash flows.

Success in completing acquisitions is also dependent on efficiently integrating the acquired business into our existing operations, including our internal control environment, or otherwise leveraging its operations, which may present challenges that are different from those presented by organic growth and that may be difficult for us to manage. If we cannot successfully integrate these acquisitions and realize contemplated revenue growth opportunities and cost savings, our business, prospects, results of operations, financial position and cash flows could be materially and adversely affected.

As we expand and operate our business outside of the United States, we are presented with challenges that differ from those presented by acquisitions of domestic businesses, including challenges in adapting to new markets, languages, business, labor and cultural practices and regulatory environments. Adapting to these challenges could require us to devote significant senior management and other resources to the acquired businesses before we realize anticipated synergies or other benefits from the acquired businesses. These challenges vary widely by country and may include political instability, government intervention, discriminatory regulation and currency exchange controls or other restrictions that could prevent us from transferring funds from these operations out of the countries in which our acquired businesses operate, or converting local currencies that we hold into U.S. dollars or other currencies. If we are unable to manage successfully our non-U.S. acquisitions, our business, prospects, results of operations and financial position could be materially and adversely affected.

Foreign currency exchange rates and fluctuations may have an impact on our shareholders' equity from period to period, which could adversely affect our debt to debt-plus-equity ratio, and our future revenues, costs and cash flows from international operations. Any measures we may implement to reduce the effect of volatile currencies may be costly or ineffective.

Our sales performance will suffer if we do not adequately attract, retain and provide support to a network of independent producers and consultants.

Our products and services are sold in part through nonexclusive producers and consultants for whose services and allegiance we must compete. Our sales would be materially and adversely affected if we are unable to attract, retain and support such independent producers and consultants or if our sales strategy is not appropriately aligned across distribution channels. Our relationships with producers could be materially and adversely impacted by changes in our business practices and the nature of our relationships to address these pressures, including potential reductions in commission levels.

A number of investigations have been conducted regarding the marketing practices of producers selling health care products and the payments they receive and have resulted in enforcement actions against companies in our industry and producers marketing and selling those companies' products. If we were subjected to similar investigations and enforcement actions, such actions could result in penalties and the imposition of corrective action plans, which could materially and adversely impact our ability to market our products.

Unfavorable economic conditions could materially and adversely affect our revenues and our results of operations.

Unfavorable economic conditions may impact demand for certain of our products and services. For example, high unemployment can cause lower enrollment or lower rates of renewal in our employer group plans. Unfavorable economic conditions also have caused and could continue to cause employers to stop offering certain health care coverage as an employee benefit or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs. In addition, unfavorable economic conditions could adversely impact our ability to increase premiums or result in the cancellation by certain customers of our products and services. These conditions could lead to a decrease in our membership levels and premium and fee revenues and could materially and adversely affect our results of operations, financial position and cash flows.

During a prolonged unfavorable economic environment, state and federal budgets could be materially and adversely affected, resulting in reduced reimbursements or payments in our federal and state government health care coverage programs, including Medicare, Medicaid and CHIP. A reduction in state Medicaid reimbursement rates could be implemented retrospectively to apply to payments already negotiated or received from the government and could materially and adversely affect our results of operations, financial position and cash flows. In addition, state and federal budgetary pressures could cause the affected governments to impose new or a higher level of taxes or assessments for our commercial programs, such as premium taxes on health insurance and surcharges or fees on select fee-for-service and capitated medical claims. Any of these developments or actions could materially and adversely affect our results of operations, financial position and cash flows.

A prolonged unfavorable economic environment also could adversely impact the financial position of hospitals and other care providers, which could materially and adversely affect our contracted rates with these parties and increase our medical costs or materially and adversely affect their ability to purchase our service offerings. Further, unfavorable economic conditions could adversely impact the customers of our Optum businesses, including health plans, hospitals, care providers, employers and others, which could, in turn, materially and adversely affect Optum's financial results.

Our investment portfolio may suffer losses, which could adversely affect our results of operations, financial position and cash flows.

Market fluctuations could impair our profitability and capital position. Volatility in interest rates affects our interest income and the market value of our investments in debt securities of varying maturities, which constitute the vast majority of the fair value of our investments as of December 31, 2018. Relatively low interest rates on investments, such as those experienced during recent years, have adversely impacted our investment income. In addition, a delay in payment of principal or interest by issuers, or defaults by issuers (primarily issuers of our investments in corporate and municipal bonds), could reduce our investment income and require us to write down the value of our investments, which could adversely affect our profitability and equity.

There can be no assurance that our investments will produce total positive returns or that we will not sell investments at prices that are less than their carrying values. Changes in the value of our investment assets, as a result of interest rate fluctuations, changes in issuer financial conditions, illiquidity or otherwise, could have an adverse effect on our equity. In addition, if it became necessary for us to liquidate our investment portfolio on an accelerated basis, such an action could have an adverse effect on our results of operations and the capital position of our regulated subsidiaries.

If the value of our intangible assets is materially impaired, our results of operations, equity and credit ratings could be materially and adversely affected.

As of December 31, 2018, our goodwill and other intangible assets had a carrying value of $68 billion, representing 45% of our total consolidated assets. We periodically evaluate our goodwill and other intangible assets to determine whether all or a portion of their carrying values may be impaired, in which case a charge to earnings may be necessary. The value of our goodwill may be materially and adversely impacted if businesses that we acquire perform in a manner that is inconsistent with our assumptions. In addition, from time to time we divest businesses, and any such divestiture could result in significant asset impairment and disposition charges, including those related to goodwill and other intangible assets. Any future evaluations requiring an impairment of our goodwill and other intangible assets could materially and adversely affect our results of operations and equity in the period in which the impairment occurs. A material decrease in equity could, in turn, adversely impact our credit ratings and potentially impact our compliance with the financial covenants in our bank credit facilities.

If we fail to maintain properly the integrity or availability of our data or successfully consolidate, integrate, upgrade or expand our existing information systems, or if our technology products do not operate as intended, our business could be materially and adversely affected.

Our ability to price adequately our products and services, to provide effective service to our customers in an efficient and uninterrupted fashion, and to report accurately our results of operations depends on the integrity of the data in our information systems. We periodically consolidate, integrate, upgrade and expand our information systems' capabilities as a result of technology initiatives and recently enacted regulations, changes in our system platforms and integration of new business acquisitions. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Our information systems require an ongoing commitment of significant resources to maintain, protect and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving systems and regulatory standards and changing customer preferences. If the information we rely upon to run our businesses is found to be inaccurate or unreliable or if we fail to maintain or protect our information systems and data integrity effectively, we could lose existing customers, have difficulty attracting new customers, experience problems in determining medical cost estimates and establishing appropriate pricing, have difficulty preventing, detecting and controlling fraud, have disputes with customers, physicians and other health care professionals, become subject to regulatory sanctions or penalties, incur increases in operating expenses or suffer other adverse consequences. Our process of consolidating the number of systems we operate, upgrading and expanding our information systems' capabilities, enhancing our systems and developing new systems to keep pace with continuing changes in information processing technology may not be successful. Failure to protect, consolidate and integrate our systems successfully could result in higher than expected costs and diversion of management's time and energy, which could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses sell and install software products that may contain unexpected design defects or may encounter unexpected complications during installation or when used with other technologies utilized by the customer. Connectivity among competing technologies is becoming increasingly important in the health care industry. A failure of our technology products to operate as intended and in a seamless fashion with other products could materially and adversely affect our results of operations, financial position and cash flows.

Uncertain and rapidly evolving U.S. federal and state, non-U.S. and international laws and regulations related to the health information technology market may present compliance challenges and could materially and adversely affect the configuration of our information systems and platforms, and our ability to compete in this market.

If we are not able to protect our proprietary rights to our databases, software and related products, our ability to market our knowledge and information-related businesses could be hindered and our results of operations, financial position and cash flows could be materially and adversely affected.

We rely on our agreements with customers, confidentiality agreements with employees and third parties, and our trademarks, trade secrets, copyrights and patents to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, and we expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this industry segment grows. Such litigation and misappropriation of our proprietary information could hinder our ability to market and sell products and services and our results of operations, financial position and cash flows could be materially and adversely affected.

Restrictions on our ability to obtain funds from our regulated subsidiaries could materially and adversely affect our results of operations, financial position and cash flows.

Because we operate as a holding company, we are dependent on dividends and administrative expense reimbursements from our subsidiaries to fund our obligations. Many of these subsidiaries are regulated by departments of insurance or similar regulatory authorities. We are also required by law or regulation to maintain specific prescribed minimum amounts of capital in these subsidiaries. The levels of capitalization required depend primarily on the volume of premium revenues generated by the applicable subsidiary. In most states, we are required to seek approval by state regulatory authorities before we transfer money or pay dividends from our regulated subsidiaries that exceed specified amounts. An inability of our regulated subsidiaries to pay dividends to their parent companies in the desired amounts or at the time of our choosing could adversely affect our ability to reinvest in our business through capital expenditures or business acquisitions, as well as our ability to maintain our corporate quarterly dividend payment, repurchase shares of our common stock and repay our debt. If we are unable to obtain sufficient funds from our subsidiaries to fund our obligations, our results of operations, financial position and cash flows could be materially and adversely affected.

Any downgrades in our credit ratings could adversely affect our business, financial condition and results of operations.

Claims paying ability, financial strength and debt ratings by Nationally Recognized Statistical Rating Organizations are important factors in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used by customers and creditors. We believe our claims paying ability and financial strength ratings are important factors in marketing our products to certain of our customers. Our credit ratings impact both the cost and availability of future borrowings. Each of the credit rating agencies reviews its ratings periodically. Our ratings reflect each credit rating agency's opinion of our financial strength, operating performance and ability to meet our debt obligations or obligations to policyholders. There can be no assurance that our current credit ratings will be maintained in the future. Any downgrades in our credit ratings could materially increase our costs of or ability to access funds in the debt capital markets and otherwise materially increase our operating costs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

To support our business operations in the United States and other countries we own and lease real properties. Our various reportable segments use these facilities for their respective business purposes, and we believe these current facilities are suitable for their respective uses and are adequate for our anticipated future needs.

ITEM 3. LEGAL PROCEEDINGS

The information required by this Item 3 is incorporated herein by reference to the information set forth under the captions "Legal Matters" and "Governmental Investigations, Audits and Reviews" in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET AND HOLDERS

Our common stock is traded on the New York Stock Exchange (NYSE) under the symbol UNH. On January 31, 2019, there were 11,948 registered holders of record of our common stock.

DIVIDEND POLICY

In June 2018, our Board of Directors increased the Company's annual cash dividend rate to shareholders to $3.60 per share compared to $3.00 per share, which the Company had paid since June 2017. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

ISSUER PURCHASES OF EQUITY SECURITIES

In November 1997, our Board of Directors adopted a share repurchase program, which the Board evaluates periodically. There is no established expiration date for the program. During the fourth quarter of 2018, we repurchased 3.3 million shares at an average price of $256.15 per share. As of December 31, 2018, we had Board authorization to purchase up to 94 million shares of our common stock.

PERFORMANCE GRAPH

The following performance graph compares the cumulative five-year total return to shareholders on our common stock relative to the cumulative total returns of the S&P 500 index, the S&P Health Care Index and the Dow Jones US Industrial Average Index for the five-year period ended December 31, 2018. We have also included the customized peer group of certain *Fortune 50* companies that we have compared ourselves to in prior years. We believe that these indices provide a more meaningful comparison than the previous subset of the Fortune 50 given our diverse businesses. The comparisons assume the investment of $100 on December 31, 2013 in our common stock and in each index, and that dividends were reinvested when paid.

The *Fortune 50* Group consists of the following companies: American International Group, Inc., Berkshire Hathaway Inc., Cardinal Health, Inc., Citigroup Inc., General Electric Company, International Business Machines Corporation and Johnson & Johnson. We are not included in this *Fortune 50* Group index. In calculating the cumulative total shareholder return of the indexes, the shareholder returns of the *Fortune 50* Group companies are weighted according to the stock market capitalizations of the companies at January 1 of each year.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN

Among UnitedHealth Group, the S&P Health Care Index, the Dow Jones US Industrial Average Index, the S&P 500 Index, and Fortune 50 Group

	12/13	12/14	12/15	12/16	12/17	12/18
UnitedHealth Group	**$100.00**	**$136.46**	**$161.37**	**$223.35**	**$312.29**	**$357.64**
S&P Health Care Index	**100.00**	**125.34**	**133.97**	**130.37**	**159.15**	**169.44**

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

ITEM 6. SELECTED FINANCIAL DATA

(in millions, except percentages and per share data)	For the Years Ended December 31, 2018	2017 (a)	2016	2015 (b)	2014
Consolidated operating results					
Revenues	$226,247	$201,159	$184,840	$157,107	$130,474
Earnings from operations	17,344	15,209	12,930	11,021	10,274
Net earnings attributable to UnitedHealth Group common shareholders	11,986	10,558	7,017	5,813	5,619
Return on equity (c)	24.4%	24.4%	19.4%	17.7%	17.3%
Basic earnings per share attributable to UnitedHealth Group common shareholders	$ 12.45	$ 10.95	$ 7.37	$ 6.10	$ 5.78
Diluted earnings per share attributable to UnitedHealth Group common shareholders	12.19	10.72	7.25	6.01	5.70
Cash dividends declared per common share	3.45	2.875	2.375	1.875	1.405
Consolidated cash flows from (used for)					
Operating activities	$ 15,713	$ 13,596	$ 9,795	$ 9,740	$ 8,051
Investing activities	(12,385)	(8,599)	(9,355)	(18,395)	(2,534)
Financing activities	(4,365)	(3,441)	(1,011)	12,239	(5,293)
Consolidated financial condition (as of December 31)					
Cash and investments	$ 46,834	$ 43,831	$ 37,143	$ 31,703	$ 28,063
Total assets	152,221	139,058	122,810	111,254	86,300
Total commercial paper and long-term debt	36,554	31,692	32,970	31,965	17,324
Redeemable noncontrolling interests	1,908	2,189	2,012	1,736	1,388
Total equity	54,319	49,833	38,177	33,725	32,454

(a) Includes the impact of the revaluation of our net deferred tax liabilities due to Tax Reform enacted in December 2017.

(b) Includes the effects of the July 2015 acquisition of Catamaran Corporation (Catamaran) and related debt issuances.

(c) Return on equity is calculated as net earnings attributable to UnitedHealth Group common shareholders divided by average shareholders' equity. Average shareholders' equity is calculated using the shareholders' equity balance at the end of the preceding year and the shareholders' equity balances at the end of each of the four quarters of the year presented.

This selected financial data should be read with the accompanying "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 and the Consolidated Financial Statements and Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the accompanying Consolidated Financial Statements and Notes to the Consolidated Financial Statements thereto included in Item 8, "Financial Statements and Supplementary Data." Readers are cautioned that the statements, estimates, projections or outlook contained in this report, including discussions regarding financial prospects, economic conditions, trends and uncertainties contained in this Item 7, may constitute forward-looking statements within the meaning of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. A description of some of the risks and uncertainties can be found further below in this Item 7 and in Part I, Item 1A, "Risk Factors."

EXECUTIVE OVERVIEW

General

UnitedHealth Group is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone. Through our diversified family of businesses, we leverage core competencies in data analytics and health information; advanced technology; and clinical expertise. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

We have four reportable segments across our two business platforms, UnitedHealthcare and Optum:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

Further information on our business and reportable segments is presented in Part I, Item 1, "Business" and in Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

Business Trends

Our businesses participate in the United States, South America and certain other international health markets. In the United States, health care spending has grown consistently for many years and comprises 18% of gross domestic product (GDP). We expect overall spending on health care to continue to grow in the future, due to inflation, medical technology and pharmaceutical advancement, regulatory requirements, demographic trends in the population and national interest in health and well-being. The rate of market growth may be affected by a variety of factors, including macro-economic conditions and regulatory changes, which have impacted and could further impact our results of operations.

Pricing Trends. To price our health care benefit products, we start with our view of expected future costs. We frequently evaluate and adjust our approach in each of the local markets we serve, considering relevant factors, such as product positioning, price competitiveness and environmental, competitive, legislative and regulatory considerations, including minimum MLR thresholds. We will continue seeking to balance growth and profitability across all of these dimensions.

The commercial risk market remains highly competitive in both the small group and large group segments. We expect broad-based competition to continue as the industry adapts to individual and employer needs amid reform changes. The ACA included an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products. A provision in the 2018 federal budget imposed a one year moratorium for 2019 on the collection of the Health Insurance Industry Tax. Pricing for contracts that cover a portion of calendar year 2019 reflected the impact of the moratorium. The industry has continued to experience favorable medical cost trends due to moderated utilization, which has impacted the competitive pricing environment.

Medicare Advantage funding continues to be pressured, as discussed below in "Regulatory Trends and Uncertainties."

We expect continued Medicaid revenue growth due to anticipated changes in mix and increases in the number of people we serve; we also believe that the payment rate environment creates the risk of downward pressure on Medicaid margin percentages. We continue to take a prudent, market-sustainable posture for both new business and maintenance of existing relationships. We continue to advocate for actuarially sound rates that are commensurate with our medical cost trends and we remain dedicated to partnering with those states that are committed to the long-term viability of their programs.

Medical Cost Trends. Our medical cost trends primarily relate to changes in unit costs, health system utilization and prescription drug costs. We endeavor to mitigate those increases by engaging physicians and consumers with information and helping them make clinically sound choices, with the objective of helping them achieve high-quality, affordable care.

Delivery System and Payment Modernization. The health care market continues to change based on demographic shifts, new regulations, political forces and both payer and patient expectations. Health plans and care providers are being called upon to work together to close gaps in care and improve overall care quality, improve the health of populations and reduce costs. We continue to see a greater number of people enrolled in plans with underlying incentive-based care provider payment models that reward high-quality, affordable care and foster collaboration. We work together with clinicians to leverage our data and analytics to provide the necessary information to close gaps in care and improve overall health outcomes for patients.

We are increasingly rewarding care providers for delivering improvements in quality and cost-efficiency. As of December 31, 2018, we served nearly 17 million people through some form of aligned contractual arrangement, including full-risk, shared-risk and bundled episode-of-care and performance incentive payment approaches. As of December 31, 2018, our contracts with value-based elements totaled $74 billion in annual spending, including $18 billion through risk-transfer agreements.

This trend is creating needs for health management services that can coordinate care around the primary care physician, including new primary care channels, and for investments in new clinical and administrative information and management systems, which we believe provide growth opportunities for our Optum business platform.

Regulatory Trends and Uncertainties

Following is a summary of management's view of the trends and uncertainties related to some of the key provisions of the ACA and other regulatory matters. For additional information regarding the ACA and regulatory trends and uncertainties, see Part I, Item 1 "Business—Government Regulation" and Item 1A, "Risk Factors."

Medicare Advantage Rates. Final 2019 Medicare Advantage rates resulted in an increase in industry base rates of 3.4%, short of the industry forward medical cost trend, which creates continued pressure in the Medicare Advantage program.

The ongoing pressure on Medicare Advantage funding places continued importance on effective medical management and ongoing improvements in administrative efficiency. There are a number of adjustments we have made to partially offset these rate pressures and reductions. In some years, these adjustments will impact the majority of the seniors we serve through Medicare Advantage. For example, we seek to intensify our medical and operating cost management, make changes to the size and composition of our care provider networks, adjust members' benefits and implement or increase the member premiums that supplement the monthly payments we receive from the government. Additionally, we decide annually on a county-by-county basis where we will offer Medicare Advantage plans.

As Medicare Advantage payments change, other products may become relatively more attractive to Medicare beneficiaries and increase the demand for other senior health benefits products, such as our market-leading Medicare Supplement and stand-alone Medicare Part D insurance offerings.

Our Medicare Advantage rates are currently enhanced by CMS quality bonuses in certain counties based on our local plans' Star ratings. The level of Star ratings from CMS, based upon specified clinical and operational performance standards, will impact future quality bonuses.

Tax Reform. Tax Reform was enacted by the U.S federal government in December 2017, changing existing United States tax law, including reducing the U.S. corporate income tax rate. In 2018, the impact of Tax Reform was partially offset by the return of the nondeductible Health Insurance Industry Tax.

Health Insurance Industry Tax. After a moratorium in 2017, the industry-wide amount of the Health Insurance Industry Tax in 2018 was $14.3 billion, with our portion being $2.6 billion. The return of the tax impacted year-over-year comparability of our financial results, including revenues, the medical care ratio (MCR), operating cost ratio and effective tax rate. A one year moratorium is imposed on the collection of the Health Insurance Industry Tax in 2019.

SELECTED OPERATING PERFORMANCE ITEMS

The following represents a summary of select 2018 year-over-year operating comparisons to 2017.

- Consolidated revenues increased by 12%, UnitedHealthcare revenues increased 12% and Optum revenues grew 11%.
- UnitedHealthcare's addition of 2.2 million people through acquisition and 250,000 through organic growth was offset by 2.9 million fewer people served as a result of completion of its commitment under the TRICARE military health care program.
- Earnings from operations increased by 14%, including increases of 7% at UnitedHealthcare and 23% at Optum.
- Diluted earnings per common share increased 14% to $12.19.
- Cash flows from operations were $15.7 billion, an increase of 16%.

RESULTS SUMMARY

The following table summarizes our consolidated results of operations and other financial information:

(in millions, except percentages and per share data)	For the Years Ended December 31, 2018	2017	2016	Change 2018 vs. 2017		Change 2017 vs. 2016	
Revenues:							
Premiums	$178,087	$158,453	$144,118	$19,634	12%	$14,335	10%
Products	29,601	26,366	26,658	3,235	12	(292)	(1)
Services	17,183	15,317	13,236	1,866	12	2,081	16
Investment and other income	1,376	1,023	828	353	35	195	24
Total revenues	226,247	201,159	184,840	25,088	12	16,319	9
Operating costs:							
Medical costs	145,403	130,036	117,038	15,367	12	12,998	11
Operating costs	34,074	29,557	28,401	4,517	15	1,156	4
Cost of products sold	26,998	24,112	24,416	2,886	12	(304)	(1)
Depreciation and amortization	2,428	2,245	2,055	183	8	190	9
Total operating costs	208,903	185,950	171,910	22,953	12	14,040	8
Earnings from operations	17,344	15,209	12,930	2,135	14	2,279	18
Interest expense	(1,400)	(1,186)	(1,067)	(214)	18	(119)	11
Earnings before income taxes	15,944	14,023	11,863	1,921	14	2,160	18
Provision for income taxes	(3,562)	(3,200)	(4,790)	(362)	11	1,590	(33)
Net earnings	12,382	10,823	7,073	1,559	14	3,750	53
Earnings attributable to noncontrolling interests	(396)	(265)	(56)	(131)	49	(209)	373
Net earnings attributable to UnitedHealth Group common shareholders	$ 11,986	$ 10,558	$ 7,017	$ 1,428	14%	$ 3,541	50%
Diluted earnings per share attributable to UnitedHealth Group common shareholders	$ 12.19	$ 10.72	$ 7.25	$ 1.47	14%	$ 3.47	48%
Medical care ratio (a)	81.6%	82.1%	81.2%	(0.5)%		0.9%	
Operating cost ratio	15.1	14.7	15.4	0.4		(0.7)	
Operating margin	7.7	7.6	7.0	0.1		0.6	
Tax rate	22.3	22.8	40.4	(0.5)		(17.6)	
Net earnings margin (b)	5.3	5.2	3.8	0.1		1.4	
Return on equity (c)	24.4%	24.4%	19.4%	—%		5.0%	

(a) Medical care ratio is calculated as medical costs divided by premium revenue.

(b) Net earnings margin attributable to UnitedHealth Group shareholders.

(c) Return on equity is calculated as net earnings attributable to UnitedHealth Group common shareholders divided by average shareholders' equity. Average shareholders' equity is calculated using the shareholders' equity balance at the end of the preceding year and the shareholders' equity balances at the end of each of the four quarters of the year presented.

2018 RESULTS OF OPERATIONS COMPARED TO 2017 RESULTS

Consolidated Financial Results

Revenue

The increase in revenue was primarily driven by the increase in the number of individuals served through risk-based products across our UnitedHealthcare benefits businesses; pricing trends, including the Health Insurance

Industry Tax in 2018; and growth across the Optum business, primarily due to expansion and growth in care delivery, pharmacy care services, managed services and advisory services.

Medical Costs and MCR

Medical costs increased due to growth in people served through risk-based products and medical cost trends. The MCR decreased due to the revenue effects of the Health Insurance Industry Tax, which more than offset business mix changes and a lower level of favorable reserve development.

Reportable Segments

See Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data" for more information on our segments. The following table presents a summary of the reportable segment financial information:

(in millions, except percentages)	For the Years Ended December 31, 2018	2017	2016	Change 2018 vs. 2017		Change 2016 vs. 2015	
Revenues							
UnitedHealthcare	$183,476	$163,257	$148,581	$20,219	12%	$14,676	10%

International	6,220	4,080	4,220	2,140	52	(140)	(3)
Total UnitedHealthcare — medical	49,075	49,525	48,585	(450)	(1)%	940	2%
Supplemental Data:							
Medicare Part D stand-alone	4,710	4,940	4,930	(230)	(5)%	10	—%

The overall increase in people served through risk-based benefit plans in the commercial group market was due to growth in services to small groups. Fee-based commercial group business declined primarily due to customers converting their retirees to Medicare Advantage plans, as well as certain customers expanding the number of carriers and reconfiguring geographies served. Medicare Advantage increased year-over-year due to growth in people served through individual and employer-sponsored group Medicare Advantage plans. The decrease in people served through Medicaid was primarily driven by states adding new carriers to existing programs, reduced enrollment from state efforts to manage eligibility status and the sale of our New Mexico Medicaid plan. Medicare Supplement growth reflected strong customer retention and new sales. International growth was primarily driven by an acquisition in the first quarter.

UnitedHealthcare's revenue and earnings from operations increased due to growth in the number of individuals served across its risk-based businesses, a higher revenue membership mix, rate increases for underlying medical cost trends and the impact of the return of the Health Insurance Industry Tax. UnitedHealthcare's operating margin decreased slightly due to the performance of our traditional community-based TANF Medicaid business.

Optum

Total revenues and earnings from operations increased as each segment reported increased revenues and earnings from operations as a result of the factors discussed below, as well as productivity and overall cost management initiatives.

The results by segment were as follows:

OptumHealth

Revenue and earnings from operations increased at OptumHealth primarily due to organic and acquisition-related growth in care delivery and behavioral health, digital consumer engagement and health financial services.

OptumInsight

Revenue and earnings from operations at OptumInsight increased primarily due to growth in data analytics product and service offerings and managed services as well as organic and acquisition-related growth in advisory services.

OptumRx

Revenue and earnings from operations at OptumRx increased primarily due to growth in specialty pharmacy, home delivery services, and overall prescription growth. OptumRx fulfilled 1,343 million and 1,298 million adjusted scripts in 2018 and 2017, respectively.

2017 RESULTS OF OPERATIONS COMPARED TO 2016 RESULTS

Consolidated Financial Results

Revenue

The increase in revenue was primarily driven by organic growth in the number of individuals served across our UnitedHealthcare benefits businesses and growth across the Optum business. The increase was partially offset by revenue decreases due to the withdrawals of the ACA-compliant products in the individual market and the effects of the Health Insurance Industry Tax moratorium.

Medical Costs and MCR

Medical costs increased due to risk-based membership growth and medical cost trends. The MCR increased due to the effects of the Health Insurance Industry Tax moratorium, offset primarily by the reduction in individual ACA business, medical management initiatives and an increase in favorable medical cost reserve development.

Income Tax Rate

Our effective tax rate decreased primarily due to the impact of Tax Reform and the Health Insurance Tax moratorium. The provision for income taxes included a $1.2 billion benefit from the revaluation of net deferred tax liabilities.

Reportable Segments

UnitedHealthcare

UnitedHealthcare’s revenue increase was due to growth in the number of individuals served across its businesses and price increases for underlying medical cost trends, which were partially offset by the reduction of people served in ACA-compliant individual products and the impact of the Health Insurance Industry Tax moratorium.

The increase in UnitedHealthcare's earnings from operations was led by diversified growth and increased operating margin. The 2016 results included losses in ACA-compliant individual products and guaranty fund assessments.

Optum

Total revenues and earnings from operations increased as each segment reported increased revenues and earnings from operations as a result of the factors discussed below.

The results by segment were as follows:

OptumHealth

Revenue and earnings from operations increased at OptumHealth primarily due to organic and acquisition-related growth in care delivery.

OptumInsight

Revenue and earnings from operations at OptumInsight increased primarily due to growth in revenue management services and business process services.

OptumRx

Revenue and earnings from operations at OptumRx increased primarily due to client and consumer growth. In 2017, OptumRx fulfilled 1.3 billion adjusted scripts compared to 1.2 billion in 2016.

LIQUIDITY, FINANCIAL CONDITION AND CAPITAL RESOURCES

Liquidity

Introduction

We manage our liquidity and financial position in the context of our overall business strategy. We continually forecast and manage our cash, investments, working capital balances and capital structure to meet the short-term and long-term obligations of our businesses while seeking to maintain liquidity and financial flexibility. Cash flows generated from operating activities are principally from earnings before noncash expenses.

Our regulated subsidiaries generate significant cash flows from operations and are subject to financial regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies.

In both 2018 and 2017, our U.S. regulated subsidiaries paid their parent companies dividends of $3.7 billion. See Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data" for further detail concerning our regulated subsidiary dividends.

Our nonregulated businesses also generate significant cash flows from operations that are available for general corporate use. Cash flows generated by these entities, combined with dividends from our regulated entities and financing through the issuance of long-term debt as well as issuance of commercial paper or the ability to draw under our committed credit facilities, further strengthen our operating and financial flexibility. We use these cash flows to expand our businesses through acquisitions, reinvest in our businesses through capital expenditures, repay debt and return capital to our shareholders through shareholder dividends and/or repurchases of our common stock, depending on market conditions.

Summary of our Major Sources and Uses of Cash and Cash Equivalents

(in millions)	For the Years Ended December 31, 2018	2017	2016	Change 2018 vs. 2017	Change 2017 vs. 2016
Sources of cash:					
Cash provided by operating activities	$ 15,713	$ 13,596	$ 9,795	$ 2,117	$ 3,801
Issuances of long-term debt and commercial paper, net of repayments	4,134	—	990	4,134	(990)
Proceeds from common share issuances	838	688	429	150	259
Customer funds administered	—	3,172	1,692	(3,172)	1,480
Other	—	—	37	—	(37)
Total sources of cash	20,685	17,456	12,943		
Uses of cash:					
Cash paid for acquisitions, net of cash assumed	(5,997)	(2,131)	(1,760)	(3,866)	(371)
Cash dividends paid	(3,320)	(2,773)	(2,261)	(547)	(512)
Common share repurchases	(4,500)	(1,500)	(1,280)	(3,000)	(220)
Repayments of long-term debt and commercial paper, net of issuances	—	(2,615)	—	2,615	(2,615)
Purchases of property, equipment and capitalized software	(2,063)	(2,023)	(1,705)	(40)	(318)
Purchases of investments, net of sales and maturities	(4,099)	(4,319)	(5,927)	220	1,608
Other	(1,743)	(539)	(581)	(1,204)	42
Total uses of cash	(21,722)	(15,900)	(13,514)		
Effect of exchange rate changes on cash and cash equivalents	(78)	(5)	78	(73)	(83)
Net (decrease) increase in cash and cash equivalents	$ (1,115)	$ 1,551	$ (493)	$ (2,666)	$ 2,044

2018 Cash Flows Compared to 2017 Cash Flows

Increased cash flows provided by operating activities were primarily driven by higher net earnings in 2018 and the impact to 2017 cash flows from operating activities due to a change in net deferred tax liabilities from Tax Reform, partially offset by changes in working capital accounts.

Other significant changes in sources or uses of cash year-over-year included net issuances of debt in 2018 compared to net repayments in 2017, an increase in cash paid for acquisitions, increased share repurchases and a decrease in customer funds administered due to the timing of government payments.

2017 Cash Flows Compared to 2016 Cash Flows

Increased cash flows provided by operating activities were primarily driven by higher net earnings and changes in working capital accounts, partially offset by the change in net deferred tax liabilities driven by tax reform.

Other significant changes in sources or uses of cash year-over-year included net repayments of debt compared to 2016 net proceeds from debt issuances, which were partially offset by lower net purchases of investments.

Financial Condition

As of December 31, 2018, our cash, cash equivalent, available-for-sale debt securities and equity securities balances of $44.7 billion included $10.9 billion of cash and cash equivalents (of which $925 million was

available for general corporate use), $31.9 billion of debt securities and $2.0 billion of investments in equity securities. Given the significant portion of our portfolio held in cash equivalents, we do not anticipate fluctuations in the aggregate fair value of our financial assets to have a material impact on our liquidity or capital position. Other sources of liquidity, primarily from operating cash flows and our commercial paper program, which is supported by our bank credit facilities, reduce the need to sell investments during adverse market conditions. See Note 4 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data" for further detail concerning our fair value measurements.

Our available-for-sale debt portfolio had a weighted-average duration of 3.3 years and a weighted-average credit rating of "Double A" as of December 31, 2018. When multiple credit ratings are available for an individual security, the average of the available ratings is used to determine the weighted-average credit rating.

Capital Resources and Uses of Liquidity

In addition to cash flows from operations and cash and cash equivalent balances available for general corporate use, our capital resources and uses of liquidity are as follows:

Commercial Paper and Bank Credit Facilities. Our revolving bank credit facilities provide liquidity support for our commercial paper borrowing program, which facilitates the private placement of senior unsecured debt through third-party broker-dealers, and are available for general corporate purposes. For more information on our commercial paper and bank credit facilities, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

Our revolving bank credit facilities contain various covenants, including covenants requiring us to maintain a defined debt to debt-plus-shareholders' equity ratio of not more than 60%. As of December 31, 2018, our debt to debt-plus-shareholders' equity ratio, as defined and calculated under the credit facilities, was 38%.

Long-Term Debt. Periodically, we access capital markets to issue long-term debt for general corporate purposes, such as, to meet our working capital requirements, to refinance debt, to finance acquisitions or for share repurchases. For more information on our debt, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8 "Financial Statements and Supplementary Data."

Credit Ratings. Our credit ratings as of December 31, 2018 were as follows:

	Moody's		S&P Global		Fitch		A.M. Best	
	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook
Senior unsecured debt	A3	Stable	A+	Stable	A-	Stable	A-	Stable
Commercial paper	P-2	n/a	A-1	n/a	F1	n/a	AMB-1	n/a

The availability of financing in the form of debt or equity is influenced by many factors, including our profitability, operating cash flows, debt levels, credit ratings, debt covenants and other contractual restrictions, regulatory requirements and economic and market conditions. For example, a significant downgrade in our credit ratings or adverse conditions in the capital markets may increase the cost of borrowing for us or limit our access to capital.

Share Repurchase Program. As of December 31, 2018, we had Board authorization to purchase up to 94 million shares of our common stock. For more information on our share repurchase program, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

Dividends. In June 2018, our Board increased our annual cash dividend rate to shareholders to $3.60 per share from $3.00 per share. For more information on our dividend, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

The following table summarizes future obligations due by period as of December 31, 2018, under our various contractual obligations and commitments:

(in millions)	2019	2020 to 2021	2022 to 2023	Thereafter	Total
Debt (a)	$ 3,463	$ 8,970	$ 7,396	$ 37,988	$ 57,817
Operating leases	669	1,103	761	1,343	3,876
Purchase and other obligations (b)	1,216	2,205	808	175	4,404
Other liabilities (c)	1,206	260	257	5,213	6,936
Redeemable noncontrolling interests (d)	1,276	380	25	227	1,908
Total contractual obligations	$ 7,830	$ 12,918	$ 9,247	$ 44,946	$ 74,941

(a) Includes interest coupon payments and maturities at par or put values. The table also assumes amounts are outstanding through their contractual term. See Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data" for more detail.

(b) Includes fixed or minimum commitments under existing purchase obligations for goods and services, including agreements that are cancelable with the payment of an early termination penalty and remaining capital commitments for venture capital funds and other funding commitments. Excludes agreements that are cancelable without penalty and excludes liabilities to the extent recorded in our Consolidated Balance Sheets as of December 31, 2018.

(c) Includes obligations associated with contingent consideration and payments related to business acquisitions, certain employee benefit programs, amounts accrued for guaranty fund assessments, unrecognized tax benefits, and various long-term liabilities. Due to uncertainty regarding payment timing, obligations for employee benefit programs, charitable contributions, future settlements, unrecognized tax benefits and other liabilities have been classified as "Thereafter."

(d) Includes commitments for redeemable shares of our subsidiaries. When the timing of the redemption is indeterminable, the commitment has been classified as "Thereafter."

Pending Acquisitions. In December 2017, we entered into an agreement to acquire a company in the health care sector for a total of approximately $4.3 billion, which is not reflected in the table above.

We do not have other significant contractual obligations or commitments that require cash resources. However, we continually evaluate opportunities to expand our operations, which include internal development of new products, programs and technology applications and may include acquisitions.

OFF-BALANCE SHEET ARRANGEMENTS

As of December 31, 2018, we were not involved in any off-balance sheet arrangements, which have or are reasonably likely to have a material effect on our financial condition, results of operations or liquidity.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 2 of Notes to the Consolidated Financial Statements in Part II, Item 8 "Financial Statements and Supplementary Data" for a discussion of new accounting pronouncements that affect us.

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those estimates that require management to make challenging, subjective or complex judgments, often because they must estimate the effects of matters that are inherently uncertain and may change in subsequent periods. Critical accounting estimates involve judgments and uncertainties that are sufficiently sensitive and may result in materially different results under different assumptions and conditions.

Medical Costs Payable

Medical costs and medical costs payable include estimates of our obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received or processed. Depending on the health care professional and type of service, the typical billing lag for services can be up to 90 days from the date of service. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months. As of December 31, 2018, our days outstanding in medical payables was 50 days, calculated as total medical payables divided by total medical costs times the number of days in the period.

In each reporting period, our operating results include the effects of more completely developed medical costs payable estimates associated with previously reported periods. If the revised estimate of prior period medical costs is less than the previous estimate, we will decrease reported medical costs in the current period (favorable development). If the revised estimate of prior period medical costs is more than the previous estimate, we will increase reported medical costs in the current period (unfavorable development). Medical costs in 2018, 2017 and 2016 included favorable medical cost development related to prior years of $320 million, $690 million and $220 million, respectively.

In developing our medical costs payable estimates, we apply different estimation methods depending on the month for which incurred claims are being estimated. For example, for the most recent two months, we estimate claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data is available, supplemented by a review of near-term completion factors.

Completion Factors. A completion factor is an actuarial estimate, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by us at the date of estimation. Completion factors are the most significant factors we use in developing our medical costs payable estimates for periods prior to the most recent two months. Completion factors include judgments in relation to claim submissions such as the time from date of service to claim receipt, claim inventory levels and claim processing backlogs, as well as other factors. If actual claims submission rates from providers (which can be influenced by a number of factors, including provider mix and electronic versus manual submissions) or our claim processing patterns are different than estimated, our reserve estimates may be significantly impacted.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for those periods as of December 31, 2018:

Completion Factors (Decrease) Increase in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
(0.75)%	$ 550
(0.50)	366
(0.25)	182
0.25	(181)
0.50	(362)
0.75	(541)

Medical Cost Per Member Per Month Trend Factors. Medical cost PMPM trend factors are significant factors we use in developing our medical costs payable estimates for the most recent two months. Medical cost trend factors are developed through a comprehensive analysis of claims incurred in prior months, provider contracting and expected unit costs, benefit design and a review of a broad set of health care utilization indicators, including but not limited to, pharmacy utilization trends, inpatient hospital authorization data and influenza incidence data from the National Centers for Disease Control. We also consider macroeconomic variables such as GDP growth, employment and disposable income. A large number of factors can cause the medical cost trend to vary from our estimates, including: our ability and practices to manage medical and pharmaceutical costs, changes in level and

mix of services utilized, mix of benefits offered, including the impact of co-pays and deductibles, changes in medical practices, catastrophes and epidemics.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for the most recent two months as of December 31, 2018:

Medical Cost PMPM Quarterly Trend Increase (Decrease) in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
3%	$ 703
2	469
1	234
(1)	(234)
(2)	(469)
(3)	(703)

The completion factors and medical costs PMPM trend factors analyses above include outcomes that are considered reasonably likely based on our historical experience estimating liabilities for incurred but not reported benefit claims.

Management believes the amount of medical costs payable is reasonable and adequate to cover our liability for unpaid claims as of December 31, 2018; however, actual claim payments may differ from established estimates as discussed above. Assuming a hypothetical 1% difference between our December 31, 2018 estimates of medical costs payable and actual medical costs payable, excluding AARP Medicare Supplement Insurance and any potential offsetting impact from premium rebates, 2018 net earnings would have increased or decreased by approximately $140 million.

For more detail related to our medical cost estimates, see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements and Supplementary Data.”

Revenues

We derive a substantial portion of our revenues from health care insurance premiums. We recognize premium revenues in the period eligible individuals are entitled to receive health care services. Customers are typically billed monthly at a contracted rate per eligible person multiplied by the total number of people eligible to receive services.

Our Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under the CMS risk adjustment payment methodology. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. We estimate risk adjustment revenues based upon the data submitted and expected to be submitted to CMS. As a result of the variability of factors that determine such estimations, the actual amount of CMS’ retroactive payments could be materially more or less than our estimates. This may result in favorable or unfavorable adjustments to our Medicare premium revenue and, accordingly, our profitability. For more detail on premium revenues, see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements and Supplementary Data.” Risk adjustment data for our plans is subject to review by the federal and state governments, including audit by regulators. See Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements and Supplementary Data” for additional information regarding these audits. Our estimates of premiums to be recognized are reduced by any expected premium minimum MLR rebates payable by us.

Goodwill and Intangible Assets

Goodwill. We evaluate goodwill for impairment annually or more frequently when an event occurs or circumstances change that indicate the carrying value may not be recoverable. When testing goodwill for

impairment, we may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. During a qualitative analysis, we consider the impact of changes, if any, to the following factors: macroeconomic, industry and market factors, cost factors, changes in overall financial performance, and any other relevant events and uncertainties impacting a reporting unit. If our qualitative assessment indicates that goodwill impairment is more likely than not, we perform additional quantitative analyses. We may also elect to skip the qualitative testing and proceed directly to the quantitative testing. For reporting units where a quantitative analysis is performed, we perform a multi-step test measuring the fair values of the reporting units and comparing them to their aggregate carrying values, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows, which include assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods and discount rates. For each reporting unit, comparative market multiples are used to corroborate the results of our discounted cash flow test.

Forecasts and long-term growth rates used for our reporting units are consistent with, and use inputs from, our internal long-term business plan and strategies. Key assumptions used in these forecasts include:

- *Revenue trends.* Key revenue drivers for each reporting unit are determined and assessed. Significant factors include: customer and/or membership growth, medical trends and the impact and expectations of regulatory environments. Additional macro-economic assumptions relating to unemployment, GDP growth, interest rates and inflation are also evaluated and incorporated, as appropriate.
- *Medical cost trends.* For further discussion of medical cost trends, see the “Medical Cost Trend” section of Executive Overview-Business Trends and the “Medical Costs Payable” critical accounting estimate above. Similar factors, including historical and expected medical cost trend levels, are considered in estimating our long-term medical trends at the reporting unit level.
- *Operating productivity.* We forecast expected operating cost levels based on historical levels and expectations of future operating cost levels.
- *Capital levels.* The operating and long-term capital requirements for each business are considered.

Discount rates are determined for each reporting unit and include consideration of the implied risk inherent in their forecasts. Our most significant estimate in the discount rate determinations involves our adjustments to the peer company weighted average costs of capital that reflect reporting unit-specific factors. We have not made any adjustments to decrease a discount rate below the calculated peer company weighted average cost of capital for any reporting unit. Company-specific adjustments to discount rates are subjective and thus are difficult to measure with certainty. The passage of time and the availability of additional information regarding areas of uncertainty with respect to the reporting units’ operations could cause these assumptions to change in the future. As of October 1, 2018, we completed our annual impairment tests for goodwill with all of our reporting units having fair values substantially in excess of their carrying values.

Intangible Assets. Our finite-lived intangible assets are subject to impairment tests when events or circumstances indicate that an asset’s (or asset group’s) carrying value may exceed its estimated fair value. Consideration is given on a quarterly basis to a number of potential impairment indicators, including: changes in the use of the assets, changes in legal or other business factors that could affect value, experienced or expected operating cash-flow deterioration or losses, adverse changes in customer populations, adverse competitive or technological advances that could impact value and other factors.

Our indefinite-lived intangible assets are tested for impairment on an annual basis, or more frequently if impairment indicators exist. To determine if an indefinite-lived intangible asset is impaired, we compare its

estimated fair value to its carrying value. If the carrying value exceeds its estimated fair value, an impairment would be recorded for the amount by which the carrying value exceeds its estimated fair value. Intangible assets were not impaired in 2018.

LEGAL MATTERS

A description of our legal proceedings is presented in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

CONCENTRATIONS OF CREDIT RISK

Investments in financial instruments such as marketable securities and accounts receivable may subject us to concentrations of credit risk. Our investments in marketable securities are managed under an investment policy authorized by our Board of Directors. This policy limits the amounts that may be invested in any one issuer and generally limits our investments to U.S. government and agency securities, state and municipal securities and corporate debt obligations that are investment grade. Concentrations of credit risk with respect to accounts receivable are limited due to the large number of employer groups and other customers that constitute our client base. As of December 31, 2018, there were no significant concentrations of credit risk.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risks are exposures to changes in interest rates that impact our investment income and interest expense and the fair value of certain of our fixed-rate investments and debt, as well as foreign currency exchange rate risk of the U.S. dollar primarily to the Brazilian real and Chilean peso.

As of December 31, 2018, we had $14 billion of financial assets on which the interest rates received vary with market interest rates, which may materially impact our investment income. Also as of December 31, 2018, $9 billion of our financial liabilities, which include commercial paper, debt and deposit liabilities, were at interest rates that vary with market rates, either directly or through the use of related interest rate swap contracts.

The fair value of certain of our fixed-rate investments and debt also varies with market interest rates. As of December 31, 2018, $30 billion of our investments were fixed-rate debt securities and $32 billion of our debt was non-swapped fixed-rate term debt. An increase in market interest rates decreases the market value of fixed-rate investments and fixed-rate debt. Conversely, a decrease in market interest rates increases the market value of fixed-rate investments and fixed-rate debt.

We manage exposure to market interest rates by diversifying investments across different fixed-income market sectors and debt across maturities, as well as by endeavoring to match our floating-rate assets and liabilities over time, either directly or through the use of interest rate swap contracts. Unrealized gains and losses on investments in available-for-sale securities are reported in comprehensive income.

The following tables summarize the impact of hypothetical changes in market interest rates across the entire yield curve by 1% point or 2% points as of December 31, 2018 and 2017 on our investment income and interest expense per annum and the fair value of our investments and debt (in millions, except percentages):

	December 31, 2018			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum	Interest Expense Per Annum	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 276	$ 189	$ (2,242)	$ (5,017)
1	138	94	(1,140)	(2,724)
(1)	(138)	(94)	1,118	3,155
(2)	(276)	(189)	2,196	6,953

	December 31, 2017			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum (a)	Interest Expense Per Annum (a)	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 300	$ 170	$ (1,958)	$ (4,546)
1	150	85	(933)	(2,460)
(1)	(150)	(85)	950	2,923
(2)	(197)	(133)	1,773	6,414

(a) Given the low absolute level of short-term market rates on our floating-rate assets and liabilities as of December 31, 2017, the assumed hypothetical change in interest rates does not reflect the full 200 basis point reduction in interest income or interest expense in 2017, as the rate cannot fall below zero.

(b) As of December 31, 2018 and 2017, some of our investments had interest rates below 2% so the assumed hypothetical change in the fair value of investments does not reflect the full 200 basis point reduction.

We have an exposure to changes in the value of foreign currencies, primarily the Brazilian real and the Chilean peso, to the U.S. dollar in translation of UnitedHealthcare Global's operating results at the average exchange rate over the accounting period, and UnitedHealthcare Global's assets and liabilities at the spot rate at the end of the accounting period. The gains or losses resulting from translating foreign assets and liabilities into U.S. dollars are included in equity and comprehensive income.

An appreciation of the U.S. dollar against the Brazilian real or Chilean peso reduces the carrying value of the net assets denominated in those currencies. For example, as of December 31, 2018, a hypothetical 10% and 25% increase in the value of the U.S. dollar against those currencies would have caused a reduction in net assets of approximately $600 million and $1.4 billion, respectively. We manage exposure to foreign currency earnings risk primarily by conducting our international business operations in their functional currencies.

As of December 31, 2018, we had $2.0 billion of investments in equity securities, consisting of investments in non-U.S. dollar fixed-income funds; employee savings plan related investments; and dividend paying stocks. Valuations in non-U.S. dollar funds are subject to foreign exchange rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of UnitedHealth Group Incorporated and Subsidiaries:

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 12, 2019 expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinions

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/S/ DELOITTE & TOUCHE LLP

Minneapolis, Minnesota
February 12, 2019

We have served as the Company's auditor since 2002.

UnitedHealth Group
Notes to the Consolidated Financial Statements

1. Description of Business

UnitedHealth Group Incorporated (individually and together with its subsidiaries, "UnitedHealth Group" and "the Company") is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone.

Through its diversified family of businesses, the Company leverages core competencies in data and health information; advanced technology; and clinical expertise. These core competencies are deployed within two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

2. Basis of Presentation, Use of Estimates and Significant Accounting Policies

Basis of Presentation

The Company has prepared the Consolidated Financial Statements according to U.S. Generally Accepted Accounting Principles (GAAP) and has included the accounts of UnitedHealth Group and its subsidiaries.

Use of Estimates

These Consolidated Financial Statements include certain amounts based on the Company's best estimates and judgments. The Company's most significant estimates relate to estimates and judgments for medical costs payable and revenues, valuation and impairment analysis of goodwill and other intangible assets and estimates of other current liabilities and other current receivables. Certain of these estimates require the application of complex assumptions and judgments, often because they involve matters that are inherently uncertain and will likely change in subsequent periods. The impact of any change in estimates is included in earnings in the period in which the estimate is adjusted.

Revenues

Premiums

Premium revenues are primarily derived from risk-based health insurance arrangements in which the premium is typically at a fixed rate per individual served for a one-year period, and the Company assumes the economic risk of funding its customers' health care and related administrative costs.

Premium revenues are recognized in the period in which eligible individuals are entitled to receive health care benefits. Health care premium payments received from the Company's customers in advance of the service period are recorded as unearned revenues. Fully insured commercial products of U.S. health plans, Medicare Advantage and Medicare Prescription Drug Benefit (Medicare Part D) plans with medical loss ratios as calculated under the definitions in the Patient Protection and Affordable Care Act (ACA) and related federal and state regulations and implementing regulation, that fall below certain targets are required to rebate ratable portions of their premiums annually. Medicare Advantage premium revenue includes the impact of the Centers for Medicare & Medicaid Services (CMS) quality bonuses based on plans' Star ratings.

Premium revenues are recognized based on the estimated premiums earned, net of projected rebates, because the Company is able to reasonably estimate the ultimate premiums of these contracts. The Company also records premium revenues from capitation arrangements at its OptumHealth businesses.

The Company's Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under CMS' risk adjustment payment methodology. CMS deploys a risk adjustment model that apportions

premiums paid to all health plans according to health severity and certain demographic factors. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. Under this risk adjustment methodology, CMS calculates the risk adjusted premium payment using diagnosis data from hospital inpatient, hospital outpatient and physician treatment settings. The Company and health care providers collect, capture and submit the necessary and available diagnosis data to CMS within prescribed deadlines. The Company estimates risk adjustment premium revenues based upon the diagnosis data submitted and expected to be submitted to CMS. Risk adjustment data for the Company's plans are subject to review by the government, including audit by regulators. See Note 12 for additional information regarding these audits.

Products and Services

For the Company's OptumRx pharmacy care services business, the majority of revenues are derived from products sold through a contracted network of retail pharmacies or home delivery, specialty and compounding pharmacy facilities. Product revenues include ingredient costs (net of rebates), a negotiated dispensing fee and customer co-payments for drugs dispensed through the Company's mail-service pharmacy. In retail pharmacy transactions, revenues recognized exclude the member's applicable co-payment. Pharmacy products are billed to customers based on the number of transactions occurring during the billing period. Product revenues are recognized when the prescriptions are dispensed through the retail network or received by consumers through the Company's mail-service pharmacy. The Company has entered into contracts in which it is primarily obligated to pay its network pharmacy providers for benefits provided to their customers regardless of whether the Company is paid. The Company is also involved in establishing the prices charged by retail pharmacies, determining which drugs will be included in formulary listings and selecting which retail pharmacies will be included in the network offered to plan sponsors' members and accordingly, are reported on a gross basis.

Services revenue consists of fees derived from services performed for customers that self-insure the health care costs of their employees and employees' dependents. Under service fee contracts, the Company receives monthly, a fixed fee per employee, which is recognized as revenue as the Company performs, or makes available, the applicable services to the customer. The customers retain the risk of financing health care costs for their employees and employees' dependents, and the Company administers the payment of customer funds to physicians and other health care professionals from customer-funded bank accounts. As the Company has neither the obligation for funding the health care costs, nor the primary responsibility for providing the medical care, the Company does not recognize premium revenue and medical costs for these contracts in its Consolidated Financial Statements. For these fee-based customer arrangements, the Company provides coordination and facilitation of medical services; transaction processing; customer, consumer and care professional services; and access to contracted networks of physicians, hospitals and other health care professionals. These services are performed throughout the contract period.

Revenues are also comprised of a number of services and products sold through Optum. OptumHealth's service revenues include net patient service revenues that are recorded based upon established billing rates, less allowances for contractual adjustments, and are recognized as services are provided. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds. OptumInsight provides software and information products, advisory consulting arrangements and services outsourcing contracts, which may be delivered over several years. OptumInsight revenues are generally recognized over time and measured each period based on the progress to date as services are performed or made available to customers.

As of December 31, 2018 and 2017, accounts receivables related to products and services were $3.9 billion and $3.7 billion, respectively. In 2018 and 2017, the Company had no material bad-debt expense and there were no material contract assets, contract liabilities or deferred contract costs recorded on the Consolidated Balance Sheets as of December 31, 2018 or 2017.

For the years ended December 31, 2018 and 2017, revenue recognized from performance obligations related to prior periods (for example, due to changes in transaction price) was not material.

Revenue expected to be recognized in any future year related to remaining performance obligations, excluding revenue pertaining to contracts that have an original expected duration of one year or less, contracts where revenue is recognized as invoiced and contracts with variable consideration related to undelivered performance obligations, is not material.

See Note 13 for disaggregation of revenue by segment and type.

Medical Costs and Medical Costs Payable

The Company's estimate of medical costs payable represents management's best estimate of its liability for unpaid medical costs as of December 31, 2018.

Each period, the Company re-examines previously established medical costs payable estimates based on actual claim submissions and other changes in facts and circumstances. As more complete claim information becomes available, the Company adjusts the amount of the estimates and includes the changes in estimates in medical costs in the period in which the change is identified. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months.

Medical costs and medical costs payable include estimates of the Company's obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received, processed, or paid. The Company develops estimates for medical care services incurred but not reported (IBNR), which includes estimates for claims that have not been received or fully processed, using an actuarial process that is consistently applied, centrally controlled and automated. The actuarial models consider factors such as time from date of service to claim processing, seasonal variances in medical care consumption, health care professional contract rate changes, medical care utilization and other medical cost trends, membership volume and demographics, the introduction of new technologies, benefit plan changes, and business mix changes related to products, customers and geography.

In developing its medical costs payable estimates, the Company applies different estimation methods depending on which incurred claims are being estimated. For the most recent two months, the Company estimates claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data are available, supplemented by a review of near-term completion factors (actuarial estimates, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by the Company at the date of estimation). For months prior to the most recent two months, the Company applies the completion factors to actual claims adjudicated-to-date to estimate the expected amount of ultimate incurred claims for those months.

Cost of Products Sold

The Company's cost of products sold includes the cost of pharmaceuticals dispensed to unaffiliated customers either directly at its home delivery and specialty pharmacy locations, or indirectly through its nationwide network of participating pharmacies. Rebates attributable to non-affiliated clients are accrued as rebates receivable and a reduction of cost of products sold, with a corresponding payable for the amounts of the rebates to be remitted to those non-affiliated clients in accordance with their contracts and recorded in the Consolidated Statements of Operations as a reduction of product revenue. Cost of products sold also includes the cost of personnel to support the Company's transaction processing services, system sales, maintenance and professional services.

Cash, Cash Equivalents and Investments

Cash and cash equivalents are highly liquid investments that have an original maturity of three months or less. The fair value of cash and cash equivalents approximates their carrying value because of the short maturity of the instruments.

Investments with maturities of less than one year are classified as short-term. Because of regulatory requirements, certain investments are included in long-term investments regardless of their maturity date. The Company classifies these investments as held-to-maturity and reports them at amortized cost. Substantially all other investments are classified as available-for-sale and reported at fair value based on quoted market prices, where available. Equity investments, with certain exceptions, are measured at fair value with changes in fair value recognized in net earnings.

The Company excludes unrealized gains and losses on investments in available-for-sale debt securities from net earnings and reports them as comprehensive income and, net of income tax effects, as a separate component of equity. To calculate realized gains and losses on the sale of debt securities, the Company specifically identifies the cost of each investment sold.

The Company evaluates an investment for impairment by considering the length of time and extent to which market value has been less than cost or amortized cost, the financial condition and near-term prospects of the issuer as well as specific events or circumstances that may influence the operations of the issuer and the Company's intent to sell the security or the likelihood that it will be required to sell the security before recovery of the entire amortized cost.

New information and the passage of time can change these judgments. The Company manages its investment portfolio to limit its exposure to any one issuer or market sector, and largely limits its investments to investment grade quality. Securities downgraded below policy minimums after purchase will be disposed of in accordance with the Company's investment policy.

Assets Under Management

The Company provides health insurance products and services to members of AARP under a Supplemental Health Insurance Program (the AARP Program) and to AARP members and non-members under separate Medicare Advantage and Medicare Part D arrangements. The products and services under the AARP Program include supplemental Medicare benefits, hospital indemnity insurance, including insurance for individuals between 50 to 64 years of age, and other related products.

Pursuant to the Company's agreement, AARP Program assets are managed separately from the Company's general investment portfolio and are used to pay costs associated with the AARP Program. These assets are invested at the Company's discretion, within investment guidelines approved by AARP. The Company does not guarantee any rates of return on these investments and, upon any transfer of the AARP Program contract to another entity, the Company would transfer cash equal in amount to the fair value of these investments at the date of transfer to that entity. Because the purpose of these assets is to fund the medical costs payable, the rate stabilization fund (RSF) liabilities and other related liabilities associated with this AARP contract, assets under management are classified as current assets, consistent with the classification of these liabilities.

The effects of changes in other balance sheet amounts associated with the AARP Program also accrue to the overall benefit of the AARP policyholders through the RSF balance. Accordingly, the Company excludes the effect of such changes in its Consolidated Statements of Cash Flows.

Other Current Receivables

Other current receivables include amounts due from pharmaceutical manufacturers for rebates and other miscellaneous amounts due to the Company.

The Company's pharmacy care services businesses contract with pharmaceutical manufacturers, some of which provide rebates based on use of the manufacturers' products by its affiliated and non-affiliated clients. The Company accrues rebates as they are earned by its clients on a monthly basis based on the terms of the applicable

contracts, historical data and current estimates. The pharmacy care services businesses bill these rebates to the manufacturers on a monthly or quarterly basis depending on the contractual terms and record rebates attributable to affiliated clients as a reduction to medical costs. The Company generally receives rebates two to five months after billing. As of December 31, 2018 and 2017, total pharmaceutical manufacturer rebates receivable included in other receivables in the Consolidated Balance Sheets amounted to $4.2 billion and $3.8 billion, respectively.

Property, Equipment and Capitalized Software

Property, equipment and capitalized software are stated at cost, net of accumulated depreciation and amortization. Capitalized software consists of certain costs incurred in the development of internal-use software, including external direct costs of materials and services and applicable payroll costs of employees devoted to specific software development.

The Company calculates depreciation and amortization using the straight-line method over the estimated useful lives of the assets. The useful lives for property, equipment and capitalized software are:

Furniture, fixtures and equipment	3 to 10 years
Buildings	35 to 40 years
Capitalized software	3 to 5 years

Leasehold improvements are depreciated over the shorter of the remaining lease term or their estimated useful economic life.

Goodwill

To determine whether goodwill is impaired, annually or more frequently if needed, the Company performs a multi-step impairment test. The Company may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. The Company may also elect to skip the qualitative testing and proceed directly to the quantitative testing. When performing quantitative testing, the Company first estimates the fair values of its reporting units using discounted cash flows. To determine fair values, the Company must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value and discount rates. Comparative market multiples are used to corroborate the results of the discounted cash flow test. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

There was no impairment of goodwill during the year ended December 31, 2018.

Intangible Assets

The Company’s intangible assets are subject to impairment tests when events or circumstances indicate that an intangible asset (or asset group) may be impaired. The Company’s indefinite-lived intangible assets are also tested for impairment annually. There was no impairment of intangible assets during the year ended December 31, 2018.

Other Current Liabilities

Other current liabilities include health savings account deposits ($7.5 billion and $6.4 billion as of December 31, 2018 and 2017, respectively), deposits under the Medicare Part D program, the RSF associated with the AARP Program, accruals for premium rebate payments under the ACA, the current portion of future policy benefits and customer balances.

Policy Acquisition Costs

The Company's short duration health insurance contracts typically have a one-year term and may be canceled by the customer with at least 30 days' notice. Costs related to the acquisition and renewal of short duration customer contracts are primarily charged to expense as incurred.

Redeemable Noncontrolling Interests

Redeemable noncontrolling interests in the Company's subsidiaries whose redemption is outside the control of the Company are classified as temporary equity. The following table provides details of the Company's redeemable noncontrolling interests' activity for the years ended December 31, 2018 and 2017:

(in millions)	2018	2017
Redeemable noncontrolling interests, beginning of period	$2,189	$2,012
Net earnings	123	71
Acquisitions	102	565
Redemptions	(90)	(309)
Distributions	(53)	(38)
Fair value and other adjustments	(363)	(112)
Redeemable noncontrolling interests, end of period	$1,908	$2,189

Share-Based Compensation

The Company recognizes compensation expense for share-based awards, including stock options, stock-settled stock appreciation rights (SARs) and restricted stock and restricted stock units (collectively, restricted shares), on a straight-line basis over the related service period (generally the vesting period) of the award, or to an employee's eligible retirement date under the award agreement, if earlier. Restricted shares vest ratably, primarily over two to five years and compensation expense related to restricted shares is based on the share price on the date of grant. Stock options and SARs vest ratably primarily over four years and may be exercised up to 10 years from the date of grant. Compensation expense related to stock options and SARs is based on the fair value at the date of grant, which is estimated on the date of grant using a binomial option-pricing model. Under the Company's Employee Stock Purchase Plan (ESPP), eligible employees are allowed to purchase the Company's stock at a discounted price, which is 85% of the lower market price of the Company's common stock at the beginning or at the end of the six-month purchase period. Share-based compensation expense for all programs is recognized in operating costs in the Consolidated Statements of Operations.

Net Earnings Per Common Share

The Company computes basic earnings per common share attributable to UnitedHealth Group common shareholders by dividing net earnings attributable to UnitedHealth Group common shareholders by the weighted-average number of common shares outstanding during the period. The Company determines diluted net earnings per common share attributable to UnitedHealth Group common shareholders using the weighted-average number of common shares outstanding during the period, adjusted for potentially dilutive shares associated with stock options, SARs, restricted shares and the ESPP (collectively, common stock equivalents), using the treasury stock method. The treasury stock method assumes a hypothetical issuance of shares to settle the share-based awards, with the assumed proceeds used to purchase common stock at the average market price for the period. Assumed proceeds include the amount the employee must pay upon exercise and the average unrecognized compensation cost. The difference between the number of shares assumed issued and number of shares assumed purchased represents the dilutive shares.

Health Insurance Industry Tax

The ACA includes an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products. A one year moratorium on the collection of the Health Insurance Industry Tax will occur in 2019.

The Company estimates its liability for the Health Insurance Industry Tax based on a ratio of the Company's applicable net premiums written compared to the U.S. health insurance industry total applicable net premiums, both for the previous calendar year. The Company records in full the estimated liability for the Health Insurance Industry Tax at the beginning of the calendar year with a corresponding deferred cost that is amortized to operating costs on the Consolidated Statements of Operations using a straight-line method over the calendar year. The liability is recorded in accounts payable and accrued liabilities and the corresponding deferred cost is recorded in prepaid expenses and other current assets on the Consolidated Balance Sheets.

Recently Issued Accounting Standards

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2016-02, "Leases (Topic 842)" as modified by ASUs 2018-01, 2018-10, 2018-11 and 2018-20 (collectively, ASU 2016-02). Under ASU 2016-02, an entity is required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both finance and operating leases. For leases with a term of 12 months or less, the Company elected to not recognize lease assets and lease liabilities and expense the leases over a straight-line basis for the term of those leases. ASU 2016-02 requires new disclosures that depict the amount, timing and uncertainty of cash flows pertaining to an entity's leases. The Company adopted ASU 2016-02 on January 1, 2019, using the cumulative effect upon adoption approach. The adoption resulted in no material impact to the Company's balance sheet, results of operations, equity or cash flows.

Recently Adopted Accounting Standards

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01). Most notably, the new guidance requires that equity investments, with certain exemptions, be measured at fair value with changes in fair value recognized in net income as opposed to other comprehensive income. The Company adopted ASU 2016-01 on a prospective basis effective January 1, 2018, as required, and reclassified $24 million from accumulated other comprehensive income to retained earnings.

The Company has determined that there have been no other recently adopted or issued accounting standards that had, or will have, a material impact on its Consolidated Financial Statements.

3. Investments

A summary of debt securities by major security type is as follows:

(in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2018				
Debt securities — available-for-sale:				
U.S. government and agency obligations	$ 3,434	$ 13	$ (42)	$ 3,405
State and municipal obligations	7,117	61	(57)	7,121
Corporate obligations	15,366	14	(218)	15,162
U.S. agency mortgage-backed securities	4,947	11	(106)	4,852
Non-U.S. agency mortgage-backed securities	1,376	2	(20)	1,358
Total debt securities — available-for-sale	32,240	101	(443)	31,898
Debt securities — held-to-maturity:				
U.S. government and agency obligations	255	1	(2)	254
State and municipal obligations	11	—	—	11
Corporate obligations	355	—	—	355
Total debt securities — held-to-maturity	621	1	(2)	620
Total debt securities	$ 32,861	$ 102	$ (445)	$ 32,518
December 31, 2017				
Debt securities — available-for-sale:				
U.S. government and agency obligations	$ 2,673	$ 1	$ (30)	$ 2,644
State and municipal obligations	7,596	99	(35)	7,660
Corporate obligations	13,181	57	(44)	13,194
U.S. agency mortgage-backed securities	3,942	7	(38)	3,911
Non-U.S. agency mortgage-backed securities	1,018	3	(6)	1,015
Total debt securities — available-for-sale	28,410	167	(153)	28,424
Debt securities — held-to-maturity:				
U.S. government and agency obligations	254	1	(1)	254
State and municipal obligations	2	—	—	2
Corporate obligations	280	—	—	280
Total debt securities — held-to-maturity	536	1	(1)	536
Total debt securities	$ 28,946	$ 168	$ (154)	$ 28,960

Nearly all of the Company's investments in mortgage-backed securities were rated AAA as of December 31, 2018.

The Company held $2.0 billion of equity securities as of December 31, 2018 and December 31, 2017. The Company's investments in equity securities primarily consist of employee savings plan related investments, Brazilian real denominated fixed-income funds and dividend paying stocks, with readily determinable fair values. Additionally, the Company's investments included $1.5 billion and $0.9 billion of equity method investments in operating businesses in the health care sector, as of December 31, 2018 and 2017, respectively.

The amortized cost and fair value of debt securities as of December 31, 2018, by contractual maturity, were as follows:

(in millions)	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	$ 3,560	$ 3,551	$ 150	$150
Due after one year through five years	12,432	12,297	213	212
Due after five years through ten years	7,362	7,270	129	129
Due after ten years	2,563	2,570	129	129
U.S. agency mortgage-backed securities	4,947	4,852	—	—
Non-U.S. agency mortgage-backed securities	1,376	1,358	—	—
Total debt securities	$32,240	$31,898	$ 621	$620

The fair value of available-for-sale investments with gross unrealized losses by major security type and length of time that individual securities have been in a continuous unrealized loss position were as follows:

(in millions)	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
December 31, 2018						
Debt securities — available-for-sale:						
U.S. government and agency obligations	$ 998	$ (7)	$ 1,425	$ (35)	$ 2,423	$ (42)
State and municipal obligations	1,334	(11)	2,491	(46)	3,825	(57)
Corporate obligations	8,105	(109)	4,239	(109)	12,344	(218)
U.S. agency mortgage-backed securities	1,296	(22)	2,388	(84)	3,684	(106)
Non-U.S. agency mortgage-backed securities	622	(7)	459	(13)	1,081	(20)
Total debt securities — available-for-sale	$12,355	$ (156)	$11,002	$ (287)	$23,357	$ (443)
December 31, 2017						
Debt securities — available-for-sale:						
U.S. government and agency obligations	$ 1,249	$ (8)	$ 1,027	$ (22)	$ 2,276	$ (30)
State and municipal obligations	2,599	(21)	866	(14)	3,465	(35)
Corporate obligations	5,901	(23)	1,242	(21)	7,143	(44)
U.S. agency mortgage-backed securities	1,657	(12)	1,162	(26)	2,819	(38)
Non-U.S. agency mortgage-backed securities	411	(3)	144	(3)	555	(6)
Total debt securities — available-for-sale	$11,817	$ (67)	$ 4,441	$ (86)	$16,258	$ (153)

The Company's unrealized losses from all securities as of December 31, 2018 were generated from approximately 19,000 positions out of a total of 31,000 positions. The Company believes that it will collect the principal and interest due on its debt securities that have an amortized cost in excess of fair value. The unrealized losses were primarily caused by interest rate increases and not by unfavorable changes in the credit quality associated with these securities. At each reporting period, the Company evaluates securities for impairment when the fair value of the investment is less than its amortized cost. The Company evaluated the underlying credit quality and credit ratings of the issuers, noting no significant deterioration since purchase. As of December 31, 2018, the Company did not have the intent to sell any of the securities in an unrealized loss position. Therefore, the Company believes these losses to be temporary.

4. Fair Value

Certain assets and liabilities are measured at fair value in the Consolidated Financial Statements or have fair values disclosed in the Notes to the Consolidated Financial Statements. These assets and liabilities are classified into one of three levels of a hierarchy defined by GAAP. In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

The fair value hierarchy is summarized as follows:

Level 1 — Quoted prices (unadjusted) for identical assets/liabilities in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets/liabilities in active markets;
- Quoted prices for identical or similar assets/liabilities in inactive markets (e.g., few transactions, limited information, noncurrent prices, high variability over time);
- Inputs other than quoted prices that are observable for the asset/liability (e.g., interest rates, yield curves, implied volatilities, credit spreads); and
- Inputs that are corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

There was no transfers in or out of Level 3 financial assets or liabilities during the year ended December 31, 2018 or 2017.

Nonfinancial assets and liabilities or financial assets and liabilities that are measured at fair value on a nonrecurring basis are subject to fair value adjustments only in certain circumstances, such as when the Company records an impairment. There were no significant fair value adjustments for these assets and liabilities recorded during the year ended December 31, 2018 or 2017.

The following methods and assumptions were used to estimate the fair value and determine the fair value hierarchy classification of each class of financial instrument included in the tables below:

Cash and Cash Equivalents. The carrying value of cash and cash equivalents approximates fair value as maturities are less than three months. Fair values of cash equivalent instruments that do not trade on a regular basis in active markets are classified as Level 2.

Debt and Equity Securities. Fair values of debt and equity securities are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, and, if necessary, makes adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and nonbinding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by a secondary pricing source, such as its custodian, its investment consultant and third-party investment advisors. Additionally, the Company

compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and reviews of fair value methodology documentation provided by independent pricing services have not historically resulted in adjustment in the prices obtained from the pricing service.

Fair values of debt securities that do not trade on a regular basis in active markets but are priced using other observable inputs are classified as Level 2.

Fair value estimates for Level 1 and Level 2 equity securities are based on quoted market prices for actively traded equity securities and/or other market data for the same or comparable instruments and transactions in establishing the prices.

The fair values of Level 3 investments in corporate bonds are estimated using valuation techniques that rely heavily on management assumptions and qualitative observations.

Throughout the procedures discussed above in relation to the Company's processes for validating third-party pricing information, the Company validates the understanding of assumptions and inputs used in security pricing and determines the proper classification in the hierarchy based on that understanding.

Assets Under Management. Assets under management consists of debt securities and other investments held to fund costs associated with the AARP Program and are priced and classified using the same methodologies as the Company's investments in debt and equity securities.

Long-Term Debt. The fair values of the Company's long-term debt are estimated and classified using the same methodologies as the Company's investments in debt securities.

The following table presents a summary of fair value measurements by level and carrying values for items measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair and Carrying Value
December 31, 2018				
Cash and cash equivalents	$ 10,757	$ 109	$ —	$10,866
Debt securities — available-for-sale:				
U.S. government and agency obligations	3,060	345	—	3,405
State and municipal obligations	—	7,121	—	7,121
Corporate obligations	39	14,950	173	15,162
U.S. agency mortgage-backed securities	—	4,852	—	4,852
Non-U.S. agency mortgage-backed securities	—	1,358	—	1,358
Total debt securities — available-for-sale	3,099	28,626	173	31,898
Equity securities	1,832	13	—	1,845
Assets under management	1,086	1,938	8	3,032
Total assets at fair value	$ 16,774	$ 30,686	$ 181	$47,641
Percentage of total assets at fair value	35%	65%	—%	100%
December 31, 2017				
Cash and cash equivalents	$ 11,718	$ 263	$ —	$11,981
Debt securities — available-for-sale:				
U.S. government and agency obligations	2,428	216	—	2,644
State and municipal obligations	—	7,660	—	7,660
Corporate obligations	65	12,989	140	13,194
U.S. agency mortgage-backed securities	—	3,911	—	3,911
Non-U.S. agency mortgage-backed securities	—	1,015	—	1,015
Total debt securities — available-for-sale	2,493	25,791	140	28,424
Equity securities	1,784	14	194	1,992
Assets under management	1,117	1,984	—	3,101
Total assets at fair value	$ 17,112	$ 28,052	$ 334	$45,498
Percentage of total assets at fair value	38%	61%	1%	100%

The following table presents a summary of fair value measurements by level and carrying values for certain financial instruments not measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair Value	Total Carrying Value
December 31, 2018					
Debt securities — held-to-maturity	$ 260	$ 65	$ 295	$ 620	$ 621
Long-term debt and other financing obligations	$ —	$ 37,944	$ —	$ 37,944	$ 36,554
December 31, 2017					
Debt securities — held-to-maturity	$ 267	$ 4	$ 265	$ 536	$ 536
Long-term debt and other financing obligations	$ —	$ 34,504	$ —	$ 34,504	$ 31,542

The carrying amounts reported on the Consolidated Balance Sheets for other current financial assets and liabilities approximate fair value because of their short-term nature. These assets and liabilities are not listed in the table above.

5. Property, Equipment and Capitalized Software

A summary of property, equipment and capitalized software is as follows:

(in millions)	December 31, 2018	December 31, 2017
Land and improvements	$ 566	$ 405
Buildings and improvements	4,470	3,664
Computer equipment	1,984	1,829
Furniture and fixtures	1,525	1,208
Less accumulated depreciation	(2,787)	(2,488)
Property and equipment, net	5,758	4,618
Capitalized software	4,054	3,601
Less accumulated amortization	(1,354)	(1,206)
Capitalized software, net	2,700	2,395
Total property, equipment and capitalized software, net	$ 8,458	$ 7,013

Depreciation expense for property and equipment for the years ended December 31, 2018, 2017 and 2016 was $924 million, $799 million and $698 million, respectively. Amortization expense for capitalized software for the years ended December 31, 2018, 2017 and 2016 was $606 million, $550 million and $475 million, respectively.

6. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill, by reportable segment, were as follows:

(in millions)	UnitedHealthcare	OptumHealth	OptumInsight	OptumRx	Consolidated
Balance at January 1, 2017	$ 23,854	$ 6,322	$ 4,449	$12,959	$ 47,584
Acquisitions	690	5,189	1,221	—	7,100
Foreign currency effects and adjustments, net	(60)	(23)	4	(49)	(128)
Balance at December 31, 2017	24,484	11,488	5,674	12,910	54,556
Acquisitions	2,723	471	106	1,881	5,181
Foreign currency effects and adjustments, net	(807)	(12)	(8)	—	(827)
Balance at December 31, 2018	$ 26,400	$ 11,947	$ 5,772	$14,791	$ 58,910

The gross carrying value, accumulated amortization and net carrying value of other intangible assets were as follows:

	December 31, 2018			December 31, 2017		
(in millions)	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Customer-related	$11,622	$ (3,908)	$7,714	$10,832	$ (3,743)	$7,089
Trademarks and technology	1,122	(512)	610	1,054	(432)	622
Trademarks and other indefinite-lived	745	—	745	561	—	561
Other	428	(172)	256	351	(134)	217
Total	$13,917	$ (4,592)	$9,325	$12,798	$ (4,309)	$8,489

The acquisition date fair values and weighted-average useful lives assigned to finite-lived intangible assets acquired in business combinations consisted of the following by year of acquisition:

	2018		2017	
(in millions, except years)	Fair Value	Weighted-Average Useful Life	Fair Value	Weighted-Average Useful Life
Customer-related	$1,355	17 years	$324	13 years
Trademarks and technology	122	4 years	367	11 years
Other	97	9 years	82	6 years
Total acquired finite-lived intangible assets	$1,574	16 years	$773	11 years

Estimated full year amortization expense relating to intangible assets for each of the next five years ending December 31 is as follows:

(in millions)	
2019	$889
2020	795
2021	724
2022	632
2023	593

Amortization expense relating to intangible assets for the years ended December 31, 2018, 2017 and 2016 was $898 million, $896 million and $882 million, respectively.

7. Medical Costs Payable

The following table shows the components of the change in medical costs payable for the years ended December 31:

(in millions)	2018	2017	2016
Medical costs payable, beginning of period	$ 17,871	$ 16,391	$ 14,330
Acquisitions	339	83	—
Reported medical costs:			
Current year	145,723	130,726	117,258
Prior years	(320)	(690)	(220)
Total reported medical costs	145,403	130,036	117,038
Medical payments:			
Payments for current year	(127,155)	(113,811)	(101,696)
Payments for prior years	(16,567)	(14,828)	(13,281)
Total medical payments	(143,722)	(128,639)	(114,977)
Medical costs payable, end of period	$ 19,891	$ 17,871	$ 16,391

For the years ended December 31, 2018 and 2016, no individual factors significantly impacted medical cost reserve development. For the year ended December 31, 2017, medical cost reserve development was primarily driven by lower than expected health system utilization levels.

Medical costs payable included IBNR of $13.2 billion and $12.3 billion at December 31, 2018 and 2017, respectively. Substantially all of the IBNR balance as of December 31, 2018 relates to the current year. The following is information about incurred and paid medical cost development as of December 31, 2018:

(in millions)	Net Incurred Medical Costs For the Years ended December 31,	
Year	2017	2018
2017	$ 130,726	$ 130,441
2018		145,723
Total		$ 276,164

(in millions)	Net Cumulative Medical Payments For the Years ended December 31,	
Year	2017	2018
2017	$ (113,811)	$ (129,778)
2018		(127,155)
Total		(256,933)
Net remaining outstanding liabilities prior to 2017		660
Total medical costs payable		$ 19,891

8. Commercial Paper and Long-Term Debt

Commercial paper and senior unsecured long-term debt consisted of the following:

(in millions, except percentages)	December 31, 2018			December 31, 2017

4.450% notes due December 2048	1,100	1,087	1,132	—	—	—
Total commercial paper and long-term debt	$35,667	$35,234	$36,591	$31,417	$31,067	$34,029

The Company's long-term debt obligations also included $1.3 billion and $625 million of other financing obligations, of which $229 million and $107 million were current as of December 31, 2018 and 2017, respectively.

Maturities of long-term debt for the years ending December 31 are as follows:

(in millions)	
2019	$ 1,973
2020	3,350
2021	3,350
2022	3,215
2023	2,325
Thereafter	22,775

Commercial Paper and Revolving Bank Credit Facilities

Commercial paper consists of short-duration, senior unsecured debt privately placed on a discount basis through broker-dealers.

The Company has $3.5 billion five-year, $3.5 billion three-year and $3.0 billion 364-day revolving bank credit facilities with 26 banks, which mature in December 2023, December 2021 and December 2019, respectively. These facilities provide liquidity support for the Company's commercial paper program and are available for general corporate purposes. As of December 31, 2018, no amounts had been drawn on any of the bank credit facilities. The annual interest rates, which are variable based on term, are calculated based on the London Interbank Offered Rate (LIBOR) plus a credit spread based on the Company's senior unsecured credit ratings. If amounts had been drawn on the bank credit facilities as of December 31, 2018, annual interest rates would have ranged from 3.2% to 3.6%.

Debt Covenants

The Company's bank credit facilities contain various covenants, including requiring the Company to maintain a debt to debt-plus-shareholders' equity ratio of not more than 60%. The Company was in compliance with its debt covenants as of December 31, 2018.

9. Income Taxes

The current income tax provision reflects the tax consequences of revenues and expenses currently taxable or deductible on various income tax returns for the year reported. The deferred income tax provision or benefit generally reflects the net change in deferred income tax assets and liabilities during the year, excluding any deferred income tax assets and liabilities of acquired businesses. The components of the provision for income taxes for the years ended December 31 are as follows:

(in millions)	2018	2017	2016
Current Provision:			
Federal	$2,897	$3,597	$4,302
State and local	219	314	312
Foreign	404	254	95
Total current provision	3,520	4,165	4,709
Deferred provision (benefit)	42	(965)	81
Total provision for income taxes	$3,562	$3,200	$4,790

The reconciliation of the tax provision at the U.S. federal statutory rate to the provision for income taxes and the effective tax rate for the years ended December 31 is as follows:

(in millions, except percentages)	2018		2017		2016	
Tax provision at the U.S. federal statutory rate	$3,348	21.0%	$4,908	35.0%	$4,152	35.0%
Change in tax law	—	—	(1,199)	(8.6)	—	—
State income taxes, net of federal benefit	168	1.0	197	1.4	205	1.7
Share-based awards — excess tax benefit	(161)	(1.0)	(319)	(2.3)	(158)	(1.3)
Non-deductible compensation	117	0.7	175	1.3	128	1.1
Health insurance industry tax	552	3.5	—	—	645	5.4
Foreign rate differential	(203)	(1.3)	(282)	(2.0)	(105)	(0.9)
Other, net	(259)	(1.6)	(280)	(2.0)	(77)	(0.6)
Provision for income taxes	$3,562	22.3%	$3,200	22.8%	$4,790	40.4%

Deferred income tax assets and liabilities are recognized for the differences between the financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. The components of deferred income tax assets and liabilities as of December 31 are as follows:

(in millions)	2018	2017
Deferred income tax assets:		
Accrued expenses and allowances	$ 551	$ 544
U.S. federal and state net operating loss carryforwards	190	216
Share-based compensation	91	97
Nondeductible liabilities	184	169
Non-U.S. tax loss carryforwards	426	445
Other-domestic	306	167
Other-non-U.S.	337	198
Subtotal	2,085	1,836
Less: valuation allowances	(84)	(64)
Total deferred income tax assets	2,001	1,772
Deferred income tax liabilities:		
U.S. federal and state intangible assets	(2,131)	(1,998)
Non-U.S. goodwill and intangible assets	(709)	(602)
Capitalized software	(603)	(530)
Depreciation and amortization	(266)	(236)
Prepaid expenses	(152)	(223)
Outside basis in partnerships	(300)	(279)
Other-non-U.S.	(314)	(86)
Total deferred income tax liabilities	(4,475)	(3,954)
Net deferred income tax liabilities	$(2,474)	$(2,182)

Valuation allowances are provided when it is considered more likely than not that deferred tax assets will not be realized. The valuation allowances primarily relate to future tax benefits on certain federal, state and non-U.S. net operating loss carryforwards. Federal net operating loss carryforwards of $99 million expire beginning in 2022 through 2037 and $17 million have an indefinite carryforward period; state net operating loss carryforwards expire beginning in 2019 through 2038. Substantially all of the non-U.S. tax loss carryforwards have indefinite carryforward periods.

As of December 31, 2018, the Company's undistributed earnings from non-U.S. subsidiaries are intended to be indefinitely reinvested in non-U.S. operations, and therefore no U.S. deferred taxes have been recorded. Taxes payable on the remittance of such earnings would be minimal.

A reconciliation of the beginning and ending amount of unrecognized tax benefits as of December 31 is as follows:

(in millions)	2018	2017	2016
Gross unrecognized tax benefits, beginning of period	$ 598	$ 263	$ 224
Gross increases:			
Current year tax positions	487	356	37
Prior year tax positions	87	40	24
Gross decreases:			
Prior year tax positions	(84)	(33)	(4)
Settlements	(20)	(24)	(6)
Statute of limitations lapses	(12)	(4)	(12)
Gross unrecognized tax benefits, end of period	$1,056	$ 598	$ 263

The Company believes it is reasonably possible that its liability for unrecognized tax benefits will decrease in the next twelve months by $118 million as a result of audit settlements and the expiration of statutes of limitations.

The Company classifies interest and penalties associated with uncertain income tax positions as income taxes within its Consolidated Statements of Operations. During the years ended December 31, 2018, 2017 and 2016, the Company recognized $6 million, $14 million and $11 million of interest and penalties, respectively. The Company had $95 million and $84 million of accrued interest and penalties for uncertain tax positions as of December 31, 2018 and 2017, respectively. These amounts are not included in the reconciliation above. As of December 31, 2018, there were $716 million of unrecognized tax benefits that, if recognized, would affect the effective tax rate.

The Company currently files income tax returns in the United States, various states and localities and non-U.S. jurisdictions. The U.S. Internal Revenue Service (IRS) has completed exams on the consolidated income tax returns for fiscal years 2016 and prior. The Company's 2018 and 2017 tax years are under review by the IRS under its Compliance Assurance Program. With the exception of a few states, the Company is no longer subject to income tax examinations prior to the 2012 tax year. In general, the Company is subject to examination in non-U.S. jurisdictions for years 2013 and forward.

10. Shareholders' Equity

Regulatory Capital and Dividend Restrictions

The Company's regulated insurance and HMO subsidiaries in the United States are subject to regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies. In the United States, most of these regulations and standards are generally consistent with model regulations established by the National Association of Insurance Commissioners. These standards generally permit dividends to be paid from statutory unassigned surplus of the regulated subsidiary and are limited based on the regulated subsidiary's level of statutory net income and statutory capital and surplus. These dividends are referred to as "ordinary dividends" and generally may be paid without prior regulatory approval. If the dividend, together with other dividends paid within the preceding twelve months, exceeds a specified statutory limit or is paid from sources other than earned surplus, it is generally considered an "extraordinary dividend" and must receive prior regulatory approval.

For both the years ended December 31, 2018 and 2017, the Company's regulated subsidiaries paid their parent companies dividends of $3.7 billion, including $1.1 billion of extraordinary dividends.

The Company's regulated subsidiaries had estimated aggregate statutory capital and surplus of $23.7 billion as of December 31, 2018. The estimated statutory capital and surplus necessary to satisfy regulatory requirements of the Company's regulated subsidiaries was approximately $10.3 billion as of December 31, 2018.

Optum Bank must meet minimum capital requirements of the Federal Deposit Insurance Corporation (FDIC) to be considered "Well Capitalized" under the capital adequacy rules to which it is subject. At December 31, 2018, the Company believes that Optum Bank met the FDIC requirements to be considered "Well Capitalized."

Share Repurchase Program

Under its Board of Directors' authorization, the Company maintains a share repurchase program. The objectives of the share repurchase program are to optimize the Company's capital structure and cost of capital, thereby improving returns to shareholders, as well as to offset the dilutive impact of share-based awards. Repurchases may be made from time to time in open market purchases or other types of transactions (including prepaid or structured share repurchase programs), subject to certain Board restrictions. In June 2018, the Board renewed the Company's share repurchase program with an authorization to repurchase up to 100 million shares of its common stock.

A summary of common share repurchases for the years ended December 31, 2018 and 2017 is as follows:

	Years Ended December 31,	
(in millions, except per share data)	**2018**	**2017**
Common share repurchases, shares	19	9
Common share repurchases, average price per share	$236.72	$173.54
Common share repurchases, aggregate cost	$ 4,500	$ 1,500
Board authorized shares remaining	94	42

Dividends

In June 2018, the Company's Board of Directors increased the Company's annual dividend rate to shareholders to $3.60 per share compared to $3.00 per share, which the Company had paid since June 2017. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

11. Share-Based Compensation

The Company's outstanding share-based awards consist mainly of non-qualified stock options, SARs and restricted shares. As of December 31, 2018, the Company had 42 million shares available for future grants of share-based awards under the Plan. As of December 31, 2018, there were also 7 million shares of common stock available for issuance under the ESPP.

Stock Options and SARs

Stock option and SAR activity for the year ended December 31, 2018 is summarized in the table below:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Aggregate Intrinsic Value
	(in millions)		(in years)	(in millions)
Outstanding at beginning of period	37	$ 102		
Granted	7	229		
Exercised	(8)	78		
Forfeited	(1)	162		
Outstanding at end of period	35	131	6.5	$ 4,114
Exercisable at end of period	16	87	5.0	2,560
Vested and expected to vest, end of period	34	129	6.5	4,072

Restricted Shares

Restricted share activity for the year ended December 31, 2018 is summarized in the table below:

(shares in millions)	Shares	Weighted-Average Grant Date Fair Value per Share
Nonvested at beginning of period	7	$ 128
Granted	2	229
Vested	(3)	119
Nonvested at end of period	6	163

Other Share-Based Compensation Data

	For the Years Ended December 31,		
(in millions, except per share amounts)	2018	2017	2016
Stock Options and SARs			
Weighted-average grant date fair value of shares granted, per share	$ 43	$ 29	$ 20
Total intrinsic value of stock options and SARs exercised	1,431	1,473	595
Restricted Shares			
Weighted-average grant date fair value of shares granted, per share	229	163	115
Total fair value of restricted shares vested	$ 521	$ 460	$274
Employee Stock Purchase Plan			
Number of shares purchased	2	2	2
Share-Based Compensation Items			
Share-based compensation expense, before tax	$ 638	$ 597	$485
Share-based compensation expense, net of tax effects	587	531	417
Income tax benefit realized from share-based award exercises	239	431	236

(in millions, except years)	December 31, 2018
Unrecognized compensation expense related to share awards	$ 628
Weighted-average years to recognize compensation expense	1.3

Share-Based Compensation Recognition and Estimates

The principal assumptions the Company used in calculating grant-date fair value for stock options and SARs were as follows:

	For the Years Ended December 31,		
	2018	2017	2016
Risk-free interest rate	2.6% - 3.1%	1.9% - 2.1%	1.2% - 1.4%
Expected volatility	18.7% - 19.3%	18.5% - 20.7%	20.8% - 22.5%
Expected dividend yield	1.3% - 1.5%	1.4% - 1.6%	1.8%
Forfeiture rate	5.0%	5.0%	5.0%
Expected life in years	5.6	5.7	5.6 - 5.9

Risk-free interest rates are based on U.S. Treasury yields in effect at the time of grant. Expected volatilities are based on the historical volatility of the Company's common stock and the implied volatility from exchange-traded options on the Company's common stock. Expected dividend yields are based on the per share cash dividend paid by the Company. The Company uses historical data to estimate option and SAR exercises and forfeitures within the valuation model. The expected lives of options and SARs granted represents the period of time that the awards granted are expected to be outstanding based on historical exercise patterns.

Other Employee Benefit Plans

The Company offers a 401(k) plan for its employees. Compensation expense related to this plan was not material for 2018, 2017 and 2016.

In addition, the Company maintains non-qualified, deferred compensation plans, which allow certain members of senior management and executives to defer portions of their salary or bonus and receive certain Company contributions on such deferrals, subject to plan limitations. The deferrals are recorded within long-term investments with an approximately equal amount in other liabilities in the Consolidated Balance Sheets. The total deferrals are distributable based upon termination of employment or other periods, as elected under each plan and were $988 million and $865 million as of December 31, 2018 and 2017, respectively.

12. Commitments and Contingencies

The Company leases facilities and equipment under long-term operating leases that are non-cancelable and expire on various dates. Rent expense under all operating leases for the years ended December 31, 2018, 2017 and 2016 was $751 million, $710 million and $608 million, respectively.

As of December 31, 2018, future minimum annual lease payments, net of sublease income, under all non-cancelable operating leases were as follows:

(in millions)	Future Minimum Lease Payments
2019	$ 669
2020	592
2021	511
2022	423
2023	338
Thereafter	1,343

The Company provides guarantees related to its service level under certain contracts. If minimum standards are not met, the Company may be financially at risk up to a stated percentage of the contracted fee or a stated dollar amount. None of the amounts accrued, paid or charged to income for service level guarantees were material as of December 31, 2018, 2017 or 2016.

As of December 31, 2018, the Company had outstanding, undrawn letters of credit with financial institutions of $83 million and surety bonds outstanding with insurance companies of $1.3 billion, primarily to bond contractual performance.

Pending Acquisition

In December 2017, the Company entered into an agreement to acquire a company in the health care sector for a total of approximately $4.3 billion.

Legal Matters

Because of the nature of its businesses, the Company is frequently made party to a variety of legal actions and regulatory inquiries, including class actions and suits brought by members, care providers, consumer advocacy organizations, customers and regulators, relating to the Company's businesses, including management and administration of health benefit plans and other services. These matters include medical malpractice, employment, intellectual property, antitrust, privacy and contract claims and claims related to health care benefits coverage and other business practices.

The Company records liabilities for its estimates of probable costs resulting from these matters where appropriate. Estimates of costs resulting from legal and regulatory matters involving the Company are inherently difficult to predict, particularly where the matters: involve indeterminate claims for monetary damages or may involve fines, penalties or punitive damages; present novel legal theories or represent a shift in regulatory policy; involve a large number of claimants or regulatory bodies; are in the early stages of the proceedings; or could result in a change in business practices. Accordingly, the Company is often unable to estimate the losses or ranges of losses for those matters where there is a reasonable possibility or it is probable that a loss may be incurred.

Government Investigations, Audits and Reviews

The Company has been involved or is currently involved in various governmental investigations, audits and reviews. These include routine, regular and special investigations, audits and reviews by CMS, state insurance and health and welfare departments, state attorneys general, the Office of the Inspector General, the Office of Personnel Management, the Office of Civil Rights, the Government Accountability Office, the Federal Trade Commission, U.S. Congressional committees, the U.S. Department of Justice, the SEC, the Internal Revenue Service, the U.S. Drug Enforcement Administration, the U.S. Department of Labor, the Federal Deposit Insurance Corporation, the Defense Contract Audit Agency and other governmental authorities. Similarly, our international businesses are also subject to investigations, audits and reviews by applicable foreign governments, including South American and other non-U.S. governmental authorities. Certain of the Company's businesses have been reviewed or are currently under review, including for, among other matters, compliance with coding and other requirements under the Medicare risk-adjustment model. CMS has selected certain of the Company's local plans for risk adjustment data validation (RADV) audits to validate the coding practices of and supporting documentation maintained by health care providers and such audits may result in retrospective adjustments to payments made to the Company's health plans.

On February 14, 2017, the Department of Justice (DOJ) announced its decision to pursue certain claims within a lawsuit initially asserted against the Company and filed under seal by a whistleblower in 2011. The whistleblower's complaint, which was unsealed on February 15, 2017, alleges that the Company made improper risk adjustment submissions and violated the False Claims Act. On February 12, 2018, the court granted in part and denied in part the Company's motion to dismiss. In May 2018, DOJ moved to dismiss the Company's counterclaims, which were filed in March 2018, and moved for partial summary judgment. Those motions were argued in September 2018. The Company cannot reasonably estimate the outcome that may result from this matter given its procedural status.

13. Segment Financial Information

Factors used to determine the Company's reportable segments include the nature of operating activities, economic characteristics, existence of separate senior management teams and the type of information used by the Company's chief operating decision maker to evaluate its results of operations. Reportable segments with similar economic characteristics, products and services, customers, distribution methods and operational processes that operate in a similar regulatory environment are combined.

The following is a description of the types of products and services from which each of the Company's four reportable segments derives its revenues:

- *UnitedHealthcare* includes the combined results of operations of UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global. The U.S. businesses share significant common assets, including a contracted network of physicians, health care professionals, hospitals and other facilities, information technology and consumer engagement infrastructure and other resources. UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services for large national employers, public sector employers, mid-sized employers, small businesses and individuals nationwide. UnitedHealthcare Medicare & Retirement provides health care coverage and health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services as well as services dealing with chronic disease and other specialized issues for older individuals. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, the Children's Health Insurance Program and other federal, state and community health care programs. UnitedHealthcare Global is a diversified global health services business with a variety of offerings, including international commercial health and dental benefits and health care delivery.
- *OptumHealth* focuses on care delivery, care management, wellness and consumer engagement, and health financial services. OptumHealth serves the physical, emotional and health-related financial needs of individuals, enabling population health through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth offers access to networks of care provider specialists, health management services, care delivery, consumer engagement and financial services.
- *OptumInsight* provides services, technology and health care expertise to major participants in the health care industry. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.
- *OptumRx* offers pharmacy care services and programs, including retail network contracting, home delivery, specialty and compounding pharmacy services, purchasing and clinical capabilities, and develops programs in areas such as step therapy, formulary management, drug adherence and disease/drug therapy management.

The Company's accounting policies for reportable segment operations are consistent with those described in the Summary of Significant Accounting Policies (see Note 2). Transactions between reportable segments principally consist of sales of pharmacy care products and services to UnitedHealthcare customers by OptumRx, certain product offerings and care management and local care delivery services sold to UnitedHealthcare by OptumHealth, and health information and technology solutions, consulting and other services sold to UnitedHealthcare by OptumInsight. These transactions are recorded at management's estimate of fair value. Intersegment transactions are eliminated in consolidation. Assets and liabilities that are jointly used are assigned to each reportable segment using estimates of pro-rata usage. Cash and investments are assigned such that each reportable segment has working capital and/or at least minimum specified levels of regulatory capital.

As a percentage of the Company's total consolidated revenues, premium revenues from CMS were 30%, 28% and 25% for 2018, 2017 and 2016, respectively, most of which were generated by UnitedHealthcare Medicare & Retirement and included in the UnitedHealthcare segment. U.S. customer revenue represented approximately 96%, 96% and 97% of consolidated total revenues for 2018, 2017 and 2016, respectively. Long-lived fixed assets located in the United States represented approximately 76% and 77% of the total long-lived fixed assets as of December 31, 2018 and 2017, respectively. The non-U.S. revenues and fixed assets are primarily related to UnitedHealthcare Global.

The following table presents the reportable segment financial information:

(in millions)	UnitedHealthcare	Optum					Corporate and Eliminations	Consolidated
		OptumHealth	OptumInsight	OptumRx	Optum Eliminations	Optum

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act) that are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms; and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the filing of this Annual Report on Form 10-K, management evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2018. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of December 31, 2018.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes in our internal control over financial reporting during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Management on Internal Control Over Financial Reporting as of December 31, 2018

Management of UnitedHealth Group Incorporated and Subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control system is designed to provide reasonable assurance to our management and board of directors regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2018. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013).* Based on our assessment and the COSO criteria, we believe that, as of December 31, 2018, the Company maintained effective internal control over financial reporting.

The Company's independent registered public accounting firm has audited the Company's internal control over financial reporting as of December 31, 2018, as stated in the Report of Independent Registered Public Accounting Firm, appearing under Item 9A.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of UnitedHealth Group Incorporated and Subsidiaries:

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of UnitedHealth Group Incorporated and Subsidiaries (the "Company") as of December 31, 2018, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control—Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2018, of the Company and our report dated February 12, 2019, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting as of December 31, 2018. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

DIRECTORS OF THE REGISTRANT

The following sets forth certain information regarding our directors as of February 12, 2019, including their name and principal occupation or employment:

William C. Ballard, Jr.
Former Of Counsel
Bingham Greenebaum Doll LLP

Richard T. Burke
Lead Independent Director
UnitedHealth Group

Timothy P. Flynn
Retired Chair
KPMG International

Stephen J. Hemsley
Executive Chair
UnitedHealth Group

Michele J. Hooper
President and Chief Executive Officer
The Directors' Council

F. William McNabb III
Former Chairman and Chief Executive Officer
The Vanguard Group, Inc.

Valerie Montgomery Rice, M.D
President and Dean
Morehouse School of Medicine

Glenn M. Renwick
Chair
Fiserv, Inc.

David S. Wichmann
Chief Executive Officer
UnitedHealth Group

Gail R. Wilensky, Ph.D.
Senior Fellow
Project HOPE

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant."

We have adopted a code of ethics applicable to our principal executive officer and other senior financial officers, who include our principal financial officer, principal accounting officer, controller and persons performing similar functions. The code of ethics, entitled Code of Conduct: Our Principles of Ethics and Integrity, is posted on our website at *www.unitedhealthgroup.com*. For information about how to obtain the Code of Conduct, see Part I, Item 1, "Business." We intend to satisfy the SEC's disclosure requirements regarding amendments to, or waivers of, the code of ethics for our senior financial officers by posting such information on our website indicated above.

The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Corporate Governance," "Proposal 1-Election of Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2019 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Items 402, 407(e)(4) and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation," "Director Compensation," "Corporate Governance—Risk Oversight" and

"Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2019 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Equity Compensation Plan Information

The following table sets forth certain information, as of December 31, 2018, concerning shares of common stock authorized for issuance under all of our equity compensation plans:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(in millions)		(in millions)
Equity compensation plans approved by shareholders [1]	33	$ 135	49[3]
Equity compensation plans not approved by shareholders [2]	—	—	—
Total [2]	33	$ 135	49

(1) Consists of the UnitedHealth Group Incorporated 2011 Stock Incentive Plan, as amended and the UnitedHealth Group 1993 Employee Stock Purchase Plan, as amended.

(2) Excludes 1,676,000 shares underlying stock options assumed by us in connection with acquisitions. These options have a weighted-average exercise price of $59 and an average remaining term of approximately 5 years. These options are administered pursuant to the terms of the plans under which the options originally were granted. No future awards will be granted under these acquired plans.

(3) Includes 7 million shares of common stock available for future issuance under the 1993 Employee Stock Purchase Plan as of December 31, 2018, and 42 million shares available under the 2011 Stock Incentive Plan as of December 31, 2018. Shares available under the 2011 Stock Incentive Plan may become the subject of future awards in the form of stock options, SARs, restricted stock, restricted stock units, performance awards and other stock-based awards.

The information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2019 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Certain Relationships and Transactions" and "Corporate Governance" in our definitive proxy statement for our 2019 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by Item 9(e) of Schedule 14A will be included under the heading "Disclosure of Fees Paid to Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2019 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) 1. *Financial Statements and Supplementary Data*

The financial statements are included under Item 8 of this report:

- Reports of Independent Registered Public Accounting Firm.
- Consolidated Balance Sheets as of December 31, 2018 and 2017.
- Consolidated Statements of Operations for the years ended December 31, 2018, 2017, and 2016.
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2018, 2017, and 2016.
- Consolidated Statements of Changes in Equity for the years ended December 31, 2018, 2017, and 2016.
- Consolidated Statements of Cash Flows for the years ended December 31, 2018, 2017, and 2016.
- Notes to the Consolidated Financial Statements.

2. *Financial Statement Schedules*

The following financial statement schedule of the Company is included in Item 15(c):

- Schedule I—Condensed Financial Information of Registrant (Parent Company Only).

All other schedules for which provision is made in the applicable accounting regulations of the SEC are not required under the related instructions, are inapplicable, or the required information is included in the consolidated financial statements, and therefore have been omitted.

(b) The following exhibits are filed or incorporated by reference herein in response to Item 601 of Regulation S-K. The Company files Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K pursuant to the Securities Exchange Act of 1934 under Commission File No. 1-10864.

EXHIBIT INDEX**

3.1	Certificate of Incorporation of UnitedHealth Group Incorporated (incorporated by reference to Exhibit 3.1 to UnitedHealth Group Incorporated's Registration Statement on Form 8-A/A, Commission File No. 1-10864, filed on July 1, 2015)
3.2	Bylaws of UnitedHealth Group Incorporated, effective August 15, 2017 (incorporated by reference to Exhibit 3.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on August 16, 2017)
4.1	Senior Indenture, dated as of November 15, 1998, between United HealthCare Corporation and The Bank of New York (incorporated by reference to Exhibit 4.1 to UnitedHealth Group Incorporated's Registration Statement on Form S-3/A, SEC File Number 333-66013, filed on January 11, 1999)
4.2	Amendment, dated as of November 6, 2000, to Senior Indenture, dated as of November 15, 1998, between the UnitedHealth Group Incorporated and The Bank of New York (incorporated by reference to Exhibit 4.1 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2001)

4.3	Instrument of Resignation, Appointment and Acceptance of Trustee, dated January 8, 2007, pursuant to the Senior Indenture, dated as of November 15, 1988, amended as of November 6, 2000, among UnitedHealth Group Incorporated, The Bank of New York and Wilmington Trust Company (incorporated by reference to Exhibit 4.3 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended June 30, 2007)
4.4	Indenture, dated as of February 4, 2008, between UnitedHealth Group Incorporated and U.S. Bank National Association (incorporated by reference to Exhibit 4.1 to UnitedHealth Group Incorporated's Registration Statement on Form S-3, SEC File Number 333-149031, filed on February 4, 2008)
*10.1	UnitedHealth Group Incorporated 2011 Stock Incentive Plan, as amended and restated in 2018
*10.2	Amendment to UnitedHealth Group Incorporated's Stock Option and Stock Appreciation Right Awards, effective November 6, 2014 (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2014)
*10.3	Form of Agreement for Non-Qualified Stock Option Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan, as amended and restated in 2015, for awards made after January 1, 2016 (incorporated by reference to Exhibit 10.4 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.4	Form of Agreement for Non-Qualified Stock Option Award for International Participants under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.3 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2013)

(c) Financial Statement Schedule

Schedule I—Condensed Financial Information of Registrant (Parent Company Only).

Schedule I

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of UnitedHealth Group Incorporated and Subsidiaries:

Opinion on the Financial Statement Schedule

We have audited the consolidated financial statements of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2018 and 2017, and for each of the three years in the period ended December 31, 2018, and the Company's internal control over financial reporting as of December 31, 2018, and have issued our reports thereon dated February 12, 2019; such reports are included elsewhere in this Form 10-K. Our audits also included the financial statement schedule of the Company listed in the Index at Item 15. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statement schedule based on our audits. In our opinion, the financial statement schedule, when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

See Notes to the Condensed Financial Statements of Registrant

Schedule I

Condensed Financial Information of Registrant
(Parent Company Only)
UnitedHealth Group
Notes to Condensed Financial Statements

1. Basis of Presentation

UnitedHealth Group's parent company financial information has been derived from its consolidated financial statements and should be read in conjunction with the consolidated financial statements included in this Form 10-K. The accounting policies for the registrant are the same as those described in Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

2. Subsidiary Transactions

Investment in Subsidiaries. UnitedHealth Group's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries.

Dividends and Capital Distributions. Cash dividends received from subsidiaries and included in Cash Flows from Operating Activities in the Condensed Statements of Cash Flows were $5.6 billion, $3.4 billion and $3.7 billion in 2018, 2017 and 2016, respectively. Additionally, $4.2 billion, $3.4 billion and $2.1 billion in cash were received as a return of capital to the parent company during 2018, 2017 and 2016, respectively.

3. Commercial Paper and Long-Term Debt

Discussion of commercial paper and long-term debt can be found in Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data." Long-term debt obligations of the parent company do not include other financing obligations at subsidiaries that totaled $1.3 billion and $625 million at December 31, 2018 and 2017, respectively.

Maturities of commercial paper and long-term debt for the years ending December 31 are as follows:

(in millions)	
2019	$ 1,750
2020	3,150
2021	3,150
2022	3,015
2023	2,125
Thereafter	22,477

4. Commitments and Contingencies

For a summary of commitments and contingencies, see Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data."

ITEM 16. FORM 10-K SUMMARY

None.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Such proxy statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

UNITEDHEALTH GROUP

Table of Contents

PART I

ITEM 1. BUSINESS

INTRODUCTION

Overview

UnitedHealth Group is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone. The terms "we," "our," "us," "its," "UnitedHealth Group," or the "Company" used in this report refer to UnitedHealth Group Incorporated and its subsidiaries.

Through our diversified family of businesses, we leverage core competencies in data and health information; advanced technology; and clinical expertise to help meet the demands of the health system. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

UnitedHealthcare provides health care benefits to an array of customers and markets. UnitedHealthcare Employer & Individual serves employers ranging from sole proprietorships to large, multi-site and national employers, public sector employers and other individuals. UnitedHealthcare Medicare & Retirement delivers health and well-being benefits for Medicare beneficiaries and retirees. UnitedHealthcare Community & State manages health care benefit programs on behalf of state Medicaid and community programs and their participants. UnitedHealthcare Global includes the provision of health and dental benefits and hospital and clinical services to employer groups and individuals in Brazil, and other diversified global health businesses.

Optum is a health services business serving the broad health care marketplace, including payers, care providers, employers, governments, life sciences companies and consumers, through its OptumHealth, OptumInsight and OptumRx businesses. These businesses have dedicated units that help improve overall health system performance through optimizing care quality, reducing costs and improving consumer experience and care provider performance, leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations.

Through UnitedHealthcare and Optum, in 2017, we processed nearly three-quarters of a trillion dollars in gross billed charges and we managed nearly $250 billion in aggregate health care spending on behalf of the customers and consumers we serve. Our revenues are derived from premiums on risk-based products; fees from management, administrative, technology and consulting services; sales of a wide variety of products and services related to the broad health care industry; and investment and other income. Our two business platforms have four reportable segments:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

For our financial results and the presentation of certain other financial information by segment, including revenues and long-lived fixed assets by geographic source, see Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

UnitedHealthcare

Through its health benefits offerings, UnitedHealthcare is enabling better health, helping to control rising health care costs and creating a better health care experience for its customers. UnitedHealthcare's market position is built on:

- strong local market relationships;

- the breadth of product offerings, which are responsive to many distinct market segments in health care;
- service and advanced technology;
- competitive medical and operating cost positions;
- effective clinical engagement;
- extensive expertise in distinct market segments; and
- innovation for customers and consumers.

UnitedHealthcare utilizes Optum's capabilities to help coordinate patient care, improve affordability of medical care, analyze cost trends, manage pharmacy benefits, work with care providers more effectively and create a simpler consumer experience.

In the United States, UnitedHealthcare arranges for discounted access to care through networks that include 1.2 million physicians and other health care professionals and approximately 6,500 hospitals and other facilities.

UnitedHealthcare is subject to extensive government regulation. See further discussion of our regulatory environment below under "Government Regulation" and in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

UnitedHealthcare Employer & Individual

UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services nationwide for large national employers, public sector employers, mid-sized employers, small businesses, and individuals. UnitedHealthcare Employer & Individual provides access to medical services for over 27 million people on behalf of our customers and alliance partners. This includes more than 230,000 employer customers serving people across all 50 states, the District of Columbia and most U.S. territories. Products are offered through affiliates that are licensed as insurance companies, health maintenance organizations (HMOs), or third-party administrators (TPAs). Large employer groups typically use self-funded arrangements where UnitedHealthcare Employer & Individual earns a service fee. Smaller employer groups and individuals are more likely to purchase risk-based products because they are less willing or unable to bear a greater potential liability for health care expenditures.

Through its risk-based product offerings, UnitedHealthcare Employer & Individual assumes the risk of both medical and administrative costs for its customers in return for a monthly premium, which is typically a fixed rate per individual served for a one-year period. When providing administrative and other management services to customers that elect to self-fund the health care costs of their employees and employees' dependents, UnitedHealthcare Employer & Individual receives a fixed monthly service fee per individual served. These customers retain the risk of financing medical benefits for their employees and employees' dependents, while UnitedHealthcare Employer & Individual provides services such as coordination and facilitation of medical and related services to customers, consumers and health care professionals, administration of transaction processing and access to a contracted network of physicians, hospitals and other health care professionals, including dental and vision.

The consolidated purchasing capacity represented by the individuals served by UnitedHealth Group makes it possible for UnitedHealthcare Employer & Individual to contract for cost-effective access to a large number of conveniently located care professionals and facilities. UnitedHealthcare Employer & Individual has relationships with network care providers that integrate data and analytics, implement value-based payments and care management programs, and enable us to jointly better manage health care and improve quality across populations.

UnitedHealthcare Employer & Individual typically distributes its products through consultants or direct sales in the larger employer and public sector segments. In the smaller group segment of the commercial marketplace,

UnitedHealthcare Employer & Individual's distribution system consists primarily of direct sales and sales through collaboration with brokers and agents. UnitedHealthcare Employer & Individual also distributes products through wholesale agents or agencies that contract with health insurance carriers to distribute individual or group benefits and provide other related services to their customers. In addition, UnitedHealthcare Employer & Individual distributes its products through professional employer organizations, associations and through both multi-carrier and its own proprietary private exchange marketplaces.

UnitedHealthcare Employer & Individual's diverse product portfolio offers employers a continuum of benefit designs, price points and approaches to consumer engagement, which provides the flexibility to meet a full spectrum of their coverage needs.

UnitedHealthcare Employer & Individual's major product families include:

Traditional Products. Traditional products include a full range of medical benefits and network options from managed plans, such as Choice and Options PPO, to more traditional indemnity products. The plans offer a full spectrum of covered services, including preventive care, direct access to specialists and catastrophic protection.

Consumer Engagement Products. Consumer engagement products couple plan design with financial accounts to increase individuals' responsibility for their health and well-being. This suite of products includes high-deductible consumer-driven benefit plans, which include health reimbursement accounts (HRAs), health savings accounts (HSAs) and consumer engagement services such as personalized behavioral incentive programs and consumer education. During 2017, more than 50,000 employer-sponsored benefit plans, including nearly 400 employers in the large group self-funded market, purchased HRA or HSA health benefit products from us.

Clinical and Pharmacy Products. UnitedHealthcare Employer & Individual offers a comprehensive suite of clinical and pharmacy care services products, which complement its service offerings by improving quality of care, engaging members and providing cost-saving options. All UnitedHealthcare Employer & Individual members are provided access to clinical products that help them make better health care decisions and better use of their medical benefits, which contribute to improved health and lowered medical expenses.

Each medical plan has a core set of clinical programs embedded in the offering, with additional services available depending on offering type (risk-based or self-funded), line of business (e.g., small business, key accounts, public sector, national accounts or individuals) and clinical need. UnitedHealthcare Employer & Individual's clinical programs include:

- wellness programs;
- decision support;
- utilization management;
- case and disease management;
- complex condition management;
- on-site programs, including biometrics and flu shots;
- incentives to reinforce positive behavior change;
- mental health/substance use disorder management; and
- employee assistance programs.

UnitedHealthcare Employer & Individual's comprehensive and integrated pharmaceutical care services promote lower costs by using formulary programs to produce better unit costs, encouraging consumers to use drugs that offer improved value and outcomes, helping consumers take actions to improve their health and supporting the appropriate use of drugs based on clinical evidence through physician and consumer education programs.

Specialty Offerings. UnitedHealthcare Employer & Individual also delivers dental, vision, life, critical illness and disability product offerings through an integrated approach, using its network of more than 22,000 vision offices and more than 85,000 dental offices, in private and retail settings.

UnitedHealthcare Military & Veterans. UnitedHealthcare Military & Veterans was the provider of health care services for nearly 3 million active duty and retired military service members and their families under the Department of Defense's (DoD) TRICARE Managed Care Support contract that concluded on January 1, 2018.

UnitedHealthcare Medicare & Retirement

UnitedHealthcare Medicare & Retirement provides health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services, as well as services dealing with chronic disease and other specialized issues common among older individuals. UnitedHealthcare Medicare & Retirement is fully dedicated to serving this growing senior market segment, providing products and services in all 50 states, the District of Columbia and most U.S. territories. UnitedHealthcare Medicare & Retirement has distinct pricing, underwriting, clinical program management and marketing capabilities dedicated to health products and services in this market.

UnitedHealthcare Medicare & Retirement offers a selection of products that allow people to obtain the health coverage and services they need as their circumstances change. UnitedHealthcare Medicare & Retirement is positioned to serve seniors who find that affordable, network-based care provided through Medicare Advantage plans meets their unique health care needs. For those who prefer traditional fee-for-service Medicare, UnitedHealthcare Medicare & Retirement offers both Medicare Supplement and Medicare Prescription Drug Benefit (Medicare Part D) prescription drug programs that supplement their government-sponsored Medicare by providing additional benefits and coverage options. Beneficiaries with special needs are served through UnitedHealthcare Medicare & Retirement Dual, Chronic and Institutional Special Needs Plans (SNPs) in many markets. UnitedHealthcare Medicare & Retirement services include care management and clinical management programs, a nurse health line service, 24-hour access to health care information, access to discounted health services from a network of care providers and administrative services.

UnitedHealthcare Medicare & Retirement has extensive distribution capabilities and experience, including direct marketing to consumers on behalf of its key clients: AARP, the nation's largest membership organization dedicated to the needs of people age 50 and over, and state and U.S. government agencies. Products are also offered through employer groups and agent channels.

UnitedHealthcare Medicare & Retirement's major product categories include:

Medicare Advantage. UnitedHealthcare Medicare & Retirement provides health care coverage for seniors and other eligible Medicare beneficiaries primarily through the Medicare Advantage program administered by the Centers for Medicare & Medicaid Services (CMS), including Medicare Advantage HMO plans, preferred provider organization (PPO) plans, Point-of-Service plans, Private-Fee-for-Service plans and SNPs. Under the Medicare Advantage program, UnitedHealthcare Medicare & Retirement provides health insurance coverage in exchange for a fixed monthly premium per member from CMS plus, in some cases, monthly consumer premiums. Premium amounts received from CMS vary based on the geographic areas in which members reside; demographic factors such as age, gender and institutionalized status; and the health status of the individual. Medicare Advantage plans are designed to compete at the local level, taking into account member and care provider preferences, competitor offerings, our quality and cost initiatives, our historical financial results and the long-term payment rate outlook for each geographic area. UnitedHealthcare Medicare & Retirement served 4.4 million people through its Medicare Advantage products as of December 31, 2017.

Built on more than 20 years of experience, UnitedHealthcare Medicare & Retirement's senior-focused care management model operates at a medical cost level below that of traditional Medicare, while helping seniors live

healthier lives. Through UnitedHealth Group's HouseCalls program, nurse practitioners performed nearly 1.3 million in-home preventive care visits in 2017 to address unmet care opportunities and close gaps in care. For high-risk patients in certain care settings and programs, UnitedHealthcare Medicare & Retirement uses proprietary, automated medical record software that enables clinical care teams to capture and track patient data and clinical encounters, creating a comprehensive set of care information that bridges across home, hospital and nursing home care settings. Proprietary predictive modeling tools help identify people at high risk and allow care managers to create individualized care plans that help them obtain the right care, in the right place, at the right time.

Medicare Part D. UnitedHealthcare Medicare & Retirement provides Medicare Part D benefits to beneficiaries throughout the United States and its territories through its Medicare Advantage and stand-alone Medicare Part D plans. The stand-alone Medicare Part D plans address a large spectrum of beneficiaries' needs and preferences for their prescription drug coverage, including low cost prescription options. Each of the plans includes the majority of the drugs covered by Medicare and provides varying levels of coverage to meet the diverse needs of Medicare beneficiaries. As of December 31, 2017, UnitedHealthcare enrolled 8.9 million people in the Medicare Part D programs, including 4.9 million individuals in the stand-alone Medicare Part D plans with the remainder in Medicare Advantage plans incorporating Medicare Part D coverage.

Medicare Supplement. UnitedHealthcare Medicare & Retirement is currently serving 4.9 million seniors nationwide through various Medicare Supplement products in association with AARP. UnitedHealthcare Medicare & Retirement offers a full range of supplemental products at a diversity of price points. These products cover various levels of coinsurance and deductible gaps that seniors are exposed to in the traditional Medicare program.

Premium revenues from CMS represented 28% of UnitedHealth Group's total consolidated revenues for the year ended December 31, 2017, most of which were generated by UnitedHealthcare Medicare & Retirement.

UnitedHealthcare Community & State

UnitedHealthcare Community & State is dedicated to serving state programs that care for the economically disadvantaged, the medically underserved and those without the benefit of employer-funded health care coverage, in exchange for a monthly premium per member from the state program. In some cases, these premiums are subject to experience or risk adjustments. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, Children's Health Insurance Programs (CHIP), SNPs, integrated Medicare-Medicaid plans (MMP) and other federal, state and community health care programs. As of December 31, 2017, UnitedHealthcare Community & State participated in programs in 28 states and the District of Columbia, and served 6.7 million beneficiaries; including more than 1.1 million people through Medicaid expansion programs in 16 states under the Patient Protection and Affordable Care Act (ACA).

States using managed care services for Medicaid beneficiaries select health plans by using a formal bid process or by awarding individual contracts. A number of factors are considered by UnitedHealthcare Community & State when choosing programs for participation, including the state's commitment and consistency of support for its Medicaid managed care program in terms of service, innovation and funding; the eligible population base, both immediate and long term; and the structure of the projected program. UnitedHealthcare Community & State works with its state customers to advocate for actuarially sound rates, commensurate with medical cost trends.

The primary categories of eligibility for the programs served by UnitedHealthcare Community & State and its participation are:

- Temporary Assistance to Needy Families, primarily women and children – 26 markets;
- CHIP – 25 markets;
- Aged, Blind and Disabled – 22 markets;

- SNP – 20 markets;
- Medicaid Expansion – 16 markets;
- Long-Term Services and Supports – 14 markets;
- MMP – 2 markets; and
- other programs (e.g., administrative services, childless adults, developmentally disabled) – 9 markets.

These health plans and care programs offered are designed to address the complex needs of the populations they serve, including the chronically ill, those with disabilities and people with a higher risk of medical, behavioral and social conditions. UnitedHealthcare Community & State administers benefits for the unique needs of children, pregnant women, adults, seniors and those who are institutionalized or are nursing home eligible. These individuals often live in areas that are medically underserved and are less likely to have a consistent relationship with the medical community or a care provider. These individuals also tend to face significant social and economic challenges.

UnitedHealthcare Community & State leverages the national capabilities of UnitedHealth Group locally, supporting effective care management, strong regulatory partnerships, greater administrative efficiency, improved clinical outcomes and the ability to adapt to a changing national and local market environment. UnitedHealthcare Community & State coordinates resources among family, physicians, other health care providers, and government and community-based agencies and organizations to facilitate continuous and effective care and often addresses other social determinants that can impact people's health status and health system usage.

Approximately 75% of the people in state Medicaid programs are served by managed care, but this population represents only 40% of total Medicaid spending. UnitedHealthcare Community & State's business development opportunities include entering fee-for-service markets converting to managed care, which represents a population of nearly 8 million people; and growing in existing managed care markets, including state expansions to populations with more complex needs requiring more sophisticated models of care. This expansion includes integrated management of physical, behavioral, long-term care services and supports, and social services by applying strong data analytics and community-based collaboration.

UnitedHealthcare Community & State continues to evolve its clinical model to enhance quality and the clinical experience for the people it serves. The model allows UnitedHealthcare Community & State to quickly identify the people who could benefit most from more highly coordinated care; typically, the 5% of members who are most at risk and drive over 50% of states' medical costs.

UnitedHealthcare Global

UnitedHealthcare Global serves more than 4 million people with medical benefits and 2 million with dental benefits, residing principally in Brazil, but also in more than 130 other countries. UnitedHealthcare Global owns and operates nearly 150 hospitals, specialty centers, primary care and emergency services clinics in Brazil and Portugal. UnitedHealthcare Global provides a comprehensive range of health and mobilization capabilities and supports the health systems of individual nations with support for improving health care financing and delivery. Clients include multi-national and local businesses, governments and individuals around the world.

Global Markets. UnitedHealthcare Global serves local populations in select markets around the world, primarily in Brazil and Portugal, by touching nearly every aspect of health care and leveraging expertise in clinical care management and health care data to improve outcomes, raise quality and constrain costs.

In Brazil, Amil provides health benefits to 4 million people through a broad network of owned and affiliated clinics, hospitals and care providers. Dental benefits are also provided to 2 million people. Amil's members have

access to both an owned care delivery system, as well as a contracted provider network of nearly 21,000 physicians and other health care professionals, approximately 1,800 hospitals and nearly 7,000 laboratories and diagnostic imaging centers. Americas Serviços Médicos offers health care delivery in Brazil through hospitals, ambulatory clinics and surgery centers to Amil members and the external payer market.

Lusíadas Saúde provides clinical services in Portugal through an owned network of hospitals and outpatient clinics.

Global Solutions. UnitedHealthcare Global includes other diversified global health services with a variety of offerings for international customers, including:

- Global Insurance, which offers expatriate insurance solution for globally mobile employees and their families;
- Assistance and Risk provides a global medical network and evacuation services;
- Global Medical provides remote medical services, telemedicine, supplies and equipment, and end-to-end remote medical services; and
- U.S. Networks assists foreign insurers and employers navigating the U.S. health care system.

Optum

Optum is a health services business serving the broad health care marketplace, including:

- Those who need care: the consumers who need the right support, information, resources and products to achieve their health goals.
- Those who provide care: pharmacies, hospitals, physicians, practices and other health care facilities seeking to modernize the health system and support the best possible patient care and experiences.
- Those who pay for care: employers, health plans, and state, federal and municipal agencies devoted to ensuring the populations they sponsor receive high-quality care, administered and delivered efficiently and effectively.
- Those who innovate for care: global life sciences organizations dedicated to developing more effective approaches to care, enabling technologies and medicines that improve care delivery and health outcomes.

Optum operates three business segments leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations:

- OptumHealth focuses on care delivery, care management, wellness and consumer engagement, and health financial services;
- OptumInsight specializes in data and analytics and other health care information technology services, and delivers operational services and support; and
- OptumRx provides pharmacy care services.

OptumHealth

OptumHealth is a diversified health and wellness business serving the physical, emotional and health-related financial needs of 91 million unique individuals. OptumHealth enables population health management through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth products and services deliver value by improving quality and patient satisfaction while lowering cost. OptumHealth builds high-performing networks and centers of excellence across the care continuum, by working directly with physicians to advance population health management and by coordinating care for the most medically complex patients.

OptumHealth serves patients and care providers through its local ambulatory care services business and delivers care through a physician-led, patient-centric and data-driven organization comprised of more than 30,000 employed, managed and contracted physicians. OptumHealth also enables care providers' transition from traditional, fee-for-service care delivery to performance-based delivery and payment models that put patient health and outcomes first, such as those emerging through accountable care organizations (ACOs) and local care provider partnerships. Through strategic partnerships, alliances and ownership arrangements OptumHealth helps care providers adopt new approaches and technologies that improve the coordination of care across all providers involved in patient care. MedExpress' over 240 neighborhood care centers provide urgent and walk-in care services with a consumer-friendly approach and Surgical Care Affiliates' 200 independent ambulatory surgical centers and surgical hospitals provide high-value surgical services at a lower cost than a traditional in-patient hospital setting.

OptumHealth's mobile care delivery business delivers occupational health and medical services to government customers, with a particular focus on the U.S. military.

OptumHealth serves people through population health management services that meet both the preventive care and health intervention needs of consumers across the care continuum—physical health and wellness, mental health, complex medical conditions, disease management, hospitalization and post-acute care. This includes offering access to proprietary networks of provider specialists in many clinical specialties, including behavioral health, organ transplant, chiropractic and physical therapy. OptumHealth engages consumers in managing their health, including guidance, tools and programs that help them achieve their health goals and maintain healthy lifestyles.

Optum Financial Services, through Optum Bank, a wholly-owned subsidiary, serves consumers through 4.8 million health savings and other accounts with over $8 billion in assets under management as of December 31, 2017. During 2017, Optum Bank processed nearly $150 billion in medical payments to physicians and other health care providers. Organizations across the health system rely on Optum to manage and improve payment flows through its highly automated, scalable, electronic payment systems.

OptumHealth offers its products on a risk basis, where it assumes responsibility for health care costs in exchange for a monthly premium per individual served, on an administrative fee basis, under which it manages or administers delivery of the products or services in exchange for a fixed monthly fee per individual served, or on a fee-for-service basis, where it delivers medical services to patients in exchange for a contracted fee. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds.

OptumHealth sells its products primarily through its direct sales force, strategic collaborations and external producers in three markets: employers (which includes the sub-markets of large, mid-sized and small employers), payers (which includes the sub-markets of health plans, TPAs, underwriter/stop-loss carriers and individual market intermediaries) and government entities (which includes states, CMS, DoD, the Veterans Administration and other federal procurement agencies).

OptumInsight

OptumInsight provides services, technology and health care expertise to major participants in the health care industry. OptumInsight's capabilities are focused on data and analytics, technology and information that help improve the quality of care and drive greater efficiency in the health care system. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, advance quality, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.

Many of OptumInsight's software and information products and professional services are delivered over extended periods, often several years. OptumInsight maintains an order backlog to track unearned revenues under

these long-term arrangements. The backlog consists of estimated revenue from signed contracts, other legally binding agreements and anticipated contract renewals based on historical experience with OptumInsight's customers. OptumInsight's aggregate backlog at December 31, 2017, was $15.0 billion, of which $8.3 billion is expected to be realized within the next 12 months. This includes $5.4 billion related to intersegment agreements, all of which are in the current portion of the backlog. OptumInsight's aggregate backlog at December 31, 2016, was $12.6 billion. OptumInsight cannot provide any assurance that it will be able to realize all of the revenues included in the backlog due to uncertainties with regard to the timing and scope of services and the potential for cancellation, non-renewal or early termination of service arrangements.

OptumInsight's products and services are sold primarily through a direct sales force. OptumInsight's products are also supported and distributed through an array of alliances and business partnerships with other technology vendors, who integrate and interface OptumInsight's products with their applications.

OptumInsight believes it is well positioned to address the needs of four primary market segments: care providers (e.g., physicians and hospital systems), health plans, governments and life sciences companies.

Care Providers. Serving more than four out of five U.S. hospitals and more than 100,000 physicians, OptumInsight assists care providers in meeting their challenge to improve patient outcomes and care amid changing payment models and pressures. OptumInsight brings a broad array of solutions to help care providers meet these challenges, with particular focus on clinical performance and quality improvement, population health management, data management and analytics, revenue management, cost containment, compliance, cloud-enabled collaboration and consumer engagement.

Health Plans. OptumInsight serves approximately 300 health plans through cost-effective, technology-enabled solutions that help them improve efficiency, understand and optimize growth while managing risk, deliver on clinical performance and compliance goals, and build and manage strong networks of care.

Governments. OptumInsight provides services tailored to government payers, including data and analytics technology, claims management and payment accuracy services, and strategic consulting.

Life Sciences. OptumInsight provides services to global life sciences companies. These companies look to OptumInsight for data, analytics and expertise in core areas of health economics and outcomes research, market access consulting, integrated clinical and health care claims data and informatics services, epidemiology and drug safety, and patient reported outcomes.

OptumRx

OptumRx provides a full spectrum of pharmacy care services to more than 65 million people in the United States through its network of more than 67,000 retail pharmacies, multiple home delivery and specialty pharmacies and through the provision of home infusion services. OptumRx's comprehensive whole-person approach to pharmacy care services integrates demographic, medical, laboratory, pharmaceutical and other clinical data and applies analytics to drive clinical care insight to support care treatments and compliance, benefiting clients and individuals through enhanced services, elevated clinical quality and cost trend management.

In 2017, OptumRx managed approximately $85 billion in pharmaceutical spending, including $35 billion in specialty pharmaceutical spending.

OptumRx provides pharmacy care services to a number of health plans, including a substantial majority of UnitedHealthcare members, large national employer plans, unions and trusts and government entities. OptumRx's distribution system consists primarily of health insurance brokers and other health care consultants and direct sales.

As of December 31, 2017, OptumRx operated four home delivery pharmacies in the United States, which provides patients with access to maintenance medications and enables OptumRx to manage clients' drug costs through operating efficiencies and economies of scale. As of December 31, 2017, OptumRx's specialty pharmacy operations included 16 specialty mail order pharmacies located throughout the United States that are used for delivery of advanced medications to individuals with chronic or genetic diseases and disorders.

OptumRx offers multiple clinical programs and services to help clients manage overall pharmacy and health care costs in a clinically appropriate manner, which are designed to promote good health outcomes, and to help target inappropriate utilization and non-adherence to medication, each of which may result in adverse medical events that negatively impact member health and client pharmacy and medical spend. OptumRx provides various utilization management, medication management, quality assurance, adherence and counseling programs to complement the client's plan design and clinical strategies. OptumRx offers a distinctive approach to integrating the management of medical and pharmaceutical care, using data and advanced analytics to help improve comprehensive decision-making, elevate quality, close gaps in care and reduce costs for customers and members.

GOVERNMENT REGULATION

Most of our businesses are subject to comprehensive federal, state and international laws and regulations. We are regulated by federal, state and international regulatory agencies that generally have discretion to issue regulations and interpret and enforce laws and rules. The regulations can vary significantly from jurisdiction to jurisdiction and the interpretation of existing laws and rules also may change periodically. Domestic and international governments continue to enact and consider various legislative and regulatory proposals that could materially impact certain aspects of the health care system. New laws, regulations and rules, or changes in the interpretation of existing laws, regulations and rules, including as a result of changes in the political climate, could adversely affect our business.

If we fail to comply with, or fail to respond quickly and appropriately to changes in, applicable laws, regulations and rules, our business, results of operations, financial position and cash flows could be materially and adversely affected. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to our compliance with federal, state and international laws and regulations.

Federal Laws and Regulation

We are subject to various levels of U.S. federal regulation. For example, when we contract with the federal government, we are subject to federal laws and regulations relating to the award, administration and performance of U.S. government contracts. CMS regulates our UnitedHealthcare businesses and certain aspects of our Optum businesses. Payments by CMS to our businesses are subject to regulations, including those governing fee-for-service and the submission of information relating to the health status of enrollees for purposes of determining the amounts of certain payments to us. CMS also has the right to audit our performance to determine our compliance with CMS contracts and regulations and the quality of care we provide to Medicare beneficiaries. Our commercial business is further subject to CMS audits related to medical loss ratios (MLRs) and risk adjustment data.

UnitedHealthcare Community & State has Medicaid and CHIP contracts that are subject to federal regulations regarding services to be provided to Medicaid enrollees, payment for those services and other aspects of these programs. There are many regulations affecting Medicare and Medicaid compliance and the regulatory environment with respect to these programs is complex. We are also subject to federal law and regulations relating to the administration of contracts with federal agencies. In addition, our business is subject to laws and regulations relating to consumer protection, anti-fraud and abuse, anti-kickbacks, false claims, prohibited referrals, inappropriately reducing or limiting health care services, anti-money laundering, securities and antitrust.

The Tax Cuts and Jobs Act. On December 22, 2017, the U.S. federal government enacted a tax bill (Tax Cuts and Jobs Act or Tax Reform). The Tax Cuts and Jobs Act changed existing United States tax law and includes numerous provisions that will affect our results of operations, financial position and cash flows. For instance, Tax Reform reduced the U.S. corporate income tax rate and changed business-related exclusions and deductions and credits.

Privacy, Security and Data Standards Regulation. The administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996, as amended (HIPAA), apply to both the group and individual health insurance markets, including self-funded employee benefit plans. Federal regulations related to HIPAA contain minimum standards for electronic transactions and code sets and for the privacy and security of protected health information.

The Health Information Technology for Economic and Clinical Health Act (HITECH) imposed requirements on uses and disclosures of health information; included contracting requirements for HIPAA business associate agreements; extended parts of HIPAA privacy and security provisions to business associates; added federal data breach notification requirements for covered entities and business associates and reporting requirements to the U.S. Department of Health and Human Services (HHS) and the Federal Trade Commission and, in some cases, to the local media; strengthened enforcement and imposed higher financial penalties for HIPAA violations and, in certain cases, imposed criminal penalties for individuals, including employees. In the conduct of our business, depending on the circumstances, we may act as either a covered entity or a business associate. Federal consumer protection laws may also apply in some instances to privacy and security practices related to personally identifiable information.

The use and disclosure of individually identifiable health data by our businesses is also regulated in some instances by other federal laws, including the Gramm-Leach-Bliley Act (GLBA) or state statutes implementing GLBA. These federal laws and state statutes generally require insurers to provide customers with notice regarding how their non-public personal health and financial information is used and the opportunity to “opt out” of certain disclosures before the insurer shares such information with a third party, and generally require safeguards for the protection of personal information. Neither the GLBA nor HIPAA privacy regulations preempt more stringent state laws and regulations that may apply to us, as discussed below.

ERISA. The Employee Retirement Income Security Act of 1974, as amended (ERISA), regulates how our services are provided to or through certain types of employer-sponsored health benefit plans. ERISA is a set of laws and regulations that is subject to periodic interpretation by the U.S. Department of Labor (DOL) as well as the federal courts. ERISA sets forth standards on how our business units may do business with employers who sponsor employee health benefit plans, particularly those that maintain self-funded plans. Regulations established by the DOL subject us to additional requirements for administration of benefits, claims payment and member appeals under health care plans governed by ERISA.

State Laws and Regulation

Health Care Regulation. Our insurance and HMO subsidiaries must be licensed by the jurisdictions in which they conduct business. All of the states in which our subsidiaries offer insurance and HMO products regulate those products and operations. The states require periodic financial reports and establish minimum capital or restricted cash reserve requirements. The National Association of Insurance Commissioners has adopted model regulations that, where adopted by states, require expanded governance practices and risk and solvency assessment reporting. Most states have adopted these or similar measures to expand the scope of regulations relating to corporate governance and internal control activities of HMOs and insurance companies. We are required to maintain a risk management framework and file a confidential self-assessment report with state insurance regulators. Reports are filed annually with Connecticut, our lead regulator, and with New York, as required by that state’s regulation. Certain states have also adopted their own regulations for minimum MLRs with which health plans must comply. In addition, a number of state legislatures have enacted or are

contemplating significant reforms of their health insurance markets, either independent of or to comply with or be eligible for grants or other incentives in connection with the ACA, which may affect our operations and our financial results.

Health plans and insurance companies are regulated under state insurance holding company regulations. Such regulations generally require registration with applicable state departments of insurance and the filing of reports that describe capital structure, ownership, financial condition, certain intercompany transactions and general business operations. Most state insurance holding company laws and regulations require prior regulatory approval of acquisitions and material intercompany transfers of assets, as well as transactions between the regulated companies and their parent holding companies or affiliates. These laws may restrict the ability of our regulated subsidiaries to pay dividends to our holding companies.

Some of our business activity is subject to other health care-related regulations and requirements, including PPO, Managed Care Organization (MCO), utilization review (UR), TPA, pharmacy care services, durable medical equipment or care provider-related regulations and licensure requirements. These regulations differ from state to state and may contain network, contracting, product and rate, licensing and financial and reporting requirements. There are laws and regulations that set specific standards for delivery of services, appeals, grievances and payment of claims, adequacy of health care professional networks, fraud prevention, protection of consumer health information, pricing and underwriting practices and covered benefits and services. State health care anti-fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services and improper marketing. Certain of our businesses are subject to state general agent, broker and sales distributions laws and regulations. UnitedHealthcare Community & State and certain of our Optum businesses are subject to regulation by state Medicaid agencies that oversee the provision of benefits to our Medicaid and CHIP beneficiaries and to our dually eligible (for Medicare and Medicaid) beneficiaries. We also contract with state governmental entities and are subject to state laws and regulations relating to the award, administration and performance of state government contracts.

State Privacy and Security Regulations. A number of states have adopted laws and regulations that may affect our privacy and security practices, such as state laws that govern the use, disclosure and protection of social security numbers and protected health information or that are designed to implement GLBA or protect credit card account data. State and local authorities increasingly focus on the importance of protecting individuals from identity theft, with a significant number of states enacting laws requiring businesses to meet minimum cyber-security standards and notify individuals of security breaches involving personal information. State consumer protection laws may also apply to privacy and security practices related to personally identifiable information, including information related to consumers and care providers. Different approaches to state privacy and insurance regulation and varying enforcement philosophies in the different states may materially and adversely affect our ability to standardize our products and services across state lines. See Part I, Item 1A, “Risk Factors” for a discussion of the risks related to compliance with state privacy and security regulations.

Corporate Practice of Medicine and Fee-Splitting Laws. Certain of our businesses function as direct medical service providers and, as such, are subject to additional laws and regulations. Some states have corporate practice of medicine laws that prohibit specific types of entities from practicing medicine or employing physicians to practice medicine. Moreover, some states prohibit certain entities from sharing in the fees or revenues of a professional practice (fee-splitting). These prohibitions may be statutory or regulatory, or may be imposed through judicial or regulatory interpretation. The laws, regulations and interpretations in certain states have been subject to limited judicial and regulatory interpretation and are subject to change.

Pharmacy and PBM Regulations

OptumRx’s businesses include home delivery and specialty pharmacies that must be licensed as pharmacies in the states in which they are located. Certain of our home delivery and specialty pharmacies must also register with the U.S. Drug Enforcement Administration (DEA) and individual state controlled substance authorities to

dispense controlled substances. In addition to the laws and regulations in the states where our home delivery and specialty pharmacies are located, laws and regulations in non-resident states where we deliver pharmaceuticals may also apply, including those requiring us to register with the board of pharmacy in the non-resident state. These non-resident states generally expect our home delivery and specialty pharmacies to follow the laws of the state in which the pharmacies are located, but some states also require us to comply with the laws of that non-resident state when pharmaceuticals are delivered there. As certain of our home delivery and specialty pharmacies maintain eligibility as Medicare and state Medicaid providers, their participation in the programs requires them to comply with the applicable Medicare and Medicaid provider rules and regulations. Other laws and regulations affecting our home delivery and specialty pharmacies include federal and state statutes and regulations governing the labeling, packaging, advertising and adulteration of prescription drugs and dispensing of controlled substances. See Part I, Item 1A, “Risk Factors” for a discussion of the risks related to our pharmacy care services businesses.

Legislation seeking to regulate PBM activities introduced or enacted in a number of states could impact our business practices. Additionally, organizations like the National Association of Insurance Commissioners periodically issue model regulations and credentialing organizations, like the National Committee for Quality Assurance (NCQA) and the Utilization Review Accreditation Commission (URAC), may establish standards that impact PBM, mail or specialty pharmacy activities. While these model regulations and standards do not have the force of law, they may influence states to adopt their recommendations and impact the services we deliver to our clients. There is both federal and state legislation affecting the ability to limit access to a pharmacy provider network or remove network providers. Additionally, many states limit our ability to manage and establish maximum allowable costs for generic prescription drugs. With respect to formulary services, a number of government entities, including CMS, HHS and state departments of insurance, regulate the administration of prescription drug benefits offered through federal or state exchanges. Many states also regulate the scope of prescription drug coverage, as well as the delivery channels to receive such prescriptions, for insurers, MCOs and Medicaid managed care plans. These regulations could limit or preclude (i) certain plan designs, (ii) limited networks, (iii) requirements to use particular care providers or distribution channel, (iv) copayment differentials among providers and (v) formulary tiering practices.

Consumer Protection Laws

Certain of our businesses participate in direct-to-consumer activities and are subject to regulations applicable to on-line communications and other general consumer protection laws and regulations such as the Federal Tort Claims Act, the Federal Postal Service Act and the Federal Trade Commission‘s (FTC) Telemarketing Sales Rule. Most states also have similar consumer protection laws.

Certain laws, such as the Telephone Consumer Protection Act, give the FTC, Federal Communications Commission (“FCC”) and state attorneys general the ability to regulate, and bring enforcement actions relating to, telemarketing practices and certain automated outbound contacts such as phone calls, texts or emails. Under certain circumstances, these laws may provide consumers with a private right of action. Violations of these laws could result in substantial statutory penalties and other sanctions.

Banking Regulation

Optum Bank is subject to regulation by federal banking regulators, including the Federal Deposit Insurance Corporation, which performs annual examinations to ensure that the bank is operating in accordance with federal safety and soundness requirements, and the Consumer Financial Protection Bureau, which may perform periodic examinations to ensure that the bank is in compliance with applicable consumer protection statutes, regulations and agency guidelines. Optum Bank is also subject to supervision and regulation by the Utah State Department of Financial Institutions, which carries out annual examinations to ensure that the bank is operating in accordance with state safety and soundness requirements and performs periodic examinations of the bank’s compliance with applicable state banking statutes, regulations and agency guidelines. In the event of unfavorable examination

results from any of these agencies, the bank could become subject to increased operational expenses and capital requirements, enhanced governmental oversight and monetary penalties.

International Regulation

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes vary from jurisdiction to jurisdiction. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the Foreign Corrupt Practices Act (FCPA), which prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage.

COMPETITION

As a diversified health care company, we operate in highly competitive markets. Our competitors include managed health care companies, insurance companies, HMOs, TPAs, PBMs and business services outsourcing companies, health care professionals that have formed networks to contract directly with employers or with CMS, specialty benefit providers, government entities, population health management companies and various health information and consulting companies. For our UnitedHealthcare businesses, our competitors include Aetna Inc., Anthem, Inc., Centene Corporation, Cigna Corporation, Humana Inc., Kaiser Permanente, numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross Blue Shield Association and, with respect to our Brazilian operations, several established competitors in Brazil and other enterprises that serve more limited geographic areas. For our OptumRx businesses, our competitors include CVS Health Corporation, Express Scripts, Inc. and Prime Therapeutics LLC. New entrants into the markets in which we compete, as well as consolidation within these markets, also contribute to a competitive environment. We compete on the basis of the sales, marketing and pricing of our products and services; product innovation; consumer engagement and satisfaction; the level and quality of products and services; care delivery; network and clinical management capabilities; market share; product distribution systems; efficiency of administration operations; financial strength; and marketplace reputation. If we fail to compete effectively to maintain or increase our market share, including by maintaining or increasing enrollments in businesses providing health benefits, our results of operations, financial position and cash flows could be materially and adversely affected. See Part I, Item 1A, “Risk Factors,” for additional discussion of our risks related to competition.

INTELLECTUAL PROPERTY RIGHTS

We have obtained trademark registration for the UnitedHealth Group, UnitedHealthcare and Optum names and logos. We own registrations for certain of our other trademarks in the United States and abroad. We hold a portfolio of patents and have patent applications pending from time to time. We are not substantially dependent on any single patent or group of related patents.

Unless otherwise noted, trademarks appearing in this report are trademarks owned by us. We disclaim any proprietary interest in the marks and names of others.

EMPLOYEES

As of December 31, 2017, we employed 260,000 individuals.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following sets forth certain information regarding our executive officers as of February 13, 2018, including the business experience of each executive officer during the past five years:

Name	Age	Position
Stephen J. Hemsley	65	Executive Chair of the Board
David S. Wichmann	55	Chief Executive Officer
Steven H. Nelson	58	Executive Vice President; Chief Executive Officer of UnitedHealthcare
Larry C. Renfro	64	Vice Chairman; Chief Executive Officer of Optum
John F. Rex	55	Executive Vice President; Chief Financial Officer
Thomas E. Roos	45	Senior Vice President; Chief Accounting Officer
Marianne D. Short	66	Executive Vice President; Chief Legal Officer
D. Ellen Wilson	60	Executive Vice President, Human Capital

Our Board of Directors elects executive officers annually. Our executive officers serve until their successors are duly elected and qualified, or until their earlier death, resignation, removal or disqualification.

Mr. Hemsley is Executive Chair of the Board of UnitedHealth Group and has served in that capacity since September 2017. Mr. Hemsley previously served as Chief Executive Officer from 2006 to August 2017. He has been a member of the Board of Directors since 2000.

Mr. Wichmann is Chief Executive Officer of UnitedHealth Group and a member of the Board of Directors and has served in that capacity since September 2017. Mr. Wichmann previously served as President of UnitedHealth Group from November 2014 to August 2017. Mr. Wichmann also served as Chief Financial Officer of UnitedHealth Group from January 2011 to June 2016. From April 2008 to November 2014, Mr. Wichmann served as Executive Vice President of UnitedHealth Group and President of UnitedHealth Group Operations.

Mr. Nelson is Executive Vice President of UnitedHealth Group and Chief Executive Officer of UnitedHealthcare and has served in that capacity since August 2017. Mr. Nelson served as Chief Executive Officer of UnitedHealthcare's Medicare & Retirement, from March 2014 to August 2017. He served as Chief Executive Officer of UnitedHealthcare Community & State from August 2012 to March 2014. From January 2008 to July 2012 he served as President of UnitedHealthcare Community & State and then Chief Executive Officer of UnitedHealthcare Employer & Individual's West Region business.

Mr. Renfro is Vice Chairman of UnitedHealth Group and Chief Executive Officer of Optum. Mr. Renfro has served as Vice Chairman of UnitedHealth Group since November 2014 and Chief Executive Officer of Optum since July 2011. From January 2011 to July 2011, Mr. Renfro served as Executive Vice President of UnitedHealth Group.

Mr. Rex is Executive Vice President and Chief Financial Officer of UnitedHealth Group and has served in that capacity since June 2016. From March 2012 to June 2016, Mr. Rex served as Executive Vice President and Chief Financial Officer of Optum. Prior to joining Optum in 2012, Mr. Rex spent over a decade at JP Morgan, a global financial services firm, and its predecessors, concluding his tenure as a Managing Director.

Mr. Roos is Senior Vice President and Chief Accounting Officer of UnitedHealth Group and has served in that capacity since August 2015. Prior to joining UnitedHealth Group, Mr. Roos was a Partner at Deloitte & Touche LLP, an independent registered accounting firm, from September 2007 to August 2015.

Ms. Short is Executive Vice President and Chief Legal Officer of UnitedHealth Group and has served in that capacity since January 2013. Prior to joining UnitedHealth Group, Ms. Short served as the Managing Partner at Dorsey & Whitney LLP, an international law firm, from January 2007 to December 2012.

Ms. Wilson is Executive Vice President, Human Capital of UnitedHealth Group and has served in that capacity since June 2013. From January 2012 to May 2013, Ms. Wilson served as Chief Administrative Officer of Optum. Prior to joining Optum, Ms. Wilson served for 17 years at Fidelity Investments, concluding her tenure there as head of Human Resources.

Additional Information

UnitedHealth Group Incorporated was incorporated in January 1977 in Minnesota. On July 1, 2015, UnitedHealth Group Incorporated changed its state of incorporation from Minnesota to Delaware pursuant to a plan of conversion. Our executive offices are located at UnitedHealth Group Center, 9900 Bren Road East, Minnetonka, Minnesota 55343; our telephone number is (952) 936-1300.

You can access our website at *www.unitedhealthgroup.com* to learn more about our company. From that site, you can download and print copies of our annual reports to shareholders, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, along with amendments to those reports. You can also download from our website our certificate of incorporation, bylaws and corporate governance policies, including our Principles of Governance, Board of Directors Committee Charters and Code of Conduct. We make periodic reports and amendments available, free of charge, on our website, as soon as reasonably practicable after we file or furnish these reports to the Securities and Exchange Commission (SEC). We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: UnitedHealth Group Incorporated, 9900 Bren Road East, Minnetonka, MN 55343, Attn: Corporate Secretary. Information on or linked to our website is neither part of nor incorporated by reference into this Annual Report on Form 10-K or any other SEC filings.

Our transfer agent, Wells Fargo Shareowner Services, can help you with a variety of shareholder-related services, including change of address, lost stock certificates, transfer of stock to another person and other administrative services. You can write to our transfer agent at: Wells Fargo Shareowner Services, P.O. Box 64854, St. Paul, Minnesota 55164-0854, email *stocktransfer@wellsfargo.com*, or telephone (800) 468-9716 or (651) 450-4064.

ITEM 1A. RISK FACTORS

CAUTIONARY STATEMENTS

The statements, estimates, projections or outlook contained in this Annual Report on Form 10-K include forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). When used in this Annual Report on Form 10-K and in future filings by us with the SEC, in our news releases, presentations to securities analysts or investors, and in oral statements made by or with the approval of one of our executive officers, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “forecast,” “outlook,” “plan,” “project,” “should” or similar words or phrases are intended to identify such forward-looking statements. These statements are intended to take advantage of the “safe harbor” provisions of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. Any forward-looking statement in this report speaks only as of the date of this report and, except as required by law; we undertake no obligation to update any forward-looking statement to reflect events or circumstances, including unanticipated events, after the date of this report.

The following discussion contains cautionary statements regarding our business that investors and others should consider. We do not undertake to address in future filings or communications regarding our business or results of operations how any of these factors may have caused our results to differ from discussions or information contained in previous filings or communications. In addition, any of the matters discussed below may have affected past, as well as current, forward-looking statements about future results. Any or all forward-looking statements in this Annual Report on Form 10-K and in any other public filings or statements we make may turn

out to be wrong. Our forward-looking statements can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. Many factors discussed below will be important in determining our future results. By their nature, forward-looking statements are not guarantees of future performance or results and are subject to risks, uncertainties and assumptions that are difficult to predict or quantify.

If we fail to estimate, price for and manage our medical costs in an effective manner, the profitability of our risk-based products and services could decline and could materially and adversely affect our results of operations, financial position and cash flows.

Through our risk-based benefit products, we assume the risk of both medical and administrative costs for our customers in return for monthly premiums. Premium revenues from risk-based benefits products comprise nearly 80% of our total consolidated revenues. We generally use approximately 80% to 85% of our premium revenues to pay the costs of health care services delivered to these customers. The profitability of our products depends in large part on our ability to predict, price for and effectively manage medical costs. In this regard, federal and state regulatory requirements obligate our commercial, Medicare Advantage and certain state-based Medicaid health plans to maintain minimum MLRs, which could make it more difficult for us to obtain price increases for our products. In addition, our OptumHealth business negotiates capitation arrangements with commercial third-party payers. Under the typical capitation arrangement, the health care provider receives a fixed percentage of a third-party payer's premiums to cover all or a defined portion of the medical costs provided to the capitated member. If we fail to predict accurately, price for or manage the costs of providing care to our capitated members, our results of operations could be materially and adversely affected.

We manage medical costs through underwriting criteria, product design, negotiation of favorable provider contracts and care management programs. Total medical costs are affected by the number of individual services rendered, the cost of each service and the type of service rendered. Our premium revenue on commercial policies and Medicaid contracts are typically based on a fixed monthly rate per individual served for a 12-month period and is generally priced one to six months before the contract commences. Our revenue on Medicare policies is based on bids submitted to CMS in June the year before the contract year. Although we base the commercial and Medicaid premiums we charge and our Medicare bids on our estimates of future medical costs over the fixed contract period, many factors may cause actual costs to exceed those estimated and reflected in premiums or bids. These factors may include medical cost inflation, increased use of services, increased cost of individual services, natural catastrophes or other large-scale medical emergencies, epidemics, the introduction of new or costly drugs, treatments and technology, new treatment guidelines, new mandated benefits (such as the expansion of essential benefits coverage) or other regulatory changes and insured population characteristics. Relatively small differences between predicted and actual medical costs or utilization rates as a percentage of revenues can result in significant changes in our financial results. For example, if our 2017 medical costs for commercial insured products were 1% higher, without proportionally higher revenues from such products, our annual net earnings for 2017 would have been reduced by approximately $235 million, excluding any offsetting impact from risk adjustment or from reduced premium rebates due to minimum MLRs.

In addition, the financial results we report for any particular period include estimates of costs that have been incurred for which claims are still outstanding. These estimates involve an extensive degree of judgment. If these estimates prove inaccurate, our results of operations could be materially and adversely affected.

Our business activities are highly regulated and new laws or regulations or changes in existing laws or regulations or their enforcement or application could materially and adversely affect our business.

We are regulated by federal, state and local governments in the United States and other countries where we do business. Our insurance and HMO subsidiaries must be licensed by and are subject to regulation in the jurisdictions in which they conduct business. For example, states require periodic financial reports and enforce minimum capital or restricted cash reserve requirements. Health plans and insurance companies are also regulated under state insurance holding company regulations and some of our activities may be subject to other

health care-related regulations and requirements, including those relating to PPOs, MCOs, UR and TPA-related regulations and licensure requirements. Some of our UnitedHealthcare and Optum businesses hold government contracts or provide services related to government contracts and are subject to U.S. federal and state and non-U.S. self-referral, anti-kickback, medical necessity, risk adjustment, false claims and other laws and regulations governing government contractors and the use of government funds. In addition, under state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. Some states have similar laws relating to HMOs and other payers such as consumer operated and oriented plans (co-ops) established under the ACA. Any such assessment could expose our insurance entities and other insurers to the risk of paying a portion of an impaired or insolvent insurance company's claims through state guaranty associations.

Certain of our businesses provide products or services to various government agencies. Our relationships with these government agencies are subject to the terms of contracts that we hold with the agencies and to laws and regulations regarding government contracts. Among others, certain laws and regulations restrict or prohibit companies from performing work for government agencies that might be viewed as an actual or potential conflict of interest. These laws may limit our ability to pursue and perform certain types of work, thereby materially and adversely affecting our results of operations, financial position and cash flows.

Certain of our Optum businesses are also subject to regulations that are distinct from those faced by our insurance and HMO subsidiaries, including, for example, state telemedicine regulations; debt collection laws; banking regulations; distributor and producer licensing requirements; state corporate practice of medicine doctrines; fee-splitting rules; and health care facility licensure and certificate of need requirements, some of which could impact our relationships with physicians, hospitals and customers. These risks and uncertainties may materially and adversely affect our ability to market or provide our products and services, or to do so at targeted operating margins, or may increase the regulatory burdens under which we operate.

The laws and rules governing our businesses and interpretations of those laws and rules are subject to frequent change. For example, legislative, administrative and public policy changes to the ACA are being debated, and we cannot predict if the ACA will be further modified or repealed or replaced. Additionally, the integration into our businesses of entities that we acquire may affect the way in which existing laws and rules apply to us, including subjecting us to laws and rules that did not previously apply to us. The broad latitude given to the agencies administering, interpreting and enforcing current and future regulations governing our businesses could force us to change how we do business, restrict revenue and enrollment growth, increase our health care and administrative costs and capital requirements, or expose us to increased liability in courts for coverage determinations, contract interpretation and other actions.

We also must obtain and maintain regulatory approvals to market many of our products and services, increase prices for certain regulated products and services and complete certain acquisitions and dispositions or integrate certain acquisitions. For example, premium rates for our health insurance and managed care products are subject to regulatory review or approval in many states and by the federal government. Additionally, we must submit data on all proposed rate increases on many of our products to HHS for monitoring purposes. Geographic and product expansions may be subject to state and federal regulatory approvals. Delays in obtaining necessary approvals or our failure to obtain or maintain adequate approvals could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes encompass, among other matters, local and cross-border taxation, licensing, tariffs, intellectual property, investment, capital (including minimum solvency margin and reserve requirements), management control, labor, anti-fraud, anti-corruption and privacy and data protection regulations (including requirements for cross-border data transfers) that vary by jurisdiction. We currently operate outside of the United States and in the future may acquire or commence additional businesses based

outside of the United States, increasing our exposure to non-U.S. regulatory regimes. For example, our UnitedHealthcare Brazil business subjects us to Brazilian laws and regulations affecting hospitals, managed care and insurance industries and to regulation by Brazilian regulators, including the national regulatory agency for private health insurance and plans, the Agência Nacional de Saúde Suplementar, whose approach to the interpretation, implementation and enforcement of industry regulations could differ from the approach taken by U.S. regulators. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the FCPA, which prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage. Our failure to comply with U.S. or non-U.S. laws and regulations governing our conduct outside the United States or to establish constructive relations with non-U.S. regulators could adversely affect our ability to market our products and services, or to do so at targeted operating margins, which may have a material adverse effect on our business, financial condition and results of operations.

The health care industry is also regularly subject to negative publicity, including as a result of governmental investigations, adverse media coverage and political debate surrounding industry regulation. Negative publicity may adversely affect our stock price and damage our reputation in various markets.

As a result of our participation in various government health care programs, both as a payer and as a service provider to payers, we are exposed to additional risks associated with program funding, enrollments, payment adjustments, audits and government investigations that could materially and adversely affect our business, results of operations, financial position and cash flows.

We participate in various federal, state and local government health care benefit programs, including as a payer in Medicare Advantage, Medicare Part D, various Medicaid programs and CHIP, and receive substantial revenues from these programs. Certain of our Optum businesses also provide services to payers participating in government health care programs. A reduction or less than expected increase, or a protracted delay, in government funding for these programs or change in allocation methodologies, or, as is a typical feature of many government contracts, termination of the contract at the option of the government, may materially and adversely affect our results of operations, financial position and cash flows.

The government health care programs in which we participate generally are subject to frequent changes, including changes that may reduce the number of persons enrolled or eligible for coverage, reduce the amount of reimbursement or payment levels, reduce our participation in certain service areas or markets, or increase our administrative or medical costs under such programs. Revenues for these programs depend on periodic funding from the federal government or applicable state governments and allocation of the funding through various payment mechanisms. Funding for these government programs depends on many factors outside of our control, including general economic conditions and budgetary constraints at the federal or applicable state level. For example CMS has in the past reduced or frozen Medicare Advantage benchmarks, and additional cuts to Medicare Advantage benchmarks are possible. In addition, from time to time, CMS makes changes to the way it calculates Medicare Advantage risk adjustment payments. Although we have adjusted members' benefits and premiums on a selective basis, ceased to offer benefit plans in certain counties, and intensified both our medical and operating cost management in response to the benchmark reductions and other funding pressures, these or other strategies may not fully address the funding pressures in the Medicare Advantage program. In addition, payers in the Medicare Advantage program may be subject to reductions in payments from CMS as a result of decreased funding or recoupment pursuant to government audit.

Under the Medicaid managed care program, state Medicaid agencies seek bids from eligible health plans to continue their participation in the acute care Medicaid health programs. If we are not successful in obtaining renewals of state Medicaid managed care contracts, we risk losing the members that were enrolled in those Medicaid plans. Under the Medicare Part D program, to qualify for automatic enrollment of low income members, our bids must result in an enrollee premium below a regional benchmark, which is calculated by the government after all regional bids are submitted. If the enrollee premium is not below the government

benchmark, we risk losing the members who were auto-assigned to us and will not have additional members auto-assigned to us. In general, our bids are based upon certain assumptions regarding enrollment, utilization, medical costs and other factors. If any of these assumptions is materially incorrect, either as a result of unforeseen changes to the programs on which we bid, or submission by our competitors at lower rates than our bids, our results of operations, financial position and cash flows could be materially and adversely affected.

Many of the government health care coverage programs in which we participate are subject to the prior satisfaction of certain conditions or performance standards or benchmarks. For example, as part of the ACA, CMS has a system that provides various quality bonus payments to Medicare Advantage plans that meet certain quality star ratings at the local plan level. The star rating system considers various measures adopted by CMS, including, among others, quality of care, preventive services, chronic illness management and customer satisfaction. Plans must have a rating of four stars or higher to qualify for bonus payments. If we do not maintain or continue to improve our star ratings, our plans may not be eligible for quality bonuses and we may experience a negative impact on our revenues and the benefits that our plans can offer, which could materially and adversely affect the marketability of our plans, our membership levels, results of operations, financial position and cash flows. Any changes in standards or care delivery models that apply to government health care programs, including Medicare and Medicaid, or our inability to improve our quality scores and star ratings to meet government performance requirements or to match the performance of our competitors could result in limitations to our participation in or exclusion from these or other government programs, which in turn could materially and adversely affect our results of operations, financial position and cash flows.

CMS uses various payment mechanisms to allocate funding for Medicare programs, including adjustment of monthly capitation payments to Medicare Advantage plans and Medicare Part D plans according to the predicted health status of each beneficiary as supported by data from health care providers for Medicare Advantage plans, as well as, for Medicare Part D plans, risk-sharing provisions based on a comparison of costs predicted in our annual bids to actual prescription drug costs. Some state Medicaid programs utilize a similar process. For example, our UnitedHealthcare Medicare & Retirement and UnitedHealthcare Community & State businesses submit information relating to the health status of enrollees to CMS or state agencies for purposes of determining the amount of certain payments to us. CMS and the Office of Inspector General for HHS periodically perform risk adjustment data validation (RADV) audits of selected Medicare health plans to validate the coding practices of and supporting documentation maintained by health care providers. Certain of our local plans have been selected for such audits, which have in the past resulted and could in the future result in retrospective adjustments to payments made to our health plans, fines, corrective action plans or other adverse action by CMS.

We have been and may in the future become involved in routine, regular and special governmental investigations, audits, reviews and assessments. For example, various governmental agencies have conducted investigations into certain PBM practices, which have resulted in other PBMs agreeing to civil penalties, including the payment of money and corporate integrity agreements. Additionally, such investigations, audits or reviews sometimes arise out of or prompt claims by private litigants or whistleblowers that, among other allegations, we failed to disclose certain business practices or, as a government contractor, submitted false or erroneous claims to the government. Governmental investigations, audits, reviews and assessments could lead to government actions, which could result in adverse publicity, the assessment of damages, civil or criminal fines or penalties, or other sanctions, including restrictions or changes in the way we conduct business, loss of licensure or exclusion from participation in government programs, any of which could have a material adverse effect on our business, results of operations, financial position and cash flows.

If we sustain cyber-attacks or other privacy or data security incidents that result in security breaches that disrupt our operations or result in the unintended dissemination of protected personal information or proprietary or confidential information, we could suffer a loss of revenue and increased costs, exposure to significant liability, reputational harm and other serious negative consequences.

We routinely process, store and transmit large amounts of data in our operations, including protected personal information as well as proprietary or confidential information relating to our business or third-parties. Some of

the data we process, store and transmit may be outside of the United States due to our information technology systems and international business operations. We are regularly the target of attempted cyber-attacks and other security threats and may be subject to breaches of the information technology systems we use. We have programs in place to detect, contain and respond to data security incidents and provide employee awareness training around phishing, malware and other cyber risks to protect, to the greatest extent possible, against cyber risks and security breaches. However, because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or implement adequate preventive measures. Experienced computer programmers and hackers may be able to penetrate our layered security controls and misappropriate or compromise protected personal information or proprietary or confidential information or that of third-parties, create system disruptions or cause system shutdowns. They also may be able to develop and deploy viruses, worms and other malicious software programs that attack our systems or otherwise exploit any security vulnerabilities. Hardware, software, or applications we develop or procure from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Our facilities may also be vulnerable to security incidents or security attacks; acts of vandalism or theft; coordinated attacks by activist entities; misplaced or lost data; human errors; or other similar events that could negatively affect our systems and our customer's data.

The costs to eliminate or address the foregoing security threats and vulnerabilities before or after a cyber-incident could be material. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service and loss of existing or potential customers. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information, proprietary information or confidential information about us or our customers or other third-parties, could expose our customers' private information and our customers to the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

If we fail to comply with applicable privacy, security and data laws, regulations and standards, including with respect to third-party service providers that utilize protected personal information on our behalf, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

The collection, maintenance, protection, use, transmission, disclosure and disposal of protected personal information are regulated at the federal, state, international and industry levels and requirements are imposed on us by contracts with customers. These laws, rules and requirements are subject to change. Compliance with new privacy and security laws, regulations and requirements may result in increased operating costs, and may constrain or require us to alter our business model or operations. For example, the HITECH amendments to HIPAA imposed further restrictions on our ability to collect, disclose and use protected personal information and imposed additional compliance requirements on our business.

Internationally, many of the jurisdictions in which we operate have established their own data security and privacy legal framework with which we or our customers must comply. We expect that there will continue to be new proposed laws, regulations and industry standards concerning privacy, data protection and information security in the European Union and other jurisdictions, and we cannot yet determine the impacts such future laws, regulations and standards may have on our businesses or the businesses of our customers. For example, in May 2018, the European Union's General Data Protection Regulation will overhaul data protection laws in the European Union. The new regulation will supersede current European Union data protection legislation, may impose more stringent European Union data protection requirements on us or our customers, and may prescribe greater penalties for noncompliance.

Many of our businesses are also subject to the Payment Card Industry Data Security Standard, which is a multifaceted security standard that is designed to protect credit card account data as mandated by payment card industry entities.

HIPAA requires business associates as well as covered entities to comply with certain privacy and security requirements. While we provide for appropriate protections through our contracts with our third-party service providers and in certain cases assess their security controls, we have limited oversight or control over their actions and practices. Several of our businesses act as business associates to their covered entity customers and, as a result, collect, use, disclose and maintain protected personal information in order to provide services to these customers. HHS has announced that it will continue its audit program to assess HIPAA compliance efforts by covered entities and expand it to include business associates. An audit resulting in findings or allegations of noncompliance could have a material adverse effect on our results of operations, financial position and cash flows.

Through our Optum businesses, including our Optum Labs business, we maintain a database of administrative and clinical data that is statistically de-identified in accordance with HIPAA standards. Noncompliance or findings of noncompliance with applicable laws, regulations or requirements, or the occurrence of any privacy or security breach involving the misappropriation, loss or other unauthorized disclosure of protected personal information, whether by us or by one of our third-party service providers, could have a material adverse effect on our reputation and business, including mandatory disclosure to the media, loss of existing or new customers, significant increases in the cost of managing and remediating privacy or security incidents and material fines, penalties and litigation awards, among other consequences, any of which could have a material and adverse effect on our results of operations, financial position and cash flows.

Our businesses providing pharmacy care services face regulatory and operational risks and uncertainties that may differ from the risks of our other businesses.

We provide pharmacy care services through our OptumRx and UnitedHealthcare businesses. Each business is subject to federal and state anti-kickback beneficiary inducement and other laws that govern the relationships of the business with pharmaceutical manufacturers, physicians, pharmacies, customers and consumers. As a provider of pharmacy benefit management services, OptumRx is also subject to an increasing number of licensure, registration and other laws and accreditation standards that impact the business practices of a pharmacy benefit manager. OptumRx also conducts business through home delivery, specialty pharmacies and home infusion, which subjects it to extensive federal, state and local laws and regulations, including those of the DEA and individual state controlled substance authorities, the FDA and Boards of Pharmacy. In addition, federal and state legislatures regularly consider new regulations for the industry that could materially and adversely affect current industry practices, including potential new legislation and regulations regarding the receipt or disclosure of rebates and other fees from pharmaceutical companies, the development and use of formularies and other utilization management tools, the use of average wholesale prices or other pricing benchmarks, pricing for specialty pharmaceuticals, limited access to networks and pharmacy network reimbursement methodologies.

We could face potential claims in connection with purported errors by our home delivery or specialty pharmacies or the provision of home infusion services, including in connection with the risks inherent in the packaging and distribution of pharmaceuticals and other health care products. Disruptions from any of our home delivery, specialty pharmacy or home infusion services could materially and adversely affect our results of operations, financial position and cash flows.

In addition, our pharmacy care services businesses provide services to sponsors of health benefit plans that are subject to ERISA. A private party or the DOL, which is the agency that enforces ERISA, could assert that the fiduciary obligations imposed by the statute apply to some or all of the services provided by our pharmacy care services businesses even where our pharmacy care services businesses are not contractually obligated to assume fiduciary obligations. If a court were to determine that fiduciary obligations apply to our pharmacy care services businesses in connection with services for which our pharmacy care services businesses are not contractually obligated to assume fiduciary obligations, we could be subject to claims for breaches of fiduciary obligations or claims that we entered into certain prohibited transactions.

If we fail to compete effectively to maintain or increase our market share, including maintaining or increasing enrollments in businesses providing health benefits, our results of operations, financial position and cash flows could be materially and adversely affected.

Our businesses compete throughout the United States, South America and other foreign markets and face significant competition in all of the geographic markets in which we operate. In particular markets, our competitors, compared to us, may have greater capabilities, resources or market share; a more established reputation; superior supplier or health care professional arrangements; better existing business relationships; lower profit margin or financial return expectations; or other factors that give such competitors a competitive advantage. Our competitive position may also be adversely affected by significant merger and acquisition activity that has occurred in the industries in which we operate, both among our competitors and suppliers (including hospitals, physician groups and other health care professionals). Consolidation may make it more difficult for us to retain or increase our customer base, improve the terms on which we do business with our suppliers, or maintain or increase profitability. In addition, new direct-to-consumer business models from competing businesses may make it more difficult for us to directly engage consumers in the selection and management of their health care benefits and health care usage, and we may face challenges from new technologies and market entrants that could disrupt our existing relationship with health plan enrollees in these areas. Our business, results of operations, financial position and cash flows could be materially and adversely affected if we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets, if we do not design and price our products properly and competitively, if we are unable to innovate and deliver products and services that demonstrate value to our customers, if we do not provide a satisfactory level of services, if membership or demand for other services does not increase as we expect or declines, or if we lose accounts with more profitable products while retaining or increasing membership in accounts with less profitable products.

If we fail to develop and maintain satisfactory relationships with physicians, hospitals and other service providers, our business could be materially and adversely affected.

Our results of operations and prospects are substantially dependent on our continued ability to contract with physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and other service providers at competitive prices. Any failure by us to develop and maintain satisfactory relationships with health care providers, whether in-network or out-of-network, could materially and adversely affect our business, results of operations, financial position and cash flows. In addition, certain activities related to network design, provider participation in networks and provider payments could result in disputes that may be costly, divert management's attention from our operations and result in negative publicity.

In any particular market, physicians and health care providers could refuse to contract, demand higher payments, or take other actions that could result in higher medical costs, less desirable products for customers or difficulty meeting regulatory or accreditation requirements. In some markets, certain health care providers, particularly hospitals, physician/hospital organizations or multi-specialty physician groups, may have significant market positions or near monopolies that could result in diminished bargaining power on our part. In addition, accountable care organizations; practice management companies (which aggregate physician practices for administrative efficiency) and other organizational structures that physicians, hospitals and other care providers choose may change the way in which these providers do business with us and may change the competitive landscape. Such organizations or groups of physicians may compete directly with us, which could adversely affect our operations, and our results of operations, financial position and cash flows by impacting our relationships with these providers or affecting the way that we price our products and estimate our costs, which might require us to incur costs to change our operations. In addition, if these providers refuse to contract with us, use their market position to negotiate favorable contracts or place us at a competitive disadvantage, our ability to market products or to be profitable in those areas could be materially and adversely affected.

We have capitation arrangements with some physicians, hospitals and other health care providers. Capitation arrangements limit our exposure to the risk of increasing medical costs, but expose us to risk related to the

adequacy of the financial and medical care resources of the health care provider. To the extent that a capitated health care provider organization faces financial difficulties or otherwise is unable to perform its obligations under the capitation arrangement, we may be held responsible for unpaid health care claims that should have been the responsibility of the capitated health care provider and for which we have already paid the provider, under the capitation arrangement. Further, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts could result in a disruption in the provision of services to our members or a reduction in the services available to our members. Health care providers with which we contract may not properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events could have a material adverse effect on the provision of services to our members and our operations.

Some providers that render services to our members do not have contracts with us. In those cases, we do not have a pre-established understanding about the amount of compensation that is due to the provider for services rendered to our members. In some states, the amount of compensation due to these out-of-network providers is defined by law or regulation, but in most instances the amount is either not defined or is established by a standard that does not clearly specify dollar terms. In some instances, providers may believe that they are underpaid for their services and may either litigate or arbitrate their dispute with us or try to recover from our members the difference between what we have paid them and the amount they charged us.

The success of some of our businesses, including OptumHealth and UnitedHealthcare Brazil, depend on maintaining satisfactory physician relationships as employees, independent contractors or joint venture partners. The physicians that practice medicine or contract with our affiliated physician organizations could terminate their provider contracts or otherwise become unable or unwilling to continue practicing medicine or contracting with us. There is and will likely be heightened competition in the markets where we operate to acquire or manage physician practices or to employ or contract with individual physicians. If we are unable to maintain or grow satisfactory relationships with physicians, or to acquire, recruit or, in some instances, employ physicians, or to retain enrollees following the departure of a physician, our revenues could be materially and adversely affected. In addition, our affiliated physician organizations contract with health insurance and HMO competitors of UnitedHealthcare. Our businesses could suffer if our affiliated physician organizations fail to maintain relationships with these health insurance or HMO companies, or fail to adequately price their contracts with these third-party payers.

In addition, physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and certain health care providers are customers of our Optum businesses. Physicians also provide medical services at facilities owned by our Optum businesses. Given the importance of health care providers and other constituents to our businesses, failure to maintain satisfactory relationships with them could materially and adversely affect our results of operations, financial position and cash flows.

We are routinely subject to various litigation actions due to the nature of our business, which could damage our reputation and, if resolved unfavorably, could result in substantial penalties or monetary damages and materially and adversely affect our results of operations, financial position and cash flows.

We are routinely made party to a variety of legal actions related to, among other matters, the design, management and delivery of our product and service offerings. These matters have included or could in the future include matters related to health care benefits coverage and payment claims (including disputes with enrollees, customers and contracted and non-contracted physicians, hospitals and other health care professionals), tort claims (including claims related to the delivery of health care services, such as medical malpractice by staff at our affiliates' facilities, or by health care practitioners who are employed by us, have contractual relationships with us, or serve as providers to our managed care networks), whistleblower claims (including claims under the False Claims Act or similar statutes), contract and labor disputes, tax claims and claims related to disclosure of certain business practices. We are also party to certain class action lawsuits brought by health care professional groups and consumers. In addition, we operate in jurisdictions outside of the United States, where contractual rights, tax

positions and applicable regulations may be subject to interpretation or uncertainty to a greater degree than in the United States, and therefore subject to dispute by customers, government authorities or others. We are largely self-insured with regard to litigation risks. While we maintain excess liability insurance with outside insurance carriers for claims in excess of our self-insurance, certain types of damages, such as punitive damages in some circumstances, are not covered by insurance. Although we record liabilities for our estimates of the probable costs resulting from self-insured matters, it is possible that the level of actual losses will significantly exceed the liabilities recorded.

We cannot predict the outcome of significant legal actions in which we are involved and are incurring expenses in resolving these matters. The legal actions we face or may face in the future could further increase our cost of doing business and materially and adversely affect our results of operations, financial position and cash flows. In addition, certain legal actions could result in adverse publicity, which could damage our reputation and materially and adversely affect our ability to retain our current business or grow our market share in some markets and businesses.

Any failure by us to manage successfully our strategic alliances or complete, manage or integrate acquisitions and other significant strategic transactions or relationships domestically or outside the United States could materially and adversely affect our business, prospects, results of operations, financial position and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures and outsourcing transactions and often enter into agreements relating to such transactions. For example, we have a strategic alliance with AARP under which we provide AARP-branded Medicare Supplement insurance to AARP members and other AARP-branded products and services to Medicare beneficiaries. If we fail to meet the needs of our alliance or joint venture partners, including by developing additional products and services, providing high levels of service, pricing our products and services competitively or responding effectively to applicable federal and state regulatory changes, our alliances and joint ventures could be damaged or terminated, which in turn could adversely impact our reputation, business and results of operations. Further, if we fail to identify and successfully complete transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally, we may be placed at a competitive disadvantage or we may be adversely affected by negative market perceptions, any of which may have a material adverse effect on our results of operations, financial position or cash flows.

Success in completing acquisitions is also dependent on efficiently integrating the acquired business into our existing operations, including our internal control environment, or otherwise leveraging its operations, which may present challenges that are different from those presented by organic growth and that may be difficult for us to manage. If we cannot successfully integrate these acquisitions and realize contemplated revenue growth opportunities and cost savings, our business, prospects, results of operations, financial position and cash flows could be materially and adversely affected.

As we expand and operate our business outside of the United States, we are presented with challenges that differ from those presented by acquisitions of domestic businesses, including challenges in adapting to new markets, languages, business, labor and cultural practices and regulatory environments. Adapting to these challenges could require us to devote significant senior management and other resources to the acquired businesses before we realize anticipated synergies or other benefits from the acquired businesses. These challenges vary widely by country and may include political instability, government intervention, discriminatory regulation and currency exchange controls or other restrictions that could prevent us from transferring funds from these operations out of the countries in which our acquired businesses operate or converting local currencies that we hold into U.S. dollars or other currencies. If we are unable to manage successfully our non-U.S. acquisitions, our business, prospects, results of operations and financial position could be materially and adversely affected.

Foreign currency exchange rates and fluctuations may have an impact on our shareholders' equity from period to period, which could adversely affect our debt to debt-plus-equity ratio, and our future revenues, costs and cash flows from international operations. Any measures we may implement to reduce the effect of volatile currencies may be costly or ineffective.

Our sales performance will suffer if we do not adequately attract, retain and provide support to a network of independent producers and consultants.

Our products and services are sold in part through nonexclusive producers and consultants for whose services and allegiance we must compete intensely. Our sales would be materially and adversely affected if we are unable to attract, retain and support such independent producers and consultants or if our sales strategy is not appropriately aligned across distribution channels. Our relationships with producers could be materially and adversely impacted by changes in our business practices and the nature of our relationships to address these pressures, including potential reductions in commission levels.

A number of investigations have been conducted regarding the marketing practices of producers selling health care products and the payments they receive and have resulted in enforcement actions against companies in our industry and producers marketing and selling those companies' products. If we were subjected to similar investigations and enforcement actions, such actions could result in penalties and the imposition of corrective action plans, which could materially and adversely impact our ability to market our products.

Unfavorable economic conditions could materially and adversely affect our revenues and our results of operations.

Unfavorable economic conditions may impact demand for certain of our products and services. For example, high unemployment can cause lower enrollment or lower rates of renewal in our employer group plans. Unfavorable economic conditions also have caused and could continue to cause employers to stop offering certain health care coverage as an employee benefit or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs. In addition, unfavorable economic conditions could adversely impact our ability to increase premiums or result in the cancellation by certain customers of our products and services. These conditions could lead to a decrease in our membership levels and premium and fee revenues and could materially and adversely affect our results of operations, financial position and cash flows.

During a prolonged unfavorable economic environment, state and federal budgets could be materially and adversely affected, resulting in reduced reimbursements or payments in our federal and state government health care coverage programs, including Medicare, Medicaid and CHIP. A reduction in state Medicaid reimbursement rates could be implemented retrospectively to apply to payments already negotiated or received from the government and could materially and adversely affect our results of operations, financial position and cash flows. In addition, state and federal budgetary pressures could cause the affected governments to impose new or a higher level of taxes or assessments for our commercial programs, such as premium taxes on insurance companies and HMOs and surcharges or fees on select fee-for-service and capitated medical claims. Any of these developments or actions could materially and adversely affect our results of operations, financial position and cash flows.

A prolonged unfavorable economic environment also could adversely impact the financial position of hospitals and other care providers, which could materially and adversely affect our contracted rates with these parties and increase our medical costs or materially and adversely affect their ability to purchase our service offerings. Further, unfavorable economic conditions could adversely impact the customers of our Optum businesses, including health plans, HMOs, hospitals, care providers, employers and others, which could, in turn, materially and adversely affect Optum's financial results.

Our investment portfolio may suffer losses, which could adversely affect our results of operations, financial position and cash flows.

Market fluctuations could impair our profitability and capital position. Volatility in interest rates affects our interest income and the market value of our investments in debt securities of varying maturities, which constitute the vast majority of the fair value of our investments as of December 31, 2017. Relatively low interest rates on investments, such as those experienced during recent years, have adversely impacted our investment income, and the continuation of the current low interest rate environment could further adversely affect our investment income. In addition, a delay in payment of principal or interest by issuers, or defaults by issuers (primarily issuers of our investments in corporate and municipal bonds), could reduce our investment income and require us to write down the value of our investments, which could adversely affect our profitability and equity.

There can be no assurance that our investments will produce total positive returns or that we will not sell investments at prices that are less than their carrying values. Changes in the value of our investment assets, as a result of interest rate fluctuations, changes in issuer financial conditions, illiquidity or otherwise, could have an adverse effect on our equity. In addition, if it became necessary for us to liquidate our investment portfolio on an accelerated basis, such an action could have an adverse effect on our results of operations and the capital position of regulated subsidiaries.

If the value of our intangible assets is materially impaired, our results of operations, equity and credit ratings could be materially and adversely affected.

As of December 31, 2017, goodwill and other intangible assets had a carrying value of $63 billion, representing 45% of our total consolidated assets. We periodically evaluate our goodwill and other intangible assets to determine whether all or a portion of their carrying values may be impaired, in which case a charge to earnings may be necessary. The value of our goodwill may be materially and adversely impacted if businesses that we acquire perform in a manner that is inconsistent with our assumptions. In addition, from time to time we divest businesses, and any such divestiture could result in significant asset impairment and disposition charges, including those related to goodwill and other intangible assets. Any future evaluations requiring an impairment of our goodwill and other intangible assets could materially and adversely affect our results of operations and equity in the period in which the impairment occurs. A material decrease in equity could, in turn, adversely impact our credit ratings and potentially impact our compliance with the covenants in our bank credit facilities.

If we fail to maintain properly the integrity or availability of our data or successfully consolidate, integrate, upgrade or expand our existing information systems, or if our technology products do not operate as intended, our business could be materially and adversely affected.

Our ability to price adequately our products and services, to provide effective service to our customers in an efficient and uninterrupted fashion, and to report accurately our results of operations depends on the integrity of the data in our information systems. We periodically consolidate, integrate, upgrade and expand our information systems capabilities as a result of technology initiatives and recently enacted regulations, changes in our system platforms and integration of new business acquisitions. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Our information systems require an ongoing commitment of significant resources to maintain, protect and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving systems and regulatory standards and changing customer preferences. If the information we rely upon to run our businesses is found to be inaccurate or unreliable or if we fail to maintain or protect our information systems and data integrity effectively, we could lose existing customers, have difficulty attracting new customers, experience problems in determining medical cost estimates and establishing appropriate pricing, have difficulty preventing, detecting and controlling fraud, have disputes with customers, physicians and other health care professionals, become subject to regulatory sanctions or penalties, incur increases in operating expenses or suffer other adverse consequences. Our process of consolidating the number of systems we operate, upgrading and expanding our information systems capabilities, enhancing our systems and developing new systems to keep pace with continuing changes in information processing technology may not be successful. Failure to protect, consolidate and integrate our systems

successfully could result in higher than expected costs and diversion of management's time and energy, which could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses sell and install software products that may contain unexpected design defects or may encounter unexpected complications during installation or when used with other technologies utilized by the customer. Connectivity among competing technologies is becoming increasingly important in the health care industry. A failure of our technology products to operate as intended and in a seamless fashion with other products could materially and adversely affect our results of operations, financial position and cash flows.

Uncertain and rapidly evolving U.S. federal and state, non-U.S. and international laws and regulations related to the health information technology market may present compliance challenges and could materially and adversely affect the configuration of our information systems and platforms, and our ability to compete in this market.

If we are not able to protect our proprietary rights to our databases, software and related products, our ability to market our knowledge and information-related businesses could be hindered and our results of operations, financial position and cash flows could be materially and adversely affected.

We rely on our agreements with customers, confidentiality agreements with employees and third parties, and our trademarks, trade secrets, copyrights and patents to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, and we expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this industry segment grows. Such litigation and misappropriation of our proprietary information could hinder our ability to market and sell products and services and our results of operations, financial position and cash flows could be materially and adversely affected.

Restrictions on our ability to obtain funds from our regulated subsidiaries could materially and adversely affect our results of operations, financial position and cash flows.

Because we operate as a holding company, we are dependent on dividends and administrative expense reimbursements from our subsidiaries to fund our obligations. Many of these subsidiaries are regulated by departments of insurance or similar regulatory authorities. We are also required by law or regulation to maintain specific prescribed minimum amounts of capital in these subsidiaries. The levels of capitalization required depend primarily on the volume of premium revenues generated by the applicable subsidiary. In most states, we are required to seek approval by state regulatory authorities before we transfer money or pay dividends from our regulated subsidiaries that exceed specified amounts. An inability of our regulated subsidiaries to pay dividends to their parent companies in the desired amounts or at the time of our choosing could adversely affect our ability to reinvest in our business through capital expenditures or business acquisitions, as well as our ability to maintain our corporate quarterly dividend payment, repurchase shares of our common stock and repay our debt. If we are unable to obtain sufficient funds from our subsidiaries to fund our obligations, our results of operations, financial position and cash flows could be materially and adversely affected.

Any downgrades in our credit ratings could adversely affect our business, financial condition and results of operations.

Claims paying ability, financial strength and debt ratings by Nationally Recognized Statistical Rating Organizations are important factors in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used by customers and creditors. We believe our claims paying ability and financial strength ratings are important factors in marketing our products to certain of our customers. Our credit ratings impact both the cost and availability of future borrowings. Each of the credit rating agencies reviews its ratings periodically. Our ratings reflect each credit rating agency's opinion of our financial strength, operating performance and ability to meet our debt obligations or obligations to policyholders. There

can be no assurance that our current credit ratings will be maintained in the future. Any downgrades in our credit ratings could materially increase our costs of or ability to access funds in the debt capital markets and otherwise materially increase our operating costs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

To support our business operations in the United States and other countries we own and lease real properties. Our various reportable segments use these facilities for their respective business purposes, and we believe these current facilities are suitable for their respective uses and are adequate for our anticipated future needs.

ITEM 3. LEGAL PROCEEDINGS

The information required by this Item 3 is incorporated herein by reference to the information set forth under the captions “Legal Matters” and “Governmental Investigations, Audits and Reviews” in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements.”

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET PRICES AND HOLDERS

Our common stock is traded on the New York Stock Exchange (NYSE) under the symbol UNH. On January 31, 2018, there were 12,418 registered holders of record of our common stock. The high and low per share common stock sales prices reported by the NYSE and cash dividends declared for our last two fiscal years were as follows:

	High	Low	Cash Dividends Declared
2017			
First quarter	$172.14	$156.09	$0.625
Second quarter	$188.66	$164.25	$0.750
Third quarter	$200.76	$183.86	$0.750
Fourth quarter	$231.77	$186.00	$0.750
2016			
First quarter	$131.10	$107.51	$0.500
Second quarter	$141.31	$125.26	$0.625
Third quarter	$144.48	$132.39	$0.625
Fourth quarter	$164.00	$133.03	$0.625

DIVIDEND POLICY

In June 2017, our Board of Directors increased the Company's quarterly cash dividend to shareholders to an annual dividend rate of $3.00 per share compared to the annual dividend rate of $2.50 per share, which the Company had paid since June 2016. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

ISSUER PURCHASES OF EQUITY SECURITIES

In November 1997, our Board of Directors adopted a share repurchase program, which the Board evaluates periodically. There is no established expiration date for the program. During the fourth quarter 2017, we repurchased 1.6 million shares at an average price of $210.97 per share. As of December 31, 2017, we had Board authorization to purchase up to 42 million shares of our common stock.

PERFORMANCE GRAPH

The following performance graph compares the cumulative five-year total return to shareholders on our common stock relative to the cumulative total returns of the S&P 500 index and a customized peer group of certain Fortune 50 companies (the "*Fortune 50 Group*") for the five-year period ended December 31, 2017. We are not included in the *Fortune 50* Group index. In calculating the cumulative total shareholder return of the indexes, the shareholder returns of the *Fortune 50* Group companies are weighted according to the stock market capitalizations of the companies at January 1 of each year. The comparisons assume the investment of $100 on December 31, 2012 in our common stock and in each index, and that dividends were reinvested when paid.

The *Fortune 50* Group consists of the following companies: American International Group, Inc., Berkshire Hathaway Inc., Cardinal Health, Inc., Citigroup Inc., General Electric Company, International Business Machines Corporation and Johnson & Johnson. Although there are differences among the companies in terms of size and industry, like UnitedHealth Group, all of these companies are large multi-segment companies using a well-defined operating model in one or more broad sectors of the economy.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN

Among UnitedHealth Group, the S&P 500 Index,
and Fortune 50 Group

	12/12	12/13	12/14	12/15	12/16	12/17
UnitedHealth Group	**$100.00**	**$141.03**	**$192.45**	**$227.59**	**$314.99**	**$440.44**
S&P 500 Index	**100.00**	**132.39**	**150.51**	**152.59**	**170.84**	**208.14**
Fortune 50 Group	**100.00**	**127.82**	**134.63**	**139.01**	**157.63**	**161.63**

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

ITEM 6. SELECTED FINANCIAL DATA

(in millions, except percentages and per share data)	For the Year Ended December 31, 2017 (a)	2016	2015 (b)	2014	2013
Consolidated operating results					
Revenues	$201,159	$184,840	$157,107	$130,474	$122,489
Earnings from operations	15,209	12,930	11,021	10,274	9,623
Net earnings attributable to UnitedHealth Group common shareholders	10,558	7,017	5,813	5,619	5,625
Return on equity (c)	24.4%	19.4%	17.7%	17.3%	17.7%
Basic earnings per share attributable to UnitedHealth Group common shareholders	$ 10.95	$ 7.37	$ 6.10	$ 5.78	$ 5.59
Diluted earnings per share attributable to UnitedHealth Group common shareholders	10.72	7.25	6.01	5.70	5.50
Cash dividends declared per common share	2.8750	2.3750	1.8750	1.4050	1.0525
Consolidated cash flows from (used for)					
Operating activities	$ 13,596	$ 9,795	$ 9,740	$ 8,051	$ 6,991
Investing activities	(8,599)	(9,355)	(18,395)	(2,534)	(3,089)
Financing activities	(3,441)	(1,011)	12,239	(5,293)	(4,946)
Consolidated financial condition (as of December 31)					
Cash and investments	$ 43,831	$ 37,143	$ 31,703	$ 28,063	$ 28,818
Total assets	139,058	122,810	111,254	86,300	81,800
Total commercial paper and long-term debt	31,692	32,970	31,965	17,324	16,778
Redeemable noncontrolling interests	2,189	2,012	1,736	1,388	1,175
Total equity	49,833	38,177	33,725	32,454	32,149

(a) Includes the impact of the revaluation of our net deferred tax liabilities due to Tax Reform enacted in December 2017.

(b) Includes the effects of the July 2015 acquisition of Catamaran Corporation (Catamaran) and related debt issuances.

(c) Return on equity is calculated as net earnings divided by average equity. Average equity is calculated using the equity balance at the end of the preceding year and the equity balances at the end of each of the four quarters of the year presented.

Financial Highlights should be read with the accompanying "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 and the Consolidated Financial Statements and Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the accompanying Consolidated Financial Statements and Notes to the Consolidated Financial Statements thereto included in Item 8, "Financial Statements." Readers are cautioned that the statements, estimates, projections or outlook contained in this report, including discussions regarding financial prospects, economic conditions, trends and uncertainties contained in this Item 7, may constitute forward-looking statements within the meaning of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. A description of some of the risks and uncertainties can be found further below in this Item 7 and in Part I, Item 1A, "Risk Factors."

EXECUTIVE OVERVIEW

General

UnitedHealth Group is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone. Through our diversified family of businesses, we leverage core competencies in advanced, enabling technology; health care data; information and intelligence; and clinical care delivery, management and coordination to help meet the demands of the health system. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

We have four reportable segments across our two business platforms, UnitedHealthcare and Optum:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

Further information on our business and reportable segments is presented in Part I, Item 1, “Business” and in Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements.”

Business Trends

Our businesses participate in the United States, South America and certain other international health markets. In the United States, health care spending has grown consistently for many years and comprises approximately 18% of gross domestic product. We expect overall spending on health care to continue to grow in the future, due to inflation, medical technology and pharmaceutical advancement, regulatory requirements, demographic trends in the population and national interest in health and well-being. The rate of market growth may be affected by a variety of factors, including macro-economic conditions and regulatory changes, which have impacted and could further impact our results of operations.

Pricing Trends. To price our health care benefit products, we start with our view of expected future costs. We frequently evaluate and adjust our approach in each of the local markets we serve, considering all relevant factors, such as product positioning, price competitiveness and environmental, competitive, legislative and regulatory considerations, including minimum MLR thresholds. We will continue seeking to balance growth and profitability across all of these dimensions.

The commercial risk market remains highly competitive in both the small group and large group segments. We expect broad-based competition to continue as the industry adapts to individual and employer needs amid reform changes. The ACA included an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products. A provision in the 2016 Federal Budget imposed a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax. Pricing for contracts that cover a portion of calendar year 2018 reflected the impact of the returning Health Insurance Industry Tax. Conversely, the industry has continued to experience favorable medical cost trends due to moderated utilization, which has impacted the competitive pricing environment.

Medicare Advantage funding continues to be pressured, as discussed below in “Regulatory Trends and Uncertainties.”

We expect continued Medicaid revenue growth due to anticipated increases in the number of people we serve; we also believe that the payment rate environment creates the risk of downward pressure on Medicaid margin

percentages. We continue to take a prudent, market-sustainable posture for both new business and maintenance of existing relationships. We advocate for actuarially sound rates that are commensurate with our medical cost trends and we remain dedicated to partnering with those states that are committed to the long-term viability of their programs.

Medical Cost Trends. Our medical cost trends primarily relate to changes in unit costs, health system utilization and prescription drug costs. We endeavor to mitigate those increases by engaging physicians and consumers with information and helping them make clinically sound choices, with the objective of helping them achieve high quality, affordable care.

Delivery System and Payment Modernization. The health care market continues to change based on demographic shifts, new regulations, political forces and both payer and patient expectations. Health plans and care providers are being called upon to work together to close gaps in care and improve overall care quality, improve the health of populations and reduce costs. We continue to see a greater number of people enrolled in plans with underlying incentive-based care provider payment models that reward high-quality, affordable care and foster collaboration. We work together with clinicians to leverage our data and analytics to provide the necessary information to close gaps in care and improve overall health outcomes for patients.

We are increasingly rewarding care providers for delivering improvements in quality and cost-efficiency. As of December 31, 2017, we served nearly 16 million people through some form of aligned contractual arrangement, including full-risk, shared-risk and bundled episode-of-care and performance incentive payment approaches. As of December 31, 2017, our contracts with value-based elements total nearly $65 billion in annual spending.

This trend is creating needs for health management services that can coordinate care around the primary care physician, including new primary care channels, and for investments in new clinical and administrative information and management systems, which we believe provide growth opportunities for our Optum business platform.

Regulatory Trends and Uncertainties

Following is a summary of management's view of the trends and uncertainties related to some of the key provisions of the ACA and other regulatory matters. For additional information regarding the ACA and regulatory trends and uncertainties, see Part I, Item 1 "Business — Government Regulation" and Item 1A, "Risk Factors."

Medicare Advantage Rates. Final 2018 Medicare Advantage rates resulted in an increase in industry base rates of approximately 0.45%, well short of the industry forward medical cost trend of 3%, as well as the return of the Health Insurance Industry Tax in 2018, described below, which creates continued pressure in the Medicare Advantage program. The impact of this funding shortfall in Medicare Advantage is partially mitigated by reductions in provider payments for those care providers with rates indexed to Medicare Advantage revenues or Medicare fee-for-service payment rates. These factors can affect our plan benefit designs, pricing, growth prospects and earnings expectations for our Medicare Advantage plans.

The ongoing pressure on Medicare Advantage funding places continued importance on effective medical management and ongoing improvements in administrative efficiency. There are a number of adjustments we have made to partially offset these rate pressures and reductions. In some years, these adjustments will impact the majority of the seniors we serve through Medicare Advantage. For example, we seek to intensify our medical and operating cost management, make changes to the size and composition of our care provider networks, and adjust members' benefits, implement or increase the member premiums that supplement the monthly payments we receive from the government. Additionally, we decide annually on a county-by-county basis where we will offer Medicare Advantage plans.

As Medicare Advantage payments change, other products may become relatively more attractive to Medicare beneficiaries and increase the demand for other senior health benefits products such as our market-leading Medicare Supplement and stand-alone Medicare Part D insurance offerings.

Our Medicare Advantage rates are currently enhanced by CMS quality bonuses in certain counties based on our local plans' Star ratings. The level of Star ratings from CMS, based upon specified clinical and operational performance standards, will impact future quality bonuses. In addition, Star ratings affect the amount of savings a plan can use to offer supplemental benefits, which ultimately may affect the plan's membership and revenue. For the 2017 payment year, approximately 80% of our Medicare Advantage members were in plans rated four stars or higher. We expect that at least 85% of our Medicare Advantage members will be in plans rated four stars or higher for payment year 2018. We continue to dedicate substantial resources to advance our quality scores and Star ratings to strengthen our local market programs and further improve our performance.

Tax Reform. Tax Reform was enacted by the U.S federal government in December 2017, changing existing United States tax law including reducing the U.S. corporate income tax rate. The Company re-measured deferred taxes as of the date of enactment, which resulted in a $1.2 billion reduction to the net deferred tax liability and corresponding increase to earnings in 2017. With Tax Reform, we expect that our effective tax rate in 2018 will be approximately 24%.

Health Insurance Industry Tax. A provision in the 2016 Federal Budget imposed a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax. In 2018, the industry-wide amount of the Health Insurance Industry Tax will be $14.3 billion and we expect our portion to be approximately $2.8 billion. A one year moratorium on the collection of the Health Insurance Industry Tax will occur in 2019.

RESULTS SUMMARY

The following table summarizes our consolidated results of operations and other financial information:

(in millions, except percentages and per share data)	For the Years Ended December 31, 2017	2016	2015	Change 2017 vs. 2016		Change 2016 vs. 2015	
Revenues:							
Premiums	$158,453	$144,118	$127,163	$14,335	10%	$16,955	13%
Products	26,366	26,658	17,312	(292)	(1)	9,346	54
Services	15,317	13,236	11,922	2,081	16	1,314	11

Provision for income taxes	(3,200)	(4,790)	(4,363)	1,590	(33)	(427)	10
Net earnings	10,823	7,073	5,868	3,750	53	1,205	21
Earnings attributable to noncontrolling interests	(265)	(56)	(55)	(209)	373	(1)	2
Net earnings attributable to UnitedHealth Group common shareholders	$ 10,558	$ 7,017	$ 5,813	$ 3,541	50%	$ 1,204	21%
Diluted earnings per share attributable to UnitedHealth Group common shareholders	$ 10.72	$ 7.25	$ 6.01	$ 3.47	48%	$ 1.24	21%
Medical care ratio (a)	82.1%	81.2%	81.7%	0.9%		(0.5)%	
Operating cost ratio	14.7	15.4	15.5	(0.7)		(0.1)	
Operating margin	7.6	7.0	7.0	0.6		—	
Tax rate	22.8	40.4	42.6	(17.6)		(2.2)	
Net earnings margin (b)	5.2	3.8	3.7	1.4		0.1	
Return on equity (c)	24.4%	19.4%	17.7%	5.0%		1.7%	

(a) Medical care ratio is calculated as medical costs divided by premium revenue.
(b) Net earnings margin attributable to UnitedHealth Group shareholders.
(c) Return on equity is calculated as annualized net earnings divided by average equity. Average equity is calculated using the equity balance at the end of the preceding year and the equity balances at the end of each of the four quarters in the year presented.

SELECTED OPERATING PERFORMANCE AND OTHER SIGNIFICANT ITEMS

The following represents a summary of select 2017 year-over-year operating comparisons to 2016 and other 2017 significant items.

- Consolidated revenues increased by 9%, UnitedHealthcare revenues increased 10% and Optum revenues grew 9%.

- UnitedHealthcare grew to serve an additional 1.1 million people domestically.
- Earnings from operations increased by 18%, including increases of 16% at UnitedHealthcare and 19% at Optum.
- Diluted earnings per common share increased 48% to $10.72, including $1.22 per share due to the impact of Tax Reform.
- Cash flows from operations were $13.6 billion, an increase of 39%.

2017 RESULTS OF OPERATIONS COMPARED TO 2016 RESULTS.

Consolidated Financial Results

Revenue

The increase in revenue was primarily driven by organic growth in the number of individuals served across our UnitedHealthcare benefits businesses and growth across the Optum business. The increase was partially offset by revenue decreases due to the withdrawals of the ACA-compliant products in the individual market and the effects of the Health Insurance Industry Tax moratorium.

Medical Costs and MCR

Medical costs increased due to risk-based membership growth and medical cost trends. The MCR increased due to the effects of the Health Insurance Industry Tax moratorium, offset primarily by the reduction in individual ACA business, medical management initiatives and an increase in favorable medical cost reserve development.

Income Tax Rate

Our effective tax rate decreased primarily due to the impact of Tax Reform and the Health Insurance Tax moratorium. The provision for income taxes included the $1.2 billion benefit from the revaluation of net deferred tax liabilities.

Reportable Segments

See Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more information on our segments. The following table presents a summary of the reportable segment financial information:

(in millions, except percentages)	For the Years Ended December 31, 2017	2016	2015	Change 2017 vs. 2016		Change 2016 vs. 2015

Total public and senior	15,580	13,785	12,575	1,795	13	1,210	10
Total UnitedHealthcare — domestic medical	45,445	44,365	42,305	1,080	2	2,060	5
International	4,080	4,220	4,090	(140)	(3)	130	3
Total UnitedHealthcare — medical	49,525	48,585	46,395	940	2%	2,190	5%
Supplemental Data:							
Medicare Part D stand-alone	4,940	4,930	5,060	10	—%	(130)	(3)%

In the commercial group market, broad-based growth was across group sizes and regions, led by gains in services to small groups and resulted in the overall increase in people served through risk-based benefit plans. Fee-based commercial group business declined due to the non-renewal of one public sector customer. Membership in individual business decreased due to our reduced participation in ACA-compliant products in 2017. Medicare Advantage increased year-over-year due to growth in people served through individual and employer-sponsored group Medicare Advantage plans. Medicaid growth was driven by the combination of new state-based awards and growth in established programs. Medicare Supplement growth reflected strong customer retention and new sales.

UnitedHealthcare's revenue increase was due to growth in the number of individuals served across its businesses and price increases for underlying medical cost trends, which were partially offset by the reduction of people served in ACA-compliant individual products and the impact of the Health Insurance Industry Tax moratorium.

The increase in UnitedHealthcare's earnings from operations was led by diversified growth and increased operating margin. The 2016 results included losses in ACA-complaint individual products and guaranty fund assessments.

Optum

Total revenues and earnings from operations increased as each segment reported increased revenues and earnings from operations as a result of the factors discussed below.

The results by segment were as follows:

OptumHealth

Revenue and earnings from operations increased at OptumHealth primarily due to organic and acquisition-related growth in care delivery.

OptumInsight

Revenue and earnings from operations at OptumInsight increased primarily due to growth in revenue management services and business process services.

OptumRx

Revenue and earnings from operations at OptumRx increased primarily due to client and consumer growth. In 2017, OptumRx fulfilled 1.3 billion adjusted scripts compared to 1.2 billion in 2016.

2016 RESULTS OF OPERATIONS COMPARED TO 2015 RESULTS

Our results of operations were affected by our acquisition of Catamaran in the third quarter of 2015.

Consolidated Financial Results

Revenues

The increases in revenues were primarily driven by organic growth in the number of individuals served across our UnitedHealthcare benefits businesses and growth across all of our Optum services businesses.

Medical Costs

Medical costs increased due to risk-based membership growth and medical cost trends, partially offset by medical management initiatives.

Income Tax Rate

Our effective tax rate decreased primarily due to the adoption of "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting," which we adopted in the first quarter of 2016.

Reportable Segments

UnitedHealthcare

UnitedHealthcare's revenue growth was due to growth in the number of individuals served across its businesses and price increases for underlying medical cost trends.

UnitedHealthcare's operating earnings increased due to diversified growth, offset by guaranty fund assessments recorded in the fourth quarter of 2016.

Optum

Total revenues and operating earnings increased as each reporting segment increased revenues and earnings from operations by double-digit percentages as a result of the factors discussed below.

The results by segment were as follows:

OptumHealth

Revenue and earnings from operations increased at OptumHealth primarily due to growth in its health care delivery businesses as well as expansion of behavioral services into new Medicaid markets. Strong performance in business supporting UnitedHealthcare partially offset by investments in the health care delivery business drove the increase in earnings from operations.

OptumInsight

Revenue and earnings from operations at OptumInsight increased primarily due to growth in revenue management, business process outsourcing and technology services.

OptumRx

Revenue and earnings from operations at OptumRx increased primarily due to the full-year impact of Catamaran and organic growth. In 2016, OptumRx fulfilled 1.2 billion adjusted scripts compared to 932 million in 2015.

LIQUIDITY, FINANCIAL CONDITION AND CAPITAL RESOURCES

Liquidity

Introduction

We manage our liquidity and financial position in the context of our overall business strategy. We continually forecast and manage our cash, investments, working capital balances and capital structure to meet the short-term and long-term obligations of our businesses while seeking to maintain liquidity and financial flexibility. Cash flows generated from operating activities are principally from earnings before noncash expenses.

Our regulated subsidiaries generate significant cash flows from operations and are subject to financial regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies.

In 2017, our U.S. regulated subsidiaries paid their parent companies dividends of $3.7 billion. For the year ended December 31, 2016, our U.S. regulated subsidiaries paid their parent companies dividends of $3.9 billion. See Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements” for further detail concerning our regulated subsidiary dividends.

Our nonregulated businesses also generate significant cash flows from operations that are available for general corporate use. Cash flows generated by these entities, combined with dividends from our regulated entities and financing through the issuance of long-term debt as well as issuance of commercial paper or the ability to draw under our committed credit facilities, further strengthen our operating and financial flexibility. We use these cash flows to expand our businesses through acquisitions, reinvest in our businesses through capital expenditures, repay debt and return capital to our shareholders through shareholder dividends and/or repurchases of our common stock, depending on market conditions.

Summary of our Major Sources and Uses of Cash and Cash Equivalents

(in millions)	For the Years Ended December 31, 2017	2016	2015	Change 2017 vs. 2016	Change 2016 vs. 2015
Sources of cash:					
Cash provided by operating activities	$ 13,596	$ 9,795	$ 9,740	$ 3,801	$ 55
Issuances of long-term debt and commercial paper, net of repayments	—	990	14,607	(990)	(13,617)
Proceeds from common share issuances	688	429	402	259	27

Effect of exchange rate changes on cash and cash equivalents	(5)	78	(156)	(83)	234
Net increase (decrease) in cash and cash equivalents	$ 1,551	$ (493)	$ 3,428	$ 2,044	$ (3,921)

2017 Cash Flows Compared to 2016 Cash Flows

Increased cash flows provided by operating activities were primarily driven by higher net earnings and changes in working capital accounts, partially offset by the change in net deferred tax liabilities driven by tax reform.

Other significant changes in sources or uses of cash year-over-year included net repayments of debt compared to 2016 net proceeds from debt issuances, which were partially offset by lower net purchases of investments.

2016 Cash Flows Compared to 2015 Cash Flows

Cash flows provided by operating activities increased slightly as higher net earnings were mostly offset by increased CMS receivables and other operating items.

Other significant changes in sources or uses of cash year-over-year included increased net purchases of investments in 2016 and the decreases in cash paid for acquisitions and proceeds from debt issuances due to the 2015 acquisition of Catamaran.

Financial Condition

As of December 31, 2017, our cash, cash equivalent and available-for-sale investment balances of $42.4 billion included $12.0 billion of cash and cash equivalents (of which approximately $800 million was available for

general corporate use), $28.4 billion of debt securities and $2.0 billion of investments in equity securities consisting of investments in non-U.S. dollar fixed-income funds; employee savings plan related investments; and dividend paying stocks. Given the significant portion of our portfolio held in cash equivalents, we do not anticipate fluctuations in the aggregate fair value of our financial assets to have a material impact on our liquidity or capital position. Other sources of liquidity, primarily from operating cash flows and our commercial paper program, which is supported by our bank credit facilities, reduce the need to sell investments during adverse market conditions. See Note 4 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for further detail concerning our fair value measurements.

Our available-for-sale debt portfolio had a weighted-average duration of 3.2 years and a weighted-average credit rating of "Double A" as of December 31, 2017. When multiple credit ratings are available for an individual security, the average of the available ratings is used to determine the weighted-average credit rating.

Capital Resources and Uses of Liquidity

In addition to cash flows from operations and cash and cash equivalent balances available for general corporate use, our capital resources and uses of liquidity are as follows:

Commercial Paper and Bank Credit Facilities. Our revolving bank credit facilities provide liquidity support for our commercial paper borrowing program, which facilitates the private placement of senior unsecured debt through third-party broker-dealers, and are available for general corporate purposes. For more information on our commercial paper and bank credit facilities, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Our revolving bank credit facilities contain various covenants, including covenants requiring us to maintain a defined debt to debt-plus-shareholders' equity ratio of not more than 55%. As of December 31, 2017, our debt to debt-plus-shareholders' equity ratio, as defined and calculated under the credit facilities, was approximately 37%.

Long-Term Debt. Periodically, we access capital markets to issue long-term debt for general corporate purposes, such as, to meet our working capital requirements, to refinance debt, to finance acquisitions or for share repurchases. For more information on our debt, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8 "Financial Statements."

Credit Ratings. Our credit ratings as of December 31, 2017 were as follows:

	Moody's		S&P Global		Fitch		A.M. Best	
	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook
Senior unsecured debt	A3	Stable	A+	Negative [(a)]	A-	Stable	bbb+	Stable
Commercial paper	P-2	n/a	A-1	n/a	F1	n/a	AMB-2	n/a

(a) In January 2018, S&P Global affirmed our ratings and changed our outlook to Stable.

The availability of financing in the form of debt or equity is influenced by many factors, including our profitability, operating cash flows, debt levels, credit ratings, debt covenants and other contractual restrictions, regulatory requirements and economic and market conditions. For example, a significant downgrade in our credit ratings or adverse conditions in the capital markets may increase the cost of borrowing for us or limit our access to capital.

Share Repurchase Program. As of December 31, 2017, we had Board authorization to purchase up to 42 million shares of our common stock. For more information on our share repurchase program, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Dividends. In June 2017, our Board increased our quarterly cash dividend to shareholders by 20% to an annual dividend rate of $3.00 per share. For more information on our dividend, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

The following table summarizes future obligations due by period as of December 31, 2017, under our various contractual obligations and commitments:

(in millions)	2018	2019 to 2020	2021 to 2022	Thereafter	Total
Debt (a)	$ 4,006	$ 7,017	$ 7,241	$ 30,609	$ 48,873
Operating leases	538	884	851	809	3,082
Purchase and other obligations (b)	833	866	462	293	2,454
Other liabilities (c)	823	284	284	5,589	6,980
Redeemable noncontrolling interests (d)	1,575	358	25	231	2,189
Total contractual obligations	$ 7,775	$ 9,409	$ 8,863	$ 37,531	$ 63,578

(a) Includes interest coupon payments and maturities at par or put values. The table also assumes amounts are outstanding through their contractual term. See Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more detail.

(b) Includes fixed or minimum commitments under existing purchase obligations for goods and services, including agreements that are cancelable with the payment of an early termination penalty and remaining capital commitments for venture capital funds and other funding commitments. Excludes agreements that are cancelable without penalty and excludes liabilities to the extent recorded in our Consolidated Balance Sheets as of December 31, 2017.

(c) Includes obligations associated with contingent consideration and other payments related to business acquisitions, certain employee benefit programs, amounts accrued for guaranty fund assessments, unrecognized tax benefits, and various other long-term liabilities. Due to uncertainty regarding payment timing, obligations for employee benefit programs, charitable contributions, future settlements and other liabilities have been classified as "Thereafter."

(d) Includes commitments for redeemable shares of our subsidiaries. When the timing of the redemption is indeterminable, the commitment has been classified as "Thereafter."

Pending Acquisitions. In December 2017, we entered into agreements to acquire two companies in the health care sector for a total of approximately $7.7 billion, which are not reflected in the table above. One of the acquisitions closed in January 2018; the other is expected to close later in 2018, subject to regulatory approval and other customary closing conditions.

We do not have other significant contractual obligations or commitments that require cash resources. However, we continually evaluate opportunities to expand our operations, which include internal development of new products, programs and technology applications and may include acquisitions.

OFF-BALANCE SHEET ARRANGEMENTS

As of December 31, 2017, we were not involved in any off-balance sheet arrangements, which have or are reasonably likely to have a material effect on our financial condition, results of operations or liquidity.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 2 of Notes to the Consolidated Financial Statements in Part II, Item 8 "Financial Statements" for a discussion of new accounting pronouncements that affect us.

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those estimates that require management to make challenging, subjective or complex judgments, often because they must estimate the effects of matters that are inherently uncertain and may

change in subsequent periods. Critical accounting estimates involve judgments and uncertainties that are sufficiently sensitive and may result in materially different results under different assumptions and conditions.

Medical Costs Payable

Medical costs and medical costs payable include estimates of our obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received or processed. Depending on the health care professional and type of service, the typical billing lag for services can be up to 90 days from the date of service. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months. As of December 31, 2017, our days outstanding in medical payables was 50 days, calculated as total medical payables divided by total medical costs times the number of days in the period.

In each reporting period, our operating results include the effects of more completely developed medical costs payable estimates associated with previously reported periods. If the revised estimate of prior period medical costs is less than the previous estimate, we will decrease reported medical costs in the current period (favorable development). If the revised estimate of prior period medical costs is more than the previous estimate, we will increase reported medical costs in the current period (unfavorable development). Medical costs in 2017, 2016 and 2015 included favorable medical cost development related to prior years of $690 million, $220 million and $320 million, respectively.

In developing our medical costs payable estimates, we apply different estimation methods depending on the month for which incurred claims are being estimated. For example, for the most recent two months, we estimate claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data is available, supplemented by a review of near-term completion factors.

Completion Factors. A completion factor is an actuarial estimate, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by us at the date of estimation. Completion factors are the most significant factors we use in developing our medical costs payable estimates for periods prior to the most recent two months. Completion factors include judgments in relation to claim submissions such as the time from date of service to claim receipt, claim inventory levels and claim processing backlogs, as well as other factors. If actual claims submission rates from providers (which can be influenced by a number of factors, including provider mix and electronic versus manual submissions) or our claim processing patterns are different than estimated, our reserve estimates may be significantly impacted.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for those periods as of December 31, 2017:

Completion Factors (Decrease) Increase in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
(0.75)%	$ 486
(0.50)	323
(0.25)	161
0.25	(160)
0.50	(320)
0.75	(478)

Medical Cost Per Member Per Month Trend Factors. Medical cost PMPM trend factors are significant factors we use in developing our medical costs payable estimates for the most recent two months. Medical cost trend factors are developed through a comprehensive analysis of claims incurred in prior months, provider contracting and expected unit costs, benefit design and a review of a broad set of health care utilization indicators, including but not limited to, pharmacy utilization trends, inpatient hospital authorization data and influenza incidence data from the National Centers for Disease Control. We also consider macroeconomic variables such as

gross-domestic product growth, employment and disposable income. A large number of factors can cause the medical cost trend to vary from our estimates, including: our ability and practices to manage medical and pharmaceutical costs, changes in level and mix of services utilized, mix of benefits offered, including the impact of co-pays and deductibles, changes in medical practices, catastrophes and epidemics.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for the most recent two months as of December 31, 2017:

Medical Cost PMPM Trend Increase (Decrease) in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
3%	$ 623
2	415
1	208
(1)	(208)
(2)	(415)
(3)	(623)

The completion factors and medical costs PMPM trend factors analyses above include outcomes that are considered reasonably likely based on our historical experience estimating liabilities for incurred but not reported benefit claims.

Management believes the amount of medical costs payable is reasonable and adequate to cover our liability for unpaid claims as of December 31, 2017; however, actual claim payments may differ from established estimates as discussed above. Assuming a hypothetical 1% difference between our December 31, 2017 estimates of medical costs payable and actual medical costs payable, excluding AARP Medicare Supplement Insurance and any potential offsetting impact from premium rebates, 2017 net earnings would have increased or decreased by $110 million.

For more detail related to our medical cost estimates, see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements.”

Revenues

We derive a substantial portion of our revenues from health care insurance premiums. We recognize premium revenues in the period eligible individuals are entitled to receive health care services. Customers are typically billed monthly at a contracted rate per eligible person multiplied by the total number of people eligible to receive services.

Our Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under the CMS risk adjustment payment methodology. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. We estimate risk adjustment revenues based upon the data submitted and expected to be submitted to CMS. As a result of the variability of factors that determine such estimations, the actual amount of CMS’ retroactive payments could be materially more or less than our estimates. This may result in favorable or unfavorable adjustments to our Medicare premium revenue and, accordingly, our profitability. For more detail on premium revenues, see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements.” Risk adjustment data for our plans is subject to review by the federal and state governments, including audit by regulators. See Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements” for additional information regarding these audits. Our estimates of premiums to be recognized are reduced by any expected premium minimum MLR rebates payable by us.

Goodwill and Intangible Assets

Goodwill. We evaluate goodwill for impairment annually or more frequently when an event occurs or circumstances change that indicate the carrying value may not be recoverable. When testing goodwill for impairment, we may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. During a qualitative analysis, we consider the impact of changes, if any, to the following factors: macroeconomic, industry and market factors, cost factors, changes in overall financial performance, and any other relevant events and uncertainties impacting a reporting unit. If our qualitative assessment indicates that goodwill impairment is more likely than not, we perform additional quantitative analyses. We may also elect to skip the qualitative testing and proceed directly to the quantitative testing. For reporting units where a quantitative analysis is performed, we perform a multi-step test measuring the fair values of the reporting units and comparing them to their aggregate carrying values, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows, which include assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods and discount rates. For each reporting unit, comparative market multiples are used to corroborate the results of our discounted cash flow test.

Forecasts and long-term growth rates used for our reporting units are consistent with, and use inputs from, our internal long-term business plan and strategies. Key assumptions used in these forecasts include:

- *Revenue trends.* Key revenue drivers for each reporting unit are determined and assessed. Significant factors include: customer and/or membership growth, medical trends and the impact and expectations of regulatory environments. Additional macro-economic assumptions relating to unemployment, GDP growth, interest rates and inflation are also evaluated and incorporated, as appropriate.
- *Medical cost trends.* For further discussion of medical cost trends, see the “Medical Cost Trend” section of Executive Overview-Business Trends above and the discussion in the “Medical Costs Payable” critical accounting estimate above. Similar factors, including historical and expected medical cost trend levels, are considered in estimating our long-term medical trends at the reporting unit level.
- *Operating productivity.* We forecast expected operating cost levels based on historical levels and expectations of future operating cost levels.
- *Capital levels.* The operating and long-term capital requirements for each business are considered.

Discount rates are determined for each reporting unit and include consideration of the implied risk inherent in their forecasts. Our most significant estimate in the discount rate determinations involves our adjustments to the peer company weighted average costs of capital that reflect reporting unit-specific factors. We have not made any adjustments to decrease a discount rate below the calculated peer company weighted average cost of capital for any reporting unit. Company-specific adjustments to discount rates are subjective and thus are difficult to measure with certainty. The passage of time and the availability of additional information regarding areas of uncertainty with respect to the reporting units’ operations could cause these assumptions to change in the future. We completed our annual impairment tests for goodwill as of October 1, 2017. All of our reporting units had fair values substantially in excess of their carrying values.

Intangible Assets. Our finite-lived intangible assets are subject to impairment tests when events or circumstances indicate that an asset’s (or asset group’s) carrying value may exceed its estimated fair value. Consideration is given on a quarterly basis to a number of potential impairment indicators, including: changes in the use of the assets, changes in legal or other business factors that could affect value, experienced or expected operating cash-flow deterioration or losses, adverse changes in customer populations, adverse competitive or technological advances that could impact value and other factors.

Our indefinite-lived intangible assets are tested for impairment on an annual basis, or more frequently if impairment indicators exist. To determine if an indefinite-lived intangible asset is impaired, we compare its estimated fair value to its carrying value. If the carrying value exceeds its estimated fair value, an impairment would be recorded for the amount by which the carrying value exceeds its estimated fair value. Intangible assets were not impaired in 2017.

LEGAL MATTERS

A description of our legal proceedings is presented in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

CONCENTRATIONS OF CREDIT RISK

Investments in financial instruments such as marketable securities and accounts receivable may subject us to concentrations of credit risk. Our investments in marketable securities are managed under an investment policy authorized by our Board of Directors. This policy limits the amounts that may be invested in any one issuer and generally limits our investments to U.S. government and agency securities, state and municipal securities and corporate debt obligations that are investment grade. Concentrations of credit risk with respect to accounts receivable are limited due to the large number of employer groups and other customers that constitute our client base. As of December 31, 2017, there were no significant concentrations of credit risk.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risks are exposures to changes in interest rates that impact our investment income and interest expense and the fair value of certain of our fixed-rate investments and debt, as well as foreign currency exchange rate risk of the U.S. dollar primarily to the Brazilian real.

As of December 31, 2017, we had $15 billion of financial assets on which the interest rates received vary with market interest rates, which may materially impact our investment income. Also as of December 31, 2017, $8.5 billion of our financial liabilities, which include commercial paper, debt and deposit liabilities, were at interest rates that vary with market rates, either directly or through the use of related interest rate swap contracts. The fair value of certain of our fixed-rate investments and debt also varies with market interest rates. As of December 31, 2017, $25.9 billion of our investments were fixed-rate debt securities and $28.7 billion of our debt was non-swapped fixed-rate term debt. An increase in market interest rates decreases the market value of fixed-rate investments and fixed-rate debt. Conversely, a decrease in market interest rates increases the market value of fixed-rate investments and fixed-rate debt.

We manage exposure to market interest rates by diversifying investments across different fixed-income market sectors and debt across maturities, as well as by endeavoring to match our floating-rate assets and liabilities over time, either directly or through the use of interest rate swap contracts. Unrealized gains and losses on investments in available-for-sale securities are reported in comprehensive income.

The following tables summarize the impact of hypothetical changes in market interest rates across the entire yield curve by 1% point or 2% points as of December 31, 2017 and 2016 on our investment income and interest expense per annum and the fair value of our investments and debt (in millions, except percentages):

	December 31, 2017			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum (a)	Interest Expense Per Annum (a)	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 300	$ 170	$ (1,958)	$ (4,546)
1	150	85	(933)	(2,460)
(1)	(150)	(85)	950	2,923
(2)	(197)	(133)	1,773	6,414

	December 31, 2016			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum (a)	Interest Expense Per Annum (a)	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 263	$ 245	$ (1,711)	$ (3,470)
1	132	122	(873)	(1,860)
(1)	(105)	(95)	855	2,244
(2)	nm	nm	1,562	4,784

nm = not meaningful

(a) Given the low absolute level of short-term market rates on our floating-rate assets and liabilities as of December 31, 2017 and 2016, the assumed hypothetical change in interest rates does not reflect the full 100 and 200 basis point reduction, respectively, in interest income or interest expense, in 2017 and 2016, respectively, as the rate cannot fall below zero.

(b) As of December 31, 2017 and 2016, some of our investments had interest rates below 2% so the assumed hypothetical change in the fair value of investments does not reflect the full 200 basis point reduction.

We have an exposure to changes in the value of the Brazilian real to the U.S. dollar in translation of UnitedHealthcare Brazil's operating results at the average exchange rate over the accounting period, and UnitedHealthcare Brazil's assets and liabilities at the spot rate at the end of the accounting period. The gains or losses resulting from translating foreign assets and liabilities into U.S. dollars are included in equity and comprehensive income.

An appreciation of the U.S. dollar against the Brazilian real reduces the carrying value of the net assets denominated in Brazilian real. For example, as of December 31, 2017, a hypothetical 10% and 25% increase in the value of the U.S. dollar against the Brazilian real would have caused a reduction in net assets of approximately $500 million and $1.1 billion, respectively. We manage exposure to foreign currency earnings risk primarily by conducting our international business operations in their functional currencies.

As of December 31, 2017, we had $2.0 billion of investments in equity securities, consisting of investments in non-U.S. dollar fixed-income funds; employee savings plan related investments; and dividend paying stocks. Valuations in non-U.S. dollar funds are subject to foreign exchange rates.

ITEM 8. FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of UnitedHealth Group Incorporated and Subsidiaries:

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 13, 2018, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinions

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ DELOITTE & TOUCHE LLP

Minneapolis, Minnesota
February 13, 2018

We have served as the Company's auditor since 2002.

UnitedHealth Group
Notes to the Consolidated Financial Statements

1. Description of Business

UnitedHealth Group Incorporated (individually and together with its subsidiaries, "UnitedHealth Group" and "the Company") is a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone.

Through its diversified family of businesses, the Company leverages core competencies in data and health information; advanced technology; and clinical expertise to help meet the demands of the health system. These core competencies are deployed within two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

2. Basis of Presentation, Use of Estimates and Significant Accounting Policies

Basis of Presentation

The Company has prepared the Consolidated Financial Statements according to U.S. Generally Accepted Accounting Principles (GAAP) and has included the accounts of UnitedHealth Group and its subsidiaries.

Use of Estimates

These Consolidated Financial Statements include certain amounts based on the Company's best estimates and judgments. The Company's most significant estimates relate to estimates and judgments for medical costs payable and revenues, valuation and impairment analysis of goodwill and other intangible assets and estimates of other current liabilities and other current receivables. Certain of these estimates require the application of complex assumptions and judgments, often because they involve matters that are inherently uncertain and will likely change in subsequent periods. The impact of any change in estimates is included in earnings in the period in which the estimate is adjusted.

Revenues

Premiums

Premium revenues are primarily derived from risk-based health insurance arrangements in which the premium is typically at a fixed rate per individual served for a one-year period, and the Company assumes the economic risk of funding its customers' health care and related administrative costs.

Premium revenues are recognized in the period in which eligible individuals are entitled to receive health care benefits. Health care premium payments received from the Company's customers in advance of the service period are recorded as unearned revenues. Fully insured commercial products of U.S. health plans, Medicare Advantage and Medicare Prescription Drug Benefit (Medicare Part D) plans with medical loss ratios as calculated under the definitions in the Patient Protection and Affordable Care Act (ACA) and related federal and state regulations and implementing regulations, that fall below certain targets are required to rebate ratable portions of their premiums annually. Medicare Advantage premium revenue includes the impact of Centers for Medicare & Medicaid Services (CMS) quality bonuses based on plans' Star ratings.

Premium revenues are recognized based on the estimated premiums earned net of projected rebates because the Company is able to reasonably estimate the ultimate premiums of these contracts. The Company also records premium revenues from capitation arrangements at its OptumHealth businesses.

The Company's Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under CMS' risk adjustment payment methodology. CMS deploys a risk adjustment model that apportions

premiums paid to all health plans according to health severity and certain demographic factors. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. Under this risk adjustment methodology, CMS calculates the risk adjusted premium payment using diagnosis data from hospital inpatient, hospital outpatient and physician treatment settings. The Company and health care providers collect, capture and submit the necessary and available diagnosis data to CMS within prescribed deadlines. The Company estimates risk adjustment premium revenues based upon the diagnosis data submitted and expected to be submitted to CMS. Risk adjustment data for the Company's plans are subject to review by the government, including audit by regulators. See Note 12 for additional information regarding these audits.

Products and Services

For the Company's OptumRx pharmacy care services business, the majority of revenues are derived from products sold through a contracted network of retail pharmacies or home delivery and specialty pharmacy facilities. Product revenues include ingredient costs (net of rebates), a negotiated dispensing fee and customer co-payments for drugs dispensed through the Company's mail-service pharmacy. In retail pharmacy transactions, revenues recognized exclude the member's applicable co-payment. Pharmacy products are billed to customers based on the number of transactions occurring during the billing period. Product revenues are recognized when the prescriptions are dispensed through the retail network or received by consumers through the Company's mail-service pharmacy. The Company has entered into contracts in which it is primarily obligated to pay its network pharmacy providers for benefits provided to their customers regardless of whether the Company is paid. The Company is also involved in establishing the prices charged by retail pharmacies, determining which drugs will be included in formulary listings and selecting which retail pharmacies will be included in the network offered to plan sponsors' members and accordingly, are reported on a gross basis.

Services revenue consists of fees derived from services performed for customers that self-insure the health care costs of their employees and employees' dependents. Under service fee contracts, the Company receives monthly, a fixed fee per employee, which is recognized as revenue as the Company performs, or makes available the applicable services to the customer. The customers retain the risk of financing health care costs for their employees and employees' dependents, and the Company administers the payment of customer funds to physicians and other health care professionals from customer-funded bank accounts. As the Company has neither the obligation for funding the health care costs, nor the primary responsibility for providing the medical care, the Company does not recognize premium revenue and medical costs for these contracts in its Consolidated Financial Statements. For these fee-based customer arrangements, the Company provides coordination and facilitation of medical services; transaction processing; customer, consumer and care professional services; and access to contracted networks of physicians, hospitals and other health care professionals. These services are performed throughout the contract period.

Revenues are also comprised of a number of services and products sold through Optum. OptumHealth's service revenues include net patient service revenues that are recorded based upon established billing rates, less allowances for contractual adjustments, and are recognized as services are provided. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds. OptumInsight provides software and information products, advisory consulting arrangements and services outsourcing contracts, which may be delivered over several years. OptumInsight revenues are generally recognized over time and measured each period based on the progress to date as services are performed or made available to customers.

As of December 31, 2017, accounts receivables related to products and services were $3.7 billion. In 2017, the Company had no material bad-debt expense and there were no material contract assets, contract liabilities or deferred contract costs recorded on the Consolidated Balance Sheet as of December 31, 2017.

For the year ended December 31, 2017, revenue recognized from performance obligations related to prior periods (for example, due to changes in transaction price), was not material.

Revenue expected to be recognized in any future year related to remaining performance obligations, excluding revenue pertaining to contracts that have an original expected duration of one year or less, contracts where revenue is recognized as invoiced and contracts with variable consideration related to undelivered performance obligations, is not material.

See Note 13 for disaggregation of revenue by segment and type.

Medical Costs and Medical Costs Payable

The Company's estimate of medical costs payable represents management's best estimate of its liability for unpaid medical costs as of December 31, 2017.

Each period, the Company re-examines previously established medical costs payable estimates based on actual claim submissions and other changes in facts and circumstances. As more complete claim information becomes available, the Company adjusts the amount of the estimates and includes the changes in estimates in medical costs in the period in which the change is identified. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months.

Medical costs and medical costs payable include estimates of the Company's obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received, processed, or paid. The Company develops estimates for medical care services incurred but not reported (IBNR), which includes estimates for claims that have not been received or fully processed, using an actuarial process that is consistently applied, centrally controlled and automated. The actuarial models consider factors such as time from date of service to claim processing, seasonal variances in medical care consumption, health care professional contract rate changes, medical care utilization and other medical cost trends, membership volume and demographics, the introduction of new technologies, benefit plan changes, and business mix changes related to products, customers and geography.

In developing its medical costs payable estimates, the Company applies different estimation methods depending on which incurred claims are being estimated. For the most recent two months, the Company estimates claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data are available, supplemented by a review of near-term completion factors (actuarial estimates, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by the Company at the date of estimation). For months prior to the most recent two months, the Company applies the completion factors to actual claims adjudicated-to-date to estimate the expected amount of ultimate incurred claims for those months.

Cost of Products Sold

The Company's cost of products sold includes the cost of pharmaceuticals dispensed to unaffiliated customers either directly at its mail and specialty pharmacy locations, or indirectly through its nationwide network of participating pharmacies. Rebates attributable to non-affiliated clients are accrued as rebates receivable and a reduction of cost of products sold with a corresponding payable for the amounts of the rebates to be remitted to those non-affiliated clients in accordance with their contracts and recorded in the Consolidated Statements of Operations as a reduction of product revenue. Cost of products sold also includes the cost of personnel to support the Company's transaction processing services, system sales, maintenance and professional services.

Cash, Cash Equivalents and Investments

Cash and cash equivalents are highly liquid investments that have an original maturity of three months or less. The fair value of cash and cash equivalents approximates their carrying value because of the short maturity of the instruments.

Investments with maturities of less than one year are classified as short-term. Because of regulatory requirements, certain investments are included in long-term investments regardless of their maturity date. The Company classifies these investments as held-to-maturity and reports them at amortized cost. Substantially all other investments are classified as available-for-sale and reported at fair value based on quoted market prices, where available.

The Company excludes unrealized gains and losses on investments in available-for-sale securities from net earnings and reports them as comprehensive income and, net of income tax effects, as a separate component of equity. To calculate realized gains and losses on the sale of investments, the Company specifically identifies the cost of each investment sold.

The Company evaluates an investment for impairment by considering the length of time and extent to which market value has been less than cost or amortized cost, the financial condition and near-term prospects of the issuer as well as specific events or circumstances that may influence the operations of the issuer and the Company's intent to sell the security or the likelihood that it will be required to sell the security before recovery of the entire amortized cost.

New information and the passage of time can change these judgments. The Company manages its investment portfolio to limit its exposure to any one issuer or market sector, and largely limits its investments to investment grade quality. Securities downgraded below policy minimums after purchase will be disposed of in accordance with the Company's investment policy.

Assets Under Management

The Company provides health insurance products and services to members of AARP under a Supplemental Health Insurance Program (the AARP Program) and to AARP members and non-members under separate Medicare Advantage and Medicare Part D arrangements. The products and services under the AARP Program include supplemental Medicare benefits, hospital indemnity insurance, including insurance for individuals between 50 to 64 years of age and other related products.

Pursuant to the Company's agreement, AARP Program assets are managed separately from the Company's general investment portfolio and are used to pay costs associated with the AARP Program. These assets are invested at the Company's discretion, within investment guidelines approved by AARP. The Company does not guarantee any rates of return on these investments and, upon any transfer of the AARP Program contract to another entity, the Company would transfer cash equal in amount to the fair value of these investments at the date of transfer to that entity. Because the purpose of these assets is to fund the medical costs payable, the rate stabilization fund (RSF) liabilities and other related liabilities associated with this AARP contract, assets under management are classified as current assets, consistent with the classification of these liabilities.

The effects of changes in other balance sheet amounts associated with the AARP Program also accrue to the overall benefit of the AARP policyholders through the RSF balance. Accordingly, the Company excludes the effect of such changes in its Consolidated Statements of Cash Flows.

Other Current Receivables

Other current receivables include amounts due from pharmaceutical manufacturers for rebates and Medicare Part D drug discounts and other miscellaneous amounts due to the Company.

The Company's pharmacy care services businesses contract with pharmaceutical manufacturers, some of which provide rebates based on use of the manufacturers' products by its affiliated and non-affiliated clients. The Company accrues rebates as they are earned by its clients on a monthly basis based on the terms of the applicable contracts, historical data and current estimates. The pharmacy care services businesses bill these rebates to the

manufacturers on a monthly or quarterly basis depending on the contractual terms and record rebates attributable to affiliated clients as a reduction to medical costs. The Company generally receives rebates from two to five months after billing. As of December 31, 2017 and 2016, total pharmaceutical manufacturer rebates receivable included in other receivables in the Consolidated Balance Sheets amounted to $3.8 billion and $3.3 billion, respectively.

As of December 31, 2017 and 2016, the Company's Medicare Part D receivables amounted to $0.5 billion and $1.5 billion, respectively.

Property, Equipment and Capitalized Software

Property, equipment and capitalized software are stated at cost, net of accumulated depreciation and amortization. Capitalized software consists of certain costs incurred in the development of internal-use software, including external direct costs of materials and services and applicable payroll costs of employees devoted to specific software development.

The Company calculates depreciation and amortization using the straight-line method over the estimated useful lives of the assets. The useful lives for property, equipment and capitalized software are:

Furniture, fixtures and equipment	3 to 10 years
Buildings	35 to 40 years
Capitalized software	3 to 5 years

Leasehold improvements are depreciated over the shorter of the remaining lease term or their estimated useful economic life.

Goodwill

To determine whether goodwill is impaired, annually or more frequently if needed, the Company performs a multi-step impairment test. The Company may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. The Company may also elect to skip the qualitative testing and proceed directly to the quantitative testing. When performing quantitative testing, the Company first estimates the fair values of its reporting units using discounted cash flows. To determine fair values, the Company must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value and discount rates. Comparative market multiples are used to corroborate the results of the discounted cash flow test. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

There was no impairment of goodwill during the year ended December 31, 2017.

Intangible Assets

The Company's intangible assets are subject to impairment tests when events or circumstances indicate that an intangible asset (or asset group) may be impaired. The Company's indefinite lived intangible assets are also tested for impairment annually. There was no impairment of intangible assets during the year ended December 31, 2017.

Other Current Liabilities

Other current liabilities include health savings account deposits ($6.4 billion and $5.7 billion as of December 31, 2017 and 2016, respectively), deposits under the Medicare Part D program ($1.6 billion, and $0.7 billion as of

December 31, 2017 and 2016, respectively), the RSF associated with the AARP Program, accruals for premium rebate payments under the ACA, the current portion of future policy benefits and customer balances.

Policy Acquisition Costs

The Company's short duration health insurance contracts typically have a one-year term and may be canceled by the customer with at least 30 days' notice. Costs related to the acquisition and renewal of short duration customer contracts are charged to expense as incurred.

Redeemable Noncontrolling Interests

Redeemable noncontrolling interests in the Company's subsidiaries whose redemption is outside the control of the Company are classified as temporary equity. The following table provides details of the Company's redeemable noncontrolling interests' activity for the years ended December 31, 2017 and 2016:

(in millions)	2017	2016
Redeemable noncontrolling interests, beginning of period	$2,012	$1,736
Net earnings	71	16
Acquisitions	565	34
Redemptions	(309)	(123)
Distributions	(38)	(11)
Fair value and other adjustments	(112)	360
Redeemable noncontrolling interests, end of period	$2,189	$2,012

Share-Based Compensation

The Company recognizes compensation expense for share-based awards, including stock options, stock-settled stock appreciation rights (SARs) and restricted stock and restricted stock units (collectively, restricted shares), on a straight-line basis over the related service period (generally the vesting period) of the award, or to an employee's eligible retirement date under the award agreement, if earlier. Restricted shares vest ratably, primarily over two to five years and compensation expense related to restricted shares is based on the share price on date of grant. Stock options and SARs vest ratably primarily over four years and may be exercised up to 10 years from the date of grant. Compensation expense related to stock options and SARs is based on the fair value at date of grant, which is estimated on the date of grant using a binomial option-pricing model. Under the Company's Employee Stock Purchase Plan (ESPP), eligible employees are allowed to purchase the Company's stock at a discounted price, which is 85% of the lower market price of the Company's common stock at the beginning or at the end of the six-month purchase period. Share-based compensation expense for all programs is recognized in operating costs in the Consolidated Statements of Operations.

Net Earnings Per Common Share

The Company computes basic earnings per common share attributable to UnitedHealth Group common shareholders by dividing net earnings attributable to UnitedHealth Group common shareholders by the weighted-average number of common shares outstanding during the period. The Company determines diluted net earnings per common share attributable to UnitedHealth Group common shareholders using the weighted-average number of common shares outstanding during the period, adjusted for potentially dilutive shares associated with stock options, SARs, restricted shares and the ESPP (collectively, common stock equivalents), using the treasury stock method. The treasury stock method assumes a hypothetical issuance of shares to settle the share-based awards, with the assumed proceeds used to purchase common stock at the average market price for the period. Assumed proceeds include the amount the employee must pay upon exercise and any unrecognized compensation cost. The difference between the number of shares assumed issued and number of shares assumed purchased represents the dilutive shares.

Health Insurance Industry Tax

The ACA includes an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products.

The Company estimates its liability for the Health Insurance Industry Tax based on a ratio of the Company's applicable net premiums written compared to the U.S. health insurance industry total applicable net premiums, both for the previous calendar year. The Company records in full the estimated liability for the Health Insurance Industry Tax at the beginning of the calendar year with a corresponding deferred cost that is amortized to operating costs on the Consolidated Statements of Operations using a straight-line method over the calendar year. The liability is recorded in accounts payable and accrued liabilities and the corresponding deferred cost is recorded in prepaid expenses and other current assets on the Consolidated Balance Sheets. A provision in the 2016 Federal Budget imposed a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax.

Recently Issued Accounting Standards

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2016-02, "Leases (Topic 842)" (ASU 2016-02). Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both finance and operating leases. For leases with a term of 12 months or less, an entity may elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing and uncertainty of cash flows pertaining to an entity's leases. Companies are currently required to adopt the new standard using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption of ASU 2016-02 is permitted. When adopted, the Company does not expect ASU 2016-02 to have a material impact on its results of operations, equity or cash flows. The impact of ASU 2016-02 on the Company's consolidated financial position will be based on leases outstanding at the time of adoption.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01). The new guidance changes the current accounting related to (i) the classification and measurement of certain equity investments, (ii) the presentation of changes in the fair value of financial liabilities measured under the fair value option that are due to instrument-specific credit risk, and (iii) certain disclosures associated with the fair value of financial instruments. Most notably, ASU 2016-01 requires that equity investments, with certain exemptions, be measured at fair value with changes in fair value recognized in net income as opposed to other comprehensive income. The Company adopted ASU 2016-01 effective January 1, 2018 as required. ASU 2016-01 did not have a material impact on the Company's consolidated financial position, results of operations, equity or cash flows.

Recently Adopted Accounting Standards

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" as modified by subsequently issued ASUs 2015-14, 2016-08, 2016-10, 2016-12 and 2016-20 (collectively ASU 2014-09). ASU 2014-09 superseded existing revenue recognition standards with a single model unless those contracts are within the scope of other standards (e.g., an insurance entity's insurance contracts). The revenue recognition principle in ASU 2014-09 is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The Company early adopted the new standard effective January 1, 2017, as allowed, using the modified retrospective approach. A significant majority of the Company's revenues are not subject to the new guidance. The adoption of ASU 2014-09 did not have a material impact on the Company's consolidated financial position, results of operations, equity or cash flows as of the adoption date or for the year ended December 31, 2017.

The Company has determined that there have been no other recently adopted or issued accounting standards that had, or will have, a material impact on its Consolidated Financial Statements.

3. Investments

A summary of short-term and long-term investments by major security type is as follows:

(in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2017				
Debt securities — available-for-sale:				
U.S. government and agency obligations	$ 2,673	$ 1	$ (30)	$ 2,644
State and municipal obligations	7,596	99	(35)	7,660
Corporate obligations	13,181	57	(44)	13,194
U.S. agency mortgage-backed securities	3,942	7	(38)	3,911
Non-U.S. agency mortgage-backed securities	1,018	3	(6)	1,015
Total debt securities — available-for-sale	28,410	167	(153)	28,424
Equity securities	2,026	7	(41)	1,992
Debt securities — held-to-maturity:				
U.S. government and agency obligations	254	1	(1)	254
State and municipal obligations	2	—	—	2
Corporate obligations	280	—	—	280

Total investments	$ 26,859	$ 145	$ (290)	$26,714

Nearly all of the Company's investments in mortgage-backed securities were rated AAA as of December 31, 2017.

The amortized cost and fair value of debt securities as of December 31, 2017, by contractual maturity, were as follows:

	Available-for-Sale		Held-to-Maturity	
(in millions)	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	$ 3,630	$ 3,628	$ 155	$ 155
Due after one year through five years	10,658	10,631	131	130
Due after five years through ten years	6,894	6,932	103	103
Due after ten years	2,268	2,307	147	148

Equity securities	$ 93	$ (5)	$ 91	$ (42)	$ 184	$ (47)

The Company's unrealized losses from all securities as of December 31, 2017 were generated from approximately 13,000 positions out of a total of 29,000 positions. The Company believes that it will collect the principal and interest due on its debt securities that have an amortized cost in excess of fair value. The unrealized losses were primarily caused by interest rate increases and not by unfavorable changes in the credit quality associated with these securities. At each reporting period, the Company evaluates securities for impairment when the fair value of the investment is less than its amortized cost. The Company evaluated the underlying credit quality and credit ratings of the issuers, noting no significant deterioration since purchase.

As of December 31, 2017, the Company did not have the intent to sell any of the securities in an unrealized loss position. Therefore, the Company believes these losses to be temporary.

The Company's investments in equity securities consist of investments in Brazilian real denominated fixed-income funds, employee savings plan related investments and dividend paying stocks. The Company evaluated its investments in equity securities for severity and duration of unrealized loss, overall market volatility and other market factors. Additionally, as of December 31, 2017, the Company's investments included $898 million of equity method investments in operating businesses in the health care sector.

Net realized gains reclassified out of accumulated other comprehensive income were from the following sources:

	For the Years Ended December 31,		
(in millions)	**2017**	**2016**	**2015**
Total other-than-temporary impairment recognized in earnings	$ (9)	$ (45)	$ (22)
Gross realized losses from sales	(33)	(44)	(28)
Gross realized gains from sales	125	255	191
Net realized gains (included in investment and other income on the Consolidated Statements of Operations)	83	166	141
Income tax effect (included in provision for income taxes on the Consolidated Statements of Operations)	(30)	(60)	(53)
Realized gains, net of taxes	$ 53	$ 106	$ 88

4. Fair Value

Certain assets and liabilities are measured at fair value in the Consolidated Financial Statements or have fair values disclosed in the Notes to the Consolidated Financial Statements. These assets and liabilities are classified into one of three levels of a hierarchy defined by GAAP. In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

The fair value hierarchy is summarized as follows:

Level 1 — Quoted prices (unadjusted) for identical assets/liabilities in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets/liabilities in active markets;
- Quoted prices for identical or similar assets/liabilities in inactive markets (e.g., few transactions, limited information, noncurrent prices, high variability over time);
- Inputs other than quoted prices that are observable for the asset/liability (e.g., interest rates, yield curves, implied volatilities, credit spreads); and
- Inputs that are corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

Transfers between levels, if any, are recorded as of the beginning of the reporting period in which the transfer occurs; there was no transfer between Levels 1, 2 or 3 of any financial assets or liabilities during the year ended December 31, 2017 or 2016.

Nonfinancial assets and liabilities or financial assets and liabilities that are measured at fair value on a nonrecurring basis are subject to fair value adjustments only in certain circumstances, such as when the Company records an impairment. There were no significant fair value adjustments for these assets and liabilities recorded during the year ended December 31, 2017 or 2016.

The following methods and assumptions were used to estimate the fair value and determine the fair value hierarchy classification of each class of financial instrument included in the tables below:

Cash and Cash Equivalents. The carrying value of cash and cash equivalents approximates fair value as maturities are less than three months. Fair values of cash equivalent instruments that do not trade on a regular basis in active markets are classified as Level 2.

Debt and Equity Securities. Fair values of debt and equity securities are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, and, if necessary, makes adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and nonbinding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by a secondary pricing source, such as its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and reviews of fair value methodology documentation provided by independent pricing services have not historically resulted in adjustment in the prices obtained from the pricing service.

Fair values of debt securities that do not trade on a regular basis in active markets but are priced using other observable inputs are classified as Level 2.

Fair value estimates for Level 1 and Level 2 equity securities are based on quoted market prices for actively traded equity securities and/or other market data for the same or comparable instruments and transactions in establishing the prices.

The fair values of Level 3 investments in venture capital portfolios are estimated using a market valuation technique that relies heavily on management assumptions and qualitative observations. Under the market approach, the fair values of the Company's various venture capital investments are computed using limited quantitative and qualitative observations of activity for similar companies in the current market. The Company's market modeling utilizes, as applicable, transactions for comparable companies in similar industries that also have similar revenue and growth characteristics and preferences in their capital structure. Key significant unobservable inputs in the market technique include implied earnings before interest, taxes, depreciation and amortization (EBITDA) multiples and revenue multiples. Additionally, the fair values of certain of the Company's venture capital securities are based on recent transactions in inactive markets for identical or similar securities. Significant changes in any of these inputs could result in significantly lower or higher fair value measurements.

Throughout the procedures discussed above in relation to the Company's processes for validating third-party pricing information, the Company validates the understanding of assumptions and inputs used in security pricing and determines the proper classification in the hierarchy based on that understanding.

Assets Under Management. Assets under management consists of debt securities and other investments held to fund costs associated with the AARP Program and are priced and classified using the same methodologies as the Company's investments in debt and equity securities.

Long-Term Debt. The fair values of the Company's long-term debt are estimated and classified using the same methodologies as the Company's investments in debt securities.

The following table presents a summary of fair value measurements by level and carrying values for items measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair and Carrying Value
December 31, 2017				
Cash and cash equivalents	$ 11,718	$ 263	$ —	$11,981
Debt securities — available-for-sale:

Corporate obligations	65	12,989	140	13,194
U.S. agency mortgage-backed securities	—	3,911	—	3,911
Non-U.S. agency mortgage-backed securities	—	1,015	—	1,015
Total debt securities — available-for-sale	2,493	25,791	140	28,424
Equity securities	1,784	14	194	1,992
Assets under management	1,117	1,984	—	3,101
Total assets at fair value	$ 17,112	$ 28,052	$ 334	$45,498
Percentage of total assets at fair value	38%	61%	1%	100%
December 31, 2016				
Cash and cash equivalents	$ 10,386	$ 44	$ —	$10,430
Debt securities — available-for-sale:				
U.S. government and agency obligations	2,017	247	—	2,264
State and municipal obligations	—	7,059	—	7,059
Corporate obligations	21	10,804	102	10,927
U.S. agency mortgage-backed securities	—	2,927	—	2,927
Non-U.S. agency mortgage-backed securities	—	1,002	—	1,002
Total debt securities — available-for-sale	2,038	22,039	102	24,179
Equity securities	1,591	13	437	2,041
Assets under management	1,064	2,041	—	3,105
Total assets at fair value	$ 15,079	$ 24,137	$ 539	$39,755
Percentage of total assets at fair value	38%	61%	1%	100%

The following table presents a summary of fair value measurements by level and carrying values for certain financial instruments not measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair Value	Total Carrying Value
December 31, 2017					
Debt securities — held-to-maturity:					
U.S. government and agency obligations	$ 251	$ 3	$ —	$ 254	$ 254
State and municipal obligations	—	—	2	2	2
Corporate obligations	16	1	263	280	280
Total debt securities — held-to-maturity	$ 267	$ 4	$ 265	$ 536	$ 536
Long-term debt and other financing obligations	$ —	$ 34,504	$ —	$34,504	$31,542
December 31, 2016					
Debt securities — held-to-maturity:					
U.S. government and agency obligations	$ 251	$ —	$ —	$ 251	$ 250
State and municipal obligations	—	—	5	5	5
Corporate obligations	20	8	210	238	238
Total debt securities — held-to-maturity	$ 271	$ 8	$ 215	$ 494	$ 493
Long-term debt and other financing obligations	$ —	$ 31,295	$ —	$31,295	$29,337

The carrying amounts reported on the Consolidated Balance Sheets for other current financial assets and liabilities approximate fair value because of their short-term nature. These assets and liabilities are not listed in the table above.

5. Property, Equipment and Capitalized Software

A summary of property, equipment and capitalized software is as follows:

(in millions)	December 31, 2017	December 31, 2016
Land and improvements	$ 405	$ 324
Buildings and improvements	3,664	3,148
Computer equipment	1,829	2,021
Furniture and fixtures	1,208	999
Less accumulated depreciation	(2,488)	(2,621)
Property and equipment, net	4,618	3,871
Capitalized software	3,601	3,158
Less accumulated amortization	(1,206)	(1,128)
Capitalized software, net	2,395	2,030
Total property, equipment and capitalized software, net	$ 7,013	$ 5,901

Depreciation expense for property and equipment for the years ended December 31, 2017, 2016 and 2015 was $799 million, $698 million and $613 million, respectively. Amortization expense for capitalized software for the years ended December 31, 2017, 2016 and 2015 was $550 million, $475 million and $430 million, respectively.

6. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill, by reportable segment, were as follows:

(in millions)	UnitedHealthcare	OptumHealth	OptumInsight	OptumRx	Consolidated
Balance at January 1, 2016	$ 22,925	$ 5,660	$ 4,296	$ 11,572	$ 44,453
Acquisitions	526	683	—	1,387	2,596
Foreign currency effects and adjustments, net	403	(21)	153	—	535
Balance at December 31, 2016	23,854	6,322	4,449	12,959	47,584
Acquisitions	690	5,189	1,221	—	7,100
Foreign currency effects and adjustments, net	(60)	(23)	4	(49)	(128)
Balance at December 31, 2017	$ 24,484	$ 11,488	$ 5,674	$ 12,910	$ 54,556

The gross carrying value, accumulated amortization and net carrying value of other intangible assets were as follows:

	December 31, 2017			December 31, 2016		
(in millions)	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Customer-related	$10,832	$ (3,743)	$ 7,089	$10,942	$ (3,416)	$7,526
Trademarks and technology	1,054	(432)	622	720	(323)	397
Trademarks and other indefinite-lived	561	—	561	468	—	468
Other	351	(134)	217	258	(108)	150
Total	$12,798	$ (4,309)	$ 8,489	$12,388	$ (3,847)	$8,541

The acquisition date fair values and weighted-average useful lives assigned to finite-lived intangible assets acquired in business combinations consisted of the following by year of acquisition:

	2017		2016	
(in millions, except years)	Fair Value	Weighted-Average Useful Life	Fair Value	Weighted-Average Useful Life
Customer-related	$324	13 years	$785	17 years
Trademarks and technology	367	11 years	82	4 years
Other	82	6 years	22	5 years
Total acquired finite-lived intangible assets	$773	11 years	$889	16 years

Estimated full year amortization expense relating to intangible assets for each of the next five years ending December 31 is as follows:

(in millions)	
2018	$833
2019	756
2020	665
2021	600
2022	528

Amortization expense relating to intangible assets for the years ended December 31, 2017, 2016 and 2015 was $896 million, $882 million and $650 million, respectively.

7. Medical Costs Payable

The following table shows the components of the change in medical costs payable for the years ended December 31:

(in millions)	2017	2016	2015
Medical costs payable, beginning of period	$ 16,391	$ 14,330	$ 12,040
Acquisitions	83	—	—
Reported medical costs:			
Current year	130,726	117,258	104,195
Prior years	(690)	(220)	(320)
Total reported medical costs	130,036	117,038	103,875
Medical payments:			
Payments for current year	(113,811)	(101,696)	(90,630)
Payments for prior years	(14,828)	(13,281)	(10,955)
Total medical payments	(128,639)	(114,977)	(101,585)
Medical costs payable, end of period	$ 17,871	$ 16,391	$ 14,330

For the year ended December 31, 2017, medical cost reserve development was primarily driven by lower than expected health system utilization levels. For the years ended December 31, 2016 and 2015, no individual factors were significant.

Medical costs payable included IBNR of $12.3 billion and $11.6 billion at December 31, 2017 and 2016, respectively. Substantially all of the IBNR balance as of December 31, 2017 relates to the current year. The following is information about incurred and paid medical cost development as of December 31, 2017:

(in millions)	Net Incurred Medical Costs For the Years ended December 31,	
Year	2016	2017
2016	$ 117,258	$ 116,622
2017		130,726
Total		$ 247,348

(in millions)	Net Cumulative Medical Payments For the Years ended December 31,	
Year	2016	2017
2016	$ (101,696)	$ (116,187)
2017		(113,811)
Total		(229,998)
Net remaining outstanding liabilities prior to 2016		521
Total medical costs payable		$ 17,871

8. Commercial Paper and Long-Term Debt

Commercial paper and senior unsecured long-term debt consisted of the following:

(in millions, except percentages)	December 31, 2017			December 31, 2016		
	Par Value	Carrying Value	Fair Value	Par Value	Carrying Value	Fair Value
Commercial paper	$ 150	$ 150	$ 150	$ 3,633	$ 3,633	$ 3,633

Total commercial paper and long-term debt	$31,417	$31,067	$34,029	$33,022	$32,770	$34,728

In 2017, the Company repaid $926 million in debt assumed in connection with an acquisition. The Company's long-term debt obligations also included $625 million and $200 million of other financing obligations, of which $107 million and $80 million were current as of December 31, 2017 and 2016, respectively.

Maturities of commercial paper and long-term debt for the years ending December 31 are as follows:

(in millions)	
2018	$ 2,857
2019	1,850
2020	3,250
2021	2,500
2022	3,115
Thereafter	18,470

Commercial Paper and Revolving Bank Credit Facilities

Commercial paper consists of short-duration, senior unsecured debt privately placed on a discount basis through broker-dealers. As of December 31, 2017, the Company's outstanding commercial paper had a weighted-average annual interest rate of 1.5%.

The Company has $3.0 billion five-year, $3.0 billion three-year and $4.0 billion 364-day revolving bank credit facilities with 26 banks, which mature in December 2022, December 2020 and December 2018, respectively. These facilities provide liquidity support for the Company's commercial paper program and are available for general corporate purposes. As of December 31, 2017, no amounts had been drawn on any of the bank credit facilities. The annual interest rates, which are variable based on term, are calculated based on the London Interbank Offered Rate (LIBOR) plus a credit spread based on the Company's senior unsecured credit ratings. If amounts had been drawn on the bank credit facilities as of December 31, 2017, annual interest rates would have ranged from 2.4% to 2.7%.

Debt Covenants

The Company's bank credit facilities contain various covenants, including requiring the Company to maintain a debt to debt-plus-shareholders' equity ratio of not more than 55%. The Company was in compliance with its debt covenants as of December 31, 2017.

9. Income Taxes

The current income tax provision reflects the tax consequences of revenues and expenses currently taxable or deductible on various income tax returns for the year reported. The deferred income tax provision or benefit generally reflects the net change in deferred income tax assets and liabilities during the year, excluding any deferred income tax assets and liabilities of acquired businesses. The components of the provision for income taxes for the years ended December 31 are as follows:

(in millions)	2017	2016	2015
Current Provision:			
Federal	$3,597	$4,302	$4,109
State and local	314	312	281
Foreign	254	95	46
Total current provision	4,165	4,709	4,436
Deferred (benefit) provision	(965)	81	(73)
Total provision for income taxes	$3,200	$4,790	$4,363

The reconciliation of the tax provision at the U.S. federal statutory rate to the provision for income taxes and the effective tax rate for the years ended December 31 is as follows:

(in millions, except percentages)	2017		2016		2015	
Tax provision at the U.S. federal statutory rate	$ 4,908	35.0%	$4,152	35.0%	$3,581	35.0%
Change in tax law	(1,199)	(8.6)	—	—	—	—
State income taxes, net of federal benefit	197	1.4	205	1.7	145	1.4
Share-based awards — excess tax benefit	(319)	(2.3)	(158)	(1.3)	—	—
Non-deductible compensation	175	1.3	128	1.1	103	1.0
Health insurance industry tax	—	—	645	5.4	627	6.1
Foreign rate differential	(282)	(2.0)	(105)	(0.9)	(34)	(0.3)
Other, net	(280)	(2.0)	(77)	(0.6)	(59)	(0.6)
Provision for income taxes	$ 3,200	22.8%	$4,790	40.4%	$4,363	42.6%

Deferred income tax assets and liabilities are recognized for the differences between the financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. The components of deferred income tax assets and liabilities as of December 31 are as follows:

(in millions)	2017	2016
Deferred income tax assets:		
Accrued expenses and allowances	$ 544	$ 820
U.S. federal and state net operating loss carryforwards	216	147
Share-based compensation	97	126
Nondeductible liabilities	169	236
Non-U.S. tax loss carryforwards	445	434
Other-domestic	167	476
Other-non-U.S.	198	175
Subtotal	1,836	2,414
Less: valuation allowances	(64)	(55)
Total deferred income tax assets	1,772	2,359
Deferred income tax liabilities:		
U.S. federal and state intangible assets	(1,998)	(3,055)
Non-U.S. goodwill and intangible assets	(602)	(584)
Capitalized software	(530)	(707)
Depreciation and amortization	(236)	(332)
Prepaid expenses	(223)	(228)
Outside basis in partnerships	(279)	(132)
Other-non-U.S.	(86)	(82)
Total deferred income tax liabilities	(3,954)	(5,120)
Net deferred income tax liabilities	$(2,182)	$(2,761)

On December 22, 2017, the U.S. federal government enacted a tax bill, H.R.1, An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018 (Tax Reform). Tax Reform changed existing United States tax law, including a reduction of the U.S. corporate income tax rate. The Company re-measured deferred taxes as of the date of enactment, which resulted in the $1.2 billion reduction of net deferred income tax liabilities. The Company's measurement of the income tax effects of Tax Reform for the year ended December 31, 2017 is reasonably estimated and, therefore, included in these financial statements in accordance with SEC Staff Accounting Bulletin No. 118.

Valuation allowances are provided when it is considered more likely than not that deferred tax assets will not be realized. The valuation allowances primarily relate to future tax benefits on certain federal, state and non-U.S. net operating loss carryforwards. Federal net operating loss carryforwards of $235 million expire beginning in 2022 through 2037; state net operating loss carryforwards expire beginning in 2018 through 2037. Substantially all of the non-U.S. tax loss carryforwards have indefinite carryforward periods.

As of December 31, 2017, the Company's undistributed earnings from non-U.S. subsidiaries are intended to be indefinitely reinvested in non-U.S. operations, and therefore no U.S. deferred taxes have been recorded. Taxes payable on the remittance of such earnings would be minimal.

A reconciliation of the beginning and ending amount of unrecognized tax benefits as of December 31 is as follows:

(in millions)	2017	2016	2015
Gross unrecognized tax benefits, beginning of period	$263	$224	$ 92
Gross increases:			
Current year tax positions	356	37	—
Prior year tax positions	40	24	55
Acquired reserves	—	—	89
Gross decreases:			
Prior year tax positions	(33)	(4)	(2)
Settlements	(24)	(6)	(1)
Statute of limitations lapses	(4)	(12)	(9)
Gross unrecognized tax benefits, end of period	$598	$263	$224

The Company believes it is reasonably possible that its liability for unrecognized tax benefits will decrease in the next twelve months by $210 million as a result of audit settlements and the expiration of statutes of limitations.

The Company classifies interest and penalties associated with uncertain income tax positions as income taxes within its Consolidated Statements of Operations. During the years ended December 31, 2017, 2016 and 2015, the Company recognized $14 million, $11 million and $11 million of interest and penalties, respectively. The Company had $84 million and $70 million of accrued interest and penalties for uncertain tax positions as of December 31, 2017 and 2016, respectively. These amounts are not included in the reconciliation above. As of December 31, 2017, there were $472 million of unrecognized tax benefits that, if recognized, would affect the effective tax rate.

The Company currently files income tax returns in the United States, various states and localities and non-U.S. jurisdictions. The U.S. Internal Revenue Service (IRS) has completed exams on the consolidated income tax returns for fiscal years 2016 and prior. The Company's 2017 tax year is under advance review by the IRS under its Compliance Assurance Program. With the exception of a few states, the Company is no longer subject to income tax examinations prior to the 2011 tax year. In general, the Company is subject to examination in non-U.S. jurisdictions for years 2012 and forward.

10. Shareholders' Equity

Regulatory Capital and Dividend Restrictions

The Company's regulated insurance and HMO subsidiaries in the United States are subject to regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies. In the United States, most of these regulations and standards are generally consistent with model regulations established by the National

Association of Insurance Commissioners. These standards generally permit dividends to be paid from statutory unassigned surplus of the regulated subsidiary and are limited based on the regulated subsidiary's level of statutory net income and statutory capital and surplus. These dividends are referred to as "ordinary dividends" and generally may be paid without prior regulatory approval. If the dividend, together with other dividends paid within the preceding twelve months, exceeds a specified statutory limit or is paid from sources other than earned surplus, it is generally considered an "extraordinary dividend" and must receive prior regulatory approval.

For the year ended December 31, 2017, the Company's regulated subsidiaries paid their parent companies dividends of $3.7 billion, including $1.1 billion of extraordinary dividends. For the year ended December 31, 2016, the Company's regulated subsidiaries paid their parent companies dividends of $3.9 billion, including $3.3 billion of extraordinary dividends.

The Company's regulated subsidiaries had estimated aggregate statutory capital and surplus of $20.7 billion as of December 31, 2017. The estimated statutory capital and surplus necessary to satisfy regulatory requirements of the Company's regulated subsidiaries was approximately $12.2 billion as of December 31, 2017.

Optum Bank must meet minimum requirements for Tier 1 leverage capital, Tier 1 risk-based capital, common equity Tier 1 risk-based capital and total risk-based capital of the Federal Deposit Insurance Corporation (FDIC) to be considered "Well Capitalized" under the capital adequacy rules to which it is subject. At December 31, 2017, the Company believes that Optum Bank met the FDIC requirements to be considered "Well Capitalized."

Share Repurchase Program

Under its Board of Directors' authorization, the Company maintains a share repurchase program. The objectives of the share repurchase program are to optimize the Company's capital structure and cost of capital, thereby improving returns to shareholders, as well as to offset the dilutive impact of share-based awards. Repurchases may be made from time to time in open market purchases or other types of transactions (including prepaid or structured share repurchase programs), subject to certain Board restrictions. In June 2014, the Board renewed the Company's share repurchase program with an authorization to
repurchase up to 100 million shares of its common stock.

A summary of common share repurchases for the years ended December 31, 2017 and 2016 is as follows:

	Years Ended December 31,	
(in millions, except per share data)	**2017**	**2016**
Common share repurchases, shares	9	10
Common share repurchases, average price per share	$173.54	$128.97
Common share repurchases, aggregate cost	$ 1,500	$ 1,280
Board authorized shares remaining	42	51

Dividends

In June 2017, the Company's Board of Directors increased the Company's quarterly cash dividend to shareholders to equal an annual dividend rate of $3.00 per share compared to the annual dividend rate of $2.50 per share, which the Company had paid since June 2016. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

11. Share-Based Compensation

The Company's outstanding share-based awards consist mainly of non-qualified stock options, SARs and restricted shares. As of December 31, 2017, the Company had 51 million shares available for future grants of share-based awards under the Plan. As of December 31, 2017, there were also 9 million shares of common stock available for issuance under the ESPP.

Stock Options and SARs

Stock option and SAR activity for the year ended December 31, 2017 is summarized in the table below:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Aggregate Intrinsic Value
	(in millions)		(in years)	(in millions)
Outstanding at beginning of period	36	$ 84		
Granted	15	111		
Exercised	(12)	55		
Forfeited	(2)	125		
Outstanding at end of period	37	102	6.6	$ 4,443
Exercisable at end of period	16	67	4.8	2,412
Vested and expected to vest, end of period	36	101	6.6	4,363

Restricted Shares

Restricted share activity for the year ended December 31, 2017 is summarized in the table below:

(shares in millions)	Shares	Weighted-Average Grant Date Fair Value per Share
Nonvested at beginning of period	7	$ 96
Granted	3	163
Vested	(3)	84
Nonvested at end of period	7	128

Other Share-Based Compensation Data

	For the Years Ended December 31,		
(in millions, except per share amounts)	2017	2016	2015
Stock Options and SARs			
Weighted-average grant date fair value of shares granted, per share	$ 29	$ 20	$ 22
Total intrinsic value of stock options and SARs exercised	1,473	595	482
Restricted Shares			
Weighted-average grant date fair value of shares granted, per share	163	115	110
Total fair value of restricted shares vested	$ 460	$274	$460
Employee Stock Purchase Plan			
Number of shares purchased	2	2	2
Share-Based Compensation Items			
Share-based compensation expense, before tax	$ 597	$485	$406
Share-based compensation expense, net of tax effects	531	417	348
Income tax benefit realized from share-based award exercises	431	236	247

(in millions, except years)	December 31, 2017
Unrecognized compensation expense related to share awards	$ 593
Weighted-average years to recognize compensation expense	1.3

Share-Based Compensation Recognition and Estimates

The principal assumptions the Company used in calculating grant-date fair value for stock options and SARs were as follows:

	For the Years Ended December 31,		
	2017	2016	2015
Risk-free interest rate	1.9% -2.1%	1.2% -1.4%	1.6% -1.7%
Expected volatility	18.5% -20.7%	20.8% -22.5%	22.3% -24.1%
Expected dividend yield	1.4% - 1.6%	1.8%	1.4% - 1.7%
Forfeiture rate	5.0%	5.0%	5.0%
Expected life in years	5.7	5.6 - 5.9	5.5 - 6.1

Risk-free interest rates are based on U.S. Treasury yields in effect at the time of grant. Expected volatilities are based on the historical volatility of the Company's common stock and the implied volatility from exchange-traded options on the Company's common stock. Expected dividend yields are based on the per share cash dividend paid by the Company. The Company uses historical data to estimate option and SAR exercises and forfeitures within the valuation model. The expected lives of options and SARs granted represents the period of time that the awards granted are expected to be outstanding based on historical exercise patterns.

Other Employee Benefit Plans

The Company offers a 401(k) plan for its employees. Compensation expense related to this plan was not material for 2017, 2016 and 2015.

In addition, the Company maintains non-qualified, deferred compensation plans, which allow certain members of senior management and executives to defer portions of their salary or bonus and receive certain Company contributions on such deferrals, subject to plan limitations. The deferrals are recorded within long-term investments with an approximately equal amount in other liabilities in the Consolidated Balance Sheets. The total deferrals are distributable based upon termination of employment or other periods, as elected under each plan and were $865 million and $672 million as of December 31, 2017 and 2016, respectively.

12. Commitments and Contingencies

The Company leases facilities and equipment under long-term operating leases that are non-cancelable and expire on various dates. Rent expense under all operating leases for the years ended December 31, 2017, 2016 and 2015 was $710 million, $608 million and $555 million, respectively.

As of December 31, 2017, future minimum annual lease payments, net of sublease income, under all non-cancelable operating leases were as follows:

(in millions)	Future Minimum Lease Payments
2018	$ 538
2019	470
2020	414
2021	350
2022	501
Thereafter	809

The Company provides guarantees related to its service level under certain contracts. If minimum standards are not met, the Company may be financially at risk up to a stated percentage of the contracted fee or a stated dollar amount. None of the amounts accrued, paid or charged to income for service level guarantees were material as of December 31, 2017, 2016 or 2015.

As of December 31, 2017, the Company had outstanding, undrawn letters of credit with financial institutions of $72 million and surety bonds outstanding with insurance companies of $1.4 billion, primarily to bond contractual performance.

Pending Acquisition

In December 2017, the Company entered into agreements to acquire two companies in the health care sector for a total of approximately $7.7 billion. One of the acquisitions closed in January 2018; the other is expected to close later in 2018, subject to regulatory approval and other customary closing conditions.

Legal Matters

Because of the nature of its businesses, the Company is frequently made party to a variety of legal actions and regulatory inquiries, including class actions and suits brought by members, care providers, consumer advocacy organizations, customers and regulators, relating to the Company's businesses, including management and administration of health benefit plans and other services. These matters include medical malpractice, employment, intellectual property, antitrust, privacy and contract claims and claims related to health care benefits coverage and other business practices.

The Company records liabilities for its estimates of probable costs resulting from these matters where appropriate. Estimates of costs resulting from legal and regulatory matters involving the Company are inherently difficult to predict, particularly where the matters: involve indeterminate claims for monetary damages or may involve fines, penalties or punitive damages; present novel legal theories or represent a shift in regulatory policy; involve a large number of claimants or regulatory bodies; are in the early stages of the proceedings; or could result in a change in business practices. Accordingly, the Company is often unable to estimate the losses or ranges of losses for those matters where there is a reasonable possibility or it is probable that a loss may be incurred.

Government Investigations, Audits and Reviews

The Company has been involved or is currently involved in various governmental investigations, audits and reviews. These include routine, regular and special investigations, audits and reviews by the CMS, state insurance and health and welfare departments, the Brazilian national regulatory agency for private health insurance and plans (the Agência Nacional de Saúde Suplementar), state attorneys general, the Office of the Inspector General, the Office of Personnel Management, the Office of Civil Rights, the Government Accountability Office, the Federal Trade Commission, U.S. Congressional committees, the U.S. Department of Justice, the SEC, the Internal Revenue Service, the U.S. Drug Enforcement Administration, the Brazilian federal revenue service (the Secretaria da Receita Federal), the U.S. Department of Labor, the Federal Deposit Insurance Corporation, the Defense Contract Audit Agency and other governmental authorities. Certain of the Company's businesses have been reviewed or are currently under review, including for, among other matters, compliance with coding and other requirements under the Medicare risk-adjustment model. CMS has selected certain of the Company's local plans for risk adjustment data validation (RADV) audits to validate the coding practices of and supporting documentation maintained by health care providers and such audits may result in retrospective adjustments to payments made to the Company's health plans.

On February 14, 2017, the Department of Justice (DOJ) announced its decision to pursue certain claims within a lawsuit initially asserted against the Company and filed under seal by a whistleblower in 2011. The whistleblower's complaint, which was unsealed on February 15, 2017, alleges that the Company, along with a number of other Medicare Advantage plans, made improper risk adjustment submissions and violated the False Claims Act. On March 24, 2017, DOJ intervened in a separate lawsuit initially asserted against the Company and filed by a whistleblower in 2009 concerning risk adjustment submissions by Medicare Advantage plans. On October 5, 2017, in one of the cases, the district court dismissed certain of DOJ's claims with prejudice, and

dismissed all of DOJ's remaining claims with leave to file a further amended complaint; on October 12, the DOJ filed a notice of dismissal without prejudice of the case. The other case is now pending in the U.S. District Court for the Central District of California. The Company cannot reasonably estimate the outcome that may result from this remaining matter given its current posture.

13. Segment Financial Information

Factors used to determine the Company's reportable segments include the nature of operating activities, economic characteristics, existence of separate senior management teams and the type of information used by the Company's chief operating decision maker to evaluate its results of operations. Reportable segments with similar economic characteristics, products and services, customers, distribution methods and operational processes that operate in a similar regulatory environment are combined.

The following is a description of the types of products and services from which each of the Company's four reportable segments derives its revenues:

- *UnitedHealthcare* includes the combined results of operations of UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global. The U.S. businesses share significant common assets, including a contracted network of physicians, health care professionals, hospitals and other facilities, information technology infrastructure and other resources. UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services for large national employers, public sector employers, mid-sized employers, small businesses and individuals nationwide. UnitedHealthcare Medicare & Retirement provides health care coverage and health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services as well as services dealing with chronic disease and other specialized issues for older individuals. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, the Children's Health Insurance Program and other federal, state and community health care programs. UnitedHealthcare Global is a diversified global health services business with a variety of offerings, including international commercial health and dental benefits and health care delivery.
- *OptumHealth* serves the physical, emotional and health-related financial needs of individuals, enabling population health management through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth offers access to networks of care provider specialists, health management services, care delivery, consumer engagement and financial services.
- *OptumInsight* provides services, technology and health care expertise to major participants in the health care industry. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.
- *OptumRx* offers pharmacy care services and programs, including retail network contracting, home delivery and specialty pharmacy services, purchasing and clinical capabilities, and develops programs in areas such as step therapy, formulary management, drug adherence and disease/drug therapy management.

The Company's accounting policies for reportable segment operations are consistent with those described in the Summary of Significant Accounting Policies (see Note 2). Transactions between reportable segments principally consist of sales of pharmacy care products and services to UnitedHealthcare customers by OptumRx, certain product offerings and care management and local care delivery services sold to UnitedHealthcare by OptumHealth, and health information and technology solutions, consulting and other services sold to UnitedHealthcare by OptumInsight. These transactions are recorded at management's estimate of fair value. Intersegment transactions are eliminated in consolidation. Assets and liabilities that are jointly used are assigned to each reportable segment using estimates of pro-rata usage. Cash and investments are assigned such that each reportable segment has working capital and/or at least minimum specified levels of regulatory capital.

As a percentage of the Company's total consolidated revenues, premium revenues from CMS were 28%, 25% and 26% for 2017, 2016 and 2015, respectively, most of which were generated by UnitedHealthcare Medicare & Retirement and included in the UnitedHealthcare segment. U.S. customer revenue represented approximately 96%, 97% and 96% of consolidated total revenues for 2017, 2016 and 2015, respectively. Long-lived fixed assets located in the United States represented approximately 77% and 75% of the total long-lived fixed assets as of December 31, 2017 and 2016, respectively. The non-U.S. revenues and fixed assets are primarily related to UnitedHealthcare Global.

The following table presents the reportable segment financial information:

(in millions)	UnitedHealthcare	Optum: OptumHealth	Optum: OptumInsight	Optum: OptumRx	Optum: Optum Eliminations	Optum: Optum	Corporate and Eliminations	Consolidated

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act) that are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms; and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the filing of this Annual Report on Form 10-K, management evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2017. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of December 31, 2017.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes in our internal control over financial reporting during the quarter ended December 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Management on Internal Control Over Financial Reporting as of December 31, 2017

Management of UnitedHealth Group Incorporated and Subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control system is designed to provide reasonable assurance to our management and board of directors regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2017. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013).* Based on our assessment and the COSO criteria, we believe that, as of December 31, 2017, the Company maintained effective internal control over financial reporting.

The Company's independent registered public accounting firm has audited the Company's internal control over financial reporting as of December 31, 2017, as stated in the Report of Independent Registered Public Accounting Firm, appearing under Item 9A.

Report of Independent Registered Public Accounting Firm

To the shareholders and the Board of Directors of UnitedHealth Group Incorporated and Subsidiaries:

Opinions on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2017, of the Company and our report dated February 13, 2018, expressed an unqualified opinion on consolidated financial statements.

Basis for Opinions

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting as of December 31, 2017. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

President and Dean
Morehouse School of Medicine

Glenn M. Renwick
Chair
Fiserv, Inc.

Kenneth I. Shine, M.D.
Professor of Medicine at the Dell Medical School
University of Texas

David S. Wichmann
Chief Executive Officer
UnitedHealth Group

Gail R. Wilensky, Ph.D.
Senior Fellow
Project HOPE, an international health foundation

Andrew P. Witty
Former Chief Executive Officer
GlaxoSmithKline
Chancellor
University of Nottingham

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant."

We have adopted a code of ethics applicable to our principal executive officer and other senior financial officers, who include our principal financial officer, principal accounting officer, controller and persons performing similar functions. The code of ethics, entitled Code of Conduct: Our Principles of Ethics and Integrity, is posted on our website at *www.unitedhealthgroup.com*. For information about how to obtain the Code of Conduct, see Part I, Item 1, "Business." We intend to satisfy the SEC's disclosure requirements regarding amendments to, or waivers of, the code of ethics for our senior financial officers by posting such information on our website indicated above.

The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Corporate Governance," "Proposal 1-Election of Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2018 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Items 402, 407(e)(4) and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation," "Director Compensation," "Corporate Governance—Risk Oversight" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2018 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Equity Compensation Plan Information

The following table sets forth certain information, as of December 31, 2017, concerning shares of common stock authorized for issuance under all of our equity compensation plans:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(in millions)		(in millions)
Equity compensation plans approved by shareholders [1]	35	$ 106	60[3]
Equity compensation plans not approved by shareholders [2]	–	–	–
Total [2]	35	$ 106	60

(1) Consists of the UnitedHealth Group Incorporated 2011 Stock Incentive Plan, as amended and the UnitedHealth Group 1993 ESPP, as amended.

(2) Excludes 2,818,000 shares underlying stock options assumed by us in connection with acquisitions. These options have a weighted-average exercise price of $61 and an average remaining term of approximately 3 years. The options are administered pursuant to the terms of the plan under which the options originally were granted. No future awards will be granted under this acquired plan.

(3) Includes 9 million shares of common stock available for future issuance under the Employee Stock Purchase Plan as of December 31, 2017, and 51 million shares available under the 2011 Stock Incentive Plan as of December 31, 2017. Shares available under the 2011 Stock Incentive Plan may become the subject of future awards in the form of stock options, SARs, restricted stock, restricted stock units, performance awards and other stock-based awards.

The information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2018 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Certain Relationships and Transactions" and "Corporate Governance" in our definitive proxy statement for our 2018 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 9(e) of Schedule 14A will be included under the heading "Disclosure of Fees Paid to Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2018 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) 1. *Financial Statements*

The financial statements are included under Item 8 of this report:

- Reports of Independent Registered Public Accounting Firm.
- Consolidated Balance Sheets as of December 31, 2017 and 2016.
- Consolidated Statements of Operations for the years ended December 31, 2017, 2016, and 2015.
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2017, 2016, and 2015.
- Consolidated Statements of Changes in Equity for the years ended December 31, 2017, 2016, and 2015.
- Consolidated Statements of Cash Flows for the years ended December 31, 2017, 2016, and 2015.
- Notes to the Consolidated Financial Statements.

2. *Financial Statement Schedules*

The following financial statement schedule of the Company is included in Item 15(c):

- Schedule I – Condensed Financial Information of Registrant (Parent Company Only).

All other schedules for which provision is made in the applicable accounting regulations of the SEC are not required under the related instructions, are inapplicable, or the required information is included in the consolidated financial statements, and therefore have been omitted.

(b) The following exhibits are filed or incorporated by reference herein in response to Item 601 of Regulation S-K. The Company files Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K pursuant to the Securities Exchange Act of 1934 under Commission File No. 1-10864.

EXHIBIT INDEX**

(c) Financial Statement Schedule

Schedule I – Condensed Financial Information of Registrant (Parent Company Only).

Schedule I

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of UnitedHealth Group Incorporated and Subsidiaries:

Opinion on the Financial Statement Schedule

We have audited the consolidated financial statements of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2017 and 2016, and for each of the three years in the period ended December 31, 2017, and the Company's internal control over financial reporting as of December 31, 2017, and have issued our reports thereon dated February 13, 2018; such reports are included elsewhere in this Form 10-K. Our audits also included the financial statement schedule of the Company listed in the Index at Item 15. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statement schedule based on our audits. In our opinion, the financial statement schedule, when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Schedule I

Condensed Financial Information of Registrant
(Parent Company Only)
UnitedHealth Group
Notes to Condensed Financial Statements

1. Basis of Presentation

UnitedHealth Group's parent company financial information has been derived from its consolidated financial statements and should be read in conjunction with the consolidated financial statements included in this Form 10-K. The accounting policies for the registrant are the same as those described in Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

2. Subsidiary Transactions

Investment in Subsidiaries. UnitedHealth Group's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries.

Dividends and Capital Distributions. Cash dividends received from subsidiaries and included in Cash Flows from Operating Activities in the Condensed Statements of Cash Flows were $3.4 billion, $3.7 billion and $4.8 billion in 2017, 2016 and 2015, respectively. Additionally, $3.4 billion, $2.1 billion and $4.4 billion in cash were received as a return of capital to the parent company during 2017, 2016 and 2015, respectively.

3. Commercial Paper and Long-Term Debt

Discussion of commercial paper and long-term debt can be found in Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements." Long-term debt obligations of the parent company do not include other financing obligations at subsidiaries that totaled $625 million and $200 million at December 31, 2017 and 2016, respectively.

Maturities of commercial paper and long-term debt for the years ending December 31 are as follows:

(in millions)	
2018	$ 2,750
2019	1,750
2020	3,150
2021	2,400
2022	3,015
Thereafter	18,352

4. Commitments and Contingencies

For a summary of commitments and contingencies, see Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

ITEM 16. FORM 10-K SUMMARY

None.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Such proxy statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

UNITEDHEALTH GROUP

Table of Contents

PART I

ITEM 1. BUSINESS

INTRODUCTION

Overview

UnitedHealth Group is a diversified health and well-being company dedicated to helping people live healthier lives and helping to make the health system work better for everyone. The terms "we," "our," "us," "its," "UnitedHealth Group," or the "Company" used in this report refer to UnitedHealth Group Incorporated and its subsidiaries.

Through our diversified family of businesses, we leverage core competencies in advanced, enabling technology; health care data, information and intelligence; and clinical care management and coordination to help meet the demands of the health system. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

UnitedHealthcare provides health care benefits to an array of customers and markets. UnitedHealthcare Employer & Individual serves employers ranging from sole proprietorships to large, multi-site and national employers, public sector employers and other individuals. UnitedHealthcare Medicare & Retirement delivers health and well-being benefits for Medicare beneficiaries and retirees. UnitedHealthcare Community & State manages health care benefit programs on behalf of state Medicaid and community programs and their participants. UnitedHealthcare Global includes UnitedHealthcare Brazil, a health care company providing health and dental benefits and hospital and clinical services to employer groups and individuals in Brazil, and other diversified global health businesses.

Optum is a health services business serving the broad health care marketplace, including payers, care providers, employers, governments, life sciences companies and consumers, through its OptumHealth, OptumInsight and OptumRx businesses. These businesses have dedicated units that help improve overall health system performance through optimizing care quality, reducing costs and improving consumer experience and care provider performance leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations.

Through UnitedHealthcare and Optum, in 2016, we processed more than one half trillion dollars in gross billed charges and we managed more than $200 billion in aggregate health care spending on behalf of the customers and consumers we serve. Our revenues are derived from premiums on risk-based products; fees from management, administrative, technology and consulting services; sales of a wide variety of products and services related to the broad health and well-being industry; and investment and other income. Our two business platforms have four reportable segments:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

For our financial results and the presentation of certain other financial information by segment, including revenues and long-lived fixed assets by geographic source, see Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

UnitedHealthcare

Through its health benefits offerings, UnitedHealthcare is enabling better health, helping to control rising health care costs and creating a better health care experience for its customers. UnitedHealthcare's market position is built on:

- strong local market relationships;
- the breadth of product offerings, which are responsive to many distinct market segments in health care;
- service and advanced technology;
- competitive medical and operating cost positions;
- effective clinical engagement;
- extensive expertise in distinct market segments; and
- innovation for customers and consumers.

UnitedHealthcare utilizes Optum's capabilities to help coordinate patient care, improve affordability of medical care, analyze cost trends, manage pharmacy benefits, work with care providers more effectively and create a simpler consumer experience.

In the United States, UnitedHealthcare arranges for discounted access to care through networks that include 1 million physicians and other health care professionals and approximately 6,000 hospitals and other facilities.

UnitedHealthcare is subject to extensive government regulation. See further discussion of our regulatory environment below under "Government Regulation" and in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

UnitedHealthcare Employer & Individual

UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services nationwide for large national employers, public sector employers, mid-sized employers, small businesses, and individuals. UnitedHealthcare Employer & Individual provides access to medical services for over 30 million people on behalf of our customers and alliance partners. This includes more than 200,000 employer customers across all 50 states. Products are offered through affiliates that are licensed as insurance companies, health maintenance organizations (HMOs), or third-party administrators (TPAs). Large employer groups typically use self-funded arrangements where UnitedHealthcare Employer & Individual earns a service fee. Smaller employer groups and individuals are more likely to purchase risk-based products because they are less willing or unable to bear a greater potential liability for health care expenditures.
