Compliance with state and federal laws and regulations is costly and requires our segment management to expend substantial time and resources which could negatively impact our segments' results of operations. Further, the HIPAA regulations and state privacy laws expose our segments to increased regulatory risk, as the penalties associated with a failure to comply or with information security breaches, even if unintentional, could have a material adverse effect on our segments' results of operations.

Our WD Services segment has operations in many countries in Europe, and internationally, and these operations have access to significant amounts of sensitive personal information about individuals. In Europe, these operations are subject to European and national data privacy legislation which imposes significant obligations on data processors and controllers with respect to such personal information. Similar regimes exist in other WD Service jurisdictions such as Australia, Canada and South Korea. Some countries, such as Spain, France and Germany, have particularly strong privacy laws which impose even greater obligations on people handling personal information. Data protection and privacy law within the EU is changing effective May 25, 2018, from which date the EU General Data Protection Regulation ("GDPR") must be complied with. Amongst other changes the GDPR brings about an increase in the potential fines for certain breaches of the GDPR, of up to the higher of 4% of an undertaking's global turnover or €20,000,000. In addition to fining powers, data protection authorities in Europe have significant powers to require organizations that breach regulations to put in place measures to ensure that such breaches do not occur again, and require businesses to stop processing personal information until the required measures are in place. Such orders could significantly impact our business given that we are required to handle personal information as part of our service delivery model. The GDPR and other similar laws and regulations, as well as any associated inquiries or investigations or any other government actions, may be costly to comply with, result in negative publicity, increase our operating costs, require significant management time and attention, and subject us to remedies that may harm our business, including fines or demands or orders that we modify or cease existing business practices.

Our segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results.

If our segments fail to comply with federal and state documentation, coding and billing rules, our segments could be subject to criminal or civil penalties, loss of licenses and exclusion from the Medicare and Medicaid programs, which could have a material adverse impact on our segments' operating results. In billing for our segments' services to third-party payers, our segments must follow complex documentation, coding and billing rules. These rules are based on federal and state laws, rules and regulations, various government pronouncements, and industry practice. In the U.S., failure to follow these rules could result in

potential criminal or civil liability under the federal False Claims Act, under which extensive financial penalties can be imposed or under various state statutes which prohibit the submission of false claims for services covered. Compliance failure could further result in criminal liability under various federal and state criminal or civil statutes. Our segments may be subject to audits conducted by our clients or their proxies that may result in recoupment of funds. In addition, our segments' clients may be subject to certain audits that may result in recoupment of funds from our clients that may, in turn, implicate our segments' services. Our segments' businesses could be adversely affected in the event such an audit results in negative findings and recoupment from or penalties to their customers.

Our segment contracts are subject to stringent claims and invoice processing regimes which vary depending on the customer and nature of the payment mechanism. Government entities in the U.S. may take the position that if a transport cannot be matched to a healthcare event, or is conducted inconsistently with contractual, regulatory or even policy requirements, payment for such transport may be recouped by such customer. Under European procurement legislation which has been implemented in each EU member state, any conviction for fraud can result in a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. This could significantly affect our business given that most of our customers in Europe are governmental organizations. Any such breaches or deficiencies in paperwork associated with billing may also be subject to contractual clawback regimes and penalties, which can be enforced many years after the revenue has been paid by the relevant authority.

While our segments carefully and regularly review their documentation, coding and billing practices, the rules are frequently vague and confusing and they cannot assure that governmental investigators, private insurers or private whistleblowers will not challenge their practices. Such a challenge could result in a material adverse effect on our segments' financial position and results of operations.

Our segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments.

Our U.S. Healthcare Segments are subject to the federal Anti-Kickback Statute, which prohibits the offer, payment, solicitation or receipt of any form of remuneration in return for referring, ordering, leasing, purchasing or arranging for or recommending the ordering, purchasing or leasing of items or services payable by a federally funded healthcare program. Any of our U.S. Healthcare Segments' financial relationships with healthcare providers will be potentially implicated by this statute to the extent Medicare or Medicaid referrals are implicated. Violations of the Anti-Kickback Statute could result in substantial civil or criminal penalties, including criminal fines of up to $25,000 per violation, imprisonment of up to five years, civil penalties under the Civil Monetary Penalties Law of up to $50,000 per violation, plus three times the remuneration involved, civil penalties under the False Claims Act of up to $11,000 for each claim submitted, plus three times the amounts paid for such claims and exclusion from participation in the Medicaid and Medicare programs. Any such penalties could have a significant negative effect on our U.S. Healthcare Segments' operations. Furthermore, the exclusion, if applied to such segments, could result in significant reductions in our revenues, which could materially and adversely affect such segments' businesses, financial condition and results of their operations. In addition, many states have adopted laws similar to the federal Anti-Kickback Statute with similar penalties.

As an international business whose customers are largely in the public sector, the WD Services segment generally wins work through public tender processes. Various statutes, such as the UK's Bribery Act and the Foreign Corrupt Practices Act in the U.S., generally require organizations to prohibit bribery by or for the organization and demand the implementation of systems to counter bribery, including risk management, training and guidance and the maintenance of adequate record-keeping and internal accounting practices. These statutes also, among other things, prohibit us from providing anything of value to foreign officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. In addition, many countries in which we operate have antitrust or competition regulations which, among other things, prohibit collusive tendering or bid-rigging behavior. Policies and procedures we implement to prevent bribery, corruption and anti-competitive conduct may not effectively prevent us from violating these regulations in every transaction in which we may engage, and such a violation could adversely affect our reputation, business, financial condition and results of operations. Any breach of bribery, corruption and collusive tendering laws could also expose our operations in Europe to a ban from participating in public procurement tenders for up to 5 years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority.

In WD Services, we conduct business in several countries, each with its own system of regulation. Compliance with existing regulations is costly, and changes in regulations or violations of regulations may result in increased costs or sanctions that could reduce our revenue and profitability.

As of December 31, 2017, our WD Services segment operated in the U.S and 10 countries outside the U.S. Each of these countries has its own national and municipal laws and regulations, and some countries such as Australia, Germany and Switzerland,

have both federal and state regulations. In the UK, certain law making powers are being devolved to Scotland, Wales and Northern Ireland. These laws can differ significantly from country to country. In addition, in Europe, countries (including the UK) are subject to European Union ("EU") laws and rules. We have implemented compliance policies to help assure our compliance with these laws and regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services or the manner in which we conduct our business.

Our segments' businesses could be adversely affected by future legislative changes that hinder or reverse the privatization of non-emergency transportation services or workforce development services.

The market for certain of our segments' services depends largely on government sponsored programs. These programs can be modified or amended at any time. Moreover, part of our growth strategy includes aggressively pursuing opportunities created by government initiatives to privatize the delivery of non-emergency transportation services and workforce development services. However, there are opponents to the privatization of these services and, as a result, future privatization is uncertain. In the UK, opposition to the government's outsourcing of the services provided by WD Services to private companies may increase in light of recent events in the UK, including the liquidation of the UK government contractor Carillion plc. In 2017, legislation was proposed in the U.S. Congress, but not passed, which would reduce or eliminate certain non-emergency medical transportation services provided by NET Services as a required Medicaid benefit. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our segments' operating results.

Our business could be adversely affected by the referendum on the UK's exit from the European Union.

On June 23, 2016, the UK held a referendum in which eligible persons voted in favor of a proposal that the UK leave the EU, also known as "Brexit". The result of the referendum increases political and economic uncertainty in the UK for the foreseeable future, in particular during any period where the terms of any UK exit from the EU are negotiated. In turn, Brexit could cause disruptions to and create uncertainty surrounding our business, including affecting our relationships with our existing and future payers and employees, which could have an adverse effect on our financial results, operations and prospects, including being adversely affected in ways that cannot be anticipated at present. The impact of Brexit on our business is not yet clear, and will depend on any agreements the UK makes to retain access to EU markets. Such agreements could potentially disrupt and/or destabilize the markets we serve and the tax jurisdictions in which we operate and adversely change tax benefits or liabilities in these or other jurisdictions. The terms of any UK exit from the EU could generate restriction on the movement of capital and the mobility of personnel. Depending on the outcome of negotiations between the UK and the European Union regarding the terms of Brexit (which will be negotiated over a period which may extend at least until March 2019), we may decide to alter the group's European operations to respond to new business, legal, regulatory, tax and trade environments that may result. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the UK determines which EU laws to replace, modify or replicate.

Following the referendum, there was significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business. The strengthening of the U.S. dollar relative to the British pound and other currencies may adversely affect our results of operations as we translate sales and other results denominated in foreign currency into U.S. dollars for our financial statements. During periods of a strengthening dollar, our reported international sales and earnings could be reduced because foreign currencies may translate into fewer U.S. dollars. For the year ended December 31, 2017, revenue denominated in British pound represented 11.6% of our revenue.

Brexit may also create global economic uncertainty, which may cause our payers to closely monitor their costs and reduce their spending budget on our services. Additionally, changes in governmental personnel may impact our current relationships with our payers. Any of these effects and the uncertainties of Brexit, among others, could materially adversely affect our business, business opportunities, results of operations, financial condition, future growth and cash flows.

Changes to the regulatory landscape applicable to Matrix could have a material adverse effect on our results of operations and financial condition.

The CHA services industry is primarily regulated by federal and state healthcare Laws and the requirements of participation and reimbursement of the MA Program established by CMS. From time to time, CMS considers changes to

regulatory guidelines with respect to prospective CHAs or the risk adjusted payment system applicable to Matrix's Medicare Advantage plan customers. CMS could adopt new requirements or guidelines that may, for example, increase the costs associated with CHAs, limit the opportunities and settings available to administer CHAs, or otherwise change the risk adjusted payment system in a way that would

adversely impact our business. Further, changes in or adoption of new state laws governing the scope of practice of mid-level practitioners, or more restrictive interpretations of such laws, may restrict Matrix's ability to provide services using nurse practitioners. Any such implementation of additional regulations on the CHA industry by CMS or other regulatory bodies or further regulation of mid-level practitioners could have a material adverse impact on Matrix's revenues and margins, which could have a material adverse impact on our consolidated results of operations.

If our U.S. Healthcare Segments fail to comply with physician self-referral laws, to the extent applicable to our operations, they could experience a significant loss of reimbursement revenue.

Our U.S. Healthcare Segments may be subject to federal and state statutes and regulations banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship and billing for services provided pursuant to such referrals if any occur. Violation of these federal and state laws and regulations, to the extent applicable to our U.S. Healthcare Segments' operations, may result in prohibition of payment for services rendered, loss of licenses, fines, criminal penalties and exclusion from Medicaid and Medicare programs. To the extent such segments do maintain such financial relationships with physicians, they rely on certain exceptions to self-referral laws that they believe will be applicable to such arrangements. Any failure to comply with such exceptions could result in the penalties discussed above.

As government contractors, our segments are subject to an increased risk of litigation and other legal actions and liabilities.

As government contractors, our segments are subject to an increased risk of investigation, criminal prosecution, civil fraud, whistleblower lawsuits and other legal actions and liabilities that are not as frequently experienced by companies that do not provide government sponsored services. Companies providing government sponsored services can also become involved in public inquiries which can lead to negative media speculation or potential cancellation or termination of contracts. In WD Services in Europe, European procurement regulations in force in each European Union member state require public procurement authorities to impose a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority, where companies are found guilty of fraud or certain other criminal offenses. Authorities can also exercise their discretion to blacklist companies for up to two years where they believe they have been involved in acts of gross misconduct or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. The occurrence of any of these actions, regardless of the outcome, could disrupt our operations and result in increased costs, and could limit our ability to obtain additional contracts in other jurisdictions. Further, government tenders in the U.S., the European Union and other countries can be subject to challenge where the procurer has not followed the correct processes, or where they seek to make material amendments to contracts after award. Consequently, it can be very difficult to convince government customers to amend their contracts, even where circumstances have changed significantly, because they are concerned that if challenged they may have to re-procure the entire service. This can pose significant risks in terms of cost management and profitability.

Our segments' businesses are subject to licensing regulations and other regulatory provisions, including provisions governing surveys and audits. Changes to, or violations of, these regulations could negatively impact our segments' revenues.

In many of the locations where our segments operate, they are required by local laws (both U.S. and foreign) to obtain and maintain licenses. The applicable state and local licensing requirements govern the services our segments provide, the credentials of staff, record keeping, treatment planning, client monitoring and supervision of staff. The failure to maintain these licenses or the loss of a license could have a material adverse impact on our segments' businesses and could prevent them from providing services to clients in a given jurisdiction. Our segments' contracts are subject to surveys or audit by their payers or their clients. Our segments are also subject to regulations that restrict their ability to contract directly with a government agency in certain situations. Such restrictions could affect our segments' ability to contract with certain payers and clients, and could have a material adverse impact on our segments' results of operations.

Our segments' contracts are subject to audit and modification by the payers with whom our segments contract, at their sole discretion.

Our segments' businesses depend on their ability to successfully perform under various government funded contracts. Under the terms of these contracts, payers, government agencies or their proxy contractors can review our segments' compliance or performance, as well as our segments' records and general business practices at any time, and may, in their discretion:

- suspend or prevent our segments from receiving new contracts or extending existing contracts because of violations or suspected violations of procurement laws or regulations;
- terminate or modify our segments' existing contracts;
- reduce the amount our segments are paid under our existing contracts; or
- audit and object to our segments' contract related fees.

Any increase in the number or scope of audits could increase our segments' expenses, and the audit process may disrupt the day-to-day operations of our segments' businesses and distract their management. If payers have significant audit findings, or if they make material modifications to our segments' contracts, it could have a material adverse impact on our segments' results of operations.

Contract profitability may decline due to actions by governmental agencies or penalties that are based on government generated statistical information that may not be known to us in advance.

WD Services' operating costs and profitability may be significantly impacted by actions required by a government agency, such as the availability of information systems maintained by the government to streamline enrollment into our service programs. Government generated performance statistics, such as the MOJ reoffending report, may not be known to us prior to its release by the government agencies. WD Services may be subject to penalties that are based on such government generated statistics, and we could be required to make material payments, the amounts of which we may not be able to estimate and which could have an adverse effect on our financial condition and results of operations.

In addition, certain contracts may require that we hire former government employees, in relation to offering our service programs, or develop new information technology systems which would serve to replace legacy systems operated by the government. Lastly, revenue under certain contracts may be adjusted prospectively if client volumes are below expectations or client profiles change materially, which may also lead to cost or productivity changes. If the Company is unable to adjust its costs accordingly, profitability is negatively impacted.

Our estimated income taxes could be materially different from income taxes that we ultimately pay.

We are subject to income taxation in both the U.S. and 10 foreign countries, including specific states or provinces where we operate. Our overall effective income tax rate is a function of applicable local tax rates and the geographic mix of our income from continuing operations before taxes, which is itself impacted by currency movements. Consequently, the isolated or combined effects of unfavorable movements in tax rates, geographic mix, or foreign exchange rates could reduce our after-tax income.

Our annual tax rate is based on our income and the tax laws in the various jurisdictions in which we operate. Significant judgment and estimation is required in determining our annual income tax expense and in evaluating our tax positions and related matters. In the ordinary course of our business, there are many transactions and calculations for which the ultimate tax determinations are uncertain or otherwise subject to interpretation. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related disputes could be materially different from our historical income tax provisions and accruals. In addition, we make judgments regarding the applicability of tax treaties and the appropriate application of transfer pricing regulations. In the event one taxing jurisdiction disagrees with another taxing jurisdiction with respect to the amount or applicability of a particular type of tax, or the amount or availability of a particular type of tax refund or credit, we could experience temporary or permanent double taxation and increased professional fees to resolve such taxation matters. Our determination of our income tax liability is always subject to review by applicable tax authorities, and we have been audited by various jurisdictions in prior years. Although we believe our income tax estimates and related determinations are reasonable and appropriate, relevant taxing authorities may disagree. The ultimate outcome of any such audits and reviews could be materially different from the estimates and determinations reflected in our historical

income tax provisions and accruals. Any adverse outcome of any such audit or review could have an adverse effect on our financial condition and the results of our operations.

The Tax Cuts and Jobs Act ("Tax Reform Act"), which was signed into law on December 22, 2017, significantly affected U.S. income tax law by changing how the U.S. imposes income tax on multinational corporations. We have recorded in our consolidated financial statements provisional amounts based on our current estimates of the effects of the Tax Reform Act in

accordance with our current understanding of the Tax Reform Act and currently available guidance. For additional information regarding the Tax Reform Act and the provisional tax amounts recorded in our consolidated financial statements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies". The final amounts may be significantly affected by regulations and interpretive guidance expected to be issued by the tax authorities, clarifications of the accounting treatment of various items, our additional analysis, and our refinement of our estimates of the effects of the Tax Reform Act and, therefore, such final amounts may be materially different than our current provisional amounts, which could materially affect our tax obligations and effective tax rate.

Risks Related to Our Indebtedness

Restrictive covenants in our Credit Agreement may limit our current and future operations, particularly our ability to respond to changes in our business or to pursue our business strategies.

The terms contained in the agreements that govern certain of our indebtedness, including our Amended and Restated Credit and Guaranty Agreement (as amended, supplemented, or modified, the "Credit Agreement"), and the agreements that govern any future indebtedness of ours, may include a number of restrictive covenants that impose significant operating and financial restrictions, including restrictions on our ability to take actions that we believe may be in our best interest. These agreements, among other things, limit our ability to:

- incur additional debt;
- provide guarantees in respect of obligations of other persons;
- issue redeemable stock and preferred stock;
- pay dividends or distributions or redeem or repurchase capital stock;
- make loans, investments and capital expenditures;
- enter into transactions with affiliates;
- create or incur liens;
- make distributions from our subsidiaries;
- sell assets and capital stock of our subsidiaries;
- make acquisitions; and
- consolidate or merge with or into, or sell substantially all of our assets to, another person.

A breach of the covenants or restrictions could result in a default under the applicable agreements that govern our indebtedness. Such default may preclude us from drawing from our senior secured credit facility (the "Credit Facility") or allow the creditors to accelerate the related debt and may result in the acceleration of any other debt that we may incur to which a cross acceleration or cross-default provision applies. In the event our lenders accelerate the repayment of our borrowings, we cannot assure that we and our subsidiaries would have sufficient assets to repay such indebtedness.

Loss of available financing or an inability to renew, repay or refinance our debt could have an adverse effect on our financial condition and results of operations.

At December 31, 2017, our available credit under the Credit Facility was $188.9 million. The Credit Facility matures on August 2, 2018. If our cash on hand is insufficient, or we are unable to generate sufficient cash flows in the future, to cover our cash flow and liquidity needs and service our debt, we may be required to seek additional sources of funds, including refinancing all or a portion of our existing or future debt, incurring additional debt to maintain sufficient cash flow to fund our ongoing operating needs, pay interest and fund anticipated expenditures. There can be no assurance that any refinancing will be possible or that any additional financing could be obtained on acceptable terms. If we are unable to obtain additional financing, we may (i) be unable to satisfy our obligations under our outstanding indebtedness, (ii) be unable to pursue future business opportunities or fund acquisitions, (iii) find it more difficult to fund future operating costs, tax payments or general corporate expenditures and (iv) become vulnerable to adverse general economic, capital markets and industry conditions. Any of these circumstances could have a material adverse effect on our financial position, liquidity and results of operations.

We may incur substantial additional indebtedness in the future, which could impair our financial condition.

We may incur substantial additional indebtedness in the future to fund activities including but not limited to share repurchases, acquisitions, cash dividends and business expansion. Any existing and future indebtedness increases the risk that we may be unable to generate cash sufficient to pay amounts due in respect of such indebtedness. Future substantial indebtedness could have other important consequences on our business. For example, it could:

- make it more difficult for us to satisfy our obligations;
- make it more difficult to renew or enter into new contracts with existing and potential future clients;
- limit our ability to borrow additional amounts to fund working capital, capital expenditures, debt service requirements, execution of our business strategy or acquisitions and other purposes;
- require us to dedicate a substantial portion of our cash flow from operations to pay principal and interest on our debt, which would reduce the funds available to us for other purposes;
- restrict our ability to dispose of assets and use the proceeds from any such dispositions;
- restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due;
- make us more vulnerable to adverse changes in general economic, industry and competitive conditions, as well as in government regulation and to our business;
- expose us to risks inherent in interest rate fluctuations because some of our borrowings are at variable rates of interest, which could result in higher interest expenses in the event of increases in interest rates; and
- make it more difficult to satisfy our financial obligations.

Our ability to satisfy and manage our debt obligations depends on our ability to generate cash flow and on overall financial market conditions. To some extent, this is subject to prevailing economic and competitive conditions and to certain financial, business and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow from operations to permit us to pay principal, premium, if any, or interest on our debt obligations. If we are unable to generate sufficient cash flow from operations to service our debt obligations and meet our other cash needs, we may be forced to reduce or delay capital expenditures, sell or curtail assets or operations, seek additional capital, or seek to restructure or refinance our indebtedness. If we must sell or curtail our assets or operations, it may negatively affect our ability to generate revenue.

Risks Related to Our Capital Stock

Our annual operating results and stock price may be volatile or may decline significantly regardless of our operating performance.

Our annual operating results and the market price for our Common Stock may fluctuate significantly in response to a number of factors, many of which we cannot control, including:

- changes in rates or coverage for services by payers;
- changes in Medicaid, Medicare or other U.S. federal or state rules, regulations, policies or applicable foreign regulations, policies and technical guidance, including UK health, employment and criminal justice legislation and guidance, Saudi Arabian licensing and Saudization rules, as well as other foreign laws applicable to our business;
- price and volume fluctuations in the overall stock market;
- market conditions or trends in our industry or the economy as a whole;
- increased competition in any of our segments, including through insourcing of services by our clients and new entrants to the market;
- other events or factors, including those resulting from war, incidents of terrorism, natural disasters or responses to these events;
- changes in tax law; and
- changes in accounting principles.

In addition, the stock markets, and in particular the NASDAQ Global Select Market, have experienced considerable price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If

we become involved in securities litigation, we could incur substantial costs, and our resources and the attention of management could be diverted from our business.

The Company depends on its subsidiaries for cash to fund all of its operations and expenses, including to make future dividend payments, if any.

Our operations are conducted entirely through our subsidiaries and our ability to generate cash to fund all of our operations and expenses, to pay dividends or to meet any debt service obligations is highly dependent on the earnings and the receipt of funds from our subsidiaries via dividends or intercompany loans. We do not currently expect to declare or pay dividends on our Common Stock for the foreseeable future; however, to the extent that we determine in the future to pay dividends on our Common Stock, none of our subsidiaries will be obligated to make funds available to us for the payment of dividends. Further, the agreement governing our Credit Agreement significantly restricts the ability of our subsidiaries to pay dividends, make loans or otherwise transfer assets to us. In addition, Delaware law may impose requirements that may restrict our ability to pay dividends to holders of our Common Stock.

If securities or industry analysts do not publish research or publish misleading or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our Common Stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. If one or more analysts downgrade our stock or publish misleading or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price or trading volume to decline.

Future sales of shares by existing stockholders could cause our stock price to decline.

Sales of substantial amounts of our Common Stock in the public market, or the perception that these sales could occur, could cause the market price of our Common Stock to decline. As of March 5, 2018, we had 12,866,551 outstanding shares of Common Stock which are freely transferable without restriction or further registration under the Securities Act of 1933, as amended (the "Securities Act"), unless held by or purchased by our "affiliates" as that term is defined in Rule 144 under the Securities Act. Shares of our Common Stock held by or purchased by our affiliates are restricted securities within the meaning of Rule 144 under the Securities Act, but will be eligible for resale subject to applicable volume, means of sale, holding period and other limitations of Rule 144 under the Securities Act.

As of March 5, 2018, shares of our convertible preferred stock were convertible into 2,014,042 shares of Common Stock, all of which are subject to registration rights. In addition, as of March 5, 2018, 1,653,755 shares of Common Stock are beneficially owned by entities for which Coliseum Capital Management acts as investment adviser.

In August 2016, we filed a registration statement under the Securities Act to register additional shares of Common Stock to be issued under our equity compensation plans and, as a result, all shares of Common Stock acquired upon exercise of stock options granted under our plans will also be freely tradable under the Securities Act, unless purchased by our affiliates. As of December 31, 2017, there were stock options outstanding to purchase a total of 606,695 shares of our Common Stock and there were 111,157 shares of our Common Stock subject to restricted stock awards. In addition, 1,938,666 shares of our Common Stock are reserved for future issuances under the plan.

The terms of our Preferred Stock contain restrictive covenants that may impair our ability to conduct business and we may not be able to maintain compliance with the obligations under our outstanding Preferred Stock which could have a material adverse effect on our future results of operations and our stock price.

On February 11, 2015 and March 12, 2015, we issued $65.5 million and $15.8 million, respectively, of Preferred Stock. The terms of the Preferred Stock require us to pay mandatory quarterly dividends, either in cash or through an increase in the stated principal value of such stock. Our ability to satisfy and manage our obligations under our outstanding Preferred Stock depends, in part, on our ability to generate cash flow and on overall financial market conditions. Additionally, the terms of our Preferred Stock contain operating and financial covenants that limit management's discretion with respect to certain business matters. Among other things, these covenants, subject to certain limitations and exceptions, restrict our ability to incur additional debt, sell or otherwise dispose of our assets, make acquisitions, and merge or consolidate with other entities. As a result of these covenants and restrictions, we may be limited in how we conduct our business, which could have a material adverse effect on our future results of operations and our stock price.

Future offerings of debt or equity securities that would rank senior to our Common Stock, may adversely affect the market price of our Common Stock.

If, in the future, we decide to issue debt or equity securities that rank senior to our Common Stock, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our Common Stock and may result in dilution to owners of our Common Stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, holders of our Common Stock will bear the risk of our future offerings reducing the market price of our Common Stock and diluting the value of their stock holdings in us.

Fulfilling our obligations incident to being a public company, including with respect to the requirements of and related rules under the Sarbanes-Oxley Act of 2002, is expensive and time-consuming, and any delays or difficulties in satisfying these obligations could have a material adverse effect on our future results of operations and our stock price.

We are subject to the reporting and corporate governance requirements, under the listing standards of the NASDAQ Global Select Market ("NASDAQ") and the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), that apply to issuers of listed equity, which impose certain significant compliance costs and obligations upon us. Being a publicly listed company requires a significant commitment of additional resources and management oversight resulting in increased operating costs. These requirements also place additional demands on our finance and accounting staff and on our financial accounting and information systems. Other expenses associated with being a public company include increases in auditing, accounting and legal fees and expenses, investor relations expenses, increased directors' fees and director and officer liability insurance costs, registrar and transfer agent fees and listing fees, as well as other expenses. As a public company, we are required, among other things, to define and expand the roles and the duties of our Board of Directors ("Board") and its committees and institute more comprehensive compliance and investor relations functions.

If we fail to maintain effective internal control over financial reporting in the future, the accuracy and timing of our financial reporting may be adversely affected. Preparing our consolidated financial statements involves a number of complex manual and automated processes, which are dependent upon individual data input or review and require significant management judgment. One or more of these elements may result in errors that may not be detected and could result in a material misstatement of our consolidated financial statements. If a material misstatement occurs in the future, we may fail to meet our future reporting obligations. For example, we may fail to file periodic reports in a timely manner or may need to restate our financial results, either of which may cause the price of our common stock to decline. In addition, our WD Services business is subject to the European Union's and other countries' data security and protection laws and regulations, which may make it more difficult for the Company to maintain the records and internal accounting practices necessary to ensure the appropriate operation of our internal controls or to detect corruption or increasing the Company's costs to maintain appropriate controls.

If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.

Our financial statements have been prepared in accordance with accounting principles generally accepted in the United States, or GAAP. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, contingent obligations, NET Services transportation expense, recoverability of long-lived assets and doubtful accounts. In addition, our foreign operations report their results pursuant to International Financial Reporting Standards, or IFRS, or local accounting standards, which requires judgment to convert into GAAP. Lastly, the implementation of ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which is effective for the Company beginning January 1, 2018, requires a significant level of judgment and estimation, especially in regards to contingent or success-based payments, such as those prevalent at WD Services. These estimates and judgments affect the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, we may need to accrue additional charges or reduce the value of assets that could adversely affect our results of operations, leading to a loss in investor confidence in our ability to manage our business and our stock price could decline.

Anti-takeover provisions in our second amended and restated certificate of incorporation and amended and restated by-laws could discourage, delay or prevent a change of control of our company and may affect the trading price of our Common Stock.

Our second amended and restated certificate of incorporation and amended and restated bylaws include a number of provisions that may be deemed to have anti-takeover effects, which include when and by whom special meetings of our stockholders may be called, and may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. Such provisions may prevent our stockholders from receiving the benefit from any premium to the market price of our Common Stock offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our Common Stock if the provisions are viewed as discouraging takeover attempts in the future. Our second amended and restated certificate of incorporation and amended and restated by-laws may also make it difficult for stockholders to replace or remove our management. These provisions may facilitate management entrenchment that may delay, deter, render more difficult or prevent a change in our control, which may not be in the best interests of our stockholders.

We do not expect to pay dividends on our Common Stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our Common Stock.

We currently do not expect to declare and pay dividends on our Common Stock for the foreseeable future. We currently intend to invest our future earnings, if any, to fund our growth, to develop our business, for working capital needs and for general corporate purposes. Therefore, you are not likely to receive any dividends on your Common Stock for the foreseeable future and the success of an investment in shares of our Common Stock will depend upon any future appreciation in their value. There is no guarantee that shares of our Common Stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

Item 1B. ***Unresolved Staff Comments.***

None.

Item 2. ***Properties.***

Our principal executive office is located in Stamford, Connecticut, and we lease additional office space in Tucson, Arizona. As of March 2, 2018, NET Services leases space in approximately 40 locations, WD Services leases space in approximately 220 locations, and Matrix leases space in five locations. The lease terms vary and we believe are generally at market rates. We believe that our properties are adequate for our current business needs, and believe that we can obtain adequate space, if needed, to meet our foreseeable business needs.

Item 3. ***Legal Proceedings.***

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL (the "Haverhill Litigation"). The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding Preferred Stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the Preferred Stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's Preferred Stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule

14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the Preferred Stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's stockholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton, Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of Preferred Stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding (which was subsequently extended) to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the Court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties then entered into a proposed settlement agreement which was submitted to the Court for approval. On September 28, 2017, the Court approved the proposed settlement agreement among the parties that provided for a settlement amount of $10 million less plaintiff's legal fees and expenses (the "Settlement Amount"), with 75% of the Settlement Amount to be paid to the Company and 25% of the Settlement Amount to be paid to holders of the Company's Common Stock other than certain excluded parties. On November 16, 2017, the Company, as a nominal defendant, received a payment of $5.4 million from the Settlement Amount.

Item 4. ***Mine Safety Disclosures***

Not applicable.

PART II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

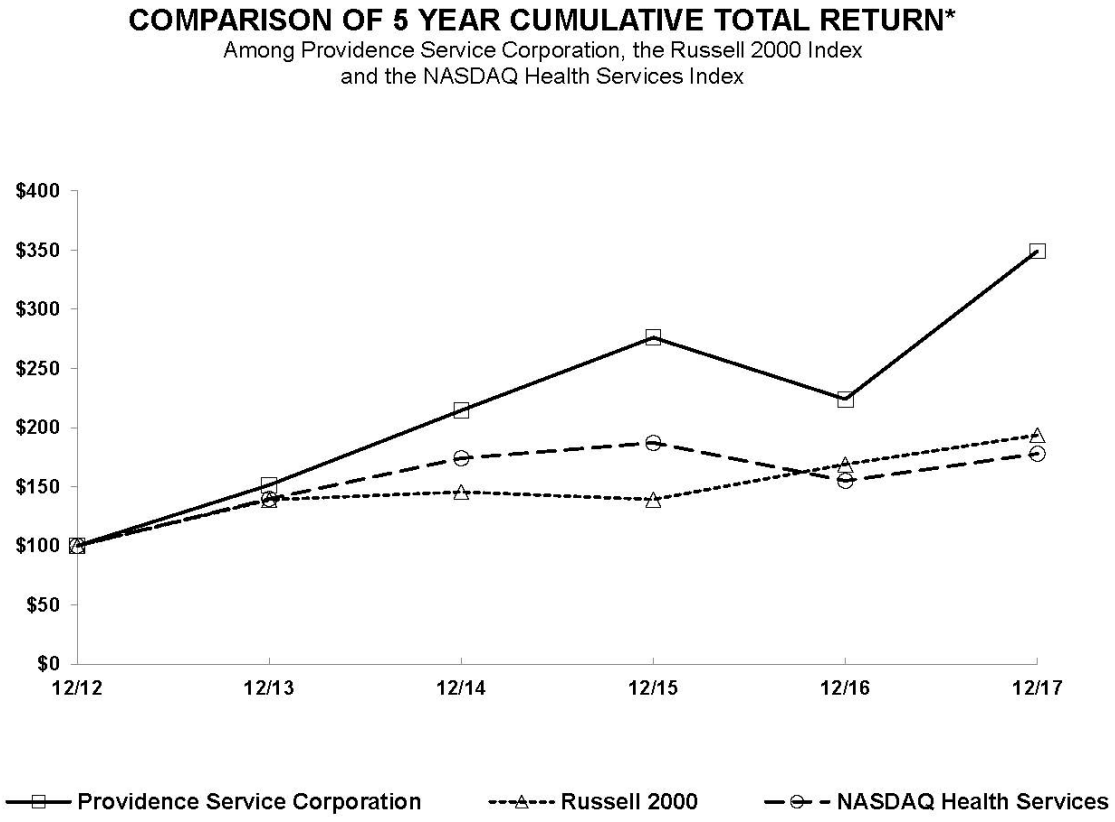
Market for our Common Stock

Our Common Stock, our only class of common equity, has been quoted on NASDAQ under the symbol "PRSC" since August 19, 2003. Prior to that time there was no public market for our Common Stock. As of March 5, 2018, there were 22 holders of record of our Common Stock. The following table sets forth the high and low sales prices per share of our Common Stock for the period indicated, as reported on NASDAQ Global Select Market:

	High	Low
2017		
Fourth Quarter	$ 60.59	$ 53.84
Third Quarter	$ 54.99	$ 49.77
Second Quarter	$ 47.47	$ 43.73
First Quarter	$ 41.80	$ 37.65
2016		
Fourth Quarter	$ 49.97	$ 34.89
Third Quarter	$ 50.30	$ 43.01
Second Quarter	$ 53.38	$ 43.77
First Quarter	$ 55.28	$ 42.03

Stock Performance Graph

The following graph shows a comparison of the cumulative total return for our Common Stock, NASDAQ Health Services Index and Russell 2000 Index assuming an investment of $100 in each on December 31, 2012.



*$100 invested on 12/31/12 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Dividends

We have not paid any cash dividends on our Common Stock and currently do not expect to pay dividends on our Common Stock. In addition, our ability to pay dividends on our Common Stock is limited by the terms of our Credit Agreement and our Preferred Stock. The payment of future cash dividends, if any, will be reviewed periodically by the Board and will depend upon, among other things, our financial condition, funds from operations, the level of our capital and development expenditures, any restrictions imposed by present or future debt or equity instruments, and changes in federal tax policies, if any.

Issuer Purchases of Equity Securities

Period	Total Number of Shares of Common Stock Purchased (1)	Average Price Paid per Share	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Program (2)	Maximum Dollar Value of Shares of Common Stock that May Yet Be Purchased Under Program (2) (in thousands)
Fourth quarter:				
October 1, 2017 to October 31, 2017	—	$ —	—	$ 69,640
November 1, 2017 to November 30, 2017	247	$ 56.74	—	$ 69,640
December 1, 2017 to December 31, 2017	181,714	$ 58.27	180,270	$ 59,137
Total	181,961	$ 58.26	180,270	

(1) Includes (i) shares that were acquired from employees in connection with the settlement of income tax and related benefit withholding obligations arising from vesting in restricted stock awards; and (ii) the repurchase of shares under the repurchase program authorized by the Board on November 2, 2017. For more information on these repurchases, see Note 11, *Stockholders' Equity*, to our consolidated financial statements.

(2) On October 26, 2016, our Board authorized a new repurchase program, under which the Company may repurchase up to $100.0 million in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30.4 million, excluding commission payments.

On November 2, 2017, our Board approved the extension of the Company's prior stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of the Company's officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements. As of December 31, 2017, a total of 180,270 shares were purchased through the extended plan approved on November 2, 2017, for $10.5 million, excluding commission payments. For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and capital resources".

Equity Compensation Plan Information

The following table provides certain information as of December 31, 2017 with respect to our equity based compensation plans.

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	(b) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders (1)	606,695	$ 48.70	1,938,666
Equity compensation plans not approved by security holders	—	—	—
Total	606,695	48.70	1,938,666

(1) The number of shares shown in column (b) represents the number of shares available for issuance pursuant to stock options and other stock-based awards that could be granted in the future under the Company's 2006 Long-Term Incentive Plan, as amended (the "2006 Plan").

Item 6. ***Selected Financial Data.***

We have derived the following selected financial data from the consolidated financial statements and related notes. The information set forth below is not necessarily indicative of future results. This information should be read in conjunction with our consolidated financial statements and the related notes, and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations", all of which are included elsewhere in this Annual Report on Form 10-K.

Significant transactions which occurred during the periods presented include the acquisition of Ingeus effective May 30, 2014, which primarily comprises our WD Services segment, the investment in Mission Providence, a joint venture in Australia, which commenced operations in 2014 but was sold on September 29, 2017, and our equity interest in Matrix effective October 19, 2016. Matrix, which was originally acquired on October 23, 2014, comprised our HA Services segment through October 19, 2016. The operations of HA Services and Human Services, which was sold effective November 1, 2015, have been presented as discontinued operations for all periods presented.

Total stockholders' equity	336,017	297,675	290,132	221,414	150,637

(1) Other income for the year ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5.4 million, see Item 3. *Legal Proceedings* for further information on the settlement.

(2) Gain on sale of equity investment of $12.4 million relates to the sale of the Company's equity interest in Mission Providence in 2017. The investment in Mission Providence was part of the WD Services segment.

(3) Discontinued operations, net of tax, for the years ended December 31, 2017 and 2016 include losses of $6.0 million and $5.6 million, respectively, related to potential indemnification claims for our historical Human Services segment.

(4) The year ended December 31, 2017 includes a net tax benefit of $16.0 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017 due to the re-measurement of deferred tax liabilities by Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a benefit of $19.4 million, partially offset by $3.4 million of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix's re-measurement of its deferred tax liabilities. In addition, the tax provision was adversely impacted by tax expense of $3.6 million related to the Company's 2015 Holding Company LTI Program (the "HoldCo LTIP"), for which expense was incurred for financial reporting purposes, but no shares were issued due to the market condition of the award not being satisfied and thus no tax deduction was realized.

(5) On October 19, 2016, we completed the Matrix Transaction. Included in discontinued operations, net of tax, for 2016 is a gain on the transaction, net of tax, totaling $109.4 million. In conjunction with the completion of this transaction, we fully repaid the amounts outstanding on our term loans and Credit Facility in 2016.

(6) During the fourth quarter of 2016, WD Services recorded long-lived asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK.

(7) On November 1, 2015, we completed the sale of our Human Services segment. Included in discontinued operations, net of tax, for 2015 is a gain on the sale of the Human Services segment, net of tax, totaling $100.3 million.

(8) The Company incurred $20.9 million of accelerated expense in 2015 related to restricted shares and cash placed into escrow at the time of the Ingeus acquisition. The shares and cash were placed into escrow concurrent with the payments of the acquisition consideration paid in 2014 for Ingeus; however, because two sellers of Ingeus remained employees post acquisition, the value of the shares and cash was recognized as compensation expense over the escrow term. Acceleration was triggered in 2015 when the two sellers separated from the Company. In addition, in 2015 and 2014, respectively, the Company incurred $5.9 million and $4.5 million of expense related to the separation of these two employees. Benefits of $2.0 million, $2.5 million and $16.1 million associated with the favorable resolution of acquisition contingencies and reductions in the fair value of Ingeus contingent consideration are included in general and administrative expenses for

2017, 2015 and 2014, respectively. 2017, 2016 and 2015 expenses also include $2.6 million, $8.5 million and $12.2 million, respectively, of WD Services' redundancy costs.

(9) Equity in net (gain) loss of investees primarily relates to our investment in Mission Providence during 2015, 2016 and 2017 and Matrix for the period of October 19, 2016 through December 31, 2017. Matrix became an equity investment upon the completion of the Matrix Transaction. For Mission Providence, we recorded net loss in investee of $1.4 million, $8.5 million and $11.0 million in 2017, 2016 and 2015, respectively. For Matrix, we recorded $13.4 million in equity in net gain of investee and $1.8 million in equity in net loss of investee related to our equity method investment in Matrix in 2017 and for the period of October 19, 2016 through December 31, 2016, respectively. The equity in net gain from Matrix for the year ended December 31, 2017 includes a benefit of $13.6 million related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. As a result of the increased equity income, Providence incurred higher tax expense of $3.4 million, which is reflected as a component of "Provision for income taxes" in the table above. The investment in Matrix at December 31, 2017 of $169.7 million is included in "Equity investments" in our consolidated balance sheet.

(10) 2014 includes $4.5 million of financing fees that were deferred and fully expensed within interest expense in the fourth quarter of 2014 in relation to bridge financing commitments and $3.0 million of third-party financing fees that are included in general and administrative expense.

(11) 2015 includes $2.4 million in Ingeus transaction-related expenses and 2014 includes $11.8 million in acquisition costs primarily related to the acquisitions of Ingeus and Matrix.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Item 6. "Selected Financial Data" and our consolidated financial statements and related notes included in Item 8. "Financial Statements and Supplementary Data" of this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and other factors that may cause actual results to differ materially from those projected in any forward-looking statements, as discussed in "Disclosure Regarding Forward-Looking Statements". These risks and uncertainties include but are not limited to those set forth in Item 1A. "Risk Factors".

Overview of Our Business

Please refer to *Item 1. "Business"* of this Annual Report on Form 10-K for a discussion of our services and corporate strategy.

Providence owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which we hold interests comprise the following segments:

- NET Services – Nationwide manager of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in Matrix, a nationwide provider of in-home care optimization and management solutions, including CHAs, to members of managed care organizations, accounted for as an equity method investment. On February 16, 2018, Matrix acquired HealthFair, expanding its service offerings to include mobile health assessments, advanced diagnostic testing, and additional care optimization services.

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company. We are actively monitoring these activities as they relate to our capital allocation and acquisition strategy to ensure alignment with Providence's overall strategic objectives and its goal of enhancing shareholder value.

Business Outlook and Trends

Our performance is affected by a number of trends that drive the demand for our services. In particular, the markets in which we operate are exposed to various trends such as healthcare industry and demographic dynamics in the U.S. and international government outsourcing and employment dynamics. Over the long term, we believe there are numerous factors that could affect growth within the industries in which we operate, including:

- an aging population, which will increase demand for healthcare services;
- a movement towards value-based versus fee for service care and budget pressure on governments, both of which may increase the use of private corporations to provide necessary and innovative services;
- increasing demand for in-home care provision, driven by cost pressures on traditional reimbursement models and technological advances enabling remote engagement;
- technological advancements, which may be utilized by us to improve service and lower costs, but also by others which may increase industry competitiveness;
- changes in UK government policy driven by opposition to the government's outsourcing of the services provided by WD Services to private companies, which opposition may increase in light of recent events in the UK, including the liquidation of the UK government contractor Carillion plc;
- the results of the referendum on the UK's exit from the European Union and related political and economic uncertainty in the UK; and

- proposals by the President of the United States and Congress to change the Medicaid program, including considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs

to a fixed amount per beneficiary, and CMS' grant of waivers to states relative to the parameters of their Medicaid programs. Enactment of adverse legislation, regulation or agency guidance, may reduce the demand for our services, our ability to conduct some or all of our business and/or reimbursement rates for services performed within our segments.

Historically, our segments have grown through organic expansion into new markets and service lines, organic expansion within existing markets and service lines, increases in the number of members served under contracts we have been awarded, the securing of new contracts, and acquisitions. With respect to acquisitions, we are actively evaluating the optimal industry sectors, such as the non-emergency medical transportation industry and others in which businesses complementary to our NET Services business operate, around which to focus our merger and acquisition activity. This ongoing evaluation takes into consideration and balances a number of factors, including the strategic goals, competitive landscape, and growth opportunities of our current segments, in an attempt to direct our capital towards those areas most likely to drive long-term value creation and generate the highest levels of return for our shareholders. In addition, as evidenced by the 2016 Matrix Transaction, we may also enter into strategic partnerships if we feel this provides the best opportunity to maximize shareholder value. The pursuit of our strategy may also result in the disposition of current businesses, as demonstrated in 2017 with our sale of our equity investment in Mission Providence and in 2015 with the sale of our Human Services segment. In making these determinations, we base our decisions on a variety of factors, including the availability of alternative opportunities to deploy capital, maximize shareholder value or other strategic considerations. The outcome of our active evaluation of the optimal industry sectors around which to focus our merger and acquisition activity as well as the potential future entry into strategic partnerships or potential disposition of businesses may impact the extent and manner in which we deploy resources across Providence, including strategic and administrative resources between Corporate and Other and our operating segments, and we may incur incremental costs in pursuing these efforts.

Revenues and Expenses

NET Services

NET Services primarily contracts with state Medicaid agencies and managed care organizations for the coordination of their members' non-emergency transportation needs. Most contracts are capitated, which means we are paid on a per-member, per-month basis for each eligible member. For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we negotiate rates and remit payment to the transportation providers. However, for certain contracts, we assume no risk for the transportation network, credentialing and/or payments to these providers. For these contracts, we only provide administrative management services to support the customers efforts to serve its clients.

WD Services

WD Services primarily provides workforce development and offender rehabilitation services on a global basis that include employment preparation and placement, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs. Populations served by WD Services are broad and include the disabled, recently and long-term unemployed and individuals seeking new skills, as well as individuals that are coping with medical illnesses, are newly graduated from educational institutions, or are being released from incarceration. We contract primarily with national and regional government entities that seek to reduce the unemployment and recidivism rates.

The revenue earned by WD Services under its contracts is often derived through a combination of different revenue channels including, but not limited to, fees contingent upon: (1) the volume of WD end-users referred to or admitted into a specific program, (2) the achievement of defined outcomes for specific individuals, such as a job placement or continued employment, and (3) the achievement of defined outcomes for a population of individuals over a specific time period, such as aggregate employment or recidivism rates. The relative contributions of different revenue channels under a specific contract can fluctuate meaningfully over the life of a contract and thus contribute to significant earnings volatility. Revenue recognition related to our NCS youth programs can be particularly volatile due to the timing of services provided, which typically occur in the second and third quarters of each year. WD Services also earns revenue under fixed FFS arrangements, based upon contractual rates established at the outset of the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. Volume levels are typically not guaranteed under contracts. We

bill according to contractual terms, typically after proof of services have been demonstrated, although certain contracts allow for ratable billings based upon expected levels of services, and require reconciliation at the conclusion of the contract year.

As described above, when WD Services enters into new markets and service lines, it often experiences significant costs, which are expensed as incurred, whereas revenue may not be realized until a later date. As a result, WD Services experiences significant variability in its financial results and we therefore believe the results of WD Services are best viewed over a multi-year period.

Classification of Operating Expenses

Our "Service expense" line item includes the majority of the operating expenses of NET Services and WD Services as well as our captive insurance company, with the exception of certain costs which are classified as "General and administrative expense". Service expense also excludes asset impairment charges and depreciation and amortization expenses. In the discussion below, we present the breakdown of service expense by the following major categories: purchased services, payroll and related costs, other operating expenses and stock-based compensation. Purchased services includes the amounts we pay to third-party service providers and are typically dependent upon service volume. Payroll and related costs include all personnel costs of our segments. Other operating expenses include general overhead costs, excluding facilities and related charges, of our segments. Stock-based compensation represents the stock-based compensation expense associated with stock grants to employees of our segments as well as the expense related to restricted stock placed into escrow at the time of the Ingeus acquisition.

Our "General and administrative expense" primarily includes the operating expenses of our corporate office, excluding depreciation and amortization, as well as facilities and related charges of our segments and contingent consideration and acquisition related adjustments, as applicable.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are important in the preparation of our consolidated financial statements because they require that we use judgment and estimates in applying those policies. We prepare our consolidated financial statements and accompanying notes in accordance with GAAP. Preparation of the consolidated financial statements and accompanying notes requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements as well as revenue and expenses during the periods reported. We base our estimates on historical experience, where applicable, and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions.

There are certain critical estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider an accounting estimate to be critical if:

- it requires us to make an assumption because information was not available at the time or it included matters that were highly uncertain at the time the estimate is made; and
- changes in the estimate or different estimates that could have been selected may have had a material impact on our financial condition or results of operations.

For more information on each of these policies, see Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, to our consolidated financial statements. We discuss information about the nature and rationale for our critical accounting estimates below.

Transportation Accrual

We accrue the cost of transportation expense within NET Services based on request for services and the amount we expect to be billed by transportation providers, as we generally only pay transportation providers for completed trips based upon documentation submitted after services have been provided. The transportation accrual requires significant judgment, as the accrual is based upon contractual rates and mileage estimates, as well as an estimated rate for unknown cancellations, as members may have requested transportation but not notified us of cancellation. Based upon historical experience and contract terms, we estimate the amount of expense incurred for invoices which have not yet been submitted as of period end. Actual expense could be greater or less than the amounts estimated due to changes in member or transportation provider behavior.

Business Combinations

We assign the value of the consideration transferred to acquire a business to the tangible assets and identifiable intangible assets acquired and liabilities assumed on the basis of their fair values at the date of acquisition. Any excess purchase price paid over the fair value of the net tangible and intangible assets acquired is allocated to goodwill. When determining the fair values of assets acquired and liabilities assumed, management makes significant estimates and

assumptions, especially with respect to intangible assets. Critical estimates in valuing certain intangible assets include but are not limited to future expected cash flows from customer relationships and trade names, and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. As a result, actual results may differ significantly from estimates.

Recoverability of Goodwill and Definite-Lived Intangible Assets

Goodwill. In accordance with ASC 350, *Intangibles-Goodwill and Other*, we review goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, we then perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Long-Lived Assets Including Intangibles. In accordance with ASC 360, *Property, Plant, and Equipment*, we review the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, we assess the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, we estimate the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, we record an impairment loss equal to the excess of the carrying value over the estimated fair value.

The use of different estimates or assumptions in determining the fair value of our goodwill and intangible assets may result in different values for those assets, which could result in an impairment or, in the period in which an impairment is recognized, could result in a materially different impairment charge.

During the fourth quarter of 2016, the Company reviewed WD Services for impairment, as there were several negative factors impacting the segment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with their carrying amounts and recorded an asset impairment charge of $10.0 million to property and equipment and $4.4 million to definite-lived customer relationship intangible assets, which is recorded in "Asset impairment charge" on the Company's consolidated statement of operations for the year ended December 31, 2016. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an impairment charge of $5.2 million, which is included in "Asset impairment charge" on the Company's consolidated

statement of operations for the year ended December 31, 2016. No impairment charges were incurred during the year ended December 31, 2017.

Income Taxes

We record income taxes under the liability method. Deferred tax assets and liabilities reflect our estimation of the future tax consequences of temporary differences between the carrying amounts of assets and liabilities for book and tax purposes. We determine deferred income taxes based on the differences in accounting methods and timing between financial statement and income tax reporting. Accordingly, we determine the deferred tax asset or liability for each temporary difference based on the enacted tax rates expected to be in effect when we realize the underlying items of income and expense. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available to us for tax reporting purposes, as well as other relevant factors. We may establish a valuation allowance to reduce deferred tax assets to the amount we believe is more likely than not to be realized. Due to inherent complexities arising from the nature of our businesses, future changes in income tax law, tax sharing agreements or variances between our actual and anticipated operating results, we make certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

We record liabilities to address uncertain tax positions we have taken in previously filed tax returns or that we expect to take in a future tax return. The determination for required liabilities is based upon an analysis of each individual tax position, taking into consideration whether it is more likely than not that our tax position, based on technical merits, will be sustained upon examination. For those positions for which we conclude it is more likely than not it will be sustained, we recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. The difference between the amount recognized and the total tax position is recorded as a liability. The ultimate resolution of these tax positions may be greater or less than the liabilities recorded.

On December 22, 2017, the Tax Reform Act was enacted, which significantly changes U.S. tax law by, among other things, lowering corporate income tax rates, implementing a territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. The Tax Reform Act permanently reduces the U.S. corporate income tax rate from a maximum of 35% to a flat 21% rate, effective January 1, 2018. The Tax Reform Act also provides for a one-time deemed repatriation of post-1986 undistributed foreign subsidiary earnings and profits through the year ended December 31, 2017.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. We have recognized the provisional tax impacts related to deemed repatriated earnings and the benefit for the revaluation of deferred tax assets and liabilities, and included these amounts in our consolidated financial statements for the year ended December 31, 2017. The final impact may differ from these provisional amounts, possibly materially, due to, among other things, additional analysis, changes in interpretations and assumptions we made, additional regulatory guidance that may be issued, and actions we may take as a result of the Tax Reform Act. In accordance with SAB 118, the financial reporting impact of the Tax Reform Act will be completed no later than the fourth quarter of 2018.

Reinsurance and Self-Insurance Liabilities

We historically reinsured a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs through our wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. In conjunction with the policy renewals on May 16, 2017, SPCIC did not renew the expiring policies. However, SPCIC continues to resolve claims under the historical policy years. In addition, under the current policies, the Company retains liability up to the policy deductibles. In addition, we maintain self-funded health insurance programs for U.S. based employees with a stop-loss umbrella policy with a third party insurer to limit the maximum potential liability for individual claims and for a maximum potential claim liability based on member enrollment. We utilize independent actuarial reports to determine the expected losses and in order to record the appropriate entries associated with our historical reinsurance programs, our retained exposure for the deductibles under our current policies, and self-funded health insurance programs. We regularly analyze our reserves for incurred but not reported claims, and for reported but not paid claims related to our reinsurance and self-funded insurance programs. We believe our reserves are adequate. However, significant judgment is involved in assessing these reserves such as evaluating historical paid claims, average lag times between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are recorded once a probable amount is known.

Revenue Recognition

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where we assume the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made.

FFS contracts. Revenues earned under FFS contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established rates which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we remit payment to the transportation providers; however, for certain contracts, we only provide administrative management services to support the customers efforts to serve its clients. The amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services which include employment preparation and placement, apprenticeship and training, and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, we primarily receive four types of revenue streams under contracts with government entities: referral/attachment fees, job placement and job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client attains and holds employment for a specified minimum period of time. Sustainment fees are typically payable when clients maintain a job outcome past specified employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e., the person is placed in a job or reaches the maximum time period for the program). The estimated period of time for which services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes.

If the rate is adjusted but the Company is unable to adjust its costs accordingly, or if the volume or types of referrals are lower than estimated, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as “Deferred revenue” until the services are rendered.

Stock Based Compensation

Our primary forms of employee stock-based compensation are stock option awards and restricted stock awards, including certain awards which vest based upon performance conditions. We measure the value of stock option awards on the date of grant at fair value using the appropriate valuation techniques, including the Black-Scholes and Monte Carlo option-pricing models. We

recognize the fair value as stock-based compensation expense on a straight-line basis over the requisite service period, which is typically the vesting period. The pricing models require various highly judgmental assumptions including volatility and expected option term. If any of the assumptions used in the models change significantly, stock-based compensation expense may differ materially in the future from that recorded in the current period.

As a result of the adoption of Accounting Standards Update ("ASU") No. 2016-09, *Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* ("ASU 2016-09"), effective January 1, 2017, we no longer record stock-based compensation expense net of estimated forfeitures and the tax effects of awards are treated as discrete items in the period in which tax windfalls or shortfalls occur. The adoption also impacted the presentation of cash flows and the computation of earnings per share.

The adoption of ASU 2016-09 will subject our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes based upon the fair value of the award at the grant date. See additional discussion included in Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, to our consolidated financial statements.

Restructuring, Redundancy and Related Reorganization Costs

We have engaged in employee headcount optimization actions within WD Services which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. We accrue for severance and other employee separation costs under these actions when it is probable that a liability has been incurred and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans for the number of employees impacted, but the final determination of the actual employees to be terminated is subject to a customary consultation process. The estimate of costs that will ultimately be paid requires significant judgment and to the extent that actual results or updated results differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period such amounts are determined.

Results of operations

Segment reporting. Our operations are organized and reviewed by management along our segment lines. We operate in two principal business segments: NET Services and WD Services. Our investment in Matrix is also a reportable segment referred to as the "Matrix Investment". Segment results are based on how our chief operating decision maker manages our business, makes operating decisions and evaluates operating performance. The operating results of the two principal business segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by our corporate division on behalf of the segment, which primarily relate to insurance and stock-based compensation allocations. Indirect expenses, including unallocated corporate functions and expenses, such as executive, finance, accounting, human resources, information technology and legal, as well as the results of our captive insurance company (the "Captive") and elimination entries recorded in consolidation are reflected in "Corporate and Other".

Discontinued operations. Effective October 19, 2016, we completed the Matrix Transaction resulting in our ownership of a noncontrolling interest in our historical HA Services segment. The HA Services segment results of operations for the periods through October 19, 2016 are separately discussed in the "Discontinued operations, net of tax" section set forth below. For periods subsequent to the transaction, the results of the Matrix Investment are separately discussed in the "Equity in net loss of investees" section set forth below. Additionally, effective November 1, 2015, we completed the sale of our Human Services segment. The Human Services segment results of operations are separately discussed in the "Discontinued operations, net of tax" section set forth below.

Year ended December 31, 2017 compared to year ended December 31, 2016

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2017 and 2016 (in thousands):

	Year ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,623,882	100.0 %	1,578,245	100.0 %
Operating expenses:				
Service expense	1,489,044	91.7 %	1,452,110	92.0 %
General and administrative expense	72,336	4.5 %	69,911	4.4 %
Asset impairment charge	—	— %	21,003	1.3 %
Depreciation and amortization	26,469	1.6 %	26,604	1.7 %
Total operating expenses	1,587,849	97.8 %	1,569,628	99.5 %
Operating income	36,033	2.2 %	8,617	0.5 %
Non-operating expense:				
Interest expense, net	1,278	0.1 %	1,583	0.1 %
Other income	(5,363)	(0.3)%	—	— %
Equity in net (gain) loss of investees	(12,054)	(0.7)%	10,287	0.7 %
Gain on sale of equity investment	(12,377)	(0.8)%	—	— %
Loss (gain) on foreign currency transactions	345	— %	(1,375)	(0.1)%
Income (loss) from continuing operations before income taxes	64,204	4.0 %	(1,878)	(0.1)%
Provision for income taxes	4,401	0.3 %	17,036	1.1 %
Income (loss) from continuing operations	59,803	3.7 %	(18,914)	(1.2)%
Discontinued operations, net of tax	(5,983)	(0.4)%	108,760	6.9 %
Net income	53,820	3.3 %	89,846	5.7 %
Net (gain) loss attributable to noncontrolling interest	(451)	— %	2,082	0.1 %
Net income attributable to Providence	53,369	3.3 %	91,928	5.8 %

Service revenue, net. Consolidated service revenue, net for 2017 increased $45.6 million, or 2.9%, compared to 2016. Revenue for 2017 compared to 2016 includes an increase in revenue of NET Services of $84.5 million, which was partially offset by a decrease in revenue of WD Services of $38.7 million. Excluding the effects of changes in currency exchange rates, consolidated service revenue increased 3.4% in 2017 compared to 2016.

Total operating expenses. Consolidated operating expenses for 2017 increased $18.2 million, or 1.2%, compared to 2016. Operating expenses for 2017 compared to 2016 included an increase in expenses attributable to NET Services of $95.8 million and Corporate and Other of $2.5 million. Partially offsetting these expense increases was a decrease in WD Services' operating expenses of $80.2 million. 2016 operating expenses include asset impairment charges of $19.6 million at WD Services and $1.4 million at Corporate and Other.

Operating income. Consolidated operating income for 2017 increased $27.4 million compared to 2016 due to a decrease in the operating loss of WD Services in 2017 of $41.4 million, as compared to 2016. This change was partially offset

by a decrease in operating income of NET Services in 2017 as compared to 2016 of $11.3 million and an increase in the operating loss for Corporate and Other of $2.7 million in 2017 as compared to 2016.

Interest expense, net. Consolidated interest expense, net for 2017 decreased $0.3 million, or 19.3%, compared to 2016, and remained consistent as a percentage of revenue.

Other income. Other income in 2017 of $5.4 million represents the settlement received from the Haverhill Litigation, see Item 3. *Legal Proceedings* for further information on the settlement.

Equity in net (gain) loss of investees. Our equity in net (gain) loss of investees for 2017 of $12.1 million includes an equity in net loss for Mission Providence of $1.4 million through the sale date on September 29, 2017, and an equity in net gain for Matrix of $13.4 million. Our equity in net loss of investees for 2016 of $10.3 million includes an equity in net loss for Mission Providence of $8.5 million and Matrix of $1.8 million. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction, and we record our ownership percentage of Matrix's profit or loss in net loss or gain of investees. Included in Matrix's 2017 full standalone net income of $26.7 million (which is not consolidated with Providence's) are depreciation and amortization of $33.5 million, interest expense of $14.8 million, transaction bonuses and other transaction related costs of $3.5 million, equity compensation of $2.6 million, management fees paid to Matrix's shareholders of $2.3 million, merger and acquisition diligence related costs of $0.7 million and income tax benefit of $29.6 million. Matrix's significant income tax benefit in 2017 primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. Included in Matrix's 2016 full standalone net loss of $4.2 million (which is not consolidated with Providence's) are depreciation and amortization of $6.4 million, interest expense of $2.9 million, transaction bonuses and other transaction related costs of $6.4 million, equity compensation of $0.4 million, management fees paid to Matrix's shareholders of $0.4 million and income tax benefit of $2.8 million.

Gain on sale of equity investment. The gain on sale of equity investment of $12.4 million relates to the sale of the Company's equity interest in Mission Providence in 2017. The investment in Mission Providence was part of the WD Services segment. The sale of Mission Providence is not included as a discontinued operation as the disposition did not represent a strategic shift that has a major effect on our operations and financial results.

Loss (gain) on foreign currency transactions. The foreign currency loss of $0.3 million and gain of $1.4 million for 2017 and 2016, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. Our effective tax rate from continuing operations for 2017 was 6.9%. The effective tax rate was lower than the U.S. federal statutory rate of 35% primarily due to the impact of the Tax Reform Act. The tax provision includes a benefit of $16.0 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017, consisting of a net tax benefit of $19.4 million from the re-measurement of deferred tax liabilities from the lower U.S. corporate tax rate, partially offset by additional tax expense of $3.4 million due to an increase in our equity in net gain of Matrix as a result of Matrix's re-measurement of deferred tax liabilities. In addition, the Company incurred tax expense of $3.6 million related to the HoldCo LTIP, for which expense was recorded for financial reporting purposes based upon fair value of the award at the grant date, but no shares will be issued due to the market condition of the award not being satisfied. This tax expense was the result of the adoption of ASU 2016-09, which subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes.

During 2016, we recognized an income tax provision despite having a loss from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit could not be recognized, and non-deductible expenses, the Company recognized taxable income for this year upon which the income tax provision for financial reporting is calculated.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our former Human Services segment and our former HA Services segment, composed entirely of our 100% ownership in Matrix until the completion of the Matrix Transaction on October 19, 2016. For 2017, discontinued operations, net of tax for our Human Services segment was a loss of $6.0 million, which primarily related to the accrual of a contingent liability of $9.0 million related to the settlement of indemnification claims and associated legal costs of $0.7 million, partially offset by a related tax benefit. Discontinued operations, net of tax for our Human Services segment was a loss of $5.6 million in 2016, which included an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million, partially offset by a related tax benefit. Discontinued operations, net of tax for our HA Services segment was income of $114.3 million for 2016, which included a gain on

disposition, net of tax, of $109.4 million. See Note 20, *Discontinued Operations,* to our consolidated financial statements for additional information.

Net (income) loss attributable to noncontrolling interests. Net (income) loss attributable to noncontrolling interests primarily relates to a minority interest held by a third-party operating partner in our company servicing the offender rehabilitation contract in our WD Services segment.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,318,220	100.0%	1,233,720	100.0%
Service expense	1,227,426	93.1%	1,132,857	91.8%
General and administrative expense	11,779	0.9%	11,406	0.9%
Depreciation and amortization	13,275	1.0%	12,375	1.0%
Operating income	65,740	5.0%	77,082	6.2%

Service revenue, net. Service revenue, net for NET Services in 2017 increased $84.5 million, or 6.8%, compared to 2016. The increase was related to net increased revenue from existing contracts, including successfully renewed contracts, of $82.5 million, due to the net impact of membership and rate changes. Included within net rate changes are the positive impacts of final agreements on rate adjustments related to existing contracts that experienced increased utilization in 2017 as well as the release of previously accrued revenue hold-backs based on certain contract performance requirements on a significant contract. Additionally, the impact of new contracts, including new managed care organization contracts in Florida and New York, contributed $93.8 million of revenue for 2017. These increases were partially offset by the $91.8 million impact on revenue of contracts we no longer serve, including a contract with the state of New York.

Service expense. Service expense is comprised of the following for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	1,009,518	76.6%	927,321	75.2%
Payroll and related costs	165,666	12.6%	162,000	13.1%
Other operating expenses	51,720	3.9%	42,478	3.4%
Stock-based compensation	522	—%	1,058	0.1%
Total service expense	1,227,426	93.1%	1,132,857	91.8%

Service expense for 2017 increased $94.6 million, or 8.3%, compared to 2016. The increase in service expense was primarily attributable to the impact of new managed care organization contracts in California, Florida and New York. Purchased services as a percentage of revenue increased from 75.2% in 2016 to 76.6% in 2017 primarily attributable to an increase in utilization across multiple contracts. The higher utilization was in part driven by increased Medicaid reimbursement in New Jersey for certain medical services, increasing the demand for transportation services, and increased utilization across multiple managed care contracts in California. Additionally, due to milder winter weather conditions during the first quarter of 2017, we experienced above expected utilization; however, we experienced lower utilization for contracts in the third quarter of 2017 due in part to the impact of Hurricane Irma. The increase in purchased services as a percentage of revenue caused by increased utilization was partially offset by the successful implementation of initiatives aimed at lowering

transportation costs on a per trip and per mile basis as well as the release of a reserve based upon the finalization of a contract amendment with a state customer.

Payroll and related costs as a percentage of revenue decreased from 13.1% in 2016 to 12.6% in 2017 due to efficiencies gained from multiple process improvement initiatives, including those aimed at lowering payroll expense across our reservation

and operation center networks, as well as a decrease in chief executive officer compensation expense due to the transition of the chief executive officer position during 2017. Other operating expenses increased for 2017 as compared to 2016 primarily attributable to an incremental $4.1 million of value enhancement and related costs incurred for external resources used in the design and implementation of NET Services member experience and value enhancement initiatives in 2017, as well as increased software and hardware maintenance costs associated with increased use of information technology.

General and administrative expense. General and administrative expenses in 2017 increased $0.4 million, or 3.3%, as compared to 2016, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense remained constant at 0.9%.

Depreciation and amortization expense. Depreciation and amortization expenses increased $0.9 million primarily due to the addition of long-lived assets relating to information technology projects. As a percentage of revenue, depreciation and amortization remained constant at 1.0%. At December 31, 2017, NET Services has $11.9 million of construction and development in progress related to its LCAD NextGen technology system, which is expected to be placed into service in 2018.

WD Services

WD Services financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	305,662	100.0%	344,403	100.0 %
Service expense	265,417	86.8%	320,147	93.0 %
General and administrative expense	25,438	8.3%	30,300	8.8 %
Asset impairment charge	—	—%	19,588	5.7 %
Depreciation and amortization	12,851	4.2%	13,824	4.0 %
Operating income (loss)	1,956	0.6%	(39,456)	(11.5)%

Service revenue, net. Service revenue, net in 2017 decreased $38.7 million, or 11.2%, compared to 2016. Excluding the effects of changes in currency exchange rates, service revenue decreased 8.9% in 2017 compared to 2016, which was primarily related to the anticipated decline of referrals under the segment's Work Programme contracts in the UK, as well as decreased revenue under our offender rehabilitation program. While WD Services has successfully secured contracts under the UK's new Work and Health Programme, the successor program to the Work Programme, with a combined total value of approximately $195 million over 5 years, revenues under these new contracts were negligible in 2017 and did not offset declines in revenue experienced under the Work Programme contracts. These decreases were partially offset by increases across various employability contracts outside the UK, including in Australia, France, Germany and the U.S., as well as increased revenue from our health services contract in the UK. 2017 includes the impact of $5.2 million of revenue recognized under the offender rehabilitation program related to the finalization of a contractual adjustment for the contract year ended March 31, 2017, whereas 2016 includes $5.4 million of revenue recognized under the offender rehabilitation program related to the finalization of a contractual adjustment for the prior contract years ended March 31, 2015 and 2016.

Service expense. Service expense is comprised of the following for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	177,195	58.0%	210,293	61.1 %
Purchased services	49,491	16.2%	65,363	19.0 %
Other operating expenses	38,675	12.7%	44,502	12.9 %
Stock-based compensation	56	—%	(11)	— %
Total service expense	265,417	86.8%	320,147	93.0 %

Service expense in 2017 decreased $54.7 million, or 17.1%, compared to 2016. Payroll and related costs decreased primarily as a result of declining referrals under the segment's primary employability program in the UK as well as redundancy plans that better aligned headcount with service delivery volumes, resulting in a decrease of payroll and related costs as a percentage of revenue. Payroll and related costs include $2.6 million and $8.5 million in 2017 and 2016, respectively, of termination benefits related to redundancy plans. Purchased services decreased in 2017 compared to 2016 primarily as a result of a decline in client referrals under our primary employability program in the UK, which resulted in a decline in the use of outsourced services. Other operating expenses decreased in 2017 compared to 2016 primarily as a result of a decline in consulting related costs and information technology maintenance costs.

General and administrative expense. General and administrative expense in 2017 decreased $4.9 million compared to 2016. The decrease was due to office closures associated with the restructuring of the UK operations, as well as lower rent for certain offices. Additionally, $2.0 million of the decrease related to the impact of acquisition related contingencies that were favorably resolved in 2017, resulting in a benefit to general and administrative expense.

Asset impairment charge. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK. No impairment charges were incurred in 2017.

Depreciation and amortization expense. Depreciation and amortization expense for 2017 decreased $1.0 million compared to 2016, primarily due to the asset impairment charges incurred during the fourth quarter of 2016, which decreased the value of our intangible assets and certain property and equipment.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the Providence corporate level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,	
	2017	2016
	$	$
Service revenue, net	—	122
Service expense (a)	(3,799)	(894)
General and administrative expense	35,119	28,205

Asset impairment charge	—	1,415
Depreciation and amortization	343	405
Operating loss	(31,663)	(29,009)

(a) Negative amounts are present for this line item due to changes in estimate for claims incurred but not reported, as well as elimination entries that are included in Corporate and Other. Certain offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2017 increased by $2.7 million, or 9.1%, as compared to 2016 primarily due to an increase in cash settled stock-based compensation expense of $3.6 million, primarily as a result of an increase in the Company's stock price in 2017 as compared to a decrease in 2016, an increase in share settled stock-based compensation expense of $2.7 million, primarily related to an increase in expense for the HoldCo LTIP despite this program expiring with no shares due to any employees, expense for stock options issued to a former chief executive officer upon separation from the Company, and a benefit recorded in 2016 for performance based units, with no corresponding benefit in 2017, as well as an increase of $3.8 million of professional costs due to activities associated with our increased focus on strategic initiatives. This increase was partially offset by a reduction in insurance loss reserves of $3.5 million in 2017, versus $2.5 million in 2016, due to favorable claims history of our Captive reinsurance programs, as well as decreased costs of the Captive operations due to no longer writing new policies as of May 2017, which is included in "Service expense", decreased accounting, legal and professional fees included in "General and administrative expense", and decreased asset impairment charges, as $1.4 million was recorded in 2016 in relation to the sale of a building.

General and administrative expense includes stock-based compensation for the HoldCo LTIP of $4.7 million and $3.3 million for 2017 and 2016, respectively. No shares will be distributed under the HoldCo LTIP as the volume weighted average of Providence's stock price over the 90-day trading period ended on December 31, 2017 was less than $56.79. As such, as of December 31, 2017, we accelerated all remaining unrecognized compensation expense for the Holdco LTIP as there was no further requisite service period associated with the award resulting in an acceleration of expense of $1.1 million. General and administrative expense also includes $0.4 million and $1.6 million for 2017 and 2016, respectively, related to a shareholder lawsuit.

Costs associated with the resignation of Mr. Lindstrom during the year ended December 31, 2017 include cash compensation related items of $0.9 million, stock-based compensation of $0.7 million, and other costs of $0.2 million. These costs are recorded as part of "General and administrative expense".

Year ended December 31, 2016 compared to year ended December 31, 2015

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2016 and 2015 (in thousands):

	Year ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,578,245	100.0 %	1,478,010	100.0 %
Operating expenses:				
Service expense	1,452,110	92.0 %	1,381,154	93.4 %
General and administrative expense	69,911	4.4 %	70,986	4.8 %
Asset impairment charge	21,003	1.3 %	—	— %
Depreciation and amortization	26,604	1.7 %	23,998	1.6 %
Total operating expenses	1,569,628	99.5 %	1,476,138	99.9 %
Operating income	8,617	0.5 %	1,872	0.1 %
Non-operating expense:				
Interest expense, net	1,583	0.1 %	1,853	0.1 %
Equity in net loss of investees	10,287	0.7 %	10,970	0.7 %
Gain on foreign currency transactions	(1,375)	(0.1)%	(857)	(0.1)%

Provision for income taxes	17,036	1.1 %	14,583	1.0 %
Income (loss) from continuing operations	(18,914)	(1.2)%	(24,677)	(1.7)%
Discontinued operations, net of tax	108,760	6.9 %	107,871	7.3 %
Net income	89,846	5.7 %	83,194	5.6 %
Net loss attributable to noncontrolling interest	2,082	0.1 %	502	— %
Net income attributable to Providence	91,928	5.8 %	83,696	5.7 %

Service revenue, net. Consolidated service revenue, net for 2016 increased $100.2 million, or 6.8%, compared to 2015. Revenue for 2016 compared to 2015 included an increase in revenue of NET Services of $150.7 million, which was partially offset by a decrease in revenue of WD Services of $50.7 million. Excluding the effects of changes in currency exchange rates, consolidated service revenue increased 8.8% in 2016 compared to 2015.

Total operating expenses. Consolidated operating expenses for 2016 increased $93.5 million, or 6.3%, compared to 2015. Operating expenses for 2016 compared to 2015 included an increase in expenses attributable to NET Services of $144.8 million and Corporate and Other of $2.2 million. Partially offsetting these expense increases was a decrease in WD Services' operating expenses of $53.6 million. Operating expenses included asset impairment charges of $19.6 million at WD Services and $1.4 million at Corporate and Other during 2016, while no such charges were incurred in 2015.

Operating income. Consolidated operating income for 2016 increased $6.7 million compared to 2015 due to an increase in operating income of NET Services in 2016 as compared to 2015 of $5.9 million and a decrease in the operating loss of WD Services in 2016 as compared to 2015 of $2.9 million, although WD Services' new offender rehabilitation program incurred an operating loss in 2016 as compared to operating income in 2015. In addition, France continued to experience a significant operating loss in 2016, consistent with 2015. These changes were partially offset by an increase in the

operating loss for Corporate and Other of $2.0 million, driven primarily by the asset impairment charge of $1.4 million in 2016.

Interest expense, net. Consolidated interest expense, net for 2016 decreased $0.3 million, or 14.6%, compared to 2015. The decrease is primarily related to the repayment of the related party note during 2015, which was partially offset by higher commitment fees on our Credit Facility for 2016 as compared to 2015.

Equity in net loss of investees. Equity in net loss of investees primarily relates to our investments in Mission Providence and Matrix. Mission Providence, which is part of WD Services, began providing services in July 2015. We record 75% of Mission Providence's profit or loss in equity in net loss of investees. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction. Our equity in net loss of investees related to WD Services and Matrix totaled $8.5 million and $1.8 million, respectively, for 2016. Included in Matrix's results (which are not consolidated with Providence's) is interest expense of $2.9 million and transaction related expenses of $6.0 million, which includes $4.0 million of transaction incentive compensation payable to the Matrix management team.

Gain on foreign currency transactions. The foreign currency gains of $1.4 million and $0.9 million for 2016 and 2015, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. We recognized an income tax provision for 2016 and 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized taxable income for these years upon which the income tax provision for financial reporting is calculated.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our former Human Services segment and our former HA Services segment, composed entirely of our 100% equity interest in Matrix until the completion of the Matrix Transaction on October 19, 2016. Discontinued operations, net of tax for our Human Services segment was a loss of $5.6 million in 2016 and income of $101.8 million in 2015, respectively. 2016 Human Services results include an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million. 2015 Human Services segment results include a gain on disposition, net of tax, of $100.3 million. Discontinued operations, net of tax for our HA Services segment was income of $114.3 million and $6.1 million for 2016 and 2015, respectively. 2016 HA Services segment results include a gain on disposition, net of tax, of $109.4 million. See Note 20, *Discontinued Operations,* to our consolidated financial statements for additional information.

Net loss attributable to noncontrolling interest. Net loss attributable to noncontrolling interests primarily relates to the minority interest associated with our company servicing the offender rehabilitation contract in our WD Services segment. As this contract is currently experiencing losses, as further discussed below, we have a net loss attributable to noncontrolling interests.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,233,720	100.0%	1,083,015	100.0%
Service expense	1,132,857	91.8%	991,659	91.6%
General and administrative expense	11,406	0.9%	10,704	1.0%
Depreciation and amortization	12,375	1.0%	9,429	0.9%
Operating income	77,082	6.2%	71,223	6.6%

Service revenue, net. Service revenue, net for NET Services in 2016 increased $150.7 million, or 13.9%, compared to 2015. The increase related to the impact of new contracts which contributed $76.4 million of revenue in 2016, including contracts in California and Florida, and an increase in revenue associated with existing contracts of $119.8 million due to the net impact of membership and rate changes, partially offset by the loss of certain contracts that resulted in a decrease in revenue of $45.5 million.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	927,321	75.2%	814,632	75.2%
Payroll and related costs	162,000	13.1%	141,669	13.1%
Other operating expenses	42,478	3.4%	34,634	3.2%
Stock-based compensation	1,058	0.1%	724	0.1%
Total service expense	1,132,857	91.8%	991,659	91.6%

Service expense for 2016 increased $141.2 million, or 14.2%, compared to 2015. The increase in service expense was primarily attributable to an increase in purchased transportation services due primarily to higher transportation volume. Purchased services as a percentage of revenue remained constant at 75.2%. Additionally, our payroll and related costs increased for 2016 as compared to 2015 primarily due to the hiring of employees to support new contracts and increased call volume associated with increased utilization, as well as an increase of $1.2 million in expense for the long-term incentive plan for management put into place in the fourth quarter of 2015 and separation related charges for NET Services' former chief executive officer during 2016 of $0.8 million. Our other operating expenses also increased for 2016 as compared to 2015. The increase was primarily attributable to increased bad debt expense, including $2.1 million of expense related to one specific customer, and costs incurred for external resources used in the design and implementation of NET Services member experience and value enhancement initiatives of $2.0 million. Stock-based compensation increased $0.3 million in 2016 as compared to 2015 primarily due to the expense associated with new stock-based compensation awards granted in 2016 that vested in January 2017.

General and administrative expense. General and administrative expenses in 2016 increased $0.7 million, or 6.6%, as compared to 2015, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense decreased slightly from 1.0% for 2015 to 0.9% for 2016.

Depreciation and amortization expense. Depreciation and amortization expenses increased $2.9 million primarily due to the addition of long-lived assets in our call centers. As a percentage of revenue, depreciation and amortization increased slightly from 0.9% for 2015 to 1.0% for 2016.

WD Services

WD Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	344,403	100.0 %	395,059	100.0 %
Service expense	320,147	93.0 %	393,803	99.7 %
General and administrative expense	30,300	8.8 %	29,846	7.6 %
Asset impairment charge	19,588	5.7 %	—	— %
Depreciation and amortization	13,824	4.0 %	13,776	3.5 %
Operating income (loss)	(39,456)	(11.5)%	(42,366)	(10.7)%

Service revenue, net. Service revenue, net in 2016 decreased $50.7 million, or 12.8%, compared to 2015. Excluding the effects of changes in currency exchange rates, service revenue decreased 5.1% in 2016 compared to 2015, which was primarily related to revenue declines associated with declining referrals and an altered pricing structure under the segment's primary employability program in the UK and a revised bidding strategy in certain markets. Implemented in late 2015, the overhauled bidding process emphasized the pursuit of only those contracts that meet certain investment criteria, including risk-weighted return

on capital thresholds, and involve the provision of services where we believe our experience will allow us to deliver differentiated and improved outcomes for our clients. As a result of this enhanced criteria and a challenging UK outsourcing industry, new contracts have been more infrequent and smaller in nature. The decrease was partially offset by two new contracts in France that began in 2015 and growth of NCS youth programs in 2016. WD Services additionally recognized revenue of $5.4 million for 2016 under its offender rehabilitation program related to the finalization of a contractual adjustment for contract years ended March 31, 2015 and 2016, which partially offset the decline in revenue under this contract for 2016.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	210,293	61.1 %	249,130	63.1%
Purchased services	65,363	19.0 %	78,498	19.9%
Other operating expenses	44,502	12.9 %	45,418	11.5%
Stock-based compensation	(11)	— %	20,757	5.3%
Total service expense	320,147	93.0 %	393,803	99.7%

Service expense in 2016 decreased $73.7 million, or 18.7%, compared to 2015. Payroll and related costs decreased primarily as a result of the redundancy plans implemented in the fourth quarter of 2015 that were designed to better align headcount with service delivery volumes as well as declining referrals under the segment's primary employability program in the UK. Partially offsetting these decreases was increased payroll and related costs associated with a significant new offender rehabilitation program that began in 2015 and higher payroll expenses in France associated with new programs implemented in 2015 and 2016. As referenced above, both the segment's new offender rehabilitation program and operations in France had significant operating losses in 2016. In addition, $8.5 million in termination benefits related to three redundancy plans contributed to losses in 2016. Purchased services decreased in 2016 compared to 2015 primarily as a result of a decline in client referrals under our primary employability program in the UK which required less use of outsourced services. Stock-based compensation decreased $20.8 million in 2016 as compared to 2015 primarily due to expenses totaling $16.1 million related to the settlement of outstanding awards in the fourth quarter of 2015 in relation to the separation of two executives, who were also sellers of Ingeus to Providence, as further described in Note 13, *Stock-Based Compensation and Similar Arrangements,* to our consolidated financial statements.

General and administrative expense. General and administrative expense in 2016 increased $0.5 million compared to 2015. $2.5 million of the increase relates to the impact of the reduction in the fair value of contingent consideration that was recorded in 2015. Offsetting this increase were decreased facility costs of $2.0 million primarily due to the closure of numerous sites in the UK, partially offset by the opening of new sites in France during 2016.

Asset impairment charge. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK. No impairment charges were incurred in 2015.

Depreciation and amortization expense. Depreciation and amortization expense for 2016 was flat compared to 2015.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the Providence corporate level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,	
	2016	2015
	$	$
Service revenue, net (a)	122	(64)
Service expense (a)	(894)	(4,308)
General and administrative expense	28,205	30,436
Asset impairment charge	1,415	—
Depreciation and amortization	405	793
Operating loss	(29,009)	(26,985)

(a) Negative amounts are present for this line item due to elimination entries that are included in Corporate and Other. Offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2016 increased by $2.0 million, or 7.5%, as compared to 2015 primarily due to a $4.5 million decrease in benefits associated with favorable claims experiences on our reinsurance and self-insured programs, an asset impairment charge of $1.4 million in 2016 and a $0.4 million net increase in compensation related expenses. The $0.4 million net increase in compensation expenses in 2016 was primarily due to an increase in short-term incentives and $1.0 million of compensation related to the sale of the Company's Human Services segment in 2015. Also included in 2016 were $1.6 million of expenses related to a shareholder lawsuit, an increase of $0.8 million from 2015. These increases in expense were partially offset by a decrease in various professional fees of $4.0 million. The Company anticipates continued reductions in multiple Corporate and Other expense categories in 2017.

Seasonality

Our quarterly operating results and operating cash flows normally fluctuate due in part to seasonal factors, uneven demand for services and the timing of new contracts, which impact the amount of revenues earned and expenses incurred. NET Services experiences fluctuations in demand during the summer and winter seasons. Due to higher demand in the summer months, lower demand during the winter months, and a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter. WD Services is impacted by both the timing of commencement and expiration of major contracts. Under many of WD Services' contracts, we invest significant sums of money in personnel, leased office space, purchased or developed technology, and other costs, and generally incur these costs prior to commencing services and receiving payments. This results in significant variability in financial performance and cash flows between quarters and for comparative periods. It is expected that future contracts will be structured in a similar fashion. However, the Company does not expect a large variability in financial performance upon the commencement of WD Service's newly secured Work and Health Programme contracts as the upfront implementation investments needed for these contracts are expected to be significantly less than those associated with other large contract commencements undertaken in the past, such as the offender rehabilitation program in 2016. In addition, under the majority of WD Services' contracts, the Company relies on its customers, which include government agencies, to provide referrals, for which the Company can provide services and earn revenue. The timing and magnitude of referrals can fluctuate significantly, leading to volatility in revenue.

Liquidity and capital resources

Short-term capital requirements consist primarily of recurring operating expenses and new contract start-up costs, including workforce restructuring costs. We expect to meet any cash requirements through available cash on hand, cash generated from our operating segments, and borrowing capacity under our Credit Facility (as defined below).

Cash flow from operating activities was our primary source of cash during 2017, and included $5.4 million received from the settlement of the Haverhill Litigation. Additionally, 2017 included $15.6 million in proceeds from the sale of our equity investment in Mission Providence which is included in cash provided by investing activities. Our balance of cash and cash equivalents was $95.3 million and $72.3 million at December 31, 2017 and 2016, respectively, including $40.1 million and $21.4 million held in foreign countries, respectively. The December 31, 2017 foreign cash balance includes the proceeds from the sale of Mission Providence of $15.6 million. Such cash held in foreign countries is generally used to fund foreign operations, although it may also be used to repay intercompany indebtedness existing between Providence and its foreign subsidiaries. As of March 5, 2018, the Company transferred $13.9 million from its foreign operations to its domestic operations since December 31, 2017.

We had restricted cash of $6.3 million and $14.1 million at December 31, 2017 and 2016, respectively, primarily related to contractual obligations and activities of our captive insurance subsidiary. Given expiring policies under our captive insurance subsidiary were not renewed upon expiration in May 2017, we expect our restricted cash balances to decline over time. These restricted cash amounts are not included in our balance of cash and cash equivalents. At both December 31, 2017 and 2016, we had no amounts outstanding under our credit facility.

We may, from time to time, access capital markets to raise equity or debt financing for various business reasons, including acquisitions. We may also raise debt financing to fund future repurchases of our Common Stock. The timing, term, size, and pricing of any such financing will depend on investor interest and market conditions, and there can be no assurance that we will be able to obtain any such financing. Our current credit facility expires on August 2, 2018. On November 2, 2017, the Company's Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Through December 31, 2017, the Company repurchased 180,270 shares, for $10.5 million, and $59.1 million was available under the plan to repurchase shares. During the period January 1, 2018 to March 5, 2018, the Company repurchased an additional 527,825 shares for $33.3 million, and $25.8 million was available under the plan to repurchase shares.

The cash flow statement for all periods presented includes both continuing and discontinued operations. Discontinued operations includes the activity of our Human Services and HA Services segments. The loss from discontinued operations totaled $6.0 million for the year ended December 31, 2017, while income from discontinued operations totaled $108.8 million and $107.9 million for the years ended December 31, 2016 and 2015, respectively. For 2017, the loss from discontinued operations primarily related to the accrual of a contingent liability of $9.0 million related to the future settlement of indemnification claims associated with our former Human Services segment, partially offset by a related tax benefit. The significant income from discontinued operations during the years ended December 31, 2016 and 2015 related to the gains on sale of our HA Services segment and Human Services segment, respectively. Significant non-cash items of our discontinued operations in 2016 and 2015 included $3.7 million and $5.7 million of depreciation expense, respectively, $17.5 million and $28.6 million of amortization expense, respectively, and $52.3 million and negative $5.0 million of deferred taxes, respectively. Our discontinued operations also purchased property and equipment totaling $9.2 million and $10.3 million during 2016 and 2015.

2017 cash flows compared to 2016

Operating activities. Cash provided by operating activities was $55.0 million for 2017, an increase of $13.3 million compared with 2016. 2017 and 2016 cash flow from operations was driven by net income of $53.8 million and $89.8 million, respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of negative $11.1 million and negative $32.9 million, respectively, and changes in working capital of $12.3 million and negative $15.2 million, respectively.

The change in non-cash adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of:

- the disposition of HA Services, resulting in decreased gain on sale of business, depreciation, amortization and deferred taxes in 2017 as compared to 2016;
- the asset impairment charge incurred in 2016 of $21.0 million;
- the impact on deferred taxes as a result of the Tax Reform Act passed in 2017;
- the gain on sale of Mission Providence of $12.4 million in 2017; and

- the impact of the change in equity in net (gain) loss of investees, which was a gain of $12.1 million in 2017 as compared to a loss of $10.3 million in 2016.

The change in working capital was primarily driven by the following:

- Accounts receivable generated a cash inflow in 2017 of $5.7 million as compared to an outflow of $19.3 million in 2016. The increase in cash inflow of $25.0 million was primarily attributable to NET Services due to the timing of collections as well as an outflow of $3.1 million of HA Services in 2016. These changes were partially offset by cash outflows in 2017 related to an increase in WD Services' receivables in Germany, Saudi Arabia, South Korea and the UK.
- Prepaid expenses and other generated a cash inflow of $15.5 million in 2017, as compared to a cash outflow of $4.1 million in 2016. The increase in cash inflow of $19.5 million was primarily attributable to a decrease in other receivables related to amounts receivable from insurance carriers in respect to certain claims paid by the Company, but reimbursable from the respective insurance carrier, decreased receivables related to our captive insurance company insurance policy rewrite, decreased prepaid value added taxes in the UK, decreased prepayments in WD Services in relation to certain contracts and changes in income tax payments.
- Accounts payable and accrued expenses generated a cash outflow of $9.1 million in 2017, as compared to a cash inflow of $33.4 million in 2016. The decrease in cash inflow of $42.4 million is due primarily to the impact of NET Services accrued contract payments of $21.5 million, as well as the disposition of HA Services, which generated a cash inflow of $10.6 million in 2016. Partially offsetting these impacts is the impact of the increase in the accrued settlement related to our former Human Services segment of $9.0 million during 2017 as compared to an increase of $6.0 million in 2016.
- Accrued transportation costs of NET Services generated a cash inflow of $11.2 million in 2017, as compared to a cash inflow of $8.7 million in 2016. The increase in cash inflow of $2.6 million is due primarily to the timing of payments to NET Services transportation providers and increased volume.
- Income taxes payable on sale of business for 2016 includes a cash outflow of $30.2 million related to the sale of our Human Services segment.

Investing activities. Net cash provided by investing activities of $0.8 million in 2017 decreased by $323.1 million as compared to 2016. The decrease was primarily attributable to $371.6 million of proceeds on the Matrix Transaction recorded in 2016, which was partially offset by the impact of $15.6 million in proceeds from the sale of our equity investment in Mission Providence in 2017. Additionally in 2017, we made a cost method investment in Circulation, a technology-based service provider, for $3.0 million. There was also a decrease in funding of our equity investment in Mission Providence of $13.7 million and a decrease in the purchase of property and equipment of $21.3 million. 2016 included purchases of property and equipment of $9.2 million by our discontinued operations.

Financing activities. Net cash used in financing activities of $33.8 million in 2017 decreased $343.0 million as compared to 2016. During 2016, there was a net repayment of debt of $305.0 million, primarily related to the repayment of debt upon the completion of the Matrix Transaction. Additionally, during 2017, we repurchased $41.0 million less of our Common Stock than in 2016. In addition, there was a decrease in proceeds from Common Stock issued pursuant to stock option exercises of $2.2 million.

2016 cash flows compared to 2015

Operating activities. Cash provided by operating activities was $41.8 million for 2016, an increase of $25.7 million compared with 2015. 2016 and 2015 cash flow from operations was driven by net income of $89.8 million and $83.2 million, respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of negative $32.9 million and negative $1.2 million, respectively, and changes in working capital of negative $15.2 million and negative $65.9 million, respectively. The change in adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of the disposition of HA Services in 2016 and Human Services in 2015, as well as, significant stock-based compensation in 2015 and an asset impairment charge in 2016. The change in working capital is primarily driven by the following:

- Accounts receivable generated a cash outflow for 2016 of $19.3 million as compared to an outflow of $86.6 million for 2015. The decrease in cash outflow of $67.3 million was primarily attributable to timing of significant receivable collections of NET Services, increases in WD Services accounts receivable in 2015 related to additional revenue contracts in place during 2015 as compared to 2014, and a cash outflow related to Human Services in 2015.
- Accounts payable and accrued expenses generated a cash inflow of $33.4 million in 2016, as compared to a cash outflow of $21.9 million in 2015. The increase in cash flow of $55.3 million was primarily attributable to our Human

Services segment activity included in 2015, but not in 2016, due to the sale effective November 1, 2015, as well as a decreased change in accrued compensation between periods.

- Deferred revenue generated a cash outflow of $4.0 million in 2016, as compared to a cash inflow of $19.0 million in 2015. The significant cash inflow in 2015 primarily related to WD Services in association with cash received in advance of services being rendered for two large contracts.

- Income taxes payable on sale of business for 2016 includes a cash outflow of $30.2 million related to the sale of our Human Services segment.

Investing activities. Net cash provided by investing activities of $323.9 million in 2016 increased by $180.6 million as compared to 2015. The increase was primarily attributable to $371.6 million of proceeds on the Matrix Transaction recorded in 2016, which was partially offset by the impact of $199.9 million in proceeds from the sale of our Human Services segment in 2015. There was also an increase in the purchase of property and equipment of $6.1 million from 2015 to 2016.

Financing activities. Net cash used in financing activities of $376.8 million in 2016 increased $142.7 million as compared to 2015. During 2016, there was a net repayment of debt of $305.0 million, primarily related to the repayment of debt upon the completion of the Matrix Transaction, compared to a net repayment of debt of $271.1 million in 2015 upon the sale of our Human Services segment. Additionally, during 2016, we repurchased $33.5 million more of our Common Stock than in 2015. 2015 includes $80.7 million received from the issuance of preferred stock as well as a contingent consideration payment of $7.5 million associated with our purchase of Ingeus UK Holdings Limited and its wholly and partly-owned subsidiaries and associates.

Obligations and commitments

Current Credit Facility

The Credit Agreement provides for a revolving credit facility of $200.0 million, $25.0 million of which is available for letters of credit. As of December 31, 2017 we had no borrowings outstanding under the Credit Facility and seven letters of credit in the aggregate amount of $11.1 million outstanding. At December 31, 2017, our available credit under the Credit Facility was $188.9 million. The Credit Facility matures on August 2, 2018.

Under the Credit Agreement, we have an option to request an increase in the amount of the revolving credit facility and/or the term loan facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75.0 million with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. We may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility.

We may prepay any outstanding principal under the Credit Facility in whole or in part, at any time without premium or penalty, subject to reimbursement of the lenders' breakage and redeployment costs in connection with prepayments of London Interbank Offered Rate, or LIBOR, loans. The unutilized portion of the commitments under the Credit Facility may be irrevocably reduced or terminated by us at any time without penalty.

Interest on the outstanding principal amount of any loans accrues, at our election, at a per annum rate equal to LIBOR, plus an applicable margin or the base rate plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on our consolidated leverage ratio as defined in the Credit Agreement. Interest on any loans is payable quarterly in arrears. In addition, we are obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on our consolidated leverage ratio.

The Credit Facility also requires us (subject to certain exceptions as set forth in the Amended and Restated Credit Agreement) to prepay the outstanding loans in an aggregate amount equal to 100% of the net cash proceeds received from certain asset dispositions, debt issuances, insurance and casualty awards and other extraordinary receipts.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on our ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, repurchase shares, sell assets, and merge and consolidate. We are subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants. The Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and the Company's

consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter. We were in compliance with all covenants as of December 31, 2017.

Our obligations under the Credit Facility are guaranteed by all of our present and future domestic subsidiaries, excluding certain domestic subsidiaries, which includes our insurance captive. Our obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of our respective assets, other than our

equity investment in Matrix, including a pledge of 100% of the issued and outstanding stock of our domestic subsidiaries, excluding our insurance captive, and 65% of the issued and outstanding stock of our first tier foreign subsidiaries.

Credit Facility Background

On August 2, 2013, we entered into the Credit Agreement with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, SunTrust Bank, as syndication agent, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson Humphrey, Inc., as joint lead arrangers and joint book managers and other lenders party thereto. The Credit Agreement provided us with a senior secured credit facility, in aggregate principal amount of $225.0 million, comprised of a $60.0 million term loan facility and a $165.0 million revolving credit facility. The Credit Facility includes sublimits for swingline loans and letters of credit in amounts of up to $10.0 million and $25.0 million, respectively. On August 2, 2013, we borrowed the entire amount available under the term loan facility and $16.0 million under our revolving credit facility and used the proceeds thereof to refinance certain of our existing indebtedness.

On May 28, 2014, we entered into the first amendment to the Credit Agreement (the "First Amendment"). The First Amendment provided for, among other things, an increase in the aggregate amount of the Credit Facility from $165.0 million to $240.0 million and other modifications in connection with the consummation of the acquisition of Ingeus.

On October 23, 2014, we entered into the Second Amendment to the Credit Agreement (the "Second Amendment") to (i) add a new term loan tranche in aggregate principal amount of up to $250.0 million to partly finance the acquisition of Matrix and make certain other modifications in connection with the consummation of the acquisition of Matrix and (ii) add an excess cash flow mandatory prepayment provision.

On September 3, 2015, we entered into the Third Amendment to the Credit Agreement (the "Third Amendment"). Pursuant to the Third Amendment, the lenders under the Credit Agreement consented to Providence's sale of the Human Services segment and certain other amendments to the terms of the Credit Agreement to reflect such consents.

On August 28, 2016, we entered into the Fourth Amendment and Consent (the "Fourth Amendment") to the Credit Agreement. In accordance with the Fourth Amendment, which provided for the lenders' consent to the Matrix Transaction, a portion of the net cash proceeds received by the Company in connection with the Matrix Transaction were applied to the prepayment of outstanding term loans and revolving loans. Additionally, effective following the repayment of the outstanding term loans in full on October 20, 2016, the Fourth Amendment further (i) reduced the aggregate revolving commitments under the Credit Agreement to $200.0 million, (ii) amended the consolidated net leverage ratio covenant such that the Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and (iii) replaced the existing consolidated fixed charge coverage ratio covenant with a covenant that the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter.

Rights Offering

We completed a rights offering on February 5, 2015, allowing all of the Company's existing common stockholders the non-transferrable right to purchase their pro rata share of $65.5 million of Preferred Stock at a price equal to $100.00 per share (the "Rights Offering"). The Preferred Stock was convertible into shares of our Common Stock at a conversion price equal to $39.88, which was the closing price of our Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC (collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock was purchased by the Standby Purchasers at the $100.00 per share subscription price. The Standby Purchasers beneficially owned approximately 94% of our outstanding Preferred Stock after giving effect to the Rights Offering and the Standby Purchase Agreement. The Company received $65.5 million in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement, which it used to repay the related party unsecured subordinated bridge note that was outstanding as of December 31, 2014.

Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's convertible preferred stock at a $105 per share subscription price.

We may pay a noncumulative cash dividend on each share of convertible preferred stock, when, as and if declared by a committee of our Board, at the rate of 5.5% per annum on the liquidation preference then in effect. Following the issue date of the convertible preferred stock, on or before the third business day immediately preceding each fiscal quarter, we determine our

intention whether or not to pay a cash dividend with respect to that ensuing quarter and give notice of our intention to each holder of convertible preferred stock as soon as practicable thereafter.

In the event we do not declare and pay a cash dividend, the liquidation preference will be increased to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to such then applicable liquidation preference multiplied by 8.5% per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and, if declared, will begin to accrue on the first day of the applicable dividend period. Payment in kind ("PIK") dividends, if applicable, will accrue and be cumulative on the same schedule as set forth above for cash dividends and will also be compounded at the applicable annual rate on each applicable subsequent dividend date. PIK dividends are paid upon the occurrence of a liquidation event, conversion or redemption in accordance with the terms of the convertible preferred stock. Cash dividends were declared each quarter for the years ended December 31, 2017 and 2016 and totaled $4.4 million each year.

Reinsurance and Self-Funded Insurance Programs

Reinsurance

We historically reinsured a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through our wholly-owned captive insurance subsidiary, Social Services Providers Captive Insurance Company, or SPCIC. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

At December 31, 2017, the cumulative reserve for expected losses since inception of these historical automobile, general and professional liability and workers' compensation reinsurance programs was $1.1 million, $0.7 million and $5.0 million, respectively. Based on an independent actuarial report, our expected losses related to workers' compensation, automobile and general and professional liability in excess of our liability under our associated historical reinsurance programs at December 31, 2017 was $5.7 million. We recorded a corresponding receivable from third-party insurers and liability at December 31, 2017 for these expected losses, which would be paid by third-party insurers to the extent losses are incurred.

Further, we had restricted cash of $6.3 million and $14.1 million at December 31, 2017 and December 31, 2016, respectively, which was primarily restricted to secure the reinsured claims losses under the historical automobile, general and professional liability and workers' compensation reinsurance programs.

Health Insurance

We offer our NET Services, U.S. based WD Services, and corporate employees an option to participate in self-funded health insurance programs. Additionally, we historically offered this option to our HA Services and Human Services segments' employees. During the year ended December 31, 2017, health claims were self-funded with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $275,000 per person, subject to an aggregating stop-loss limit of $400,000. In addition, the program has a total stop-loss limit for total claims, in order to limit our exposure to catastrophic claims.

Health insurance claims are paid as they are submitted to the plan administrator. We maintain accruals for claims that have been incurred but not yet reported to the plan administrator, and therefore, have not been paid. The incurred but not reported reserve is based on an established cap and current payment trends of health insurance claims. The liability for the self-funded health plan of $2.2 million and $3.0 million as of December 31, 2017 and 2016, respectively, was recorded in "Reinsurance liability and related reserve" in our consolidated balance sheets.

We charge our employees a portion of the costs of our self-funded group health insurance programs. We determine this charge at the beginning of each plan year based upon historical and projected medical utilization data. Any difference between our projections and our actual experience is borne by us, up to the stop-loss limit. We estimate potential obligations for liabilities under this program to reserve what we believe to be a sufficient amount to cover liabilities based on our past

experience. Any significant increase in the number of claims or costs associated with claims made under this program above what we reserve could have a material adverse effect on our financial results.

Contractual cash obligations.

The following is a summary of our future contractual cash obligations as of December 31, 2017:

	At December 31, 2017				
Contractual cash obligations (000's)	**Total**	**Less than 1 Year**	**1-3 Years**	**3-5 Years**	**After 5 Years**
Capital Leases	$ 2,984	$ 2,400	$ 584	$ —	$ —
Interest (1)	467	467	—	—	—
Purchased services commitments (2)	8,448	2,966	5,482	—	—
Guarantees (3)	43,287	42,768	519	—	—
Letters of credit (3)	11,074	11,074	—	—	—
Operating Leases (4)	62,092	20,875	23,114	14,164	3,939
Total	$ 128,352	$ 80,550	$ 29,699	$ 14,164	$ 3,939

(1) Future interest payments have been calculated at the current rates as of December 31, 2017.

(2) Our purchase obligations represent the minimum obligations we have under agreements with certain of our vendors. These minimum obligations are less than our projected use for those periods. Payments may be more than the minimum obligations based on actual use.

(3) Guarantees and letters of credit ("LOCs") are commitments that represent funding responsibilities that may require our performance in the event of third-party demands or contingent events. Guarantees include surety bonds we provide to certain customers to protect against potential non-delivery of our non-emergency transportation services. Of the outstanding balance of our stand-by LOCs, $11.1 million directly reduces the amount available to us from our Credit Facility. The surety bonds and LOC amounts in the above table represent the amount of commitment expiration per period.

(4) The operating leases are for office space and related office equipment. We account for these leases on a monthly basis. Certain leases contain periodic rent escalation adjustments and renewal options.

Other than the items described above, we do not have any off-balance sheet arrangements as of December 31, 2017.

Stock repurchase programs

On November 4, 2015, our Board authorized us to engage in a repurchase program to repurchase up to $70.0 million in aggregate value of our Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $63.0 million, excluding commission payments.

On October 26, 2016, our Board authorized us to engage in a repurchase program to repurchase up to $100.0 million in aggregate value of our Common Stock during the twelve-month period following October 26, 2016. As of October 26, 2017, we spent $30.4 million, excluding commission payments, to purchase 770,808 shares of our Common Stock under this plan.

On November 2, 2017, the Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. As of December 31, 2017, 180,270 shares were purchased under this plan for $10.5 million, excluding commission payments, after it was extended on November 2, 2017. In addition, during the period January 1, 2018 to March 5, 2018, the Company repurchased an additional 527,825 shares for $33.3 million, and $25.8 million was available under the plan to repurchase shares.

Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at

the discretion of our officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements.

Off-balance sheet arrangements

As of December 31, 2017 and 2016, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

New Accounting Pronouncements

The new accounting pronouncements that impact our business are included in Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements,* to our consolidated financial statements and are incorporated herein by reference.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk.***

Foreign currency risk

As of December 31, 2017, we conducted business in 10 countries outside the U.S. As such, our cash flows and earnings are subject to fluctuations from changes in foreign currency exchange rates. We do not currently hedge against the possible impact of currency fluctuations. For 2017, we generated $288.5 million of our net operating revenues from operations outside the U.S.

A 10% reduction in the foreign currency exchange rate from British Pounds to U.S. dollars would have a $18.8 million negative impact on consolidated revenue, and a negligible impact on net income. A 10% reduction in other foreign currency exchange rates would not have a significant impact on our financial results.

We assess the significance of foreign currency risk on a periodic basis and may implement strategies to manage such risk as we deem appropriate.

Item 8. ***Financial Statements and Supplementary Data.***

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting for the registrant, as such term is defined in Rule 13a-15(f) of the Exchange Act. We designed our internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

The Company, under the supervision and with the participation of its management, including its principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2017, based on the criteria set forth in the Internal Control–Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, the Company concluded that its internal control over financial reporting was effective as of December 31, 2017.

KPMG LLP, an independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued an audit report on the effectiveness of the Company's internal control over financial reporting which is presented in Part II, Item 8 of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
The Providence Service Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of The Providence Service Corporation and subsidiaries (the "Company") as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"). In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 9, 2018 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

We did not audit the financial statements of Mercury Parent, LLC, (a 46.6 percent owned investee company) as of and for the year ended December 31, 2017. The Company's investment in Mercury Parent, LLC at December 31, 2017 was $169.7 million, and its equity in net gain of Mercury Parent, LLC was $13.4 million for the year ended December 31, 2017. The financial statements of Mercury Parent, LLC were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Mercury Parent, LLC, is based solely on the report of the other auditors.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2008.

Stamford, Connecticut
March 9, 2018

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
The Providence Service Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited The Providence Service Corporation and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"), and our report dated March 9, 2018 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Providence Service Corporation
Notes to Consolidated Financial Statements
December 31, 2017
(in thousands except share and per share data)

1. Organization and Basis of Presentation

Description of Business

The Providence Service Corporation ("we", the "Company" or "Providence") owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which the Company holds interests comprise the following segments:

- Non-Emergency Transportation Services ("NET Services") – Nationwide manager of non-emergency medical transportation ("NET") programs for state governments and managed care organizations.
- Workforce Development Services ("WD Services") – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in CCHN Group Holdings, Inc. and its subsidiaries ("Matrix"), a nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments ("CHAs"), to members of managed care organizations, accounted for as an equity method investment. On February 16, 2018, Matrix acquired HealthFair, expanding its service offerings to include mobile health assessments, advanced diagnostic testing, and additional care optimization services.

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company.

Discontinued Operations

During the periods presented, the Company completed the following transactions, which resulted in the presentation of the operations as Discontinued Operations. On November 1, 2015, the Company completed the sale of its Human Services segment. In addition to the results through the sale date, the Company has recorded additional expenses related to legal proceedings as described in Note 18, *Commitment and Contingencies*, related to an indemnified legal matter. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest (the "Matrix Transaction"). Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in the Company's Health Assessment Services ("HA Services") segment.

Basis of Presentation

The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The FASB establishes accounting principles generally accepted in the United States ("GAAP"). Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. References to GAAP issued by the FASB in these footnotes are to the FASB *Accounting Standards Codification* ("ASC"), which serves as a single source of authoritative non-SEC accounting and reporting standards to be applied by non-governmental entities. All amounts are presented in U.S. dollars, unless otherwise noted.

The Company holds investments that are accounted for using the equity method. The Company does not control the decision-making process or business management practices of these affiliates. While the Company has access to certain information and performs certain procedures to review the reasonableness of information, the Company relies on management of these affiliates to provide accurate financial information prepared in accordance with GAAP. The Company receives audit reports relating to such financial information from the significant affiliates' independent auditors on an annual basis. The Company is not aware of any errors in or possible misstatements of the financial information provided by its equity affiliates that would have a material effect on the Company's consolidated financial statements.

Reclassifications

The Company has reclassified certain amounts relating to its prior period results to conform to its current period presentation. See Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, for additional information on other reclassifications.

2. Significant Accounting Policies and Recent Accounting Pronouncements

Principles of Consolidation

The accompanying consolidated financial statements include The Providence Service Corporation, its wholly-owned subsidiaries, and entities it controls, or in which it has a variable interest and is the primary beneficiary of expected cash profits or losses. The Company records its investments in entities that it does not control, but over which it has the ability to exercise significant influence, using the equity method. The Company has eliminated significant intercompany transactions and accounts.

Accounting Estimates

The Company uses estimates and assumptions in the preparation of the consolidated financial statements in accordance with GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the Company's consolidated financial statements. These estimates and assumptions also affect the reported amount of net income or loss during any period. The Company's actual financial results could differ significantly from these estimates. The significant estimates underlying the Company's consolidated financial statements include revenue recognition; allowance for doubtful accounts; accrued transportation costs; accrued restructuring; income taxes; recoverability of current and long-lived assets, including equity method investments; intangible assets and goodwill; loss contingencies; accounting for business combinations, including amounts assigned to definite and indefinite lived intangibles and contingent consideration; loss reserves for reinsurance and self-funded insurance programs; and stock-based compensation.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances and highly liquid investments with an initial maturity of three months or less. Investments in cash equivalents are carried at cost, which approximates fair value. The Company places its temporary cash investments with high credit quality financial institutions. At times, such investments may be in excess of the federally insured limits.

At December 31, 2017 and 2016, $40,127 and $21,411, respectively, of cash was held in foreign countries. Such cash is generally used to fund foreign operations, although it may be used also to repay intercompany indebtedness or similar arrangements. As of December 31, 2017, cash held in foreign countries included approximately $15,593 of proceeds from the sale of the Company's joint venture Mission Providence Pty Ltd ("Mission Providence").

Restricted Cash

At December 31, 2017 and 2016, the Company had $6,296 and $14,130, respectively, of restricted cash:

	December 31,	
	2017	**2016**
Collateral for letters of credit - Reinsured claims losses	$ —	$ 2,265
Escrow/Trust - Reinsured claims losses	6,296	11,865
Restricted cash for reinsured claims losses	6,296	14,130
Less current portion	1,091	3,192
Restricted cash, less current portion	$ 5,205	$ 10,938

Of the restricted cash amount at December 31, 2017 and 2016:

- $0 and $2,265, respectively, served as collateral for irrevocable standby letters of credit to secure any reinsured claims losses under the Company's reinsurance program;

- the remaining $6,296 and $11,865, respectively, is primarily related to restricted cash held in trusts for reinsurance claims losses under the Company's historical workers' compensation, general and professional liability and auto liability reinsurance programs, as well as amounts restricted for withdrawal under our self-insured medical and benefits plans.

Accounts Receivable and Allowance for Doubtful Accounts

The Company records accounts receivable amounts at the contractual amount, less an allowance for doubtful accounts. The Company maintains an allowance for doubtful accounts at an amount it estimates to be sufficient to cover the risk that an account will not be collected. The Company regularly evaluates its accounts receivable, especially receivables that are past due, and reassesses its allowance for doubtful accounts based on identified customer collection issues. In circumstances where the Company is aware of a customer's inability to meet its financial obligation, the Company records a specific allowance for doubtful accounts to reduce its net recognized receivable to an amount the Company reasonably expects to collect. The Company also provides a general allowance, based upon historical experience. Under certain contracts of NET Services, final payment is based on a reconciliation of actual utilization and cost, and the final reconciliation may require a considerable period of time. As of December 31, 2017 and 2016, accounts receivable under these reconciliation contracts totaled $42,054 and $45,287, respectively. In addition, certain government entities which WD Services serves remit payment substantially beyond the payment terms. The Company monitors these amounts due to the aging of receivables, but generally believes the balances are collectible. However, factors within those government entities could change and there can be no assurance that such changes would not result in an inability to collect the receivables.

The Company's provision for doubtful accounts expense from continuing operations for the years ended December 31, 2017, 2016 and 2015 was $1,372, $2,892 and $1,369, respectively.

Property and Equipment

Property and equipment are stated at historical cost, net of accumulated depreciation, or at fair value if the assets were initially recorded as the result of a business combination or if the asset was remeasured due to an impairment. Depreciation is calculated using the straight-line method over the estimated useful life of the asset. Maintenance and repairs are expensed as incurred. Gains and losses resulting from the disposition of an asset are reflected in operating expense.

Recoverability of Goodwill

In accordance with ASC 350, *Intangibles-Goodwill and Other*, the Company reviews goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, then we perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

The Company estimates the fair value of the Company's reporting units using either an income approach, a market valuation approach, a transaction valuation approach or a blended approach. The income approach produces an estimated fair value of a reporting unit based on the present value of the cash flows the Company expects the reporting unit to generate in the future. Estimates included in the discounted cash flow model include the discount rate, which the Company determines based

on adjusting an industry-wide weighted-average cost of capital for size, geography, and company specific risk factors, long-term rates of growth and profitability of the Company's business, working capital effects and planned capital expenditures. The market approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to comparable publicly traded entities in similar lines of business. The transaction valuation approach produces an estimated fair value of a reporting unit

based on a comparison of the reporting unit to publicly available transactional data involving both publicly traded and private entities in similar lines of business. The Company's significant estimates in both the market and transaction approach include the selected similar companies with comparable business factors such as size, growth, profitability, risk and return on investment and the multiples the Company applies to revenue and earnings before interest, taxes, depreciation and amortization ("EBITDA") to estimate the fair value of the reporting unit.

As discussed in Note 6, *Goodwill and Intangibles*, the Company determined that goodwill was impaired for the WD Services segment during the year ended December 31, 2016, and the Company recorded an asset impairment charge related to its goodwill of $5,224. The Company did not record any impairment charges for the year ended December 31, 2017. The Company recorded $1,593 of impairment charges related to its Human Services segment during the year ended December 31, 2015, which is included in "Discontinued operations, net of tax" in the consolidated statements of income.

Recoverability of Intangible Assets Subject to Amortization and Other Long-Lived Assets

Intangible assets subject to amortization and other long-lived assets are carried at cost and are amortized or depreciated on a straight-line basis over their estimated useful lives of 5 to 15 years. In accordance with ASC 360, *Property, Plant, and Equipment*, the Company reviews the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, the Company assesses the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, the Company estimates the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, the Company records an impairment loss equal to the excess of the carrying value over the estimated fair value. As discussed in Note 6, *Goodwill and Intangibles*, the Company determined that the WD Services segment's intangible assets and property and equipment were impaired during the year ended December 31, 2016, and the Company recorded asset impairment charges of $9,983 and $4,381 to property and equipment and customer relationship intangible assets, respectively. The Company did not record any impairment charges for the years ended December 31, 2017 and 2015.

Accrued Transportation Costs

Eligible members of our customers schedule transportation through the Company's central reservation system. NET Services generally contracts with third-party providers to provide the transportation. The cost of transportation is recorded in the month the services are rendered, based upon contractual rates and mileage estimates. Transportation providers provide invoices once the trip is completed. Any trips that have not been invoiced require an accrual, based upon the expected cost as well as an estimate for cancellations, as the Company is generally only obligated to pay the transportation provider for completed trips. These estimates are based upon the historical trend associated with each contract's population and the transportation provider network servicing the program. There may be differences between actual invoiced amounts and estimated costs, and any resulting adjustments are included in expense. Accrued transportation costs were $83,588 and $72,356 at December 31, 2017 and 2016, respectively.

Deferred Financing Costs and Debt Discounts

The Company capitalizes direct expenses incurred in connection with its credit facilities and other borrowings, and amortizes such expenses over the life of the respective credit facility or other borrowings. Fees charged by lenders on the revolving facility and all fees charged by third parties are recorded as deferred financing costs and fees charged by lenders on term loans are recorded as a debt discount. Deferred financing costs, net of amortization, totaling $388 and $1,070 as of December 31, 2017 and 2016, respectively, are included in "Prepaid expenses and other" and "Other assets", respectively, on the consolidated balance sheet as there were no borrowings outstanding under the Company's credit facility.

Revenue Recognition

The Company recognizes revenue when it is earned and realizable based on the following criteria: persuasive evidence that an arrangement exists, services have been rendered, the price is fixed or determinable and collectability is reasonably assured.

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where the Company assumes the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made.

Fee for service contracts. Revenues earned under fee for service ("FFS") contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established fees which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, the Company arranges for transportation of members through its network of independent transportation providers, whereby it remits payment to the transportation providers. However, for certain contracts, the Company only provides administrative management services to support the customers' efforts to serve its clients, and the amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services, both of which include employment preparation and placement, apprenticeship and training, youth community service programs and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, the Company often receives four types of revenue streams under contracts with government entities: referral/attachment fees, job placement/job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client attains and holds employment for a specified minimum period of time. Sustainment fees are typically payable when clients maintain a job outcome past specified employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e. the person is placed in a job or reaches the maximum time period for the program). The estimated period of time services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes.

If the rate is adjusted but the Company is unable to adjust its costs accordingly, or if the volume or types of referrals are lower than estimated, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as "Deferred revenue" until the services are rendered.

Stock-Based Compensation

The Company follows the fair value recognition provisions of ASC Topic 718 – *Compensation – Stock Compensation* ("ASC 718"), which requires companies to measure and recognize compensation expense for all share based payments at fair value.

- The Company calculates the fair value of stock options using the Black-Scholes option-pricing formula. The fair value of non-vested restricted stock grants is determined based on the closing market price of the Company's Common Stock on the date of grant. Stock-based compensation expense charged against income for stock options and stock grants is based on the grant-date fair value. Forfeitures are recorded as they occur. The expense for stock-based compensation awards is amortized on a straight-line basis over the requisite service period, which is typically the vesting period.

- The Company records restricted stock units ("RSUs") that may be settled by the holder in cash, rather than shares, as a liability and remeasures these liabilities at fair value at the end of each reporting period. Upon settlement of these awards, the total compensation expense recorded over the vesting period of the awards will equal the settlement amount, which is based on the Company's stock price on the settlement date.

- Performance-based RSUs vest upon achievement of certain company specific performance conditions. On the date of grant, the Company determines the fair value of the performance-based award using the fair value of the Company's Common Stock at that time and it assesses whether it is probable that the performance targets will be achieved. If assessed as probable, the Company records compensation expense for these awards over the requisite service period. At each reporting period, the Company reassesses the probability of achieving the performance targets and the performance period required to meet those targets. The estimation of whether the performance targets will be achieved and of the performance period required to achieve the targets requires judgment, and to the extent actual results or updated estimates differ from the Company's current estimates, the cumulative effect on current and prior periods of those changes will be recorded in the period estimates are revised, or the change in estimate will be applied prospectively depending on whether the change affects the estimate of total compensation cost to be recognized or merely affects the period over which compensation cost is to be recognized. The ultimate number of shares issued and the related compensation expense recognized will be based on a comparison of the final performance metrics to the specified targets.

- The Company calculates the fair value of market-based stock awards, including the Company's 2015 Holding Company LTI Program (the "HoldCo LTIP") awards, using the Monte-Carlo simulation valuation model. Forfeitures are recorded as they occur. Compensation expense for market-based awards is recognized over the requisite service period regardless of whether the market conditions are expected to be achieved.

Income Taxes

Deferred income taxes are determined by the liability method in accordance with ASC Topic 740 - *Income Taxes*. Under this method, deferred tax assets and liabilities are determined based on differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. The Company considers many factors when assessing the likelihood of future realization of deferred tax assets, including recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available for tax reporting purposes, as well as other relevant factors. The Company establishes a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. Due to inherent complexities arising from the nature of the Company's businesses, future changes in income tax law or variances between the Company's actual and anticipated operating results, the Company makes certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

The Company has recorded a valuation allowance which includes amounts for net operating losses and tax credit carryforwards, as more fully described in Note 17, *Income Taxes,* for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations.

The Company recognizes interest and penalties related to income taxes as a component of income tax expense.

The Company accounts for uncertain tax positions based on a two-step process of evaluating recognition and measurement criteria. The first step assesses whether the tax position is more likely than not to be sustained upon examination by the tax authority, including resolution of any appeals or litigation, based on the technical merits of the position. If the tax position meets the more likely than not criteria, the portion of the tax benefit greater than 50% likely to be realized upon settlement with the tax authority is recognized in the consolidated financial statements.

On December 22, 2017, the U.S. bill commonly referred to as the Tax Cuts and Jobs Act ("Tax Reform Act") was enacted as more fully described in Note 17, *Income Taxes*.

Foreign Currency Translation

Local currencies generally are considered the functional currencies outside the U.S. Assets and liabilities for operations in local-currency environments are translated at month-end exchange rates of the period reported. Income and expense items are translated at the average exchange rate for each applicable month. Cumulative translation adjustments are recorded as a component of accumulated other comprehensive loss, net of tax, in stockholders' equity within the consolidated balance sheets.

Loss Reserves for Certain Reinsurance and Self-Funded Insurance Programs

The Company historically reinsured a substantial portion of its automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through the Company's wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

The Company utilizes a report prepared by an independent actuary to estimate the gross expected losses related to historical automobile, general and professional and workers' compensation liability reinsurance policies, including the estimated losses in excess of SPCIC's insurance limits, which would be reimbursed to SPCIC to the extent such losses were incurred. As of December 31, 2017 and 2016, the Company had reserves of $6,699 and $11,240, respectively, for the automobile, general and professional liability and workers' compensation reinsurance policies, net of expected receivables for losses in excess of SPCIC's historical insurance limits. The gross reserve as of December 31, 2017 and 2016 of $12,448 and $16,505, respectively, is classified as "Reinsurance liability reserves" and "Other long-term liabilities" in the consolidated balance sheets. The estimated amount to be reimbursed to SPCIC as of December 31, 2017 and 2016 was $5,749 and $5,265, respectively, and is classified as "Other receivables" and "Other assets" in the consolidated balance sheets.

The Company also maintains a self-funded health insurance program with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $275 per person, subject to an aggregating stop-loss limit of $400. In addition, the program has a total stop-loss limit for total claims, in order to limit the Company's exposure to catastrophic claims. With respect to this program, the Company considers historical and projected medical utilization data when estimating its health insurance program liability and related expense. As of December 31, 2017 and 2016, the Company had $2,229 and $3,022, respectively, in reserve for its self-funded health insurance programs. The reserves are classified as "Reinsurance and related liability reserves" in the consolidated balance sheets.

The Company utilizes analysis prepared by third-party administrators and independent actuaries based on historical claims information with respect to the general and professional liability coverage, workers' compensation coverage, automobile liability, automobile physical damage, and health insurance coverage to determine the amount of required reserves.

The Company regularly analyzes its reserves for incurred but not reported claims, and for reported but not paid claims related to its reinsurance and self-funded insurance programs. The Company believes its reserves are adequate. However, significant judgment is involved in assessing these reserves, such as assessing historical paid claims, average lag times between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known.

Restructuring, Redundancy and Related Reorganization Costs

The Company has engaged in employee headcount optimization actions within the WD Services segment which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans, and are included in accrued expenses to the extent they have not been paid.

Noncontrolling Interests

Noncontrolling interests represent the noncontrolling holders' percentage share of income or losses from a subsidiary in which the Company holds a majority, but less than 100%, ownership interest and the results of which are consolidated and included in the Company's consolidated financial statements. The Company has a 90% ownership in The Reducing Reoffending Partnership Limited, which commenced operations in 2015.

Discontinued Operations

In determining whether a group of assets disposed (or to be disposed) of should be presented as a discontinued operation, the Company makes a determination of whether the criteria for held-for-sale classification is met and whether the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. If these determinations can be made affirmatively, the results of operations of the group of assets being disposed of (as well as any gain or loss on the disposal transaction) are aggregated for separate presentation apart from continuing operating results of the Company in the consolidated financial statements. See Note 20, *Discontinued Operations,* for a summary of discontinued operations.

Earnings Per Share

The Company computes basic earnings per share by taking net income attributable to the Company available to common stockholders divided by the weighted average number of common shares outstanding during the period, including restricted stock and stock held in escrow if such shares are participating securities. Diluted earnings per share includes the potential dilution that may occur from stock-based awards and other stock-based commitments using the treasury stock or the as-if converted methods, as applicable. For additional information on how the Company computes earnings per share, see Note 14, *Earnings Per Share*.

Fair Value of Financial Instruments

The Company discloses the fair value of its financial instruments based on the fair value hierarchy using the following three categories:

Level 1 – Quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company may be required to pay additional consideration in relation to certain acquisitions based on the achievement of certain earnings targets. Acquisition-related contingent consideration is initially measured and recorded at fair value as an element of consideration paid in connection with an acquisition with subsequent adjustments recognized in "General and administrative expense" in the consolidated statements of income. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value using a discounted probability-weighted approach. This approach takes into consideration Level 3 unobservable inputs including probability assessments of expected future cash flows over the period in which the obligation is expected to be settled and applies a discount factor that captures the uncertainties associated with the obligation. Changes in these unobservable inputs could significantly impact the fair value of the obligation recorded in the accompanying consolidated balance sheets and operating expenses in the consolidated statements of income.

The carrying amounts of cash and cash equivalents, restricted cash, accounts receivable and accounts payable approximate their fair value because of the relatively short-term maturity of these instruments.

Recent Accounting Pronouncements

The Company adopted the following accounting pronouncements during the year ended December 31, 2017:

In November 2015, the FASB issued Accounting Standards Update ("ASU") No. 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* ("ASU 2015-17"), which changes how deferred taxes are classified on organizations' balance sheets. The ASU eliminates the current requirement for organizations to present deferred tax liabilities and assets as current and noncurrent in a classified balance sheet. Instead, organizations will be required to classify all deferred tax assets and liabilities as noncurrent. The amendments apply to all organizations that present a classified balance

sheet. For public companies, the amendments are effective for financial statements issued for annual periods beginning after December 16, 2016, and interim periods within those annual periods. The Company adopted ASU 2015-17 retrospectively on January 1, 2017, which resulted in the reclassification of the December 31, 2016 deferred tax assets-current balance of $6,825 and non-current deferred tax assets of $2,493 to long-term deferred tax liabilities in the amount of $9,318.

In March 2016, the FASB issued ASU No. 2016-07, *Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting* ("ASU 2016-07"). ASU 2016-07 eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. ASU 2016-07 instead specifies that the investor should add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and apply the equity method of accounting as of the date the investment became qualified for equity method accounting. ASU 2016-07 is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 and should be applied prospectively. The Company adopted ASU 2016-07 on January 1, 2017. The adoption of ASU 2016-07 had no impact on the Company's financial statements or disclosures.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* ("ASU 2016-09"). ASU 2016-09 is intended to improve the accounting for employee share-based payments and affect all organizations that issue share-based payment awards to their employees. Several aspects of the accounting for share-based payment award transactions are simplified, including income tax consequences, classification of awards as either equity or liabilities and classification in the statement of cash flows. For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company adopted ASU 2016-09 on January 1, 2017, and elected to recognize forfeitures as they occur. As a result, the Company recorded a cumulative effect adjustment of $850 to retained earnings as of January 1, 2017. Upon adoption, all excess tax benefits and tax deficiencies related to employee share-based payments are recognized through income tax expense prospectively.

The Company excluded the related tax benefits when applying the treasury stock method for computing diluted shares outstanding on a prospective basis resulting in a decrease in diluted weighted average shares outstanding of 4,642 shares for the year ended December 31, 2017.

The adoption of ASU 2016-09 subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes based upon the fair value of the award at the grant date. For the year ended December 31, 2017, the Company recorded excess tax deficiencies, net, of $3,604 as an increase to the provision for income taxes. This deficiency primarily related to the Company's Holdco LTIP. As further explained in Note 12, *Stock-Based Compensation and Similar Arrangements*, no shares were distributed under the Company's HoldCo LTIP as the volume weighted average of Providence's stock price over the 90-day trading period ended on December 31, 2017 did not exceed $56.79. As this market condition was not satisfied, a related tax deficiency was recognized during the year ended December 31, 2017 of $3,590.

The Company elected to apply the change in classification of cash flows resulting from excess tax benefits or deficiencies on a retrospective basis. This resulted in an increase in cash flows provided by operating activities of $282, offset by an increase of $282 in cash flows used in financing activities in the consolidated statement of cash flows for the year ended December 31, 2016, and an increase in cash flows provided by operating activities of $2,857, offset by an increase of $2,857 in cash flows used in financing activities in the consolidated statement of cash flows for the year ended December 31, 2015. Additionally, ASU 2016-09 requires that employee taxes paid when an employer withholds shares for tax-withholding purposes be reported as financing activities in the consolidated statements of cash flows, which is how the Company has historically classified these amounts.

In January 2017, the FASB issued ASU No. 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business* ("ASU 2017-01"). ASU 2017-01 clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. ASU 2017-01 is effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The Company adopted ASU 2017-01 on April 1, 2017. The adoption of ASU 2017-01 had no impact on the Company's financial statements or disclosures.

In January 2017, the FASB issued ASU No. 2017-03, *Accounting Changes and Error Corrections (Topic 250) and Investments - Equity Method and Joint Ventures (Topic 323)* ("ASU 2017-03"). ASU 2017-03 expands required qualitative disclosures when registrants cannot reasonably estimate the impact that adoption of an ASU will have on the financial

statements. Such qualitative disclosures would include a comparison of the registrant's new accounting policies, if determined, to current accounting policies, a description of the status of the registrant's process to implement the new standard and a description of the significant implementation matters yet to be addressed by the registrant. The Company implemented ASU 2016-15 in its consolidated financial statements for the year ended December 31, 2017 resulting in enhanced qualitative disclosures regarding future adoption of new ASUs.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04"). ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. As a result, under ASU 2017-04, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the impairment loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. This guidance is effective prospectively for fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed after January 1, 2017. The Company adopted ASU 2017-04 on April 1, 2017. The adoption of ASU 2017-04 had no impact on the Company's financial statements or disclosures.

Recent accounting pronouncements that were not yet adopted by the Company through December 31, 2017 are as follows:

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* ("ASU 2014-09"). ASU 2014-09 introduced FASB Accounting Standards Codification Topic 606 ("ASC 606"), which will replace most currently applicable existing revenue recognition guidance and is intended to improve and converge with international standards the financial reporting requirements for revenue from contracts with customers. The core principle of ASC 606 is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. ASC 606 also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. ASU 2014-09 allows for adoption either on a full retrospective basis to each prior reporting period presented or on a modified retrospective basis with the cumulative effect of initially applying the new guidance recognized at the date of initial application, which is effective for the Company on January 1, 2018.

The Company has substantially completed its adoption plan, under which it performed conceptual and detailed contract reviews to determine the impact of ASC 606 on its financial statements, internal controls and operational processes. The guidance in ASC 606 on the following topics was critical to the Company's analysis:

- the effect of specified clauses on the term of many of the Company's contracts with customers;
- the nature of the promises in many of the Company's contracts with customers to perform integrated services over a period of time;
- whether and how much variable consideration to include when determining the transaction prices for its contracts with customers;
- whether any of the Company's customer contracts require performance over a series of distinct service periods and the impact on determining and allocating the transaction price; and
- the manner in which the Company will measure its progress towards fully satisfying its performance obligations, including a determination of whether the Company may be able to use certain practical expedients.

The impact of adoption on revenue for each segment is as follows:

NET Services – For non-emergency transportation solutions, the Company will primarily use the right-to-invoice practical expedient to account for revenue when the Company has a right to consideration from a customer in an amount that corresponds directly with the value of the entity's performance completed to date. This is consistent with the Company's current revenue recognition policy. The only impact identified for NET Services is the presentation of one contract on a net basis which is currently accounted for on a gross basis, as the Company does not control the service, as defined under the new standard.

WD Services – WD Services has a number of contracts which include variable consideration, whereby it earns revenues if certain contractually defined outcomes occur in the future. When the related performance obligations are satisfied over time, the Company will recognize revenue in the proportion that the outcome has been earned based on services provided. The amount of revenue is based upon the Company's estimate of the final amount of outcome fees to be earned. The Company will evaluate probability using either the expected value method or the most likely amount method, as appropriate. At each reporting period, the Company will update its estimate of outcome fees, based upon actual results as well as refined estimates of future results, and will record an adjustment to revenue, based upon services performed to date. Under the new

standard, the Company may recognize revenues for outcome fees earlier under the new standard, as revenue is currently recognized upon the final resolution of the contingency, i.e. the outcome is able to be invoiced. However, under certain contracts the Company receives up-front fees, which may be recognized over a longer period under the new standard as compared to current guidance. As of adoption, such impacts are not material to the consolidated financial statements.

The new standard will require the Company to recognize contract assets and liabilities on its balance sheet as appropriate. Additionally, the Company will be required to make additional disclosures about the nature of its contracts and the related performance obligations.

The Company is in its final stages of quantifying the financial impacts of the new guidance based on the contracts that exist at the date of adoption, as well as evaluating presentation of our revenues and required enhancements to disclosures. We have implemented both process and information systems changes to identify and assess contracts that are impacted by the new revenue recognition criteria and accumulate data to satisfy new disclosure requirements. As discussed above, we expect the new standard will have an immaterial impact on our consolidated financial statements, other than increased disclosures, upon adoption. Changes to revenue recognition as a result of applying the new standard will largely arise from outcome fees as described above, as well as the timing of revenue recognition for up-front fees. The Company will use the modified retrospective adoption method, and plans to adopt the standard on January 1, 2018.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* ("ASU 2016-02"). ASU 2016-02 introduced FASB Accounting Standards Codification Topic 842 ("ASC 842"), which will replace ASC 840, *Leases*. Under ASC 842, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.

ASU 2016-02 is effective for publicly held entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Lessees must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach does not require transition accounting for leases that expired before the earliest comparative period presented. Lessees may not apply a full retrospective transition approach. The Company has not entered into significant lease agreements in which it is the lessor; however, the Company does have lease agreements in which it is the lessee. The Company is assessing the impact of applying ASC 842 to its lease agreements. It is in the process of developing an adoption plan, assembling a cross-functional project team and assessing the impacts of applying ASC 842 to the Company's financial statements, information systems and internal controls. The assessment of applying ASU 2016-02 is ongoing and, therefore, the Company has not yet determined whether the impacts will be material to the Company's consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses (Topic 326)* ("ASU 2016-13"). The amendments in ASU 2016-13 will supersede or clarify much of the existing guidance for reporting credit losses for assets held at amortized cost basis and available for sale debt securities. The amendments in ASU 2016-13 affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. ASU 2016-13 is effective for financial statements issued for fiscal years beginning after December 15, 2019, with early adoption permitted for fiscal years beginning after December 15, 2018. The Company has not evaluated the impact of ASU 2016-13 on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"). ASU 2016-15 provides guidance for eight targeted changes with respect to how cash receipts and cash payments are classified in the statements of cash flows, with the objective of reducing diversity in practice. ASU 2016-15 is effective for financial statements issued for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption is not expected to have a significant impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* ("ASU 2016-18"). ASU 2016-18 requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for public entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period; however, any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. ASU 2016-18 must be adopted retrospectively. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption will impact the Company's consolidated statements of cash flow as the Company has restricted cash totaling $6,296 at December 31, 2017. Additionally, the Company will be required to make

additional disclosures detailing the balance sheet line items that are included in the sum of cash, cash equivalents and restricted cash in the consolidated statements of cash flow.

In May 2017, the FASB issued ASU No. 2017-09, *Compensation–Stock Compensation (Topic 718): Scope of Modification Accounting* ("ASU 2017-09"). ASU 2017-09 provides guidance about which changes to the terms of a share-based payment award

should be accounted for as a modification. A change to an award should be accounted for as a modification unless the fair value of the modified award is the same as the original award, the vesting conditions do not change, and the classification as an equity or liability instrument does not change. This guidance is effective for fiscal years beginning after December 15, 2017. Early adoption is permitted. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption of ASU 2017-09 is not expected to have a material impact on the Company's consolidated financial statements.

3. Equity Investment

Matrix

Prior to the closing of the Matrix Transaction on October 19, 2016, the financial results of Matrix were included in the Company's HA Services segment. Subsequent to the closing of the Matrix Transaction, the Company owned a 46.8% noncontrolling interest in Matrix. As of December 31, 2017, the Company owned a 46.6% noncontrolling interest in Matrix. Pursuant to a Shareholder's Agreement, affiliates of Frazier Healthcare Partners hold rights necessary to control the fundamental operations of Matrix. The Company accounts for this investment in Matrix under the equity method of accounting and the Company's share of Matrix's income or losses are recorded as "Equity in net (gain) loss of investees" in the accompanying consolidated statements of income.

The carrying amount of the assets included in the Company's consolidated balance sheet and the maximum loss exposure related to the Company's interest in Matrix as of December 31, 2017 and 2016 totaled $169,699 and $157,202, respectively.

Summary financial information for Matrix on a standalone basis is as follows:

	December 31,	
	2017	**2016**
Current assets	$ 37,563	$ 28,589
Long-term assets	597,613	614,841
Current liabilities	27,718	25,791
Long-term liabilities	240,513	281,348

	Twelve months ended December 31, 2017	**October 19, 2016 through December 31, 2016**
Revenue	$ 227,872	$ 41,635
Operating income (loss)	11,870	(4,079)
Net income (loss)	26,665	(4,200)

Included in Matrix's standalone net income of $26,665 for the year ended December 31, 2017 is depreciation and amortization of $33,512, transaction related expenses of $3,537, which includes $2,679 of transaction incentive compensation, equity compensation of $2,639, management fees paid to Matrix's shareholders of $2,331, merger and acquisition due diligence related costs of $685, interest expense of $14,818 and an income tax benefit of $29,613. The income tax benefit primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. Included in Matrix's standalone net loss of $4,200 for the year ended December 31, 2016 is depreciation and amortization of $6,356, transaction related expenses of $6,367, which includes $4,033 of transaction incentive compensation, equity compensation of $407, management fees paid to Matrix's shareholders of $396, interest expense of $2,949 and an income tax benefit of $2,828.

See Note 20, *Discontinued Operations*, for Matrix's January 1, 2016 through October 19, 2016 results of operations, as well as the results of operations for the year ended December 31, 2015.

Mission Providence

The Company entered into a joint venture agreement in November 2014 with Mission Australia ACN ("Mission Australia") to form Mission Providence. Mission Providence delivers employment preparation and placement services in Australia. The

Company had a 60% ownership interest in Mission Providence, and had rights to 75% of Mission Providence's distributions of cash or profit surplus twice per calendar year. The Company accounted for this investment under the equity method of accounting and the Company's share of Mission Providence's income or losses was recorded as "Equity in net (gain) loss of investees" in the accompanying consolidated statements of income. Cash contributions made to Mission Providence in exchange for its equity interests are included in the consolidated statements of cash flows as "Purchase of equity investments".

On September 29, 2017, the Company and Mission Australia completed the sale of 100% of the stock of Mission Providence pursuant to a share sale agreement. Upon the sale of Mission Providence, the Company received AUD 20,184, or $15,823 of proceeds, for its equity interest, net of transaction fees. Subsequently, a working capital adjustment was finalized in December 2017 resulting in the return of $229 of the proceeds. The related gain on sale of Mission Providence totaling $12,377 is recorded as "Gain on sale of equity investment" in the accompanying consolidated statements of income. The carrying amount of the assets included in the Company's consolidated balance sheet related to the Company's interest in Mission Providence was $4,021 at December 31, 2016.

Summary financial information for Mission Providence on a standalone basis is as follows:

	December 31, 2016
Current assets	$ 4,640
Long-term assets	10,473
Current liabilities	12,844
Long-term liabilities	1,655

	Nine months ended September 30, 2017	Twelve months ended December 31, 2016
Revenue	$ 30,125	$ 36,546
Operating loss	(1,765)	(9,664)
Net loss	(1,934)	(8,843)

4. Prepaid Expenses and Other

Prepaid expenses and other were comprised of the following:

	December 31,	
	2017	2016
Prepaid income taxes	$ 1,106	$ 1,467
Escrow funds	10,000	10,000
Prepaid insurance	2,121	3,153
Prepaid taxes and licenses	906	3,570
Note receivable	3,224	3,130
Prepaid rent	2,268	2,013
Deposits held for leased premises and bonds	2,849	2,609
Other	12,769	11,953
Total prepaid expenses and other	$ 35,243	$ 37,895

Escrow funds represent amounts related to indemnification claims from the sale of the Human Services segment, which was completed on November 1, 2015. The Company has accrued $15,000 as a contingent liability for the settlement of potential indemnification claims, which is included in "Accrued expenses" in the consolidated balance sheet as of

December 31, 2017. The escrow funds will be used to satisfy a portion of this settlement. See Note 18, *Commitments and Contingencies*, for further information.

5. Property and Equipment

Property and equipment consisted of the following:

	Estimated Useful Life (years)			December 31, 2017	December 31, 2016
Computer and telecom equipment	3	—	5	$ 35,915	$ 31,854
Software	3	—	5	32,989	26,883
Leasehold improvements	Shorter of 7 years or lease term			17,890	16,720
Furniture and fixtures	5	—	10	6,416	8,070
Automobiles	5			3,797	3,597
Construction and development in progress	N/A			13,384	5,831
				110,391	92,955
Less accumulated depreciation				60,014	46,735
Total property and equipment, net				$ 50,377	$ 46,220

Depreciation expense from continuing operations was $18,542, $18,038 and $14,488 for the years ended December 31, 2017, 2016 and 2015, respectively.

The Company sold the building and land that included holding company office space in Arizona effective December 31, 2016 resulting in an asset impairment charge of $1,415 for the year ended December 31, 2016. The Company recorded an asset impairment charge of $9,983 for the year ended December 31, 2016 related to its WD Services segment based on its review of the carrying value of long-lived assets. The impairment charges are reflected in "Asset impairment charge" in the consolidated statement of income for the year ended December 31, 2016. See Note 6, *Goodwill and Intangibles,* for further discussion of the impairment charges incurred related to the WD Services segment during 2016. Construction in progress as of December 31, 2017 is primarily comprised of NET Services, which has incurred substantial software development costs for its LCAD NextGen technology system. Such amounts are expected to be placed into service during 2018.

6. Goodwill and Intangibles

Impairment

The Company did not record any impairment charges for the year ended December 31, 2017. During the fourth quarter of 2016, the Company reviewed WD Services for impairment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the United Kingdom ("UK") impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with the carrying amounts and recorded an asset impairment charge of $4,381 to definite-lived customer relationship intangible assets, which is recorded in "Asset impairment charge" on the Company's consolidated statement of operations. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an asset impairment charge of $5,224, which is included in "Asset impairment charge" on the Company's consolidated statement of operations. The Company reviewed the carrying value of other long-lived assets and goodwill, and noted no indicators of impairment for NET Services

or the Matrix Investment during the year ended December 31, 2016. The Company recorded $1,593 of impairment charges related to its Human Services segment during the year ended December 31, 2015, which is included in “Discontinued operations, net of tax” in the consolidated statements of income.

Goodwill

Changes in goodwill were as follows:

	NET Services	WD Services	Consolidated Total
Balances at December 31, 2015			
Goodwill	$ 191,215	$ 40,784	$ 231,999
Accumulated impairment losses	(96,000)	(6,041)	(102,041)
	95,215	34,743	129,958
Asset impairment charge	—	(5,224)	(5,224)
Foreign currency translation adjustment	—	(5,110)	(5,110)
Balances at December 31, 2016			
Goodwill	191,215	35,674	226,889
Accumulated impairment losses	(96,000)	(11,265)	(107,265)
	95,215	24,409	119,624
Foreign currency translation adjustment	—	2,044	2,044
Balances at December 31, 2017			
Goodwill	191,215	37,718	228,933
Accumulated impairment losses	(96,000)	(11,265)	(107,265)
	$ 95,215	$ 26,453	$ 121,668

The total amount of goodwill that was deductible for income tax purposes related to acquisitions as of December 31, 2017 and 2016 was $4,222.

Intangible Assets

Intangible assets are comprised of acquired customer relationships, trademarks and trade names, and developed technology. Intangible assets consisted of the following:

		December 31,			
		2017		2016	
	Estimated Useful Life (Yrs)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	15	$ 48,128	$ (33,136)	$ 48,020	$ (29,941)
Customer relationships	10	30,583	(11,871)	27,915	(8,147)
Trademarks and Trade Names	10	14,525	(5,205)	13,282	(3,431)
Developed technology	5	3,228	(2,313)	2,951	(1,525)
Total		$ 96,464	$ (52,525)	$ 92,168	$ (43,044)

The gross carrying amount as of December 31, 2017 and 2016 includes the asset impairment charge of $4,381 to definite-lived customer relationship intangible assets of WD Services recorded during the year ended December 31, 2016. The weighted-average amortization period at December 31, 2017 for intangibles was 12.3 years. No significant residual value is estimated for these intangible assets. Amortization expense from continuing operations was $7,927, $8,566 and $9,510 for the years ended December 31, 2017, 2016 and 2015, respectively.

The total amortization expense is estimated to be as follows for the next five years and thereafter as of December 31, 2017 based upon the applicable foreign exchange rates as of December 31, 2017:

Year	Amount
2018	$ 8,126
2019	7,749
2020	7,473
2021	7,387
2022	7,025
Thereafter	6,179
Total	$ 43,939

7. Accrued Expenses

Accrued expenses consisted of the following:

	December 31,	
	2017	2016
Accrued compensation and related	$ 33,653	$ 23,050
NET Services accrued contract payments	17,487	32,836
Accrued settlement	15,000	6,000
Income taxes payable	3,723	372
Other	33,975	40,123
Total accrued expenses	$ 103,838	$ 102,381

8. Restructuring, Redundancy and Related Reorganization Costs

WD Services has two active redundancy programs at December 31, 2017. During the year ended December 31, 2017, WD Services had four redundancy programs. Of these four redundancy plans, two were approved in 2015 and have been completed; a plan related to the termination of employees delivering services under an offender rehabilitation program ("Offender Rehabilitation Program") and a plan related to the termination of employees delivering services under the Company's employability and skills training programs and certain other employees in the United Kingdom ("UK Restructuring Program"). In addition, a redundancy plan related to the termination of employees as part of a value enhancement project ("Ingeus Futures' Program") to better align costs with revenue for certain contracts in the UK and to improve overall operating performance was approved in 2016 and a further redundancy program to align costs with revenue for offender rehabilitation services ("Delivery First Program") was approved in the fourth quarter of 2017. The Company recorded severance and related charges of $2,577 and $8,511 during the years ended December 31, 2017 and 2016, respectively, relating to the termination benefits for employee groups and specifically identified employees impacted by these plans. The severance charges incurred are recorded as "Service expense" in the accompanying consolidated statements of income.

The initial estimates of severance and related charges for the plans were based upon the employee groups impacted, average salary and benefits, and redundancy benefits pursuant to the existing policies. Additional charges above the initial estimates were incurred for the redundancy plans related to the actualization of termination benefits for specifically identified employees impacted under these plans, as well as an increase in the number of individuals impacted by these plans. The final identification of the employees impacted by each program is subject to customary consultation procedures. In addition, additional phases of value enhancement projects may be undertaken in the future, if costs and revenue are not aligned.

Summary of Severance and Related Charges

	January 1, 2017	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2017
Ingeus Futures' Program	$ 2,486	$ 1,223	$ (3,386)	$ 159	$ 482
Offender Rehabilitation Program	1,380	(40)	(1,357)	17	—
UK Restructuring Program	50	(53)	—	3	—
Delivery First Program	—	1,447	(184)	24	1,287
Total	$ 3,916	$ 2,577	$ (4,927)	$ 203	$ 1,769

	January 1, 2016	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2016
Ingeus Futures' Program	$ —	$ 2,515	$ —	$ (29)	$ 2,486
Offender Rehabilitation Program	6,538	4,865	(8,924)	(1,099)	1,380
UK Restructuring Program	2,059	1,131	(3,031)	(109)	50
Total	$ 8,597	$ 8,511	$ (11,955)	$ (1,237)	$ 3,916

The total of accrued severance and related costs of $1,769 and $3,916 are reflected in “Accrued expenses” in the consolidated balance sheets at December 31, 2017 and 2016, respectively. The amount accrued as of December 31, 2017 for the Ingeus Futures’ Program and Delivery First Program is expected to be settled principally during 2018.

9. Long-Term Obligations

The Company’s long-term obligations were as follows:

	December 31, 2017	December 31, 2016
$200,000 revolving loan, LIBOR plus 2.25% - 3.25% with interest payable at least once every three months through August 2018	$ —	$ —
Capital lease obligations	2,984	3,611
	2,984	3,611
Less current portion of capital lease obligations	2,400	1,721
Total long-term obligations, less current portion	$ 584	$ 1,890

Annual maturities of capital lease obligations as of December 31, 2017 are as follows:

Year	Amount
2018	$ 2,400
2019	504
2020	80
Total	$ 2,984

Credit Facility

The Company is a party to the amended and restated credit and guaranty agreement, dated as of August 2, 2013 (as amended, the "Credit Agreement"), with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, and the other lenders party thereto. The Credit Agreement provides the Company with a $200,000 revolving credit facility (the "Credit Facility"), including a sub-facility of $25,000 for letters of credit. As of December 31, 2017, the Company had no borrowings and seven letters of credit in the amount of $11,074 outstanding under the revolving credit facility. At December 31, 2017, the Company's available credit under the revolving credit facility was $188,926. Under the Credit Agreement, the Company has an option to request an increase in the amount of the revolving credit facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75,000 with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. The Company may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility. The Credit Facility matures on August 2, 2018.

Interest on the outstanding principal amount of loans accrues, at the Company's election, at a per annum rate equal to LIBOR, plus an applicable margin, or the base rate as defined in the agreement plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on the Company's consolidated leverage ratio as defined in the Credit Agreement. Interest on the loans is payable quarterly in arrears. In addition, the Company is obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on the Company's consolidated leverage ratio.

The Company's obligations under the Credit Facility are guaranteed by all of the Company's present and future domestic subsidiaries, excluding certain domestic subsidiaries which include the Company's insurance captive. The Company's obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of the Company's respective assets, including a pledge of 100% of the issued and outstanding stock of the Company's domestic subsidiaries, excluding the Company's insurance captive, and 65% of the issued and outstanding stock of the Company's first tier foreign subsidiaries.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on the Company's ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, sell assets, and merge and consolidate. The Company is subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants.

Capital Leases

NET Services has seven capital leases for information technology hardware and software with termination dates ranging from January 2018 through October 2020. The terms of the leases are between 12 and 36 months, with interest recorded at an incremental borrowing rate of 3.28%. At December 31, 2017, $6,045 represents equipment under capital leases and $1,642 represents accumulated depreciation recognized on this leased equipment.

10. Convertible Preferred Stock, Net

The Company completed a rights offering on February 5, 2015 (the "Rights Offering") providing all of the Company's existing common stock holders the non-transferrable right to purchase their pro rata share of $65,500 of convertible preferred stock at a price equal to $100.00 per share ("Preferred Stock"). The Preferred Stock is convertible into shares of Providence's Company's common stock, $0.001 par value per share ("Common Stock") at a conversion price equal to $39.88 per share, which was the closing price of the Company's Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement (the "Standby Purchase Agreement") between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC

(collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock were purchased by the Standby Purchasers at the $100.00 per share subscription price. The Company received $65,500 in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement. Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's Preferred Stock, at a purchase price of $105.00

per share or a total purchase price of $15,750, of the same series and having the same conversion price as the Preferred Stock sold in the Rights Offering.

The Company may pay a noncumulative cash dividend on each share of Preferred Stock, if and when declared by a committee of its Board of Directors ("Board"), at the rate of five and one-half percent (5.5%) per annum on the liquidation preference then in effect. On or before the third business day immediately preceding each fiscal quarter, the Company must determine its intention whether or not to pay a cash dividend with respect to that ensuing quarter and will give notice of its intention to each holder of Preferred Stock as soon as practicable thereafter.

In the event the Company does not declare and pay a cash dividend, the Company will declare a payment in kind ("PIK") dividend by increasing the liquidation preference of the convertible Preferred Stock to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to the liquidation preference then in effect multiplied by eight and one-half percent (8.5%) per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination. All holders of the Company's Preferred Stock are able to convert their Preferred Stock into shares of Common Stock at a rate of approximately 2.51 shares of Common Stock for each share of Preferred Stock. As of December 31, 2017, 1,800 shares of Preferred Stock have been converted to 4,510 shares of Common Stock.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and commenced on April 1, 2015, and, if declared, begin to accrue on the first day of the applicable dividend period. PIK dividends, if applicable, accrue cumulatively on the same schedule as set forth above for cash dividends and are also compounded at the applicable annual rate on each applicable subsequent dividend date. Cash dividends on redeemable convertible preferred stock totaling $4,418, or $5.50 per share, $4,419, or $5.50 per share, and $3,928, or $4.88 per share, were distributed to convertible preferred stockholders for the years ended December 31, 2017, 2016 and 2015, respectively.

The Preferred Stock is accounted for outside of stockholders' equity as it may be redeemed upon certain change in control events that are not solely in the control of the Company. Dividends are recorded in stockholders' equity and consist of the 5.5%/8.5% dividend. At the time of issuance of the Preferred Stock, the Company recorded a discount on Preferred Stock related to beneficial conversion features that arose due to the closing price of the Company's Common Stock being higher than the conversion price of the Preferred Stock on the commitment date. The amortization of this discount was recorded in stockholders' equity. The discount was fully amortized as of June 30, 2015.

The following table summarizes the Preferred Stock activity for the years ended December 31, 2017 and 2016:

	Dollar Value	Share Count
Balance at December 31, 2015	$ 77,576	803,518
Conversion to common stock	(12)	(120)
Allocation of issuance costs	1	—
Balance at December 31, 2016	$ 77,565	803,398
Conversion to common stock	(20)	(198)
Allocation of issuance costs	1	—
Balance at December 31, 2017	$ 77,546	803,200

As of December 31, 2017 and 2016, the outstanding shares of Preferred Stock were convertible into 2,014,042 and 2,014,538 shares of Common Stock, respectively.

11. Stockholders' Equity

At December 31, 2017 and 2016 there were 17,473,598 and 17,315,661 shares of the Company's Common Stock issued, respectively, including 4,126,132 and 3,478,676 treasury shares at December 31, 2017 and 2016, respectively.

Subject to the rights specifically granted to holders of any then outstanding shares of the Company's Preferred Stock, the Company's common stockholders are entitled to vote together as a class on all matters submitted to a vote of the Company's common stockholders, and are entitled to any dividends that may be declared by the Board. The Company's

common stockholders do not have cumulative voting rights. Upon the Company's dissolution, liquidation or winding up, holders of the Company's Common Stock are entitled to share ratably in the Company's net assets after payment or provision for all liabilities and any

preferential liquidation rights of the Company's Preferred Stock then outstanding. The Company's common stockholders do not have preemptive rights to purchase shares of the Company's stock. The issued and outstanding shares of the Company's Common Stock are not subject to any redemption provisions and are not convertible into any other shares of the Company's capital stock. The rights, preferences and privileges of holders of the Company's Common Stock will be subject to those of the holders of any shares of the Company's Preferred Stock the Company may issue in the future.

The following table reflects the total number of shares of the Company's Common Stock reserved for future issuance as of December 31, 2017:

Shares of common stock reserved for:	
Exercise of stock options and restricted stock awards	681,608
Conversion of preferred stock to common stock	2,014,042
Issuance of Performance Restricted Stock Units	18,122
Total shares of common stock reserved for future issuance	2,713,772

Share Repurchases

On October 14, 2015, the Company entered into an agreement to repurchase 707,318 of its Common Stock held by former stockholders of Matrix for an aggregate purchase price of $29,000 (or $41.00 per share). The Company funded this purchase through a combination of borrowing on its Credit Facility and cash on hand. The purchase of these shares was completed on October 30, 2015.

On November 4, 2015, the Board authorized the Company to engage in a repurchase program to repurchase up to $70,000 in aggregate value of the Company's Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $62,981, excluding commission payments.

On October 26, 2016, the Board authorized a new repurchase program, under which the Company may repurchase up to $100,000 in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30,360, excluding commission payments.

On November 2, 2017, the Board approved the extension of the Company's October 26, 2016 stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69,640 (the amount remaining from the $100,000 repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. As of December 31, 2017, 180,270 shares were purchased under this plan after it was extended on November 2, 2017 for $10,503, excluding commission payments.

During the years ended December 31, 2017, 2016 and 2015, the Company withheld 19,556, 2,736 and 15,961 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations arising from vesting of restricted stock awards. In addition, during the years ended December 31, 2017 and 2015, the Company withheld 5,665 and 5,718 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations and the exercise price upon the exercise of stock options. During the year ended December 31, 2015, the Company withheld 43,743 shares to cover the settlement of income tax and related benefit withholding obligations arising from shares held by employees that were released from escrow related to the Matrix acquisition, which shares are treated as treasury stock.

12. Stock-Based Compensation and Similar Arrangements

The Company provides stock-based compensation to employees, non-employee directors, consultants and advisors under the Company's 2006 Long-Term Incentive Plan ("2006 Plan"). The 2006 Plan allows the flexibility to grant or award stock options, stock appreciation rights, restricted stock, unrestricted stock, stock units including restricted stock units and performance awards to eligible persons.

The following table summarizes the activity under the 2006 Plan as of December 31, 2017:

	Number of shares of the Company's Common Stock authorized for issuance	Number of shares of the Company's Common Stock remaining for future grants	Number of shares of the Company's Common Stock subject to	
			Stock Options	Stock Grants
2006 Plan	5,400,000	1,938,666	606,695	111,157

The following table reflects the amount of stock-based compensation, for share settled awards issued to employees and non-employee directors, recorded in each financial statement line item for the years ended December 31, 2017, 2016 and 2015:

	Year Ended December 31,		
	2017	2016	2015
Service expense	$ 491	$ 830	$ 21,480
General and administrative expense	7,052	4,324	5,027
Equity in net (gain) loss of investees	76	18	—
Discontinued operations, net of tax	—	(18)	115
Total stock-based compensation	$ 7,619	$ 5,154	$ 26,622

Stock-based compensation included in service expense is related to the following segments:

	Year Ended December 31,		
	2017	2016	2015
NET Services	$ 434	$ 841	$ 724
WD Services (a)	57	(11)	20,756
Total stock-based compensation in service expense	$ 491	$ 830	$ 21,480

(a) WD Services includes $16,078 for the year ended December 31, 2015 related to the acceleration of awards pursuant to the separation agreements for two executives.

The amounts above exclude tax benefits of $2,885, $2,072 and $2,322 for the years ended December 31, 2017, 2016 and 2015, respectively.

Stock Options

During the year ended December 31, 2016, the Company did not grant any stock options. The fair value of each stock option awarded to employees is estimated on the date of grant using the Black-Scholes option-pricing formula based on the following assumptions for the years ended December 31, 2017 and 2015:

	Year Ended December 31,					
	2017			2015		
Expected dividend yield	0.0%			0.0%		
Expected stock price volatility	19.45%	—	42.95%	33.8%	—	46.14%
Risk-free interest rate	0.95%	—	2.23%	0.4%	—	1.35%
Expected life of options (years)	0.03	—	6.50	0.03	—	4.00

The risk-free interest rate was based on the U.S. Treasury security rate in effect as of the date of grant which corresponds to the expected life of the award. The expected stock price volatility was based on the Company's historical data. The expected

lives of options were based on the Company's historical data, a simplified method for plain vanilla options, or the Company's best estimate where appropriate.

During the fourth quarter of 2017, James Lindstrom resigned from the Company as Chief Executive Officer ("CEO") and board member of the Company. As a result of Mr. Lindstrom's resignation as CEO, a separation agreement was entered into between the Company and Mr. Lindstrom. As a result of this separation agreement, Mr. Lindstrom was granted 125,000 stock options with an exercise price of $61.33 per share that were immediately vested. The options are exercisable through December 31, 2018.

During the year ended December 31, 2017, the Company issued 91,400 shares of its Common Stock in connection with the exercise of employee stock options under the Company's 2006 Plan.

The following table summarizes the stock option activity for the year ended December 31, 2017:

	Year ended December 31, 2017			
	Number of Shares Under Option	Weighted-average Exercise Price	Weighted-average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at beginning of period	355,598	$ 33.48		
Granted	371,775	57.08		
Exercised	(115,825)	29.77		
Forfeited/Cancelled	(854)	46.44		
Expired	(3,999)	24.59		
Outstanding at end of period	606,695	$ 48.70	2.62	$ 6,705
Vested or expected to vest at end of period	606,695	$ 48.70	2.62	$ 6,705
Exercisable at end of period	357,984	$ 44.65	2.10	$ 5,508

The weighted-average grant-date fair value for options granted, total intrinsic value and cash received by the Company related to options exercised during the years ended December 31, 2017, 2016 and 2015 were as follows:

	Year ended December 31,		
	2017	2016	2015
Weighted-average grant date fair value per share	$ 9.05	$ —	$ 8.77
Options exercised:			
Total intrinsic value	$ 2,010	$ 979	$ 6,659
Cash received	$ 1,921	$ 4,108	$ 4,894

Stock Option Modifications

During the fourth quarter of 2017, as a result of the separation agreement between the Company and Mr. Lindstrom, Mr. Lindstrom's outstanding stock options from his grants of 11,319 on August 6, 2015 and 9,798 on March 15, 2017 were modified to accelerate the vesting date of both awards to November 15, 2017 and allow exercise of the stock options until December 31, 2018. As a result of the modification to the terms of the original stock options granted to Mr. Lindstrom, the Company recognized an accelerated expense of $83 on the award for the year ended December 31, 2017.

During the second quarter of 2015, Warren Rustand terminated his role as CEO and board member of the Company, but remained employed as a Senior Advisor through the end of 2015. As a result of Mr. Rustand's termination as CEO, a separation agreement was entered into between the Company and Mr. Rustand. As a result of this separation agreement, Mr. Rustand's outstanding stock options from his grant of 200,000 stock options on September 11, 2014 were modified to

accelerate the vesting date for the second tranche of options from June 30, 2015 to June 5, 2015, and the exercise period for all vested options of 133,332 was lengthened. In addition, the third tranche of options, consisting of 66,668 options, was cancelled. As a result of the modifications

to the terms of the original stock options granted to Mr. Rustand, the Company recognized additional stock-based compensation expense of $737 for the year ended December 31, 2015.

Restricted Stock Awards

During the year ended December 31, 2017, the Company granted 33,420 shares of restricted stock ("RSAs") to non-employee directors of its Board, executive officers and certain key employees. The awards primarily vest in three equal installments on the first, second and third anniversaries of the date of grant.

During the year ended December 31, 2017, the Company issued 36,623 shares of its Common Stock to non-employee directors, executive officers and key employees upon the vesting of certain RSAs granted in 2016, 2015 and 2014 under the Company's 2006 Plan. As of December 31, 2017 and 2016, 10,134 shares were vested but not released due to an additional holding period required by the grant agreement.

The following table summarizes the activity of the shares and weighted-average grant date fair value of the Company's unvested restricted Common Stock during the year ended December 31, 2017:

	Shares		Weighted-average grant date fair value
Non-vested at beginning of period	72,198	$	44.44
Granted	33,420	$	43.91
Vested	(36,623)	$	43.42
Forfeited or cancelled	(4,216)	$	47.17
Non-vested at end of period	64,779	$	44.82

As of December 31, 2017, there was $4,331 of unrecognized compensation cost related to unvested share settled stock options and RSAs granted under the 2006 Plan. The cost is expected to be recognized over a weighted-average period of 1.2 years. The total fair value of stock options and RSAs vested was $3,550, $1,383 and $3,709 for the years ended December 31, 2017, 2016 and 2015, respectively.

Other Restricted Stock Award Grants

During the year ended December 31, 2014, the Board approved the grant of 596,915 RSAs to two individuals in connection with the Ingeus acquisition. The grants were made outside of the 2006 Plan, as they were related to the acquisition. However, since the term of the awards provided for vesting based on continued employment, the awards were accounted for as stock-based compensation. The shares necessary to settle these awards were placed in an escrow account in 2014, and were releasable from escrow in accordance with the vesting of the awards. Per the original terms of the agreements, the awards vested upon continued employment of the grantees, in four equal installments on the anniversary date of the grant. However, on October 15, 2015, the Company entered into agreements whereby the executives' employment was terminated by mutual agreement and vesting was no longer based upon continued employment. The Company recognized $16,078 in stock-based compensation expense at the time of the modification, which otherwise would have been recognized over the remainder of the vesting period. Additionally, the Company recognized accelerated deferred compensation expense of $4,714 related to these agreements during the year ended December 31, 2015. As of December 31, 2017, 149,228 underlying shares to settle the awards are held in the escrow account and will be released in 2018, although all expense was recognized as of December 31, 2015.

Restricted Stock Units

During the year ended December 31, 2016, the Company granted 5,930 restricted stock units to a key employee, related to the terms of a separation agreement, that vested on January 3, 2017. The units were settled through a cash payment

of $304 during the year ended December 31, 2017. The award was liability classified, and the expense recorded was based upon the Company's closing stock price at the end of each reporting period and the completed requisite service period.

Performance Restricted Stock Units

The Company had 18,122 performance restricted stock units ("PRSUs") outstanding at December 31, 2017. These awards vest upon the Company or its segments meeting certain performance criteria over a set performance period as determined, and subject to adjustment, by the Company's Compensation Committee of the Board. 13,262 of the outstanding PRSUs at December 31, 2017 have a performance criteria tied to the Company's return on equity ("ROE"), with performance periods ending on December 31, 2017. The grantees will earn 33% of PRSUs granted if the ROE is 12% but less than 15%, and 100% of the PRSUs granted if the ROE is 15% or more. If ROE is less than 12%, no PRSUs will be earned. The Company has determined, subsequent to December 31, 2017, that none of these PRSUs, with a performance period ended December 31, 2017, will vest. 4,860 of the outstanding PRSUs at December 31, 2017 have a performance criteria tied to NET Services' EBITDA and the Company's EBITDA performance with performance periods ending on December 31, 2017. The Company expects all of these PRSUs, with a performance period ended December 31, 2017, to vest. Compensation expense (benefit) related to these awards totaled $19, ($270) and $613 for the years ended December 31, 2017, 2016 and 2015, respectively.

Cash Settled Awards

During the years ended December 31, 2017, 2016 and 2015, respectively, the Company issued 3,097, 3,360 and 4,000 stock equivalent units ("SEUs"), which settle in cash upon vesting, to Coliseum Capital Partners, L.P., in lieu of a grant to Christopher Shackelton, Chairman of the Board, for his service on the Board, which vest one-third upon each anniversary of the vesting date. The fair value of the SEUs is based on the closing stock price on the last day of the period and the completed requisite service period. The Company recorded $235, $287 and $588 of expense for SEUs during the years ended December 31, 2017, 2016 and 2015, respectively.

During the year ended December 31, 2014, the Company issued 200,000 stock option equivalent units ("SOEUs"), with an exercise price of $43.81 per share, which settle in cash, to Coliseum Capital Partners, L.P in lieu of a grant to Christopher Shackelton, for other services rendered. All 200,000 SOEUs were outstanding and exercisable at December 31, 2017. This award vested one-third upon grant, one-third on June 30, 2015 and one-third on June 30, 2016. No additional SOEUs were granted during the years ended December 31, 2017, 2016 and 2015. The Company recorded $2,146 and $1,888 of expense for SOEUs during the years ended December 31, 2017 and 2015, respectively, and a benefit of $1,517 during the year ended December 31, 2016. The expenses and benefit are included in "General and administrative expense" in the consolidated statements of income. The fair value of the SOEUs was estimated as of December 31, 2017, 2016 and 2015 using the Black-Scholes option-pricing formula and amortized over the option's graded vesting periods with the following assumptions:

	Year ended December 31,								
	2017			2016			2015		
Expected dividend yield	0.0%			0.0%			0.0%		
Expected stock price volatility	23.36%	—	32.09%	35.71%	—	41.82%	43.75%	—	45.3%
Risk-free interest rate	1.75%	—	1.95%	1.11%	—	1.64%	1.2%	—	1.70%
Expected life of options (in years)	0.75	—	2.75	1.0	—	3.00	2.75	—	4.75

As of December 31, 2017 and 2016, the Company had a short-term liability of $3,938 and $1,764, respectively, in "Accrued expenses" in the consolidated balance sheet related to unexercised vested and unvested cash settled share-based payment awards. The cash settled share-based compensation benefit in total excluded tax expense of $492 for the year ended December 31, 2016. The cash settled share-based compensation expense in total excluded a tax benefit of $908 and $990 for the years ended December 31, 2017 and 2015. The unrecognized compensation cost for SEUs is expected to be recognized over a weighted average period of 0.8 years; however, the total expense for both SEUs and SOEUs will continue to be adjusted until the awards are settled.

Holdco Long-Term Incentive Plan

On August 6, 2015 (the "Award Date"), the Compensation Committee of the Board adopted the HoldCo LTIP under the 2006 Plan. The Holdco LTIP was designed to provide long-term performance based awards to certain executive officers of

Providence. Under the program, executives would receive shares of Providence Common Stock based on the shareholder value created in excess of an 8.0% compounded annual return between the Award Date and December 31, 2017 (the "Extraordinary Shareholder Value"). The Award Date value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price over the 90-day trading period ending on the Award Date. The Extraordinary Shareholder Value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price

over the 90-day trading period ending on December 31, 2017. A pool for use in the allocation of awards was created equal to 8.0% of the Extraordinary Shareholder Value.

Participants in the HoldCo LTIP would receive a percentage allocation of any such pool and, following determination of the size of the pool, would be entitled to a number of shares equal to their pro rata portion of the pool divided by the volume weighted average of the Company's per share price over the 90-day trading period ending on December 31, 2017. Of the shares allocated, 60% would be issued to the participant on or shortly following determination of the pool, 25% would vest and be issued on the one-year anniversary of such determination date, subject to continued employment, and the remaining 15% would be issued on the second anniversary of the determination date, subject to continued employment.

It was determined that no shares would be distributed under the Holdco LTIP as the calculation of the pool amount was zero. $4,738, $3,319 and $1,353 of expense is included in "General and administrative expense" in the consolidated statements of income for the years ended December 31, 2017, 2016 and 2015, respectively. As of December 31, 2017, the Company accelerated all remaining unrecognized compensation expense for the Holdco LTIP as there was no further requisite service period associated with the award, resulting in an acceleration of expense of $1,053.

These awards were equity classified and the fair value of the awards was calculated using a Monte-Carlo simulation valuation model. The fair value of the awards granted in 2016 and 2015 were estimated using the following assumptions:

	Year ended December 31,					
	2016			2015		
Forward interest rate	0.24%	—	2.71%	0.04%	—	2.90%
Expected Volatility	40.0%			45.0%		
Dividend Yield	—%			—%		
Fair Value of Total Pool	$12,870			$12,590		

13. Vertical Long-Term Incentive Plan

The Company established Long-Term Incentive Plans ("Vertical LTIPs") for the Company's operating segments, or verticals, during the fourth quarter of 2015. The Vertical LTIPs are consistent in their basic terms, but each were customized for specific aspects of the associated vertical. The awards pay in cash, however up to 50% of the award may be paid in unrestricted stock if the recipient elects this option when the Vertical LTIP offer letter is received. In addition, at the discretion of the Company, the recipients may be able to elect unrestricted stock in lieu of cash compensation at a later date. The Vertical LTIPs reward participants based on certain measures of free cash flow and EBITDA results adjusted as specified in the plan document. The awards vest in three installments: 60% of the award will pay out immediately following December 31, 2017, 25% one year following the performance period (i.e. December 31, 2018) and 15% two years following the performance period (i.e. December 31, 2019). Payout is subject to the participant remaining employed by the Company.

During 2017, the Company revised the structure of the NET Services long-term incentive plan. As a result, the Company finalized the amount payable under the plan at $2,956. The total value will be paid to the awarded participants per the terms of the original agreement and thus the remaining unamortized expense relating to this plan continues to be recognized over the remaining service period. As of December 31, 2017, unamortized compensation expense is $299. For the years ended December 31, 2017, 2016, and 2015, $816, $1,513 and $328 of expense, respectively, is included in "Service expense" in the consolidated statements of income related to this plan. At December 31, 2017, the liability for long-term incentive plans of the Company's operating segments of $2,657 is reflected in "Accrued expenses" and "Other long-term liabilities" in the consolidated balance sheet. At December 31, 2016, the liability for long-term incentive plans of the Company's operating segments of $1,841 is reflected in "Other long-term liabilities" in the consolidated balance sheet.

14. Earnings Per Share

The following table details the computation of basic and diluted earnings per share:

	Year ended December 31,		
	2017	**2016**	**2015**
Numerator:			
Net income attributable to Providence	$ 53,369	$ 91,928	$ 83,696
Less dividends on convertible preferred stock	(4,419)	(4,419)	(3,935)
Less accretion of convertible preferred stock discount	—	—	(1,071)
Less income allocated to participating securities	(7,085)	(13,135)	(10,691)
Net income available to common stockholders	$ 41,865	$ 74,374	$ 67,999
Continuing operations	$ 47,848	$ (21,251)	$ (29,181)
Discontinued operations	(5,983)	95,625	97,180
	$ 41,865	$ 74,374	$ 67,999
Denominator:			
Denominator for basic earnings per share -- weighted-average shares	13,602,140	14,666,896	15,960,905
Effect of dilutive securities:			
Common stock options	66,314	—	—
Performance-based restricted stock units	4,860	—	—
Denominator for diluted earnings per share -- adjusted weighted-average shares assumed conversion	13,673,314	14,666,896	15,960,905
Basic earnings (loss) per share:			
Continuing operations	$ 3.52	$ (1.45)	$ (1.83)
Discontinued operations	(0.44)	6.52	6.09
	$ 3.08	$ 5.07	$ 4.26
Diluted earnings (loss) per share:			
Continuing operations	$ 3.50	$ (1.45)	$ (1.83)
Discontinued operations	(0.44)	6.52	6.09
	$ 3.06	$ 5.07	$ 4.26

The accretion of Preferred Stock discount in the table above related to a beneficial conversion feature of the Company's Preferred Stock that was fully amortized as of June 30, 2015. Income allocated to participating securities is calculated by allocating a portion of net income attributable to Providence, less dividends on convertible stock, to the convertible preferred stockholders on a pro-rata as converted basis; however, the convertible preferred stockholders are not allocated losses.

The following weighted-average shares were not included in the computation of diluted earnings per share as the effect of their inclusion would have been anti-dilutive:

	Year ended December 31,		
	2017	**2016**	**2015**
Stock options to purchase common stock	362,392	22,638	173,925

Convertible preferred stock	803,323	803,442	700,241

15. Operating Leases

The Company has non-cancelable contractual obligations in the form of operating leases for office space, related office equipment and other facilities. The leases expire in various years and generally provide for renewal options. In the normal course of business, it is expected that these leases will be renewed or replaced by leases on other properties.

Certain operating leases provide for increases in future minimum annual rental payments based on defined increases in the Consumer Price Index, subject to certain minimum increases. Several of these lease agreements contain provisions for periods in which rent payments are reduced. The total amount of rental payments due over the lease term is being charged to rent expense on a straight-line basis over the term of the lease. The cumulative difference between rent expense recorded and the amount paid, for continuing operations, as of December 31, 2017 and 2016 was $3,957 and $3,253, respectively, and is included in "Accrued expenses" and "Other long-term liabilities" in the consolidated balance sheets.

Future minimum payments under non-cancelable operating leases for equipment and property with initial terms of one year or more consisted of the following at December 31, 2017:

	Operating Leases
2018	$ 20,875
2019	13,376
2020	9,738
2021	8,022
2022	6,142
Thereafter	3,939
Total future minimum lease payments	$ 62,092

Rent expense for continuing operations related to operating leases was $27,511, $29,316 and $31,191, for the years ended December 31, 2017, 2016 and 2015, respectively. Also, the lease agreements generally require the Company to pay executory costs such as real estate taxes, insurance, and repairs, which are recorded to expense as incurred.

16. Retirement Plan

The Company maintains a qualified defined contribution plan under Section 401(k) of the Internal Revenue Code of 1986, as amended, for all employees of its NET Services operating segment and corporate personnel. The Company, at its discretion, may make a matching contribution to the plan. Any matching contributions vest over 5 years. Unvested matching contributions are forfeitable upon employee termination. Employee contributions are fully vested and non-forfeitable. The Company's contributions to the plan for continuing operations were $320, $248 and $221, for the years ended December 31, 2017, 2016 and 2015, respectively.

WD Services' employees are entitled to benefits under certain retirement plans. The WD Services' segment has separate plans in each country it operates. The plans receive fixed contributions from WD Services' companies and the legal or constructive obligation is limited to these contributions, although the benefits the employees ultimately receive are determined by the plan administrators, which includes government entities and third-party administrators. The Company's contributions to these plans were $8,219, $9,139 and $10,331 for the years ended December 31, 2017, 2016 and 2015, respectively.

The Company also maintains a Deferred Compensation Rabbi Trust Plan for highly compensated employees of NET Services. This plan was put in place to compensate for the inability of highly compensated employees to take full advantage of the Company's 401(k) plan. Additional information is included in Note 18, *Commitments and Contingencies*.

17. Income Taxes

The following table summarizes our U.S. and foreign income (loss) from continuing operations before income taxes:

	Year Ended December 31,		
	2017	**2016**	**2015**
US	48,719	65,559	43,598
Foreign	15,485	(67,437)	(53,692)
Total	$ 64,204	$ (1,878)	$ (10,094)

The federal, state and foreign income tax provision is summarized as follows:

	Year Ended December 31,		
	2017	**2016**	**2015**
Federal:			
Current	$ 18,792	$ 21,202	$ 15,161
Deferred	(19,767)	(6,477)	(1,606)
	(975)	14,725	13,555
State:			
Current	3,975	4,580	2,644
Deferred	723	(938)	(38)
	4,698	3,642	2,606
Foreign:			
Current	1,197	266	523
Deferred	(519)	(1,597)	(2,101)
	678	(1,331)	(1,578)
Total provision for income taxes	$ 4,401	$ 17,036	$ 14,583

A reconciliation of the provision for income taxes with amounts determined by applying the statutory U.S. federal income tax rate to income (loss) from continuing operations before income taxes is as follows:

	Year Ended December 31,		
	2017	2016	2015
Federal statutory rates	35%	35 %	35 %
Federal income tax at statutory rates	$ 22,471	$ (657)	$ (3,533)
Revaluation of net deferred tax liabilities due to U.S. tax reform	(19,397)	—	—
U.S. tax reform impact on equity income of investee	(1,646)	—	—
Change in valuation allowance	2,299	9,480	3,574
Change in uncertain tax positions	7	73	(76)
State income taxes, net of federal benefit	3,203	2,396	1,785
Difference between federal statutory and foreign tax rate	(1,648)	9,427	4,642
Stock compensation	3,400	—	(184)
Meals and entertainment	100	96	81
Amortization of deferred consideration	—	—	9,444
Transaction costs	159	—	(447)
Contingent consideration liability reversal	—	—	(854)
Nontaxable income	(1,203)	—	(965)
Tax credits	(354)	(947)	(456)
Legal expense	(805)	522	284
Depreciation	—	—	649
Equity in net loss of investee	569	624	366
Sale of joint venture	(6,021)	—	—
Asset impairment	—	2,353	—
Foreign exchange	2,925	(7,001)	—
Other	342	670	273
Provision for income taxes	$ 4,401	$ 17,036	$ 14,583
Effective income tax rate	7%	(907)%	(144)%

The Company recognized an income tax provision for the years ended December 31, 2016 and December 31, 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized estimated taxable income for these years upon which the income tax provision for financial reporting is calculated.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	December 31,	
	2017	2016
Deferred tax assets:		
Net operating loss carryforwards	$ 20,496	$ 17,742
Tax credit carryforwards	486	399
Accounts receivable allowance	1,134	1,341
Accrued items and reserves	14,371	18,669
Stock compensation	1,480	4,224
Deferred rent	572	915
Property and equipment depreciation	300	—
Other	173	180
	39,012	43,470
Deferred tax liabilities:		
Deferred financing costs	38	154
Prepaids	1,440	2,103
Property and equipment depreciation	—	1,238
Goodwill and intangibles amortization	5,809	9,568
Equity investment	42,113	59,244
Other	205	203
	49,605	72,510
Net deferred tax liabilities	(10,593)	(29,040)
Less valuation allowance	(26,402)	(27,423)
Net deferred tax liabilities	$ (36,995)	$ (56,463)
Net noncurrent deferred tax assets, net of valuation allowance of $26,402 and $27,423 for 2017 and 2016, respectively	4,632	1,510
Net noncurrent deferred tax liabilities, net of valuation allowance of $0 and $0 for 2017 and 2016, respectively	(41,627)	(57,973)
	$ (36,995)	$ (56,463)

At December 31, 2017, the Company had no federal or state net operating loss carryforwards. The Company had net operating loss carryforwards in the following countries which can be carried forward indefinitely:

Australia	$ 41,256
Canada	728
France	3,882
Saudi Arabia	82
UK	40,090

Realization of the Company's net operating loss carryforwards is dependent on generating sufficient taxable income. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized, to the extent they are not covered by a valuation allowance. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

The net change in the total valuation allowance for the year ended December 31, 2017 was negative $1,021, of which positive $2,299 related to current operations and negative $3,320 related to the adjustment of the beginning balance. The valuation

allowance includes $25,929 primarily for Australia, France and UK net operating loss carryforwards, and $473 for state tax credit carryforwards for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations. The Company will continue to assess the valuation allowance, and to the extent it is determined that the valuation allowance should be changed, an appropriate adjustment will be recorded.

U.S. Tax Reform

On December 22, 2017, the Tax Reform Act was enacted which institutes fundamental changes to the taxation of multinational corporations. The Tax Reform Act includes changes to the taxation of foreign earnings by implementing a dividend exemption system, expansion of the current anti-deferral rules, a minimum tax on low-taxed foreign earnings and new measures to deter base erosion. The Tax Reform Act also includes a permanent reduction in the corporate tax rate to 21%, repeal of the corporate alternative minimum tax, expensing of capital investment, and limitation of the deduction for interest expense. Furthermore, as part of the transition to the new tax system, a one-time transition tax is imposed on a U.S. shareholder's historical undistributed earnings and profits ("E&P") of foreign affiliates. Although the Tax Reform Act is generally effective January 1, 2018, GAAP requires recognition of the tax effects of new legislation during the reporting period that includes the enactment date, which was December 22, 2017.

As a result of the reduction in the U.S. corporate income tax rate, the Company revalued its ending net deferred tax liabilities as of December 31, 2017 and recognized a provisional tax benefit of $19,397. The Company has projected net accumulated deficits in foreign E&P; therefore, no provisional tax expense for deemed repatriation has been recognized. For any future foreign earnings, the Company will generally be free of additional U.S. tax consequences due to a dividends received deduction implemented as part of the move to a territorial tax system for foreign subsidiary earnings. The Company continues to assert indefinite reinvestment in outside basis differences. Determination of the amount of unrecognized deferred tax liability on outside basis differences is not practicable because of the complexity of laws and regulations, the varying tax treatment of alternative repatriation scenarios, and the variation due to multiple potential assumptions relating to the timing of any future repatriation.

The global intangible low taxed income ("GILTI") provisions of the Tax Reform Act require the Company to include in its U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets. The Company may be subject to incremental U.S. tax on GILTI income beginning in 2018, and has elected to account for GILTI tax in the period in which it is incurred. Therefore, no deferred tax impacts of GILTI have been considered in the Company's consolidated financial statements for the year ended December 31, 2017.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. In accordance with the SAB 118 guidance, the Company has recognized the provisional tax impacts related to the benefit for the revaluation of deferred tax assets and liabilities in its consolidated financial statements for the year ended December 31, 2017. The final impact of the Tax Reform Act may differ from these provisional amounts, possibly materially, due to, among other things, issuance of additional regulatory guidance, changes in interpretations and assumptions the Company has made, and actions the Company may take as a result of the Tax Reform Act. In accordance with SAB 118, the financial reporting impact of the Tax Reform Act will be completed in the fourth quarter of 2018.

Unrecognized Tax Benefits

The Company expects no material amount of the unrecognized tax benefits to be recognized during the next twelve months. The Company recognizes interest and penalties as a component of income tax expense. During the years ended December 31, 2017, 2016 and 2015, the Company recognized approximately $65, $19 and $27, respectively, in interest and penalties. The Company had approximately $83 and $52 for the payment of penalties and interest accrued as of December 31, 2017 and 2016, respectively.

A reconciliation of the liability for unrecognized income tax benefits is as follows:

	December 31,		
	2017	2016	2015
Unrecognized tax benefits, beginning of year	$ 1,108	$ 271	$ 347
Balance upon acquisition/disposition	—	764	—
Increase (decrease) related to prior year positions	22	37	(47)
Increase related to current year tax positions	101	139	48
Statute of limitations expiration	(116)	(103)	(77)
Unrecognized tax benefits, end of year	$ 1,115	$ 1,108	$ 271

The Company is subject to taxation in the U.S. and various foreign and state jurisdictions. The statute of limitations is generally three years for the U.S., two to five years in foreign countries and between three and four years for the various states in which the Company operates. The Company is subject to the following material taxing jurisdictions: the U.S., UK, Australia, France, Saudi Arabia and Korea. The tax years that remain open for examination by the U.S. and various foreign countries and states principally include the years 2013 to 2017.

18. Commitments and Contingencies

Legal proceedings

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL (the "Haverhill Litigation"). The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding Preferred Stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the Preferred Stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's Preferred Stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule 14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board of the Company agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the Preferred Stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's stockholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton,

Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of Preferred Stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding (which was subsequently extended) to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the Court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties then entered into a proposed settlement agreement which was submitted to the Court for approval. On September 28, 2017, the Court approved the proposed settlement agreement among the parties that provided for a settlement amount of $10,000 less plaintiff's legal fees and expenses (the "Settlement Amount"), with 75% of the Settlement Amount to be paid to the Company and 25% of the Settlement Amount to be paid to holders of the Company's Common Stock other than certain excluded parties. In November 2017, the Company received a payment of $5,363 from the Settlement Amount, which is included in "Other income" in the consolidated statement of income for the year ended December 31, 2017.

In addition to the matter described above, in the ordinary course of business, the Company is a party to various lawsuits. Management does not expect these lawsuits to have a material impact on the liquidity, results of operations, or financial condition of Providence.

Indemnifications related to Haverhill Litigation

The Company indemnified the Standby Purchasers from and against any and all losses, claims, damages, expenses and liabilities relating to or arising out of (i) any breach of any representation, warranty, covenant or undertaking made by or on behalf of the Company in the Standby Purchase Agreement and (ii) the transactions contemplated by the Standby Purchase Agreement and the 14.0% Unsecured Subordinated Note in aggregate principal amount of $65,500, except to the extent that any such losses, claims, damages, expenses and liabilities are attributable to the gross negligence, willful misconduct or fraud of such Standby Purchaser.

The Company has also indemnified other third parties from and against any and all losses, claims, damages, expenses and liabilities arising out of or in connection with the Company's acquisition of CCHN Group Holdings, Inc. (operating under the tradename Matrix, and formerly included in our HA Services segment) in October 2014 and related financing commitments, except to the extent that any such losses, claims, damages, expenses and liabilities are found in a final, non-appealable judgment by a court of competent jurisdiction to have resulted from the gross negligence, bad faith or willful misconduct of such third parties, or a material breach of such third parties' obligations under the related agreements.

The Company recorded $318, $1,282 and $310 of such indemnified legal expenses related to the Haverhill Litigation during the years ended December 31, 2017, 2016 and 2015, respectively, which is included in “General and administrative expenses” in the consolidated statements of income. Of these amounts, $245, $757 and $310 for the years ended December 31, 2017, 2016

and 2015, respectively, were indemnified legal expenses of related parties. Other legal expenses of the Company related to the Haverhill Litigation are covered under the Company's insurance policies, subject to applicable deductibles and customary review of the expenses by the carrier. The Company recognized expense of $8, $210 and $500 for the years ended December 31, 2017, 2016 and 2015, respectively. While the carrier typically remits payment directly to the respective law firm, the Company accrues for the cost and records a corresponding receivable for the amount to be paid by the carrier. The Company has recognized an insurance receivable of $941 and $1,645 in "Other receivables" in the consolidated balance sheets at December 31, 2017 and 2016, respectively, with a corresponding liability amount recorded to "Accrued expenses".

Other Indemnifications

The Company has provided certain standard indemnifications in connection with the sale of the Human Services segment to Molina Healthcare Inc. ("Molina") effective November 1, 2015. All representations and warranties made by the Company in the Membership Interest Purchase Agreement (the "Purchase Agreement") to sell the Human Services segment ended on February 1, 2017. However, claims made prior to February 1, 2017 by the purchaser of the Human Services segment against these representations and warranties may survive until the claims are settled. In addition, certain representations, including tax representations, survive until the expiration of applicable statutes of limitation, and healthcare representations survive until the third anniversary of the closing date. The Company has received indications from the purchaser of the Human Services segment regarding potential indemnification claims. One potential indemnification claim relates to *Rodriguez v. Providence Community Corrections* (the "Rodriguez Litigation"), a complaint filed in the District Court for the Middle District of Tennessee, Nashville Division (the "Rodriquez Court"), against Providence Community Corrections, Inc. ("PCC"), an entity sold under the Purchase Agreement. On September 18, 2017, the plaintiffs in the Rodriguez Litigation filed an unopposed motion for preliminary approval of a proposed settlement, pursuant to which PCC would pay $14,000 to the plaintiffs and $350 to co-defendant Rutherford County, Tennessee. On October 5, 2017, the Rodriguez Court denied preliminary approval of the settlement and requested additional information. On October 18, 2017, the plaintiffs filed a second unopposed motion for approval of the proposed settlement. On January 2, 2018, the Rodriguez Court granted preliminary approval of the proposed settlement and authorized notice to class members.

On September 15, 2017, Molina and the Company entered into a memorandum of understanding; and on March 1, 2018, Molina and the Company entered into a settlement agreement, regarding a settlement of an indemnification claim by Molina with respect to the Rodriguez Litigation and other matters. As of December 31, 2017, the accrual is $15,000 with respect to an estimate of loss for potential indemnification claims. The Company expects to recover a portion of the settlement through insurance coverage, although this cannot be assured.

Litigation is inherently uncertain and the actual losses incurred in the event that the related legal proceedings were to result in unfavorable outcomes could have a material adverse effect on the Company's business and financial performance.

The Company has provided certain standard indemnifications in connection with its Matrix stock subscription transaction whereby Mercury Fortuna Buyer, LLC ("Subscriber"), Providence and Matrix entered into a stock subscription agreement (the "Subscription Agreement"), dated August 28, 2016. The representations and warranties made by the Company in the Subscription Agreement ended January 19, 2018; however, certain fundamental representations survive through the 36th month following the closing date. The covenants and agreements of the parties to be performed prior to the closing ended January 19, 2018, and all other covenants and agreements survive until the expiration of the applicable statute of limitations in the event of a breach, or for such lesser periods specified therein. The Company is not aware of any indemnification liabilities with respect to Matrix that require accrual at December 31, 2017.

Other Contingencies

On January 25, 2018, the UK Ministry of Justice (the "MOJ") released a report on reoffending statistics for certain offenders who entered probation services during the period October 2015 to March 2016. The report provides statistics for all providers of probation services, including our subsidiary RRP, which is in our WD Services segment. This information is the second data set that is utilized to determine performance payments under the various providers' transforming rehabilitation contracts with the MOJ, as the actual rates of recidivism are compared to benchmark rates established by the MOJ. Performance payments and penalties are linked to two separate measures of recidivism - the binary measure and the frequency measure. The binary measure defines the percentage of offenders within a cohort, formed quarterly, who reoffend in the following 12 months. The frequency measure defines the average number of offenses committed by reoffenders within the same 12-month measurement period. The performance for the frequency measure for most providers has been below the

benchmarks established by the MOJ. As a result, RRP could be required to make payments to the MOJ and the amounts of such payments could be material. The amount of potential payments to the MOJ, if any, under RRP's contracts with the MOJ cannot be estimated at this time, as the MOJ is

reviewing the data to understand the underlying reasons for the increase in certain rates of recidivism and other factors that could impact the contractual measure.

Deferred Compensation Plan

The Company has one deferred compensation plan for management and highly compensated employees of NET Services as of December 31, 2017. The deferred compensation plan is unfunded, and benefits are paid from the general assets of the Company. The total of participant deferrals, which is reflected in "Other long-term liabilities" in the consolidated balance sheets, was $1,806 and $1,430 at December 31, 2017 and 2016, respectively.

19. Transactions with Related Parties

The Company incurred legal expenses under an indemnification agreement with the Standby Purchasers as further discussed in Note 18, *Commitments and Contingencies*. Preferred Stock dividends earned by the Standby Purchasers during the years ended December 31, 2017 and 2016 totaled $4,213 each year.

During the year ended December 31, 2017, the Company made a $566 loan to Mission Providence. The loan was also repaid during the year ended December 31, 2017.

20. Discontinued Operations

Effective October 19, 2016, the Company completed the Matrix Transaction. At the closing, (i) cash consideration of $180,614 was paid by the Subscriber to Matrix based upon an enterprise value of $537,500 and (ii) Matrix borrowed approximately $198,000 pursuant to a credit and guaranty agreement providing for term loans in an aggregate principal amount of $198,000 and revolving loan commitments in an aggregate principal amount not to exceed $10,000, which was not drawn at the closing. At the closing, Matrix distributed $381,163 to Providence, in full satisfaction of a promissory note and accumulated interest between Matrix and Providence. At the closing, Providence made a $5,663 capital contribution to Matrix, as described in the Subscription Agreement, as amended, based upon its pro-rata ownership of Matrix, to fund the near-term cash needs of Matrix. On the day that was fifteen days following the closing date, Providence was, to the extent payable pursuant to the terms of the Subscription Agreement, as amended, entitled to receive from Matrix, or required to pay to Matrix, subsequent working capital adjustment payments. Providence received an initial payment of $5,172 from Matrix in November 2016 which is net of the capital contribution of $5,663 described above, based upon the initial working capital calculation as described in the Subscription Agreement. Additionally, in February 2017, the Company received a $75 payment from Matrix representing the final working capital adjustment payment.

In accordance with ASC 205-20, *Presentation of Financial Statements-Discontinued Operations*, a component of an entity is reported in discontinued operations after meeting the criteria for held for sale classification if the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. The Company analyzed the quantitative and qualitative factors relevant to the Matrix stock subscription transaction resulting in the Company no longer owning a controlling interest in Matrix, and determined that those held for sale conditions for discontinued operations presentation were met during the third quarter of 2016. As such, the historical financial results of Matrix, the Company's historical HA Services segment, and the related income tax effects have been presented as discontinued operations for all periods presented in the accompanying consolidated financial statements through October 19, 2016.

The Company has continuing involvement with Matrix through its ownership of 46.6% of the equity interests in Matrix as of December 31, 2017, as well as through a management consulting agreement, not to exceed ten years. Prior to the Matrix Transaction, the Company owned 100% of the equity interest in Matrix. Subsequent to the Matrix Transaction, the Company accounts for its investment in Matrix under the equity method of accounting. The Company's share of Matrix's losses subsequent to the Matrix Transaction, which totaled $13,445 and $1,789, is recorded as "Equity in net (gain) loss of investees" in its consolidated statement of income for the years ended December 31, 2017 and 2016, respectively. Matrix's pretax loss for the year ended December 31, 2017 totaled $2,948 and includes $3,537 of transaction related expenses. Matrix's pretax loss for the period of October 19, 2016 through December 31, 2016 totaled $7,027 and includes $6,367 of transaction related expenses. There have been no cash inflows or outflows from or to Matrix subsequent to the closing of the Matrix Transaction, other than the working capital adjustments discussed above and management fees associated with its ongoing relationship with Matrix, of which $1,103 was received during the year ended December 31, 2017. $247 and $185 are

included in “Other receivables” in the consolidated balance sheets at December 31, 2017 and 2016, respectively, related to management fees receivable.

On September 3, 2015, the Company entered into a Purchase Agreement, pursuant to which the Company agreed to sell all of the membership interests in Providence Human Services, LLC and Providence Community Services, LLC, comprising the

Company's Human Services segment, in exchange for cash proceeds of approximately $200,000 prior to adjustments for estimated working capital, certain seller transaction costs, debt assumed by the buyer, and a $20,099 cash payment received for the Providence Human Services cash and cash equivalents on hand at closing. The net proceeds were $230,703, although $10,000 is held in an indemnity escrow and recorded within "Prepaid expenses and other" in the consolidated balance sheet at December 31, 2017. Proceeds include a customary working capital adjustment of $13,246. During the years ended December 31, 2017 and 2016, the Company recorded additional expenses related to the Human Services segment, principally related to legal proceedings as described in Note 18, *Commitment and Contingences*, related to an indemnified legal matter.

Results of Operations

The following table summarizes the results of operations classified as discontinued operations, net of tax, for the years ended December 31, 2017, 2016 and 2015. The HA Services segment column in the table below for the year ended December 31, 2016 reflects the financial results for HA Services from January 1, 2016 through October 19, 2016.

	Year ended December 31, 2017		
	Human Services Segment	**HA Services Segment**	**Total Discontinued Operations**
Operating expenses:

Discontinued operations, net of tax	$ 101,800	$ 6,071	$ 107,871

Interest expense, net

The Company allocated interest expense, including amortization of deferred financing fees, to discontinued operations based on the portion of the debt that was required to be paid with the proceeds from the sale of the Human Services segment and the Matrix Transaction. The total allocated interest expense is included in "Interest expense, net" in the tables above. The total allocated interest expense for the years ended December 31, 2016 and 2015 is as follows:

	Year ended December 31,	
	2016	2015
Human Services Segment	$ —	$ 2,871
HA Services Segment	9,939	14,376
Total	$ 9,939	$ 17,247

Cash Flow Information

The following table presents depreciation, amortization, capital expenditures and significant operating noncash items of the discontinued operations for the years ended December 31, 2016 and 2015:

	For the year ended December 31, 2016		
	Human Services Segment	HA Services Segment	Total Discontinued Operations

Purchase of property and equipment	$ 2,224	$ 8,079	$ 10,303

21. Segments

The Providence Service Corporation owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which the Company holds interests comprise the following segments:

- NET Services – Nationwide manager of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in Matrix, a nationwide provider of in-home care optimization and management solutions, including CHAs, to members of managed care organizations, accounted for as an equity

method investment as a result of the Matrix Transaction on October 19, 2016, which is further discussed in Note 20, *Discontinued Operations*

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions, and the Company's captive insurance company.

Segment results are based on how the Company's chief operating decision maker ("CODM") manages the Company's business, makes operating decisions and evaluates operating performance. The operating results of the segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by Corporate on behalf of the segment. Indirect expenses, including unallocated corporate functions and expenses, such as executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company as well as elimination entries recorded in consolidation are reflected in Corporate and Other.

The following table sets forth certain financial information from continuing operations attributable to the Company's business segments for the years ended December 31, 2017, 2016 and 2015.

	Year Ended December 31, 2017

Domestic service revenue, net, totaled 82.2%, 79.2% and 74.4% of service revenue, net for the years ended December 31, 2017, 2016 and 2015, respectively. Foreign service revenue, net, totaled 17.8%, 20.8% and 25.6% of service revenue, net for the years ended December 31, 2017, 2016 and 2015, respectively.

At December 31, 2017, $99,071 of the Company's net assets from continuing operations were located in countries outside of the U.S. At December 31, 2016, $76,579 of the Company's net assets from continuing operations were located in countries outside of the U.S.

Customer Information

11.2%, 10.2% and 11.0% of the Company's consolidated revenue was derived from one U.S. state Medicaid program for the years ended December 31, 2017, 2016 and 2015, respectively. 10.7% of the Company's consolidated revenue was derived from one UK governmental agency for the year ended December 31, 2015. In addition, substantially all of the

Company's revenues are generated from domestic and foreign governmental agencies or entities that contract with governmental agencies.

22. Quarterly Results (Unaudited)

The quarterly consolidated financial statements presented below reflect HA Services and Human Services as discontinued operations for all periods presented.

	Quarter ended			
	March 31, 2017 (1)	**June 30, 2017**	**September 30, 2017 (2)**	**December 31, 2017 (3)(4)(5)**
Service revenue, net	$ 399,494	$ 407,983	$ 409,517	$ 406,888
Operating Income	6,788	5,999	6,309	16,937
Income from continuing operations, net of tax	1,915	3,858	14,964	39,066
Discontinued operations, net of tax	(5,866)	(117)	(16)	16

Earnings (loss) per common share (10):				
Basic	$ 0.07	$ 0.21	$ (0.05)	$ 4.92
Diluted	$ 0.07	$ 0.21	$ (0.05)	$ 4.92

(1) The Company recorded expenses, net of tax, of $5,866 in Discontinued operations, net of tax, in the quarter ending March 31, 2017 related to the Company's former Human Services segment, which are principally related to an ongoing legal matter.

(2) The Company recorded a gain on sale of equity investment of $12,606, net of tax, related to the sale of its equity interest in Mission Providence during the quarter ended September 30, 2017. During the quarter ended December 31, 2017, the Company recorded a reduction to the gain on sale of $229, related to the finalization of the working capital adjustment per the sale agreement.

(3) Operating income for the quarter ended December 31, 2017 increased as compared to the prior quarters in 2017 as a result of a decrease in service expense as a percentage of revenue for NET Services and WD Services. This was primarily a result of lower operating costs of both segments as well as certain NET Services contractual adjustments recorded in the fourth quarter of 2017.

(4) The quarter ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5,363.

(5) The quarter ended December 31, 2017 includes a net tax benefit of $16,017 related to the enactment of the Tax Reform Act during the fourth quarter of 2017, due to the re-measurement of deferred tax liabilities by

Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a tax benefit of $19,397, partially offset by $3,379 of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix' re-

measurement of its deferred tax liabilities. The equity in net gain from Matrix for the quarter ended December 31, 2017 includes a tax benefit of $13,610 related to Matrix's re-measurement of deferred tax liabilities as a result of the Tax Reform Act.

(6) The Company recorded expenses, net of tax, of $5,035 in Discontinued operations, net of tax, in the quarter ended September 30, 2016 related to the Company's former Human Services segment, which are principally related to an ongoing legal matter.

(7) Service revenue, net for the quarter ending December 31, 2016 decreased from the quarter ended September 30, 2016 primarily due to decreased revenue associated with the WD Services' National Citizen Service summer youth programs, which are seasonal in nature. Additionally, the quarter ended September 30, 2016 included revenue of $5,367 under the WD Services' offender rehabilitation program related to the finalization of a contractual adjustment for the contract years ended March 31, 2015 and 2016.

(8) The Company recorded an asset impairment charge of $1,415 related to the building and land utilized by the holding company, which was sold effective December 30, 2016. Also, the Company recorded asset impairment charges in its WD Services segment of $9,983, $4,381 and $5,224 to its property and equipment, intangible assets and goodwill, respectively.

(9) The quarter ended December 31, 2016 includes gain on loss of controlling interest in Matrix, net of tax, of $109,403.

(10) Earnings per share is computed independently for each of the quarters presented. Therefore, the sum of quarterly earnings per share may not equal the total computed for the year.

23. Subsequent Events

On February 16, 2018, Matrix acquired HealthFair, a leading provider of mobile health assessment and advanced diagnostic testing services for a purchase price of $160,000 plus an earnout payment contingent upon HealthFair's 2018 financial performance. Additionally, Matrix entered into a financing transaction consisting of a $330,000 first lien term loan and a $20,000 revolving line of credit, of which none was drawn, and issued an aggregate of approximately 24,200,000 shares of its common units related to a seller roll-over contribution. As a result of the rollover of certain equity interests in HealthFair, Providence's equity ownership is 43.6% as of February 16, 2018.

On November 2, 2017, the Company's Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69,640 (the amount remaining from the $100,000 repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. During the period January 1, 2018 to March 5, 2018, the Company repurchased 527,825 shares for $33,330, and $25,807 was available under the plan to repurchase shares.

Item 9. ***Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.***

None.

Item 9A. ***Controls and Procedures.***

Evaluation of Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management (including its principal executive officer and principal financial officer), evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act as of the end of the period covered by this Annual Report on Form 10-K (December 31, 2017). Based upon this evaluation, the Company's principal executive and financial officers have concluded that such disclosure controls and procedures were effective to provide reasonable assurance that (i) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's report on internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Report of Independent Registered Public Accounting Firm

The attestation report of the registered public accounting firm on the Company's internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Changes in Internal Control Over Financial Reporting

The principal executive and financial officers also conducted an evaluation of whether any changes in the Company's internal control over financial reporting occurred during the quarter ended December 31, 2017 that have materially affected or which are reasonably likely to materially affect such control. Such officers have concluded that no such changes have occurred.

Item 9B. ***Other Information.***

Effective March 12, 2018, Matthew Umscheid, our current Senior Vice President, Strategic Services, is being transferred to employment in such role at our LogistiCare business, pursuant to an offer letter dated March 6, 2018. In connection with this transfer, Mr. Umscheid is resigning as an officer of the Company. Under the terms of his offer letter with LogistiCare, Mr. Umscheid's annual base salary will remain at $350,000, his target annual bonus for 2018 will remain at 75% of his base salary, and there is no term of employment. In his new role, Mr. Umscheid will also be eligible to participate in other compensation and benefit programs made available to LogistiCare's senior executives, including a long-term incentive plan.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Code of Ethics

We have adopted a code of ethics that applies to our senior management, including our chief executive officer, chief financial officer, controller and persons performing similar functions, as well as our directors, officers and employees. This code of ethics is part of our broader Compliance and Ethics Plan and Code of Conduct, which is available free of charge in the Investor Relations section of our website at www.prscholdings.com. We intend to disclose any amendment to, or waiver from, a provision of the code of ethics that applies to our principal executive officer, principal financial officer or principal accounting officer on our website. The information contained on our website is not part of, and is not incorporated in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 11. ***Executive Compensation.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 14. ***Principal Accounting Fees and Services.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules.***

(a)(1) Financial Statements

The following consolidated financial statements including footnotes are included in Item 8.

- Consolidated Balance Sheets at December 31, 2017 and 2016;
- Consolidated Statements of Income for the years ended December 31, 2017, 2016 and 2015;
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2017, 2016 and 2015;
- Consolidated Statements of Stockholders' Equity for the years ended December 31, 2017, 2016 and 2015; and
- Consolidated Statements of Cash Flows for the years ended December 31, 2017, 2016 and 2015.

(2) Financial Statement Schedules

Schedule II Valuation and Qualifying Accounts

	Balance at beginning of period	Additions: Charged to costs and expenses	Additions: Charged to other accounts	Deductions	Balance at end of period
Year Ended December 31, 2017:					
Allowance for doubtful accounts	$ 5,901	$ 815	$ (466) (1)	$ 488 (2)	$ 5,762
Year Ended December 31, 2016:					
Allowance for doubtful accounts	$ 4,380	$ 3,298	$ 1,058 (1)	$ 2,835 (2)	$ 5,901
Year Ended December 31, 2015:					
Allowance for doubtful accounts	$ 3,198	$ 1,928	$ 1,152 (1)	$ 1,898 (2)	$ 4,380

Notes:

Schedule above has been recast from prior year to exclude activity related to discontinued operations.

(1) Amounts primarily include the allowance for contractual adjustments related to our non-emergency transportation services operating segment that are recorded as adjustments to non-emergency transportation services revenue. Amount additionally includes impact from change in foreign currency rates.

(2) Write-offs, net of recoveries.

All other schedules are omitted because they are not applicable or the required information is shown in our financial statements or the related notes thereto.

FORM 10-K

(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2016

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 001-34221

The Providence Service Corporation
(Exact name of registrant as specified in its charter)

Delaware	**86-0845127**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**
700 Canal Street, Third Floor, Stamford, CT	**06902**
(Address of principal executive offices)	**(Zip code)**

Registrant's telephone number, including area code: (203) 307-2800

Securities registered pursuant to Section 12(b) of the Act:

Title of each Class	**Name of each exchange on which registered**
Common Stock, $0.001 par value per share	**The NASDAQ Global Select Market**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ☐ Yes ☒ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). ☒ Yes ☐ No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☐	Accelerated filer	☒
Non-accelerated filer	☐ (Do not check if a smaller reporting company)	Smaller reporting company	☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☒ No

The aggregate market value of the voting and non-voting common equity of the registrant held by non-affiliates based on the closing price for such common equity as reported on The NASDAQ Global Select Market on the last business day of the registrant's most recently completed second fiscal quarter (June 30, 2016) was $563.9 million.

As of March 6, 2017, there were outstanding 13,500,436 shares (excluding treasury shares of 3,833,420) of the registrant's Common Stock, $.001 par value per share, which is the only outstanding capital stock of the registrant.

DOCUMENTS INCORPORATED BY REFERENCE

All or a portion of Items 10 through 14 in Part III of this Form 10-K are incorporated by reference to our definitive proxy statement on Schedule 14A for our 2017 stockholder meeting; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Report on Form 10-K filed on or before such date.

TABLE OF CONTENTS

Part I

In this Annual Report on Form 10-K, the words the "Company", the "registrant", "we", "our", "us", "Providence" and similar terms refer to The Providence Service Corporation and, except as otherwise specified herein, to our subsidiaries. When such terms are used in reference to the Company's common stock, $0.001 par value per share (the "Common Stock), and the Series A Convertible Preferred Stock, $0.001 par value per share (the "Preferred Stock"), they refer specifically to The Providence Service Corporation.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains certain statements that may be deemed "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including statements related to the Company's strategies or expectations about revenues, liabilities, results of operations, cash flows, ability to fund operations, profitability, ability to meet financial covenants, contracts or market opportunities. The Company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission (the "SEC"), in materials delivered to stockholders and in press releases. In addition, the Company's representatives may from time to time make oral forward-looking statements. In certain cases, you may identify forward looking-statements by words such as "may", "will", "should", "could", "expect", "plan", "project", "intend", "anticipate", "believe", "seek", "estimate", "predict", "potential", "target", "forecast", "likely", the negative of such terms or comparable terminology. In addition, statements that are not historical statements of fact should also be considered forward-looking statements. These forward-looking statements are based on the Company's current expectations, assumptions, estimates and projections about its business and industry, and involve risks, uncertainties and other factors that may cause actual events to be materially different from those expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to, the risks described under Item 1A in Part I of this Annual Report on Form 10-K.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statement was made. The Company is under no obligation to (and expressly disclaims any such obligation to) update any of the information in any forward-looking statement if such forward-looking statement later turns out to be inaccurate, whether as a result of new information, future events or otherwise.

Item 1. ***Business.***

Background

The Providence Service Corporation is a holding company which owns interests in subsidiaries and other companies that are primarily engaged in the provision of healthcare and workforce development services for public and private sector entities seeking to control costs and promote positive outcomes. The subsidiaries and other companies in which we hold interests comprise the following segments:

- Non-Emergency Transportation Services ("NET Services") – Nationwide provider of non-emergency medical transportation ("NET") programs for state governments and managed care organizations.
- Workforce Development Services ("WD Services") – Global provider of employment preparation and placement and legal offender rehabilitation services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments ("CHAs"), to members of managed care organizations, accounted for as an equity method investment.

Ingeus UK Holdings Limited and its wholly and partly-owned subsidiaries and associates (collectively, "Ingeus"), which make up the majority of WD Services, were acquired on May 30, 2014. On November 1, 2015, we completed the sale of our Human Services segment (the "Human Services Sale"), which is accounted for as a discontinued operation.

Matrix Investment is comprised of our interest in Mercury Parent, LLC, a newly formed parent of CCHN Group Holdings, Inc. CCHN Group Holdings, Inc. and its subsidiaries are referred to as "Matrix". Matrix was acquired by the Company on October 23, 2014. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix, with Providence retaining a 46.8% equity interest (the "Matrix Transaction"). Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in our Health Assessment Services ("HA Services") segment. The Company now owns a noncontrolling interest in Matrix. The Company's proportionate share of Matrix's net assets and financial results for the period following the closing of the Matrix Transaction are presented under the equity method. The assets, liabilities and financial results of Matrix for the period prior to the closing of the Matrix Transaction are presented within discontinued operations. For additional information regarding the Matrix Transaction, see Note 21, *Discontinued Operations,* to our consolidated financial statements.

As of December 31, 2016, NET Services and WD Services operated in 40 states and the District of Columbia in the United States ("U.S."), and in 9 countries outside of the U.S.

The Company is a Delaware corporation formed in 1996 and headquartered in Stamford, Connecticut.

Business Strategies

While our segments report into our holding company management team, each is managed in a decentralized manner and pursues strategies reflective of their respective industries and operating models.

Our holding company strategy is designed to increase shareholder value through a focus on building intrinsic value on a per share basis, which in turn is predicated upon the growth, continuous improvement and efficient delivery of high quality, technology-enabled services within our segments. In order to successfully pursue our strategies, our priorities at the holding company level include: 1) pursuing the highest standards of governance, values and compliance, 2) ensuring operating excellence by attracting, developing, and retaining empowered and accountable segment level leadership with significant industry experience, and 3) allocating capital opportunistically in markets that may be inefficient or where we have an ability to invest at a discount to intrinsic value, particularly where our experience, analysis, and long-term perspective can provide an advantage over competitors. As demonstrated in 2016 with the Matrix Transaction and in 2015 with the Human Services Sale, we also may enter into strategic partnerships or dispose of current or future segments, based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations. While infrequent, we may also pursue acquisitions and investments in industries not served by our existing segments.

Our strategic priorities and service offerings are based upon a common purpose of delivering exceptional value in the healthcare and workforce development industries, primarily through technology-enabled service platforms. Our segments seek to deliver disciplined and industry leading sales growth (excluding the impact of acquisitions) and generate industry-leading margins, cash flow and returns on capital. To accomplish these goals, we continuously improve our offerings in the areas of quality, cost and innovation through multiple operational levers. We pursue both organic and inorganic growth through entry into adjacent markets and complementary service lines, particularly with offerings that may leverage the advantages inherent in our large-scale networks. Our segments' core competencies include developing and managing large provider networks, tailoring healthcare and workforce development service offerings to the unique needs of diverse communities and populations, and implementing technology-enabled delivery models to achieve superior outcomes in low cost settings.

Holding Company Competition

In identifying, evaluating and selecting strategic opportunities, we may encounter intense competition from other entities having similar business objectives, such as strategic investors, private equity groups and special purpose acquisition corporations. Many of these entities are well established and have extensive experience identifying and executing transactions directly or through affiliates. These competitors may possess greater human and other resources than us, and our financial resources may be relatively limited in comparison. Any of these factors may place us at a competitive disadvantage in contrast to our competitors.

Financial Information About our Segments

The Company operates in two principal business segments, NET Services and WD Services. In addition, Providence holds a noncontrolling interest in Matrix, which is a reportable segment for financial reporting purposes, Matrix Investment. Financial information about segments and geographic areas, including revenues, operating income (loss), and long-lived assets of each segment, is included in Note 22, *Segments*, to our consolidated financial statements and is incorporated herein by reference. See Item 1A, Risk Factors, for a discussion of risks related to our operations and investments.

Our Segments

NET Services

Services offered. NET Services provides non-emergency transportation solutions to clients in 39 states and the District of Columbia. As of December 31, 2016, approximately 26.1 million individuals were eligible to receive our transportation services, and during 2016, NET Services managed 69.0 million trips. For 2016, 2015 and 2014, NET Services accounted for 78.2%, 73.3% and 80.9%, respectively, of Providence's consolidated revenue.

NET Services primarily contracts with state Medicaid programs and managed care organizations ("MCOs" and collectively "NET customers") for the coordination of their members' ("NET end-users") non-emergency transportation needs. NET end-users are typically Medicaid or Medicare eligible members, whose limited mobility or financial resources would otherwise hinder their ability to access necessary healthcare and social services. We believe our transportation services enable access to care that not only improves the quality of life and health of the populations we serve, but also enables many of the individuals we serve to pursue independent living in their homes rather than in more expensive institutional care settings.

Our programs are dependent upon our highly-integrated technology platform and the management of a multifaceted network of transportation providers. Our technology platform is integrated with our network constituents and purpose-built for the unique needs of our industry. Our platform is highly scalable and can support substantial growth in our current membership base. Our platform provides for broad interconnectivity between NET end users, transportation providers and our clients, and, we believe, uniquely positions us as a future focal point in the evolving healthcare industry to introduce additional population insights. In 2016, we introduced new technological features for NET end users to improve service levels, lower costs and build the foundation for additional data analytics capabilities.

To fulfill the transportation needs of NET end-users, we apply our proprietary technology platform to an extensive system of approximately 5,500 transportation resources. This includes our in-network roster of fully contracted transportation providers who operate sedans, wheelchair equipped vehicles, multi-passenger vans and ambulances. Our system also utilizes partnerships with mass transit entities, mileage reimbursement programs and taxis. To promote safety, quality, and compliance, our in-network transportation providers undergo an in-depth credentialing and education process. In 2016, we introduced additional sources of transportation capacity, including on-demand transportation systems in certain markets, to increase our service levels and lower costs. Through these additional sources of transportation, we may use integrated solutions using our proprietary technology platform and our external partners' application program interfaces to improve on-time and on-demand performance, provide real time information and analytics, minimize cancellations and better allow for the scale required to provide an effective, nationwide service.

Revenue and customers. In 2016, contracts with state Medicaid agencies and MCOs represented 58.9% and 41.1%, respectively, of NET Services' revenue. NET Services derived 13.1%, 15.0% and 17.0% of its revenue from a single Medicaid agency for the years ended December 31, 2016, 2015 and 2014, respectively. The next four largest NET Services customers in the aggregate comprised 22.6%, 24.2% and 26.2% of NET Services' revenue for the years ended December 31, 2016, 2015 and 2014, respectively.

Contracts with state Medicaid agencies are typically for three to five years with multiple renewal options. Contracts with MCOs are typically of indefinite duration until terminated by either party upon reasonable notice (as determined in accordance with the contract), and allow for regular price adjustments based upon utilization and transportation cost. On average, approximately 20% of the total revenue generated by NET Services under state Medicaid contracts is subject to renewal within the next 12 months, although this percentage can be much higher, as certain contracts represent a significant portion of revenue. As of December 31, 2016, 33.8% of NET Services revenue was generated under state Medicaid contracts that were subject to renewal within the next 12 months, which includes our contract with the state of New Jersey, which represented 13.1% of NET Services' revenue in 2016.

78.3% of NET Services' revenue in 2016 was generated under capitated contracts where we assume the responsibility of meeting the covered healthcare related transportation requirements of a specific population. Capitated contracts are generally structured with fixed per-member, per-month payment rates. The remainder of the revenue was generated under other types of fee arrangements, including administrative services only, fee for service ("FFS"), cost plus and flat fee contracts, under which fees are generated based upon billing rates for specific services or defined membership populations.

Seasonality. While revenue is generally fixed, primarily as a result of the capitated nature of the majority of our contracts, service expense varies based on the utilization of our services. The quarterly operating income and cash flows of NET Services normally fluctuate as a result of seasonal variations in the business, principally due to lower transportation demand during the winter season and higher demand during the summer season.

Competition. We compete with a variety of regional organizations that provide similar healthcare and social services related transportation, such as American Medical Response, Inc., Medical Transportation Management Inc., SoutheasTrans, Inc. and Veyo LLC, as well as local and regional providers. Most local competitors seek to win contracts for specific counties or small geographic territories whereas we and other larger competitors seek to win contracts for an entire state or large regional area. We compete based upon a number of factors, including our nationwide network, technical expertise, experience, service capability, and price.

Business development. Our sales and marketing strategy relies on a concentrated business development effort, with centralized marketing programs. Due to the critical nature of our services, our customers rely upon our past delivery performance record, network development and management expertise, technical expertise and specialized knowledge. A significant portion of our revenue is generated from long-term, repeat customers. Our long-term strategy is to improve our position as the preferred provider of transportation, complementary network-based services and data analytics offerings to both state Medicaid agencies and MCOs. Key elements of our long-term strategy include continued investment in our technologies, enabling us to both lower costs and improve service delivery. We also consider opportunistic acquisitions of businesses that serve our market or leverage our nationwide infrastructure, consistent with our stated holding company strategy.

In 2016, we launched a strategic initiative to enhance member satisfaction and drive greater operational efficiencies. This initiative focuses on developing and deploying new processes and technologies needed to progress towards an industry-leading call center and reservation scheduling platform; improve member communication, accessibility, and satisfaction; optimize the utilization of our extensive network of transportation providers; and build the foundation for additional analytical capabilities. The implementation of the initiative is expected to be substantially completed by the end of 2017.

WD Services

Services offered. WD Services provides workforce development and legal reoffender rehabilitation services, which include employment preparation and placement, apprenticeship and training, youth community service programs and certain health related services. For 2016, 2015 and 2014, WD Services accounted for 21.8%, 26.7% and 19.1%, respectively, of Providence's consolidated revenue.

WD Services' end user client base ("WD end-users") is broad and includes both the recently and long-term unemployed, disabled, and individuals seeking new skills, as well as individuals that are coping with medical illnesses, are newly graduated from educational institutions, or have been recently released from incarceration.

As of December 31, 2016, WD Services operated in 10 countries, including the United Kingdom ("UK"), Australia, France, Saudi Arabia, South Korea, Canada, the U.S., Germany, Spain and Switzerland. We expect to launch operations in Singapore in 2017. Operations in Sweden and Poland ceased during 2016.

Revenue, customers and clients. The majority of WD Services' revenue is generated through the provision of employability and training programs to national government entities seeking to reduce unemployment or recidivism rates. For the years ended December 31, 2016, 2015 and 2014, 68.3%, 75.5% and 66.6%, respectively, of WD Services' revenue was derived from operations in the UK. Additionally, 28.9%, 40.0% and 57.2% of WD Services' revenue was derived from a contract with the UK government's Department of Work and Pensions during the years ended December 31, 2016, 2015 and 2014, respectively. During the years ended December 31, 2016 and 2015, 25.9% and 28.2% of WD Services' revenue was derived from a contract with the UK government's Ministry of Justice.

The revenue earned by WD Services under its contracts is often derived through a combination of different revenue channels including, but not limited to, fees contingent upon: (1) the volume of WD end-users referred to and/or admitted into a specific program, (2) the achievement of defined outcomes for specific individuals, such as a job placement or continued employment and (3) the achievement of defined outcomes for a population of individuals over a specific time period, such as aggregate employment or recidivism rates. The relative contributions of different revenue channels under a specific contract can fluctuate meaningfully over the life of a contract and thus contribute to significant earnings volatility. In particular, revenue recognition related to our National Citizen Services ("NCS") youth programs can be particularly volatile due to the nature of the payment cycle and services provided. WD Services also earns revenue under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. Volume levels are typically not guaranteed under contracts.

The nature of the services offered by WD Services often relies on our ability to improve a certain set of outcomes at a reduced cost versus previously utilized in-sourced delivery models. As a result, as we commence new contracts using transformational delivery models, we are required to invest significant upfront capital for information technology, human resources, facilities and other onboarding costs, such as consultants and redundancy payments. The level of upfront funding required is dependent upon the size and nature of the contract. Although significant upfront funding may be required, revenues are often payable only as services are delivered and, in some cases, only after incentive measures have been achieved over a multi-year period. As a result of these two factors, there can be significant variability in our earnings from quarter-to-quarter and year-to-year. In addition, under the majority of WD Services' contracts, the Company relies on its customers, which include government agencies, to provide referrals, for whom the Company can provide services and earn revenue. The timing and magnitude of referrals can fluctuate significantly, leading to volatility in revenue. As a result, we often measure a contracts success over the entire term of the contract and believe the financial results of WD Services are best viewed over a multi-year perspective.

Seasonality. While there has been period-to-period variability in WD Services' earnings due to the factors discussed above and also set forth in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Revenues and Expenses – WD Services", there has not been a material seasonal effect on WD Services' results of operations.

Competition. In the UK, Australia and Saudi Arabia, the workforce development market is served by large multi-national corporations and regional for-profit and non-profit entities. In Canada, France, Germany, South Korea, Spain, Switzerland, and the U.S., our competition primarily consists of small, privately owned companies. In the UK, the offender rehabilitation market is served by large corporations, often working with charitable sector providers. Our larger competitors include Maximus, Capita, G4S, Sodexo, Interserve, Seetec, The Reed Group, Staffline and Serco.

The market for services to governments is competitive and subject to change and pricing pressure, particularly during the bidding for new contracts and contract renewals. However, due to the critical nature of our offerings and the WD end-users we serve, market entry can be difficult for new entrants or those without prior established track-records. Other barriers to entry include operational service complexity and significant upfront investments. This can include establishment of complex IT systems, significant monitoring and reporting obligations, delivery from sites across wide geographies, and management and development of supply chains.

Business development. Our business development activities are performed both locally and centrally in WD Services' London headquarters. Through local and global networks and relationships, we become aware of new opportunities for which we develop bids through competitive processes. The nature of the competitive processes varies from highly competitive to being one of a few providers, or the sole provider, to bid on a contract. In late 2015, our bidding process was overhauled with an improved focus on pursuing only those contracts that meet certain investment criteria, including risk-weighted return on capital thresholds, and involve the provision of services where we believe our experience will allow us to deliver differentiated and improved outcomes for our clients.

In 2016, in order to build upon its leadership position in the UK employment services industry, enhance client satisfaction and drive greater operational efficiencies, WD Services launched the Ingeus Futures program. This program includes organizational restructuring, the development and deployment of new processes and technologies, and increased business development resources. Each aspect is aimed at improving operational efficiencies and client services as well as developing the internal capabilities necessary to ensure long-term profitable growth in the employment, training and healthcare industries. The implementation of the initiative is expected to be substantially completed during 2017.

Matrix Investment

On October 19, 2016, the Company completed a stock subscription transaction, pursuant to which affiliates of Frazier Healthcare Partners (the "Frazier Subscriber") purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest. On that same date, a subsidiary of the Company and the Frazier Subscriber entered into an Amended and Restated Limited Liability Company Agreement (the "Operating Agreement") of Mercury Parent, LLC, a newly formed company through which the parties hold their equity interests in Matrix. The Operating Agreement sets forth certain terms and conditions regarding the ownership by the Company and Frazier Subscriber of interests in Mercury Parent and their indirect ownership of common stock of Matrix, and provides for, among other things, certain liquidity and governance rights and other obligations and rights, in each case, on the terms and conditions contained therein.

Services offered. Matrix provides in-home care optimization and care management solutions, which include CHAs. Matrix utilizes a national network of over 1,100 nurse practitioners ("NPs"), located across 36 states, to provide its services primarily to members of Medicare Advantage ("MA") health plans.

Matrix primarily generates revenue from CHAs, which obtain a health plan members' information related to health status, social, environmental and medical risks and help the MA plans improve the accuracy of such information. Matrix's services typically commence with a member analysis that utilizes client data, such as medical claims data, to maximize its ability to improve client and member outcomes as a result of the assessment process. Through Matrix's contact centers, which include almost 175 colleagues, Matrix pursues additional data collection and schedules assessments. Matrix's NPs then spend approximately 60 minutes in the member's home conducting a CHA, which is comprised of a physical examination and other diagnostic services.

Matrix's services are dependent upon its technology platform which integrates the NP network, operations infrastructure, call centers and clients. Matrix's purpose-built platform is designed for the unique needs of its industry, is highly scalable and can support substantial growth. We believe Matrix's network and platform positions Matrix as a future focal point in the evolving healthcare industry in the introduction of both additional population insights and care management services. As a further step towards the provision of these additional data analytics and care management services, Matrix launched a chronic care management offering in 2015. With data provided by its health plan clients, Matrix utilizes analytics to determine for which members it can most effectively lower costs and improve outcomes through face-to-face engagements with clinicians. Each program is customized and is served by a comprehensive team of case managers, nurse practitioners, registered nurses, and trained call center colleagues.

Revenue, customers and clients. As of December 31, 2016, Matrix's customers included almost 40 health plans, including for-profit multi-state health plans and non-profit health plans that operate in only one state or several counties within one state. Matrix serves many of the largest and most prestigious health plans and health systems in the U.S. For the year ended December 31, 2016, Matrix's top five customers accounted for 71.8% of its revenue, and its largest customer accounted for 27.8% of its revenue. Matrix enters into annual or multi-annual contracts with its customers under which it is paid on a per assessment basis.

Seasonality. Matrix has historically experienced higher CHA volume in the second half of the calendar year as a result of an accelerating demand towards calendar year-end. However, in 2016, CHAs were performed more evenly throughout the year as Matrix worked to balance volume to more efficiently utilize NP capacity.

Competition. We believe that Matrix and CenseoHealth are the largest independent providers of CHAs to the health plan market. There are many smaller competitors, including Advance Health, EMSI Healthcare Services, MedXM, and Inovalon, Inc. Some health plans in-source CHA services. Matrix's chronic care management competitors include Landmark Healthcare, PopHealthcare and Optum.

Employees

In the execution of our holding company strategy, our holding company staff utilizes their experience in both public and private markets, previous operational leadership in a variety of industries, as well as other typical public holding company capabilities, including competencies in the areas of accounting, tax, human resources, information technology and legal. Our colleagues may also supplement our segment leadership teams in the areas of strategic development, operational and financial improvement, and cross segment sales or operational synergies on a selective basis.

As of December 31, 2016, there were approximately 30 employees at our holding company. In addition, as of December 31, 2016, we employed approximately 7,590 clinical, client service and administrative personnel. Of these employees, approximately 3,760 work in NET Services and approximately 3,830 work in WD Services.

None of our U.S. employees are members of a union. We have nearly 2,380 and 370 full-time employees in the UK and France, respectively. Certain of our UK employees are members of the NAPO and Unison unions and certain of our employees in France are members of the Confederation Generale du Travail. Unionized employees in both countries have collective bargaining rights. Participation in unions is confidential under European employment laws. We believe we have good relationships with our employees, both unionized and non-unionized, in the U.S. and internationally.

Regulatory Environment

Overview

Our segments are subject to numerous federal, state and local laws, regulations and agency guidance (collectively, "Laws"). These Laws significantly affect the way in which our segments operate various aspects of their businesses. Our segments must also comply with state and local licensing requirements, state and federal requirements for participation in Medicare and Medicaid, requirements for contracting with MA plans, and contractual requirements imposed upon them by the federal, state and local agencies and third-party commercial customers to which they provide services. Failure to follow the rules and requirements of these programs can significantly affect our segments' ability to be paid for the services they provide and be authorized to provide services on an ongoing basis.

In addition, our segments' revenue is largely derived from contracts that are directly or indirectly paid or funded by government agencies, including Medicare and Medicaid. A significant decline in government expenditures for such programs, or shift of program parameters or funding, could cause customers to reduce their payments under those contracts or to not renew such contracts, either of which could have a negative impact on our segments' future operating results. As funding for our contracts is dependent in part upon federal funding, such funding changes could have a significant effect on our business.

The Medicare and Medicaid programs are governed by significant and complex federal Laws. Because each of the Medicare and Medicaid is financed, at least in part, with federal funds, direct or indirect recipients of those funds are subject to federal fraud, waste and abuse Laws. In addition, there are federal privacy and security Laws that govern the healthcare industry. State Laws primarily pertain to the licensure of certain categories of healthcare professionals and providers and the state's interest in regulating the quality of healthcare in the state, regardless of the source of payment, but may also include state Laws pertaining to fraud, waste and abuse, privacy and security Laws, and the state's regulation of its Medicaid program. Federal or state regulatory laws that may affect our segments' businesses, include, but are not limited to the following:

- false and other improper claims or false statements pertaining to reimbursement;
- the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") and its privacy, security, breach notification and enforcement and code set regulations, along with evolving state laws protecting patient privacy and requiring notifications of unauthorized access to, or use of, patient medical information;
- civil monetary penalties law;
- anti-kickback laws;
- the Stark Law and other self-referral and financial inducement laws;
- CMS regulations pertaining to Medicare as well as CMS releases applicable to the operation of MA plans, such as reimbursement rates, risk adjustment and data collection methodologies, adjustments to quality management measurements and other relevant factors; and
- state licensure laws.

A violation of certain of these Laws could result in civil and criminal penalties, the refund of monies paid by government or private payers, our segments' exclusion from participation in federal healthcare payer programs, or the loss of our segments' license to conduct business within a particular state's boundaries. Although our segments believe that they are able to maintain material compliance with all applicable Laws, these Laws are complex and a review of our segments' practices by a court, or applicable law enforcement or regulatory authority, could result in an adverse determination that could harm our segments' businesses. Furthermore, the Laws applicable to our segments' businesses are subject to change, interpretation and amendment, which could adversely affect our segments' ability to conduct our business.

Federal Law

Federal healthcare laws apply in any case in which our segments are providing an item or service that is reimbursable or provide information to our segments' customers that results in reimbursement by a federal healthcare payer program to our segments or them. The principal federal Laws that affect our segments' businesses include those that prohibit the filing of false or improper claims or other data with federal healthcare payer programs and those that prohibit unlawful inducements for the referral of business reimbursable under federal healthcare payer programs.

False and Other Improper Claims

Under the federal False Claims Act (31 U.S.C. §§ 3729-3733) and similar state Laws, the government may impose civil liability on our segments if they knowingly submit, or participate in submitting, any claims for payment to the federal or state government that are false or fraudulent, or that contain false or misleading information. The False Claims Act defines a claim as a demand for money or property made directly to the government or to a contractor, grantee, or other recipient if the money is to be spent on the government's behalf or if the government will reimburse the contractor or grantee. Liability can be incurred for submitting (or causing another to submit) false claims with actual knowledge or for submitting false claims with reckless disregard or deliberate ignorance. Liability can also be incurred for knowingly making or using a false record or statement to receive payment from the federal government or for knowingly and improperly avoiding or decreasing an obligation to pay or transmit money or property to the government. Consequently, a provider need not take an affirmative action to conceal or avoid an obligation to the government, but the mere retention of an overpayment from the government could lead to potential liability under the False Claims Act.

If our segments are ever found to have violated the False Claims Act, they could be required to make significant payments to the government (including damages and penalties in addition to the return of reimbursements previously collected) and could be excluded from participating in federal healthcare programs or providing services to entities which contract with those programs. Many states also have similar false claims statutes. In addition, healthcare fraud is a priority of the U.S. Department of Justice, the Department of Health and Human Services ("DHHS"), its program integrity contractors and its Office of Inspector General, the Federal Bureau of Investigation and state Attorneys General. These agencies have devoted a significant amount of resources to investigating healthcare fraud.

While the criminal statutes generally are reserved for instances evidencing fraudulent intent, the civil and administrative penalty statutes are being applied by the federal government in an increasingly broad range of circumstances. Examples of the types of activities giving rise to liability for filing false claims include billing for services not rendered, misrepresenting services rendered (i.e., miscoding), applications for duplicate reimbursement and providing false information that results in reimbursement or impacts reimbursement amounts. Additionally, the federal government takes the position that a pattern of claiming reimbursement for unnecessary services violates these statutes if the claimant should have known that the services were unnecessary. The federal government also takes the position that claiming reimbursement for services that are substandard is a violation of these statutes if the claimant should have known that the care was substandard. Criminal penalties also are available even in the case of claims filed with private insurers if the federal government shows that the claims constitute mail fraud or wire fraud or violate any of the federal criminal healthcare fraud statutes.

State Medicaid agencies and state Attorneys General also have authority to seek criminal or civil sanctions for fraud and abuse violations. In addition, private insurers may bring actions under state false claim laws. In certain circumstances, federal and state laws authorize private whistleblowers to bring false claim or "qui tam" suits on behalf of the government against providers and reward the whistleblower with a portion of any final recovery. In addition, the federal government has engaged a number of private audit organizations to assist it in tracking and recovering claims for healthcare services that may have been improperly submitted.

Governmental investigations and whistleblower "qui tam" suits against healthcare companies have increased significantly in recent years, and have resulted in substantial penalties and fines and exclusions of persons and entities from participating in government healthcare programs. Although our segments monitor their billing practices for compliance with applicable laws, such laws are very complex, and they might not be able to detect all errors or interpret such laws in a manner consistent with a court or an agency's interpretation.

Health information practices

Under HIPAA, DHHS issued rules to define and implement standards for the electronic transactions and code sets for the submission of transactions such as claims, and privacy and security of individually identifiable health information in whatever manner it is maintained.

The Final Rule on Enforcement of the HIPAA Administrative Simplification provisions, including the transaction standards, the security standards and the privacy rule, published by DHHS addresses, among other issues, DHHS's policies for determining violations and calculating civil monetary penalties, how DHHS will address the statutory limitations on the imposition of civil monetary penalties, and various procedural issues. The rule extends enforcement provisions currently applicable to the healthcare privacy regulations to other HIPAA standards, including security, transactions and the appropriate use of service code sets.

The Health Information Technology for Economic and Clinical Health Act ("HITECH"), enacted as part of the American Recovery and Reinvestment Act of 2009, extends certain of HIPAA's obligations to parties providing services to healthcare entities covered by HIPAA known as "business associates," imposes new notice of privacy breach reporting obligations, extends enforcement powers to state attorney generals and amends the HIPAA privacy and security laws to strengthen the civil and criminal enforcement of HIPAA. HITECH establishes four categories of violations that reflect increasing levels of culpability, four corresponding tiers of penalty amounts that significantly increase the minimum penalty amount for each violation, and a maximum penalty amount of $1.5 million for all violations of an identical provision. With the additional HIPAA enforcement power under HITECH, the Office of Civil Rights of the Department of Health and Human Services and states are increasing their investigations and enforcement of HIPAA compliance. Our segments have taken steps to ensure compliance with HIPAA and we are monitoring compliance on an ongoing basis.

Additionally, the HITECH Final Rule imposes various requirements on covered entities and business associates, and expands the definition of "business associates" to cover contractors of business associates. Even when our segments are not operating as covered entities, they may be deemed to be "business associates" for HIPAA rule purposes of such covered entities. Our segments monitor their compliance obligations under HIPAA as modified by HITECH, and implement operational and systems changes, associate training and education, conduct risk assessments and allocate resources as needed. Any noncompliance with HIPPA requirements could expose our segments to the criminal and increased civil penalties provided under HITECH and require them to incur significant costs in order to seek to comply with its requirements or to remediate potential issues that may arise.

Federal and state anti-kickback laws

Federal law commonly known as the "Anti-Kickback Statute" prohibits the knowing and willful offer, solicitation, payment or receipt of anything of value (direct or indirect, overt or covert, in cash or in kind) which is intended to induce: the referral of an individual for a service for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs; or the ordering, purchasing, leasing, or arranging for, or recommending the purchase, lease or order of, any service or item for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs.

Interpretations of the Anti-Kickback Statute have been very broad and under current Law, courts and federal regulatory authorities have stated that the Anti-Kickback Statute is violated if even one purpose (as opposed to the sole or primary purpose) of the arrangement is to induce referrals. Even bona fide investment interests in a healthcare provider may be questioned under the Anti-Kickback Statute if the government concludes that the opportunity to invest was offered as an inducement for referrals.

This act is subject to numerous statutory and regulatory "safe harbors." Compliance with the requirements of a safe harbor offers defenses against Anti-Kickback Statute allegations. Failure of an arrangement to satisfy all of the requirements of a particular safe harbor does not mean that the arrangement is unlawful. However, it may mean that such an arrangement will be subject to scrutiny by the regulatory authorities.

While our segments believe that their operations are in compliance with applicable Medicare and Medicaid fraud and abuse laws, there can be no guarantee. Our segments seek to structure all applicable arrangements to comply with applicable safe harbors where possible. There is a risk however, that the federal government might investigate such arrangements and conclude they violate the Anti-Kickback Statute. If our segments' arrangements are found to violate the Anti-Kickback Statute, our segments, along with their clients would be subject to civil and criminal penalties, which may include exclusion from participation in government reimbursement programs, and our segments' arrangements would not be legally enforceable, which could materially and adversely affect their business.

Many states, including some where our segments do business, have adopted anti-kickback laws that are similar to the federal Anti-Kickback Statute. Some of these state laws are very closely patterned on the federal Anti-Kickback Statute; others, however, are broader and reach reimbursement by private payers. If our segments' activities were deemed to be inconsistent with state anti-kickback or illegal remuneration laws, they could face civil and criminal penalties or be barred from such activities, any of which could harm our segments' businesses.

Federal and State Self-Referral Prohibitions

Our segments may be subject to federal and state statutes banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship. Section 1877 of the Social Security Act, also known as the "Stark Law", prohibits physicians from making a "referral" for "designated health services" for Medicare (and in many cases Medicaid) patients from entities or facilities in which such physicians directly or indirectly hold a "financial relationship".

A financial relationship can take the form of a direct or indirect ownership, investment or compensation arrangement. A referral includes the request by a physician for, or ordering of, or the certifying or recertifying the need for, any designated health services.

Certain services that our segments provide may be identified as "designated health services" for purposes of the Stark Law. Our segments cannot provide assurance that future regulatory changes will not result in other services our segments provide becoming subject to the Stark Law's ownership, investment or compensation prohibitions in the future.

Many states, including some states where our segments do business, have adopted similar or broader prohibitions against payments that are intended to induce referrals of clients. Moreover, many states where our segments operate have laws similar to the Stark Law prohibiting physician self-referrals. While our segments believe that they are operating in compliance with the Stark Law, there can be no guarantee that violations will not occur.

Healthcare Reform

On March 23, 2010, the President of the United States signed into law comprehensive health reform through the Patient Protection and Affordable Care Act (Pub. L. 11-148) ("PPACA"). On March 30, 2010, the President signed a reconciliation budget bill that included amendments to the PPACA (Pub. L. 11-152). These laws in combination form the "ACA" referred to herein. The changes to various aspects of the healthcare system in the ACA are far-reaching and include, among many others, substantial adjustments to Medicare reimbursement, establishment of individual mandates for healthcare coverage, extension of coverage to certain populations, expansion of Medicaid, restrictions on physician-owned hospitals, and increased efficiency and oversight provisions.

Some of the provisions of the ACA took effect immediately, while others will take effect later or will be phased in over time, ranging from a few months following approval to ten years. Due to the complexity of the ACA, it is likely that additional legislation will be considered and enacted. The ACA requires the promulgation of regulations that will likely have significant effects on the healthcare industry and third party payers. Thus, the healthcare industry and our operations may be subjected to significant new statutory and regulatory requirements and contractual terms and conditions, and consequently to structural and operational changes and challenges.

The ACA also implements significant changes to healthcare fraud and abuse laws that will intensify the risks and consequences of enforcement actions. These include expansion of the False Claims Act by: (a) narrowing the public disclosure bar; and (b) explicitly stating that violations of the Anti-Kickback Statute trigger false claims liability. In addition, the ACA lessens the intent requirements under the Anti-Kickback Statute to provide that a person may violate the statute without knowledge or specific intent. The ACA also provides new funding and expanded powers to investigate fraud, including through expansion of the Medicare Recovery Audit Contractor ("RAC") program to Medicare Parts C and D and Medicaid and authorizing the suspension of Medicare and Medicaid payments to a provider of services pending an investigation of a credible allegation of fraud. Finally, the legislation creates enhanced penalties for noncompliance, including increased criminal penalties and expansion of administrative penalties under Medicare and Medicaid. Collectively, such changes could have a material adverse impact on our segments' operations.

On January 20, 2017, U.S. President Donald J. Trump issued an executive order that directs federal agencies to take steps to ensure the government's implementation of the ACA minimizes the burden on impacted parties (individuals, states, etc.). The underlying intent of the executive order is to take the first steps to repeal and replace the ACA. The executive order specifically instructs agencies to "waive, defer, grant exemptions from, or delay implementation of provisions" that place a "fiscal burden on any State" or that impose a "cost, fee, tax, penalty, or regulatory burden" on stakeholders including patients, providers, and insurers. The order states that any changes should be made only to the extent "permitted by law" and should comply with the law governing administrative rule-making. The executive order does not, however, provide specifics on next steps or provisions that will be reexamined nor is it clear how the executive branch will be reconciled with Republican congressional efforts to repeal and replace the ACA or what portions of the ACA may continue in any replacement legislation. There are multiple pending legislative proposals to amend the ACA which, among other effects, could repeal all or parts of the ACA without replacing its extension of coverage to expansion populations and materially restructure the Medicaid and other government health care programs.

Surveys and audits

Our segments' programs are subject to periodic surveys by government authorities or their contractors to ensure compliance with various requirements. Regulators conducting periodic surveys often provide reports containing statements of deficiencies for alleged failures to comply with various regulatory requirements. In most cases, if a deficiency finding is made by a reviewing agency, our segments will work with the reviewing agency to agree upon the steps to be taken to bring our program into compliance with applicable regulatory requirements. In some cases, however, an agency may take a number of adverse actions against a program, including:

- the imposition of fines or penalties or the recoupment of amounts paid;
- temporary suspension of admission of new clients to our program's service;
- in extreme circumstances, exclusion from participation in Medicaid, Medicare or other programs;
- revocation of our license; or

- contract termination.

While our segments believe that our programs are in compliance with Medicare, Medicaid and other program certification requirements and state licensure requirements, failure to comply with these requirements could have a material adverse impact on our segments' businesses and their ability to enter into contracts with other agencies to provide services.

Billing/claims reviews and audits

Agencies and other third-party commercial payers periodically conduct pre-payment or post-payment medical reviews or other audits of our segments' claims or other audits in conjunction with their obligations to comply with the requirements of Medicare or Medicaid. In order to conduct these reviews, payers request documentation from our segments and then review that documentation to determine compliance with applicable rules and regulations, including the eligibility of clients to receive benefits, the appropriateness of the care provided to those clients, and the documentation of that care. Any determination that our segments have not complied with applicable rules and regulations could result in adjustment of payments or the incurrence of fines and penalties, or in situations of significant compliance failures review or non-renewal of related contracts.

Corporate practice of medicine and fee splitting

Some states in which our segments operate prohibit general business entities, such as our segments are, from "practicing medicine," which definition varies from state to state and can include employing physicians, as well as engaging in fee-splitting arrangements with these healthcare providers. Among other things, our segments currently contract with and employ NPs to perform CHAs. We believe that our segments have structured their operations appropriately; however, they could be alleged or found to be in violation of some or all of these laws. If a state determines that some portion of our segments' businesses violate these laws, it may seek to have our segments discontinue or restructure those portions of their operations or subject them to increased costs, penalties, fines, certain license requirements or other measures. Any determination that our segments have acted improperly in this regard may result in liability to them. In addition, agreements between the corporation and the professional may be considered void and unenforceable.

Professional licensure and other requirements

Many of our segments' employees are subject to federal and state laws and regulations governing the ethics and practice of their professions. For example, our mid-level practitioners (e.g., NPs) are subject to state laws requiring physician supervision and state laws governing mid-level scope of practice. As the use of mid-levels by physicians increases, state governing boards are implementing more robust regulations governing mid-levels and their scope of practice under physician supervision. Our segments' ability to provide mid-level practitioner services may be restricted by the enactment of new state laws governing mid-level scope of practice and by state agency interpretations and enforcement of such existing laws. In addition, professionals who are eligible to participate in Medicare and Medicaid as individual providers must not have been excluded from participation in government programs at any time. Our segments' ability to provide services depends upon the ability of their personnel to meet individual licensure and other requirements and maintain such licensure in good standing.

International Regulation of WD Services

As a provider of workforce development services in multiple international jurisdictions, we are subject to numerous national and local laws and regulations. These laws and regulations significantly affect the way in which we operate various aspects of our business. We must also comply with contract-specific technical and infrastructure requirements. Failure to follow the rules and requirements of these programs can significantly affect our ability to be paid for the services we provide. In addition, our revenue is primarily derived from contracts that are funded by national governments that are seeking to reduce the overall unemployment rate, or improve job placement success for targeted cohorts, and the recidivism rate. Further, the revenue we receive from these contracts is typically tied to milestones that are largely uncontrolled by us. Such milestones include the job placement success of clients, duration and tenure of clients in jobs once they are placed, and various other market and industry factors including the overall unemployment rate. A significant decline in national and local government initiatives to provide funding for employment programs, or shift of expenditures or funding, could cause government sponsors to reduce their expenditures under those contracts or not renew such contracts, either of which could have a negative impact on our future operating results.

WD Services is also subject to the European Union's and other countries' data security and protection laws and regulations. These laws and regulations impose broad obligations on the organizations which collects such data, as well as confer broad rights on individuals about whom such data is collected. These laws and regulations may also restrict the flow of information, including information about employees or service users, from this segment to the Company in the U.S. In certain instances, informed consent to the data transfer must be given by the affected employee or service user. Compliance with such laws and regulations may make it more difficult for the Company to gather data necessary to ensure the appropriate operation of its internal controls or to detect corruption resulting in the need for additional controls or increasing the Company's costs to maintain appropriate controls.

Failure to comply with such laws and regulations could result in fines, penalties or prison sentences as well as significant adverse publicity.

Further, our international operations are subject to various U.S. and foreign statutes that prohibit bribery and corruption, including the U.S. Foreign Corrupt Practices Act and the UK's Bribery Act. These statutes generally require organizations to prohibit bribery by or for the organization and demand the implementation of systems to counter bribery, including risk management, training and guidance and the maintenance of adequate record-keeping and internal accounting practices. The statutes also, among other things, prevent the provision of anything of value to government officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. In addition, many countries in which we operate have antitrust or competition regulations which, among other things, prohibit collusive tendering or bid-rigging behavior. Failure to comply with any of these statutes and regulations could result in fines or penalties, or in some cases prison sentences, and could result in significant adverse publicity.

Additional Information

The Company's website at www.prscholdings.com provides access to its periodic reports, certain corporate governance documents, press releases, interim shareholder reports and links to its subsidiaries' websites. The Company makes available to the public on its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after it electronically files such material with, or furnishes such material to, the SEC. Copies are also available, without charge, upon request to The Providence Service Corporation, 700 Canal Street, Third Floor, Stamford, CT 06902, (203) 307-2800, Attention: Corporate Secretary. The information contained on our website is not part of, and is not incorporated by reference in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 1A. ***Risk Factors.***

You should consider and read carefully all of the risks and uncertainties described below, as well as other information included in this Annual Report on Form 10-K, including our consolidated financial statements and related notes. The risks described below are not the only ones facing us. The occurrence of any of the following risks or additional risks and uncertainties not presently known to us or that we currently believe to be immaterial could materially and adversely affect our business, financial condition and results of operations. This Annual Report on Form 10-K also contains forward-looking statements and estimates that involve risks and uncertainties. Our actual results could differ materially from those anticipated in any forward-looking statements as a result of specific factors, including the risks and uncertainties described below.

Risks Related to Our Business

Certain of our segments' contracts can be terminated prior to expiration, without cause and without penalty to the payers. In addition, our NET Services contracts are subject to frequent renewal. There can be no assurance that our contracts will survive until the end of their stated terms, or that upon their expiration will be renewed or extended on satisfactory terms, if at all. Disruptions to, the early expiration of or the failure to renew our contracts could have a material adverse impact on our financial condition and results of operations.

With respect to many of our contracts, the payer may terminate the contract without cause, at will and without penalty to the payer, either immediately or upon the expiration of a short notice period in the event that, among other reasons, government appropriations supporting the programs serviced by the contract are reduced or eliminated or the payer deems our performance under the contract to be unsatisfactory. The failure of payers to renew or extend significant contracts or their early termination of significant contracts could adversely affect our financial performance. For example, many of the state Medicaid contracts held by NET Services, which represented 58.9% in the aggregate of NET Services revenue for the year ended December 31, 2016, have terms ranging from two to five years and are typically subject to a competitive bidding process near the end of the term. Typically, approximately 20% of revenue generated by NET Services under state government contracts in a twelve-month period is subject to renewal within the following twelve-month period, although this percentage can be much higher, as certain contracts represent a significant portion of revenue. NET Services also contracts with MCOs. For the year ended December 31, 2016, contracts with MCOs represented 41.1% in the aggregate of NET Services revenue. MCO contracts are typically of indefinite duration until terminated by either party upon reasonable notice (as determined in accordance with the contract). We cannot anticipate if, when or to what extent we will be successful in renewing our state government contracts or retaining our MCO contracts. During 2016, certain state government clients notified NET Services that their existing contracts will not be renewed, which we expect to result in a decline in operating income as a percentage of revenue of at least approximately 100 to 125 basis points, beginning in the first quarter of 2017. While we pursue new contract awards and also undertake efficiency measures, there can be no assurance that such measures will fully offset the impact of contracts that are not renewed or are cancelled on our operating income and results of operations.

We cannot anticipate if, when or to what extent a payer might terminate its contract with us prior to its expiration or fail to renew or extend a contract with us. If we are unable to retain or renew our contracts, or replace lost contracts, on satisfactory terms our financial conditions and results of operations could be materially adversely affected.

We obtain a significant portion of our business through responses to government requests for proposals and we may not be awarded contracts through this process in the future, or contracts we are awarded may not be profitable.

We obtain, and will continue to seek to obtain, a significant portion of our business from national, state, and local government entities. To obtain business from government entities, we are often required to respond to requests for proposals ("RFPs"). To propose effectively, we must accurately estimate our cost structure for servicing a proposed contract, the time required to establish operations and the terms of the proposals submitted by competitors. We must also assemble and submit a large volume of information within rigid and often short timetables. Our ability to respond successfully to RFPs will greatly impact our business.

To facilitate our ability to procure or retain government-sponsored contracts, we rely in part on establishing and maintaining relationships with officials of various government entities and agencies. These relationships enable us to provide informal input and advice to the government entities and agencies prior to the development of an RFP or program for privatization of healthcare and workforce development services and we believe they enhance our chances of procuring contracts with these payers. We may be unable to successfully manage our relationships with government entities and agencies and with elected officials and appointees due to, among other things, changes in the personnel holding various government offices or changes in our personnel who have these relationships. Any failure to establish, maintain or manage relationships with government and agency personnel may hinder our ability to procure or retain government-sponsored contracts.

Our ability to win contracts to administer and manage programs traditionally administered by government employees is also dependent on the impact of government unions. Many government employees belong to labor unions with considerable financial resources and lobbying networks. These unions could apply opposing political pressure on legislators and other officials seeking to privatize government programs. Union opposition could result in our losing government contracts, being precluded from providing services under government contracts, or maintaining or renewing existing contracts. If we could not renew certain contracts or obtain new contracts due to opposition political actions, it could have a material adverse impact on our operating results.

Any acquisition that we undertake could be difficult to integrate, disrupt our business, dilute stockholder value or have a material adverse impact on our operating results.

We have made, and anticipate that we will continue to make, acquisitions. We have made a number of acquisitions since our inception. The success of these and future acquisitions depends in part on our ability to integrate acquired companies into our business operations. Integration of any acquired companies will place significant demands on our management, systems, internal controls and financial and physical resources. This could require us to incur significant expense for, among other things, hiring additional qualified personnel, retaining professionals to assist in developing the appropriate control systems and expanding our information technology infrastructure. The nature of our business is such that qualified management personnel can be difficult to find. Our inability to manage growth effectively could have a material adverse effect on our financial results.

There can be no assurance that the companies acquired will generate income at the historical or projected levels on which we based our acquisition decisions, that we will be able to maintain or renew the acquired companies' contracts, that we will be able to realize operating and economic efficiencies upon integration of acquired companies or that the acquisitions will not adversely affect our results of operations or financial condition.

We continually review opportunities to acquire other businesses that would complement our current services, expand our markets or otherwise offer prospects for growth. In connection with our acquisition strategy, we could issue stock that would dilute existing stockholders' percentage ownership, or we could incur or assume substantial debt or contingent liabilities. Acquisitions involve numerous risks, including, but not limited to, the following:

- challenges and unanticipated costs assimilating the acquired operations;
- known and unknown legal or financial liabilities associated with an acquisition;
- diversion of management's attention from our core businesses;
- adverse effects on existing business relationships with customers;
- entering markets in which we have limited or no experience;
- potential loss of key employees of purchased organizations;
- incurrence of excessive leverage in financing an acquisition;
- failure to maintain and renew contracts and other revenue streams of the acquired business;
- costs associated with litigation or other claims arising in connection with the acquired company;
- unanticipated operating, accounting or management difficulties in connection with an acquisition; and
- dilution to our earnings per share.

We cannot assure you that we will be successful in overcoming problems encountered in connection with any acquisition and our inability to do so could disrupt our operations and adversely affect our business. Our failure to address these risks or other problems encountered in connection with past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities and harm our business generally.

Our investments in joint ventures and unconsolidated entities could be adversely affected by our lack of sole decision-making authority, our reliance on our joint venture partners' financial condition, any disputes that may arise between us and our joint venture partners and our exposure to potential losses from the actions of our joint venture partners.

In October 2016, we completed the Matrix Transaction, pursuant to which we retained a 46.8% equity interest in Matrix, but sold our controlling interest in Matrix, which constituted our former HA Services segment. As a result of the Matrix Transaction we no longer have unilateral power to direct the activities that most significantly impact Matrix's economic performance. In November 2014, we entered into a joint venture agreement to form Mission Providence, whereby we have a 60% ownership in Mission Providence and rights to 75% of Mission Providence's distributions of cash or profit surplus twice per calendar year, but do not have unilateral power to direct the activities that most significantly impact Mission Providence's economic performance. Our future growth may depend, in part, on future similar arrangements, any of which could be material to our financial condition and results of operations. These arrangements involve risks not present with respect to our wholly-owned subsidiaries, which may negatively impact our financial condition and results of operations or make the arrangements less successful than anticipated, including the following:

- we may be unable to take actions that we believe are appropriate but that are opposed by our joint venture partners under arrangements that require us to cede or share decision-making authority over major decisions affecting the ownership or operation of the joint venture and any property owned by the joint venture, such as the sale or financing of the business or the making of additional capital contributions for the benefit of the business;
- our joint venture partners may take actions that we oppose;
- we may be unable to sell or transfer our interest in a joint venture to a third party if we fail to obtain the prior consent of our joint venture partners;

- our joint venture partners may become bankrupt or fail to fund their share of required capital contributions, which could adversely impact the joint venture or increase our financial commitment to the joint venture;
- our joint venture partners may have business interests or goals with respect to a business that conflict with our business interests and goals, including with respect to the timing, terms and strategies for investment, which could increase the likelihood of disputes regarding the ownership, management or disposition of the business;
- disagreements with our joint venture partners could result in litigation or arbitration that increases our expenses, distracts our officers and directors, and disrupts the day-to-day operations of the business, including the delay of important decisions until the dispute is resolved; and
- we may suffer losses as a result of actions taken by our joint venture partners with respect to our joint venture investments.

We derive a significant amount of our revenues from a few payers, which puts our financial condition and results of operations at risk. Any changes in the funding, financial viability or our relationships with these payers could have a material adverse impact on our financial condition and results of operations.

We generate a significant amount of the revenues in our segments from a few payers under a small number of contracts. For example, for the years ended December 31, 2016, 2015 and 2014, we generated 47.9%, 54.6% and 58.1%, respectively, of our consolidated revenue from ten payers. Additionally, five payers related to NET Services represented, in the aggregate, 35.6%, 39.2% and 43.2%, respectively, of NET Services revenue for the years ended December 31, 2016, 2015 and 2014. A single payer related to WD Services represented 28.9%, 40.0% and 57.2% of our WD Services revenue for the years ended December 31, 2016 and 2015, and the period from May 31, 2014 to December 31, 2014, respectively. Additionally, a single payer related to Matrix represented 27.8%, 31.1% and 43.2% of Matrix revenue for the years ended December 31, 2016 and 2015, and the period from October 24, 2014 to December 31, 2014, respectively. The loss of, reduction in amounts generated by, or changes in methods or regulations governing payments for our services under these contracts could have a material adverse impact on our revenue and results of operations. In addition, any consolidation of any of our private payers could increase the impact that any such risks would have on our revenue and results of operations.

If we fail to satisfy our contractual obligations, we could be liable for damages and financial penalties, which may place existing pledged performance and payment bonds at risk as well as harm our ability to keep our existing contracts or obtain new contracts and future bonds.

Our failure to comply with our contractual obligations could, in addition to providing grounds for immediate termination of the contract for cause, negatively impact our financial performance and damage our reputation, which, in turn, could have a material adverse effect on our ability to maintain current contracts or obtain new ones. Our failure to meet contractual obligations could also result in substantial actual and consequential financial damages. The termination of a contract for cause could, for instance, subject us to liabilities for excess costs incurred by a payer in obtaining similar services from another source. In addition, our contracts require us to indemnify payers for our failure to meet standards of care, and some of them contain liquidated damages provisions and financial penalties that we must pay if we breach these contracts.

If we fail to estimate accurately the cost of performing certain contracts, we may experience reduced or negative margins.

During 2016, 2015 and 2014, 78.3%, 83.6% and 84.1% of our NET Services revenue, respectively, was generated under capitated contracts with the remainder generated through FFS and flat fee contracts. WD Services also provides services under FFS and flat fee contracts. Under most of NET Services' capitated contracts, we assume the responsibility of managing the needs of a specific geographic population by contracting out transportation services to local transportation companies on a per ride or per mile basis. We use "pricing models" to determine applicable contract rates, which takes into account factors such as estimated utilization, state specific data, previous experience in the state or with similar services, the medically covered programs outlined in the contract, identified populations to be serviced, estimated volume, estimated transportation provider rates and availability of mass transit. The amount of the fixed per-member, monthly fee is determined in the bidding process, but is predicated on actual historical transportation data for the subject geographic region as provided by the payer, actuarial work performed in-house as well as by third party actuarial firms and actuarial analyses provided by the payer. If the utilization of our services is more than we estimated, the contract may be less profitable than anticipated, or may not be profitable at all. Under our FFS contracts, we receive fees based on our interactions with government-sponsored clients. To earn a profit on these contracts, we must accurately estimate costs incurred in providing services. Our risk relating to these contracts is that our client population is not large enough to cover our fixed costs, such as rent and overhead. Our FFS contracts are not reimbursed on a cost basis and therefore, if we fail to estimate our costs accurately, we may experience reduced margins or losses on these contracts. Revenue under certain contracts may be adjusted prospectively if client volumes are below expectations. If the Company is unable to adjust its costs accordingly, our profitability may be negatively impacted. In addition, certain contracts with state Medicaid agencies are renewable at the state's option without an adjustment to pricing terms. If such renewed contracts require us to incur higher costs, including inflation or regulatory changes, than originally anticipated, our results of operations and financial condition may be adversely affected.

In WD Services, we often provide services to a client based on a unit price for delivery of a service or achievement of a defined outcome. If we fail to estimate costs accurately, we may have minimal ability to change the unit price to ensure profitability. While we may be able to alter our cost structure to reflect lower than anticipated volumes and other changes in service need, there are certain fixed costs which are difficult to alter while still ensuring we can meet our contractual obligations. Further, many contracts require us to undertake significant onboarding projects, including making redundancies and changes to properties and IT. If we fail to anticipate the cost of these change programs, we may be unable to recover startup costs throughout the life of the contract.

We may incur costs before receiving related revenues, which could impact our liquidity.

When we are awarded a contract to provide services, we may incur expenses before we receive any contract payments. These expenses include leasing office space, purchasing office equipment, instituting information technology systems, development of supply chains, hiring personnel and releasing certain personnel. As a result, in certain contracts where the government does not fund program start-up costs, we may be required to make significant investments before receiving any related contract payments or payments sufficient to cover start-up costs. For example, WD Services incurred start-up costs in 2016 related to the offender rehabilitation program in the UK, start-up costs in France, and in certain employability contracts in Australia. In addition, payments due to us from payers may be delayed due to billing cycles or as a result of failures to approve government budgets in a timely manner. Moreover, any resulting mismatch in expenses and revenue, especially under FFS arrangements, could be exacerbated if we fail either to invoice the payer correctly or to collect our fee in a timely manner. Such amounts may exceed our available cash, and any resulting liquidity shortages may require additional financing, which may not be available on satisfactory terms, or at all. This could have a material adverse impact on our ongoing operations and our financial position.

Our business is subject to risks of litigation.

The services we provide are subject to lawsuits and claims. A substantial award payable by the Company could have a material adverse impact on our operations and cash flows, and could adversely impact our ability to continue to purchase appropriate liability insurance. We can be subject to claims for negligence or intentional misconduct (in addition to professional liability type claims) by an employee or a third party we engage to assist with the provision of services, including but not limited to claims arising out of accidents involving vehicle collisions, workforce development placements or CHAs and various claims that could result from employees or contracted third parties driving to or from interactions with clients or while providing direct client services. We can be subject to employee-related claims such as wrongful discharge, discrimination or a violation of equal employment laws and permitting issues. While we attempt to insure against for these types of claims, damages exceeding our insurance limits or outside our insurance coverage, such as a claim for fraud, certain wage and hour violations or punitive damages, could adversely affect our cash flow and financial condition.

We depend on our key personnel. We face substantial competition in attracting and retaining experienced professionals, and we may be unable to sustain or grow our business if we cannot attract and retain qualified employees.

Our success depends to a significant degree on our ability to identify, attract, develop, motivate and retain highly qualified and experienced professionals who possess the skills and experience necessary to deliver high-quality services to our clients, with the continued contributions of our senior management being especially critical to our success. Our objective of providing the highest quality of service to our clients is a significant consideration when we evaluate the education, experience and qualifications of potential candidates for employment as direct care and administrative staff. To that end, we attempt to hire professionals and others with requisite educational backgrounds and professional certifications. These employees are in great demand and are likely to remain a limited resource for the foreseeable future.

Our ability to attract and retain employees with the requisite experience and skills depends on several factors including, but not limited to, our ability to offer competitive wages, benefits and professional growth opportunities. While we have established programs to attract new employees and provide incentives to retain existing employees, particularly our senior management, we cannot assure you that we will be able to attract new employees or retain the services of our senior management or any other key employees in the future. Some of the companies with which we compete for experienced personnel have greater financial, technical, political and marketing resources, name recognition and a larger number of clients and payers than we do, which may prove more attractive to employment candidates. The inability to attract and retain experienced personnel could have a material adverse effect on our business.

The performance of each of our business segments also depends on the talents and efforts of our highly skilled information technology professionals. For example, technological improvement is a key component of the strategic initiative at NET Services to enhance member satisfaction and drive greater operational efficiencies and as NET Services expands our transportation network capacity beyond its traditional transportation provider network, increases on-time and on-demand performance, provides real time analytics and minimizes cancellations. Competition for skilled intellectual technology professionals can be intense. Our success depends on our ability to recruit, retain and motivate these individuals.

Effective succession planning is also important to our future success. If we fail to ensure the effective transfer of senior management knowledge and smooth transitions involving senior management across our various businesses, including NET Services, whose chief executive officer stepped down in January 2017, our ability to execute short and long-term strategic, financial and operating goals, as well as our business, financial condition and results of operations generally, could be adversely affected.

We may have difficulty successfully completing divestitures.

As demonstrated in 2016 with the Matrix Transaction and in 2015 with the Human Services Sale, we may dispose of all or a portion of current or future investments, based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations. Divestitures could result in difficulties in the separation of operations, services, products and personnel, the diversion of management's attention, the disruption of our business and the potential loss of key employees and customers. A disposition may be subject to the satisfaction of pre-closing conditions as well as to obtaining necessary regulatory and government approvals, which, if not satisfied or obtained, may prevent us from completing the disposition, whether or not the disposition has been publicly announced. Divestitures may also involve continued financial involvement in the divested assets and businesses, such as indemnities or other financial obligations, in which the performance of the divested assets or businesses could impact our results of operations. Further, such divestitures may result in proceeds to us in an amount less than we expect or less than our assessment of the value of those assets. Any sale of our assets could result in a loss on divestiture. Any of the foregoing could adversely affect our financial condition and results of operations.

The indemnification provisions of acquisition and disposition agreements by which we have acquired or sold companies may result in liabilities.

We rely heavily on the representations and warranties and related indemnities provided to us by the sellers of acquired companies, including as they relate to creation, ownership and rights in intellectual property and compliance with laws and contractual requirements. However, the liability of the former owners is limited under the relevant acquisition agreements, and certain sellers may be unable to meet their indemnification responsibilities. Similarly, the purchasers of our divested operations may from time to time agree to indemnify us for operations of such businesses after the closing. We cannot be assured that any of these indemnification provisions will fully protect us, and as a result we may face unexpected liabilities that adversely affect our consolidated results of operations, financial condition and cash flows.

In addition, we have provided certain indemnifications in connection with the Human Services Sale in 2015 and the Matrix Transaction in 2016. To the extent we choose to divest other operations of our businesses in the future, we expect to provide certain indemnifications in connection with these divestitures. We may face liabilities in connection with these current or future indemnification obligations that may adversely affect our consolidated results of operation, financial condition and cash flows. The Company has received indications from the purchaser of its former Human Services segment regarding certain potential indemnification claims. As of December 31, 2016, the Company had established an accrual of $6 million with respect to an estimate of loss for such potential indemnification claims. Such purchaser has also threatened to assert other claims against the Company related to the acquisition, which the Company intends to vigorously defend itself against. Litigation is inherently uncertain, and the losses incurred in the event that the legal proceedings related to such claims were to result in unfavorable outcomes could have a material adverse effect on the Company's business and financial performance. For more information on these potential indemnification obligations, see Note 19, *Commitments and Contingencies*, to our consolidated financial statements.

Our success depends on our ability to compete effectively in the marketplace.

We compete for clients and for contracts with a variety of organizations that offer similar services. Many organizations of varying sizes compete with us, including local not-for-profit organizations and community-based organizations, larger companies, organizations that currently provide or may begin to provide similar NET management services, and large multi-national corporations that currently provide or may begin to provide workforce development services and CHA providers. Some of these companies have greater financial, technical, political, marketing, name recognition and other resources and a larger number of clients or payers than we do. In addition, some of these companies offer more services than we do. We have experienced, and expect to continue to experience, competition from new entrants into the markets in which we operate. Increased competition may result in pricing pressures, loss of or failure to gain market share or loss of or failure to gain clients or payers, any of which could have a material adverse effect on our operating results.

We may be adversely impacted by inadequacies in, or security breaches of, our information technology systems.

Our information technology systems are critically important to our operations. We provide services to individuals, including services that require us to maintain sensitive and personal client information, including information relating to their health, social security numbers and other identifying data. Therefore, our information technology systems store client information protected by numerous federal, state and foreign regulations. We also rely on our information technology systems (some of which are outsourced to third parties) to manage the data, communications and business processes for all other functions, including our marketing, sales, logistics, customer service, accounting and administrative functions. Further, our systems include interfaces to third-party stakeholders, often connected via the Internet. In addition, certain of our services or information related to our services are carried out or hosted within our customers' IT systems, and any failure or weaknesses in their IT systems may negatively impact our ability to deliver the services, for which we may not receive relief from contractual performance obligations or compensation for services provided. As a result of the data we maintain and third-party access, we are subject to increasing cybersecurity risks. The nature of our business, where services are often performed outside a secured location, adds additional risk.

If we do not allocate and effectively manage the resources necessary to build, sustain and protect an appropriate technology infrastructure, our business or financial results could be negatively impacted. Furthermore, computer hackers and data thieves are increasingly sophisticated and operate large scale and complex automated attacks and our information technology systems may be vulnerable to material security breaches (including the access to or acquisition of customer, employee or other confidential data), cyber-based attacks or other material system failures. Any breach of our data security could result in an unauthorized release or transfer of customer or employee information, or the loss of valuable business data or cause a disruption in our business. These events could give rise to unwanted media attention, damage our reputation, damage our customer relationships and result in lost sales, fines or lawsuits. We may also be required to expend significant capital and other resources to protect against or respond to or alleviate problems caused by a security breach. If we are unable to prevent material failures, our operations may be impacted, and we may suffer other negative consequences such as reputational damage, litigation, remediation costs, a requirement not to operate our business until defects are remedied or penalties under various data privacy laws and regulations.

There are risks associated with our international operations that are different from the risks associated with our operations in the U.S., and our exposure to the risks of a global market could hinder our ability to maintain and expand international operations.

We have operation centers in Australia, Canada, France, Germany, Saudi Arabia, South Korea, Spain, Switzerland, the UK and the U.S. We also expect to launch operations in Singapore in 2017. In implementing our international strategy, we may face barriers to entry and competition from local companies and other companies that already have established global businesses, as well as the risks generally associated with conducting business internationally. The success and profitability of international operations are subject to numerous risks and uncertainties, many of which are outside of our control, such as:

- political or economic instability;
- changes in governmental regulation or taxation;
- currency exchange fluctuations;
- difficulties and costs of staffing and managing operations in certain foreign countries;
- work stoppages or other changes in labor conditions; and
- taxes and other restrictions on repatriating foreign profits back to the U.S.

In addition, changes in policies or laws of the U.S. or foreign governments resulting in, among other changes, higher taxation, tariffs or similar protectionist laws could reduce the anticipated benefits of international operations and could have a material adverse effect on our results of operations and financial condition. We have currency exposure arising from both sales and purchases denominated in foreign currencies, including intercompany transactions outside the U.S., and we currently do not conduct hedging activities. The value of the U.S. dollar against other foreign currencies has seen significant volatility recently. Our financial condition and results of operations are reported in multiple currencies, and are then translated into U.S. dollars at the applicable exchange rate for inclusion in our consolidated financial statements. Appreciation of the U.S. dollar against these other currencies will have a negative impact on our reported net revenue and operating income while depreciation of the U.S. dollar against such currencies will have a positive effect on reported net revenue and operating income. We cannot predict with precision the effect of future exchange-rate fluctuations on our business and operating results, and significant rate fluctuations could have a material adverse effect on our results of operations and financial condition.

We operate and are in a taxable income position in multiple tax jurisdictions, and face the risk of double taxation if one jurisdiction does not acquiesce to the tax claims of another jurisdiction.

We currently operate in the U.S. and 9 foreign countries and are subject to income taxation in those countries and the specific states or provinces where we operate. In the event one taxing jurisdiction disagrees with another taxing jurisdiction with respect to the amount or applicability of a particular type of tax, or the amount or availability of a particular type of tax refund or credit, we could experience temporary or permanent double taxation and increased professional fees to resolve such taxation matters.

Our results of operations will continue to fluctuate due to seasonality.

Our quarterly operating results and operating cash flows normally fluctuate as a result of seasonal variations in our business. NET Services experiences fluctuations in demand for its non-emergency transportation services during the summer and winter seasons. Due to higher demand in the summer months and lower demand in the winter months, coupled with a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter season. WD Services is impacted by both the timing of commencement and expiration of major contracts. WD Services and Matrix Investment typically do not experience seasonal fluctuations in operating results. However, quarterly volatility in revenue and earnings is common in the case of WD Services due to the timing of commencement and expiration of certain major contracts as well as fluctuations in referrals provided by its customers. In addition, Matrix Investment experiences quarterly volatility in earnings due to uneven demand for services.

Our reported financial results could suffer if there is an impairment of goodwill or other intangible assets.

Goodwill may be impaired if the estimated fair value of one or more of our reporting units is less than the carrying value of the respective reporting unit. As a result of our growth, in part through acquisitions, goodwill and other intangible assets represent a significant portion of our assets. We perform an analysis on our goodwill balances to test for impairment on an annual basis. Interim impairment tests may also be required in advance of our annual impairment test if events occur or circumstances change that would more likely than not reduce the fair value, including goodwill, of one or more of our reporting units below the reporting unit's carrying value. Such circumstances could include but are not limited to: (1) loss of significant contracts, (2) a significant adverse change in legal factors, government regulations or in the climate of our business, (3) unanticipated competition, (4) an adverse action or assessment by a regulator or (5) a significant decline in our stock price. In the fourth quarter of 2016, we recorded an asset impairment charge of $19.6 million related to WD Services as discussed below in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates". Any impairment charges could have a material adverse impact on our results of operations and financial position.

Our use of a reinsurance program to cover certain claims for losses suffered and costs or expenses incurred could negatively impact our business.

We reinsure a substantial portion of our automobile, general liability, professional liability and workers' compensation insurance. We also reinsured the general liability, professional liability, workers' compensation insurance, automobile liability and automobile physical damage of various members of the network of subcontracted transportation providers and independent third parties over various policy years under reinsurance programs through our two wholly-owned captive insurance subsidiaries. However, effective February 15, 2011, we did not renew our reinsurance agreement and do not assume liabilities for policies that cover the general liability, automobile liability, and automobile physical damage coverage of our independent third-party transportation providers after that date. We will continue to administer existing policies for the foreseeable future and resolve remaining and future claims related to these policies. In the event that actual reinsured losses increase unexpectedly and substantially exceed actuarially determined estimated reinsured losses under the program, the aggregate of such losses could materially increase our liability and adversely affect our financial condition, liquidity, cash flows and results of operations. In addition, as the availability to us of certain traditional insurance coverage diminishes or increases in cost, we will continue to evaluate the levels and types of insurance we include in our reinsurance and self-insurance programs. Any increase to these programs increases our risk exposure and therefore increases the risk of a possible material adverse effect on our financial condition, liquidity, cash flows and results of operations.

Inaccurate, misleading or negative media coverage could damage our reputation and harm our ability to maintain or procure contracts.

There is sometimes media coverage regarding services that we or our competitors provide or contracts that we or our competitors are a party to. Inaccurate, misleading or negative media coverage about us could harm our reputation and, accordingly, our ability to maintain our existing contracts or procure new contracts. In addition, negative media coverage could influence government officials to slow the pace of privatizing or retendering government services.

Regulatory Risks

Our segments conduct business in a heavily regulated healthcare industry. Compliance with existing Laws is costly, and changes in Laws or violations of Laws may result in increased costs or sanctions that could reduce our segments' revenue and profitability.

The healthcare industry is subject to extensive federal and state Laws relating to, among other things:

- professional licensure;
- conduct of operations;
- addition of facilities, equipment and services, including certificates of need;
- coding and billing related to our services; and
- payment for services.

Both federal and state government agencies have increased coordinated civil and criminal enforcement efforts related to the healthcare industry. Regulations related to the healthcare industry are extremely complex and, in many instances, the industry does not have the benefit of significant regulatory or judicial interpretation of those laws. The Patient Protection and Affordable Care Act, as well as the anticipated attempts to repeal all or portions of those laws by the President and Congress, has also introduced some degree of regulatory uncertainty as the industry does not know how the changes it introduced or changes to it will affect many aspects of the industry. Medicare and Medicaid anti-fraud and abuse laws prohibit certain business practices and relationships related to items and services reimbursable under Medicare, Medicaid and other governmental healthcare programs, including the payment or receipt of remuneration to induce or arrange for referral of patients or recommendation for the provision of items or services covered by Medicare or Medicaid or any other federal or state healthcare program. Federal and state laws prohibit the submission of false or fraudulent claims, including claims to obtain reimbursement under Medicare and Medicaid. Our segments have implemented compliance policies to help assure their compliance with these regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require our segments to make changes in their facilities, equipment, personnel, services or the manner in which they conduct our business.

Changes in budgetary priorities of the government entities that fund the services our segments provide could result in our segments' loss of contracts or a decrease in amounts payable to them under their contracts.

Our segments' revenue is largely derived from contracts that are directly or indirectly paid or funded by government agencies. All of these contracts are subject to legislative appropriations and state or national budget approval. The availability of funding under our segments' contracts with state governments is dependent in part upon federal funding to states. Changes in Medicaid methodology may further reduce the availability of federal funds to states in which we provide services. Congress is considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs to a fixed amount per beneficiary. CMS has the ability to grant waivers to states relative to the parameters of their Medicaid programs. Such changes, individually or in the aggregate could have a material adverse effect on our segment operations.

Among the alternative Medicaid funding approaches that states have explored are provider assessments as tools for leveraging increased Medicaid federal matching funds. Provider assessment plans generate additional federal matching funds to the states for Medicaid reimbursement purposes, and implementation of a provider assessment plan requires approval by the Centers for Medicare and Medicaid Services in order to qualify for federal matching funds. These plans usually take the form of a bed tax or a quality assessment fee, which were historically required to be imposed uniformly across classes of providers within the state, except that such taxes only applied to Medicaid health plans.

Changes to provider assessment opportunities, the Medicaid programs in states in which our segments operate or in the structure of the federal government's support for those programs can impact the amount of funds available in the programs our segments support. Our segments cannot make any assurances that these Medicaid changes will not negatively affect the funding under their contracts. As funding under our segments' contracts is dependent in part upon federal funding, such funding changes could have a significant effect upon our segments' businesses.

Currently, many of the U.S. states and overseas countries in which our segment operate are facing budgetary shortfalls or changes in budgetary priorities. While many of these states are dealing with budgetary concerns by shifting costs from institutional care to home and community based care such as we provide, there is no assurance that this trend will continue.

Likewise, in many of the overseas countries addressed by WD Services, particularly England, a continued focus following the global financial crisis on austerity measures to reduce national and local budget deficits could lead to further spending cuts or changes to welfare arrangements. This may make availability of funding for outsourcing of such services more difficult to obtain from relevant government departments, which may lead to more challenging terms and conditions including pressure on prices or volumes of services provided.

In the UK, the low unemployment rate has led to a change in the government prioritizing employability services, and a consequent reduction in scale of the Work & Health Programme, the successor program to the Work Programme. While we have the ability to alter a portion of our cost structure to reflect the decreasing volume of these contracts during their term, there may be significant redundancy costs and management time additionally invested to reflect these changes, particularly if programs are discontinued.

Consequently, a significant decline in government expenditures, shift of expenditures or funding away from programs that call for the types of services that we provide, or change in government contracting or funding policies could cause payers to terminate their contracts with our segments or reduce their expenditures under those contracts, either of which could have a negative impact on our segments' operating results.

In WD Services, we conduct business in several countries, each with its own system of regulation. Compliance with existing regulations is costly, and changes in regulations or violations of regulations may result in increased costs or sanctions that could reduce our revenue and profitability.

As of December 31, 2016, our WD Services segment operated in 9 countries outside the U.S. Each of these countries has its own national and municipal laws and regulations, and some countries such as Australia, Germany and Switzerland, have both federal and state regulations. In the UK, certain law making powers are being devolved to Scotland, Wales and Northern Ireland. These laws can differ significantly from country to country. In addition, in Europe, countries (including the UK) are subject to European Union ("EU") laws and rules. We have implemented compliance policies to help assure our compliance with these laws and regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services or the manner in which we conduct our business.

Our business could be adversely affected by the referendum on the UK's exit from in the European Union.

On June 23, 2016, the UK held a referendum in which eligible persons voted in favor of a proposal that the UK leave the EU, also known as "Brexit". The result of the referendum increases political and economic uncertainty in the UK for the foreseeable future, in particular during any period where the terms of any UK exit from the EU are negotiated. In turn, Brexit could cause disruptions to and create uncertainty surrounding our business, including affecting our relationships with our existing and future payers and employees, which could have an adverse effect on our financial results, operations and prospects. The impact of Brexit on our business is not yet clear, and will depend on any agreements the UK makes to retain access to EU markets. Such agreements could potentially disrupt the markets we serve and the tax jurisdictions in which we operate and adversely change tax benefits or liabilities in these or other jurisdictions. The terms of any UK exit from the EU could generate restriction on the movement of capital and the mobility of personnel. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the UK determines which EU laws to replace or replicate.

Following the referendum, there was significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business. The strengthening of the U.S. dollar relative to the British pound and other currencies may adversely affect our results of operations as we translate sales and other results denominated in foreign currency into U.S. dollars for our financial statements. During periods of a strengthening dollar, our reported international sales and earnings could be reduced because foreign currencies may translate into fewer U.S. dollars.

Brexit may also create global economic uncertainty, which may cause our payers to closely monitor their costs and reduce their spending budget on our services. Additionally, changes in governmental personnel may impact our current relationships with our payers. Any of these effects of Brexit, among others, could materially adversely affect our business, business opportunities, results of operations, financial condition and cash flows.

Changes to the regulatory landscape applicable to Matrix could have a material adverse effect on our results of operations and financial condition.

The CHA services industry is primarily regulated by federal and state healthcare Laws and the requirements of participation and reimbursement of the MA Program established by CMS. From time to time, CMS considers changes to regulatory guidelines with respect to prospective CHAs or the risk adjusted payment system applicable to Matrix's Medicare Advantage plan customers. CMS could adopt new requirements or guidelines that may, for example, increase the costs associated with CHAs, limit the opportunities and settings available to administer CHAs, or otherwise change the risk adjusted payment system in a way that would adversely impact our business. Further, changes in or adoption of new state laws governing the scope of practice of mid-level practitioners, or more restrictive interpretations of such laws, may restrict Matrix's ability to provide services using nurse practitioners. Any such implementation of additional regulations on the CHA industry by CMS or other regulatory bodies or further regulation of mid-level practitioners could have a material adverse impact on Matrix's revenues and margins, which could have a material adverse impact on our consolidated results of operations.

Our segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results.

If our segments fail to comply with federal and state documentation, coding and billing rules, our segments could be subject to criminal or civil penalties, loss of licenses and exclusion from the Medicare and Medicaid programs, which could have a material adverse impact on our segments' operating results. In billing for our segments' services to third-party payers, our segments must follow complex documentation, coding and billing rules. These rules are based on federal and state laws, rules and regulations, various government pronouncements, and industry practice. Failure to follow these rules could result in potential criminal or civil liability under the federal False Claims Act, under which extensive financial penalties can be imposed or under various state statutes which prohibit the submission of false claims for services covered. Compliance failure could further result in criminal liability under various federal and state criminal or civil statutes. Our segments may be subject to audits conducted by our clients or their proxies that may result in recoupment of funds. In addition, our segments' clients may be subject to certain audits that may result in recoupment of funds from our clients that may, in turn, implicate our segments' services. For example, Matrix's MA plan clients are subject to Risk Adjustment Data Validation audits, which are aimed at validating the accuracy of the materials supporting the HCC (Hierarchical Condition Category) codes submitted by MA plans for payment. Our segments' businesses could be adversely affected in the event such an audit results in negative findings and recoupment from or penalties to their customers.

In WD Services, particularly in Europe, our contracts are subject to stringent claims and invoice processing regimes which vary depending on the customer and nature of the payment mechanism. Under European procurement legislation which has been implemented in each EU member state, any conviction for fraud can result in a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. This could significantly affect our business given that most of our customers in Europe are governmental organizations. Any such breaches or deficiencies in paperwork associated with billing may also be subject to contractual clawback regimes and penalties, which can be enforced many years after the revenue has been paid by the relevant authority.

While our segments carefully and regularly review their documentation, coding and billing practices, the rules are frequently vague and confusing and they cannot assure that governmental investigators, private insurers or private whistleblowers will not challenge their practices. Such a challenge could result in a material adverse effect on our segments' financial position and results of operations.

If our segments fail to comply with the federal Anti-Kickback Statute, they could be subject to criminal and civil penalties, loss of licenses and exclusion from the Medicaid and Medicare programs, all of which could have a material adverse impact on our segments' operating results.

The federal Anti-Kickback Statute prohibits the offer, payment, solicitation or receipt of any form of remuneration in return for referring, ordering, leasing, purchasing or arranging for or recommending the ordering, purchasing or leasing of items or services payable by a federally funded healthcare program. Any of our segments' financial relationships with healthcare providers will be potentially implicated by this statute to the extent Medicare or Medicaid referrals are implicated. Violations of the Anti-kickback Statute could result in substantial civil or criminal penalties, including criminal fines of up to $25,000 per violation, imprisonment of up to five years, civil penalties under the Civil Monetary Penalties Law of up to $50,000 per violation, plus three times the remuneration involved, civil penalties under the False Claims Act of up to $11,000 for each claim submitted, plus three times the amounts paid for such claims and exclusion from participation in the Medicaid and Medicare programs. Any such penalties could have a significant negative effect on our segments' operations. Furthermore, the exclusion, if applied to our segments, could result in significant reductions in our segments' revenues, which could materially and adversely affect our segments' businesses, financial condition and results of their operations. In addition, many states have adopted laws similar to the federal Anti-Kickback Statute with similar penalties.

If our segments fail to comply with physician self-referral laws, to the extent applicable to our operations, they could experience a significant loss of reimbursement revenue.

Our segments may be subject to federal and state statutes and regulations banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship and billing for services provided pursuant to such referrals if any occur. Violation of these federal and state laws and regulations, to the extent applicable to our segments' operations, may result in prohibition of payment for services rendered, loss of licenses, fines, criminal penalties and exclusion from Medicaid and Medicare programs. To the extent our segments do maintain such financial relationships with physicians, they rely on certain exceptions to self-referral laws that they believe will be applicable to such arrangements. Any failure to comply with such exceptions could result in the penalties discussed above.

Our WD Services segment operates internationally, which exposes the group to risks of bribery, corruption and collusive tendering practices with respect to public officials and tenders.

As an international business whose customers are largely in the public sector, the WD Services segment generally wins work through public tender processes. Various statutes, such as the UK's Bribery Act and the Foreign Corrupt Practices Act in the U.S., generally require organizations to prohibit bribery by or for the organization and demand the implementation of systems to counter bribery, including risk management, training and guidance and the maintenance of adequate record-keeping and internal accounting practices. These statutes also, among other things, prohibit us from providing anything of value to foreign officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. In addition, many countries in which we operate have antitrust or competition regulations which, among other things, prohibit collusive tendering or bid-rigging behavior. Policies and procedures we implement to prevent bribery, corruption and anti-competitive conduct may not effectively prevent us from violating these regulations in every transaction in which we may engage, and such a violation could adversely affect our reputation, business, financial condition and results of operations. Further, WD Services is subject to the European Union's and other countries' data security and protection laws and regulations, which may restrict the flow of information, including information about employees or service users, from this segment to the Company in the U.S. In certain instances, informed consent to the data transfer must be given by the affected employee or service user. Compliance with such laws and regulations may make it more difficult for the Company to maintain the records and internal accounting practices necessary to ensure the appropriate operation of our internal controls or to detect corruption or to detect corruption resulting in the need for additional controls or increasing the Company's costs to maintain appropriate controls. Any breach of bribery, corruption and collusive tendering laws could also expose our operations in Europe to a ban from participating in public procurement tenders for up to 5 years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority.

Our segments are subject to regulations relating to privacy and security of patient and service user information. Failure to comply with privacy and security regulations could result in a material adverse impact on our segments' operating results.

There are numerous federal and state regulations addressing patient information privacy and security concerns. In particular, the federal regulations issued under HIPAA contain provisions that:

- protect individual privacy by limiting the uses and disclosures of patient information;
- require the implementation of security safeguards to ensure the confidentiality, integrity and availability of individually identifiable health information in electronic form; and
- prescribe specific transaction formats and data code sets for certain electronic healthcare transactions.

Compliance with state and federal laws and regulations is costly and requires our segment management to expend substantial time and resources which could negatively impact our segments' results of operations. Further, the HIPAA regulations and state privacy laws expose our segments to increased regulatory risk, as the penalties associated with a failure to comply or with information security breaches, even if unintentional, could have a material adverse effect on our segments' results of operations.

Our WD Services segment has operations in many countries in Europe, and internationally, and these operations have access to significant amounts of sensitive personal information about individuals. In Europe, these operations are subject to European and national data privacy legislation which imposes significant obligations on data processors and controllers with respect to such personal information. Similar regimes exist in other WD Service jurisdictions such as Australia, Canada and South Korea. Some countries, such as Spain, France and Germany, have particularly strong privacy laws which impose even greater obligations on people handling personal information. There are amendments which will come into effect with respect to European data privacy legislation which will significantly increase the fines for any breaches. In addition to fining powers, information privacy regulators in Europe have significant powers to require organizations that breach regulations to put in place measures to ensure that such breaches do not occur again, and require businesses to stop processing personal information until the required measures are in place. Such orders could significantly impact our business given that we are required to handle personal information as part of our service delivery model.

As government contractors, our segments are subject to an increased risk of litigation and other legal actions and liabilities.

As government contractors, our segments are subject to an increased risk of investigation, criminal prosecution, civil fraud, whistleblower lawsuits and other legal actions and liabilities that are not as frequently experienced by companies that do not provide government sponsored services. Companies providing government sponsored services can also become involved in public inquiries which can lead to negative media speculation or potential cancellation or termination of contracts. In WD Services in Europe, European procurement regulations in force in each European Union member state require public procurement authorities to impose a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority, where companies are found guilty of fraud or certain other criminal offenses. Authorities can also exercise their discretion to blacklist companies for up to two years where they believe they have been involved in acts of gross misconduct or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. The occurrence of any of these actions, regardless of the outcome, could disrupt our operations and result in increased costs, and could limit our ability to obtain additional contracts in other jurisdictions. Further, government tenders in European Union jurisdictions and other countries can be subject to challenge where the procurer has not followed the correct processes, or where they seek to make material amendments to contracts after award. Consequently, it can be very difficult to convince government customers to amend their contracts, even where circumstances have changed significantly, because they are concerned that if challenged they may have to re-procure the entire service. This can pose significant risks in terms of cost management and profitability

Our segments' businesses could be adversely affected by future legislative changes that hinder or reverse the privatization of non-emergency transportation services or workforce development services.

The market for certain of our segments' services depends largely on government sponsored programs. These programs can be modified or amended at any time. Moreover, part of our growth strategy includes aggressively pursuing opportunities created by government initiatives to privatize the delivery of non-emergency transportation services and workforce development services. However, there are opponents to the privatization of these services and, as a result, future privatization is uncertain. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our segments' operating results.

Our segments' businesses are subject to licensing regulations and other regulatory provisions, including provisions governing surveys and audits. Changes to, or violations of, these regulations could negatively impact our segments' revenues.

In many of the locations where our segments operate, they are required by local laws (both U.S. and foreign) to obtain and maintain licenses. The applicable state and local licensing requirements govern the services our segments provide, the credentials of staff, record keeping, treatment planning, client monitoring and supervision of staff. The failure to maintain these licenses or the loss of a license could have a material adverse impact on our segments' businesses and could prevent them from providing services to clients in a given jurisdiction. Most of our segments' contracts are subject to surveys or audit by their payers or their clients. Our segments are also subject to regulations that restrict their ability to contract directly with a government agency in certain situations. Such restrictions could affect our segments' ability to contract with certain payers and clients, and could have a material adverse impact on our segments' results of operations.

Our segments' contracts are subject to audit and modification by the payers with whom our segments contract, at their sole discretion.

Our segments' businesses depend on their ability to successfully perform under various government funded contracts. Under the terms of these contracts, payers, government agencies or their proxy contractors can review our segments' compliance or performance, as well as our segments' records and general business practices at any time, and may, in their discretion:

- suspend or prevent our segments from receiving new contracts or extending existing contracts because of violations or suspected violations of procurement laws or regulations;
- terminate or modify our segments' existing contracts;
- reduce the amount our segments are paid under our existing contracts; or
- audit and object to our segments' contract related fees.

Any increase in the number or scope of audits could increase our segments' expenses, and the audit process may disrupt the day-to-day operations of our segments' businesses and distract their management. If payers have significant audit findings, or if they make material modifications to our segments' contracts, it could have a material adverse impact on our segments' results of operations.

Contract profitability may decline due to actions by governmental agencies.

WD Services' operating costs and profitability may be significantly impacted by actions required by a government agency, such as the availability of information systems maintained by the government to streamline enrollment into our service programs. In addition, certain contracts may require that we hire former government employees, in relation to offering our service programs. Lastly, revenue under certain contracts may be adjusted prospectively if client volumes are below expectations or client profiles change materially, which may also lead to cost or productivity changes. If the Company is unable to adjust its costs accordingly, profitability is negatively impacted.

Our estimated income taxes could be materially different from income taxes that we ultimately pay.

We are subject to income taxation in both the U.S. and numerous jurisdictions abroad. Significant judgment and estimation is required in determining our provision for income taxes and related matters. In the ordinary course of our business, there are many transactions and calculations for which the ultimate tax determinations are uncertain or otherwise subject to interpretation. Our determination of our income tax liability is always subject to review by applicable tax authorities, and we have been audited by various jurisdictions in prior years. Although we believe our income tax estimates and related determinations are reasonable and appropriate, relevant taxing authorities may disagree. The ultimate outcome of any such audits and reviews could be materially different from the estimates and determinations reflected in our historical income tax provisions and accruals. Any adverse outcome of any such audit or review could have an adverse effect on our financial condition and the results of our operations.

Risks Related to Our Indebtedness

Restrictive covenants in our Credit Agreement may limit our current and future operations, particularly our ability to respond to changes in our business or to pursue our business strategies.

The terms contained in the agreements that govern certain of our indebtedness, including our Amended and Restated Credit and Guaranty Agreement (as amended, supplemented, or modified, the "Credit Agreement"), and the agreements that govern any future indebtedness of ours, may include a number of restrictive covenants that impose significant operating and financial restrictions, including restrictions on our ability to take actions that we believe may be in our best interest. These agreements, among other things, limit our ability to:

- incur additional debt;
- provide guarantees in respect of obligations of other persons;
- issue redeemable stock and preferred stock;
- pay dividends or distributions or redeem or repurchase capital stock;
- make loans, investments and capital expenditures;
- enter into transactions with affiliates;
- create or incur liens;
- make distributions from our subsidiaries;
- sell assets and capital stock of our subsidiaries;
- make acquisitions; and
- consolidate or merge with or into, or sell substantially all of our assets to, another person.

A breach of the covenants or restrictions could result in a default under the applicable agreements that govern our indebtedness. Such default may preclude us from drawing from our senior secured credit facility (the "Credit Facility") or allow the creditors to accelerate the related debt and may result in the acceleration of any other debt to which a cross acceleration or cross-default provision applies. In the event our lenders accelerate the repayment of our borrowings, we cannot assure that we and our subsidiaries would have sufficient assets to repay such indebtedness.

We may incur substantial additional indebtedness in the future, which could impair our financial condition.

We may incur substantial additional indebtedness in the future to fund activities including but not limited to share repurchases, acquisitions, cash dividends and business expansion. Any existing and future indebtedness increases the risk that we may be unable to generate cash sufficient to pay amounts due in respect of such indebtedness. Future substantial indebtedness could have other important consequences on our business. For example, it could:

- make it more difficult for us to satisfy our obligations;

- make it more difficult renew or enter into new contracts with existing and potential future clients;
- limit our ability to borrow additional amounts to fund working capital, capital expenditures, debt service requirements, execution of our business strategy or acquisitions and other purposes;
- require us to dedicate a substantial portion of our cash flow from operations to pay principal and interest on our debt, which would reduce the funds available to us for other purposes;
- restrict our ability to dispose of assets and use the proceeds from any such dispositions;
- restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due;
- make us more vulnerable to adverse changes in general economic, industry and competitive conditions, as well as in government regulation and to our business;
- expose us to risks inherent in interest rate fluctuations because some of our borrowings are at variable rates of interest, which could result in higher interest expenses in the event of increases in interest rates; and
- make it more difficult to satisfy our financial obligations.

Our ability to satisfy and manage our debt obligations depends on our ability to generate cash flow and on overall financial market conditions. To some extent, this is subject to prevailing economic and competitive conditions and to certain financial, business and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow from operations to permit us to pay principal, premium, if any, or interest on our debt obligations. If we are unable to generate sufficient cash flow from operations to service our debt obligations and meet our other cash needs, we may be forced to reduce or delay capital expenditures, sell or curtail assets or operations, seek additional capital, or seek to restructure or refinance our indebtedness. If we must sell or curtail our assets or operations, it may negatively affect our ability to generate revenue.

On February 11, 2015 and March 12, 2015, we issued $65.5 million and $15.8 million, respectively, of convertible preferred stock. The terms of the convertible preferred stock require us to pay mandatory quarterly dividends, either in cash or through an increase in the stated principal value of such stock. Our ability to satisfy and manage our obligations under our outstanding preferred stock depends, in part, on our ability to generate cash flow and on overall financial market conditions and the other factors discussed above.

Risks Related to Our Common Stock

Our annual operating results and stock price may be volatile or may decline significantly regardless of our operating performance.

Our annual operating results and the market price for our Common Stock may fluctuate significantly in response to a number of factors, many of which we cannot control, including:

- changes in rates or coverage for services by payers;
- changes in Medicaid, Medicare or other U.S. federal or state rules, regulations, policies or applicable foreign regulations, policies and technical guidance, including UK health, employment and criminal justice legislation and guidance, Saudi Arabian licensing and Saudization rules, as well as other foreign laws applicable to our business;
- price and volume fluctuations in the overall stock market;
- market conditions or trends in our industry or the economy as a whole;
- increased competition in any of our segments, including through insourcing of services by our clients and new entrants to the market;
- other events or factors, including those resulting from war, incidents of terrorism, natural disasters or responses to these events; and
- changes in accounting principles.

In addition, the stock markets, and in particular the NASDAQ Global Select Market, have experienced considerable price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If we become involved in securities litigation, we could incur substantial costs, and our resources and the attention of management could be diverted from our business.

The Company is a holding company and it depends on its subsidiaries for cash to fund all of its operations and expenses, including to make future dividend payments, if any.

Our operations are conducted entirely through our subsidiaries and our ability to generate cash to fund all of our operations and expenses, to pay dividends or to meet any debt service obligations is highly dependent on the earnings and the receipt of funds from our subsidiaries via dividends or intercompany loans. We do not currently expect to declare or pay dividends on our Common Stock for the foreseeable future; however, to the extent that we determine in the future to pay dividends on our Common Stock, none of our subsidiaries will be obligated to make funds available to us for the payment of dividends. Further, the agreement governing our Credit Agreement significantly restricts the ability of our subsidiaries to pay dividends, make loans or otherwise transfer assets to us. In addition, Delaware law may impose requirements that may restrict our ability to pay dividends to holders of our Common Stock.

If securities or industry analysts do not publish research or publish misleading or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our Common Stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. If one or more analysts downgrade our stock or publish misleading or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price or trading volume to decline.

Future sales of shares by existing stockholders could cause our stock price to decline.

Sales of substantial amounts of our Common Stock in the public market, or the perception that these sales could occur, could cause the market price of our Common Stock to decline. As of March 6, 2017, we had 13,500,436 outstanding shares of Common Stock which are freely transferable without restriction or further registration under the Securities Act of 1933, as amended (the "Securities Act"), unless held by or purchased by our "affiliates" as that term is defined in Rule 144 under the Securities Act. Shares of our Common Stock held by or purchased by our affiliates are restricted securities within the meaning of Rule 144 under the Securities Act, but will be eligible for resale subject to applicable volume, means of sale, holding period and other limitations of Rule 144 under the Securities Act.

As of March 6, 2017, shares of our convertible preferred stock were convertible into 2,014,538 shares of Common Stock, all of which are subject to registration rights. In addition, as of March 6, 2017, 1,968,360 shares of Common Stock are beneficially owned by entities for which Coliseum Capital Management acts as investment adviser.

In August 2016, we filed a registration statement under the Securities Act to register the shares of Common Stock to be issued under our equity compensation plans and, as a result, all shares of Common Stock acquired upon exercise of stock options granted under our plans will also be freely tradable under the Securities Act, unless purchased by our affiliates. As of December 31, 2016, there were stock options outstanding to purchase a total of 355,598 shares of our Common Stock and there were 131,540 shares of our Common Stock subject to restricted stock awards. In addition, 2,324,927 shares of our Common Stock are reserved for future issuances.

Future offerings of debt or equity securities that would rank senior to our Common Stock, may adversely affect the market price of our Common Stock.

If, in the future, we decide to issue debt or equity securities that rank senior to our Common Stock, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our Common Stock and may result in dilution to owners of our Common Stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, holders of our Common Stock will bear the risk of our future offerings reducing the market price of our Common Stock and diluting the value of their stock holdings in us.

Fulfilling our obligations incident to being a public company, including with respect to the requirements of and related rules under the Sarbanes-Oxley Act of 2002, is expensive and time-consuming, and any delays or difficulties in satisfying these obligations could have a material adverse effect on our future results of operations and our stock price.

We are subject to the reporting and corporate governance requirements, under the listing standards of the NASDAQ Global Select Market ("NASDAQ") and the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), that apply to issuers of listed equity, which impose certain significant compliance costs and obligations upon us. The changes necessitated by being a publicly listed company require a significant commitment of additional resources and management oversight resulting in increased operating costs. These requirements also place additional demands on our finance and accounting staff and on our financial accounting and information systems. Other expenses associated with being a public company include increases in auditing, accounting and legal fees and expenses, investor relations expenses, increased directors' fees and director and officer liability insurance costs, registrar and transfer agent fees and listing fees, as well as other expenses. As a public company, we are required, among other things, to define and expand the roles and the duties of our Board of Directors ("Board") and its committees and institute more comprehensive compliance and investor relations functions.

Anti-takeover provisions in our second amended and restated certificate of incorporation and amended and restated by-laws could discourage, delay or prevent a change of control of our company and may affect the trading price of our Common Stock.

Our second amended and restated certificate of incorporation and amended and restated bylaws include a number of provisions that may be deemed to have anti-takeover effects, which include when and by whom special meetings of our stockholders may be called, and may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. Such provisions may prevent our stockholders from receiving the benefit from any premium to the market price of our Common Stock offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our Common Stock if the provisions are viewed as discouraging takeover attempts in the future. Our second amended and restated certificate of incorporation and amended and restated by-laws may also make it difficult for stockholders to replace or remove our management. These provisions may facilitate management entrenchment that may delay, deter, render more difficult or prevent a change in our control, which may not be in the best interests of our stockholders.

We do not expect to pay dividends on our Common Stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our Common Stock.

We currently do not expect to declare and pay dividends on our Common Stock for the foreseeable future. We currently intend to invest our future earnings, if any, to fund our growth, to develop our business, for working capital needs and for general corporate purposes. Therefore, you are not likely to receive any dividends on your Common Stock for the foreseeable future and the success of an investment in shares of our Common Stock will depend upon any future appreciation in their value. There is no guarantee that shares of our Common Stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

Item 1B. ***Unresolved Staff Comments.***

None.

Item 2. ***Properties.***

Our holding company principal executive offices are located in Stamford, Connecticut, and we lease additional office space in Tucson, Arizona. On December 30, 2016, we sold the building in which our Tucson office space is located to a third party. As of March 6, 2017, NET Services leases space in approximately 40 locations, WD Services leases space in approximately 250 locations, and Matrix leases space in three locations. The lease terms vary and we believe are generally at market rates. We believe that our properties are adequate for our current business needs, and believe that we can obtain adequate space, if needed, to meet our foreseeable business needs.

Item 3. ***Legal Proceedings.***

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware, (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL. The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding convertible preferred stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the preferred stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's preferred stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule 14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the preferred stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's shareholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton, Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and preferred stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of preferred stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and preferred stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding from the date of such order to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On October 10, 2016, the Court granted an extension of the stay of the proceeding from November 20, 2016 until January 20, 2017, to allow the special litigation committee additional time to complete its investigation and review, and to determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties are working to finalize and document the settlement, which will then be presented to the Court for approval.

Item 4. ***Mine Safety Disclosures***

Not applicable.

PART II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

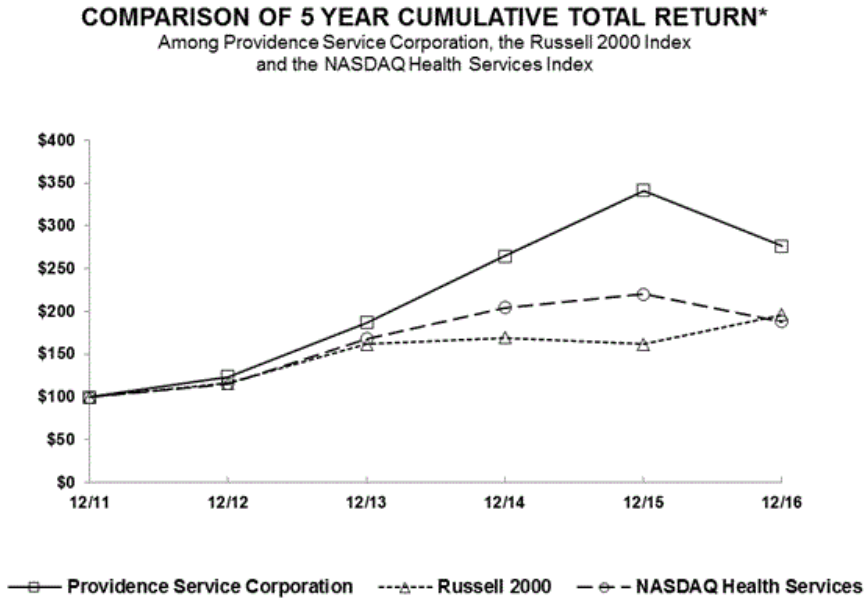
Market for our common stock

Our Common Stock, our only class of common equity, has been quoted on NASDAQ under the symbol "PRSC" since August 19, 2003. Prior to that time there was no public market for our Common Stock. As of March 6, 2017, there were 20 holders of record of our Common Stock. The following table sets forth the high and low sales prices per share of our Common Stock for the period indicated, as reported on NASDAQ Global Select Market:

	High	Low
2016		
Fourth Quarter	$ 49.97	$ 34.89
Third Quarter	$ 50.30	$ 43.01
Second Quarter	$ 53.38	$ 43.77
First Quarter	$ 55.28	$ 42.03
2015		
Fourth Quarter	$ 56.92	$ 41.80
Third Quarter	$ 53.49	$ 39.08
Second Quarter	$ 55.99	$ 40.52
First Quarter	$ 53.60	$ 36.03

Stock Performance Graph

The following graph shows a comparison of the cumulative total return for our Common Stock, NASDAQ Health Index and Russell 2000 Index assuming an investment of $100 in each on December 31, 2011.



*$100 invested on 12/31/11 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Dividends

We have not paid any cash dividends on our Common Stock and currently do not expect to pay dividends on our Common Stock. In addition, our ability to pay dividends on our Common Stock is limited by the terms of our Credit Agreement and our Preferred Stock. The payment of future cash dividends, if any, will be reviewed periodically by the Board and will depend upon, among other things, our financial condition, funds from operations, the level of our capital and development expenditures, any restrictions imposed by present or future debt or equity instruments, and changes in federal tax policies, if any.

Issuer Purchases of Equity Securities

Period	Total Number of Shares of Common Stock Purchased (1)	Average Price Paid per Share	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Program (2)	Maximum Dollar Value of Shares of Common Stock that May Yet Be Purchased Under Program (2) (in thousands)
Fourth quarter:				
October 1, 2016 to October 31, 2016	101,224	$ 47.17	101,224	$ 6,991
November 1, 2016 to November 30, 2016 (3)	1,500	$ 37.75	-	$ 100,000
December 1, 2016 to December 31, 2016 (4)	330,659	$ 37.63	328,843	$ 87,616
Total	433,383	$ 39.86	430,067	

(1) Includes (i) shares that were acquired from employees in connection with the settlement of income tax and related benefit withholding obligations arising from vesting in restricted stock awards; (ii) shares that were acquired through open market trades by the Company's Chief Executive Officer ("CEO"); (iii) the repurchase of shares under the repurchase program authorized by the Board on November 4, 2015; and (iv) the repurchase of shares under the repurchase program authorized by the Board on October 26, 2016. For more information on these repurchases, see Note 12, *Stockholders' Equity*, to our consolidated financial statements.

(2) On November 4, 2015, our Board authorized the Company to engage in a repurchase program to repurchase up to $70.0 million in aggregate value of the Company's Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $63.0 million, including commission payments.

On October 26, 2016, our Board authorized a new repurchase program, under which the Company may repurchase up to $100.0 million in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. As of December 31, 2016, a total of 328,843 shares were purchased through this plan for $12.4 million, including commission payments. For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and capital resources".

(3) Includes open market purchase by the CEO of 1,500 shares at an average price paid per share of $37.75 as disclosed in Mr. Lindstrom's Form 4 filed with the SEC on November 23, 2016.

(4) Includes open market purchase by the CEO of 1,500 shares at an average price paid per share of $36.47 as disclosed in Mr. Lindstrom's Form 4 filed with the SEC on December 2, 2016.

Equity Compensation Plan Information

The following table provides certain information as of December 31, 2016 with respect to our equity based compensation plans.

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	(b) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders (1)	355,598	$ 33.48	2,324,927
Equity compensation plans not approved by security holders	—	—	—
Total	355,598	$ 33.48	2,324,927

(1) The number of shares shown in column (b) represents the number of shares available for issuance pursuant to stock options and other stock-based awards that could be granted in the future under the 2006 Long-Term Incentive Plan, as amended.

Item 6. ***Selected Financial Data.***

We have derived the following selected financial data from the consolidated financial statements and related notes. The information set forth below is not necessarily indicative of future results. This information should be read in conjunction with our consolidated financial statements and the related notes, and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations", all of which are included elsewhere in this report.

	Year Ended December 31,				
	2016 (1)(2)(3)(4)(5)(8)	2015 (1)(3)(4)(5)(8)	2014 (1)(3)(4)(6)(7)	2013 (1)(3)(8)	2012 (1)(3)(8)
	(dollars and shares in thousands, except per share data)				
Statement of operations data:					
Service revenue, net	$ 1,578,889	$ 1,478,010	$ 1,092,880	$ 798,766	$ 777,010
Total operating expenses	1,570,272	1,476,138	1,049,893	771,590	771,365
Operating income	8,617	1,872	42,987	27,176	5,645

Convertible preferred stock	77,565	77,576	-	-	-
Total stockholders' equity	297,675	290,132	221,414	150,637	118,687

(1) On October 19, 2016, we completed the Matrix Transaction. Accordingly, the results of operations and financial condition of our HA Services segment have been presented in discontinued operations for all periods presented. Included in 2016 is a gain on the transaction, net of tax, totaling $109.4 million. Additionally, we recorded $1.8 million in equity in net loss of investee related to our equity method investment in Matrix from the period of October 19, 2016 through December 31, 2016. The investment in Matrix at December 31, 2016 of $157.2 million is included in "Equity investments" in our consolidated balance sheet. In conjunction with the completion of this transaction, we fully repaid the amounts outstanding on our term loans and Credit Facility.

(2) During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK.

(3) On November 1, 2015, we completed the sale of our Human Services segment. Accordingly, the results of operations and financial condition of our Human Services segment have been presented in discontinued operations for all periods presented. Included in 2015 is a gain on the sale of the Human Services segment, net of tax, totaling $100.3 million.

(4) The Company incurred $20.9 million of accelerated expense in 2015 related to restricted shares and cash placed into escrow at the time of the Ingeus acquisition. The shares and cash were placed into escrow concurrent with the payments of the acquisition consideration paid in 2014 for Ingeus; however, because two sellers of Ingeus remained employees post acquisition, the value of the shares and cash was recognized as compensation expense over the escrow term. Acceleration was triggered in 2015 when the two sellers separated from the Company. In addition, in 2015 and 2014, respectively, the Company incurred $5.9 million and $4.5 million of expense related to the separation of these two employees. Benefits of $2.5 million and $16.1 million associated with the reduction in the fair value of Ingeus contingent consideration are included in general and administrative expenses for 2015 and 2014, respectively. 2016 and 2015 expenses also include $8.5 million and $12.2 million, respectively, of WD Services' redundancy costs and $2.4 million in Ingeus transaction-related expenses in 2015, whereas 2014 includes $11.8 million in acquisition costs primarily related to the acquisitions of Ingeus and Matrix.

(5) Equity in net loss of investees, included in "Other expenses" in the table above, primarily relates to our investment in Mission Providence during 2015 and 2016 and Matrix for the period of October 19, 2016 through December 31, 2016. Matrix became an equity investment upon the completion of the Matrix Transaction.

(6) Two significant acquisitions were completed during 2014. We acquired Ingeus effective May 30, 2014 and we acquired Matrix effective October 23, 2014.

(7) 2014 includes $4.5 million of financing fees that were deferred and fully expensed within interest expense in the fourth quarter of 2014 in relation to bridge financing commitments and $3.0 million of third-party financing fees that are included in general and administrative expense.

(8) We incurred expense (net of benefit of forfeiture of stock-based compensation) of $0.9 million, $0.7 million, $1.3 million and $1.3 million in 2016, 2015, 2013 and 2012, respectively for severance and retirement payments related to former executive officers and key employees.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Item 6. "Selected Financial Data" and our consolidated financial statements and related notes included in Item 8. "Financial Statements and Supplementary Data" of this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and other factors that may cause actual results to differ materially from those projected in any forward-looking statements, as discussed in "Disclosure Regarding Forward-Looking Statements". These risks and uncertainties include but are not limited to those set forth in Item 1A. "Risk Factors".

Overview of Our Business

Please refer to *Item 1. "Business"* of this Form 10-K for a discussion of our services and corporate strategy. The Providence Service Corporation is a holding company which owns interests in subsidiaries and other companies that are primarily engaged in the provision of healthcare and workforce development services. The subsidiaries and other companies in which we hold interests comprise the following segments:

- NET Services – Nationwide provider of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement and legal offender rehabilitation services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in nationwide provider of in-home care optimization and management solutions, including CHAs, to members of managed care organizations, accounted for as an equity method investment.

Business Outlook and Trends

Our performance is affected by a number of trends that drive the demand for our services. In particular, the markets in which we operate are exposed to various trends such as healthcare industry and demographic dynamics in the U.S. and international government outsourcing and employment dynamics. Over the long term, we believe there are numerous factors that could affect growth within the industries in which we operate, including:

- an aging population, which will increase demand for healthcare services;
- a movement towards value-based care models, versus FFS models, and budget pressure on governments, both of which may increase the use of private corporations to provide necessary and innovative services;
- increasing demand for in-home care provision, driven by cost pressures on traditional reimbursement models and technological advances enabling remote engagement;
- technological advancements, which may be utilized by us to improve service and lower costs and by others, which may increase industry competitiveness;
- changes in UK government policy, such as decreased volumes in future welfare-to-work programs, specifically through the UK's Work and Health Programme, which will have a reduced scope and reduced funding compared with the prior programs;
- the results of the referendum on the UK's exit from the EU and related political and economic uncertainty in the UK; and
- the U.S. federal government's expressed intent to repeal the ACA and replace such law with an alternative proposal. The details of both the extent of the provisions that may be repealed as well as the details of any potential replacement legislation are uncertain at this time. Enactment of adverse legislation, regulation or agency guidance, may eliminate or reduce the demand for our business, our ability to conduct some or all of our business and/or reimbursement rates for services performed within our segments.

Historically, our segments have grown through organic expansion into new markets and service lines, organic expansion within existing markets and service lines, increases in the number of members served under contracts we have been awarded, the securing of new contracts and acquisitions. We continue to selectively identify and pursue the acquisition of attractive businesses that are complementary to our business strategies. In addition, as demonstrated in 2016 with the Matrix Transaction and in 2015 with the Human Services Sale, we also may enter into strategic partnerships or dispose of current or future investments, based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations.

Revenues and Expenses

NET Services

NET Services primarily contracts with state Medicaid agencies and managed care organizations for the coordination of their members' non-emergency transportation needs. Most contracts are capitated, which means we are paid on a per-member, per-month basis for each eligible member. For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we remit payment to the transportation providers. However, for certain contracts, we only provide management services, and do not contract with transportation providers for the actual transportation.

WD Services

WD Services primarily provides workforce development and offender rehabilitation services on a global basis that include employment preparation and placement, apprenticeship and training, youth community service programs and certain health-related services to clients on behalf of governmental and private entities. Populations served by WD Services are broad and include both recently and long-term unemployed, disabled, and individuals seeking new skills, as well as individuals that are coping with medical illnesses, are newly graduated from educational institutions, and those that have been released from incarceration. We contract primarily with national and regional government entities that seek to reduce the unemployment and recidivism rates.

The revenue earned by WD Services under its contracts is often derived through a combination of different revenue channels including, but not limited to, fees contingent upon: (1) the volume of WD end-users referred to or admitted into a specific program, (2) the achievement of defined outcomes for specific individuals, such as a job placement or continued employment, and (3) the achievement of defined outcomes for a population of individuals over a specific time period, such as aggregate employment or recidivism rates. The relative contributions of different revenue channels under a specific contract can fluctuate meaningfully over the life of a contract and thus contribute to significant earnings volatility. In particular, revenue recognition related to our NCS youth programs can be particularly volatile due to the nature of the payment cycle and services provided. WD Services also earns revenue under fixed FFS arrangements, based upon contractual rates established at the outset of the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. Volume levels are typically not guaranteed under contracts. We bill according to contractual terms, typically after proof of services have been demonstrated, although certain contracts allow for ratable billings based upon expected levels of services, and require reconciliation at the conclusion of the contract year.

As described above, when WD Services enters into new markets and service lines, it often experiences significant costs, which are expensed as incurred, whereas revenue may not be realized until a later date. As a result, WD Services experiences significant variability in its financial results and we therefore believe the results of WD Services are best viewed over a multi-year period.

Classification of Operating Expenses

Our "Service expense" line item includes the majority of the operating expenses of NET Services and WD Services as well as of our captive insurance company, with the exception of certain costs which are classified as "General and administrative expense". Service expense also excludes asset impairment charges and depreciation and amortization expenses. In the discussion below, we present the breakdown of service expense by the following major categories: purchased services, payroll and related costs, other operating expenses and stock-based compensation. Purchased services includes the amounts we pay to third-party service providers and are typically dependent upon service volume. Payroll and related costs include all personnel costs of our segments. Other operating expenses include general overhead costs, excluding facilities and related charges, of our segments. Stock-based compensation represents the stock-based compensation expense associated with stock grants to employees of our segments as well as the expense related to restricted stock placed into escrow at the time of the Ingeus acquisition.

Our "General and administrative expense" primarily includes the operating expenses of our corporate office, excluding depreciation and amortization, as well as facilities and related charges of our segments and contingent consideration adjustments, as applicable.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are important in the preparation of our consolidated financial statements because they require that we use judgment and estimates in applying those policies. We prepare our consolidated financial statements and accompanying notes in accordance with generally accepted accounting principles in the United States ("GAAP"). Preparation of the consolidated financial statements and accompanying notes requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements as well as revenue and expenses during the periods reported. We base our estimates on historical experience, where applicable, and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions.

There are certain critical estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider an accounting estimate to be critical if:

- It requires us to make an assumption because information was not available at the time or it included matters that were highly uncertain at the time the estimate is made; and
- Changes in the estimate or different estimates that could have been selected may have had a material impact on our financial condition or results of operations.

For more information on each of these policies, see Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, to our consolidated financial statements. We discuss information about the nature and rationale for our critical accounting estimates below.

Transportation Accrual

We accrue the cost of transportation expense within NET Services based on request for services and the amount we expect to be billed by transportation providers, as we generally only pay transportation providers for completed trips based upon documentation submitted after services have been provided. The transportation accrual requires significant judgment, as the accrual is based upon contractual rates and mileage estimates, as well as an estimated rate for unknown cancellations, as members may have requested transportation but not notified us of cancellation. Based upon historical experience and contract terms, we estimate the amount of expense incurred for invoices which have not yet been submitted as of period end. Actual expense could be greater or less than the amounts estimated due to changes in member or transportation provider behavior.

Business Combinations

We assign the value of the consideration transferred to acquire a business to the tangible assets and identifiable intangible assets acquired and liabilities assumed on the basis of their fair values at the date of acquisition. Any excess purchase price paid over the fair value of the net tangible and intangible assets acquired is allocated to goodwill. When determining the fair values of assets acquired and liabilities assumed, management makes significant estimates and assumptions, especially with respect to intangible assets. Critical estimates in valuing certain intangible assets include but are not limited to future expected cash flows from customer relationships and trade names, and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. As a result, actual results may differ significantly from estimates.

Recoverability of Goodwill and Definite-Lived Intangible Assets

Goodwill. In accordance with ASC 350, *Intangibles-Goodwill and Other*, we review goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. Historically, we have performed the annual goodwill impairment test for all reporting units as of December 31 of each year; however, we elected to change this date to October 1 of each year beginning in 2016 in order to better align the timing of the annual impairment testing with the Company's annual budgeting and forecasting process. We believe that this change in the goodwill impairment testing date is not a material change to the Company's method of applying an accounting principle. Our evaluation of goodwill for impairment involves a two-step process to identify goodwill impairment and measure the amount of goodwill impairment loss. First, we perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we then perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is considered to be potentially impaired and we proceed to step two of the impairment analysis, in which we determine the amount of any impairment loss by comparing the carrying value of the reporting unit's goodwill to its implied fair value. Periodically, we may choose to forgo the initial qualitative assessment and perform only the quantitative analysis in our annual evaluation.

We estimate the fair value of the Company's reporting units using either an income approach, a market valuation approach, a transaction valuation approach or a blended approach. The income approach produces an estimated fair value of a reporting unit based on the present value of the cash flows we expect the reporting unit to generate in the future. Estimates included in the discounted cash flow model include the discount rate, which we determine based on adjusting an industry-wide weighted-average cost of capital for size, geography, and company specific risk factors, long-term rates of growth and profitability of our business, working capital effects, planned capital expenditures and a terminal value. The market approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to comparable publicly traded entities in similar lines of business. The transaction valuation approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to publicly available transactional data involving both publicly traded and private entities in similar lines of business. Our significant estimates in both the market and transaction approach include the selected similar companies with comparable business factors such as size, growth, profitability, risk and return on investment and the multiples we apply to revenue and earnings before interest, taxes, depreciation and amortization ("EBITDA") to estimate the fair value of the reporting unit.

Long-Lived Assets Including Intangibles. In accordance with ASC 360, *Property, Plant, and Equipment*, we review the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, we assess the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, we estimate the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, we record an impairment loss equal to the excess of the carrying value over the estimated fair value.

The use of different estimates or assumptions in determining the fair value of our goodwill and intangible assets may result in different values for those assets, which could result in an impairment or, in the period in which an impairment is recognized, could result in a materially different impairment charge.

During the fourth quarter of 2016, the Company reviewed WD Services for impairment, as there were several negative factors impacting the segment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with their carrying amounts and recorded an asset impairment charge of $10.0 million to property and equipment and $4.4 million to definite-lived customer relationship intangible assets, which is recorded in "Asset impairment charge" on the Company's consolidated statement of operations. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an impairment charge of $5.2 million, which is included in "Asset impairment charge" on the Company's consolidated statement of operations.

Income Taxes

We record income taxes under the liability method. Deferred tax assets and liabilities reflect our estimation of the future tax consequences of temporary differences between the carrying amounts of assets and liabilities for book and tax purposes. We determine deferred income taxes based on the differences in accounting methods and timing between financial statement and income tax reporting. Accordingly, we determine the deferred tax asset or liability for each temporary difference based on the enacted tax rates expected to be in effect when we realize the underlying items of income and expense. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available to us for tax reporting purposes, as well as other relevant factors. We may establish a valuation allowance to reduce deferred tax assets to the amount we believe is more likely than not to be realized. Due to inherent complexities arising from the nature of our businesses, future changes in income tax law, tax sharing agreements or variances between our actual and anticipated operating results, we make certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

We record liabilities to address uncertain tax positions we have taken in previously filed tax returns or that we expect to take in a future tax return. The determination for required liabilities is based upon an analysis of each individual tax position, taking into consideration whether it is more likely than not that our tax position, based on technical merits, will be sustained upon examination. For those positions for which we conclude it is more likely than not it will be sustained, we recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. The difference between the amount recognized and the total tax position is recorded as a liability. The ultimate resolution of these tax positions may be greater or less than the liabilities recorded.

Reinsurance and Self-Insurance Liabilities

We reinsure a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs through our wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. In addition, we maintain a self-funded health insurance program for U.S. based employees with a stop-loss umbrella policy with a third party insurer to limit the maximum potential liability for individual claims and for a maximum potential claim liability based on member enrollment. We utilize independent actuarial reports to determine the expected losses and in order to record the appropriate entries associated with our reinsurance programs and self-funded health insurance program. We regularly analyze our reserves for incurred but not reported claims, and for reported but not paid claims related to our reinsurance and self-funded insurance programs. We believe our reserves are adequate. However, significant judgment is involved in assessing these reserves such as assessing historical paid claims, average lags between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known.

Revenue Recognition

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where we assume the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after the contract month, based on a reconciliation of actual utilization and cost compared to the prepayment made.

FFS contracts. Revenues earned under FFS contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established fees which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we remit payment to the transportation providers. However, for certain contracts, we only provide management services, and do not contract with transportation providers for the actual transportation. Under these contracts, the amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services which include employment preparation and placement, apprenticeship and training, and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, we primarily receive four types of revenue streams under contracts with government entities: referral/attachment fees, job placement and job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client is employed, and remains employed for a specified period of time. Sustainment fees are typically payable upon certain employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e. the person is placed in a job or reaches the maximum time period for the program). The estimated period of time for which services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. If the Company is unable to adjust its costs accordingly, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as “Deferred revenue” until the services are rendered.

Stock Based Compensation

Our primary form of employee stock-based compensation is stock option awards and restricted stock awards, including certain awards which vest based upon performance conditions. We measure the value of stock option awards on the date of grant at fair value using the appropriate valuation techniques, including the Black-Scholes and Monte Carlo option-pricing models. We recognize the fair value, net of estimated forfeitures, as stock-based compensation expense over the remaining term on a straight-line basis. The pricing models require various highly judgmental assumptions including volatility and expected option term. If any of the assumptions used in the models change significantly, stock-based compensation expense may differ materially in the future from that recorded in the current period.

We record stock-based compensation expense net of estimated forfeitures. In determining the estimated forfeiture rates for stock-based awards, we periodically conduct an assessment of the actual number of awards that have been forfeited to date as well as those expected to be forfeited in the future. We consider many factors when estimating expected forfeitures, including the type of award, the employee class and historical experience. The estimate of stock awards that will ultimately be forfeited requires significant judgment and to the extent that actual results or updated estimates differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period such estimates are revised.

Restructuring, Redundancy and Related Reorganization Costs

We have engaged in employee headcount optimization actions within WD Services which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. We accrue for severance and other employee separation costs under these actions when it is probable that a liability has been incurred and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans for the number of employees impacted, but the final determination of the actual employees to be terminated is subject to a customary consultation process. The estimate of costs that will ultimately be paid requires significant judgment and to the extent that actual results or updated results differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period such amounts are determined.

Results of operations

Segment reporting. Our operations are organized and reviewed by management along our segment lines. We operate in two principal business segments: NET Services and WD Services. Our investment in Matrix is also a reportable segment referred to as the "Matrix Investment".

Effective October 19, 2016, we completed the Matrix Transaction resulting in our ownership of a noncontrolling interest in our historical HA Services segment. The HA Services segment results of operations for the periods through October 19, 2016 are separately discussed in the "Discontinued operations, net of tax" section set forth below and are separately discussed in the "Equity in net loss of investees" section set forth below for the subsequent period through December 31, 2016. Additionally, effective November 1, 2015, we completed the sale of our Human Services segment. The Human Services segment results of operations are separately discussed in the "Discontinued operations, net of tax" section set forth below.

Segment results are based on how our chief operating decision maker manages our business, makes operating decisions and evaluates operating performance. The operating results of the two principal business segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by our corporate division on behalf of the segment. Indirect expenses, including unallocated corporate functions and expenses, such as executive, finance, accounting, human resources, information technology and legal, as well as the results of our captive insurance company (the "Captive") and elimination entries recorded in consolidation are reflected in "Corporate and Other".

Year ended December 31, 2016 compared to year ended December 31, 2015

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2016 and 2015 (in thousands):

	Year ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,578,889	100.0%	1,478,010	100.0%
Operating expenses:				
Service expense	1,452,754	92.0%	1,381,154	93.4%
General and administrative expense	69,911	4.4%	70,986	4.8%
Asset impairment charge	21,003	1.3%	-	0.0%
Depreciation and amortization	26,604	1.7%	23,998	1.6%
Total operating expenses	1,570,272	99.5%	1,476,138	99.9%
Operating income	8,617	0.5%	1,872	0.1%
Non-operating expense:				
Interest expense, net	1,583	0.1%	1,853	0.1%
Equity in net loss of investees	10,287	0.7%	10,970	0.7%
Gain on foreign currency transactions	(1,375)	-0.1%	(857)	-0.1%
Income (loss) from continuing operations before income taxes	(1,878)	-0.1%	(10,094)	-0.7%
Provision for income taxes	17,036	1.1%	14,583	1.0%
Income (loss) from continuing operations	(18,914)	-1.2%	(24,677)	-1.7%
Discontinued operations, net of tax	108,760	6.9%	107,871	7.3%
Net income	89,846	5.7%	83,194	5.6%
Net loss attributable to noncontrolling interest	2,082	0.1%	502	0.0%
Net income attributable to Providence	91,928	5.8%	83,696	5.7%

Service revenue, net. Consolidated service revenue, net for 2016 increased $100.9 million, or 6.8%, compared to 2015. Revenue for 2016 compared to 2015 includes an increase in revenue of NET Services of $151.3 million, which was partially offset by a decrease in revenue of WD Services of $50.7 million. Excluding the effects of changes in currency exchange rates, consolidated service revenue increased 8.9% in 2016 compared to 2015.

Total operating expenses. Consolidated operating expenses for 2016 increased $94.1 million, or 6.4%, compared to 2015. Operating expenses for 2016 compared to 2015 included an increase in expenses attributable to NET Services of $145.5 million and Corporate and Other of $2.2 million. Partially offsetting these expense increases was a decrease in WD Services' operating expenses of $53.6 million. Operating expenses include asset impairment charges of $19.6 million at WD Services and $1.4 million at Corporate and Other during 2016.

Operating income. Consolidated operating income for 2016 increased $6.7 million compared to 2015 due to an increase in operating income of NET Services in 2016 as compared to 2015 of $5.9 million and a decrease in the operating loss of WD Services in 2016 as compared to 2015 of $2.9 million, although WD Services' new offender rehabilitation program incurred an operating loss in 2016 as compared to operating income in 2015. In addition, France continued to experience a significant operating loss in 2016, consistent with 2015. These changes were partially offset by an increase in the operating loss for Corporate and Other of $2.0 million, driven primarily by the asset impairment charge of $1.4 million in 2016.

Interest expense, net. Consolidated interest expense, net for 2016 decreased $0.3 million, or 14.6%, compared to 2015. The decrease is primarily related to the repayment of the related party note during 2015, which was partially offset by higher commitment fees on our Credit Facility for 2016 as compared to 2015.

Equity in net loss of investees. Equity in net loss of investees primarily relates to our investments in Mission Providence and Matrix. Mission Providence, which is part of WD Services, began providing services in July 2015. We record 75% of Mission Providence's profit or loss in equity in net loss of investees. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction, and record 46.8% of Matrix's profit or loss in net loss of investees. Our equity in net loss of investees related to WD Services and Matrix totaled $8.5 million and $1.8 million, respectively, for 2016. Included in Matrix's results is interest expense of $2.9 million and transaction related expenses of $6.0 million, which includes $4.0 million of transaction incentive compensation payable to the Matrix management team.

Gain on foreign currency transactions. The foreign currency gains of $1.4 million and $0.9 million for 2016 and 2015, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. We recognized an income tax provision for 2016 and 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized estimated taxable income for these years upon which the income tax provision for financial reporting is calculated.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our former Human Services segment and our former HA Services segment, composed entirely of our 100% equity interest in Matrix until the completion of the Matrix Transaction on October 19, 2016. Discontinued operations, net of tax for our Human Services segment was a loss of $5.6 million in 2016 and income of $101.8 million in 2015, respectively. 2016 Human Services results include an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million. Discontinued operations, net of tax for our HA Services segment was income of $114.3 million and $6.1 million for 2016 and 2015, respectively. 2016 HA Services segment results include a gain on disposition, net of tax, of $109.4 million. See Note 21, *Discontinued Operations,* to our consolidated financial statements for additional information.

Net loss attributable to noncontrolling interest. Net loss attributable to noncontrolling interests primarily relates to the minority interest associated with our company servicing the offender rehabilitation contract in our WD Services segment. As this contract is currently experiencing losses, as further discussed below, we have a net loss attributable to noncontrolling interests.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,234,364	100.0%	1,083,015	100.0%
Service expense	1,133,501	91.8%	991,659	91.6%
General and administrative expense	11,406	0.9%	10,704	1.0%
Depreciation and amortization	12,375	1.0%	9,429	0.9%
Operating income	77,082	6.2%	71,223	6.6%

Service revenue, net. Service revenue, net for NET Services in 2016 increased $151.3 million, or 14.0%, compared to 2015. The increase related to the impact of new contracts which contributed $76.4 million of revenue in 2016, including contracts in California and Florida, and an increase in revenue associated with existing contracts of $120.4 million due to the net impact of membership and rate changes, partially offset by the loss of certain contracts that resulted in a decrease in revenue of $45.5 million.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	927,965	75.2%	814,632	75.2%
Payroll and related costs	162,000	13.1%	141,669	13.1%
Other operating expenses	42,478	3.4%	34,634	3.2%
Stock-based compensation	1,058	0.1%	724	0.1%
Total service expense	1,133,501	91.8%	991,659	91.6%

Service expense for 2016 increased $141.8 million, or 14.3%, compared to 2015. The increase in service expense was primarily attributable to an increase in purchased transportation services due primarily to higher transportation volume. Purchased services as a percentage of revenue remained constant at 75.2%. Additionally, our payroll and related costs increased for 2016 as compared to 2015 primarily due to the hiring of employees to support new contracts and increased call volume associated with increased utilization, as well as an increase of $1.2 million in expense for the long-term incentive plan for management put into place in the fourth quarter of 2015 and separation related charges for NET Services' former chief executive officer during 2016 of $0.8 million. Our other operating expenses also increased for 2016 as compared to 2015. The increase was primarily attributable to increased bad debt expense, including $2.1 million of expense related to one specific customer, and costs incurred for external resources used in the design and implementation of NET Services member experience and value enhancement initiatives of $2.0 million. Stock-based compensation increased $0.3 million in 2016 as compared to 2015 primarily due to the expense associated with new stock-based compensation awards granted in 2016 that vested in January 2017.

General and administrative expense. General and administrative expenses in 2016 increased $0.7 million, or 6.6%, as compared to 2015, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense decreased slightly from 1.0% for 2015 to 0.9% for 2016.

Depreciation and amortization expense. Depreciation and amortization expenses increased $2.9 million primarily due to the addition of long-lived assets in our call centers. As a percentage of revenue, depreciation and amortization increased slightly from 0.9% for 2015 to 1.0% for 2016.

WD Services

WD Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	344,403	100.0%	395,059	100.0%
Service expense	320,147	93.0%	393,803	99.7%
General and administrative expense	30,300	8.8%	29,846	7.6%
Asset impairment charge	19,588	5.7%	-	0.0%
Depreciation and amortization	13,824	4.0%	13,776	3.5%
Operating income (loss)	(39,456)	-11.5%	(42,366)	-10.7%

Service revenue, net. Service revenue, net in 2016 decreased $50.7 million, or 12.8%, compared to 2015. Excluding the effects of changes in currency exchange rates, service revenue decreased 5.1% in 2016 compared to 2015, which was primarily related to revenue declines associated with declining referrals and an altered pricing structure under the segment's primary employability program in the UK and a revised bidding strategy in certain markets. Implemented in late 2015, the overhauled bidding process emphasized the pursuit of only those contracts that meet certain investment criteria, including risk-weighted return on capital thresholds, and involve the provision of services where we believe our experience will allow us to deliver differentiated and improved outcomes for our clients. As a result of this enhanced criteria and a challenging UK outsourcing industry, new contracts have been more infrequent and smaller in nature. The decrease was partially offset by two new contracts in France that began in 2015 and growth of NCS youth programs in 2016. WD Services additionally recognized revenue of $5.4 million for 2016 under its offender rehabilitation program related to the finalization of a contractual adjustment for contract years ended March 31, 2015 and 2016, which partially offset the decline in revenue under this contract for 2016.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	210,293	61.1%	249,130	63.1%
Purchased services	65,363	19.0%	78,498	19.9%
Other operating expenses	44,502	12.9%	45,418	11.5%
Stock-based compensation	(11)	0.0%	20,757	5.3%
Total service expense	320,147	93.0%	393,803	99.7%

Service expense in 2016 decreased $73.7 million, or 18.7%, compared to 2015. Payroll and related costs decreased primarily as a result of the redundancy plans implemented in the fourth quarter of 2015 that were designed to better align headcount with service delivery volumes as well as declining referrals under the segment's primary employability program in the UK. Partially offsetting these decreases was increased payroll and related costs associated with a significant new offender rehabilitation program that began in 2015 and higher payroll expenses in France associated with new programs implemented in 2015 and 2016. As referenced above, both the segment's new offender rehabilitation program and operations in France had significant operating losses in 2016. In addition, $8.5 million in termination benefits related to three redundancy plans contributed to losses in 2016. Purchased services decreased in 2016 compared to 2015 primarily as a result of a decline in client referrals under our primary employability program in the UK which required less use of outsourced services. Stock-based compensation decreased $20.8 million in 2016 as compared to 2015 primarily due to expenses totaling $16.1 million related to the settlement of outstanding awards in the fourth quarter of 2015 in relation to the separation of two executives, who were also sellers of Ingeus to Providence, as further described in Note 13, *Stock-Based Compensation and Similar Arrangements,* to our consolidated financial statements.

General and administrative expense. General and administrative expense in 2016 increased $0.5 million compared to 2015. $2.5 million of the increase relates to the impact of the reduction in the fair value of contingent consideration that was recorded in 2015. Offsetting this increase were decreased facility costs of $2.0 million primarily due to the closure of numerous sites in the UK, partially offset by the opening of new sites in France during 2016.

Asset impairment charge. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK.

Depreciation and amortization expense. Depreciation and amortization expense for 2016 was flat compared to 2015.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the holding company level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,	
	2016	2015
	$	$
Service revenue, net (a)	122	(64)
Service expense (a)	(894)	(4,308)
General and administrative expense	28,205	30,436
Asset impairment charge	1,415	-
Depreciation and amortization	405	793
Operating loss	(29,009)	(26,985)

(a)Negative amounts are present for this line item due to elimination entries that are included in Corporate and Other. Offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2016 increased by $2.0 million, or 7.5%, as compared to 2015 primarily due to a $4.5 million decrease in benefits associated with favorable claims experiences on our reinsurance and self-insured programs, an asset impairment charge of $1.4 million in 2016 and a $0.4 million net increase in compensation related expenses. The $0.4 million net increase in compensation expenses in 2016 was primarily due to an increase in short-term incentives and $1.0 million of compensation related to the sale of the Company's Human Services segment in 2015. Also included in 2016 were $1.6 million of expenses related to a shareholder lawsuit, an increase of $0.8 million from 2015. These increases in expense were partially offset by a decrease in various professional fees of $4.0 million. The Company anticipates continued reductions in multiple Corporate and Other expense categories in 2017.

Year ended December 31, 2015 compared to year ended December 31, 2014

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2015 and 2014 (in thousands):

	Year ended December 31,			
	2015		2014	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,478,010	100.0%	1,092,880	100.0%
Operating expenses:				
Service expense	1,381,154	93.4%	988,600	90.5%
General and administrative expense	70,986	4.8%	44,080	4.0%
Depreciation and amortization	23,998	1.6%	17,213	1.6%
Total operating expenses	1,476,138	99.9%	1,049,893	96.1%
Operating income	1,872	0.1%	42,987	3.9%
Non-operating expense:				
Interest expense, net	1,853	0.1%	10,224	0.9%
Equity in net loss of investees	10,970	0.7%	-	0.0%
Gain on foreign currency transactions	(857)	-0.1%	(37)	0.0%
Income (loss) from continuing operations before income taxes	(10,094)	-0.7%	32,800	3.0%
Provision for income taxes	14,583	1.0%	8,289	0.8%
Income (loss) from continuing operations	(24,677)	-1.7%	24,511	2.2%
Discontinued operations, net of tax	107,871	7.3%	(4,236)	-0.4%
Net income	83,194	5.6%	20,275	1.9%
Net loss attributable to noncontrolling interest	502	0.0%	-	0.0%
Net income attributable to Providence	83,696	5.7%	20,275	1.9%

Service revenue, net. Consolidated service revenue, net for 2015 increased $385.1 million, or 35.2%, compared to 2014. Revenue for 2015 compared to 2014 includes an increase in revenue attributable to an increase in revenue of WD Services of $186.3 million, as a result of the acquisition of Ingeus on May 30, 2014, and of NET Services of $198.7 million.

Total operating expenses. Consolidated operating expenses for 2015 increased $426.2 million, or 40.6%, compared to 2014. Operating expenses for 2015 compared to 2014 included an increase in expenses attributable to WD Services of $246.2 million, due primarily to the acquisition discussed above, and an increase in expense attributable to NET Services of $195.2 million. Partially offsetting these expense increases was a decrease in Corporate and Other expenses of $15.2 million.

Operating income. Consolidated operating income for 2015 decreased $41.1 million compared to 2014. The decrease was primarily attributable to the decrease in the operating income of WD Services in 2015 as compared to 2014 of $59.9 million. This decrease was partially offset by increased operating income of NET Services of $3.5 million and a decreased operating loss for Corporate and Other of $15.3 million.

Interest expense, net. Consolidated interest expense, net for 2015 decreased $8.4 million compared to 2014. The decrease is primarily related to interest allocated to discontinued operations for the Matrix Transaction, commencing in October 2014, when Matrix was acquired by Providence. The interest allocation is based upon the amount of debt required to be paid off with the proceeds of the Matrix stock subscription transaction.

Equity in net loss of investees. Equity in net loss of investees in 2015 relates to our investment in Mission Providence. Mission Providence began providing services in July 2015 and incurred significant start-up and administrative costs. We record 75% of Mission Providence's profit or loss.

Gain on foreign currency transactions. The foreign currency gain of $0.9 million and $0.04 million for 2015 and 2014, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. Our effective tax rate for 2015 exceeded 100%. The effective tax rate exceeded the U.S. federal statutory rate of 35% primarily due to foreign net operating losses (including equity investment losses) for which the future income tax benefit currently cannot be recognized, significant losses in foreign jurisdictions with tax rates lower than the U.S. rate of 35%, state income taxes, and certain non-deductible expenses, including significant amounts of compensation expense related to two former shareholders of Ingeus who reside in Australia, for which no tax deduction may be claimed. Our effective tax rate for 2014 was 25.3%, due primarily to the reduction in fair value in contingent consideration for the Ingeus acquisition, which is not treated as taxable income.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our Human Services segment and our HA Services segment. Discontinued operations, net of tax for our Human Services segment was income of $101.8 million and a loss of $3.6 million for 2015 and 2014, respectively. 2015 Human Services results include a gain on disposition, net of tax, of $100.3 million. Discontinued operations, net of tax for our HA Services segment was income of $6.1 million and a loss of $0.6 million for 2015 and 2014, respectively. See Note 21, *Discontinued Operations,* to our consolidated financial statements for additional information.

Net loss attributable to noncontrolling interest. Net loss attributable to noncontrolling interests primarily relates to the minority interest associated with our offender rehabilitation contract in WD Services. As this program has experienced losses, as further discussed below, we have a net loss attributable to noncontrolling interests.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2015 and 2014 (in thousands):

	Year Ended December 31,			
	2015		2014	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,083,015	100.0%	884,287	100.0%
Service expense	991,659	91.6%	800,454	90.5%
General and administrative expense	10,704	1.0%	8,406	1.0%
Depreciation and amortization	9,429	0.9%	7,698	0.9%
Operating income	71,223	6.6%	67,729	7.7%

Service revenue, net. Services revenue, net for 2015 increased $198.7 million, or 22.5%, compared to 2014. The increase related to the impact of new contracts which contributed $51.3 million of revenue in 2015, including contracts in Maine, Rhode Island, Florida and Ohio, and an increase in revenue associated with existing contracts of $175.7 million due to the net impact of membership and rate changes, partially offset by the loss of certain contracts which resulted in a decrease in revenue of $28.3 million.

Service expense. Service expense is comprised of the following for 2015 and 2014 (in thousands):

	Year Ended December 31,			
	2015		2014	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	814,632	75.2%	657,979	74.4%
Payroll and related costs	141,669	13.1%	111,212	12.6%
Other operating expenses	34,634	3.2%	30,676	3.5%
Stock-based compensation	724	0.1%	587	0.1%
Total service expense	991,659	91.6%	800,454	90.5%

Service expense for 2015 increased $191.2 million, or 23.9%, compared to 2014. The increase in service expense is primarily attributable to an increase in purchased transportation services due primarily to higher transportation volume. Purchased transportation services as a percentage of revenue increased slightly, primarily as a result of an increase in utilization, including an increase in utilization by Medicaid expansion members as they became more familiar with the availability of transportation services. Additionally, our payroll and related costs increased for 2015 as compared to 2014 due to additional contracts and increased call volume due to the increased utilization. Our other operating expenses also increased in 2015 as compared to 2014 due to volume, although it decreased slightly as a percentage of revenue.

General and administrative expense. General and administrative expenses in 2015 increased $2.3 million, or 27.3%, as compared to 2014, due to increased facility costs resulting from the overall growth of our operations, including the opening of a new call center in Arizona.

Depreciation and amortization expense. Depreciation and amortization expenses increased $1.7 million primarily due to the addition of long-lived assets in our call centers. As a percentage of revenue, depreciation and amortization remained constant at 0.9%.

WD Services

WD Services' comparative results are significantly impacted due to the acquisition of Ingeus in May 2014. The results presented below include Ingeus for the full-year 2015 as compared to the post-acquisition period in 2014. WD Services financial results are as follows for 2015 and 2014 (in thousands):

	Year Ended December 31,			
	2015		2014	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	395,059	100.0%	208,763	100.0%
Service expense	393,803	99.7%	184,919	88.6%
General and administrative expense	29,846	7.6%	(2,072)	-1.0%
Depreciation and amortization	13,776	3.5%	8,406	4.0%
Operating income (loss)	(42,366)	-10.7%	17,510	8.4%

Service revenue, net. Service revenue, net in 2015 increased $186.3 million, or 89.2%, compared to 2014. The increase in 2015 compared to 2014 is primarily related to the inclusion of Ingeus since May 30, 2014, as Ingeus contributed $367.4 million in 2015 compared to $179.3 million in 2014. Additionally, WD Services experienced revenue growth due to a significant new offender rehabilitation program which began in 2015, offset by revenue declines associated with declining referrals and reduced unit pricing under its primary employability program in the UK. Assuming Ingeus was acquired on January 1, 2014, WD Services revenue in 2014 would have been $361.2 million on a pro forma basis.

Service expense. Service expense is comprised of the following for 2015 and 2014 (in thousands):

	Year Ended December 31,			
	2015		2014	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	249,130	63.1%	105,436	50.5%
Purchased services	78,498	19.9%	48,114	23.0%
Other operating expenses	45,418	11.5%	27,938	13.4%
Stock-based compensation	20,757	5.3%	3,431	1.6%
Total service expense	393,803	99.7%	184,919	88.6%

Service expense in 2015 increased $208.9 million, or 113.0%, compared to 2014. The increase in 2015 compared to 2014 is primarily related to the Ingeus acquisition. Payroll and related costs increased primarily as a result of new headcount for a new offender rehabilitation program. Generally, under new contracts, headcount costs increase as new employees are hired and trained prior to significant revenue being earned, resulting in an increase in payroll and related costs as a percentage of revenue. Payroll and related costs for the year ended December 31, 2015 include $12.2 million in termination benefits primarily related to two redundancy plans designed to better align headcount with service delivery volumes. Additionally, on October 15, 2015, we entered into Settlement Deeds whereby two Ingeus executives' (who were also selling shareholders of Ingeus) employment agreements were terminated by mutual agreement. The termination of the employees' employment agreements resulted in $4.8 million of accelerated compensation expense and $16.1 million in accelerated stock-based compensation from restricted shares and cash placed into escrow in 2014, in conjunction with the payment of acquisition consideration of Ingeus. These amounts would otherwise have been recognized over the four year vesting period, which was scheduled to end in May 2018. In addition, in 2015 and 2014, respectively, we incurred $5.9 million and $4.5 million of related compensation and stock-based compensation expense prior to termination. WD Services also incurred $2.4 million in other costs associated with the separation with these two employees which is included in other operating expenses in the table above.

General and administrative expense. General and administrative expense in 2015 increased $31.9 million compared to 2014. $13.6 million of the increase relates to the impact of the reduction in the fair value of contingent consideration, as the reduction recorded in 2015 was $2.5 million as compared to the reduction in 2014 of $16.1 million. The fair value of the contingent consideration was zero at December 31, 2015. Additionally, facility costs increased $18.3 million, to $32.3 million in 2015 from $14.0 million in 2014 primarily due to the Ingeus acquisition, as well as growth associated with our new programs.

Depreciation and amortization expense. Depreciation and amortization expense for 2015 increased $5.4 million compared to 2014, principally attributable to the full year of activity in 2015 for Ingeus.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the holding company level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2015 and 2014 (in thousands):

	Year Ended December 31,	
	2015	**2014**
	$	$
Service revenue, net (a)	(64)	(170)
Service expense (a)	(4,308)	3,227
General and administrative expense	30,436	37,746
Depreciation and amortization	793	1,109
Operating loss	(26,985)	(42,252)

(a) Negative amounts are present for this line item due to elimination entries that are included in Corporate and Other. Offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2015 decreased by $15.3 million as compared to 2014, due primarily to decreased expenses. Service expense for 2015 decreased $7.5 million as compared to 2014 due to favorable claims history in 2015 for our self-insurance and reinsurance programs, as well as a decrease in certain payroll and related costs of $3.8 million primarily due to positions eliminated in 2014.

General and administrative expenses in 2015 decreased $7.3 million, or 19.4%, compared to 2014. The decrease was primarily related to a decrease in acquisition costs of $11.2 million, which were incurred in relation to the acquisitions of Ingeus and Matrix. Additionally, the year ended December 31, 2014 included $3.0 million in financing fees associated with the debt refinancing completed in October 2014. Offsetting these decreases in expenses were increased legal fees in 2015 as compared to 2014, of which $0.8 million related to legal fees associated with a putative stockholder class action derivative complaint. Additional increases in general and administrative expenses related to additional accounting and compliance related fees, recruiting, professional fees and payroll related costs of $5.2 million due primarily to increased costs to integrate Ingeus and Matrix into our internal controls program as well as increased audit costs related to the new companies acquired. We also incurred expense attributable to stock award modifications in the amount of $0.7 million related to a separation agreement with a former chief executive officer and incurred an increase in cash settled stock-based compensation expense of $0.9 million. In addition, in 2015 we incurred $1.4 million in general and administrative expense related to a new stock-based long-term incentive plan designed to provide long-term performance based awards to certain executive officers of Providence.

Seasonality

Our quarterly operating results and operating cash flows normally fluctuate due in part to seasonal factors, uneven demand for services and the timing of new contracts, which impact the amount of revenues earned and expenses incurred. NET Services experiences fluctuations in demand during the summer and winter seasons. Due to higher demand in the summer months, lower demand during the winter, and a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter. WD Services is impacted by both the timing of commencement and expiration of major contracts. Under many of WD Services' contracts, we invest significant sums of money in personnel, leased office space, purchased or developed technology, and other costs, and generally incur these costs prior to commencing services and receiving payments. This results in significant variability in financial performance and cash flows between quarters and for comparative periods. It is expected that future contracts will be structured in a similar fashion. In addition, under the majority of WD Services' contracts, the Company relies on its customers, which include government agencies, to provide referrals, for whom the Company can provide services and earn revenue. The timing and magnitude of referrals can fluctuate significantly, leading to volatility in revenue. The Matrix Investment experiences quarterly volatility in earnings due to uneven demand for services, and historically, with the exception of the year ended December 31, 2015, has experienced higher volumes in the second half of the calendar year.

Liquidity and capital resources

Short-term capital requirements consist primarily of recurring operating expenses, new contract start-up costs, including workforce restructuring costs. In addition, in order to ensure operational optimization, we periodically perform reviews of our operations and service delivery infrastructure. These reviews may result in the identification of actions or measures which are expected to have long-term benefits, but which could result in short-term capital requirements for restructuring, capital expenditures or implementation costs. In 2016, we launched a strategic initiative to enhance member satisfaction and drive greater operational efficiencies in NET Services. The implementation of the initiative is expected to be substantially completed by the end of 2017. Additionally, in 2016, in order to build upon WD Services' leadership position in the UK employment services industry, enhance client satisfaction and drive greater operational efficiencies, WD Services launched the Ingeus Futures program which includes organizational restructuring, the development and deployment of new processes and technologies, and increased business development resources. The implementation of the initiative is expected to be substantially completed during 2017. We expect to meet any cash requirements through available cash on hand, cash generated from our operating segments, and borrowing capacity under our Credit Facility.

Cash flow from investing activities was our primary source of cash during 2016 due to the completion of the Matrix Transaction in October 2016. Our balance of cash and cash equivalents was $72.3 million and $79.8 million at December 31, 2016 and 2015, respectively, including $21.4 million and $37.5 million held in foreign countries, respectively. Such cash held in foreign countries is generally used to fund foreign operations, although it may also be used to repay intercompany indebtedness existing between Providence and its foreign subsidiaries. Cash included in current assets of discontinued operations held for sale totaled $5.0 at December 31, 2015.

We had restricted cash of $14.1 million and $20.1 million at December 31, 2016 and 2015, respectively, primarily related to contractual obligations and activities of our captive insurance subsidiary. At December 31, 2016 and 2015, our total debt under our Credit Facility was $0 and $305.0 million, respectively.

We may, from time to time, access capital markets to raise equity or debt financing for various business reasons, including acquisitions. We may also raise debt financing to fund future repurchases of our common stock. The timing, term, size, and pricing of any such financing will depend on investor interest and market conditions, and there can be no assurance that we will be able to obtain any such financing.

The cash flow statement for all periods presented includes both continuing and discontinued operations.

Year ended December 31, 2016

Cash flows

Operating activities. We generated net cash flows from operating activities of $41.5 million for 2016. These cash flows included net income of $89.8 million, which includes a non-cash net of tax gain on the Matrix Transaction of $109.4 million. In addition, non-cash items include $26.0 million of amortization expense, $21.7 million of depreciation expense, $21.0 million in asset impairment charges, $5.1 million in stock-based compensation expense and $10.3 million of equity in net loss of investees. In addition, we made income tax payments of $30.2 million in relation to the sale of our Human Services segment, which was partially offset by $8.2 million received from the purchaser of the Human Services segment to reimburse us for a portion of these taxes. Significant non-cash activity from our discontinued operations included $17.5 million of amortization and $3.7 million of depreciation. Changes in working capital items include the following significant items:

- $19.3 million use of cash due to the increase in accounts receivable, the majority of which is due to an increase in NET Services' accounts receivable of $15.2 million. This increase was primarily related to increases in amounts owed under capitated reconciliation contracts, whereby funds are received after a final reconciliation of the number of members served, as well as increases in receivables for FFS and administrative services only contracts. These increases were partially offset by decreased receivables for two customers with significant amounts due to us as of the end of the prior year. Additionally, the accounts receivable of our former HA Services segment, reported as a discontinued operation, increased $3.1 million from December 31, 2015 to the time of the Matrix Transaction, which is reported as a use of cash from operations in the statement of cash flows.

- $33.4 million source of cash due to the increase in accounts payable and accrued expenses primarily related to accrued NET Services contract payments, increased compensation accruals and accruals for legal fees and estimated settlements. These increases were partially offset by $8.6 million paid during 2016 for WD Services' redundancy costs. Additionally, the accounts payable and accrued expenses of our former HA Services segment, increased $10.6 million from December 31, 2015 to the time of the Matrix Transaction, which is reported as a use of cash from operations in the statement of cash flows.
- $8.7 million source of cash due to the increase in accrued transportation costs of NET Services resulting from an increase in trip volume in 2016 over 2015.

Investing activities. Net cash generated by investing activities totaled $323.9 million for 2016. The Matrix Transaction resulted in cash proceeds from investing activities of $371.6 million. $32.0 million of cash was used by our continuing operations to purchase property and equipment primarily related to information technology purchases to support service delivery efficiencies and the growth of our operating segments. Purchases of property and equipment by our discontinued operations totaled $9.2 million. We also used $8.0 million to fund our equity investment in Mission Providence and $5.7 million to fund our equity investment in Matrix.

Financing activities. Net cash used in financing activities totaled $376.5 million for 2016. During 2016, we repaid a net amount of $19.7 million under our Credit Facility and repaid our term loans in the amount of $285.3 million primarily with the use of a portion of our proceeds from the Matrix Transaction. Additionally, cash paid for common stock repurchases pursuant to our $70.0 million stock repurchase program, which terminated on November 3, 2016, totaled $57.9 million, and cash paid for common stock repurchases pursuant to our $100.0 million stock repurchase program, which commenced on October 26, 2016, totaled $12.4 million. We paid convertible preferred stock dividends of $4.4 million and received cash proceeds from the exercise of employee stock option totaling $4.1 million.

Effect of exchange rate changes on cash. There was a negative effect on cash of $1.4 million for 2016 which resulted primarily from the decline in the value of the British pound, as compared to the U.S. dollar. The June 23, 2016 announcement of the passage of the referendum advising for the exit of the UK from the EU adversely impacted global markets, including currencies, and resulted in a decline in the value of the British pound, as compared to the U.S. dollar.

Year ended December 31, 2015

Cash flows

Operating activities. We generated net cash flows from operating activities of $13.2 million for 2015. These cash flows included net income of $83.2 million, which includes a non-cash net of tax gain on sale of our Human Services segment of $100.3 million. In addition, non-cash items include, $38.1 million of amortization expense, $26.6 million in stock-based compensation expense, $20.2 million of depreciation expense, and $11.0 million of equity in net loss of investees. Significant non-cash activity from our discontinued operations included $5.7 million of depreciation, $28.6 million of amortization, and $1.6 million of asset impairment charges. Changes in working capital items, include the following significant items:

- $86.6 million use of cash due to the increase in accounts receivable, the majority of which is due to an increase in NET Services' accounts receivable of $48.0 million due primarily to timing, as two significant customer balances increased at year-end, but were subsequently collected as of February 2016. In addition, $16.2 million of the increase in NET Services' accounts receivable is due to amounts owed under capitated reconciliation contracts, whereby funds are received after a final reconciliation of the number of members served. Additionally, WD Services accounts receivable increased $20.4 million due to additional revenue contracts in place during 2015 as compared to 2014. The accounts receivable of our former Human Services segment, a discontinued operation, increased $9.9 million from December 31, 2014 to the time of sale, which is reported as a use of cash from operations in the statement of cash flows.

- $19.0 million source of cash due to an increase in deferred revenue, of which $15.7 million related to WD Services in association with cash received in advance of services being rendered for two large contracts.

Investing activities. Net cash generated by investing activities totaled $143.3 million for 2015. The sale of our Human Services segment effective November 1, 2015, resulted in cash proceeds from investing activities of $199.9 million. $24.8 million of cash was used to purchase property and equipment to support the growth of our continuing operations, and $16.1 million was used to fund our equity investment in Mission Providence. Purchases of property and equipment by our discontinued operations totaled $10.3 million.

Financing activities. Net cash used in financing activities totaled $231.3 million for 2015. We repaid a net amount of $182.0 million under our Credit Facility during 2015, primarily with the use of a portion of our proceeds from the sale of our Human Services segment. Additionally, scheduled term loan payments totaled $23.6 million. We also repaid the $65.5 million unsecured subordinated related party bridge note from the net proceeds of $80.7 million received from the issuance of preferred stock. Additional use of funds included stock repurchases of $36.8 million, a contingent consideration payment related to the Ingeus acquisition of $7.5 million and preferred stock dividend payments of $3.9 million. Cash proceeds from the exercise of employee stock option exercises were $4.9 million.

Obligations and commitments

Current Credit Facility and Impact of the Matrix Transaction

On August 28, 2016, we entered into the Fourth Amendment and Consent (the "Fourth Amendment") to the Credit Agreement. Pursuant to the Fourth Amendment, which provided for the lenders' consent to the Matrix Transaction, the net cash proceeds received by the Company in connection with the Matrix Transaction were to be applied first, to the prepayment of outstanding term loans, second, to the prepayment of outstanding revolving loans and third, for any purpose not prohibited by the Credit Agreement. Additionally, effective following the repayment of the outstanding term loans in full on October 20, 2016, the Fourth Amendment further (i) reduced the aggregate revolving commitments under the Credit Agreement to $200 million, (ii) amended the consolidated net leverage ratio covenant such that the Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and (iii) replaced the existing consolidated fixed charge coverage ratio covenant with a covenant that the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter.

No further amounts may be borrowed under the term loan facility. Upon the repayment, we wrote-off the deferred financing fees associated with the term loans, as well as a portion of deferred financing fees associated with the revolving Credit Facility due to the reduction of the aggregate revolving commitment. The total write-off was $2.3 million which is included in "Discontinued operations, net of tax" in our consolidated statement of income for the year ended December 31, 2016.

We had no borrowings outstanding under the Credit Facility as of December 31, 2016. $25.0 million of the Credit Facility is available to collateralize letters of credit. As of December 31, 2016, six letters of credit in the aggregate amount of $5.4 million were outstanding. At December 31, 2016, our available credit under the Credit Facility was $194.6 million.

Our obligations under the Credit Facility are guaranteed by all of our present and future domestic subsidiaries, excluding certain domestic subsidiaries, which includes our insurance captives. Our obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of our respective assets, other than our equity investment in Matrix, including a pledge of 100% of the issued and outstanding stock of our domestic subsidiaries, excluding our insurance captives, and 65% of the issued and outstanding stock of our first tier foreign subsidiaries.

Credit Facility Background

On August 2, 2013, we entered into the Credit Agreement with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, SunTrust Bank, as syndication agent, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson Humphrey, Inc., as joint lead arrangers and joint book managers and other lenders party thereto. The Credit Agreement provided us with a senior secured credit facility, in aggregate principal amount of $225.0 million, comprised of a $60.0 million term loan facility and a $165.0 million revolving credit facility. The Credit Facility includes sublimits for swingline loans and letters of credit in amounts of up to $10.0 million and $25.0 million, respectively. On August 2, 2013, we borrowed the entire amount available under the term loan facility and $16.0 million under our revolving credit facility and used the proceeds thereof to refinance certain of our existing indebtedness.

On May 28, 2014, we entered into the first amendment to the Credit Agreement (the "First Amendment"). The First Amendment provided for, among other things, an increase in the aggregate amount of the Credit Facility from $165.0 million to $240.0 million and other modifications in connection with the consummation of the acquisition of Ingeus.

On October 23, 2014, we entered into the Second Amendment to the Credit Agreement (the “Second Amendment”) to (i) add a new term loan tranche in aggregate principal amount of up to $250.0 million to partly finance the acquisition of Matrix, (ii) provide the consent of the required lenders to consummate the acquisition of Matrix, (iii) permit incurrence of additional debt to fund the acquisition of Matrix and (iv) add an excess cash flow mandatory prepayment provision.

On September 3, 2015, we entered into the Third Amendment to the Credit Agreement (the “Third Amendment”). Pursuant to the Third Amendment, the lenders under the Credit Agreement consented to Providence’s sale of the Human Services segment, provided that a minimum amount equal to 50% of the net cash proceeds, as defined in the Credit Agreement, of the sale was applied pro rata to the prepayment of revolving loans and swingline loans under the Credit Agreement. Further, the lenders consented to our use of 50% of the net cash proceeds of the sale to make restricted payments to repurchase common stock pursuant to a Providence stock repurchase program. The Third Amendment provided for amendments to the terms of the Credit Agreement to reflect such consents.

Under the Credit Agreement, as amended through the Fourth Amendment, we have an option to request an increase in the amount of the revolving credit facility and/or the term loan facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75.0 million with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. We may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility.

The Credit Facility matures on August 2, 2018. We may prepay the Credit Facility in whole or in part, at any time without premium or penalty, subject to reimbursement of the lenders’ breakage and redeployment costs in connection with prepayments of London Interbank Offered Rate, or LIBOR, loans. The unutilized portion of the commitments under the Credit Facility may be irrevocably reduced or terminated by us at any time without penalty.

Interest on the outstanding principal amount of any loans accrues, at our election, at a per annum rate equal to LIBOR, plus an applicable margin or the base rate plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on our consolidated leverage ratio as defined in the Credit Agreement. Interest on any loans is payable quarterly in arrears. In addition, we are obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender’s commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on our consolidated leverage ratio.

The Credit Facility also requires us (subject to certain exceptions as set forth in the Amended and Restated Credit Agreement) to prepay the outstanding loans in an aggregate amount equal to 100% of the net cash proceeds received from certain asset dispositions, debt issuances, insurance and casualty awards and other extraordinary receipts.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on our ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, repurchase shares, sell assets, and merge and consolidate. We are subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants. We were in compliance with all covenants as of December 31, 2016.

Rights offering. We completed a rights offering on February 5, 2015, allowing all of the Company’s existing common stockholders the non-transferrable right to purchase their pro rata share of $65.5 million of Preferred Stock at a price equal to $100.00 per share (the “Rights Offering”). The Preferred Stock was convertible into shares of our Common Stock at a conversion price equal to $39.88, which was the closing price of our Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC (collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock was purchased by Standby Purchasers at the $100.00 per share subscription price. The Standby Purchasers beneficially owned approximately 94% of our outstanding Preferred Stock after giving effect to the Rights Offering and the Standby Purchase Agreement. The Company received $65.5 million in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement, which it used to repay the related party unsecured subordinated bridge note that was outstanding as of December 31, 2014.

Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's convertible preferred stock at a $105 per share subscription price.

We may pay a noncumulative cash dividend on each share of convertible preferred stock, when, as and if declared by a committee of our Board, at the rate of 5.5% per annum on the liquidation preference then in effect. Following the issue date of the convertible preferred stock, on or before the third business day immediately preceding each fiscal quarter, we will determine our intention whether or not to pay a cash dividend with respect to that ensuing quarter and will give notice of our intention to each holder of convertible preferred stock as soon as practicable thereafter.

In the event we do not declare and pay a cash dividend, the liquidation preference will be increased to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to such then applicable liquidation preference multiplied by 8.5% per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and, if declared, will begin to accrue on the first day of the applicable dividend period. Paid in kind ("PIK") dividends, if applicable, will accrue and be cumulative on the same schedule as set forth above for cash dividends and will also be compounded at the applicable annual rate on each applicable subsequent dividend date. PIK dividends are paid upon the occurrence of a liquidation event, conversion or redemption in accordance with the terms of the convertible preferred stock. Cash dividends were declared each quarter for the years ended December 31, 2016 and 2015 and totaled $4.4 million and $3.9 million, respectively.

Reinsurance and Self-Funded Insurance Programs

Reinsurance

We reinsure a substantial portion of our NET Services' and historical HA Services and Human Services' automobile, general and professional liability and workers' compensation costs under reinsurance programs through SPCIC, our wholly owned subsidiary. The decision to reinsure these risks was made based on current conditions in the insurance marketplace, an increasing number of coverage limitations, and fluctuating insurance premium rates.

SPCIC, which is a licensed captive insurance company domiciled in the State of Arizona, reinsures third-party insurers for general and professional liability exposures for the first dollar of each and every loss up to $1.0 million per loss and $3.0 million in the aggregate. At December 31, 2016, the cumulative reserve for expected losses was $1.4 million. The excess premium over our expected losses may be used to fund SPCIC's operating expenses, fund any deficit arising in automobile and workers' compensation liability coverage, provide for surplus reserves, and fund any other risk management activities.

SPCIC reinsures a third-party insurer for workers' compensation insurance for the first dollar of each and every loss up to $0.5 million per claim. The cumulative reserve for expected losses at December 31, 2016 was $7.8 million.

SPCIC also reinsures a third-party insurer for automobile liability exposures up to $250,000 per claim. The cumulative reserve for expected losses at December 31, 2016 was $2.0 million.

Based on an independent actuarial report, our expected losses related to workers' compensation, automobile and general and professional liability in excess of our liability under our associated reinsurance programs at December 31, 2016 was $5.3 million. We recorded a corresponding receivable from third-party insurers and liability at December 31, 2016 for these expected losses, which would be paid by third-party insurers to the extent losses are incurred.

SPCIC had restricted cash of $13.8 million and $19.5 million at December 31, 2016 and 2015, respectively, to cover expected claims losses of SPCIC. The full extent of claims may not be fully determined for years. Therefore, the estimates of potential obligations are based on recommendations of an independent actuary using historical data, industry data, and our claims experience.

Health Insurance

We offer our NET Services, U.S. based WD Services, and corporate employees an option to participate in self-funded health insurance programs. Additionally, we historically offered this option to our HA Services and Human Services segments' employees. During the year ended December 31, 2016, health claims were self-funded with a stop-loss umbrella policy with a third party insurer to limit the maximum potential liability for individual claims to $275,000 per person, subject to an aggregating stop-loss limit of $400,000. In addition, the program has a total stop-loss limit for total claims, in order to limit our exposure to catastrophic claims.

Health insurance claims are paid as they are submitted to the plan administrator. We maintain accruals for claims that have been incurred but not yet reported to the plan administrator, and therefore, have not been paid. The incurred but not reported reserve is based on an established cap and current payment trends of health insurance claims. The liability for the self-funded health plan of $3.0 million and $2.4 million as of December 31, 2016 and 2015, respectively, was recorded in "Reinsurance liability and related reserve" in our consolidated balance sheets.

We charge our employees a portion of the costs of our self-funded group health insurance programs. We determine this charge at the beginning of each plan year based upon historical and projected medical utilization data. Any difference between our projections and our actual experience is borne by us, up to the stop-loss limit. We estimate potential obligations for liabilities under this program to reserve what we believe to be a sufficient amount to cover liabilities based on our past experience. Any significant increase in the number of claims or costs associated with claims made under this program above what we reserve could have a material adverse effect on our financial results.

Contractual cash obligations.

The following is a summary of our future contractual cash obligations as of December 31, 2016:

	At December 31, 2016				
Contractual cash obligations (000's)	**Total**	**Less than 1 Year**	**1-3 Years**	**3-5 Years**	**After 5 Years**
Capital Leases	$ 3,611	$ 1,721	$ 1,890	$ -	$ -
Interest (1)	1,476	893	583	-	-
Purchased services commitments (2)	1,944	995	761	188	-
Guarantees (3)	50,276	49,757	519	-	-
Letters of credit (3)	5,414	5,414	-	-	-
Operating Leases (4)	72,076	19,788	24,938	13,275	14,075
Total	$ 134,797	$ 78,568	$ 28,691	$ 13,463	$ 14,075

(1) Future interest payments have been calculated at the current rates as of December 31, 2016.

(2) Our purchase obligations represent the minimum obligations we have under agreements with certain of our vendors. These minimum obligations are less than our projected use for those periods. Payments may be more than the minimum obligations based on actual use.

(3) Guarantees and letters of credit ("LOCs") are commitments that represent funding responsibilities that may require our performance in the event of third-party demands or contingent events. Guarantees include surety bonds we provide to certain customers to protect against potential non-delivery of our non-emergency transportation services. Of the outstanding balance of our stand-by LOCs, $5.4 million directly reduces the amount available to us from our Credit Facility. The surety bonds and LOC amounts in the above table represent the amount of commitment expiration per period.

(4) The operating leases are for office space and related office equipment. We account for these leases on a monthly basis. Certain leases contain periodic rent escalation adjustments and renewal options.

Other than the items described above, we do not have any off-balance sheet arrangements as of December 31, 2016.

Stock repurchase programs

Our Board approved a stock repurchase program on February 1, 2007. Under this stock repurchase program we spent $14.4 million to purchase 756,100 shares of our common stock on the open market. We did not purchase shares of our Common Stock during the period 2008 through 2011 or during the period of 2013 through 2015 under this plan. This plan was formally terminated in January 2016.

On November 4, 2015, our Board authorized us to engage in a repurchase program to repurchase up to $70.0 million in aggregate value of our Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $63.0 million, including commission payments.

On October 26, 2016, our Board authorized us to engage in a repurchase program to repurchase up to $100.0 million in aggregate value of our Common Stock during the twelve-month period following October 26, 2016. Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of our officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements. During 2016, we spent $12.4 million, including commission payments, to purchase 328,843 shares of our Common Stock under this plan.

Off-balance sheet arrangements

As of December 31, 2016 and 2015, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

New Accounting Pronouncements

The new accounting pronouncements that impact our business are included in Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements,* to our consolidated financial statements and are incorporated herein by reference.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk.***

Foreign currency risk

As of December 31, 2016, we conducted business in 9 countries outside the U.S. As such, our cash flows and earnings are subject to fluctuations from changes in foreign currency exchange rates. We do not currently hedge against the possible impact of currency fluctuations. For 2016, we generated $328.2 million of our net operating revenues from operations outside the US. As we expand further into international markets, we expect the risk from foreign currency exchange rates to increase.

A 10% adverse change in the foreign currency exchange rate from British Pounds to U.S. dollars would have a $23.5 million impact on consolidated revenue, and a positive $3.2 million impact on net income. A 10% adverse change in other foreign currency exchange rates would not have a significant impact on our financial results.

We assess the significance of foreign currency risk on a periodic basis and may implement strategies to manage such risk as we deem appropriate.

Item 8. ***Financial Statements and Supplementary Data.***

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting for the registrant, as such term is defined in Rule 13a-15(f) of the Exchange Act. We designed our internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

The Company, under the supervision and with the participation of its management, including its principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2016, based on the criteria set forth in the Internal Control–Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, the Company concluded that its internal control over financial reporting was effective as of December 31, 2016.

KPMG LLP, an independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued an audit report on the effectiveness of the Company's internal control over financial reporting which is presented in Part II, Item 8 of this Annual Report.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
The Providence Service Corporation:

We have audited the accompanying consolidated balance sheets of The Providence Service Corporation and subsidiaries (the Company) as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2016. In connection with our audits of the consolidated financial statements, we have also audited the financial statement schedule in Item 15(a)(2). These consolidated financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The Providence Service Corporation and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material aspects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 10, 2017 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Phoenix, Arizona
March 10, 2017

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
The Providence Service Corporation:

We have audited The Providence Service Corporation's (the Company) internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Report on Internal Control over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, The Providence Service Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of The Providence Service Corporation and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2016, and our report dated March 10, 2017 expressed an unqualified opinion on those consolidated financial statements.

The Providence Service Corporation
Notes to Consolidated Financial Statements
December 31, 2016
(in thousands except share and per share data)

1. Organization and Basis of Presentation

Description of Business

The Providence Service Corporation ("we", the "Company" or "Providence") is a holding company, which owns interests in subsidiaries and other companies that are primarily engaged in the provision of healthcare and workforce development services for public and private sector entities seeking to control costs and promote positive outcomes. The subsidiaries and other companies in which the Company holds interests comprise the following segments:

- Non-Emergency Transportation Services ("NET Services") – Nationwide provider of non-emergency medical transportation programs for state governments and managed care organizations.
- Workforce Development Services ("WD Services") – Global provider of employment preparation and placement and legal offender rehabilitation services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments ("CHAs"), to members of managed care organizations, accounted for as an equity method investment.

Ingeus UK Holdings Limited and its wholly and partly-owned subsidiaries and associates (collectively, "Ingeus"), which make up the majority of WD Services, were acquired on May 30, 2014. On November 1, 2015, the Company completed the sale of its Human Services segment, which is accounted for as a discontinued operation.

Matrix Investment is comprised of Mercury Parent, LLC, a newly formed parent of CCHN Group Holdings, Inc. CCHN Group Holdings, Inc. and its subsidiaries are referred to as "Matrix". Matrix was acquired by the Company on October 23, 2014. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest (the "Matrix Transaction"). Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in the Company's Health Assessment Services ("HA Services") segment. The Company now owns a noncontrolling interest in Matrix. The Company's proportionate share of Matrix's net assets and financial results for the period following the closing of the Matrix Transaction are presented under the equity method. Its assets, liabilities and financial results for the period prior to the closing of the Matrix Transaction are presented within discontinued operations. For additional information regarding the Matrix Transaction, see Note 21, *Discontinued Operations*.

As of December 31, 2016, the Company's consolidated subsidiaries operated in 40 states and the District of Columbia in the United States ("U.S."), and in 9 countries outside of the U.S.

Basis of Presentation

The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The FASB establishes accounting principles generally accepted in the United States ("GAAP"). Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. References to GAAP issued by the FASB in these footnotes are to the FASB *Accounting Standards Codification* ("ASC"), which serves as a single source of authoritative non-SEC accounting and reporting standards to be applied by non-governmental entities. All amounts are presented in U.S. dollars, unless otherwise noted.

The Company holds investments that are accounted for using the equity method. The Company does not control the decision making process nor business management practices of these affiliates. Accordingly, the Company relies on management of these affiliates to provide accurate financial information prepared in accordance with GAAP. The Company receives audit reports relating to such financial information from the affiliates' independent auditors on an annual basis. The Company is not aware of any errors in or possible misstatements of the financial information provided by its equity affiliates that would have a material effect on the Company's consolidated financial statements.

Reclassifications

The Company has reclassified certain amounts relating to its prior period results to conform to its current period presentation. Effective January 1, 2016, the Company adopted Accounting Standards Update ("ASU") No. 2015-03, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs* ("ASU 2015-03") and reclassified debt issuance costs to a contra-liability account in the consolidated balance sheet as of December 31, 2015.

During the quarter ended September 30, 2016, Matrix, which comprised the HA Services segment, met the criteria for held for sale classification due to the execution on August 28, 2016 of a stock subscription agreement by the Company pursuant to which a third-party subscribed for a controlling equity interest in Matrix. The transaction was effective October 19, 2016 and resulted in a gain, net of tax, of $109,403. The HA Services segment is presented as a discontinued operation in accordance with GAAP. The assets and liabilities of the HA Services segment are classified as held for sale in the consolidated balance sheet for the year ended December 31, 2015. Additionally, the operating results of this segment, along with the Human Services segment sold on November 1, 2015, are reported as discontinued operations, net of tax, in the consolidated statements of income for all periods presented. See Note 21, *Discontinued Operations.*

2. Significant Accounting Policies and Recent Accounting Pronouncements

Principles of Consolidation

The accompanying consolidated financial statements include The Providence Service Corporation, its wholly-owned subsidiaries, and entities it controls, or in which it has a variable interest and is the primary beneficiary of expected cash profits or losses. The Company records its investments in entities that it does not control, but over which it has the ability to exercise significant influence, using the equity method. The Company has eliminated significant intercompany transactions and accounts.

Accounting Estimates

The Company uses estimates and assumptions in the preparation of the consolidated financial statements in accordance with GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the Company's consolidated financial statements. These estimates and assumptions also affect the reported amount of net income or loss during any period. The Company's actual financial results could differ significantly from these estimates. The significant estimates underlying the Company's consolidated financial statements include revenue recognition; allowance for doubtful accounts; accrued transportation costs; accrued restructuring; income taxes; recoverability of current and long-lived assets, including equity method investments; intangible assets and goodwill; loss contingencies; accounting for business combinations, including amounts assigned to definite and indefinite lived intangibles and contingent consideration; loss reserves for reinsurance and self-funded insurance programs; and stock-based compensation.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances and highly liquid investments with an initial maturity of three months or less. Investments in cash equivalents are carried at cost, which approximates fair value. The Company places its temporary cash investments with high credit quality financial institutions. At times, such investments may be in excess of the federally insured limits.

At December 31, 2016 and 2015, $21,411 and $37,467, respectively, of cash was held in foreign countries. Such cash is generally used to fund foreign operations, although it may be used also to repay intercompany indebtedness or similar arrangements.

Restricted Cash

At December 31, 2016 and 2015, the Company had $14,130 and $20,056, respectively, of restricted cash:

	December 31,	
	2016	2015
Collateral for letters of credit - Reinsured claims losses	$ 2,265	$ 3,033
Escrow/Trust - Reinsured claims losses	11,865	17,023
Restricted cash for reinsured claims losses	14,130	20,056
Less current portion	3,192	4,012
Restricted cash, less current portion	$ 10,938	$ 16,044

Of the restricted cash amount at December 31, 2016 and 2015:

- $2,265 and $3,033, respectively, served as collateral for irrevocable standby letters of credit to secure any reinsured claims losses under the Company's reinsurance program;
- of the remaining $11,865 and $17,023:
    - $310 and $565, respectively, was restricted under a historical auto liability program associated with NET Services that ceased providing reinsurance on new claims in 2011; and
    - $11,555 and $16,458, respectively, was restricted and held in trusts for reinsurance claims losses under the Company's workers' compensation, general and professional liability and auto liability reinsurance programs.

Accounts Receivable and Allowance for Doubtful Accounts

The Company records accounts receivable amounts at the contractual amount, less an allowance for doubtful accounts. The Company maintains an allowance for doubtful accounts at an amount it estimates to be sufficient to cover the risk that an account will not be collected. The Company regularly evaluates its accounts receivable, especially receivables that are past due, and reassesses its allowance for doubtful accounts based on identified customer collection issues. In circumstances where the Company is aware of a customer's inability to meet its financial obligation, the Company records a specific allowance for doubtful accounts to reduce its net recognized receivable to an amount the Company reasonably expects to collect. The Company also provides a general allowance, based upon historical experience. Under certain contracts of NET Services, final payment is based on a reconciliation of actual utilization and cost, and the final reconciliation may require a considerable period of time. As of December 31, 2016 and 2015, accounts receivable under these reconciliation contracts totaled $45,287 and $30,242, respectively.

The Company's provision for doubtful accounts expense for the years ended December 31, 2016, 2015 and 2014 was $2,892, $1,369 and $1,014, respectively.

Property and Equipment

Property and equipment are stated at historical cost, net of accumulated depreciation, or at fair value if the assets were initially recorded as the result of a business combination or if the asset was remeasured due to an impairment. Depreciation is calculated using the straight-line method over the estimated useful life of the asset. Maintenance and repairs are expensed as incurred. Gains and losses resulting from the disposition of an asset are reflected in operating expense.

Recoverability of Goodwill

In accordance with ASC 350, *Intangibles-Goodwill and Other*, the Company reviews goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. Historically, the Company has performed the annual goodwill impairment test for all reporting units as of December 31 of each year; however, it elected to change this date to October 1 of each year beginning in 2016 in order to better align the timing of the annual impairment testing with the Company's annual budgeting and forecasting process. The Company believes that this change in the goodwill impairment testing date is not a material change to the Company's method of applying an accounting principle. The Company's evaluation of goodwill for impairment involves a two-step process to identify goodwill impairment and measure the amount of goodwill impairment loss. First, the Company performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value, the Company then performs a quantitative assessment and compares the fair value of the reporting unit, as determined by that quantitative assessment, to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is considered to be potentially impaired and the Company proceeds to step two of the impairment analysis. In step two of the analysis, the Company determines the amount of any impairment loss by comparing the carrying value of the reporting unit's goodwill to its implied fair value. Periodically, the Company may choose to forgo the initial qualitative assessment and perform only the quantitative analysis in its annual evaluation.

The Company estimates the fair value of the Company's reporting units using either an income approach, a market valuation approach, a transaction valuation approach or a blended approach. The income approach produces an estimated fair value of a reporting unit based on the present value of the cash flows the Company expects the reporting unit to generate in the future. Estimates included in the discounted cash flow model include the discount rate, which the Company determines based on adjusting an industry-wide weighted-average cost of capital for size, geography, and company specific risk factors, long-term rates of growth and profitability of the Company's business, working capital effects and planned capital expenditures. The market approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to comparable publicly traded entities in similar lines of business. The transaction valuation approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to publicly available transactional data involving both publicly traded and private entities in similar lines of business. The Company's significant estimates in both the market and transaction approach include the selected similar companies with comparable business factors such as size, growth, profitability, risk and return on investment and the multiples the Company applies to revenue and earnings before interest, taxes, depreciation and amortization ("EBITDA") to estimate the fair value of the reporting unit.

As discussed in Note 6, *Goodwill and Intangibles*, the Company determined that goodwill was impaired for the WD Services segment during the year ended December 31, 2016, and the Company recorded an asset impairment charge related to its goodwill of $5,224. The Company did not record any impairment charges for continuing operations for the years ended December 31, 2015 and 2014.

Recoverability of Intangible Assets Subject to Amortization and Other Long-Lived Assets

Intangible assets subject to amortization and other long-lived assets are carried at cost and are amortized or depreciated on a straight-line basis over their estimated useful lives of 5 to 15 years. In accordance with ASC 360, *Property, Plant, and Equipment*, the Company reviews the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, the Company assesses the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, the Company estimates the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, the Company records an impairment loss equal to the excess of the carrying value over the estimated fair value. As discussed in Note 6, *Goodwill and Intangibles*, the Company determined that the WD Services segment's intangible assets and property and equipment were impaired during the year ended December 31, 2016, and the Company recorded asset impairment charges of $9,983 and $4,381 to property and equipment and customer relationship intangible assets, respectively.

Accrued Transportation Costs

NET Services contracts with third-party providers for transportation services. Eligible members of our customers schedule transportation through the Company's central reservation system. The cost of transportation is recorded in the month the services are rendered, based upon contractual rates and mileage estimates. Transportation providers provide invoices once the trip is completed. Any trips that have not been invoiced require an accrual, based upon the expected cost as well as an estimate for cancellations, as the Company is generally only obligated to pay the transportation provider for completed trips. These estimates are based upon the historical trend associated with each contract's population and the transportation provider network servicing the program. There may be differences between actual invoiced amounts and estimated costs, and any resulting adjustments are included in expense. Accrued transportation costs were $73,191 and $64,537 at December 31, 2016 and 2015, respectively.

Deferred Financing Costs and Debt Discounts

The Company capitalizes direct expenses incurred in connection with its credit facilities and other borrowings, and amortizes such expenses over the life of the respective credit facility or other borrowings. Fees charged by lenders on the revolving facility and all fees charged by third parties are recorded as deferred financing costs and fees charged by lenders on term loans are recorded as a debt discount. Deferred financing costs, net of amortization, totaling $1,070 as of December 31, 2016 is included in "Other assets", in the consolidated balance sheet as there were no borrowings outstanding under the Company's senior secured credit facility ("Credit Facility"). Deferred financing costs and debt discount, net of amortization totaling $4,879 at December 31, 2015, is included in "Long-term obligations, less current portion," in the consolidated balance sheet.

Revenue Recognition

The Company recognizes revenue when it is earned and realizable based on the following criteria: persuasive evidence that an arrangement exists, services have been rendered, the price is fixed or determinable and collectability is reasonably assured.

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where the Company assumes the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after the contract month, based on a reconciliation of actual utilization and cost compared to the prepayment made.

Fee for service contracts. Revenues earned under fee for service ("FFS") contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established fees which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, the Company arranges for transportation of members through its network of independent transportation providers, whereby it remits payment to the transportation providers. However, for certain contracts, the Company only provides management services, and does not contract with transportation providers for the actual transportation. Under these contracts, the amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services, both of which include employment preparation and placement, apprenticeship and training, youth community service programs and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, the Company often receives four types of revenue streams under contracts with government entities: referral/attachment fees, job placement/job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client is employed, and remains employed for a specified period of time. Sustainment fees are typically payable upon certain employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e. the person is placed in a job or reaches the maximum time period for the program). The estimated period of time services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. If the rate is adjusted but the Company is unable to adjust its costs accordingly, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as "Deferred revenue" until the services are rendered.

Stock-Based Compensation

The Company follows the fair value recognition provisions of ASC Topic 718 – *Compensation – Stock Compensation* ("ASC 718"), which requires companies to measure and recognize compensation expense for all share based payments at fair value.

- The Company calculates the fair value of stock options using the Black-Scholes option-pricing formula. The fair value of non-vested restricted stock grants is determined based on the closing market price of the Company's common stock on the date of grant. Stock-based compensation expense charged against income for stock options and stock grants is based on the grant-date fair value, based upon the number of awards expected to vest. Forfeitures estimated at the time of grant are revised as necessary based upon actual vesting. The expense for stock-based compensation awards is amortized on a straight-line basis over the requisite service period, which is typically the vesting period.

- The Company records restricted stock units ("RSUs") that may be settled by the holder in cash, rather than shares, as a liability and remeasures these liabilities at fair value at the end of each reporting period. Upon settlement of these awards, the total compensation expense recorded over the vesting period of the awards will equal the settlement amount, which is based on the Company's stock price on the settlement date.

- Performance-based RSUs vest upon achievement of certain company specific performance conditions. On the date of grant, the Company determines the fair value of the performance-based award using the fair value of the Company's common stock at that time and it assesses whether it is probable that the performance targets will be achieved. If assessed as probable, the Company records compensation expense for these awards over the requisite service period. At each reporting period, the Company reassesses the probability of achieving the performance targets and the performance period required to meet those targets. The estimation of whether the performance targets will be achieved and of the performance period required to achieve the targets requires judgment, and to the extent actual results or updated estimates differ from the Company's current estimates, the cumulative effect on current and prior periods of those changes will be recorded in the period estimates are revised, or the change in estimate will be applied prospectively depending on whether the change affects the estimate of total compensation cost to be recognized or merely affects the period over which compensation cost is to be recognized. The ultimate number of shares issued and the related compensation expense recognized will be based on a comparison of the final performance metrics to the specified targets.

- The Company calculates the fair value of market-based stock awards, including the Company's the 2015 Holding Company LTI Program (the "HoldCo LTIP") awards, using the Monte-Carlo simulation valuation model. Forfeitures estimated at the time of grant are revised as necessary based upon actual vesting. Compensation expense for market-based awards is recognized over the requisite service period regardless of whether the market conditions are expected to be achieved.

Income Taxes

Deferred income taxes are determined by the liability method in accordance with ASC Topic 740 - *Income Taxes*. Under this method, deferred tax assets and liabilities are determined based on differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. The Company considers many factors when assessing the likelihood of future realization of deferred tax assets, including recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available for tax reporting purposes, as well as other relevant factors. The Company establishes a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. Due to inherent complexities arising from the nature of the Company's businesses, future changes in income tax law or variances between the Company's actual and anticipated operating results, the Company makes certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

The Company has recorded a valuation allowance which includes amounts for net operating losses and tax credit carryforwards, as more fully described in Note 18, *Income Taxes,* for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations.

The Company recognizes interest and penalties related to income taxes as a component of income tax expense.

Residual U.S. income taxes have not been provided on undistributed earnings of the Company's foreign subsidiaries. These earnings are considered to be indefinitely reinvested and, accordingly, no provision for U.S. federal and state income taxes will be provided thereon. Upon distribution of those earnings in the form of dividends or otherwise, the Company may be subject to both U.S. income taxes and withholding taxes payable to various foreign jurisdictions, less an adjustment for foreign tax credits. Funds utilized to repay intercompany amounts are not subject to withholding requirements. Because of the availability of U.S. foreign tax credits, it is not practicable to determine the U.S. federal income tax liability that would be payable if such earnings were not reinvested indefinitely.

The Company accounts for uncertain tax positions based on a two-step process of evaluating recognition and measurement criteria. The first step assesses whether the tax position is more likely than not to be sustained upon examination by the tax authority, including resolution of any appeals or litigation, based on the technical merits of the position. If the tax position meets the more likely than not criteria, the portion of the tax benefit greater than 50% likely to be realized upon settlement with the tax authority is recognized in the consolidated financial statements.

Foreign Currency Translation

Local currencies generally are considered the functional currencies outside the US. Assets and liabilities for operations in local-currency environments are translated at month-end exchange rates of the period reported. Income and expense items are translated at the average exchange rate for each applicable month. Cumulative translation adjustments are recorded as a component of accumulated other comprehensive loss, net of tax, in stockholders' equity within the consolidated balance sheets.

Loss Reserves for Certain Reinsurance and Self-Funded Insurance Programs

The Company reinsures a substantial portion of its automobile, general and professional liability and workers' compensation costs under reinsurance programs through the Company's wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona.

The Company and its subsidiaries enter into insurance arrangements with third-party insurers. SPCIC reinsures third-party insurers for automobile liability exposures for $250 per claim. SPCIC also reinsures these third-party insurers for general and professional liability exposures for the first dollar of each loss up to $1,000 per loss and $3,000 in the aggregate. Additionally, SPCIC reinsures a third-party insurer for worker's compensation insurance for the first dollar of each and every loss up to $500 per occurrence. The Company utilizes a report prepared by an independent actuary to estimate the gross expected losses related to automobile, general and professional and workers' compensation liability, including the estimated losses in excess of SPCIC's insurance limits, which would be reimbursed to SPCIC to the extent such losses were incurred. As of December 31, 2016 and 2015, the Company had reserves of $11,195 and $12,988, respectively, for the automobile, general and professional liability and workers' compensation programs, net of expected receivables for losses in excess of SPCIC's insurance limits. The gross reserve as of December 31, 2016 and 2015 of $16,460 and $19,733, respectively, is classified as "Reinsurance liability reserves" and "Other long-term liabilities" in the consolidated balance sheets. The estimated amount to be reimbursed to SPCIC as of December 31, 2016 and 2015 was $5,265 and $6,745, respectively, and is classified as "Other receivables' and "Other assets" in the consolidated balance sheets.

The Company also maintains a self-funded health insurance program with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims to $275 per person, subject to an aggregating stop-loss limit of $400. In addition, the program has a total stop-loss limit for total claims, in order to limit the Company's exposure to catastrophic claims. With respect to this program, the Company considers historical and projected medical utilization data when estimating its health insurance program liability and related expense. As of December 31, 2016 and 2015, the Company had $3,022 and $2,351, respectively, in reserve for its self-funded health insurance programs. The reserves are classified as "Reinsurance and related liability reserves" in the consolidated balance sheets.

The Company utilizes analyses prepared by third-party administrators and independent actuaries based on historical claims information with respect to the general and professional liability coverage, workers' compensation coverage, automobile liability, automobile physical damage, and health insurance coverage to determine the amount of required reserves.

The Company regularly analyzes its reserves for incurred but not reported claims, and for reported but not paid claims related to its reinsurance and self-funded insurance programs. The Company believes its reserves are adequate. However, significant judgment is involved in assessing these reserves such as assessing historical paid claims, average lags between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known.

Restructuring, Redundancy and Related Reorganization Costs

The Company has engaged in employee headcount optimization actions within the WD Services segment which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans, and are included in accrued expenses to the extent they have not been paid.

Noncontrolling Interests

Noncontrolling interests represent the noncontrolling holders' percentage share of income or losses from a subsidiary in which the Company holds a majority, but less than 100%, ownership interest and the results of which are consolidated and included in the Company's consolidated financial statements. The Company has a 90% ownership in The Reducing Reoffending Partnership Limited, which commenced operations in 2015.

Discontinued Operations

In determining whether a group of assets disposed (or to be disposed) of should be presented as a discontinued operation, the Company makes a determination of whether the criteria for held-for-sale classification is met and whether the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. If these determinations can be made affirmatively, the results of operations of the group of assets being disposed of (as well as any gain or loss on the disposal transaction) are aggregated for separate presentation apart from continuing operating results of the Company in the consolidated financial statements. See Note 21, *Discontinued Operations,* for a summary of discontinued operations.

Earnings Per Share

The Company computes basic earnings per share by taking net income attributable to the Company available to common stockholders divided by the weighted average number of common shares outstanding during the period including restricted stock and stock held in escrow if such shares are participating securities. Diluted earnings per share includes the potential dilution that may occur from stock-based awards and other stock-based commitments using the treasury stock or the as-if converted methods, as applicable. For additional information on how the Company computes earnings per share, see Note 15, *Earnings Per Share*.

Fair Value of Financial Instruments

The Company discloses the fair value of its financial instruments based on the fair value hierarchy using the following three categories:

Level 1 – Quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company may be required to pay additional consideration in relation to certain acquisitions based on the achievement of certain earnings targets. Acquisition-related contingent consideration is initially measured and recorded at fair value as an element of consideration paid in connection with an acquisition with subsequent adjustments recognized in "General and administrative expense" in the consolidated statements of income. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value using a discounted probability-weighted approach. This approach takes into consideration Level 3 unobservable inputs including probability assessments of expected future cash flows over the period in which the obligation is expected to be settled and applies a discount factor that captures the uncertainties associated with the obligation. Changes in these unobservable inputs could significantly impact the fair value of the obligation recorded in the accompanying consolidated balance sheets and operating expenses in the consolidated statements of income.

The carrying amounts of cash and cash equivalents, restricted cash, accounts receivable and accounts payable approximate their fair value because of the relatively short-term maturity of these instruments.

Recent Accounting Pronouncements

The Company adopted the following accounting pronouncements during the year ended December 31, 2016:

In April 2015, the FASB issued ASU 2015-03, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The Company capitalizes debt issuance costs incurred in connection with its credit facilities, line-of-credit, and other borrowings ("deferred financing costs"), and amortizes such costs over the life of the respective debt liability. Upon adoption of ASU 2015-03 on January 1, 2016, the Company elected to present deferred financing costs for both its credit facilities and line-of credit arrangement as a direct deduction from the carrying amount of the respective debt liability. Accordingly, deferred financing costs, net of amortization, totaling $3,774 at December 31, 2015 have been reclassified from "Other assets" to "Long-term obligations, less current portion" in the consolidated balance sheet.

In February 2015, the FASB issued ASU No. 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis* ("ASU 2015-02"), which changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a variable interest entity ("VIE"), and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. The new consolidation guidance is effective for public business entities for annual and interim periods in fiscal years beginning after December 15, 2015. The adoption of ASU 2015-02 on January 1, 2016 had no impact on the consolidation of the Company's existing VIEs.

In September 2015, the FASB issued ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments* ("ASU 2015-16") which eliminates the requirement for an acquirer to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. The ASU is effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. The Company adopted ASU 2015-16 on January 1, 2016. The adoption of this ASU did not have an impact on the Company's current accounting and disclosures; however, any future business acquisition transactions may be impacted.

Recent accounting pronouncements that were not yet adopted by the Company through December 31, 2016 are as follows:

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers: Topic 606* ("ASU 2014-09"). ASU 2014-09 introduced FASB Accounting Standards Codification Topic 606 ("ASC 606"). ASC 606 will supersede ASC 605, *Revenue Recognition* and most of the industry-specific guidance on recognizing revenue. The FASB has since issued the following updates that clarify or supplement the guidance in ASU 2014-09:

- In December 2016, the FASB issued ASU No. 2016-20, *Revenue from Contracts with Customers (Topic 606): Technical Corrections and Improvements* ("ASU 2016-20"). ASU 2016-20 makes several narrow-scope improvements or clarifications to ASC 606. Most notably, ASU 2016-20 provides additional guidance on testing contract costs for impairment, applying the guidance on contract modifications, and determining the point at which a contract asset becomes a receivable. Additionally, ASU 2016-20 clarifies the information an entity should include in the disclosure of remaining performance obligations and provides an optional exemption from those disclosure requirements in situations in which an entity is not required to estimate variable consideration to recognize revenue.
- In May 2016, the FASB issued ASU No. 2016-12, *Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients* ("ASU 2016-12"). ASU 2016-12 clarifies how an entity should assess collectability, present sales taxes, measure noncash consideration and apply some aspects of the transition guidance in ASU 2014-09.
- In April 2016, the FASB issued ASU No. 2016-10, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing* ("ASU 2016-10"). ASU 2016-10 clarifies the guidance in ASU 2014-09 for identifying performance obligations and recognizing revenue for licenses of intellectual property.
- In March 2016, the FASB issued ASU No. 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* ("ASU 2016-08"). ASU 2016-08 clarifies the implementation guidance in ASU 2014-09 on principal versus agent considerations and whether an entity should report revenue on a gross or net basis.

Each of these ASUs are effective for public companies for annual reporting periods (and interim reporting periods within those annual reporting periods) beginning after December 15, 2017 and permit entities to transition using either a full retrospective or modified retrospective methodology. The Company has developed an implementation plan, assembled a cross-functional project team and begun to assess the impacts of applying ASC 606 by completing an analysis of the Company's contracts with its customers. Based upon these preliminary procedures, management anticipates that the following key considerations will impact the Company's accounting and reporting under the new standard:

- identification of what constitutes a contract in the Company's environment,
- timing of revenue recognition (for example, point-in-time versus over time and/or accelerated versus deferred),
- single versus multiple performance obligations, and

- other considerations.

The assessment of applying ASC 606 is ongoing and, therefore, the Company has not yet determined whether those impacts will be material to the Company's consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* ("ASU 2015-17") which changes how deferred taxes are classified on organizations' balance sheets. The ASU eliminates the current requirement for organizations to present deferred tax liabilities and assets as current and noncurrent in a classified balance sheet. Instead, organizations will be required to classify all deferred tax assets and liabilities as noncurrent. The amendments apply to all organizations that present a classified balance sheet. For public companies, the amendments are effective for financial statements issued for annual periods beginning after December 16, 2016, and interim periods within those annual periods. The Company adopted ASU 2015-17 on January 1, 2017. This ASU impacts the Company's financial statements, as the Company had $6,825 of current deferred tax assets, at December 31, 2016. Application of this guidance as of December 31, 2016 would have resulted in a long-term deferred tax asset of $1,510 and a long-term deferred tax liability of $57,973 in the consolidated balance sheet as of December 31, 2016.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* ("ASU 2016-02"). ASU 2016-02 introduced FASB Accounting Standards Codification Topic 842 ("ASC 842"), which will replace ASC 840, *Leases*. Under ASC 842, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.

ASU 2016-02 is effective for publicly held entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Lessees must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach does not require transition accounting for leases that expired before the earliest comparative period presented. Lessees may not apply a full retrospective transition approach. The Company has not entered into significant lease agreements in which it is the lessor; however, the Company does have lease agreements in which it is the lessee. The Company is in the preliminary stages of assessing the impact of applying ASC 842 to its lease agreements. The assessment of applying ASU 2016-02 is ongoing and, therefore, the Company has not yet determined whether the impacts will be material to the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-07, *Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting* ("ASU 2016-07"). ASU 2016-07 eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. ASU 2016-07 instead specifies that the investor should add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and apply the equity method of accounting as of the date the investment became qualified for equity method accounting. ASU 2016-07 is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 and should be applied prospectively. The Company adopted ASU 2016-07 on January 1, 2017. The adoption of ASU 2016-07 will impact the Company's accounting and disclosures for investments for which it begins applying the equity method after January 1, 2017.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* ("ASU 2016-09"). ASU 2016-09 is intended to improve the accounting for employee share-based payments and affect all organizations that issue share-based payment awards to their employees. Several aspects of the accounting for share-based payment award transactions are simplified, including income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company adopted ASU 2016-09 on January 1, 2017, and elected to recognize forfeitures as they occur. The Company also elected to apply the change in classification of cash flows resulting from excess tax benefits or deficiencies on a retrospective basis. The adoption resulted in the Company recording a cumulative effect adjustment to retained earnings on January 1, 2017 totaling $841 for the differential between the amount of compensation cost previously recorded and the amount that would have been recorded without an applied estimated forfeiture assumption, as well as the recognition of previously unrecognized excess tax benefits of $6,507 through a cumulative effect adjustment to retained earnings as of January 1, 2017.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses (Topic 326)* ("ASU 2016-13"). The amendments in ASU 2016-13 will supersede or clarify much of the existing guidance for reporting credit losses for assets held at amortized cost basis and available for sale debt securities. The amendments in ASU 2016-13 affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. ASU 2016-13 is effective for financial statements issued for fiscal years beginning after December 15, 2019, with early adoption permitted for fiscal years beginning after December 15, 2018. The Company has not evaluated the impact of ASU 2016-13 on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"). ASU 2016-15 provides guidance for eight targeted changes with respect to how cash receipts and cash payments are classified in the statements of cash flows, with the objective of reducing diversity in practice. ASU 2016-15 is effective for financial statements issued for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company currently is evaluating the impact the adoption of this ASU will have on the presentation of the Company's consolidated statements of cash flows.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* ("ASU 2016-18"). ASU 2016-18 requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for public entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period, however, any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. ASU 2016-18 must be adopted retrospectively. The Company currently is evaluating the impact the adoption of ASU 2016-18 will have on the presentation of the Company's consolidated statements of cash flows.

3. Equity Investment

Mission Providence

The Company entered into a joint venture agreement in November 2014 to form Mission Providence Pty Ltd ("Mission Providence"). Mission Providence delivers employment preparation and placement services in Australia. The Company has a 60% ownership interest in Mission Providence, and has rights to 75% of Mission Providence's distributions of cash or profit surplus twice per calendar year. The Company provided $8,000 and $16,072 in capital contributions in 2016 and 2015, respectively, to Mission Providence.

The Company determined it has a variable interest in Mission Providence. However, it does not have unilateral power to direct the activities that most significantly impact Mission Providence's economic performance, which include budget approval, business planning, the appointment of key officers and liquidation and distribution of share capital. As a result, the Company is not the primary beneficiary of Mission Providence. The Company accounts for this investment under the equity method of accounting and the Company's share of Mission Providence's losses are recorded as "Equity in net loss of investees" in the accompanying consolidated statements of income. Cash contributions made to Mission Providence in exchange for its equity interests are included in the consolidated statements of cash flows as "Equity investments." The investment is accounted for as part of WD Services.

The following table summarizes the carrying amounts of the assets and liabilities included in the Company's consolidated balance sheet and the maximum loss exposure related to the Company's interest in Mission Providence as of December 31, 2016 and 2015:

	Equity Investments	Accrued Expenses	Maximum Exposure to Loss
December 31, 2016	$ 4,021	$ -	$ 4,021
December 31, 2015	$ 9,324	$ 4,654	$ 9,324

Summary financial information for Mission Providence on a standalone basis is as follows:

	December 31, 2016	December 31, 2015
Current assets	$ 4,640	$ 7,789
Long-term assets	10,473	8,869
Current liabilities	12,844	10,488
Long-term liabilities	1,655	-

	Year ended December 31,	
	2016	2015
Revenue	$ 36,546	$ 11,206
Operating loss	(9,664)	(19,397)
Net loss	(8,843)	(13,106)

Matrix

As a result of the Matrix Transaction, the Company's remaining ownership in Matrix is a noncontrolling interest effective October 19, 2016. In addition, pursuant to a Shareholder's Agreement, the third-party subscriber holds rights necessary to control the fundamental operations of Matrix. The Company accounts for this investment under the equity method of accounting and the Company's share of Matrix's losses are recorded as "Equity in net loss of investee" in the accompanying consolidated statements of income. The Company's retained interest of 46.8% in Matrix upon the closing of the stock subscription transaction was recorded at fair value based upon the fair value of the subscriber's 53.2% interest in Matrix. See additional information on the transaction in Note 21, *Discontinued Operations*.

The carrying amount of the assets included in the Company's consolidated balance sheet and the maximum loss exposure related to the Company's interest in Matrix as of December 31, 2016 totaled $157,202.

Summary financial information for Matrix on a standalone basis is as follows:

	December 31, 2016
Current assets	$ 28,589
Long-term assets	614,841
Current liabilities	25,791
Long-term liabilities	281,348

	October 19, 2016 through December 31, 2016
Revenue	$ 41,635
Operating loss	(4,079)
Net loss	(4,200)

Included in Matrix's operating loss is depreciation and amortization of $6,356 and transaction related expenses of $6,367, which includes $4,033 of transaction incentive compensation.

4. Prepaid Expenses and Other

Prepaid expenses and other were comprised of the following:

	December 31,	
	2016	2015
Prepaid income taxes	$ 1,467	$ 1,607
Escrow funds	10,000	-
Prepaid insurance	3,153	2,971
Prepaid taxes and licenses	3,570	4,895
Note receivable	3,130	-
Prepaid rent	2,013	2,235
Deposits held for leased premises and bonds	2,609	2,574
Other	12,139	13,342
Total prepaid expenses and other	$ 38,081	$ 27,624

Escrow funds relate to the sale of the Human Services segment, which was completed on November 1, 2015. The escrow funds are scheduled to be released fifteen months following the closing, although the amount to be released is subject to reduction to the extent indemnified representation and warranty claims are identified and agreed with the buyer. During 2016, the Company recorded $6,000 in Accrued Liabilities, as an estimate of potential claims against the escrow funds, and as such, the escrow funds have not yet been released. See Note 19, *Commitments and Contingencies*, for further information.

5. Property and Equipment

Property and equipment consisted of the following:

	Estimated Useful Life (years)	December 31, 2016	December 31, 2015
Land	--	$ -	$ 1,182
Building	39	-	5,214
Computer and telecom equipment	3 - 5	31,854	27,046
Software	3 - 5	26,883	19,497
Leasehold improvements	Shorter of 7 years or lease term	16,720	16,122
Furniture and fixtures	5 - 10	8,070	5,815
Automobiles	5	3,597	3,471
Construction and development in progress	--	5,831	1,956
		92,955	80,303
Less accumulated depreciation		46,735	34,145
Total property and equipment, net		$ 46,220	$ 46,158

Depreciation expense from continuing operations was $18,038, $14,488 and $10,241 for the years ended December 31, 2016, 2015 and 2014, respectively.

The Company sold the building and land that included holding company office space in Arizona effective December 30, 2016 resulting in an asset impairment charge of $1,415 for the year ended December 31, 2016. The Company recorded an asset impairment charge of $9,983 related to its WD Services segment based on its review of the carrying value of long-lived assets. The impairment charges are reflected in “Asset impairment charge” in the consolidated statement of income for the year ended December 31, 2016. See Note 6, *Goodwill and Intangibles,* for further discussion of the impairment charges incurred related to the WD Services segment during 2016.

6. Goodwill and Intangibles

Impairment

During the fourth quarter of 2016, the Company reviewed WD Services for impairment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the United Kingdom ("UK") impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with the carrying amounts and recorded an asset impairment charge of $4,381 to definite-lived customer relationship intangible assets, which is recorded in "Asset impairment charge" on the Company's consolidated statement of operations. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an asset impairment charge of $5,224, which is included in "Asset impairment charge" on the Company's consolidated statement of operations.

The Company reviewed the carrying value of other long-lived assets and goodwill, and noted no indicators of impairment for NET Services or the Matrix Investment.

Goodwill

Changes in goodwill were as follows:

	NET Services	WD Services	Consolidated Total
Balances at December 31, 2014			
Goodwill	$ 191,215	$ 42,662	$ 233,877
Accumulated impairment losses	(96,000)	(6,041)	(102,041)
	95,215	36,621	131,836
Foreign currency translation adjustment	-	(1,878)	(1,878)
Balances at December 31, 2015			
Goodwill	191,215	40,784	231,999
Accumulated impairment losses	(96,000)	(6,041)	(102,041)
	95,215	34,743	129,958
Asset impairment charge	-	(5,224)	(5,224)
Foreign currency translation adjustment	-	(5,110)	(5,110)
Balances at December 31, 2016			
Goodwill	191,215	35,674	226,889
Accumulated impairment losses	(96,000)	(11,265)	(107,265)
	$ 95,215	$ 24,409	$ 119,624

The total amount of goodwill that was deductible for income tax purposes related to acquisitions as of December 31, 2016 and 2015 was $4,222.

Intangible Assets

Intangible assets are comprised of acquired customer relationships, trademarks and trade names, and developed technology. Intangible assets consisted of the following:

		December 31,			
		2016		2015	
	Estimated Useful Life (Yrs)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	15	$ 48,020	$ (29,941)	$ 47,973	$ (26,804)
Customer relationships	10	27,915	(8,147)	38,688	(6,126)
Trademarks and Trade Names	10	13,282	(3,431)	15,936	(2,523)
Developed technology	5	2,951	(1,525)	3,541	(1,121)
Total		$ 92,168	$ (43,044)	$ 106,138	$ (36,574)

The gross carrying amount as of December 31, 2016 includes the asset impairment charge of $4,381 to definite-lived customer relationship intangible assets of WD Services. The weighted-average amortization period at December 31, 2016 for intangibles with a definite life was 12.4 years. No significant residual value is estimated for these intangible assets. Amortization expense from continuing operations was $8,566, $9,510 and $6,973 for the years ended December 31, 2016, 2015 and 2014, respectively. The total amortization expense is estimated to be as follows for the next five years and thereafter as of December 31, 2016 based upon the applicable foreign exchange rates as of December 31, 2016:

Year	Amount
2017	$ 7,682
2018	7,682
2019	7,338
2020	7,092
2021	7,017
Thereafter	12,313
Total	$ 49,124

7. Accrued Expenses

Accrued expenses consisted of the following:

	December 31,	
	2016	2015
Accrued compensation	$ 23,050	$ 20,523
NET Services accrued contract payments	32,001	26,669
Income taxes payable	372	24,200
Other	45,449	46,044
Total accrued expenses	$ 100,872	$ 117,436

8. Restructuring, Redundancy and Related Reorganization Costs

In the fourth quarter of 2016, WD Services approved a redundancy plan related to the termination of employees as part of a value enhancement project ("Ingeus Futures' Program") to better align costs at Ingeus with revenue. In the fourth quarter of 2015, WD Services approved two redundancy plans. The first plan relates to the termination of employees delivering services under an offender rehabilitation program ("Offender Rehabilitation Program"). The second plan primarily relates to the termination of employees delivering services under the Company's employability and skills training programs and certain other employees in the UK ("UK Restructuring Program"). The Company recorded severance and related charges of $8,511 and $10,551 during the years ended December 31, 2016 and 2015, respectively, relating to the termination benefits for employee groups and specifically identified employees impacted by these plans. The severance charges incurred are recorded as "Service expense" in the accompanying consolidated statements of income.

The initial estimate of severance and related charges at December 31, 2015 for the Offender Rehabilitation Program and UK Restructuring Program and at December 31, 2016 for the Ingeus Futures' Program was based upon the employee groups impacted, average salary and benefits, and redundancy benefits pursuant to the existing policies. The charges incurred for the Offender Rehabilitation Program and UK Restructuring Program during 2016 related to the actualization of termination benefits for specifically identified employees impacted, as well as an increase in the number of individuals impacted by these plans. The final identification of the employees impacted by each program is subject to customary consultation procedures. Additionally, the Company anticipates the potential for further redundancy expenses under the Ingeus Futures' Program as further costs become estimable.

Summary of Severance and Related Charges

	January 1, 2016	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2016
Ingeus Futures' Program	$ -	$ 2,456	$ -	$ (29)	$ 2,427
Offender Rehabilitation Program	6,538	4,865	(8,924)	(1,099)	1,380
UK Restructuring Program	2,059	1,190	(3,031)	(109)	109
Total	$ 8,597	$ 8,511	$ (11,955)	$ (1,237)	$ 3,916

	January 1, 2015	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2015
Offender Rehabilitation Program	$ -	$ 8,465	$ (1,839)	$ (88)	$ 6,538
UK Restructuring Program	-	2,086	-	(27)	2,059
Total	$ -	$ 10,551	$ (1,839)	$ (115)	$ 8,597

The total of accrued severance and related costs of $3,916 and $8,597 are reflected in "Accrued expenses" in the consolidated balance sheets at December 31, 2016 and 2015, respectively. The amount accrued as of December 31, 2016 for the Ingeus Futures' Program, Offender Rehabilitation Program and UK Restructuring Program is expected to be settled by the end of 2017.

9. Fair Value Measurements

The fair value of liabilities measured at fair value on a recurring basis was zero at December 31, 2016 and 2015. There were no transfers between Level 1 and Level 2, or into or out of Level 3, during 2016 and 2015.

The changes in Level 3 liabilities measured at fair value on a recurring basis were as follows for the years ended December 31, 2015 and 2014:

	Contingent Consideration Liabilities	
	December 31, 2015	December 31, 2014
Balance at the beginning of year	$ 10,549	$ -
Initial valuation upon acquistion	-	30,095
Payments	(7,496)	-
Gain in general and administrative expense	(2,469)	(16,314)
Foreign exchange revaluation	(584)	(3,232)
Balance at end of year	$ -	$ 10,549

There were no events that occurred during the year ended December 31, 2016 that would indicate a fair value greater than zero for the contingent consideration liabilities. The valuation techniques and significant unobservable inputs used in recurring Level 3 fair value measurements were as follows at December 31, 2015:

December 31, 2015	Fair Value	Valuation Technique	Significant Unobservable Inputs	Value
Contingent consideration liabilities	$ -	Discounted probability-weighted approach	Discount rate	14.12%

Financial liabilities that were not remeasured at fair value were as follows:

		December 31, 2016		December 31, 2015	
	Fair Value Level	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial liabilities					
Credit facility	3	$ -	$ -	$ 304,950	$ 308,892

10. Long-Term Obligations

The Company's long-term obligations were as follows:

	December 31, 2016	December 31, 2015
$200,000 revolving loan, LIBOR plus 2.25% - 3.25% with interest payable at least once every three months through August 2018	$ -	$ 19,700
$250,000 term loan, LIBOR plus 2.25% - 3.25% with principal payable quarterly beginning March 31, 2015 and interest payable at least once every three months, repaid October 2016	-	231,250
$60,000 term loan, LIBOR plus 2.25% - 3.25% with principal payable quarterly beginning December 31, 2014 and interest payable at least once every three months, repaid October 2016	-	54,000
Capital lease obligations	3,611	-
	3,611	304,950
Unamortized discount on debt	-	(4,879)
	3,611	300,071
Less current portion	1,721	31,375
Total long-term obligations, less current portion	$ 1,890	$ 268,696

Unamortized discount on debt as of December 31, 2015 includes $3,774 of deferred financing costs related to the Company's term loans and revolving loan. As described below, in conjunction with the Matrix Transaction, the Company permanently repaid the outstanding term loans and reduced the capacity under the revolving loan. As of December 31, 2016, there were no borrowings outstanding under the revolving loan, and thus the deferred financing costs of $1,070 are included in Other Assets.

Annual maturities of capital lease obligations as of December 31, 2016 are as follows:

Year	Amount
2017	$ 1,721
2018	1,763
2019	127
Total	$ 3,611

Current Credit Facility and Impact of the Matrix Transaction

On August 28, 2016, the Company entered into the Fourth Amendment and Consent (the "Fourth Amendment") to the Amended and Restated Credit and Guaranty Agreement (as amended, modified or supplemented, the "Credit Agreement"). The Fourth Amendment provided for the lenders' consent to the Matrix Transaction and additionally required the net cash proceeds received by the Company be applied first, to the prepayment of outstanding term loans, second, to the prepayment of outstanding revolving loans and third, for any purpose not prohibited by the Credit Agreement. Additionally, effective following the repayment of the outstanding term loans in full on October 20, 2016, the Fourth Amendment further (i) reduced the aggregate revolving commitments under the Credit Agreement to $200,000, (ii) amended the consolidated net leverage ratio covenant such that the Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter, (iii) replaced the existing consolidated fixed charge coverage ratio covenant with a covenant that the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter and (iv) amended the Credit Agreement to make certain other changes to the terms thereof.

The outstanding loans under the Credit Facility were fully paid on October 20, 2016. No further amounts may be borrowed under the term loan facility. Upon the repayment, the Company wrote-off the deferred financing fees associated with the term loans, as well as a portion of deferred financing fees associated with the Credit Facility due to the reduction of the aggregate revolving commitment. The total write-off was $2,302 which is included in "Discontinued operations, net of tax" in the accompanying consolidated statement of income for the year ended December 31, 2016.

The Company had no borrowings outstanding under the Credit Facility as of December 31, 2016. $25,000 of the Credit Facility is available to collateralize certain letters of credit. As of December 31, 2016, six letters of credit in the amount of $5,414 were outstanding. At December 31, 2016, the Company's available credit under the Credit Facility was $194,586.

The Company's obligations under the Credit Facility are guaranteed by all of the Company's present and future domestic subsidiaries, excluding certain domestic subsidiaries which include the Company's insurance captives. The Company's obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of the Company's respective assets, including a pledge of 100% of the issued and outstanding stock of the Company's domestic subsidiaries, excluding the Company's insurance captives, and 65% of the issued and outstanding stock of the Company's first tier foreign subsidiaries. However, in connection with the completion of the Matrix stock subscription, Matrix was released as a guarantor of the Company's obligations under its Credit Agreement and Matrix's property is no longer pledged to secure such obligations.

Credit Facility Background

On August 2, 2013, the Company entered the Credit Agreement with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, SunTrust Bank, as syndication agent, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson Humphrey, Inc., as joint lead arrangers and joint book managers, and other lenders party thereto. The Credit Agreement provided the Company with the Credit Facility in the aggregate principal amount of $225,000, comprised of a $60,000 term loan facility and a $165,000 revolving credit facility. The Credit Facility includes sublimits for swingline loans and letters of credit in amounts up to $10,000 and $25,000, respectively. On August 2, 2013, the Company borrowed the entire amount available under the term loan facility and $16,000 under the revolving credit facility and used the proceeds thereof to refinance certain of the Company's existing indebtedness.

On May 28, 2014 the Company entered into the First Amendment to the Credit Agreement (the "First Amendment"). The First Amendment provided for, among other things, an increase in the aggregate amount of the revolving credit facility from $165,000 to $240,000 and other modifications in connection with the consummation of the acquisition of Ingeus.

On October 23, 2014, the Company entered into the Second Amendment to the Credit Agreement (the "Second Amendment") to amend the Credit Facility to (i) add a new term loan tranche in the aggregate principal amount of up to $250,000 to partly finance the acquisition of Matrix, (ii) provide the consent of the required lenders to consummate the acquisition of Matrix, (iii) permit incurrence of additional debt to fund the acquisition of Matrix and, (iv) add an excess cash flow mandatory prepayment provision.

On September 3, 2015, the Company entered into the Third Amendment to the Credit Agreement (the "Third Amendment") to amend the Credit Agreement to (i) allow the lenders under the Credit Agreement to consent to the Company's sale of the Human Services segment, provided that a minimum amount equal to 50% of the net cash proceeds, as defined in the Credit Agreement, of the sale is applied pro rata to the prepayment of revolving loans and swingline loans under the Credit Agreement and (ii) allow the lenders to consent to the Company's use of 50% of the net cash proceeds of the sale to make restricted payments to repurchase common stock pursuant to a Providence stock repurchase program. The Third Amendment provided for amendments to the terms of the Credit Agreement to reflect such consents.

Under the Credit Agreement, as amended through the Fourth Amendment, the Company has an option to request an increase in the amount of the revolving credit facility and/or the term loan facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75,000 with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. The Company may not be able to access additional funds under this option as no lender is obligated to participate in any such increase under the Credit Facility.

The Credit Facility matures on August 2, 2018. The Company may prepay the Credit Facility in whole or in part, at any time without premium or penalty, subject to reimbursement of the lenders' breakage and redeployment costs in connection with prepayments of London Interbank Offered Rate, or LIBOR, loans. The unutilized portion of the commitments under the Credit Facility may be irrevocably reduced or terminated by the Company at any time without penalty.

Interest on the outstanding principal amount of the loans accrues, at the Company's election, at a per annum rate equal to LIBOR, plus an applicable margin, or the base rate as defined in the agreement plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on the Company's consolidated leverage ratio as defined in the Credit Agreement. Interest on the loans is payable quarterly in arrears. In addition, the Company is obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on the Company's consolidated leverage ratio.

The Credit Facility also requires the Company (subject to certain exceptions as set forth in the Amended and Restated Credit Agreement) to prepay the outstanding loans in an aggregate amount equal to 100% of the net cash proceeds received from certain asset dispositions, debt issuances, insurance and casualty awards and other extraordinary receipts.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on the Company's ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, sell assets and merge and consolidate. The Company is subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants.

Capital Leases

NET Services has four capital leases for information technology equipment with termination dates ranging from January 2018 through September 2019. The terms of the leases are between 21 and 36 months, with interest recorded at an incremental borrowing rate of 3.28%. At December 31, 2016, $4,571 represents equipment under capital leases and $460 represents accumulated depreciation recognized on this leased equipment.

11. Convertible Preferred Stock, Net

The Company completed a rights offering on February 5, 2015 (the "Rights Offering") providing all of the Company's existing common stock holders the non-transferrable right to purchase their pro rata share of $65,500 of convertible preferred stock at a price equal to $100.00 per share ("Preferred Stock"). The Preferred Stock is convertible into shares of Providence's Company's common stock, $0.001 par value per share ("Common Stock) at a conversion price equal to $39.88 per share, which was the closing price of the Company's Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement (the "Standby Purchase Agreement") between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC (collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock were purchased by the Standby Purchasers at the $100.00 per share subscription price. The Company received $65,500 in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement. Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's Preferred Stock, at a purchase price of $105.00 per share or a total purchase price of $15,750, of the same series and having the same conversion price as the Preferred Stock sold in the Rights Offering.

The Company may pay a noncumulative cash dividend on each share of Preferred Stock, if and when declared by a committee of its Board of Directors ("Board"), at the rate of five and one-half percent (5.5%) per annum on the liquidation preference then in effect. On or before the third business day immediately preceding each fiscal quarter, the Company must determine its intention whether or not to pay a cash dividend with respect to that ensuing quarter and will give notice of its intention to each holder of Preferred Stock as soon as practicable thereafter.

In the event the Company does not declare and pay a cash dividend, the Company will declare a paid in kind ("PIK") dividend by increasing the liquidation preference of the convertible Preferred Stock to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to the liquidation preference then in effect multiplied by eight and one-half percent (8.5%) per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination. All holders of the Company's Preferred Stock are able to convert their Preferred Stock into shares of Common Stock at a rate of approximately 2.51 shares of Common Stock for each share of Preferred Stock. As of December 31, 2016, 1,602 shares of Preferred Stock have been converted to 4,015 shares of Common Stock.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, which commenced on April 1, 2015, and, if declared, begin to accrue on the first day of the applicable dividend period. PIK dividends, if applicable, accrue cumulatively on the same schedule as set forth above for cash dividends and are also compounded at the applicable annual rate on each applicable subsequent dividend date. Cash dividends totaling $4,419 and $3,928 were distributed to convertible preferred stockholders for the years ended December 31, 2016 and 2015, respectively.

The Preferred Stock is accounted for outside of stockholders' equity as it may be redeemed upon certain change in control events that are not solely in the control of the Company. Dividends are recorded in stockholders' equity and consist of the 5.5%/8.5% dividend. At the time of issuance of the Preferred Stock, the Company recorded a discount on Preferred Stock related to beneficial conversion features that arose due to the closing price of the Company's Common Stock being higher than the conversion price of the Preferred Stock on the commitment date. The amortization of this discount was recorded in stockholders' equity. The discount was fully amortized as of June 30, 2015.

The following table summarizes the Preferred Stock activity for the years ended December 31, 2016 and 2015:

	Dollar Value	Share Count
Balance at December 31, 2014	$ -	-
Shares issued	81,250	805,000
Issuance costs	(3,531)	-
Beneficial conversion feature	(1,071)	-
Amortization of beneficial conversion feature	1,071	-
Conversion to common stock	(149)	(1,482)
Allocation of issuance costs	6	-
Balance at December 31, 2015	$ 77,576	803,518
Conversion to common stock	(12)	(120)
Allocation of issuance costs	1	-
Balance at December 31, 2016	$ 77,565	803,398

As of December 31, 2016 and 2015, the outstanding shares of Preferred Stock were convertible into 2,014,538 and 2,014,840 shares of Common Stock, respectively.

12. Stockholders' Equity

At December 31, 2016 and 2015 there were 17,315,661 and 17,186,780 shares of the Company's Common Stock issued, respectively, including 3,478,676 and 1,895,998 treasury shares at December 31, 2016 and 2015, respectively.

Subject to the rights specifically granted to holders of any then outstanding shares of the Company's Preferred Stock, the Company's common stockholders are entitled to vote together as a class on all matters submitted to a vote of the Company's common stockholders, and are entitled to any dividends that may be declared by the Board. The Company's common stockholders do not have cumulative voting rights. Upon the Company's dissolution, liquidation or winding up, holders of the Company's Common Stock are entitled to share ratably in the Company's net assets after payment or provision for all liabilities and any preferential liquidation rights of the Company's Preferred Stock then outstanding. The Company's common stockholders do not have preemptive rights to purchase shares of the Company's stock. The issued and outstanding shares of the Company's Common Stock are not subject to any redemption provisions and are not convertible into any other shares of the Company's capital stock. The rights, preferences and privileges of holders of the Company's Common Stock will be subject to those of the holders of any shares of the Company's Preferred Stock the Company may issue in the future.

During the year ended December 31, 2014, the sellers of WCG International Consultants Ltd. ("WCG") surrendered 39,162 exchangeable shares of PSC of Canada Exchange Corp. ("PSC") to fulfill their obligation to the Company for the settlement of a dispute and the reimbursement of legal fees. These shares were converted to shares of the Company and transferred to treasury. Additionally, 222,532 exchangeable shares of PSC were exchanged into shares of Common Stock of the Company and distributed to the sellers of WCG, thus eliminating the related noncontrolling interest balance as of December 31, 2014.

During the year ended December 31, 2014, the Company issued stock, with certain escrow restrictions, in conjunction with the acquisitions of Ingeus and Matrix.

The following table reflects the total number of shares of the Company's Common Stock reserved for future issuance as of December 31, 2016:

Shares of common stock reserved for:	
Exercise of stock options and restricted stock awards	437,930
Conversion of preferred stock to common stock	2,014,538
Issuance of Performance Restricted Stock Units	49,208
Total shares of common stock reserved for future issuance	2,501,676

Share Repurchases

On February 1, 2007, the Board approved a stock repurchase program for up to one million shares of its Common Stock under which the Company spent $14,376 to purchase 756,100 shares of its Common Stock in the open market through December 31, 2012. No repurchases have been made since 2012. This program was formally terminated in January 2016.

On October 14, 2015, the Company entered into an agreement to repurchase 707,318 of its Common Stock held by former stockholders of Matrix for an aggregate purchase price of $29,000 (or $41.00 per share). The Company funded this purchase through a combination of borrowing on its Credit Facility and cash on hand. The purchase of these shares was completed on October 30, 2015.

On November 4, 2015, the Board authorized the Company to engage in a repurchase program to repurchase up to $70,000 in aggregate value of the Company's Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $62,981, excluding commission payments.

On October 26, 2016, the Board authorized a new repurchase program, under which the Company may repurchase up to $100,000 in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. As of December 31, 2016, 328,843 shares were purchased through this plan for $12,377, excluding commission payments.

During the years ended December 31, 2016, 2015 and 2014, the Company repurchased 2,736, 15,961 and 18,504 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations arising from vesting of restricted stock awards. In addition, in 2015, the Company withheld 5,718 shares for the payment of the exercise price upon the exercise of stock options and 43,743 shares to cover the settlement of income tax and related benefit withholding obligations arising from shares held by employees that were released from escrow related to the Matrix acquisition, which shares are treated as treasury stock.

13. Stock-Based Compensation and Similar Arrangements

The Company provides stock-based compensation to employees, non-employee directors, consultants and advisors under the Company's 2006 Long-Term Incentive Plan ("2006 Plan"). The 2006 Plan allows the flexibility to grant or award stock options, stock appreciation rights, restricted stock, unrestricted stock, stock units including restricted stock units and performance awards to eligible persons. The following table summarizes the activity under the 2006 Plan as of December 31, 2016:

	Number of shares of the Company's common stock authorized for issuance	Number of shares of the Company's common stock remaining available for future grants	Number of shares of the Company's common stock subject to	
			Stock Options	Stock Grants
2006 Plan	5,400,000	2,324,927	355,598	131,540

The following table reflects the amount of stock-based compensation, for share settled awards issued to employees and non-employee directors, recorded in each financial statement line item for the years ended December 31, 2016, 2015 and 2014:

	Year ended December 31,		
	2016	2015	2014
Service expense	$ 830	$ 21,480	$ 4,019
General and administrative expense	4,324	5,027	3,537
Discontinued operations, net of tax	(18)	115	6
Total stock-based compensation	$ 5,136	$ 26,622	$ 7,562

Stock-based compensation included in service expense is related to the following segments:

	Year ended December 31,		
	2016	2015	2014
NET Services	$ 841	$ 724	$ 587
WD Services (a)	(11)	20,756	3,432
Total stock-based compensation in service expense	$ 830	$ 21,480	$ 4,019

(a) WD Services includes $16,078 for the year ended December 31, 2015 related to the acceleration of awards pursuant to the separation agreements for two executives.

The amounts above exclude the tax benefit of $2,072, $2,322 and $1,570 for the years ended December 31, 2016, 2015 and 2014, respectively. For the years ended December 31, 2016, 2015 and 2014, the amount of excess tax benefits resulting from the exercise of stock options was $282, $2,857 and $2,722, respectively. For the years ended December 31, 2016, 2015 and 2014, the Company had tax shortfalls resulting from the exercise of stock options of $558, $151 and $38, respectively. The excess tax benefits resulting from the exercise of stock options are reflected as cash flows from financing activities for the years ended December 31, 2016, 2015 and 2014 in the consolidated statements of cash flows.

Stock Options

During the year ended December 31, 2016, the Company did not grant any stock options. The fair value of each stock option awarded to employees is estimated on the date of grant using the Black-Scholes option-pricing formula based on the following assumptions:

	Year ended December 31,	
	2015	2014
Expected dividend yield	0.0%	0.0%
Expected stock price volatility	33.84% - 46.14%	45.6% - 50.25%
Risk-free interest rate	0.35% - 1.35%	1.1% - 1.88%
Expected life of options (years)	10 days - 4	3.25 - 5.47

The risk-free interest rate was based on the U.S. Treasury security rate in effect as of the date of grant which corresponds to the expected life of the award. The expected lives of options and the expected stock price volatility were based on the Company's historical data, or the Company's best estimate where appropriate.

During the year ended December 31, 2016, the Company issued 105,788 shares of its Common Stock in connection with the exercise of employee stock options under the Company's 2006 Plan.

The following table summarizes the stock option activity for the year ended December 31, 2016:

	Year ended December 31, 2016			
	Number of Shares Under Option	Weighted-average Exercise Price	Weighted-average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at beginning of period	505,452	$ 34.84		
Exercised	(105,788)	38.83		
Forfeited/Cancelled	(27,400)	31.48		
Expired	(16,666)	43.81		
Outstanding at end of period	355,598	$ 33.48	3.41	$ 2,514
Vested or expected to vest at end of period	344,574	$ 33.33	3.46	$ 2,500
Exercisable at end of period	232,141	$ 30.86	4.22	$ 2,355

The weighted-average grant-date fair value for options granted, total intrinsic value and cash received by the Company related to options exercised during the years ended December 31, 2016, 2015 and 2014 were as follows:

	Year ended December 31,		
	2016	2015	2014
Weighted-average grant date fair value	$ -	$ 8.77	$ 17.09
Options exercised:			
Total intrinsic value	$ 979	$ 6,659	$ 9,107
Cash received	$ 4,108	$ 4,895	$ 11,019

Stock Option Modifications

During the second quarter of 2015, Warren Rustand terminated his role as Chief Executive Officer ("CEO") and board member of the Company, but remained employed as a Senior Advisor through the end of 2015. As a result of Mr. Rustand's termination as CEO, a Separation Agreement was entered into between the Company and Mr. Rustand. As a result of this Separation Agreement, Mr. Rustand's outstanding stock options from his grant of 200,000 stock options on September 11, 2014 were modified to accelerate the vesting date for the second tranche of options from June 30, 2015 to June 5, 2015, and the exercise period for all vested options of 133,332 was lengthened. In addition, the third tranche of options, consisting of 66,668 options, was cancelled. As a result of the modifications to the terms of the original stock options granted to Mr. Rustand, the Company recognized additional stock-based compensation expense of $737 for the year ended December 31, 2015.

Restricted Stock Awards

During the year ended December 31, 2016, the Company granted 57,964 shares of restricted stock ("RSAs") to non-employee directors of its Board, executive officers and certain key employees. The awards primarily vest in three equal installments on the first, second and third anniversaries of the date of grant.

During the year ended December 31, 2016, the Company issued 22,793 shares of its Common Stock to non-employee directors, executive officers and key employees upon the vesting of certain RSAs granted in 2015, 2014 and 2013 under the Company's 2006 Plan. An additional 3,307 RSAs vested during the year but were not released to the participant due to an additional holding period required by the grant agreement. As of December 31, 2016 and 2015, 10,134 shares and 6,827 shares, respectively, were vested but not released. In connection with the vesting of these RSAs, 2,736 shares of the Company's Common Stock were surrendered to the Company by the recipients to pay their associated taxes due to the federal and state taxing authorities during 2016. These shares were placed into our treasury account.

The following table summarizes the activity of the shares and weighted-average grant date fair value of the Company's unvested restricted Common Stock during the year ended December 31, 2016:

	Shares	Weighted-average grant date fair value
Non-vested at beginning of period	44,182	$ 38.67
Granted	57,964	$ 44.90
Vested	(26,100)	$ 35.53
Forfeited or cancelled	(3,848)	$ 44.63
Non-vested at end of period	72,198	$ 44.44

As of December 31, 2016, there was $2,220 of unrecognized compensation cost related to unvested share settled stock options and RSAs granted under the 2006 Plan. The cost is expected to be recognized over a weighted-average period of 1.37 years. The total fair value of stock options and RSAs vested was $1,383, $3,709 and $4,155 for the years ended December 31, 2016, 2015 and 2014, respectively.

Other Restricted Stock Award Grants

During the year ended December 31, 2014, the Board approved the grant of 596,915 RSAs to two individuals in connection with the Ingeus acquisition. The grants were made outside of the 2006 Plan, as they were related to the acquisition. However, since the term of the awards provided for vesting based on continued employment, the awards were accounted for as stock-based compensation. The shares necessary to settle these awards were placed in an escrow account in 2014, and were releasable from escrow in accordance with the vesting of the awards. Per the original terms of the agreements, the awards vested upon continued employment of the grantees, in four equal installments on the anniversary date of the grant. However, on October 15, 2015, the Company entered into agreements whereby the executives' employment was terminated by mutual agreement and vesting was no longer based upon continued employment. The Company recognized $16,078 in stock-based compensation expense at the time of the modification, which otherwise would have been recognized over the remainder of the vesting period. Additionally, the Company recognized accelerated deferred compensation expense of $4,714 related to these agreements during the year ended December 31, 2015. As of December 31, 2016, 298,457 underlying shares to settle the awards are held in the escrow account, although all expense was recognized as of December 31, 2015.

Restricted Stock Units

During the year ended December 31, 2016, the Company granted 5,930 restricted stock units to a key employee, related to the terms of a separation agreement, that vested on January 3, 2017. The units will be settled through shares or cash no later than December 31, 2017. The award is liability classified, and the expense recorded is based upon the Company's closing stock price at the end of each reporting period and the completed requisite service period.

Performance Restricted Stock Units

The Company had 49,208 performance restricted stock units ("PRSUs") outstanding at December 31, 2016 to key employees. These awards vest upon the Company or its segments meeting certain performance criteria over a set performance period as determined, and subject to adjustment, by the Company's Compensation Committee of the Board. 35,879 of the outstanding PRSUs at December 31, 2016 have a performance criteria tied to the Company's return on equity ("ROE"), with performance periods ending on December 31, 2016 and 2017. The grantees will earn 33% of PRSUs granted if the ROE is 12% but less than 15%, and 100% of the PRSUs granted if the ROE is 15% or more. If ROE is less than 12%, no PRSUs will be earned. The Company does not expect any of these PRSUs, with a performance period ended December 31, 2016, to vest. 13,329 of the outstanding PRSUs at December 31, 2016 have a performance criteria tied to NET Services' EBITDA and the Company's EBITDA performance with performance periods ending on December 31, 2016 and 2017. The Company expects 6,665 of these PRSUs, with a performance period ended December 31, 2016, to vest. Compensation expense related to these awards totaled ($270), $613 and ($162) for the years ended December 31, 2016, 2015 and 2014, respectively.

Cash Settled Awards

During the years ended December 31, 2016, 2015 and 2014, respectively, the Company issued 3,360, 4,000 and 6,195 stock equivalent units ("SEUs"), which settle in cash upon vesting, to Coliseum Capital Partners, L.P., in lieu of a grant to Christopher Shackelton, Chairman of the Board, for his service on the Board, which vest one-third upon each anniversary of the vesting date. The fair value of the SEUs is based on the closing stock price on the last day of the period and the completed requisite service period. The Company recorded $287, $588 and $375 of expense for SEUs during the years ended December 31, 2016, 2015 and 2014, respectively.

During the year ended December 31, 2014, the Company issued 200,000 stock option equivalent units ("SOEUs"), with an exercise price of $43.81 per share, which settle in cash, to Coliseum Capital Partners, L.P in lieu of a grant to Christopher Shackelton, for other services rendered. All 200,000 SOEUs were outstanding and exercisable at December 31, 2016. This award vested one-third upon grant, one-third on June 30, 2015 and one-third on June 30, 2016. No additional SOEUs were granted during the years ended December 31, 2016 and 2015. The Company recorded ($1,517), $1,888 and $1,249 of expense for SOEUs during the years ended December 31, 2016, 2015 and 2014, respectively. The expense is included in "General and administrative expense" in the consolidated statements of income. The fair value of the SOEUs was estimated as of December 31, 2016, 2015 and 2014 using the Black-Scholes option-pricing formula and amortized over the option's graded vesting periods with the following assumptions:

	Year ended December 31,		
	2016	**2015**	**2014**
Expected dividend yield	0.0%	0.0%	0.0%
Expected stock price volatility	35.71% - 41.82%	43.75% - 45.30%	46.75% - 50.1%
Risk-free interest rate	1.11% - 1.64%	1.24% - 1.70%	1.3% - 1.76%
Expected life of options (in years)	1.0 - 3.0%	2.75 - 4.75	3.75 - 5.75

As of December 31, 2016 and 2015, the Company had a short-term liability of $1,764 and $3,555, respectively, in "Accrued expenses" in the consolidated balance sheet related to unexercised vested and unvested cash settled share-based payment awards. The cash settled share-based compensation expense in total excluded tax expense of $492 for the year ended December 31, 2016. The cash settled share-based compensation expense in total excluded a tax benefit of $990 and $650 for the years ended December 31, 2015 and 2014, respectively. The unrecognized compensation cost is expected to be recognized over a weighted average period of 0.78 years; however, the total expense will continue to be adjusted for the unexercised vested SOEUs until they are exercised.

Holdco Long-Term Incentive Plan

On August 6, 2015 (the "Award Date"), the Compensation Committee of the Board adopted the HoldCo LTIP under the 2006 Plan. The Holdco LTIP is designed to provide long-term performance based awards to certain executive officers of Providence. Under the program, executives will receive shares of Providence Common Stock based on the shareholder value created in excess of an 8.0% compounded annual return between the Award Date and December 31, 2017 (the "Extraordinary Shareholder Value"). The Award Date value is calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price over a 90-day period ending on the Award Date. The value as of December 31, 2017 will be calculated on the basis of a similar 90-day volume weighted average common share price. A pool for use in the allocation of awards was created equal to 8.0% of the Extraordinary Shareholder Value.

Participants in the HoldCo LTIP will receive a percentage allocation of any such pool and, following determination of the size of the pool, will be entitled to a number of shares equal to their pro rata portion of the pool divided by the volume weighted average of the Company's per share price over the 90-day period ending on December 31, 2017. Of the shares allocated, 60% will be issued to the participant on or shortly following determination of the pool, 25% will vest and be issued on the one-year anniversary of such determination date, subject to continued employment, and the remaining 15% will be issued on the second anniversary of the determination date, subject to continued employment. As of December 31, 2016, 88.5% of the award pool had been granted to executives and $3,319 and $1,353 of expense is included in "General and administrative expense" in the consolidated statements of income for the years ended December 31, 2016 and 2015, respectively. As of December 31, 2016, there was $5,361 of unrecognized compensation cost related to non-vested Holdco LTIP shares granted under the 2006 Plan. The cost is expected to be recognized over a weighted-average period of 1.55 years. These awards are equity classified and the fair value of the awards was calculated using a Monte-Carlo simulation valuation model. The fair value of the awards granted in 2015 and 2016 were estimated using the following assumptions:

	Year ended December 31,	
	2016	**2015**
Forward interest rate	0.24% - 2.71%	0.04% - 2.90%
Expected Volatility	40.0%	45.0%
Dividend Yield	0.0%	0.0%
Fair Value of Total Pool	$12,870	$12,590

14. Vertical Long-Term Incentive Plan

The Company established Long-Term Incentive Plans ("Vertical LTIPs") for the Company's operating segments, or verticals, during the fourth quarter of 2015. The Vertical LTIPs are consistent in their basic terms, but each have been customized for specific aspects of the associated vertical. The awards pay in cash, however up to 50% of the award may be paid in unrestricted stock if the recipient elects this option when the Vertical LTIP offer letter is received. In addition, at the discretion of the Company, the recipients may be able to elect unrestricted stock in lieu of cash compensation at a later date. The Vertical LTIPs reward participants based on certain measures of free cash flow and EBITDA results adjusted as specified in the plan document. The awards vest in three installments: 60% of the award will pay out immediately following December 31, 2017, 25% one year following the performance period (i.e. December 31, 2018) and 15% two years following the performance period (i.e. December 31, 2019). Payout is subject to the employee remaining employed by the Company. For the years ended December 31, 2016 and 2015, $1,513 and $328 of expense, respectively, is included in "Service expense" in the consolidated statements of income related to this plan.

15. Earnings Per Share

The following table details the computation of basic and diluted earnings per share:

	Year ended December 31,		
	2016	**2015**	**2014**
Numerator:			
Net income attributable to Providence	$ 91,928	$ 83,696	$ 20,275
Less dividends on convertible preferred stock	(4,419)	(3,935)	-
Less accretion of convertible preferred stock discount	-	(1,071)	-
Less income allocated to participating securities	(13,135)	(10,691)	-
Net income available to common stockholders	$ 74,374	$ 67,999	$ 20,275
Continuing operations	$ (21,251)	$ (29,181)	$ 24,511
Discontinued operations	95,625	97,180	(4,236)
	$ 74,374	$ 67,999	$ 20,275
Denominator:			
Denominator for basic earnings per share -- weighted-average shares	14,666,896	15,960,905	14,765,303
Effect of dilutive securities:			
Common stock options	-	-	236,538
Performance-based restricted stock units	-	-	16,720
Denominator for diluted earnings per share -- adjusted weighted-average shares assumed conversion	14,666,896	15,960,905	15,018,561
Basic earnings (loss) per share:			
Continuing operations	$ (1.45)	$ (1.83)	$ 1.66
Discontinued operations	6.52	6.09	(0.29)
	$ 5.07	$ 4.26	$ 1.37
Diluted earnings (loss) per share:			
Continuing operations	$ (1.45)	$ (1.83)	$ 1.63
Discontinued operations	6.52	6.09	(0.28)
	$ 5.07	$ 4.26	$ 1.35

The accretion of Preferred Stock discount in the table above related to a beneficial conversion feature of the Company's Preferred Stock that was fully amortized as of June 30, 2015. Income allocated to participating securities is calculated by allocating a portion of net income less dividends on convertible stock and amortization of Preferred Stock discount to the Preferred Stock holders on a pro rata, as converted, basis; however, the convertible preferred stockholders are not required to absorb losses.

The following weighted-average shares were not included in the computation of diluted earnings per share as the effect of their inclusion would have been anti-dilutive:

	Year ended December 31,		
	2016	2015	2014
Stock options to purchase common stock	22,638	173,925	92,054
Convertible preferred stock	803,442	700,241	-

16. Operating Leases

The Company has non-cancelable contractual obligations in the form of operating leases for office space, related office equipment and other facilities. The leases expire in various years and generally provide for renewal options. In the normal course of business, it is expected that these leases will be renewed or replaced by leases on other properties.

Certain operating leases provide for increases in future minimum annual rental payments based on defined increases in the Consumer Price Index, subject to certain minimum increases. Several of these lease agreements contain provisions for periods in which rent payments are reduced. The total amount of rental payments due over the lease term is being charged to rent expense on a straight-line basis over the term of the lease. The difference between rent expense recorded and the amount paid, for continuing operations, as of December 31, 2016 and 2015 was $3,253 and $2,217, respectively, and is included in "Other long-term liabilities" in the consolidated balance sheets. Also, the lease agreements generally require the Company to pay executory costs such as real estate taxes, insurance, and repairs.

Future minimum payments under non-cancelable operating leases for equipment and property with initial terms of one year or more consisted of the following at December 31, 2016:

	Operating Leases
2017	$ 19,788
2018	14,422
2019	10,516
2020	7,276
2021	5,999
Thereafter	14,075
Total future minimum lease payments	$ 72,076

Rent expense for continuing operations related to operating leases was $29,316, $31,191 and $16,117, for the years ended December 31, 2016, 2015 and 2014, respectively.

17. Retirement Plan

The Company maintains a qualified defined contribution plan under Section 401(k) of the Internal Revenue Code of 1986, as amended, for all employees of its NET Services operating segment and corporate personnel. The Company, at its discretion, may make a matching contribution to the plan. Any matching contributions vest over five years. Unvested matching contributions are forfeitable upon employee termination. Employee contributions are fully vested and non-forfeitable. The Company's contributions to the plan for continuing operations were $248, $221 and $180, for the years ended December 31, 2016, 2015 and 2014, respectively.

WD Services' employees are entitled to benefits under certain retirement plans. The WD Services' segment has separate plans in each country it operates. The plans receive fixed contributions from WD Services' companies and the legal or constructive obligation is limited to these contributions, although the benefits the employees ultimately receive are determined by the plan administrators, which includes government entities and third-party administrators. The Company's contributions to these plans were $9,139, $10,331 and $2,424 for the years ended December 31, 2016, 2015 and 2014, respectively.

The Company also maintains a Deferred Compensation Rabbi Trust Plan for highly compensated employees of NET Services. This plan was put in place to compensate for the inability of highly compensated employees to take full advantage of the Company's 401(k) plan. Additional information is included in Note 19, *Commitments and Contingencies*.

18. Income Taxes

The following table summarizes our U.S. and foreign income (loss) from continuing operations before income taxes:

	Year ended December 31,		
	2016	**2015**	**2014**
US	$ 65,559	$ 43,598	$ 16,944
Foreign	(67,437)	(53,692)	15,856
Total	$ (1,878)	$ (10,094)	$ 32,800

The federal, state and foreign income tax provision is summarized as follows:

	Year ended December 31,		
	2016	**2015**	**2014**
Federal:			
Current	$ 21,202	$ 15,161	$ 9,534
Deferred	(6,477)	(1,606)	(2,792)
	14,725	13,555	6,742
State:			
Current	$ 4,580	$ 2,644	$ 2,188
Deferred	(938)	(38)	(621)
	3,642	2,606	1,567
Foreign:			
Current	$ 266	$ 523	$ (616)
Deferred	(1,597)	(2,101)	596
	(1,331)	(1,578)	(20)
Total provision for income taxes	$ 17,036	$ 14,583	$ 8,289

A reconciliation of the provision for income taxes with amounts determined by applying the statutory U.S. federal income tax rate to income (loss) from continuing operations before income taxes is as follows:

	Year Ended December 31,		
	2016	2015	2014
Federal statutory rates	35%	35%	35%
Federal income tax at statutory rates	$ (657)	$ (3,533)	$ 11,480
Change in valuation allowance	9,480	3,574	1,758
Change in uncertain tax positions	73	(76)	(1,741)
State income taxes, net of federal benefit	2,396	1,785	1,369
Difference between federal statutory and foreign tax rate	9,427	4,642	(353)
Stock compensation	-	(184)	(524)
Meals and entertainment	96	81	85
Amortization of deferred consideration	-	9,444	1,574
Transaction costs	-	(447)	1,769
Contingent consideration liability reversal	-	(854)	(5,748)
Nontaxable interest income	-	(965)	(660)
Tax credits	(947)	(456)	-
Legal expense	522	284	-
Depreciation	-	649	-
Equity in net loss of investee	624	366	-
Asset Impairment	2,353	-	-
Foreign Exchange	(7,001)	-	-
Other	670	273	(720)
Provision for income taxes	$ 17,036	$ 14,583	$ 8,289
Effective income tax rate	(907)%	(144)%	25%

The Company recognized an income tax provision for the years ended December 31, 2016 and December 31, 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized estimated taxable income for these years upon which the income tax provision for financial reporting is calculated.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	December 31,	
	2016	2015
Deferred tax assets:		
Net operating loss carryforwds	$ 17,742	$ 16,889
Tax credit carryforwards	399	48
Accounts receivable allowance	1,341	355
Accrued items and reserves	18,669	12,955
Stock compensation	4,224	3,226
Deferred rent	915	614
Deferred financing costs	-	127
Other	180	228
	43,470	34,442
Deferred tax liabilities:		
Deferred financing costs	154	-
Prepaids	2,103	1,181
Property and equipment depreciation	1,238	3,697
Goodwill and intangibles amortization	9,568	13,248
Equity Investment	59,244	-
Other	203	273
	72,510	18,399
Net deferred tax assets	(29,040)	16,043
Less valuation allowance	(27,423)	(21,513)
Net deferred tax assets	$ (56,463)	$ (5,470)
Current deferred tax assets, net of valuation allowance of $163 and $0 for 2016 and 2015, respectively	$ 6,825	$ 2,891
Net noncurrent deferred tax assets, net of valuation allowance of $27,260 and $21,513 for 2016 and 2015, respectively	4,003	42
Net noncurrent deferred tax liabilities, net of valuation allowance of $0 and $0 for 2016 and 2015, repectively	(67,291)	(8,403)
	$ (56,463)	$ (5,470)

At December 31, 2016, the Company had no federal net operating loss carryforwards, and $336 of state net operating loss carryforwards which expire as follows:

2017	$ -
2018	13
2019	-
2020	-
2021	207
Thereafter	116
	$ 336

The Company had net operating loss carryforwards in the following countries which can be carried forward indefinitely:

Australia	$ 32,736
Canada	782
France	3,382
Poland	264
Sweden	201
UK	39,666

Realization of the Company's net operating loss carryforwards is dependent on generating sufficient taxable income prior to expiration of the loss carryforwards. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized, to the extent they are not covered by a valuation allowance. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

The net change in the total valuation allowance for the year ended December 31, 2016 was $5,910, of which $9,480 related to current operations and negative $3,570 related to the adjustment of the beginning balance. The valuation allowance includes $27,127 primarily for Australia, France and UK net operating loss carryforwards, and $296 for state net operating loss and tax credit carryforwards for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations. The Company will continue to assess the valuation allowance, and to the extent it is determined that the valuation allowance should be changed, an appropriate adjustment will be recorded.

The Company recognized certain excess tax benefits related to stock option plans for the years ended December 31, 2016, 2015 and 2014 in the amount of $282, $2,857 and $2,722, respectively. Such benefits were recorded as a reduction of income taxes payable and an increase in additional paid-in-capital and are included in "Exercise of employee stock options" in the accompanying statements of stockholders' equity and comprehensive income.

The Company recognized a tax shortfall related to stock option plans for the years ended December 31, 2016, 2015 and 2014 in the amount of $558, $151 and $38, respectively. This was recorded as a reduction of deferred tax assets and a decrease to additional paid-in-capital and is included in "Exercise of employee stock options" in the accompanying statements of stockholders' equity and comprehensive income.

The Company expects no material amount of the unrecognized tax benefits to be recognized during the next twelve months. The Company recognizes interest and penalties as a component of income tax expense. During the years ended December 31, 2016, 2015 and 2014, the Company recognized approximately $19, $27 and $14, respectively, in interest and penalties. The Company had approximately $52 and $48 for the payment of penalties and interest accrued as of December 31, 2016 and 2015, respectively. A reconciliation of the liability for unrecognized income tax benefits is as follows:

	December 31,		
	2016	**2015**	**2014**
Unrecognized tax benefits, beginning of year	$ 271	$ 347	$ 414
Balance upon acquisition/disposition	764	-	1,674
Increase (decrease) related to prior year positions	37	(47)	14
Increase related to current year tax positions	139	48	100
Statute of limitations expiration	(103)	(77)	(1,855)
Unrecognized tax benefits, end of year	$ 1,108	$ 271	$ 347

The Company is subject to taxation in the U.S. and various foreign and state jurisdictions. The statute of limitations is generally three years for the U.S., two to five years in foreign countries and between three and four years for the various states in which the Company operates. The Company is subject to the following material taxing jurisdictions: the U.S., UK, Australia, France, Saudi Arabia and Korea. The tax years that remain open for examination by the U.S. and various foreign countries and states principally include the years 2012 to 2016.

19. Commitments and Contingencies

Legal proceedings

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware, (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL. The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding Preferred Stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the Preferred Stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's Preferred Stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule 14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board of the Company agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the Preferred Stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's shareholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton, Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of Preferred Stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, LLC, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding from the date of such order to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On October 10, 2016, the Court granted an extension of the stay of the proceeding from November 20, 2016 until January 20, 2017, to allow the special litigation committee additional time to complete its investigation and review, and to determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties are working to finalize and document the settlement, which will then be presented to the Court for approval.

The Company has indemnified the Standby Purchasers from and against any and all losses, claims, damages, expenses and liabilities relating to or arising out of (i) any breach of any representation, warranty, covenant or undertaking made by or on behalf of the Company in the Standby Purchase Agreement and (ii) the transactions contemplated by the Standby Purchase Agreement and the 14.0% Unsecured Subordinated Note in aggregate principal amount of $65,500, except to the extent that any such losses, claims, damages, expenses and liabilities are attributable to the gross negligence, willful misconduct or fraud of such Standby Purchaser.

The Company has also indemnified other third parties from and against any and all losses, claims, damages, expenses and liabilities arising out of or in connection with the Company's acquisition of CCHN Group Holdings, Inc. (operating under the tradename Matrix, and formerly included in our HA Services segment) in October 2014 and related financing commitments, except to the extent that any such losses, claims, damages, expenses and liabilities are found in a final, non-appealable judgment by a court of competent jurisdiction to have resulted from the gross negligence, bad faith or willful misconduct of such third parties, or a material breach of such third parties' obligations under the related agreements.

The Company recorded $1,282 and $310 of such indemnified legal expenses related to this case during the years ended December 31, 2016 and 2015, respectively, which is included in "General and administrative expenses" in the consolidated statements of income. Of these amounts, $757 and $310 for the years ended December 31, 2016 and 2015, respectively, were indemnified legal expenses of related parties. Other legal expenses of the Company related to this matter are covered under the Company's insurance policies, subject to applicable deductibles and customary review of the expenses by the carrier. The Company recognized expense of $210 and $500 for the years ended December 31, 2016 and 2015, respectively. While the carrier typically remits payment directly to the respective law firm, the Company accrues for the cost and records a corresponding receivable for the amount to be paid by the carrier. The Company has recognized an insurance receivable of $1,645 and $2,210 in "Other receivables" in the consolidated balance sheets at December 31, 2016 and 2015, respectively, with a corresponding liability amount recorded to "Accrued expenses".

In addition to the matter described above, in the ordinary course of business, the Company is a party to various lawsuits. Management does not expect these lawsuits to have a material impact on the liquidity, results of operations, or financial condition of Providence.

Other Indemnifications

The Company has provided certain standard indemnifications in connection with the sale of the Human Services segment to Molina Healthcare Inc. ("Molina") effective November 1, 2015. All representations and warranties made by the Company in the Membership Interest Purchase Agreement (the "Purchase Agreement") to sell the Human Services segment survive through the 15th month following the closing date, and ended on February 1, 2017. However, certain representations, including tax representations, survive until the expiration of applicable statutes of limitation, and healthcare representations survive until the third anniversary of the closing date. The Company has received indications from the purchaser of the Human Services segment regarding potential indemnification claims. One potential indemnification claim relates to *Rodriguez v. Providence Community Corrections,* a complaint filed in the District Court for the Middle District of Tennessee, Nashville Division (the "Rodriquez Litigation"), against Providence Community Corrections, Inc. ("PCC"), an entity sold under the Purchase Agreement. The purchaser of the Human Services segment announced in September 2016 that the parties to the Rodriguez Litigation accepted a mediation proposal for settlement pursuant to which PCC would pay the plaintiffs $14,000, and the parties are in the process of finalizing the settlement agreement. The outcome of any indemnification claim is uncertain but the Company believes that a significant portion of the settlement amount will be paid by PCC or PCC's insurance carriers.

The Company has established an accrual of $6,000 with respect to an estimate of loss for potential indemnification claims related to the Company's former Human Services segment, which is included in "Discontinued operations, net of tax" in the consolidated statements of income for the year ended December 31, 2016. It is reasonably possible losses may be incurred in excess of the $6,000 accrued, given the mediation proposal for settlement described above.

Molina has also threatened to assert other claims against the Company related to Molina's acquisition of PCC. The Company intends to vigorously defend itself against any such claims.

Litigation is inherently uncertain and the actual losses incurred in the event that the related legal proceedings were to result in unfavorable outcomes could have a material adverse effect on the Company's business and financial performance.

The Company has provided certain standard indemnifications in connection with its Matrix stock subscription transaction whereby Mercury Fortuna Buyer, LLC ("Subscriber"), Providence and Matrix entered into a stock subscription agreement (the "Subscription Agreement"), dated August 28, 2016. The representations and warranties made by the Company in the Subscription Agreement survive through the 15th month following the closing date; however, certain fundamental representations survive through the 36th month following the closing date. The covenants and agreements of the parties to be performed prior to the closing survive through the 15th month following the closing date, and all other covenants and agreements survive until the expiration of the applicable statute of limitations in the event of a breach, or for such lesser periods specified therein.

As of December 31, 2016, Matrix has certain malpractice claims that arose prior to the Company's date of purchase. The Company believes it is reasonably possible that a loss has occurred; however, it is not able to reliably estimate the amount of such loss. Although the Company does not believe that the aggregate amount of liability reasonably possible with respect to these matters would have a material adverse effect on its financial results, litigation is inherently uncertain and the actual losses incurred in the event that the Company's legal proceedings were to result in unfavorable outcomes could have a material adverse effect on the Company's business and financial performance. The Company is not aware of any indemnification liabilities with respect to Matrix that require accrual at December 31, 2016.

Deferred Compensation Plan

The Company has one deferred compensation plan for management and highly compensated employees of NET Services as of December 31, 2016. The deferred compensation plan is unfunded, and benefits are paid from the general assets of the Company. The total of participant deferrals, which is reflected in "Other long-term liabilities" in the consolidated balance sheets, was $1,430 and $1,247 at December 31, 2016 and 2015, respectively.

20. Transactions with Related Parties

The Company incurred legal expenses under an indemnification agreement with the Standby Purchasers as further discussed in Note 19, *Commitments and Contingencies*. Preferred Stock dividends earned by the Standby Purchasers during the years ended December 31, 2016 and 2015 totaled $4,213 and $3,739, respectively.

The Company operates a call center in Phoenix, Arizona. The building in which the call center is located was leased to the Company from VWP McDowell, LLC ("McDowell") until July 2014, at which time McDowell sold its interest in the property. Certain immediate family members of the then Chief Executive Officer of NET Services had a partial ownership interest in McDowell. In the aggregate these family members owned an approximate 13% interest in McDowell directly and indirectly through a trust. For 2014, the Company expensed $234 in lease payments to McDowell.

21. Discontinued Operations

Effective October 19, 2016, the Company completed the Matrix Transaction. At the Closing, (i) cash consideration of $180,614 was paid by the Subscriber to Matrix based upon an enterprise value of $537,500 and (ii) Matrix borrowed approximately $198,000 pursuant to a credit and guaranty agreement providing for term loans in an aggregate principal amount of $198,000 and revolving loan commitments in an aggregate principal amount not to exceed $10,000, which was not drawn at the Closing. At the Closing, Matrix distributed $381,163 to Providence, in full satisfaction of a promissory note and accumulated interest between Matrix and Providence. At the Closing, Providence made a $5,663 capital contribution to Matrix, as described in the Subscription Agreement, as amended, based upon its pro-rata ownership of Matrix, to fund the near-term cash needs of Matrix. On the day that was fifteen days following the Closing Date, Providence was, to the extent payable pursuant to the terms of the Subscription Agreement, as amended, entitled to receive from Matrix, or required to pay to Matrix, subsequent working capital adjustment payments. Providence received an initial payment of $5,172 from Matrix in November 2016 which is net of the capital contribution of $5,663 described above, based upon the initial working capital calculation as described in the Subscription Agreement. Additionally, in February 2017, the Company received a $75 payment from Matrix representing the final working capital adjustment payment.

In accordance with ASC 205-20, *Presentation of Financial Statements-Discontinued Operations*, a component of an entity is reported in discontinued operations after meeting the criteria for held for sale classification if the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. The Company analyzed the quantitative and qualitative factors relevant to the Matrix stock subscription transaction resulting in the Company no longer owning a controlling interest in Matrix, and determined that those held for sale conditions for discontinued operations presentation were met during the third quarter of 2016. As such, the historical financial results of Matrix, the Company’s historical HA Services segment, and the related income tax effects have been presented as discontinued operations for all periods presented in the accompanying consolidated financial statements through October 19, 2016.

The Company has continuing involvement with Matrix through its retention of 46.8% of the equity interests in Matrix, as well as through a management consulting agreement, not to exceed ten years. Prior to the Matrix Transaction, the Company owned 100% of the equity interest in Matrix. Subsequent to the Matrix Transaction, the Company accounts for its investment in Matrix under the equity method of accounting. The Company’s 46.8% share of Matrix’s losses subsequent to the Matrix Transaction, which totaled $1,789, is recorded as “Equity in net loss of investees” in its consolidated statement of income for the year ended December 31, 2016. Matrix’s pretax loss for the period of October 19, 2016 through December 31, 2016 totaled $7,027 and includes $6,367 of transaction related expenses. There have been no cash inflows or outflows from or to Matrix subsequent to the closing of the Matrix Transaction, other than the working capital adjustments discussed above, however the Company will receive management fees associated with its ongoing relationship with Matrix, of which $185 is included in “Other receivables” in the consolidated balance sheet at December 31, 2016.

On September 3, 2015, the Company entered into a Purchase Agreement, pursuant to which the Company agreed to sell all of the membership interests in Providence Human Services, LLC and Providence Community Services, LLC, comprising the Company’s Human Services segment, in exchange for cash proceeds of approximately $200,000 prior to adjustments for estimated working capital, certain seller transaction costs, debt assumed by the buyer, and a $20,099 cash payment received for the Providence Human Services cash and cash equivalents on hand at closing. The net proceeds were $230,703, although $10,000 is held in an indemnity escrow and recorded within “Prepaid expenses and other” in the consolidated balance sheet at December 31, 2016. Proceeds include a customary working capital adjustment of $13,246. During the year ended December 31, 2016, the Company recorded additional expenses related to the Human Services segment, principally related to legal proceedings as described in Note 19, *Commitment and Contingences*, related to an indemnified legal matter.

Results of Operations

The following table summarizes the results of operations classified as discontinued operations, net of tax, for the years ended December 31, 2016, 2015 and 2014. The HA Services segment column in the table below for the year ended December 31, 2016 reflects the financial results for HA Services from January 1, 2016 through October 19, 2016. The HA Services segment column in the table below for the year ended December 31, 2014 reflects the financial results for HA Services from October 24, 2014 through December 31, 2014.

	Year ended December 31, 2016

Discontinued operations, net of tax	$ (3,642)	$ (594)	$ (4,236)

Interest expense, net

The Company allocated interest expense, including amortization of deferred financing fees, to discontinued operations based on the portion of the debt that was required to be paid with the proceeds from the sale of the Human Services segment and the Matrix Transaction. The total allocated interest expense is included in "Interest expense, net" in the tables above. The total allocated interest expense for the years ended December 31, 2016, 2015 and 2014 is as follows:

	Year ended December 31,		
	2016	**2015**	**2014**
Human Services Segment	$ -	$ 2,871	$ 1,519
HA Services Segment	9,939	14,376	2,904
Total	$ 9,939	$ 17,247	$ 4,423

The following table summarizes the carrying amounts of the major classes of assets and liabilities held for sale in the consolidated balance sheet as of December 31, 2015:

	December 31, 2015
Cash and cash equivalents	$ 5,014
Accounts receivable, net of allowance of $1,208	21,117
Prepaid expenses and other	3,094
Deferred tax assets	2,986
Current assets of discontinued operations held for sale	$ 32,211
Property and equipment, net	$ 11,629
Goodwill	210,071
Intangible assets, net	216,387
Other assets	3,313
Non-current assets of discontinued operations held for sale	$ 441,400
Current portion of long-term obligations	
Accounts payable	$ 1,988
Accrued expenses	13,116
Reinsurance liability reserve	745
Current liabilities of discontinued operations held for sale	$ 15,849
Other long-term liabilities	$ 2,197
Deferred tax liabilities	85,071
Non-current liabilities of discontinued operations held for sale	$ 87,268

The reserve for the estimated loss under the indemnifications in connection with the sale of the Human Services segment, as described in Note 19, *Commitments and Contingencies*, is included within “Accrued expenses” on the consolidated balance sheet at December 31, 2016.

Cash Flow Information

The following table presents depreciation, amortization, capital expenditures and significant operating noncash items of the discontinued operations for the years ended December 31, 2016, 2015 and 2014:

	For the year ended December 31, 2016		
	Human Services Segment	HA Services Segment	Total Discontinued Operations

Cash flows from discontinued investing activities:			
Purchase of property and equipment	$ 4,766	$ 2,115	$ 6,881

22. Segments

The Company is a holding company, which owns interests in subsidiaries and other companies that are primarily engaged in the provision of healthcare and workforce development services. The subsidiaries and other companies in which the Company holds interests comprise the following segments:

- NET Services – Nationwide provider of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement and legal offender rehabilitation services to eligible participants of government sponsored programs.

- Matrix Investment – Minority interest in nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments, to members of managed care organizations, accounted for as an equity method investment.

Effective October 19, 2016, pursuant to the Matrix Transaction, the Company no longer owns a controlling interest in Matrix, which historically constituted the HA Services segment as further discussed in Note 21, *Discontinued Operations*. As the HA Services segment, through October 19, 2016, is presented as a discontinued operation, it is not reflected in the Company's segment disclosures. However, the Company accounts for its noncontrolling interest in Matrix from October 19, 2016 through December 31, 2016 as an equity method investment, which solely comprises Matrix Investment in the table below.

Segment results are based on how the Company's chief operating decision maker ("CODM") manages the Company's business, makes operating decisions and evaluates operating performance. The operating results of the segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by Corporate on behalf of the segment. Indirect expenses, including unallocated corporate functions and expenses, such as executive, accounting, finance, human resources, information technology and legal, as well as the results of SPCIC and elimination entries recorded in consolidation are reflected in Corporate and Other.

The following table sets forth certain financial information from continuing operations attributable to the Company's business segments for the years ended December 30, 2016, 2015 and 2014.

	Year Ended December 31, 2016				
	NET Services	WD Services	Matrix Investment	Corporate and Other	Total
Service revenue, net	$ 1,234,364	$ 344,403	$ -	$ 122	$ 1,578,889
Service expense	1,133,501	320,147	-	(894)	1,452,754
General and administrative expense	11,406	30,300	-	28,205	69,911

Operating income (loss)	$ 67,729	$ 17,510	$ (42,252)	$ 42,987
Long-lived asset expenditures	$ 12,477	$ 104,594	$ 473	$ 117,544

During the year ended December 31, 2014, the Company reported its segment activities under a full absorption method, where all corporate direct and indirect costs were allocated to the reporting segments. Additionally, the oversight of two legacy businesses was transferred to the management of WD Services in 2015. In fiscal 2015, a decision was made by the CODM to retain indirect costs at Corporate because the operating segments have no ability to control or manage these costs and the costs have no direct relationship to revenue earned or operating costs incurred by the segment. In addition, the amount of direct expense incurred by Corporate on behalf of the segments was limited, as each of the Company's segments operated and continue to operate with their own infrastructure, workforce and processes, which further supported retaining indirect costs at Corporate rather than allocating all Corporate costs to the segments. Separate reporting of indirect costs within Corporate and Other also allows the CODM to better track and manage these costs and allows the Company's shareholders greater transparency into costs associated with revenue generation and administration of the Company. The segment results for the year ended December 31, 2014 have been recast to reflect the current management of the segments. The operating income (loss) for NET Services and WD Services as originally reported for the year ended December 31, 2014 included an allocation of indirect corporate overhead expense of $11,224 and $8,819, respectively.

Geographic Information

The following table details the Company's revenue from continuing operations and long-lived assets by geographic location.

	For the year ended December 31, 2016			
	United States	United Kingdom	Other Foreign	Consolidated Total
Service revenue, net	$ 1,250,687	$ 235,061	$ 93,141	$ 1,578,889

Diluted	$ 0.32	$ 0.26	$ (0.41)	$ 4.05

(1)The Company classified interest expense, net of tax, of $221, $236 and $229 for the quarterly periods ended March 31, 2016, June 30, 2016 and September 30, 2016, respectively, and $251, $246 and $252 for the quarterly periods ended March 31, 2015, June 30, 2015 and September 30, 2015, respectively, to Discontinued Operations. Such amounts were previously classified as continuing operations in the Company's Form 10-Q for the period ended September 30, 2016. These amounts relate to the finalization of interest expense allocated to discontinued operations associated with the debt that was required to be repaid upon the completion of the Matrix stock subscription transaction.

(2)Includes equity in net loss of investee of $2,717, $1,459, $1,544 and $2,801, for the quarters ending March 31, 2016, June 30, 2016, September 30, 2016 and December 31, 2016, respectively, related to the Company's investment in Mission Providence. Includes equity in net loss of investee of $1,789, for the quarter ending December 31, 2016, related to the Company's investment in Matrix.

(3)The Company recorded expenses, net of tax, of $5,035 in Discontinued operations, net of tax, in the quarter ending September 30, 2016 related to the Company's former Human Services segment, which are principally related to an ongoing legal matter.

(4)Service revenue, net for the quarter ending December 31, 2016 decreased from the quarter ended September 30, 2016 primarily due to decreased revenue associated with the WD Services' National Citizen Service summer youth programs, which are seasonal in nature. Additionally, the quarter ended September 30, 2016 included revenue of $5,367 under the WD Services' offender rehabilitation program related to the finalization of a contractual adjustment for the contract years ending March 31, 2015 and 2016.

(5) The Company recorded an asset impairment charge of $1,415 related to the building and land utilized by the holding company, which was sold effective December 30, 2016. Also, the Company recorded asset impairment charges in its WD Services segment of $9,983, $4,381 and $5,224 to its property and equipment, intangible assets and goodwill, respectively.

(6) Includes gain on loss of controlling interest in Matrix, net of tax, of $109,403.

(7) Includes equity in net loss of investee of $2,483, $1,059, $4,465 and $2,962, for the quarters ending March 31, 2015, June 30, 2015, September 30, 2015 and December 31, 2015, respectively, related to the Company's investment in Mission Providence which incurred significant start-up costs during 2015.

(8) The Company incurred $20,944 of expense related to restricted shares and cash placed into escrow at the time of the Ingeus acquisition. The shares and cash were placed into escrow concurrent with the payment of the acquisition consideration paid for Ingeus; however, because two sellers of Ingeus remained employees post acquisition, the value of the shares and cash was recognized as compensation expense over the escrow term. Acceleration of this expense was triggered when the two sellers separated from the Company.

(9) Includes gain on disposition, net of tax, of $100,332, in relation to the sale of the Company's Human Services segment.

(10) Includes a gain due to a reduction in the estimated fair value of contingent consideration of $2,469 in 2015 related to the Ingeus acquisition.

(11) Earnings per share is computed independently for each of the quarters presented. Therefore, the sum of quarterly earnings per share may not equal the total computed for the year.

Item 9. ***Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.***

None.

Item 9A. ***Controls and Procedures.***

Evaluation of Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management (including its principal executive officer and principal financial officer), evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act as of the end of the period covered by this Annual Report on Form 10-K (December 31, 2016). Based upon this evaluation, the Company's principal executive and financial officers have concluded that such disclosure controls and procedures were effective to provide reasonable assurance that (i) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's report on internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Report of Independent Registered Public Accounting Firm

The attestation report of the registered public accounting firm on the Company's internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Changes in Internal Control Over Financial Reporting

The principal executive and financial officers also conducted an evaluation of whether any changes in the Company's internal control over financial reporting occurred during the quarter ended December 31, 2016 that have materially affected or which are reasonably likely to materially affect such control. Such officers have concluded that no such changes have occurred.

Item 9B. ***Other Information.***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2017 annual meeting of stockholders; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Code of Ethics

We have adopted a code of ethics that applies to our senior management, including our chief executive officer, chief financial officer, controller and persons performing similar functions, as well as our directors, officers and employees. This code of ethics is part of our broader Compliance and Ethics Plan and Code of Conduct, which is available free of charge in the Investor Relations section of our website at www.prscholdings.com. We intend to disclose any amendment to, or waiver from, a provision of the code of ethics that applies to our principal executive officer, principal financial officer or principal accounting officer on our website. The information contained on our website is not part of, and is not incorporated in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 11. ***Executive Compensation.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2017 annual meeting of stockholders; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2017 annual meeting of stockholders; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2017 annual meeting of stockholders; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 14. ***Principal Accounting Fees and Services.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2017 annual meeting of stockholders; provided that if such proxy statement is not filed on or before May 1, 2017, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules.***

(a)(1) Financial Statements

The following consolidated financial statements including footnotes are included in Item 8.

- Consolidated Balance Sheets at December 31, 2016 and 2015;
- Consolidated Statements of Income for the years ended December 31, 2016, 2015 and 2014;
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2016, 2015 and 2014;
- Consolidated Statements of Stockholders' Equity at December 31, 2016, 2015 and 2014; and
- Consolidated Statements of Cash Flows for the years ended December 31, 2016, 2015 and 2014.

(2) Financial Statement Schedules

Schedule II Valuation and Qualifying Accounts

	Balance at beginning of period	Additions: Charged to costs and expenses	Additions: Charged to other accounts	Deductions	Balance at end of period
Year Ended December 31, 2016:					
Allowance for doubtful accounts	$ 4,380	$ 3,298	$ 1,058(1)	$ 2,835(2)	$ 5,901
Year Ended December 31, 2015:					
Allowance for doubtful accounts	$ 3,198	$ 1,928	$ 1,152(1)	$ 1,898(2)	$ 4,380
Year Ended December 31, 2014:					
Allowance for doubtful accounts	$ 2,465	$ 881	$ 2,717(1)	$ 2,865(2)	$ 3,198

Notes:

Schedule above has been recast from prior year to exclude activity related to discontinued operations.

(1) Amounts primarily include the allowance for contractual adjustments related to our non-emergency transportation services operating segment that are recorded as adjustments to non-emergency transportation services revenue. Amount additionally includes impact from change in foreign currency rates.
(2) Write-offs, net of recoveries

All other schedules are omitted because they are not applicable or the required information is shown in our financial statements or the related notes thereto.

(3) Exhibits

FORWARD-LOOKING STATEMENTS

From time to time, we and our representatives may provide information, whether orally or in writing, including certain statements in this Annual Report on Form 10-K, which are deemed to be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expressed or implied herein as anticipated, believed, estimated, expected or intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make.

Such factors include, but are not limited to: government appropriations and termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information, and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our information systems or security systems or any service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our continuing emphasis on and shift toward technology-led digital transactions; customer decision-making cycles and lead time for customer commitments; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to modernize our information technology infrastructure and consolidate data centers; our ability to comply with data security standards; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. We do not intend to update these forward-looking statements, except as required by law.

TABLE OF CONTENTS

Table of Contents

PART I

ITEM 1. BUSINESS

In this Annual Report on Form 10-K, unless the content otherwise dictates, "Conduent", the "Company", "we" or "our" mean Conduent Inc. and its consolidated subsidiaries.

Our Business

Conduent is a leading provider of business process services with expertise in managing operations involving high volume, repeatable and individualized interactions. The Company's portfolio covers both front office and back office operations; however, the majority of its revenue and differentiation derives from engagements where it serves on behalf of its clients to manage end-user interactions across a wide-range of domains. Examples include payments, collections, benefit administration and end-user communication services. The Company creates value for its clients through more efficient service delivery combined with a personalized and seamless experience for the end-user. The Company applies its expertise, technology and innovation to continually modernize its offerings for improved customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics.

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement between the Company and Xerox Corporation (Separation). As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

With approximately 82,000 employees globally as of December 31, 2018, we provide differentiated services to clients spanning small, medium and large businesses and to governments around the world.

Our Transformation

We have a portfolio of businesses that we are optimizing and effectively targeting attractive growth areas in a rapidly evolving business process services industry. We have taken significant actions to improve our profitability and drive growth with a more focused portfolio of services.

Key initiatives include:

- ***Realigned Delivery.*** During 2018, we reorganized the business to better align to our vertical go-to-market strategy and to our global delivery capabilities. We believe this operating structure will allow us to better integrate and tailor business solutions for our customers.
- ***Divested Non-Core Assets.*** We divested four businesses in 2018 for aggregate proceeds of $703 million in cash. These divestitures enabled us to increase our focus on areas where we have a competitive advantage.
- ***Increased Use of Automation.*** We have developed and deployed a set of advanced software-based automation tools as part of our service delivery operations. These tools reduce the amount of repetitive, manual labor required to deliver many of our services and improve service quality through lower error rates and faster processing times.
- ***Real Estate, Infrastructure and Selling, General and Administrative (SG&A).*** We have significantly reduced the number of our leased and owned properties from 339 to 266 and reduced our information technology infrastructure spending. We have also reduced our SG&A costs from $611 million in 2017 to $560 million in 2018.

We continue to execute on our strategic transformation program to deliver cost savings through infrastructure optimization, labor productivity and automation initiatives, restructuring of unprofitable contracts and other efficiencies. This transformation program has and will enable us to better capitalize on our differentiated service offerings, industry expertise and global delivery excellence and position us for long-term shareholder value creation.

Table of Contents

Our Market Opportunity

We estimate our addressable market size in the global business process service industry at approximately $201 billion in 2018, according to third party industry reports, and we are a leader across several segments of this large, diverse and growing market. Providing business process services is complex and multi-faceted with services that span many industries.

Ongoing competitive pressures and increasing demand for further productivity gains have motivated businesses to outsource elements of their day-to-day operations to accelerate performance and innovation. As a result, our clients have become more focused on their core businesses and the range of outsourced activities has expanded greatly. Increasing globalization has also required many companies to optimize cost structures to retain competitiveness and business process services have become a key component of this strategy.

The ongoing shift to next-generation software and automation technologies is driving greater demand for, and expectation of, efficiency and personalization by the constituents and customers of the businesses and governments we serve. Addressing these business and operational challenges is necessary for business process services companies to capitalize on these trends. In addition, business process services have the potential to meaningfully enhance productivity for businesses and governments and satisfaction for their constituents and customers.

Segments

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

- Our *Commercial Industries* segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

- Our *Government Services* segment provides government-centric business process services and subject matter experts to U.S. federal, state and local and foreign governments.

- Our *Transportation* segment provides systems and support to transportation departments and agencies globally. Primary offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other represents our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

We present segment financial information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference. The discussion below highlights our segment revenues for the year ended December 31, 2018.

Table of Contents

Commercial Industries

Our Commercial Industries segment is our largest segment, with $2.5 billion in revenues in 2018, representing 47.2% of total revenues. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services. These services are complemented by innovative industry-specific services such as payment integrity solutions to clients in the healthcare payer space, care and quality analytics, workflow solutions and software adoption services to healthcare provider clients, personalized product information for clients in the automotive industry, source-to-pay solutions for clients in the manufacturing industry, revenue generation and clinical services for clients in the pharmaceutical and life sciences industries, end-user engagement and marketing services for clients in the Retail industry, and mortgage and consumer loan processing for clients in the Financial Services industry.

Government Services

Our Government Services segment generated revenues of $1.4 billion in 2018, representing 25.1% of our total revenues. This segment provides government-centric business process services to U.S. federal, state and local governments for public assistance program administration, transaction processing and payment services. In order to provide targeted support to our government clients, our Government Services segment is organized into several primary businesses:

- ***Federal, State and Local Government:*** We support our government clients with services targeting key civilian agencies within federal, state and local governments, as well as government administrative offices. Our depth of agency-specific expertise combined with our scale allows us to deliver and manage programs at all levels of government. Our broad set of services includes public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies.

- ***Payments:*** With more than $75 billion disbursed annually, we are a leader in government payment disbursements for federally sponsored programs like Supplemental Nutritional Assistance Program (SNAP, commonly known as food stamps) and Women, Infant and Children (WIC) as well as government initiated cash disbursements such as child support, unemployment and federal social security. We provide our payment card services which include branded prepaid debit card (Visa and Mastercard), Electronic Benefit Transfer (EBT for SNAP and WIC) and Electronic Child Care to 35 states and the U.S. Treasury with a diversified portfolio consisting of 165 different payment programs nationwide.

- ***Government Healthcare:*** We provide medical management and fiscal agent care management services to Medicaid programs and federally-funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia. Our services include a range of innovative solutions such as Medicaid management fiscal agent, pharmacy benefits management and clinical program management. These services help states optimize their costs by streamlining access to care and improve patient health outcomes through population health management and help families in need by improving beneficiary support.

Transportation

Our Transportation segment generated revenues of $0.7 billion in 2018, representing 13.5% of our total revenues. This segment provides revenue-generating transportation services to government clients in 24 countries. Our services include support for electronic toll collection, public transit, parking and photo enforcement. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting. These innovative services significantly improve individual travel experiences, optimize how vehicles and goods move efficiently within cities, digitize integrated modes of transportation and help our government clients to better serve their constituents.

Other

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018. In 2018, Other accounted for $0.8 billion of revenues, representing 14.2% of total revenues.

Table of Contents

Our Service Offerings

Our portfolio of business process services includes a combination of industry-specific and multi-industry services. We have subject matter experts who are responsible for implementing each of these services, delivering service excellence to clients, ensuring best practices to improve cost competitiveness, innovating our next generation offerings and supporting worldwide sales.

Industry-Specific Services

Commercial Industry-Specific Services

Examples of the services we offer include personalized product information for automotive clients, source to pay solutions for manufacturing clients, care integration and coordination, member health risk assessments and payment integrity (such as recovering claims from the appropriate payers) for healthcare clients, mortgage and consumer loan processing for financial institution clients and customized workforce learning solutions for aerospace clients.

Transportation Services

The transportation services we offer include support for electronic toll collection, public transit, parking and photo enforcement. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting.

Government Services

Our broad set of public sector services includes public assistance program administration, pension administration, records management, disease management and software offerings in support of federal, state and local government agencies. It also includes fiscal agent administrative services and providing management information systems in support of Medicaid programs or pharmacy benefits management for Government Healthcare clients.

Multi-Industry Services

Transaction Processing Services

We help our clients to improve communications with their customers and constituents, whether it is on paper, on-line or through other communication channels. By supporting our clients' customer communication processes, we help our clients deliver a better experience to their customers and operate with improved efficiency and greater effectiveness.

We offer a broad array of flexible transaction processing services that include data entry, scanning, image processing, enrollment processing, claims processing, high volume offsite print and mail services and file indexing. Our multi-channel communication capabilities (including secure print, email, text and web) enable the delivery of personalized and targeted communications that are designed to elicit the desired response from customers or other end-users (*e.g.*, on-time bill payment and increased marketing response rates). Our service offerings utilize both proprietary and commercially available third-party technologies, combined with our expertise to ensure continued quality and innovation for our clients.

Payment Services

Prepaid Cards: We are an extensive provider of VISA and MasterCard prepaid debit cards, as well as other electronic payment cards in support of U.S. government benefit programs such as Social Security, the Supplemental Nutrition Assistance Program (formerly known as food stamps), the Special Supplemental Nutrition Program for Women, Infants and Children and other specialized Electronic Benefits Transfer programs. Our secure payment services reduce fraud and eliminate paper checks by disbursing electronic payments directly to end-users, even those without bank accounts. Our proprietary processing platform, significant operational expertise, advanced fraud analytics and adoption of Europay, MasterCard and Visa chip-enabled technology put us in the forefront of the Prepaid Card industry.

Table of Contents

Health Savings Accounts (HSA): We provide clients with a simplified approach to help their employees manage their health care costs and accumulate wealth with tax-advantaged accounts. We consolidate administration of all health spending accounts onto one common platform, including HSA, Health Reimbursement Arrangements, Flexible Spending Accounts and Health Incentive Accounts. By consolidating and integrating the management of health spending accounts, we help our clients improve benefit enrollment and account opening, consolidate customer service, simplify communications and streamline account funding and management. As of December 31, 2018, we had approximately 1 million active HSA accounts and $2.5 billion of assets under management within our HSA offering.

Child Support Payments: We are an industry leader of State Government Disbursement Units in the U.S. for child support payments. We collect payments from non-custodial parents via check, credit card and transfers from employee payroll systems and disburse payments to the beneficiaries.

End-User Engagement

We offer a range of services that help our clients support their end-users. This includes in-bound and out-bound call support for both simple and complex transactions, technical support and patient assistance. We also provide multi-channel communication support (both print and digital) across a range of industries.

Human Resources Services

We help our clients support their employees at all stages of employment from initial on-boarding through retirement, as well as HSA administration. We offer clients a range of customized advisory, technology and administrative services that improve the ability of employees to manage their benefits, professional development and retirement planning. Also, we assist our clients with workers' compensation claims management.

Finance and Accounting Services

We serve clients by managing their critical finance, accounting and procurement processes. Our services include general accounting and reporting, billing and accounts receivable and purchasing, accounts payable and expense management services. We also offer wholesale and retail lockbox services and process auto and mortgage loans in the United States. With a global, dedicated team, we manage the core, end-to-end process areas of finance, accounting and procurement for some of the world’s most recognized brands.

Legal Business Services

We have been providing client support to law firms and corporate legal departments for over 20 years. We work across the litigation lifecycle, with particular focus on the legal discovery and review process. Our offerings include litigation support services, compliance and risk review and managed services support.

Workforce Learning Services

We are a provider of end-to-end learning services, designed to accelerate the productivity and development of our clients’ employees and extended work forces. Our global presence, superior innovation and expertise allow us to deliver performance-based learning services tailored to our clients’ unique strategic business goals. Our offerings include learning strategy and assessment, instructor management and learning administration.

Applied Automation and Analytics Solutions

Many of our service offerings described above incorporate our applied automation and analytics solutions to increase their value and effectiveness to clients across all industries. We deploy these solutions to personalize millions of interactions, optimize service delivery and simplify complex processes. For example, our customer care services harness the power of applied analytics and automation to help our customer service agents work more efficiently across different communication channels. Our applied automation solutions track and learn the most efficient means to address common customer service needs as they occur in real time so that we can solve the same problem faster the next time around. The combination of applied automation and analytics allows us to identify new service demand patterns and opportunities quickly so that we can proactively address them on behalf of our clients.

Table of Contents

Our Competitive Strengths

We possess a number of competitive strengths that distinguish us from our competitors, including:

Leadership in attractive growth markets. We are a leader in business process services. Our clients continue to outsource key business processes to accelerate performance and innovation. Additionally, clients are moving beyond services for back-office functions in order to drive customer satisfaction and loyalty, as well as productivity and efficiency. The increase in globalization and cost competition continues to accelerate, forcing companies to seek ways to stay ahead of the competition. These factors, along with clients and their customers demanding more personalized, seamless and secure solutions, are collectively driving the ongoing shift to next-generation software and automation technologies.

- ***Healthcare.*** U.S. healthcare spending was estimated to have represented 17.9% of GDP in 2017 and is projected to grow at an average rate of 5.5% per year for 2017-2026. As one of the most regulated industries, healthcare providers must balance increased utilization with heightened complexity and new financial pressures such as government budget challenges to significantly reduce reimbursements, reimbursement penalties for hospital readmissions and a shift from fee-for-service to “value-based” population health management. We are widely recognized by industry analysts as a leader in healthcare payer operations, serving 19 of the top 20 U.S. managed healthcare plans and providing administrative and care management solutions to Medicaid programs and federally funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia.

- ***Transportation.*** Traffic congestion continues to increase as urbanization and changing demographics take hold globally. As a result, optimized transportation systems are becoming critical to increase efficiency while maintaining strict safety requirements. Electronic toll collection, public transit and parking all represent key growth drivers as governments at all levels increasingly focus on transportation infrastructure. We are an award-winning innovator in parking management.

- ***Transaction Processing.*** We provide high volume print and mail services, enrollment processing and personalized and targeted marketing and communications, to large corporations and we believe we are a leading provider in this market.

- ***Prepaid Cards***: We are the leading provider of prepaid payment card services in support of the U.S. government prepaid card services market.

Global delivery expertise. Our scale and global delivery network enables us to deliver our proprietary technology, differentiated service offerings and service capabilities expertly to clients around the world. We have operations in India, Philippines, Jamaica, Guatemala, Mexico, Romania, Dominican Republic and several locations within the United States, giving our customers the option for "onshore" or "offshore" outsourced business process services. This global delivery model enables us to leverage lower-cost production locations, consistent methodologies and processes, time zone advantages and business continuity plans. As of December 31, 2018, 49% of our employees were located in high cost countries and 51% were located in low cost countries.

Differentiated suite of multi-industry service offerings at scale. We manage transaction-intensive processes and work directly with end-users to meet their needs often in real-time. We are unique in our ability to offer our clients these business process services on a large scale and with high quality. Additionally, we are able to leverage our multi-industry services to bring the same scale and quality to our portfolio of industry-specific service offerings, such as healthcare claims management, employee benefits management and public transit fare collection.

Innovation and development. We innovate by developing and acquiring new technologies and capabilities that improve business processes. We are constantly creating the next generation of simple, automated and touchless business processes to drive lower costs, higher quality and increased end-user satisfaction. Analytics allow us to transform big data into useful information that helps identify operational improvements and constituent insights. Additionally, we leverage robotic process automation and predictive analytics and combine this with our deep subject matter expertise to create intelligent services that improve security, increase speed and improve accuracy, quality and regulatory compliance, and uncover insights that support better decision making and outcomes for our clients.

Table of Contents

Stable recurring revenue model supported by a loyal, diverse client base. We have a broad and diverse base of clients in 26 countries across geographies and industries, including Fortune 1000 companies, small and midsize businesses and governmental entities. Our close client relationships and successful client execution support our stable recurring revenue model and high renewal rates. Excluding our strategic decision not to renew certain contracts, renewal rates for 2018 and 2017 were 95% and 94%, respectively.

Our Strategies

Our strategy is to drive leadership in attractive markets by leveraging and building on our competitive strengths. We intend to execute our strategy through increased business portfolio focus and operating discipline, enhanced sales and delivery capabilities and tightly aligned investments. Our strategy is designed to deliver value by delivering profitable growth, expanding operating margins and deploying a disciplined capital allocation strategy.

Specific elements of our strategy include the following:

Expand within attractive industries. The industries in which we operate have attractive revenue growth rates, generally in the mid-single digits. We intend to sharpen our focus and expand our business in industries with strong growth and profitability characteristics. We will employ a disciplined approach to portfolio management to complement our competitive strengths and build depth and breadth in our core businesses. Within the Healthcare industry, we intend to leverage our data analytics, differentiated service offerings and industry know-how to continue to service payer, provider and core government healthcare clients. Within the Transportation industry, we will leverage our global, end-to-end platforms to continue to deliver seamless travel experiences while providing back-end Transaction Processing and Call Center services for government clients globally.

Optimize and strengthen our services capabilities. We plan to optimize our services capabilities and strengthen several core areas, including Transaction Processing, Finance and Accounting and Prepaid Card services by building out our services offerings and continuing to improve our competitive strengths. We have divested non-core assets, refocused our business towards higher margin growing segments and consolidated delivery operations to enable greater productivity. Within Transaction Processing, we intend to continue to build industry-specific service offerings and advance inbound and outbound processing capabilities. Within End-User Engagement, we intend to capitalize on our global scale, cost efficiencies and our ability to provide seamless communications between our clients and their end-users through traditional (e.g., voice) and digital (e.g., web, mobile and Internet of Things) channels. In Prepaid Cards, we plan to continue to leverage our scalable platform to help our clients simplify their payment disbursement processes.

Continue to advance next-generation platforms and capabilities. We intend to maintain our focus on innovation to create next-generation solutions aligned with our clients' future needs and our growth strategies. We plan to advance our current platforms, further automate and personalize business processes and enhance data analytics capabilities to deliver value-added services for our clients.

Engage, develop and support our people. We intend to increasingly develop our employees by investing in training, processes and systems to equip them with modern tools that enable them to perform their jobs more efficiently. Furthermore, we plan to strengthen our sales teams throughout improved and optimized coverage and effective talent management.

Competition

Although we encounter competition in all areas of our portfolio, we lead across many areas of our principal businesses. We compete on the basis of technology, performance, price, quality, reliability and customer service and support. In the current political environment in the U.S. and other territories, we also consider our "onshore" delivery capacity to be a competitive advantage. We participate in a highly competitive and rapidly evolving market, driven by changes in industry standards and demands of customers to become more efficient. Our competitors range from large international companies to relatively small firms. Our competitors include:

- Large multinational service providers such as CGI Group, Accenture, Aon Hewitt, Cognizant, Hewlett-Packard Enterprise, IBM, Teletech and Teleperformance;
- Traditional Business Process Outsourcing companies such as Genpact, ELX Services, Exela Technologies and WNS Global Services;
- Payroll processing and human capital management providers such as ADP and Paychex;

- Healthcare-focused IT and service solutions providers such as Cerner and Maximus;
- U.S. Federal focused government services such as CACI International and DXC Technology;
- Transportation multi-nationals such as Roper/TransCore, Cubic and Kapsch; and
- Smaller niche business processing service providers and in-house departments that perform functions that could be outsourced to us.

Sales and Marketing

We market our business process services to both potential and existing clients through our worldwide sales force and our business development team. Additionally, we have dedicated “solution architects” who work with clients to better understand their situation and develop a custom-tailored solution to meet their unique needs.

Our sales and marketing strategy is to go to market by industry to deliver key industry-specific and multi-industry service offerings to our clients. We focus on developing new prospects through market research and analysis, renewing expiring contracts and leveraging existing client relationships to offer additional services. We leverage our broad, multi-industry service offerings to package solutions through enterprise selling, while maintaining a disciplined approach to pricing and contracting. Our sales efforts typically involve extended selling cycles and our expertise in specific industries is critical to winning new business.

Our Geographies

We provide services globally and we have a diversified geographic delivery network, including a significant presence within the U.S. In 2018, approximately 12% of our revenues were generated by clients outside the United States. In 2018, our revenues by geography were as follows: $4,748 million in the United States (88% of total revenues), $497 million in Europe (9% of total revenues) and $148 million from the rest of the world (3% of total revenues). We present geographical information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference.

Innovation and Research and Development

Our innovation and research and development (R&D) capabilities are critical to our client value proposition and competitive positioning. Our investments in innovation align with our growth strategies and are driven by a view of future needs and required competencies developed in close partnership with our clients and R&D partners. We are investing in attractive markets, such as healthcare and transportation, and building on proven platforms to create services that distinguish us from our competitors.

Our innovation and R&D are focused on three key areas: automation, personalization and analytics.

Automation—Create simple, automated and touchless business processes to drive lower costs, higher quality and increased agility. Businesses require agility to quickly respond to market changes and new customer requirements. To enable greater business process agility, our R&D goals are to simplify, automate and enable business processes via flexible platforms that run on robust and scalable infrastructures. Automation of business processes benefits from our strong image, video and robotic processing, as well as our machine learning capabilities. Application of these methods to business processes enables technology to perform tasks that today are performed manually. Examples include providing automation solutions in transportation by aggregating and automatically applying business rules to simplify toll payments, using our state-of-the-art video and image analytics to reduce the need for manual review of license plates in tolling and toll adjustment scenarios, analyzing data on eligibility claims and checking for correctness on applications. The scope of automation is applied across our portfolio of services and is a key element of our ongoing strategy of modern, efficient services.

Table of Contents

Personalization—Augment humans by providing secure, real-time and context-aware personalized products and services. Whether business correspondence, personal communication, manufactured items or information service, personalization increases the value to the recipient. Our R&D investments lead to technologies that improve the efficiency, economics and relevance of business services, such as customer care and health and welfare services. For example, in our current customer care service offerings, the human touch is seamlessly added as our software automatically takes telephony data and merges it with customer records pulled from multiple sources to seamlessly create targeted scripts and flows. This allows the agent to have the caller's data readily available and provide a more personal experience to the customer —whether on the phone or online. In toll systems, our systems automatically pull up a customer's name, verify their information and prompt them for unpaid tolls. In transit systems, our mobile app aggregates and calculates the time, cost, carbon footprint and health benefits from walking, biking, driving, parking and taking public transit. For health and welfare, our systems provide state-of-the-art personalized delivery to ensure the best utilization of funds for the neediest populations.

Analytics—Transform big data into useful information to support better decision making. Competitive advantage can be achieved by better utilizing available and real-time information. Today, information resides in an ever increasing universe of servers, repositories and formats. The vast majority of information is unstructured, including text, images, voice and videos. We seek to better manage large data systems in order to extract business insights to provide our clients with actionable recommendations and new services. Tailoring these methods to various industry applications leads to new customer value propositions. In hospitals, we mine usage and clinical indicators to improve patient experiences. We also help our healthcare clients identify waste and fraud by identifying networks of providers and patients with suspicious behavior, such as sudden and dramatic increases in a provider's level of business or unusual or illogical patient treatment sequences. In transportation, we enable transport and parking operators to better understand and predict commuter needs, including adherence to schedules, passenger loading levels, car park utilization rates and the impact of varying factors, such as weather and schedule variations. In our card payment services business, we perform geo location analytics to predict potential fraud behaviors to assure monies are being distributed to the intended recipients.

Intellectual Property

Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. We own approximately 1,011 patents and pending applications. Our patent portfolio evolves as new patents are awarded to us and as older patents expire. These patents expire at various dates, generally 20 years from their original filing dates. While we believe that our portfolio of patents and applications has value, in general, no single patent is essential to our business or any individual segment. In addition, any of our proprietary rights could be challenged, invalidated or circumvented, or may not provide significant competitive advantages.

Our business relies on software provided to an approximately equal extent, by both internal development and external sourcing to deliver our services. With respect to internally developed software, we claim copyright on all such software, registering works which may be accessible to third parties. In addition, we rely on maintaining source code confidentiality to assure our market competitiveness. With respect to externally sourced software, we rely on contracts assuring our continued access for our business usage.

In the United States, we own 87 trademarks, which are either registered or applied for, reflecting the many businesses we participate in. These trademarks may have a perpetual life, subject to renewal every 10 years and may be subject to cancellation or invalidation based on certain use requirements and third party challenges, or on other grounds. We vigorously enforce and protect our trademarks.

People and Culture

We draw on the business and technical expertise of our talented and diverse global workforce to provide our clients with high-quality services. Our business leaders bring a strong diversity of experience in our industry and a track record of successful performance and execution.

Table of Contents

Conduent established its own diversity and inclusion program post-separation, which is overseen by Conduent's human resources department. Conduent promotes understanding and inclusion through a comprehensive set of diversity initiatives and strategies, including addressing under-representation by identifying shortfalls and developing action plans to close those gaps and through work-life programs that assist employees in certain aspects of their personal lives. Additionally, Conduent informs and educates all employees on diversity programs, policies and achievements. As an independent company, we intend to continue our commitment to diversity and inclusion and implement similar policies and programs.

In the United States, Conduent complies with Equal Employment Opportunity guidelines and all applicable federal, state and local laws that govern the hiring and treatment of our employees.

As of December 31, 2018, we had approximately 82,000 employees globally, with 43% located in the United States and the remainder located primarily in India, Philippines, Jamaica, Guatemala and Mexico.

Training and Talent Development

We believe our people are our most important asset, which is why we invest in employee growth and development programs. We are focused on building a workplace where our people can do their best work and have access to the tools and resources they need to perform their jobs more effectively. We are building a culture of learning and have shifted from delivering training to incorporating learning into day-to-day work.

We have a strong performance management system in place that requires all employees to engage with their managers on goal-setting and performance feedback, enabling personal and professional development. There is a strong emphasis on mentorship and coaching, both formal and informal, to help employees get to the next level in their careers. We enable this by developing management capability for our frontline leaders to ensure they are able to coach and mentor their teams and engage in constructive and continuous two-way dialogue.

Corporate Ethics

Our commitment to business ethics represents more than a declaration to do the right thing. It has become an integral part of the way we do business. We operate according to our ethics and compliance program, which is designed to meet general governance and specific industry and regulatory requirements with a focus on values, culture and performance with integrity. Conduent has a business ethics program, which is overseen by the business ethics office, and a code of business conduct (Code), which serves as the foundation of our business ethics program. The Code sets forth our expectations for ethical leadership, performance with integrity and compliance with company policies and the law. In addition, the Code embodies and reinforces Conduent’s commitment to integrity and helps employees resolve ethics and compliance concerns consistent with operating principles and legal and policy controls. In addition, our employees are required to complete business ethics training annually and we periodically solicit their input to gauge the state of Conduent’s ethical culture and help identify areas for improvement.

Our directors must act in accordance with our Code of Business Conduct and Ethics for Members of the Board; our principal executive officer, principal financial officer and principal accounting officer, among others, must act in accordance with our Finance Code of Conduct; and all of our executives and employees must act in accordance with our Code of Business Conduct. Each of these codes of conduct can be accessed through our website at www.conduent.com/corporate-governance. They are also available to any shareholder who requests them in writing addressed to Conduent Incorporated, 100 Campus Drive Suite 200, Florham Park, NJ 07932, Attention: Corporate Secretary. We will disclose any future amendments to, or waivers from, provisions of our Code of Business Conduct and Ethics for members of the Board and, our Code of Business Conduct and our Finance Code of Conduct for our officers on our website as promptly as practicable, and consistent with the requirements of applicable U.S. Securities and Exchange Commission (SEC) and New York Stock Exchange rules.

Seasonality

Our revenues can be affected by various factors such as our clients’ demand pattern for our services. These factors have historically resulted in higher revenues and profits in the fourth quarter.

Table of Contents

Other

Conduent Incorporated is a New York corporation, organized in 2016. Our principal executive offices are located at 100 Campus Drive, Florham Park, New Jersey 07932. Our telephone number is (844) 663-2638.

In the Investor Information section of our Internet website, you will find our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. We make these documents available as soon as we can after we have filed them with, or furnished them to, the SEC.

Our Internet address is www.conduent.com.

ITEM 1A. RISK FACTORS

Our government contracts are subject to appropriation of funds, termination rights, audits and investigations, which, if exercised, could negatively impact our reputation and reduce our ability to compete for new contracts.

A significant portion of our revenues is derived from contracts with U.S. federal, state and local governments and their agencies, and some of our revenues are derived from contracts with foreign governments and their agencies. Government entities typically finance projects through appropriated funds. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, failures to enact appropriation legislation (e.g., a government "shut-down"), government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt or funding constraints, could result in lower governmental sales and in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Additionally, if the government discovers improper or illegal activities or contractual non-compliance (including improper billing), we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with the government. Any resulting penalties or sanctions could materially adversely affect our results of operations and financial condition. Moreover, government contracts are generally subject to audits and investigations by government agencies. If the government finds that we inappropriately charged any costs to a contract, the costs are not reimbursable or, if already reimbursed, the cost must be refunded to the government. Further, the negative publicity that could arise from any such penalties, sanctions or findings in such audits or investigations could have an adverse effect on our reputation in the industry and reduce our ability to compete for new contracts and could materially adversely affect our results of operations and financial condition.

We derive significant revenue and profit from commercial and government contracts awarded through competitive bidding processes, including renewals, which can impose substantial costs on us, and we will not achieve revenue and profit objectives if we fail to accurately and effectively bid on such projects.

Many of these contracts are extremely complex and require the investment of significant resources in order to prepare accurate bids and proposals. Competitive bidding imposes substantial costs and presents a number of risks, including: (i) the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may or may not be awarded to us; (ii) the need to estimate accurately the resources and costs that will be required to implement and service any contracts we are awarded, sometimes in advance of the final determination of their full scope and design; (iii) the expense and delay that may arise if our competitors protest or challenge awards made to us pursuant to competitive bidding and the risk that such protests or challenges could result in the requirement to resubmit bids and in the termination, reduction or modification of the awarded contracts; and (iv) the opportunity cost of not bidding on and winning other contracts we might otherwise pursue. If our competitors protest or challenge an award made to us on a government contract, the costs to defend such an award may be significant and could involve subsequent litigation that could take years to resolve.

Table of Contents

Our ability to recover capital and other investments in connection with our contracts is subject to risk.

In order to attract and retain large outsourcing contracts, we sometimes make significant capital and other investments to enable us to perform our services under those contracts, such as purchases of information technology equipment, facility costs, labor resources and costs incurred to develop and implement software. The net book value of certain assets recorded, including a portion of our intangible assets, could be impaired, and our results of operations and financial condition could be materially adversely affected in the event of the early termination of all or a part of such a contract or a reduction in volumes and services thereunder for reasons such as a customer's or client's merger or acquisition, divestiture of assets or businesses, business failure or deterioration or a customer's or client's exercise of contract termination rights.

We rely to a significant extent on third-party providers, such as subcontractors, a relatively small number of primary software vendors, utility providers and network providers; if they cannot deliver or perform as expected or if our relationships with them are terminated or otherwise change, our results of operations and financial condition could be materially adversely affected.

Our ability to service our customers and clients and deliver and implement solutions depends to a large extent on third-party providers such as subcontractors, a relatively small number of primary software vendors, software application developers, utility providers and network providers meeting their obligations to us and our expectations in a timely, quality manner. Recently, we have experienced suboptimal performance from an inherited legacy technology vendor, which has caused certain operational challenges and customer delivery performance issues that we have been aggressively addressing. Our results of operations and financial condition could be materially adversely affected and we might incur significant additional liabilities (a) if we are unable to adequately renegotiate these legacy contracts, or (b) if any of our third-party providers (1) do not meet their service level obligations, (2) do not meet our or our clients' expectations, (3) terminate or refuse to renew their relationships with us, or (4) offer their products to us with less advantageous prices and other terms than previously offered.

Failure to deliver on our contractual obligations properly and on time could materially adversely affect our results of operations and financial condition.

Our business model depends in large part on our ability to retain existing and attract new work from our base of existing clients, as well as on relationships we develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to meet those needs. In order for our business to grow, we must successfully manage the provision of services under our contracts. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client or obtain new work from other potential clients. In particular, many of our contracts with non-government clients may be terminated by the client, without cause, upon specified advance notice. Accordingly, clients who are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date, which may result in our inability to fully recover our up-front investments. In addition, clients could direct future business to our competitors. We could also trigger contractual credits to clients or a contractual default. Failure to properly transition new clients to our systems, properly budget transition costs or accurately estimate contract operational costs could result in delays in our contract performance, trigger service level penalties, impair fixed or intangible assets or result in contract profit margins that do not meet our expectations or our historical profit margins.

In addition, we incur significant expenditures for the development and construction of system software platforms needed to support our clients' needs. Our failure to fully understand client requirements or implement the appropriate operating systems or databases or solutions which enable the use of other supporting software may delay the project and result in cost overruns or potential impairment of the related software platforms, which could materially adversely affect our results of operations and financial condition.

We face significant competition and our failure to compete successfully could materially adversely affect our results of operations and financial condition.

To remain competitive, we must develop services and applications; periodically enhance our existing offerings; remain cost efficient; and attract and retain key personnel and management. If we are unable to compete successfully, we could lose market share and important customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Table of Contents

Our significant indebtedness could materially adversely affect our results of operations and financial condition.

We have and will continue to have a significant amount of debt and other obligations. Our substantial debt and other obligations could have important consequences. For example, it could (i) increase our vulnerability to general adverse economic and industry conditions; (ii) limit our ability to obtain additional financing for future working capital, capital expenditures, acquisitions and other general corporate requirements; (iii) require us to dedicate a substantial portion of our cash flows from operations to service debt and other obligations thereby reducing the availability of our cash flows from operations for other purposes; (iv) limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate; (v) place us at a competitive disadvantage compared to our competitors that have less debt; and (vi) become due and payable upon a change in control. If new debt is added to our current debt levels, these related risks could increase.

Our ability to make payments on and to refinance our indebtedness, as well as any future debt that we may incur, will depend on our ability to generate cash in the future from operations, financings or asset sales. Our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

The terms of our indebtedness may restrict our current and future operations, particularly our ability to incur debt that we may need to fund initiatives in response to changes in our business, the industries in which we operate, the economy and governmental regulations.

The terms of our indebtedness include a number of restrictive covenants that impose significant operating and financial restrictions on us and our subsidiaries and limit our ability to engage in actions that may be in our long-term best interests. These may restrict our and our subsidiaries' ability to take some or all of the following actions:

- incur or guarantee additional indebtedness or sell disqualified or preferred stock;
- pay dividends on, make distributions in respect of, repurchase or redeem, capital stock;
- make investments or acquisitions;
- sell, transfer or otherwise dispose of certain assets, including accounts receivable;
- create liens;
- enter into sale/leaseback transactions;
- enter into agreements restricting the ability to pay dividends or make other intercompany transfers;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our or our subsidiaries' assets;
- enter into transactions with affiliates;
- prepay, repurchase or redeem certain kinds of indebtedness;
- issue or sell stock of our subsidiaries; and/or
- significantly change the nature of our business.

As a result of all of these restrictions, we may be:

- limited in how we conduct our business and pursue our strategy;
- unable to raise additional debt financing to operate during general economic or business downturns; or
- unable to compete effectively or to take advantage of new business opportunities.

A breach of any of the restrictive covenants, if applicable, could result in an event of default under the terms of this indebtedness. If an event of default occurs, the lenders would have the right to accelerate the repayment of such debt and the event of default or acceleration may result in the acceleration of the repayment of any other of our debt to which a cross-default or cross-acceleration provision applies. Furthermore, the lenders of this indebtedness may require that we pledge our assets as collateral as security for our repayment obligations. If we were unable to repay any amount of this indebtedness when due and payable, the lenders could proceed against the collateral that secures this indebtedness. In the event our creditors accelerate the repayment of our borrowings, we may not have sufficient assets to repay such indebtedness, which could materially adversely affect our results of operations and financial condition.

Table of Contents

Our business is dependent on continued interest in outsourcing.

Our business and growth depend in large part on continued interest in outsourced business process services. Outsourcing means that an entity contracts with a third-party, such as us, to provide business process services rather than perform such services in-house. There can be no assurance that this interest will continue, as organizations may elect to perform such services themselves and/or the business process outsourcing industry could move to an as-a-Service model, thereby eliminating traditional business process outsourcing tasks. A significant change in this interest in outsourcing could materially adversely affect our results of operations and financial condition. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

Our profitability is dependent upon our ability to obtain adequate pricing for our services and to improve our cost structure.

Our success depends on our ability to obtain adequate pricing for our services that will provide a reasonable return to our shareholders. Depending on competitive market factors, future prices we obtain for our services may decline from previous levels. If we are unable to obtain adequate pricing for our services, it could materially adversely affect our results of operations and financial condition. In addition, our contracts are increasingly requiring tighter timelines for implementation as well as more stringent service level metrics. This makes the bidding process for new contracts much more difficult and requires us to adequately consider these requirements in the pricing of our services.

In order to meet the service requirements of our customers, which often includes 24/7 service, and to optimize our employee cost base, including our back-office support, we often locate our delivery service and back-office support centers in lower-cost locations, including several developing countries. Concentrating our centers in these locations presents a number of operational risks, many of which are beyond our control, including the risks of political instability, natural disasters, safety and security risks, labor disruptions, excessive employee turnover and rising labor rates. Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of such centers outside of the United States could materially adversely affect our results of operations and financial condition. These risks could impair our ability to effectively provide services to our customers and keep our costs aligned to our associated revenues and market requirements.

Our ability to sustain and improve profit margins is dependent on a number of factors, including our ability to continue to improve the cost efficiency of our operations through such programs as robotic process automation, to absorb the level of pricing pressures on our services through cost improvements and to successfully complete information technology initiatives. If any of these factors adversely materialize or if we are unable to achieve and maintain productivity improvements through restructuring actions or information technology initiatives, our ability to offset labor cost inflation and competitive price pressures would be impaired, each of which could materially adversely affect our results of operations and financial condition.

We may be subject to claims of infringement of third-party intellectual property rights which could adversely affect our results of operation and financial condition.

We rely heavily on the use of intellectual property. We do not own all of the software that we use to run our business; instead we license this software from a small number of primary vendors. If these vendors assert claims that we or our clients are infringing on their software or related intellectual property, we could incur substantial costs to defend these claims, which could materially adversely affect our results of operations and financial condition. In addition, if any of our vendors' infringement claims are ultimately successful, our vendors could require us to (i) cease selling or using products or services that incorporate the challenged software or technology, (ii) obtain a license or additional licenses from our vendors or (iii) redesign our services which rely on the challenged software or technology. In addition, we may be exposed to claims for monetary damages. If we are unsuccessful in defending an infringement claim and our vendors require us to initiate any of the above actions, or we are required to pay monetary damages, then such actions could materially adversely affect our results of operations and financial condition.

Table of Contents

We are subject to laws of the United States and foreign jurisdictions relating to individually identifiable information and personal health information, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and negatively impact our operations.

We receive, process, transmit and store information relating to identifiable individuals, both in our role as a service provider and as an employer. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations designed to protect both individually identifiable information as well as personal health information, including the Health Insurance Portability and Accountability Act of 1996, as amended (“HIPAA”) and the HIPAA regulations governing, among other things, the privacy, security and electronic transmission of individually identifiable health information, and the European Union Directive on Data Protection (Directive 95/46/EC). The EU General Data Protection Regulation (GDPR) replaced the Data Protection Directive 95/46/EC (with an enforcement date of May 25, 2018) and is designed to harmonize data privacy laws across Europe, to protect and empower all EU citizens data privacy, to reshape the way organizations across the region approach data privacy and will have a significant impact on how we process and handle certain data. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of individually identifiable information. These laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. For example, the invalidation of the U.S.-EU Safe Harbor regime and the GDPR have required us to implement alternative mechanisms in order for some of our data flows from Europe to the United States to comply with applicable law. Changes to existing laws, the introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to obtain and process information and allegations by our customers and clients that we have not performed our contractual obligations, any of which could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and materially adversely affect our results of operations and financial condition.

We process, support and execute financial transactions, and disburse funds, on behalf of both government and commercial customers, often in partnership with financial institutions. This activity includes receiving debit and credit card information, processing payments for and due to our customers and disbursing funds on payment or debit cards to payees of our customers. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations, including the Electronic Fund Transfer Act, as amended, the Currency and Foreign Transactions Reporting Act of 1970 (commonly known as the Bank Secrecy Act), as amended, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (including the so-called Durbin Amendment), as amended, the Gramm-Leach-Bliley Act (also known as the Financial Modernization Act of 1999), as amended, and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of certain financial transactions and related support services. These laws are subject to frequent changes, and new statutes and regulations in this area may be enacted at any time. Changes to existing laws, the introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process and support financial transactions and allegations by our customers, partners and clients that we have not performed our contractual obligations. Any of these could materially adversely affect our results of operations and financial condition.

Table of Contents

Our data systems, information systems and network infrastructure may be subject to hacking or other cybersecurity threats and other service interruptions, which could expose us to liability, impair our reputation or temporarily render us unable to fulfill our service obligations under our contracts.

We are a leading provider of business processing services concentrated in transaction-intensive processing, analytics and automation. We act as a trusted business partner in both front office and back office platforms, providing interactions on a substantial scale with our customers and other third-parties. Our customers include global commercial clients and government clients who depend upon our operational efficiency, non-interruption of service, and accuracy and security of information. We also use third-party providers such as subcontractors, software vendors, utility providers and network providers, upon whom we rely for our business processing services, to deliver uninterrupted, secure service. As part of our business processing services we also develop system software platforms necessary to support our customers' needs, with significant ongoing investment in developing and operating customer-appropriate operating systems, data bases and system software solutions. We also receive, process, transmit and store substantial volumes of information relating to identifiable individuals, both in our role as a service provider and as an employer, and we are subject to numerous laws, rules and regulations in the United States (both federal and state) and foreign jurisdictions designed to protect both individually identifiable information as well as personal health information. We also receive, process and implement financial transactions, and disburse funds, on behalf of both commercial and government customers, which activity includes receiving debit and credit card information to process payments due to our customers as well as disbursing funds to payees of our customers. As a result of these and other business processing services, the integrity, security, accuracy and non-interruption of our systems and information technology and that of our third-party providers and our interfaces with our customers are extremely important to our business, operating results, growth, prospects and reputation.

We have implemented security systems and controls, both directly and with third-party subcontractors and service providers, with the intent of maintaining both the physical security of our facilities and the data security of our customers', clients' and suppliers' confidential information and information related to identifiable individuals (including payment card and debit and credit card information and health information) against unauthorized access through our information systems or by other electronic transmission or through the misdirection, theft or loss of physical media. These include, for example, the appropriate encryption of information. Despite such efforts, we are susceptible to breach of security systems which may result in unauthorized access to our facilities and those of our customers and/or the information we and our customers are trying to protect. Cybersecurity failure might be caused by computer hacking, malware, computer viruses, worms and other destructive software, "cyber-attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Operational or business delays may also result from the disruption of network or information systems and subsequent remediation activities.

Because the techniques used to obtain unauthorized access are constantly changing and becoming increasingly more sophisticated and often are not recognized until launched against a target, we or our third-party service providers may be unable to anticipate these techniques or implement sufficient preventative measures. Hacking, malware, phishing, viruses and other "cyber-attacks" have become more prevalent, have occurred in our systems in the past, and may occur in our systems in the future. Although we have implemented and intend to continue to implement what we believe to be appropriate cyber practices and cybersecurity systems, these systems may prove to be inadequate and result in the disruption, failure, misappropriation or corruption of our network and information systems. Notwithstanding the preventative and protective measures we have in place, it may not be possible for us to fully or timely know if or when such incidents arise, or the full business impact of any cybersecurity breach.

Additionally, with advances in computer capabilities and data protection requirements to address ongoing threats, we may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by security breaches. Moreover, employee error or malfeasance, faulty password management or other irregularities may result in a defeat of our or our third-party service providers' security measures and a breach of our or our third-party service providers' information systems (whether digital, cloud-based or otherwise).

Table of Contents

If unauthorized parties gain physical access to one of our or one of our third-party service providers' facilities or electronic access to our or one of our third-party service providers' information systems or such sensitive or confidential information is misdirected, lost or stolen during transmission or transport, any theft or misuse of such information could result in, among other things, unfavorable publicity and significant damage to our brand, governmental inquiry, oversight and possible regulatory action, difficulty in marketing our services, loss of existing and potential customers, allegations by our customers that we have not performed our contractual obligations, litigation by affected parties and possible financial obligations for substantial damages related to the theft or misuse of such information, any of which could materially adversely affect our results of operations and financial condition. Moreover, a security breach could require us to devote significant management resources to address the problems created by the security breach and to expend significant additional resources to upgrade further the security measures that we employ to guard such personal information against "cyber-attacks" and to maintain various systems and data centers for our customers. Often these systems and data centers must be maintained worldwide and on a 24/7 basis. Although we endeavor to ensure that there is adequate backup and maintenance of these systems and centers, we could experience service interruptions that could result in curtailed operations and loss of existing and potential customers, which could significantly reduce our revenues and profits in addition to significantly impairing our reputation. If our information systems and our back-up systems are damaged, breached or cease to function properly, we may have to make a significant investment to repair or replace them, and we may suffer interruptions in our operations in the interim, each of which could materially adversely affect our results of operations and financial condition and diminish the value of our shares.

In addition, our and our customers' systems and networks are subject to continued threats of terrorism, which could disrupt our operations as well as disrupt the utilities and telecommunications infrastructure on which our business depends. To the extent any such disruptions were to occur, our business, operating results and financial condition could be materially adversely affected.

If we underestimate the scope of work or the costs of performance in our contracts, or we mis-perform our contracts, our results of operations and financial condition could be materially adversely affected.

In order to stay competitive in our industry, we must keep pace with changing technologies and customer preferences. Many of our contracts require us to design, develop and implement new technological and operating systems for our customers. Many of these systems involve detailed and complex computer source code which must be created and integrated into a working system that meets contract specifications. The accounting for these contracts requires judgment relative to assessing risks, estimating contract revenues and costs and making assumptions for schedule and technical issues. To varying degrees, each contract type involves some risk that we could underestimate the costs and resources necessary to fulfill the contract. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances has resulted, in reduced profits or in losses. In addition, many of our contracts contain complicated performance obligations, including, without limitation, designing and building new integrated computer systems. These contracts carry potential financial penalties or could result in financial damages or exposures if we fail to properly perform those obligations and could result in our results of operations and financial condition being materially adversely affected.

Our continuing emphasis and shift toward technology-led digital transactions, rather than more labor intensive commoditized services, could impact our type and timing of the customer contracts that we enter into, particularly in the short-term.

We have made the strategic decision to increase our focus on technology-led digital transactions and focus less on historic labor-intensive commoditized services and customer contracts. We believe technology-led digital transactions are becoming, and will become, the type of services required by many of our customers and those in the industry. We believe that our continuing focus on digital transactions will better create long-term value and increased profitability. However, this increased emphasis on technology-led digital transactions has resulted in and will continue to result in our exiting certain services and contracts, and could adversely impact our revenues and our results of operations, particularly in the short-term.

Table of Contents

Our customers' decision-making cycles are changing and the lead time for customers to commit to contracts with us has been lengthening.

As our services industry and our service offerings change and evolve, particularly with our customers increasing their focus on digital offerings, our customers are spending increased time and resources evaluating technology and other investments needed to obtain optimal results and performance, including from their outsourcing providers including the Company. This has led to longer sales lead time cycles for contract commitments from our customers, which can adversely affect the timing of customer commitments and our revenues and results of operations.

If we are unable to collect our receivables for unbilled services, our results of operations and financial condition could be materially adversely affected.

The profitability of certain of our large contracts depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. Actual losses on client balances could differ from current estimates and, as a result, may require adjustment of our receivables for unbilled services. Our receivables include long-term contracts. Over the course of a long-term contract, our customers' financial condition may change such that their ability to pay their obligations, and our ability to collect our fees for services rendered, is adversely affected. Additionally, we may perform work for the federal, state and local governments, with respect to which we must file requests for equitable adjustment or claims with the proper agency to seek recovery in whole or in part, for out-of-scope work directed or caused by the government customer in support of its project, and the amounts of such recoveries may not meet our expectations or cover our costs. Timely collection of client balances also depends on our ability to complete our contractual commitments (such as, our ability to achieve specified milestones in percentage-of-completion contracts) and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our results of operations and financial condition could be materially adversely affected.

A decline in revenues from or a loss or failure of significant clients could materially adversely affect our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by the loss or failure of significant clients. Some of our clients are in business sectors which have experienced significant financial difficulties or consolidation, and/or the reduction of volumes or their inability to make payments to us, as a result of, among other things, their merger or acquisition, divestiture of assets or businesses, contract expiration, nonrenewal or early termination (including termination for convenience) or business or financial failure or deterioration. Economic and political conditions could affect our clients' businesses and the markets they serve.

We have non-recurring revenue, which subjects us to a risk that our revenues and cash flows from operations may fluctuate from period to period.

Revenue generated from our non-recurring services may fluctuate due to factors both within and outside of our control. Our mix of non-recurring and recurring revenues is impacted by acquisitions as well as growth in our non-recurring lines of business, as well as our strategic decisions to exit or reduce our services in particular service areas. There is less predictability and certainty in the timing and amount of revenues generated by our non-recurring services and, accordingly, our results of operations and financial condition could be materially adversely affected by the timing and amount of revenues generated from our non-recurring services.

Table of Contents

The failure to obtain or maintain a satisfactory credit rating could adversely affect our liquidity, capital position, borrowing costs, access to capital markets and ability to post surety or performance bonds to support clients' contracts.

Any future downgrades to our credit rating could negatively impact our ability to renew contracts with our existing clients, limit our ability to compete for new clients, result in increased premiums for surety or performance bonds to support our clients' contracts and/or result in a requirement that we provide collateral to secure our surety or performance bonds. Further, certain of our commercial outsourcing contracts provide that, in the event our credit ratings are downgraded to specified levels, the client may elect to terminate its contract with us and either pay a reduced termination fee or, in some limited instances, no termination fee. Such a credit rating downgrade could adversely affect these client relationships.

There can be no assurance that we will be able to maintain our credit ratings. Any additional actual or anticipated downgrades of our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position and access to capital markets.

A failure to attract and retain necessary technical personnel and qualified subcontractors could materially adversely affect our results of operations and financial condition.

Because we operate in intensely competitive markets, our success depends to a significant extent upon our ability to attract, retain and motivate highly skilled and qualified technical personnel and to subcontract with qualified, competent subcontractors. If we fail to attract, train and retain sufficient numbers of qualified engineers, technical staff and sales and marketing representatives or are unable to contract with qualified, competent subcontractors, our results of operations and financial condition could be materially adversely affected. Experienced and capable personnel in the services industry remain in high demand, and there is continual competition for their talents. Our ability to renegotiate certain of our legacy third-party contracts which we view as unfavorable, or to improve the service levels we expect from these contracts and third-party providers, is key to our ability to timely, efficiently and profitably deliver our services to our customers. Additionally, we may be required to increase our hiring in geographic areas outside of the United States, which could subject us to increased geopolitical and exchange rate risk. The loss of any key technical employee, the loss of a key subcontractor relationship or our inability to renegotiate or obtain required service levels from legacy and other third-party providers, could materially adversely affect our results of operations and financial condition.

Increases in the cost of telephone and data services or significant interruptions in such services could materially adversely affect our results of operations and financial condition.

Our business is significantly dependent on telephone and data service provided by various local and long distance telephone and data service providers around the world. Accordingly, any disruption of these services could materially adversely affect our results of operations and financial condition. We have taken steps to mitigate our exposure to service disruptions by investing in redundant circuits, although there is no assurance that the redundant circuits would not also suffer disruption. Any inability to obtain telephone or data services at favorable rates could materially adversely affect our results of operations and financial condition. Where possible, we have entered into long-term contracts with various providers to mitigate short-term rate increases and fluctuations. There is no obligation, however, for the vendors to renew their contracts with us, or to offer the same or lower rates in the future, and such contracts are subject to termination or modification for various reasons outside of our control. A significant increase in the cost of telephone or data services that is not recoverable through an increase in the price of our services could materially adversely affect our results of operations and financial condition. In addition, a number of our facilities are located in jurisdictions outside of the United States where the provision of utility services, including electricity and water, may not be consistently reliable, and while there are backup systems in many of our operating facilities, an extended outage of utility or network services could materially adversely affect our results of operations and financial condition.

Table of Contents

If we fail to successfully develop new service offerings, including new technology components, and protect our intellectual property rights, we may be unable to retain current customers and gain new customers and our revenues would decline.

The process of developing new service offerings, including new technology components, is inherently complex and uncertain. It requires accurate anticipation of customers' changing needs and emerging technological trends. We must make long-term investments and commit significant resources before knowing whether these investments will eventually result in service offerings that achieve customer acceptance and generate the revenues required to provide desired returns. For example, establishing internal automation processes to help us develop new service offerings will require significant up-front costs and resources, which, if not monetized effectively, could materially adversely affect our revenues. In addition, some of our service offerings rely on technologies developed by and licensed from third-parties. We may not be able to obtain or continue to obtain licenses and technologies from these third-parties at all or on reasonable terms, or such third-parties may demand cross-licenses to our intellectual property. It is also possible that our intellectual property rights could be challenged, invalidated or circumvented, allowing others to use our intellectual property to our competitive detriment. We also must ensure that all of our service offerings comply with both existing and newly enacted regulatory requirements in the countries in which they are sold. If we fail to accurately anticipate and meet our customers' needs through the development of new service offerings (including technology components) or if we fail to adequately protect our intellectual property rights or if our new service offerings are not widely accepted or if our current or future service offerings fail to meet applicable worldwide regulatory requirements, we could lose market share and customers to our competitors and that could materially adversely affect our results of operations and financial condition.

The Company's business, operating results and reputation may be negatively impacted by failures or delays in our efforts to modernize our information technology infrastructure and to consolidate to fewer data centers.

We have experienced certain disruptions in our operations and service delivery performance issues as a result of some of our information technology infrastructure that is outdated and needs to be enhanced and updated, which disruptions have adversely impacted client and delivery performance. As a result we are investing in modernizing a significant portion of our information technology infrastructure with new systems and processes and consolidating our data centers as part of our transformation initiatives. This also includes investments in our data center and networks, enhancement, modernization and consolidation of our IT infrastructure and customer-facing technologies, enhanced cybersecurity and movement to cloud-based technology. We expect that these changes will provide greater strategic and operational flexibility and efficiency and better control of our systems and processes. There is a risk, however, that our modernization efforts and data center consolidations could materially and adversely disrupt our operations and our service delivery to customers, could result in contractual penalties or damage claims from customers, could occur over a period longer than planned, and could require greater than expected investment and other internal and external resources. It may also take longer to realize the intended favorable benefits from an enhanced technology infrastructure than we expected, or that disruptions may continue to occur while we enhance this infrastructure.

The process of consolidating our data center involves inherent risks and may cause disruptions to our operations. In October 2018, we suffered a significant outage as a result of a data center migration, which resulted in unplanned system unavailability and disruption for our customers. We plan to undertake several data center migrations in the future and, in the course of these data migrations, could potentially experience significant service outages. Future service disruptions could hinder our ability to attract new customers, cause us to incur legal liability, contractual penalties or issue service credits to our customers and cause us to lose current customers, each of which could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

If we fail to meet industry data security standards, our ability to meet contractual obligations may be impaired and result in contractual damage or contract breach claims.

In some of our services lines, we are contractually subject to industry data security standards. These industry data security standards include Card Brand (Visa, Mastercard, American Express, Discover and JCB) operating rules, certification requirements and rules governing electronic funds transfers, including Payment Card Industry Data Security Standard (PCI DSS), a data security standard applicable to companies that collect, store or transmit payment card data. These standards also include the Health Information Trust Alliance (HITRUST) which applies to aspects of the healthcare industry and components of which is being used in other industries as well. While we are taking steps to achieve future compliance and/or certification for our systems, we may not be compliant now, and in the future we may not be able to maintain compliance with PCI DSS, HITRUST and other applicable industry standards. We are taking steps to achieve compliance and/or certification for our systems, but we cannot assure that these efforts will be successful in the time period required or at all. Any failure to comply fully or materially with PCI DSS, HITRUST and other applicable industry standards now or at any point in the future may provide customers the right to terminate contracts with us or to enforce provisions obligating us to reimburse them for any penalties or costs incurred by them as a result of our non-compliance, or subject us to other fines, penalties, damages or civil liability, each of which could have a material adverse effect on our business, financial condition and results of operations. In addition, failure to meet PCI DSS standards could result in the loss of our ability to accept credit card payments and the failure to meet HITRUST standards could impact our ability to service customers in the healthcare and other industries, both of which could have a material adverse impact on our business, financial condition and results of operations.

We are a holding company and, therefore, may not be able to receive dividends or other payments in needed amounts from our subsidiaries.

Our principal assets are the shares of capital stock and indebtedness of our subsidiaries. We rely on dividends, interest and other payments from these subsidiaries to meet our obligations for paying principal and interest on outstanding debt obligations, paying corporate expenses and, if determined by our Board, paying dividends to shareholders and repurchasing common shares. Certain of our subsidiaries are subject to regulatory requirements of the jurisdictions in which they operate or other restrictions that may limit the amounts that these subsidiaries can pay in dividends or other payments to us. No assurance can be given that there will not be further changes in law, regulatory actions or other circumstances that could restrict the ability of our subsidiaries to pay dividends to us. In addition, due to differences in tax rates, repatriation of funds from certain countries into the United States could have unfavorable tax ramifications for us.

Our results of operations and financial condition could be materially adversely affected by legal and regulatory matters.

We are potentially subject to various contingent liabilities that are not reflected on our balance sheet, including those arising as a result of being involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental and non-governmental entity contracting, servicing and governmental entity procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act of 1974 (ERISA); and other laws, regulations and contractual undertakings, as discussed under Note 14 – Contingencies and Litigation in our Consolidated Financial Statements. If developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual or materially increase an existing accrual, or if any of these matters result in an adverse judgment or are settled for significant amounts above any existing accruals, it could materially adversely affect our results of operations and financial condition in the period or periods in which such change in determination, judgment or settlement occurs. There can be no assurances as to the favorable outcome of any claim, lawsuit, investigation or proceeding. It is possible that a resolution of one or more such proceedings, through judgment, settlement or otherwise, could require us to make substantial payments to satisfy judgments, fines or penalties or settlement amounts, any of which could materially adversely affect our results of operations and financial condition. Additionally, the terms of dismissal, settlement, release or other resolution may permit certain claims to be reopened under certain conditions. For example, we entered into an agreement with the State of Texas and the Texas Health and Human Services Commission to settle all claims resulting from alleged failures by Conduent State Healthcare LLC and Texas Medicaid & Healthcare Partnership to properly perform obligations under two contracts entered into with the Texas Health and Human Services Commission in 2003 and 2010. The settlement amount is $236 million, which is payable in installments in 2019, 2020 and 2021; however, the settlement agreement does not prevent the Company from prepaying the entire amount. Pursuant to that agreement, the release of the State of Texas's claims is not effective until the Company pays the settlement amount in full. Accordingly, if the Company fails to make any of the required installment payments, the State of Texas has the right to reopen the claims and move forward with the litigation. Claims, lawsuits investigations and proceedings involving the Company could also result in reputational harm, criminal sanctions, consent decrees or orders preventing us from offering certain services, requiring a change in our business practices in costly ways or requiring development of non-infringing or otherwise altered products or technologies. In addition, it can be very costly to defend litigation and these costs could materially adversely affect our results of operations and financial condition. See Note 14 – Contingencies and Litigation to our Consolidated Financial Statements.

Our results of operations and financial condition may be materially adversely affected by conditions abroad, including local economics, political environments, fluctuating foreign currencies and shifting regulatory schemes.

A portion of our revenues is generated from operations outside the United States. In addition, we maintain significant operations outside the United States. Our results of operations and financial condition could be materially adversely affected by changes in foreign currency exchange rates, as well as by a number of other factors, including, without limitation, changes in economic conditions from country to country, changes in a country's political conditions, trade controls and protection measures, financial sanctions, licensing requirements, local tax issues, capitalization and other related legal matters. The ultimate manner in which Great Britain withdraws from the European Union, and the resulting impact on cross-border transactions and operations between Great Britain and the European Union member states, could materially and adversely affect our operations and financial condition. We generally hedge foreign currency denominated assets, liabilities and anticipated transactions primarily through the use of currency derivative contracts. The use of derivative contracts is intended to mitigate or reduce transactional level volatility in the results of foreign operations, but does not completely eliminate volatility. We do not hedge the translation effect of international revenues and expenses, which are denominated in currencies other than our U.S. parent functional currency, within our Consolidated Financial Statements. If we are unable to effectively hedge these risks, our results of operations and financial condition could be materially adversely affected.

Table of Contents

Risks related to the spin-off:

We may be unable to achieve some or all of the benefits that we expect to achieve from the spin-off.

We believe that, as an independent, publicly traded company, we will be able to, among other things, design and implement corporate strategies and policies that are targeted to our business, better focus our financial and operational resources on our specific business, create effective incentives for our management and employees that are more closely tied to our business performance, provide investors more flexibility and enable us to achieve alignment with a more natural shareholder base and implement and maintain a capital structure designed to meet our specific needs. However, as a result of separating from Xerox, we may be more susceptible to market fluctuations and other adverse events. As an independent entity, we have an arm's-length relationship with Xerox and we may not be able to obtain supplies from Xerox on terms as favorable to us as those we had as a wholly owned subsidiary of Xerox prior to the spin-off. As a smaller, independent company, Conduent has a narrower business focus and may be more vulnerable to changing market conditions as well as the risk of takeover by third parties. In addition, we may be unable to achieve some or all of the benefits that we expected to achieve as an independent company in the time we expect, if at all. Furthermore, Xerox used to guarantee our and our subsidiaries' performance under certain services contracts and real estate leases. Following the spin-off, we expect that Conduent will provide such performance guarantees, and we may be unable to retain or renew contracts or real estate leases or a failure to renew such contracts or leases on favorable terms and conditions could materially adversely affect our results of operations and financial condition. If we fail to achieve some or all of the benefits that we expected to achieve as an independent company, or do not achieve them in the time we expect, our results of operations and financial condition could be materially adversely affected.

We may be unable to make, on a timely or cost-effective basis, the changes necessary to operate as an independent, publicly traded company, and we may experience increased costs after the spin-off.

We had historically operated as part of Xerox's corporate organization, and Xerox had provided us with various corporate functions. Following the spin-off, Xerox has no obligation to provide us with assistance other than the transition services described under "Certain Relationships and Related Party Transactions -Transition Services Agreement." These services do not include every service that we have received from Xerox in the past, and Xerox is only obligated to provide these services for limited periods following completion of the spin-off. Accordingly, following the spin-off, we have needed to provide internally or obtain from unaffiliated third parties the services we had received from Xerox. These services include senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services, the effective and appropriate performance of which are critical to our operations. We may be unable to replace these services on terms and conditions as favorable as those we received from Xerox. Because our business had operated as part of the wider Xerox organization, we may incur additional costs that could adversely affect our business. If we fail to obtain the quality of services necessary to operate effectively or incur greater costs in obtaining these services, our results of operations and financial condition could be materially adversely affected.

Table of Contents

We have no recent operating history as an independent, publicly traded company, and our historical and pro forma financial data are not necessarily representative of the results we would have achieved as an independent, publicly traded company and may not be a reliable indicator of our future results.

We derived certain of the historical financial data included in this Annual Report from Xerox's consolidated financial statements, and this data does not necessarily reflect the results of operations and financial condition we would have achieved as an independent, publicly traded company during the periods presented, or those that we will achieve in the future. This is primarily because of the following factors:

- Prior to the spin-off, we operated as part of Xerox's broader corporate organization and Xerox performed various corporate functions for us, including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services. Our historical financial data reflect allocations of corporate expenses from Xerox for these and similar functions. These allocations may not reflect the costs we have incurred and in the future will incur for similar services as an independent, publicly traded company.
- We entered into transactions with Xerox that did not exist prior to the spin-off, such as Xerox's provision of transition services, which will cause us to incur new costs.
- Such historical financial data does not and in the future may not reflect changes that we have experienced and expect to experience in the future as a result of our separation from Xerox. As part of Xerox, we enjoyed certain benefits from Xerox's operating diversity, size, purchasing power, credit rating, borrowing leverage and available capital for investments. Many of our services contracts, particularly those for our transportation service offerings in our Public Sector business, require significant capital investments, and after the spin-off, we may not have access to the capital (from both internal and external sources) necessary to fund these services contracts. As an independent entity, we may be unable to purchase goods, services and technologies, such as insurance and health care benefits and computer software licenses, or access capital markets on terms as favorable to us as those we obtained as part of Xerox prior to the spin-off

Following the spin-off, we are now responsible for the additional costs associated with being an independent, publicly traded company, including costs related to corporate governance, investor and public relations and public reporting. For additional information about our past financial performance and the basis of presentation of our financial statements, see "Selected Historical Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical financial statements and the notes thereto included in this annual report on Form 10-K.

We may have been able to receive better terms from unaffiliated third parties than the terms we receive in our agreements with Xerox.

We entered into agreements with Xerox related to our separation from Xerox, including the Separation and Distribution Agreement, Transition Services Agreement, Tax Matters Agreement, Employee Matters Agreement and any other agreements, while we were still part of Xerox. Accordingly, these agreements may not reflect terms that would have resulted from arm's-length negotiations among unaffiliated third parties. The terms of these agreements relate to, among other things, allocations of assets, liabilities, rights, indemnifications and other obligations between Xerox and us. We may have received better terms from third parties. See "Certain Relationships and Related Party Transactions-Agreements with Xerox."

Table of Contents

The spin-off could result in significant tax liability to Xerox and its shareholders.

Completion of the spin-off required Xerox's receipt of a written opinion of Cravath, Swaine & Moore LLP to the effect that the Distribution should qualify for non-recognition of gain and loss under Section 355 of the Internal Revenue Code (the "Code") and the receipt and continuing effectiveness and validity of the IRS Ruling.

The opinion of counsel did not address any U.S. state or local or foreign tax consequences of the spin-off. The opinion assumed that the spin-off was completed according to the terms of the Separation and Distribution Agreement and relied on the facts as stated in the Separation and Distribution Agreement, the Tax Matters Agreement, the other ancillary agreements, the Information Statement included in our registration statement on Form 10 and a number of other documents. In addition, the opinion was based on certain representations as to factual matters from, and certain covenants by, Xerox and us. The opinion cannot be relied on if any of the assumptions, representations or covenants are incorrect, incomplete or inaccurate or are violated in any material respect.

Xerox received an IRS ruling in connection with the spin-off (the "IRS Ruling"). The IRS Ruling relies on certain facts, assumptions, representations and undertakings from Xerox and us regarding the past and future conduct of Xerox's and our businesses and other matters. If any of these facts, assumptions, representations or undertakings is incorrect or not otherwise satisfied, Xerox may not be able to rely on the IRS Ruling. In addition, the IRS Ruling is not a comprehensive ruling from the IRS regarding all aspects of the U.S. federal income tax consequences of the transactions.

Accordingly, notwithstanding the opinion of counsel and the IRS Ruling, there can be no assurance that the IRS will not assert, or that a court would not sustain, a contrary position.

If the distribution in connection with the spin-off were determined not to qualify for non-recognition of gain and loss for U.S. federal income tax purposes, U.S. holders who received our common stock could be subject to tax. In this case, each U.S. holder who received our common stock in the distribution would generally, for U.S. federal income tax purposes, be treated as having received a distribution in an amount equal to the fair market value of our common stock received, which would generally result in (i) a taxable dividend to the U.S. holder to the extent of that U.S. holder's pro rata share of Xerox's current and accumulated earnings and profits; (ii) a reduction in the U.S. holder's basis (but not below zero) in Xerox common stock to the extent the amount received exceeds the shareholder's share of Xerox's earnings and profits; and (iii) a taxable gain from the exchange of Xerox common stock to the extent the amount received exceeds the sum of the U.S. holder's share of Xerox's earnings and profits and the U.S. holder's basis in its Xerox common stock.

We could have an indemnification obligation to Xerox if the Distribution were determined not to qualify for non-recognition treatment, which could materially adversely affect our results of operations and financial condition.

If it were determined that the distribution in connection with the spin-off did not qualify for non-recognition of gain and loss under Section 355 of the Code, we could, under certain circumstances, be required to indemnify Xerox for the resulting taxes and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

In addition, Section 355(e) of the Code generally creates a presumption that the distribution would be taxable to Xerox, but not to shareholders, if we or our shareholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the distribution, unless it were established that such transactions and the distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the distribution were taxable to Xerox due to such a 50% or greater change in ownership of our stock, Xerox would recognize gain equal to the excess of the fair market value of our common stock distributed to Xerox shareholders over Xerox's tax basis in our common stock and we generally would be required to indemnify Xerox for the tax on such gain and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

Table of Contents

We agreed to numerous restrictions to preserve the non-recognition treatment of the Distribution, which may reduce our strategic and operating flexibility.

We agreed in the Tax Matters Agreement to covenants and indemnification obligations that address compliance with Section 355 of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic transactions or engage in new businesses or other transactions that may otherwise maximize the value of our business, and might discourage or delay a strategic transaction that our shareholders may consider favorable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We lease and own numerous facilities worldwide with larger concentrations of space in Kentucky, New Jersey, California, Mexico, Guatemala, the Philippines, Jamaica, Romania and India. Our owned and leased facilities house general offices, sales offices, service locations, call centers and distribution centers. The size of our property portfolio as of December 31, 2018 was approximately 8.2 million square feet at an annual operating cost (lease costs and expenses) of approximately $217 million and comprised 260 leased properties and 6 owned properties. We believe that our current facilities are suitable and adequate for our current businesses. Because of the interrelation of our business segments, each of the segments uses substantially all of these properties at least in part.

In addition to the 8.2 million square feet of our real estate property portfolio, we also had 1.4 million square feet of our leased and owned properties that became surplus in 2018 due to the implementation of our strategic transformation program as well as various productivity initiatives to consolidate our real estate footprint. We aggressively managed our surplus properties through early terminations and subleasing of leased properties and the sale of owned properties. As a result, approximately 1.0 million square feet of the surplus property portfolio were resolved as of December 31, 2018. Additional leased and owned properties may become surplus over the next three years as we continue the strategic transformation program. We are obligated to maintain our leased surplus properties through required contractual lease periods and plan to dispose of or sublease these properties.

ITEM 3. LEGAL PROCEEDINGS

The information set forth under Note 14 – Contingencies and Litigation in the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management’s Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated. This MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes. This MD&A provides additional information about our operations, current developments, financial condition, cash flows and results of operations.

Throughout the MD&A, we refer to various notes to our Consolidated Financial Statements which appear in Item 8 of this 2018 Form 10-K, and the information contained in such notes is incorporated by reference into the MD&A in the places where such references are made.

Overview

With revenues of $5.4 billion, we are a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience.

Headquartered in Florham Park, New Jersey, we have a team of approximately 82,000 people as of December 31, 2018, servicing customers in 26 countries. In 2018, 12% of our revenue was generated outside the U.S.

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

- **Commercial Industries -** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include transaction processing, end-user engagement, human resource management, omni-channel communications and finance and accounting services.
- **Government Services -** Our Government Services sector provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.
- **Transportation -** Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Table of Contents

Significant 2018 Actions

Dispositions

In 2018, we completed divestitures of: (1) our Commercial Vehicle Operations business; (2) our off-street parking business; (3) our U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the United Kingdom; and (4) our local and municipal constituent government software solutions business. The aggregate proceeds for these divestitures was $703 million in cash. The businesses sold represented $304 million and $500 million of 2018 and 2017 revenue, respectively. We recorded a pre-tax gain of $78 million on these divestitures for the year ended December 31, 2018.

Significant 2017 Actions

Dispositions

In 2017, we completed divestitures of: (1) our Firehouse business and suite of emergency records management products used by fire departments across the country for their incident reporting and Emergency Management System information and records management; (2) our healthcare provider consulting services business, which advises healthcare organizations on IT application optimization; (3) the Breakaway Group business, which provides advisory project services to assist healthcare organizations optimize their health IT applications; (4) the mobile device management business of Wireless Data Services Limited; and (5) the Global Mobility business. The aggregate proceeds for these divestitures was $56 million in cash. The businesses sold represented $60 million and $82 million of 2017 and 2016 revenue, respectively. We recorded a pre-tax gain of $16 million on these divestitures for the year ended December 31, 2017.

In addition, in 2017, we sold a property located in Dallas, Texas, which was formerly the Affiliated Computer Services (ACS) headquarters, for a pre-tax gain of $24 million. This was part of our effort to consolidate our real estate footprint.

Health Enterprise Settlement

On November 28, 2017, we entered into a definitive settlement agreement with the State of New York regarding resolution of the HE platform project. Under the terms of the settlement: (1) our contract with the State of New York terminated effective December 15, 2017 and we were released from all liabilities and obligations in connection with the contract at such time; and (2) paid or incurred costs on behalf of, the State of New York in the amount of approximately $20 million. As we have previously reserved this amount, we incurred no additional charges as a result of the settlement.

Significant 2016 Actions

Separation

On December 31, 2016, Conduent Incorporated spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement. The separation was completed by way of a pro rata distribution of Conduent Incorporated shares held by Xerox to Xerox's shareholders. As a result of the spin-off we operate as an independent, publicly traded company on the New York Stock Exchange under the ticker "CNDT".

Goodwill Impairment Charge

Our Commercial Industries reporting units operating results declined in 2016 versus our expectations, including a weak fourth quarter 2016. In performing our annual impairment test during the fourth quarter of 2016, we determined that the carrying value of the Commercial Industries reporting unit exceeded its fair value by 53%, which resulted in a goodwill impairment of $935 million. This has been presented as Goodwill impairment, a separate line item in the Consolidated Statements of Income (Loss). Refer to Note 6 – Goodwill and Intangible Assets, Net, in the Consolidated Financial Statements for additional information.

Table of Contents

Health Enterprise Charge

In February 2017, we determined that it was not probable that the New York Medicaid Management Information System (NY MMIS) project would be completed. As a result of this determination, we recorded a pre-tax charge (NY MMIS charge) of $161 million ($98 million after-tax) in the fourth quarter of 2016. The charge included $83 million for the write-off of contract receivables which were recorded as a reduction of revenue and $78 million recorded in Cost of services including $36 million for wind-down costs, $28 million related to the non-cash charge for the impairment of software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements and notes thereto. In preparing our Consolidated Financial Statements, we have made our best estimates and judgments of certain amounts included in the Consolidated Financial Statements giving due consideration to materiality. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Senior management has discussed the development and selection of the critical accounting policies, estimates and related disclosures included herein with the Audit Committee of the Board of Directors. We consider these as critical to understanding our Consolidated Financial Statements, as their application places the most significant demands on management's judgment, since financial reporting results rely on estimates of the effects of matters that are inherently uncertain. In instances where different estimates could have reasonably been used, we disclose the impact of these different estimates on our operations. In certain instances, the accounting rules are prescriptive; therefore, it would not have been possible to reasonably use different estimates. Changes in assumptions and estimates are reflected in the period in which they occur. The impact of such changes could be material to our results of operations and financial condition in any quarterly or annual period.

Specific risks associated with these critical accounting policies are discussed throughout the MD&A, where such policies affect our reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements.

Revenue Recognition

Application of the accounting principles in U.S. GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies — Revenue Recognition in the Consolidated Financial Statements for additional information regarding our revenue recognition policies.

Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Table of Contents

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale. Upon determining that a long-lived asset (disposal group) meets the criteria to be classified as held for sale, the Company reports the assets and liabilities of the disposal group in the line items Assets held for sale and Liabilities held for sale, respectively, in the Consolidated Balance Sheets.

In 2018, management approved the disposal through sale of certain assets and businesses, which were a mix of both Commercial Industries, Government Services and Transportation. This action was taken as a result of our evaluation of these businesses as they represent businesses in markets or with services that we did not see as strategic or core. As of December 31, 2018, most of these businesses have been sold. At December 31, 2018, we reclassified $15 million to assets held for sale and $40 million to liabilities held for sale relating to a portfolio of select standalone customer care contracts that was not yet sold. See Note 3 – Assets/Liabilities Held for Sale and Divestitures for additional information.

Intangible Assets

The fair values of identifiable intangible assets are primarily estimated using an income approach. These estimates include market participant assumptions and require projected financial information, including assumptions about future revenue growth and costs necessary to facilitate the projected growth. Other key inputs include assumptions about technological obsolescence, customer attrition rates, brand recognition, the allocation of projected cash flows to identifiable intangible assets and discount rates. We regularly review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

- significant underperformance relative to historical or projected future operating results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangibles and long-lived assets may not be recoverable based upon the existence of one or more of the above indicators of potential impairment, we assess whether an impairment has occurred based on whether net book value of the assets exceeds the related projected undiscounted cash flows from these assets. We consider a number of factors, including past operating results, budgets, economic projections, market trends and product development cycles in estimating future cash flows. Differing estimates and assumptions as to any of the factors described above could result in a materially different impairment charge, if any, and thus materially different results of operations.

Goodwill

Goodwill is not amortized but rather tested for impairment annually, or more frequently if an event or circumstance indicates that impairment may have been incurred. Events or circumstances that might indicate an interim evaluation is warranted include, among other things, unexpected adverse business conditions, macro and reporting unit specific economic factors, supply costs, unanticipated competitive activities and acts by governments and courts.

Application of the annual goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units and the assessment of the fair value of each reporting unit. We determined that our reporting units were the same as our operating segments and, therefore, our business is comprised of three reporting units. Our annual quantitative impairment test of goodwill was performed in the fourth quarter of 2018.

Table of Contents

In our quantitative test, we estimate the fair value of each reporting unit by weighting the results from the income approach (discounted cash flow methodology) and market approach. These valuation approaches require significant judgment and consider a number of factors that include, but are not limited to, expected future cash flows, growth rates and discount rates and comparable multiples from publicly traded companies in our industry. In addition, we are required to make certain assumptions and estimates regarding the current economic environment, industry factors and the future profitability of our businesses.

When performing our discounted cash flow analysis for each reporting unit, we incorporate the use of projected financial information and discount rates that are developed using market participant-based assumptions. The cash-flow projections are based on three-year financial forecasts developed by management that include revenue and expense projections, restructuring and strategic transformation activities, capital spending trends and investment in working capital to support anticipated revenue growth or other changes in the business. The selected discount rates consider the risk and nature of the respective reporting units' cash flows, appropriate capital structure and rates of return that market participants would require to invest their capital in our reporting units.

We believe these assumptions are appropriate and reflect our forecasted long-term business model and give appropriate consideration to our historical results as well as the current economic environment and markets that we serve.

Based on our quantitative assessments, we concluded that the fair value of our reporting units (which are the Financial Services & Healthcare, Consumer & Industrial and Europe operating segments, together comprising Commercial Industries, Government Services operating segment and the Transportation operating segment) exceeded their respective carrying values by approximately $600 million (for all Commercial Industries), $285 million for Government Services and $120 million for Transportation, respectively. The most significant assumption used in the goodwill analysis relates to the long-term organic growth rate for the operating segments comprising Commercial Industries, Government Services and Transportation segments. For example, the EBITDA long term growth rates for the Commercial Industries operating segments, Government Services and Transportation segments were 3%, 2.5% and 4%, respectively. The growth rates are consistent with industry long term growth rates and contemplate that Conduent will grow, on a long term basis, at least consistent with its peers. To the extent that Conduent losses a significant contract or multiple significant contracts, such that its growth rates are negatively impacted, its goodwill could be impaired. Specifically, if Conduent’s EBITDA long term growth rates were zero for the Commercial and Government operating segments and 3% for the Transportation operating segment, the fair values of the operating segments would approximate the book values of the operating segments.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding goodwill by reportable segment.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision is based on nonrecurring events as well as recurring factors, including the taxation of foreign income. In addition, our provision will change based on discrete or other nonrecurring events such as audit settlements, tax law changes, changes in valuation allowances and other factors, that may not be predictable. In the event that there is a significant unusual or one-time item recognized in our operating results, the taxes attributable to that item would be separately calculated and recorded at the same time as an unusual or one-time item.

We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our Consolidated Balance Sheets, as well as operating loss and tax credit carryforwards. We follow very specific and detailed guidelines in each tax jurisdiction regarding the recoverability of any tax assets recorded in our Consolidated Balance Sheets and provide valuation allowances as required. We regularly review our deferred tax assets for recoverability considering historical profitability, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. Gross deferred tax assets of $210 million and $245 million had valuation allowances of $44 million and $35 million at December 31, 2018 and 2017, respectively.

Table of Contents

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform includes a tax on global intangible low-taxed income ("GILTI"), which imposes a U.S. tax on certain income earned by the Company's foreign subsidiaries. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections. The Company elected to treat the tax on GILTI as a period cost when incurred and therefore, no deferred taxes for GILTI have been recognized for the year ended December 31, 2018.

We are subject to ongoing tax examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon our assessment of the more-likely-than-not outcomes of such matters. In addition, when applicable, we adjust previously recorded tax expense to reflect examination results. Our ongoing assessments of the more-likely-than-not outcomes of examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results. Unrecognized tax benefits were $20 million, $15 million and $14 million at December 31, 2018, 2017 and 2016, respectively.

Refer to Note 13 – Income Taxes in the Consolidated Financial Statements for additional information regarding deferred income taxes and unrecognized tax benefits.

Loss Contingencies

We are currently involved in various claims and legal proceedings. At least quarterly, we review the status of each significant matter and assess its potential financial exposure considering all available information including, but not limited to, the impact of negotiations, settlements, rulings, advice of legal counsel and other updated information and events pertaining to a particular matter. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, we reassess the potential liability related to pending claims and litigation, and may revise estimates. These revisions in the estimates of the potential liabilities could have a material impact on the results of operations and financial position.

Refer to Note 14 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding loss contingencies.

Table of Contents

Financial Information

Financial information for the three years ended December 31, 2018 was as follows:

	Year Ended December 31,			2018 vs. 2017		2017 vs. 2016	
(in millions)	2018	2017	2016	$ Change	% Change	$ Change	% Change

Revenue

Revenue for 2018 decreased, compared to the prior year period, mainly due to the impact from adopting the accounting guidance related to revenue recognition, which is also referred to herein as the "new revenue standard", divestitures completed in 2017 and 2018, strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts and contract losses. Partially offsetting these declines were increases from the ramp of new business. Excluding the impact of the new revenue standard and divestitures, the 2018 revenue decreased by 3.8% mainly due to strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts and contract losses, partially offset by the ramp of new business.

Revenue for 2017 decreased, compared to the prior year period, mainly due to the impact from strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, the run-off of our Student Loan business and contract losses. Partially offsetting these declines were new contracts in the Government Services and the Transportation segments.

Cost of Services (excluding depreciation and amortization)

Cost of services for 2018 decreased, compared to the prior year period, mainly driven by the impact from adopting the new revenue standard, reductions in real estate, information technology and labor costs from our strategic transformation initiatives, lost business, strategic contract actions taken by management as part of portfolio management, lower volumes and divestitures completed in 2017 and 2018.

Table of Contents

Cost of services for 2017 decreased, compared to the prior year period, primarily due to cost transformation, lost business, wind-down of the NY MMIS contract, run-off of our Student Loan business, strategic contract actions taken by management as part of portfolio management and lower volumes.

Selling, General and Administrative (SG&A) (excluding depreciation and amortization)

Lower SG&A for 2018, compared to the prior year period, was reflective of the impact of our strategic transformation initiatives, primarily due to reductions in labor costs.

Lower SG&A for 2017, compared to the prior year period, was reflective of the impact of our strategic transformation initiatives driving lower wages and benefits, partially offset by the expansion and investment in our sales force.

Depreciation and Amortization

Depreciation and amortization decreased in 2018, compared to the prior year period, primarily due to the divestitures in 2018. The decrease in Depreciation and amortization for 2017, compared to the prior year period, was primarily due to the acceleration of amortization of certain trade-names in 2016. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding our intangible assets.

Restructuring and Related Costs

Restructuring and related costs for the year ended December 31, 2018, include $34 million of severance costs due to headcount reductions of approximately 3,000 employees worldwide, $40 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint as well as $7 million of costs primarily related to data center migration and professional support services associated with the implementation of the strategic transformation program.

Restructuring and related costs for the year ended December 31, 2017 include $41 million of severance costs due to headcount reductions of approximately 3,200 employees worldwide, $51 million of lease cancellation costs as part of our effort to consolidate our real estate footprint and $9 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program.

Restructuring and related costs for the year ended December 31, 2016 include $54 million of severance costs due to headcount reductions of approximately 3,600 employees worldwide, $28 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program and $19 million of lease cancellation costs as part of our effort to consolidate our real estate footprint.

Refer to Note 7 – Restructuring Programs and Related Costs in the Consolidated Financial Statements for additional information regarding our restructuring programs.

Interest Expense

The decrease in Interest expense for 2018, compared to the prior year period, was driven primarily by the repayment of the Senior Notes and repricing of the term loans in 2018, partially offset by the write-off of debt issuance costs for certain loans that were refinanced in June 2018, amortization of debt issuance costs associated with the repricing of the loans and interest rate increases in 2018. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information.

Increase in interest expense for 2017, compared to the prior year period, was primarily due to the issuance of debt with the capitalization of the Company during the spin-off in December 2016 and subsequent borrowing under Term Loan B in January 2017, as well as amounts outstanding at various times throughout the year and interest rate increases.

Table of Contents

(Gain) Loss on Divestitures and Transaction Costs

The loss for 2018, compared to the prior year period gain, was driven primarily by an impairment charge related to the anticipated sale of a portfolio of select standalone customer care contracts that was completed in February 2019, partially offset by net gains from divestitures and transaction costs. The gain for 2017, compared to the prior year period loss, was due to gains from the sale of property located in Dallas and from divestitures. See Note 3 – Assets/Liabilities Held for Sale and Divestitures for additional information on 2018 divestitures.

Litigation Costs (Recoveries), Net

Increase in net litigation costs for 2018, compared to the prior year period, was primarily due to increases in reserves related to the litigation settlement pursuant to the Texas Agreement ("Texas Agreement"), Student Loan Service exposures and a reserve for certain terminated contracts that are subject to litigation.

Decrease in net litigation costs for 2017, compared to the prior year period, was primarily due to income received from certain customer dispute settlements and adjustment to contingent consideration on a previous acquisition.

Refer to Note 14 – Contingencies and Litigation to the Consolidated Financial Statements for additional information.

(Gain) Loss on Extinguishment of Debt

The loss on extinguishment of debt for 2018, related to the premium paid for the substantial buyback of the 10.5% Senior Notes due 2024.

Refer to Note 9 – Debt to the Consolidated Financial Statements for additional information regarding the debt redemption.

Goodwill Impairment

Our Commercial Industries reporting unit experienced declining operating results in 2016 versus expectations. As a result, we recorded a goodwill impairment of $935 million in 2016. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding the Goodwill impairment charge.

Separation Costs

Separation costs are primarily for third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies, such as those related to human resources, brand management, real estate and information management to the extent not capitalized. Separation costs also include the costs associated with bonuses and restricted stock grants awarded to employees for retention through the separation.

Other (Income) Expenses, Net

Other (income) expenses, net primarily includes foreign currency transaction losses (gains) and other deferred compensation investment results.

Table of Contents

Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted. The effects of changes in tax rates and laws were recognized in 2017, the period in which the new legislation was enacted. The income tax effects of the Tax Reform were initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform were provided. A provisional benefit was recorded for $210 million resulting from a reduction in the tax rate from 35% to 21%. This was partially offset by a $12 million charge from one time tax on undistributed and previously untaxed post-1986 foreign earnings and profits (Transition Tax). The Company finalized its accounting for this matter in the fourth quarter of 2018 and recognized a $2 million additional benefit year to date, included as a component of income tax expense from continuing operations. The 2018 effective tax rate was (5.3)% and was lower than the U.S. statutory rate of 21%, primarily due to pre-tax loss and tax from the impacts of business divestitures, partially offset by U.S. foreign tax credits. As a result of higher U.S. Federal taxable income caused by the divestitures, the Company is not subject to Base Erosion Anti-Abuse Tax (BEAT) in 2018.

Excluding the impact of divestitures, the State of Texas litigation reserve, the loss on extinguishment of debt, charges for amortization of intangible assets, restructuring and divestiture related costs, the normalized effective tax rate without a BEAT tax for 2018 was 25.1%.

The 2017 rate was higher than the U.S. statutory rate of 35% primarily due to the impact of the Tax Reform, which included the reduction of the U.S. statutory rate from 35% to 21% and the Transition Tax.

Excluding primarily the tax impact of the Tax Reform, the termination of the COLI, amortization of intangible assets and gains on U.S divestitures, the adjusted effective tax rate for 2017 was 33.8%.

Operations Review of Segments

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

Table of Contents

The following are our results of financial performance by segment for the three years ended December 31, 2018:

(in millions)	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
				Divestitures	Other		
Year Ended December 31, 2018							
Total Revenue	$ 2,547	$ 1,351	$ 729	$ 752	$ 14	$ —	$ 5,393
Profit (Loss)	$ 500	$ 424	$ 113	$ 98	$ (18)	$ (695)	$ 422
Adjusted EBITDA	$ 597	$ 451	$ 149	$ 105	$ (15)	$ (647)	$ 640
% of Total Revenue	47.2%	25.1%	13.5%	13.9%	0.3 %	—%	100.0%
Adjusted EBITDA Margin	23.4%	33.4%	20.4%	14.0%	(107.1)%	—%	11.9%
Year Ended December 31, 2017							
Total Revenue	$ 2,685	$ 1,433	$ 767	$ 1,062	$ 75	$ —	$ 6,022
Profit (Loss)	$ 563	$ 398	$ 114	$ 128	$ 16	$ (802)	$ 417
Adjusted EBITDA	$ 661	$ 440	$ 157	$ 141	$ 18	$ (745)	$ 672
% of Total Revenue	44.7%	23.8%	12.7%	17.6%	1.2 %	—%	100.0%

Adjusted EBITDA Margin	22.0%	29.5%	16.8%	17.1%	6.9 %	—%	9.9%

Commercial Industries Segment

Revenue

Commercial Industries revenue for 2018 decreased, compared to the prior year period, primarily driven by strategic contract actions and contract losses, businesses divested in 2018 and the impact of the new revenue standard, partially offset by revenue from new contracts and price increases from existing accounts.

Commercial Industries revenue 2017 decreased, compared to the prior year period, primarily driven by strategic contract actions and contract losses, lower volumes in our customer care offerings and lost business, partially offset by revenue from new contracts and price increases with existing clients.

Segment Profit and Adjusted EBITDA

Decrease in the Commercial Industries segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was mainly driven by the overall revenue decline from strategic actions and investments in technology platforms, partially offset by reductions in real estate, information technology and labor costs from our strategic transformation initiatives and from increases in new business.

Increase in the Commercial Industries segment profit and adjusted EBITDA margin for 2017, compared to the prior year period, was primarily driven by reduced costs as a result of reductions in real estate, information technology and labor costs from our strategic transformation initiatives, as well as contract remediation and strategic contract actions, partially offset by the overall revenue decline and investments in technology platforms.

Government Services Segment

Revenue

Government Services revenue for 2018 decreased, compared to the prior year period, primarily driven by strategic contract actions and the impact of the new revenue standard, contract losses and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Government Services revenue for 2017 decreased, compared to the prior year period, primarily driven by strategic contract actions, contract losses and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Segment Profit and Adjusted EBITDA

Increase in the Government Services segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives and contract remediation, as well as price increases on certain accounts, partially offset by investments in technology platforms.

Decrease in the Government Services segment profit and adjusted EBITDA for 2017, compared to the prior year period, was primarily driven by strategic contract actions, contract losses in healthcare and payment services businesses, partially offset by our strategic transformation initiative.

Transportation Segment

Revenue

Transportation revenue for 2018 decreased, compared to the prior year period, primarily driven by the impact of the new revenue standard, contract losses, service level penalties and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Transportation revenue for 2017 was flat, compared to the prior year period, primarily driven by ramp of new business, offset by strategic decisions and contract losses.

Segment Profit and Adjusted EBITDA

Transportation segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was flat. This was mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives, offset by investments in technology platforms.

Increase in the Transportation segment profit and adjusted EBITDA for 2017, compared to the prior year period, was mainly due to our strategic transformation initiative, partially offset by strategic decisions and contract losses.

Other

Revenue

Other revenue for 2018 decreased, compared to the prior year period, driven mainly by the divestitures completed in 2017 and 2018 and the run-off of our Student Loan Services business.

Other revenue for 2017 decreased, compared to the prior year period, driven mainly by the divestitures completed in 2017 and the run-off of our Student Loan Services business.

Segment Profit (Loss) and Adjusted EBITDA

Decrease in Other segment profit and adjusted EBITDA for 2018 were primarily due to divestitures completed in 2017 and 2018 and the run-off of our Student Loan Services business.

Table of Contents

Increase in Other segment profit for 2017 was primarily due to nonrecurring NY MMIS and HE charges in 2016. Decrease in Other segment adjusted EBITDA for 2017 was primarily due to divestitures completed in 2017 and the run-off of our Student Loan Services business.

Shared IT / Infrastructure & Corporate Costs

Improvements in Shared IT/Infrastructure and Corporate costs for both 2018 and 2017, compared to the prior year periods, were primarily driven by reduced costs as a result of reductions in real estate, information technology and labor costs from our strategic transformation initiatives.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table reflect the impact of our adoption of the new revenue recognition standard on January 1, 2018 and also excludes divestitures. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies for further discussion of the estimated impact of the adoption of this standard.

	Year Ended December 31,		2018 vs. 2017	
(in millions)	2018	2017	$ Change	% Change
New business TCV	$ 1,598	$ 2,031	$ (433)	(21)%
Renewals TCV	3,847	2,297	1,550	67 %
Total Signings	$ 5,445	$ 4,328	$ 1,117	26 %
Annual recurring revenue signings[1]	$ 365	$ 471	$ (106)	(23)%
Non-recurring revenue signings[2]	$ 234	$ 326	$ (92)	(28)%

(1) *Recurring revenue signings are for new business contracts longer than one year.*

(2) *Non-recurring revenue signings are for contracts shorter than one year.*

Signings for the 2018 increased, compared to the prior year, mainly due to increased renewal activities, partially offset by new business signings decline due to a continued focus on strategic wins with acceptable margins.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rates for 2018 and 2017 were 95% and 94%, respectively.

Capital Resources and Liquidity

As of December 31, 2018 and 2017, total cash and cash equivalents were $756 million (of which approximately $100 million was cash in foreign locations) and $658 million, respectively. Subsequent to December 31, 2018, the Company purchased the HSP business for approximately $90 million and entered into an agreement to settle the Texas litigation, $20 million of which is payable in the first quarter of 2019. Also, it is anticipated that our working capital in the first quarter of 2019 will be a net use of cash. Regarding the Texas litigation, the Settlement Agreement does not prevent the Company from prepaying the foregoing amounts and the Company is currently considering whether to do so. The Company also has a $750 million revolving line of credit for its various cash needs, of which $12 million has been utilized for letters of credit.

Table of Contents

As of December 31, 2018, there were $1.5 billion outstanding borrowings under our Credit Agreement of which $55 million was due within one year. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional debt information.

Refer to the *Capital Market Activity* section below for additional information regarding our capital activity.

Cash Flow Analysis

The following summarizes our cash flows for the three years ended December 31, 2018, as reported in our Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements:

	Year Ended December 31,			Change	
(in millions)	2018	2017	2016	2018	2017
Net cash provided by operating activities	$ 283	$ 300	$ 95	$ (17)	$ 205
Net cash provided by investing activities	460	74	16	386	58
Net cash provided by (used in) financing activities	(637)	(124)	150	(513)	(274)

Operating Activities

The decrease in cash generated from operating activities for 2018, compared to the prior year period, was primarily attributable to increased tax payments and increased deferred compensation payments, partially offset by other working capital amounts.

The increase in cash generated from operating activities for 2017, compared to the prior year period, was primarily attributable to improvements in working capital and reduced wind-down payments associated with implementations in California, Montana and New York, partially offset by higher interest payments on our outstanding debt.

Investing Activities

The increase in cash generated from investing activities for 2018, compared to the prior year period, was primarily due to the proceeds from the divestitures, partially offset by increased spending for capital expenditures related to modernizing our information technology infrastructure.

The increase in cash provided by investing activities for 2017, compared to the prior year period, was primarily related to proceeds received on the liquidation of investments related to the termination of the deferred compensation plan, proceeds from the sale of business and assets and lower net additions to land, buildings and equipment, partially offset by non-recurring proceeds from related party notes receivable in 2016.

Financing Activities

The increase in cash used from financing activities for 2018, compared to the prior year period, was related to net debt repayments, premium on debt redemption and repayments of capital leases, partially offset by payments to former parent company in 2017.

The decrease in cash used in financing activities for 2017, compared to the prior year period, was primarily related to a decrease in proceeds from long term debt and an increase in debt payments, partially offset by a reduction in payments to former parent.

Capital Market Activity

On June 28, 2018, the Company entered into Amendment No. 3 (Amendment) to the December 7, 2016 Credit Agreement and in July 2018, the Company redeemed $476 million of its $510 million 10.5% Senior Notes due 2024.

Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information on both Amendment No. 3 and the partial redemption of the Senior Notes.

Table of Contents

Financial Instruments

Refer to Note 10 – Financial Instruments in the Consolidated Financial Statements for additional information.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

At December 31, 2018, we had the following contractual cash obligations and other commercial commitments and contingencies:

(in millions)	2019	2020	2021	2022	2023	Thereafter
Total debt, including capital lease obligations[1]	$ 55	$ 50	$ 84	$ 576	$ 800	$ 33
Interest on debt[2]	90	89	86	56	4	3
Minimum operating lease commitments[3]	153	113	78	53	33	76
Defined benefit pension plans	2	—	—	—	—	—
Estimated Purchase Commitments[4]	87	58	34	3	—	1
Total	$ 387	$ 310	$ 282	$ 688	$ 837	$ 113

(1) Total debt represents principal debt and capital leases. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information regarding debt.
(2) Represents interest on debt. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information.
(3) Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information.
(4) Other purchase commitments: We enter into other purchase commitments with vendors in the ordinary course of business. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We currently do not have, nor do we anticipate, material loss contracts.

The table above does not include the amounts payable under the Texas Agreement. Refer to Note 14 – Contingencies and Litigation for additional information.

Other Contingencies and Commitments

As more fully discussed in Note 14 – Contingencies and Litigation in the Consolidated Financial Statements, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. In addition, guarantees, indemnifications and claims may arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates. Nonperformance under a contract including a guarantee, indemnification or claim could trigger an obligation of the Company.

We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. Should developments in any of these areas cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs.

Off-Balance Sheet Arrangements

As of December 31, 2018, we do not believe we have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

In addition, refer to the preceding table for the Company's contractual cash obligations and other commercial commitments and Note 14 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding contingencies, guarantees and indemnifications.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from foreign currency exchange rates, which could affect operating results, financial position and cash flows. We manage our exposure to this market risk through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We utilized derivative financial instruments to hedge economic exposures, as well as reduce earnings and cash flow volatility resulting from shifts in market rates. We also hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify or change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 10 – Financial Instruments in the Consolidated Financial Statements for additional discussion on our financial risk management.

Foreign Exchange Risk Management

Assuming a 10% appreciation or depreciation in foreign currency exchange rates from the quoted foreign currency exchange rates at December 31, 2018, the potential change in the fair value of foreign currency-denominated assets and liabilities in each entity would not be significant because all material currency asset and liability exposures were economically hedged as of December 31, 2018. A 10% appreciation or depreciation of the U.S. Dollar against all currencies from the quoted foreign currency exchange rates at December 31, 2018 would have an impact on our cumulative translation adjustment portion of equity of approximately $50 million. The net amount invested in foreign subsidiaries and affiliates, primarily in the U.K. and Europe, and translated into U.S. Dollars using the year-end exchange rates, was approximately $504 million at December 31, 2018.

Interest Rate Risk Management

The consolidated weighted-average interest rates related to our total debt for 2018 approximated 3.42% for Term A Loan due 2021, 5.44% for Term B Loan due 2023, 7.71% for Senior Notes due 2024 and 2.08% for capital lease obligations. As of December 31, 2018, $1,564 million of our total debt of $1,598 million carried variable interest rates. The fair values of our fixed rate financial instruments are sensitive to changes in interest rates and at December 31, 2018, a 10% increase in market interest rates would decrease the fair values of such financial instruments by approximately $1.5 million. A 10% decrease in market interest rates would increase the fair values of such financial instruments by approximately $4 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Conduent Incorporated

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Conduent Incorporated and its subsidiaries (the "Company") as of December 31, 2018 and 2017, and the related consolidated statements of income (loss), comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2018 appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for revenues from contracts with customers in 2018.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Table of Contents

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORTS OF MANAGEMENT

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have free access to the Audit Committee.

CONDUENT INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation and Summary of Significant Accounting Policies

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

We are a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience. We create value for our commercial and government clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

Our Consolidated Financial Statements included the historical basis of assets, liabilities, revenues and expenses of the individual businesses of the Company, including joint ventures and partnerships over which the Company has a controlling financial interest. We have prepared the Consolidated Financial Statements pursuant to the rules and regulations of the SEC. Certain reclassifications have been made to prior years' amounts to conform to the current year presentation. All intercompany transactions and balances have been eliminated.

We have also considered the impact of subsequent events on these consolidated financial statements.

Separation from Xerox Corporation

On December 31, 2016, Conduent spun-off from Xerox Corporation (Xerox), pursuant to the Separation and Distribution Agreement (Separation). The Separation was completed by way of a pro rata distribution of Conduent shares held by Xerox to Xerox’s shareholders. As a result, we operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

Prior to December 31, 2016, the Financial Statements of the Company were derived from the financial statements and accounting records of Xerox as if Conduent operated on a standalone basis. Historically, the Company consisted of the Business Process Outsourcing Operating segment within Xerox’s reportable Services segment and did not operate as a separate, standalone company. Accordingly, Xerox performed certain corporate overhead functions for the Company. Therefore, certain corporate costs, including compensation costs for corporate employees supporting the Company, were allocated from Xerox. It is not practicable to estimate actual costs that would have been incurred had the Company been a separate standalone company. Allocations for management costs and corporate support services provided to the Company totaled $165 million for year ended December 31, 2016. Management of the Company believes the assumptions regarding the allocated expenses reasonably reflect the utilization of services provided to or the benefit received by the Company during the period prior to the Separation. The Consolidated Financial Statements for the period prior to the Separation does not necessarily include all the expenses that would have been incurred or held by the Company had it been a separate, standalone company.

Use of Estimates

We prepared the Consolidated Financial Statements using financial information available at the time of preparation, which requires us to make estimates and assumptions that affect the amounts reported. Our most significant estimates pertain to the intangible and long-lived assets, valuation of goodwill, contingencies and litigation, income taxes and corporate allocations (for year ended December 31, 2016). Our estimates are based on management's best knowledge of current events, historical experience, and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates.

New Accounting Standards

Table of Contents

Leases: In February 2016, the FASB updated the accounting guidance related to leases requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with a lease term greater than 12 months. The accounting for lessors is largely unchanged. This updated guidance is effective for the Company beginning January 1, 2019. The Company adopted this updated accounting guidance beginning January 1, 2019 using the optional transition approach, which allows entities to initially apply the new leases standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Comparative periods will continue to be presented under existing lease guidance. This updated standard will have a significant impact on its Consolidated Balance Sheets by increasing its assets and liabilities. The Company does not expect the adoption to have a material impact on its Consolidated Statements of Income (Loss) and Consolidated Statements of Cash Flows.

Credit Losses: In June 2016, the FASB updated the accounting guidance related to measurement of credit losses on financial instruments, which requires financial assets measured at amortized cost to be presented at the net amount expected to be collected. This updated guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact on the Company's Consolidated Financial Statements.

Recently Adopted Accounting Standards

Cloud Computing Arrangements: In August 2018, the Financial Accounting Standards Board (FASB) issued an accounting update which aligns the requirements for capitalizing implementation costs incurred in a hosting cloud computing arrangement that is a service contract with the existing capitalization requirements for implementation costs incurred to develop or obtain internal-use software (and hosting cloud computing arrangements that include an internal-use software license). The Company elected to early adopt this standard on July 1, 2018 on a prospective basis. The adoption of this guidance did not have a material impact on the Company’s Consolidated Financial Statements.

Reclassifying Certain Tax Effects From Accumulated Other Comprehensive Income: On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted, lowering the U.S. corporate tax rate from 35% to 21%. The U.S. deferred tax assets and liabilities, including the balances originally recorded to Accumulated Other Comprehensive Income (AOCI), were adjusted to the new tax rate through net income from continuing operations in December 2017. In February 2018, the FASB issued guidance permitting companies, on an elective basis, to reclassify the disproportionate income tax effects of Tax Reform on items within AOCI to retained earnings. The only disproportionate income tax effects in the Company’s AOCI balance in December 2017 related to the U.S. pension plan. The plan was transferred to H.I.G. Capital as part of the U.S. human resource consulting and actuarial business divestiture completed in August 2018. In light of this, the Company adopted this accounting policy effective July 1, 2018 and has reclassified $5 million from AOCI to retained earnings as of September 30, 2018. Refer to the Consolidated Statements of Shareholders' Equity for additional information regarding this reclassification.

Cash Flows: In November 2016, the FASB issued updated accounting guidance regarding the presentation of restricted cash in the Consolidated Statements of Cash Flows. Specifically, this update requires that restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the Consolidated Statements of Cash Flows. The Company adopted this updated accounting guidance on January 1, 2018 using the retrospective method. The adoption of this guidance resulted in a reclassification of restricted cash of $9 million and $26 million for the years ended December 31, 2017 and 2016, respectively, in the Consolidated Statements of Cash Flows.

Revenue Recognition: In May 2014, the FASB updated the accounting guidance related to revenue recognition, which is also referred to herein as "the new revenue standard" to clarify the principles for recognizing revenue and replaced all existing revenue recognition guidance in U.S. GAAP with one accounting model. The core principle of the guidance is that an entity should recognize revenue when the promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The updated guidance also requires additional qualitative and quantitative disclosures relating to the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers largely on a disaggregated basis. The Company adopted the new revenue standard as of January 1, 2018, using the modified retrospective method. The Company has applied the new revenue standard only to contracts not completed as of the date of initial application. The adoption has primarily impacted the following: (1) revenue associated with postage recognized on a net basis versus previously being recognized on a gross basis; (2) the timing of revenue recognition associated with fixed fees for certain contracts with more than one performance obligation; and (3) the timing of recognition of certain pricing discounts and credits.

The Company recorded a net increase to opening retained earnings of $17 million, a decrease to current and long-term unearned income of $9 million and $6 million, respectively, and increase to contract assets of $7 million and an increase to deferred taxes of $5 million as of January 1, 2018, due to the cumulative impact of adopting this new guidance. The comparative information has not been restated and continues to be reported under the accounting standards in effect for the periods presented.

The impact of the new revenue standard for the year ended December 31, 2018, was a decrease in Revenue of approximately $150 million, primarily as a result of recognizing postage receipts on a net basis, in the Company's Consolidated Statements of Income (Loss). The impact of the new revenue standard, as of and for the period ended December 31, 2018, on the Company's pre-tax income (loss), Consolidated Balance Sheets and Statements of Cash Flows was not material.

Summary of Accounting Policies

Revenue recognition

The Company recognizes revenue when control of the promised goods or services is transferred to its customers, in an amount that reflects the consideration that the Company expects to receive in exchange for those goods or services.

The Company's contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct performance obligations that should be accounted for separately, versus together, may require judgment. Typically, the Company's contracts include performance obligation(s) to stand-ready on a daily or monthly basis to provide services to the customers. Under a stand-ready obligation, the evaluation of the nature of our performance obligation is focused on each time increment rather than the underlying activities. Accordingly, the promise to stand-ready is accounted for as a single-series performance obligation.

Once the Company determines the performance obligations, the Company estimates the amount of variable consideration, if any, to be included in determining the transaction price. Typical forms of variable consideration include variable pricing based on the number of transactions processed or usage-based pricing arrangements. Variable consideration is also present in the form of volume discounts, tiered and declining pricing, penalties for service level agreements, performance bonuses and credits. In circumstances where we meet certain requirements to allocate variable consideration to a distinct service within a series of related services, we allocate variable consideration to each distinct period of service within the series. If we do not meet those requirements, we include an estimate of variable consideration in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty is resolved. For contracts with multiple performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines standalone selling prices based on the prices charged to customers or by using expected cost plus margin.

Table of Contents

The Company typically satisfies its performance obligations over time as the services are provided. A time-elapsed output method is used to measure progress because the nature of the Company's promise is a stand-ready service and efforts are expended evenly throughout the period. In limited circumstances, such as contracts for implementation or development projects, the Company also uses a cost-to-cost based input method. The Company has determined that the above methods provide a faithful depiction of the transfer of services to the customer.

Estimates of revenue expected to be recognized in future periods exclude unexercised customer options to purchase additional services that do not represent material rights to the customer. Customer options that do not represent a material right are only accounted for when the customer exercises its option to purchase additional goods or services. The Company recognizes revenue for non-refundable upfront implementation fees on a straight-line basis over the period between the initiation of the services through the end of the contract term.

When more than one party is involved in providing services to a customer, the Company evaluates whether it is the principal, and reports revenue on a gross basis, or an agent, and reports revenue on a net basis. In this assessment, the Company considers the following: if it obtains control of the specified services before they are transferred to the customer; is primarily responsible for fulfillment and inventory risk; and has discretion in establishing price.

The Company reports revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The primary revenue-based taxes are sales tax and value-added tax (VAT).

The Company's payment terms vary by type of services offered. The time between invoicing and when payment is due is not significant. For certain services and customer types, the Company requires payment before services are rendered.

From time to time, the Company's contracts are modified to account for additions or changes to existing performance obligations. The Company's contract modifications related to stand-ready performance obligations are generally accounted for prospectively.

Disaggregation of Revenue

During the second quarter of 2018, the Company changed how it presents the disaggregated revenue by major service line to reflect the core businesses separate from the non-core businesses. This change had no impact on disaggregated revenue by reportable segment or the timing of revenue recognition.

Table of Contents

The following table provides information about disaggregated revenue by major service line, the timing of revenue recognition and a reconciliation of the disaggregated revenue by reportable segments. Refer to Note 2 – Segment Reporting for additional information on the Company's reportable segments.

(in millions)	Year Ended December 31, 2018
Commercial Industries:	
Omni-channel communications	$ 852
Human resource services	754
Industry services	941
Total Commercial Industries	2,547
Government Services	1,351
Transportation	729
Other:	
Divestitures	752
Education	14
Total Other	766
Total Consolidated Revenue	$ 5,393
Timing of Revenue Recognition:	
Point in time	$ 142
Over time	5,251
Total Revenue	$ 5,393

The Company's contracts with customers are broadly similar in nature throughout the Company's major service lines. The following is a description of the major service lines:

- **Omni-Channel Communications:** The Company offers a range of services that help its clients support their end-users. This includes in-bound and out-bound call support for both simple and complex transactions, technical support and patient assistance. The Company also provides multi-channel communication support (both print and digital) across a range of industries.

- **Human Resource Services:** The Company helps its clients support their employees at all stages of employment from initial on-boarding through retirement as well as health savings account (HSA) administration. The Company offers clients a range of customized advisory, technology and administrative services that improve the ability of employees to manage their benefits, professional development and retirement planning. Also, the Company assists its clients with workers' compensation claims management.

- **Industry Services:** The Company leverages technology to assist its clients with transaction processing as well as providing platform solutions. This includes offerings such as finance and accounting, transaction processing, learning, legal and payment integrity services, among others.

- **Government Services:** The Company's services include public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies. The Company also provides payment services, which include prepaid cards, child support disbursements and other government support programs, disbursement of electronic payments directly to end-users, collections and transfer of payments.

- **Transportation:** The Company provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

- **Divestitures:** This represents divestitures that were previously reported as Commercial Industries Non-core and Public Sector Non-core.

Table of Contents

Contract Balances

The Company receives payments from customers based upon contractual billing schedules. Accounts receivable are recorded when the right to consideration becomes unconditional. Contract assets are the Company's rights to consideration for services provided when the right is conditioned on something other than passage of time (for example, meeting a milestone for the right to bill under the cost-to-cost measure of progress). Contract assets are transferred to Accounts receivable when the rights become unconditional. Unearned income includes payments received in advance of performance under the contract, which are realized when the associated revenue is recognized under the contract.

The following table provides information about the balances of the Company's contract assets, unearned income and receivables from contracts with customers:

(in millions)	December 31, 2018	January 1, 2018
Contract Assets (Unearned Income)		
Current contract assets(1)	$ 177	$ 191
Long-term contract assets(2)	7	2
Current unearned income	(112)	(128)
Long-term unearned income(3)	(32)	(46)
Net Contract Assets (Unearned Income)	$ 40	$ 19
Accounts receivable, net	$ 782	$ 908

____

(1) Prior to the adoption of the new revenue standard, these amounts were recorded in Accounts receivable, net and represented unbilled amounts.

(2) Presented in Other long-term assets in the Consolidated Balance Sheets

(3) Presented in Other long-term liabilities in the Consolidated Balance Sheets

Revenue of $134 million was recognized during the year ended December 31, 2018 related to the Company's unearned income at January 1, 2018. The Company had no asset impairment charges related to contract assets for the year ended December 31, 2018.

Transaction Price Allocated to the Remaining Performance Obligations

Estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied or partially satisfied at December 31, 2018, was approximately $2 billion. The Company expects to recognize approximately 67% of the revenues over the next two years and the remainder thereafter.

Costs to Obtain and Fulfill a Contract

The Company capitalizes commission expenses paid to internal sales personnel that are incremental to obtaining customer contracts. The net book value of these costs, which was $24 million as of December 31, 2018, are included in Other long-term assets. The judgments made in determining the amount of costs incurred include whether the commissions are incremental and directly related to a successful acquisition of a customer contract. These costs are amortized in Depreciation and amortization over the term of the contract or the estimated life of the customer relationship, if renewals are expected and the renewal commission is not commensurate with the initial commission. These costs are periodically reviewed for impairment. The Company expenses sales commissions when incurred if the amortization period of the sales commission is one year or less.

In addition, the Company may provide inducement payments to secure customer contracts. These inducement payments are capitalized and amortized to expense over the term of the customer contract. The net book value of these costs totaled $23 million as of December 31, 2018 and are included in Other long-term assets.

Table of Contents

Also, the Company capitalizes costs incurred to fulfill its contracts that (i) relate directly to the contract, (ii) are expected to generate resources that will be used to satisfy the Company's performance obligation under the contract and (iii) are expected to be recovered through revenue generated under the contract. The net book value of these costs, which comprise set-up/transition activities, was $53 million as of December 31, 2018, and are classified in Other long-term assets on the Consolidated Balance Sheets. Contract fulfillment costs are expensed to Cost of services as the Company satisfies its performance obligations by transferring the service to the customer. These costs are amortized on a systematic basis over the expected period of benefit.

The amortization of costs incurred to obtain and fulfill a contract for the year ended December 31, 2018, was approximately $50 million.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, including money market funds and investments with original maturities of three months or less.

Receivable Sales

In 2018, 2017 and 2016, the Company sold certain accounts receivable and derecognized the corresponding receivable balance. Refer to Note 4 – Accounts Receivable, Net for more details on our receivable sales.

Assets/Liabilities Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale.

In both 2018 and 2017, management approved the disposal through sale of certain assets and businesses. This action was taken as a result of our strategic evaluation of these businesses. As of December 31, 2018 and 2017, these businesses qualified as assets held for sale and we reclassified $15 million and $757 million to assets held for sale for 2018 and 2017, respectively, and $40 million and $169 million to liabilities held for sale for 2018 and 2017, respectively.

Refer to Note 3 – Assets/Liabilities Held for Sale and Divestitures for further discussion.

Table of Contents

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost. Buildings and equipment are depreciated over their estimated useful lives. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life. Significant improvements are capitalized and maintenance and repairs are expensed when incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further discussion.

Software - Internal Use and Product

Internal Use: We capitalize direct costs associated with developing, purchasing or otherwise acquiring software for internal use and amortize these costs on a straight-line basis over the expected useful life of the software, beginning when the software is implemented. Costs for upgrades and enhancements that will not result in additional functionality are expensed as incurred. Amounts incurred for Internal Use Software are included in Cash Flows from Investing.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further information.

Goodwill

For acquired businesses, the Company records the acquired assets and assumed liabilities based on their relative fair values at the date of acquisitions (commonly referred to as the purchase price allocation). Goodwill represents the excess of the purchase price paid in excess of the fair value of net tangible and intangible assets acquired. For the Company’s business acquisitions, the purchase price is allocated to identifiable intangible assets separate from goodwill if they are from contractual or other legal rights, or if they could be separated from the acquired business and sold, transferred, licensed, rented or exchanged.

We test goodwill for impairment annually or more frequently if an event or change in circumstances indicate the asset may be impaired. Impairment testing for goodwill is done at the reporting unit level. We determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. If the fair value of a reporting unit is less than its carrying amount, an impairment charge would be recognized for amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Other Intangible Assets

Other intangible assets primarily consist of assets acquired through business combinations, including installed customer base and distribution network relationships, patents and trademarks. Other intangible assets are amortized on a straight-line basis over their estimated economic lives unless impairment is identified.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, including buildings, equipment, internal use software, product software and other intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. If these cash flows are less than the carrying value of such asset, an impairment loss is recognized for the difference between estimated fair value and carrying value. Our primary measure of fair value is based on forecasted cash flows.

Table of Contents

Income Taxes

We account for income taxes under the asset and liability method. Deferred tax assets and liabilities are based on differences between U.S. GAAP reporting and tax bases of assets or liabilities and based on current tax laws, regulations and rates.

The recognition of deferred tax assets requires an assessment to determine the realization of such assets. Management establishes valuation allowances on deferred tax assets when it is determined "more-likely-than-not" that some portion or all of the deferred tax assets may not be realized. Management considers positive and negative evidence in evaluating the ability of the Company to realize its deferred tax assets, including its historical results and forecasts of future ability to realize its deferred tax assets, including projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies.

We are subject to ongoing tax examinations and assessments in various jurisdictions. We have unrecognized tax benefits for uncertain tax positions. We follow U.S. GAAP which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results.

On December 22, 2017, the US enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform includes a tax on global intangible low-taxed income ("GILTI"), which imposes a U.S. tax on certain income earned by the Company's foreign subsidiaries. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections. The Company elected to treat the tax on GILTI as a period cost when incurred and therefore, no deferred taxes for GILTI have been recognized for the year ended December 31, 2018.

Refer to Note 13 – Income Taxes for further discussion.

Foreign Currency Translation and Re-measurement

The functional currency for most foreign operations is the local currency. Net assets are translated at current rates of exchange and income, expense and cash flow items are translated at average exchange rates for the applicable period. The translation adjustments are recorded in Accumulated other comprehensive loss.

The U.S. Dollar is used as the functional currency for certain foreign subsidiaries that conduct their business in U.S. Dollars. A combination of current and historical exchange rates is used in re-measuring the local currency transactions of these subsidiaries and the resulting exchange adjustments are recorded in Currency (gains) and losses within other expenses, net together with other foreign currency re-measurements.

Table of Contents

Note 2 – Segment Reporting

Our reportable segments correspond to how we organize and manage the business, as defined by our CEO who is also our Chief Operating Decision Maker, and are aligned to the industries in which our clients operate. Our segments involve the delivery of business process services and include service arrangements where we manage a customer's business activity or process.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

We report our financial performance based on the three reportable segments: Commercial Industries, Government Services and Transportation.

- **Commercial Industries:** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

- **Government Services:** Our Government Services segment provides government-centric business process services to U.S. federal, state and local and foreign governments for, public assistance, program administration, transaction processing and payment services.

- **Transportation:** Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Table of Contents

Selected financial information for our reportable segments was as follows:

(in millions)	Year Ended December 31,						
	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
2018				Divestitures	Other		
Revenue	$ 2,547	$ 1,351	$ 729	$ 752	$ 14	$ —	$ 5,393

Table of Contents

Geographic area data is based upon the location of the subsidiary reporting the revenue or long-lived assets and is as follows for each of the years ended December 31:

	Revenues			Long-Lived Assets (1)	
(in millions)	2018	2017	2016	2018	2017
United States	$ 4,748	$ 5,303	$ 5,686	$ 375	$ 289
Europe	497	538	547	28	42
Other areas	148	181	175	62	54
Total Revenues and Long-Lived Assets	$ 5,393	$ 6,022	$ 6,408	$ 465	$ 385

____

(1) Long-lived assets are comprised of (i) Land, buildings and equipment, net, (ii) Internal use software, net and (iii) Product software, net.

In 2016, our methodology to disclose revenue on a geographic basis changed to reflect where the work is contracted.

Note 3 – Assets/Liabilities Held for Sale and Divestitures

In September 2018, the Company entered into an agreement (subject to regulatory approval) to sell a portfolio of select standalone customer care contracts to Skyview Capital LLC. The assets and liabilities related to this portfolio, collectively referred to as the Disposal Group, have been reclassified to held for sale and measured at the lower of carrying value or fair value less cost to sell. The fair value less estimated cost to sell, as measured by the terms of the sale's agreement, was less than the carrying amount by $66 million. Accordingly, the Company recorded a $66 million impairment charge, which included a write-off of goodwill of $11 million and long-lived assets of $11 million. This impairment charge was included in the (Gain) loss on divestitures and transaction costs line in the Consolidated Statements of Income (Loss). This Disposal Group is reported in Other segment. The revenues generated from this business were $439 million and $483 million for the years ended December 31, 2018 and 2017, respectively.

Following is a summary of the major categories of assets and liabilities that have been reclassified to held for sale.

(in millions)	December 31, 2018
Accounts Receivable, net	$ 15
Total Assets held for sale	$ 15
Accounts payable	$ 1
Accrued compensation	16
Unearned revenue	8
Other	15
Total Liabilities held for sale	$ 40

In September 2018, the Company completed the sale of its local and municipal constituent government software solutions business to Avenu Insights & Analytics. The proceeds from this divestiture were $106 million in cash and the transaction generated a pre-tax gain of $0 million. The revenues generated from this business were $81 million and $113 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

In August 2018, the Company completed the sale of its U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the United Kingdom (U.K.) to H.I.G. Capital. The proceeds from this divestiture include $168 million in cash paid at closing, $20 million to be collected in installments over four years and a contingent consideration of $6 million. The transaction generated a pre-tax loss of $7 million. The revenues generated from this business were $172 million, which includes $6 million of intercompany revenue and $279 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

In July 2018, the Company completed the sale of its off-street parking business, including the Multipark System in France and the U.K., along with its U.S. Airport Parking business to Andera Partners. The proceeds from this divestiture were $26 million in cash and the transaction generated a pre-tax gain of $8 million. The revenues generated from this business were $18 million and $42 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

In June 2018, the Company completed the sale of its Commercial Vehicle Operations (CVO) business to Alinda Capital Partners. During the third quarter of 2018, the Company recorded a final working capital adjustment for the sale of the CVO business in the amount of $3 million, increasing the total cash proceeds received and pre-tax gain recorded to $403 million and $77 million, respectively. The revenue generated from this business was $33 million and $66 million for the six months ended June 30, 2018 and for the year ended December 31, 2017, respectively.

Note 4 – Accounts Receivable, Net

The Accounts receivable, net balance of $782 million and $1,114 million at December 31, 2018 and 2017, respectively, included allowance for doubtful accounts of $1 million and $2 million at December 31, 2018 and 2017, respectively.

The Company enters into supply chain financing programs from time to time to sell certain accounts receivable without recourse to third-party financial institutions. Sales of accounts receivable are reflected as a reduction of accounts receivable on the Consolidated Balance Sheets and the proceeds are included in cash flow from operating activities in the Consolidated Statements of Cash Flows.

Accounts receivable sales were as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Accounts receivable sales	$ 119	$ 94	$ 259

Note 5 - Land, Buildings, Equipment and Software, Net

Land, buildings and equipment, net were as follows:

(in millions except as noted)	Estimated Useful Lives (Years)	December 31, 2018	December 31, 2017
Land		$ 2	$ 3
Building and building equipment	25 to 50	7	17
Leasehold improvements	Varies	246	247
Office furniture and equipment	3 to 15	901	784
Other	4 to 20	2	1
Construction in progress		64	24
Subtotal		1,222	1,076
Accumulated depreciation		(894)	(819)
Land, Buildings and Equipment, Net		$ 328	$ 257

Depreciation expense and operating lease rent expense were as follows:

(in millions)	Year Ended December 31, 2018	2017	2016
Depreciation expense	$ 121	$ 125	$ 130
Operating lease rent expense	$ 208	$ 267	$ 299

We lease buildings and equipment, substantially all of which are accounted for as operating leases. Certain leases were accounted for as capital leases and the remaining net book value of those assets, included in Land, Buildings and Equipment, net were approximately $24 million and $32 million at December 31, 2018 and 2017, respectively.

Future minimum operating lease commitments that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2018 were as follows (in millions):

2019	2020	2021	2022	2023	Thereafter
$ 153	$ 113	$ 78	$ 53	$ 33	$ 76

Internal Use and Product Software

Internal use and product software are included in Other long-term assets on the Company's Consolidated Balance Sheets. Additions to Internal Use and Product Software as well as year-end balances for these assets were as follows:

(in millions) Additions to:	Year Ended December 31, 2018	2017	2016
Internal use software	$ 47	$ 36	$ 39
Product software	8	10	10

Table of Contents

(in millions)	December 31,	
Capitalized Costs, Net	2018	2017
Internal use software(1)	$ 123	$ 106
Product software(1)	18	22

____
(1) See Note 8 – Supplementary Financial Information for additional information.

Useful lives of our internal use and product software generally vary from one to seven years.

During 2016 we determined that it was probable that we would not fully complete our NY MMIS project in its current form. As a result of this decision an impairment charge of approximately $28 million was recorded in Cost of services. We also recorded an additional impairment charge in 2016 related to the 2015 HE charge of approximately $9 million in Restructuring and asset impairment.

Note 6 - Goodwill and Intangible Assets, Net

Goodwill

The following table presents the changes in the carrying amount of goodwill, by reportable segments:

(in millions)	Commercial Industries	Government Services	Transportation	Total
Balance at December 31, 2016	$ 1,504	$ 1,738	$ 647	$ 3,889
Foreign currency translation	19	—	28	47
Disposition	(19)	(14)	—	(33)
Assets held-for-sale	(105)	(414)	(18)	(537)
Balance at December 31, 2017	**$ 1,399**	**$ 1,310**	**$ 657**	**$ 3,366**
Foreign currency translation	(10)	—	(16)	(26)
Assets held-for-sale	(12)	—	—	(12)
Other(1)	14	66	—	80
Balance at December 31, 2018	**$ 1,391**	**$ 1,376**	**$ 641**	**$ 3,408**

____
(1) Represents 2018 true-up to the 2017 Assets held for sale.

Impairment Charge

There was no impairment identified for the years ended December 31, 2018 and 2017. In 2016, due to the declining trends and projections in the Commercial Industries reporting unit, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value. Accordingly, we recorded a pre-tax goodwill impairment charge of $935 million during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). There was no impairment identified for the Public Sector in 2016.

Table of Contents

Intangible Assets, Net

Net intangible assets were $651 million at December 31, 2018 of which $417 million, $160 million and $74 million relate to our Commercial Industries, Government Services and Transportation segments, respectively. Intangible assets were comprised of the following:

		December 31, 2018			December 31, 2017		
(in millions except years)	Weighted Average Amortization	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Customer relationships	11 years	$ 2,914	$ 2,264	$ 650	$ 2,907	$ 2,022	$ 885
Technology, patents and non-compete	4 years	6	5	1	11	5	6
Total Intangible Assets		$ 2,920	$ 2,269	$ 651	$ 2,918	$ 2,027	$ 891

Amortization expense related to intangible assets was $242 million, $243 million and $280 million for the years ended December 31, 2018, 2017 and 2016, respectively. Amortization expense is expected to approximate $241 million in 2019, $238 million in 2020, $134 million in 2021, $12 million in 2022 and $6 million in 2023.

Note 7 – Restructuring Programs and Related Costs

The Company engages in a series of restructuring programs related to downsizing its employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce its cost structure and improve productivity. The implementation of the Company's strategic transformation program and various productivity initiatives have reduced the Company's real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Also included in Restructuring and Related Costs are incremental, non-recurring costs related to the consolidation of our data centers. Management continues to evaluate the Company's business and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made or actions are completed.

Costs associated with restructuring, including employee severance and lease termination costs, are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of our restructuring program activity during the two years ended December 31, 2018 is as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Balance at December 31, 2016	$ 15	$ 6	$ 21
Restructuring provision	49	54	103
Adjustments to prior accruals	(8)	(3)	(11)

Unearned income	32	54
Restructuring reserves	13	12
Other	62	60
Total Other Long-term Liabilities	$ 280	$ 146

_____

(1) The balances at December 31, 2018 and 2017 are expected to be amortized over a weighted average remaining life of approximately 10 and 9 years, respectively.

Amortization expense for the next five years and thereafter for deferred contract costs is expected as follows:

2019	2020	2021	2022	2023	Thereafter
$ 41	$ 13	$ 8	$ 6	$ 2	$ 30

Table of Contents

Note 9 – Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments or as of the earliest put date available to the debt holders. We defer costs associated with debt issuance over the applicable term. These costs are amortized as interest expense in our Consolidated Statements of Income (Loss).

Long-term debt was as follows:

(in millions)	Weighted Average Interest Rates at December 31, 2018(1)	December 31, 2018	December 31, 2017
Term loan A due 2022	3.42%	$ 705	$ 732
Term loan B due 2023	5.44%	833	842
Senior notes due 2024	7.71%	34	510
Capital lease obligations	2.08%	26	33
Principal Debt Balance		$ 1,598	$ 2,117
Debt issuance costs and unamortized discounts		(31)	(56)
Less: current maturities		(55)	(82)
Total Long-term Debt		$ 1,512	$ 1,979

(1) Represents weighted average effective interest rate which includes the effect of discounts and premiums on issued debt.

Scheduled principal payments due on our long-term debt for the next five years and thereafter are as follows:

2019	2020	2021	2022	2023	Thereafter	Total
$ 55	$ 50	$ 84	$ 576	$ 800	$ 33	$ 1,598

Credit Facility

On December 7, 2016, we entered into a senior secured credit agreement (Credit Agreement) among the Company, its subsidiaries: Conduent Business Services, LLC (CBS), Affiliated Computer Services International B.V. and Conduent Finance, Inc. (CFI), the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains senior secured credit facilities (Senior Credit Facilities) consisting of:

(i) Senior Secured Term Loan A (Term Loan A) with an aggregate principal amount of $700 million;
(ii) Senior Secured Term Loan B (Term Loan B) with an aggregate principal amount of $850 million;
(iii) Senior Revolving Credit Facility (Revolving Credit Facility) with an aggregate available amount of $750 million including a sub-limit for up to $300 million million available for the issuance of letters of credit.

As of December 31, 2018, we have utilized $12 million of our revolving credit facility capacity to issue letters of credit.

The Credit Agreement permits us to incur incremental term loan borrowings and /or increase commitments under the revolving credit facility, subject to certain limitations and satisfaction of certain conditions, in an aggregate amount not to exceed (i) $300 million plus, (ii) if the senior secured net leverage ratio of Conduent Business Services (CBS) and its subsidiaries does not exceed 2.25 to 1.00 on a pro forma basis (without giving effect to any incurrence under clause (i) that is incurred substantially simultaneously with amounts incurred under clause (ii)), an unlimited amount.

All obligations under the Credit Agreement are unconditionally guaranteed by the Company, CBS, Conduent Finance, Inc. (CFI) and the existing and future direct and indirect wholly owned domestic subsidiaries of CBS (subject to certain exceptions). All obligations under the Credit Agreement, and the guarantees of those obligations, are secured, subject to certain exceptions, by substantially all of the assets of CBS and the guarantors under the Credit Agreement (other than the Company and CFI), including a first-priority pledge of all the capital stock of CBS and the subsidiaries of CBS directly held by CBS or the guarantors (other than the Company and CFI) under the

Table of Contents

Credit Agreement (which pledges, in the case of any foreign subsidiary, will be limited to 65% of the capital stock of any first-tier foreign subsidiary).

The Credit Agreement contains certain customary affirmative and negative covenants, restrictions and events of default. The Credit Agreement requires total net leverage ratio for December 31, 2018 and thereafter not to exceed 3.75 to 1.00.

Senior Notes

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or CBS that guarantee the obligations under the Senior Credit Facilities.

Interest is payable semi-annually. At the option of the Issuers, the Senior Notes are redeemable in whole or in part, at any time prior to December 15, 2020, at a price equal to 100% of the aggregate principal amount of the Senior Notes plus accrued and unpaid interest, if any, to, but excluding, the redemption date plus a “make-whole” premium. The Issuers may also redeem the Senior Notes, in whole or in part, at any time on or after December 15, 2020, at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to but excluding the redemption date. Additionally, at any time prior to December 15, 2019, the Issuers may redeem up to 35% of the aggregate principal amount of the Senior Notes, subject to certain conditions, with the net cash proceeds from certain equity offerings at a price equal to 110.50% of the principal amount of the Senior Notes, plus accrued and unpaid interest, if any, to, but excluding, the redemption date.

Loans Repricing and Redemption

On June 28, 2018, the Company entered into Amendment No. 3 (Amendment) to the December 7, 2016 Credit Agreement, which (i) extended the revolving credit maturity from December 7, 2021 to December 7, 2022 and reduced the interest rate on the revolving credit by 0.5% from 2.25% over LIBOR to 1.75% over LIBOR; (ii) extended the maturity date of the Term A Loans from December 7, 2021 to December 7, 2022 and reduced the interest rate by 0.5% from 2.25% over LIBOR to 1.75% over LIBOR, and (iii) reduced the interest rate on the Term B Loans by 0.5% from 3.0% over LIBOR to 2.5% over LIBOR. These transactions resulted in a write-off of unamortized discount and issuance costs of $3 million.

In July 2018, the Company redeemed $476 million of its $510 million 10.50% Senior Notes due 2024. As part of the redemption, the Company paid a premium of $95 million and wrote off the associated unamortized discount and issuance costs of $13 million.

Interest

Interest paid on our short-term and long-term debt amounted to $100 million, $129 million, $5 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Interest expense and interest income was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Interest expense	$ 112	$ 137	$ 40
Interest income	7	3	3

Table of Contents

Note 10 – Financial Instruments

We are exposed to market risk from changes in foreign currency exchange rates and interest rates, which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We enter into limited types of derivative contracts to manage foreign currency exposures that we hedge. Our primary foreign currency market exposures include the Philippine Peso, Indian Rupee and Mexican Peso. The fair market values of all our derivative contracts change with fluctuations in interest rates or currency exchange rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. Derivative financial instruments are held solely as risk management tools and not for trading or speculative purposes. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

We do not believe there is significant risk of loss in the event of non-performance by the counterparty associated with our derivative instruments because these transactions are executed with a major financial institution. Further, our policy is to deal only with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties.

Summary of Foreign Exchange Hedging Positions

At December 31, 2018 and 2017, we had outstanding forward exchange with gross notional values of $167 million and $160 million, respectively. At December 31, 2018, approximately 65% of these contracts mature within three months, 14% in three to six months, 17% in six to twelve months and 4% in greater than 12 months.

The following is a summary of the primary hedging positions and corresponding fair values:

	December 31, 2018		December 31, 2017	
(in millions)	Gross Notional Value	Fair Value Asset (Liability)(1)	Gross Notional Value	Fair Value Asset (Liability)(1)
Currencies Hedged (Buy/Sell)				
Philippine Peso/U.S. Dollar	$ 53	$ —	$ 62	$ —
Indian Rupee/U.S. Dollar	69	2	68	1
Mexican Peso/U.S. Dollar	8	—	9	—
All Other	37	—	21	—
Total Foreign Exchange Hedging	$ 167	$ 2	$ 160	$ 1

(1) Represents the net receivable (payable) amount included in the Consolidated Balance Sheet.

Note 11 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP established a hierarchy framework to classify the fair value based on the observability of significant inputs to the measurement. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities.

Table of Contents

Summary of Financial Assets and Liabilities Accounted for at Fair Value on a Recurring Basis

The following table represents assets and liabilities measured at fair value on a recurring basis. The basis for the measurement at fair value in all cases was Level 2.

(in millions)	December 31, 2018	December 31, 2017
Assets:		
Foreign exchange contract - forward	$ 3	$ 2
Total Assets	$ 3	$ 2
Liabilities:		
Foreign exchange contracts - forwards	$ 1	$ 1
Deferred compensation plan liabilities(1)	—	99
Total Liabilities	$ 1	$ 100

(1) In September 2017, the Company terminated the legacy deferred compensation plans (Plans) and the Company Owned Life Insurance (COLI), which held the Plans' investments. The Company made the payments to Plan participants in 2018.

Summary of Other Financial Assets and Liabilities

The estimated fair values of our other financial assets and liabilities were as follows:

	December 31, 2018		December 31, 2017	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Assets held for sale	$ 15	$ 15	$ 757	$ 757
Liabilities:				
Long-term debt	$ 1,512	$ 1,463	$ 1,979	$ 2,070
Liabilities held for sale	$ 40	$ 40	$ 169	$ 169

The fair value amounts for Cash and cash equivalents, Restricted cash, Accounts receivable, net and Short-term debt approximate carrying amounts due to the short-term maturities of these instruments.

The fair value of the Assets held for sale and the Liabilities held for sale were measured based on the sale's price less estimated transactions costs (Level 3). Refer to Note 3 – Assets/Liabilities Held for Sale and Divestitures to the Consolidated Financial Statements for additional information.

The fair value of Long-term debt was estimated based on the current rates offered to the Company for debt of similar maturities (Level 2).

Note 12 – Employee Benefit Plans

Defined Benefit Plans

In 2018, all of the U.S. and the majority of the international plan assets and obligations were part of the divestiture of the U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the U.K. The company's remaining benefit obligations and plan assets in 2018 were $12 million and $3 million, respectively.

As of December 31, 2017 the Company had a pension benefit obligation of $280 million ($102 million in the US and $178 million from non-US plans). The plans also had assets of approximately $222 million ($62 million in the US and $160 million from non-US plans), in which the assets were invested primarily in equity and fixed income securities (level 1 and level 2).

Table of Contents

Defined Contribution Plans

We have post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals were transitioned to an enhanced defined contribution plan. In these plans employees are allowed to contribute a portion of their salaries and bonuses to the plans, and we match a portion of the employee contributions. We recorded charges related to our defined contribution plans of $28 million in 2018, $35 million in 2017 and $35 million in 2016.

Note 13 - Income Taxes

Prior to the Separation, Conduent's operating results were included in Xerox Corporation's various consolidated U.S. federal and state income tax returns, as well as non-U.S. tax filings. For the purposes of the Company's Consolidated Financial Statements for periods prior to the Separation, income tax expense and deferred tax balances have been recorded as if the Company filed tax returns on a standalone basis separate from Xerox. The Separate Return Method applies the accounting guidance for income taxes to the standalone financial statements as if the Company was a separate taxpayer and a standalone enterprise for fiscal 2016.

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform significantly changes the U.S. corporate income tax laws by, among other things, reducing the corporate income tax rate to 21% starting in 2018 and creating a territorial tax system with a one-time mandatory tax on previous deferred foreign earnings of U.S. subsidiaries. With respect to this legislation, the Company recorded a provisional tax benefit of $198 million in the fourth quarter of 2017, which included a $210 million tax benefit due to the re-measurement of deferred tax assets and liabilities resulting from the decrease in the corporate U.S. federal income tax rate from 35% to 21% and $12 million as a one-time-charge on the transition tax for Post-1986 undistributed and not previously taxed foreign earnings and profits. The Company finalized its accounting for this legislation in the fourth quarter of 2018 and recognized a $2 million additional benefit year to date, included as a component of income tax expense from continuing operations. The true-up of the provisional benefit includes $5 million additional benefit due to re-measurement of deferred tax assets and liabilities resulting from the decrease in the U.S. corporate federal income tax rate, a $1 million reduction in the one-time charge on the transition tax and a $4 million charge due to change in recognition of deferred tax assets related to deductibility of certain expenses.

Income (loss) before income taxes (pre-tax income (loss)) was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Domestic loss	$ (411)	$ (91)	$ (1,329)
Foreign income	16	75	102
Loss Before Income Taxes	$ (395)	$ (16)	$ (1,227)

Provision (benefit) for income taxes were as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Federal Income Taxes			
Current	$ 35	$ 4	$ (116)
Deferred	(62)	(233)	(132)
Foreign Income Taxes			
Current	41	25	31
Deferred	(6)	(3)	(3)
State Income Taxes			
Current	20	8	1
Deferred	(7)	6	(25)
Total Benefit	$ 21	$ (193)	$ (244)

Table of Contents

A reconciliation of the U.S. federal statutory income tax rate to the consolidated effective income tax rate was as follows:

	Year Ended December 31,		
	2018	2017	2016
U.S. federal statutory income tax rate	21.0 %	35.0 %	35.0 %
Nondeductible expenses(1)	(3.7)%	(104.0)%	(19.0)%
Effect of tax law changes	0.5 %	1,282.4 %	— %
Change in valuation allowance for deferred tax assets	(1.7)%	(39.5)%	0.1 %
State taxes, net of federal benefit	(2.3)%	1.2 %	1.8 %
Audit and other tax return adjustments	— %	— %	1.4 %
Tax-exempt income, credits and incentives	2.2 %	38.9 %	0.7 %
Foreign rate differential adjusted for U.S. taxation of foreign profits(2)	1.9 %	47.7 %	0.7 %
Divestitures(3)	(20.3)%	(51.9)%	— %
Unrecognized tax benefits and other	(2.9)%	(3.5)%	(0.8)%
Effective Income Tax Rate	(5.3)%	1,206.3 %	19.9 %

(1) In 2017, nondeductible expenses primarily related to officers life insurance.
(2) The “U.S. taxation of foreign profits” represents the U.S. tax, net of foreign tax credits, associated with actual and deemed repatriations of earnings from our non-U.S. subsidiaries.
(3) 2018 and 2017 divestitures include nondeductible goodwill allocated to divested businesses.

On a consolidated basis, we paid/(received) a total of $108 million, $29 million and $(123) million in income taxes to federal, foreign and state jurisdictions during the three years ended December 31, 2018, 2017 and 2016, respectively.

Total income tax expense (benefit) was allocated as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Pre-tax income	$ 21	$ (193)	$ (244)
Discontinued operations	—	3	—
Common shareholders' equity:			
Changes in defined benefit plans	—	—	8
Stock option and incentive plans, net	—	—	—
Total Income Tax Expense (Benefit)	$ 21	$ (190)	$ (236)

Unrecognized Tax Benefits and Audit Resolutions

We recognize tax liabilities when, despite our belief that our tax return positions are supportable, we believe that certain positions may not be fully sustained upon review by tax authorities. Each period we assess uncertain tax positions for recognition, measurement and effective settlement. Benefits from uncertain tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Where we have determined that our tax return filing position does not satisfy the more-likely-than-not recognition threshold, we have recorded no tax benefits.

We are also subject to ongoing tax examinations in numerous jurisdictions due to the extensive geographical scope of our operations. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can increase or decrease our effective tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain. As of December 31, 2018, we do not believe that there are any positions for which it is reasonably possible that the total amount of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

Table of Contents

A reconciliation of the beginning and ending amount of unrecognized tax benefits was as follows:

(in millions)	2018	2017	2016
Balance at January 1	$ 15	$ 14	$ 24
Additions related to current year	3	—	1
Additions related to prior years positions	5	—	—
Reductions related to prior years positions	—	—	(5)
Settlements with taxing authorities[1]	(1)	—	(5)
Currency	(2)	1	(1)
Balance at December 31	$ 20	$ 15	$ 14

(1) 2018 and 2016 settlement resulted in $1 million and $5 million cash paid, respectively.

We maintain offsetting benefits from other jurisdictions of $15 million, $16 million and $16 million, at December 31, 2018, 2017 and 2016, respectively. We recognized interest and penalties accrued on unrecognized tax benefits, as well as interest received from favorable settlements within income tax expense. We had $10 million, $6 million and $4 million accrued for the payment of interest and penalties associated with unrecognized tax benefits at December 31, 2018, 2017 and 2016, respectively. In the U.S., we are no longer subject to U.S. federal income tax examinations for years before 2012. With respect to our major foreign jurisdictions, the years generally remain open back to 2006.

Deferred Income Taxes

The Company is indefinitely reinvested in the undistributed earnings of its foreign subsidiaries with respect to the U.S. These foreign subsidiaries have aggregate cumulative undistributed earnings of $164 million as of December 31, 2018. For years after 2017, the Tax Reform does allow for certain earnings to be repatriated free from U.S. Federal taxes. However, the repatriation of earnings could give rise to additional tax liabilities. We have also not provided for deferred taxes on outside basis differences in our investments in our foreign subsidiaries that are unrelated to unremitted earnings. These other basis differences will also be indefinitely reinvested. A determination of the unrecognized deferred taxes related to these other components of our outside basis differences is not practicable. We have provided for deferred taxes with respect to certain unremitted earnings of foreign subsidiaries that are not indefinitely reinvested between foreign subsidiaries outside of the U.S.

Table of Contents

The tax effects of temporary differences that give rise to significant portions of the deferred taxes were as follows:

	December 31,	
(in millions)	2018	2017
Deferred Tax Assets		
Net operating losses	$ 46	$ 41
Operating reserves, accruals and deferrals	68	85
Deferred compensation	16	59
Pension	2	15
Settlement reserves	67	18
Other	11	27
Subtotal	210	245
Valuation allowance	(44)	(35)
Total	$ 166	$ 210
Deferred Tax Liabilities		
Unearned income	$ 86	$ 134
Intangibles and goodwill	341	413
Depreciation	30	5
Other	24	25
Total	$ 481	$ 577
Total Deferred Taxes, Net	$ (315)	$ (367)

The deferred tax assets for the respective periods were assessed for recoverability and, where applicable, a valuation allowance was recorded to reduce the total deferred tax asset to an amount that will, more-likely-than-not, be realized in the future. The net change in the total valuation allowance for the years ended December 31, 2018 and 2017 was an increase of $9 million and $11 million, respectively. The valuation allowance relates primarily to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Although realization is not assured, we have concluded that it is more-likely-than-not that the deferred tax assets, for which a valuation allowance was determined to be unnecessary, will be realized in the ordinary course of operations based on the available positive and negative evidence, including scheduling of deferred tax liabilities and projected income from operating activities. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if actual future income or income tax rates are lower than estimated, or if there are differences in the timing or amount of future reversals of existing taxable or deductible temporary differences.

At December 31, 2018, we had tax credit carryforwards of $9 million available to offset future income taxes which will expire between 2019 and 2038 if not utilized. We also had net operating loss carryforwards for income tax purposes of $417 million that will expire between 2019 and 2038, if not utilized; and $54 million available to offset future taxable income indefinitely.

Table of Contents

Note 14 – Contingencies and Litigation

As more fully discussed below, the Company is involved in a variety of claims, lawsuits, investigations and proceedings concerning: governmental entity contracting, servicing and procurement law; intellectual property law; employment law; commercial and contracts law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company assesses its potential liability by analyzing its litigation and regulatory matters using available information. The Company develops its view on estimated losses in consultation with outside counsel handling its defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in the Company's determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts in excess of any accrual for such matter or matters, this could have a material adverse effect on the Company's results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. The Company believes it has recorded adequate provisions for any such matters as of December 31, 2018. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matters could be in excess of any amounts accrued and could be material to the Company's results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates when the Company undertakes an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the consolidated financial position or liquidity. As of December 31, 2018, the Company had accrued its estimate of liability incurred under its indemnification arrangements and guarantees.

Table of Contents

Litigation Against the Company

State of Texas v. Xerox Corporation, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Conduent State Healthcare, LLC (f/k/a Xerox State Healthcare, LLC, f/k/a ACS State Healthcare, LLC) and Conduent Incorporated: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Xerox Corporation, Xerox State Healthcare, LLC and ACS State Healthcare (collectively, the "Xerox Defendants") violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”). The State alleges that the Xerox Defendants made false representations of material facts regarding the processes, procedures, implementation and results regarding the prior authorization of orthodontic claims. The State seeks recovery of amounts paid for orthodontic treatment under the Texas Medicaid program for the period from approximately 2004 to 2012, three times the amount of the payments made as a result of the alleged unlawful acts, civil penalties, pre- and post-judgment interest and all costs and attorneys’ fees. The Xerox Defendants filed their Answer in June, 2014 denying all allegations. A trial date was originally scheduled for November, 2018. During the first quarter of 2018, the State notified the Xerox Defendants in the litigation discovery process that its claim is in excess of two billion dollars based primarily on the assertion of treble damages and civil penalties per illegal act for almost two hundred thousand purported illegal acts. During the second quarter of 2018, the trial date was rescheduled for May, 2019. During October of 2018, discussions with the State were undertaken to determine if a mutually acceptable settlement might be reached. Those discussions were not productive. In the wake of those discussions, we recorded an additional $72 million reserve during the third quarter of 2018, increasing our aggregate reserve for this matter as of September 30, 2018, to $110 million. During December 2018, we re-engaged with the State in discussions to settle the matter. In February 2019, those discussions culminated in a settlement agreement and release among the Xerox Defendants, the State and HHSC. Pursuant to the terms of the Texas Agreement ("Texas Agreement"), the Company will pay the State of Texas $236 million in full settlement of the claims asserted against the Xerox Defendants. This amount is payable in installments of: (1) $20 million within 10 days of execution of the settlement agreement; (2) $20 million by April 15, 2019; (3) $38 million by July 31, 2019; (4) $79 million by July 31, 2020; and (5) $79 million by July 31, 2021. The Agreement does not prevent the Company from prepaying the foregoing amounts and the Company is currently considering whether to do so. The Company does not intend to make further disclosure regarding a possible prepayment unless it actually prepays such amounts in whole or in part. As part of the settlement, all proceedings in the lawsuit are suspended and the State and the HHSC will dismiss the lawsuit with prejudice and release the Xerox Defendants from all of the State’s claims after all settlement payments are made. As a result of entering into the Texas Agreement, the Company recorded an additional reserve of $113 million in the quarter ended December 31, 2018 which is net of a $13 million discount to reflect the fair value of the liability. The Defendants’ have not made any admission of liability or wrongdoing in entering into the Texas Agreement.

Table of Contents

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck"), which was a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court as to Buck only, and only with respect to Plaintiff's claim of aiding and abetting StanCERA in breaching its fiduciary duty. This case has been stayed pending the outcome of parallel litigation the plaintiffs are pursuing against StanCERA. The parallel litigation was tried before the bench in June 2018, and on January 24, 2019, the court found in favor of StanCERA, holding that it had not breached its fiduciary duty to plaintiffs. Plaintiffs in the parallel litigation have the right to file an appeal, which we expect. Nasrawi remains stayed until the parallel litigation is finally concluded. Absent the court finding that StanCERA breached its fiduciary duty, plaintiffs' claim against Buck for aiding and abetting said breach would not appear viable. Buck will continue to aggressively defend these lawsuits. In August 2018, Conduent sold Buck Consultants, LLC; however, the Company retained this liability after the sale. The Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide a Medicaid Management Information Systems (the "NY MMIS Contract"). In the lawsuit, Conduent seeks damages in excess of one hundred fifty million dollars. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and recorded in the same period certain charges associated with the termination. Cognizant asserted two counterclaims for breach of contract seeking recovery of damages in excess of forty-seven million dollars, which includes amounts alleged not paid to Cognizant under the contract and an alleged twenty-five million dollars of termination fee. Conduent has responded to Cognizant's counterclaims by denying the allegations. Conduent will continue to vigorously defend itself against the counterclaims but the Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Table of Contents

Other Matters:

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB commence an action, it may seek restitution, civil monetary penalties, injunctive relief, or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. XES submitted its response to the NORA. The CFPB's NORA stems from an inquiry that commenced in 2014 when XES received and responded to a CFPB Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the U.S. Department of Education (the "Department") and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB, the U.S. Department of Education, the U.S. Department of Justice, the New York Office of the Attorney General, the New York Department of Financial Services and the Massachusetts Office of the Attorney General began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies. It resolved the Massachusetts Office of the Attorney General investigation in November 2016 and the investigations by both the New York agencies in January 2019. Both as a result of these inquiries, its own reviews of operations and work performed by external auditors, XES has identified certain other operational issues requiring remediation, and this remediation work has commenced. XES disclosed these additional operational projects to the Department at the end of the second quarter of 2018 and is working to complete these projects. In the third quarter of 2018, the Company exited the Student Loan Services business. The Company cannot provide assurance that the CFPB, another regulator, a financial institution on behalf of which the Company serviced third-party student loans, or another party will not ultimately commence a legal action against XES in which fines, penalties or other liabilities are sought from XES. Nor is the Company able to predict the likely outcome of these matters, should any such matter be commenced, or reasonably provide an estimate or range of estimates of any loss in excess of current reserves. The Company could in future periods incur judgments or enter into settlements to resolve these potential matters for amounts in excess of current reserves and there could be a material adverse effect on the Company's results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Guarantees and Indemnifications

Indemnifications Provided as Part of Contracts and Agreements

Acquisitions/Divestitures:

We have indemnified, subject to certain deductibles and limits, the purchasers of businesses or divested assets for the occurrence of specified events under certain of our divestiture agreements. In addition, we customarily agree to hold the other party harmless against losses arising from a breach of representations and covenants, including such matters as adequate title to assets sold, intellectual property rights and certain income taxes arising prior to the date of acquisition. Where appropriate, an obligation for such indemnifications is recorded as a liability at the time of the acquisition or divestiture. Since the obligated amounts of these types of indemnifications are often not explicitly stated or are contingent on the occurrence of future events, the overall maximum amount, or range of amount of the obligation under such indemnifications cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, we have not historically made significant payments for these indemnifications. Additionally, under certain of our acquisition agreements, we have provided for additional consideration to be paid to the sellers if established financial targets are achieved within specific timeframes post-closing. We have recognized liabilities for these contingent obligations based on an estimate of the fair value of these contingencies at the time of acquisition. Contingent obligations related to indemnifications arising from our divestitures and contingent consideration provided for by our acquisitions are not expected to be material to our financial position, results of operations or cash flows.

Table of Contents

Other Agreements:

We are also party to the following types of agreements pursuant to which we may be obligated to indemnify the other party with respect to certain matters:

- Guarantees on behalf of our subsidiaries with respect to real estate leases. These lease guarantees may remain in effect subsequent to the sale of the subsidiary.
- Agreements to indemnify various service providers, trustees and bank agents from any third-party claims related to their performance on our behalf, with the exception of claims that result from the third-party's own willful misconduct or gross negligence.
- Guarantees of our performance in certain services contracts to our customers and indirectly the performance of third parties with whom we have subcontracted for their services. This includes indemnifications to customers for losses that may be sustained as a result of our performance of services at a customer's location.

In each of these circumstances, our payment is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract and such procedures also typically allow us to challenge the other party's claims. In the case of lease guarantees, we may contest the liabilities asserted under the lease. Further, our obligations under these agreements and guarantees may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments we made.

Intellectual Property Indemnifications

We do not own most of the software that we use to run our business. Instead, we license this software from a small number of primary vendors. We indemnify certain software providers against claims that may arise as a result of our use or our subsidiaries', customers' or resellers' use of their software in our services and solutions. These indemnities usually do not include limits on the claims, provided the claim is made pursuant to the procedures required in the services contract.

Indemnification of Officers and Directors

Our corporate by-laws require that, except to the extent expressly prohibited by law, we must indemnify our officers and directors against judgments, fines, penalties and amounts paid in settlement and reasonable expenses, including attorneys' fees, incurred in connection with civil or criminal action or proceedings or any appeal, as it relates to their services to our Company and our subsidiaries. Although the by-laws provide no limit on the amount of indemnification, we may have recourse against our insurance carriers for certain payments made by us. However, certain indemnification payments (such as those related to "clawback" provisions in certain compensation arrangements) may not be covered under our directors' and officers' insurance coverage. We also indemnify certain fiduciaries of our employee benefit plans for liabilities incurred in their service as fiduciary whether or not they are officers of the Company. Finally, in connection with our acquisition of businesses, we may become contractually obligated to indemnify certain former and current directors, officers and employees of those businesses in accordance with pre-acquisition by-laws or indemnification agreements or applicable state law.

Other Contingencies

Certain contracts, primarily in the Company's Public Sector segment, require the Company to provide a surety bond or a letter of credit as a guarantee of performance. As of December 31, 2018, the Company had $646 million of outstanding surety bonds used to secure its performance of contractual obligations with its clients and $344 million of outstanding letters of credit issued to secure the Company's performance of contractual obligations to its clients as well as other corporate obligations. In general, the Company would only be liable for the amount of these guarantees in the event of default in the Company's performance of its obligations under each contract. The Company believes it has sufficient capacity in the surety markets and liquidity from its cash flow and its various credit arrangements (including its Credit Facility) to allow it to respond to future requests for proposals that require such credit support.

Table of Contents

Note 15 - Preferred Stock

Series A Preferred Stock

In connection with the December 31, 2016 spin-off from Xerox Corporation, we issued 120 thousand shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The Series A convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of the Series A convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393 thousand shares (reflecting an initial conversion price of approximately $22.250 per share of common stock), subject to customary anti-dilution adjustments.

If the closing price of our common stock exceeds 137% of the initial conversion price for 20 out of 30 trading days, we have the right to cause any or all of the Series A convertible preferred stock to be converted into shares of common stock at the then applicable conversion rate. The Series A convertible preferred stock is also convertible, at the option of the holder, upon a change in control, at the applicable conversion rate plus an additional number of shares determined by reference to the price paid for our common stock upon such change in control. In addition, upon the occurrence of certain fundamental change events, including a change in control or the delisting of Conduent's common stock, the holder of Series A convertible preferred stock has the right to require us to redeem any or all of the Series A convertible preferred stock in cash at a redemption price per share equal to the liquidation preference and any accrued and unpaid dividends to, but not including, the redemption date. As a result of the contingent redemption feature, the Series A convertible preferred stock is classified as temporary equity and reflected separately from permanent equity in the Consolidated Balance Sheets.

Note 16 – Shareholders’ Equity

Preferred Stock

As of December 31, 2018, we had one class of preferred stock outstanding. See Note 15 – Preferred Stock for further information. We are authorized to issue approximately 100 million shares of cumulative preferred stock at $0.01 par value per share.

Common Stock

We have 1 billion authorized shares of common stock at $0.01 par value per share. At December 31, 2018, 15 million shares were reserved for issuance under our incentive compensation plans and 5.4 million shares were reserved for conversion of the Series A convertible preferred stock.

Stock Compensation Plans

Certain of our employees participate in a long-term incentive plan. Our long-term incentive plan authorizes the issuance of restricted stock units / shares (RSU), performance stock units / share (PSU) and non-qualified stock options to employees. All awards for these plans prior to 2017 were made in Xerox stock and therefore converted into Conduent stock effective upon the Separation. Using a formula designed to preserve the value of the award immediately prior to the Separation, all of these awards will be settled and are reflected in the Company's Consolidated Statements of Shareholders' Equity. Stock-based compensation expense includes expense based on the awards and terms previously granted to the employees.

Stock-based compensation expense was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Stock-based compensation expense, pre-tax	$ 38	$ 42	$ 23
Income tax benefit recognized in earnings	7	17	9

Table of Contents

Restricted Stock Units / Shares Compensation expense is based upon the grant date market price. The compensation expense is recorded over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest.

Performance Stock Units / Shares: The Company granted PSUs that vest contingent upon its achievement of certain specified financial performance criteria over a three-year period. If the three-year actual results exceed the stated targets, then the plan participants have the potential to earn additional shares of common stock, which cannot exceed 100% of the original grant.

The fair value of PSUs is based upon the market price of Conduent's common stock on the date of the grant. Compensation expense is recognized over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest. If the stated targets are not met, any recognized compensation cost would be reversed.

Employee Stock Options: Stock options were issued by a former parent company and were converted to Conduent's common stock upon the Separation. These options generally expire within the next one year. Other than these options, Conduent has not issued any new stock options.

Summary of Stock-based Compensation Activity

	2018		2017		2016

(1) Stock-based compensation was converted from former parent stock into Conduent common stock at spin-off.

The Company issued 96 thousand Deferred Stock Units (DSU) to non-employee members of the Board of Directors. These DSUs are fully vested and will be issued when the directors leave the Board.

The Company has 119 thousand stock options outstanding as of December 31, 2018 at a strike price of $10.15. These stock options are fully vested and exercisable.

Table of Contents

The total unrecognized compensation cost related to non-vested stock-based awards at December 31, 2018 was as follows (in millions):

Awards	Unrecognized Compensation	Remaining Weighted-Average Vesting Period (Years)
Restricted Stock Units / Shares	$ 21	0.9
Performance Stock Units / Shares	15	0.8
Total	$ 36	

The aggregate intrinsic value of outstanding RSUs and PSUs awards were as follows (in millions):

Awards	December 31, 2018
Restricted Stock Units / Shares	$ 26
Performance Stock Units / Shares	48

Information related to stock options outstanding and exercisable at December 31, 2018 was as follows

(in millions)	Options

Note 18 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

(in millions, except per share data. Shares in thousands)	Year Ended December 31, 2018	2017	2016
Basic Earnings (Loss) per Share:			
Net income (loss) from continuing operations	$ (416)	$ 177	$ (983)
Accrued dividends on preferred stock	(10)	(10)	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	(426)	167	(983)
Net income (loss) from discontinued operations	—	4	—
Adjusted Net Income (Loss) Available to Common Shareholders	$ (426)	$ 171	$ (983)
Weighted average common shares outstanding	206,056	204,007	202,875
Basic Earnings (Loss) per Share:			
Continuing operations	$ (2.06)	$ 0.82	$ (4.85)
Discontinued operations	—	0.02	—
Basic Earnings (Loss) per Share	$ (2.06)	$ 0.84	$ (4.85)
Diluted Earnings (Loss) per Share:			
Net income (loss) from continuing operations	$ (416)	$ 177	$ (983)
Accrued dividends on preferred stock	(10)	(10)	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	(426)	167	(983)
Net income (loss) from discontinued operations	—	4	—
Adjusted Net Income (Loss) Available to Common Shareholders	$ (426)	$ 171	$ (983)
Weighted average common shares outstanding	206,056	204,007	202,875
Common shares issuable with respect to:			
Stock options	—	195	—
Restricted stock and performance units / shares	—	2,591	—
8% Convertible preferred stock	—	—	—
Adjusted Weighted Average Common Shares Outstanding	206,056	206,793	202,875
Diluted Earnings (Loss) per Share:			
Continuing operations	$ (2.06)	$ 0.81	$ (4.85)
Discontinued operations	—	0.02	—
Diluted Earnings (Loss) per Share	$ (2.06)	$ 0.83	$ (4.85)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):			
Stock Options	119	—	857
Restricted stock and performance shares/units	5,242	2,568	5,719
Convertible preferred stock	5,393	5,393	5,393
Total Anti-Dilutive Securities	10,754	7,961	11,969

Note 19 – Subsequent Events

In January 2019, the Company completed the acquisition of Health Solutions Plus (HSP), a software provider of healthcare payer administration solutions for $90 million and a maximum contingent consideration payment of $7.8 million over two years.

In February 2019, the Company completed the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC for $25 million, subject to delayed transfer of certain assets in some countries pending fulfillment of legal requirements.

(1) *The sum of quarterly earnings per share may differ from the full-year amounts due to rounding, or in the case of diluted earnings per share, because securities that are anti-dilutive in certain quarters may not be anti-dilutive on a full-year basis.*

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

Table of Contents

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements

Management is responsible for the integrity and objectivity of all information presented in this Annual Report on Form 10-K. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have access to the Audit Committee.

Disclosure Controls and Procedures

The Company's management evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of December 31, 2018, the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this Annual Report on Form 10-K, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company's management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended. Under the supervision and with the participation of our management, including our principal executive officer, principal financial officer and principal accounting officer, we have conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on the above evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2018.

The effectiveness of our internal control over financial reporting as of December 31, 2018 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Part II, Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter ended December 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding directors is incorporated herein by reference to the section entitled “Proposal 1 - Election of Directors” in our definitive Proxy Statement (2019 Proxy Statement) to be filed pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, for our 2019 Annual Meeting of Stockholders. The Proxy Statement is expected to be filed within 120 days after the end of our fiscal year ended December 31, 2018.

The information regarding compliance with Section 16(a) of the Securities and Exchange Act of 1934 is incorporated herein by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” of our 2019 Proxy Statement.

The information required by this Item regarding the Audit Committee, its members and the Audit Committee financial experts is incorporated by reference herein from the subsection entitled “Committee Functions, Membership and Meetings” in the section entitled “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

We have adopted a code of ethics applicable to our principal executive officer, principal financial officer and principal accounting officer. The Finance Code of Conduct can be found on our website at: https://www.conduent.com/corporate-governance/ethics-and-compliance/. Information concerning our Finance Code of Conduct can be found under "Corporate Governance" in our 2019 Proxy Statement and is incorporated here by reference.

Executive Officers of Conduent

The following is a list of the executive officers of Conduent, their current ages, their present positions and the year appointed to their present positions.

Each officer is elected to hold office until the meeting of the Board of Directors held on the day of the next annual meeting of shareholders, subject to the provisions of the by-laws.

Name	Age	Present Position	Year Appointed to Present Position	Conduent Officer Since
Ashok Vemuri*	50	Chief Executive Officer	2017	2017
Allan Cohen	49	Vice President & Chief Accounting Officer	2017	2017
Jeffrey Friedel	54	Executive Vice President & Chief People Officer	2017	2017
James Michael Peffer	57	Executive Vice President, General Counsel & Secretary	2017	2017
Brian J. Webb-Walsh	43	Executive Vice President & Chief Financial Officer	2017	2017

* Member of Conduent Board of Directors

Each of the officers named above has been an officer or an executive of Conduent or its subsidiaries for less than five years.

Mr. Vemuri served as Chief Executive Officer of Xerox Business Services, LLC and an Executive Vice President of Xerox Corporation since July 2016. Mr. Vemuri previously was President, Chief Executive Officer and a member of the Board of Directors of IGATE Corporation. Prior to IGATE, Mr. Vemuri spent 14 years at Infosys Limited, a multinational consulting and IT services company, in a variety of leadership and business development roles.

Prior to joining Conduent, Mr. Cohen served as Senior Vice President and Controller of NBC Universal since 2011. Mr. Cohen also previously served as Vice President, Assistant Controller at Time Warner, Professional Accounting Fellow in the Division of Corporate Finance at the SEC and Senior Manager at PriceWaterhouseCoopers.

Table of Contents

Prior to joining Conduent, Mr. Friedel served as Vice President and Head of the Office of Integrity and Compliance at Infosys Limited from January 2016 to September 2016, a global leader in technology services and consulting, where he oversaw SEC compliance, internal investigations, code of conduct, whistleblower, and anti-bribery and export regulations. Mr. Friedel has also previously served as Senior Vice President and General Counsel at IGATE Corporation from June 2014 to December 2015, an IT services and business process outsourcing company which was acquired by CapGemini. Prior to June 2014, Mr. Friedel held a variety of leadership roles at Infosys Limited.

Mr. Peffer served as Vice President, General Counsel and Secretary for Xerox Corporation from August 2016 to December 2016. Prior to this, Mr. Peffer served as Associate General Counsel of Xerox Corporation and Executive Vice President of Xerox Business Services, LLC since 2010. Prior to 2010, Mr. Peffer was Senior Vice President and Deputy General Counsel of ACS from May 2009.

Mr. Webb-Walsh served as the Chief Financial Officer of Xerox Services since January 2016. Prior to this, Mr. Webb-Walsh was Senior Vice President of Finance for the Government Healthcare Group and the Platform Development and Systems Integration Group of Xerox Services. Mr. Webb-Walsh joined Xerox Corporation in 1997 and has held a variety of leadership positions.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item included under the following captions under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement is incorporated herein by reference: “Compensation Discussion and Analysis”, “Summary Compensation Table”, “Grants of Plan-Based Awards in 2018”, “Outstanding Equity Awards at 2018 Fiscal Year-End”, “Option Exercises and Stock Vested in 2018”, “Pension Benefits for the 2018 Fiscal Year”, “Nonqualified Deferred Compensation for the 2018 Fiscal Year”, “Potential Payments upon Termination or Change in Control”, “Summary of Annual Director Annual Compensation, "Compensation Committee Interlocks and Insider Participation” and “Compensation Committee”. The information included under the heading “Compensation Committee Report” in our 2019 Proxy Statement is incorporated herein by reference; however, this information shall not be deemed to be “soliciting material” or to be “filed” with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this Item regarding security ownership of certain beneficial owners and management and securities authorized for issuance under equity compensation plans is incorporated herein by reference to the subsections entitled “Ownership of Company Securities,” and “Equity Compensation Plan Information” under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information required by this Item regarding certain relationships and related transactions is incorporated herein by reference to the subsection entitled “Certain Relationships and Related Person Transactions” under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement. The information regarding director independence is incorporated herein by reference to the subsections entitled “Corporate Governance” and “Director Independence” in the section entitled “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

ITEM 14. PRINCIPAL AUDITOR FEES AND SERVICES

The information required by this Item regarding principal auditor fees and services is incorporated herein by reference to the section entitled “Proposal 2 - Ratification of Election of Independent Registered Public Accounting Firm” in our 2019 Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) (1) Index to Financial Statements and Financial Statement Schedule, incorporated by reference or filed as part of this report:

- Report of Independent Registered Public Accounting Firm including Report on Financial Statement Schedule;
- Consolidated Statements of Income (Loss) for each of the years in the three-year period ended December 31, 2018;
- Consolidated Statements of Comprehensive Income (Loss) for each of the years in the three-year period ended December 31, 2018;
- Consolidated Balance Sheets as of December 31, 2018 and 2017;
- Consolidated Statements of Cash Flows for each of the years in the three-year period ended December 31, 2018;
- Consolidated Statements of Shareholders' Equity for each of the years in the three-year period ended December 31, 2018;
- Notes to the Consolidated Financial Statements;
- Schedule II - Valuation and Qualifying Accounts for the three years ended December 31, 2018; and
- All other schedules are omitted as they are not applicable, or the information required is included in the financial statements or notes thereto.

(2) Supplementary Data:

- Quarterly Results of Operations (unaudited).
- SCHEDULE II

VALUATION AND QUALIFYING ACCOUNTS

For the three years ended December 31, 2018

(in millions)	Balance at beginning of period	Additions charged to expense[1]	Amounts (credited) charged to other income statement accounts [2]	Deductions and other, net of recoveries [3][4]	Balance at end of period
Allowance for Losses:					
2018 Accounts Receivable	$ 2	$ —	$ —	$ (1)	$ 1
2017 Accounts Receivable	7	(1)	—	(4)	2
2016 Accounts Receivable	6	4	—	(3)	7
Tax Valuation Allowance:					
2018 Tax Valuation	35	9	—	—	44
2017 Tax Valuation	24	11	—	—	35
2016 Tax Valuation	38	—	—	(14)	24

(1) Account Receivables: additions charged to expense represent bad debt provisions relate to estimated losses due to credit and similar collectibility issues.
(2) Account Receivables: Other charges (credits) relate to adjustments to reserves necessary to reflect events of non-payment such as customer accommodations and contract terminations.

Table of Contents

(3) Account Receivables: Deductions and other, net of recoveries primarily relates to receivable write-offs, but also includes the impact of foreign currency translation adjustments and recoveries of previously written off receivables.

(4) Tax Valuation: Reductions to tax valuation allowance are primarily related to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

(3) The exhibits listed below are filed or incorporated by reference are part of this Form 10-K.

Management contracts or compensatory plans or arrangements listed that are applicable to the executive officers named in the Summary Compensation Table which appears in Registrant's 2019 Proxy Statement or to our directors are preceded by an asterisk (*).

Exhibit No.	
2.1	Separation and Distribution Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 2.1 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
3.1	Restated Certificate of Incorporation of Registrant as of December 23, 2016.
	Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016.
	Incorporated by reference to Exhibit 3.2 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
4.1(a)	Indenture, dated as of December 7, 2016, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated December 9, 2016. (See SEC File Number 001-37817).
4.1(b)	First Supplemental Indenture, dated as of January 9, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(a) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(c)	Second Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(b) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(d)	Third Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(c) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(e)	Fourth Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(d) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(f)	Fifth Supplemental Indenture, dated as of July 12, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated July 12, 2018. (See SEC File Number 001-37817).
10.1(a)	Credit Agreement, dated as of December 7, 2016, among Conduent Incorporated, Xerox Business Services, LLC, Affiliated Computer Services International B.V., Conduent Finance, Inc., the Lenders from time to time party thereto and JPMorgan Chase Bank, N.A., as Administrative Agent.
	Incorporated by reference to Exhibit 10.1 to Registrant's Current Report on Form 8-K dated December 9, 2016. (See SEC File Number 001-37817).

Table of Contents

10.1(b)	Amendment No. 1 to Credit Agreement, dated as of April 1, 2017, among Conduent Incorporated, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Affiliated Computer Services International B.V., Conduent Finance, Inc., the Lenders from time to time party thereto and JPMorgan Chase Bank, N.A. as Administrative Agent.

EXHIBIT 10.6(a)(ix)

RESTRICTED STOCK UNIT AWARD AGREEMENT PURSUANT TO
CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Restricted Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration the Company agrees as follows:

AWARDS

1 . Award of Restricted Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary the number of Restricted Stock Units (individually, a "RSU") as shown on the Award Summary. Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE RESTRICTED STOCK UNITS

2 . Entitlement to Shares. As soon as practicable on or after each applicable Vesting Date (as defined below) (or such earlier date provided in Section 9), the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested RSUs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following each applicable Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued as a result of such tax withholding. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of RSUs covered hereby shall be subject to the Employee's continued employment with the Company or a subsidiary or affiliate through the applicable Vesting Date. The Employee shall be eligible to vest in one-third of the shares of Common Stock covered by this Agreement as set forth in the Award Summary on each of December 31, 2019, December 31, 2020 and December 31, 2021 (each, a "Vesting Date").

Upon the occurrence of an event constituting a Change in Control, notwithstanding anything to the contrary in Section 22(b) of the Plan, the RSUs outstanding on the date of such Change in Control, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such RSUs, and any dividend equivalents with respect thereto, shall be subject to Employee's continued employment with the Company or a subsidiary or an affiliate through each applicable Vesting Date as provided in this Section 3, at which time such RSUs shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee; provided that the RSUs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to a Vesting Date. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on each applicable Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested RSUs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on each applicable Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of RSUs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the RSUs until the date of issuance of a stock certificate to him for such RSUs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the RSUs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, RSUs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a RSU in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on RSUs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than Termination For Good Reason following a Change in Control, the RSUs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer on or after the nine-month anniversary of the grant date of the RSUs and prior to a Change in Control for any reason other than due to death, Disability or a termination for Cause, the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since January 1, 2018, in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. Such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled in accordance with Section 2 within 60 days following the Vesting Date immediately following such termination; provided that such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days following the Vesting Date immediately following such termination] in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the vesting period elapsed prior to such termination;

(v) involuntarily ceases to be an employee of the Employer (A) due to termination for Cause or (B) prior to the nine-month anniversary of the grant date of the RSUs and prior to a Change in Control for any reason other than due to death or Disability, the RSUs shall be cancelled and forfeited on the date of such termination of employment; and

(vi) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination.

(b) Definitions. “Cause” means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company’s Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for “immediate discharge” under the Employer’s Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

"Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

"Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

(c) Divestiture. Notwithstanding the above, the termination of Employee's employment with Employer in connection with the Employer's sale (whether by sale of assets or a subsidiary, or both) of a line of business within which the Employee was employed immediately prior to such sale as determined by the Committee in its sole discretion, that does not constitute a Change in Control, shall be treated as an involuntary termination of employment for purposes of this Agreement and the RSUs shall vest and be paid as provided in Section 9(a)(ii) above, whether or not such termination occurs after the nine-month anniversary of the grant date of the RSUs; provided, however, that, in the event the Employee is offered a comparable position (as determined by the Committee in accordance with the Company's severance policy) with the acquirer of such line of business and does not accept such offer, the RSUs shall be cancelled and forfeited on the date of termination of employment.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the RSUs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of RSUs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the RSUs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting or settlement of RSUs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of RSUs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the RSUs are subject to modification and adjustment under Section 6 of the Plan.

(a) the award of the RSUs is voluntary and occasional and does not create any contractual or other right to receive future grants of RSUs, or benefits in lieu of RSUs, even if RSUs have been granted repeatedly in the past;
(b) all decisions with respect to future RSU awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;
(c) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the RSU award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;
(d) The Employee is voluntarily participating in the Plan;
(e) the RSUs and the shares of Common Stock subject to the RSUs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;
(f) the RSUs and the shares of Common Stock subject to the RSUs are not intended to replace any pension rights or compensation;

EXHIBIT 10.6(a)(ix)

(g) the RSUs and the shares of Common Stock subject to the RSUs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(h) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(i) in consideration of the award of the RSUs, no claim or entitlement to compensation or damages shall arise from forfeiture of the RSUs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(j) subject to the provisions in the Plan regarding Change in Control, RSUs and the benefits under the Plan, if any, will not auto-matically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her partici-pation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agree-ment in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corpora-tion" of the Com-pany as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as deter-mined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

EXHIBIT 10.6(a)(ix)

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated busi-ness, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

EXHIBIT 10.6(a)(ix)

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates. In the event that any 60-day period described in Section 9 of this Agreement straddles two calendar years, then any RSUs, and any dividends with respect thereto, that are settled within such 60-day period in accordance with this Agreement shall be settled in the second calendar year.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

EXHIBIT 10.6(a)(ix)

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the RSU award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the RSUs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is nec-essary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CONDUENT INCORPORATED

EXHIBIT 10.6(a)(x)

PERFORMANCE STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Performance Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration, the Company agrees as follows:

AWARDS

1. Award of Performance Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary Performance Stock Units (individually, a "PS") as shown on the Award Summary, representing the target number of shares of Common Stock covered by this Agreement (the "Target PSs"). Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE PERFORMANCE STOCK UNITS

2. Entitlement to Shares. As soon as practicable on or after the Vesting Date (as defined below) (or such earlier date provided in Section 9) in connection with the PSs, the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested PSs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following the Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued pursuant to this Agreement. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of the PSs covered hereby shall be subject to (i) the achievement of the performance goals as set forth in the Award Summary (the "Performance Goals") as determined by the Committee and (ii) the Employee's continued employment with the Company or a subsidiary or affiliate through December 31, 2021 (the "Vesting Date"). In the event the achievement of the Performance Goals is "below threshold" level, then all of the PSs will be forfeited; in the event that achievement of the Performance Goals is between "threshold" and "target" level, then no less than 50% and no more than 100% of the Target PSs will vest; and in the event achievement of the Performance Goals is between "target" and "maximum" level, then no less than 100% and no more than 200% of the Target PSs will vest, in each case as set forth in the Award Summary and subject to the Employee's continued employment through the Vesting Date as described in clause (ii) of the immediately preceding sentence.

Upon the occurrence of an event constituting a Change in Control prior to the Vesting Date, notwithstanding anything to the contrary in Section 22(b) of the Plan, the Performance Goals shall be deemed achieved at target level, but thereafter the PSs, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such PSs, and any dividend equivalents with respect thereto, shall be subject to the Employee's continued employment with the Company or a subsidiary or an affiliate through the Vesting Date, at which time such PSs shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger tax or penalty under Section 409A of the Code, as determined by the Committee; provided that such PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to the Vesting Date or in the event such Change in Control occurs following a termination of the Employee's employment. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on the Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested PSs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on the Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5 . Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6 . Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of PSs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/ Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the PSs until the date of issuance of a stock certificate to him for such PSs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the PSs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, PSs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a PS in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on PSs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than Termination For Good Reason following a Change in Control, the PSs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer on or after the nine-month anniversary of the grant date of PSs and prior to a Change in Control for any reason other than due to death, Disability or a termination for Cause, the number of PSs covered by this Agreement, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. The vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the three-year performance period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the vesting of the PSs shall remain subject to the achievement of the Performance Goals in accordance with Section 3, if such termination of employment occurs prior to a Change in Control and shall be settled on the Vesting Date in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the three-year performance period elapsed prior to such termination;

(v) involuntarily ceases to be an employee of the Employer (A) due to termination for Cause or (B) prior to the nine-month anniversary of the grant date of the PSs and prior to a Change in Control for any reason other than due to death or Disability, the PSs shall be cancelled and forfeited on the date of such termination of employment; and

(vi) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, without proration based on the portion of the three-year performance period elapsed prior to such termination. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination.

(b) Definitions. “Cause” means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company’s Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for “immediate discharge” under the Employer’s Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

"Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

"Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

(c) Divestiture. Notwithstanding the above, the termination of Employee's employment with Employer in connection with the Employer's sale (whether by sale of assets or a subsidiary, or both) of a line of business within which the Employee was employed immediately prior to such sale as determined by the Committee in its sole discretion, that does not constitute a Change in Control, shall be treated as an involuntary termination of employment for purposes of this Agreement and the PSs shall vest and be paid as provided in Section 9(a)(ii) above, whether or not such termination occurs after the nine-month anniversary of the grant date of the PSs; provided, however, that, in the event the Employee is offered a comparable position (as determined by the Committee in accordance with the Company's severance policy) with the acquirer of such line of business and does not accept such offer, the PSs shall be cancelled and forfeited on the date of termination of employment.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the PSs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of PSs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the PSs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting or settlement of the PSs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of PSs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the PSs are subject to modification and adjustment under Section 6 of the Plan.

(a) the award of the PSs is voluntary and occasional and does not create any contractual or other right to receive future grants of PSs, or benefits in lieu of PSs, even if PSs have been granted repeatedly in the past;
(b) all decisions with respect to future PS awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;
(c) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the PS award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;
(d) The Employee is voluntarily participating in the Plan;
(e) the PSs and the shares of Common Stock subject to the PSs are an extraordinary item that does not constitute compensa-tion of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;
(f) the PSs and the shares of Common Stock subject to the PSs are not intended to replace any pension rights or compensation;

EXHIBIT 10.6(a)(x)

(g) the PSs and the shares of Common Stock subject to the PSs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(h) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(i) in consideration of the award of the PSs, no claim or entitlement to compensation or damages shall arise from forfeiture of the PSs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(j) subject to the provisions in the Plan regarding Change in Control, PSs and the benefits under the Plan, if any, will not auto-matically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her partici-pation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agree-ment in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corpora-tion" of the Com-pany as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as deter-mined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated busi-ness, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

EXHIBIT 10.6(a)(x)

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates. In the event that any 60-day period described in Section 9 of this Agreement straddles two calendar years, then any PSs, and any dividends with respect thereto, that are settled within such 60-day period in accordance with this Agreement shall be settled in the second calendar year

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the PS award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the PSs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is nec-essary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CEO CERTIFICATIONS

I, Ashok Vemuri, certify that:

1. I have reviewed this Annual Report on Form 10-K of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CFO CERTIFICATIONS

I, Brian Webb-Walsh, certify that:

1. I have reviewed this Annual Report on Form 10-K of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

From time to time, we and our representatives may provide information, whether orally or in writing, including certain statements in this Annual Report on Form 10-K, which are deemed to be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expressed or implied herein as anticipated, believed, estimated, expected or intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make.

Such factors include, but are not limited to: termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information, and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our security systems and service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. We do not intend to update these forward-looking statements, except as required by law.

TABLE OF CONTENTS

Table of Contents

PART I

ITEM 1. BUSINESS

In this Annual Report on Form 10-K, unless the content otherwise dictates, "Conduent", the "Company", "we" or "our" mean Conduent Inc. and its consolidated subsidiaries.

Our Business

Conduent is a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experiences.

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement between the Company and Xerox Corporation (Separation). As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

We create value for our Commercial and Public Sector clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics.

Our portfolio includes industry-focused service offerings in attractive growth markets such as Healthcare and Transportation, as well as multi-industry service offerings such as Transaction Processing, Human Resources Solutions and Payment Services.

Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation, complemented by tightly aligned investments. As a result, we aim to deliver profitable growth and margin expansion and to deploy a disciplined capital allocation strategy.

With approximately 90,000 employees globally as of December 31, 2017, we provide differentiated services to clients spanning small, medium and large businesses and to governments around the world.

Our Transformation

We have a portfolio of businesses that we are optimizing and effectively targeting attractive growth areas in a rapidly evolving business process services industry. We have taken significant actions to improve our profitability and drive growth with a more focused portfolio of services.

Key initiatives include:

- ***Realigned Delivery.*** During 2017 we reorganized the business to better align to our vertical go-to-market strategy and to our global delivery capabilities. We believe this operating structure will allow us to better integrate and tailor business solutions for our customers.
- ***Divested Non-Core Assets.*** We divested five businesses in 2017 for aggregate proceeds of $56 million in cash. These sales enabled us to increase our focus on areas where we have a competitive advantage.
- ***Increased Use of Automation.*** We have developed and deployed a set of advanced software-based automation tools as part of our service delivery operations. These tools reduce the amount of repetitive, manual labor required to deliver many of our services and improve service quality through lower error rates and faster processing times.
- ***Real Estate, Infrastructure and Selling, General and Administrative (SG&A).*** We have significantly reduced the number of leased and owned properties from 462 to 339, reduced our information technology infrastructure costs by streamlining our operations and reduced our SG&A costs from $686 million in 2016 to $615 million in 2017.

Table of Contents

We continue to execute on our strategic transformation program to deliver cost savings through infrastructure optimization, labor productivity and automation initiatives, restructuring of unprofitable contracts and other efficiencies. This transformation program has and will enable us to better capitalize on our differentiated service offerings, industry expertise and global delivery excellence and position us for long-term shareholder value creation.

Our Market Opportunity

We estimate our addressable market size in the global business process service industry at approximately $243 billion in 2017, according to third party industry reports, and we are a leader across several segments of this large, diverse and growing market. Providing business process services is complex and multi-faceted with services that span many industries.

Ongoing competitive pressures and increasing demand for further productivity gains have motivated businesses to outsource elements of their day-to-day operations to accelerate performance and innovation. As a result, our clients have become more focused on their core businesses and the range of outsourced activities has expanded greatly. Increasing globalization has also required many companies to optimize cost structures to retain competitiveness and business process services have become a key component of this strategy.

The ongoing shift to next-generation software and automation technologies is driving greater demand for, and expectation of, efficiency and personalization by the constituents and customers of the businesses and governments we serve. Addressing these business and operational challenges is necessary for business process
services companies to capitalize on these trends. In addition, business process services have the potential to meaningfully enhance productivity for businesses and governments and satisfaction for their constituents and customers.

Segments

Our reportable segments correspond to how management organizes and manages the business and are aligned to the industries in which our clients operate, which are Commercial Industries and Public Sector.

- Our *Commercial Industries* segment provides business process services and customized solutions to clients in a variety of industries.
- Our *Public Sector* segment provides government-centric business process services and subject matter experts to U.S. federal, state and local and foreign governments.

Other represents our Government Health Enterprise (HE) Medicaid Platform for all current state clients and our Education business, including our Student Loan business, as well as inter-segment eliminations.

We present segment financial information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference. The discussion below highlights our segment revenues for the year ended December 31, 2017.

Commercial Industries

Our Commercial Industries segment is our largest segment, with $3.5 billion in revenues in 2017, representing 59% of total revenues. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include Customer Care, Human Resource Management, Worker's Compensation process management, Finance and Accounting, Workforce Learning Services and Legal Business Services. These services are complemented by innovative industry-specific services such as payment integrity solutions to clients in the Healthcare payer space, care and quality analytics, workflow solutions and software adoption services to Healthcare provider clients, personalized product information for clients in the Automotive industry, digitized source-to-pay solutions for clients in the Manufacturing industry, revenue generation and clinical services for clients in the Pharmaceutical and Life Sciences industries, customer experience and marketing services for clients in the Retail industry, and mortgage and consumer loan processing for clients in the Financial Services industry.

Table of Contents

Public Sector

Our Public Sector segment generated revenues of $2.2 billion in 2017, representing 36% of the total revenues. This segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance program administration, transaction processing and payment services. In order to provide targeted support to our government clients, our Public Sector segment is organized into several primary businesses:

- ***Transportation:*** We provide revenue-generating transportation services to government clients in 27 countries. Our services include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting. These innovative services significantly improve individual travel experiences, optimize how vehicles and goods move efficiently within cities, digitize integrated modes of transportation and help our government clients to better serve their constituents.

- ***Federal, State and Local Government:*** We support our government clients with services targeting key civilian agencies within federal, state and local governments, as well as government administrative offices. Our depth of agency-specific expertise combined with our scale allows us to deliver and manage programs at all levels of government. Our broad set of public sector services includes public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies.

- ***Payments:*** With more than $87 billion disbursed annually, we are a leader in government payment disbursements for federally sponsored programs like Supplemental Nutritional Assistance Program (SNAP, a.k.a Food Stamps) and Women, Infant and Children (WIC) as well as government initiated cash disbursements such as child support, unemployment and federal social security. We provide our payment card services which include branded prepaid debit card (Visa and Mastercard), Electronic Benefit Transfer (EBT for SNAP and WIC) and Electronic Child Care to 36 states and the US Treasury with a diversified portfolio consisting of 147 different payment programs nationwide.

- ***Government Healthcare:*** We provide medical management and fiscal agent care management services to Medicaid programs and federally-funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia. Our services include a range of innovative solutions such as Medicaid management fiscal agent, pharmacy benefits management and clinical program management. These services help states optimize their costs by streamlining access to care and improve patient health outcomes through population health management and help families in need by improving beneficiary support.

Other

Other includes our Government HE Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients, our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations. In 2017, Other accounted for $311 million of revenues, representing 5% of total revenues.

Our Service Offerings

Our portfolio of business process services includes a combination of industry-specific and multi-industry services. We have subject matter experts who are responsible for implementing each of these services, delivering service excellence to clients, ensuring best practices to improve cost competitiveness, innovating our next generation offerings and supporting worldwide sales.

Table of Contents

Industry-Specific Services

Commercial Industry-Specific Services
Examples of the services we offer include personalized product information for automotive clients, digitized source to pay solutions for manufacturing clients, care integration and coordination, member health risk assessments and payment integrity (such as recovering claims from the appropriate payers) for healthcare clients, mortgage and consumer loan processing for financial institution clients and customized workforce learning solutions for aerospace clients.

Public Sector-Specific Services

Transportation Services: The transportation services we offer include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting.

Other Public Sector Services: Our broad set of public sector services includes public assistance program administration, pension administration, records management, disease management and software offerings in support of federal, state and local government agencies. It also includes fiscal agent administrative services and providing management information systems in support of Medicaid programs or pharmacy benefits management for Government Healthcare clients.

Multi-Industry Services

Transaction Processing Services
We help our clients to improve communications with their customers and constituents, whether it is on paper, on-line or through other communication channels. By supporting our clients' customer communication processes, we help our clients deliver a better experience to their customers and operate with improved efficiency and greater effectiveness.

We offer a broad array of flexible transaction processing services that include data entry, scanning, image processing, enrollment processing, claims processing, high volume offsite print and mail services and file indexing. Our multi-channel communication capabilities (including secure print, email, text and web) enable the delivery of personalized and targeted communications that are designed to elicit the desired response from customers or other end-users (*e.g.*, on-time bill payment and increased marketing response rates). Our service offerings utilize both proprietary and commercially available third-party technologies, combined with our expertise to ensure continued quality and innovation for our clients.

Payment Services
Prepaid Cards: We are an extensive provider of VISA and MasterCard prepaid debit cards, as well as other electronic payment cards in support of U.S. government benefit programs including Social Security, the Supplemental Nutrition Assistance Program (formerly known as food stamps), the Special Supplemental Nutrition Program for Women, Infants and Children and other specialized Electronic Benefits Transfer programs. Our secure payment services reduce fraud and eliminate paper checks by disbursing electronic payments directly to end users, even those without bank accounts. Our proprietary processing platform, significant operational expertise, advanced fraud analytics and adoption of Europay, MasterCard and Visa chip-enabled technology put us in the forefront of the Prepaid Card industry.

Health Savings Accounts (HSA): We provide clients with a simplified approach to help their employees manage their health care costs and accumulate wealth with tax-advantaged accounts. We consolidate administration of all health spending accounts onto one common platform, including Health Savings Accounts, Health Reimbursement Arrangements, Flexible Spending Accounts and Health Incentive Accounts. By consolidating and integrating the management of health spending accounts, we help our clients improve benefit enrollment and account opening, consolidate customer service, simplify communications and streamline account funding and management. As of December 31, 2017, we had approximately 1 million active HSA accounts and $2.3 billion of assets under management within our HSA offering.

Table of Contents

Child Support Payments: We are an industry leader of U.S. State Government Disbursement Units for child support payments. We collect payments from non-custodial parents via check, credit card and transfers from employee payroll systems and disburse payments to the beneficiaries.

Customer Care Services
We offer customer care services that help our clients provide their own customers with a superior experience. Our service offerings range from answering simple billing questions to providing complex technical and customer support. We also offer both inbound and outbound sales and cross-selling programs through our contact center operations. We provide these services through multiple channels, including phone, SMS, chat, interactive voice response, social networks and email. We augment our customer care agents' efficiency and effectiveness with advanced technologies that help them resolve customer needs quickly and with consistent high quality.

Human Resources Services
We help our clients to support their employees at all stages of employment from initial on-boarding through retirement. We offer clients customized advisory, technology and administrative services that help them more
effectively involve employees in their health insurance, retirement plan and compensation programs. We design
and administer employee benefit programs that attract, reward and retain workforce talent through engaging technologies and decision support tools. Our service offerings include; cloud-based HR outsourcing; payroll and benefits administration; health savings and tax efficient account administration; and administration of, and consultation regarding, our proprietary private health care exchange, which allows employees to select from a set of predefined providers and also provides market-leading health and benefit decision support tools and ongoing health and wellness management.

Finance and Accounting Services
We serve clients by managing their critical finance, accounting and procurement processes. Our services include general accounting and reporting, billing and accounts receivable and purchasing, accounts payable and expense management services. We also offer wholesale and retail lockbox services and process auto and mortgage loans in the United States. With a global, dedicated team, we manage the core, end-to-end process areas of finance, accounting and procurement for some of the world's most recognized brands.

Legal Business Services
We have been providing client support to law firms and corporate legal departments for over 20 years. We work across the litigation lifecycle, with particular focus on the legal discovery and review process. Our offerings include litigation support services, compliance and risk review and managed services support.

Workforce Learning Services
We are a provider of end-to-end learning services, designed to accelerate the productivity and development of our clients' employees and extended work forces. Our global presence, superior innovation and expertise allow us to deliver performance-based learning services tailored to our clients' unique strategic business goals. Our offerings include learning strategy and assessment, instructor management and learning administration.

Applied Automation and Analytics Solutions
Many of our service offerings described above incorporate our applied automation and analytics solutions to increase their value and effectiveness to clients across all industries. We deploy these solutions to personalize millions of interactions, optimize service delivery and simplify complex processes. For example, our customer care services harness the power of applied analytics and automation to help our customer service agents work more efficiently across different communication channels. Our applied automation solutions track and learn the most efficient means to address common customer service needs as they occur in real time so that we can solve the same problem faster the next time around. The combination of applied automation and analytics allows us to identify new service demand patterns and opportunities quickly so that we can proactively address them on behalf of our clients.

Table of Contents

Our Competitive Strengths

We possess a number of competitive strengths that distinguish us from our competitors, including:

Leadership in attractive growth markets. We are a leader in business process services. Our clients continue to outsource key business processes to accelerate performance and innovation. Additionally, clients are moving beyond services for back-office functions in order to drive customer satisfaction and loyalty, as well as productivity and efficiency. The increase in globalization and cost competition continues to accelerate, forcing companies to seek ways to stay ahead of the competition. These factors, along with clients and their customers demanding more personalized, seamless and secure solutions, are collectively driving the ongoing shift to next-generation software and automation technologies.

- ***Healthcare.*** U.S. healthcare spending is estimated to have represented greater than 17.9% of GDP in 2016 and is continuing to grow. As one of the most regulated industries, healthcare providers must balance increased utilization with heightened complexity and new financial pressures such as government budget challenges to significantly reduce reimbursements, reimbursement penalties for hospital readmissions and a shift from fee-for-service to “value-based” population health management. We are widely recognized by industry analysts as a leader in healthcare payer operations, serving all 20 of the top 20 U.S. managed healthcare plans and providing administrative and care management solutions to Medicaid programs and federally funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia.

- ***Transportation.*** Traffic congestion continues to increase as urbanization and changing demographics take hold globally. As a result, optimized transportation systems are becoming critical to increase efficiency while maintaining strict safety requirements. Electronic toll collection, public transit and parking all represent key growth drivers as governments at all levels increasingly focus on transportation infrastructure. We maintain approximately 54% market share position in electronic toll collection in the United States based on toll revenues collected through our systems in 2017. We are also one of the largest U.S.-based commercial vehicle operations service providers in the United States with approximately 51% market share based on 2017 revenues, and we are an award-winning innovator in parking management.

- ***Transaction Processing.*** We provide high volume print and mail services, enrollment processing and personalized and targeted marketing and communications, to large corporations and we believe we are a leading provider in this market.

- ***Prepaid Cards***: We are the leading provider of prepaid payment card services in support of the U.S. government prepaid card services market.

Global delivery expertise. Our scale and global delivery network enables us to deliver our proprietary technology, differentiated service offerings and service capabilities expertly to clients around the world. We have operations in India, Philippines, Jamaica, Guatemala, Mexico, Romania, Dominican Republic and several locations within the United States, giving our customers the option for "onshore" or "offshore" outsourced business process services. This global delivery model enables us to leverage lower-cost production locations, consistent methodologies and processes, time zone advantages and business continuity plans. As of December 31, 2017, our employee location mix was approximately 48% in North America, 20% in Latin America / Caribbean, 22% in Asia Pacific and 10% in Europe / Middle East / Africa.

Differentiated suite of multi-industry service offerings at scale. We manage transaction-intensive processes and work directly with end-users to meet their needs often in real-time. We are unique in our ability to offer our clients these business process services on a large scale and with high quality. Additionally, we are able to leverage our multi-industry services to bring the same scale and quality to our portfolio of industry-specific service offerings, such as healthcare claims management, employee benefits management and public transit fare collection.

Table of Contents

Innovation and development. We innovate by developing and acquiring new technologies and capabilities that improve business processes. We are constantly creating the next generation of simple, automated and touchless business processes to drive lower costs, higher quality and increased end-user satisfaction. Analytics allow us to transform big data into useful information that helps identify operational improvements and constituent insights. Additionally, we leverage robotic process automation and predictive analytics and combine this with our deep subject matter expertise to create intelligent services that improve security, increase speed and improve accuracy, quality and regulatory compliance, and uncover insights that support better decision making and outcomes for our clients.

Stable recurring revenue model supported by a loyal, diverse client base. We have a broad and diverse base of clients in 31 countries across geographies and industries, including Fortune 1000 companies, small and midsize businesses and governmental entities. Our close client relationships and successful client execution support our stable recurring revenue model and high renewal rates. Excluding our strategic decision not to renew certain contracts, the renewal rate for the year ended December 31, 2017 was 94% and above our target range of 85%-90%. Including all contracts, renewal rate would have been approximately 87%.

Our Strategies

Our strategy is to drive leadership in attractive markets by leveraging and building on our competitive strengths. We intend to execute our strategy through increased business portfolio focus and operating discipline, enhanced sales and delivery capabilities and tightly aligned investments. Our strategy is designed to deliver value by delivering profitable growth, expanding operating margins and deploying a disciplined capital allocation strategy.

Specific elements of our strategy include the following:

Expand within attractive industries. The industries in which we operate have attractive revenue growth rates, generally in the mid-single digits. We intend to sharpen our focus and expand our business in industries with strong growth and profitability characteristics. We will employ a disciplined approach to portfolio management to complement our competitive strengths and build depth and breadth in our core businesses. Within the Healthcare industry, we intend to leverage our data analytics, differentiated service offerings and industry know-how to continue to service payer, provider and core government healthcare clients. Within the Transportation industry, we will leverage our global, end-to-end platforms to continue to deliver seamless travel experiences while providing back-end Transaction Processing and Call Center services for government clients globally.

Optimize and strengthen our services capabilities. We plan to optimize our services capabilities and strengthen several core areas, including Transaction Processing, Finance and Accounting and Prepaid Card services by building out our services offerings and continuing to improve our competitive strengths. We have begun to divest non-core assets, refocused our business towards higher margin growing segments and consolidated delivery operations to enable greater productivity. Within Transaction Processing, we intend to continue to build industry-specific service offerings and advance inbound and outbound processing capabilities. Within Customer Experience, we intend to capitalize on our global scale, cost efficiencies and our ability to provide seamless communications between our clients and their end-users through traditional (e.g., voice) and digital (e.g., web, mobile and Internet of Things) channels. In Prepaid Cards, we plan to continue to leverage our scalable platform to help our clients simplify their payment disbursement processes.

Continue to advance next-generation platforms and capabilities. We intend to maintain our focus on innovation to create next-generation solutions aligned with our clients' future needs and our growth strategies. We plan to advance our current platforms, further automate and personalize business processes and enhance data analytics capabilities to deliver value-added services for our clients.

Engage, develop and support our people. We intend to increasingly develop our employees by investing in training, processes and systems to equip them with modern tools that enable them to perform their jobs more
efficiently. Furthermore, we plan to strengthen our sales teams throughout improved and optimized coverage and effective talent management.

Table of Contents

Competition

Although we encounter competition in all areas of our portfolio, we lead across many areas of our principal businesses. We compete on the basis of technology, performance, price, quality, reliability and customer service and support. In the current political environment in the U.S. and other territories, we also consider our "onshore" delivery capacity to be a competitive advantage. We participate in a highly competitive and rapidly evolving market, driven by changes in industry standards and demands of customers to become more efficient. Our competitors range from large international companies to relatively small firms. Our competitors include:

- Large multinational service providers such as CGI Group, Accenture, Aon Hewitt, Cognizant, Hewlett-Packard Enterprise, IBM, Teletech and Teleperformance;
- Traditional Business Process Outsourcing companies such as Genpact, ELX Services, Exela Technologies and WNS Global Services;
- Payroll processing and human capital management providers such as ADP and Paychex;
- Healthcare-focused IT and service solutions providers such as Cerner and Maximus;
- U.S. Federal focused government services such as CACI International and DXC Technology;
- Transportation multi-nationals such as Roper/Transcore, Cubic and Kaptsh; and
- Smaller niche business processing service providers and in-house departments that perform functions that could be outsourced to us.

Sales and Marketing

We market our business process services to both potential and existing clients through our worldwide sales force and our business development team. Additionally, we have dedicated “solution architects” who work with clients to better understand their situation and develop a custom-tailored solution to meet their unique needs.

Our sales and marketing strategy is to go to market by industry to deliver key industry-specific and multi-industry service offerings to our clients. We focus on developing new prospects through market research and analysis, renewing expiring contracts and leveraging existing client relationships to offer additional services. We leverage our broad, multi-industry service offerings to package solutions through enterprise selling, while maintaining a disciplined approach to pricing and contracting. Our sales efforts typically involve extended selling cycles and our expertise in specific industries is critical to winning new business.

Our Geographies

We provide services globally and we have a diversified geographic delivery network, including a significant presence within the U.S. In 2017, approximately 12% of our revenues were generated by clients outside the United States. In 2017, our revenues by geography were as follows: $5,303 million in the United States (88% of total revenues), $538 million in Europe (9% of total revenues) and $181 million from the rest of the world (3% of total revenues). We present geographical information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference.

Innovation and Research and Development

Our innovation and research and development (R&D) capabilities are critical to our client value proposition and competitive positioning. Our investments in innovation align with our growth strategies and are driven by a view of future needs and required competencies developed in close partnership with our clients and R&D partners. We are investing in attractive markets, such as healthcare and transportation, and building on proven platforms to create services that distinguish us from our competitors.

Our innovation and R&D are focused on three key areas: automation, personalization and analytics.

Table of Contents

Automation—Create simple, automated and touchless business processes to drive lower cost, higher quality and increased agility. Businesses require agility to quickly respond to market changes and new customer requirements. To enable greater business process agility, our R&D goals are to simplify, automate and enable business processes via flexible platforms that run on robust and scalable infrastructures. Automation of business processes benefits from our strong image, video and robotic processing, as well as our machine learning capabilities. Application of these methods to business processes enables technology to perform tasks that today are performed manually. Examples include providing automation solutions in transportation by aggregating and automatically applying business rules to simplify toll payments, using our state-of-the-art video and image analytics to reduce the need for manual review of license plates in tolling and toll adjustment scenarios, analyzing data on eligibility claims and checking for correctness on applications. The scope of automation is applied across our portfolio of services and is a key element of our ongoing strategy of modern, efficient services.

Personalization—Augment humans by providing secure, real-time and context-aware personalized products and services. Whether business correspondence, personal communication, manufactured items or information service, personalization increases the value to the recipient. Our R&D investments lead to technologies that improve the efficiency, economics and relevance of business services, such as customer care and health and welfare services. In our current customer care service offerings, the human touch is seamlessly added as our software automatically takes telephony data and merges it with customer records pulled from multiple sources to seamlessly create targeted scripts and flows. This allows the agent to have the caller's data at their fingertips and provide a more personal experience to the customer—whether on the phone or online. In toll systems, our systems automatically pull up a customer's name, verify their information and prompt them for unpaid tolls. In transit systems, our mobile app aggregates and calculates the time, cost, carbon footprint and health benefits from walking, biking, driving, parking and taking public transit. For health and welfare, our systems provide state of the art personalized delivery to ensure the best utilization of funds for the neediest populations.

Analytics—Transform big data into useful information to support better decision making. Competitive advantage can be achieved by better utilizing available and real-time information. Today, information resides in an ever increasing universe of servers, repositories and formats. The vast majority of information is unstructured, including text, images, voice and videos. We seek to better manage large data systems in order to extract business insights to provide our clients with actionable recommendations and new services. Tailoring these methods to various industry applications leads to new customer value propositions. In hospitals, we mine usage and clinical indicators to improve patient experiences. We also help our healthcare clients identify waste and fraud by identifying networks of providers and patients with suspicious behavior, such as sudden and dramatic increases in a provider's level of business or unusual or illogical patient treatment sequences. In transportation, we enable transport and parking operators to better understand and predict commuter needs, including adherence to schedules, passenger loading levels, car park utilization rates and the impact of varying factors such as weather and schedule variations. In our card payment services business, we perform geo location analytics to predict potential fraud behaviors to assure monies are being distributed to the intended recipients.

Intellectual Property

Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. We own approximately 1,024 patents and pending applications. Our patent portfolio evolves as new patents are awarded to us and as older patents expire. These patents expire at various dates, generally 20 years from their original filing dates. While we believe that our portfolio of patents and applications has value, in general no single patent is essential to our business or any individual segment. In addition, any of our proprietary rights could be challenged, invalidated or circumvented, or may not provide significant competitive advantages.

Our business relies on software provided to an approximately equal extent, by both internal development and external sourcing to deliver our services in our businesses. With respect to internally developed software, we claim copyright on all such software, registering works which may be accessible to third parties. In addition, we rely on maintaining source code confidentiality to assure our market competitiveness. With respect to externally sourced software, we rely on contracts assuring our continued access for our business usage.

In the United States, we own 132 trademarks, which are either registered or applied for, reflecting the many businesses we participate in. These trademarks may have a perpetual life, subject to renewal every 10 years and may be subject to cancellation or invalidation based on certain use requirements and third-party challenges, or on other grounds. We vigorously enforce and protect our trademarks.

Table of Contents

People and Culture

We draw on the business and technical expertise of our talented and diverse global workforce to provide our clients with high-quality services. Our business leaders bring a strong diversity of experience in our industry and a track record of successful performance and execution.

Conduent established its own diversity and inclusion program post-separation, which is overseen by Conduent's human resources department. Conduent promotes understanding and inclusion through a comprehensive set of diversity initiatives and strategies, including addressing under-representation by identifying shortfalls and developing action plans to close those gaps and through work-life programs that assist employees in certain aspects of their personal lives. Additionally, Conduent informs and educates all employees on diversity programs, policies and achievements. As an independent company, we intend to continue our commitment to diversity and inclusion and implement similar policies and programs.

In the United States, Conduent complies with Equal Employment Opportunity guidelines and all applicable federal, state and local laws that govern the hiring and treatment of its employees.

As of December 31, 2017, we had approximately 90,000 employees globally, with 48% located in the United States and the remainder located primarily in India, Philippines, Jamaica, Guatemala and Mexico.

Training and Talent Development
We believe our people are our most important asset, which is why we invest in employee growth and development programs. We are focused on building a workplace where our people can do their best work and have access to the tools and resources they need to perform their jobs more effectively. We are building a culture of learning and have shifted from delivering training to incorporating learning into day-to-day work.

We have a strong performance management system in place that requires all employees to engage with their managers on goal-setting and performance feedback, enabling personal and professional development. There is a strong emphasis on mentorship and coaching, both formal and informal, to help employees get to the next level in their careers. We enable this by developing management capability for our front line leaders to ensure they are able to coach and mentor their teams and engage in constructive and continuous two-way dialogue.

Corporate Ethics
Our commitment to business ethics represents more than a declaration to do the right thing. It has become an integral part of the way we do business. We operate according to our ethics and compliance program, which is designed to meet general governance and specific industry and regulatory requirements with a focus on values, culture and performance with integrity. Conduent has a business ethics program, which is overseen by the business ethics office, and a code of business conduct (Code), which serves as the foundation of our business ethics program. The Code makes clear Conduent’s expectations for ethical leadership, performance with integrity and compliance with company policies and the law. In addition, the Code embodies and reinforces Conduent’s commitment to integrity and helps employees resolve ethics and compliance concerns consistent with operating principles and legal and policy controls. In addition, as Conduent employees, our employees are required to complete business ethics training annually and we periodically solicit their input to gauge the state of Conduent’s ethical culture and help identify areas for improvement.

Our directors must act in accordance with our Code of Business Conduct and Ethics for Members of the Board; our principal executive officer, principal financial officer and principal accounting officer, among others, must act in accordance with our Finance Code of Conduct; and all of our executives and employees must act in accordance with our Code of Business Conduct. Each of these codes of conduct can be accessed through our website at www.conduent.com/corporate-governance. They are also available to any shareholder who requests them in writing addressed to Conduent Incorporated, 100 Campus Drive Suite 200, Florham Park, NJ 07932, Attention: Corporate Secretary. We will disclose any future amendments to, or waivers from, provisions of our Code of Business Conduct and Ethics for members of the Board and, our Code of Business Conduct and our Finance Code of Conduct for our officers on our website as promptly as practicable, and consistent with the requirements of applicable SEC and NYSE rules.

Table of Contents

Seasonality

Our revenues can be affected by various factors such as our clients' demand pattern for our services. These factors have historically resulted in higher revenues and profits in the fourth quarter.

Other

Conduent Incorporated is a New York corporation, organized in 2016. Our principal executive offices are located at 100 Campus Drive, Florham Park, New Jersey 07932. Our telephone number is (844) 663-2638.

In the Investor Information section of our Internet website, you will find our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. We make these documents available as soon as we can after we have filed them with, or furnished them to the U.S. Securities and Exchange Commission (SEC).

Our Internet address is www.conduent.com.

ITEM 1A. RISK FACTORS

Our government contracts are subject to termination rights, audits and investigations, which, if exercised, could negatively impact our reputation and reduce our ability to compete for new contracts.

A significant portion of our revenues is derived from contracts with U.S. federal, state and local governments and their agencies, and some of our revenues are derived from contracts with foreign governments and their agencies. Government entities typically finance projects through appropriated funds. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt or funding constraints, such as those recently experienced in the United States and Europe, could result in lower governmental sales and in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Additionally, if the government discovers improper or illegal activities or contractual non-compliance (including improper billing), we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with the government. Any resulting penalties or sanctions could materially adversely affect our results of operations and financial condition. Moreover, government contracts are generally subject to audits and investigations by government agencies. If the government finds that we inappropriately charged any costs to a contract, the costs are not reimbursable or, if already reimbursed, the cost must be refunded to the government. Further, the negative publicity that could arise from any such penalties, sanctions or findings in such audits or investigations could have an adverse effect on our reputation in the industry and reduce our ability to compete for new contracts and could materially adversely affect our results of operations and financial condition.

We derive significant revenue and profit from commercial and government contracts awarded through competitive bidding processes, including renewals, which can impose substantial costs on us, and we will not achieve revenue and profit objectives if we fail to accurately and effectively bid on such projects.

Many of these contracts are extremely complex and require the investment of significant resources in order to prepare accurate bids and proposals. Competitive bidding imposes substantial costs and presents a number of risks, including: (i) the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may or may not be awarded to us; (ii) the need to estimate accurately the resources and costs that will be required to implement and service any contracts we are awarded, sometimes in advance of the final determination of their full scope and design; (iii) the expense and delay that may arise if our competitors protest or challenge awards made to us pursuant to competitive bidding and the risk that such protests or challenges could result in the requirement to resubmit bids and in the termination, reduction or modification of the awarded contracts; and (iv) the opportunity cost of not bidding on and winning other contracts we might otherwise pursue. If our competitors protest or challenge an award made to us on a government contract, the costs to defend such an award may be significant and could involve subsequent litigation that could take years to resolve.

Table of Contents

Our ability to recover capital and other investments in connection with our contracts is subject to risk.

In order to attract and retain large outsourcing contracts, we sometimes make significant capital and other investments to enable us to perform our services under those contracts, such as purchases of information technology equipment, facility costs, labor resources and costs incurred to develop and implement software. The net book value of certain assets recorded, including a portion of our intangible assets, could be impaired, and our results of operations and financial condition could be materially adversely affected in the event of the early termination of all or a part of such a contract or a reduction in volumes and services thereunder for reasons such as a customer's or client's merger or acquisition, divestiture of assets or businesses, business failure or deterioration or a customer's or client's exercise of contract termination rights.

We rely to a significant extent on third-party providers, such as subcontractors, a relatively small number of primary software vendors, utility providers and network providers; if they cannot deliver or perform as expected or if our relationships with them are terminated or otherwise change, our results of operations and financial condition could be materially adversely affected.

Our ability to service our customers and clients and deliver and implement solutions depends to a large extent on third-party providers such as subcontractors, a relatively small number of primary software vendors, software application developers, utility providers and network providers meeting their obligations to us and our expectations in a timely, quality manner. Our results of operations and financial condition could be materially adversely affected and we might incur significant additional liabilities if any of our third-party providers do not meet these obligations or our or our clients' expectations or if they terminate or refuse to renew their relationships with us or were to offer their products to us with less advantageous prices and other terms than we previously had.

Failure to deliver on our contractual obligations properly and on time could materially adversely affect our results of operations and financial condition.

Our business model depends in large part on our ability to retain existing and attract new work from our base of existing clients, as well as on relationships we develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to meet those needs. In order for our business to grow, we must successfully manage the provision of services under our contracts. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client or obtain new work from other potential clients. In particular, many of our contracts with non-government clients may be terminated by the client, without cause, upon specified advance notice, so clients who are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date, which may result in our inability to fully recover our up-front investments. In addition, clients could direct future business to our competitors. We could also trigger contractual credits to clients or a contractual default. Failure to properly transition new clients to our systems, properly budget transition costs or accurately estimate contract operational costs could result in delays in our contract performance, trigger service level penalties, impair fixed or intangible assets or result in contract profit margins that do not meet our expectations or our historical profit margins.

In addition, we incur significant expenditures for the development and construction of system software platforms needed to support our clients' needs. Our failure to fully understand client requirements or implement the appropriate operating systems or databases or solutions which enable the use of other supporting software may delay the project and result in cost overruns or potential impairment of the related software platforms, which could materially adversely affect our results of operations and financial condition.

We face significant competition and our failure to compete successfully could materially adversely affect our results of operations and financial condition.

To remain competitive, we must develop services and applications; periodically enhance our existing offerings; remain cost efficient; and attract and retain key personnel and management. If we are unable to compete successfully, we could lose market share and important customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Table of Contents

Our significant indebtedness could materially adversely affect our results of operations and financial condition.

We have and will continue to have a significant amount of debt and other obligations. Our substantial debt and other obligations could have important consequences. For example, it could (i) increase our vulnerability to general adverse economic and industry conditions; (ii) limit our ability to obtain additional financing for future working capital, capital expenditures, acquisitions and other general corporate requirements; (iii) require us to dedicate a substantial portion of our cash flows from operations to service debt and other obligations thereby reducing the availability of our cash flows from operations for other purposes; (iv) limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate; (v) place us at a competitive disadvantage compared to our competitors that have less debt; and (vi) become due and payable upon a change in control. If new debt is added to our current debt levels, these related risks could increase.

Our ability to make payments on and to refinance our indebtedness, including the debt incurred in connection with our spin-off, as well as any future debt that we may incur, will depend on our ability to generate cash in the future from operations, financings or asset sales. Our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

The terms of our indebtedness may restrict our current and future operations, particularly our ability to incur debt that we may need to fund initiatives in response to changes in our business, the industries in which we operate, the economy and governmental regulations.

The terms of our indebtedness include a number of restrictive covenants that impose significant operating and financial restrictions on us and our subsidiaries and limit our ability to engage in actions that may be in our long-term best interests. These may restrict our and our subsidiaries' ability to take some or all of the following actions:

- incur or guarantee additional indebtedness or sell disqualified or preferred stock;
- pay dividends on, make distributions in respect of, repurchase or redeem, capital stock;
- make investments or acquisitions;
- sell, transfer or otherwise dispose of certain assets, including accounts receivable;
- create liens;
- enter into sale/leaseback transactions;
- enter into agreements restricting the ability to pay dividends or make other intercompany transfers;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our or our subsidiaries' assets;
- enter into transactions with affiliates;
- prepay, repurchase or redeem certain kinds of indebtedness;
- issue or sell stock of our subsidiaries; and/or
- significantly change the nature of our business.

As a result of all of these restrictions, we may be:

- limited in how we conduct our business and pursue our strategy; unable to raise additional debt financing to operate during general economic or business downturns; or
- unable to compete effectively or to take advantage of new business opportunities.

A breach of any of these covenants, if applicable, could result in an event of default under the terms of this indebtedness. If an event of default occurs, the lenders would have the right to accelerate the repayment of such debt and the event of default or acceleration may result in the acceleration of the repayment of any other of our debt to which a cross-default or cross-acceleration provision applies. Furthermore, the lenders of this indebtedness may require that we pledge our assets as collateral as security for our repayment obligations. If we were unable to repay any amount of this indebtedness when due and payable, the lenders could proceed against the collateral that secures this indebtedness. In the event our creditors accelerate the repayment of our borrowings, we may not have sufficient assets to repay such indebtedness, which could materially adversely affect our results of operations and financial condition.

Table of Contents

Our business is dependent on continued interest in outsourcing.

Our business and growth depend in large part on continued interest in outsourced business process services. Outsourcing means that an entity contracts with a third party, such as us, to provide business process services rather than perform such services in-house. There can be no assurance that this interest will continue, as organizations may elect to perform such services themselves and/or the business process outsourcing industry could move to an as-a-Service model, thereby eliminating traditional business process outsourcing tasks. A significant change in this interest in outsourcing could materially adversely affect our results of operations and financial condition. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

Our profitability is dependent upon our ability to obtain adequate pricing for our services and to improve our cost structure.

Our success depends on our ability to obtain adequate pricing for our services that will provide a reasonable return to our shareholders. Depending on competitive market factors, future prices we obtain for our services may decline from previous levels. If we are unable to obtain adequate pricing for our services, it could materially adversely affect our results of operations and financial condition. In addition, our contracts are increasingly requiring tighter timelines for implementation as well as more stringent service level metrics. This makes the bidding process for new contracts much more difficult and requires us to adequately consider these requirements in the pricing of our services.

In order to meet the service requirements of our customers, which often includes 24/7 service, and to optimize our employee cost base, including our back-office support, we often locate our delivery service and back-office support centers in lower-cost locations, including several developing countries. Concentrating our centers in these locations presents a number of operational risks, many of which are beyond our control, including the risks of political instability, natural disasters, safety and security risks, labor disruptions, excessive employee turnover and rising labor rates. Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of such centers outside of the United States could materially adversely affect our results of operations and financial condition. These risks could impair our ability to effectively provide services to our customers and keep our costs aligned to our associated revenues and market requirements.

Our ability to sustain and improve profit margins is dependent on a number of factors, including our ability to continue to improve the cost efficiency of our operations through such programs as robotic process automation, to absorb the level of pricing pressures on our services through cost improvements and to successfully complete information technology initiatives. If any of these factors adversely materialize or if we are unable to achieve and maintain productivity improvements through restructuring actions or information technology initiatives, our ability to offset labor cost inflation and competitive price pressures would be impaired, each of which could materially adversely affect our results of operations and financial condition.

We may be subject to claims of infringement of third-party intellectual property rights which could adversely affect our results of operation and financial condition.

We rely heavily on the use of intellectual property. We do not own a significant portion of the software that we use to run our business; instead we license this software from a small number of primary vendors. If these vendors assert claims that we or our clients are infringing on their software or related intellectual property, we could incur substantial costs to defend these claims, which could materially adversely affect our results of operations and financial condition. In addition, if any of our vendors' infringement claims are ultimately successful, our vendors could require us to (i) cease selling or using products or services that incorporate the challenged software or technology, (ii) obtain a license or additional licenses from our vendors or (iii) redesign our services which rely on the challenged software or technology. In addition, we may be exposed to claims for monetary damages. If we are unsuccessful in defending an infringement claim and our vendors require us to initiate any of the above actions, or we are required to pay monetary damages, then such actions could materially adversely affect our results of operations and financial condition.

Table of Contents

We are subject to laws of the United States and foreign jurisdictions relating to individually identifiable information and personal health information, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and negatively impact our operations.

We receive, process, transmit and store information relating to identifiable individuals, both in our role as a service provider and as an employer. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations designed to protect both individually identifiable information as well as personal health information, including the Health Insurance Portability and Accountability Act of 1996, as amended ("HIPAA") and the HIPAA regulations governing, among other things, the privacy, security and electronic transmission of individually identifiable health information, and the European Union Directive on Data Protection (Directive 95/46/EC). The EU General Data Protection Regulation (GDPR) replaces the Data Protection Directive 95/46/EC (with an enforcement date of May 25, 2018) and is designed to harmonize data privacy laws across Europe, to protect and empower all EU citizens data privacy, to reshape the way organizations across the region approach data privacy and will have a significant impact on how we process and handle certain data. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of individually identifiable information and these laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. For example, the invalidation of the U.S.-EU Safe Harbor regime and the emerging GDPR will require us to implement alternative mechanisms in order for some of our data flows from Europe to the United States to comply with applicable law. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to obtain and process information and allegations by our customers and clients that we have not performed our contractual obligations, any of which could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and materially adversely affect our results of operations and financial condition.

We process, support and execute financial transactions, and disburse funds, on behalf of both government and commercial customers, often in partnership with financial institutions. This activity includes receiving debit and credit card information, processing payments for and due to our customers and disbursing funds on payment or debit cards to payees of our customers. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations, including the Electronic Fund Transfer Act, as amended, the Currency and Foreign Transactions Reporting Act of 1970 (commonly known as the Bank Secrecy Act), as amended, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (including the so-called Durbin Amendment), as amended, the Gramm-Leach-Bliley Act (also known as the Financial Modernization Act of 1999), as amended, and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of certain financial transactions and related support services. These laws are subject to frequent changes, and new statutes and regulations in this area may be enacted at any time. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process and support financial transactions and allegations by our customers, partners and clients that we have not performed our contractual obligations. Any of these could materially adversely affect our results of operations and financial condition.

Table of Contents

Our data systems, information systems and network infrastructure may be subject to hacking or other cyber security threats and other service interruptions, which could expose us to liability, impair our reputation or temporarily render us unable to fulfill our service obligations under our contracts.

We are a leading provider of business processing services concentrated in transaction-intensive processing, analytics and automation. We act as a trusted business partner in both front office and back office platforms, providing interactions on a substantial scale with our customers and other third parties. Our customers include global commercial clients and government clients who depend upon our operational efficiency, non-interruption of service, and accuracy and security of information. We also use third party providers such as subcontractors, software vendors, utility providers and network providers, upon whom we rely for our business processing services, to deliver uninterrupted, secure service. As part of our business processing services we also develop system software platforms necessary to support our customers' needs, with significant ongoing investment in developing and operating customer-appropriate operating systems, data bases and system software solutions. We also receive, process, transmit and store substantial volumes of information relating to identifiable individuals, both in our role as a service provider and as an employer, and we are subject to numerous laws, rules and regulations in the United States (both federal and state) and foreign jurisdictions designed to protect both individually identifiable information as well as personal health information. We also receive, process and implement financial transactions, and disburse funds, on behalf of both commercial and government customers, which activity includes receiving debit and credit card information to process payments due to our customers as well as disbursing funds to payees of our customers. As a result of these and other business processing services, the integrity, security, accuracy and non-interruption of our systems and information technology and that of our third-party providers and our interfaces with our customers are extremely important to our business, operating results, growth, prospects and reputation.

We have implemented security systems and controls, both directly and with third-party subcontractors and service providers, with the intent of maintaining both the physical security of our facilities and the data security of our customers', clients' and suppliers' confidential information and information related to identifiable individuals (including payment card and debit and credit card information and health information) against unauthorized access through our information systems or by other electronic transmission or through the misdirection, theft or loss of physical media. These include, for example, the appropriate encryption of information. Despite such efforts, we are subject to breach of security systems which may result in unauthorized access to our facilities and those of our customers and/or the information we and our customers are trying to protect. Cyber security failure might be caused by computer hacking, malware, computer viruses, worms and other destructive software, "cyber-attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Operational or business delays may also result from the disruption of network or information systems and subsequent remediation activities.

Because the techniques used to obtain unauthorized access are constantly changing and becoming increasingly more sophisticated and often are not recognized until launched against a target, we or our third-party service providers may be unable to anticipate these techniques or implement sufficient preventative measures. Hacking, malware, phishing, viruses and other "cyber-attacks" have become more prevalent, have occurred in our systems in the past, and may occur in our systems in the future. Although we have implemented and intend to continue to implement what we believe to be appropriate cyber practices and cyber security systems, these systems may prove to be inadequate and result in the disruption, failure, misappropriation or corruption of our network and information systems.

Additionally, with advances in computer capabilities and data protection requirements to address ongoing threats, we may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by security breaches. Moreover, employee error or malfeasance, faulty password management or other irregularities may result in a defeat of our or our third-party service providers' security measures and a breach of our or our third-party service providers' information systems (whether digital, cloud-based or otherwise).

Table of Contents

If unauthorized parties gain physical access to one of our or one of our third-party service providers' facilities or electronic access to our or one of our third-party service providers' information systems or such sensitive or confidential information is misdirected, lost or stolen during transmission or transport, any theft or misuse of such information could result in, among other things, unfavorable publicity and significant damage to our brand, governmental inquiry, oversight and possible regulatory action, difficulty in marketing our services, loss of existing and potential customers, allegations by our customers that we have not performed our contractual obligations, litigation by affected parties and possible financial obligations for substantial damages related to the theft or misuse of such information, any of which could materially adversely affect our results of operations and financial condition. Moreover, a security breach could require us to devote significant management resources to address the problems created by the security breach and to expend significant additional resources to upgrade further the security measures that we employ to guard such personal information against "cyber attacks" and to maintain various systems and data centers for our customers. Often these systems and data centers must be maintained worldwide and on a 24/7 basis. Although we endeavor to ensure that there is adequate backup and maintenance of these systems and centers, we could experience service interruptions that could result in curtailed operations and loss of existing and potential customers, which could significantly reduce our revenues and profits in addition to significantly impairing our reputation. If our information systems and our back-up systems are damaged, breached or cease to function properly, we may have to make a significant investment to repair or replace them, and we may suffer interruptions in our operations in the interim, each of which could materially adversely affect our results of operations and financial condition and diminish the value of our shares.

In addition, our and our customers' systems and networks are subject to continued threats of terrorism, which could disrupt our operations as well as disrupt the utilities and telecommunications infrastructure on which our business depends. To the extent any such disruptions were to occur, our business, operating results and financial condition could be materially adversely affected.

If we underestimate the scope of work or the costs of performance in our contracts, or we mis-perform our contracts, our results of operations and financial condition could be materially adversely affected.

In order to stay competitive in our industry, we must also keep pace with changing technologies and customer preferences. Many of our contracts require us to design, develop and implement new technological and operating systems for our customers. Many of these systems involve detailed and complex computer source code which must be created and integrated into a working system that meets contract specifications. The accounting for these contracts requires judgment relative to assessing risks, estimating contract revenues and costs and making assumptions for schedule and technical issues. To varying degrees, each contract type involves some risk that we could underestimate the costs and resources necessary to fulfill the contract. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances has resulted, in reduced profits or in losses. In addition, in many of our contracts, we have complicated performance obligations, including, without limitation, designing and building new integrated computer systems or doing actuarial work for pension, medical and other plans with beneficiaries that can rely on future projection of obligations to determine appropriate levels of funding. These contracts carry potential financial penalties or could result in financial damages or exposures if we fail to properly perform those obligations and could result in our results of operations and financial condition being materially adversely affected.

Table of Contents

If we are unable to collect our receivables for unbilled services, our results of operations and financial condition could be materially adversely affected.

The profitability of certain of our large contracts depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. Actual losses on client balances could differ from current estimates and, as a result, may require adjustment of our receivables for unbilled services. Our receivables include long-term contracts and over the course of a long-term contract, our customers' financial condition may change such that their ability to pay their obligations, and our ability to collect our fees for services rendered, is adversely affected. Additionally, we may perform work for the federal, state and local governments, with respect to which we must file requests for equitable adjustment or claims with the proper agency to seek recovery in whole or in part, for out-of-scope work directed or caused by the government customer in support of its project, and the amounts of such recoveries may not meet our expectations or cover our costs. Timely collection of client balances also depends on our ability to complete our contractual commitments (for example, achieve specified milestones in percentage-of-completion contracts) and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our results of operations and financial condition could be materially adversely affected.

A decline in revenues from or a loss or failure of significant clients could materially adversely affect our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by the loss or failure of significant clients. Some of our clients are in business sectors which have experienced significant financial difficulties or consolidation, and/or the reduction of volumes or their inability to make payments to us, as a result of, among other things, their merger or acquisition, divestiture of assets or businesses, contract expiration, nonrenewal or early termination (including termination for convenience) or business or financial failure or deterioration. Economic and political conditions could affect our clients' businesses and the markets they serve.

We have non-recurring revenue, which subjects us to a risk that our revenues and cash flows from operations may fluctuate from period to period.

Revenue generated from our non-recurring services may fluctuate due to factors both within and outside of our control. Our mix of non-recurring and recurring revenues is impacted by acquisitions as well as growth in our non-recurring lines of business. There is less predictability and certainty in the timing and amount of revenues generated by our non-recurring services and, accordingly, our results of operations and financial condition could be materially adversely affected by the timing and amount of revenues generated from our non-recurring services.

The failure to obtain or maintain a satisfactory credit rating could adversely affect our liquidity, capital position, borrowing costs, access to capital markets and ability to post surety or performance bonds to support clients' contracts.

Any future downgrades to our credit rating could negatively impact our ability to renew contracts with our existing clients, limit our ability to compete for new clients, result in increased premiums for surety or performance bonds to support our clients' contracts and/or result in a requirement that we provide collateral to secure our surety or performance bonds. Further, certain of our commercial outsourcing contracts provide that, in the event our credit ratings are downgraded to specified levels, the client may elect to terminate its contract with us and either pay a reduced termination fee or, in some limited instances, no termination fee. Such a credit rating downgrade could adversely affect these client relationships.

There can be no assurance that we will be able to maintain our credit ratings. Any additional actual or anticipated downgrades of our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position and access to capital markets.

Table of Contents

A failure to attract and retain necessary technical personnel and qualified subcontractors could materially adversely affect our results of operations and financial condition.

Because we operate in intensely competitive markets, our success depends to a significant extent upon our ability to attract, retain and motivate highly skilled and qualified technical personnel and to subcontract with qualified, competent subcontractors. If we fail to attract, train and retain sufficient numbers of qualified engineers, technical staff and sales and marketing representatives or are unable to contract with qualified, competent subcontractors, our results of operations and financial condition could be materially adversely affected. Experienced and capable personnel in the services industry remain in high demand, and there is continual competition for their talents. Additionally, we may be required to increase our hiring in geographic areas outside of the United States, which could subject us to increased geopolitical and exchange rate risk. The loss of any key technical employee or the loss of a key subcontractor relationship could materially adversely affect our results of operations and financial condition.

Increases in the cost of telephone and data services or significant interruptions in such services could materially adversely affect our results of operations and financial condition.

Our business is significantly dependent on telephone and data service provided by various local and long distance telephone and data service providers around the world. Accordingly, any disruption of these services could materially adversely affect our results of operations and financial condition. We have taken steps to mitigate our exposure to service disruptions by investing in redundant circuits, although there is no assurance that the redundant circuits would not also suffer disruption. Any inability to obtain telephone or data services at favorable rates could materially adversely affect our results of operations and financial condition. Where possible, we have entered into long-term contracts with various providers to mitigate short-term rate increases and fluctuations. There is no obligation, however, for the vendors to renew their contracts with us, or to offer the same or lower rates in the future, and such contracts are subject to termination or modification for various reasons outside of our control. A significant increase in the cost of telephone or data services that is not recoverable through an increase in the price of our services could materially adversely affect our results of operations and financial condition. In addition, a number of our facilities are located in jurisdictions outside of the United States where the provision of utility services, including electricity and water, may not be consistently reliable, and while there are backup systems in many of our operating facilities, an extended outage of utility or network services could materially adversely affect our results of operations and financial condition.

We are a holding company and, therefore, may not be able to receive dividends or other payments in needed amounts from our subsidiaries.

Our principal assets are the shares of capital stock and indebtedness of our subsidiaries. We rely on dividends, interest and other payments from these subsidiaries to meet our obligations for paying principal and interest on outstanding debt obligations, paying corporate expenses and, if determined by our Board, paying dividends to shareholders and repurchasing common shares. Certain of our subsidiaries are subject to regulatory requirements of the jurisdictions in which they operate or other restrictions that may limit the amounts that these subsidiaries can pay in dividends or other payments to us. No assurance can be given that there will not be further changes in law, regulatory actions or other circumstances that could restrict the ability of our subsidiaries to pay dividends to us. In addition, due to differences in tax rates, repatriation of funds from certain countries into the United States could have unfavorable tax ramifications for us.

Table of Contents

Our results of operations and financial condition could be materially adversely affected by legal and regulatory matters.

We are potentially subject to various contingent liabilities that are not reflected on our balance sheet, including those arising as a result of being involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental and non-governmental entity contracting, servicing and governmental entity procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act of 1974 (ERISA); and other laws, regulations and contractual undertakings, as discussed under Note 13 – Contingencies and Litigation in our Consolidated Financial Statements. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual or materially increase an existing accrual, or should any of these matters result in an adverse judgment or be settled for significant amounts above any existing accruals, it could materially adversely affect our results of operations and financial condition in the period or periods in which such change in determination, judgment or settlement occurs. There can be no assurances as to the favorable outcome of any claim, lawsuit, investigation or proceeding. It is possible that a resolution of one or more such proceedings could require us to make substantial payments to satisfy judgments, fines or penalties or to settle claims or proceedings, any of which could materially adversely affect our results of operations and financial condition. These proceedings could also result in reputational harm, criminal sanctions, consent decrees or orders preventing us from offering certain services, requiring a change in our business practices in costly ways or requiring development of non-infringing or otherwise altered products or technologies. In addition, it can be very costly to defend litigation and these costs could materially adversely affect our results of operations and financial condition. See Note 13 – Contingencies and Litigation to our Consolidated Financial Statements.

Our results of operations and financial condition may be materially adversely affected by conditions abroad, including local economics, political environments, fluctuating foreign currencies and shifting regulatory schemes.

A portion of our revenues is generated from operations outside the United States. In addition, we maintain significant operations outside the United States. Our results of operations and financial condition could be materially adversely affected by changes in foreign currency exchange rates, as well as by a number of other factors, including, without limitation, changes in economic conditions from country to country, changes in a country's political conditions, trade controls and protection measures, financial sanctions, licensing requirements, local tax issues, capitalization and other related legal matters. We generally hedge foreign currency denominated assets, liabilities and anticipated transactions primarily through the use of currency derivative contracts. The use of derivative contracts is intended to mitigate or reduce transactional level volatility in the results of foreign operations, but does not completely eliminate volatility. We do not hedge the translation effect of international revenues and expenses, which are denominated in currencies other than our U.S. parent functional currency, within our Consolidated Financial Statements. If we are unable to effectively hedge these risks, our results of operations and financial condition could be materially adversely affected.

Table of Contents

If we fail to successfully develop new service offerings, including new technology components, and protect our intellectual property rights, we may be unable to retain current customers and gain new customers and our revenues would decline.

The process of developing new service offerings, including new technology components, is inherently complex and uncertain. It requires accurate anticipation of customers' changing needs and emerging technological trends. We must make long-term investments and commit significant resources before knowing whether these investments will eventually result in service offerings that achieve customer acceptance and generate the revenues required to provide desired returns. For example, establishing internal automation processes to help us develop new service offerings will require significant up-front costs and resources, which, if not monetized effectively, could materially adversely affect our revenues. In addition, some of our service offerings rely on technologies developed by and licensed from third parties. We may not be able to obtain or continue to obtain licenses and technologies from these third parties at all or on reasonable terms, or such third parties may demand cross-licenses to our intellectual property. It is also possible that our intellectual property rights could be challenged, invalidated or circumvented, allowing others to use our intellectual property to our competitive detriment. We also must ensure that all of our service offerings comply with both existing and newly enacted regulatory requirements in the countries in which they are sold. If we fail to accurately anticipate and meet our customers' needs through the development of new service offerings (including technology components) or if we fail to adequately protect our intellectual property rights or if our new service offerings are not widely accepted or if our current or future service offerings fail to meet applicable worldwide regulatory requirements, we could lose market share and customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Risks related to the spin-off:

We may be unable to achieve some or all of the benefits that we expect to achieve from the spin-off.

We believe that, as an independent, publicly traded company, we will be able to, among other things, design and implement corporate strategies and policies that are targeted to our business, better focus our financial and operational resources on our specific business, create effective incentives for our management and employees that are more closely tied to our business performance, provide investors more flexibility and enable us to achieve alignment with a more natural shareholder base and implement and maintain a capital structure designed to meet our specific needs. However, as a result of separating from Xerox, we may be more susceptible to market fluctuations and other adverse events. As an independent entity, we have an arm's-length relationship with Xerox and we may not be able to obtain supplies from Xerox on terms as favorable to us as those we had as a wholly owned subsidiary of Xerox prior to the spin-off. As a smaller, independent company, Conduent has a narrower business focus and may be more vulnerable to changing market conditions as well as the risk of takeover by third parties. In addition, we may be unable to achieve some or all of the benefits that we expected to achieve as an independent company in the time we expect, if at all. Furthermore, Xerox used to guarantee our and our subsidiaries' performance under certain services contracts and real estate leases. Following the spin-off, we expect that Conduent will provide such performance guarantees, and we may be unable to retain or renew contracts or real estate leases or a failure to renew such contracts or leases on favorable terms and conditions could materially adversely affect our results of operations and financial condition. If we fail to achieve some or all of the benefits that we expected to achieve as an independent company, or do not achieve them in the time we expect, our results of operations and financial condition could be materially adversely affected.

Table of Contents

We may be unable to make, on a timely or cost-effective basis, the changes necessary to operate as an independent, publicly traded company, and we may experience increased costs after the spin-off.

We had historically operated as part of Xerox's corporate organization, and Xerox had provided us with various corporate functions. Following the spin-off, Xerox has no obligation to provide us with assistance other than the transition services described under "Certain Relationships and Related Party Transactions —Transition Services Agreement." These services do not include every service that we have received from Xerox in the past, and Xerox is only obligated to provide these services for limited periods following completion of the spin-off. Accordingly, following the spin-off, we have needed to provide internally or obtain from unaffiliated third parties the services we had received from Xerox. These services include senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services, the effective and appropriate performance of which are critical to our operations. We may be unable to replace these services on terms and conditions as favorable as those we received from Xerox. Because our business had operated as part of the wider Xerox organization, we may incur additional costs that could adversely affect our business. If we fail to obtain the quality of services necessary to operate effectively or incur greater costs in obtaining these services, our results of operations and financial condition could be materially adversely affected.

We have no recent operating history as an independent, publicly traded company, and our historical and pro forma financial data are not necessarily representative of the results we would have achieved as an independent, publicly traded company and may not be a reliable indicator of our future results.

We derived certain of the historical financial data included in this Annual Report from Xerox's consolidated financial statements, and this data does not necessarily reflect the results of operations and financial condition we would have achieved as an independent, publicly traded company during the periods presented, or those that we will achieve in the future. This is primarily because of the following factors:

- Prior to the spin-off, we operated as part of Xerox's broader corporate organization and Xerox performed various corporate functions for us, including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services. Our historical financial data reflect allocations of corporate expenses from Xerox for these and similar functions. These allocations may not reflect the costs we have incurred and in the future will incur for similar services as an independent, publicly traded company.
- We entered into transactions with Xerox that did not exist prior to the spin-off, such as Xerox's provision of transition services, which will cause us to incur new costs.
- Such historical financial data does not and in the future may not reflect changes that we have experienced and expect to experience in the future as a result of our separation from Xerox. As part of Xerox, we enjoyed certain benefits from Xerox's operating diversity, size, purchasing power, credit rating, borrowing leverage and available capital for investments. Many of our services contracts, particularly those for our transportation service offerings in our Public Sector business, require significant capital investments, and after the spin-off, we may not have access to the capital (from both internal and external sources) necessary to fund these services contracts. As an independent entity, we may be unable to purchase goods, services and technologies, such as insurance and health care benefits and computer software licenses, or access capital markets on terms as favorable to us as those we obtained as part of Xerox prior to the spin-off.

Following the spin-off, we are now responsible for the additional costs associated with being an independent, publicly traded company, including costs related to corporate governance, investor and public relations and public reporting. For additional information about our past financial performance and the basis of presentation of our financial statements, see "Selected Historical Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical financial statements and the notes thereto included in this annual report on Form 10-K.

Table of Contents

We may have been able to receive better terms from unaffiliated third parties than the terms we receive in our agreements with Xerox.

We entered into agreements with Xerox related to our separation from Xerox, including the Separation and Distribution Agreement, Transition Services Agreement, Tax Matters Agreement, Employee Matters Agreement and any other agreements, while we were still part of Xerox. Accordingly, these agreements may not reflect terms that would have resulted from arm's-length negotiations among unaffiliated third parties. The terms of these agreements relate to, among other things, allocations of assets, liabilities, rights, indemnifications and other obligations between Xerox and us. We may have received better terms from third parties. See "Certain Relationships and Related Party Transactions—Agreements with Xerox."

The spin-off could result in significant tax liability to Xerox and its shareholders.

Completion of the spin-off required Xerox's receipt of a written opinion of Cravath, Swaine & Moore LLP to the effect that the Distribution should qualify for non-recognition of gain and loss under Section 355 of the Internal Revenue Code (the "Code") and the receipt and continuing effectiveness and validity of the IRS Ruling.

The opinion of counsel did not address any U.S. state or local or foreign tax consequences of the spin-off. The opinion assumed that the spin-off was completed according to the terms of the Separation and Distribution Agreement and relied on the facts as stated in the Separation and Distribution Agreement, the Tax Matters Agreement, the other ancillary agreements, the Information Statement included in our registration statement on Form 10 and a number of other documents. In addition, the opinion was based on certain representations as to factual matters from, and certain covenants by, Xerox and us. The opinion cannot be relied on if any of the assumptions, representations or covenants are incorrect, incomplete or inaccurate or are violated in any material respect.

Xerox received an IRS ruling in connection with the spin-off (the "IRS Ruling"). The IRS Ruling relies on certain facts, assumptions, representations and undertakings from Xerox and us regarding the past and future conduct of Xerox's and our businesses and other matters. If any of these facts, assumptions, representations or undertakings is incorrect or not otherwise satisfied, Xerox may not be able to rely on the IRS Ruling. In addition, the IRS Ruling is not a comprehensive ruling from the IRS regarding all aspects of the U.S. federal income tax consequences of the transactions.

Accordingly, notwithstanding the opinion of counsel and the IRS Ruling, there can be no assurance that the IRS will not assert, or that a court would not sustain, a contrary position.

If the distribution in connection with the spin-off were determined not to qualify for non-recognition of gain and loss for U.S. federal income tax purposes, U.S. holders who received our common stock could be subject to tax. In this case, each U.S. holder who received our common stock in the distribution would generally, for U.S. federal income tax purposes, be treated as having received a distribution in an amount equal to the fair market value of our common stock received, which would generally result in (i) a taxable dividend to the U.S. holder to the extent of that U.S. holder's pro rata share of Xerox's current and accumulated earnings and profits; (ii) a reduction in the U.S. holder's basis (but not below zero) in Xerox common stock to the extent the amount received exceeds the shareholder's share of Xerox's earnings and profits; and (iii) a taxable gain from the exchange of Xerox common stock to the extent the amount received exceeds the sum of the U.S. holder's share of Xerox's earnings and profits and the U.S. holder's basis in its Xerox common stock.

We could have an indemnification obligation to Xerox if the Distribution were determined not to qualify for non-recognition treatment, which could materially adversely affect our results of operations and financial condition.

If it were determined that the distribution in connection with the spin-off did not qualify for non-recognition of gain and loss under Section 355 of the Code, we could, under certain circumstances, be required to indemnify Xerox for the resulting taxes and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

Table of Contents

In addition, Section 355(e) of the Code generally creates a presumption that the distribution would be taxable to Xerox, but not to shareholders, if we or our shareholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the distribution, unless it were established that such transactions and the distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the distribution were taxable to Xerox due to such a 50% or greater change in ownership of our stock, Xerox would recognize gain equal to the excess of the fair market value of our common stock distributed to Xerox shareholders over Xerox's tax basis in our common stock and we generally would be required to indemnify Xerox for the tax on such gain and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

We agreed to numerous restrictions to preserve the non-recognition treatment of the Distribution, which may reduce our strategic and operating flexibility.

We agreed in the Tax Matters Agreement to covenants and indemnification obligations that address compliance with Section 355 of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic transactions or engage in new businesses or other transactions that may otherwise maximize the value of our business, and might discourage or delay a strategic transaction that our shareholders may consider favorable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We lease and own numerous facilities worldwide with larger concentrations of space in Kentucky, New Jersey, California, Mexico, Guatemala, the Philippines, Jamaica, Romania and India. Our owned and leased facilities house general offices, sales offices, service locations, call centers and distribution centers. The size of our property portfolio as of December 31, 2017 was approximately 9.7 million square feet at an annual operating cost (lease costs and expenses) of approximately $247 million and comprised 330 leased properties and 9 owned properties. We believe that our current facilities are suitable and adequate for our current businesses. Because of the interrelation of our business segments, each of the segments uses substantially all of these properties at least in part.

In addition to the 9.7 million square feet of our real estate property portfolio, we also had 2.7 million square feet of our leased and owned properties that became surplus in 2017 due to the implementation of our strategic transformation program as well as various productivity initiatives to consolidate our real estate footprint. We aggressively managed our surplus properties through early terminations and subleasing of leased properties and the sale of owned properties. As a result, approximately 1.7 million square feet of the surplus property portfolio were resolved as of December 31, 2017. Additional leased and owned properties may become surplus over the next three years as we continue the strategic transformation program. We are obligated to maintain our leased surplus properties through required contractual lease periods and plan to dispose of or sublease these properties.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated. This MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes. This MD&A provides additional information about our operations, current developments, financial condition, cash flows and results of operations.

Throughout the MD&A, we refer to various notes to our Consolidated Financial Statements which appear in Item 8 of this 2017 Form 10-K, and the information contained in such notes is incorporated by reference into the MD&A in the places where such references are made.

Overview

With revenues of $6.0 billion, we are a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience.

Headquartered in Florham Park, New Jersey, we, have a team of approximately 90,000 people as of December 31, 2017, who serves customers in 31 countries. In 2017, 12% of our revenue was generated outside the U.S.

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

Beginning in 2017, in an effort to better reflect how we manage our business, we changed our reporting segments to align the Healthcare business based upon customer focus between Commercial Industries and Public Sector.

- **Commercial Industries -** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include transaction processing, customer experience, human resource management, omni-channel communications and finance and accounting services.
- **Public Sector -** Our Public Sector segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.

Other includes our Government HE Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients; our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations.

Significant 2017 Actions

Dispositions

In 2017, we completed divestitures of: (1) our Firehouse business and suite of emergency records management products used by fire departments across the country for their incident reporting and Emergency Management System information and records management; (2) our healthcare provider consulting services business, which advises healthcare organizations on IT application optimization; (3) the Breakaway Group business, which provides advisory project services to assist healthcare organizations optimize their health IT applications; (4) the mobile device management business of Wireless Data Services Limited; and (5) the Global Mobility business. The aggregate proceeds for these divestitures was $56 million in cash. The businesses sold represent $60 million and $82 million of 2017 and 2016 revenue, respectively. We recorded a pre-tax gain of $16 million on these divestitures for the year ended December 31, 2017.

Table of Contents

In addition, in 2017, we sold a property located in Dallas, Texas, which was formerly the Affiliated Computer Services (ACS) headquarters, for a pre-tax gain of $24 million. This was part of our effort to consolidate our real estate footprint.

Health Enterprise Settlement

On November 28, 2017, we entered into a definitive settlement agreement with the State of New York regarding resolution of the HE platform project. Under the terms of the settlement: (1) our contract with the State of New York terminated effective December 15, 2017 and we were released from all liabilities and obligations in connection with the contract at such time; and (2) we will pay, or incur costs on behalf of, the State of New York in the amount of approximately $20 million. As we have previously reserved this amount, we will incur no additional charges as a result of the settlement.

Significant 2016 Actions

Separation

On December 31, 2016, Conduent Incorporated spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement. The separation was completed by way of a pro rata distribution of Conduent Incorporated shares held by Xerox to Xerox's shareholders. As a result of the spin-off we operate as an independent, publicly traded company on the New York Stock Exchange under the ticker "CNDT".

Goodwill Impairment Charge

Our Commercial Industries reporting units operating results declined in 2016 versus our expectations, including a weak fourth quarter 2016. In performing our annual impairment test during the fourth quarter of 2016, we determined that the carrying value of the Commercial Industries reporting unit exceeded its fair value by 53%, which resulted in a goodwill impairment of $935 million. This has been presented as Goodwill impairment, a separate line item in the Consolidated Statements of Income (Loss). Refer to Note 6 – Goodwill and Intangible Assets, Net, in the Consolidated Financial Statements for additional information.

Health Enterprise Charge

In February 2017, we determined that it was not probable that the New York Medicaid Management Information System (NY MMIS) project would be completed. As a result of this determination, we recorded a pre-tax charge (NY MMIS charge) of $161 million ($98 million after-tax) in the fourth quarter of 2016. The charge included $83 million for the write-off of contract receivables which were recorded as a reduction of revenue and $78 million recorded in Cost of services including $36 million for wind-down costs, $28 million related to the non-cash charge for the impairment of software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

Significant 2015 Actions

Health Enterprise Charge

In 2015, we determined that we would not fully complete the HE platform implementation projects in California and Montana. However, we would continue to process Medicaid claims using existing legacy systems in those states, thus providing uninterrupted service for the states' healthcare providers and constituents.

As a result of this determination, we recorded a pre-tax HE charge of $389 million ($237 million after-tax). The charge included $116 million for the write-off of contract receivables (primarily non-current), $34 million related to the non-cash impairment of the HE software and deferred contract set-up transition costs and $23 million for other related assets and liabilities. The remainder of the charge was primarily related to settlement costs including payments to subcontractors resulting in cash outflows in future periods. Of the $389 million charge, $116 million was recorded as a reduction to revenue and the remaining $273 million recorded to Cost of services.

This development resulted from the Government Healthcare strategy change announced in July 2015, regarding our decision to focus our future HE implementations on current Medicaid customers and to discontinue investment in and sales of our Integrated Eligibility System. This resulted in a pre-tax non-cash software platform impairment charge of $146 million ($89 million after-tax).

Table of Contents

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements and notes thereto. In preparing our Consolidated Financial Statements, we have made our best estimates and judgments of certain amounts included in the Consolidated Financial Statements giving due consideration to materiality. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Senior management has discussed the development and selection of the critical accounting policies, estimates and related disclosures included herein with the Audit Committee of the Board of Directors. We consider these as critical to understanding our Consolidated Financial Statements, as their application places the most significant demands on management's judgment, since financial reporting results rely on estimates of the effects of matters that are inherently uncertain. In instances where different estimates could have reasonably been used, we disclose the impact of these different estimates on our operations. In certain instances, the accounting rules are prescriptive; therefore, it would not have been possible to reasonably use different estimates. Changes in assumptions and estimates are reflected in the period in which they occur. The impact of such changes could be material to our results of operations and financial condition in any quarterly or annual period.

Specific risks associated with these critical accounting policies are discussed throughout the MD&A, where such policies affect our reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements.

Revenue Recognition

Application of the various accounting principles in U.S. GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies — Revenue Recognition in the Consolidated Financial Statements for additional information regarding our revenue recognition policies.

A significant portion of our revenue is recognized based on objective criteria that do not require significant estimates or uncertainties. For example, transaction volumes, time and material and cost reimbursable arrangements are based on specific, objective criteria under the contracts. Accordingly, revenues recognized under these contracts do not require the use of significant estimates that are susceptible to change. Revenue recognized using the percentage-of completion (POC) accounting method does require the use of estimates and judgment as discussed below.

We recognize revenues when we have persuasive evidence of an arrangement, the services have been provided, the transaction price is fixed or determinable and collectability is reasonably assured. During 2017, approximately 80% of our revenue was recognized based on transaction volumes, approximately 13% was recognized on a fixed fee basis (wherein our revenue is earned as we fulfill our performance obligations under the arrangement), approximately 1% was related to cost reimbursable contracts, approximately 2% recognized using POC accounting and the remaining 4% was related to time and material contracts. Our revenue mix is subject to change due to the impact of changing customer requirements, acquisitions, divestitures, new business and lost business.

Percentage-of-Completion: The POC method requires the use of estimates and judgment. Although not significant to total revenue, the POC methodology is normally applied to certain of our larger and longer term outsourcing contracts involving system development and implementation, primarily in government healthcare and certain government transportation contracts. In addition, we had unbilled receivables totaling $187 million and $279 million at December 31, 2017 and 2016, respectively, representing revenues recognized but not yet billable under the terms of our POC contracts.

Table of Contents

The POC accounting methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed based on a current cumulative cost incurred to estimated total cost basis and a reasonably consistent profit margin over the period. Due to the long-term nature of these arrangements, developing the estimates of cost often requires significant judgment. Factors that must be considered in estimating the progress of work completed and ultimate cost of the projects include, but are not limited to, the availability of labor and labor productivity, the nature and complexity of the work to be performed and the impact of delayed performance. If changes occur in delivery, productivity or other factors used in developing the estimates of costs or revenues, we revise our cost and revenue estimates, which may result in increases or decreases in revenues. Such revisions are reflected in income in the period in which the facts that give rise to that revision become known. We perform ongoing profitability analysis of our POC services contracts in order to determine whether the latest estimates require updating. Key factors reviewed by the Company to estimate the future costs to complete each contract are future labor costs, future product costs, expected productivity efficiencies, achievement of contracted milestones and performance goals, as well as potential penalties for milestone and system implementation delays.

If at any time our estimates indicate the POC contract will be unprofitable, the entire estimated loss for the remainder of the contract is recorded immediately in cost of services. This results in the contract being recorded at a zero profit margin going forward with recognition of an equal amount of revenues and costs over the remaining contract term. A zero profit margin may also be applied when it is impractical to estimate specific amounts or ranges of contract revenues and costs; however, we can at least determine that we will not incur a loss on a particular contract.

Capitalization of Outsourcing Contract Costs

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract. We regularly review costs to determine appropriateness for deferral in accordance with the relevant accounting guidance. Key estimates and assumptions that we must make include projecting future cash flows in order to assess the recoverability of deferred costs. To assess recoverability, undiscounted estimated cash flows of the contract are projected over its remaining life and compared to the carrying amount of contract related assets, including the unamortized deferred cost balance. Key factors that are considered in estimating the undiscounted cash flows include projected labor costs and productivity efficiencies. A significant change in an estimate or assumption on one or more contracts could have a material effect on our results of operations.

Capitalization of Software Development Costs

We capitalize certain costs incurred to develop commercial software products to be sold, leased or otherwise marketed after establishing technological feasibility, and we capitalize costs to develop or purchase internal-use software. Significant estimates and assumptions include: determining the appropriate period over which to amortize the capitalized costs based on estimated useful lives, estimating the marketability of the commercial software products and related future revenues and assessing the unamortized cost balances for impairment. For commercial software products, determining the appropriate amortization period is based on estimates of future revenues from sales of the products. We consider various factors to project marketability and future revenues, including an assessment of alternative solutions or products, current and historical demand for the product, and anticipated changes in technology that may make the product obsolete. For internal-use software, the appropriate amortization period is based on estimates of our ability to utilize the software on an ongoing basis. To assess the recoverability of capitalized software costs, we consider estimates of future revenue, costs and cash flows. Such estimates require assumptions about future cash inflows and outflows, and are primarily based on the historical experience and expectations regarding future revenues. A significant change in an estimate related to one or more software products could result in a material change to our results of operations.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information regarding capitalized software costs.

Table of Contents

Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale. Upon determining that a long-lived asset (disposal group) meets the criteria to be classified as held for sale, the Company reports the assets and liabilities of the disposal group in the line items Assets held for sale and Liabilities held for sale, respectively, in the Consolidated Balance Sheets.

In the fourth quarter of 2017, management approved the disposal through sale of certain assets and businesses, which is a mix of both Commercial Industries and Public Sectors. This action was taken as a result of our evaluation of these businesses as they represent businesses in markets or with services that we did not see as strategic or core. As of December 31, 2017, these businesses qualified as assets held for sale. During the year ended December 31, 2017, we reclassified $757 million to assets held for sale and $169 million to liabilities held for sale, as we have an active program to locate buyers for these businesses and we expect these businesses to be sold within one year.

Intangible Assets

The fair values of identifiable intangible assets are primarily estimated using an income approach. These estimates include market participant assumptions and require projected financial information, including assumptions about future revenue growth and costs necessary to facilitate the projected growth. Other key inputs include assumptions about technological obsolescence, customer attrition rates, brand recognition, the allocation of projected cash flows to identifiable intangible assets and discount rates. We regularly review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

- significant underperformance relative to historical or projected future operating results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangibles and long-lived assets may not be recoverable based upon the existence of one or more of the above indicators of potential impairment, we assess whether an impairment has occurred based on whether net book value of the assets exceeds the related projected undiscounted cash flows from these assets. We consider a number of factors, including past operating results, budgets, economic projections, market trends and product development cycles in estimating future cash flows. Differing estimates and assumptions as to any of the factors described above could result in a materially different impairment charge, if any, and thus materially different results of operations.

Goodwill

Goodwill is not amortized but rather tested for impairment annually, or more frequently, if an event or circumstance indicates that impairment may have been incurred. Events or circumstances that might indicate an interim evaluation is warranted include, among other things, unexpected adverse business conditions, macro and reporting unit specific economic factors, supply costs, unanticipated competitive activities and acts by governments and courts.

Table of Contents

Application of the annual goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units and the assessment of the fair value of each reporting unit. We determined that our reporting units were the same as our operating segments and, therefore, our business is comprised of two reporting units. Our annual quantitative impairment test of goodwill was performed in the fourth quarter of 2017.

In our quantitative test, we estimate the fair value of each reporting unit by weighting the results from the income approach (discounted cash flow methodology) and market approach. These valuation approaches require significant judgment and consider a number of factors that include, but are not limited to, expected future cash flows, growth rates and discount rates and comparable multiples from publicly traded companies in our industry. In addition, we are required to make certain assumptions and estimates regarding the current economic environment, industry factors and the future profitability of our businesses.

When performing our discounted cash flow analysis for each reporting unit, we incorporate the use of projected financial information and discount rates that are developed using market participant-based assumptions. The cash-flow projections are based on three-year financial forecasts developed by management that include revenue and expense projections, restructuring and strategic transformation activities, capital spending trends and investment in working capital to support anticipated revenue growth or other changes in the business. The selected discount rates consider the risk and nature of the respective reporting units' cash flows, appropriate capital structure and rates of return that market participants would require to invest their capital in our reporting units.

We believe these assumptions are appropriate and reflect our forecasted long-term business model and give appropriate consideration to our historical results as well as the current economic environment and markets that we serve.

Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries and Public Sector reporting units exceeded their respective carrying values by 72% and 13%, respectively, at December 31, 2017. The most significant assumptions used in the goodwill analysis relate to a 3% long-term organic growth rate for both the Commercial Industries and Public Sector segments as well as a 9.25% and a 8.75% discount rate for the Commercial Industries and Public Sector segments, respectively. The fair values of the Commercial Industries and Public Sector segments are sensitive to changes in the long-term growth rates and the discount rates. A decrease of 50 basis points to the long-term growth rate or an increase to the discount rate of 50 basis points would result in an approximate reduction of fair value of $200 million and $250 million, respectively, in the Public Sector segment.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding goodwill by reportable segment.

Restructuring and Asset Impairments

We have engaged in restructuring actions, which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction, the fair value of assets made redundant or obsolete and the lease cancellation and other exit costs. We accrue for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements.

For additional information regarding our restructuring actions, refer to the "Restructuring and Related Costs" section in the MD&A and Note 7 – Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision is based on nonrecurring events as well as recurring factors, including the taxation of foreign income. In addition, our provision will change based on discrete or other nonrecurring events such as audit settlements, tax law changes, changes in valuation allowances and other factors, that may not be predictable. In the event that there is a significant unusual or one-time item recognized in our operating results, the taxes attributable to that item would be separately calculated and recorded at the same time as an unusual or one-time item.

Table of Contents

We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our Consolidated Balance Sheets, as well as operating loss and tax credit carryforwards. We follow very specific and detailed guidelines in each tax jurisdiction regarding the recoverability of any tax assets recorded in our Consolidated Balance Sheets and provide valuation allowances as required. We regularly review our deferred tax assets for recoverability considering historical profitability, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. Gross deferred tax assets of $250 million and $360 million had valuation allowances of $35 million and $24 million at December 31, 2017 and 2016, respectively. As a result of the 2017 tax law changes in the United States, we recorded provisional amounts for a one-time non-cash $210 million income tax benefit related to adjusting our deferred tax liabilities from a 35% Federal tax rate to a 21% Federal tax rate and the transition tax expense of $12 million.

We are subject to ongoing tax examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon our assessment of the more-likely-than-not outcomes of such matters. In addition, when applicable, we adjust previously recorded tax expense to reflect examination results. Our ongoing assessments of the more-likely-than-not outcomes of examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results. Unrecognized tax benefits were $15 million, $14 million and $24 million at December 31, 2017, 2016 and 2015, respectively.

Refer to Note 12 – Income Taxes in the Consolidated Financial Statements for additional information regarding deferred income taxes and unrecognized tax benefits.

Loss Contingencies

We are currently involved in various claims and legal proceedings. At least quarterly, we review the status of each significant matter and assess its potential financial exposure considering all available information including, but not limited to, the impact of negotiations, settlements, rulings, advice of legal counsel and other updated information and events pertaining to a particular matter. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, we reassess the potential liability related to pending claims and litigation, and may revise estimates. These revisions in the estimates of the potential liabilities could have a material impact on the results of operations and financial position.

Refer to Note 13 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding loss contingencies.

Table of Contents

Financial Information

Financial information for the three years ended December 31, 2017 was as follows:

	Year Ended December 31,			2017 vs. 2016		2016 vs. 2015	
(in millions)	2017	2016	2015	$ Change	% Change	$ Change	% Change
Total Revenues	$ 6,022	$ 6,408	$ 6,662	$ (386)	(6)%	$ (254)	(4)%
Total Cost of services	4,977	5,498	5,977	(521)	(9)%	(479)	(8)%
Gross Margin	**$ 1,045**	**$ 910**	**$ 685**	**$ 135**	**15 %**	**$ 225**	**33 %**

Revenue

Total revenues for 2017 decreased mainly due to the impact from strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, the run-off of our Student Loan business and contract losses. Partially offsetting these declines was an increase from the ramping of new business.

Total revenues for 2016 decreased compared to the prior year as a result of the NY MMIS charge of $83 million, lower volumes, delayed ramping of new business and contract exits, primarily in customer care contracts within our Commercial Industries segment, the run off of our Student Loan business and overall price declines that were consistent with prior-period trends. Partially offsetting these declines were new contracts in the Public Sector.

Cost of Services

Cost of services for 2017 decreased compared to the prior year period primarily due to cost transformation, lost business, wind-down of the NY MMIS contract, run-off of our Student Loan business, strategic contract actions taken by management as part of portfolio management and lower volumes.

Cost of services for 2016 decreased compared to the prior year period primarily due to lost business, the NY MMIS contract, run-off of our Student Loan business and lower volumes.

Gross Margin

Increase in gross margin in 2017 compared to the prior year period was driven primarily by the impact of cost and productivity improvements, including benefits from our strategic transformation program, exiting or remediating certain underperforming contracts and lower costs associated with our Student Loan business. This was partially offset by the run-off of our Student Loan business, contract losses and lower volumes with existing clients.

Increase in gross margin in 2016 compared to the prior year period reflected cost benefits from our strategic transformation initiatives offset by lost business and margin pressures in our customer service offerings and price declines.

Table of Contents

Selling, General and Administrative (SG&A)

Lower SG&A compared to the prior years reflected the impact of our strategic transformation initiatives driving lower wages and benefits, partially offset by the expansion and investment in our sales force.

Restructuring and Related Costs

Restructuring and related costs for the year ended December 31, 2017 include $46 million of lease cancellation costs as part of our effort to consolidate our real estate footprint, $41 million of severance costs due to headcount reductions of approximately 3,200 employees worldwide, $9 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program and $5 million of asset impairments charges.

Restructuring and related costs for the year ended December 31, 2016 include $54 million of severance costs due to headcount reductions of approximately 3,600 employees worldwide, $28 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program, $12 million of asset impairment charges and $7 million of lease cancellation costs.

Refer to Note 7 – Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements for additional information regarding our restructuring programs.

Amortization of Intangible Assets

Amortization of intangible asset decreased in 2017 from the prior year primarily due to the acceleration of amortization of certain trade-names in 2016.

Amortization of intangible assets was higher in 2016 as compared to 2015, primarily due to the acceleration of amortization of certain trade-names associated with prior acquisitions.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding our intangible assets.

Goodwill Impairment

Our Commercial Industries reporting unit experienced declining operating results in 2016 versus expectations. As a result, we recorded a goodwill impairment of $935 million. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding the Goodwill impairment charge.

Separation Costs

Separation costs are primarily for third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies, such as those related to human resources, brand management, real estate and information management to the extent not capitalized. Separation costs also include the costs associated with bonuses and restricted stock grants awarded to employees for retention through the separation.

Interest Expense

Interest expense represents interest on long-term debt and the amortization of debt issuance costs. Interest expense for the year ended December 31, 2017 increased compared to the prior year, primarily due to the issuance of debt with the capitalization of the Company during the spin-off in December 2016 and subsequent borrowing under Term Loan B in January 2017, as well as amounts outstanding at various times throughout the year under the Company's credit facility.

In 2017, the Company successfully repriced its Term Loan B in April and October (Amendments No.1 and No. 2, respectively), which overall resulted in lowering the total interest rate on this loan by 250 basis points to LIBOR plus 3.0%.

Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.

Table of Contents

Related Party Interest

In January 2017, in connection with the spin-off from Xerox Corporation, we paid Xerox $161 million for the final settlement per the Separation and Distribution Agreement.

Related-party interest expense for the year ended December 31, 2016 was lower than the prior year primarily due to the payment of certain related party notes payable in 2015, as a result of the proceeds received from the sale of the ITO business.

Refer to Note 18 – Related Party Transactions and Former Parent Company Investment in the Consolidated Financial Statements for additional information.

(Gain) Loss on Sale of Asset

As disclosed under Item 7. MD&A— Divestiture, we completed five divestitures in 2017 with aggregate proceeds of $56 million. We recorded a pre-tax gain of $16 million on these divestitures. In addition, in 2017 we sold a property located in Dallas, TX, which was formerly the ACS headquarters, for a pre-tax gain of $24 million.

Other (Income) Expense, Net

Other (income) expense, net primarily includes foreign currency transaction losses (gains), litigation and other contingent matters and deferred compensation investment results.

Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted. The effects of changes in tax rates and laws are recognized in the period in which the new legislation is enacted. In the case of US federal income taxes, the enactment date is the date the bill becomes law. The income tax effects of the Tax Reform have been initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform have been provided and adjustments to provisional amounts will be made in subsequent reporting periods as information becomes available to complete provisional computations.

The 2017 effective tax rate was 1,206.3% as compared with 19.9% for the prior year. The 2017 rate was higher than the U.S. statutory tax rate of 35% primarily due to the impact of the Tax Reform, which included the reduction of the U.S. statutory rate from 35% to 21% and a one-time tax on undistributed and previously untaxed post-1986 foreign earnings and profits. Excluding primarily the tax impact of the Tax Reform, the termination of the COLI, amortization of intangible assets and gains on U.S divestitures, the adjusted effective tax rate for 2017 was 33.8%. The Tax Reform is the most significant change to U.S. federal income tax legislation in over 30 years and, as a result, has a disproportionate effect on our 2017 effective tax rate. See Note 12 – Income Taxes for further information regarding the impact of the Tax Reform on our Consolidated Financial Statements.

Deferred tax assets and liabilities are measured and recorded using the enacted tax rates for the periods during which the related temporary differences are expected to reverse or deferred tax attributes are expected to be realized. As a result of the change in future federal statutory tax rate due to the passing of the Tax Reform, the deferred tax assets and liabilities should no longer be valued at a federal statutory rate of 35%, but rather at the rate in which the benefit of the deferred tax liabilities will be realized by the Company. As such, the U.S. federal statutory rate used to value the Company's deferred tax assets and liabilities was 21%, which resulted in a $210 million tax benefit.

The 2016 effective tax rate was lower than the U.S. statutory tax rate due primarily to the impact of the non-deductible Goodwill impairment charge. Excluding primarily the goodwill impairment, NY MMIS, amortization of intangible assets, and restructuring costs, the 2016 normalized effective rate was 29.0%.

Table of Contents

Operations Review of Segments

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate. Beginning in 2017, in an effort to better reflect how we organize and manage our business, we changed our reporting segments to align the Healthcare business based on customer focus between Commercial Industries and Public Sector. All prior years have been adjusted to reflect the new reporting segments.

The following are our results of financial performance by segment for the three years ended December 31, 2017:

(in millions)	Commercial Industries	Public Sector	Other	Total
Year Ended December 31, 2017				
Total Revenue	$ 3,548	$ 2,163	$ 311	$ 6,022
Profit (Loss)	$ 182	$ 245	$ (10)	$ 417
EBITDA[1]	$ 344	$ 330	$ (3)	$ 671
Adjusted EBITDA(1)	$ 344	$ 330	$ (2)	$ 672
% of Total Revenue	58.9%	35.9%	5.2 %	100.0%

Adjusted EBITDA Margin[1]	9.7%	15.3%	(0.6)%	11.2%
Year Ended December 31, 2016				
Total Revenue	$ 3,805	$ 2,308	$ 295	$ 6,408
Adjusted Revenue[1]	$ 3,805	$ 2,308	$ 378	$ 6,491
Profit (Loss)	$ 151	$ 293	$ (248)	$ 196
EBITDA[1]	$ 313	$ 395	$ (182)	$ 526
Adjusted EBITDA[1]	$ 313	$ 395	$ (73)	$ 635
% of Total Revenue	59.4%	36.0%	4.6 %	100.0%
EBITDA Margin[1]	8.2%	17.1%	(61.7)%	8.2%
Adjusted EBITDA Margin[1]	8.2%	17.1%	(19.3)%	9.8%
Year Ended December 31, 2015				
Total Revenue	$ 4,059	$ 2,331	$ 272	$ 6,662
Adjusted Revenue[1]	$ 4,059	$ 2,331	$ 388	$ 6,778
Profit (Loss)	$ 148	$ 298	$ (509)	$ (63)
EBITDA[1]	$ 308	$ 416	$ (440)	$ 284
Adjusted EBITDA[1]	$ 308	$ 416	$ (85)	$ 639
% of Total Revenue	60.9%	35.0%	4.1 %	100.0%
EBITDA Margin[1]	7.6%	17.8%	(161.8)%	4.3%
Adjusted EBITDA Margin[1]	7.6%	17.8%	(21.9)%	9.4%

(1) Refer to the reconciliations table in the "Non-GAAP Financial Measures" section.

Commercial Industries Segment

Revenue

Commercial Industries revenue 2017 as compared to prior year decreased, primarily driven by strategic contract actions, lower volumes in our customer care offerings and lost business, partially offset by revenue from new contracts and price increases with existing clients. Commercial Industries revenue for 2016 decreased from the prior year, mainly driven by lost business, lower volumes in our customer care offerings and reduced level of project work as a result of fewer large cases in our litigation services offering, negative impacts from currency and strategic contract exits. Partially offsetting the decline were new contract signings, primarily in our high-tech business area.

Table of Contents

Segment Profit

Increase in the Commercial Industries segment profit for 2017 as compared to the prior year, was primarily driven by reduced costs as a result of our strategic transformation initiatives, including contract remediation and strategic contract actions, partially offset by the overall revenue decline. The Commercial Industries segment profit for 2016 as compared to the prior year was largely flat, primarily due to overall benefits from costs and productivity initiatives, partially offset by margin pressure in our customer care services offering and reduced project work in our litigation services offering.

Public Sector Segment

Revenue

Public Sector revenue for 2017 as compared to prior year decreased, primarily driven by strategic decisions and contract losses in State & Local, Government Healthcare and Payment Services. Public Sector revenue for 2016 decreased as compared to the prior year, primarily due to lower volumes and lost business in State Government Services, partially offset by new business.

Segment Profit

Decrease in the Public Sector segment profit for 2017 as compared to the prior year was mainly due to strategic decisions, contract losses in Government Healthcare, as well as losses in our Payment Services business, partially mitigated by our strategic transformation initiative. Decrease in the Public Sector segment profit for 2016 as compared to prior year was primarily due to the impact of lost business in State Government Services, partially offset by costs and productivity initiatives and improved performance in our transportation offering.

Other

Revenue

Other revenue for 2017 improved compared to 2016, primarily due to improved pricing and performance from two large Health Enterprise clients, partially offset by the exit from the NY MMIS contract and the strategic run-off of the Student Loan business. Other revenue for 2016 increased compared to 2015 as a result of the non-recurring $116 million HE charge in 2015, partially offset by the $83 million write-off of NY MMIS in 2016, the continued run-off of the Student Loan business, partially offset by our prior-year decision to not complete the HE implementations in California and Montana.

Segment Loss

Other loss for 2017 improved, primarily due to improved profitability in the student loan business, improved pricing from a contract extension with a large Health Enterprise client and general operational efficiencies in the HE business. Other loss for 2016 improved as a result of the non-recurring $389 million HE charge in 2015, partially offset by the $161 million write-off of the NY MMIS, partially offset by improvements in HE platform implementation expenses resulting from the decision to not fully complete the HE platform implementation in California and Montana.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table do not reflect the impact of our adoption of the new revenue recognition standard on January 1, 2018. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies for further discussion of the estimated impact of the adoption of this standard.

Table of Contents

(in millions)	Year Ended December 31, 2017	2016	2015	2017 vs. 2016 $ Change	% Change	2016 vs. 2015 $ Change	% Change
New business TCV	$ 2,260	$ 2,527	$ 4,345	$ (267)	(11)%	$ (1,818)	(42)%
Renewals TCV	2,692	4,325	3,637	(1,633)	(38)%	688	19 %
Total Signings	$ 4,952	$ 6,852	$ 7,982	$ (1,900)	(28)%	$ (1,130)	(14)%
Annual recurring revenue signings	$ 533	$ 589	$ 883	$ (56)	(10)%	$ (294)	(33)%
Non-recurring revenue signings	$ 383	$ 438	$ 451	$ (55)	(13)%	$ (13)	(3)%

Signings for 2017 decreased compared to the prior year mainly due to strategic decisions by management to streamline our portfolio which impacted both new business and renewal volume. Partially offsetting these declines were new business wins in targeted offerings and expansion with certain existing clients.

Signings for 2016 decreased compared to the prior year, primarily reflecting lower contribution from new business, due in part to our decision not to pursue opportunities with lower margins and the prior year large NY MMIS new business signing.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rate for 2017 was 94% and above our target range of 85%-90%. Including all contracts, renewals would have been 87%.

Capital Resources and Liquidity

As of December 31, 2017 and 2016, total cash and cash equivalents were $658 million and $390 million, respectively. As of December 31, 2017, there were $1,574 million outstanding borrowings under our credit facility and we utilized $12 million of our revolving credit facility capacity to issue letters of credit. In addition, we will make payments in 2018 of $99 million to participants of the terminated deferred compensation plans.

Refer to the *Capital Market Activity* section below for additional information regarding our capital activity.

Cash Flow Analysis

The following summarizes our cash flows for the three years ended December 31, 2017, as reported in our Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements:

(in millions)	Year Ended December 31, 2017	2016	2015	Change 2017	2016
Net cash provided by operating activities	$ 302	$ 108	$ 493	$ 194	$ (385)
Net cash provided by investing activities	74	16	522	58	(506)
Net cash provided by (used in) financing activities	(109)	132	(1,023)	(241)	1,155

Operating Activities

The increase in cash generated from operating activities for the year ended December 31, 2017 was primarily attributable to improvements in working capital and reduced wind-down payments associated with implementations in California, Montana and New York, partially offset by a higher interest payments on our outstanding debt.

The decrease in cash generated from operating activities for the year ended December 31, 2016 was primarily attributable to reduced factoring, HE settlement payments and working capital partially offset by lower net income tax payments due to income tax refunds.

Table of Contents

Investing Activities

The increase in cash provided by investing activities for the year ended December 31, 2017 compared to the year ended December 31, 2016 was primarily related to $117 million in proceeds received on the liquidation of investments related to the termination of the deferred compensation plan, $56 million of proceeds from the sale of business and assets as compared to payments of $54 million in 2016, $86 million of lower net additions to land, buildings and equipment, partially offset by non-recurring proceeds of $248 million on related party notes receivable in 2016.

The decrease in cash provided by investing activities for the year ended December 31, 2016 compared to the year ended December 31, 2015 was primarily related to $54 million of payments for the sale of business and assets as compared to proceeds of $742 million in 2015, partially offset by proceeds of $248 million from related party notes receivable in 2016.

Financing Activities

The change to cash used in financing activities for the year ended December 31, 2017 compared to cash provided by for the year ended December 31, 2016 was primarily related to a decrease of $1.7 billion in proceeds from long term debt and an increase in debt payments of $209 million, partially offset by a reduction in payments to former parent of $1.6 billion.

The change to cash provided by financing activities for the year ended December 31, 2016 compared to cash used for the year ended December 31, 2015 was primarily related to an increase of $1.9 billion in proceeds from long term debt and a reduction in payments on debt of $261 million, partially offset by an increase in payments to former parent of $957 million.

Capital Market Activity

In April 2017, we entered into Amendment No. 1 to the Credit Agreement, which reduced the interest rate on our Term Loan B by 1.5% from 5.5% over LIBOR to 4.0% over LIBOR. Subsequently in October 2017, we entered into Amendment No. 2, which reduced the interest rate on our Term Loan B by 1.0% from 4.0% over LIBOR to 3.0% over LIBOR.

In January 2017, we borrowed an additional $100 million on Term Loan B with proceeds used for general corporate purposes.

Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.

Financial Instruments

Refer to Note 9 – Financial Instruments in the Consolidated Financial Statements for additional information.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

At December 31, 2017, we had the following contractual cash obligations and other commercial commitments and contingencies:

(in millions)	2018	2019	2020	2021	2022	Thereafter
Total debt, including capital lease obligations[1]	$ 82	$ 72	$ 85	$ 560	$ 9	$ 1,309
Interest on debt[2]	115	113	110	107	91	156
Minimum operating lease commitments[3]	163	119	80	53	31	52
Defined benefit pension plans	8	—	—	—	—	—
Estimated Purchase Commitments[4]	116	100	68	38	21	—
Total	$ 484	$ 404	$ 343	$ 758	$ 152	$ 1,517

(1) Total debt represents principal debt and capital leases. Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information regarding debt.
(2) Represents interest on debt. Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.
(3) Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information.

Table of Contents

(4) Other purchase commitments: We enter into other purchase commitments with vendors in the ordinary course of business. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We currently do not have, nor do we anticipate, material loss contracts.

Pension Benefit Plans

We sponsor defined benefit pension plans that require periodic cash contributions. Our 2017 cash contributions for these plans were $8 million. In 2018, based on current actuarial calculations, we expect to make contributions of approximately $8 million to our worldwide defined benefit pension plans.

Contributions to our defined benefit pension plans in subsequent years will depend on a number of factors, including the investment performance of plan assets and discount rates as well as potential legislative and plan changes. At December 31, 2017, the unfunded and underfunded balances of our U.S. and non-U.S. defined benefit pension plans were $40 million and $19 million, respectively.

Refer to Note 11 – Employee Benefit Plans in the Consolidated Financial Statements for additional information regarding contributions to our defined benefit pension and post-retirement plans.

Other Contingencies and Commitments

As more fully discussed in Note 13 – Contingencies and Litigation in the Consolidated Financial Statements, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. In addition, guarantees, indemnifications and claims may arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates. Nonperformance under a contract including a guarantee, indemnification or claim could trigger an obligation of the Company.

We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. Should developments in any of these areas cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs.

Off-Balance Sheet Arrangements

As of December 31, 2017, we do not believe we have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

In addition, refer to the preceding table for the Company's contractual cash obligations and other commercial commitments and Note 13 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding contingencies, guarantees, indemnifications and warranty liabilities.

Non-GAAP Financial Measures

We have reported our financial results in accordance with U.S. generally accepted accounting principles (GAAP). In addition, we have discussed our results using the non-GAAP measures described below.

Table of Contents

We believe these non-GAAP measures allow investors to better understand the trends in our business and to better understand and compare our results. Accordingly, we believe it is necessary to adjust several reported amounts, determined in accordance with GAAP, to exclude the effects of certain items as well as their related tax effects. Management believes that these non-GAAP financial measures provide an additional means of analyzing the current periods' results against the corresponding prior periods' results. However, these non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with U.S. GAAP. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable U.S. GAAP measures and should be read only in conjunction with our Consolidated Financial Statements prepared in accordance with U.S. GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions and providing such non-GAAP financial measures to investors allows for a further level of transparency as the factors management uses in planning for and forecasting future periods. Compensation of our executives is based in part on the performance of our business based on these non-GAAP measures.

A reconciliation of the non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with U.S. GAAP are provided in the tables below.

These reconciliations also include the income tax effects of our non-GAAP performance measures in total, to the extent applicable. The income tax effects are calculated under the same accounting principles as applied to our reported pre-tax performance measures under ASC 740, which employs an annual effective tax rate method. The income tax effect for our non-GAAP performance measures is effectively the difference in income taxes for reported and adjusted pre-tax income calculated under the annual effective tax rate method. The tax effect of the non-GAAP adjustments was calculated based upon evaluation of the statutory tax treatment and the applicable statutory tax rate in the jurisdictions in which such charges were incurred.

Adjusted Revenue, Adjusted Operating Income and Adjusted Operating Margin*

We make adjustments to Revenue and Pre-tax income (Loss) for the following items for the purpose of calculating Adjusted Revenue, Adjusted Operating Income and Adjusted Operating Margin.

- Goodwill Impairment. Represents Goodwill Impairment charge of $935 million.
- Amortization of intangible assets. The amortization of intangible assets is driven by acquisition activity, which can vary in size, nature and timing as compared to other companies within our industry and from period to period.
- NY MMIS. Revenue and costs associated with the Company not fully completing the State of New York Health Enterprise Platform project.
- Restructuring and related costs. Restructuring and related costs include restructuring and asset impairment charges as well as costs associated with our strategic transformation program.
- HE charge. Revenue and costs associated with not fully completing the Health Enterprise Medical Platform projects in California and Montana.
- Separation costs. Separation costs are expenses incurred in connection with separation from Xerox Corporation into a separate, independent, publicly traded company. These costs primarily relate to third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies.
- Interest expense. Interest expense includes interest on long-term debt and amortization of debt issuance costs.
- Related party interest. Related party interest relates interest on related party Notes payable from Xerox prior to the Separation.
- Other (income) expenses, net. Other (income) expenses, net includes currency (gains) losses, net, litigation matters and all other (income) expenses, net.
- (Gain) loss on sale of asset and businesses.

** Applies to both consolidated and segment disclosures.*

We provide our investors with adjusted operating income and adjusted operating margin information, as supplemental information, because we believe it offers added insight, by itself and for comparability between periods, by adjusting for certain non-cash items as well as certain other identified items which we do not believe are indicative of our ongoing business and may also provide added insight on trends in our ongoing business.

Table of Contents

Adjusted Net Income (Loss), Adjusted Earnings per Share and Adjusted Effective Tax Rate

We made adjustments to Income (Loss) before Income Taxes for the following items for the purpose of calculating Adjusted Net Income (Loss), Adjusted Earnings per Share and Adjusted Effective Tax Rate:

- Goodwill Impairment.
- Amortization of intangible assets.
- NY MMIS.
- Restructuring and related costs.
- HE charge.
- Separation costs.
- (Gain) loss on sale of asset and businesses.
- Other (income) expenses, net.

The Company provides adjusted net income and adjusted EPS financial measures to assist our investors in evaluating our ongoing operating performance for the current reporting period and, where provided, over different reporting periods, by adjusting for certain items which may be recurring or non-recurring and which in our view do not necessarily reflect ongoing performance. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions.

Management believes that adjusted effective tax rate, provided as supplemental information, facilitates a comparison by investors of our actual effective tax rate with an adjusted effective tax rate which reflects the impact of the items which are excluded in providing adjusted net income, and may provide added insight into our underlying business results and how effective tax rates impact our ongoing business.

Segment and Consolidated Adjusted EBITDA and EBITDA Margin

We use Adjusted EBITDA and Adjusted EBITDA Margin as additional way of assessing certain aspects of our operations that, when viewed with the GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, provide a more complete understanding of our on-going business. Adjusted EBITDA represents income (loss) before interest, income taxes, depreciation and amortization adjusted for the following items:

- Goodwill Impairment.
- Restructuring and related costs.
- Separation costs.
- Other (income) expenses, net.
- NY MMIS.
- NY MMIS depreciation
- HE charge.
- HE charge depreciation.
- (Gain) loss on sale of asset and businesses.
- Business transformation costs (Segment only).

Adjusted EBITDA and Adjusted EBITDA Margin are not intended to represent cash flows from operations, operating income (loss) or net income (loss) as defined by U.S. GAAP as indicators of operating performances. Management cautions that amounts presented in accordance with Conduent's definition of Adjusted EBITDA may not be comparable to similar measures disclosed by other companies because not all companies calculate Adjusted EBITDA in the same manner.

Key Financial Ratios

We make adjustments to Gross margin and SG&A as a percentage on Revenue:

- NY MMIS.
- HE charge.

Table of Contents

The Company provides adjusted gross margin and adjusted SG&A as a percentage of revenue to assist our investors in evaluating our ongoing operating performance for the current reporting period and, where provided, over different reporting periods, by adjusting for certain items which may be recurring or non-recurring and which in our view do not necessarily reflect ongoing performance. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions.

Non-GAAP Reconciliations

Net Income (Loss) and EPS Reconciliation:

	Year Ended December 31, 2017		Year Ended December 31, 2016		Year Ended December 31, 2015	
(in millions; except per share amounts)	Net Income (Loss)	EPS	Net Income (Loss)	EPS	Net Income (Loss)	EPS

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from foreign currency exchange rates, which could affect operating results, financial position and cash flows. We manage our exposure to this market risk through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We utilized derivative financial instruments to hedge economic exposures, as well as reduce earnings and cash flow volatility resulting from shifts in market rates. We also hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Table of Contents

Recent market events have not caused us to materially modify or change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 9 – Financial Instruments in the Consolidated Financial Statements for additional discussion on our financial risk management.

Foreign Exchange Risk Management

Assuming a 10% appreciation or depreciation in foreign currency exchange rates from the quoted foreign currency exchange rates at December 31, 2017, the potential change in the fair value of foreign currency-denominated assets and liabilities in each entity would not be significant because all material currency asset and liability exposures were economically hedged as of December 31, 2017. A 10% appreciation or depreciation of the U.S. Dollar against all currencies from the quoted foreign currency exchange rates at December 31, 2017 would have an impact on our cumulative translation adjustment portion of equity of approximately $54 million. The net amount invested in foreign subsidiaries and affiliates, primarily in the U.K. and Europe, and translated into U.S. Dollars using the year-end exchange rates, was approximately $542 million at December 31, 2017.

Interest Rate Risk Management

The consolidated weighted-average interest rates related to our total debt for 2017 approximated 3.11% for Term A Loan due 2021, 6.79% for Term B Loan due 2023, 10.91% for Senior Notes due 2024 and 4.39% for capital lease obligations. As of December 31, 2017, $1,607 million of our total debt of $2,117 million carried variable interest rates. The fair values of our fixed rate financial instruments are sensitive to changes in interest rates and at December 31, 2017, a 10% increase in market interest rates would decrease the fair values of such financial instruments by approximately $19 million. A 10% decrease in market interest rates would increase the fair values of such financial instruments by approximately $52 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Conduent Incorporated

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Conduent Incorporated and its subsidiaries as of December 31, 2017 and 2016, and the related consolidated statements of income (loss), comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2017, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2017 appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016**,** and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Table of Contents

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORTS OF MANAGEMENT

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have free access to the Audit Committee.

CONDUENT INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation and Summary of Significant Accounting Policies

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

We are a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end user experience. We create value for our commercial and government clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

Our Consolidated Financial Statements included the historical basis of assets, liabilities, revenues and expenses of the individual businesses of the Company, including joint ventures and partnerships over which the Company has a controlling financial interest. We have prepared the Consolidated Financial Statements pursuant to the rules and regulations of the SEC. Certain reclassifications have been made to prior years to conform to the current year presentation. All intercompany transactions and balances have been eliminated.

We have also considered the impact of subsequent events on these consolidated financial statements.

Separation from Xerox Corporation

On December 31, 2016, Conduent spun-off from Xerox Corporation (Xerox), pursuant to the Separation and Distribution Agreement (Separation). The Separation was completed by way of a pro rata distribution of Conduent shares held by Xerox to Xerox’s shareholders. As a result, we operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

Prior to December 31, 2016, the Financial Statements of the Company were derived from the financial statements and accounting records of Xerox as if the Conduent operated on a standalone basis. Historically, the Company consisted of the Business Process Outsourcing Operating segment within Xerox’s reportable Services segment and did not operate as a separate, standalone company. Accordingly, Xerox performed certain corporate overhead functions for the Company. Therefore, certain corporate costs, including compensation costs for corporate employees supporting the Company, were allocated from Xerox. It is not practicable to estimate actual costs that would have been incurred had the Company been a separate standalone company during the periods presented. Allocations for management costs and corporate support services provided to the Company totaled $165 million and $170 million for years ended December 31, 2016 and December 31, 2015, respectively. Management of the Company believes the assumptions regarding the allocated expenses reasonably reflect the utilization of services provided to or the benefit received by the Company during the periods prior to the Separation. The Consolidated Financial Statements for the periods prior to the Separation do not necessarily include all the expenses that would have been incurred or held by the Company had it been a separate, standalone company.

Table of Contents

Use of Estimates

We prepared the Consolidated Financial Statements using financial information available at the time of preparation, which requires us to make estimates and assumptions that affect the amounts reported. Our most significant estimates pertain to the recognition of revenue for contracts based on the percentage of completion method of accounting, intangible and long-lived assets, valuation of goodwill, contingencies and litigation, income taxes and corporate allocations (for years ended December 31, 2016 and 2015). Our estimates are based on management's best knowledge of current events, historical experience, and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates.

New Accounting Standards

Revenue Recognition: In May 2014, the Financial Accounting Standards Board (FASB) updated the accounting guidance related to revenue recognition to clarify the principles for recognizing revenue and replaced all existing revenue recognition guidance in U.S. GAAP with one accounting model. The core principle of the guidance is that an entity should recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The updated guidance also requires additional qualitative and quantitative disclosures relating to the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers largely on a disaggregated basis. We have evaluated the adoption impact of the updated accounting guidance on our consolidated financial statements and continue to evaluate the impact on disclosures and internal controls. The new guidance will impact: (1) revenue associated with postage, which will be recognized on a net basis versus the current gross treatment; (2) the timing of revenue recognition associated with fixed fees for certain contracts with more than one performance obligation; and (3) the timing of recognition of certain pricing discounts. We adopted this updated accounting guidance beginning January 1, 2018 using the modified retrospective method under which we will recognize a cumulative-effect adjustment of approximately $20 million at the date of adoption (the expected impact to 2018 revenues is approximately $15 million), which excludes changes to our revenue associated with the reimbursement of postage. In addition, we recognized approximately $150 million of postage revenue in 2017 that will be recognized on a net basis (for all future periods) in Cost of services.

Leases: In February 2016, the FASB updated the accounting guidance related to leases requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases except short term leases (lease term of 12 months or less). The accounting for lessors is largely unchanged. This updated guidance is effective for us beginning January 1, 2019. This guidance must be adopted using a modified retrospective approach through a cumulative-effect adjustment for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. While we are currently evaluating the impact of the updated accounting guidance on our consolidated financial statements; we do expect a material impact to the Company's Consolidated Balance Sheets.

Cash Flows: In November 2016 the FASB issued updated accounting guidance regarding the presentation of restricted cash in the statement of cash flows. Specifically, this update requires that restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. At December 31, 2017 and 2016, we had $9 million and $22 million of restricted cash, respectively, reported in other current assets. This update is effective for us beginning January 1, 2018.

Business Combinations: In January 2017, the FASB issued clarifying accounting guidance related to the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This update is effective for us beginning January 1, 2018, with early adoption permitted. The amendment in this update will be applied prospectively. There will be no material impact from the adoption of this clarifying accounting guidance on our consolidated financial statements.

Table of Contents

Recently Adopted Accounting Standards

Goodwill: In January 2017, the FASB issued updated accounting guidance for simplifying the goodwill impairment test. Under the new guidance, an entity does not have to calculate the implied fair value of goodwill at the impairment testing date of its assets and liabilities as if those assets and liabilities had been acquired in a business combination. Instead the goodwill impairment test will compare the fair value of a reporting unit with its carrying amount and recognize as an impairment charge any amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit. We have elected to early adopt this new guidance for our goodwill impairment tests performed after January 1, 2017. Adoption did not have any effect on our financial condition, results of operations or cash flows.

Summary of Accounting Policies

Revenue Recognition

We primarily generate revenue through services. Revenue is recognized when it is realized or realizable and earned. We consider revenue realized or realizable and earned when we have persuasive evidence of an arrangement, delivery has occurred, the transaction price is fixed or determinable and collectibility is reasonably assured. Delivery does not occur until services have been provided to the customer, risk of loss has transferred to the customer, and either customer acceptance has been obtained, customer acceptance provisions have lapsed or the company has objective evidence that the criteria specified in the customer acceptance provisions have been satisfied. The transaction price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

Outsourcing Services: Revenues associated with outsourcing services are generally recognized as services are rendered, which is generally on the basis of the number of accounts or transactions processed. In service arrangements where final acceptance of a system or solution by the customer is required, revenue is deferred until all acceptance criteria have been met. Revenues on cost reimbursable contracts are recognized by applying an estimated factor to costs as incurred, determined by the contract provisions and prior experience. Revenues on unit-price contracts are recognized at the contractual selling prices as work is completed and accepted by the customer. Revenues on time and material contracts are recognized at the contractual rates as the labor hours and direct expenses are incurred.

Revenues on certain fixed price contracts where we provide system development and implementation services are recognized over the contract term based on the percentage of development and implementation services that are provided during the period compared with the total estimated development and implementation services to be provided over the entire contract using the percentage-of-completion accounting methodology. These services require that we perform significant, extensive and complex design, development, modification or implementation of our customers' systems. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement.

The percentage-of-completion methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed, on a current cumulative cost to an estimated total cost basis, using a reasonably consistent profit margin over the period.

Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided. We recognize revenues for non-refundable, upfront implementation fees on a straight-line basis over the period between the initiation of the services through the end of the contract term.

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract.

Spending associated with customer-related deferred set-up/transition and inducement costs were as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Set-up/transition and inducement expenditures	$ 55	$ 63	$ 65

Table of Contents

The capitalized amount of customer contract costs were as follows:

	Year Ended December 31,	
(in millions)	2017	2016
Capitalized customer contract costs [1]	126	137

(1) The balance at December 31, 2017 and 2016 are expected to be amortized over a weighted average period of approximately nine and eight years, respectively.

Amortization expense for the next five years and thereafter is expected to be as follows (in millions):

2018	2019	2020	2021	2022	Thereafter
$ 54	$ 22	$ 13	$ 9	$ 6	$ 22

Long-lived assets used in the fulfillment of the arrangements are capitalized and depreciated over the shorter of their useful life or the term of the contract if an asset is contract specific.

Multiple Element Arrangements: As described above, we enter into the following revenue arrangements that may consist of multiple deliverables including contracts for multiple types of outsourcing services, as well as professional and value-added services. For instance, we may contract for an implementation or development project and also provide services to operate the system which we implement or develop over a period of time; or we may contract to scan, manage and store customer documents.

In substantially all of our multiple element arrangements, we are able to separate the deliverables since we normally will meet both of the following criteria:

- The delivered item(s) has value to the customer on a stand-alone basis; and
- If the arrangement includes a general right of return relative to the delivered item(s), delivery or performance of the undelivered item(s) is considered probable and substantially in our control.

Consideration in a multiple-element arrangement is allocated at the inception of the arrangement to all deliverables on the basis of the relative selling price. When applying the relative selling price method, the selling price for each deliverable is primarily determined based on vendor-specific objective evidence (VSOE), third-party evidence (TPE), or our best estimate of the selling price. The above noted revenue policies are then applied to each separated deliverable, as applicable.

Revenue Reporting: Revenue from sales of third-party vendor products or services is recorded net of costs when the Company is acting as an agent between the customer and the vendor or supplier, or gross when the Company is a principal to the transaction. Postage is generally recognized on a gross basis. Several factors are considered to determine whether the company is an agent or principal, most notably whether the Company is the primary obligor to the customer, or has inventory risk. Consideration is also given to whether the Company adds meaningful value to the vendor's product or service, was involved in the selection of the vendor's product or service, has latitude in establishing the sales price or has credit risk.

Revenue-based Taxes: We report revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The primary revenue-based taxes are sales tax and value-added tax (VAT).

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, including money market funds and investments with original maturities of three months or less.

Receivable Sales

We had transferred certain portions of our receivable portfolios in 2016 and 2015 and accounted for those transfers as sales based on meeting the criteria for derecognition. Losses on the sale of receivables depend, in part, on both (a) the cash proceeds and (b) the net non-cash proceeds received or paid. When we have sold receivables, we normally received beneficial interests in the transferred receivables from the purchasers as part of the proceeds. Refer to Note 4 – Accounts Receivable, Net for more details on our receivable sales.

Table of Contents

Assets/Liabilities Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale.

In the fourth quarter of 2017, Management approved for disposal through sale of certain assets and businesses. This action was taken as a result of our strategic evaluation of these businesses. As of December 31, 2017, these businesses qualified as assets held for sale. During the year ended December 31, 2017, we reclassified $757 million to assets held for sale and $169 million to liabilities held for sale, as we have an active program to locate buyers for these businesses and we expect these businesses to be sold within one year.

Refer to Note 3 – Assets/Liabilities Held for Sale for further discussion.

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost. Buildings and equipment are depreciated over their estimated useful lives. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life. Significant improvements are capitalized and maintenance and repairs are expensed when incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further discussion.

Software - Internal Use and Product

Internal Use: We capitalize direct costs associated with developing, purchasing or otherwise acquiring software for internal use and amortize these costs on a straight-line basis over the expected useful life of the software, beginning when the software is implemented (Internal Use Software). Costs incurred for upgrades and enhancements that will not result in additional functionality are expensed as incurred. Amounts expended for Internal Use Software are included in Cash Flows from Investing.

Product: We also capitalize certain costs related to the development of software solutions to be sold to our customers upon reaching technological feasibility (Product Software). These costs are amortized on a straight-line basis over the estimated economic life of the software. Amounts expended for Product Software are included in Cash Flows from Operations. We perform periodic reviews to ensure that unamortized Product Software costs remain recoverable from estimated future operating profits (net realizable value or NRV). Costs to support or service licensed software are charged to Costs of outsourcing as incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further information.

Goodwill

For acquired businesses, the Company records the acquired assets and assumed liabilities based on their relative fair values at the date of acquisitions (commonly referred to as the purchase price allocation). Goodwill represents the excess of the purchase price paid in excess of the fair value of net tangible and intangible assets acquired. For the Company's business acquisitions, the purchase price is allocated to identifiable intangible assets separate from goodwill if they are from contractual or other legal rights, or if they could be separated from the acquired business and sold, transferred, licensed, rented or exchanged.

Table of Contents

We test goodwill for impairment annually or more frequent if an event or change in circumstances indicate the asset may be impaired. Impairment testing for goodwill is done at the reporting unit level. We determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. If the fair value of a reporting unit is less than its carrying amount, an impairment charge would be recognized for amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Other Intangible Assets

Other intangible assets primarily consist of assets acquired through business combinations, including installed customer base and distribution network relationships, patents and trademarks. Other intangible assets are amortized on a straight-line basis over their estimated economic lives unless impairment is identified.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, including buildings, equipment, internal use software, product software and other intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. If these cash flows are less than the carrying value of such asset, an impairment loss is recognized for the difference between estimated fair value and carrying value. Our primary measure of fair value is based on forecasted cash flows.

Pension Obligations

We sponsor various forms of defined benefit pension plans in several countries covering employees who meet eligibility requirements.

Several statistical and other factors that attempt to anticipate future events are used in calculating the expense, liability and asset values related to our pension plans. These factors include assumptions we make about the discount rate, expected return on plan assets, the rate of future compensation increases and mortality rates.

The discount rate is used to present value our future anticipated benefit obligations. The discount rate reflects the current rate at which benefit liabilities could be effectively settled considering the timing of expected payments for plan participants. In estimating our discount rate, we consider rates of return on high-quality fixed-income investments adjusted to eliminate the effects of call provisions, as well as the expected timing of pension and other benefit payments.

The expected rate of return on plan assets is the long-term rate of return we expect to earn on plan assets. When estimating the expected rate of return, in addition to assessing recent performance, we consider the historical returns earned on plan assets, the rates of return expected in the future, and our investment strategy and asset mix with respect to the plans' funds. The expected rate of return on plan assets is reviewed annually and revised, as necessary, to reflect changes in financial markets and our investment strategy.

Each year, the difference between the actual return on plan assets and the expected return on plan assets, as well as increases or decreases in the benefit obligation as a result of changes in the discount rate and other actuarial assumptions, are added to or subtracted from any cumulative actuarial gain or loss from prior years. This amount is the net actuarial gain or loss recognized in Accumulated other comprehensive loss. We amortize net actuarial gains and losses as a component of net pension cost for a year if, as of the beginning of the year, that net gain or loss (excluding asset gains or losses that have not been recognized in market-related value) exceeds 10% of the greater of the projected benefit obligation or the market-related value of plan assets (the "corridor" method). This determination is made on a plan-by-plan basis. If amortization is required for a particular plan, we amortize the applicable net gain or loss in excess of the 10% threshold on a straight-line basis in net periodic pension cost over the remaining service period of the employees participating in that pension plan. In plans where substantially all participants are inactive, the amortization period for the excess is the average remaining life expectancy of the plan participants.

All changes are ultimately recognized as components of net periodic benefit cost, except to the extent they may be offset by subsequent changes. At any point, changes that have been identified and quantified but not recognized as components of net periodic benefit cost, are recognized in Accumulated other comprehensive loss, net of tax.

Table of Contents

Refer to Note 11 – Employee Benefit Plans for further information regarding our Pension Benefit Obligations.

Income Taxes

We account for income taxes under the asset and liability method. Deferred tax assets and liabilities are based on differences between U.S. GAAP reporting and tax bases of assets or liabilities and based on current tax laws, regulations and rates.

The recognition of deferred tax assets requires an assessment to determine the realization of such assets. Management establishes valuation allowances on deferred tax assets when it is determined "more-likely-than-not" that some portion or all of the deferred tax assets may not be realized. Management considers positive and negative evidence in evaluating the ability of the Company to realize its deferred tax assets, including its historical results and forecasts of future ability to realize its deferred tax assets, including projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies.

We are subject to ongoing tax examinations and assessments in various jurisdictions. We have unrecognized tax benefits for uncertain tax positions. We follow U.S. GAAP which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results.

Refer to Note 12 – Income Taxes for further discussion.

Foreign Currency Translation and Re-measurement

The functional currency for most foreign operations is the local currency. Net assets are translated at current rates of exchange and income, expense and cash flow items are translated at average exchange rates for the applicable period. The translation adjustments are recorded in Accumulated other comprehensive loss.

The U.S. Dollar is used as the functional currency for certain foreign subsidiaries that conduct their business in U.S. Dollars. A combination of current and historical exchange rates is used in re-measuring the local currency transactions of these subsidiaries and the resulting exchange adjustments are recorded in Currency (gains) and losses within other expenses, net together with other foreign currency re-measurements.

Note 2 – Segment Reporting

Our reportable segments correspond to how we organize and manage the business, as defined by our CEO who is also our Chief Operating Decision Maker, and are aligned to the industries in which our clients operate. Our segments involve the delivery of business process services and include service arrangements where we manage a customer's business activity or process. We report our financial performance based on the two reportable segments: Commercial Industries and Public Sector.

- **Commercial Industries:** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries (other than healthcare). Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include customer care, human resource management and finance and accounting services. These services are complemented by innovative industry-specific services such as personalized product information for the automotive industry; digitized source-to-pay solutions for clients in the manufacturing industry; customer experience and marketing services for clients in the retail industry; mortgage and consumer loan processing for clients in the financial services industry; and customized workforce learning solutions for clients in the aerospace industry.
- **Public Sector:** Our Public Sector segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.

Other includes our Government Health Enterprise Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients; our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations.

Table of Contents

Selected financial information for our reportable segments was as follows:

(in millions)	Year Ended December 31, Commercial Industries	Public Sector	Other	Total
2017				
Revenue	$ 3,486	$ 2,160	$ 334	$ 5,980
Former parent company revenue	42	—	—	42
Inter-segment revenue	20	3	(23)	—
Total Segment Revenue	$ 3,548	$ 2,163	$ 311	$ 6,022
Depreciation and amortization	$ 162	$ 85	$ 7	$ 254
Segment profit (loss)	182	245	(10)	417
2016				
Revenue	$ 3,729	$ 2,300	$ 329	$ 6,358
Former parent company revenue	50	1	(1)	50
Inter-segment revenue	26	7	(33)	—
Total Segment Revenue	$ 3,805	$ 2,308	$ 295	$ 6,408
Depreciation and amortization	$ 162	$ 102	$ 69	$ 333
Segment profit (loss)	151	293	(248)	196
2015				
Revenue	$ 3,970	$ 2,324	$ 315	$ 6,609
Former parent company revenue	54	—	(1)	53
Inter-segment revenue	35	7	(42)	—
Total Segment Revenue	$ 4,059	$ 2,331	$ 272	$ 6,662
Depreciation and amortization	$ 160	$ 118	$ 72	$ 350
Segment profit (loss)	148	298	(509)	(63)

The following is a reconciliation of segment profit (loss) profit to pre-tax (loss) income:

(in millions)	Year Ended December 31, 2017	2016	2015
Segment Profit (Loss) Reconciliation to Pre-tax Loss			
Pre-tax Loss	$ (16)	$ (1,227)	$ (574)
Reconciling items:			
Goodwill impairment	—	935	—
Amortization of intangible assets	243	280	250
Restructuring and related costs	101	101	159
Interest expense	137	14	8
Related party interest	—	26	61
Separation costs	12	44	—
(Gain) Loss on sale of asset and businesses	(42)	2	—
Business transformation costs	—	3	3
Other (income) expenses, net	(18)	18	30
Total Segment Profit (Loss)	$ 417	$ 196	$ (63)

Table of Contents

Geographic area data is based upon the location of the subsidiary reporting the revenue or long-lived assets and is as follows for each of the years ended December 31:

	Revenues			Long-Lived Assets [1]	
(in millions)	2017	2016	2015	2017	2016
United States	$ 5,303	$ 5,686	$ 5,849	$ 289	$ 325
Europe	538	547	616	42	47
Other areas	181	175	197	54	64
Total Revenues and Long-Lived Assets	$ 6,022	$ 6,408	$ 6,662	$ 385	$ 436

(1) Long-lived assets are comprised of (i) Land, buildings and equipment, net, (ii) Internal use software, net and (iii) Product software, net.

In 2016, our methodology to disclose revenue on a geographic basis changed to reflect where the work is contracted. All prior years have been adjusted to reflect this change in methodology.

Note 3 – Assets/Liabilities Held for Sale

As of December 31, 2017, there were certain businesses that qualified as assets/liabilities held for sale due to plans for disposal through sale. These assets/liabilities held for sale include a mix of both Commercial Industries and Public Sector that represent businesses in markets or with services that we did not see as strategic or core. The following is a summary of the major categories of assets and liabilities that have been reclassified to held for sale.

(in millions)	Year Ended December 31, 2017
Accounts Receivable, net	$ 160
Other current assets	41
Land, building and equipment, net	6
Product Software, net	3
Intangible assets, net	7
Goodwill	537
Other long-term assets	3
Total Assets held for sale	$ 757
Accounts payable	$ 9
Accrued compensation	20
Unearned revenue	30
Other current liabilities	53
Pension and other benefit obligations	50
Other long-term liabilities	7
Total Liabilities held for sale	$ 169

Information Technology Outsourcing (ITO)

In 2015 we completed the sale of our ITO business to Atos, which represented a discontinued operation.

In February 2016, we reached an agreement with Atos on the final adjustments to the closing balance of net assets sold as well as the settlement of certain indemnifications and recorded an additional pre-tax loss on the disposal in 2015 of $24 million ($14 million after-tax). The additional loss was recorded in 2015 as the financial statements had not yet been issued when the agreement was reached with Atos. We made a payment in 2016 to Atos of approximately $52 million, representing a $28 million adjustment to the final sales price as a result of this agreement and a payment of $24 million due from closing. The payment is reflected in Investing cash flows as an adjustment of the sales proceeds.

Table of Contents

Summarized financial information for our Discontinued Operations is as follows:

(in millions)	Year Ended December 31, 2015
Revenues	$ 619
Income (loss) from operations	$ 104
Loss on disposal	(101)
Net income (loss) before income taxes	$ 3
Income tax expense	(81)
Loss from discontinued operations, net of tax	$ (78)

The following is a summary of selected financial information of the ITO business:

(in millions)	Year Ended December 31, 2015
Expenses:	
Operating lease rent expense	$ 130
Defined contribution plans	4
Interest expense	2
Expenditures:	
Cost of additions to land, buildings and equipment	$ 41
Cost of additions to internal use software	1
Customer-related deferred set-up/transition and inducement costs	10

Note 4 – Accounts Receivable, Net

Accounts receivable, net was as follows:

	December 31,	
(in millions)	2017	2016
Amounts billed or billable	$ 919	$ 1,014
Unbilled amounts	187	279
Allowance for doubtful accounts	(2)	(7)
Accounts Receivable, Net	$ 1,104	$ 1,286

Unbilled amounts include amounts associated with percentage-of-completion accounting and other earned revenues not currently billable due to contractual provisions. Amounts to be invoiced in subsequent months for current services provided are included in amounts billable, and at December 31, 2017 and 2016 were approximately $364 million and $429 million, respectively.

Accounts Receivable Sales Arrangements

Prior to 2017, we sold accounts receivables with payment due dates of less than 60 days.

Under most of the agreements, we continue to service the sold accounts receivable. When applicable, a servicing liability is recorded for the estimated fair value of the servicing. The amounts associated with the servicing liability were not material.

Accounts receivable sales were as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Accounts receivable sales	$ —	$ 250	$ 325
Estimated increase (decrease) to operating cash flows[1]	—	(136)	58

(1) *Represents the difference between current and prior year fourth quarter receivable sales adjusted for the effects of: (i) deferred proceeds, (ii) collections prior to the end of the year and (iii) currency.*

Table of Contents

Note 5 - Land, Buildings, Equipment and Software, Net

Land, buildings and equipment, net were as follows:

(in millions except as noted)	Estimated Useful Lives (Years)	December 31, 2017	December 31, 2016
Land		$ 3	$ 10
Building and building equipment	25 to 50	17	20
Leasehold improvements	Varies	247	236
Office furniture and equipment	3 to 15	784	719
Other	4 to 20	1	1
Construction in progress		24	54
Subtotal		1,076	1,040
Accumulated depreciation		(819)	(757)
Land, Buildings and Equipment, Net		$ 257	$ 283

Depreciation expense and operating lease rent expense were as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Depreciation expense	$ 125	$ 130	$ 126
Operating lease rent expense	$ 375	$ 378	$ 389

We lease buildings and equipment, substantially all of which are accounted for as operating leases. Certain leases were accounted for as capital leases and the remaining net book value of those assets, included in Land, Buildings and Equipment, net were approximately $32 million and $42 million at December 31, 2017 and 2016, respectively.

Future minimum operating lease commitments that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2017 were as follows (in millions):

2018	2019	2020	2021	2022	Thereafter
$ 163	$ 119	$ 80	$ 53	$ 31	$ 52

Internal Use and Product Software

Additions to Internal Use and Product Software as well as year-end balances for these assets were as follows:

(in millions) Additions to:	Year Ended December 31, 2017	2016	2015
Internal use software	$ 36	$ 39	$ 27
Product software	10	10	19

(in millions) Capitalized Costs, Net	December 31, 2017	2016
Internal use software	$ 106	$ 115
Product software	22	38

Useful lives of our internal use and product software generally vary from one to seven years.

Table of Contents

Included within product software at December 31, 2017 and 2016 were $2 million and $3 million, respectively, of capitalized costs associated with software system platforms developed for use in certain of our government services businesses.

During 2016 we determined that it was probable that we would not fully complete our NY MMIS project in its current form. As a result of this decision an impairment charge of approximately $28 million was recorded in Cost of services. We also recorded an additional impairment charge in 2016 related to the 2015 HE charge of approximately $9 million in Restructuring and asset impairment. In 2015 we decided to discontinue certain future implementations of these software system platforms, and recorded an impairment charge of $160 million ($14 million in Cost of services and $146 million in Restructuring and asset impairments).

Note 6 - Goodwill and Intangible Assets, Net

Goodwill

The following table presents the changes in the carrying amount of goodwill, by reportable segment:

(in millions)	Commercial Industries	Public Sector	Total
Balance at December 31, 2015	$ 2,467	$ 2,405	$ 4,872
Foreign currency translation	(24)	(20)	(44)
Acquisitions	(2)	—	(2)
Disposition	(2)	—	(2)
Impairment	(935)	—	(935)
Balance at December 31, 2016	$ 1,504	$ 2,385	$ 3,889
Foreign currency translation	19	28	47
Dispositions	(19)	(14)	(33)
Assets held for sale	(105)	(432)	(537)
Balance at December 31, 2017	**$ 1,399**	**$ 1,967**	**$ 3,366**

Impairment Charge

There was no impairment identified for the years ended December 31, 2017 and 2015. In 2016, due to the declining trends and projections in the Commercial Industries reporting unit, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value. Accordingly, we recorded a pre-tax goodwill impairment charge of $935 million during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). There was no impairment identified for the Public Sector in 2016.

Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries and Public Sector reporting units exceeded their respective carrying values by 72% and 13%, respectively, at December 31, 2017. The most significant assumptions used in the goodwill analysis relate to a 3% long-term organic growth rate for both the Commercial Industries and Public Sector segments as well as a 9.25% and a 8.75% discount rate for the Commercial Industries and Public Sector segments, respectively.

Intangible Assets, Net

Net intangible assets were $891 million at December 31, 2017 of which $492 million and $399 million relate to our Commercial Industries and Public Sector segments, respectively. Intangible assets were comprised of the following:

		December 31, 2017			December 31, 2016		
(in millions except years)	Weighted Average Amortization	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Customer relationships	12 years	$ 2,907	$ 2,022	$ 885	$ 2,924	$ 1,788	$ 1,136
Technology, patents and non-compete	4 years	11	5	6	11	3	8
Total Intangible Assets		$ 2,918	$ 2,027	$ 891	$ 2,935	$ 1,791	$ 1,144

Table of Contents

Amortization expense related to intangible assets was $243 million, $280 million and $250 million for the years ended December 31, 2017, 2016 and 2015, respectively. Amortization expense is expected to approximate $241 million in 2018, $241 million in 2019, $238 million in 2020, $134 million in 2021 and $12 million in 2022.

Note 7 – Restructuring Programs and Asset Impairment Charges

We engage in a series of restructuring programs related to downsizing our employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce our cost structure and improve productivity. Prior to 2017, these initiatives primarily consist of severance actions that impacted all major geographies and segments. In 2017, the implementation of our strategic transformation program as well as various productivity initiatives reduced our real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Management continues to evaluate our business, therefore, in future years, there may be additional provisions for new plan initiatives as well as changes in previously recorded estimates as payments are made or actions are completed. Asset impairment charges were also incurred in connection with these restructuring actions for those assets sold, abandoned or made obsolete as a result of these programs.

Costs associated with restructuring, including employee severance and lease termination costs are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of our restructuring program activity during the two years ended December 31, 2017 is as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Asset Impairments	Total
Balance at December 31, 2015	4	—	—	4
Restructuring provision	67	7	12	86
Reversals of prior accruals	(13)	—	—	(13)
Total Net Current Period Charges	54	7	12	73
Charges against reserve and currency	(43)	(2)	(11)	(56)
Balance at December 31, 2016	15	5	1	21
Restructuring provision	49	49	5	103
Reversals of prior accruals	(8)	(3)	—	(11)
Total Net Current Period Charges	41	46	5	92
Charges against reserve and currency	(42)	(17)	(6)	(65)
Liabilities held for sale	—	(4)	—	(4)
Balance at December 31, 2017	$ 14	$ 30	$ —	$ 44

We also recorded costs related to professional support services associated with the implementation of the strategic transformation program of $9 million and $28 million during the years ended December 31, 2017 and 2016, respectively.

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Commercial Industries	$ 60	$ 57	$ 11
Public Sector	28	12	2
Other[1]	4	4	146
Total Net Restructuring Charges	$ 92	$ 73	$ 159

(1) Refer to Note 5 – Land, Buildings, Equipment and Software, Net for additional information regarding the asset impairment in 2016 and 2015.

Table of Contents

Note 8 – Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments or as of the earliest put date available to the debt holders. We defer costs associated with debt issuance over the applicable term. These costs are amortized as interest expense in our Consolidated Statements of Income (Loss).

Long-term debt was as follows:

(in millions)	Weighted Average Interest Rates at December 31, 2017[1]	December 31, 2017	December 31, 2016
Term loan A due 2021	3.11%	$ 732	$ 694
Term loan B due 2023	6.79%	842	750
Senior notes due 2024	10.91%	510	510
Capital lease obligations	4.39%	33	43
Principal Debt Balance		$ 2,117	$ 1,997
Debt issuance costs and unamortized discounts		(56)	(56)
Less: current maturities		(82)	(28)
Total Long-term Debt		$ 1,979	$ 1,913

(1) Represents weighted average effective interest rate which includes the effect of discounts and premiums on issued debt.

Scheduled principal payments due on our long-term debt for the next five years and thereafter are as follows:

2018(1)	2019	2020	2021	2022	Thereafter	Total
$ 82	$ 72	$ 85	$ 560	$ 9	$ 1,309	$ 2,117

(1) Quarterly long-term debt maturities for 2018 are $21 million, $21 million, $21 million and $19 million for the first, second, third and fourth quarters, respectively.

Credit Facility

On December 7, 2016, we entered into a senior secured credit agreement (Credit Agreement) among the Company, its subsidiaries: Conduent Business Services, LLC (CBS), Affiliated Computer Services International B.V. and Conduent Finance, Inc. (CFI), the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains senior secured credit facilities (Senior Credit Facilities) consisting of:

(i) Senior Secured Term Loan A (Term Loan A) due 2021 with an aggregate principal amount of $700 million;
(ii) Senior Secured Term Loan B (Term Loan B) due 2023 with an aggregate principal amount of $850 million;
(iii) Senior Revolving Credit Facility (Revolving Credit Facility) due 2021 with an aggregate available amount of $750 million including a sub-limit for up to $300 million available for the issuance of letters of credit.

Borrowings under the Term Loan A Facility and the Revolving Credit Facility bears interest at a rate equal to either the sum of a base rate plus a margin ranging from 1.00% and 1.50% or the sum of a Eurocurrency rate plus an applicable rate ranging from 2.00% to 2.50%, with either such margin varying according to the total net leverage ratio of CBS. Borrowing under Term Loan B Facility bears interest at a rate equal to the sum of a base rate plus 2.0%, or the sum of a Eurocurrency rate plus 3.0%. CBS is required to pay a quarterly commitment fee under the Revolving Credit Facility at a rate ranging from 0.35% to 0.40% per annum, with such rate varying according to the total net leverage ratio of CBS and the actual daily unused portion of the commitments during the applicable quarter. CBS is also required to pay a fee equal to the adjusted LIBOR on the aggregate face amount of outstanding letters of credit under the Revolving Credit Facility.

The Credit Agreement permits us to incur incremental term loan borrowings and /or increase commitments under the Revolving Credit Facility, subject to certain limitations and satisfaction of certain conditions, in an aggregate amount not to exceed (i) $200 million plus, (ii) if the senior secured net leverage ratio of CBS and its subsidiaries does not exceed 2.25 to 1.00 on a pro forma basis (without giving effect to any incurrence under clause (i) that is incurred substantially simultaneously with amounts incurred under clause (ii)), an unlimited amount.

Table of Contents

All obligations under the Senior Credit Facilities are unconditionally guaranteed by the Company, CBS, CFI and the existing and future direct and indirect wholly owned domestic subsidiaries of CBS (subject to certain exceptions). All obligations under the Senior Credit Facilities, and the guarantees of those obligations, are secured, subject to certain exceptions, by substantially all of the assets of CBS and the guarantors under the Senior Credit Facilities (other than the Company and CFI), including a first-priority pledge of all the capital stock of CBS and the subsidiaries of CBS directly held by CBS or the guarantors (other than the Company and CFI) under the Senior Credit Facilities (which pledge, in the case of any foreign subsidiary, will be limited to 65% of the capital stock of any first-tier foreign subsidiary).

The Credit Facility contains certain customary affirmative and negative covenants, restrictions and events of default. CBS is required to maintain a total net leverage ratio not to exceed 4.25 to 1.00 (a quarterly test) for each quarter through September 30, 2018 and 3.75 to 1.00 for each quarter thereafter.

The net proceeds of the borrowings under the Term Loan A of $700 million (approximately $278 million borrowed in Euros) and Term Loan B of $850 million, were used to purchase our international subsidiaries from Xerox Corporation, to pay a distribution to Xerox Corporation and for working capital and other general corporate purposes. At December 31, 2017 we had $1,574 million in outstanding borrowings under our Credit Agreement and had utilized $12 million of our Revolving Credit Facility capacity to issue letters of credit. Discounts and debt issuance costs of $47 million were deferred.

Senior Notes

On December 7, 2016, CBS and CFI, each a wholly owned subsidiary of the Company, issued $510 million Senior Unsecured Notes due 2024 bearing interest at 10.5% (the "Senior Notes"). Interest is payable semi-annually, beginning on June 15, 2017. Discounts and debt issuance costs of $17 million were deferred.

At the option of the Issuers, the Senior Notes are redeemable in whole or in part, at any time prior to December 15, 2020, at a price equal to 100% of the aggregate principal amount of the Senior Notes plus accrued and unpaid interest, if any, to, but excluding, the redemption date plus a “make-whole” premium. The Issuers may also redeem the Senior Notes, in whole or in part, at any time on or after December 15, 2020, at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to but excluding the redemption date. Additionally, at any time prior to December 15, 2019, the Issuers may redeem up to 35% of the aggregate principal amount of the Senior Notes with the net cash proceeds from certain equity offerings at a price equal to 110.50% of the principal amount of the Senior Notes, plus accrued and unpaid interest, if any, to, but excluding, the redemption date.

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or CBS that guarantee the obligations under the Senior Credit Facilities.

Proceeds from the issuance were used to fund a portion of the transfer of cash to Xerox Corporation in connection with the spin-off.

Interest

Interest paid on our short-term and long-term debt amounted to $129 million, $5 million and $9 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Interest expense and interest income was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Interest expense	$ 137	$ 14	$ 8
Interest income	3	3	3

Table of Contents

Note 9 – Financial Instruments

We are exposed to market risk from changes in foreign currency exchange rates and interest rates, which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We enter into limited types of derivative contracts to manage foreign currency exposures that we hedge. Our primary foreign currency market exposures include the Philippine Peso, Indian Rupee and Mexican Peso. The fair market values of all our derivative contracts change with fluctuations in interest rates or currency exchange rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. Derivative financial instruments are held solely as risk management tools and not for trading or speculative purposes. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

We do not believe there is significant risk of loss in the event of non-performance by the counterparty associated with our derivative instruments because these transactions are executed with a major financial institution. Further, our policy is to deal only with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties.

Summary of Foreign Exchange Hedging Positions

At December 31, 2017, we had outstanding forward exchange with gross notional values of $160 million, which is typical of the amounts that are normally outstanding at any point during the year. The impact of our hedging program is not material to our balance sheet or income statement.

Approximately 68% of these contracts mature within three months, 12% in three to six months, 15% in six to twelve months and 5% in greater than 12 months.

The following is a summary of the primary hedging positions and corresponding fair values as of December 31, 2017:

(in millions)	Gross Notional Value	Fair Value Asset (Liability)[1]
Currencies Hedged (Buy/Sell)		
Philippine Peso/U.S. Dollar	$ 62	$ —
Indian Rupee/U.S. Dollar	68	1
Mexican Peso/U.S. Dollar	9	—
All Other	21	—
Total Foreign Exchange Hedging	$ 160	$ 1

(1) Represents the net receivable (payable) amount included in the Consolidated Balance Sheet at December 31, 2017.

Note 10 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. US. GAAP establishes a framework for measuring that includes a hierarchy used to classify the inputs used in measuring fair value. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities. As at December 31, 2017 and 2016, the Company did not have any asset or liability that was measured using Level 1 inputs.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly. All the Company's assets and liabilities that were measured at fair value on a recurring basis as at December 31, 2017 and 2016, were valued using Level 2 inputs.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets. As at December 31, 2017 and 2016, the Company did not have any asset or liability that was measured using Level 3 inputs.

Table of Contents

The following table represents assets and liabilities fair value measured on a recurring basis. The basis for the measurement at fair value in all cases is Level 2 – Significant Other Observable Inputs.

	As of December 31,	
(in millions)	2017	2016
Assets:		
Foreign exchange contracts - forwards	$ 2	$ 1
Deferred compensation investments in cash surrender life insurance[1]	—	99
Deferred compensation investments in mutual funds[1]	—	10
Total	$ 2	$ 110
Liabilities:		
Foreign exchange contracts - forwards	$ 1	$ 3
Deferred compensation plan liabilities[1]	99	113
Total	$ 100	$ 116

(1) In September 2017, the Company terminated the legacy deferred compensation plans (Plans) and the Company Owned Life Insurance (COLI), which held the Plans' investments. The Company will make payments to Plan participants of approximately $100 million in the fourth quarter 2018.

Fair value for our deferred compensation plan investments in company-owned life insurance is reflected at cash surrender value. Fair value for our deferred compensation plan investments in mutual funds is based on quoted market prices for actively traded investments similar to those held by the plan. Fair value for deferred compensation plan liabilities is based on the fair value of investments corresponding to employees' investment selections, based on quoted prices for similar assets in actively traded markets.

Summary of Other Financial Assets and Liabilities Fair Value Measured on a Nonrecurring Basis

The estimated fair values of our other financial assets and liabilities fair value measured on a nonrecurring basis were as follows:

	December 31, 2017		December 31, 2016	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	$ 658	$ 658	$ 390	$ 390
Restricted cash	9	9	22	22
Accounts receivable, net	1,104	1,104	1,286	1,286
Short-term debt	82	82	28	28
Long-term debt	1,979	2,070	1,913	1,933

The fair value amounts for Cash and cash equivalents, Restricted cash and Accounts receivable, net, approximate carrying amounts due to the short maturities of these instruments. The fair value of Short and Long-term debt was estimated based on the current rates offered to us for debt of similar maturities (Level 2). The difference between the fair value and the carrying value represents the theoretical net premium or discount we would pay or receive to retire all debt at such date.

The fair value of the Goodwill impairment charge of $935 million recorded in 2016, was estimated based on a determination of the implied fair value of goodwill, leveraging discounted cash flows (level 3). Refer to Note 6 – Goodwill and Intangible Assets, Net for additional information regarding this impairment.

Table of Contents

Note 11 – Employee Benefit Plans

Our defined benefit pension plans are primarily associated with certain employees in our Human Resources and Consulting business located in the U.S., Canada and the United Kingdom (U.K.). Prior to an amendment to freeze future service benefits, these defined benefit pension plans had provided benefits for participating employees based on years of service and average compensation for a specified period before retirement (see Plan Amendment below for further information).

Certain of our employees participate in post-employment medical plans. These plans are not material to our results of operations or financial position and are not included in the disclosures below.

December 31 is the measurement date for all of our defined benefit pension plans.

	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
(in millions)	2017	2016	2017	2016
Change in Benefit Obligation:				
Benefit obligation, January 1	$ 89	$ 74	$ 164	$ 157
Service cost	—	—	2	2
Interest cost	4	3	5	5

Non U.S.	65	58	46	164	157	140
Total	$ 167	$ 160	$ 108	$ 253	$ 246	$ 192

Our pension plan assets and benefit obligations at December 31, 2017 were as follows:

(in millions)	Fair Value of Pension Plan Assets	Pension Benefit Obligations	Net Funded Status	Accumulated Benefit Obligation
U.S.	$ 62	$ 102	$ (40)	$ 102
U.K.	114	113	1	114
Canada	44	55	(11)	53
Other	2	10	(8)	5
Total	$ 222	$ 280	$ (58)	$ 274

The components of Net periodic benefit cost and other changes in plan assets and benefit obligations were as follows:

	Year Ended December 31,					
	U.S. Plans			Non-U.S. Plans		
(in millions)	2017	2016	2015	2017	2016	2015
Components of Net Periodic Benefit Costs:						
Service cost	$ —	$ —	$ —	$ 2	$ 2	$ 3
Interest cost	4	3	3	5	5	6
Expected return on plan assets	(5)	(4)	(4)	(8)	(8)	(9)
Recognized net actuarial loss	1	—	—	1	1	2
Net Periodic Benefit Cost	—	(1)	(1)	—	—	2
Other changes in plan assets and benefit obligations recognized in Other Comprehensive Income:						
Net actuarial loss (gain)	7	13	4	(2)	18	(9)
Amortization of net actuarial loss	(1)	—	—	(1)	(1)	(2)
Total Recognized in Other Comprehensive Income	6	13	4	(3)	17	(11)
Total Recognized in Net Periodic Benefit Cost and Other Comprehensive Income	$ 6	$ 12	$ 3	$ (3)	$ 17	$ (9)

The net actuarial loss for the defined benefit pension plans that will be amortized from AOCL into net periodic benefit cost over the next fiscal year is $2 million.

Table of Contents

Plan Amendments

Pension Plan Freezes

In 2015, we amended several of our major defined benefit pension plans to freeze current benefits and eliminate benefits accruals for future service, including our plans in the U.S., Canada and the U.K. The freeze of current benefits is the primary driver of the reduction in pension service costs since 2015. In certain non-U.S. plans, we are required to continue to consider salary increases and inflation in determining the benefit obligation related to prior service.

Plan Assets

Current Allocation

As of the 2017 and 2016 measurement dates, the global pension plan assets were $222 million and $192 million, respectively. These assets were invested among several asset classes.

The following tables presents the defined benefit plans assets measured at fair value and the basis for that measurement:

	December 31, 2017									
(in millions)	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 1	$ —	$ —	$ 1	2%	$ 3	$ —	$ —	$ 3	2%
Equity Securities	12	31	—	43	69%	—	47	—	47	29%
Fixed Income Securities	18	—	—	18	29%	—	46	—	46	29%
Other	—	—	—	—	—%	—	55	9	64	40%
Total Fair Value of Plan Assets	$ 31	$ 31	$ —	$ 62	100%	$ 3	$ 148	$ 9	$ 160	100%

	December 31, 2016									
(in millions)	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 3	$ —	$ —	$ 3	6%	$ —	$ —	$ —	$ —	—%
Equity Securities	9	24	—	33	63%	—	61	—	61	44%
Fixed Income Securities	10	6	—	16	31%	—	60	—	60	43%
Other	—	—	—	—	—%	—	11	8	19	13%
Total Fair Value of Plan Assets	$ 22	$ 30	$ —	$ 52	100%	$ —	$ 132	$ 8	$ 140	100%

Valuation Method

Our primary Level 3 assets are Real Estate and Guaranteed Investment Contract investments which are individually immaterial. The fair value of our real estate investment funds are based on the Net Asset Value (NAV) of our ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for our Guaranteed Investment Contract investments have been determined based on the higher of the surrender value of the contract or the present value of the cash flow of the related pension obligations. The valuation techniques and inputs for our Level 3 assets have been consistently applied for all periods presented.

Investment Strategy

The target asset allocations for our worldwide defined benefit pension plans were:

	2017		2016	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Equity investments	55%	28%	55%	41%
Fixed income investments	23%	43%	25%	45%
Real estate	—%	4%	—%	4%
Other	22%	25%	20%	10%
Total Investment Strategy	100%	100%	100%	100%

Table of Contents

We employ a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by exceeding the interest growth in long-term plan liabilities. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. This consideration involves the use of long-term measures that address both return and risk. The investment portfolio contains a diversified blend of equity and fixed income investments. Furthermore, equity investments are diversified across U.S. and non-U.S. stocks, as well as growth, value and small and large capitalizations. Other assets such as real estate, are used to improve portfolio diversification. Derivatives may be used to hedge market exposure in an efficient and timely manner; however, derivatives may not be used to leverage the portfolio beyond the market value of the underlying investments. Investment risks and returns are measured and monitored on an ongoing basis through annual liability measurements and quarterly investment portfolio reviews.

Contributions

In 2017, we made cash contributions of $8 million ($3 million U.S. and $5 million non-U.S.) to our defined benefit pension plans.

In 2018, based on current actuarial calculations, we expect to make contributions of approximately $8 million ($8 million non-U.S. and none for U.S.) to our defined benefit pension plans.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid during the following years:

	Pension Benefits		
(in millions)	U.S.	Non-U.S.	Total
2018	$ 2	$ 4	$ 6
2019	2	5	7

Assumptions

Weighted-average assumptions used to determine benefit obligations at the plan measurement dates:

	Pension Benefits					
	2017		2016		2015	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	3.8%	2.9%	4.2%	3.2%	4.3%	3.9%
Rate of compensation increase	n/a	0.8%	n/a	1.0%	n/a	1.0%

Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:

	Pension Benefits							
	2018		2017		2016		2015	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	3.8%	3.1%	4.2%	3.1%	4.3%	3.9%	4.0%	3.4%
Expected return on plan assets	7.8%	4.8%	7.8%	4.8%	7.8%	5.7%	7.8%	5.8%
Rate of compensation increase	n/a	0.8%	n/a	0.8%	n/a	1.0%	n/a	1.1%

Table of Contents

Defined Contribution Plans

We have post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals (see "Plan Amendments" for additional information) were transitioned to an enhanced defined contribution plan. In these plans employees are allowed to contribute a portion of their salaries and bonuses to the plans, and we match a portion of the employee contributions. We recorded charges related to our defined contribution plans of $35 million in 2017, $35 million in 2016 and $34 million in 2015.

Note 12 - Income Taxes

Prior to the spin-off from Xerox Corporation, Conduent's operating results were included in various Xerox consolidated U.S. federal and state income tax returns, as well as non-U.S. tax filings. For the purposes of the Company's Consolidated and Combined Financial Statements for periods prior to the spin-off, income tax expense and deferred tax balances have been recorded as if the Company filed tax returns on a standalone basis, separate from Xerox. The Separate Return Method applies the accounting guidance for income taxes to the standalone financial statements as if the Company was a separate taxpayer and a standalone enterprise for fiscal 2016 and prior.

On December 22, 2017, the Tax Reform was enacted. The effects of changes in tax rates and laws are recognized in the period in which the new legislation is enacted. In the case of US federal income taxes, the enactment date is the date the bill becomes law. The income tax effects of the Tax Reform have been initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform (other than amounts related to accounting policy elections) have been provided and adjustments to provisional amounts will be made in subsequent reporting periods as information becomes available to complete provisional computations. With respect to this legislation, we recorded a provisional tax benefit of $198 million, which included a $210 million tax benefit due to the re-measurement of deferred tax assets and liabilities resulting from the decrease in the corporate U.S. federal income tax rate from 35% to 21%, and $12 million as a one-time-charge on the transition tax for Post-1986 undistributed and not previously taxed foreign earnings and profits. The impacts of Tax Reform on our 2017 Consolidated Financial Statements are provisional, and could change during 2018 as we further evaluate the impacts of the Tax Reform. The Company has provisionally adopted the policy of treating the Global Intangible Low Taxed Income (GILTI) regime as a period cost. The GILTI regime enacted as part of Tax Reform subjects certain post 2017 foreign earnings (i.e. amounts in excess of deemed return on net tangible assets of non-US subsidiaries) to US tax. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections.

(Loss) income before income taxes (pre-tax (loss) income) was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Domestic loss	$ (91)	$ (1,329)	$ (654)
Foreign income	75	102	80
Loss Before Income Taxes	$ (16)	$ (1,227)	$ (574)

Table of Contents

(Benefit) provision for income taxes were as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Federal Income Taxes			
Current	$ 4	$ (116)	$ (130)
Deferred	(233)	(132)	(99)
Foreign Income Taxes			
Current	25	31	24
Deferred	(3)	(3)	6
State Income Taxes			
Current	8	1	(17)
Deferred	6	(25)	(22)
Total Benefit	$ (193)	$ (244)	$ (238)

A reconciliation of the U.S. federal statutory income tax rate to the consolidated effective income tax rate is as follows:

	Year Ended December 31, 2017	2016	2015
U.S. federal statutory income tax rate	35.0 %	35.0 %	35.0 %
Nondeductible expenses[1]	(155.9)%	(19.0)%	(1.3)%
Effect of tax law changes	1,282.4 %	— %	0.9 %
Change in valuation allowance for deferred tax assets	(39.5)%	0.1 %	(1.0)%
State taxes, net of federal benefit	1.2 %	1.8 %	4.2 %
Audit and other tax return adjustments	— %	1.4 %	0.1 %
Tax-exempt income, credits and incentives	38.9 %	0.7 %	0.7 %
Foreign rate differential adjusted for U.S. taxation of foreign profits[2]	47.7 %	0.7 %	2.4 %
Other	(3.5)%	(0.8)%	0.5 %
Effective Income Tax Rate	1,206.3 %	19.9 %	41.5 %

(1) In 2017, nondeductible expenses primarily related to the nondeductible portion of the goodwill and officers life insurance.
(2) The "U.S. taxation of foreign profits" represents the U.S. tax, net of foreign tax credits, associated with actual and deemed repatriations of earnings from our non-U.S. subsidiaries, except for transition tax, which is reported on the line Effect of tax law changes.

On a consolidated basis, we paid/(received) a total of $29 million, $(123) million and $194 million in income taxes to federal, foreign and state jurisdictions during the three years ended December 31, 2017, 2016 and 2015, respectively.

Total income tax expense (benefit) was allocated as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Pre-tax income	$ (193)	$ (244)	$ (238)
Discontinued operations[1]	3	—	81
Common shareholders' equity:			
Changes in defined benefit plans	—	8	2
Stock option and incentive plans, net	—	—	(6)
Total Income Tax Benefit	$ (190)	$ (236)	$ (161)

(1) Refer to Note 3 – Assets/Liabilities Held for Sale for additional information regarding discontinued operations.

Table of Contents

Unrecognized Tax Benefits and Audit Resolutions

We recognize tax liabilities when, despite our belief that our tax return positions are supportable, we believe that certain positions may not be fully sustained upon review by tax authorities. Each period we assess uncertain tax positions for recognition, measurement and effective settlement. Benefits from uncertain tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Where we have determined that our tax return filing position does not satisfy the more-likely-than-not recognition threshold, we have recorded no tax benefits.

We are also subject to ongoing tax examinations in numerous jurisdictions due to the extensive geographical scope of our operations. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can increase or decrease our effective tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain. As of December 31, 2017, we do not believe that there are any positions for which it is reasonably possible that the total amount of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(in millions)	2017	2016	2015
Balance at January 1	$ 14	$ 24	$ 32
Additions related to current year	—	1	3
Additions related to prior years positions	—	—	—
Reductions related to prior years positions	—	(5)	(10)
Settlements with taxing authorities[1]	—	(5)	—
Currency	1	(1)	(1)
Balance at December 31	$ 15	$ 14	$ 24

(1) 2016 settlement results in $5 million cash paid.

Included in the balances at December 31, 2017, 2016 and 2015 are $0, $0 and $8 million, respectively, of tax positions that are highly certain of realization but for which there is uncertainty about the timing. Because of the impact of deferred tax accounting, other than for the possible incurrence of interest and penalties, the disallowance of these positions would not affect the annual effective tax rate. In addition, for other uncertain tax positions, we maintain offsetting benefits from other jurisdictions of $16 million, $16 million and $14 million, at December 31, 2017, 2016 and 2015, respectively.

We recognized interest and penalties accrued on unrecognized tax benefits, as well as interest received from favorable settlements within income tax expense. We had $6 million, $4 million and $14 million accrued for the payment of interest and penalties associated with unrecognized tax benefits at December 31, 2017, 2016 and 2015, respectively.

In the U.S., we are no longer subject to U.S. federal income tax examinations for years before 2005. With respect to our major foreign jurisdictions, the years generally remain open back to 2006.

Deferred Income Taxes

The Company is in the position of having tax basis in excess of book basis in its U.S. investment in foreign subsidiaries. Nonetheless, the Company is indefinitely reinvesting its foreign subsidiaries' undistributed earnings of $253 million. For years after 2017, the Tax Reform does allow for certain earnings to be repatriated free from US Federal taxes. However, the repatriation of earnings could give rise to additional tax liabilities.

Table of Contents

The tax effects of temporary differences that give rise to significant portions of the deferred taxes were as follows:

(in millions)	December 31, 2017	2016
Deferred Tax Assets		
Net operating losses	$ 41	$ 42
Operating reserves, accruals and deferrals	90	155
Deferred compensation	59	101
Pension	15	18
Other	45	44
Subtotal	250	360
Valuation allowance	(35)	(24)
Total	$ 215	$ 336
Deferred Tax Liabilities		
Unearned income	$ 134	$ 217
Intangibles and goodwill	413	680
Depreciation	10	15
Other	25	29
Total	$ 582	$ 941
Total Deferred Taxes, Net	$ (367)	$ (605)

The deferred tax assets for the respective periods were assessed for recoverability and, where applicable, a valuation allowance was recorded to reduce the total deferred tax asset to an amount that will, more-likely-than-not, be realized in the future. The net change in the total valuation allowance for the years ended December 31, 2017 and 2016 was an increase of $11 million and a decrease of $14 million, respectively. The valuation allowance relates primarily to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Although realization is not assured, we have concluded that it is more-likely-than-not that the deferred tax assets, for which a valuation allowance was determined to be unnecessary, will be realized in the ordinary course of operations based on the available positive and negative evidence, including scheduling of deferred tax liabilities and projected income from operating activities. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if actual future income or income tax rates are lower than estimated, or if there are differences in the timing or amount of future reversals of existing taxable or deductible temporary differences.

At December 31, 2017, we had tax credit carryforwards of $27 million available to offset future income taxes which will expire between 2018 and 2037 if not utilized. We also had net operating loss carryforwards for income tax purposes of $422 million that will expire between 2018 and 2037, if not utilized; and $43 million available to offset future taxable income indefinitely.

Table of Contents

Note 13 – Contingencies and Litigation

As more fully discussed below, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. We assess our potential liability by analyzing our litigation and regulatory matters using available information. We develop our views on estimated losses in consultation with outside counsel handling our defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, this could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. We believe that we have recorded adequate provisions for any such matters as of December 31, 2017. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matter could be in excess of any amounts accrued and could be material to our results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and nonconsolidated affiliates when we undertake an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the consolidated financial position or liquidity. As of December 31, 2017, we have accrued our estimate of liability incurred under our indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Xerox State Healthcare, LLC, and ACS State Healthcare, LLC: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Xerox Corporation, Xerox State Healthcare, LLC and ACS State Healthcare (collectively, the "Xerox Defendants") violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”). The State alleges that the Xerox Defendants made false representations of material facts regarding the processes, procedures, implementation and results regarding the prior authorization of orthodontic claims. The State seeks recovery of amounts paid for orthodontic treatment under the Texas Medicaid program for the period from approximately 2004 to 2012, three times the amount of the payments made as a result of the alleged unlawful acts, civil penalties, pre- and post-judgment interest and all costs and attorneys’ fees. The Xerox Defendants filed their Answer in June, 2014 denying all allegations. A trial date is scheduled for November, 2018. During the first quarter of 2018, the State notified the Xerox Defendants in the litigation discovery process that its claim is in excess of two billion dollars based primarily on the assertion of treble damages and civil penalties per illegal act for almost two hundred thousand purported illegal acts. The Xerox Defendants will forcefully contest this assertion and continue to vigorously defend themselves in this matter. We are not able to determine or predict the ultimate outcome of this proceeding or to estimate any reasonably possible loss or range of losses, if any, in excess of the thirty-eight million dollars we have already accrued. In the course of litigation, we periodically engage in discussions with the State's counsel for possible resolution of the matter. Should developments cause a change in our determination as to an unfavorable outcome, or result in a final adverse judgment or settlement for a significant amount, there could be a material adverse effect on our results of operations, cash flows and financial position in the period in which such change in determination, judgment or settlement occurs.

Table of Contents

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck"), a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court. Buck will continue to aggressively defend these lawsuits. We are not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide a Medicaid Management Information Systems (the "NY MMIS Contract"). In the lawsuit, Conduent seeks damages in excess of one hundred fifty million dollars. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and will be recording in that period certain charges associated with the termination. Cognizant has asserted counterclaims against Conduent in the lawsuit seeking damages in excess of twenty-two million dollars. Conduent has responded to Cognizant's counterclaims by denying the allegations. Conduent will continue to vigorously defend itself against the counterclaims but we are not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters:

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB commence an action, it may seek restitution, civil monetary penalties, injunctive relief or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. This notice stems from an inquiry that commenced in 2014 when XES received and responded to a Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the Department of Education and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB and the Department of Education, as well as certain states' attorney general offices and other regulatory agencies, began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies, and XES has submitted its NORA response. We cannot provide assurance that the CFPB or another party will not ultimately commence a legal action against XES in this matter nor are we able to predict the likely outcome of the investigations into this matter or reasonably provide an estimate or range of estimate of possible outcome or loss, if any. We could in future periods incur judgments or enter into settlements in connection with this matter and there could be a material adverse effect on our results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Table of Contents

Guarantees, Indemnifications and Warranty Liabilities

Indemnifications Provided as Part of Contracts and Agreements

Acquisitions/Divestitures:

We have indemnified, subject to certain deductibles and limits, the purchasers of businesses or divested assets for the occurrence of specified events under certain of our divestiture agreements. In addition, we customarily agree to hold the other party harmless against losses arising from a breach of representations and covenants, including such matters as adequate title to assets sold, intellectual property rights, specified environmental matters and certain income taxes arising prior to the date of acquisition. Where appropriate, an obligation for such indemnifications is recorded as a liability at the time of the acquisition or divestiture. Since the obligated amounts of these types of indemnifications are often not explicitly stated or are contingent on the occurrence of future events, the overall maximum amount of the obligation under such indemnifications cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, we have not historically made significant payments for these indemnifications. Additionally, under certain of our acquisition agreements, we have provided for additional consideration to be paid to the sellers if established financial targets are achieved post-closing. We have recognized liabilities for these contingent obligations based on an estimate of the fair value of these contingencies at the time of acquisition. Contingent obligations related to indemnifications arising from our divestitures and contingent consideration provided for by our acquisitions are not expected to be material to our financial position, results of operations or cash flows.

Other Agreements:

We are also party to the following types of agreements pursuant to which we may be obligated to indemnify the other party with respect to certain matters:

- Guarantees on behalf of our subsidiaries with respect to real estate leases. These lease guarantees may remain in effect subsequent to the sale of the subsidiary.
- Agreements to indemnify various service providers, trustees and bank agents from any third-party claims related to their performance on our behalf, with the exception of claims that result from the third-party's own willful misconduct or gross negligence.
- Guarantees of our performance in certain services contracts to our customers and indirectly the performance of third parties with whom we have subcontracted for their services. This includes indemnifications to customers for losses that may be sustained as a result of our performance of services at a customer's location.

In each of these circumstances, our payment is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract and such procedures also typically allow us to challenge the other party's claims. In the case of lease guarantees, we may contest the liabilities asserted under the lease. Further, our obligations under these agreements and guarantees may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments we made.

Also in December 2017, a customer released our former parent company from a performance guarantee for a service contract resulting in a release of escrow funds of $15 million to the Company.

Intellectual Property Indemnifications

We do not own most of the software that we use to run our business. Instead, we license this software from a small number of primary vendors. We indemnify certain software providers against claims that may arise as a result of our use or our subsidiaries', customers' or resellers' use of their software in our services and solutions. These indemnities usually do not include limits on the claims, provided the claim is made pursuant to the procedures required in the services contract.

Table of Contents

Indemnification of Officers and Directors

Our corporate by-laws require that, except to the extent expressly prohibited by law, we must indemnify our officers and directors against judgments, fines, penalties and amounts paid in settlement and reasonable expenses, including attorneys' fees, incurred in connection with civil or criminal action or proceedings or any appeal, as it relates to their services to our Company and our subsidiaries. Although the by-laws provide no limit on the amount of indemnification, we may have recourse against our insurance carriers for certain payments made by us. However, certain indemnification payments (such as those related to "clawback" provisions in certain compensation arrangements) may not be covered under our directors' and officers' insurance coverage. We also indemnify certain fiduciaries of our employee benefit plans for liabilities incurred in their service as fiduciary whether or not they are officers of the Company. Finally, in connection with our acquisition of businesses, we may become contractually obligated to indemnify certain former and current directors, officers and employees of those businesses in accordance with pre-acquisition by-laws or indemnification agreements or applicable state law.

Other Contingencies

Certain contracts, primarily in our Public Sector segment, require us to provide a surety bond or a letter of credit as a guarantee of performance. As of December 31, 2017, we had $576 million for outstanding surety and bid bonds used to secure our performance of contractual obligations with our clients, and we had $256 million of outstanding letters of credit issued to secure our performance of contractual obligations to our clients as well as other corporate obligations.

In general, we would only be liable for the amount of these guarantees in the event of default in our performance of our obligations under each contract. We believe we have sufficient capacity in the surety markets and liquidity from our cash flow and our various credit arrangements (including our Credit Facility) to allow us to respond to future requests for proposals that require such credit support.

We have service arrangements where we service third-party student loans in the Federal Family Education Loan program (FFEL) on behalf of various financial institutions. We service these loans for investors under outsourcing arrangements and do not acquire any servicing rights that are transferable by us to a third-party. At December 31, 2017, we serviced a FFEL portfolio of loans with an outstanding principal balance of approximately $5.2 billion. Some servicing agreements contain provisions that, under certain circumstances, require us to purchase the loans from the investor if the loan guaranty has been permanently terminated as a result of a loan default caused by our servicing error. If defaults caused by us are cured during an initial period, any obligation we may have to purchase these loans expires. Loans that we purchase may be subsequently cured, the guaranty reinstated and the loans repackaged for sale to third parties. We evaluate our exposure under our purchase obligations on defaulted loans and establish a reserve for potential losses. The reserve is evaluated periodically and adjusted based upon management’s analysis of the historical performance of the defaulted loans. As of December 31, 2017, other current liabilities include reserves of approximately $1 million, which we believe to be adequate. In addition to potential purchase obligations arising from servicing errors, various laws and regulations applicable to student loan borrowers could give rise to fines, penalties and other liabilities associated with loan servicing errors.

Note 14 - Preferred Stock

Series A Preferred Stock

In connection with the December 31, 2016 spin-off from Xerox Corporation, we issued 120 thousand shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393 thousand shares (reflecting an initial conversion price of approximately $22.250 per share of common stock), subject to customary anti-dilution adjustments.

Table of Contents

If the closing price of our common stock exceeds 137% of the initial conversion price for 20 out of 30 trading days, we have the right to cause any or all of the convertible preferred stock to be converted into shares of common stock at the then applicable conversion rate. The convertible preferred stock is also convertible, at the option of the holder, upon a change in control, at the applicable conversion rate plus an additional number of shares determined by reference to the price paid for our common stock upon such change in control. In addition, upon the occurrence of certain fundamental change events, including a change in control or the delisting of Conduent's common stock, the holder of convertible preferred stock has the right to require us to redeem any or all of the convertible preferred stock in cash at a redemption price per share equal to the liquidation preference and any accrued and unpaid dividends to, but not including, the redemption date. As a result of the contingent redemption feature, the convertible preferred stock is classified as temporary equity and reflected separately from permanent equity in the Consolidated Balance Sheets.

Note 15 – Shareholders' Equity

Preferred Stock

As of December 31, 2017, we had one class of preferred stock outstanding. See Note 14 – Preferred Stock for further information. We are authorized to issue approximately 100 million shares of cumulative preferred stock at $0.01 par value per share.

Common Stock

We have 1 billion authorized shares of common stock at $0.01 par value per share. At December 31, 2017, 15 million shares were reserved for issuance under our incentive compensation plans and 5.4 million shares were reserved for conversion of the Series A convertible preferred stock.

Stock Compensation Plans

Certain of our employees participate in a long-term incentive plan. Our long-term incentive plan authorizes the issuance of restricted stock units / shares (RSU), performance stock units / share (PSU) and non-qualified stock options to employees. All awards for these plans prior to 2017, were made in Xerox stock and therefore converted into Conduent stock effective upon the Separation. Using a formula designed to preserve the value of the award immediately prior to the Separation, all of these awards will be settled and are reflected in Conduent's Consolidated Statements of Stockholders' Equity. Stock-based compensation expense includes expense based on the awards and terms previously granted to the employees.

Stock-based compensation expense was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Stock-based compensation expense, pre-tax	$ 42	$ 23	$ 19
Income tax benefit recognized in earnings	17	9	7

Restricted Stock Units / Shares Compensation expense is based upon the grant date market price. The compensation expense is recorded over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest.

Performance Stock Units / Shares: The Company granted PSUs that vest contingent upon its achievement of certain specified financial performance criteria over a three-year period. If the three-year actual results exceed the stated targets, then the plan participants have the potential to earn additional shares of common stock, which cannot exceed 100% of the original grant.

The fair value of PSUs is based upon the market price of Conduent's common stock on the date of the grant and then converted to Conduent's common stock upon the Separation. Compensation expense is recognized over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest. If the stated targets are not met, any recognized compensation cost would be reversed.

Employee Stock Options: Stock options were issued by a former parent company and were converted to Conduent's common stock upon the Separation. These options generally expire within the next two years. Other than these options, Conduent has not issued any new stock options.

Table of Contents

Summary of Stock-based Compensation Activity

(shares in thousands)	2017 Shares	2017 Weighted Average Grant Date Fair Value	2016 Shares	2016 Weighted Average Grant Date Fair Value	2015 Shares	2015 Weighted Average Grant Date Fair Value

Note 18 – Related Party Transactions and Former Parent Company Investment

Allocation of Corporate Expenses

The Consolidated Statements of Income (Loss), Consolidated Statements of Comprehensive Income (Loss) and Consolidated Statements of Cash Flows for the years ended December 31, 2016 and 2015 include an allocation of general corporate expenses from Xerox, the Company's former parent. The financial information in these Consolidated Financial Statements does not necessarily include all the expenses that would have been incurred or held had we been a separate, standalone company and it is not practicable to estimate actual costs that would have been incurred had we been a separate, standalone company during the periods presented. Management considers these allocations to be a reasonable reflection of the utilization of services by, or the benefits provided. Allocations for management costs and corporate support services provided totaled $165 million and $170 million for the years ended December 31, 2016 and 2015, respectively. These amounts include costs for corporate functions including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology and other shared services. Where possible, these costs were allocated based on direct usage, with the remainder allocated on a basis of costs, headcount and/or other measures we have determined as reasonable.

	Year Ended December 31,	
(in millions)	2016	2015
Research and development	$ 25	$ 43
Selling, general and administrative	140	127
Total Allocated Corporate Expenses	$ 165	$ 170

Final Cash Allocation To Former Parent

In January 2017, in connection with the Separation, we paid Xerox $161 million for settlement of the management and support services received.

The components of Net transfers to former parent and the reconciliation to the corresponding amount presented on the Consolidated Statements of Cash Flows are as follows:

(in millions)	Year Ended December 31,	
	2016	2015
Cash pooling and general financing activities	$ (466)	$ (396)
Corporate cost allocations	165	170
Income taxes	(157)	168
Divestitures and acquisitions, net	54	(742)
Capitalization of related party notes payable	—	1,017
Total net transfers (to) from former parent	(404)	217
Stock-based compensation	(23)	(19)
Capitalization of related party notes payable	—	(1,017)
Net payments on notes payable with former parent company	(1,132)	(91)
Other, net	(161)	147
Total Net payments to former parent company per Consolidated Statements of Cash Flows	$ (1,720)	$ (763)

Related Party Notes Receivable/Payable

Certain operating units of the Company had various interest bearing notes under contractual agreements to and from Xerox Corporation and other related parties. The purpose of these notes was to provide funds for certain working capital or other capital and operating requirements of the business. Net interest expense on these notes with related party companies was recorded net in Related Party Interest in the Consolidated Statements of Income (Loss) and was $26 million and $61 million for the years ended December 31, 2016 and 2015, respectively. These notes had fixed interest rates that ranged from 1% to 8%. The balances were settled as part of the Separation transaction.

Table of Contents

Related Party Revenue and Purchases

We provide various services to Xerox Corporation, including those related to human resources, accounting and finance and customer care, which are reported as Related party revenue in the Consolidated Statements of Income (Loss). The costs related to these services are reported as Related party cost of services in the Consolidated Statements of Income (Loss).

We also leased equipment and received related services, supplies and parts, from Xerox and Xerox subsidiaries in the amount of $21 million and $24 million, for the years ended December 31, 2016 and 2015, respectively. The costs related to these services, supplies and parts are reported in Cost of services and Selling, administrative and general expenses in the Consolidated Statements of Income (Loss).

Note 19 – Subsequent Events

In the first quarter of 2018, the Company will be moving the Health Enterprise business from the Other segment into the Public Sector segment. In addition, the Company plans to move the divested businesses' historical results to Other segment from both the Commercial Industries and the Public Sector segments.

See Note 13 – Contingencies and Litigation as it relates to the termination of the Cognizant agreement.

(1) *The sum of quarterly earnings per share may differ from the full-year amounts due to rounding, or in the case of diluted earnings per share, because securities that are anti-dilutive in certain quarters may not be anti-dilutive on a full-year basis.*

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

Table of Contents

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have access to the Audit Committee.

Disclosure Controls and Procedures

The Company’s management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of December 31, 2017, the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company’s management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended. Under the supervision and with the participation of our management, including our principal executive officer, principal financial and accounting officers, we have conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on the above evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2017.

The effectiveness of our internal control over financial reporting as of December 31, 2017 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Part II, Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter ended December 31, 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding directors is incorporated herein by reference to the section entitled “Proposal 1 - Election of Directors” in our definitive Proxy Statement (2018 Proxy Statement) to be filed pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, for our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed within 120 days after the end of our fiscal year ended December 31, 2017.

The information regarding compliance with Section 16(a) of the Securities and Exchange Act of 1934 is incorporated herein by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” of our 2018 Proxy Statement.

The information regarding the Audit Committee, its members and the Audit Committee financial experts is incorporated by reference herein from the subsection entitled “Committee Functions, Membership and Meetings” in the section entitled “Proposal 1 - Election of Directors” in our 2018 Proxy Statement.

We have adopted a code of ethics applicable to our principal executive officer, principal financial officer and principal accounting officer. The Finance Code of Conduct can be found on our website at: http://www.conduent.com/investor and then clicking on Corporate Governance. Information concerning our Finance Code of Conduct can be found under "Corporate Governance" in our 2018 Proxy Statement and is incorporated here by reference.

Executive Officers of Conduent

The following is a list of the executive officers of Conduent, their current ages, their present positions and the year appointed to their present positions.

Each officer is elected to hold office until the meeting of the Board of Directors held on the day of the next annual meeting of shareholders, subject to the provisions of the By-Laws.

Name	Age	Present Position	Year Appointed to Present Position	Conduent Officer Since
Ashok Vemuri*	49	Chief Executive Officer	2017	2017
David Amoriell	61	Executive Vice President & President, Public Sector	2017	2017
Allan Cohen	48	Vice President & Chief Accounting Officer	2017	2017
Jeffrey Friedel	56	Executive Vice President & Chief People Officer	2017	2017
James Michael Peffer	56	Executive Vice President, General Counsel & Secretary	2017	2017
Brian J. Webb-Walsh	42	Executive Vice President & Chief Financial Officer	2017	2017

* Member of Conduent Board of Directors

Each of the officers named above has been an officer or an executive of Conduent or its subsidiaries for less than five years.

Mr. Vemuri served as Chief Executive Officer of Xerox Business Services, LLC and an Executive Vice President of Xerox Corporation since July 2016. Mr. Vemuri previously was President, Chief Executive Officer and a member of the Board of Directors of IGATE Corporation. Prior to IGATE, Mr. Vemuri spent 14 years at Infosys Limited, a multinational consulting and IT services company, in a variety of leadership and business development roles.

Mr. Amoriell served as the chief operating officer of the Public Sector Business Group for Xerox Services. He was named to that position in June 2014 and appointed a corporate vice president of Xerox in February 2012. Prior to that, Mr. Amoriell was the chief operating officer for the Government & Transportation Sector of Xerox Services.

Prior to joining Conduent, Mr. Cohen served as Senior Vice President and Controller of NBC Universal since 2011. Mr Cohen also previously served as Vice President, Assistant Controller at Time Warner, Professional Accounting Fellow in the Division of Corporate Finance at the Securities and Exchange Commission and Senior Manager at PriceWaterhouseCoopers.

Table of Contents

Prior to joining Conduent, Mr. Friedel served as Vice President and Head of the Office of Integrity and Compliance at Infosys Limited from January 2016 to September 2016, a global leader in technology services and consulting, where he oversaw SEC compliance, internal investigations, code of conduct, whistleblower, and anti-bribery and export regulations. Mr. Friedel has also previously served as Senior Vice President and General Counsel at IGATE Corporation from June 2014 to December 2015, an IT services and business process outsourcing company which was acquired by CapGemini. Prior to June 2014, Mr. Friedel held a variety of leadership roles at Infosys Limited.

Mr. Peffer served as Vice President, General Counsel and Secretary for Xerox Corporation from August 2016 to December 2016. Prior to this, Mr. Peffer served as Associate General Counsel of Xerox Corporation and Executive Vice President of Xerox Business Services, LLC. since 2010. Prior to 2010, Mr. Peffer was Senior Vice President and Deputy General Counsel of ACS from May 2009.

Mr. Webb-Walsh served as the Chief Financial Officer of Xerox Services since January 2016. Prior to this, Mr. Webb-Walsh was Senior Vice President of Finance for the Government Healthcare Group and the Platform Development and Systems Integration Group of Xerox Services. Mr. Webb-Walsh joined Xerox Corporation in 1997 and has held a variety of leadership positions.

2016 Tax Valuation	38	—	—	(14)	24
2015 Tax Valuation	35	—	5	(2)	38

(1) Account Receivables: additions charged to expense represent bad debt provisions relate to estimated losses due to credit and similar collectibility issues.
(2) Account Receivables: Other charges (credits) relate to adjustments to reserves necessary to reflect events of non-payment such as customer accommodations and contract terminations.
(3) Account Receivables: Deductions and other, net of recoveries primarily relates to receivable write-offs, but also includes the impact of foreign currency translation adjustments and recoveries of previously written off receivables.
(4) Tax Valuation: Reductions to tax valuation allowance are primarily related to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Table of Contents

(3) The exhibits listed below are filed or incorporated by reference are part of this Form 10-K.

Management contracts or compensatory plans or arrangements listed that are applicable to the executive officers named in the Summary Compensation Table which appears in Registrant's 2018 Proxy Statement or to our directors are preceded by an asterisk (*).

Exhibit No.	
2.1	Separation and Distribution Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 2.1 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
3.1	Restated Certificate of Incorporation of Registrant as of December 23, 2016.
	Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016.
	Incorporated by reference to Exhibit 3.2 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
4.1	Indenture, dated as of December 7, 2016, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated December 9, 2016. (See SEC File Number 001-37817).
10.1(a)	Credit Agreement, dated as of December 7, 2016, among Conduent Incorporated, Xerox Business Services, LLC, Affiliated Computer Services International B.V., Conduent Finance, Inc., the Lenders from time to time party thereto and JPMorgan Chase Bank, N.A., as Administrative Agent.
	Incorporated by reference to Exhibit 10.1 to Registrant's Current Report on Form 8-K dated December 9, 2016. (See SEC File Number 001-37817).
10.1(b)	Amendment No. 1 to Credit Agreement, dated as of April 1, 2017, among Conduent Incorporated, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Affiliated Computer Services International B.V., Conduent Finance, Inc., the Lenders from time to time party thereto and JPMorgan Chase Bank, N.A. as Administrative Agent.
	Incorporated by reference to Exhibit 10.1 to Registrant's Current Report on Form 8-K dated April 11, 2017. (See SEC File Number 001-37817).
10.1(c)	Amendment No. 2 to Credit Agreement, dated as of October 10, 2017, among Conduent Incorporated, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Affiliated Computer Services International B.V., Conduent Finance, Inc., the Lenders from time to time party thereto and JPMorgan Chase Bank, N.A. as Administrative Agent.
	Incorporated by reference to Exhibit 10.1 to Registrant's Current Report on Form 8-K dated October 10, 2017. (See SEC File Number 001-37817).
10.1(d)	First Incremental Agreement, dated as of January 3, 2017, among JPMorgan Chase Bank, N.A., as Administrative Agent and Xerox Business Services, LLC.
	Incorporated by reference to Exhibit 10.1(b) to the Registrant's Annual Report on Form 10-K dated March 10, 2017, (See SEC File Number 001-37817).
10.3(a)	Transition Services Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 10.1 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
10.3(b)	Tax Matters Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 10.2 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
10.3(c)	Employee Matters Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 10.3 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
10.3(d)	Intellectual Property Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.

Table of Contents

	Incorporated by reference to Exhibit 10.4 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
10.3(e)	Trademark License Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 10.5 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).

EXHIBIT 10.6(a)(v)

PERFORMANCE STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Performance Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration, the Company agrees as follows:

AWARDS

1. Award of Performance Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary Performance Stock Units (individually, a "PS") as shown on the Award Summary, representing the target number of shares of Common Stock covered by this Agreement (the "Target PSs"). Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE PERFORMANCE STOCK UNITS

2. Entitlement to Shares. As soon as practicable on or after the Vesting Date (as defined below) (or such earlier date provided in Section 9) in connection with the PSs, the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested PSs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following the Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued pursuant to this Agreement. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of the PSs covered hereby shall be subject to (i) the achievement of the performance goals as set forth in the Award Summary (the "Performance Goals") as determined by the Committee and (ii) the Employee's continued employment with the Company or a subsidiary or affiliate through the vesting date indicated on the Award Summary (the "Vesting Date"). In the event the achievement of the Performance Goals is "below threshold" level, then all of the PSs will be forfeited; in the event that achievement of the Performance Goals is between "threshold" and "target" level, then no less than 50% and no more than 100% of the Target PSs will vest; and in the event achievement of the Performance Goals is between "target" and "maximum" level, then no less than 100% and no more than 200% of the Target PSs will vest, in each case as set forth in the Award Summary and subject to the Employee's continued employment through the Vesting Date as described in clause (ii) of the immediately preceding sentence.

Upon the occurrence of an event constituting a Change in Control prior to the Vesting Date, notwithstanding anything to the contrary in Section 22(b) of the Plan, the Performance Goals shall be deemed achieved at target level, but thereafter the PSs, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such PSs, and any dividend equivalents with respect thereto, shall be subject to the Employee's continued employment with the Company or a subsidiary or an affiliate through the Vesting Date, at which time such PSs shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger tax or penalty under Section 409A of the Code, as determined by the Committee; provided that such PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to the Vesting Date or in the event such Change in Control occurs following a termination of the Employee's employment. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on the Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested PSs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on the Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of PSs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/ Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the PSs until the date of issuance of a stock certificate to him for such PSs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the PSs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, PSs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a PS in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on PSs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than (A) retirement or (B) following a Change in Control, Termination For Good Reason, the PSs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer prior to a Change in Control for any reason other than due to death, Disability or termination for Cause, the number of PSs covered by this Agreement, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. The vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided

that, to the extent such 60-day period straddles two calendar years, then such prorated number of PSs, and any dividend equivalents with respect thereto, shall settled in the second calendar year;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the three-year performance period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then such PSs, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the vesting of the PSs shall remain subject to the achievement of the Performance Goals in accordance with Section 3, if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days following the Vesting Date in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the three-year performance period elapsed prior to such termination;

(v) voluntarily ceases to be an employee of the Employer by reason of retirement (for purposes of this Agreement only, "retirement" for U.S. employees shall mean termination of employment at or above age 55 with 10 years of service or age 60 with 5 years of service), the PSs, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. If such termination occurs prior to a Change in Control, the vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. If such termination occurs following a Change in Control, the proration described in this Section 9(a)(v) shall be applied to the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), immediately following which such prorated number of PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. In each case, whether such termination of employment occurs prior to or following a Change of Control, such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then such prorated number of PSs, and any dividend equivalents with respect thereto, shall be settled or paid in cash, as applicable, in the second calendar year;

(vi) involuntarily ceases to be an employee of the Employer due to termination for Cause, the PSs shall, subject to any Plan provisions to the contrary, be cancelled and forfeited on the date of such termination of employment; and

(vii) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, without proration based on the portion of the three-year performance period elapsed prior to such termination. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-

day period straddles two calendar years, then such PSs, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(b) Cause. "Cause" means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company's Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for "immediate discharge" under the Employer's Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(c) "Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

(d) "Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the PSs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of PSs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the PSs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting of the PSs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of PSs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the PSs are subject to modification and adjustment under Section 6 of the Plan.

(b) the award of the PSs is voluntary and occasional and does not create any contractual or other right to receive future grants of PSs, or benefits in lieu of PSs, even if PSs have been granted repeatedly in the past;

(c) all decisions with respect to future PS awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;

(d) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the PS award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;

(e) The Employee is voluntarily participating in the Plan;

(f) the PSs and the shares of Common Stock subject to the PSs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;

(g) the PSs and the shares of Common Stock subject to the PSs are not intended to replace any pension rights or compensation;

(h) the PSs and the shares of Common Stock subject to the PSs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(i) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(j) in consideration of the award of the PSs, no claim or entitlement to compensation or damages shall arise from forfeiture of the PSs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(k) subject to the provisions in the Plan regarding Change in Control, PSs and the benefits under the Plan, if any, will not automatically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her participation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Employee, the Committee or its authorized delegate, as applicable, may amend this Agreement in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corporation" of the Company as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as determined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

EXHIBIT 10.6(a)(v)

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated business, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

EXHIBIT 10.6(a)(v)

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

EXHIBIT 10.6(a)(v)

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the PS award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the PSs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is necessary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CONDUENT INCORPORATED

EXHIBIT 10.6(a)(vi)

RESTRICTED STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Restricted Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration the Company agrees as follows:

AWARDS

1 . Award of Restricted Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary the number of Restricted Stock Units (individually, a "RSU") as shown on the Award Summary. Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE RESTRICTED STOCK UNITS

2 . Entitlement to Shares. As soon as practicable on or after the vesting dates indicated on the Award Summary (each, a "Vesting Date") (or such earlier date provided in Section 9), the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested RSUs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following each applicable Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued as a result of such tax withholding. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of RSUs covered hereby shall be subject to the Employee's continued employment with the Company or a subsidiary or affiliate through the applicable Vesting Date. The Employee shall be eligible to vest on each Vesting Date in the applicable percentage of the shares of Common Stock covered by this Agreement set forth in the Award Summary.

Upon the occurrence of an event constituting a Change in Control, notwithstanding anything to the contrary in Section 22(b) of the Plan, the RSUs outstanding on the date of such Change in Control, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such RSUs, and any dividend equivalents with respect thereto, shall be subject to Employee's continued employment with the Company or a subsidiary or an affiliate through each applicable Vesting Date as provided in this Section 3, at which time such RSUs shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee; provided that the RSUs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided

EXHIBIT 10.6(a)(vi)

in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to a Vesting Date. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on each applicable Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested RSUs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on each applicable Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of RSUs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the RSUs until the date of issuance of a stock certificate to him for such RSUs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the RSUs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, RSUs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a RSU in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on RSUs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than (A) retirement or (B) following a Change in Control, Termination For Good Reason, the RSUs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer prior to a Change in Control for any reason other than due to death, Disability or termination for Cause, the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since the date the award was granted, in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. Such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled within 60 days following such termination in accordance with Section 2; provided that such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided further that, to the extent such 60-day period straddles two calendar years, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall be settled in the second calendar year;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under

EXHIBIT 10.6(a)(vi)

Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days of such termination in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the vesting period elapsed prior to such termination;

(v) voluntarily ceases to be an employee of the Employer by reason of retirement (for purposes of this Agreement only, "retirement" for U.S. employees shall mean termination of employment at or above age 55 with 10 years of service or age 60 with 5 years of service with the Employer), the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since the date the award was granted in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. If such termination of employment occurs prior to a Change in Control, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled within 60 days following such termination in accordance with Section 2. If such termination of employment occurs following a Change in Control, such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days of the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. In each case, whether such termination of employment occurs prior to or following a Change of Control, such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent the 60-day period straddles two calendar years, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall be settled or paid in cash, as applicable, in the second calendar year;

(vi) involuntarily ceases to be an employee of the Employer due to termination for Cause, the RSUs shall, subject to any Plan provisions to the contrary, be cancelled and forfeited on the date of such termination of employment; and

(vii) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed since the most recent Vesting Date (or since the date the award was granted, in the case of a termination of employment prior to the first Vesting Date) prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall settled or paid in cash, as applicable, in the second calendar year;

(b) Cause. "Cause" means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company's Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for "immediate discharge" under the Employer's Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests

of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(c) "Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

(d) "Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the RSUs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of RSUs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the RSUs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting of RSUs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of RSUs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the RSUs are subject to modification and adjustment under Section 6 of the Plan.

(b) the award of the RSUs is voluntary and occasional and does not create any contractual or other right to receive future grants of RSUs, or benefits in lieu of RSUs, even if RSUs have been granted repeatedly in the past;

(c) all decisions with respect to future RSU awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;

(d) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the RSU award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;

(e) The Employee is voluntarily participating in the Plan;

(f) the RSUs and the shares of Common Stock subject to the RSUs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;

(g) the RSUs and the shares of Common Stock subject to the RSUs are not intended to replace any pension rights or compensation;

(h) the RSUs and the shares of Common Stock subject to the RSUs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement

or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(i) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(j) in consideration of the award of the RSUs, no claim or entitlement to compensation or damages shall arise from forfeiture of the RSUs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(k) subject to the provisions in the Plan regarding Change in Control, RSUs and the benefits under the Plan, if any, will not automatically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her participation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agreement in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corporation" of the Company as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as determined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the

authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated business, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the

EXHIBIT 10.6(a)(vi)

Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the RSU award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special

EXHIBIT 10.6(a)(vi)

terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the RSUs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is necessary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

September 27, 2017

Allan Cohen

190 Vandelinda Avenue

Teaneck, New Jersey 07666

Dear Allan:

I am pleased to offer you the position of Vice President, Chief Accounting Officer, Conduent, Inc., reporting to me. The expected start date is October 17, 2017. Your work location will be at 100 Campus Drive in Florham Park, New Jersey. This offer is contingent upon approval of the Board of Directors.

Annual Base Salary

Your starting base salary for this position will be paid bi-weekly, one week in arrears, at the annualized rate of $400,000.

Annual Performance Incentive Plan

You will be eligible to participate in the 2018 Annual Performance Incentive Plan (APIP) at an annual target level of 60% of base salary prorated for time eligible to participate in the plan. The payout can be up to 2 times target and this varies based on company and individual performance.

Executive Long-Term Incentive Plan

You will be eligible to participate in the Executive Long-Term Incentive Plan (ELTIP) for 2018 with a target award of $250,000. Grants are typically made in April of each year. Additional details of the ELTIP will be provided to you separately.

You will also be eligible to receive a sign-on ELTIP grant of $250,000 at grant date, expected to be on or about December 29, 2017. Additional details of the ELTIP will be provided to you separately.

Benefits

We are pleased to offer you a comprehensive benefits package, including medical, dental, vision care, disability income protection, accident insurance, and life insurance. You are eligible for coverage on your first day of employment assuming an October 17, 2017 start date.

In addition, Conduent offers a 401(k) savings plan which includes a dollar-for-dollar company match of 3.0%. You will also be eligible for paid vacation totaling four weeks per year.

Severance

You will be eligible for the severance if your employment is terminated by Conduent for any reason (other than for cause) as defined herein. Severance benefits under this arrangement will be the equivalent of 6 months of your annual base salary and benefits coverage and will be paid in accordance with our regularly scheduled payroll. The payment of any severance benefits will be contingent upon your execution of both a general release of all claims and an agreement not to engage in detrimental activity as determined by the Company upon your termination.

For Cause Definition

The term for cause as used in this letter shall mean any one or more of the following reasons for termination: (i) your failure to follow the directions of your manager provided such directions are not inconsistent with your job duties and/or with applicable law; (ii) your performance of any act of fraud, dishonesty, misappropriation or embezzlement, or other similar willful misconduct while conducting business on behalf of Conduent or executing upon your job duties and responsibilities; (iii) your conviction of any felony or a crime involving moral turpitude (including pleading guilty or no contest to such crime or a lesser crime which results from plea bargaining); (iv) your performance becomes impaired due to alcohol or substance abuse and you refuse to seek treatment; (v) your performance of any act which injures or reasonably could be expected to injure the reputation, brand, business or business relationships of Conduent; and (vi) your violation of any material Conduent policy, including, but not limited to, policies prohibiting sexual harassment, retaliation, discrimination, and violence.

EXHIBIT 10.6(g)

Other Conditions

It is our sincere hope and belief that our relationship will be a beneficial one, however, Conduent does not offer employment on a fixed term basis. Unless otherwise prohibited by law, this letter should not be considered in any manner as a proposed contract for employment for any fixed term, as your employment will be "at will." That is, either you or Conduent can terminate this relationship at any time, with or without cause or notice. In addition, Conduent may change any term or condition of your employment at will; with or without cause or notice.

This offer of employment is contingent on the receipt of a waiver of non-competition agreements with current or prior employers, if any. This offer is also contingent upon the successful completion of a pre-employment background check (criminal, credit etc.) which will require your execution of a background screening consent. Additionally, your employment is contingent on your execution of Conduent Employee Confidentiality, Non-Solicitation and Intellectual Property Non-Compete Agreement. Lastly, you will be required to present documents necessary to complete an I−9 Form. Human Resources will contact you to make an appointment with an I−9 verifier prior to your scheduled start date.

This offer will remain in effect until October 2, 2017. Please notify me of your acceptance and ensure that all requirements are met before we finalize your start date (expected to be on or before Tuesday, October 17, 2017). All originals should be returned to me and if you have any questions, please feel free to contact me at (973) 526-7146.

Allan, I am delighted you are joining the Conduent leadership team. This is one of most exciting periods in our company's history; I look forward to your significant contributions and success.

Sincerely,

/s/ BRIAN WEBB-WALSH

FORWARD-LOOKING STATEMENTS

From time to time, we and our representatives may provide information, whether orally or in writing, including certain statements in this Annual Report on Form 10-K, which are deemed to be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make.

Such factors include, but are not limited to: termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information, and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our security systems and service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. We do not intend to update these forward-looking statements, except as required by law.

CONDUENT INCORPORATED
FORM 10-K
DECEMBER 31, 2016

TABLE OF CONTENTS

PART I

ITEM 1. BUSINESS

Our Business

Conduent is a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experiences.

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the separation agreement. As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

We create value for our Commercial and Public Sector clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics.

Our portfolio includes industry-focused service offerings in attractive growth markets such as Healthcare and Transportation, as well as multi-industry service offerings such as Transaction Processing, Customer Care and Payment Services.

We believe our addressable market size in the global business process service industry is estimated at nearly $260 billion in 2016, with expected growth rates in the mid-single digits through 2019 according to third party industry reports. We have leadership positions in key market segments, including Healthcare and Transportation, which are expected to grow at 8% and 5% on a compounded annual basis through 2019, respectively, according to third party industry reports. In addition, we are well positioned to capitalize on key industry trends such as increased demand for productivity, automation, personalization and innovation to capture growth.

Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation, complemented by tightly aligned investments. As a result, we aim to deliver profitable growth and margin expansion and to deploy a disciplined capital allocation strategy.

With approximately 96,000 employees globally as of December 31, 2016, we provide differentiated services to clients spanning small, medium and large businesses and to governments of all sizes in 42 countries. In 2016, we generated $6.4 billion in total revenues, over 80% of which was recurring.

Our Transformation

We have a track-record of active portfolio management with an ongoing focus on optimizing our capabilities and effectively targeting attractive growth areas in a rapidly evolving business process services industry. In recent years, we have taken significant actions to improve our profitability and drive growth with a more focused portfolio of services. These include the divestiture of our Information Technology Outsourcing ("ITO") business, the refocusing of our Government Healthcare business, the re-organization of our delivery operations, as well as acquisitions and organic investments in key growth markets to expand our capabilities and client reach. We plan to continue enhancing our operational and portfolio focus as a standalone company.

Key initiatives include:

- ***Realigned Delivery.*** During 2016 we began to reorganize the business to better align to our vertical go-to-market strategy and to our global delivery capabilities. We believe this operating structure will allow us to better integrate and tailor business solutions for our customers.
- ***Divested Non-Core Assets.*** We completed the sale of our ITO business on June 30, 2015 to Atos SE. The sale enabled us to increase our focus on areas where we have a competitive advantage.
- ***Refocused our Government Healthcare Business.*** In 2015, we refocused our Government Healthcare business on higher margin, growing segments such as medical and pharmacy benefits management and fraud and abuse detection. We have also reduced our participation in certain Medicaid platform implementations that were

presenting unattractive levels of risk and exposure. We plan to continue to reduce our exposure to large-scale Medicaid platform implementations that have unattractive levels of risk and profitability in 2017.
- ***Increased Use of Automation.*** We have developed and deployed a set of advanced software-based automation tools as part of our service delivery operations. These tools reduce the amount of repetitive, manual labor required to deliver many of our services and improve service quality through lower error rates and faster processing times.

We are also in the process of a strategic transformation program to deliver cost savings through infrastructure optimization, labor productivity and automation initiatives, restructuring of unprofitable contracts and other efficiencies. This transformation program will enable us to better capitalize on our differentiated service offerings, industry expertise and global delivery excellence and position us for long-term shareholder value creation.

Our Market Opportunity

We believe our addressable market size in the global business process service industry is estimated at nearly $260 billion in 2016, according to third party industry reports, and we are a leader across several segments of this large, diverse and growing market. Providing business process services today is complex and multi-faceted with services that span many industries.

Ongoing competitive pressures and increasing demand for further productivity gains have motivated businesses to outsource elements of their day-to-day operations to accelerate performance and innovation. As a result, our clients have become more focused on their core businesses and the range of outsourced activities has expanded greatly. Increasing globalization has also required many companies to optimize cost structures to retain competitiveness and business process services have become a key component of this strategy.

The ongoing shift to next-generation software and automation technologies is driving greater demand for, and expectation of, efficiency and personalization by the constituents and customers of the businesses and governments we serve. Addressing these business and operational challenges is necessary for business process services companies to capitalize on these trends. In addition, business process services have the potential to meaningfully enhance productivity for businesses and governments and satisfaction for their constituents and customers.

Segments

Our reportable segments correspond to how management organizes and manages the business and are aligned to the industries in which our clients operate: Commercial Industries, Healthcare and Public Sector.

- Our *Commercial Industries* segment provides business process services and customized solutions to clients in a variety of industries (other than healthcare).
- Our *Healthcare* segment provides innovative industry-centric business process services to clients across the healthcare industry, including providers, payers, employers, pharmaceutical and life science companies and government agencies.
- Our *Public Sector* segment provides government-centric business process services and subject matter experts to U.S. federal, state and local and foreign governments.
- Our Government Health Enterprise (“HE”) Medicaid Platform for all current state clients and Student Loan businesses, as well as non-allocated expenses and inter-segment eliminations, are included in Other.

We present segment financial information in Note 2 to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated here by reference. The discussion below highlights our segment revenues for the year ended December 31, 2016.

Commercial Industries

Our Commercial Industries segment is our largest segment, with $2.7 billion in revenues in 2016, representing 42% of the total revenues. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include Customer Care, Human Resource Management, Finance and Accounting, Workforce Learning Services and Legal Business Services. These services are complemented by innovative industry-specific services such as personalized product information for clients in the Automotive industry, digitized source-to-pay

solutions for clients in the Manufacturing industry, customer experience and marketing services for clients in the Retail industry, and mortgage and consumer loan processing for clients in the Financial Services industry.

Healthcare

Our Healthcare segment generated revenues of $1.7 billion in 2016, representing 26% of total revenues. Through this segment we offer innovative services and solutions and subject matter expertise to clients across the healthcare industry, including providers, payers, pharmaceutical and life science companies and government agencies. We strive to enable our healthcare clients to focus on improving the patient care experience, lowering total costs and enabling better long-term health outcomes. Our Healthcare segment primarily serves the following types of clients:

- ***Healthcare Payer:*** We deliver administrative efficiency services and customer experience services/solutions to the top 20 commercial payers. Our services offered include payment integrity solutions, the full spectrum of payer administrative services, member engagement services, health risk assessment, claims processing, mailroom services and outbound printing. Our broad set of services helps healthcare payers to optimize costs by streamlining business processes and recovering incorrectly attributed liabilities. In addition, our services assist with member risk assessment and improve member experience through enhanced engagement tools.

- ***Healthcare Provider Solutions:*** We provide care and quality analytics and workflow solutions and software adoption services to hospitals, clinicians and other healthcare providers, including large healthcare systems, with contracts in 49 of the 50 states. Our healthcare provider services include a care and quality platform (Midas+), systems integration and advisory services to support electronic health record system implementations, software adoption services and community health population analytics. Our services provide our customers enhanced clinical insights of patients to improve quality of care, achieve better regulatory compliance by meeting accurate and timely reporting needs and improve their return on technology investments through simulation-based software adoption.

- ***Government Healthcare:*** We provide medical management/fiscal agent care management services to Medicaid programs and federally-funded U.S. government healthcare programs in 29 states, Puerto Rico and the District of Columbia. Our services include a range of innovative solutions such as Medicaid management fiscal agent, pharmacy benefits management and clinical program management. These services help states optimize their costs by streamlining access to care and improve patient health outcomes through population health management and help families in need by improving beneficiary support.

- ***Pharmaceuticals & Life Sciences:*** We provide services to 9 of the top 10 global pharmaceutical and life science companies to support their revenue generation and clinical services. Our services include inside sales for drug detailing, clinical trial recruitment, patient access and medication adherence and compliance solutions. These services help generate incremental revenue by driving increased adoption of both mature and new drugs by clinicians and improving patient health outcomes by facilitating access to drugs and driving medication adherence.

Public Sector

Our Public Sector segment generated revenues of $1.7 billion in 2016, representing 27% of the total revenues. This segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance program administration, transaction processing and payment services. In order to provide targeted support to our government clients, our Public Sector segment is organized into two primary businesses:

- ***Transportation:*** We provide revenue-generating transportation services to government clients in over 25 countries. Our services include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting. These innovative services significantly improve individual travel experiences, optimize how vehicles and goods move efficiently within cities, digitize integrated modes of transportation and help our government clients to better serve their constituents.

- ***Federal, State and Local Government:*** We support our government clients with services targeting key civilian agencies within federal, state and local governments, as well as government administrative offices. Our depth of agency-specific expertise combined with our scale allows us to deliver and manage programs at all levels of government. Our broad set of public sector services includes public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies.

Other

Other includes our Government HE Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients, and our Student Loan business, which is in runoff, as well as non-allocated expenses and inter-segment eliminations. In 2016, Other accounted for approximately $300 million of revenues, representing 5% of total revenues.

Our Service Offerings

Our portfolio of business process services includes a combination of industry-specific services and multi-industry services. We have subject matter experts who are responsible for implementing each of these services, delivering service excellence to clients, ensuring best practices to improve cost competitiveness, innovating our next generation offerings and supporting worldwide sales.

Industry-Specific Services

Commercial Industry-Specific Services
Examples of the services we offer include personalized product information for automotive clients, digitized source to pay solutions for manufacturing clients, mortgage and consumer loan processing for financial institution clients and customized workforce learning solutions for aerospace clients.

Healthcare Industry-Specific Services
Our healthcare services include care integration and coordination, member health risk assessments, payment integrity (*e.g.*, recovering claims from the appropriate payers), fiscal agent administrative services and providing management information systems in support of Medicaid programs, pharmacy benefits management, clinical trial recruitment and care and quality analytics.

Public Sector-Specific Services
Transportation Services: The transportation services we offer include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting.

Other Public Sector Services: Our broad set of public sector services includes public assistance program administration, pension administration, records management, disease management and software offerings in support of federal, state and local government agencies.

Multi-Industry Services

Transaction Processing Services
We help our clients to improve communications with their customers and constituents, whether it is on paper, on-line or through other communication channels. By supporting our clients' customer communication processes, we help our clients deliver a better experience to their customers and operate with improved efficiency and greater effectiveness.

We offer a broad array of flexible transaction processing services that include data entry, scanning, image processing, enrollment processing, claims processing, high volume offsite print and mail services and file indexing. Our multi-channel communication capabilities (including secure print, email, text and web) enable the delivery of personalized and targeted communications that are designed to elicit the desired response from customers or other end-users (*e.g.*, on-time bill payment, increased marketing response rates). Our service offerings utilize both

proprietary and commercially available third-party technologies, combined with our expertise to ensure continued quality and innovation for our clients.

Payment Services
Prepaid Cards: We are an extensive provider of VISA and MasterCard prepaid debit cards, as well as other electronic payment cards in support of U.S. government benefit programs including Social Security, Supplemental Nutrition Assistance Program (formerly known as food stamps), Special Supplemental Nutrition Program for Women, Infants and Children and other specialized Electronic Benefits Transfer programs. Our secure payment services reduce fraud and eliminate paper checks by disbursing electronic payments directly to end users, even those without bank accounts. Our proprietary processing platform, significant operational expertise, advanced fraud analytics and adoption of Europay, MasterCard and Visa chip-enabled technology put us in the forefront of the Prepaid Card industry.

Health Savings Accounts: We provide clients with a simplified approach to help their employees manage their health care costs and accumulate wealth with tax-advantaged accounts. We consolidate administration of all
health spending accounts onto one common platform, including Health Savings Accounts, Health Reimbursement Arrangements, Flexible Spending Accounts and Health Incentive Accounts. By consolidating and integrating the management of health spending accounts, we help our clients improve benefit enrollment and account opening, consolidate customer service, simplify communications and streamline account funding and management.

Child Support Payments: We are an industry leader of U.S. State Government Disbursement Units for child support payments. We collect payments from non-custodial parents via check, credit card and transfers from employee payroll systems and disburse payments to the beneficiaries.

Customer Care Services
We offer customer care services that help our clients provide their own customers with a superior experience. Our service offerings range from answering simple billing questions to providing complex technical and customer support. We also offer both inbound and outbound sales and cross-selling programs through our contact center operations. We provide these services through multiple channels, including phone, SMS, chat, interactive voice response, social networks and email. We augment our customer care agents' efficiency and effectiveness with advanced technologies that help them resolve customer needs quickly and with consistently high quality.

Human Resources Services
We help our clients to support their employees at all stages of employment from initial on-boarding through retirement. We offer clients customized advisory, technology and administrative services that help them more
effectively involve employees in their health insurance, retirement plan and compensation programs. We design
and administer employee benefit programs that attract, reward and retain workforce talent through engaging technologies and decision support tools. Our service offerings include global health and retirement plan consultation and administration; cloud-based HR outsourcing; payroll and benefits administration; health savings and tax efficient account administration; and administration of, and consultation regarding, our proprietary private health care exchange, which allows employees to select from a set of predefined providers and also provides market-leading health and benefit decision support tools and ongoing health and wellness management.

Finance and Accounting Services
We serve clients by managing their critical finance, accounting and procurement processes. Our services include general accounting and reporting, billing and accounts receivable and purchasing, accounts payable and expense management services. We also offer wholesale and retail lockbox services and process auto and mortgage loans in the United States. With a global, dedicated team, we manage the core, end-to-end process areas of finance, accounting and procurement for some of the world's most recognized brands.

Legal Business Services
We have been providing client support to law firms and corporate legal departments for over 20 years. We work across the litigation lifecycle, with particular focus on the legal discovery and review process. Our offerings include litigation support services, compliance and risk review and managed services support.

Workforce Learning Services
We are a provider of end-to-end learning services, designed to accelerate the productivity and development of our clients' employees and extended work forces. Our global presence, superior innovation and expertise allow us to

deliver performance-based learning services tailored to our clients' unique strategic business goals. Our offerings include learning strategy and assessment, instructor management and learning administration.

Applied Automation and Analytics Solutions
Many of our service offerings described above incorporate our applied automation and analytics solutions to increase their value and effectiveness to clients across all industries. We deploy these solutions to personalize millions of interactions, optimize service delivery and simplify complex processes. For example, our customer care services harness the power of applied analytics and automation to help our customer service agents work more efficiently across different communication channels. Our applied automation solutions track and learn the most efficient means to address common customer service needs as they occur in real time so that we can solve the same problem faster the next time around. The combination of applied automation and analytics allows us to identify new service demand patterns and opportunities quickly so that we can proactively address them on behalf of our clients.

Our Competitive Strengths

We possess a number of competitive strengths that distinguish us from our competitors, including:

Leadership in attractive growth markets. We are a leader in business process services serving clients with a total addressable market that is estimated to be $260 billion, and is expected to grow mid-single digits through 2019. Our clients continue to outsource key business processes to accelerate performance and innovation. Additionally, clients are moving beyond services for back-office functions in order to drive customer satisfaction and loyalty, as well as productivity and efficiency. The increase in globalization and cost competition continues to accelerate, forcing companies to seek ways to stay ahead of the competition. These factors, along with clients and their customers demanding more personalized, seamless and secure solutions, are collectively driving the ongoing shift to next-generation software and automation technologies.

- ***Healthcare:*** U.S. healthcare spending is estimated to have represented greater than 15% of GDP in 2016 and is continuing to grow. As one of the most regulated industries, healthcare providers must balance increased utilization with heightened complexity and new financial pressures such as government budget challenges to significantly reduce reimbursements, reimbursement penalties for hospital readmissions and a shift from fee-for-service to "value-based" population health management. We are widely recognized by industry analysts as a leader in healthcare payer operations, serving all 20 of the top 20 U.S. managed healthcare plans and providing administrative and care management solutions to Medicaid programs and federally funded U.S. government healthcare programs in 29 states, Puerto Rico and the District of Columbia.
- ***Transportation:*** Traffic congestion continues to increase as urbanization and changing demographics take hold globally. As a result, optimized transportation systems are becoming critical to increase efficiency while maintaining strict safety requirements. Electronic toll collection, public transit and parking all represent key growth drivers as governments at all levels increasingly focus on transportation infrastructure. We maintain approximately 49% market share position in electronic toll collection in the United States based on toll revenues collected through our systems in 2016. We are also one of the largest U.S.-based commercial vehicle operations service providers in the United States with approximately 40% market share based on 2016 revenues, and we are an award-winning innovator in parking management.
- ***Transaction Processing***: We provide high volume print and mail services, enrollment processing and personalized and targeted marketing and communications, to large corporations and we believe we are a leading provider in this market.
- ***Prepaid Cards***: We are the leading provider of prepaid payment card services in support of the U.S. government prepaid card services market.

Global delivery expertise. Our scale and global delivery network enables us to deliver our proprietary technology, differentiated service offerings and service capabilities expertly to clients around the world. We have approximately 290 delivery centers, including operations in India, the Philippines, Jamaica, Guatemala, Mexico, Romania, the Dominican Republic and several locations within the United States, giving our customers the option for "onshore" or "offshore" outsourced business process services. This global delivery model enables us to leverage lower-cost production locations, consistent methodologies and processes, time zone advantages and business continuity plans. As of December 31, 2016, our employee location mix was approximately 48% in North America, 21% in Latin America / Caribbean, 20% in Asia Pacific and 11% in Europe / Middle East / Africa.

Differentiated suite of multi-industry service offerings at scale. We manage transaction-intensive processes and working directly with end-users to often meet their needs in real-time. We are unique in our ability to offer our clients these business process services on a large scale and with high quality. Additionally, we are able to leverage our multi-industry services to bring the same scale and quality to our portfolio of industry-specific service offerings, such as healthcare claims management, employee benefits management and public transit fare collection.

Innovation and development. We innovate by developing and acquiring new technologies and capabilities that improve business processes. We are constantly creating the next generation of simple, automated and touchless business processes to drive lower costs, higher quality and increased end-user satisfaction. Analytics allow us to transform big data into useful information that helps identify operational improvements and constituent insights. Additionally, we leverage robotic process automation and predictive analytics, combined with our deep subject matter expertise, to create intelligent services that improve security, increase speed, improve accuracy, quality and regulatory compliance and uncover insights that support better decision making and outcomes for our clients.

Stable recurring revenue model supported by a loyal, diverse client base. We have a broad and diverse base of clients in 42 countries across geographies and industries, including Fortune 1000 companies, small and midsize businesses as well as governmental entities. Our close client relationships and successful client execution support our stable recurring revenue model and high renewal rates. As of December 31, 2016, over 80% of our total revenues were recurring in nature, and our contract renewal rate was 86%.

Our Strategies

Our strategy is to drive leadership in attractive markets by leveraging and building on our competitive strengths. We intend to execute our strategy through increased business portfolio focus and operating discipline, enhanced sales and delivery capabilities and tightly aligned investments. Our strategy is designed to deliver value by delivering profitable growth, expanding operating margins and deploying a disciplined capital allocation strategy.

Specific elements of our strategy include the following:

Expand within attractive industries. The industries in which we operate have attractive revenue growth rates, generally in the mid-single digits. We intend to sharpen our focus and expand our business in industries with strong growth and profitability characteristics. We will employ a disciplined approach to portfolio management to complement our competitive strengths and build depth and breadth in our core businesses. Within the Healthcare industry, we intend to leverage our data analytics, differentiated service offerings and industry know-how to continue to service payer, provider and core government healthcare clients. Within the Transportation industry, we will leverage our global, end-to-end platforms to continue to deliver seamless travel experiences while providing back-end Transaction Processing and Call Center services for government clients globally.

Optimize and strengthen our services capabilities. We plan to optimize our services capabilities and strengthen several core areas, including Transaction Processing, Customer Care and Prepaid Card services by building out our services offerings and continuing to improve our competitive strengths. We have divested non-core assets, refocused our Government Healthcare business towards higher margin growing segments and consolidated delivery operations to enable greater productivity. Within Transaction Processing, we intend to continue to build industry-specific service offerings and advance inbound and outbound processing capabilities. Within Customer Care, we intend to capitalize on our global scale, cost efficiencies and our ability to provide seamless communications between our clients and their end-users through traditional (e.g., voice) and digital (e.g., web, mobile, Internet of Things) channels. In Prepaid Cards, we plan to continue to leverage our scalable platform to help our clients simplify their payment disbursement processes.

Continue to advance next-generation platforms and capabilities. We intend to maintain our focus on innovation to create next-generation solutions aligned with our clients' future needs and our growth strategies. We plan to advance our current platforms, further automate and personalize business processes and enhance data analytics capabilities to deliver value-added services for our clients.

Engage, develop and support our people. We intend to increasingly develop our employees by investing in training, processes and systems to equip them with modern tools that enable them to perform their jobs more efficiently. Further, we plan to strengthen our sales teams throughout improved and optimized coverage and effective talent management.

Competition

Although we encounter competition in all areas of our portfolio, we lead across many areas of our principal businesses. We compete on the basis of technology, performance, price, quality, reliability and customer service and support. In the current political environment in the U.S. and other territories, we also consider our "onshore" delivery capacity to be a competitive advantage. We participate in a highly competitive and rapidly evolving market, driven by changes in industry standards and demands of customers to become more efficient. Our competitors range from large international companies to relatively small firms. Our competitors include:

- Large multinational service providers such as CGI Group, Computer Sciences, Accenture, Aon Hewitt, Cognizant, Hewlett-Packard Enterprise, IBM, Teletech, and Teleperformance;
- Payroll processing and human capital management providers such as ADP and Paychex;
- Healthcare-focused IT and service solutions providers such as Cerner, Quintiles, and Maximus;
- U.S. Federal focused government services such as CACI International; and
- Smaller niche business processing service providers and in-house departments that perform functions that could be outsourced to us.

Sales and Marketing

We market our business process services to both potential and existing clients through our worldwide sales force and our business development team. Additionally, we have dedicated “solution architects” who work with clients to better understand their situation and develop a custom-tailored solution to meet their unique needs.

Our sales and marketing strategy is to go to market by industry to deliver key industry-specific and multi-industry service offerings to our clients. We focus on developing new prospects through market research and analysis, renewing expiring contracts and leveraging existing client relationships to offer additional services. We leverage our broad, multi-industry service offerings to package solutions through enterprise selling, while maintaining a disciplined approach to pricing and contracting. Our sales efforts typically involve extended selling cycles and our expertise in specific industries is critical to winning new business.

Our Geographies

We provide services globally and we have a diversified geographic delivery network, including a significant presence within the U.S. In 2016, approximately 11% of our revenues were generated by clients outside the United States. In 2016, our revenues by geography were as follows: $5,686 million in the United States (89% of total revenues), $547 million in Europe (8% of total revenues) and $175 million from the rest of the world (3% of total revenues). We present geographical information in Note 2 to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated here by reference.

Innovation and Research and Development

Our innovation and research and development (R&D) capabilities are critical to our client value proposition and competitive positioning. Our investments in innovation align with our growth strategies and are driven by a view of future needs and required competencies developed in close partnership with our clients and R&D partners. We are investing in attractive markets, such as healthcare and transportation, and building on proven platforms to create services that distinguish us from our competitors.

Our innovation and R&D are focused on three key areas: automation, personalization and analytics.

Automation—Create simple, automated and touchless business processes to drive lower cost, higher quality and increased agility. Businesses require agility to quickly respond to market changes and new customer requirements. To enable greater business process agility, our R&D goals are to simplify, automate and enable business processes via flexible platforms that run on robust and scalable infrastructures. Automation of business processes benefits from our strong image, video and robotic processing, as well as our machine learning capabilities. Application of these methods to business processes enables technology to perform tasks that today are performed manually. Examples include providing automation solutions in transportation by aggregating and automatically applying business rules to simplify toll payments, using our state-of-the-art video and image analytics to reduce the need for manual review of license plates in tolling and toll adjustment scenarios, analyzing data on

eligibility claims and checking for correctness on applications. The scope of automation is applied across our portfolio of services and is a key element of our ongoing strategy of modern, efficient services.

Personalization—Augment humans by providing secure, real-time, context-aware personalized products and services. Whether business correspondence, personal communication, manufactured items or an information service, personalization increases the value to the recipient. Our R&D investments lead to technologies that improve the efficiency, economics and relevance of business services, such as customer care and health and welfare services. In our current customer care service offerings, the human touch is seamlessly added as our software automatically takes telephony data and merges it with customer records pulled from multiple sources to seamlessly create targeted scripts and flows. This allows the agent to have the caller's data at their fingertips and provide a more personal experience to the customer—whether on the phone or online. In toll systems, our systems automatically pull up a customer's name, verify their information and prompt them for unpaid tolls. In transit systems, our mobile app aggregates and calculates the time, cost, carbon footprint and health benefits from walking, biking, driving, parking and taking public transit. For health and welfare, our systems provide state of the art personalized delivery to ensure the best utilization of funds for the neediest populations.

Analytics—Transform big data into useful information to support better decision making. Competitive advantage can be achieved by better utilizing available and real-time information. Today, information resides in an ever increasing universe of servers, repositories and formats. The vast majority of information is unstructured, including text, images, voice and videos. Here, we seek to better manage large data systems in order to extract business insights to provide our clients with actionable recommendations and new services. Tailoring these methods to various industry applications leads to new customer value propositions. In hospitals, we mine usage and clinical indicators to improve patient experiences. We also help our healthcare clients identify waste and fraud by identifying networks of providers and patients with suspicious behavior, such as sudden and dramatic increases in a provider's level of business or unusual or illogical patient treatment sequences. In transportation, we enable transport and parking operators to better understand and predict commuter needs, including adherence to schedules, passenger loading levels, car park utilization rates and the impact of varying factors such as weather and schedule variations. In our card payment services business, we perform geo location analytics to predict potential fraud behaviors to assure monies are being distributed to the intended recipients.

Our total R&D spending totaled $31 million in 2016, $52 million in 2015 and $46 million in 2014. In addition to the R&D spending, a significant portion of our technology advancements occur within client contracts and are recorded as either operating expenses or capital expenditures.

Intellectual Property

Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. We own approximately 1100 patents and pending applications. Our patent portfolio evolves as new patents are awarded to us and as older patents expire. These patents expire at various dates, generally 20 years from their original filing dates. While we believe that our portfolio of patents and applications has value, in general no single patent is essential to our business or any individual segment. In addition, any of our proprietary rights could be challenged, invalidated or circumvented, or may not provide significant competitive advantages.

Our business relies on software, provided, to an approximately equal extent by both internal development and external sourcing to deliver our services in our businesses. With respect to internally developed software, we claim copyright on all such software, registering works which may be accessible to third parties. In addition, we rely on maintaining source code confidentiality to assure our market competitiveness. With respect to externally sourced software, we rely on contracts assuring our continued access for our business usage.

In the United States, we own 154 trademarks, which are either registered or applied for, reflecting the many businesses we participate in. These trademarks may have a perpetual life, subject to renewal every 10 years and may be subject to cancellation or invalidation based on certain use requirements and third-party challenges, or on other grounds. We vigorously enforce and protect our trademarks.

People and Culture

We draw on the business and technical expertise of our talented and diverse global workforce to provide our clients with high-quality services. Our business leaders bring a strong diversity of experience in our industry and a track record of successful performance and execution.

We have historically operated according to the human resource policies and programs of Xerox, which are designed to meet general governance and regulatory requirements. Conduent established its own diversity and inclusion program post-separation, which is overseen by Conduent's human resources department. Conduent promotes understanding and inclusion through a comprehensive set of diversity initiatives and strategies, including addressing under-representation by identifying shortfalls and developing action plans to close those gaps and through work-life programs that assist employees in many aspects of their personal lives. Additionally, Conduent informs and educates all employees on diversity programs, policies and achievements. As an independent company, we intend to continue our commitment to diversity and inclusion and implement similar policies and programs.

In the United States, Conduent complies with Equal Employment Opportunity guidelines and all applicable federal, state and local laws that govern the hiring and treatment of its employees.

As of December 31, 2016, we had approximately 96,000 employees globally, with 48% located in the United States and the remainder located primarily in India, the Philippines, Jamaica, Guatemala and Mexico.

Training and Talent Development
We believe our people are our most important asset, which is why we invest in employee growth and development programs. We are focused on building a workplace where our people can do their best work and have access to the tools and resources they need to perform their jobs more effectively. We are building a culture of learning and have shifted from delivering training to incorporating learning into day-to-day work.

We have a strong performance management system in place that requires all employees to engage with their managers on goal-setting and performance feedback, enabling personal and professional development. There is a strong emphasis on mentorship and coaching, both formal and informal, to help employees get to the next level in their careers. We enable this by developing management capability for our front line leaders to ensure they are able to coach and mentor their teams and engage in constructive and continuous two-way dialogue.

Corporate Ethics
Our commitment to business ethics represents more than a declaration to do the right thing. It has become an integral part of the way we do business. We operate according to our ethics and compliance program, which is designed to meet general governance and specific industry and regulatory requirements with a focus on values, culture and performance with integrity. Conduent has a business ethics program, which is overseen by a business ethics office, and a code of business conduct (Code), which will serve as the foundation of our business ethics program. The code of business conduct makes clear Conduent’s expectations for ethical leadership, performance with integrity and compliance with company policies and the law. In addition, the code of business conduct embodies and reinforces Conduent’s commitment to integrity and helps employees resolve ethics and compliance concerns consistent with operating principles and legal and policy controls. In addition, as Conduent employees, our employees are required to complete business ethics training annually and we periodically solicit their input to gauge the state of Conduent’s ethical culture and help identify areas for improvement.

Our directors must act in accordance with our Code of Business Conduct and Ethics for Members of the Board; our principal executive officer, principal financial officer and principal accounting officer, among others, must act in accordance with our Finance Code of Conduct; and all of our executives and employees must act in accordance with our Code of Business Conduct. Each of these codes of conduct can be accessed through our website at www.conduent.com/corporate-governance. They are also available to any shareholder who requests them in writing addressed to Conduent Incorporated, 2nd Floor, 100 Campus Drive, Florham Park, NJ 07932, Attention: Corporate Secretary. We will disclose any future amendments to, or waivers from, provisions of our Code of Business Conduct and Ethics for members of the Board and, our Code of Business Conduct and our Finance Code of Conduct for our officers on our website as promptly as practicable, and consistent with the requirements of applicable SEC and NYSE rules.

Backlog

Backlog, or the value of the remaining term of our service contracts, is not a metric that we regularly use to measure our business. However, over 80% of our revenues in 2016 were tied to recurring revenue contracts.

Seasonality

Our revenues can be affected by various factors such as our clients' demand pattern for our services. These factors have historically resulted in higher revenues and profits in the fourth quarter.

Other

Conduent Incorporated is a New York corporation, organized in 2016. Our principal executive offices are located at 100 Campus Drive, Florham Park, New Jersey 07932. Our telephone number is (973) 261-7100.

In the Investor Information section of our Internet website, you will find our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. We make these documents available as soon as we can after we have filed them with, or furnished them to the U.S. Securities and Exchange Commission.

Our Internet address is www.conduent.com.

ITEM 1A. RISK FACTORS

Our government contracts are subject to termination rights, audits and investigations, which, if exercised, could negatively impact our reputation and reduce our ability to compete for new contracts.

A significant portion of our revenues is derived from contracts with U.S. federal, state and local governments and their agencies, and some of our revenues are derived from contracts with foreign governments and their agencies. Government entities typically finance projects through appropriated funds. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt or funding constraints, such as those recently experienced in the United States and Europe, could result in lower governmental sales and in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Additionally, if the government discovers improper or illegal activities or contractual non-compliance (including improper billing), we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with the government. Any resulting penalties or sanctions could materially adversely affect our results of operations and financial condition. Moreover, government contracts are generally subject to audits and investigations by government agencies. If the government finds that we inappropriately charged any costs to a contract, the costs are not reimbursable or, if already reimbursed, the cost must be refunded to the government. Further, the negative publicity that could arise from any such penalties, sanctions or findings in such audits or investigations could have an adverse effect on our reputation in the industry and reduce our ability to compete for new contracts and could materially adversely affect our results of operations and financial condition.

We derive significant revenue and profit from commercial and government contracts awarded through competitive bidding processes, including renewals, which can impose substantial costs on us, and we will not achieve revenue and profit objectives if we fail to accurately and effectively bid on such projects.

Many of these contracts are extremely complex and require the investment of significant resources in order to prepare accurate bids and proposals. Competitive bidding imposes substantial costs and presents a number of risks, including: (i) the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may or may not be awarded to us; (ii) the need to estimate accurately the resources and costs that will be required to implement and service any contracts we are awarded, sometimes in advance of the final determination of their full scope and design; (iii) the expense and delay that may arise if our competitors protest or

challenge awards made to us pursuant to competitive bidding and the risk that such protests or challenges could result in the requirement to resubmit bids and in the termination, reduction or modification of the awarded contracts; and (iv) the opportunity cost of not bidding on and winning other contracts we might otherwise pursue. If our competitors protest or challenge an award made to us on a government contract, the costs to defend such an award may be significant and could involve subsequent litigation that could take years to resolve.

Our ability to recover capital and other investments in connection with our contracts is subject to risk.

In order to attract and retain large outsourcing contracts, we sometimes make significant capital and other investments to enable us to perform our services under those contracts, such as purchases of information technology equipment, facility costs, labor resources and costs incurred to develop and implement software. The net book value of certain assets recorded, including a portion of our intangible assets, could be impaired, and our results of operations and financial condition could be materially adversely affected in the event of the early termination of all or a part of such a contract or a reduction in volumes and services thereunder for reasons such as a customer's or client's merger or acquisition, divestiture of assets or businesses, business failure or deterioration or a customer's or client's exercise of contract termination rights.

We rely to a significant extent on third-party providers, such as subcontractors, a relatively small number of primary software vendors, utility providers and network providers; if they cannot deliver or perform as expected or if our relationships with them are terminated or otherwise change, our results of operations and financial condition could be materially adversely affected.

Our ability to service our customers and clients and deliver and implement solutions depends to a large extent on third-party providers such as subcontractors, a relatively small number of primary software vendors, software application developers, utility providers and network providers meeting their obligations to us and our expectations in a timely, quality manner. Our results of operations and financial condition could be materially adversely affected and we might incur significant additional liabilities if any of our third-party providers do not meet these obligations or our or our clients' expectations or if they terminate or refuse to renew their relationships with us or were to offer their products to us with less advantageous prices and other terms than we previously had.

Failure to deliver on our contractual obligations properly and on time could materially adversely affect our results of operations and financial condition.

Our business model depends in large part on our ability to retain existing and attract new work from our base of existing clients, as well as on relationships we develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to meet those needs. In order for our business to grow, we must successfully manage the provision of services under our contracts. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client or obtain new work from other potential clients. In particular, many of our contracts with non-government clients may be terminated by the client, without cause, upon specified advance notice, so clients who are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date, which may result in our inability to fully recover our up-front investments. In addition, clients could direct future business to our competitors. We could also trigger contractual credits to clients or a contractual default. Failure to properly transition new clients to our systems, properly budget transition costs or accurately estimate contract operational costs could result in delays in our contract performance, trigger service level penalties, impair fixed or intangible assets or result in contract profit margins that do not meet our expectations or our historical profit margins.

In addition, we incur significant expenditures for the development and construction of system software platforms needed to support our clients' needs. Our failure to fully understand client requirements or implement the appropriate operating systems or databases or solutions which enable the use of other supporting software may delay the project and result in cost overruns or potential impairment of the related software platforms, which could materially adversely affect our results of operations and financial condition.

We face significant competition and our failure to compete successfully could materially adversely affect our results of operations and financial condition.

To remain competitive, we must develop services and applications; periodically enhance our existing offerings; remain cost efficient; and attract and retain key personnel and management. If we are unable to compete successfully, we could lose market share and important customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Our significant indebtedness could materially adversely affect our results of operations and financial condition.

We have and will continue to have a significant amount of debt and other obligations. Our substantial debt and other obligations could have important consequences. For example, it could (i) increase our vulnerability to general adverse economic and industry conditions; (ii) limit our ability to obtain additional financing for future working capital, capital expenditures, acquisitions and other general corporate requirements; (iii) require us to dedicate a substantial portion of our cash flows from operations to service debt and other obligations thereby reducing the availability of our cash flows from operations for other purposes; (iv) limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate; (v) place us at a competitive disadvantage compared to our competitors that have less debt; and (vi) become due and payable upon a change in control. If new debt is added to our current debt levels, these related risks could increase.

Our ability to make payments on and to refinance our indebtedness, including the debt incurred in connection with the Spin-Off, as well as any future debt that we may incur, will depend on our ability to generate cash in the future from operations, financings or asset sales. Our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

The terms of our indebtedness may restrict our current and future operations, particularly our ability to incur debt that we may need to fund initiatives in response to changes in our business, the industries in which we operate, the economy and governmental regulations.

The terms of our indebtedness includes a number of restrictive covenants that impose significant operating and financial restrictions on us and our subsidiaries and limit our ability to engage in actions that may be in our long-term best interests. These may restrict our and our subsidiaries' ability to take some or all of the following actions:

- incur or guarantee additional indebtedness or sell disqualified or preferred stock;
- pay dividends on, make distributions in respect of, repurchase or redeem, capital stock;
- make investments or acquisitions;
- sell, transfer or otherwise dispose of certain assets, including accounts receivable;
- create liens;
- enter into sale/leaseback transactions;
- enter into agreements restricting the ability to pay dividends or make other intercompany transfers;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our or our subsidiaries' assets;
- enter into transactions with affiliates;
- prepay, repurchase or redeem certain kinds of indebtedness;
- issue or sell stock of our subsidiaries; and/or
- significantly change the nature of our business.

As a result of all of these restrictions, we may be:

- limited in how we conduct our business and pursue our strategy; unable to raise additional debt financing to operate during general economic or business downturns; or
- unable to compete effectively or to take advantage of new business opportunities.

A breach of any of these covenants, if applicable, could result in an event of default under the terms of this indebtedness. If an event of default occurs, the lenders would have the right to accelerate the repayment of such debt and the event of default or acceleration may result in the acceleration of the repayment of any other of our debt to which a cross-default or cross-acceleration provision applies. Furthermore, the lenders of this indebtedness may require that we pledge our assets as collateral as security for our repayment obligations. If we were unable to repay any amount of this indebtedness when due and payable, the lenders could proceed against the collateral that

secures this indebtedness. In the event our creditors accelerate the repayment of our borrowings, we may not have sufficient assets to repay such indebtedness, which could materially adversely affect our results of operations and financial condition.

Our business is dependent on continued interest in outsourcing.

Our business and growth depend in large part on continued interest in outsourced business process services. Outsourcing means that an entity contracts with a third party, such as us, to provide business process services rather than perform such services in-house. There can be no assurance that this interest will continue, as organizations may elect to perform such services themselves and/or the business process outsourcing industry
could move to an as-a-Service model, thereby eliminating traditional business process outsourcing tasks. A
significant change in this interest in outsourcing could materially adversely affect our results of operations and
financial condition. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

Our profitability is dependent upon our ability to obtain adequate pricing for our services and to improve our cost structure.

Our success depends on our ability to obtain adequate pricing for our services that will provide a reasonable return to our shareholders. Depending on competitive market factors, future prices we obtain for our services may decline from previous levels. If we are unable to obtain adequate pricing for our services, it could materially adversely affect our results of operations and financial condition. In addition, our contracts are increasingly requiring tighter timelines for implementation as well as more stringent service level metrics. This makes the bidding process for new contracts much more difficult and requires us to adequately consider these requirements in the pricing of our services.

In order to meet the service requirements of our customers, which often includes 24/7 service, and to optimize our employee cost base, including our back-office support, we often locate our delivery service and back-office support centers in lower-cost locations, including several developing countries. Concentrating our centers in these locations presents a number of operational risks, many of which are beyond our control, including the risks of political instability, natural disasters, safety and security risks, labor disruptions, excessive employee turnover and rising labor rates. Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of such centers outside of the United States could materially adversely affect our results of operations and financial condition. These risks could impair our ability to effectively provide services to our customers and keep our costs aligned to our associated revenues and market requirements.

Our ability to sustain and improve profit margins is dependent on a number of factors, including our ability to continue to improve the cost efficiency of our operations through such programs as robotic process automation, to absorb the level of pricing pressures on our services through cost improvements and to successfully complete information technology initiatives. If any of these factors adversely materialize or if we are unable to achieve and maintain productivity improvements through restructuring actions or information technology initiatives, our ability to offset labor cost inflation and competitive price pressures would be impaired, each of which could materially adversely affect our results of operations and financial condition.

We may be subject to claims of infringement of third-party intellectual property rights which could adversely affect our results of operation and financial condition.

We rely heavily on the use of intellectual property. We do not own a significant portion of the software that we use to run our business; instead we license this software from a small number of primary vendors. If these vendors assert claims that we or our clients are infringing on their software or related intellectual property, we could incur substantial costs to defend these claims, which could materially adversely affect our results of operations and financial condition. In addition, if any of our vendors' infringement claims are ultimately successful, our vendors could require us to (i) cease selling or using products or services that incorporate the challenged software or technology, (ii) obtain a license or additional licenses from our vendors or (iii) redesign our services which rely on the challenged software or technology. In addition, we may be exposed to claims for monetary damages. If we are unsuccessful in defending an infringement claim and our vendors require us to initiate any of the above actions, or we are required to pay monetary damages, then such actions could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to individually identifiable information and personal health information, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and negatively impact our operations.

We receive, process, transmit and store information relating to identifiable individuals, both in our role as a service provider and as an employer. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations designed to protect both individually identifiable information as well as personal health information, including the Health Insurance Portability and Accountability Act of 1996, as amended ("HIPAA") and the HIPAA regulations governing, among other things, the privacy, security and electronic transmission of individually identifiable health information, and the European Union Directive on Data Protection (Directive 95/46/EC). Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of individually identifiable information and these laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. For example, the recent invalidation of the U.S.-EU Safe Harbor regime will require us to implement alternative mechanisms in order for some of our data flows from Europe to the United States to comply with applicable law. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to obtain and process information and allegations by our customers and clients that we have not performed our contractual obligations, any of which could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and materially adversely affect our results of operations and financial condition.

We receive, process and implement financial transactions, and disburse funds, on behalf of both government and commercial customers. This activity includes receiving debit and credit card information to process payments due to our customers as well as disbursing funds on payment or debit cards to payees of our customers. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations, including the Electronic Fund Transfer Act, as amended, the Currency and Foreign Transactions
Reporting Act of 1970 (commonly known as the Bank Secrecy Act), as amended, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (including the so-called Durbin Amendment), as amended, the Gramm-Leach-Bliley Act (also known as the Financial Modernization Act of 1999), as amended, and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of certain financial transactions and these laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process financial transactions and allegations by our customers and clients that we have not performed our contractual obligations, any of which
could materially adversely affect our results of operations and financial condition.

We are subject to breaches of our security systems and service interruptions which could expose us to liability, impair our reputation or temporarily render us unable to fulfill our service obligations under our contracts.

We have implemented security systems, both directly and with third-party subcontractors and service providers, with the intent of maintaining both the physical security of our facilities and the data security of our customers', clients' and suppliers' confidential information and information related to identifiable individuals (including payment card and debit and credit card information and health information) against unauthorized access through our information systems or by other electronic transmission or through the misdirection, theft or loss of physical media. These include, for example, the appropriate encryption of information. Despite such efforts, we are subject to breach of security systems which may result in unauthorized access to our facilities and/ or the information we are trying to protect. Because the techniques used to obtain unauthorized access are constantly changing and becoming increasingly more sophisticated and often are not recognized until launched against a target, we or our third-party service providers may be unable to anticipate these techniques or implement sufficient preventative measures. Additionally, with advances in computer capabilities and data protection requirements to address

ongoing threats, we may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by security breaches. Moreover, employee error or malfeasance, faulty password management or other irregularities may result in a defeat of our or our third-party service providers' security measures and breach our or our third-party service providers' information systems (whether digital or otherwise).

If unauthorized parties gain physical access to one of our or one of our third-party service providers' facilities or electronic access to our or one of our third-party service providers' information systems or such information is misdirected, lost or stolen during transmission or transport, any theft or misuse of such information could result in, among other things, unfavorable publicity, governmental inquiry and oversight, difficulty in marketing our services, allegations by our customers and clients that we have not performed our contractual obligations, litigation by affected parties and possible financial obligations for damages related to the theft or misuse of such information, any of which could materially adversely affect our results of operations and financial condition. Moreover, a security breach could require us to devote significant management resources to address the problems created by the security breach and to expend significant additional resources to upgrade further the security measures that we employ to guard such important personal information against cyber attacks maintain various systems and data centers for our customers. Often these systems and data centers must be maintained worldwide and on a 24/7 basis. Although we endeavor to ensure that there is adequate backup and maintenance of these systems and centers, we could experience service interruptions that could result in curtailed operations and loss of customers, which could reduce our revenues and profits in addition to impairing our reputation. If our information systems and our back-up systems are damaged, breached or cease to function properly, we may have to make a significant investment to repair or replace them, and we may suffer interruptions in our operations in the interim, each of which could materially adversely affect our results of operations and financial condition.

If we underestimate the scope of work or the costs of performance in our contracts, or we mis-perform our contracts, our results of operations and financial condition could be materially adversely affected.

In order to stay competitive in our industry, we must also keep pace with changing technologies and customer preferences. Many of our contracts require us to design, develop and implement new technological and operating systems for our customers. Many of these systems involve detailed and complex computer source code which must be created and integrated into a working system that meets contract specifications. The accounting for these contracts requires judgment relative to assessing risks, estimating contract revenues and costs and making assumptions for schedule and technical issues. To varying degrees, each contract type involves some risk that we could underestimate the costs and resources necessary to fulfill the contract. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances has resulted, in reduced profits or in losses. In addition, in many of our contracts, we have complicated performance obligations, including, without limitation, designing and building new integrated computer systems or doing actuarial work for pension, medical and other plans with beneficiaries that can rely on future projection of obligations to determine appropriate levels of funding. These contracts carry potential financial penalties or could result in financial damages or exposures if we fail to properly perform those obligations and could result in our results of operations and financial condition being materially adversely affected.

If we are unable to collect our receivables for unbilled services, our results of operations and financial condition could be materially adversely affected.

The profitability of certain of our large contracts depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. Actual losses on client balances could differ from current estimates and, as a result, may require adjustment of our receivables for unbilled services. Our receivables include long-term contracts and over the course of a long-term contract, our customers' financial condition may change such that their ability to pay their obligations, and our ability to collect our fees for services rendered, is adversely affected. Additionally, we may perform work for the federal, state and local governments, with respect to which we must file requests for equitable adjustment or claims with the proper agency to seek recovery in whole or in part, for out-of-scope work directed or caused by the government customer in support of its project, and the amounts of such recoveries may not meet our expectations or cover our costs. Timely collection of client balances also depends on our ability to complete our contractual commitments (for example, achieve specified milestones in percentage-of-completion contracts) and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we

experience an increase in the time to bill and collect for our services, our results of operations and financial condition could be materially adversely affected.

A decline in revenues from or a loss or failure of significant clients could materially adversely affect our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by the loss or failure of significant clients. Some of our clients are in business sectors which have experienced significant financial difficulties or consolidation, and/or the reduction of volumes or their inability to make payments to us, as a result of, among other things, their merger or acquisition, divestiture of assets or businesses, contract expiration, nonrenewal or early termination (including termination for convenience) or business or financial failure or deterioration. Economic and political conditions could affect our clients' businesses and the markets they serve.

We have non-recurring revenue, which subjects us to a risk that our revenues and cash flows from operations may fluctuate from period to period.

Revenue generated from our non-recurring services may fluctuate due to factors both within and outside of our control. Our mix of non-recurring and recurring revenues is impacted by acquisitions as well as growth in our non-recurring lines of business. There is less predictability and certainty in the timing and amount of revenues generated by our non-recurring services and, accordingly, our results of operations and financial condition could be materially adversely affected by the timing and amount of revenues generated from our non-recurring services.

The failure to obtain or maintain a satisfactory credit rating could adversely affect our liquidity, capital position, borrowing costs, access to capital markets and ability to post surety or performance bonds to support clients' contracts.

Any future downgrades to our credit rating could negatively impact our ability to renew contracts with our existing clients, limit our ability to compete for new clients, result in increased premiums for surety or performance bonds to support our clients' contracts and/or result in a requirement that we provide collateral to secure our surety or performance bonds. Further, certain of our commercial outsourcing contracts provide that, in the event our credit ratings are downgraded to specified levels, the client may elect to terminate its contract with us and either pay a reduced termination fee or, in some limited instances, no termination fee. Such a credit rating downgrade could adversely affect these client relationships.

There can be no assurance that we will be able to maintain our credit ratings. Any additional actual or anticipated downgrades of our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position and access to capital markets.

A failure to attract and retain necessary technical personnel and qualified subcontractors could materially adversely affect our results of operations and financial condition.

Because we operate in intensely competitive markets, our success depends to a significant extent upon our ability to attract, retain and motivate highly skilled and qualified technical personnel and to subcontract with qualified, competent subcontractors. If we fail to attract, train and retain sufficient numbers of qualified engineers, technical staff and sales and marketing representatives or are unable to contract with qualified, competent subcontractors, our results of operations and financial condition could be materially adversely affected. Experienced and capable personnel in the services industry remain in high demand, and there is continual competition for their talents. Additionally, we may be required to increase our hiring in geographic areas outside of the United States, which could subject us to increased geopolitical and exchange rate risk. The loss of any key technical employee or the loss of a key subcontractor relationship could materially adversely affect our results of operations and financial condition.

Increases in the cost of telephone and data services or significant interruptions in such services could materially adversely affect our results of operations and financial condition.

Our business is significantly dependent on telephone and data service provided by various local and long distance telephone and data service providers around the world. Accordingly, any disruption of these services

could materially adversely affect our results of operations and financial condition. We have taken steps to mitigate our exposure to service disruptions by investing in redundant circuits, although there is no assurance that the redundant circuits would not also suffer disruption. Any inability to obtain telephone or data services at favorable rates could materially adversely affect our results of operations and financial condition. Where possible, we have entered into long-term contracts with various providers to mitigate short-term rate increases and fluctuations. There is no obligation, however, for the vendors to renew their contracts with us, or to offer the same or lower rates in the future, and such contracts are subject to termination or modification for various reasons outside of our control. A significant increase in the cost of telephone or data services that is not recoverable through an increase in the price of our services could materially adversely affect our results of operations and financial condition. In addition, a number of our facilities are located in jurisdictions outside of the United States where the provision of utility services, including electricity and water, may not be consistently reliable, and while there are backup systems in many of our operating facilities, an extended outage of utility or network services could materially adversely affect our results of operations and financial condition.

We are a holding company and, therefore, may not be able to receive dividends or other payments in needed amounts from our subsidiaries.

Our principal assets are the shares of capital stock and indebtedness of our subsidiaries. We rely on dividends, interest and other payments from these subsidiaries to meet our obligations for paying principal and interest on outstanding debt obligations, paying corporate expenses and, if determined by our Board, paying dividends to shareholders and repurchasing common shares. Certain of our subsidiaries are subject to regulatory requirements of the jurisdictions in which they operate or other restrictions that may limit the amounts that these subsidiaries can pay in dividends or other payments to us. No assurance can be given that there will not be further changes in law, regulatory actions or other circumstances that could restrict the ability of our subsidiaries to pay dividends to us. In addition, due to differences in tax rates, repatriation of funds from certain countries into the United States could have unfavorable tax ramifications for us. Furthermore, no assurance can be given that our subsidiaries may be able to make timely payments to us in order for us to meet our obligations.

Our results of operations and financial condition could be materially adversely affected by legal and regulatory matters.

We are potentially subject to various contingent liabilities that are not reflected on our balance sheet, including those arising as a result of being involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act of 1974 (ERISA); and other laws and regulations, as discussed under Note 15—Contingencies and Litigation in our Consolidated Financial Statements. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual or materially increase an existing accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts above any existing accruals, it could materially adversely affect our results of operations and financial condition in the period or periods in which such change in determination, judgment or settlement occurs. There can be no assurances as to the favorable outcome of any claim, lawsuit, investigation or proceeding. It is possible that a resolution of one or more such proceedings could require us to make substantial payments to satisfy judgments, fines or penalties or to settle claims or proceedings, any of which could materially adversely affect our results of operations and financial condition. These proceedings could also result in reputational harm, criminal sanctions, consent decrees or orders preventing us from offering certain services, requiring a change in our business practices in costly ways or requiring development of non-infringing or otherwise altered products or technologies. In addition, it can be very costly to defend litigation and these costs could materially adversely affect our results of operations and financial condition. See Note 15—Contingencies and Litigation to our Consolidated Financial Statements.

Our results of operations and financial condition may be materially adversely affected by conditions abroad, including local economics, political environments, fluctuating foreign currencies and shifting regulatory schemes.

A portion of our revenues is generated from operations outside the United States. In addition, we maintain significant operations outside the United States. Our results of operations and financial condition could be materially adversely affected by changes in foreign currency exchange rates, as well as by a number of other factors, including, without limitation, changes in economic conditions from country to country, changes in a country's political conditions, trade protection measures, licensing requirements, local tax issues, capitalization and other related legal

matters. We generally hedge foreign currency denominated assets, liabilities and anticipated transactions primarily through the use of currency derivative contracts. The use of derivative contracts is intended to mitigate or reduce transactional level volatility in the results of foreign operations, but does not completely eliminate volatility. We do not hedge the translation effect of international revenues and expenses, which are denominated in currencies other than our U.S. parent functional currency, within our combined financial statements. If we are unable to effectively hedge these risks, our results of operations and financial condition could be materially adversely affected.

If we fail to successfully develop new service offerings, including new technology components, and protect our intellectual property rights, we may be unable to retain current customers and gain new customers and our revenues would decline.

The process of developing new service offerings, including new technology components, is inherently complex and uncertain. It requires accurate anticipation of customers' changing needs and emerging technological trends. We must make long-term investments and commit significant resources before knowing whether these investments will eventually result in service offerings that achieve customer acceptance and generate the revenues required to provide desired returns. For example, establishing internal automation processes to help us develop new service offerings will require significant up-front costs and resources, which, if not monetized effectively, could materially adversely affect our revenues. In addition, some of our service offerings rely on technologies developed by and licensed from third parties. We may not be able to obtain or continue to obtain licenses and technologies from these third parties at all or on reasonable terms, or such third parties may demand cross-licenses to our intellectual property. It is also possible that our intellectual property rights could be challenged, invalidated or circumvented, allowing others to use our intellectual property to our competitive detriment. We also must ensure that all of our service offerings comply with both existing and newly enacted regulatory requirements in the countries in which they are sold. If we fail to accurately anticipate and meet our customers' needs through the development of new service offerings (including technology components) or if we fail to adequately protect our intellectual property rights or if our new service offerings are not widely accepted or if our current or future service offerings fail to meet applicable worldwide regulatory requirements, we could lose market share and customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Risks related to the Spin-off:

We may be unable to achieve some or all of the benefits that we expect to achieve from the Spin-Off.

We believe that, as an independent, publicly traded company, we will be able to, among other things, design and implement corporate strategies and policies that are targeted to our business, better focus our financial and operational resources on our specific business, create effective incentives for our management and employees that are more closely tied to our business performance, provide investors more flexibility and enable us to achieve alignment with a more natural shareholder base and implement and maintain a capital structure designed to meet our specific needs. However, by separating from Xerox, we may be more susceptible to market fluctuations and other adverse events. As an independent entity, we have an arm's-length relationship with Xerox and we may not be able to obtain supplies from Xerox on terms as favorable to us as those we had as a wholly owned subsidiary of Xerox prior to the Spin-Off. As a smaller, independent company, Conduent will have a narrower business focus and may be more vulnerable to changing market conditions as well as the risk of takeover by third parties. In addition, we may be unable to achieve some or all of the benefits that we expect to achieve as an independent company in the time we expect, if at all. Furthermore, Xerox used to guarantee our and our subsidiaries' performance under certain services contracts and real estate leases. Following the Spin-Off, we expect that Conduent will provide such performance guarantees, and we may be unable to retain or renew contracts or real estate leases or a failure to renew such contracts or leases on favorable terms and conditions could materially adversely affect our results of operations and financial condition. If we fail to achieve some or all of the benefits that we expect to achieve as an independent company, or do not achieve them in the time we expect, our results of operations and financial condition could be materially adversely affected.

We may be unable to make, on a timely or cost-effective basis, the changes necessary to operate as an independent, publicly traded company, and we may experience increased costs after the Spin-Off.

We have historically operated as part of Xerox's corporate organization, and Xerox has provided us with various corporate functions. Following the Spin-Off, Xerox will have no obligation to provide us with assistance other than the transition services described under "Certain Relationships and Related Party Transactions—Transition Services Agreement." These services do not include every service that we have received from Xerox

in the past, and Xerox is only obligated to provide these services for limited periods following completion of the Spin-Off. Accordingly, following the Spin-Off, we will need to provide internally or obtain from unaffiliated third parties the services we currently receive from Xerox. These services include senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services, the effective and appropriate performance of which are critical to our operations. We may be unable to replace these services in a timely manner or on terms and conditions as favorable as those we receive from Xerox. Because our business has most recently operated as part of the wider Xerox organization, we may be unable to successfully establish the infrastructure or implement the changes necessary to operate independently, or may incur additional costs that could adversely affect our business. If we fail to obtain the quality of services necessary to operate effectively or incur greater costs in obtaining these services, our results of operations and financial condition could be materially adversely affected.

We have no recent operating history as an independent, publicly traded company, and our historical and pro forma financial data are not necessarily representative of the results we would have achieved as an independent, publicly traded company and may not be a reliable indicator of our future results.

We derived the historical financial data included in this Annual Report from Xerox's consolidated financial statements, and this data does not necessarily reflect the results of operations and financial condition we would have achieved as an independent, publicly traded company during the periods presented, or those that we will achieve in the future. This is primarily because of the following factors:

- Prior to the Spin-Off, we operated as part of Xerox's broader corporate organization and Xerox performed various corporate functions for us, including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services. Our historical financial data reflect allocations of corporate expenses from Xerox for these and similar functions. These allocations may not reflect the costs we will incur for similar services in the future as an independent, publicly traded company.
- We entered into transactions with Xerox that did not exist prior to the Spin-Off, such as Xerox's provision of transition services, which will cause us to incur new costs.
- Our historical financial data do not reflect changes that we expect to experience in the future as a result of our separation from Xerox. As part of Xerox, we enjoyed certain benefits from Xerox's operating diversity, size, purchasing power, credit rating, borrowing leverage and available capital for investments. Many of our services contracts, particularly those for our transportation service offerings in our Public Sector business, require significant capital investments, and after the Spin-Off, we may not have access to the capital (from both internal and external sources) necessary to fund these services contracts. As an independent entity, we may be unable to purchase goods, services and technologies, such as insurance and health care benefits and computer software licenses, or access capital markets on terms as favorable to us as those we obtained as part of Xerox prior to the Spin-Off.

Following the Spin-Off, we are now responsible for the additional costs associated with being an independent, publicly traded company, including costs related to corporate governance, investor and public relations and public reporting. For additional information about our past financial performance and the basis of presentation of our financial statements, see "Selected Historical Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical financial statements and the notes thereto included in this annual report on Form 10-K. Some of the contracts to be transferred or assigned to us in connection with the Internal Transactions and Distribution contain provisions that require the consent of a third party to the Internal Transactions, the Distribution or both. Failure to obtain such consents on commercially reasonable and satisfactory terms may impair our entitlement to the benefit of these contracts in the future.

We may have been able to receive better terms from unaffiliated third parties than the terms we receive in our agreements with Xerox.

We entered into agreements with Xerox related to our separation from Xerox, including the Separation and Distribution Agreement, Transition Services Agreement, Tax Matters Agreement, Employee Matters Agreement and any other agreements, while we are still part of Xerox. Accordingly, these agreements may not reflect terms that would have resulted from arm's-length negotiations among unaffiliated third parties. The terms of these agreements relate to, among other things, allocations of assets, liabilities, rights, indemnifications and other obligations between Xerox and us. We may have received better terms from third parties. See "Certain Relationships and Related Party Transactions—Agreements with Xerox."

The Spin-Off could result in significant tax liability to Xerox and its shareholders.

Completion of the Spin-Off required Xerox's receipt of a written opinion of Cravath, Swaine & Moore LLP to the effect that the Distribution should qualify for non-recognition of gain and loss under Section 355 of the Code and the receipt and continuing effectiveness and validity of the IRS Ruling.

The opinion of counsel did not address any U.S. state or local or foreign tax consequences of the Spin-Off. The opinion assumed that the Spin-Off was completed according to the terms of the Separation and Distribution Agreement and relied on the facts as stated in the Separation and Distribution Agreement, the Tax Matters Agreement, the other ancillary agreements, the Information Statement included in our registration statement on Form 10 and a number of other documents. In addition, the opinion was based on certain representations as to factual matters from, and certain covenants by, Xerox and us. The opinion cannot be relied on if any of the assumptions, representations or covenants are incorrect, incomplete or inaccurate or are violated in any material respect.

Xerox has received the IRS Ruling. The IRS Ruling relies on certain facts, assumptions, representations and undertakings from Xerox and us regarding the past and future conduct of Xerox's and our businesses and other matters. If any of these facts, assumptions, representations or undertakings is incorrect or not otherwise satisfied, Xerox may not be able to rely on the IRS Ruling. In addition, the IRS ruling is not a comprehensive ruling from the IRS regarding all aspects of the U.S. federal income tax consequences of the transactions.

Accordingly, notwithstanding the opinion of counsel and the IRS Ruling, there can be no assurance that the IRS will not assert, or that a court would not sustain, a contrary position.

If the Distribution were determined not to qualify for non-recognition of gain and loss for U.S. federal income tax purposes, U.S. Holders could be subject to tax. In this case, each U.S. Holder who received our common stock in the Distribution would generally, for U.S. federal income tax purposes, be treated as having received a distribution in an amount equal to the fair market value of our common stock received, which would generally result in (i) a taxable dividend to the U.S. Holder to the extent of that U.S. Holder's pro rata share of Xerox's current and accumulated earnings and profits; (ii) a reduction in the U.S. Holder's basis (but not below zero) in Xerox common stock to the extent the amount received exceeds the shareholder's share of Xerox's earnings and profits; and (iii) a taxable gain from the exchange of Xerox common stock to the extent the amount received exceeds the sum of the U.S. Holder's share of Xerox's earnings and profits and the U.S. Holder's basis in its Xerox common stock.

We could have an indemnification obligation to Xerox if the Distribution were determined not to qualify for non-recognition treatment, which could materially adversely affect our results of operations and financial condition.

If it were determined that the Distribution did not qualify for non-recognition of gain and loss under Section 355 of the Code, we could, under certain circumstances, be required to indemnify Xerox for the resulting taxes and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

In addition, Section 355(e) of the Code generally creates a presumption that the Distribution would be taxable to Xerox, but not to shareholders, if we or our shareholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the Distribution, unless it were established that such transactions and the Distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the Distribution were taxable to Xerox due to such a 50% or greater change in ownership of our stock, Xerox would recognize gain equal to the excess of the fair market value of our common stock distributed to Xerox shareholders over Xerox's tax basis in our common stock and we generally would be required to indemnify Xerox for the tax on such gain and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

We agreed to numerous restrictions to preserve the non-recognition treatment of the Distribution, which may reduce our strategic and operating flexibility.

We agreed in the Tax Matters Agreement to covenants and indemnification obligations that address compliance with Section 355 of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic

transactions or engage in new businesses or other transactions that may otherwise maximize the value of our business, and might discourage or delay a strategic transaction that our shareholders may consider favorable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We lease and own numerous facilities worldwide with larger concentrations of space in Kentucky, New Jersey, California, Mexico, Guatemala, the Philippines, Jamaica, Romania and India. Our owned and leased facilities house general offices, sales offices, service locations, call centers and distribution centers. The size of our property portfolio as of December 31, 2016 was approximately 12.2 million square feet at an annual operating cost of approximately $294 million and comprised 513 leased properties and 8 owned properties. We believe that our current facilities are suitable and adequate for our current businesses. Because of the interrelation of our business segments, each of the segments use substantially all of these properties at least in part.

As a result of implementing our strategic transformation program as well as various productivity initiatives, several leased and owned properties may become surplus over the next three years. We are obligated to maintain our leased surplus properties through required contractual lease periods and plan to dispose of or sublease these
properties.

ITEM 3. LEGAL PROCEEDINGS

The information set forth under Note 15 "Contingencies and Litigation" in the Consolidated Financial Statements in Part II, Item 8, which is incorporated here by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Part II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Stock Exchange Information

The common stock of Conduent Incorporated is listed on the New York Stock Exchange ("NYSE") with the ticker symbol "CNDT." Our common stock did not begin trading until January 3, 2017.

Conduent Common Stock Dividends

We intend to retain future earnings for use in the operation of our business and to fund future growth, We do not anticipate paying any dividends on our common stock for the foreseeable future.

ITEM 6. SELECTED FINANCIAL DATA

FIVE YEARS IN REVIEW
(in millions, except per-share data)

_____
(1) We did not declare or pay dividends for the periods presented.
(2) Includes capital lease obligations.
(3) Selected data and ratios are not provided as the common stock of Conduent Incorporated did not begin "regular way" trading on the NYSE until January 3, 2017.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated. MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes. MD&A provides additional information about our operations, current developments, financial condition, cash flows and results of operations.

Throughout the MD&A, we refer to various notes to our Consolidated Financial Statements which appear in Item 8 of this 2016 Form 10-K, and the information contained in such notes is incorporated by reference into the MD&A in the places where such references are made.

Executive Overview

With revenues of $6.4 billion, we are a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience. Our addressable market size in the global business process service industry is estimated at nearly $260 billion.

Headquartered in Florham Park, New Jersey, the 96,000 people of Conduent, as of December 31, 2016, serve customers in more than 40 countries. In 2016, 11% of our revenue was generated outside the U.S.

We organize our business around three main reportable segments: **Commercial Industries, Healthcare** and **Public Sector**.

- Our **Commercial Industries** segment is comprised of business process services and customized solutions offered to clients in a variety of industries (other than healthcare).
- Our **Healthcare** segment is comprised of industry-centric business process services offered to clients across the healthcare industry, including providers, payers, employers, pharmaceutical and life science companies and government agencies.
- Our **Public Sector** segment is comprised of government-centric business process services offered to U.S. federal, state and local governments, as well as foreign.

Separation

On December 31, 2016, Conduent Incorporated completed its Separation from Xerox Corporation and is now an independent public company trading on the New York Stock Exchange under the symbol "CNDT". In connection with the separation from Xerox, Conduent entered into several agreements to (1) affect the legal and structural separation of Conduent and Xerox, (2) govern the relationship between Conduent and Xerox up to and after the completion of the separation and (3) allocate between Conduent and Xerox various assets, liabilities and obligations, including, among other things, employee benefits and tax-related assets and liabilities. The agreements entered into include a separation and distribution agreement, a transition services agreement, a tax matters agreement, an employee matters agreement, an intellectual property agreement and a trademark license agreement.

Significant 2016 Charges

Goodwill Impairment Charge
As required by ASC 350 Intangibles - Goodwill and Other, we annually test the Goodwill of our reporting units for impairment. For Step 1 of the test, as in prior years, we determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach to calculate fair value for each reporting units. We then compare the fair value of each reporting unit to its carrying value. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of each reporting units. The Market Approach

utilizes the guideline public company method. We apply a two-thirds and one-third weighting to the results of the Income Approach and the Market Approach, respectively, to calculate the fair value of each reporting units.

Our Commercial Industries reporting units operating results declined in 2016 versus our expectations, including a weak fourth quarter 2016. In performing Step 1 of our annual impairment test during the fourth quarter of 2016, we determined that the carrying value of the Commercial Industries reporting unit exceeded fair value by 53%, indicating an impairment and; therefore, we performed Step 2 of the test. Our Healthcare and Public Sector reporting units passed Step 1 with fair value exceeding carrying value by 19% and 14%, respectively, and, therefore, we were not required to perform Step 2 of the test.

Step 2 for the Commercial Industries reporting unit required a hypothetical purchase price allocation and the calculation of the implied fair value of goodwill. As a result of performing Step 2, we calculated a goodwill impairment of $935 million. This has been presented as Goodwill impairment, a separate line item in the Consolidated Statements of Income (Loss). Refer to Note 7 - Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information.

Our annual test relies upon key assumptions about revenue and profitability, including the impact of significant planned cost reductions from our Strategic Transformation program. As with any forecast, there is an element of uncertainty and management has considered this when performing the annual impairment test. Key assumptions like the discount rate we use to calculate the present value of the forecasted cash flows for each reporting unit were risk adjusted to reflect these uncertainties. If our actual operating results do not achieve the risk-adjusted forecast of revenue and profitability, or delays in achieving the benefits from the cost reductions assumed in our Strategic Transformation program occur, there is the risk of future goodwill impairments.

As a result of the significant impact of the Goodwill impairment charge on our reported revenues, earnings and key metrics for the period, we also discuss our results excluding the impact of this charge. The adjusted results are noted as “adjusted” in the discussion below. Refer to the “Non-GAAP Financial Measures” section for a reconciliation and explanation of these non-GAAP financial measures.

NY MMIS Charge
In February 2017, we determined that it is probable that we will not fully complete our New York Medicaid Management Information System ("NY MMIS") project in its current form.

As a result of this decision and the application of percentage-of-completion accounting, we recorded a pre-tax charge (NY MMIS charge) of $161 million ($98 million after-tax) during the fourth quarter of 2016. The charge included $83 million for the write-off of contract receivables, which were recorded as a reduction in Revenues. In addition, in Cost of Outsourcing, we recorded a $78 million charge which included: $36 million for wind-down costs, $28 million related to the non-cash impairment of the Health Enterprise software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

At this time, we believe we have recorded our best estimate of the financial statement impact associated with the NY MMIS contract developments; however, our estimate of the financial statement impact is subject to change once the matter is settled with the State of New York.

As a result of the significant impact of the NY MMIS charge on our reported revenues, earnings and key metrics for the period, we also discuss our results excluding the impact of these charges. These adjusted results are noted as “adjusted” in the discussion below. Refer to the “Non-GAAP Financial Measures” section for a reconciliation and explanation of these non-GAAP financial measures.

Significant 2015 Charges

Health Enterprise Charge
Late in the third quarter of 2015, we determined that we would not fully complete the Health Enterprise Medicaid platform implementation projects in California and Montana. However, we would continue to process Medicaid claims using existing legacy systems in those states, thus providing uninterrupted service for the states' healthcare providers and constituents.

This determination resulted in recording a pre-tax charge (HE charge) of $389 million ($237 million after-tax) in 2015. The charge included $116 million for the write-off of contract receivables (primarily non-current), $34 million related to the non-cash impairment of the HE software and deferred contract set-up transition costs and $23 million for other related assets and liabilities. The remainder of the charge was primarily related to settlement costs including payments to subcontractors resulting in cash outflows in future quarters. Of the $389 million charge, $116 million was recorded as a reduction to revenues and the remaining $273 million was recorded to Cost of outsourcing. This development followed the Government Healthcare strategy change announced in July 2015, regarding our decision to focus our future HE implementations on current Medicaid customers and to discontinue investment in and sales of the Xerox Integrated Eligibility System. This change in strategy resulted in pre-tax non-cash software platform impairment charges of $146 million ($89 million after-tax) in the second quarter 2015.

As a result of the significant impact of the HE charge and the software impairment charges on our reported revenues, earnings and key metrics for the period, we are also discussing our results excluding the impact of these charges. These adjusted results are noted as “adjusted” in the discussion below. Refer to the "Non-GAAP Financial Measures" section for a reconciliation and explanation of these non-GAAP financial measures.

Divestitures

In December 2014, we announced an agreement to sell our Information Technology Outsourcing (ITO) business to Atos SE and began reporting it as a Discontinued Operation. The sale was completed on June 30, 2015. Refer to Note 4 - Divestitures in our Consolidated Financial Statements for additional information.

Financial Overview

Total revenues of $6.4 billion for the year ended December 31, 2016, decreased 4%, with a 1-percentage point negative impact from currency, as compared to 2015. On an adjusted[1] basis, excluding the NY MMIS charge, total revenues decreased 4% with a 1-percentage point negative impact from currency, resulting from declines in Commercial Industries and Healthcare. Operating margin[1] of 5.5% improved 0.7-percentage points as compared to 2015, reflecting cost and productivity improvements, including benefits from our strategic transformation program, as well as lower expenses from our decision to refocus our Government Healthcare business.

2016 Net loss was $983 million for the year ended December 31, 2016. The increase in loss is primarily due to the Goodwill impairment charge, the NY MMIS charge and profit declines in Commercial Industries, partially offset by profit increases in the Public Sector and Healthcare and the inclusion of the pre-tax HE charge of $389 million in 2015.

Cash flow from operations was $108 million for the year ended December 31, 2016 as compared to $493 million in 2015. The decrease in operating cash flow was primarily due to HE settlement payments, reduced factoring and timing of collections of accounts receivable, restructuring and separation payments. Cash provided by investing activities of $16 million primarily reflects the payments received on related party notes receivables, primarily offset by cost of additions to land, building and equipment and internal use software. Cash provided by financing activities was $132 million, primarily reflecting $1,902 million for proceeds on issuance of debt, $1,132 million of net payments on related party notes payable and $588 million for transfers to Xerox.

During 2016 we began a three-year transformation program targeting cumulative cost savings of $700 million from across the business. Focus areas of the program include increasing the use of automation across service delivery solutions, improving employee utilization, reducing attrition, utilizing our global delivery network more efficiently, updating our legacy IT infrastructure and reducing spend on third-party IT vendors, achieving efficiencies in procurement, and remediating under-performing contracts. We are on track to achieve these cumulative savings through 2018.

---

(1) Refer to the "Non-GAAP Financial Measures" section for an explanation of the non-GAAP financial measure.

2017 Outlook

Revenues - For 2017, we expect total revenues to decline similar to 2016 levels with stabilization in 2018 and building growth momentum later in the year.

Investments - We plan to balance investments in the business with margin expansion and will focus on capturing market growth opportunities by aligning our businesses by industry verticals, increasing our salesforce in targeted growth areas, investing in platforms and technology and considering potential acquisitions.

Currency Impact

To understand the trends in our business, we believe that it is helpful to analyze the impact of changes in the translation of foreign currencies into U.S. Dollars on revenue and expenses. We refer to this analysis as “currency impact” or “the impact from currency” or "constant currency". In 2016, 2015 and 2014, this impact is calculated by translating current period activity in local currency using the comparable prior year period's currency translation rate.

Application of Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements and notes thereto. In preparing our Consolidated Financial Statements, we have made our best estimates and judgments of certain amounts included in the Consolidated Financial Statements giving due consideration to materiality. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Senior management has discussed the development and selection of the critical accounting policies, estimates and related disclosures included herein with the Audit Committee of the Board of Directors. We consider these as critical to understanding our Consolidated Financial Statements, as their application places the most significant demands on management's judgment, since financial reporting results rely on estimates of the effects of matters that are inherently uncertain. In instances where different estimates could have reasonably been used, we disclosed the impact of these different estimates on our operations. In certain instances, the accounting rules are prescriptive; therefore, it would not have been possible to reasonably use different estimates. Changes in assumptions and estimates are reflected in the period in which they occur. The impact of such changes could be material to our results of operations and financial condition in any quarterly or annual period.

Specific risks associated with these critical accounting policies are discussed throughout the MD&A, where such policies affect our reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to Note 1 - Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements.

Revenue Recognition

Application of the various accounting principles in U.S. GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. Refer to Note 1 - Basis of Presentation and Summary of Significant Accounting Policies - New Accounting Standards and Accounting Changes - Revenue Recognition in the Consolidated Financial Statements for additional information regarding our revenue recognition policies.

A significant portion of our revenue is recognized based on objective criteria that do not require significant estimates or uncertainties. For example, transaction volumes, time and material and cost reimbursable arrangements are based on specific, objective criteria under the contracts. Accordingly, revenues recognized under these contracts do not require the use of significant estimates that are susceptible to change. Revenue recognized using the percentage-of completion (POC) accounting method does require the use of estimates and judgment as discussed below.

We recognize revenues when we have persuasive evidence of an arrangement, the services have been provided, the transaction price is fixed or determinable and collectability is reasonably assured. During 2016, approximately 81% of our revenue was recognized based on transaction volumes, approximately 7% was recognized on a fixed fee basis (wherein our revenue is earned as we fulfill our performance obligations under the arrangement), approximately 2% was related to cost reimbursable contracts, approximately 4% recognized using POC accounting and the remaining 6% was related to time and material contracts. Our revenue mix is subject to change due to the impact of changing customer requirements, acquisitions, divestitures, new business and lost business.

Revenue Recognition - Percentage-of-Completion: A portion of our revenue (approximately 4%) is recognized using the percentage-of-completion (POC) accounting method. This method requires the use of estimates and judgment. Although not significant to total revenue, the POC methodology is normally applied to certain of our larger and longer term outsourcing contracts involving system development and implementation, primarily in government healthcare and certain government transportation contracts. In addition, we had unbilled receivables totaling $279 million and $289 million at December 31, 2016 and 2015, respectively, representing revenues recognized but not yet billable under the terms of our POC contracts.

The POC accounting methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed based on a current cumulative cost incurred to estimated total cost basis and a reasonably consistent profit margin over the period. Due to the long-term nature of these arrangements, developing the estimates of cost often requires significant judgment. Factors that must be considered in estimating the progress of work completed and ultimate cost of the projects include, but are not limited to, the availability of labor and labor productivity, the nature and complexity of the work to be performed and the impact of delayed performance. If changes occur in delivery, productivity or other factors used in developing the estimates of costs or revenues, we revise our cost and revenue estimates, which may result in increases or decreases in revenues and costs. Such revisions are reflected in income in the period in which the facts that give rise to that revision become known. We perform ongoing profitability analysis of our POC services contracts in order to determine whether the latest estimates require updating. Key factors reviewed by the company to estimate the future costs to complete each contract are future labor costs, future product costs, expected productivity efficiencies, achievement of contracted milestones and performance goals, as well as potential penalties for milestone and system implementation delays.

If at any time our estimates indicate the POC contract will be unprofitable, the entire estimated loss for the remainder of the contract is recorded immediately in cost of services. This results in the contract being recorded at a zero profit margin going forward with recognition of an equal amount of revenues and costs over the remaining contract term. A zero profit margin may also be applied when it is impractical to estimate specific amounts or ranges of contract revenues and costs; however, we can at least determine that we will not incur a loss on a particular contract.

The POC accounting process is particularly complex and challenging for contracts with significant system implementation deliverables due to their significant scope and duration, the highly technical nature of the implementations, the potential for additional costs related to productivity and performance penalties and other delivery factors. Accordingly, based on the significance of these projects, we continually monitor our progress and consider the potential for increased costs as well as risks and uncertainties in our estimates of revenues and costs under the POC accounting methodology. To the extent possible, we attempt to mitigate these risks through operational changes, project oversight and process improvements.

Capitalization of Outsourcing Contract Costs

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract. We regularly review costs to determine appropriateness for deferral in accordance with the relevant accounting guidance. Key estimates and assumptions that we must make include projecting future cash

flows in order to assess the recoverability of deferred costs. To assess recoverability, undiscounted estimated cash flows of the contract are projected over its remaining life and compared to the carrying amount of contract related assets, including the unamortized deferred cost balance. Such estimates require judgment and assumptions, which are based upon the professional knowledge and experience of our personnel. Key factors that are considered in estimating the undiscounted cash flows include projected labor costs and productivity efficiencies. A significant change in an estimate or assumption on one or more contracts could have a material effect on our results of operations.

Capitalization of Software Development Costs

We capitalize certain costs incurred to develop commercial software products to be sold, leased or otherwise marketed after establishing technological feasibility, and we capitalize costs to develop or purchase internal-use software. Significant estimates and assumptions include: determining the appropriate period over which to amortize the capitalized costs based on estimated useful lives, estimating the marketability of the commercial software products and related future revenues and assessing the unamortized cost balances for impairment. For commercial software products, determining the appropriate amortization period is based on estimates of future revenues from sales of the products. We consider various factors to project marketability and future revenues, including an assessment of alternative solutions or products, current and historical demand for the product, and anticipated changes in technology that may make the product obsolete. For internal-use software, the appropriate amortization period is based on estimates of our ability to utilize the software on an ongoing basis. To assess the recoverability of capitalized software costs, we consider estimates of future revenue, costs and cash flows. Such estimates require assumptions about future cash inflows and outflows, and are primarily based on the historical experience and expectations regarding future revenues. A significant change in an estimate related to one or more software products could result in a material change to our results of operations.

Refer to Note 6—Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information regarding capitalized software costs.

Business Combinations

The accounting for business combinations requires the use of significant estimates and assumptions in the determination of the fair value of assets acquired and liabilities assumed in order to properly allocate the purchase price consideration between assets that are depreciated and amortized from goodwill. Our estimates of the fair values of assets and liabilities acquired are based upon assumptions believed to be reasonable and, when appropriate, include assistance from independent third-party valuation firms.

Refer to Note 3 - Acquisitions in the Consolidated Financial Statements for additional information regarding the allocation of the purchase price consideration for our acquisitions.

We are primarily a service business, which normally has a lower level of tangible assets; therefore, our acquisitions typically result in significant amounts of goodwill and other intangible assets. These assets affect the amount of future period amortization expense and possible expense we could incur as a result of an impairment. Acquired intangible assets are primarily related to customer relationships. There were no acquisitions in 2016. Acquired intangible assets and goodwill were $1.1 billion at December 31, 2016.

Refer to Note 7 - Goodwill and Intangible Assets in the Consolidated Financial Statements for additional information regarding our goodwill and intangible assets.

Intangible Assets

The fair values of identifiable intangible assets are primarily estimated using an income approach. These estimates include market participant assumptions and require projected financial information, including assumptions about future revenue growth and costs necessary to facilitate the projected growth. Other key inputs include assumptions about technological obsolescence, customer attrition rates, brand recognition, the allocation of projected cash flows to identifiable intangible assets and discount rates. We regularly review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

- significant underperformance relative to historical or projected future operating results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangibles and long-lived assets may not be recoverable based upon the existence of one or more of the above indicators of potential impairment, we assess whether an impairment has

occurred based on whether net book value of the assets exceeds the related projected undiscounted cash flows from these assets. We consider a number of factors, including past operating results, budgets, economic projections, market trends and product development cycles in estimating future cash flows. Differing estimates and assumptions as to any of the factors described above could result in a materially different impairment charge, if any, and thus materially different results of operations.

Goodwill

Goodwill is not amortized but rather is tested for impairment annually or more frequently if an event or circumstance indicates that an impairment may have been incurred. Events or circumstances that might indicate an interim evaluation is warranted include, among other things, unexpected adverse business conditions, macro and reporting unit specific economic factors, supply costs, unanticipated competitive activities and acts by governments and courts.

Application of the annual goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units and the assessment- qualitatively or quantitatively - of the fair value of each reporting unit against its carrying value. We determined that our reporting units were the same as our operating segments and, therefore, our business is comprised of three reporting units with goodwill balances. Our annual impairment test of goodwill was performed in the fourth quarter of 2016. Given the risk of an impairment of our Commercial Industries reporting unit, we determined to utilize a quantitative assessment of the recoverability of our goodwill balances for each of our reporting units.

In our quantitative test, we estimate the fair value of each reporting unit by weighting the results from the income approach (discounted cash flow methodology) and market approach. These valuation approaches require significant judgment and consider a number of factors that include, but are not limited to, expected future cash flows, growth rates and discount rates and comparable multiples from publicly traded companies in our industry. In addition, we are required to make certain assumptions and estimates regarding the current economic environment, industry factors and the future profitability of our businesses.

When performing our discounted cash flow analysis for each reporting unit, we incorporate the use of projected financial information and discount rates that are developed using market participant-based assumptions. The cash-flow projections are based on three-year financial forecasts developed by management that include revenue and expense projections, restructuring and strategic transformation activities, capital spending trends and investment in working capital to support anticipated revenue growth or other changes in the business. The selected discount rates consider the risk and nature of the respective reporting units' cash flows, appropriate capital structure and rates of return that market participants would require to invest their capital in our reporting units.

We believe these assumptions are appropriate and reflect our forecasted long-term business model and give appropriate consideration to our historical results as well as the current economic environment and markets that we serve. The average discount rate applied to our projected cash flows for our Commercial Industries reporting unit was approximately 16% and 9.5% was used for both the Public Sector and Healthcare reporting units, which we considered reasonable based on the estimated capital costs of applicable market participants.

Our impairment assessment methodology includes the use of outside valuation experts and the inclusion of factors and assumptions related to third-party market participants. When performing our market approach for each reporting unit, we rely specifically on the guideline public company method. Our guideline public company method incorporates revenues and earnings multiples from publicly traded companies with operations and other characteristics similar to each reporting unit. The selected multiples consider each reporting unit’s relative growth, profitability, size and risk relative to the selected publicly traded companies.

After completing our annual impairment review for each reporting unit in the fourth quarter of 2016, based on our quantitative assessments, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value by approximately 53%, indicating an impairment. Accordingly, we preformed the next step based on Step 2 of the impairment assessment process, which resulted in our recording a pre-tax goodwill impairment charge of $935 during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). Our Healthcare and Public Sector reporting units passed Step 1 of the impairment test with fair value exceeded carrying value by approximately 19% and 14%, respectively.

Refer to Note 7 - Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding goodwill by reportable segment and the 2016 goodwill impairment charge.

Restructuring and Asset Impairments

We have engaged in restructuring actions, which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction, the fair value of assets made redundant or obsolete and the fair value of lease cancellation and other exit costs. We accrue for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements.

For a full description of our restructuring actions, refer to our discussions of restructuring in the MD&A and in Note 8—Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision is based on nonrecurring events as well as recurring factors, including the taxation of foreign income. In addition, our provision will change based on discrete or other nonrecurring events such as audit settlements, tax law changes, changes in valuation allowances, and etc., that may not be predictable. In the event that there is a significant unusual or one-time item recognized in our operating results, the taxes attributable to that item would be separately calculated and recorded at the same time as an unusual or one-time item.

We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our Consolidated Balance Sheets, as well as operating loss and tax credit carryforwards. We follow very specific and detailed guidelines in each tax jurisdiction regarding the recoverability of any tax assets recorded in our Consolidated Balance Sheets and provide valuation allowances as required. We regularly review our deferred tax assets for recoverability considering historical profitability, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. Gross deferred tax assets of $360 million and $414 million had valuation allowances of $24 million and $38 million at December 31, 2016 and 2015, respectively.

We are subject to ongoing tax examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon our assessment of the more-likely-than-not outcomes of such matters. In addition, when applicable, we adjust previously recorded tax expense to reflect examination results. Our ongoing assessments of the more-likely-than-not outcomes of examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results. Unrecognized tax benefits were $14 million, $24 million and $32 million at December 31, 2016, 2015 and 2014, respectively.

Refer to Note 14—Income Taxes in the Consolidated Financial Statements for additional information regarding deferred income taxes and unrecognized tax benefits.

Loss Contingencies

We are currently involved in various claims and legal proceedings. At least quarterly, we review the status of each significant matter and assess its potential financial exposure considering all available information including, but not limited to, the impact of negotiations, settlements, rulings, advice of legal counsel and other updated information and events pertaining to a particular matter. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, we reassess the potential liability related to pending claims and litigation, and may revise estimates. These revisions in the estimates of the potential liabilities could have a material impact on the results of operations and financial position.

Refer to Note 15—Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding loss contingencies.

Revenue Results Summary

Total Revenue

Revenue for the three years ended December 31, 2016 was as follows:

	Revenues			% Change		CC % Change	
(in millions)	2016	2015	2014	2016	2015	2016	2015
Total Revenues	$ 6,408	$ 6,662	$ 6,938	(4)%	(4)%	(3)%	(2)%
Adjusted Total Revenues (1)	$ 6,491	$ 6,778	$ 6,938	(4)%	(2)%	(3)%	— %

CC - Refer to the "Non-GAAP Financial Measures" section for description of Constant Currency
(1) Refer to the "Non-GAAP Financial Measures" section for an explanation of this non-GAAP financial measure.

Revenue 2016

Total revenues decreased 4% compared to the prior year with a 1-percentage point negative impact from currency. On an adjusted[1] basis, excluding the NY MMIS charge, total revenue decreased 4% with a 1-percentage point negative impact from currency. Overall non-U.S. revenues represented approximately 11% of total revenues (Pound Sterling-denominated revenues represented approximately 2% of total revenues).

The decline was driven by lower volumes, delayed ramping of new business and contract exits, primarily in customer care contracts within our Commercial Industries and Healthcare segments, the run off of our Student Loan business and overall price declines that were consistent with prior-period trends. Partially offsetting these declines were new contracts in the Public Sector.

Revenue 2015

Total revenues decreased 4% compared to 2014 with a 2-percentage point negative impact from currency. On an adjusted[1] basis, excluding the HE charge, total revenues decreased 2%, with a 2-percentage point negative impact from currency. The negative impact from currency reflects the significant weakening of our major foreign currencies against the U.S. dollar as compared to prior year.

The decline in total revenues was primarily driven by the run-off of the Student Loan business, the termination of the Texas Medicaid contract and the impact of our determination in the third quarter of 2015 to not fully complete the HE platform implementations in California and Montana, which combined had approximately a 4.8-percentage point negative impact on revenue growth. Offsetting this decline was moderate acquisition contribution and organic growth in several lines of business, net of the impacts from lost business and lower pricing that were consistent with prior trends.

(1) Refer to the "Non-GAAP Financial Measures" section for an explanation of the non-GAAP financial measure.

Costs, Expenses and Other Income

Summary of Key Financial Ratios

	Year Ended December 31,			Change B/(W)		Adjusted(1)		Adjusted(1) B/(W)	
	2016	2015	2014	2016	2015	2016	2015	2016	2015
Total Gross Margin	14.2 %	10.3 %	16.4%	3.9 pts	(6.1) pts	16.5%	15.8%	0.7 pts	(0.6) pts
R&D as a % of Revenue	0.5 %	0.8 %	0.7%	0.3 pts	(0.1) pts	0.5%	0.8%	0.3 pts	(0.1) pts
SAG as a % of Revenue	10.7 %	10.5 %	9.5%	(0.2) pts	(1.0) pts	10.6%	10.3%	(0.3) pts	(0.8) pts
Pre-tax Income Margin	(19.1)%	(8.6)%	0.1%	(10.5) pts	(8.7) pts	4.8%	3.7%	1.1 pts	3.6 pts
Operating Margin(2)	3.0 %	(1.0)%	6.2%	4.0 pts	(7.2) pts	5.5%	4.8%	0.7 pts	(1.6) pts

(1) Refer to Key Financial Ratios reconciliation table in the "Non-GAAP Financial Measures" section.
(2) Refer to the Operating Income/Margin reconciliation table in the "Non-GAAP Financial Measures" section.

Pre-tax Income Margin

Pre-tax income margin for year ended December 31, 2016 of (19.1)% decreased 10.5-percentage points as compared to 2015. The decline was primarily driven by the NY MMIS charge, the Goodwill impairment charge and higher separation costs. Pre-tax income was also impacted by higher amortization of intangible assets.

Pre-tax income margin for the year ended December 31, 2015 of (8.6)% declined by 8.7-percentage points primarily due to the HE charge of $389 million, previously discussed, as well as higher Restructuring and related costs primarily as a result of the software impairment charge in our Government Healthcare business of $146 million. In addition, a 0.6-percentage point decrease in gross margin and a 0.8-percentage point increase in SAG as a percent of revenue reflecting targeted resource and other investments as well as higher costs associated with our HE platform implementations, prior to the implementation of the Government Healthcare strategy change noted above. The negative impacts were partially offset by restructuring savings and productivity improvements as well as lower related party interest expense and lower other expenses, net.

Pre-tax income margin includes the goodwill impairment, NY MMIS charge, amortization of intangible assets, related party interest, net, other expenses, net, restructuring and related costs and separation costs, all of which are separately discussed in subsequent sections. Operating margin excludes these items.

Operating Margin

Operating margin[1] for the year ended December 31, 2016 of 5.5% increased 0.7-percentage points as compared to 2015. The increase was driven by an improvement in gross margin due to transformation savings, reduced costs in our HE platform implementations as well as more favorable line-of-business mix. As noted above, the operating margin contains an allocation for management cost and corporate support services totaling $165 million, $170 million and $175 million for each of the three years ended December 31, 2016.

Operating margin[1] for the year ended December 31, 2015 of 4.8% decreased 1.6-percentage points as compared to 2014. The decline was driven primarily by a 0.6-percentage point decrease in gross margin and a 0.8-percentage point increase in SAG as a percent of revenue. The operating margin decline was driven by targeted resource and other investments as well as higher costs associated with our HE platform implementations, prior to the implementation of the change in strategy in our Government Healthcare business noted above. These negative impacts were partially offset by restructuring savings and productivity improvements.

(1) Refer to the Operating Income/Margin reconciliation table and the "Non-GAAP Financial Measures" section.

Gross Margins

Gross margin for the year ended December 31, 2016 of 14.2% increased 3.9-percentage points compared to 2015. On an adjusted[1] basis, gross margin of 16.5% increased by 0.7-percentage points as compared to 2015. The increase reflected restructuring and productivity improvements, benefits from lower expenses associated with our HE platform implementations and favorable line-of-business mix. These benefits were partially offset by continued margin pressures in our customer care service offerings, lower profitability in our Student Loan business and price declines.

Total gross margin for the year ended December 31, 2015 of 10.3% decreased 6.1-percentage points as compared to 2014. On an adjusted[1] basis, gross margin of 15.8% decreased by 0.6-percentage points as compared to 2014. Targeted resource and other investments, impacts from unfavorable line-of-business mix, increased expenses associated with our HE platform implementations, prior to the change in strategy in our Government Healthcare business noted above, and price declines were partially offset by productivity improvements and restructuring benefits.

Additional analysis of the change in gross margin for each business segment is included under "Operations Review of Segment Revenue and Profit" below.

(1) Refer to the Key Financial Ratios reconciliation table in the "Non-GAAP Financial Measures" section.

Research & Development Expenses (R&D)

R&D as a percentage of revenue of 0.5% for the year ended December 31, 2016 decreased 0.3-percentage points on an actual and adjusted[1] basis compared to 2015. The decrease was due primarily to lower R&D program spending and the benefits from ongoing restructuring. R&D expense of $31 million for the year ended December 31, 2016 decreased $21 million compared to the prior year period.

R&D as a percent of revenue for the year ended December 31, 2015 of 0.8% increased 0.1-percentage points on an actual and adjusted[1] basis compared to 2014. R&D expense of $52 million for the year ended December 31, 2015 was $6 million higher than the prior year period driven by investments in new offerings and capabilities.

_____

(1) Refer to the Key Financial Ratios reconciliation table in the "Non-GAAP Financial Measures" section.

Selling, Administrative and General Expenses (SAG)

SAG as a percentage of revenue of 10.7% for the year ended December 31, 2016, increased 0.2-percentage points compared to the prior year period. On an adjusted[1] basis, SAG increased 0.3-percentage points, as benefits from restructuring and cost initiatives were more than offset by the decline in total revenues and higher expenses due to favorable prior-year compensation adjustments.

SAG of $686 million for the year ended December 31, 2016, was $13 million lower than 2015 and reflected the following:

- $24 million decrease in selling expenses;
- $11 million increase in general and administrative expenses; and
- bad debt expense of $4 million was flat as compared to the prior year and less than one percent of receivables.

SAG as a percent of revenue of 10.5% for the year ended December 31, 2015, increased 1.0-percentage points as compared to 2014. On an adjusted[1] basis, SAG as a percentage of revenue of 10.3% increased 0.8-percentage points from 2014. The increase was driven by revenue declines and targeted resource and other investments partially offset by productivity improvements.

SAG expenses of $699 million for the year ended December 31, 2015 were $40 million higher than the prior year period. The increase in SAG expense reflects the following:

- $26 million increase in general and administrative expenses; and
- $14 million increase in selling expenses.

_____

(1) Refer to the Key Financial Ratios reconciliation table in the "Non-GAAP Financial Measures" section.

Restructuring and Related Costs

During the year ended December 31, 2016, we recorded net restructuring and related costs of $101 million, including $28 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program. The remaining costs of $73 million included the following:

- $67 million of severance costs related to headcount reductions of approximately 3,600 employees globally. The actions impacted several functional areas and focused on gross margin improvements;
- $7 million for lease termination costs, primarily reflecting continued optimization of our worldwide operating locations; and
- $12 million of asset impairment charges.

The above charges were partially offset by $13 million of net reversals for changes in estimated reserves from prior period initiatives.

During the year ended December 31, 2015, we recorded net restructuring and related costs of $159 million that included the following:

- $20 million of severance costs related to headcount reductions of approximately 1,000 employees globally. These actions impacted several functional areas and focused on gross margin improvements;
- $1 million for lease termination costs, primarily reflecting continued optimization of our worldwide operating locations; and

- $146 million of asset impairment charges associated with software asset impairments resulting from the change in strategy in our Government Healthcare business in 2015.

The above charges were partially offset by $8 million of net reversals for changes in estimated reserves from prior period initiatives.

Restructuring Summary
The restructuring reserve balance as of December 31, 2016 for all programs was $21 million, of which approximately $18 million is expected to be spent over the next twelve months. In 2017, we expect to incur additional restructuring charges of approximately $75 million pre-tax.

Refer to Note 8 - Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements for additional information regarding our restructuring programs.

Amortization of Intangible Assets

During the year ended December 31, 2016, we recorded $280 million of expense related to the amortization of intangible assets, which is $30 million higher than the prior year primarily due to the write-off of certain trade-names associated with prior acquisitions.

During the year ended December 31, 2015, we recorded $250 million of expense related to the amortization of intangible assets, which was flat compared to the prior year reflecting the increase in acquisitions in 2014.

Refer to Note 7 - Goodwill and Intangible assets, Net in the Consolidated Financial Statements for additional information regarding our intangible assets.

Goodwill Impairment

Our Commercial Industries reporting unit experienced declining operating results in 2016, including a weak 2016 fourth quarter versus expectations. As a result and in consideration of other factors, in performing our annual impairment test during the fourth quarter of 2016, we determined that the Commercial Industries reporting unit goodwill was impaired by approximately $935 million. Refer to Note 7 - Goodwill and Intangible assets, Net in the Consolidated Financial Statements for additional information regarding the Goodwill impairment charge.

Separation Costs

Separation costs are primarily for third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies, such as those related to human resources, brand management, real estate and information management to the extent not capitalized. Separation costs also include the costs associated with bonuses and restricted stock grants awarded to employees for retention through the separation.

Related-Party Interest Expense, Net

Related-party interest expense for the year ended December 31, 2016 of $26 million was $35 million lower than the prior year primarily due to the capitalization of certain related party notes payable in 2015, as a result of the proceeds received from the sale of the ITO business.

Refer to Note 20 - Related Party Transactions and Former Parent Company Investment in the Consolidated Financial Statements for additional information.

Other Expenses, Net

(in millions)	Year Ended December 31, 2016	2015	2014
Third-party interest expense	$ 14	$ 8	$ 11
Gains on sales of businesses and assets[(1)]	2	(1)	(1)
Currency (gains) losses, net	(2)	4	(1)
Litigation matters	40	18	38
Deferred compensation investment (gains) losses	(8)	1	(7)
Contingent consideration adjustment	(12)	—	—
All other expenses, net	—	8	5
Total Other Expenses, Net	$ 34	$ 38	$ 45

(1) Excludes the loss on sale of the ITO business reported in Discontinued Operations. Refer to Note 4 - Divestitures in the Consolidated Financial Statements for additional information.

Third-party Interest Expense: Represents interest on senior notes and capital lease obligations.

Refer to Note 10 - Debt in the Consolidated Financial Statements for additional information regarding third-party interest expense.

Currency (Gains) Losses, Net: Currency (gains) losses, net primarily result from the re-measurement of foreign currency-denominated assets and liabilities, the cost of hedging foreign currency-denominated assets and liabilities and the mark-to-market of foreign exchange contracts utilized to hedge those foreign currency-denominated assets and liabilities.

Litigation Matters: Litigation matters reflect probable losses and reserves for various legal matters.

Refer to Note 15 - Contingencies and Litigation, in the Consolidated Financial Statements for additional information regarding litigation against the Company.

Deferred Compensation Investment (Gains) Losses: Represents (gains) losses on investments supporting certain of our deferred compensation arrangements. These gains or losses are offset by an increase or decrease in compensation expense recorded in SAG as a result of the increase or decrease in the liability associated with these arrangements.

Contingent Consideration Adjustment: Represents an adjustment for settlements related to prior years acquisition earnout.

Income Taxes

The 2016 effective tax rate was 19.9%. This rate was lower than the U.S. statutory tax rate of 35% primarily as a result of pre-tax losses in the U.S. due to the following charges: goodwill impairment, NY MMIS, restructuring and related costs, amortization of intangible assets and separation costs, including tax-related separation costs discussed below. The U.S. pre-tax losses are taxed at a higher rate than our foreign pre-tax income, which can have the effect of increasing the overall effective tax rate above the statutory tax rate. However, since only $272 million of the $935 million Goodwill impairment charge is deductible for U.S. federal income tax purposes, which results in a decreased U.S. pre-tax loss, this has made our effective tax rate lower than the statutory tax rate. On an adjusted[1] basis, the 2016 effective tax rate, which excludes the tax effects of the previously noted charges, was 29.0%. This rate was lower than the U.S. statutory tax rate primarily due to the geographical mix of our earnings and differences in the tax rates at which our earnings are taxed as well as the redetermination of certain unrecognized tax positions upon conclusion of several audits.

The 2015 effective tax rate was 41.5%. This rate was higher than the U.S. statutory tax rate of 35% primarily due to our geographical mix of earnings which included pre-tax losses in the U.S. due to the following charges: restructuring and related costs, amortization of intangible assets, and the HE charge. The U.S. pre-tax losses are taxed at a higher rate than our foreign pre-tax income, which has the effect of increasing the overall effective tax rate above the statutory tax rate. On an adjusted[1] basis, the 2015 effective tax rate was 31.5%, which excludes the tax effect of the previously noted charges. This rate was lower than the U.S. statutory tax rate primarily due to the geographical mix of our earnings and differences in the tax rates at which our earnings are taxed.

The 2014 effective tax rate was (240)%. This rate was lower than the U.S. statutory tax rate of 35% primarily due to our geographical mix of earnings which included pre-tax losses in the U.S. due to the following charges: amortization of intangibles, restructuring and related costs. The U.S. pre-tax losses are taxed at a higher rate than our foreign pre-tax income, which has the effect of increasing the overall effective tax rate above the statutory tax rate. On an adjusted[1] basis, the 2014 effective tax rate was 28.6%, which was lower than the U.S. statutory tax rate primarily due to the redetermination of certain unrecognized tax positions and partially offset by the geographical mix of our earnings and differences in the tax rates at which our earnings are taxed.

Tax-related Separation Costs

As a result of the execution of the separation, it has been determined that approximately $37 million of the $44 million separation costs will be deducted on the 2016 U.S. federal income tax return. The remaining approximately $7 million is non-deductible.

In connection with the legal separation of the company, we have completed certain internal reorganizations of, and transactions among, our wholly-owned subsidiaries and operating activities in preparation for the legal form of separation. Although we believe that, for the most part, these reorganizations were completed in a tax-free manner, we incurred incremental income tax expense associated with certain elements of the reorganizations. Accordingly, for the year-to-date period of 2016, we recorded $10 million in connection with these internal reorganizations.

_____

(1) See the "Non-GAAP Financial Measures" section for an explanation of the adjusted effective tax rate non-GAAP financial measure.

Net Loss From Continuing Operations

Net loss from continuing operations for the year ended December 31, 2016 was $983 million, or $(4.85) per diluted share. On an adjusted[1] basis, net income from continuing operations was $223 million, or $1.06 per diluted share, and reflects the adjustments for the goodwill impairment, amortization of intangible assets and restructuring and related charges.

Net loss from continuing operations for the year ended December 31, 2015 was $336 million, or $(1.65) per diluted share. On an adjusted[1] basis, net income was $174 million, or $0.83 per diluted share, and included adjustments for the amortization of intangible assets, restructuring and related charges, software impairment and the HE charge.

Net income from continuing operations for the year ended December 31, 2014 was $34 million, or $0.17 per diluted share. On an adjusted[1] basis, net income was $225 million, or $1.07 per diluted share, and included adjustments for the amortization of intangible assets and restructuring and related charges.

_____

(1) See the "Non-GAAP Financial Measures" section for a reconciliation of reported net income from continuing operations to adjusted net income.

Discontinued Operations

There were no Discontinued Operations in 2016.

Discontinued operations are primarily related to our sale of the ITO business. As previously noted, in the fourth quarter 2014, we announced an agreement to sell the ITO business to Atos SE and began reporting it as a Discontinued Operation. The sale was completed on June 30, 2015.

Refer to Note 4 - Divestitures in the Consolidated Financial Statements for additional information regarding Discontinued Operations.

Other Comprehensive Loss

Other comprehensive loss was $155 million in 2016 as compared to a loss of $52 million in 2015. The increase in loss of $103 million was primarily due to the net losses from translation adjustments related to the separation of the company from Xerox. Translation losses in 2016 were $135 million compared to losses of $60 million in 2015.

Other comprehensive loss was $52 million in 2015 as compared to a loss of $71 million in 2014. The reduction in the loss of $19 million was primarily due to the net gains from changes in defined benefit plans of $7 million in 2015 as compared to losses of $25 million in 2014. This change is largely due to an increase in discount rates in 2015 versus a decrease in discount rates in 2014 and the corresponding impact on our defined benefit obligation (decrease in 2015 versus an increase in 2014). The improvement in defined benefit plans was offset by increased

losses from translation adjustments of $16 million in 2015. Translation losses in both 2015 and 2014 reflect the weakening of our major foreign currencies as compared to the U.S. Dollar.

Worldwide Employment

Worldwide employment of approximately 96,000 as of December 31, 2016 decreased by approximately 7,800 from December 31, 2015, due primarily to lower volumes and the impact of the strategic transformation initiatives, as well as seasonal reductions, partially offset by additions from ramping new business. Worldwide employment was approximately 103,800 and 97,200 at December 2015 and 2014, respectively.

Recent Accounting Pronouncements

Refer to Note 1 - Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements for a description of recent accounting pronouncements including the respective dates of adoption and the effects on results of operations and financial conditions.

Operations Review of Segment Revenue and Profit

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate: Commercial Industries, Healthcare and Public Sector. Revenues by segment for the three years ended December 31, 2016 were as follows:

(in millions)	Total Revenue	% of Total Revenue	Segment Profit (Loss)	Segment Margin
2016				
Commercial Industries	$ 2,690	42%	$ 59	2.2 %
Healthcare	1,686	26%	159	9.4 %
Public Sector	1,731	27%	223	12.9 %
Other	301	5%	(245)	(81.4)%
Total	$ 6,408	100%	$ 196	3.1 %
Adjusted:[1]				
Other	$ 384	6%	$ (84)	(21.9)%
Total	$ 6,491	100%	$ 357	5.5 %
2015				
Commercial Industries	$ 2,896	44%	$ 69	2.4 %
Healthcare	1,750	26%	157	9.0 %

Total	$ 6,938	100%	$ 447	6.4 %

**Percentage not meaningful*
(1) Refer to the reconciliations table in the "Non-GAAP Financial Measures" section.

Commercial Industries Segment

Revenue 2016

Commercial Industries revenue of $2,690 million for the year ended December 31, 2016 was 42% of total revenues and decreased 7% from 2015. The decline was driven by lost business, lower volumes in our customer care offerings and reduced level of project work as a result of fewer large cases in our litigation services offering, negative impacts from currency and strategic contract exits. Partially offsetting the decline were benefits from ramping new contracts, primarily in our high-tech business area.

Segment Margin 2016

Commercial Industries segment margin of 2.2% for the year ended December 31, 2016 decreased by 0.2-percentage points from the prior year primarily due to margin pressure in our customer care services offering and reduced project work in our litigation services offering, only partially offset by cost and productivity benefits.

Revenue 2015

Commercial Industries revenue of $2,896 million for the year ended December 31, 2015 was 44% of total revenues and decreased 2% from 2014. The year-over-year decline was driven by the negative impacts from currency and price declines. The decline was partially offset by revenues from acquisitions as well as increased project-related work in our litigation services offering. In addition, within our customer care services offering, lost business was offset by ramping new contracts.

Segment Margin 2015

Commercial Industries segment margin of 2.4% for the year ended December 31, 2015, decreased by 2.7-percentage points from the prior year primarily due to margin pressure in our customer care offering, investments in sales and managerial resources to improve our operating performance over time, as well as the impacts of price declines.

Healthcare Segment

Revenue 2016

Healthcare revenue of $1,686 million for the year ended December 31, 2016, was 26% of total revenues and decreased 4% from the prior year with negligible impact from currency. The decline was driven by lost business and lower volumes in our customer care offering on the payer side, partially offset by ramping new business and moderating acquisition contribution.

Segment Margin 2016

Healthcare segment margin of 9.4% for the year ended December 31, 2016 increased 0.4-percentage points from the prior year primarily due to overall benefits from cost and productivity initiatives and from actions to improve profitability which more than offset margin pressures in our customer care service offering and the impacts of lost business and lower volumes.

Revenue 2015

Healthcare revenue of $1,750 million for the year ended December 31, 2015 was 26% of total revenues and remained flat from the prior year with a negligible impact from currency. Moderate acquisition contribution and organic growth in commercial payers offset the impacts from the loss of the Texas Medicaid contract and lower project-related work in commercial providers.

Segment Margin 2015

Healthcare segment margin of 9.0% for the year ended December 31, 2015 increased 1.1-percentage points from the prior year as improvements in Government Healthcare, including the prior year Nevada HIX impairment, more than offset margin declines on the commercial side driven in part by line of business mix and investments.

Public Sector Segment

Revenue 2016

Public Sector revenue of $1,731 million for the year ended December 31, 2016 was 27% of total revenues and was flat compared to the prior year as growth from ramping new business was offset by lower volumes and lost business in State Government Services.

Segment Margin 2016

Public Sector segment margin of 12.9% for the year ended December 31, 2016 increased 1.3-percentage points from the prior year, due to cost and productivity improvements and improved performance in our transportation offering, partially offset by the impact of lost business in state government services.

Revenue 2015

Public Sector revenue of $1,727 million for the year ended December 31, 2015 was 26% of total revenues and decreased 2% from the prior year. Negative impacts from currency and declines in federal services more than offset growth in state and transportation services.

Segment Margin 2015

Public Sector segment margin of 11.6% for the year ended December 31, 2015 decreased 0.1-percentage point from the prior year as improvements in federal and state services were more than offset by modest declines in transportation services.

Other

Revenue 2016

Other revenue of $301 million for the year ended December 31, 2016 was 5% of total revenue and decreased 5% on an adjusted[1] basis compared to the prior year. The decline was driven by the continued run-off of the Student Loan business and our prior-year decision to not complete the HE implementations in California and Montana.

Segment Loss 2016

Other loss of $245 million for the year ended December 31, 2016, improved $244 million from the prior year. On an adjusted[1] basis, Other loss decreased $16 million, partially offset by improvements in HE platform implementation expenses resulting from the refocusing of our Government Healthcare business in 2015 and the decision to not fully complete the HE platform implementation in California and Montana.

Revenue 2015

Other revenue of $289 million for the year ended December 31, 2015 decreased 39% from the prior year, with no impact from currency. On an adjusted[1] basis, Other revenue of $405 million was 6% of total revenue and decreased 15% compared to the prior year. The decline was primarily driven by the Student Loan business run-off and the impact of our determination in the third quarter of 2015 to not fully complete the HE platform implementations in California and Montana.

Segment Loss 2015

Other loss of $489 million for the year ended December 31, 2015 increased $440 million from the prior year. On an adjusted[1] basis, Other loss of $100 million increased $51 million from the prior year primarily due to higher losses in our HE platform implementations, prior to the refocusing of our Government Healthcare business, and lower profit from the declining Student Loan business.

(1) Refer to the reconciliations table in the "Non-GAAP Financial Measures" section.

Government Healthcare

In February 2017, we determined that it is not probable that the NY MMIS project will be completed. As a result of this determination, we recorded a pre-tax charge of $161 million ($98 million after-tax). The charge included $83 million for the write-off of contract receivables which was recorded as a reduction of revenue and $78 million recorded in cost of outsourcing, including $36 million for the wind down of costs, $28 million non-cash charge for the impairment of software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

Our HE platform is performing to contractual standards in the states where it has been fully implemented, which include New Hampshire, Alaska and North Dakota. New Hampshire was certified by the Center for Medicare and Medicaid Services in June 2015, we are currently in the process of obtaining certification for the Alaska HE implementation, and are in the planning phase of North Dakota certification.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts.

Signings for the three years ended December 31, 2016 were $6.9 billion, $8.0 billion and $7.3 billion, respectively.

Signings were an estimated $6.9 billion in TCV in 2016 and declined 14% as compared to the prior year, primarily reflecting lower contribution from new business, due in part to our decision not to pursue opportunities with lower margin and return profiles, and the prior year large NY MMIS new business signing. Excluding NY MMIS, TCV declined about 8%.

Signings were an estimated $8.0 billion in TCV in 2015 and increased 8% as compared to the prior year. Growth in 2015 included a 37% increase in new business TCV, which is inclusive of larger contracts such as the Florida Tolling and NY MMIS and was partially offset by lower renewal decision opportunities.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period. Our 2016 renewal rate of 86% was within our target range of 85%-90%.

Signings and renewal rate reflect, in part, our decision to not pursue opportunities with lower margin and return profiles.

Capital Resources and Liquidity

As of December 31, 2016 and 2015, total cash and cash equivalents were $390 million and $140 million, respectively. There were $1,444 million outstanding borrowings under our Credit Facility and we utilized $17 million of our Revolving Credit Facility capacity to issue letters of credit at December 31, 2016. We also issued $510 million 10.5% Senior Notes due 2024. Refer to the *Capital Market Activity* section below for additional information.

Cash Flow Analysis

The following summarizes our cash flows for the three years ended December 31, 2016, as reported in our Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements:

	Year Ended December 31,			Change	
(in millions)	2016	2015	2014	2016	2015
Net cash provided by operating activities	$ 108	$ 493	$ 665	$ (385)	$ (172)
Net cash provided by (used in) investing activities	16	522	(488)	(506)	1,010
Net cash provided by (used in) financing activities	132	(1,023)	(149)	1,155	(874)
Effect of exchange rate changes on cash and cash equivalents	(6)	(11)	(8)	5	(3)
Increase (decrease) in cash and cash equivalents	250	(19)	20	269	(39)
Cash and cash equivalents at beginning of year	140	159	139	(19)	20
Cash and Cash Equivalents at End of Year	$ 390	$ 140	$ 159	$ 250	$ (19)

Cash Flows from Operating Activities

Net cash provided by operating activities was $108 million for the year ended December 31, 2016. The $385 million decrease in operating cash from 2015 was primarily due to the following:

- $12 million decrease in pre-tax income before depreciation and amortization, loss on sales of business, HE prior year charge, goodwill impairment charge, NY MMIS charge, separation-related costs and restructuring and related charges.
- $233 million decrease due to reduced factoring and timing of collections of accounts receivable in 2016.
- $136 million decrease reflecting settlement payments associated with our third quarter 2015 determination that we would not fully complete the HE implementations in California and Montana.
- $82 million decrease in accounts payable and accrued compensation primarily due to the timing of payments.
- $44 million decrease for payments for separation-related costs.
- $39 million decrease due to the prior year source of cash in the discontinued ITO business.
- $27 million decrease in restructuring payments as a result of increased restructuring initiatives in 2016.
- $317 million increase due to lower net income tax payments made in 2016 as a result of receiving refunds of prior year overpayments due to a change in tax treatment of unbilled revenue..
- $21 million increase primarily from lower spending for product software from the refocusing of our Government Healthcare business in 2015.

Net cash provided by operating activities was $493 million for the year ended December 31, 2015. The $172 million decrease in operating cash from 2014 was primarily due to the following:

- $149 million decrease in pre-tax income before depreciation and amortization, gain on sales of businesses and assets, stock-based compensation and restructuring charges as well as the HE charge.
- $128 million decrease from higher income tax payments primarily driven by the tax on the sale of the ITO business.
- $105 million decrease due to the loss of cash flow associated with the ITO business, post-divestiture.
- $167 million increase from accounts receivable primarily due to additional sales of accounts receivable under existing programs, select use of prompt pay discounts and lower revenues.
- $36 million increase from lower spending for product software and up-front costs for outsourcing service contracts.
- $22 million increase in accounts payable and accrued compensation primarily related to the timing our accounts payable.

Cash Flows from Investing Activities

Net cash provided by investing activities was $16 million for the year ended December 31, 2016. The $506 million decrease in cash from 2015 was primarily due to the following:

- $992 million decrease in proceeds from sales of businesses. The first twelve months of 2016 included a $52 million payment to Atos for final post-closing adjustments associated with the 2015 ITO divestiture. 2015 included $939 million of net proceeds from the sale of the ITO business.
- $3 million increase due to lower capital expenditures (including internal use software).
- $196 million increase due to lower acquisitions.
- $285 million increase in net payments on related party notes receivable.
- $11 million increase due to payment received on deferred comp investments.

Net cash provided by investing activities was $522 million for the year ended December 31, 2015. The $1,010 million increase in cash from 2014 was primarily due to the following:

- $923 million increase in net proceeds from the sale of businesses, primarily the ITO business. Refer to Note - 4 Divestitures, in the Consolidated Financial Statements for additional information.
- $109 million change from acquisitions. 2015 acquisitions include RSA Medical LLC for $141 million, Intellinex LLC for $28 million, InVentive Patient Access Solutions for $15 million and Healthy Communities Institute Corporation for $13 million. 2014 acquisitions include ISG Holdings, Inc. for $225 million, Invoco Holding GmbH for $54 million, Consilience Software, Inc. for $25 million.
- $31 million due to lower capital expenditures (including internal use software) partly due to the sale of the ITO business.
- $59 million charge due to higher net payments on related party notes receivable.

Capital expenditures (including internal use software) in 2015 and 2014 include $42 million and $107 million, respectively, for our ITO business, which was held for sale and reported as a Discontinued Operation
through June 30, 2015. Refer to Note 4 - Divestitures in the Consolidated Financial Statements for additional information.

Cash Flows from Financing Activities

Net cash provided by financing activities was $132 million for the year ended December 31, 2016. The $1,155 million increase in the cash from 2015 was primarily due to the following:

- $2.1 billion increase primarily due to proceeds received on third party debt in 2016 ($1.9 billion) and payment of $250 million on Senior Notes in 2015.
- $1.0 billion decrease due to net payments on related party notes payable.
- $18 million decrease due to escrow related to the separation
- $84 million increase due to net transfers from parent.

Net cash used in financing activities was $1,023 million for the year ended December 31, 2015. The $874 million increase in the use of cash from 2014 was primarily due to the following:

- $636 million decrease due to net transfers to parent.
- $242 million decrease from net debt activity. 2015 reflects payment of $250 million on Senior Notes and net payments of $15 million on capital leases. 2014 reflects net payments of $19 million on capital leases and net payments of $4 million on other debt.
- $9 million decrease from contingent consideration payments for certain acquisitions in 2014.

Sales of Accounts Receivable

Accounts receivable sales arrangements are utilized in the normal course of business as part of our cash and liquidity management. We have financial facilities in the U.S. and Europe that enable us to sell certain accounts receivable without recourse to third parties. The accounts receivable sold are generally short-term trade receivables with payment due dates of less than 60 days. The level of receivable sales and benefits may not be indicative of what we expect going forward as we evaluate our working capital needs.

Refer to Note 5 - Accounts Receivable, Net in the Consolidated Financial Statements for additional information.

Capital Market Activity

Senior Notes: On December 7, 2016, Xerox Business Services, LLC (XBS) and Conduent Finance, Inc. (CFI), each a wholly owned subsidiary of the Company, issued $510 million 10.5% Senior Unsecured Notes due 2024 (the "Senior Notes"). Interest is payable semi-annually, beginning on June 15, 2017 and debt issuance costs of $17 million were deferred.

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or XBS that guarantee the obligations under the Senior Credit Facilities.

Proceeds from the issuance were used to fund a portion of the transfer of cash to Xerox Corporation in connection with the Spin-Off.

Credit Facility: On December 7, 2016, we entered into a $2.2 billion senior secured credit agreement ("Credit Agreement") among the Company, its subsidiaries XBS, Affiliated Computer Services International B.V. and CFI, the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains Senior Secured credit facilities ("Senior Credit Facilities") consisting of:

(i) Senior Secured Term Loan A (Term Loan A) due 2021 with an aggregate principal amount of $700 million;
(ii) Senior Secured Term Loan B (Term Loan B) due 2023 with an aggregate principal amount of $750 million;
(iii) Senior Revolving Credit Facility ("Revolving Credit Facility") due 2021 with an aggregate amount of $750 million. The Senior Credit Facilities includes access up to $300 million available for the issuance of letters of credit.

The net proceeds of the borrowings under the Term Loan A and B facilities were used to purchase our international subsidiaries from Xerox Corporation, to pay a distribution to Xerox Corporation and for working capital and other general corporate purposes. At December 31, 2016 we had $1,444 million outstanding borrowings under our Credit Facility and utilized $17 million or our Revolving Credit Facility capacity to issue letters of credit. Debt issuance costs of $39 million were paid and deferred.

In January 2017, we borrowed an additional $100 million on Term Loan B with proceeds used for general corporate purposes.

Refer to Note 10 - Debt in the Consolidated Financial Statements for additional information.

Financial Instruments

Refer to Note 11 - Financial Instruments in the Consolidated Financial Statements for additional information.

2017 Activity

In January we paid Xerox $161 million reflecting the settlement of the Separation.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

At December 31, 2016, we had the following contractual cash obligations and other commercial commitments and contingencies:

(in millions)	2017	2018	2019	2020	2021	Thereafter
Total debt, including capital lease obligations[1]	$ 28	$ 72	$ 67	$ 79	$ 528	$ 1,223
Interest on debt[2]	103	125	123	121	118	277
Minimum operating lease commitments[3]	176	127	89	56	36	46
Defined benefit pension plans	10	—	—	—	—	—
Estimated Purchase Commitments[4]	82	75	70	37	1	26
Total	$ 399	$ 399	$ 349	$ 293	$ 683	$ 1,572

(1) Total debt represents principal debt and capital leases. Refer to Note 10 - Debt in the Consolidated Financial Statements for additional information regarding debt.
(2) Represents interest on debt. Refer to Note 10 - Debt in the Consolidated Financial Statements for additional information.
(3) Refer to Note 6, Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information.
(4) Other purchase commitments: We enter into other purchase commitments with vendors in the ordinary course of business. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We currently do not have, nor do we anticipate, material loss contracts.

Pension Benefit Plans

We sponsor defined benefit pension plans that require periodic cash contributions. Our 2016 cash contributions for these plans were $6 million. In 2017, based on current actuarial calculations, we expect to make contributions of approximately $10 million to our worldwide defined benefit pension plans.

Contributions to our defined benefit pension plans in subsequent years will depend on a number of factors, including the investment performance of plan assets and discount rates as well as potential legislative and plan changes. At December 31, 2016, the unfunded and underfunded balances of our U.S. and Non-U.S. defined benefit pension plans were $37 million and $24 million, respectively, or $61 million in the aggregate.

Refer to Note 13 - Employee Benefit Plans in the Consolidated Financial Statements for additional information regarding contributions to our defined benefit pension and post-retirement plans.

Other Contingencies and Commitments

As more fully discussed in Note 15 - Contingencies and Litigation in the Consolidated Financial Statements, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. In addition, guarantees, indemnifications and claims may arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates. Nonperformance under a contract including a guarantee, indemnification or claim could trigger an obligation of the Company.

We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. Should developments in any of these areas cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs.

Off-Balance Sheet Arrangements

We may occasionally utilize off-balance sheet arrangements in our operations (as defined by the SEC Financial Reporting Release 67 (FRR-67), "Disclosure in Management's Discussion and Analysis about Off-Balance Sheet Arrangements and Aggregate Contractual Obligations"). We enter into the following arrangements that have off-balance sheet elements:

- Operating leases in the normal course of business. The nature of these lease arrangements is discussed in Note 6 - Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements.
- We have facilities, primarily in the U.S.and Europe that enable us to sell to third-parties certain accounts receivable without recourse. In most instances, a portion of the sales proceeds are held back by the purchaser and payment is deferred until collection of the related sold receivables. Refer to Note 5 - Accounts Receivables, Net in the Consolidated Financial Statements for further information regarding these facilities.

As of December 31, 2016, we do not believe we have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

In addition, see the preceding table for the Company's contractual cash obligations and other commercial commitments and Note 15 - Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding contingencies, guarantees, indemnifications and warranty liabilities.

Non-GAAP Financial Measures

We have reported our financial results in accordance with U.S. generally accepted accounting principles (GAAP). In addition, we have discussed our financial results using the non-GAAP measures described below, consistent with Xerox's historical presentation. We believe these non-GAAP measures allow investors to better understand the trends in our business and to better understand and compare our results. Accordingly, we believe it is necessary to adjust several reported amounts, determined in accordance with GAAP, to exclude the effects of certain items as well as their related tax effects. Management believes that these non-GAAP financial measures provide an additional means of analyzing the current periods' results against the corresponding prior periods' results. However, these non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with U.S. GAAP. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable U.S. GAAP measures and should be read only in conjunction with our Consolidated Financial Statements prepared in accordance with U.S. GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. Compensation of our executives is based in part on the performance of our business based on these non-GAAP measures.

These Non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with GAAP. A reconciliation of the Non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with GAAP are provided below.

In connection with the preparation of our financial statements for the fiscal year ended December 31, 2016, during the fourth quarter, we performed our annual goodwill impairment test. Following the completion of the impairment

test, we determined that we will record a non-cash goodwill impairment charge of $935 million (approximately $828 million after-tax or ($4.08 per share) in our Commercial Industries reporting unit. Subsequent to the goodwill impairment charge, the Commercial Industries reporting unit's goodwill balance is approximately $908 million. This non-cash charge is attributable primarily to weaker than expected Commercial Industries revenues and operating profits, including in the fourth quarter of 2016. We do not expect to make any current or future cash expenditures as a result of this impairment.

We are in discussions with the State of New York regarding the status and scope of the Health Enterprise platform project, which evolved to include options to not fully complete the project. Based on those discussions, we believe it is probable that we will not fully complete the implementation of the platform in New York. As a result of these developments, we recorded a pre-tax charge of approximately $161 million (approximately $98 million after-tax or ($0.48) per share) in our fourth-quarter 2016 results reflecting estimated asset impairments, wind down costs and other impacts from this project. The charge includes approximately $115 million for the write-off of receivables and other related assets and non-cash impairment charges, with the remainder of the charge expected to be cash outflows in future quarters for wind down and related costs.

Late in the third quarter of 2015, we determined that we would not fully complete Health Enterprise Medicaid platform implementation projects in California and Montana and recorded a charge of $389 million. The charge included a $116 million reduction to revenues with the remaining $273 million recorded to cost of outsourcing.

As a result of the significant impact of the Goodwill Impairment, NY MMIS Charge and HE Charge on our reported revenues, costs and expenses as well as key metrics for the period, we discuss our 2016 and 2015 results using non-GAAP financial measures that exclude the impact of these items, as discussed below.

Adjusted Net Income (Loss), Adjusted Earnings per Share, and Adjusted Effective Tax Rate.

We make adjustments to Income (Loss) before Income Taxes for the following items, for the purpose of calculating Adjusted Net Income (Loss), Adjusted Earnings per Share, and Adjusted Effective Tax Rate.

In 2016, we adjusted Income (Loss) before Income Taxes for the Goodwill Impairment charge of $935 million recorded during the fourth quarter 2016.

Also in 2016, we adjusted Income (Loss) before Income Taxes for the New York Health Enterprise (NY MMIS) charge of $161 million recorded during the fourth quarter 2016. In 2015, we adjusted Income (Loss) before Income Taxes for the Health Enterprise (HE) charge of $389 million recorded during the third quarter 2015.

In addition to the items discussed above, for the quarter and full year ended December 31, 2016 and 2015 we Adjusted Net Income (Loss), Earnings per Share and Effective Tax Rate for the following items:

- Amortization of intangible assets. The amortization of intangible assets is driven by acquisition activity, which can vary in size, nature and timing as compared to other companies within our industry and from period to period.
- Restructuring and related costs. Restructuring and related costs include restructuring and asset impairment charges as well as costs associated with our strategic transformation program.
- Separation costs. Separation costs are expenses incurred in connection with separation from Xerox Corporation into a separate, independent, publicly traded company. Separation costs primarily relate to third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies.
- Other expenses, net, excluding third party interest expense. Other expenses, net includes losses (gains) on sales of businesses and assets, currency (gains) losses, net, litigation matters and all other expenses, net.

Adjusted Revenue, Costs and Expenses and Margin - Adjusted Operating Income. We make adjustments to Revenue, Costs and Expenses and Margin for the following items, for the purpose of calculating Adjusted Operating Income.

In 2016, we adjusted Income (Loss) before Income Taxes for the Goodwill Impairment charge of $935 million recorded during the fourth quarter 2016.

As a result of the nature and the significant impact of the NY MMIS and HE charges on our reported revenues, costs and expenses, as well as key metrics for the period, we discussed our 2016 and 2015 Adjusted Operating Income after excluding the impact of the NY MMIS and HE charges. In 2016, we Adjusted Operating Income by adjusting

Income (Loss) before Income Taxes for the fourth quarter NY MMIS charge of $161 million, which included an $83 million reduction in revenues. In 2015, we Adjusted Operating Income by adjusting Income (Loss) before Income Taxes for the third quarter HE charge of $389 million, which included a $116 million reduction in revenues.

In addition to the items discussed above, for the we adjusted Operating Income for the following items:

- As defined above in Adjusted Net Income (Loss), Adjusted Earnings per Share, and Adjusted Effective Tax Rate:
  - Amortization of intangible assets.
  - Restructuring and related costs.
  - Separation costs.
- We also adjust Operating Income for:
  - Related Party Interest. Includes interest payments to former parent.
  - Other expenses, net. Including third party interest, losses (gains) on sales of businesses and assets, currency (gains) losses, net, litigation matters and all other expenses, net.

Adjusted Revenues

As a result of the nature and the significant impact of the NY MMIS and HE charges on our reported revenues, we discussed our 2016 and 2015 revenues excluding the impact of the NY MMIS and HE charges. For 2016, we reduced revenues by $83 million for NY MMIS. For the 2015, we reduced revenues by $116 million to reflect the reduction in HE revenues.

Adjusted Other Segment Revenue and Profit

As a result of the nature and the significant impact of the NY MMIS and HE charges on our Other Segment Revenue and Profit, we discuss Other Segment Revenue and Profit excluding the impact of the NY MMIS and HE charges. In 2016, we adjusted Other Segment Revenue and Profit by adjusting for the fourth quarter NY MMIS charge of $161 million, which included an $83 million reduction in revenues. In 2015, we adjusted Other Segment Revenue and Profit by adjusting for the third quarter HE charge of $389 million, which included a $116 million reduction in revenue.

Constant Currency

To better understand trends in our business, we believe that it is helpful to adjust revenue to exclude the impact of changes in the translation of foreign currencies into U.S. Dollars. We refer to this adjusted revenue as “constant currency.” Currency impact can be determined as the difference between actual growth rates and constant currency growth rates.

Non GAAP Reconciliations:

Net Income (Loss) and EPS reconciliation:

	Year Ended December 31, 2016		Year Ended December 31, 2015		Year Ended December 31, 2014

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from foreign currency exchange rates, which could affect operating results, financial position and cash flows. We manage our exposure to this market risk through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We utilized derivative financial instruments to hedge economic exposures, as well as reduce earnings and cash flow volatility resulting from shifts in market rates.

Recent market events have not caused us to materially modify or change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 11 - Financial Instruments in the Consolidated Financial Statements for additional discussion on our financial risk management.

Foreign Exchange Risk Management

Assuming a 10% appreciation or depreciation in foreign currency exchange rates from the quoted foreign currency exchange rates at December 31, 2016, the potential change in the fair value of foreign currency-denominated assets and liabilities in each entity would not be significant because all material currency asset and liability exposures were economically hedged as of December 31, 2016. A 10% appreciation or depreciation of the U.S. Dollar against all currencies from the quoted foreign currency exchange rates at December 31, 2016 would have an impact on our cumulative translation adjustment portion of equity of approximately $56 million. The net amount invested in foreign subsidiaries and affiliates, primarily in the U.K. and Europe, and translated into U.S. Dollars using the year-end exchange rates, was approximately $559 million at December 31, 2016.

Interest Rate Risk Management

The consolidated weighted-average interest rates related to our total debt for 2016 approximated 2.99% for Term A due 2021, 6.81%, for Term B due 2023, 10.51% for Senior Notes due 2024 and 3.89% for Capital Lease Obligations. As of December 31, 2016, $1,487 million of our total debt of $1,997 million carried variable interest rates. The fair values of our fixed rate financial instruments are sensitive to changes in interest rates and at December 31, 2016, a 10% increase in market interest rates would decrease the fair values of such financial instruments by approximately $17 million. A 10% decrease in market interest rates would increase the fair values of such financial instruments by approximately $37 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Conduent Incorporated

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income (loss), of comprehensive loss, of shareholders' equity and of cash flows present fairly, in all material respects, the financial position of Conduent Incorporated and its subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(1) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

Dallas, Texas

REPORTS OF MANAGEMENT

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent auditors, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent auditors. The independent auditors and internal auditors have free access to the Audit Committee.

Management's Report on Internal Control Over Financial Reporting

This annual report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of the company's registered public accounting firm due to a transition period established by rules of the SEC for newly public companies.

The accompanying notes are an integral part of these Consolidated Financial Statements.

CONDUENT INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in millions, except per-share data and where otherwise noted)

Note 1 – Basis of Presentation and Summary of Significant Accounting Policies

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Overview

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the separation agreement. The separation was completed by way of a pro rata distribution of Conduent Incorporated shares held by Xerox to Xerox’s shareholders. As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

Description of Business

We are a $6.4 billion global enterprise and a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end user experience. We create value for our commercial and government clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

Prior to December 31, 2016, the Combined Financial Statements of the Company were derived from the Consolidated Financial Statements and accounting records of Xerox as if the Company operated on a standalone basis during the periods presented and were prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and pursuant to the rules and regulations of the SEC. Historically, the Company consisted of the Business Processing Outsourcing Operating segment within Xerox’s reportable Services segment and did not operate as a separate, standalone company. Accordingly, Xerox had reported the financial position and the related results of operations, cash flows and changes in equity of the Company in Xerox’s Consolidated Financial Statements.

The Combined Financial Statements included the historical basis of assets, liabilities, revenues and expenses of the individual businesses of the Company, including the joint ventures and partnerships over which the Company has a controlling financial interest. The Combined Financial Statements included certain assets and liabilities that were held by Xerox that are specifically identifiable or otherwise attributable to the Company. All intercompany transactions and balances within the Company have been eliminated. Cash was managed centrally through bank accounts controlled and maintained by Xerox. Accordingly, cash and cash equivalents held by Xerox at the corporate level were not attributable to the Company for any of the periods presented. Only cash amounts specifically attributable to the Company are reflected in the Combined Balance Sheets. Transfers of cash, both to and from Xerox’s centralized cash management system, were reflected as a component of Net Parent Investment in the Combined Balance Sheets and as a financing activity on the accompanying Combined Statements of Cash Flows. Historically, the Company received or provided funding as part of Xerox’s centralized treasury program.

Third-party debt obligations of Xerox and the corresponding financing costs related to those debt obligations, specifically those that relate to senior notes, term loans, commercial paper obligations and revolving credit facilities, have not been attributed to the Company, as the Company was not the legal obligor on the debt. The only third-party debt obligations included in these Combined Financial Statements are those for which the legal obligor is the Company or a legal entity within the Company.

During the periods presented, the Company functioned as part of the larger group of companies controlled by Xerox. Accordingly, Xerox performed certain corporate overhead functions for the Company. Therefore, certain corporate costs, including compensation costs for corporate employees supporting the Company, have been allocated from

Xerox. These allocated costs are for corporate functions including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communication, internal audit and other shared services, which were not provided at the Company level. Where possible, these costs were allocated based on direct usage, with the remainder allocated on a basis of cost, headcount or other measures we have determined as reasonable. The Combined Financial Statements do not necessarily include all the expenses that would have been incurred or held by the Company had it been a separate, standalone company. We expect to incur additional expenses as a separate, standalone publicly-traded company. It is not practicable to estimate actual costs that would have been incurred had the Company been a separate standalone company during the periods presented. Allocations for management costs and corporate support services provided to the Company totaled $165, $170 and $175 for the three years ended December 31, 2016.

The management of the Company believes the assumptions underlying the Combined Financial Statements, including the assumptions regarding the allocated expenses, reasonably reflect the utilization of services provided to or the benefit received by the Company during the periods presented. Nevertheless, the Combined Financial Statements may not be indicative of the Company's future performance, and do not necessarily include all of the actual expenses that would have been incurred by the Company and may not reflect the results of operations, financial position and cash flows of the Company had the Company been a separate, standalone company during the periods presented.

Operations of the Company are included in the consolidated U.S. federal, and certain state and local and foreign income tax returns filed by Xerox, where applicable. The Company also files certain separate state and local and foreign income tax returns. Income tax expense and other income tax related information contained in the Combined Financial Statements are presented on a separate return basis as if the Company filed its own tax returns. The income taxes of the Company as presented in the Combined Financial Statements may not be indicative of the income taxes that the Company will generate in the future. In jurisdictions where the Company has been included in the tax returns filed by Xerox, any income taxes payable resulting from the related income tax provisions have been reflected in the balance sheet.

Discontinued Operations

In 2014, we announced an agreement to sell our Information Technology Outsourcing (ITO) business to Atos SE (Atos). As a result of that agreement, we reported the ITO business as held for sale and a Discontinued Operation up through its date of sale on June 30, 2015. In 2014, we also completed the disposal of Truckload Management Services (TMS) which was also reported as a Discontinued Operation. All prior period results have been reclassified to conform to the presentation of these businesses as Discontinued Operations. Refer to Note 4 - Divestitures for additional information regarding Discontinued Operations.

Use of Estimates

The preparation of our Consolidated Financial Statements is in conformity with GAAP and requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities, as well as the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our Consolidated Financial Statements will change as new events occur, as more experience is acquired, as additional information is obtained and as our operating environment changes. Our estimates are based on management's best knowledge of current events, historical experience, actions that the company may undertake in the future and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates.

The following table summarizes certain recurring type costs and expenses that require management estimates for the three years ended December 31, 2016:

	Year Ended December 31,		
Expense/(Income)	2016	2015	2014
Corporate allocations[1]	$ 165	$ 170	$ 175
Provisions for restructuring and asset impairments - continuing operations	73	159	21
Provisions for restructuring and asset impairments - discontinued operations	—	—	2
Provision for receivables	4	4	3
Provisions for litigation and regulatory matters	40	18	38
Depreciation of buildings and equipment [2]	130	126	145
Amortization of internal use software [2]	49	51	52
Amortization of product software	61	65	58
Amortization of acquired intangible assets [2]	280	250	250
Amortization of customer contract costs [2]	93	108	122
Income tax (benefit) expense - continuing operations	(244)	(238)	(24)
Income tax expense - discontinued operations	—	81	7

(1) Refer to Note 20 - Related Party and Former Parent Investment.
(2) Excludes amounts related to our ITO business, which was reported as a discontinued operation through its date of sale on June 30, 2015. Refer to Note 4 - Divestitures for additional information regarding this sale.

Changes in Estimates

In the ordinary course of accounting for the items discussed above, we make changes in estimates as appropriate and as we become aware of new or revised circumstances surrounding those estimates. Such changes and refinements in estimation methodologies are reflected in reported results of operations in the period in which the changes are made and, if material, their effects are disclosed in the Notes to the Consolidated Financial Statements and in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Statement of Cash Flows Revision

During the 2016 year-end closing process, we determined that 2015 and 2014 Cash Flows from Investing Activities and Cash Flows from Financing Activities should have been $8 and $59 lower, respectively, as the initiation of capital leases is a non-cash activity. We have determined that these errors are immaterial to all prior period financial statements impacted and we have revised the applicable 2015 and 2014 Statement of Cash Flows amounts herein.

New Accounting Standards and Accounting Changes

Except for the Accounting Standard Updates (ASU's) discussed below, the new ASU's issued by the FASB during the last two years did not have any significant impact on the Company.

Revenue Recognition

In May 2014, the FASB issued **ASU 2014-09**, ***Revenue from Contracts with Customers (Topic 606)***, to supersede nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, it is possible more judgment and estimates may be required within the revenue recognition process than required under existing U.S. GAAP, including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. ASU 2014-09 is effective for our fiscal year beginning January 1, 2018, with early adoption permitted for fiscal years beginning January 1, 2017. The standard will be adopted using either of two methods: (i) retrospective to each prior reporting period presented with the option to elect certain practical expedients as defined within ASU 2014-09; or (ii) retrospective with the cumulative effect of initially applying ASU 2014-09 recognized at the date of initial application and providing certain additional disclosures as defined per ASU 2014-09. In March 2016, the FASB issued ASU 2016-08, Revenue Recognition - Principal versus Agent (reporting revenue gross versus net). Also, in April 2016, the FASB issued ASU 2016-10 Revenue from Contracts with Customers - Identifying Performance Obligations and Licensing, and in May 2016, the FASB issued ASU 2016-12 Revenue Recognition - Narrow Scope Improvements and Practical Expedients. We will adopt this standard beginning January 1, 2018, and we will use the modified retrospective method. As a result of the Spin-off Transaction in 2016, we will need to complete most of our implementation activities in 2017.

Leases

In February 2016, the FASB issued **ASU 2016-02**, ***Leases***. This update requires the recognition of leased assets and lease obligations by lessees for those leases currently classified as operating leases under existing lease guidance. Short term leases with a term of 12 months or less are not required to be recognized. The update also requires disclosure of key information about leasing arrangements to increase transparency and comparability among organizations. The accounting for lessors does not fundamentally change except for changes to conform and align guidance to the lessee guidance as well as to the new revenue recognition guidance in ASU 2014-09. This update is effective for our fiscal year beginning January 1, 2019. We are currently evaluating the impact of the adoption of ASU 2016-02 on our consolidated financial statements.

Cash Flows

In August 2016, the FASB issued **ASU 2016-15**, **Statement of Cash Flows** - *Classification of Certain Cash Receipts and Cash Payments*. This update provides specific guidance on eight cash flow classification issues where current GAAP is either unclear or does not include specific guidance. This update is effective for our fiscal year beginning January 1, 2018 with early adoption permitted. We are currently evaluating the impact, if any, that the adoption of ASU 2016-15 may have on our statements of cash flows in future reporting periods.

Additionally, in November 2016 the FASB issued **ASU 2016-18, Statement of Cash Flows - Restricted Cash**. The update requires that amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts

shown on the statement of cash flows. We held $22 and $16 of restricted cash, currently reported in other current assets at December 31, 2016 and 2015, respectively. This update is effective for our fiscal year beginning January 1, 2018. We are currently evaluating the impact, if any, that the adoption of ASU 2016-18 may have on our statements of cash flows in future reporting periods.

Stock Compensation

In March 2016, the FASB issued **ASU 2016-09, *Compensation*** - *Stock Compensation, Improvements to Employee Share-Based payment Accounting (Topic 718).* This update includes provisions to simplify certain aspects related to the accounting for share-based awards and the related financial statement presentation. The update also requires that excess tax benefits and deficiencies be recorded in the income statement when the awards vest or are settled as compared to equity as allowed under certain conditions by current US GAAP. This change is required to be adopted prospectively in the period of adoption. In addition, the ASU modifies the classification of certain share-based payment activities within the statements of cash flows and these changes are required to be applied retrospectively to all periods presented. ASU 2016-09 is effective for our fiscal year beginning January 1, 2017.The update may add volatility to our income tax expense in future periods depending upon, among other things, the level of tax expense and the price of the Company's common stock at the date of vesting for share-based awards. We are currently evaluating the impact, if any, that the adoption of ASU 2016-09 may have on our consolidated financial statements in future reporting periods.

Income Taxes

In October 2016, the FASB issued **ASU 2016-16, Income Taxes** - *Intra-Entity Transfers of Assets Other than Inventory*. This update requires recognition of the income-tax consequences of an intra-entity transfer of assets other than inventory. Under current GAAP, recognition of the income tax consequences for assets other than inventory could only occur upon sale to a third party. This update is effective for our fiscal year beginning January 1, 2018. We are currently evaluating the impact of the adoption of ASU 2016-16 on our consolidated financial statements.

Financial Instruments - Credit Losses

In June 2016, the FASB issued **ASU 2016-13, Financial Instruments Credit Losses** - *Measurement of Credit Losses on Financial Instruments,* which requires measurement and recognition of expected credit losses for financial assets. The update impacts financial assets and net investment in leases that are not accounted for at fair value through net income. This update is effective for our fiscal year beginning January 1, 2020, with early adoption permitted as of January 1, 2019. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

Business Combinations

In January 2017, the FASB issued **ASU 2017-01, Business Combinations** (Topic 805): Clarifying the Definition of a Business, which clarifies the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This update is effective for our fiscal year beginning January 1, 2018, with early adoption permitted. We are currently evaluating the impact of the adoption of ASU 2017-01 on our consolidated financial statements, intangible assets and goodwill.

In January 2017 the FASB issued **ASU 2017-04, Intangibles - Goodwill and Other** - Simplifying the Goodwill Impairment Test, which eliminates Step 2 from the goodwill impairment test. Instead, an entity should perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit. This update is effective for our fiscal year beginning January 1, 2020, with early adoption permitted for goodwill impairment tests performed after January 1, 2017. The adoption of this standard is not expected to have any effect on our financial condition, results of operations or cash flows. If this new accounting standard, ASU 2017-04 had been adopted as of December 31, 2016, the impairment charge for the Commercial Industries reporting unit would have been $992 versus the$935 under the current standard.

Equity Method Accounting

In March 2016, the FASB issued **ASU 2016-07, *Investments*** - *Equity Method and Joint Ventures (Topic 323), Simplifying the Transition to the Equity Method of Accounting.* This update eliminates the requirement that when an existing cost method investment qualifies for use of the equity method, an investor must restate its historical financial statements, as if the equity method had been used during all previous periods. Under the new guidance, at the point an investment qualifies for the equity method, any unrealized gain or loss in accumulated other comprehensive income(loss) ("AOCI") will be recognized through earnings. This update is effective for our fiscal year beginning January 1, 2017, with early adoption permitted. The adoption of this update is not expected to have a material impact on our financial condition, results of operations or cash flows.

Accounting for Income Taxes: Balance Sheet Presentation of Deferred Taxes

In November 2015, the FASB issued **ASU 2015-17**, *Income Taxes: Balance Sheet Classification of Deferred Taxes.* This update, which simplifies the presentation of deferred income taxes, requires that deferred tax liabilities and assets be classified as non-current in a classified statement of financial position. As allowed by the update, we early adopted ASU 2015-17 effective December 31, 2015 on a prospective basis. Adoption of this update resulted in a reclassification of our net current deferred tax asset and liabilities to the net non-current deferred tax asset and liabilities in our Consolidated Balance Sheet as of December 31, 2015. Prior periods were not retrospectively adjusted. The current requirement that deferred tax liabilities and assets of a tax-paying component (jurisdiction) of an entity be offset and presented as a single amount is not affected by this update.

Interest

In April 2015, the FASB issued **ASU 2015-03**, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*. This update requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued **ASU 2015-15,** which indicated that the SEC staff would not object to an entity deferring and presenting debt issuance costs associated with a line-of-credit arrangement as an asset and subsequently amortizing those costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings. We have $66 of debt issuance costs at December 31, 2016, of which $56 is reported as a reduction to Long term debt and $10 is recorded as a Long term asset. This update was effective for our fiscal year beginning January 1, 2016. The adoption of this standard did not have a material effect on our financial condition, results of operations or cash flows.

Discontinued Operations

In April 2014, the FASB issued **ASU 2014-08**, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*. The update changes the requirements for reporting discontinued operations in Subtopic 205-20. A discontinued operation may include a component of an entity or a group of components of an entity, or a business. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity’s operations and financial results. Examples include a disposal of a major geographic area, a major line of business or a major

equity method investment. Additionally, the update requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income and expenses of discontinued operations. This update was effective prospectively for our fiscal year beginning January 1, 2015. The standard primarily involves presentation and disclosure and, therefore, did not have a material impact on our financial condition, results of operations or cash flows.

Service Concession Arrangements

In January 2014, the FASB issued **ASU 2014-05**, *Service Concession Arrangements (Topic 853)*. This update specifies that an entity should not account for a service concession arrangement within the scope of this update as a lease in accordance with Topic 840, Leases. The update was effective for our fiscal year beginning January 1, 2015. The adoption of this standard did not have a material effect on our financial condition, results of operation or cash flows.

Disclosures of Going Concern Uncertainties

In August 2014, the FASB issued **ASU 2014-15**, *Presentation of Financial Statements - Going Concern (Subtopic 205-40); Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern*, which was effective for our fiscal year ending December 31, 2016. The adoption of this standard did not have a material effect on our financial condition, results of operation or cash flows.

Other Updates

In 2016 and 2015, the FASB also issued the following Accounting Standards Updates which are not expected to have a material impact on our financial condition, results of operations or cash flows when adopted in future periods. Those updates are as follows:

- ***Accounting Changes and Error Corrections*** (Topic 250): **ASU 2017-03**, Accounting Changes and Error Corrections (Topic 250) and Investments-Equity Method and Joint Ventures (Topic 323). Transition guidance included in certain issued but not yet adopted ASUs was updated to reflect this amendment.
- ***Financial Instruments:*** **ASU 2016-01**, *Financial Instruments - Recognition and Measurement of Financial Instruments and Financial Liabilities,* which is effective for our fiscal year beginning January 1, 2018.
- ***Inventory:*** **ASU 2015-11**, *Simplifying the Subsequent Measurement of Inventory,* which is effective for our fiscal year beginning January 1, 2017.
- ***Fair Value Measurements:*** **ASU 2015-07**, *Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)*, which was effective for our fiscal year beginning January 1, 2016.
- ***Stock Compensation:*** **ASU 2014-12**, *Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could be Achieved after the Requisite Service Period,* which was effective for our fiscal year beginning January 1, 2016.
- ***Business Combinations:*** **ASU 2015-16**, *Accounting for Measurement Period Adjustments in a Business Combination*, which was effective for our fiscal year beginning January 1, 2016.
- ***Intangibles - Goodwill and Other - Internal Use Software:*** **ASU 2015-05**, *Intangibles-Goodwill and Other-Internal Use Software - Customer's Accounting for Fees Paid in a Cloud Computing Arrangement,* which was effective for our fiscal year beginning January 1, 2016.
- ***Consolidation:*** **ASU 2015-02**, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*. This update was effective for our fiscal year beginning January 1, 2016 with early adoption permitted, and is applied on a modified retrospective basis.
- ***Income Statement:*** **ASU 2015-01,** *Income Statement - Extraordinary and Unusual Items (Subtopic 225-20) - Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items*. The standard primarily involves presentation and disclosure.
- ***Derivatives and Hedging***: **ASU 2016-06**, *Contingent Put and Call Options in Debt Instruments*, which is effective for our fiscal year beginning January 1, 2017 with early adoption permitted.
- ***Derivatives and Hedging***: **ASU 2016-05**, *Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships*, which is effective for our fiscal year beginning January 1, 2017 with early adoption permitted.
- ***Derivatives and Hedging:*** **ASU 2014-16**, *Derivatives and Hedging (Topic 815) - Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity,* which was effective for our fiscal year beginning January 1, 2016.

Summary of Accounting Policies

Revenue Recognition

We primarily generate revenue through services. Revenue is recognized when it is realized or realizable and earned. We consider revenue realized or realizable and earned when we have persuasive evidence of an arrangement, delivery has occurred, the transaction price is fixed or determinable and collectibility is reasonably assured. Delivery does not occur until services have been provided to the customer, risk of loss has transferred to the customer, and either customer acceptance has been obtained, customer acceptance provisions have lapsed or the company has objective evidence that the criteria specified in the customer acceptance provisions have been satisfied. The transaction price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

Outsourcing Services: Revenues associated with outsourcing services are generally recognized as services are rendered, which is generally on the basis of the number of accounts or transactions processed. In service arrangements where final acceptance of a system or solution by the customer is required, revenue is deferred until all acceptance criteria have been met. Revenues on cost reimbursable contracts are recognized by applying an estimated factor to costs as incurred, determined by the contract provisions and prior experience. Revenues on unit-price contracts are recognized at the contractual selling prices as work is completed and accepted by the customer. Revenues on time and material contracts are recognized at the contractual rates as the labor hours and direct expenses are incurred.

Revenues on certain fixed price contracts where we provide system development and implementation services are recognized over the contract term based on the percentage of development and implementation services that are provided during the period compared with the total estimated development and implementation services to be provided over the entire contract using the percentage-of-completion accounting methodology. These services require that we perform significant, extensive and complex design, development, modification or implementation of our customers' systems. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement.

The percentage-of-completion methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed, on a current cumulative cost to estimated total cost basis, using a reasonably consistent profit margin over the period.

Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided. We recognize revenues for non-refundable, upfront implementation fees on a straight-line basis over the period between the initiation of the ongoing services through the end of the contract term.

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract.

Spending associated with customer-related deferred set-up/transition and inducement costs for the three years ended December 31, 2016 were as follows:

	Year Ended December 31,		
	2016	2015	2014
Set-up/transition and inducement expenditures	$ 63	$ 65	$ 81

The capitalized amount of customer contract costs at December 31, 2016 and 2015 were as follows:

	Year Ended December 31,	
	2016	2015
Capitalized customer contract costs [1]	137	170

_____

(1) The balance at December 31, 2016 of $137 is expected to be amortized over a weighted average period of approximately 8 years.

Amortization expense for the next five years and thereafter is expected to be as follows:

2017	2018	2019	2020	2021	Thereafter
$ 58	$ 29	$ 16	$ 8	$ 5	$ 21

Long-lived assets used in the fulfillment of the arrangements are capitalized and depreciated over the shorter of their useful life or the term of the contract if an asset is contract specific.

Other Revenue Recognition Policies

Multiple Element Arrangements: As described above, we enter into the following revenue arrangements that may consist of multiple deliverables including contracts for multiple types of outsourcing services, as well as professional and value-added services. For instance, we may contract for an implementation or development project and also provide services to operate the system which we implement or develop over a period of time; or we may contract to scan, manage and store customer documents.

In substantially all of our multiple element arrangements, we are able to separate the deliverables since we normally will meet both of the following criteria:

- The delivered item(s) has value to the customer on a stand-alone basis; and
- If the arrangement includes a general right of return relative to the delivered item(s), delivery or performance of the undelivered item(s) is considered probable and substantially in our control.

Consideration in a multiple-element arrangement is allocated at the inception of the arrangement to all deliverables on the basis of the relative selling price. When applying the relative selling price method, the selling price for each deliverable is primarily determined based on vendor-specific objective evidence (VSOE), third-party evidence (TPE), or our best estimate of the selling price. The above noted revenue policies are then applied to each separated deliverable, as applicable.

Revenue Reporting: Revenue from sales of third-party vendor products or services is recorded net of costs when the company is acting as an agent between the customer and the vendor or supplier, and gross when the company is a principal to the transaction. Postage is generally recognized on a gross basis. Several factors are considered to determine whether the company is an agent or principal, most notably whether the company is the primary obligor to the customer, or has inventory risk. Consideration is also given to whether the company adds meaningful value to the vendor's product or service, was involved in the selection of the vendor's product or service, has latitude in establishing the sales price or has credit risk.

Revenue-based Taxes: We report revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The primary revenue-based taxes are sales tax and value-added tax (VAT).

Other Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, including money market funds and investments with original maturities of three months or less.

Receivable Sales

We regularly transfer certain portions of our receivable portfolios and normally account for those transfers as sales based on meeting the criteria for derecognition in accordance with ASC Topic 860 "Transfer and Servicing" of Financial Assets. Losses on the sale of receivables depend, in part, on both (a) the cash proceeds and (b) the net non-cash proceeds received or paid. When we sell receivables, we normally receive beneficial interests in the transferred receivables from the purchasers as part of the proceeds. Refer to Note 5 - Accounts Receivable, Net for more details on our receivable sales.

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost. Buildings and equipment are depreciated over their estimated useful lives. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life. Significant improvements are capitalized and maintenance and repairs are expensed. Refer to Note 6 - Land, Buildings, Equipment and Software, Net for further discussion.

Software - Internal Use and Product

We capitalize direct costs associated with developing, purchasing or otherwise acquiring software for internal use and amortize these costs on a straight-line basis over the expected useful life of the software, beginning when the software is implemented (Internal Use Software). Costs incurred for upgrades and enhancements that will not result in additional functionality are expensed as incurred. Amounts expended for Internal Use Software are included in Cash Flows from Investing.

We also capitalize certain costs related to the development of software solutions to be sold to our customers upon reaching technological feasibility (Product Software). These costs are amortized on a straight-line basis over the estimated economic life of the software. Amounts expended for Product Software are included in Cash Flows from Operations. We perform periodic reviews to ensure that unamortized Product Software costs remain recoverable from estimated future operating profits (net realizable value or NRV). Costs to support or service licensed software are charged to Costs of outsourcing as incurred.

Refer to Note 6 - Land, Buildings, Equipment and Software, Net for further information.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of acquired net assets in a business combination, including the amount assigned to identifiable intangible assets. The primary drivers that generate goodwill are the value of synergies between the acquired entities and the company and the acquired assembled workforce, neither of which qualifies as an identifiable intangible asset. Goodwill is not amortized but rather is tested for impairment annually or more frequently if an event or circumstance indicates that an impairment loss may have been incurred.

Impairment testing for goodwill is done at the reporting unit level. A reporting unit is an operating segment or one level below an operating segment (a "component") if the component constitutes a business for which discrete financial information is available, and segment management regularly reviews the operating results of that component. Our reporting units are the same as our operating segments and this is the level that discrete financial information is available.

When testing goodwill for impairment, we may assess qualitative factors for some or all of our reporting units to determine whether it is more-likely-than-not (that is, a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount, including goodwill. Alternatively, we may bypass this qualitative assessment for some or all of our reporting units and perform a detailed quantitative test of impairment (Step 1). If we perform the detailed quantitative impairment test and the carrying amount of the reporting unit exceeds its fair value, we would perform an analysis (Step 2) to measure such impairment.

As required by ASC 350 Intangibles - Goodwill and Other, we annually test the Goodwill of our reporting units for impairment. For Step 1 of the test, as in prior years, we determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach to calculate fair value for each reporting units equity. We then compare fair value of equity to carrying value. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. We apply a two-thirds and one-third weighting to the results of the Income Approach and the Market Approach, respectively, to calculate the fair value of each reporting unit’s equity.

In 2016, based on the declining operating results of our Commercial Industries reporting unit, including in the fourth quarter, we determined to proceed to the quantitative assessment of the recoverability of our goodwill balances for each of our reporting units in performing our annual impairment test. Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value by approximately 53%, indicating an impairment. Accordingly, based on Step 2 of the impairment process, we recorded a pre-tax goodwill impairment charge of $935 million during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). Our Healthcare and Public Sector reporting units passed Step 1 of the impairment test with fair value exceeding carrying value by approximately 19% and 14%, respectively.

Other intangible assets primarily consist of assets obtained in connection with business acquisitions, including installed customer base and distribution network relationships, patents on existing technology and trademarks. We apply an impairment evaluation whenever events or changes in business circumstances indicate that the carrying value of our intangible assets may not be recoverable. Other intangible assets are amortized on a straight-line basis over their estimated economic lives. We believe that the straight-line method of amortization reflects an appropriate allocation of the cost of the intangible assets to earnings in proportion to the amount of economic benefits obtained annually by the Company.

Refer to Note 7 - Goodwill and Intangible Assets, Net for further information.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, including buildings, equipment, internal use software, product software and other intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. If these cash flows are less than the carrying value of such asset, an impairment loss is recognized for the difference between estimated fair value and carrying value. Our primary measure of fair value is based on forecasted cash flows.

Pension Obligations

We sponsor various forms of defined benefit pension plans in several countries covering employees who meet eligibility requirements. We employ a delayed recognition feature in measuring the costs associated with our pension benefit plans. This requires changes in the benefit obligations and changes in the value of assets set aside to meet those obligations to be recognized not as they occur, but systematically and gradually over subsequent periods. All changes are ultimately recognized as components of net periodic benefit cost, except to the extent they may be offset by subsequent changes. At any point, changes that have been identified and quantified but not recognized as components of net periodic benefit cost, are recognized in Accumulated Other Comprehensive Loss, net of tax.
