Through its risk-based product offerings, UnitedHealthcare Employer & Individual assumes the risk of both medical and administrative costs for its customers in return for a monthly premium, which is typically a fixed rate per individual served for a one-year period. When providing administrative and other management services to customers that elect to self-fund the health care costs of their employees and employees' dependents, UnitedHealthcare Employer & Individual receives a fixed monthly service fee per individual served. These customers retain the risk of financing medical benefits for their employees and employees' dependents, while UnitedHealthcare Employer & Individual provides services such as coordination and facilitation of medical and related services to customers, consumers and health care professionals, administration of transaction processing and access to a contracted network of physicians, hospitals and other health care professionals, including dental and vision.

The consolidated purchasing capacity represented by the individuals served by UnitedHealth Group makes it possible for UnitedHealthcare Employer & Individual to contract for cost-effective access to a large number of conveniently located care professionals and facilities. UnitedHealthcare Employer & Individual has relationships with network care providers that integrate data and analytics, implement value-based payments and care management programs, and enable us to jointly better manage health care across populations.

UnitedHealthcare Employer & Individual typically distributes its products through consultants or direct sales in the larger employer and public sector segments. In the smaller group segment of the commercial marketplace, UnitedHealthcare Employer & Individual's distribution system consists primarily of direct sales and sales through collaboration with brokers and agents. UnitedHealthcare Employer & Individual also distributes products through wholesale agents or agencies that contract with health insurance carriers to distribute individual or group benefits and provide other related services to their customers.

UnitedHealthcare Employer & Individual also distributes its products through professional employer organizations, associations and, increasingly, through both multi-carrier and its own proprietary private exchange marketplaces. Direct-to-consumer sales are supported by participation in multi-carrier health insurance marketplaces for individuals and small groups through exchanges. In 2017, UnitedHealthcare Employer & Individual will participate in individual public exchanges in three states, a reduction from 34 states in 2016.

UnitedHealthcare Employer & Individual's diverse product portfolio offers a continuum of benefit designs, price points and approaches to consumer engagement, which provides the flexibility to meet the coverage needs of employers of all sizes. The market for health benefit products is shifting, with benefit and network offerings shaped, at least in part, by the requirements and effects of the Patient Protection and Affordable Care Act (ACA) and related federal and state regulations, increased employer focus on quality and employee engagement and the urgent need to align the system around value. Cost pressures are stimulating demand for improved health care affordability and more coordinated care. UnitedHealthcare Employer & Individual is responding to this demand with medical network and contracting constructs (such as performance incentives and benefit designs that direct more patients to higher-performing care providers), alternative access to affordable and convenient care (such as through telehealth appointments with registered nurses and physicians) and a consumer-responsive service called Advocate4Me.

UnitedHealthcare Employer & Individual offers affordable products and actionable information to enable better health outcomes and to help employers attract and retain talent. UnitedHealthcare Employer & Individual's major product families include:

Traditional Products. Traditional products include a full range of medical benefits and network options from managed plans, such as Choice and Options PPO, to more traditional indemnity products. The plans offer a full spectrum of covered services, including preventive care, direct access to specialists and catastrophic protection.

Consumer Engagement Products. Consumer engagement products couple plan design with financial accounts to increase individuals' responsibility for their health and well-being. This suite of products includes high-deductible consumer-driven benefit plans, which include health reimbursement accounts (HRAs), health savings accounts (HSAs) and consumer engagement services such as personalized behavioral incentive programs and consumer education. During 2016, more than 40,000 employer-sponsored benefit plans, including nearly 400 employers in the large group self-funded market, purchased HRA or HSA products from us.

Clinical and Pharmacy Products. UnitedHealthcare Employer & Individual offers a comprehensive suite of clinical and pharmacy care services products, which complement its service offerings by improving quality of care, engaging members and providing cost-saving options. All UnitedHealthcare Employer & Individual members are provided access to clinical products that help them make better health care decisions and better use of their medical benefits, which contribute to improved health and lowered medical expenses.

Each medical plan has a core set of clinical programs embedded in the offering, with additional services available depending on offering type (risk-based or self-funded), line of business (e.g., small business, key accounts, public sector, national accounts or individuals) and clinical need. UnitedHealthcare Employer & Individual's clinical programs include:

- wellness programs;
- decision support;

- utilization management;
- case and disease management;
- complex condition management;
- on-site programs, including biometrics and flu shots;
- incentives to reinforce positive behavior change;
- mental health/substance use disorder management; and
- employee assistance programs.

UnitedHealthcare Employer & Individual's comprehensive and integrated pharmaceutical care services promote lower costs by using formulary programs to produce better unit costs, encouraging consumers to use drugs that offer improved value and outcomes, helping consumers take actions to improve their health and supporting the appropriate use of drugs based on clinical evidence through physician and consumer education programs.

Specialty Offerings. UnitedHealthcare Employer & Individual also delivers dental, vision, life, critical illness and disability product offerings through an integrated approach, including a network of more than 20,000 vision offices and more than 80,000 dental offices, in private and retail settings.

UnitedHealthcare Military & Veterans. UnitedHealthcare Military & Veterans is the provider of health care services for nearly 3 million active duty and retired military service members and their families in 21 states under the Department of Defense's (DoD) TRICARE Managed Care Support contract. The contract that began on April 1, 2013 is scheduled to conclude in 2017 and has not been renewed.

UnitedHealthcare Medicare & Retirement

UnitedHealthcare Medicare & Retirement provides health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services, as well as services dealing with chronic disease and other specialized issues common among older individuals. UnitedHealthcare Medicare & Retirement is fully dedicated to serving this growing senior market segment, providing products and services in all 50 states, the District of Columbia and most U.S. territories. UnitedHealthcare Medicare & Retirement has distinct pricing, underwriting, clinical program management and marketing capabilities dedicated to health products and services in this market.

UnitedHealthcare Medicare & Retirement offers a selection of products that allow people to obtain the health coverage and services they need as their circumstances change. UnitedHealthcare Medicare & Retirement is positioned to serve seniors who find that affordable, network-based care provided through Medicare Advantage plans meets their unique health care needs. For those who prefer traditional fee-for-service Medicare, UnitedHealthcare Medicare & Retirement offers both Medicare Supplement and Medicare Prescription Drug Benefit (Medicare Part D) prescription drug programs that supplement their government-sponsored Medicare by providing additional benefits and coverage options. Beneficiaries with special needs are served through UnitedHealthcare Medicare & Retirement Dual, Chronic and Institutional Special Needs Plans (SNPs) in many markets. UnitedHealthcare Medicare & Retirement services include care management and clinical management programs, a nurse health line service, 24-hour access to health care information, access to discounted health services from a network of care providers and administrative services.

UnitedHealthcare Medicare & Retirement has extensive distribution capabilities and experience, including direct marketing to consumers on behalf of its key clients: AARP, the nation's largest membership organization dedicated to the needs of people age 50 and over, and state and U.S. government agencies. Products are also offered through employer groups and agent channels.

UnitedHealthcare Medicare & Retirement's major product categories include:

Medicare Advantage. UnitedHealthcare Medicare & Retirement provides health care coverage for seniors and other eligible Medicare beneficiaries primarily through the Medicare Advantage program administered by CMS, including Medicare Advantage HMO plans, preferred provider organization (PPO) plans, Point-of-Service plans, Private-Fee-for-Service plans and SNPs. Under the Medicare Advantage program, UnitedHealthcare Medicare & Retirement provides health insurance coverage in exchange for a fixed monthly premium per member from CMS plus, in some cases, monthly consumer premiums. Premium amounts received from CMS vary based on the geographic areas in which members reside; demographic factors such as age, gender and institutionalized status; and the health status of the individual. Medicare Advantage plans are designed to compete at the local level, taking into account member and care provider preferences, competitor offerings, our quality and cost initiatives, our historical financial results and the long-term payment rate outlook for each geographic area. UnitedHealthcare Medicare & Retirement served 3.6 million people through its Medicare Advantage products as of December 31, 2016.

Built on more than 20 years of experience, UnitedHealthcare Medicare & Retirement's senior-focused care management model operates at a medical cost level below that of traditional Medicare, while helping seniors live healthier lives. Through UnitedHealth Group's HouseCalls program, nurse practitioners performed more than 1 million in-home preventative care visits in 2016 to address unmet care opportunities and close gaps in care. For high-risk patients in certain care settings and programs, UnitedHealthcare Medicare & Retirement uses proprietary, automated medical record software that enables clinical care teams to capture and track patient data and clinical encounters, creating a comprehensive set of care information that bridges across home, hospital and nursing home care settings. Proprietary predictive modeling tools help identify members at high risk and allow care managers to reach out to those members and create individualized care plans that help them obtain the right care, in the right place, at the right time.

Medicare Part D. UnitedHealthcare Medicare & Retirement provides Medicare Part D benefits to beneficiaries throughout the United States and its territories through its Medicare Advantage and stand-alone Medicare Part D plans. The stand-alone Medicare Part D plans address a large spectrum of beneficiaries' needs and preferences for their prescription drug coverage, including low cost prescription options. Each of the plans includes the majority of the drugs covered by Medicare and provides varying levels of coverage to meet the diverse needs of Medicare beneficiaries. As of December 31, 2016, UnitedHealthcare enrolled 8.6 million people in the Medicare Part D programs, including 4.9 million individuals in the stand-alone Medicare Part D plans with the remainder in Medicare Advantage plans incorporating Medicare Part D coverage.

Medicare Supplement. UnitedHealthcare Medicare & Retirement is currently serving 4.7 million seniors nationwide through various Medicare Supplement products in association with AARP. UnitedHealthcare Medicare & Retirement offers a full range of supplemental products at diverse price points. These products cover the various levels of coinsurance and deductible gaps that seniors are exposed to in the traditional Medicare program.

Premium revenues from the Centers for Medicare & Medicaid Services (CMS) represented 25% of UnitedHealth Group's total consolidated revenues for the year ended December 31, 2016, most of which were generated by UnitedHealthcare Medicare & Retirement.

UnitedHealthcare Community & State

UnitedHealthcare Community & State is dedicated to serving state programs that care for the economically disadvantaged, the medically underserved and those without the benefit of employer-funded health care coverage, in exchange for a monthly premium per member from the state program. In some cases, these premiums are subject to experience or risk adjustments. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, Children's Health Insurance Programs (CHIP), SNPs, integrated Medicare-Medicaid plans (MMP) and other federal, state and community health care programs. As of December 31, 2016,

UnitedHealthcare Community & State participated in programs in 24 states and the District of Columbia, and served 5.9 million beneficiaries. The Affordable Care Act provided for optional Medicaid expansion effective January 1, 2014. As of December 31, 2016, UnitedHealthcare Community & State served more than 1 million people through Medicaid expansion programs in 15 states.

States using managed care services for Medicaid beneficiaries select health plans by using a formal bid process or by awarding individual contracts. A number of factors are considered by UnitedHealthcare Community & State when choosing programs for participation, including the state's commitment and consistency of support for its Medicaid managed care program in terms of service, innovation and funding; the eligible population base, both immediate and long term; and the structure of the projected program. UnitedHealthcare Community & State works with its state customers to advocate for actuarially sound rates that are commensurate with medical cost trends.

The primary categories of eligibility for the programs served by UnitedHealthcare Community & State and its participation are:

- Temporary Assistance to Needy Families, primarily women and children – 22 markets;
- CHIP – 21 markets;
- Aged, Blind and Disabled – 20 markets;
- SNP – 15 markets;
- Medicaid Expansion – 15 markets;
- Long-Term Services and Supports – 12 markets;
- childless adult programs for the uninsured – 2 markets;
- other programs (e.g., developmentally disabled, rehabilitative services) – 5 markets; and
- MMP – 2 markets.

These health plans and care programs offered are designed to address the complex needs of the populations they serve, including the chronically ill, those with disabilities and people with a higher risk of medical, behavioral and social conditions. UnitedHealthcare Community & State administers benefits for the unique needs of children, pregnant women, adults, seniors and those who are institutionalized or are nursing home eligible. These individuals often live in areas that are medically underserved and are less likely to have a consistent relationship with the medical community or a care provider. These individuals also tend to face significant social and economic challenges.

UnitedHealthcare Community & State leverages the national capabilities of UnitedHealth Group locally, supporting effective care management, strong regulatory partnerships, greater administrative efficiency, improved clinical outcomes and the ability to adapt to a changing national and local market environment. UnitedHealthcare Community & State coordinates resources among family, physicians, other health care providers, and government and community-based agencies and organizations to facilitate continuous and effective care.

Approximately 75% of the people in state Medicaid programs are served by managed care, but this population represents only 40% of total Medicaid spending. UnitedHealthcare Community & State's business development opportunities include entering fee-for-service markets converting to managed care, which represents a population of nearly 8 million people; and growing in existing managed care markets, including state-carve-ins of populations with more complex needs requiring more sophisticated models of care. This expansion includes integrated management of physical, behavioral, long-term care services and supports and social services by applying strong data analytics and community-based collaboration.

UnitedHealthcare Community & State continues to evolve its clinical model to enhance quality and the clinical experience for the people it serves. The model allows UnitedHealthcare Community & State to quickly identify the people who could benefit most from more highly coordinated care; typically, the 5% of members who are most at risk and drive over 50% of states' medical costs.

UnitedHealthcare Global

UnitedHealthcare Global participates in international markets through national "in country" and cross-border strategic approaches. UnitedHealthcare Global's cross-border health care business provides comprehensive health benefits, care management and care delivery for multinational employers, governments and individuals around the world. UnitedHealthcare Global's goal is to create health care business solutions that are based on local expertise, infrastructure, culture and needs. As of December 31, 2016, UnitedHealthcare Global provided medical benefits to 4.2 million people, principally in Brazil, but also residing in more than 125 other countries.

UnitedHealthcare Brazil. UnitedHealthcare Brazil provides medical and dental benefits to nearly 6 million people. UnitedHealthcare Brazil owns and operates more than 40 acute hospitals and more than 50 specialty, primary care and emergency services clinics across Brazil, principally for the benefit of its members. UnitedHealthcare Brazil's patients are also treated in its contracted provider network of nearly 22,000 physicians and other health care professionals, approximately 1,900 hospitals and nearly 7,000 laboratories and diagnostic imaging centers. UnitedHealthcare Brazil offers a diversified product portfolio with a wide range of product offerings, benefit designs, price points and value, including indemnity products. UnitedHealthcare Brazil's products include various administrative services such as network access and administration, care management and personal health services and claims processing.

Other Global Offerings. UnitedHealthcare Global includes other diversified global health services with a variety of offerings for international customers, including:

- network access and care coordination in the United States and overseas;
- TPA products and services for health plans and TPAs;
- brokerage services;
- practice management services for care providers;
- government and corporate consulting services for improving quality and efficiency; and
- global expatriate insurance solutions.

Optum

Optum is a health services business serving the broad health care marketplace, including:

- Those who need care: the consumers who need the right support, information, resources and products to achieve their health goals.
- Those who provide care: pharmacies, hospitals, physicians, practices and other health care facilities seeking to modernize the health system and support the best possible patient care and experiences.
- Those who pay for care: employers, health plans, and state, federal and municipal agencies devoted to ensuring the populations they sponsor receive high-quality care, administered and delivered efficiently and effectively.
- Those who innovate for care: global life sciences organizations dedicated to developing more effective approaches to care, enabling technologies and medicines that improve care delivery and health outcomes.

Optum operates three reportable segments leveraging distinctive capabilities in data and analytics, pharmacy care services, population health, health care delivery and health care operations:

- OptumHealth focuses on care delivery, care management, wellness and consumer engagement, and health financial services;
- OptumInsight specializes in data and analytics and other health care information technology services, and delivers operational services and support; and
- OptumRx provides pharmacy care services.

OptumHealth

OptumHealth is a diversified health and wellness business serving the physical, emotional and health-related financial needs of 83 million unique individuals. OptumHealth enables population health management through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth products and services deliver value by improving quality and patient satisfaction while lowering cost. OptumHealth builds high-performing networks and centers of excellence across the care continuum, by working directly with physicians to advance population health management and by coordinating care for the most medically complex patients.

OptumHealth offers its products on a risk basis, where it assumes responsibility for health care costs in exchange for a monthly premium per individual served, on an administrative fee basis, under which it manages or administers delivery of the products or services in exchange for a fixed monthly fee per individual served, or on a fee-for-service basis, where it delivers medical services to patients in exchange for a contracted fee. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds.

OptumHealth sells its products primarily through its direct sales force, strategic collaborations and external producers in three markets: employers (which includes the sub-markets of large, mid-sized and small employers), payers (which includes the sub-markets of health plans, TPAs, underwriter/stop-loss carriers and individual market intermediaries) and government entities (which includes states, CMS, DoD, the Veterans Administration and other federal procurement agencies).

OptumHealth serves patients and care providers through its local ambulatory care services business and delivers care through a physician-led, patient-centric and data-driven organization comprised of over 20,000 employed, managed and contracted physicians. OptumHealth also enables care providers' transition from traditional, fee-for-service care delivery to performance-based delivery and payment models that put patient health and outcomes first, such as those emerging through accountable care organizations (ACOs) and local care provider partnerships. Through OptumHealth's strategic partnerships, alliances and ownership arrangements it helps care providers adopt new approaches and technologies that improve the coordination of care across all providers involved in patient care.

MedExpress' nearly 200 neighborhood care centers provide urgent and walk-in care services with a consumer-friendly approach.

The HouseCalls program provides in-home health assessments that engage individuals, understand their health status and needs, and close gaps in care. In 2016, HouseCalls conducted more than 1 million in-home health assessments.

OptumHealth's mobile care delivery business delivers occupational health and medical services to government customers, with a particular focus on the U.S. military.

OptumHealth serves people through population health management services that meet both the preventative care and health intervention needs of consumers across the care continuum — physical health and wellness, mental health, complex medical conditions, disease management, hospitalization and post-acute care. This includes offering access to proprietary networks of provider specialists in many clinical specialties, including behavioral health, organ transplant, chiropractic and physical therapy. OptumHealth engages consumers in managing their health, including guidance, tools and programs that help them achieve their health goals and maintain healthy lifestyles.

Optum Financial Services, through Optum Bank, a wholly-owned subsidiary, serves consumers through over 4.6 million health savings and other accounts with $7 billion in assets under management as of December 31,

2016. During 2016, Optum Bank processed over $100 billion in medical payments to physicians and other health care providers. Organizations across the health system rely on Optum to manage and improve payment flows through its highly automated, scalable, electronic payment systems.

OptumInsight

OptumInsight provides services, technology and health care expertise to major participants in the health care industry. OptumInsight's capabilities are focused on data and analytics, technology and information that help improve the quality of care and drive greater efficiency in the health care system. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.

Many of OptumInsight's software and information products and professional services are delivered over extended periods, often several years. OptumInsight maintains an order backlog to track unearned revenues under these long-term arrangements. The backlog consists of estimated revenue from signed contracts, other legally binding agreements and anticipated contract renewals based on historical experience with OptumInsight's customers. OptumInsight's aggregate backlog at December 31, 2016, was $12.6 billion, of which $6.9 billion is expected to be realized within the next 12 months. This includes $4.5 billion related to intersegment agreements, all of which are in the current portion of the backlog. OptumInsight's aggregate backlog at December 31, 2015, was $10.4 billion. OptumInsight cannot provide any assurance that it will be able to realize all of the revenues included in the backlog due to uncertainties with regard to the timing and scope of services and the potential for cancellation, non-renewal or early termination of service arrangements.

OptumInsight's products and services are sold primarily through a direct sales force. OptumInsight's products are also supported and distributed through an array of alliances and business partnerships with other technology vendors, who integrate and interface OptumInsight's products with their applications.

OptumInsight believes it is well positioned to address the needs of four primary market segments: care providers (e.g., physicians and hospital systems), health plans, governments and life sciences companies.

Care Providers. Serving more than four out of five U.S. hospitals and tens of thousands of physicians, OptumInsight assists care providers in meeting their challenge to improve patient outcomes and care amid changing payment models and pressures. OptumInsight brings a broad array of solutions to help care providers meet these challenges, with particular focus on clinical performance and quality improvement, population health management, data management and analytics, revenue management, cost containment, compliance, cloud-enabled collaboration and consumer engagement.

Health Plans. OptumInsight serves approximately 300 health plans through cost-effective, technology-enabled solutions that help them improve efficiency, understand and optimize growth while managing risk, deliver on clinical performance and compliance goals, and build and manage strong networks of care.

Governments. OptumInsight provides services tailored to government payers, including data and analytics technology, claims management and payment accuracy services, and strategic consulting.

Life Sciences. OptumInsight provides services to global life sciences companies. These companies look to OptumInsight for data, analytics and expertise in core areas of health economics and outcomes research, market access consulting, integrated clinical and health care claims data and informatics services, epidemiology and drug safety, and patient reported outcomes.

OptumRx

OptumRx provides a full spectrum of pharmacy care services to more than 65 million people in the United States through its network of more than 67,000 retail pharmacies and multiple home delivery facilities throughout the country. In 2016, OptumRx managed more than $80 billion in pharmaceutical spending, including more than $30 billion in specialty pharmaceutical spending. OptumRx provides retail network contracting, purchasing and clinical capabilities and works with customers to develop an optimal set of programs in areas such as step therapy, formulary management, drug adherence and disease/drug therapy management to achieve a high-quality, low-cost pharmacy offering. OptumRx's comprehensive whole-person approach to pharmacy care services integrates demographic, medical, laboratory, pharmaceutical and other clinical data and applies analytics to drive clinical care insight to support care treatments and compliance, benefiting clients and individuals through enhanced services and cost trend management.

OptumRx provides pharmacy care services to non-affiliated clients, including a number of health plans, large national employer plans, unions and trusts and government entities; as well as a substantial majority of UnitedHealthcare members. Additionally, OptumRx manages specialty pharmacy care services, including patient support and clinical programs designed to ensure quality and deliver value for consumers. OptumRx's distribution system consists primarily of health insurance brokers and other health care consultants and direct sales.

GOVERNMENT REGULATION

Most of our health and well-being businesses are subject to comprehensive federal, state and international laws and regulations. We are regulated by federal, state and international regulatory agencies that generally have discretion to issue regulations and interpret and enforce laws and rules. The regulations can vary significantly from jurisdiction to jurisdiction and the interpretation of existing laws and rules also may change periodically. Domestic and international governments continue to enact and consider various legislative and regulatory proposals that could materially impact certain aspects of the health care system. New laws, regulations and rules, or changes in the interpretation of existing laws, regulations and rules, including as a result of changes in the political climate, could adversely affect our business.

If we fail to comply with, or fail to respond quickly and appropriately to changes in, applicable laws, regulations and rules, our business, results of operations, financial position and cash flows could be materially and adversely affected. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to our compliance with federal, state and international laws and regulations.

Federal Laws and Regulation

We are subject to various levels of U.S. federal regulation. For example, when we contract with the federal government, we are subject to federal laws and regulations relating to the award, administration and performance of U.S. government contracts. CMS regulates our UnitedHealthcare businesses and certain aspects of our Optum businesses. Payments by CMS to our businesses are subject to regulations, including those governing fee-for-service and the submission of information relating to the health status of enrollees for purposes of determining the amounts of certain payments to us. CMS also has the right to audit our performance to determine our compliance with CMS contracts and regulations and the quality of care we provide to Medicare beneficiaries. Our commercial business is further subject to CMS audits related to medical loss ratios (MLRs), risk adjustment and reinsurance data.

UnitedHealthcare Community & State has Medicaid and CHIP contracts that are subject to federal regulations regarding services to be provided to Medicaid enrollees, payment for those services and other aspects of these programs. There are many regulations affecting Medicare and Medicaid compliance and the regulatory environment with respect to these programs is complex. We are also subject to federal law and regulations

relating to the administration of contracts with federal agencies. Our business is also subject to laws and regulations relating to consumer protection, anti-fraud and abuse, anti-kickbacks, false claims, prohibited referrals, inappropriately reducing or limiting health care services, anti-money laundering, securities and antitrust.

Affordable Care Act. The ACA expanded access to coverage and modified aspects of the commercial insurance market, as well as the Medicaid and Medicare programs, CHIP and other aspects of the health care system.

Among other requirements, the ACA expanded dependent coverage to age 26, expanded benefit requirements, eliminated certain annual and lifetime maximum limits, eliminated certain pre-existing condition limits, required coverage for preventative services without cost to members, required premium rebates if certain MLRs are not satisfied, granted members new and additional appeal rights, created new premium rate review processes, established a system of state and federal exchanges through which consumers can purchase health coverage, imposed new requirements on the format and content of communications (such as explanations of benefits) between health insurers and their members, introduced new risk sharing programs, reduced the Medicare Part D coverage gap and reduced payments to private plans offering Medicare Advantage.

The ACA is affecting how we do business and could impact our results of operations, financial position and cash flows. See also Part I, Item 1A, “Risk Factors” for a discussion of the risks related to the ACA and related matters.

Privacy, Security and Data Standards Regulation. The administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996, as amended (HIPAA), apply to both the group and individual health insurance markets, including self-funded employee benefit plans. Federal regulations related to HIPAA contain minimum standards for electronic transactions and code sets and for the privacy and security of protected health information.

The Health Information Technology for Economic and Clinical Health Act (HITECH) imposed requirements on uses and disclosures of health information; included contracting requirements for HIPAA business associate agreements; extended parts of HIPAA privacy and security provisions to business associates; added federal data breach notification requirements for covered entities and business associates and reporting requirements to the U.S. Department of Health and Human Services (HHS) and the Federal Trade Commission and, in some cases, to the local media; strengthened enforcement and imposed higher financial penalties for HIPAA violations and, in certain cases, imposed criminal penalties for individuals, including employees. In the conduct of our business, depending on the circumstances, we may act as either a covered entity or a business associate. Federal consumer protection laws may also apply in some instances to privacy and security practices related to personally identifiable information.

The use and disclosure of individually identifiable health data by our businesses is also regulated in some instances by other federal laws, including the Gramm-Leach-Bliley Act (GLBA) or state statutes implementing GLBA. These federal laws and state statutes generally require insurers to provide customers with notice regarding how their non-public personal health and financial information is used and the opportunity to “opt out” of certain disclosures before the insurer shares such information with a third party, and generally require safeguards for the protection of personal information. Neither the GLBA nor HIPAA privacy regulations preempt more stringent state laws and regulations that may apply to us, as discussed below.

ERISA. The Employee Retirement Income Security Act of 1974, as amended (ERISA), regulates how our services are provided to or through certain types of employer-sponsored health benefit plans. ERISA is a set of laws and regulations that is subject to periodic interpretation by the U.S. Department of Labor (DOL) as well as the federal courts. ERISA sets forth standards on how our business units may do business with employers who sponsor employee health benefit plans, particularly those that maintain self-funded plans. Regulations established by the DOL subject us to additional requirements for claims payment and member appeals under health care plans governed by ERISA.

State Laws and Regulation

Health Care Regulation. Our insurance and HMO subsidiaries must be licensed by the jurisdictions in which they conduct business. All of the states in which our subsidiaries offer insurance and HMO products regulate those products and operations. The states require periodic financial reports and establish minimum capital or restricted cash reserve requirements. The National Association of Insurance Commissioners has adopted model regulations that, where implemented by states, require expanded governance practices and risk and solvency assessment reporting. Most states have adopted these or similar measures to expand the scope of regulations relating to corporate governance and internal control activities of HMOs and insurance companies. We are required to maintain a risk management framework and file a confidential self-assessment report with state insurance regulators. Reports are filed annually with Connecticut, our lead regulator, and with New York, as required by that state's regulation. Certain states have also adopted their own regulations for minimum MLRs with which health plans must comply. In addition, a number of state legislatures have enacted or are contemplating significant reforms of their health insurance markets, either independent of or to comply with or be eligible for grants or other incentives in connection with the ACA, which may affect our operations and our financial results.

Health plans and insurance companies are regulated under state insurance holding company regulations. Such regulations generally require registration with applicable state departments of insurance and the filing of reports that describe capital structure, ownership, financial condition, certain intercompany transactions and general business operations. Most state insurance holding company laws and regulations require prior regulatory approval of acquisitions and material intercompany transfers of assets, as well as transactions between the regulated companies and their parent holding companies or affiliates. These laws may restrict the ability of our regulated subsidiaries to pay dividends to our holding companies.

Some of our business activity is subject to other health care-related regulations and requirements, including PPO, Managed Care Organization (MCO), utilization review (UR), TPA, pharmacy care services, durable medical equipment or care provider-related regulations and licensure requirements. These regulations differ from state to state and may contain network, contracting, product and rate, licensing and financial and reporting requirements. There are laws and regulations that set specific standards for delivery of services, appeals, grievances and payment of claims, adequacy of health care professional networks, fraud prevention, protection of consumer health information, pricing and underwriting practices and covered benefits and services. State health care anti-fraud and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical services and improper marketing. Certain of our businesses are subject to state general agent, broker and sales distributions laws and regulations. UnitedHealthcare Community & State and certain of our Optum businesses are subject to regulation by state Medicaid agencies that oversee the provision of benefits to our Medicaid and CHIP beneficiaries and to our dually eligible (for Medicare and Medicaid) beneficiaries. We also contract with state governmental entities and are subject to state laws and regulations relating to the award, administration and performance of state government contracts.

Guaranty Fund Assessments. Under state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. Some states have similar laws relating to HMOs and other payers such as consumer operated and oriented plans (co-ops) established under the ACA. Assessments are generally based on a formula relating to our premiums in the state compared to the premiums of other insurers and could be spread out over a period of years. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets or through premiums. Any such assessment could expose our insurance entities and other insurers to the risk of paying a portion of an impaired or insolvent insurance company's claims through state guaranty associations.

Pharmacy Regulation. OptumRx's businesses include home delivery and specialty pharmacies that must be licensed as pharmacies in the states in which they are located. Certain of our home delivery and specialty pharmacies must also register with the U.S. Drug Enforcement Administration (DEA) and individual state controlled substance authorities to dispense controlled substances. In addition to the laws and regulations in the

states where our home delivery and specialty pharmacies are located, laws and regulations in non-resident states where we deliver pharmaceuticals may also apply, including the requirement to register with the board of pharmacy in the non-resident state. These non-resident states generally expect our home delivery and specialty pharmacies to follow the laws of the state in which the pharmacies are located, but some states also require us to comply with the laws of that non-resident state when pharmaceuticals are delivered there. As certain of our home delivery and specialty pharmacies maintain eligibility as Medicare and state Medicaid providers, their participation in the programs requires them to comply with the applicable Medicare and Medicaid provider rules and regulations. Other laws and regulations affecting our home delivery and specialty pharmacies include federal and state statutes and regulations governing the labeling, packaging, advertising and adulteration of prescription drugs and dispensing of controlled substances. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to our pharmacy care services businesses.

State Privacy and Security Regulations. A number of states have adopted laws and regulations that may affect our privacy and security practices, such as state laws that govern the use, disclosure and protection of social security numbers and sensitive health information or that are designed to implement GLBA or protect credit card account data. State and local authorities increasingly focus on the importance of protecting individuals from identity theft, with a significant number of states enacting laws requiring businesses to notify individuals of security breaches involving personal information. State consumer protection laws may also apply to privacy and security practices related to personally identifiable information, including information related to consumers and care providers. Additionally, different approaches to state privacy and insurance regulation and varying enforcement philosophies in the different states may materially and adversely affect our ability to standardize our products and services across state lines. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to compliance with state privacy and security regulations.

Corporate Practice of Medicine and Fee-Splitting Laws. Certain of our businesses function as direct medical service providers and, as such, are subject to additional laws and regulations. Some states have corporate practice of medicine laws that prohibit specific types of entities from practicing medicine or employing physicians to practice medicine. Moreover, some states prohibit certain entities from sharing in the fees or revenues of a professional practice (fee-splitting). These prohibitions may be statutory or regulatory, or may be imposed through judicial or regulatory interpretation. The laws, regulations and interpretations in certain states have been subject to limited judicial and regulatory interpretation and are subject to change.

Consumer Protection Laws. Certain of our businesses participate in direct-to-consumer activities and are subject to regulations applicable to on-line communications and other general consumer protection laws and regulations.

Banking Regulation

Optum Bank is subject to regulation by federal banking regulators, including the Federal Deposit Insurance Corporation, which performs annual examinations to ensure that the bank is operating in accordance with federal safety and soundness requirements, and the Consumer Financial Protection Bureau, which may perform periodic examinations to ensure that the bank is in compliance with applicable consumer protection statutes, regulations and agency guidelines. Optum Bank is also subject to supervision and regulation by the Utah State Department of Financial Institutions, which carries out annual examinations to ensure that the bank is operating in accordance with state safety and soundness requirements and performs periodic examinations of the bank's compliance with applicable state banking statutes, regulations and agency guidelines. In the event of unfavorable examination results from any of these agencies, the bank could become subject to increased operational expenses and capital requirements, enhanced governmental oversight and monetary penalties.

International Regulation

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes vary from jurisdiction to jurisdiction. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the Foreign Corrupt Practices Act (FCPA), which prohibits offering,

promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage.

COMPETITION

As a diversified health and well-being services company, we operate in highly competitive markets. Our competitors include managed health care companies, insurance companies, HMOs, TPAs and business services outsourcing companies, health care professionals that have formed networks to contract directly with employers or with CMS, specialty benefit providers, government entities, population health management companies and various health information and consulting companies. For our UnitedHealthcare businesses, our competitors include Aetna Inc., Anthem, Inc., Centene Corporation, Cigna Corporation, Humana Inc., Kaiser Permanente, numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross Blue Shield Association and, with respect to our Brazilian operations, several established competitors in Brazil and other enterprises that serve more limited geographic areas. For our OptumRx businesses, our competitors include CVS Health Corporation, Express Scripts, Inc. and Prime Therapeutics LLC. New entrants into the markets in which we compete, as well as consolidation within these markets, also contribute to a competitive environment. We compete on the basis of the sales, marketing and pricing of our products and services; product innovation; consumer engagement and satisfaction; the level and quality of products and services; care delivery; network and clinical management capabilities; market share; product distribution systems; efficiency of administration operations; financial strength; and marketplace reputation. If we fail to compete effectively to maintain or increase our market share, including by maintaining or increasing enrollments in businesses providing health benefits, our results of operations, financial position and cash flows could be materially and adversely affected. See Part I, Item 1A, “Risk Factors,” for additional discussion of our risks related to competition.

INTELLECTUAL PROPERTY RIGHTS

We have obtained trademark registration for the UnitedHealth Group, UnitedHealthcare and Optum names and logos. We own registrations for certain of our other trademarks in the United States and abroad. We hold a portfolio of patents and have patent applications pending from time to time. We are not substantially dependent on any single patent or group of related patents.

Unless otherwise noted, trademarks appearing in this report are trademarks owned by us. We disclaim any proprietary interest in the marks and names of others.

EMPLOYEES

As of December 31, 2016, we employed more than 230,000 individuals.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following sets forth certain information regarding our executive officers as of February 8, 2017, including the business experience of each executive officer during the past five years:

Name	Age	Position
Stephen J. Hemsley	64	Chief Executive Officer
David S. Wichmann	54	President
Larry C. Renfro	63	Vice Chairman of UnitedHealth Group and Chief Executive Officer of Optum
John F. Rex	54	Executive Vice President and Chief Financial Officer
Thomas E. Roos	44	Senior Vice President and Chief Accounting Officer
Marianne D. Short	65	Executive Vice President and Chief Legal Officer
D. Ellen Wilson	59	Executive Vice President, Human Capital

Our Board of Directors elects executive officers annually. Our executive officers serve until their successors are duly elected and qualified, or until their earlier death, resignation, removal or disqualification.

Mr. Hemsley is Chief Executive Officer of UnitedHealth Group, has served in that capacity since November 2006, and has been a member of the Board of Directors since February 2000. From May 1999 to November 2014, Mr. Hemsley also served as President of UnitedHealth Group.

Mr. Wichmann is President of UnitedHealth Group. Mr. Wichmann has served as President of UnitedHealth Group since November 2014. From January 2011 to June 2016, Mr. Wichmann also served as Chief Financial Officer. From April 2008 to November 2014, Mr. Wichmann also served as Executive Vice President of UnitedHealth Group and President of UnitedHealth Group Operations.

Mr. Renfro is Vice Chairman of UnitedHealth Group and Chief Executive Officer of Optum. Mr. Renfro has served as Vice Chairman of UnitedHealth Group since November 2014 and Chief Executive Officer of Optum since July 2011. From January 2011 to July 2011, Mr. Renfro served as Executive Vice President of UnitedHealth Group.

Mr. Rex is Executive Vice President and Chief Financial Officer of UnitedHealth Group and has served in that capacity since June 2016. From March 2012 to June 2016, Mr. Rex served as Executive Vice President and Chief Financial Officer of Optum. Prior to joining Optum in 2012, Mr. Rex spent over a decade at JP Morgan, a global financial services firm, and its predecessors, concluding his tenure as a Managing Director.

Mr. Roos is Senior Vice President and Chief Accounting Officer of UnitedHealth Group and has served in that capacity since August 2015. Prior to joining UnitedHealth Group, Mr. Roos was a Partner at Deloitte & Touche LLP, an independent registered accounting firm, from September 2007 to August 2015.

Ms. Short is Executive Vice President and Chief Legal Officer of UnitedHealth Group and has served in that capacity since January 2013. Prior to joining UnitedHealth Group, Ms. Short served as the Managing Partner at Dorsey & Whitney LLP, an international law firm, from January 2007 to December 2012.

Ms. Wilson is Executive Vice President, Human Capital of UnitedHealth Group and has served in that capacity since June 2013. From January 2012 to May 2013, Ms. Wilson served as Chief Administrative Officer of Optum. Prior to joining Optum, Ms. Wilson served for 17 years at Fidelity Investments concluding her tenure there as head of Human Resources.

Additional Information

UnitedHealth Group Incorporated was incorporated in January 1977 in Minnesota. On July 1, 2015, UnitedHealth Group Incorporated changed its state of incorporation from Minnesota to Delaware pursuant to a plan of conversion. Our executive offices are located at UnitedHealth Group Center, 9900 Bren Road East, Minnetonka, Minnesota 55343; our telephone number is (952) 936-1300.

You can access our website at *www.unitedhealthgroup.com* to learn more about our Company. From that site, you can download and print copies of our annual reports to shareholders, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, along with amendments to those reports. You can also download from our website our certificate of incorporation, bylaws and corporate governance policies, including our Principles of Governance, Board of Directors Committee Charters and Code of Conduct. We make periodic reports and amendments available, free of charge, as soon as reasonably practicable after we file or furnish these reports to the Securities and Exchange Commission (SEC). We will also provide a copy of any of our corporate governance policies published on our website free of charge, upon request. To request a copy of any of these documents, please submit your request to: UnitedHealth Group Incorporated, 9900 Bren Road East, Minnetonka, MN 55343, Attn: Corporate Secretary. Information on or linked to our website is neither part of nor incorporated by reference into this Annual Report on Form 10-K or any other SEC filings.

Our transfer agent, Wells Fargo Shareowner Services, can help you with a variety of shareholder-related services, including change of address, lost stock certificates, transfer of stock to another person and other administrative services. You can write to our transfer agent at: Wells Fargo Shareowner Services, P.O. Box 64854, St. Paul, Minnesota 55164-0854, email *stocktransfer@wellsfargo.com*, or telephone (800) 468-9716 or (651) 450-4064.

ITEM 1A. RISK FACTORS

CAUTIONARY STATEMENTS

The statements, estimates, projections or outlook contained in this Annual Report on Form 10-K include forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). When used in this Annual Report on Form 10-K and in future filings by us with the SEC, in our news releases, presentations to securities analysts or investors, and in oral statements made by or with the approval of one of our executive officers, the words "believe," "expect," "intend," "estimate," "anticipate," "forecast," "outlook," "plan," "project," "should" or similar words or phrases are intended to identify such forward-looking statements. These statements are intended to take advantage of the "safe harbor" provisions of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. Any forward-looking statement speaks only as of the date of this report and, except as required by law; we undertake no obligation to update any forward-looking statement to reflect events or circumstances, including unanticipated events, after the date of this report.

The following discussion contains cautionary statements regarding our business that investors and others should consider. We do not undertake to address in future filings or communications regarding our business or results of operations how any of these factors may have caused our results to differ from discussions or information contained in previous filings or communications. In addition, any of the matters discussed below may have affected past, as well as current, forward-looking statements about future results. Any or all forward-looking statements in this Annual Report on Form 10-K and in any other public filings or statements we make may turn out to be wrong. Our forward-looking statements can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. Many factors discussed below will be important in determining our future results. By their nature, forward-looking statements are not guarantees of future performance or results and are subject to risks, uncertainties and assumptions that are difficult to predict or quantify.

If we fail to estimate, price for and manage our medical costs in an effective manner, the profitability of our risk-based products and services could decline and could materially and adversely affect our results of operations, financial position and cash flows.

Through our risk-based benefit products, we assume the risk of both medical and administrative costs for our customers in return for monthly premiums. Premium revenues from risk-based benefits products comprise nearly 80% of our total consolidated revenues. We generally use approximately 80% to 85% of our premium revenues to pay the costs of health care services delivered to these customers. The profitability of our products depends in large part on our ability to predict, price for, and effectively manage medical costs. In this regard, federal and state regulatory requirements obligate our commercial, Medicare Advantage and certain state-based Medicaid health plans to maintain minimum MLRs, which could make it more difficult for us to obtain price increases for our products. In addition, our OptumHealth business negotiates capitation arrangements with commercial third-party payers. Under the typical capitation arrangement, the health care provider receives a fixed percentage of a third-party payer's premiums to cover all or a defined portion of the medical costs provided to the capitated member. If we fail to predict accurately, price for or manage the costs of providing care to our capitated members, our results of operations could be materially and adversely affected.

We manage medical costs through underwriting criteria, product design, negotiation of favorable provider contracts and care management programs. Total medical costs are affected by the number of individual services rendered, the cost of each service and the type of service rendered. Our premium revenue on commercial policies is typically at a fixed monthly rate per individual served for a 12-month period and is generally priced one to six

months before the contract commences. Our revenue on Medicare policies is based on bids submitted in June the year before the contract year. Although we base the premiums we charge and our Medicare bids on our estimates of future medical costs over the fixed contract period, many factors may cause actual costs to exceed those estimated and reflected in premiums or bids. These factors may include medical cost inflation, increased use of services, increased cost of individual services, natural catastrophes or other large-scale medical emergencies, epidemics, the introduction of new or costly drugs, treatments and technology, new mandated benefits (such as the expansion of essential benefits coverage) or other regulatory changes and insured population characteristics. Relatively small differences between predicted and actual medical costs or utilization rates as a percentage of revenues can result in significant changes in our financial results. For example, if our 2016 medical costs for commercial insured products were 1% higher, without proportionally higher revenues from such products, our annual net earnings for 2016 would have been reduced by approximately $240 million, excluding any offsetting impact from risk adjustment, reinsurance or from reduced premium rebates due to minimum MLRs.

In addition, the financial results we report for any particular period include estimates of costs that have been incurred for which claims are still outstanding. These estimates involve an extensive degree of judgment. If these estimates prove inaccurate, our results of operations could be materially and adversely affected.

Our business activities are highly regulated and new laws or regulations or changes in existing laws or regulations or their enforcement or application could materially and adversely affect our business.

We are regulated by federal, state and local governments in the United States and other countries where we do business. Our insurance and HMO subsidiaries must be licensed by and are subject to regulation in the jurisdictions in which they conduct business. For example, states require periodic financial reports and enforce minimum capital or restricted cash reserve requirements. Health plans and insurance companies are also regulated under state insurance holding company regulations and some of our activities may be subject to other health care-related regulations and requirements, including those relating to PPOs, MCOs, UR and TPA-related regulations and licensure requirements. Some of our UnitedHealthcare and Optum businesses hold or provide services related to government contracts and are subject to U.S. federal and state and non-U.S. self-referral, anti-kickback, medical necessity, risk adjustment, false claims and other laws and regulations governing government contractors and the use of government funds. In addition, under state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. Some states have similar laws relating to HMOs and other payers such as consumer operated and oriented plans (co-ops) established under the ACA. Any such assessment could expose our insurance entities and other insurers to the risk of paying a portion of an impaired or insolvent insurance company’s claims through state guaranty associations.

Certain of our businesses provide products or services to various government agencies. Our relationships with these government agencies are subject to the terms of contracts that we hold with the agencies and to laws and regulations regarding government contracts. Among others, certain laws and regulations restrict or prohibit companies from performing work for government agencies that might be viewed as an actual or potential conflict of interest. These laws may limit our ability to pursue and perform certain types of work, thereby materially and adversely affecting our results of operations, financial position and cash flows.

Certain of our Optum businesses are also subject to regulations, which are distinct from those faced by our insurance and HMO subsidiaries, including, for example, state telemedicine regulations, debt collection laws, banking regulations, distributor and producer licensing requirements, state corporate practice of medicine doctrines, fee-splitting rules, health care facility licensure and certificate of need requirements, some of which could impact our relationships with physicians, hospitals and customers. These risks and uncertainties may materially and adversely affect our ability to market our products and services, or to do so at targeted margins, or may increase the regulatory burdens under which we operate.

The laws and rules governing our business and interpretations of those laws and rules are subject to frequent change, and the integration into our businesses of entities that we acquire may affect the way in which existing

laws and rules apply to us, including subjecting us to laws and rules that did not previously apply to us. The broad latitude given to the agencies administering, interpreting and enforcing current and future regulations governing our business could force us to change how we do business, restrict revenue and enrollment growth, increase our health care and administrative costs and capital requirements, or expose us to increased liability in courts for coverage determinations, contract interpretation and other actions.

We must also obtain and maintain regulatory approvals to market many of our products and services, increase prices for certain regulated products and services and complete certain acquisitions and dispositions or integrate certain acquisitions. For example, premium rates for our health insurance and managed care products are subject to regulatory review or approval in many states and by the federal government. Additionally, we must submit data on all proposed rate increases to HHS for monitoring purposes on many of our products. Geographic and product expansions may be subject to state and federal regulatory approvals. Delays in obtaining necessary approvals or our failure to obtain or maintain adequate approvals could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses operate internationally and are subject to regulation in the jurisdictions in which they are organized or conduct business. These regulatory regimes encompass, among other matters, local and cross-border taxation, licensing, tariffs, intellectual property, investment, capital (including minimum solvency margin and reserve requirements), management control, labor, anti-fraud, anti-corruption and privacy and data protection regulations (including requirements for cross-border data transfers) that vary by jurisdiction. We currently operate outside of the United States and in the future may acquire or commence additional businesses based outside of the United States, increasing our exposure to non-U.S. regulatory regimes. For example, our UnitedHealthcare Brazil business subjects us to Brazilian laws and regulations affecting hospitals, managed care and insurance industries and to regulation by Brazilian regulators, including the national regulatory agency for private health insurance and plans, the Agência Nacional de Saúde Suplementar, whose approach to the interpretation, implementation and enforcement of industry regulations could differ from the approach taken by U.S. regulators. In addition, our non-U.S. businesses and operations are subject to U.S. laws that regulate the conduct and activities of U.S.-based businesses operating abroad, such as the FCPA, which prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage. Our failure to comply with U.S. or non-U.S. laws and regulations governing our conduct outside the United States or to establish constructive relations with non-U.S. regulators could adversely affect our ability to market our products and services, or to do so at targeted operating margins, which may have a material adverse effect on our business, financial condition and results of operations.

The health care industry is also regularly subject to negative publicity, including as a result of governmental investigations, adverse media coverage and political debate surrounding industry regulation. Negative publicity may adversely affect our stock price and damage our reputation in various markets.

The ACA could materially and adversely affect the manner in which we conduct business and our results of operations, financial position and cash flows.

Due to its complexity and continued uncertainty, the ACA's impact remains difficult to predict and could adversely affect us. The ACA includes specific reforms for the individual and small group marketplace, including guaranteed availability of coverage, adjusted community rating requirements (which include elimination of health status and gender rating factors), essential health benefit requirements (resulting in benefit changes for many members) and actuarial value requirements resulting in expanded benefits or reduced member cost sharing (or a combination of both) for many policyholders. In addition, if we do not maintain certain MLRs, we are required to rebate ratable portions of our premiums to our customers. These requirements can cause significant disruptions in local health care markets and adjustments to our business, all of which could materially and adversely affect our results of operations, financial position and cash flows.

Our results of operations, financial position and cash flows could be materially and adversely affected if the number of individuals who gain coverage under the ACA varies from our expectations, if the demand for the ACA related products and capabilities offered by our Optum businesses is less than anticipated or if our costs are greater than anticipated.

The Trump Administration and Congressional Leaders have expressed their intentions to repeal and replace the ACA. We cannot predict if the ACA will be modified, repealed or replaced, but changes to this law could materially impact our operating results, require us to revise the ways in which we conduct business or put us at risk for loss of business.

As a result of our participation in various government health care programs, both as a payer and as a service provider to payers, we are exposed to additional risks associated with program funding, enrollments, payment adjustments, audits and government investigations that could materially and adversely affect our business, results of operations, financial position and cash flows.

We participate in various federal, state and local government health care benefit programs, including as a payer in Medicare Advantage, Medicare Part D, various Medicaid programs, CHIP and our TRICARE contract with the DoD, and receive substantial revenues from these programs. Certain of our Optum businesses also provide services to payers participating in government health care programs. A reduction or less than expected increase, or a protracted delay, in government funding for these programs or change in allocation methodologies, or, as is a typical feature of many government contracts, termination of the contract at the option of the government, may materially and adversely affect our results of operations, financial position and cash flows.

The government health care programs in which we participate generally are subject to frequent changes, including changes that may reduce the number of persons enrolled or eligible for coverage, reduce the amount of reimbursement or payment levels, reduce our participation in certain service areas or markets, or increase our administrative or medical costs under such programs. Revenues for these programs depend on periodic funding from the federal government or applicable state governments and allocation of the funding through various payment mechanisms. Funding for these government programs depends on many factors outside of our control, including general economic conditions and budgetary constraints at the federal or applicable state level. For example CMS has in the past reduced or frozen Medicare Advantage benchmarks, and additional cuts to Medicare Advantage benchmarks are possible. In addition, from time to time, CMS makes changes to the way it calculates Medicare Advantage risk adjustment payments. Although we have adjusted members' benefits and premiums on a selective basis, ceased to offer benefit plans in certain counties, and intensified both our medical and operating cost management in response to the benchmark reductions and other funding pressures, these or other strategies may not fully address the funding pressures in the Medicare Advantage program. In addition, payers in the Medicare Advantage program may be subject to reductions in payments from CMS as a result of decreased funding or recoupment pursuant to government audit.

Under the Medicaid managed care program, state Medicaid agencies seek bids from eligible health plans to continue their participation in the acute care Medicaid health programs. If we are not successful in obtaining renewals of state Medicaid managed care contracts, we risk losing the members that were enrolled in those Medicaid plans. Under the Medicare Part D program, to qualify for automatic enrollment of low income members, our bids must result in an enrollee premium below a regional benchmark, which is calculated by the government after all regional bids are submitted. If the enrollee premium is not below the government benchmark, we risk losing the members who were auto-assigned to us and will not have additional members auto-assigned to us. In general, our bids are based upon certain assumptions regarding enrollment, utilization, medical costs and other factors. In the event any of these assumptions is materially incorrect, either as a result of unforeseen changes to the programs on which we bid, or submission by our competitors at lower rates than our bids, our results of operations, financial position and cash flows could be materially and adversely affected.

Many of the government health care coverage programs in which we participate are subject to the prior satisfaction of certain conditions or performance standards or benchmarks. For example, as part of the ACA,

CMS has a system that provides various quality bonus payments to Medicare Advantage plans that meet certain quality star ratings at the local plan level. The star rating system considers various measures adopted by CMS, including, among other things, quality of care, preventative services, chronic illness management and customer satisfaction. Plans must have a rating of four stars or higher to qualify for bonus payments. If we do not maintain or continue to improve our star ratings, our plans may not be eligible for quality bonuses and we may experience a negative impact on our revenues and the benefits that our plans can offer, which could materially and adversely affect our membership levels, results of operations, financial position and cash flows. In addition, under the ACA, Congress authorized CMS and the states to implement MMP managed care demonstration programs to serve dually eligible beneficiaries to improve the coordination of their care. Health plan participation in these demonstration programs is subject to CMS approval of specified care delivery models and the satisfaction of conditions to participation, including meeting certain performance requirements. Any changes in standards or care delivery models that apply to government health care programs, including Medicare, Medicaid and the MMP demonstration programs for dually eligible beneficiaries, or our inability to improve our quality scores and star ratings to meet government performance requirements or to match the performance of our competitors could result in limitations to our participation in or exclusion from these or other government programs, which in turn could materially and adversely affect our results of operations, financial position and cash flows.

CMS uses various payment mechanisms to allocate funding for Medicare programs, including adjusting monthly capitation payments to Medicare Advantage plans and Medicare Part D plans according to the predicted health status of each beneficiary as supported by data from health care providers for Medicare Advantage plans, as well as, for Medicare Part D plans, risk-sharing provisions based on a comparison of costs predicted in our annual bids to actual prescription drug costs. Some state Medicaid programs utilize a similar process. For example, our UnitedHealthcare Medicare & Retirement and UnitedHealthcare Community & State businesses submit information relating to the health status of enrollees to CMS or state agencies for purposes of determining the amount of certain payments to us. CMS and the Office of Inspector General for HHS periodically perform risk adjustment data validation (RADV) audits of selected Medicare health plans to validate the coding practices of and supporting documentation maintained by health care providers, and certain of our local plans have been selected for audit. Such audits have in the past resulted and could in the future result in retrospective adjustments to payments made to our health plans, fines, corrective action plans or other adverse action by CMS.

We have been and may in the future become involved in routine, regular and special governmental investigations, audits, reviews and assessments. Certain of our businesses have been reviewed or are currently under review, including for compliance with coding and other requirements under the Medicare risk-adjustment model, our chart review programs and related processes. Such investigations, audits or reviews sometimes arise out of or prompt claims by private litigants or whistleblowers that, among other allegations, we failed to disclose certain business practices or, as a government contractor, submitted false claims to the government. Governmental investigations, audits, reviews and assessments could lead to government actions, which could result in adverse publicity, the assessment of damages, civil or criminal fines or penalties, or other sanctions, including restrictions or changes in the way we conduct business, loss of licensure or exclusion from participation in government programs, any of which could have a material adverse effect on our business, results of operations, financial position and cash flows.

If we fail to comply with applicable privacy, security and data laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information on our behalf, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

The collection, maintenance, protection, use, transmission, disclosure and disposal of sensitive personal information are regulated at the federal, state, international and industry levels and requirements are imposed on us by contracts with customers. These laws, rules and requirements are subject to change. Compliance with new privacy and security laws, regulations and requirements may result in increased operating costs, and may constrain or require us to alter our business model or operations. For example, the HITECH amendments to

HIPAA imposed further restrictions on our ability to collect, disclose and use sensitive personal information and imposed additional compliance requirements on our business. In addition, the General Data Protection Regulation of the European Union imposes higher potential penalties and more stringent compliance and data security requirements on our ability to collect, process and transfer personal data relating to our European businesses.

Many of our businesses are also subject to the Payment Card Industry Data Security Standard, which is a multifaceted security standard that is designed to protect credit card account data as mandated by payment card industry entities.

HIPAA requires business associates as well as covered entities to comply with certain privacy and security requirements. While we provide for appropriate protections through our contracts with our third-party service providers and in certain cases assess their security controls, we have limited oversight or control over their actions and practices. Several of our businesses act as business associates to their covered entity customers and, as a result, collect, use, disclose and maintain sensitive personal information in order to provide services to these customers. HHS has announced that it will continue its audit program to assess HIPAA compliance efforts by covered entities and expand it to include business associates. An audit resulting in findings or allegations of noncompliance could have a material adverse effect on our results of operations, financial position and cash flows.

Through our Optum businesses, including our Optum Labs business, we maintain a database of administrative and clinical data that is statistically de-identified in accordance with HIPAA standards. Noncompliance or findings of noncompliance with applicable laws, regulations or requirements, or the occurrence of any privacy or security breach involving the misappropriation, loss or other unauthorized disclosure of sensitive personal information, whether by us or by one of our third-party service providers, could have a material adverse effect on our reputation and business, including mandatory disclosure to the media, loss of existing or new customers, significant increases in the cost of managing and remediating privacy or security incidents and material fines, penalties and litigation awards, among other consequences, any of which could have a material and adverse effect on our results of operations, financial position and cash flows.

Our businesses providing pharmacy care services face regulatory and operational risks and uncertainties that may differ from the risks of our other businesses.

We provide pharmacy care services through our OptumRx and UnitedHealthcare businesses. Each business is subject to federal and state anti-kickback and other laws that govern the relationships of the business with pharmaceutical manufacturers, physicians, pharmacies, customers and consumers. OptumRx also conducts business through home delivery and specialty pharmacies, which subjects it to extensive federal, state and local laws and regulations, including those of the DEA and individual state controlled substance authorities. In addition, federal and state legislatures regularly consider new regulations for the industry that could materially and adversely affect current industry practices, including potential new regulations regarding the receipt or disclosure of rebates from pharmaceutical companies, the development and use of formularies, the use of average wholesale prices or other pricing benchmarks, pricing for specialty pharmaceuticals and pharmacy network reimbursement methodologies.

Our pharmacy care services businesses would be materially and adversely affected by our inability to contract on favorable terms with pharmaceutical manufacturers and other suppliers, and could face potential claims in connection with purported errors by our home delivery or specialty pharmacies, including in connection with the risks inherent in the packaging and distribution of pharmaceuticals and other health care products. Disruptions at any of our home delivery or specialty pharmacies due to an accident or an event that is beyond our control could affect our ability to process and dispense prescriptions in a timely manner and could materially and adversely affect our results of operations, financial position and cash flows.

In addition, our pharmacy care services businesses provide services to sponsors of health benefit plans that are subject to ERISA. A private party or the DOL, which is the agency that enforces ERISA, could assert that the

fiduciary obligations imposed by the statute apply to some or all of the services provided by our pharmacy care services businesses even where our pharmacy care services businesses are not contractually obligated to assume fiduciary obligations. In the event a court were to determine that fiduciary obligations apply to our pharmacy care services businesses in connection with services for which our pharmacy care services businesses are not contractually obligated to assume fiduciary obligations, we could be subject to claims for breaches of fiduciary obligations or claims that we entered into certain prohibited transactions.

If we fail to compete effectively to maintain or increase our market share, including maintaining or increasing enrollments in businesses providing health benefits, our results of operations, financial position and cash flows could be materially and adversely affected.

Our businesses compete throughout the United States, Brazil and other foreign markets and face significant competition in all of the geographic markets in which we operate. In particular markets, our competitors, compared to us, may have greater capabilities, resources or market share; a more established reputation; superior supplier or health care professional arrangements; better existing business relationships; lower profit margin or financial return expectations; or other factors that give such competitors a competitive advantage. In addition, our competitive position may be adversely affected by significant merger and acquisition activity that has occurred in the industries in which we operate, both among our competitors and suppliers (including hospitals, physician groups and other care professionals). Consolidation may make it more difficult for us to retain or increase our customer base, improve the terms on which we do business with our suppliers, or maintain or increase profitability. Additionally, new direct-to-consumer business models from competing businesses may make it more difficult for us to directly engage consumers in the selection and management of their health care benefits, health care usage, and in the effective navigation of the health care system we may be challenged by new technologies and market entrants that could disrupt our existing relationship with health plan enrollees in these areas. Our business, results of operations, financial position and cash flows could be materially and adversely affected if we do not compete effectively in our markets, if we set rates too high or too low in highly competitive markets, if we do not design and price our products properly and competitively, if we are unable to innovate and deliver products and services that demonstrate value to our customers, if we do not provide a satisfactory level of services, if membership or demand for other services does not increase as we expect or declines, or if we lose accounts with more profitable products while retaining or increasing membership in accounts with less profitable products.

If we fail to develop and maintain satisfactory relationships with physicians, hospitals and other service providers, our business could be materially and adversely affected.

Our results of operations and prospects are substantially dependent on our continued ability to contract with physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and other service providers at competitive prices. Any failure to develop and maintain satisfactory relationships with health care providers, whether in-network or out-of-network, could materially and adversely affect our business, results of operations, financial position and cash flows. In addition, certain activities related to network design, provider participation in networks and provider payments could result in disputes that may be costly, distract managements' attention and result in negative publicity.

In any particular market, physicians and health care providers could refuse to contract, demand higher payments, or take other actions that could result in higher medical costs, less desirable products for customers or difficulty meeting regulatory or accreditation requirements. In some markets, certain health care providers, particularly hospitals, physician/hospital organizations or multi-specialty physician groups, may have significant market positions or near monopolies that could result in diminished bargaining power on our part. In addition, accountable care organizations; practice management companies (which aggregate physician practices for administrative efficiency); and other organizational structures that physicians, hospitals and other care providers choose may change the way in which these providers interact with us and may change the competitive landscape. Such organizations or groups of physicians may compete directly with us, which could adversely affect our

operations, and our results of operations, financial position and cash flows by impacting our relationships with these providers or affecting the way that we price our products and estimate our costs, which might require us to incur costs to change our operations. In addition, if these providers refuse to contract with us, use their market position to negotiate favorable contracts or place us at a competitive disadvantage, our ability to market products or to be profitable in those areas could be materially and adversely affected.

We have capitation arrangements with some physicians, hospitals and other health care providers. Capitation arrangements limit our exposure to the risk of increasing medical costs, but expose us to risk related to the adequacy of the financial and medical care resources of the health care provider. To the extent that a capitated health care provider organization faces financial difficulties or otherwise is unable to perform its obligations under the capitation arrangement, we may be held responsible for unpaid health care claims that should have been the responsibility of the capitated health care provider and for which we have already paid the provider, under the capitation arrangement. Further, payment or other disputes between a primary care provider and specialists with whom the primary care provider contracts could result in a disruption in the provision of services to our members or a reduction in the services available to our members. Health care providers with whom we contract may not properly manage the costs of services, maintain financial solvency or avoid disputes with other providers. Any of these events could have a material adverse effect on the provision of services to our members and our operations.

Some providers that render services to our members do not have contracts with us. In those cases, we do not have a pre-established understanding about the amount of compensation that is due to the provider for services rendered to our members. In some states, the amount of compensation due to these out-of-network providers is defined by law or regulation, but in most instances, the amount is either not defined or is established by a standard that does not clearly specify dollar terms. In some instances, providers may believe that they are underpaid for their services and may either litigate or arbitrate their dispute with us or try to recover from our members the difference between what we have paid them and the amount they charged us.

The success of certain businesses, including OptumHealth and UnitedHealthcare Brazil, depend on maintaining satisfactory physician employment relationships. The physicians that practice medicine or contract with our affiliated physician organizations could terminate their provider contracts or otherwise become unable or unwilling to continue practicing medicine or contracting with us. There is and will likely be heightened competition in the markets where we operate to acquire or manage physician practices or to employ or contract with individual physicians. If we are unable to maintain or grow satisfactory relationships with physicians, or to acquire, recruit or, in some instances, employ physicians, or to retain enrollees following the departure of a physician, our revenues could be materially and adversely affected. In addition, our affiliated physician organizations contract with health insurance and HMO competitors of UnitedHealthcare. Our business could suffer if our affiliated physician organizations fail to maintain relationships with these health insurance or HMO companies, or adequately price their contracts with these third-party payers.

In addition, physicians, hospitals, pharmaceutical benefit service providers, pharmaceutical manufacturers and certain health care providers are customers of our Optum businesses. Given the importance of health care providers and other constituents to our businesses, failure to maintain satisfactory relationships with them could materially and adversely affect our results of operations, financial position and cash flows.

We are routinely subject to various litigation actions due to the nature of our business, which could damage our reputation and, if resolved unfavorably, could result in substantial penalties or monetary damages and materially and adversely affect our results of operations, financial position and cash flows.

We are routinely made party to a variety of legal actions related to, among other matters, the design, management and delivery of our product and service offerings. These matters have included or could in the future include matters related to health care benefits coverage and payment claims (including disputes with enrollees, customers and contracted and non-contracted physicians, hospitals and other health care professionals), tort claims

(including claims related to the delivery of health care services, such as medical malpractice by health care practitioners who are employed by us, have contractual relationships with us, or serve as providers to our managed care networks), whistleblower claims (including claims under the False Claims Act or similar statutes), contract and labor disputes, tax claims and claims related to disclosure of certain business practices. We are also party to certain class action lawsuits brought by health care professional groups and consumers. In addition, we operate in jurisdictions outside of the United States, where contractual rights, tax positions and applicable regulations may be subject to interpretation or uncertainty to a greater degree than in the United States, and therefore subject to dispute by customers, government authorities or others. We are largely self-insured with regard to litigation risks. Although we maintain excess liability insurance with outside insurance carriers for claims in excess of our self-insurance, certain types of damages, such as punitive damages in some circumstances, are not covered by insurance. Although we record liabilities for our estimates of the probable costs resulting from self-insured matters, it is possible that the level of actual losses will significantly exceed the liabilities recorded.

We cannot predict the outcome of significant legal actions in which we are involved and are incurring expenses in resolving these matters. The legal actions we face or may face in the future could further increase our cost of doing business and materially and adversely affect our results of operations, financial position and cash flows. In addition, certain legal actions could result in adverse publicity, which could damage our reputation and materially and adversely affect our ability to retain our current business or grow our market share in some markets and businesses.

Any failure by us to manage successfully our strategic alliances or complete, manage or integrate acquisitions and other significant strategic transactions or relationships could materially and adversely affect our business, prospects, results of operations, financial position and cash flows.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, divestitures, strategic alliances, joint ventures and outsourcing transactions and often enter into agreements relating to such transactions. For example, we have a strategic alliance with AARP under which we provide AARP-branded Medicare Supplement insurance to AARP members and other AARP-branded products and services to Medicare beneficiaries. If we fail to meet the needs of our alliance or joint venture partners, including by developing additional products and services, providing high levels of service, pricing our products and services competitively or responding effectively to applicable federal and state regulatory changes, our alliances and joint ventures could be damaged or terminated, which in turn could adversely impact our reputation, business and results of operations. Further, if we fail to identify and successfully complete transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally, we may be placed at a competitive disadvantage or we may be adversely affected by negative market perceptions, any of which may have a material adverse effect on our results of operations, financial position or cash flows. Success in completing acquisitions is also dependent upon efficiently integrating the acquired business into our existing operations, including our internal control environment, or otherwise leveraging its operations, which may present challenges that are different from those presented by organic growth and that may be difficult for us to manage. If we cannot successfully integrate these acquisitions and realize contemplated revenue growth opportunities and cost savings, our business, prospects, results of operations, financial position and cash flows could be materially and adversely affected.

As we expand and operate our business outside of the United States, we are presented with challenges that differ from those presented by acquisitions of domestic businesses, including challenges in adapting to new markets, business, labor and cultural practices and regulatory environments. Adapting to these challenges could require us to devote significant senior management and other resources to the acquired businesses before we realize anticipated synergies or other benefits from the acquired businesses. These challenges vary widely by country and may include political instability, government intervention, discriminatory regulation and currency exchange controls or other restrictions that could prevent us from transferring funds from these operations out of the countries in which our acquired businesses operate or converting local currencies that we hold into U.S. dollars

or other currencies. If we are unable to manage successfully our non-U.S. acquisitions, our business, prospects, results of operations and financial position could be materially and adversely affected.

Foreign currency exchange rates and fluctuations may have an impact on our equity from period to period, which could adversely affect our debt to debt-plus-equity ratio, and our future revenues, costs and cash flows from international operations. Any measures we may implement to reduce the effect of volatile currencies may be costly or ineffective.

Our sales performance will suffer if we do not adequately attract, retain and provide support to a network of independent producers and consultants.

Our products and services are sold in part through independent producers and consultants with whom we do not have exclusive contracts and for whose services and allegiance we must compete intensely. Our sales would be materially and adversely affected if we were unable to attract, retain and support such independent producers and consultants or if our sales strategy is not appropriately aligned across distribution channels. Our relationships with producers could be materially and adversely impacted by changes in our business practices and the nature of our relationships to address these pressures, including potential reductions in commissions.

A number of investigations have been conducted regarding the marketing practices of producers selling health care products and the payments they receive and have resulted in enforcement actions against companies in our industry and producers marketing and selling those companies' products. If we were subjected to similar investigations and enforcement actions, they could result in penalties and the imposition of corrective action plans, which could materially and adversely impact our ability to market our products.

Unfavorable economic conditions could materially and adversely affect our revenues and our results of operations.

Unfavorable economic conditions may impact demand for certain of our products and services. For example, high unemployment can cause lower enrollment or lower rates of renewal in our employer group plans. Unfavorable economic conditions have also caused and could continue to cause employers to stop offering certain health care coverage as an employee benefit or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs. In addition, unfavorable economic conditions could adversely impact our ability to increase premiums or result in the cancellation by certain customers of our products and services. These conditions could lead to a decrease in our membership levels and premium and fee revenues and could materially and adversely affect our results of operations, financial position and cash flows.

During a prolonged unfavorable economic environment, state and federal budgets could be materially and adversely affected, resulting in reduced reimbursements or payments in our federal and state government health care coverage programs, including Medicare, Medicaid and CHIP. A reduction in state Medicaid reimbursement rates could be implemented retrospectively to apply to payments already negotiated or received from the government and could materially and adversely affect our results of operations, financial position and cash flows. In addition, state and federal budgetary pressures could cause the affected governments to impose new or a higher level of taxes or assessments for our commercial programs, such as premium taxes on insurance companies and HMOs and surcharges or fees on select fee-for-service and capitated medical claims. Any of these developments or actions could materially and adversely affect our results of operations, financial position and cash flows.

A prolonged unfavorable economic environment also could adversely impact the financial position of hospitals and other care providers, which could materially and adversely affect our contracted rates with these parties and increase our medical costs or materially and adversely affect their ability to purchase our service offerings. Further, unfavorable economic conditions could adversely impact the customers of our Optum businesses, including health plans, HMOs, hospitals, care providers, employers and others, which could, in turn, materially and adversely affect Optum's financial results.

Our investment portfolio may suffer losses, which could materially and adversely affect our results of operations, financial position and cash flows.

Market fluctuations could impair our profitability and capital position. Volatility in interest rates affects our interest income and the market value of our investments in debt securities of varying maturities, which constitute the vast majority of the fair value of our investments as of December 31, 2016. Relatively low interest rates on investments, such as those experienced during recent years, have adversely impacted our investment income, and the continuation of the current low interest rate environment could further adversely affect our investment income. In addition, a delay in payment of principal or interest by issuers, or defaults by issuers (primarily from investments in corporate and municipal bonds), could reduce our investment income and require us to write down the value of our investments, which could materially and adversely affect our profitability and equity.

There can be no assurance that our investments will produce total positive returns or that we will not sell investments at prices that are less than their carrying values. Changes in the value of our investment assets, as a result of interest rate fluctuations, changes in issuer financial conditions, illiquidity or otherwise, could have an adverse effect on our equity. In addition, if it became necessary for us to liquidate our investment portfolio on an accelerated basis, such an action could have a material adverse effect on our results of operations and the capital position of regulated subsidiaries.

If the value of our intangible assets is materially impaired, our results of operations, equity and credit ratings could be materially and adversely affected.

As of December 31, 2016, goodwill and other intangible assets had a carrying value of $56 billion, representing 46% of our total consolidated assets. We periodically evaluate our goodwill and other intangible assets to determine whether all or a portion of their carrying values may be impaired, in which case a charge to earnings may be necessary. The value of our goodwill may be materially and adversely impacted if businesses that we acquire perform in a manner that is inconsistent with our assumptions. In addition, from time to time we divest businesses, and any such divestiture could result in significant asset impairment and disposition charges, including those related to goodwill and other intangible assets. Any future evaluations requiring an impairment of our goodwill and other intangible assets could materially and adversely affect our results of operations and equity in the period in which the impairment occurs. A material decrease in equity could, in turn, adversely impact our credit ratings and potentially impact our compliance with the covenants in our bank credit facilities.

If we fail to maintain properly the integrity or availability of our data or successfully consolidate, integrate, upgrade or expand our existing information systems, or if our technology products do not operate as intended, our business could be materially and adversely affected.

Our ability to price adequately our products and services, to provide effective service to our customers in an efficient and uninterrupted fashion, and to report accurately our results of operations depends on the integrity of the data in our information systems. We periodically consolidate, integrate, upgrade and expand our information systems capabilities as a result of technology initiatives and recently enacted regulations, changes in our system platforms and integration of new business acquisitions. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Our information systems require an ongoing commitment of significant resources to maintain, protect and enhance existing systems and develop new systems to keep pace with continuing changes in information processing technology, evolving systems and regulatory standards and changing customer preferences. If the information we rely upon to run our businesses is found to be inaccurate or unreliable or if we fail to maintain or protect our information systems and data integrity effectively, we could lose existing customers, have difficulty attracting new customers, experience problems in determining medical cost estimates and establishing appropriate pricing, have difficulty preventing, detecting and controlling fraud, have disputes with customers, physicians and other health care professionals, become subject to regulatory sanctions or penalties, incur increases in operating expenses or suffer other adverse consequences. Our process of

consolidating the number of systems we operate, upgrading and expanding our information systems capabilities, enhancing our systems and developing new systems to keep pace with continuing changes in information processing technology may not be successful. Failure to protect, consolidate and integrate our systems successfully could result in higher than expected costs and diversion of management's time and energy, which could materially and adversely affect our results of operations, financial position and cash flows.

Certain of our businesses sell and install software products that may contain unexpected design defects or may encounter unexpected complications during installation or when used with other technologies utilized by the customer. Connectivity among competing technologies is becoming increasingly important in the health care industry. A failure of our technology products to operate as intended and in a seamless fashion with other products could materially and adversely affect our results of operations, financial position and cash flows.

Uncertain and rapidly evolving U.S. federal and state, non-U.S. and international laws and regulations related to the health information technology market may present compliance challenges and could materially and adversely affect the configuration of our information systems and platforms, and our ability to compete in this market.

If we sustain cyber-attacks or other privacy or data security incidents, that result in security breaches that disrupt our operations or result in the unintended dissemination of sensitive personal information or proprietary or confidential information, we could suffer a loss of revenue and increased costs, exposure to significant liability, reputational harm and other serious negative consequences.

We routinely process, store and transmit large amounts of data in our operations, including sensitive personal information as well as proprietary or confidential information relating to our business or third-parties. Some of the data we process, store and transmit may be outside of the United States due to our information technology systems and international business operations. We may be subject to breaches of the information technology systems we use. Experienced computer programmers and hackers may be able to penetrate our layered security controls and misappropriate or compromise sensitive personal information or proprietary or confidential information or that of third-parties, create system disruptions or cause shutdowns. They also may be able to develop and deploy viruses, worms and other malicious software programs that attack our systems or otherwise exploit any security vulnerabilities. Our facilities may also be vulnerable to security incidents or security attacks; acts of vandalism or theft; coordinated attacks by activist entities; misplaced or lost data; human errors; or other similar events that could negatively affect our systems and our and our customer's data.

The costs to eliminate or address the foregoing security threats and vulnerabilities before or after a cyber-incident could be significant. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service and loss of existing or potential customers. In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about us or our customers or other third-parties, could expose our customers' private information and our customers to the risk of financial or medical identity theft, or expose us or other third-parties to a risk of loss or misuse of this information, result in litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

If we are not able to protect our proprietary rights to our databases, software and related products, our ability to market our knowledge and information-related businesses could be hindered and our results of operations, financial position and cash flows could be materially and adversely affected.

We rely on our agreements with customers, confidentiality agreements with employees and third parties, and our trademarks, trade secrets, copyrights and patents to protect our proprietary rights. These legal protections and precautions may not prevent misappropriation of our proprietary information. In addition, substantial litigation regarding intellectual property rights exists in the software industry, and we expect software products to be increasingly subject to third-party infringement claims as the number of products and competitors in this industry

segment grows. Such litigation and misappropriation of our proprietary information could hinder our ability to market and sell products and services and our results of operations, financial position and cash flows could be materially and adversely affected.

Restrictions on our ability to obtain funds from our regulated subsidiaries could materially and adversely affect our results of operations, financial position and cash flows.

Because we operate as a holding company, we are dependent upon dividends and administrative expense reimbursements from our subsidiaries to fund our obligations. Many of these subsidiaries are regulated by departments of insurance or similar regulatory authorities. We are also required by law or regulation to maintain specific prescribed minimum amounts of capital in these subsidiaries. The levels of capitalization required depend primarily upon the volume of premium revenues generated by the applicable subsidiary. In most states, we are required to seek prior approval by state regulatory authorities before we transfer money or pay dividends from our regulated subsidiaries that exceed specified amounts. An inability of our regulated subsidiaries to pay dividends to their parent companies in the desired amounts or at the time of our choosing could adversely affect our ability to reinvest in our business through capital expenditures or business acquisitions, as well as our ability to maintain our corporate quarterly dividend payment, repurchase shares of our common stock and repay our debt. If we are unable to obtain sufficient funds from our subsidiaries to fund our obligations, our results of operations, financial position and cash flows could be materially and adversely affected.

Any downgrades in our credit ratings could adversely affect our business, financial condition and results of operations.

Claims paying ability, financial strength and debt ratings by Nationally Recognized Statistical Rating Organizations are important factors in establishing the competitive position of insurance companies. Ratings information is broadly disseminated and generally used by customers and creditors. We believe our claims paying ability and financial strength ratings are important factors in marketing our products to certain of our customers. Our credit ratings impact both the cost and availability of future borrowings. Each of the credit rating agencies reviews its ratings periodically. Our ratings reflect each credit rating agency's opinion of our financial strength, operating performance and ability to meet our debt obligations or obligations to policyholders. There can be no assurance that our current credit ratings will be maintained in the future. Downgrades in our credit ratings, should they occur, could materially increase our costs of or ability to access funds in the debt and capital markets and otherwise materially increase our operating costs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

To support our business operations in the United States and other countries we own and lease real properties. Our various reportable segments use these facilities for their respective business purposes, and we believe these current facilities are suitable for their respective uses and are adequate for our anticipated future needs.

ITEM 3. LEGAL PROCEEDINGS

The information required by this Item 3 is incorporated herein by reference to the information set forth under the captions "Litigation Matters" and "Governmental Investigations, Audits and Reviews" in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET PRICES AND HOLDERS

Our common stock is traded on the New York Stock Exchange (NYSE) under the symbol UNH. On January 31, 2017, there were 13,035 registered holders of record of our common stock. The high and low per share common stock sales prices reported by the NYSE and cash dividends declared for our last two fiscal years were as follows:

	High	Low	Cash Dividends Declared
2016			
First quarter	$131.10	$107.51	$ 0.500
Second quarter	$141.31	$125.26	$ 0.625
Third quarter	$144.48	$132.39	$ 0.625
Fourth quarter	$164.00	$133.03	$ 0.625
2015			
First quarter	$123.76	$ 98.46	$ 0.375
Second quarter	$124.11	$111.12	$ 0.500
Third quarter	$126.21	$ 95.00	$ 0.500
Fourth quarter	$125.99	$109.61	$ 0.500

DIVIDEND POLICY

In June 2016, our Board of Directors increased the Company's quarterly cash dividend to shareholders to an annual dividend rate of $2.50 per share compared to the annual dividend rate of $2.00 per share, which the Company had paid since June 2015. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

ISSUER PURCHASES OF EQUITY SECURITIES

In November 1997, our Board of Directors adopted a share repurchase program, which the Board evaluates periodically. There is no established expiration date for the program. During the fourth quarter 2016, we repurchased approximately 1 million shares at an average price of $141.54 per share. As of December 31, 2016, we had Board authorization to purchase up to 51 million shares of our common stock.

PERFORMANCE GRAPHS

The following two performance graphs compare our total return to shareholders with the returns of indexes of other specified companies and the S&P 500 Index. The first graph compares the cumulative five-year total return to shareholders on our common stock relative to the cumulative total returns of the S&P 500 index and a customized peer group of certain *Fortune 50* companies (the "*Fortune 50* Group") for the five-year period ended December 31, 2016. The second graph compares our cumulative total return to shareholders with the S&P 500 Index and an index of a group of peer companies selected by us for the five-year period ended December 31, 2016. We are not included in either the *Fortune 50* Group index in the first graph or the peer group index in the second graph. In calculating the cumulative total shareholder return of the indexes, the shareholder returns of the *Fortune 50* Group companies in the first graph and the peer group companies in the second graph are weighted according to the stock market capitalizations of the companies at January 1 of each year. The comparisons assume the investment of $100 on December 31, 2011 in our common stock and in each index, and that dividends were reinvested when paid.

Fortune 50 Group

The *Fortune 50* Group consists of the following companies: American International Group, Inc., Berkshire Hathaway Inc., Cardinal Health, Inc., Citigroup Inc., General Electric Company, International Business Machines Corporation and Johnson & Johnson. Although there are differences among the companies in terms of size and industry, like UnitedHealth Group, all of these companies are large multi-segment companies using a well-defined operating model in one or more broad sectors of the economy.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN

Among UnitedHealth Group, the S&P 500 Index,
and Fortune 50 Group

	12/11	12/12	12/13	12/14	12/15	12/16
UnitedHealth Group	**$100.00**	**$108.59**	**$153.15**	**$208.98**	**$247.13**	**$342.05**
S&P 500 Index	**100.00**	**116.00**	**153.58**	**174.60**	**177.01**	**198.18**
Fortune 50 Group	**100.00**	**118.48**	**151.44**	**159.51**	**164.70**	**186.76**

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Peer Group

The companies included in our peer group are Aetna Inc., Anthem Inc., Cigna Corporation and Humana Inc. We believe that this peer group reflects publicly traded peers to our UnitedHealthcare businesses.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN

Among UnitedHealth Group, the S&P 500 Index,
and a Peer Group

	12/11	12/12	12/13	12/14	12/15	12/16
UnitedHealth Group	**$100.00**	**$108.59**	**$153.15**	**$208.98**	**$247.13**	**$342.05**
S&P 500 Index	**100.00**	**116.00**	**153.58**	**174.60**	**177.01**	**198.18**
Peer Group	**100.00**	**101.01**	**156.96**	**206.09**	**257.48**	**273.12**

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

ITEM 6. SELECTED FINANCIAL DATA

(in millions, except percentages and per share data)	For the Year Ended December 31, 2016	2015 (a)	2014	2013	2012
Consolidated operating results					
Revenues	$184,840	$157,107	$130,474	$122,489	$110,618
Earnings from operations	12,930	11,021	10,274	9,623	9,254
Net earnings attributable to UnitedHealth Group common shareholders	7,017	5,813	5,619	5,625	5,526
Return on equity (b)	19.4%	17.7%	17.3%	17.7%	18.7%
Basic earnings per share attributable to UnitedHealth Group common shareholders	$ 7.37	$ 6.10	$ 5.78	$ 5.59	$ 5.38
Diluted earnings per share attributable to UnitedHealth Group common shareholders	7.25	6.01	5.70	5.50	5.28
Cash dividends declared per common share	2.3750	1.8750	1.4050	1.0525	0.8000
Consolidated cash flows from (used for)					
Operating activities	$ 9,795	$ 9,740	$ 8,051	$ 6,991	$ 7,155
Investing activities	(9,355)	(18,395)	(2,534)	(3,089)	(8,649)
Financing activities	(1,011)	12,239	(5,293)	(4,946)	471
Consolidated financial condition (as of December 31)					
Cash and investments	$ 37,143	$ 31,703	$ 28,063	$ 28,818	$ 29,148
Total assets (c)	122,810	111,254	86,300	81,800	80,811
Total commercial paper and long-term debt (c)	32,970	31,965	17,324	16,778	16,680
Redeemable noncontrolling interests	2,012	1,736	1,388	1,175	2,121
Total equity	38,177	33,725	32,454	32,149	31,178

(a) Includes the effects of the July 2015 acquisition of Catamaran Corporation (Catamaran) and related debt issuances.

(b) Return on equity is calculated as net earnings divided by average equity. Average equity is calculated using the equity balance at the end of the preceding year and the equity balances at the end of each of the four quarters of the year presented.

(c) In the first quarter of 2016, the Company adopted Financial Accounting Standards Board (FASB) Accounting Standard Update (ASU) No. 2015-03 (ASU 2015-03), retrospectively as required. See Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more information on the adoption of ASU 2015-03.

Financial Highlights should be read with the accompanying "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 and the Consolidated Financial Statements and Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the accompanying Consolidated Financial Statements and Notes to the Consolidated Financial Statements thereto included in Item 8, "Financial Statements." Readers are cautioned that the statements, estimates, projections or outlook contained in this report, including discussions regarding financial prospects, economic conditions, trends and uncertainties contained in this Item 7, may constitute forward-looking statements within the meaning of the PSLRA. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the expectations expressed or implied in the forward-looking statements. A description of some of the risks and uncertainties can be found further below in this Item 7 and in Part I, Item 1A, "Risk Factors."

EXECUTIVE OVERVIEW

General

UnitedHealth Group is a diversified health and well-being company dedicated to helping people live healthier lives and helping to make the health system work better for everyone. Through our diversified family of businesses, we leverage core competencies in advanced, enabling technology; health care data; information and intelligence; and clinical care management and coordination to help meet the demands of the health system. These core competencies are deployed within our two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

We have four reportable segments across our two business platforms, UnitedHealthcare and Optum:

- UnitedHealthcare, which includes UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global;
- OptumHealth;
- OptumInsight; and
- OptumRx.

Further information on our business and reportable segments is presented in Part I, Item 1, "Business" and in Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Recent Developments

We have recognized in our financial results for the fourth quarter 2016 and the year ended December 31, 2016 the previously disclosed $350 million impact of our estimated share of guaranty association assessments resulting from the liquidation of Penn Treaty Network America Insurance Company and its subsidiary (Penn Treaty), following accounting, legal and regulatory consultations in connection with our 10-K filing. This charge will be funded over several years and affected by premium tax credits over time.

For more detail related to the Penn Treaty liquidation, see Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Business Trends

Our businesses participate in the United States, Brazilian and certain other international health markets. In the United States, health care spending has grown consistently for many years and comprises approximately 18% of gross domestic product. We expect overall spending on health care to continue to grow in the future, due to inflation, medical technology and pharmaceutical advancement, regulatory requirements, demographic trends in the population and national interest in health and well-being. The rate of market growth may be affected by a variety of factors, including macro-economic conditions and regulatory changes, which have impacted and could further impact our results of operations.

Pricing Trends. To price our health care benefit products, we start with our view of expected future costs. We frequently evaluate and adjust our approach in each of the local markets we serve, considering all relevant factors, such as product positioning, price competitiveness and environmental, competitive, legislative and regulatory considerations. Our review of regulatory considerations involves a focus on minimum MLR thresholds and the risk adjustment that impacts the small group and individual markets. We will continue seeking to balance growth and profitability across all of these dimensions.

The commercial risk market remains highly competitive in both the small group and large group segments. We expect broad-based competition to continue as the industry adapts to individual and employer needs amid reform changes. The ACA included an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products. A provision in the 2016 Federal Budget imposes a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax. Pricing for contracts that cover some portion of calendar year 2017 will reflect the impact of the moratorium. Additionally, the industry has continued to experience favorable medical cost trends due to moderated utilization, which has impacted the competitive pricing environment.

Medicare Advantage funding continues to be pressured, as discussed below in “Regulatory Trends and Uncertainties.”

We expect continued Medicaid revenue growth due to anticipated increases in the number of people we serve; we also believe that the payment rate environment creates the risk of downward pressure on Medicaid net margin percentages. We continue to take a prudent, market-sustainable posture for both new business and maintenance of existing relationships. We advocate for actuarially sound rates that are commensurate with our medical cost trends and we remain dedicated to partnering with those states that are committed to the long-term viability of their programs.

Medical Cost Trends. Our medical cost trends primarily relate to changes in unit costs, health system utilization and prescription drug costs. We endeavor to mitigate those increases with medical management. Our 2017 management activities include managing costs across all health care categories, including specialty pharmacy spending, as new therapies are introduced at high costs and older drugs experience price increases.

Delivery System and Payment Modernization. The health care market continues to change based on demographic shifts, new regulations, political forces and both payer and patient expectations. Health plans and care providers are being called upon to work together to close gaps in care and improve overall care quality, improve the health of populations and reduce costs. We continue to see a greater number of people enrolled in plans with underlying incentive-based care provider payment models that reward high-quality, affordable care and foster collaboration. We work together with clinicians to leverage our data and analytics to provide the necessary information to close gaps in care and improve overall health outcomes for patients.

We are increasingly rewarding care providers for delivering improvements in quality and cost-efficiency. As of December 31, 2016, we served more than 15 million people through some form of aligned contractual arrangement, including full-risk, shared-risk and bundled episode-of-care and performance incentive payment approaches. As of December 31, 2016, our contracts with value-based elements total nearly $53 billion in annual spending.

This trend is creating needs for health management services that can coordinate care around the primary care physician, including new primary care channels, and for investments in new clinical and administrative information and management systems, which we believe provide growth opportunities for our Optum business platform.

Regulatory Trends and Uncertainties

Following is a summary of management’s view of the trends and uncertainties related to some of the key provisions of the ACA and other regulatory matters. For additional information regarding the ACA and regulatory trends and uncertainties, see Part I, Item 1 “Business — Government Regulation” and Item 1A, “Risk Factors.”

Medicare Advantage Rates. Final 2017 Medicare Advantage rates resulted in an increase in industry base rates of approximately 0.85%, well short of the industry forward medical cost trend of 3%, which creates continued pressure in the Medicare Advantage program. The impact of this funding shortfall in Medicare Advantage is partially mitigated by reductions in provider payments for those care providers with rates indexed to Medicare Advantage revenues or Medicare fee-for-service payment rates. These factors can affect our plan benefit designs, pricing, growth prospects and earnings expectations for our Medicare Advantage plans.

The ongoing pressure on Medicare Advantage funding places continued importance on effective medical management and ongoing improvements in administrative efficiency. There are a number of adjustments we have made to partially offset these rate pressures and reductions. In some years, these adjustments will impact the majority of the seniors we serve through Medicare Advantage. For example, we seek to intensify our medical and operating cost management, make changes to the size and composition of our care provider networks, adjust members' benefits, implement or increase the member premiums that supplement the monthly payments we receive from the government and decide on a county-by-county basis where we will offer Medicare Advantage plans.

As Medicare Advantage payments change, other products may become relatively more attractive to Medicare beneficiaries and increase the demand for other senior health benefits products such as our market-leading Medicare Supplement and stand-alone Medicare Part D insurance offerings.

As provided in the ACA, our Medicare Advantage rates are currently enhanced by CMS quality bonuses in certain counties based on our local plans' Star ratings. The level of Star ratings from CMS, based upon specified clinical and operational performance standards, will impact future quality bonuses. In addition, Star ratings affect the amount of savings a plan can use to offer supplemental benefits, which ultimately may affect the plan's membership and revenue. For the 2016 payment year, approximately 57% of our Medicare Advantage members were in plans rated four stars or higher. We expect that at least 80% of our Medicare Advantage members will be in plans rated four stars or higher for payment year 2017. We continue to dedicate substantial resources to advance our quality scores and Star ratings to strengthen our local market programs and further improve our performance.

Health Insurance Industry Tax and Premium Stabilization Programs. The industry-wide amount of the Health Insurance Industry Tax was $11.3 billion in 2016 and we paid our portion of the tax, which was $1.8 billion, in September 2016. A provision in the 2016 Federal Budget imposes a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax. The Health Insurance Industry Tax is scheduled to be imposed for 2018 and beyond. In 2018, the industry-wide amount of the Health Insurance Industry Tax is expected to be $14.3 billion. The ACA also included three programs designed to stabilize the health insurance markets. These programs encompassed: a transitional reinsurance program; a temporary risk corridors program; and a permanent risk adjustment program. The transitional reinsurance and temporary risk corridors programs expired at the end of 2016.

Individual Public Exchanges. In 2016, we participated in individual public exchanges in 34 states and offered individual ACA compliant products. We recorded a premium deficiency reserve for a portion of our estimated 2016 losses in our 2015 results for in-force contracts as of January 1, 2016. During 2016, we incurred additional losses in our individual ACA compliant products and, for 2017, reduced our participation to three individual public exchanges. We expect to reduce the number of consumers we serve through individual insurance plans by nearly 1 million people in 2017, which will reduce our premium revenues by more than $4 billion.

RESULTS SUMMARY

The following table summarizes our consolidated results of operations and other financial information:

(in millions, except percentages and per share data)	For the Years Ended December 31, 2016	2015	2014	Change 2016 vs. 2015		Change 2015 vs. 2014	
Revenues:							
Premiums	$144,118	$127,163	$115,302	$16,955	13%	$11,861	10%

Net earnings margin (b)	3.8	3.7	4.3	0.1		(0.6)	
Return on equity (c)	19.4%	17.7%	17.3%	1.7%		0.4%	

nm = not meaningful

(a) Medical care ratio is calculated as medical costs divided by premium revenue.

(b) Net earnings margin attributable to UnitedHealth Group shareholders.

(c) Return on equity is calculated as annualized net earnings divided by average equity. Average equity is calculated using the equity balance at the end of the preceding year and the equity balances at the end of each of the four quarters in the year presented.

SELECTED OPERATING PERFORMANCE AND OTHER SIGNIFICANT ITEMS

The following represents a summary of select 2016 year-over-year operating comparisons to 2015 and other 2016 significant items.

- Consolidated revenues increased by 18%, UnitedHealthcare revenues increased 13% and Optum revenues grew 24%.
- UnitedHealthcare grew to serve an additional 2.1 million people domestically.
- Earnings from operations increased by 17%, including increases of 8% at UnitedHealthcare and 32% at Optum.
- Diluted earnings per common share increased 21% to $7.25.
- Cash flows from operations were $9.8 billion.

2016 RESULTS OF OPERATIONS COMPARED TO 2015 RESULTS

Our results of operations were affected by our acquisition of Catamaran in the third quarter of 2015.

Consolidated Financial Results

Revenues

The increases in revenues were primarily driven by organic growth in the number of individuals served across our UnitedHealthcare benefits businesses and growth across all of our Optum services businesses.

Medical Costs

Medical costs increased due to risk-based membership growth and medical cost trends, partially offset by medical management initiatives.

Income Tax Rate

Our effective tax rate decreased primarily due to the adoption of the ASU 2016-09, which we adopted in the first quarter of 2016. See Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, of this report for more information about the adoption of ASU 2016-09.

Reportable Segments

See Note 13 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more information on our segments. The following table presents a summary of the reportable segment financial information:

	For the Years Ended December 31,			Change		Change	
(in millions, except percentages)	2016	2015	2014	2016 vs. 2015		2015 vs. 2014	
Revenues							
UnitedHealthcare	$148,581	$131,343	$119,798	$17,238	13%	$11,545	10%

UnitedHealthcare Community & State	32,945	28,911	23,586	4,034	14	5,325	23
UnitedHealthcare Global	6,223	5,503	6,937	720	13	(1,434)	(21)
Total UnitedHealthcare revenues	$148,581	$131,343	$119,798	$17,238	13%	$11,545	10%

The following table summarizes the number of individuals served by our UnitedHealthcare businesses, by major market segment and funding arrangement:

(in thousands, except percentages)	December 31, 2016	2015	2014	Change 2016 vs. 2015		Change 2015 vs. 2014	
Commercial risk-based — group	7,470	7,095	6,765	375	5%	330	5%
Commercial risk-based — individual	1,350	1,190	740	160	13	450	61
Commercial fee-based	18,900	18,565	18,350	335	2	215	1
Fee-based TRICARE	2,860	2,880	2,895	(20)	(1)	(15)	(1)
Total commercial	30,580	29,730	28,750	850	3	980	3
Medicare Advantage	3,630	3,235	3,005	395	12	230	8
Medicaid	5,890	5,305	5,055	585	11	250	5
Medicare Supplement (Standardized)	4,265	4,035	3,750	230	6	285	8
Total public and senior	13,785	12,575	11,810	1,210	10	765	6
Total UnitedHealthcare — domestic medical	44,365	42,305	40,560	2,060	5	1,745	4
International	4,220	4,090	4,425	130	3	(335)	(8)
Total UnitedHealthcare — medical	48,585	46,395	44,985	2,190	5%	1,410	3%
Supplemental Data:							
Medicare Part D stand-alone	4,930	5,060	5,165	(130)	(3)%	(105)	(2)%

Growth in services to the public sector, mid-sized employers, small groups and individuals led the overall increase in people served through risk-based benefit plans in the commercial market. Medicare Advantage increased year-over-year due to growth in people served through individual and employer-sponsored group Medicare Advantage plans. Medicaid growth was driven by the combination of new state-based awards and growth in established programs. Medicare Supplement growth reflected strong customer retention and new sales.

UnitedHealthcare's revenue increase was due to growth in the number of individuals served across its businesses and price increases for underlying medical cost trends.

The increase in UnitedHealthcare's operating earnings was due to diversified growth, offset by guaranty fund assessments recorded in the fourth quarter of 2016. For more information on these assessments, see Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements." Operating earnings in 2015 included the establishment of premium deficiency reserves for 2016, primarily for individual ACA compliant business.

Optum

Total revenues and operating earnings increased as each segment reported increased revenues and earnings from operations as a result of the factors discussed below.

The results by segment were as follows:

OptumHealth

Revenue increased at OptumHealth primarily due to growth in its health care delivery businesses as well as expansion of behavioral services into new Medicaid markets. Strong performance in business supporting UnitedHealthcare partially offset by investments in the health care delivery business drove the increase in earnings from operations.

OptumInsight

Revenue and earnings from operations at OptumInsight increased primarily due to growth in revenue management, business process outsourcing and technology services.

OptumRx

Revenue and earnings from operations at OptumRx increased primarily due to the full-year impact of Catamaran and organic growth. In 2016, OptumRx fulfilled 1.24 billion adjusted scripts compared to 932 million in 2015.

2015 RESULTS OF OPERATIONS COMPARED TO 2014 RESULTS

Consolidated Financial Results

Revenues

The increase in revenues was primarily driven by the effect of the Catamaran acquisition and organic growth in the number of individuals served across our benefits businesses and across all of Optum's businesses.

Medical Costs

Medical costs increased primarily due to risk-based membership growth in our benefits businesses. Medical costs also included losses on individual ACA compliant products related to 2015, and the establishment of premium deficiency reserves related to the 2016 policy year for anticipated future losses for in-force individual ACA compliant contracts and a new state Medicaid contract.

Operating Cost Ratio

The decrease in our operating cost ratio was due to the inclusion of Catamaran and growth in government benefits programs, both of which have lower operating cost ratios and Company wide productivity gains.

Reportable Segments

UnitedHealthcare

UnitedHealthcare's revenue growth during the year ended December 31, 2015 was due to growth in the number of individuals served across its businesses and price increases reflecting underlying medical cost trends.

UnitedHealthcare's operating earnings for the year ended December 31, 2015 decreased as the combined individual ACA compliant losses and premium deficiency reserves totaling $815 million more than offset strong growth across the business, improved medical cost management and increased productivity.

Optum

Total revenues and operating earnings increased for the year ended December 31, 2015 as each reporting segment increased revenues and earnings from operations by double-digit percentages as a result of the factors discussed below.

The results by segment were as follows:

OptumHealth

Revenue and earnings from operations increased at OptumHealth during the year ended December 31, 2015 primarily due to growth in its care delivery businesses and the impact of acquisitions in patient care centers and population health management services. The operating margins for the year ended December 31, 2015 decreased from the prior year primarily due to investments made to develop future growth opportunities.

OptumInsight

Revenue, earnings from operations and operating margins at OptumInsight for the year ended December 31, 2015 increased primarily due to expansion and growth in care provider revenue management services and payer services.

OptumRx

Revenue and earnings from operations for the year ended December 31, 2015 increased due to the mid-year acquisition of Catamaran as well as strong organic growth. Operating margins for the year ended December 31, 2015 decreased slightly due to the inclusion of lower margin Catamaran business.

LIQUIDITY, FINANCIAL CONDITION AND CAPITAL RESOURCES

Liquidity

Introduction

We manage our liquidity and financial position in the context of our overall business strategy. We continually forecast and manage our cash, investments, working capital balances and capital structure to meet the short-term and long-term obligations of our businesses while seeking to maintain liquidity and financial flexibility. Cash flows generated from operating activities are principally from earnings before noncash expenses.

Our regulated subsidiaries generate significant cash flows from operations and are subject to financial regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies.

In 2016, our U.S. regulated subsidiaries paid their parent companies dividends of $3.9 billion. For the year ended December 31, 2015, our U.S. regulated subsidiaries paid their parent companies dividends of $4.4 billion. See Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements” for further detail concerning our regulated subsidiary dividends.

Our nonregulated businesses also generate cash flows from operations that are available for general corporate use. Cash flows generated by these entities, combined with dividends from our regulated entities and financing through the issuance of long-term debt as well as issuance of commercial paper or the ability to draw under our committed credit facilities, further strengthen our operating and financial flexibility. We use these cash flows to expand our businesses through acquisitions, reinvest in our businesses through capital expenditures, repay debt and return capital to our shareholders through shareholder dividends and/or repurchases of our common stock, depending on market conditions.

Summary of our Major Sources and Uses of Cash and Cash Equivalents

(in millions)	For the Years Ended December 31, 2016	2015	2014	Change 2016 vs. 2015	Change 2015 vs. 2014
Sources of cash:					
Cash provided by operating activities	$ 9,795	$ 9,740	$ 8,051	$ 55	$ 1,689
Issuances of long-term debt and commercial paper, net of repayments	990	14,607	391	(13,617)	14,216
Proceeds from common share issuances	429	402	462	27	(60)
Sales and maturities of investments, net of purchases	—	—	799	—	(799)
Customer funds administered	1,692	768	—	924	768
Other	37	—	115	37	(115)
Total sources of cash	12,943	25,517	9,818		
Uses of cash:					
Cash paid for acquisitions and noncontrolling interest shares, net of cash assumed	(2,017)	(16,282)	(1,923)	14,265	(14,359)
Cash dividends paid	(2,261)	(1,786)	(1,362)	(475)	(424)
Common share repurchases	(1,280)	(1,200)	(4,008)	(80)	2,808
Purchases of property, equipment and capitalized software	(1,705)	(1,556)	(1,525)	(149)	(31)
Purchases of investments, net of sales and maturities	(5,927)	(531)	—	(5,396)	(531)
Customer funds administered	—	—	(638)	—	638
Other	(324)	(578)	(138)	254	(440)
Total uses of cash	(13,514)	(21,933)	(9,594)		
Effect of exchange rate changes on cash and cash equivalents	78	(156)	(5)	234	(151)
Net (decrease) increase in cash and cash equivalents	$ (493)	$ 3,428	$ 219	$ (3,921)	$ 3,209

2016 Cash Flows Compared to 2015 Cash Flows

Cash flows provided by operating activities increased slightly as higher net earnings were mostly offset by increased CMS receivables and other operating items.

Other significant changes in sources or uses of cash year-over-year included increased net purchases of investments in 2016 and the decreases in cash paid for acquisitions and proceeds from debt issuances due to the 2015 acquisition of Catamaran.

2015 Cash Flows Compared to 2014 Cash Flows

Cash flows provided by operating activities in 2015 increased primarily due to growth in risk-based products, which increased medical costs payable and an increase in CMS risk share payables, which increased other liabilities. These increases were partially offset by an increase in pharmacy rebates, which increased other receivables, the increase in the payment of the 2015 Health Insurance Industry Tax and the payment of Reinsurance Program fees in 2015.

Other significant changes in sources or uses of cash year-over-year included increased cash paid for acquisitions and net debt issuances and decreased share repurchases, all due to the Catamaran acquisition.

Financial Condition

As of December 31, 2016, our cash, cash equivalent and available-for-sale investment balances of $36.7 billion included $10.4 billion of cash and cash equivalents (of which approximately $700 million was available for general corporate use), $24.2 billion of debt securities and $2.0 billion of investments in equity securities consisting of investments in non-U.S. dollar fixed-income funds; employee savings plan related investments; venture capital funds; and dividend paying stocks. Given the significant portion of our portfolio held in cash equivalents, we do not anticipate fluctuations in the aggregate fair value of our financial assets to have a material impact on our liquidity or capital position. Other sources of liquidity, primarily from operating cash flows and our commercial paper program, which is supported by our bank credit facilities, reduce the need to sell investments during adverse market conditions. See Note 4 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for further detail concerning our fair value measurements.

Our available-for-sale debt portfolio had a weighted-average duration of 3.3 years and a weighted-average credit rating of "AA" as of December 31, 2016. When multiple credit ratings are available for an individual security, the average of the available ratings is used to determine the weighted-average credit rating.

Capital Resources and Uses of Liquidity

In addition to cash flows from operations and cash and cash equivalent balances available for general corporate use, our capital resources and uses of liquidity are as follows:

Commercial Paper and Bank Credit Facilities. Our revolving bank credit facilities provide liquidity support for our commercial paper borrowing program, which facilitates the private placement of senior unsecured debt through third-party broker-dealers, and are available for general corporate purposes. For more information on our commercial paper and bank credit facilities, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Our revolving bank credit facilities contain various covenants, including covenants requiring us to maintain a defined debt to debt-plus-shareholders' equity ratio of not more than 55%. As of December 31, 2016, our debt to debt-plus-shareholders' equity ratio, as defined and calculated under the credit facilities was approximately 44%.

Long-Term Debt. Periodically, we access capital markets to issue long-term debt for general corporate purposes, such as, to meet our working capital requirements, to refinance debt, to finance acquisitions or for share repurchases. In February 2016, we issued debt to repay commercial paper borrowings, which were incurred for general corporate and working capital purposes, and to repay our 5.375% notes that were due March 15, 2016. In December 2016, we issued debt to repay commercial paper borrowings, which were incurred for general corporate and working capital purposes. For more information on these debt issuances, see Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8 "Financial Statements."

Credit Ratings. Our credit ratings as of December 31, 2016 were as follows:

	Moody's		Standard & Poor's		Fitch		A.M. Best	
	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook	Ratings	Outlook
Senior unsecured debt	A3	Negative	A+	Negative	A-	Negative	bbb+	Stable
Commercial paper	P-2	n/a	A-1	n/a	F1	n/a	AMB-2	n/a

The availability of financing in the form of debt or equity is influenced by many factors, including our profitability, operating cash flows, debt levels, credit ratings, debt covenants and other contractual restrictions, regulatory requirements and economic and market conditions. For example, a significant downgrade in our credit ratings or adverse conditions in the capital markets may increase the cost of borrowing for us or limit our access to capital.

Share Repurchase Program. As of December 31, 2016, we had Board authorization to purchase up to an additional 51 million shares of our common stock. For more information on our share repurchase program, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

Dividends. In June 2016, our Board increased our quarterly cash dividend to shareholders to an annual dividend rate of $2.50 per share. For more information on our dividend, see Note 10 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

The following table summarizes future obligations due by period as of December 31, 2016, under our various contractual obligations and commitments:

(in millions)	2017	2018 to 2019	2020 to 2021	Thereafter	Total
Debt (a)	$ 8,262	$ 6,282	$ 6,059	$ 27,899	$48,502
Operating leases	453	771	587	499	2,310
Purchase and other obligations (b)	623	617	297	170	1,707
Future policy benefits (c)	133	271	273	1,980	2,657
Unrecognized tax benefits (d)	19	—	—	234	253
Other liabilities recorded on the Consolidated Balance Sheet (e)	269	14	5	2,288	2,576
Redeemable noncontrolling interests (f)	958	1,054	—	—	2,012
Total contractual obligations	$10,717	$ 9,009	$ 7,221	$ 33,070	$60,017

(a) Includes interest coupon payments and maturities at par or put values. The table also assumes amounts are outstanding through their contractual term. See Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more detail.

(b) Includes fixed or minimum commitments under existing purchase obligations for goods and services, including agreements that are cancelable with the payment of an early termination penalty and remaining capital commitments for venture capital funds and other funding commitments. Excludes agreements that are cancelable without penalty and excludes liabilities to the extent recorded in our Consolidated Balance Sheets as of December 31, 2016.

(c) Future policy benefits represent account balances that accrue to the benefit of the policyholders, excluding surrender charges, for universal life and investment annuity products and for long-duration health policies sold to individuals for which some of the premium received in the earlier years is intended to pay benefits to be incurred in future years. See Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more detail.

(d) As the timing of future settlements is uncertain, the long-term portion has been classified as "Thereafter."

(e) Includes obligations associated with contingent consideration and other payments related to business acquisitions, certain employee benefit programs, amounts accrued for guaranty fund assessments and various other long-term liabilities. Due to uncertainty regarding payment timing, obligations for employee benefit programs, charitable contributions and other liabilities have been classified as "Thereafter."

(f) Includes commitments for redeemable shares of our subsidiaries.

We do not have other significant contractual obligations or commitments that require cash resources. However, we continually evaluate opportunities to expand our operations, which include internal development of new products, programs and technology applications and may include acquisitions.

OFF-BALANCE SHEET ARRANGEMENTS

As of December 31, 2016, we were not involved in any off-balance sheet arrangements, which have or are reasonably likely to have a material effect on our financial condition, results of operations or liquidity.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 2 of Notes to the Consolidated Financial Statements in Part II, Item 8 "Financial Statements" for a discussion of new accounting pronouncements that affect us.

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those estimates that require management to make challenging, subjective or complex judgments, often because they must estimate the effects of matters that are inherently uncertain and may change in subsequent periods. Critical accounting estimates involve judgments and uncertainties that are sufficiently sensitive and may result in materially different results under different assumptions and conditions.

Medical Costs Payable

Medical costs and medical costs payable include estimates of our obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received or processed. Depending on the health care professional and type of service, the typical billing lag for services can be up to 90 days from the date of service. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months. As of December 31, 2016, our days outstanding in medical payables was 51 days, calculated as total medical payables divided by total medical costs times the number of days in the period.

In each reporting period, our operating results include the effects of more completely developed medical costs payable estimates associated with previously reported periods. If the revised estimate of prior period medical costs is less than the previous estimate, we will decrease reported medical costs in the current period (favorable development). If the revised estimate of prior period medical costs is more than the previous estimate, we will increase reported medical costs in the current period (unfavorable development). Medical costs in 2016, 2015 and 2014 included favorable medical cost development related to prior years of $220 million, $320 million and $420 million, respectively.

In developing our medical costs payable estimates, we apply different estimation methods depending on the month for which incurred claims are being estimated. For example, for the most recent two months, we estimate claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data is available, supplemented by a review of near-term completion factors.

Completion Factors. A completion factor is an actuarial estimate, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by us at the date of estimation. Completion factors are the most significant factors we use in developing our medical costs payable estimates for periods prior to the most recent two months. Completion factors include judgments in relation to claim submissions such as the time from date of service to claim receipt, claim inventory levels and claim processing backlogs, as well as other factors. If actual claims submission rates from providers (which can be influenced by a number of factors, including provider mix and electronic versus manual submissions) or our claim processing patterns are different than estimated, our reserves may be significantly impacted.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for those periods as of December 31, 2016:

Completion Factors (Decrease) Increase in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
(0.75)%	$ 437
(0.50)	291
(0.25)	145
0.25	(144)
0.50	(288)
0.75	(430)

Medical Cost Per Member Per Month Trend Factors. Medical cost PMPM trend factors are significant factors we use in developing our medical costs payable estimates for the most recent two months. Medical cost trend factors are developed through a comprehensive analysis of claims incurred in prior months, provider contracting and expected unit costs, benefit design and by reviewing a broad set of health care utilization indicators, including but not limited to, pharmacy utilization trends, inpatient hospital census data and incidence data from the National Centers for Disease Control. We also consider macroeconomic variables such as gross-domestic product growth, employment and disposable income. A large number of factors can cause the medical cost trend to vary from our estimates, including: our ability and practices to manage medical and pharmaceutical costs, changes in level and mix of services utilized, mix of benefits offered, including the impact of co-pays and deductibles, changes in medical practices, catastrophes and epidemics.

The following table illustrates the sensitivity of these factors and the estimated potential impact on our medical costs payable estimates for the most recent two months as of December 31, 2016:

Medical Cost PMPM Trend Increase (Decrease) in Factors	Increase (Decrease) In Medical Costs Payable
	(in millions)
3%	$ 557
2	371
1	186
(1)	(186)
(2)	(371)
(3)	(557)

The completion factors and medical costs PMPM trend factors analyses above include outcomes that are considered reasonably likely based on our historical experience estimating liabilities for incurred but not reported benefit claims.

Management believes the amount of medical costs payable is reasonable and adequate to cover our liability for unpaid claims as of December 31, 2016; however, actual claim payments may differ from established estimates as discussed above. Assuming a hypothetical 1% difference between our December 31, 2016 estimates of medical costs payable and actual medical costs payable, excluding AARP Medicare Supplement Insurance and any potential offsetting impact from premium rebates, 2016 net earnings would have increased or decreased by $90 million.

For more detail related to our medical cost estimates, see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial Statements.”

Revenues

We derive a substantial portion of our revenues from health care insurance premiums. We recognize premium revenues in the period eligible individuals are entitled to receive health care services. Customers are typically billed monthly at a contracted rate per eligible person multiplied by the total number of people eligible to receive services.

Our Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under the CMS risk adjustment payment methodology. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. We estimate risk adjustment revenues based upon the data submitted and expected to be submitted to CMS. As a result of the variability of factors that determine such estimations, the actual amount of CMS’ retroactive payments could be materially more or less than our estimates. This may result in favorable or unfavorable adjustments to our Medicare premium revenue and, accordingly, our profitability. For more detail on premium revenues see Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, “Financial

Statements." Risk adjustment data for certain of our plans is subject to review by the federal and state governments, including audit by regulators. See Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for additional information regarding these audits. Our estimates of premiums to be recognized are reduced by any expected premium minimum MLR rebates payable by us to CMS.

Goodwill and Intangible Assets

Goodwill. We evaluate goodwill for impairment annually or more frequently when an event occurs or circumstances change that indicate the carrying value may not be recoverable. When testing goodwill for impairment, we may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. During a qualitative analysis, we consider the impact of changes, if any, to the following factors: macroeconomic, industry and market factors, cost factors, changes in overall financial performance, and any other relevant events and uncertainties impacting a reporting unit. If our qualitative assessment indicates that goodwill impairment is more likely than not, we perform additional quantitative analysis. We may also elect to skip the qualitative testing and proceed directly to the quantitative testing. For reporting units where a quantitative analysis is performed, we perform a multi-step test measuring the fair values of the reporting units and comparing them to their aggregate carrying values, including goodwill. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

We estimate the fair values of our reporting units using discounted cash flows, which include assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value beyond the discretely forecasted periods and discount rates. For each reporting unit, comparative market multiples are used to corroborate the results of our discounted cash flow test.

Forecasts and long-term growth rates used for our reporting units are consistent with, and use inputs from, our internal long-term business plan and strategies. Key assumptions used in these forecasts include:

- *Revenue trends.* Key revenue drivers for each reporting unit are determined and assessed. Significant factors include: membership growth, medical trends and the impact and expectations of regulatory environments. Additional macro-economic assumptions relating to unemployment, GDP growth, interest rates and inflation are also evaluated and incorporated, as appropriate.
- *Medical cost trends.* For further discussion of medical cost trends, see the "Medical Cost Trend" section of Executive Overview-Business Trends above and the discussion in the "Medical Costs Payable" critical accounting estimate above. Similar factors, including historical and expected medical cost trend levels, are considered in estimating our long-term medical trends at the reporting unit level.
- *Operating productivity.* We forecast expected operating cost levels based on historical levels and expectations of future operating cost levels.
- *Capital levels.* The operating and long-term capital requirements for each business are considered.

Discount rates are determined for each reporting unit and include consideration of the implied risk inherent in their forecasts. Our most significant estimate in the discount rate determinations involves our adjustments to the peer company weighted average costs of capital that reflect reporting unit-specific factors. We have not made any adjustments to decrease a discount rate below the calculated peer company weighted average cost of capital for any reporting unit. Company-specific adjustments to discount rates are subjective and thus are difficult to measure with certainty. The passage of time and the availability of additional information regarding areas of uncertainty with respect to the reporting units' operations could cause these assumptions to change in the future. We completed our annual impairment tests for goodwill as of October 1, 2016. All of our reporting units had fair values substantially in excess of their carrying values.

Intangible Assets. Our finite-lived intangible assets are subject to impairment tests when events or circumstances indicate that an asset's (or asset group's) carrying value may exceed its estimated fair value. Consideration is given on a quarterly basis to a number of potential impairment indicators, including: changes in the use of the assets, changes in legal or other business factors that could affect value, experienced or expected operating cash-flow deterioration or losses, adverse changes in customer populations, adverse competitive or technological advances that could impact value and other factors.

Our indefinite-lived intangible assets are tested for impairment on an annual basis, or more frequently if impairment indicators exist. To determine if an indefinite-lived intangible asset is impaired, we compare its estimated fair value to its carrying value. If the carrying value exceeds its estimated fair value, an impairment would be recorded for the amount by which the carrying value exceeds its estimated fair value. Intangible assets were not impaired in 2016.

Investments

Our investments are principally classified as available-for-sale and are recorded at fair value. We continually monitor the difference between the cost and fair value of our investments.

Other-Than-Temporary Impairment Assessment. Individual securities with fair values lower than costs are reviewed for impairment considering the following factors: our intent to sell the security or the likelihood that we will be required to sell the security before recovery of the entire amortized cost, the length of time and extent of impairment and the financial condition and near-term prospects of the issuer as well as specific events or circumstances that may influence the operations of the issuer. Other factors included in the assessment include the type and nature of the securities and their liquidity. Given the nature of our portfolio, primarily investment grade securities, historical impairments were largely market related (e.g., interest rate fluctuations) as opposed to credit related. Our large cash holdings reduce the risk that we will be required to sell a security. However, our intent to sell a security may change from period to period if facts and circumstances change.

The judgments and estimates related to other-than-temporary impairment may ultimately prove to be inaccurate due to many factors, including: circumstances may change over time, industry sector and market factors may differ from expectations and estimates or we may ultimately sell a security we previously intended to hold. Our assessment of the financial condition and near-term prospects of the issuer may ultimately prove to be inaccurate as time passes and new information becomes available, including changes to current facts and circumstances, or as unknown or estimated unlikely trends develop.

LEGAL MATTERS

A description of our legal proceedings is presented in Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

CONCENTRATIONS OF CREDIT RISK

Investments in financial instruments such as marketable securities and accounts receivable may subject us to concentrations of credit risk. Our investments in marketable securities are managed under an investment policy authorized by our Board of Directors. This policy limits the amounts that may be invested in any one issuer and generally limits our investments to U.S. government and agency securities, state and municipal securities and corporate debt obligations that are investment grade. Concentrations of credit risk with respect to accounts receivable are limited due to the large number of employer groups and other customers that constitute our client base. As of December 31, 2016, there were no significant concentrations of credit risk.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risks are exposures to changes in interest rates that impact our investment income and interest expense and the fair value of certain of our fixed-rate investments and debt, as well as foreign currency exchange rate risk of the U.S. dollar primarily to the Brazilian real.

As of December 31, 2016, we had $13.2 billion of financial assets on which the interest rates received vary with market interest rates, which may materially impact our investment income. Also as of December 31, 2016, $12.4 billion of our financial liabilities, which include commercial paper, debt and deposit liabilities, were at interest rates that vary with market rates, either directly or through the use of related interest rate swap contracts.

The fair value of certain of our fixed-rate investments and debt also varies with market interest rates. As of December 31, 2016, $21.9 billion of our investments were fixed-rate debt securities and $25.2 billion of our debt was non-swapped fixed-rate term debt. An increase in market interest rates decreases the market value of fixed-rate investments and fixed-rate debt. Conversely, a decrease in market interest rates increases the market value of fixed-rate investments and fixed-rate debt.

We manage exposure to market interest rates by diversifying investments across different fixed income market sectors and debt across maturities, as well as by endeavoring to match our floating-rate assets and liabilities over time, either directly or through the use of interest rate swap contracts. Unrealized gains and losses on investments in available-for-sale securities are reported in comprehensive income.

The following tables summarize the impact of hypothetical changes in market interest rates across the entire yield curve by 1% point or 2% points as of December 31, 2016 and 2015 on our investment income and interest expense per annum and the fair value of our investments and debt (in millions, except percentages):

	December 31, 2016			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum (a)	Interest Expense Per Annum (a)	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 263	$ 245	$ (1,711)	$ (3,470)
1	132	122	(873)	(1,860)
(1)	(105)	(95)	855	2,244
(2)	nm	nm	1,562	4,784

	December 31, 2015			
Increase (Decrease) in Market Interest Rate	Investment Income Per Annum (a)	Interest Expense Per Annum (a)	Fair Value of Financial Assets (b)	Fair Value of Financial Liabilities
2%	$ 258	$ 257	$ (1,388)	$ (3,233)
1	129	128	(702)	(1,746)
(1)	(80)	(55)	677	2,085
(2)	nm	nm	1,132	4,442

nm = not meaningful

(a) Given the low absolute level of short-term market rates on our floating-rate assets and liabilities as of December 31, 2016 and 2015, the assumed hypothetical change in interest rates does not reflect the full 100 basis point reduction in interest income or interest expense as the rate cannot fall below zero and thus the 200 basis point reduction is not meaningful.

(b) As of December 31, 2016 and 2015, some of our investments had interest rates below 2% so the assumed hypothetical change in the fair value of investments does not reflect the full 200 basis point reduction.

We have an exposure to changes in the value of the Brazilian real to the U.S. dollar in translation of UnitedHealthcare Brazil's operating results at the average exchange rate over the accounting period, and

UnitedHealthcare Brazil's assets and liabilities at the spot rate at the end of the accounting period. The gains or losses resulting from translating foreign assets and liabilities into U.S. dollars are included in equity and comprehensive income.

An appreciation of the U.S. dollar against the Brazilian real reduces the carrying value of the net assets denominated in Brazilian real. For example, as of December 31, 2016, a hypothetical 10% and 25% increase in the value of the U.S. dollar against the Brazilian real would have caused a reduction in net assets of approximately $400 million and $900 million, respectively. We manage exposure to foreign currency earnings risk by conducting our international business operations primarily in their functional currencies.

As of December 31, 2016, we had $2.0 billion of investments in equity securities, consisting of investments in non-U.S. dollar fixed-income funds; employee savings plan related investments; venture capital funds; and dividend paying stocks. Valuations in non-U.S. dollar funds are subject to foreign exchange rates. Valuations in venture capital funds are subject to conditions affecting health care and technology stocks and dividend paying equities are subject to more general market conditions.

ITEM 8. FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of UnitedHealth Group Incorporated and Subsidiaries:

We have audited the accompanying consolidated balance sheets of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2016. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of UnitedHealth Group Incorporated and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 8, 2017, expressed an unqualified opinion on the Company's internal control over financial reporting.

UnitedHealth Group

Notes to the Consolidated Financial Statements

1. Description of Business

UnitedHealth Group Incorporated (individually and together with its subsidiaries, "UnitedHealth Group" and "the Company") is a diversified health and well-being company dedicated to helping people live healthier lives and helping to make the health system work better for everyone.

Through its diversified family of businesses, the Company leverages core competencies in advanced, enabling technology; health care data, information and intelligence; and clinical care management and coordination to help meet the demands of the health system. These core competencies are deployed within the Company's two distinct, but strategically aligned, business platforms: health benefits operating under UnitedHealthcare and health services operating under Optum.

2. Basis of Presentation, Use of Estimates and Significant Accounting Policies

Basis of Presentation

The Company has prepared the Consolidated Financial Statements according to U.S. Generally Accepted Accounting Principles (GAAP) and has included the accounts of UnitedHealth Group and its subsidiaries.

Use of Estimates

These Consolidated Financial Statements include certain amounts based on the Company's best estimates and judgments. The Company's most significant estimates relate to estimates and judgments for medical costs payable and revenues, valuation and impairment analysis of goodwill and other intangible assets, estimates of other current liabilities and other current receivables and valuations of certain investments. Certain of these estimates require the application of complex assumptions and judgments, often because they involve matters that are inherently uncertain and will likely change in subsequent periods. The impact of any change in estimates is included in earnings in the period in which the estimate is adjusted.

Revenues

Premiums

Premium revenues are primarily derived from risk-based health insurance arrangements in which the premium is typically at a fixed rate per individual served for a one-year period, and the Company assumes the economic risk of funding its customers' health care and related administrative costs.

Premium revenues are recognized in the period in which eligible individuals are entitled to receive health care benefits. Health care premium payments received from the Company's customers in advance of the service period are recorded as unearned revenues. Fully insured commercial products of U.S. health plans, Medicare Advantage and Medicare Prescription Drug Benefit (Medicare Part D) plans with medical loss ratios as calculated under the definitions in the Patient Protection and Affordable Care Act (ACA) and related federal and state regulations and implementing regulations, that fall below certain targets are required to rebate ratable portions of their premiums annually. Medicare Advantage premium revenue includes the impact of Centers for Medicare & Medicaid Services (CMS) quality bonuses based on plans' Star ratings.

Premium revenues are recognized based on the estimated premiums earned net of projected rebates because the Company is able to reasonably estimate the ultimate premiums of these contracts. The Company also records premium revenues from capitation arrangements at its OptumHealth businesses.

The Company's Medicare Advantage and Medicare Part D premium revenues are subject to periodic adjustment under CMS' risk adjustment payment methodology. CMS deploys a risk adjustment model that apportions premiums paid to all health plans according to health severity and certain demographic factors. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. Under this risk adjustment methodology, CMS calculates the risk adjusted premium payment using diagnosis data from hospital inpatient, hospital outpatient and physician treatment settings. The Company and health care providers collect, capture and submit the necessary and available diagnosis data to CMS within prescribed deadlines. The Company estimates risk adjustment revenues based upon the diagnosis data submitted and expected to be submitted to CMS. Risk adjustment data for certain of the Company's plans are subject to review by the government, including audit by regulators. See Note 12 for additional information regarding these audits.

Products and Services

For the Company's OptumRx pharmacy care services business, the majority of revenues are derived from products sold through a contracted network of retail pharmacies or home delivery and specialty pharmacy facilities. Product revenues include ingredient costs (net of rebates), a negotiated dispensing fee and customer co-payments for drugs dispensed through the Company's mail-service pharmacy. In retail pharmacy transactions, revenues recognized exclude the member's applicable co-payment. Pharmacy products are billed to customers based on the number of transactions occurring during the billing period. Product revenues are recognized when the prescriptions are dispensed through the retail network or received by consumers through the Company's mail-service pharmacy. The Company has entered into contracts in which it is primarily obligated to pay its network pharmacy providers for benefits provided to their customers regardless of whether the Company is paid. The Company is also involved in establishing the prices charged by retail pharmacies, determining which drugs will be included in formulary listings and selecting which retail pharmacies will be included in the network offered to plan sponsors' members. As a result, revenues are reported on a gross basis.

Services revenue consists of fees derived from services performed for customers that self-insure the health care costs of their employees and employees' dependents. Under service fee contracts, the Company receives monthly, a fixed fee per employee, which is recognized as revenue as the Company performs, or makes available the applicable services to the customer. The customers retain the risk of financing health care costs for their employees and employees' dependents, and the Company administers the payment of customer funds to physicians and other health care professionals from customer-funded bank accounts. As the Company has neither the obligation for funding the health care costs, nor the primary responsibility for providing the medical care, the Company does not recognize premium revenue and medical costs for these contracts in its Consolidated Financial Statements. For these fee-based customer arrangements, the Company provides coordination and facilitation of medical services; transaction processing; customer, consumer and care professional services; and access to contracted networks of physicians, hospitals and other health care professionals. These services are performed throughout the contract period.

Revenues are also comprised of a number of services and products sold through Optum. For its financial services offerings, OptumHealth charges fees and earns investment income on managed funds. OptumInsight provides software and information products, advisory consulting arrangements and services outsourcing contracts, which may be delivered over several years. OptumInsight revenues are generally recognized over time on either a time and materials basis, or ratably as services are performed or made available to customers.

Medical Costs and Medical Costs Payable

The Company's estimate of medical costs payable represents management's best estimate of its liability for unpaid medical costs as of December 31, 2016.

Each period, the Company re-examines previously established medical costs payable estimates based on actual claim submissions and other changes in facts and circumstances. As more complete claim information becomes

available, the Company adjusts the amount of the estimates and includes the changes in estimates in medical costs in the period in which the change is identified. Approximately 90% of claims related to medical care services are known and settled within 90 days from the date of service and substantially all within twelve months.

Medical costs and medical costs payable include estimates of the Company's obligations for medical care services that have been rendered on behalf of insured consumers, but for which claims have either not yet been received, processed, or paid. The Company develops estimates for medical care services incurred but not reported (IBNR), which includes estimates for claims that have not been received or fully processed, using an actuarial process that is consistently applied, centrally controlled and automated. The actuarial models consider factors such as time from date of service to claim processing, seasonal variances in medical care consumption, health care professional contract rate changes, medical care utilization and other medical cost trends, membership volume and demographics, the introduction of new technologies, benefit plan changes, and business mix changes related to products, customers and geography.

In developing its medical costs payable estimates, the Company applies different estimation methods depending on which incurred claims are being estimated. For the most recent two months, the Company estimates claim costs incurred by applying observed medical cost trend factors to the average per member per month (PMPM) medical costs incurred in prior months for which more complete claim data are available, supplemented by a review of near-term completion factors (actuarial estimates, based upon historical experience and analysis of current trends, of the percentage of incurred claims during a given period that have been adjudicated by the Company at the date of estimation).

For months prior to the most recent two months, the Company applies the completion factors to actual claims adjudicated-to-date to estimate the expected amount of ultimate incurred claims for those months.

Cost of Products Sold

The Company's cost of products sold includes the cost of pharmaceuticals dispensed to unaffiliated customers either directly at its mail and specialty pharmacy locations, or indirectly through its nationwide network of participating pharmacies. Rebates attributable to non-affiliated clients are accrued as rebates receivable and a reduction of cost of products sold with a corresponding payable for the amounts of the rebates to be remitted to those non-affiliated clients in accordance with their contracts and recorded in the Consolidated Statements of Operations as a reduction of product revenue. Cost of products sold also includes the cost of personnel to support the Company's transaction processing services, system sales, maintenance and professional services.

Cash, Cash Equivalents and Investments

Cash and cash equivalents are highly liquid investments that have an original maturity of three months or less. The fair value of cash and cash equivalents approximates their carrying value because of the short maturity of the instruments.

Investments with maturities of less than one year are classified as short-term. Because of regulatory requirements, certain investments are included in long-term investments regardless of their maturity date. The Company classifies these investments as held-to-maturity and reports them at amortized cost. Substantially all other investments are classified as available-for-sale and reported at fair value based on quoted market prices, where available.

The Company excludes unrealized gains and losses on investments in available-for-sale securities from net earnings and reports them as comprehensive income and, net of income tax effects, as a separate component of equity. To calculate realized gains and losses on the sale of investments, the Company specifically identifies the cost of each investment sold.

The Company evaluates an investment for impairment by considering the length of time and extent to which market value has been less than cost or amortized cost, the financial condition and near-term prospects of the issuer as well as specific events or circumstances that may influence the operations of the issuer and the Company's intent to sell the security or the likelihood that it will be required to sell the security before recovery of the entire amortized cost.

New information and the passage of time can change these judgments. The Company manages its investment portfolio to limit its exposure to any one issuer or market sector, and largely limits its investments to investment grade quality. Securities downgraded below policy minimums after purchase will be disposed of in accordance with the Company's investment policy.

Assets Under Management

The Company provides health insurance products and services to members of AARP under a Supplemental Health Insurance Program (the AARP Program) and to AARP members and non-members under separate Medicare Advantage and Medicare Part D arrangements. The products and services under the AARP Program include supplemental Medicare benefits, hospital indemnity insurance, including insurance for individuals between 50 to 64 years of age and other related products.

Pursuant to the Company's agreement, AARP Program assets are managed separately from the Company's general investment portfolio and are used to pay costs associated with the AARP Program. These assets are invested at the Company's discretion, within investment guidelines approved by AARP. The Company does not guarantee any rates of return on these investments and, upon any transfer of the AARP Program contract to another entity, the Company would transfer cash equal in amount to the fair value of these investments at the date of transfer to that entity. Because the purpose of these assets is to fund the medical costs payable, the rate stabilization fund (RSF) liabilities and other related liabilities associated with this AARP contract, assets under management are classified as current assets, consistent with the classification of these liabilities.

The effects of changes in other balance sheet amounts associated with the AARP Program also accrue to the overall benefit of the AARP policyholders through the RSF balance. Accordingly, the Company excludes the effect of such changes in its Consolidated Statements of Cash Flows.

Other Current Receivables

Other current receivables include amounts due from pharmaceutical manufacturers for rebates and Medicare Part D drug discounts and other miscellaneous amounts due to the Company.

The Company's pharmacy care services businesses contract with pharmaceutical manufacturers, some of which provide rebates based on use of the manufacturers' products by its affiliated and non-affiliated clients. The Company accrues rebates as they are earned by its clients on a monthly basis based on the terms of the applicable contracts, historical data and current estimates. The pharmacy care services businesses bill these rebates to the manufacturers on a monthly or quarterly basis depending on the contractual terms and records rebates attributable to affiliated clients as a reduction to medical costs. The Company generally receives rebates from two to five months after billing. As of December 31, 2016 and 2015, total pharmaceutical manufacturer rebates receivable included in other receivables in the Consolidated Balance Sheets amounted to $3.3 billion and $2.6 billion, respectively.

For details on the Company's Medicare Part D receivables see "Medicare Part D Pharmacy Benefits" below.

Medicare Part D Pharmacy Benefits

The Company serves as a plan sponsor offering Medicare Part D prescription drug insurance coverage under contracts with CMS. Under the Medicare Part D program, there are seven separate elements of payment received by the Company during the plan year. These payment elements are as follows:

- *CMS Premium.* CMS pays a fixed monthly premium per member to the Company for the entire plan year.
- *Member Premium.* Additionally, certain members pay a fixed monthly premium to the Company for the entire plan year.
- *Low-Income Premium Subsidy.* For qualifying low-income members, CMS pays some or all of the member's monthly premiums to the Company on the member's behalf.
- *Catastrophic Reinsurance Subsidy*. CMS pays the Company a cost reimbursement estimate monthly to fund the CMS obligation to pay approximately 80% of the costs incurred by individual members in excess of the individual annual out-of-pocket maximum. A settlement is made with CMS based on actual cost experience, after the end of the plan year.
- *Low-Income Member Cost Sharing Subsidy.* For qualifying low-income members, CMS pays on the member's behalf some or all of a member's cost sharing amounts, such as deductibles and coinsurance. The cost sharing subsidy is funded by CMS through monthly payments to the Company. The Company administers and pays the subsidized portion of the claims on behalf of CMS, and a settlement payment is made between CMS and the Company based on actual claims and premium experience, after the end of the plan year.
- *CMS Risk-Share.* Premiums from CMS are subject to risk corridor provisions that compare costs targeted in the Company's annual bids by product and region to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances of more than 5% above or below the original bid submitted by the Company may result in CMS making additional payments to the Company or require the Company to refund to CMS a portion of the premiums it received. The Company estimates and recognizes an adjustment to premium revenues related to the risk corridor payment settlement based upon pharmacy claims experience to date. The estimate of the settlement associated with these risk corridor provisions requires the Company to consider factors that may not be certain, including estimates of eligible pharmacy costs and member eligibility status differences with CMS. The Company records risk-share adjustments to premium revenues in the Consolidated Statements of Operations and other current liabilities or other current receivables in the Consolidated Balance Sheets.
- *Drug Discount.* The ACA mandated a consumer discount on brand name prescription drugs for Medicare Part D plan participants in the coverage gap. This discount is funded by CMS and pharmaceutical manufacturers while the Company administers the application of these funds. Accordingly, amounts received are not reflected as premium revenues, but rather are accounted for as deposits. The Company records a liability when amounts are received from CMS and a receivable when the Company bills the pharmaceutical manufacturers. Related cash flows are presented as customer funds administered within financing activities in the Consolidated Statements of Cash Flows.

The CMS Premium, the Member Premium and the Low-Income Premium Subsidy represent payments for the Company's insurance risk coverage under the Medicare Part D program and, therefore, are recorded as premium revenues in the Consolidated Statements of Operations. Premium revenues are recognized ratably over the period in which eligible individuals are entitled to receive prescription drug benefits. The Company records premium payments received in advance of the applicable service period in unearned revenues in the Consolidated Balance Sheets.

The Catastrophic Reinsurance Subsidy and the Low-Income Member Cost Sharing Subsidy (Subsidies) represent cost reimbursements under the Medicare Part D program. Amounts received for these Subsidies are not reflected as premium revenues, but rather are accounted for as receivables and/or deposits. Related cash flows are presented as customer funds administered within financing activities in the Consolidated Statements of Cash Flows.

Pharmacy care costs and administrative costs under the contract are expensed as incurred and are recognized in medical costs and operating costs, respectively, in the Consolidated Statements of Operations.

The final 2016 risk-share amount is expected to be settled during the second half of 2017, and is subject to the reconciliation process with CMS.

The Consolidated Balance Sheets include the following amounts associated with the Medicare Part D program:

	December 31, 2016			December 31, 2015		
(in millions)	Subsidies	Drug Discount	Risk-Share	Subsidies	Drug Discount	Risk-Share
Other current receivables	$ 934	$ 543	$ —	$ 1,703	$ 423	$ —
Other current liabilities	—	267	471	—	58	496

Property, Equipment and Capitalized Software

Property, equipment and capitalized software are stated at cost, net of accumulated depreciation and amortization. Capitalized software consists of certain costs incurred in the development of internal-use software, including external direct costs of materials and services and applicable payroll costs of employees devoted to specific software development.

The Company calculates depreciation and amortization using the straight-line method over the estimated useful lives of the assets. The useful lives for property, equipment and capitalized software are:

Furniture, fixtures and equipment	3 to 7 years
Buildings	35 to 40 years
Capitalized software	3 to 5 years

Leasehold improvements are depreciated over the shorter of the remaining lease term or their estimated useful economic life.

Goodwill

To determine whether goodwill is impaired, annually or more frequently if needed, the Company performs a multi-step impairment test. The Company may first assess qualitative factors to determine if it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value. The Company may also elect to skip the qualitative testing and proceed directly to the quantitative testing. When performing quantitative testing, the Company first estimates the fair values of its reporting units using discounted cash flows. To determine fair values, the Company must make assumptions about a wide variety of internal and external factors. Significant assumptions used in the impairment analysis include financial projections of free cash flow (including significant assumptions about operations, capital requirements and income taxes), long-term growth rates for determining terminal value and discount rates. Comparative market multiples are used to corroborate the results of the discounted cash flow test. If the fair value is less than the carrying value of the reporting unit, then the implied value of goodwill would be calculated and compared to the carrying amount of goodwill to determine whether goodwill is impaired.

There was no impairment of goodwill during the year ended December 31, 2016.

Intangible Assets

The Company’s intangible assets are subject to impairment tests when events or circumstances indicate that an intangible asset (or asset group) may be impaired. The Company’s indefinite lived intangible assets are also tested for impairment annually. There was no impairment of intangible assets during the year ended December 31, 2016.

Accounts Payable and Accrued Liabilities

The Company had checks outstanding of $1.5 billion and $1.6 billion as of December 31, 2016 and 2015, respectively, which were classified as accounts payable and accrued liabilities and the change in this balance has been reflected within other financing activities in the Consolidated Statements of Cash Flows.

Other Current Liabilities

Other current liabilities include health savings account deposits ($5.7 billion and $3.6 billion as of December 31, 2016 and 2015, respectively), the RSF associated with the AARP Program, deposits under the Medicare Part D program (see "Medicare Part D Pharmacy Benefits" above), accruals for premium rebate payments under the ACA, the current portion of future policy benefits and customer balances.

Future Policy Benefits

Future policy benefits represent account balances that accrue to the benefit of the policyholders, excluding surrender charges, for universal life and investment annuity products and for long-duration health policies sold to individuals for which some of the premium received in the earlier years is intended to pay benefits to be incurred in future years.

Policy Acquisition Costs

The Company's short duration health insurance contracts typically have a one-year term and may be canceled by the customer with at least 30 days' notice. Costs related to the acquisition and renewal of short duration customer contracts are charged to expense as incurred.

Redeemable Noncontrolling Interests

Redeemable noncontrolling interests in the Company's subsidiaries whose redemption is outside the control of the Company are classified as temporary equity. The following table provides details of the Company's redeemable noncontrolling interests' activity for the years ended December 31, 2016 and 2015:

(in millions)	2016	2015
Redeemable noncontrolling interests, beginning of period	$1,736	$1,388
Net earnings	16	29
Acquisitions	34	196
Redemptions	(123)	(116)
Distributions	(11)	(19)
Fair value and other adjustments	360	258
Redeemable noncontrolling interests, end of period	$2,012	$1,736

Share-Based Compensation

The Company recognizes compensation expense for share-based awards, including stock options, stock-settled stock appreciation rights (SARs) and restricted stock and restricted stock units (collectively, restricted shares), on a straight-line basis over the related service period (generally the vesting period) of the award, or to an employee's eligible retirement date under the award agreement, if earlier. Restricted shares vest ratably; primarily over two to five years and compensation expense related to restricted shares is based on the share price on date of grant. Stock options and SARs vest ratably primarily over four years and may be exercised up to 10 years from the date of grant. Compensation expense related to stock options and SARs is based on the fair value at date of grant, which is estimated on the date of grant using a binomial option-pricing model. Under the Company's Employee Stock Purchase Plan (ESPP) eligible employees are allowed to purchase the Company's

stock at a discounted price, which is 85% of the lower market price of the Company's common stock at the beginning or at the end of the six-month purchase period. Share-based compensation expense for all programs is recognized in operating costs in the Consolidated Statements of Operations.

Net Earnings Per Common Share

The Company computes basic earnings per common share attributable to UnitedHealth Group common shareholders by dividing net earnings attributable to UnitedHealth Group common shareholders by the weighted-average number of common shares outstanding during the period. The Company determines diluted net earnings per common share attributable to UnitedHealth Group common shareholders using the weighted-average number of common shares outstanding during the period, adjusted for potentially dilutive shares associated with stock options, SARs, restricted shares and the ESPP, (collectively, common stock equivalents) using the treasury stock method. The treasury stock method assumes a hypothetical issuance of shares to settle the share-based awards, with the assumed proceeds used to purchase common stock at the average market price for the period. Assumed proceeds include the amount the employee must pay upon exercise and any unrecognized compensation cost. The difference between the number of shares assumed issued and number of shares assumed purchased represents the dilutive shares.

Health Insurance Industry Tax

The ACA includes an annual, nondeductible insurance industry tax (Health Insurance Industry Tax) to be levied proportionally across the insurance industry for risk-based health insurance products.

The Company estimates its liability for the Health Insurance Industry Tax based on a ratio of the Company's applicable net premiums written compared to the U.S. health insurance industry total applicable net premiums, both for the previous calendar year. The Company records in full the estimated liability for the Health Insurance Industry Tax at the beginning of the calendar year with a corresponding deferred cost that is amortized to operating costs on the Consolidated Statements of Operations using a straight-line method of allocation over the calendar year. The liability is recorded in accounts payable and accrued liabilities and the corresponding deferred cost is recorded in prepaid expenses and other current assets on the Consolidated Balance Sheets. A provision in the 2016 Federal Budget imposed a one year moratorium for 2017 on the collection of the Health Insurance Industry Tax.

Premium Stabilization Programs

The ACA included three programs designed to stabilize health insurance markets (Premium Stabilization Programs): a permanent risk adjustment program; a temporary risk corridors program; and a transitional reinsurance program (Reinsurance Program).

The risk-adjustment provisions apply to market reform compliant individual and small group plans in the commercial markets. Under the program, each covered member is assigned a risk score based upon demographic information and applicable diagnostic codes from the current year paid claims, in order to determine an average risk score for each plan in a particular state and market risk pool. Generally, a plan with a risk score that is less than the state's average risk score will pay into the pool, while a plan with a risk score that is greater than the state's average will receive money from the pool. The temporary risk corridors provisions are intended to limit the gains and losses of individual and small group qualified health plans. Plans are required to calculate the U.S. Department of Health and Human Services (HHS) risk corridor ratio of allowable costs to the defined target amount. Qualified health plans with ratios below 97% are required to make payments to HHS, while plans with ratios greater than 103% expect to receive funds from HHS. The Reinsurance Program and temporary risk corridors program expired at the end of 2016.

For the Premium Stabilization Programs, the Company records a receivable or payable as an adjustment to premium revenue based on year-to-date experience when the amounts are reasonably estimable and collection is reasonably assured. Final adjustments or recoverable amounts to the Premium Stabilization Programs are determined by HHS in the year following the policy year.

Recently Issued Accounting Standards

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2016-02, "Leases (Topic 842)" (ASU 2016-02). Under ASU 2016-02, an entity will be required to recognize assets and liabilities for the rights and obligations created by leases on the entity's balance sheet for both finance and operating leases. For leases with a term of 12 months or less, an entity can elect to not recognize lease assets and lease liabilities and expense the lease over a straight-line basis for the term of the lease. ASU 2016-02 will require new disclosures that depict the amount, timing, and uncertainty of cash flows pertaining to an entity's leases. Companies are required to adopt the new standard using a modified retrospective approach for annual and interim periods beginning after December 15, 2018. Early adoption of ASU 2016-02 is permitted. When adopted, the Company does not expect ASU 2016-02 to have a material impact on its results of operations, equity or cash flows. The impact of ASU 2016-02 on the Company's consolidated financial position will be based on leases outstanding at the time of adoption.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01). The new guidance changes the current accounting related to (i) the classification and measurement of certain equity investments, (ii) the presentation of changes in the fair value of financial liabilities measured under the fair value option that are due to instrument-specific credit risk, and (iii) certain disclosures associated with the fair value of financial instruments. Most notably, ASU 2016-01 requires that equity investments, with certain exemptions, be measured at fair value with changes in fair value recognized in net income as opposed to other comprehensive income. The new guidance is effective for annual and interim reporting periods beginning after December 15, 2017. As of December 31, 2016, based on equity securities held, the Company does not expect ASU 2016-01 to have a material impact on its consolidated financial position, results of operations, equity or cash flows. The Company will continue to evaluate any changes in its mix of investments or market conditions and the related impact of ASU 2016-01.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" (ASU 2014-09) as modified by ASU No. 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date," ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)," ASU No. 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing," ASU No. 2016-12, "Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients," and ASU 2016-20, "Revenue from Contracts with Customers (Topic 606): Technical Corrections and Improvements." ASU 2014-09 will supersede existing revenue recognition standards with a single model unless those contracts are within the scope of other standards (e.g., an insurance entity's insurance contracts). The revenue recognition principle in ASU 2014-09 is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, new and enhanced disclosures will be required. Companies may adopt the new standard either using the full retrospective approach, a modified retrospective approach with practical expedients, or a cumulative effect upon adoption approach. The Company early adopted the new standard effective January 1, 2017, as allowed, using the modified retrospective approach. As the majority of the Company's revenues are not subject to the new guidance, the adoption of ASU 2014-09 did not have a material impact on the Company's consolidated financial position, results of operations, equity or cash flows.

Recently Adopted Accounting Standards

In March 2016, the FASB issued ASU No. 2016-09, "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting" (ASU 2016-09). ASU 2016-09 modifies several aspects of the accounting for share-based payment awards, including income tax consequences, and classification on the statement of cash flows. The Company early adopted ASU 2016-09 in the first quarter of 2016. The provisions of ASU 2016-09 related to the timing of when excess tax benefits are recognized, minimum statutory

withholding requirements and forfeitures were adopted using a modified retrospective transition method by means of a cumulative-effect adjustment to equity as of January 1, 2016. The provisions of ASU 2016-09 related to the recognition of excess tax benefits in the income statement and classification in the statement of cash flows were adopted prospectively and the prior periods were not retrospectively adjusted. The adoption of ASU 2016-09 did not materially impact the Company's consolidated financial position, results of operations, equity or cash flows.

In November 2015, the FASB issued ASU No. 2015-17, "Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes" (ASU 2015-17). ASU 2015-17 requires entities to present deferred tax assets and deferred tax liabilities as noncurrent on the balance sheet. Prior to the issuance of ASU 2015-17, deferred taxes were required to be presented as a net current asset or liability and a net noncurrent asset or liability. The Company adopted ASU 2015-17 on a prospective basis in the first quarter of 2016 and the prior period was not retrospectively adjusted. The adoption of ASU 2015-17 did not impact the Company's consolidated financial position, results of operations, equity or cash flows.

In May 2015, the FASB issued ASU No. 2015-09, "Financial Services — Insurance (Topic 944): Disclosures about Short-Duration Contracts" (ASU 2015-09). ASU 2015-09 requires insurance entities to provide additional disclosures about short-duration insurance liabilities, including incurred and paid medical costs information by year. The Company adopted the disclosure requirements of ASU 2015-09 and has included the new disclosures within Notes 2 and 7.

In April 2015, the FASB issued ASU No. 2015-03, "Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs" (ASU 2015-03). ASU 2015-03 requires debt issuance costs to be presented as a reduction of the carrying amount of the related debt liability. Prior to the issuance of ASU 2015-03, debt issuance costs were required to be presented as an asset on the balance sheet. The Company adopted ASU 2015-03 on a retrospective basis, as required, in the first quarter of 2016. The Company reclassified $129 million and $82 million in debt issuance costs that were recorded in other assets to long-term debt, less current maturities on the Consolidated Balance Sheet as of December 31, 2015 and 2014, respectively.

The Company has determined that there have been no other recently adopted or issued accounting standards that had, or will have, a material impact on its Consolidated Financial Statements.

3. Investments

A summary of short-term and long-term investments by major security type is as follows:

(in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2016				
Debt securities — available-for-sale:				
U.S. government and agency obligations	$ 2,294	$ 1	$ (31)	$ 2,264
State and municipal obligations	7,120	40	(101)	7,059
Corporate obligations	10,944	41	(58)	10,927
U.S. agency mortgage-backed securities	2,963	7	(43)	2,927
Non-U.S. agency mortgage-backed securities	1,009	3	(10)	1,002
Total debt securities — available-for-sale	24,330	92	(243)	24,179
Equity securities	2,036	52	(47)	2,041
Debt securities — held-to-maturity:				
U.S. government and agency obligations	250	1	—	251
State and municipal obligations	5	—	—	5
Corporate obligations	238	—	—	238
Total debt securities — held-to-maturity	493	1	—	494
Total investments	$ 26,859	$ 145	$ (290)	$26,714
December 31, 2015				
Debt securities — available-for-sale:				
U.S. government and agency obligations	$ 1,982	$ 1	$ (6)	$ 1,977
State and municipal obligations	6,022	149	(3)	6,168
Corporate obligations	7,446	41	(81)	7,406
U.S. agency mortgage-backed securities	2,127	13	(16)	2,124
Non-U.S. agency mortgage-backed securities	962	5	(11)	956
Total debt securities — available-for-sale	18,539	209	(117)	18,631
Equity securities	1,638	58	(57)	1,639
Debt securities — held-to-maturity:				
U.S. government and agency obligations	163	1	—	164
State and municipal obligations	8	—	—	8
Corporate obligations	339	—	—	339
Total debt securities — held-to-maturity	510	1	—	511
Total investments	$ 20,687	$ 268	$ (174)	$20,781

Nearly all of the Company's investments in mortgage-backed securities were rated AAA as of December 31, 2016.

The amortized cost and fair value of debt securities as of December 31, 2016, by contractual maturity, were as follows:

	Available-for-Sale		Held-to-Maturity	
(in millions)	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	$ 2,893	$ 2,895	$ 151	$ 151
Due after one year through five years	9,646	9,625	153	153
Due after five years through ten years	5,706	5,645	124	124
Due after ten years	2,113	2,085	65	66
U.S. agency mortgage-backed securities	2,963	2,927	—	—
Non-U.S. agency mortgage-backed securities	1,009	1,002	—	—
Total debt securities	$ 24,330	$24,179	$ 493	$ 494

The fair value of available-for-sale investments with gross unrealized losses by major security type and length of time that individual securities have been in a continuous unrealized loss position were as follows:

	Less Than 12 Months		12 Months or Greater		Total	
(in millions)	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
December 31, 2016						
Debt securities — available-for-sale:						
U.S. government and agency obligations	$ 1,794	$ (31)	$ —	$ —	$ 1,794	$ (31)
State and municipal obligations	4,376	(101)	—	—	4,376	(101)
Corporate obligations	5,128	(56)	137	(2)	5,265	(58)
U.S. agency mortgage-backed securities	2,247	(40)	79	(3)	2,326	(43)
Non-U.S. agency mortgage-backed securities	544	(7)	97	(3)	641	(10)
Total debt securities — available-for-sale	$14,089	$ (235)	$ 313	$ (8)	$14,402	$ (243)
Equity securities	$ 93	$ (5)	$ 91	$ (42)	$ 184	$ (47)
December 31, 2015						
Debt securities — available-for-sale:						
U.S. government and agency obligations	$ 1,473	$ (6)	$ —	$ —	$ 1,473	$ (6)
State and municipal obligations	650	(3)	—	—	650	(3)
Corporate obligations	4,629	(63)	339	(18)	4,968	(81)
U.S. agency mortgage-backed securities	1,304	(12)	116	(4)	1,420	(16)
Non-U.S. agency mortgage-backed securities	593	(7)	127	(4)	720	(11)
Total debt securities — available-for-sale	$ 8,649	$ (91)	$ 582	$ (26)	$ 9,231	$ (117)
Equity securities	$ 112	$ (11)	$ 89	$ (46)	$ 201	$ (57)

The Company's unrealized losses from all securities as of December 31, 2016 were generated from approximately 12,000 positions out of a total of 27,000 positions. The Company believes that it will collect the principal and interest due on its debt securities that have an amortized cost in excess of fair value. The unrealized losses were primarily caused by interest rate increases and not by unfavorable changes in the credit quality associated with these securities. At each reporting period, the Company evaluates securities for impairment when the fair value of the investment is less than its amortized cost. The Company evaluated the underlying credit quality and credit ratings of the issuers, noting no significant deterioration since purchase. As of December 31, 2016, the Company did not have the intent to sell any of the securities in an unrealized loss position. Therefore, the Company believes these losses to be temporary.

The Company's investments in equity securities consist of investments in Brazilian real denominated fixed-income funds, employee savings plan related investments, venture capital funds and dividend paying stocks. The Company evaluated its investments in equity securities for severity and duration of unrealized loss, overall market volatility and other market factors.

Net realized gains reclassified out of accumulated other comprehensive income were from the following sources:

	For the Years Ended December 31,		
(in millions)	2016	2015	2014
Total other-than-temporary impairment recognized in earnings	$ (45)	$ (22)	$ (26)
Gross realized losses from sales	(44)	(28)	(47)
Gross realized gains from sales	255	191	284
Net realized gains (included in investment and other income on the Consolidated Statements of Operations)	166	141	211
Income tax effect (included in provision for income taxes on the Consolidated Statements of Operations)	(60)	(53)	(77)
Realized gains, net of taxes	$ 106	$ 88	$ 134

4. Fair Value

Certain assets and liabilities are measured at fair value in the Consolidated Financial Statements or have fair values disclosed in the Notes to the Consolidated Financial Statements. These assets and liabilities are classified into one of three levels of a hierarchy defined by GAAP. In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

The fair value hierarchy is summarized as follows:

Level 1 — Quoted prices (unadjusted) for identical assets/liabilities in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets/liabilities in active markets;
- Quoted prices for identical or similar assets/liabilities in inactive markets (e.g., few transactions, limited information, noncurrent prices, high variability over time);
- Inputs other than quoted prices that are observable for the asset/liability (e.g., interest rates, yield curves, implied volatilities, credit spreads); and
- Inputs that are corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

Transfers between levels, if any, are recorded as of the beginning of the reporting period in which the transfer occurs; there was no transfer between Levels 1, 2 or 3 of any financial assets or liabilities during the years ended December 31, 2016 or 2015.

Nonfinancial assets and liabilities or financial assets and liabilities that are measured at fair value on a nonrecurring basis are subject to fair value adjustments only in certain circumstances, such as when the Company records an impairment. There were no significant fair value adjustments for these assets and liabilities recorded during the years ended December 31, 2016 or 2015.

The following methods and assumptions were used to estimate the fair value and determine the fair value hierarchy classification of each class of financial instrument included in the tables below:

Cash and Cash Equivalents. The carrying value of cash and cash equivalents approximates fair value as maturities are less than three months. Fair values of cash equivalent instruments that do not trade on a regular basis in active markets are classified as Level 2.

Debt and Equity Securities. Fair values of debt and equity securities are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, and, if necessary, makes adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and nonbinding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by a secondary pricing source, such as its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and reviews of fair value methodology documentation provided by independent pricing services have not historically resulted in adjustment in the prices obtained from the pricing service.

Fair values of debt securities that do not trade on a regular basis in active markets but are priced using other observable inputs are classified as Level 2.

Fair value estimates for Level 1 and Level 2 equity securities are based on quoted market prices for actively traded equity securities and/or other market data for the same or comparable instruments and transactions in establishing the prices.

The fair values of Level 3 investments in venture capital portfolios are estimated using a market valuation technique that relies heavily on management assumptions and qualitative observations. Under the market approach, the fair values of the Company's various venture capital investments are computed using limited quantitative and qualitative observations of activity for similar companies in the current market. The Company's market modeling utilizes, as applicable, transactions for comparable companies in similar industries that also have similar revenue and growth characteristics and preferences in their capital structure. Key significant unobservable inputs in the market technique include implied earnings before interest, taxes, depreciation and amortization (EBITDA) multiples and revenue multiples. Additionally, the fair values of certain of the Company's venture capital securities are based on recent transactions in inactive markets for identical or similar securities. Significant changes in any of these inputs could result in significantly lower or higher fair value measurements.

Throughout the procedures discussed above in relation to the Company's processes for validating third-party pricing information, the Company validates the understanding of assumptions and inputs used in security pricing and determines the proper classification in the hierarchy based on that understanding.

Assets Under Management. Assets under management consists of debt securities and other investments held to fund costs associated with the AARP Program and are priced and classified using the same methodologies as the Company's investments in debt and equity securities.

Other Assets. The fair values of the Company's other assets are estimated and classified using the same methodologies as the Company's investments in debt securities.

Interest Rate Swaps. Fair values of the Company's swaps are estimated using the terms of the swaps and publicly available information, including market yield curves. Because the swaps are unique and not actively traded but are valued using other observable inputs, the fair values are classified as Level 2.

Long-Term Debt. The fair values of the Company's long-term debt are estimated and classified using the same methodologies as the Company's investments in debt securities.

The following table presents a summary of fair value measurements by level and carrying values for items measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair and Carrying Value
December 31, 2016				
Cash and cash equivalents	$ 10,386	$ 44	$ —	$10,430
Debt securities — available-for-sale:				
U.S. government and agency obligations	2,017	247	—	2,264
State and municipal obligations	—	7,059	—	7,059
Corporate obligations	21	10,804	102	10,927
U.S. agency mortgage-backed securities	—	2,927	—	2,927
Non-U.S. agency mortgage-backed securities	—	1,002	—	1,002
Total debt securities — available-for-sale	2,038	22,039	102	24,179
Equity securities	1,591	13	437	2,041
Assets under management	1,064	2,041	—	3,105
Interest rate swap assets	—	55	—	55
Total assets at fair value	$ 15,079	$ 24,192	$ 539	$39,810
Percentage of total assets at fair value	38%	61%	1%	100%
Interest rate swap liabilities	$ —	$ 14	$ —	$ 14
December 31, 2015				
Cash and cash equivalents	$ 10,906	$ 17	$ —	$10,923
Debt securities — available-for-sale:				
U.S. government and agency obligations	1,779	198	—	1,977
State and municipal obligations	—	6,168	—	6,168
Corporate obligations	5	7,308	93	7,406
U.S. agency mortgage-backed securities	—	2,124	—	2,124
Non-U.S. agency mortgage-backed securities	—	951	5	956
Total debt securities — available-for-sale	1,784	16,749	98	18,631
Equity securities	1,223	14	402	1,639
Assets under management	832	2,166	—	2,998
Interest rate swap assets	—	93	—	93
Total assets at fair value	$ 14,745	$ 19,039	$ 500	$34,284
Percentage of total assets at fair value	43%	56%	1%	100%
Interest rate swap liabilities	$ —	$ 11	$ —	$ 11

The following table presents a summary of fair value measurements by level and carrying values for certain financial instruments not measured at fair value on a recurring basis in the Consolidated Balance Sheets:

(in millions)	Quoted Prices in Active Markets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Fair Value	Total Carrying Value
December 31, 2016					
Debt securities — held-to-maturity:					
U.S. government and agency obligations	$ 251	$ —	$ —	$ 251	$ 250
State and municipal obligations	—	—	5	5	5
Corporate obligations	20	8	210	238	238
Total debt securities — held-to-maturity	$ 271	$ 8	$ 215	$ 494	$ 493
Other assets	$ —	$ 476	$ —	$ 476	$ 471
Long-term debt and other financing obligations	$ —	$ 31,295	$ —	$31,295	$29,337
December 31, 2015					
Debt securities — held-to-maturity:					
U.S. government and agency obligations	$ 164	$ —	$ —	$ 164	$ 163
State and municipal obligations	—	—	8	8	8
Corporate obligations	91	10	238	339	339
Total debt securities — held-to-maturity	$ 255	$ 10	$ 246	$ 511	$ 510
Other assets	$ —	$ 493	$ —	$ 493	$ 500
Long-term debt and other financing obligations	$ —	$ 29,455	$ —	$29,455	$27,978

The carrying amounts reported on the Consolidated Balance Sheets for other current financial assets and liabilities approximate fair value because of their short-term nature. These assets and liabilities are not listed in the table above.

A reconciliation of the beginning and ending balances of assets measured at fair value on a recurring basis using Level 3 inputs is as follows:

	December 31, 2016			December 31, 2015			December 31, 2014		
(in millions)	Debt Securities	Equity Securities	Total	Debt Securities	Equity Securities	Total	Debt Securities	Equity Securities	Total
Balance at beginning of period	$ 98	$ 402	$500	$ 74	$ 310	$384	$ 42	$ 269	$ 311
Purchases	12	100	112	27	106	133	32	105	137
Sales	(9)	(29)	(38)	(4)	(24)	(28)	(1)	(180)	(181)
Net unrealized gains (losses) in accumulated other comprehensive income	1	(13)	(12)	2	5	7	1	6	7
Net realized (losses) gains in investment and other income	—	(23)	(23)	(1)	5	4	—	110	110
Balance at end of period	$ 102	$ 437	$539	$ 98	$ 402	$500	$ 74	$ 310	$ 384

The following table presents quantitative information regarding unobservable inputs that were significant to the valuation of assets measured at fair value on a recurring basis using Level 3 inputs:

(in millions)	Fair Value	Valuation Technique	Unobservable Input	Range Low	Range High
December 31, 2016					
Equity securities:					
Venture capital portfolios	$ 404	Market approach — comparable companies	Revenue multiple	1.0	6.0
			EBITDA multiple	8.0	12.0
	33	Market approach — recent transactions	Inactive market transactions	N/A	N/A
Total equity securities	$ 437				

Also included in the Company's assets measured at fair value on a recurring basis using Level 3 inputs were $102 million of available-for-sale debt securities as of December 31, 2016, which were not significant.

5. Property, Equipment and Capitalized Software

A summary of property, equipment and capitalized software is as follows:

(in millions)	December 31, 2016	December 31, 2015
Land and improvements	$ 324	$ 237
Buildings and improvements	3,148	2,420
Computer equipment	2,021	1,945
Furniture and fixtures	999	790
Less accumulated depreciation	(2,621)	(2,163)
Property and equipment, net	3,871	3,229
Capitalized software	3,158	2,642
Less accumulated amortization	(1,128)	(1,010)
Capitalized software, net	2,030	1,632
Total property, equipment and capitalized software, net	$ 5,901	$ 4,861

Depreciation expense for property and equipment for the years ended December 31, 2016, 2015 and 2014 was $698 million, $613 million and $532 million, respectively. Amortization expense for capitalized software for the years ended December 31, 2016, 2015 and 2014 was $475 million, $430 million and $422 million, respectively.

6. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill, by reportable segment, were as follows:

(in millions)	UnitedHealthcare	OptumHealth	OptumInsight	OptumRx	Consolidated
Balance at January 1, 2015	$ 24,030	$ 3,834	$ 4,236	$ 840	$ 32,940
Acquisitions	128	1,817	89	10,732	12,766
Foreign currency effects and adjustments, net	(1,233)	9	(29)	—	(1,253)
Balance at December 31, 2015	22,925	5,660	4,296	11,572	44,453
Acquisitions	526	683	—	1,387	2,596
Foreign currency effects and adjustments, net	403	(21)	153	—	535
Balance at December 31, 2016	$ 23,854	$ 6,322	$ 4,449	$ 12,959	$ 47,584

During the third quarter of 2015, the Company acquired all of the outstanding common shares of Catamaran Corporation and funded Catamaran's payoff of its outstanding debt and credit facility for a total of $14.3 billion in cash. This combination diversified OptumRx's customer and business mix and enhanced OptumRx's technology capabilities and flexible service offerings. The total consideration exceeded the estimated fair value of the net tangible assets acquired by $16.0 billion, of which $5.4 billion has been allocated to finite-lived intangible assets and $10.6 billion to goodwill. The goodwill is not deductible for income tax purposes.

The gross carrying value, accumulated amortization and net carrying value of other intangible assets were as follows:

	December 31, 2016			December 31, 2015		
(in millions)	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Customer-related	$10,942	$ (3,416)	$ 7,526	$10,270	$ (2,796)	$ 7,474
Trademarks and technology	720	(323)	397	682	(249)	433
Trademarks — indefinite-lived	468	—	468	358	—	358
Other	258	(108)	150	209	(83)	126
Total	$12,388	$ (3,847)	$ 8,541	$11,519	$ (3,128)	$ 8,391

The acquisition date fair values and weighted-average useful lives assigned to finite-lived intangible assets acquired in business combinations consisted of the following by year of acquisition:

	2016		2015	
(in millions, except years)	Fair Value	Weighted-Average Useful Life	Fair Value	Weighted-Average Useful Life
Customer-related	$785	17 years	$5,518	19 years
Trademarks and technology	82	4 years	194	4 years
Other	22	5 years	—	
Total acquired finite-lived intangible assets	$889	16 years	$5,712	19 years

Estimated full year amortization expense relating to intangible assets for each of the next five years ending December 31 is as follows:

(in millions)	
2017	$865
2018	755
2019	679
2020	596
2021	536

Amortization expense relating to intangible assets for the years ended December 31, 2016, 2015 and 2014 was $882 million, $650 million and $524 million, respectively.

7. Medical Costs Payable

The following table shows the components of the change in medical costs payable for the years ended December 31:

(in millions)	2016	2015	2014
Medical costs payable, beginning of period	$ 14,330	$ 12,040	$ 11,575
Reported medical costs:			
Current year	117,258	104,195	94,053
Prior years	(220)	(320)	(420)
Total reported medical costs	117,038	103,875	93,633
Medical payments:			
Payments for current year	(101,696)	(90,630)	(82,750)
Payments for prior years	(13,281)	(10,955)	(10,418)
Total medical payments	(114,977)	(101,585)	(93,168)
Medical costs payable, end of period	$ 16,391	$ 14,330	$ 12,040

For the years ended December 31, 2016, 2015 and 2014 the medical cost reserve development included no individual factors that were material.

Medical costs payable included IBNR of $11.6 billion and $9.8 billion at December 31, 2016 and 2015, respectively. Substantially all of the IBNR balance as of December 31, 2016 relates to the current year. The following is information about incurred and paid medical cost development as of December 31, 2016:

(in millions)	Net Incurred Medical Costs For the Years ended December 31,	
Year	2015	2016
2015	$ 104,195	$ 103,973
2016		117,258
Total		$ 221,231

(in millions)	Net Cumulative Medical Payments For the Years ended December 31,	
Year	2015	2016
2015	$ (90,630)	$ (103,885)
2016		(101,696)
Total		(205,581)
Net remaining outstanding liabilities prior to 2015		741
Total medical costs payable		$ 16,391

8. Commercial Paper and Long-Term Debt

Commercial paper, term loan and senior unsecured long-term debt consisted of the following:

(in millions, except percentages)	December 31, 2016 Par Value	December 31, 2016 Carrying Value	December 31, 2016 Fair Value	December 31, 2015 Par Value	December 31, 2015 Carrying Value (a)	December 31, 2015 Fair Value

Total commercial paper, term loan and long-term debt	$33,022	$32,770	$34,728	$31,972	$31,801	$33,278

(a) In the first quarter of 2016, the Company adopted ASU 2015-03, retrospectively as required. See Note 2 for more information on the adoption of ASU 2015-03.

The Company's long-term debt obligations also included $200 million and $164 million of other financing obligations, of which $80 million and $47 million were current as of December 31, 2016 and 2015, respectively.

Maturities of commercial paper and long-term debt for the years ending December 31 are as follows:

(in millions)	
2017	$ 7,185
2018	2,622
2019	1,769
2020	1,955
2021	2,407
Thereafter	17,284

Commercial Paper and Revolving Bank Credit Facilities

Commercial paper consists of short-duration, senior unsecured debt privately placed on a discount basis through broker-dealers. As of December 31, 2016, the Company's outstanding commercial paper had a weighted-average annual interest rate of 0.9%.

The Company has $3.0 billion five-year, $2.0 billion three-year and $1.0 billion 364-day revolving bank credit facilities with 23 banks, which mature in December 2021, December 2019, and December 2017, respectively. These facilities provide liquidity support for the Company's commercial paper program and are available for general corporate purposes. As of December 31, 2016, no amounts had been drawn on any of the bank credit facilities. The annual interest rates, which are variable based on term, are calculated based on the London Interbank Offered Rate (LIBOR) plus a credit spread based on the Company's senior unsecured credit ratings. If amounts had been drawn on the bank credit facilities as of December 31, 2016, annual interest rates would have ranged from 1.6% to 2.2%.

Debt Covenants

The Company's bank credit facilities contain various covenants, including requiring the Company to maintain a debt to debt-plus-shareholders' equity ratio of not more than 55%. The Company was in compliance with its debt covenants as of December 31, 2016.

9. Income Taxes

The current income tax provision reflects the tax consequences of revenues and expenses currently taxable or deductible on various income tax returns for the year reported. The deferred income tax provision or benefit generally reflects the net change in deferred income tax assets and liabilities during the year, excluding any deferred income tax assets and liabilities of acquired businesses. The components of the provision for income taxes for the years ended December 31 are as follows:

(in millions)	2016	2015	2014
Current Provision:			
Federal	$4,397	$4,155	$3,883
State and local	312	281	271
Total current provision	4,709	4,436	4,154
Deferred provision (benefit)	81	(73)	(117)
Total provision for income taxes	$4,790	$4,363	$4,037

The reconciliation of the tax provision at the U.S. federal statutory rate to the provision for income taxes and the effective tax rate for the years ended December 31 is as follows:

(in millions, except percentages)	2016		2015		2014	
Tax provision at the U.S. federal statutory rate	$4,152	35.0%	$3,581	35.0%	$3,380	35.0%
Health insurance industry tax	645	5.4	627	6.1	469	4.8
State income taxes, net of federal benefit	205	1.7	145	1.4	154	1.6
Share-based awards — excess tax benefit	(158)	(1.3)	—	—	—	—
Non-deductible compensation	128	1.1	103	1.0	96	1.0
Other, net	(182)	(1.5)	(93)	(0.9)	(62)	(0.6)
Provision for income taxes	$4,790	40.4%	$4,363	42.6%	$4,037	41.8%

Deferred income tax assets and liabilities are recognized for the differences between the financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. The components of deferred income tax assets and liabilities as of December 31 are as follows:

(in millions)	2016	2015
Deferred income tax assets:		
Accrued expenses and allowances	$ 820	$ 739
U.S. federal and state net operating loss carryforwards	147	139
Share-based compensation	126	124
Nondeductible liabilities	236	205
Medical costs payable and other current liabilities	95	71
Non-U.S. tax loss carryforwards	434	244
Net unrealized losses on investments	55	—
Other-domestic	194	214
Other-non-U.S.	175	130
Subtotal	2,282	1,866
Less: valuation allowances	(55)	(44)
Total deferred income tax assets	2,227	1,822
Deferred income tax liabilities:		
U.S. federal and state intangible assets	(3,055)	(2,951)
Non-U.S. goodwill and intangible assets	(584)	(397)
Capitalized software	(707)	(574)
Net unrealized gains on investments	—	(34)
Depreciation and amortization	(332)	(312)
Prepaid expenses	(228)	(205)
Other-non-U.S.	(82)	(76)
Total deferred income tax liabilities	(4,988)	(4,549)
Net deferred income tax liabilities	$(2,761)	$(2,727)

Valuation allowances are provided when it is considered more likely than not that deferred tax assets will not be realized. The valuation allowances primarily relate to future tax benefits on certain federal, state and non-U.S. net operating loss carryforwards. Federal net operating loss carryforwards of $74 million expire beginning in 2021 through 2036; state net operating loss carryforwards expire beginning in 2017 through 2036. Substantially all of the non-U.S. tax loss carryforwards have indefinite carryforward periods.

As of December 31, 2016, the Company had $717 million of undistributed earnings from non-U.S. subsidiaries that are intended to be reinvested in non-U.S. operations. Because these earnings are considered permanently reinvested, no U.S. tax provision has been accrued related to the repatriation of these earnings. It is not practicable to estimate the amount of U.S. tax that might be payable on the eventual remittance of such earnings.

A reconciliation of the beginning and ending amount of unrecognized tax benefits as of December 31 is as follows:

(in millions)	2016	2015	2014
Gross unrecognized tax benefits, beginning of period	$224	$ 92	$89
Gross increases:			
Current year tax positions	37	—	—
Prior year tax positions	24	55	4
Acquired reserves	—	89	—
Gross decreases:			
Prior year tax positions	(4)	(2)	—
Settlements	(6)	(1)	—
Statute of limitations lapses	(12)	(9)	(1)
Gross unrecognized tax benefits, end of period	$263	$224	$92

The Company believes it is reasonably possible that its liability for unrecognized tax benefits will decrease in the next twelve months by $197 million as a result of audit settlements and the expiration of statutes of limitations.

The Company classifies interest and penalties associated with uncertain income tax positions as income taxes within its Consolidated Statement of Operations. During the years ended December 31, 2016, 2015 and 2014 the Company recognized $11 million, $11 million and $6 million of interest and penalties, respectively. The Company had $70 million and $59 million of accrued interest and penalties for uncertain tax positions as of December 31, 2016 and 2015, respectively. These amounts are not included in the reconciliation above.

The Company currently files income tax returns in the United States, various states and non-U.S. jurisdictions. The U.S. Internal Revenue Service (IRS) has completed exams on the consolidated income tax returns for fiscal years 2015 and prior. The Company's 2016 tax year is under advance review by the IRS under its Compliance Assurance Program. With the exception of a few states, the Company is no longer subject to income tax examinations prior to the 2010 tax year. The Brazilian federal revenue service — Secretaria da Receita Federal (SRF) may audit the Company's Brazilian subsidiaries for a period of five years from the date on which corporate income taxes should have been paid and/or the date when the tax return was filed.

10. Shareholders' Equity

Regulatory Capital and Dividend Restrictions

The Company's regulated subsidiaries are subject to regulations and standards in their respective jurisdictions. These standards, among other things, require these subsidiaries to maintain specified levels of statutory capital, as defined by each jurisdiction, and restrict the timing and amount of dividends and other distributions that may be paid to their parent companies. In the United States, most of these regulations and standards are generally consistent with model regulations established by the National Association of Insurance Commissioners. These standards generally permit dividends to be paid from statutory unassigned surplus of the regulated subsidiary and are limited based on the regulated subsidiary's level of statutory net income and statutory capital and surplus. These dividends are referred to as "ordinary dividends" and generally can be paid without prior regulatory approval. If the dividend, together with other dividends paid within the preceding twelve months, exceeds a specified statutory limit or is paid from sources other than earned surplus, it is generally considered an "extraordinary dividend" and must receive prior regulatory approval.

For the year ended December 31, 2016, the Company's regulated subsidiaries paid their parent companies dividends of $3.9 billion, including $3.3 billion of extraordinary dividends. For the year ended December 31, 2015, the Company's regulated subsidiaries paid their parent companies dividends of $4.4 billion, including $1.5 billion of extraordinary dividends. As of December 31, 2016, approximately $700 million of the Company's $10.4 billion of cash and cash equivalents was available for general corporate use.

The Company's regulated subsidiaries had estimated aggregate statutory capital and surplus of approximately $17.9 billion as of December 31, 2016. The estimated statutory capital and surplus necessary to satisfy regulatory requirements of the Company's regulated subsidiaries was approximately $10.5 billion as of December 31, 2016.

Optum Bank must meet minimum requirements for Tier 1 leverage capital, Tier 1 risk-based capital, common equity Tier1 risk-based capital and total risk-based capital of the Federal Deposit Insurance Corporation (FDIC) to be considered "Well Capitalized" under the capital adequacy rules to which it is subject. At December 31, 2016, the Company believes that Optum Bank met the FDIC requirements to be considered "Well Capitalized."

Share Repurchase Program

Under its Board of Directors' authorization, the Company maintains a share repurchase program. The objectives of the share repurchase program are to optimize the Company's capital structure and cost of capital, thereby improving returns to shareholders, as well as to offset the dilutive impact of share-based awards. Repurchases may be made from time to time in open market purchases or other types of transactions (including prepaid or structured share repurchase programs), subject to certain Board restrictions. In June 2014, the Board renewed the Company's share repurchase program with an authorization to repurchase up to 100 million shares of its common stock.

A summary of common share repurchases for the years ended December 31, 2016 and 2015 is as follows:

	Years Ended December 31,	
(in millions, except per share data)	**2016**	**2015**
Common share repurchases, shares	10	11
Common share repurchases, average price per share	$ 128.97	$ 112.45
Common share repurchases, aggregate cost	$ 1,280	$ 1,200
Board authorized shares remaining	51	61

Dividends

In June 2016, the Company's Board of Directors increased the Company's quarterly cash dividend to shareholders to equal an annual dividend rate of $2.50 per share compared to the annual dividend rate of $2.00 per share, which the Company had paid since June 2015. Declaration and payment of future quarterly dividends is at the discretion of the Board and may be adjusted as business needs or market conditions change.

11. Share-Based Compensation

The Company's outstanding share-based awards consist mainly of non-qualified stock options, SARs and restricted shares. As of December 31, 2016, the Company had 68 million shares available for future grants of share-based awards under the Plan. As of December 31, 2016, there were also 10 million shares of common stock available for issuance under the ESPP.

Stock Options and SARs

Stock option and SAR activity for the year ended December 31, 2016 is summarized in the table below:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Aggregate Intrinsic Value
	(in millions)		(in years)	(in millions)
Outstanding at beginning of period	34	$ 68		
Granted	11	113		
Exercised	(8)	57		
Forfeited	(1)	103		
Outstanding at end of period	36	84	6.6	$ 2,758
Exercisable at end of period	14	56	4.0	1,458
Vested and expected to vest, end of period	35	83	6.6	2,704

Restricted Shares

Restricted share activity for the year ended December 31, 2016 is summarized in the table below:

(shares in millions)	Shares	Weighted-Average Grant Date Fair Value per Share
Nonvested at beginning of period	7	$ 82
Granted	3	115
Vested	(3)	76
Nonvested at end of period	7	96

Other Share-Based Compensation Data

	For the Years Ended December 31,		
(in millions, except per share amounts)	2016	2015	2014
Stock Options and SARs			
Weighted-average grant date fair value of shares granted, per share	$ 20	$ 22	$ 22
Total intrinsic value of stock options and SARs exercised	595	482	526
Restricted Shares			
Weighted-average grant date fair value of shares granted, per share	115	110	71
Total fair value of restricted shares vested	$274	$460	$437
Employee Stock Purchase Plan			
Number of shares purchased	2	2	2
Share-Based Compensation Items			
Share-based compensation expense, before tax	$485	$406	$364
Share-based compensation expense, net of tax effects	417	348	314
Income tax benefit realized from share-based award exercises	236	247	231

(in millions, except years)	December 31, 2016
Unrecognized compensation expense related to share awards	$ 516
Weighted-average years to recognize compensation expense	1.3

Share-Based Compensation Recognition and Estimates

The principal assumptions the Company used in calculating grant-date fair value for stock options and SARs were as follows:

	For the Years Ended December 31,		
	2016	2015	2014
Risk-free interest rate	1.2% - 1.4%	1.6% - 1.7%	1.7% -1.8%
Expected volatility	20.8% - 22.5%	22.3% - 24.1%	24.1% - 39.6%
Expected dividend yield	1.8%	1.4% - 1.7%	1.6% - 1.9%
Forfeiture rate	5.0%	5.0%	5.0%
Expected life in years	5.6 - 5.9	5.5 - 6.1	5.4

Risk-free interest rates are based on U.S. Treasury yields in effect at the time of grant. Expected volatilities are based on the historical volatility of the Company's common stock and the implied volatility from exchange-traded options on the Company's common stock. Expected dividend yields are based on the per share cash dividend paid by the Company. The Company uses historical data to estimate option and SAR exercises and forfeitures within the valuation model. The expected lives of options and SARs granted represents the period of time that the awards granted are expected to be outstanding based on historical exercise patterns.

Other Employee Benefit Plans

The Company also offers a 401(k) plan for its employees. Compensation expense related to this plan was not material for 2016, 2015 and 2014.

In addition, the Company maintains non-qualified, deferred compensation plans, which allow certain members of senior management and executives to defer portions of their salary or bonus and receive certain Company contributions on such deferrals, subject to plan limitations. The deferrals are recorded within long-term investments with an approximately equal amount in other liabilities in the Consolidated Balance Sheets. The total deferrals are distributable based upon termination of employment or other periods, as elected under each plan and were $672 million and $553 million as of December 31, 2016 and 2015, respectively.

12. Commitments and Contingencies

The Company leases facilities and equipment under long-term operating leases that are non-cancelable and expire on various dates. Rent expense under all operating leases for the years ended December 31, 2016, 2015 and 2014 was $608 million, $555 million and $449 million, respectively.

As of December 31, 2016, future minimum annual lease payments, net of sublease income, under all non-cancelable operating leases were as follows:

(in millions)	Future Minimum Lease Payments
2017	$ 453
2018	416
2019	355
2020	314
2021	273
Thereafter	499

The Company provides guarantees related to its service level under certain contracts. If minimum standards are not met, the Company may be financially at risk up to a stated percentage of the contracted fee or a stated dollar amount. None of the amounts accrued, paid or charged to income for service level guarantees were material as of December 31, 2016, 2015 or 2014.

As of December 31, 2016, the Company had outstanding, undrawn letters of credit with financial institutions of $28 million and surety bonds outstanding with insurance companies of $1.2 billion, primarily to bond contractual performance.

Legal Matters

Because of the nature of its businesses, the Company is frequently made party to a variety of legal actions and regulatory inquiries, including class actions and suits brought by members, care providers, consumer advocacy organizations, customers and regulators, relating to the Company's businesses, including management and administration of health benefit plans and other services. These matters include medical malpractice, employment, intellectual property, antitrust, privacy and contract claims and claims related to health care benefits coverage and other business practices.

The Company records liabilities for its estimates of probable costs resulting from these matters where appropriate. Estimates of costs resulting from legal and regulatory matters involving the Company are inherently difficult to predict, particularly where the matters: involve indeterminate claims for monetary damages or may involve fines, penalties or punitive damages; present novel legal theories or represent a shift in regulatory policy; involve a large number of claimants or regulatory bodies; are in the early stages of the proceedings; or could

result in a change in business practices. Accordingly, the Company is often unable to estimate the losses or ranges of losses for those matters where there is a reasonable possibility or it is probable that a loss may be incurred.

Litigation Matters

California Claims Processing Matter. On January 25, 2008, the California Department of Insurance (CDI) issued an Order to Show Cause to PacifiCare Life and Health Insurance Company, a subsidiary of the Company, alleging violations of certain insurance statutes and regulations related to an alleged failure to include certain language in standard claims correspondence, timeliness and accuracy of claims processing, interest payments, care provider contract implementation, care provider dispute resolution and other related matters. Although the Company believes that CDI had never before issued a fine in excess of $8 million, CDI advocated a fine of approximately $325 million in this matter. The matter was the subject of an administrative hearing before a California administrative law judge beginning in December 2009, and in August 2013, the administrative law judge issued a nonbinding proposed decision recommending a fine of $11.5 million. The California Insurance Commissioner rejected the administrative law judge's recommendation and on June 9, 2014, issued his own decision imposing a fine of approximately $174 million. On July 10, 2014, the Company filed a lawsuit in California state court challenging the Commissioner's decision. On September 8, 2015, in the first phase of that lawsuit, the California state court issued an order invalidating certain of the regulations the Commissioner had relied upon in issuing his decision and penalty. The Company cannot reasonably estimate the range of loss, if any, that may result from this matter given the procedural status of the dispute, the wide range of possible outcomes, the legal issues presented (including the legal basis for the majority of the alleged violations), the inherent difficulty in predicting a regulatory fine in the event of a remand, and the various remedies and levels of judicial review that remain available to the Company.

Government Investigations, Audits and Reviews

The Company has been involved or is currently involved in various governmental investigations, audits and reviews. These include routine, regular and special investigations, audits and reviews by the CMS, state insurance and health and welfare departments, the Brazilian national regulatory agency for private health insurance and plans (the Agência Nacional de Saúde Suplementar), state attorneys general, the Office of the Inspector General, the Office of Personnel Management, the Office of Civil Rights, the Government Accountability Office, the Federal Trade Commission, U.S. Congressional committees, the U.S. Department of Justice, the SEC, the Internal Revenue Service, the U.S. Drug Enforcement Administration, the Brazilian federal revenue service (the Secretaria da Receita Federal), the U.S. Department of Labor, the Federal Deposit Insurance Corporation, the Defense Contract Audit Agency and other governmental authorities. Certain of the Company's businesses have been reviewed or are currently under review, including for, among other matters, compliance with coding and other requirements under the Medicare risk-adjustment model. The Company has produced documents, information and witnesses to the Department of Justice in cooperation with a current review of the Company's risk-adjustment processes, including the Company's patient chart review and related programs. CMS has selected certain of the Company's local plans for risk adjustment data validation (RADV) audits to validate the coding practices of and supporting documentation maintained by health care providers and such audits may result in retrospective adjustments to payments made to the Company's health plans.

The Company cannot reasonably estimate the range of loss, if any, that may result from any material government investigations, audits and reviews in which it is currently involved given the status of the reviews, the wide range of possible outcomes and the inherent difficulty in predicting regulatory action, fines and penalties, if any, the Company's legal and factual defenses and the various remedies and levels of judicial review available to the Company in the event of an adverse finding.

Guaranty Fund Assessments

Under state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. Some states have similar laws relating to HMOs and other payers such as consumer operated and oriented plans (co-ops) established under the ACA. In 2009, the Pennsylvania Insurance Commissioner placed long term care insurer Penn Treaty Network America Insurance Company and its subsidiary (Penn Treaty), neither of which is affiliated with the Company, in rehabilitation and petitioned a state court for approval to liquidate Penn Treaty. In 2012, the court denied the liquidation petition and ordered the Insurance Commissioner to submit a rehabilitation plan. A second amended plan of rehabilitation was later withdrawn and, as of November 2016, Penn Treaty will be liquidated. As of December 31, 2016, the Company recorded the $350 million impact of its estimated share of guaranty association assessments resulting from the Penn Treaty liquidation.

13. Segment Financial Information

Factors used to determine the Company's reportable segments include the nature of operating activities, economic characteristics, existence of separate senior management teams and the type of information used by the Company's chief operating decision maker to evaluate its results of operations. Reportable segments with similar economic characteristics, products and services, customers, distribution methods and operational processes that operate in a similar regulatory environment are combined.

The following is a description of the types of products and services from which each of the Company's four reportable segments derives its revenues:

- *UnitedHealthcare* includes the combined results of operations of UnitedHealthcare Employer & Individual, UnitedHealthcare Medicare & Retirement, UnitedHealthcare Community & State and UnitedHealthcare Global. The U.S. businesses share significant common assets, including a contracted network of physicians, health care professionals, hospitals and other facilities, information technology infrastructure and other resources. UnitedHealthcare Employer & Individual offers an array of consumer-oriented health benefit plans and services for large national employers, public sector employers, mid-sized employers, small businesses and individuals nationwide and active and retired military and their families through the TRICARE program. UnitedHealthcare Medicare & Retirement provides health care coverage and health and well-being services to individuals age 50 and older, addressing their unique needs for preventive and acute health care services as well as services dealing with chronic disease and other specialized issues for older individuals. UnitedHealthcare Community & State's primary customers oversee Medicaid plans, the Children's Health Insurance Program and other federal, state and community health care programs. UnitedHealthcare Global is a diversified global health services business with a variety of offerings, including international commercial health and dental benefits.
- *OptumHealth* serves the physical, emotional and health-related financial needs of individuals, enabling population health management through programs offered by employers, payers, government entities and directly with the care delivery system. OptumHealth offers access to networks of care provider specialists, health management services, care delivery, consumer engagement and financial services.
- *OptumInsight* provides services, technology and health care expertise to major participants in the health care industry. Hospital systems, physicians, health plans, governments, life sciences companies and other organizations that comprise the health care industry depend on OptumInsight to help them improve performance, achieve efficiency, reduce costs, meet compliance mandates and modernize their core operating systems to meet the changing needs of the health system.
- *OptumRx* offers pharmacy care services and programs, including retail network contracting, home delivery and specialty pharmacy services, purchasing and clinical capabilities, and develops programs in areas such as step therapy, formulary management, drug adherence and disease/drug therapy management.

The Company's accounting policies for reportable segment operations are consistent with those described in the Summary of Significant Accounting Policies (see Note 2). Transactions between reportable segments principally consist of sales of pharmacy care products and services to UnitedHealthcare customers by OptumRx, certain product offerings and care management and local care delivery services sold to UnitedHealthcare by OptumHealth, and health information and technology solutions, consulting and other services sold to UnitedHealthcare by OptumInsight. These transactions are recorded at management's estimate of fair value. Intersegment transactions are eliminated in consolidation. Assets and liabilities that are jointly used are assigned to each reportable segment using estimates of pro-rata usage. Cash and investments are assigned such that each reportable segment has working capital and/or at least minimum specified levels of regulatory capital.

As a percentage of the Company's total consolidated revenues, premium revenues from CMS were 25% for 2016, 26% for 2015 and 29% for 2014, most of which were generated by UnitedHealthcare Medicare & Retirement and included in the UnitedHealthcare segment. U.S. customer revenue represented approximately 97%, 96% and 95% of consolidated total revenues for 2016, 2015 and 2014, respectively. Long-lived fixed assets located in the United States represented approximately 75% and 81% of the total long-lived fixed assets as of December 31, 2016 and 2015, respectively. The non-U.S. revenues and fixed assets are primarily related to UnitedHealthcare Global.

The following table presents the reportable segment financial information:

(in millions)	UnitedHealthcare	Optum					Corporate and Eliminations	Consolidated
		OptumHealth	OptumInsight	OptumRx	Optum Eliminations	Optum

Diluted	1.46	1.64	1.65	1.26

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act) that are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms; and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the filing of this Annual Report on Form 10-K, management evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2016. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of December 31, 2016.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes in our internal control over financial reporting during the quarter ended December 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Management on Internal Control Over Financial Reporting as of December 31, 2016

UnitedHealth Group Incorporated and Subsidiaries' (the "Company") management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control system is designed to provide reasonable assurance to our management and board of directors regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2016. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013).* Based on our assessment and the COSO criteria, we believe that, as of December 31, 2016, the Company maintained effective internal control over financial reporting.

The Company's independent registered public accounting firm has audited the Company's internal control over financial reporting as of December 31, 2016, as stated in the Report of Independent Registered Public Accounting Firm, appearing under Item 9A.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of UnitedHealth Group Incorporated and Subsidiaries:

We have audited the internal control over financial reporting of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2016, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting as of December 31, 2016. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2016 of the Company and our report dated February 8, 2017 expressed an unqualified opinion on those consolidated financial statements.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

DIRECTORS OF THE REGISTRANT

The following sets forth certain information regarding our directors as of February 8, 2017, including their name and principal occupation or employment:

William C. Ballard, Jr.
Former Of Counsel
Bingham Greenebaum Doll LLP

Edson Bueno, M.D.
Founder Amil and
Chairman UnitedHealth Group Latin America

Richard T. Burke
Non-Executive Chair
UnitedHealth Group

Robert J. Darretta
Retired Vice-Chair and
Chief Financial Officer
Johnson & Johnson

Timothy P. Flynn
Retired Chair
KPMG International

Stephen J. Hemsley
Chief Executive Officer
UnitedHealth Group

Michele J. Hooper
President and Chief Executive Officer
The Directors' Council, a company
focused on improving the governance
processes of corporate boards

Rodger A. Lawson
Executive Chair
E*TRADE Financial Corporation and
Retired President and Chief Executive Officer
Fidelity Investments — Financial Services

Glenn M. Renwick
Executive Chair
The Progressive Corporation

Kenneth I. Shine, M.D.
Professor of Medicine at the Dell Medical School
University of Texas

Gail R. Wilensky, Ph.D.
Senior Fellow
Project HOPE, an international health foundation

Pursuant to General Instruction G(3) to Form 10-K and Instruction 3 to Item 401(b) of Regulation S-K, information regarding our executive officers is provided in Item 1 of Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant."

We have adopted a code of ethics applicable to our principal executive officer and other senior financial officers, who include our principal financial officer, principal accounting officer, controller and persons performing similar functions. The code of ethics, entitled Code of Conduct: Our Principles of Ethics and Integrity, is posted on our website at *www.unitedhealthgroup.com*. For information about how to obtain the Code of Conduct, see Part I, Item 1, "Business." We intend to satisfy the SEC's disclosure requirements regarding amendments to, or waivers of, the code of ethics for our senior financial officers by posting such information on our website indicated above.

The remaining information required by Items 401, 405, 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K will be included under the headings "Corporate Governance," "Proposal 1-Election of Directors" and "Section

16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement for our 2017 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Items 402, 407(e)(4) and (e)(5) of Regulation S-K will be included under the headings "Executive Compensation," "Director Compensation," "Corporate Governance — Risk Oversight" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for our 2017 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Equity Compensation Plan Information

The following table sets forth certain information, as of December 31, 2016, concerning shares of common stock authorized for issuance under all of our equity compensation plans:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(in millions)		(in millions)
Equity compensation plans approved by shareholders [1]	36	$ 84	78 [3]
Equity compensation plans not approved by shareholders [2]	—	—	—
Total [2]	36	$ 84	78

(1) Consists of the UnitedHealth Group Incorporated 2011 Stock Incentive Plan, as amended and the UnitedHealth Group 1993 ESPP, as amended.

(2) Excludes 184,000 shares underlying stock options assumed by us in connection with an acquisition. These options have a weighted-average exercise price of $95 and an average remaining term of approximately 7 years. The options are administered pursuant to the terms of the plan under which the options originally were granted. No future awards will be granted under this acquired plan.

(3) Includes 10 million shares of common stock available for future issuance under the Employee Stock Purchase Plan as of December 31, 2016, and 68 million shares available under the 2011 Stock Incentive Plan as of December 31, 2016. Shares available under the 2011 Stock Incentive Plan may become the subject of future awards in the form of stock options, SARs, restricted stock, restricted stock units, performance awards and other stock-based awards.

The information required by Item 403 of Regulation S-K will be included under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for our 2017 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Items 404 and 407(a) of Regulation S-K will be included under the headings "Certain Relationships and Transactions" and "Corporate Governance" in our definitive proxy statement for our 2017 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 9(e) of Schedule 14A will be included under the heading "Disclosure of Fees Paid to Independent Registered Public Accounting Firm" in our definitive proxy statement for our 2017 Annual Meeting of Shareholders, and such required information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) 1. *Financial Statements*

The financial statements are included under Item 8 of this report:

- Reports of Independent Registered Public Accounting Firm.
- Consolidated Balance Sheets as of December 31, 2016 and 2015.
- Consolidated Statements of Operations for the years ended December 31, 2016, 2015, and 2014.
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2016, 2015, and 2014.
- Consolidated Statements of Changes in Equity for the years ended December 31, 2016, 2015, and 2014.
- Consolidated Statements of Cash Flows for the years ended December 31, 2016, 2015, and 2014.
- Notes to the Consolidated Financial Statements.

2. *Financial Statement Schedules*

The following financial statement schedule of the Company is included in Item 15(c):

- Schedule I—Condensed Financial Information of Registrant (Parent Company Only).

All other schedules for which provision is made in the applicable accounting regulations of the SEC are not required under the related instructions, are inapplicable, or the required information is included in the consolidated financial statements, and therefore have been omitted.

(b) The following exhibits are filed or incorporated by reference herein in response to Item 601 of Regulation S-K. The Company files Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K pursuant to the Securities Exchange Act of 1934 under Commission File No. 1-10864.

EXHIBIT INDEX**

3.1	Certificate of Incorporation of UnitedHealth Group Incorporated (incorporated by reference to Exhibit 3.1 to UnitedHealth Group Incorporated's Registration Statement on Form 8-A/A, Commission File No. 1-10864, filed on July 1, 2015)

(c) Financial Statement Schedule

Schedule I — Condensed Financial Information of Registrant (Parent Company Only).

Schedule I

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of UnitedHealth Group Incorporated and Subsidiaries:

We have audited the consolidated financial statements of UnitedHealth Group Incorporated and subsidiaries (the "Company") as of December 31, 2016 and 2015, and for each of the three years in the period ended December 31, 2016, and the Company's internal control over financial reporting as of December 31, 2016, and have issued our reports thereon dated February 8, 2017; such consolidated financial statements and reports are included elsewhere in this Form 10-K. Our audits also included the consolidated financial statement schedule of the Company listed in Item 15. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, the consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

Schedule I

Condensed Financial Information of Registrant
(Parent Company Only)
UnitedHealth Group
Notes to Condensed Financial Statements

1. Basis of Presentation

UnitedHealth Group's parent company financial information has been derived from its consolidated financial statements and should be read in conjunction with the consolidated financial statements included in this Form 10-K. The accounting policies for the registrant are the same as those described in Note 2 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

2. Subsidiary Transactions

Investment in Subsidiaries. UnitedHealth Group's investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries.

Intercompany Notes. In July 2015, the parent company issued $4.8 billion in intercompany notes that were used to partially fund the acquisition of Catamaran. See Note 6 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements" for more information about Catamaran.

Dividends and Capital Distributions. Cash dividends received from subsidiaries and included in Cash Flows from Operating Activities in the Condensed Statements of Cash Flows were $3.7 billion, $4.8 billion and $5.5 billion in 2016, 2015 and 2014, respectively. Additionally, $2.1 billion and $4.4 billion in cash were received as a return of capital to the parent company during 2016 and 2015, respectively.

3. Commercial Paper and Long-Term Debt

Discussion of commercial paper and long-term debt can be found in Note 8 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements." Long-term debt obligations of the parent company do not include other financing obligations at subsidiaries that totaled $200 million and $164 million at December 31, 2016 and 2015, respectively.

Maturities of commercial paper and long-term debt for the years ending December 31 are as follows:

(in millions)	
2017	$ 7,105
2018	2,600
2019	1,750
2020	1,950
2021	2,400
Thereafter	17,217

4. Commitments and Contingencies

For a summary of commitments and contingencies, see Note 12 of Notes to the Consolidated Financial Statements included in Part II, Item 8, "Financial Statements."

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

4.4	Indenture, dated as of February 4, 2008, between UnitedHealth Group Incorporated and U.S. Bank National Association (incorporated by reference to Exhibit 4.1 to UnitedHealth Group Incorporated's Registration Statement on Form S-3, SEC File Number 333-149031, filed on February 4, 2008)
*10.1	UnitedHealth Group Incorporated 2011 Stock Incentive Plan, as amended and restated in 2015 (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on June 5, 2015)
*10.2	Amendment to UnitedHealth Group Incorporated's Stock Option and Stock Appreciation Right Awards, effective November 6, 2014 (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2014)
*10.3	Form of Agreement for Non-Qualified Stock Option Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan, as amended and restated in 2015, for awards made after January 1, 2016 (incorporated by reference to Exhibit 10.4 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.4	Form of Agreement for Non-Qualified Stock Option Award for International Participants under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.3 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2013)
*10.5	Form of Addendum for Non-Qualified Stock Option Award Agreement for International Participants under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.37 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2012)
*10.6	Form of Agreement for Restricted Stock Unit Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan, as amended and restated in 2015, for awards made after January 1, 2016 (incorporated by reference to Exhibit 10.5 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.7	Form of Agreement for Restricted Stock Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.5 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on May 27, 2011)

*10.8	Form of Agreement for Stock Appreciation Rights Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.4 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on May 27, 2011)
*10.9	Form of Agreement for Performance-based Restricted Stock Unit Award to Executives under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan, as amended and restated in 2015, for awards made after January 1, 2016 (incorporated by reference to Exhibit 10.6 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.10	Form of Agreement for Initial Deferred Stock Unit Award to Non-Employee Directors under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.7 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on May 27, 2011)
*10.11	Form of Agreement for Deferred Stock Unit Award to Non-Employee Directors under UnitedHealth Group Incorporated's 2011 Stock Incentive Plan (incorporated by reference to Exhibit 10.6 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on May 27, 2011)
10.12	Form of Indemnification Agreement (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on July 1, 2015)
*10.13	Amended and Restated UnitedHealth Group Incorporated Executive Incentive Plan (2009 Statement), effective as of December 31, 2008 (incorporated by reference to Exhibit 10.12 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2008)
*10.14	Amended and Restated UnitedHealth Group Incorporated 2008 Executive Incentive Plan, effective as of December 31, 2008 (incorporated by reference to Exhibit 10.13 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2008)
*10.15	Amendment, dated as of December 21, 2012, of Amended and Restated UnitedHealth Group Incorporated 2008 Executive Incentive Plan (incorporated by reference to Exhibit 10.11 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2012)
*10.16	Second Amendment, dated as of November 5, 2015, of Amended and Restated UnitedHealth Group Incorporated 2008 Executive Incentive Plan (incorporated by reference to Exhibit 10.3 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.17	UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10(e) of UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2003)
*10.18	First Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.3 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on November 3, 2006)
*10.19	Second Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.13 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2007)
*10.20	Third Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.17 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2008)
*10.21	Fourth Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2010)

*10.22	Fifth Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2014)
*10.23	Sixth Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement) (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015)
*10.24	Seventh Amendment to UnitedHealth Group Executive Savings Plan (2004 Statement)
*10.25	Summary of Non-Management Director Compensation, effective as of October 1, 2016 (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2016)
*10.26	UnitedHealth Group Directors' Compensation Deferral Plan (2009 Statement) (incorporated by reference to Exhibit 10.18 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2008)
*10.27	Amendment to the UnitedHealth Group Directors' Compensation Deferral Plan, effective as of January 1, 2010 (incorporated by reference to Exhibit 10.20 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2009)
*10.28	First Amendment to UnitedHealth Group Directors' Compensation Deferral Plan (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended September 30, 2010)
*10.29	Catamaran Corporation Third Amended and Restated Long-Term Incentive Plan, as amended (incorporated by reference to Exhibit 4.3 to UnitedHealth Group Incorporated's Registration Statement on Form S-8, SEC File Number 333-205824, filed on July 23, 2015)
*10.30	Catalyst Health Solutions, Inc. 2006 Stock Incentive Plan, as amended (incorporated by reference to Exhibit 4.4 to UnitedHealth Group Incorporated's Registration Statement on Form S-8, SEC File Number 333-205824, filed on July 23, 2015)
*10.31	Employment Agreement, dated as of November 7, 2006, between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on November 8, 2006)
*10.32	Agreement for Supplemental Executive Retirement Pay, effective April 1, 2004, between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit 10(b) to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended March 31, 2004)
*10.33	Amendment to Agreement for Supplemental Executive Retirement Pay, dated as of November 7, 2006, between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit A to Exhibit 10.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on November 8, 2006)
*10.34	Amendment to Employment Agreement and Agreement for Supplemental Executive Retirement Pay, effective as of December 31, 2008, between United HealthCare Services, Inc. and Stephen J. Hemsley (incorporated by reference to Exhibit 10.22 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2008)
*10.35	Amendment to Agreement for Supplemental Executive Retirement Pay, dated as of June 7, 2016, between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended June 30, 2016)

*10.36	Letter Agreement, effective as of February 19, 2008, by and between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit 10.22 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2007)
*10.37	Amendment to Employment Agreement, dated as of December 14, 2010, between UnitedHealth Group Incorporated and Stephen J. Hemsley (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Current Report on Form 8-K filed on December 15, 2010)
*10.38	Amended and Restated Employment Agreement, effective as of December 1, 2014, between United HealthCare Services, Inc. and David Wichmann (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015)
*10.39	Amended and Restated Employment Agreement, effective December 1, 2014, between United HealthCare Services, Inc. and Larry Renfro (incorporated by reference to Exhibit 10.2 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015)
*10.40	Amended Employment Agreement, effective as of November 1, 2012, between Amil Assistência Médica Internacional S.A. and Dr. Edson de Godoy Bueno (incorporated by reference to Exhibit 10.32 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2012)
*10.41	Employment Agreement, effective as of January 1, 2013, between United HealthCare Services, Inc. and Marianne D. Short (incorporated by reference to Exhibit 10.34 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2013)
*10.42	Amended and Restated Employment Agreement, dated as of February 3, 2014, between United HealthCare Services, Inc. and D. Ellen Wilson (incorporated by reference to Exhibit 10.40 to UnitedHealth Group Incorporated's Annual Report on Form 10-K for the year ended December 31, 2015)
*10.43	Amended and Restated Employment Agreement, dated as of June 7, 2016, between United HealthCare Services, Inc. and John Rex (incorporated by reference to Exhibit 10.1 to UnitedHealth Group Incorporated's Quarterly Report on Form 10-Q for the quarter ended June 30, 2016)

Introduction

References to Cardinal Health and Fiscal Years

As used in this report, "we," "our," "us," "Cardinal Health" and similar pronouns refer to Cardinal Health, Inc. and its majority-owned subsidiaries, unless the context requires otherwise. Our fiscal year ends on June 30. References to fiscal 2019 , 2018 , 2017 , 2016 , 2015 and 2014 and to the fiscal years ended June 30, 2019 , 2018 , 2017 , 2016 , 2015 and 2014 , respectively. Except as otherwise specified, information in this report is provided as of June 30, 2018 .

Non-GAAP Financial Measures

In this report, including in the "Fiscal 2018 Overview" section of Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), we use financial measures that are derived from consolidated financial data but are not presented in our financial statements that are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). These measures are considered “non-GAAP financial measures” under the Securities and Exchange Commission (“SEC”) rules. The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures are included in the “Explanation and Reconciliation of Non-GAAP Financial Measures” section following MD&A in this report.

Important Information Regarding Forward-Looking Statements

This report (including information incorporated by reference) includes forward-looking statements addressing expectations, prospects, estimates and other matters that are dependent upon future events or developments. Many forward-looking statements appear in MD&A, but there are others throughout this report, which may be identified by words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions, and include statements reflecting future results or guidance, statements of outlook and expense accruals. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied. The most significant of these risks and uncertainties are described in “Risk Factors” in this report and in Exhibit 99.1 to the Form 10-K included in this report. Forward-looking statements in this report speak only as of the date of this document. Except to the extent required by applicable law, we undertake no obligation to update or revise any forward-looking statement.

Available Information

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports are available free of charge on our website (www.cardinalhealth.com), under the “Investors — Financial Reporting — SEC Filings” caption, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. You may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website (www.sec.gov) where you can search for annual, quarterly and current reports, proxy and information statements, and other information regarding us and other public companies.

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

About Cardinal Health

Cardinal Health, Inc. is an Ohio corporation formed in 1979 and is a global, integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. We provide medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency. We manage our business and report our financial results in two segments: Pharmaceutical and Medical.

Pharmaceutical Segment

Our Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical, and over-the-counter healthcare and consumer products in the United States. This segment also provides services to pharmaceutical manufacturers and healthcare providers to support the development, marketing, and distribution of specialty pharmaceutical products; operates nuclear pharmacies and radiopharmaceutical manufacturing facilities; provides pharmacy management services to hospitals, as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers; and repackages generic pharmaceuticals and over-the-counter healthcare products.

Medical Segment

Our Medical segment manufactures, sources and distributes Cardinal Health branded medical, surgical and laboratory products, which are sold in the United States, Canada, Europe, Asia and other markets. In addition to distributing Cardinal Health branded products, this segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States and Canada. This segment also distributes medical products to patients' homes in the United States through our Cardinal Health at Home division.

Consolidated Results

Fiscal 2018 Overview

Revenue
Revenue for fiscal 2018 was $136.8 billion , a 5 percent increase from the prior year, due primarily to sales growth from pharmaceutical distribution and specialty pharmaceutical customers. The Patient Recovery Business acquisition also contributed to the increase in revenue in fiscal 2018.

GAAP and Non-GAAP Operating Earnings

(in millions)	2018	2017	Change
GAAP	**$ 126**	$ 2,120	**(94)%**
Restructuring and employee severance	**176**	56	
Amortization and other acquisition-related costs	**707**	527	
Impairments and (gain)/loss on disposal of assets	**1,417**	18	
Litigation (recoveries)/charges, net	**159**	48	
Non-GAAP	**$ 2,585**	$ 2,769	**(7)%**

The sum of the components may not equal the total due to rounding.

During fiscal 2018 , GAAP operating earnings decreased 94 percent to $126 million and non-GAAP operating earnings decreased 7 percent to $2.6 billion .

The decrease in GAAP operating earnings was primarily due to a non-cash goodwill impairment charge related to our Medical segment; increased amortization of acquisition-related intangible assets as a result of the Patient Recovery Business acquisition; contract termination restructuring costs to transition the distribution of our Medical segment's surgeon gloves in certain international markets from a third-party distribution arrangement to a direct distribution model; performance from Cardinal Health Brand products, primarily Cordis; performance from our Pharmaceutical segment generics program; litigation charges associated with inferior vena cava (IVC) filter product liability claims; and the adverse impact of pharmaceutical customer contract renewals. These factors were partially offset by contributions from the Patient Recovery Business acquisition.

The decrease in non-GAAP operating earnings was primarily due to performance from Cardinal Health Brand products, primarily Cordis; performance from our Pharmaceutical segment generics program; and the adverse impact of pharmaceutical customer contract renewals. These factors were partially offset by contributions from the Patient Recovery Business acquisition.

GAAP and Non-GAAP Diluted EPS

($ per share)	2018	2017	Change
GAAP	**$ 0.81**	$ 4.03	**(80)%**
Restructuring and employee severance	**0.48**	0.11	
Amortization and other acquisition-related costs	**1.69**	1.13	
Impairments and (gain)/loss on disposal of assets	**4.64**	0.04	
Litigation (recoveries)/charges, net	**0.35**	0.09	
Transitional tax benefit, net	**(2.97)**	$ —	
Non-GAAP	**$ 5.00**	$ 5.40	**(7)%**

The sum of the components may not equal the total due to rounding.

During fiscal 2018 , GAAP diluted earnings per share attributable to Cardinal Health, Inc. ("diluted EPS") decreased 80 percent to $0.81 and non-GAAP diluted EPS decreased 7 percent to $5.00 .

Fiscal 2018 GAAP diluted EPS decreased primarily due to the factors impacting GAAP operating earnings and increased interest expense. These were partially offset by the net benefit from the U.S. Tax Cuts and Jobs Act ("Tax Act"), which includes a provisional transitional tax benefit of $936 million as well as the benefit from applying a lower federal tax rate to our U.S. pre-tax earnings.

Fiscal 2018 non-GAAP diluted EPS decreased primarily due to the factors impacting non-GAAP operating earnings and an increase in interest expense, partially offset by the benefit of applying a lower U.S. federal statutory tax rate under the Tax Act to U.S. pre-tax non-GAAP earnings.

Cash and Equivalents

Our cash and equivalents balance was $1.8 billion at June 30, 2018 compared to $6.9 billion at June 30, 2017 . The decrease in cash and equivalents during fiscal 2018 was due to $6.1 billion paid for acquisitions, $954 million paid for debt repayments, $581 million paid in dividends, $550 million paid for share repurchases and $384 million paid for capital expenditures. These cash decreases were offset in part by $2.8 billion of net cash provided by operating activities and $861 million of cash proceeds from the sale of our China distribution business.

Significant Developments in Fiscal 2018 and Trends

Acquisitions and Divestitures

Patient Recovery Business Acquisition
On July 29, 2017, we acquired the Patient Care, Deep Vein Thrombosis, and Nutritional Insufficiency businesses (the "Patient Recovery Business") from Medtronic plc for $6.1 billion in cash. The acquisition further expanded the Medical segment's portfolio of Cardinal Health Brand products.

China Distribution Business Divestiture
During fiscal 2018 we completed the divestiture of our pharmaceutical and medical products distribution business in China (the "China distribution business") to Shanghai Pharmaceuticals Holding Co., Ltd. for proceeds of $861 million (after adjusting for third party indebtedness and preliminary transaction adjustments). The proceeds are not reflective of tax obligations due in connection with the sale, for which we have recorded a liability of $59 million . We recognized a pre-tax loss of $41 million related to this divestiture.

naviHealth Divestiture
In June 2018, we signed a securities purchase agreement and a contribution and rollover agreement with investor entities controlled by Clayton, Dubilier & Rice ("CD&R") to sell our ownership interest in naviHealth for proceeds of $736 million (after adjusting for certain fees and expenses) and a 44% equity interest in a partnership that owns naviHealth. We also have certain call rights to reacquire naviHealth. We do not expect a cash tax impact from this transaction because the capital gain will be offset by capital loss carry-forwards . The transaction closed on August 1, 2018. We expect to record a pre-tax gain of more than $500 million in the first quarter of fiscal 2019.

Trends

Within our Pharmaceutical segment, we expect fiscal 2019 segment profit to be less than our fiscal 2018 segment profit due to the adverse impact of customer contract renewals, generics program performance, and the previously announced loss of a large pharmaceutical distribution customer. Our generics program performance includes the negative impact of generic pharmaceutical customer pricing changes partially offset by the benefits of Red Oak Sourcing. As is generally the case, the frequency, timing, magnitude and profit impact of pharmaceutical customer pricing changes and branded and generic pharmaceutical manufacturer pricing changes remain uncertain and their impact on Pharmaceutical segment profit and consolidated operating earnings in fiscal 2019 could be more or less than we expect.

The acquisition of the Patient Recovery Business increased Medical segment revenue and profit during fiscal 2018. We expect the acquisition to increase Medical segment profit further during fiscal 2019 due to the one additional month of results and the fiscal 2018 negative impact of the inventory fair value step up. We also expect the acquisition will increase amortization and acquisition-related costs in fiscal 2019 due to the size and complexity of the acquisition.

The performance of our Cordis business within our Medical segment declined significantly due to inventory challenges and increased operating costs in fiscal 2018. We expect Cordis performance to stabilize in fiscal 2019.

In early fiscal 2019, we implemented certain enterprise-wide cost-saving measures, which we expect to reduce our future operating expenses.

Tax Cuts and Jobs Act
The Tax Act was enacted in December 2017. The Tax Act, among other things, reduced the U.S. federal corporate tax rate from 35 percent to 21 percent and required companies to pay a one-time tax to repatriate, for U.S. purposes, earnings of certain foreign subsidiaries that were previously deferred for tax purposes. The rate change was effective at the beginning of calendar year 2018 and the application of the lower federal tax rate to our U.S. pre-tax earnings resulted in a significant favorable impact to our tax provision in fiscal 2018. Additionally, we recognized a $936 million provisional net transitional tax benefit during fiscal 2018, consisting of the remeasurement of our U.S. deferred tax assets and liabilities at the lower tax rate partially offset by the expense for the repatriation tax. We expect the lower federal statutory rate to be more beneficial in fiscal 2019 than in 2018; however, beginning in fiscal 2019, the Tax Act limits certain deductions and creates new taxes on certain foreign sourced earnings, which will offset some of the additional benefit.

We are still completing our accounting for the tax effects of the Tax Act because all of the necessary information is not currently available, prepared, or analyzed. As such, the amounts we have recorded are provisional estimates and, as permitted by the SEC, we will continue to assess the impact of enactment of the Tax Act and we may record additional provisional amounts or adjustments to provisional amounts during the first half of fiscal 2019.

Results of Operations

Revenue

	Revenue			Change	
(in millions)	**2018**	2017	2016	**2018**	2017
Pharmaceutical	**$ 121,241**	$116,463	$109,131	**4%**	7%
Medical	**15,581**	13,524	12,430	**15%**	9%
Total segment revenue	**136,822**	129,987	121,561	**5%**	7%
Corporate	**(13)**	(11)	(15)	**N.M.**	N.M.
Total revenue	**$ 136,809**	$129,976	$121,546	**5%**	7%

Fiscal 2018 Compared to Fiscal 2017

Pharmaceutical Segment
Fiscal 2018 Pharmaceutical segment revenue grew primarily due to sales growth from pharmaceutical distribution and specialty pharmaceutical customers, which together increased revenue by $9.4 billion. The increases were partially offset by the previously announced May 2017 expiration of a large pharmaceutical distribution mail order customer contract and the February 2018 divestiture of our China distribution business.

Medical Segment
Fiscal 2018 Medical segment revenue grew mainly due to $1.9 billion of contributions from acquisitions, which primarily consists of the Patient Recovery Business acquisition.

Fiscal 2017 Compared to Fiscal 2016

Pharmaceutical Segment
Fiscal 2017 Pharmaceutical segment revenue grew primarily due to sales growth from the addition of OptumRx and from other pharmaceutical distribution customers, including branded pharmaceutical price appreciation, all of which increased revenue by $7.0 billion.

Medical Segment
Fiscal 2017 Medical segment revenue grew primarily due to sales growth from new and existing customers and $212 million in contributions from acquisitions.

Cost of Products Sold

Cost of products sold f or fiscal 2018 and 2017 increased $6.2 billion (5 percent) and $8.4 billion (7 percent) compared to the prior-year periods, respectively, as a result of the same factors affecting the changes in revenue and gross margin.

Gross Margin

	Consolidated Gross Margin			Change	
(in millions)	**2018**	2017	2016	**2018**	2017
Gross margin	**$ 7,181**	$ 6,544	$ 6,543	**10%**	—%

Fiscal 2018 Compared to Fiscal 2017

Fiscal 2018 consolidated gross margin increased $637 million (10 percent) and was favorably impacted by acquisitions ($809 million), which primarily consists of the Patient Recovery Business acquisition.

Gross margin rate grew during fiscal 2018 , mainly due to acquisitions, which primarily consists of the Patient Recovery Business acquisition. Gross margin rate growth was partially offset by the negative impact of changes in pharmaceutical distribution product mix and performance in our Cordis business due to inventory challenges and increased manufacturing costs.

Fiscal 2017 Compared to Fiscal 2016

Fiscal 2017 consolidated gross margin was essentially flat versus the prior-year period.

Consolidated gross margin for fiscal 2017 was positively impacted by sales growth from pharmaceutical distribution customers ($260 million) and acquisitions in both segments ($132 million) and was negatively impacted by the previously disclosed loss of a large pharmaceutical distribution customer.

Gross margin rate contracted during fiscal 2017 , primarily due to generic pharmaceutical customer pricing changes, partially offset by the benefits from Red Oak Sourcing within our Pharmaceutical segment generics program.

Distribution, Selling, General and Administrative ("SG&A") Expenses

	SG&A Expenses			Change	
(in millions)	**2018**	2017	2016	**2018**	2017
SG&A expenses	**$ 4,596**	$ 3,775	$ 3,648	**22%**	3%

Fiscal 2018 Compared to Fiscal 2017

Fiscal 2018 SG&A expenses increased mainly due to acquisitions ($524 million), which primarily consists of the Patient Recovery Business acquisition, and enterprise-wide compensation related items.

Fiscal 2017 Compared to Fiscal 2016

Fiscal 2017 SG&A expenses increased primarily due to acquisitions ($112 million) and costs related to a multi-year project to replace certain Pharmaceutical segment finance and operating information systems, partially offset by reduced enterprise-wide incentive compensation.

Segment Profit

We evaluate segment performance based on segment profit, among other measures. See Note 16 of the "Notes to Consolidated Financial Statements" for additional information on segment profit.

	Segment Profit and Operating Earnings			Change	
(in millions)	**2018**	2017	2016	**2018**	2017
Pharmaceutical	**$ 1,992**	$ 2,187	$ 2,488	**(9)%**	(12)%
Medical	**662**	572	457	**16 %**	25 %
Total segment profit	**2,654**	2,759	2,945	**(4)%**	(6)%
Corporate	**(2,528)**	(639)	(486)	**296 %**	31 %
Total consolidated operating earnings	**$ 126**	$ 2,120	$ 2,459	**(94)%**	(14)%

Fiscal 2018 Compared to Fiscal 2017

Pharmaceutical Segment Profit
Fiscal 2018 Pharmaceutical segment profit decreased largely due to our generics program performance and the adverse impact of customer contract renewals. Our generics program performance includes the negative impact of generic pharmaceutical customer pricing changes partially offset by the benefits of Red Oak Sourcing. Performance from our specialty pharmaceutical products distribution and services business positively impacted Pharmaceutical segment profit.

Medical Segment Profit
Fiscal 2018 Medical segment profit increased largely due to acquisitions, inclusive of the unfavorable cost of products sold impact from the fair value step up of inventory acquired with the Patient Recovery Business acquisition. The increase was partially offset by performance from the Cordis business, and to a lesser extent, performance from other Cardinal Health Brand products. The performance from the Cordis business primarily reflects inventory challenges and increased operating costs.

Corporate
The changes in Corporate during fiscal 2018 are due to the factors discussed in the Other Components of Consolidated Operating Earnings section that follows.

Fiscal 2017 Compared to Fiscal 2016

Pharmaceutical Segment Profit
Fiscal 2017 Pharmaceutical segment profit decreased largely due to our generic program performance. The previously disclosed loss of a large pharmaceutical distribution customer, the adverse impact of customer contract renewals and reduced levels of branded pharmaceutical price appreciation also contributed to the decrease in Pharmaceutical segment profit.

Medical Segment Profit
Fiscal 2017 Medical segment profit increased due to strong performance from naviHealth, contributions from Cardinal Health branded products, reduced enterprise-wide incentive compensation, and contributions from distribution services. Cardinal Health branded products growth includes the prior year unfavorable impact on cost of products sold from the Cordis inventory fair value step up.

Corporate
The changes in Corporate during fiscal 2017 are due to the factors discussed in the Other Components of Consolidated Operating Earnings section that follows.

Other Components of Consolidated Operating Earnings

In addition to revenue, gross margin, and SG&A expenses discussed previously, consolidated operating earnings were impacted by the following:

(in millions)	2018	2017	2016
Restructuring and employee severance	**$ 176**	$ 56	$ 25
Amortization and other acquisition-related costs	**707**	527	459
Impairments and (gain)/loss on disposal of assets, net	**1,417**	18	21
Litigation (recoveries)/charges, net	**159**	48	(69)

Restructuring and Employee Severance
The increase in restructuring and employee severance during fiscal 2018 was primarily due to $125 million in contract termination costs to transition the distribution of our Medical segment's surgeon gloves in certain international markets from a third-party distribution arrangement to a direct distribution model.

Amortization and Other Acquisition-Related Costs
Amortization of acquisition-related intangible assets was $574 million, $395 million and $355 million for fiscal 2018 , 2017 and 2016 , respectively. The increase in amortization of acquisition-related intangible assets during fiscal 2018 was largely due to the Patient Recovery Business acquisition.

Transaction and integration costs associated with the acquisition of the Patient Recovery Business were $109 million and $54 million during fiscal 2018 and 2017, respectively.

Impairments and (gain)/loss on disposal of assets, net
During the fourth quarter of fiscal 2018, we recognized a $1.4 billion non-cash goodwill impairment charge related to our Medical segment, as discussed further in Note 5 of the "Notes to Consolidated Financial Statements." There was no tax benefit related to this goodwill impairment charge.

Litigation (Recoveries)/Charges, Net
The increases in litigation charges during fiscal 2018 and 2017 were due to an increase in estimated losses and legal defense costs associated with inferior vena cava (IVC) filter product liability claims.

During fiscal 2016 , we received and recognized income of $80 million from settlements of class action antitrust lawsuits in which we were a class member.

Earnings/(loss) Before Income Taxes

In addition to the items discussed above, earnings/(loss) before income taxes was impacted by the following:

	Earnings/(loss) Before Income Taxes			Change	
(in millions)	2018	2017	2016	2018	2017
Other (income)/expense, net	**$ 23**	$ (5)	$ 5	**N.M.**	N.M.
Interest expense, net	**329**	201	178	**64%**	13%
Loss on extinguishment of debt	**2**	—	—	**N.M.**	N.M.

Interest Expense, Net
Fiscal 2018 interest expense increased primarily due to new debt issued in June 2017 to fund a portion of the purchase price of the Patient Recovery Business acquisition.

Provision for Income Taxes

Generally, fluctuations in the effective tax rate are due to changes in the distribution of income among taxing jurisdictions with differing income tax rates and other reconciling items.

The fluctuations in the effective tax rate from fiscal 2017 to fiscal 2018 are primarily due to net benefits from the enactment of the Tax Act, the impact of nondeductible goodwill impairment charges, an increase in valuation allowances and a benefit from a capital loss due to international legal entity reorganization. The significant increase in valuation allowances were related to capital losses, credit carryforwards and net operating loss carryforwards in U.S. federal, U.S. state and international jurisdictions that will not likely be realized. A reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate from continuing operations is as follows (see Note 8 of the "Notes to Consolidated Financial Statements" for additional information):

	2018 (1)	2017 (2)	2016 (2)
Provision at Federal statutory rate	**28.1 %**	35.0 %	35.0 %
State and local income taxes, net of federal benefit	**(16.0)**	1.0	1.5
Foreign tax rate differential	**(48.4)**	(7.3)	(0.6)
Nondeductible/nontaxable items	**(10.2)**	0.2	1.0
Goodwill impairment	**(124.7)**	—	—
Tax Act	**410.9**	—	—
Capital loss	**71.4**	—	—
Change in valuation allowances	**(76.9)**	7.7	0.1
Foreign tax credits	**27.3**	(1.6)	(0.1)
China tax	**(25.8)**	—	—
Other	**(21.9)**	(2.3)	0.2
Effective income tax rate	**213.8 %**	32.7 %	37.1 %

(1) The effective income tax rate for fiscal 2018 represents an income tax benefit tax rate.

(2) The effective income tax rates for fiscal 2017 and 2016 represents income tax expense tax rates.

Fiscal 2018

The fiscal 2018 effective income tax rate was impacted by various items including benefits from the enactment of the Tax Act, the impact of nondeductible goodwill impairment charges, changes in valuation allowances and a benefit from a capital loss due to an international legal entity reorganization.

The net benefit from the Tax Act for fiscal 2018 includes a provisional net tax benefit of $977 million related to the remeasurement of our deferred tax assets and liabilities to the new federal statutory rate, the benefit from the impact of applying a lower federal tax rate to our year-to-date U.S. pre-tax earnings and a provisional tax expense of $41 million for the one-time repatriation tax applied to our undistributed foreign earnings.

Our effective tax rate for fiscal 2018 also includes $59 million of tax expense recognized in connection with the sale of our China distribution business.

Ongoing Audits

The IRS is currently conducting audits of fiscal years 2008 through 2014.

Fiscal 2017 and Fiscal 2016

The fiscal 2017 effective income tax rate was favorably impacted by the realignment of foreign subsidiaries in anticipation of closing the acquisition of the Patient Recovery Business and also from deductions related to U.S. production activities. The state and local income tax rate decreased primarily due to resolutions with state taxing authorities.

The fiscal 2016 effective income tax rate was favorably impacted by the state and local income tax rate, which decreased due to resolutions with state taxing authorities and a shift in the distribution of income among jurisdictions. The foreign tax rate differential decreased primarily due to the deferred tax benefits recognized in fiscal 2015.

Liquidity and Capital Resources

We currently believe that, based on available capital resources (cash on hand and committed credit facilities) and projected operating cash flow, we have adequate capital resources to fund working capital needs; currently anticipated capital expenditures; currently anticipated business growth and expansion; contractual obligations; tax payments; and current and projected debt service requirements, dividends, and share repurchases. If we decide to engage in one or more additional acquisitions, depending on the size and timing of such transactions, we may need to access capital markets for additional financing.

Cash and Equivalents

Our cash and equivalents balance was $1.8 billion at June 30, 2018 compared to $6.9 billion at June 30, 2017 . The decrease in cash and equivalents during fiscal 2018 was due to $6.1 billion deployed for acquisitions during the year, $954 million used for debt repayments, $581 million paid in dividends, $550 million paid for share repurchases and $384 million paid for capital expenditures, offset in part by $2.8 billion net cash provided by operating activities and $861 million of proceeds from the divestiture of the China distribution business. N et cash provided by operating activities increased by $1.6 billion from fiscal 2017 primarily due to working capital changes in part as a result of timing of customer and vendor payments related to the new Pharmaceutical segment finance and operating information systems. At June 30, 2018 , our cash and equivalents were held in cash depository accounts with major banks or invested in high quality, short-term liquid investments.

In August 2018, we completed the sale of our interest in naviHealth to CD&R and received proceeds of $736 million (after adjusting for certain fees and expenses) and a 44% equity interest in a partnership that owns naviHealth.

The increase in cash and equivalents during fiscal 2017 of $4.5 billion was due to proceeds from a $5.2 billion debt issuance and $1.2 billion provided by operating activities, partially offset by $600 million paid for share repurchases, $577 million paid in dividends, $387 million paid in capital expenditures and $310 million in debt repayments. The $1.8 billion decrease in net cash provided by operating activities in fiscal 2017 was primarily due to an increase in working capital as a result of changes in timing of customer and vendor payments, some of which related to implementation of the new Pharmaceutical segment finance and operating information systems.

The decrease in cash and equivalents during fiscal 2016 of $2.2 billion was due to $3.6 billion deployed for acquisitions, $651 million paid for share repurchases, $512 million paid in dividends and $465 million paid in capital expenditures, partially offset by net cash provided by operating activities of $3.0 billion , which was positively impacted by increased net earnings and working capital improvements.

The cash and equivalents balance at June 30, 2018 included $557 million of cash held by subsidiaries outside of the United States. Though our foreign earnings as of December 31, 2017 have been deemed to be repatriated from a U.S. federal tax perspective, we have not yet completed our assessment of the Tax Act on our plans to reinvest foreign earnings and as such have not changed our prior conclusion that the earnings are indefinitely reinvested. As such, no non-U.S. taxes related to repatriation were recorded at June 30, 2018 . If we decide to repatriate these earnings in the future, we may be subject to certain non-U.S. taxes at that time. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information on the Tax Act.

Changes in working capital, which impact operating cash flow, can vary significantly depending on factors such as the timing of customer payments, inventory purchases and payments to vendors in the regular course of business, as well as fluctuating working capital needs driven by customer and product mix.

Other Financing Arrangements and Financial Instruments

Credit Facilities and Commercial Paper

In addition to cash and equivalents and operating cash flow, other sources of liquidity at June 30, 2018 include a $2.0 billion commercial paper program, backed by a $2.0 billion revolving credit facility. We also have a $1.0 billion committed receivables sales facility program. At June 30, 2018 , we had no amounts outstanding under our revolving credit facility or our committed receivables sales facility program. Under our commercial paper and committed receivables programs, we had maximum amounts outstanding of $1.7 billion and an average daily amount outstanding of $277 million during fiscal 2018. Our revolving credit facility and committed receivables sales facility programs require us to maintain, as of the end of any calendar quarter, a consolidated leverage ratio of no more than 4.25-to-1 , which will reduce to 3.25-to-1 in March 2019. As of June 30, 2018 , we were in compliance with this financial covenant.

Long-Term Obligations

In June 2018, we repaid our $550 million 1.95% Notes due 2018 in full at maturity. At June 30, 2018 , we had total long-term obligations of $8.0 billion . In fiscal 2018 we sold our China distribution business, including its debt which was $378 million as of June 30, 2017. See Note 4 of the “Notes to Consolidated Financial Statements” for further discussion of this divestiture.

In June 2017, we sold $1 billion aggregate principal amount of 1.948% notes due 2019, $1.15 billion aggregate principal amount of 2.616% notes due 2022, $350 million aggregate principal amount of floating rate notes due 2022, $750 million aggregate principal amount of 3.079% notes due 2024, $1.35 billion aggregate principal amount of 3.410% notes due 2027 and $600 million aggregate principal amount of 4.368% notes due 2047. In addition to funding a portion of the purchase price of the acquisition of the Patient Recovery Business described below, in July 2017 we used a portion of the debt proceeds to redeem our $400 million 1.7% notes due 2018.

Funding for Acquisition of Medtronic's Patient Recovery Business

On July 29, 2017 , we acquired the Patient Recovery Business from Medtronic for $6.1 billion in cash. We funded the acquisition through $4.5 billion in new long-term debt issued in June 2017, the use of existing cash and borrowings under existing credit arrangements.

Risk Management

We use interest rate swaps, foreign currency contracts and commodity contracts to manage our exposure to cash flow variability. We also use interest rate swaps to protect the value of our debt and use foreign currency forward contracts to protect the value of our existing and forecasted foreign currency assets and liabilities. See the "Quantitative and Qualitative Disclosures About Market Risk" section as well as Note 1 and Note 12 of the “Notes to Consolidated Financial Statements” for information regarding the use of financial instruments and derivatives as well as foreign currency, interest rate and commodity exposures.

Capital Deployment

Capital Expenditures

Capital expenditures during fiscal 2018 , 2017 and 2016 were $384 million , $387 million and $465 million , respectively.

We expect capital expenditures in fiscal 2019 to be between $360 million and $390 million primarily for information technology projects, growth projects in our core business and for integration of the acquisition of the Patient Recovery Business.

Dividends

During fiscal 2018 , we paid quarterly dividends totaling $1.85 per share, an increase of 3 percent from fiscal 2017 .

On May 9, 2018, our Board of Directors approved a quarterly dividend of $0.4763 per share, or $1.91 per share on an annualized basis, which was paid on July 15, 2018 to shareholders of record on July 2, 2018.

On August 8, 2018, our Board of Directors approved a quarterly dividend of $0.4763 per share, or $1.91 per share on an annualized basis, which will be paid on October 15, 2018 to shareholders of record on October 1, 2018.

Share Repurchases

During fiscal 2018 , we repurchased $550 million of our common shares. We funded the repurchases with available cash and short-term borrowing. At June 30, 2018 , we had $893 million r emaining under our existing $1.0 billion share repurchase program.

On August 16, 2018 we entered into an accelerated share repurchase program ("ASR") to purchase shares of our common stock for an aggregate purchase price of $ 600 million and received an initial delivery of 9.5 million shares of common stock using a reference price of $ 50.45 . The program is expected to conclude in the second quarter of fiscal 2019.

During fiscal 2017, we repurchased $600 million of our common shares. We funded the repurchases with available cash.

Acquisition of Medtronic's Patient Recovery Business

Described above under "Funding for Acquisition of Medtronic's Patient Recovery Business."

Contractual Obligations

At June 30, 2018 , our contractual obligations, including estimated payments due by period, are as follows:

(in millions)	2019	2020 to 2021	2022 to 2023	There-after	Total
Long-term debt and short-term borrowings (1)	$ 999	$ 964	$ 2,259	$ 4,783	**$ 9,005**
Interest on long-term debt	303	531	420	2,068	**3,322**
Capital lease obligations (2)	2	4	2	—	**8**
Operating leases (3)	113	174	99	103	**489**
Purchase obligations and other payments (4)	534	501	382	196	**1,613**
Total contractual obligations (5)	**$ 1,951**	**$ 2,174**	**$ 3,162**	**$ 7,150**	**$ 14,437**

(1) Represents maturities of our long-term debt obligations and other short-term borrowings excluding capital lease obligations described below. See Note 7 of the “Notes to Consolidated Financial Statements” for further information.

(2) Represents maturities of our capital lease obligations included within long-term obligations in our consolidated balance sheets.

(3) Represents minimum rental payments for operating leases having initial or remaining non-cancelable lease terms as described in Note 9 of the “Notes to Consolidated Financial Statements.”

(4) A purchase obligation is defined as an agreement to purchase goods or services that is legally enforceable and specifies all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and approximate timing of the transaction. The purchase obligation amounts disclosed above represent estimates of the minimum for which we are obligated and the time period in which cash outflows will occur. Purchase orders and authorizations to purchase that involve no firm commitment from either party are excluded from the above table. In addition, contracts that can be unilaterally canceled with no termination fee or with proper notice are excluded from our total purchase obligations except for the amount of the termination fee or the minimum amount of goods that must be purchased during the requisite notice period. Purchase obligations and other payments also includes quarterly payments of $45.6 million that we are required to pay CVS Health Corporation ("CVS") in connection with Red Oak Sourcing and will be in place for the remaining six years of the agreement. See Note 9 of the “Notes to Consolidated Financial Statements” for additional information.

(5) Long-term liabilities, such as unrecognized tax benefits, deferred taxes and other tax liabilities, have been excluded from the above table due to the inherent uncertainty of the underlying tax positions or because of the inability to reasonably estimate the timing of any cash outflows. See Note 8 of the "Notes to Consolidated Financial Statements" for further discussion of income taxes.

Off-Balance Sheet Arrangements

We had no significant "off-balance sheet arrangements" at June 30, 2018 , as that term is defined in the SEC rules.

Recent Financial Accounting Standards

See Note 1 of the “Notes to Consolidated Financial Statements” for a discussion of recent financial accounting standards.

Critical Accounting Policies and Sensitive Accounting Estimates

Critical accounting policies are those accounting policies that (i) can have a significant impact on our financial condition and results of operations and (ii) require the use of complex and subjective estimates based upon past experience and management's judgment. Other people applying reasonable judgment to the same facts and circumstances could develop different estimates. Because estimates are inherently uncertain, actual results may differ. In this section, we describe the significant policies applied in preparing our consolidated financial statements that management believes are the most dependent on estimates and assumptions. For further discussion of accounting policies for items within this section and of additional accounting policies, see Note 1 of the "Notes to Consolidated Financial Statements."

Allowance for Doubtful Accounts

The allowance for doubtful accounts includes general and specific reserves. We determine our allowance for doubtful accounts by reviewing accounts receivable aging, industry trends, customer financial strength and credit standing, historical write-off trends and payment history. We regularly evaluate how changes in economic conditions may affect credit risks. See Note 1 of the "Notes to Consolidated Financial Statements" for further information on our policy for Receivables and Allowance for Doubtful Accounts.

A hypothetical 0.1 percent increase or decrease in the reserve as a percentage of trade receivables at June 30, 2018 , would result in an increase or decrease in bad debt expense of $8 million . We believe the reserve maintained and expenses recorded in fiscal 2018 are appropriate.

At this time, we are not aware of any analytical findings or customer issues that are likely to lead to a significant future increase in the allowance for doubtful accounts as a percentage of revenue. The following table presents information regarding the allowance for doubtful accounts over the past three fiscal years:

(in millions, except percentages)	2018	2017	2016
Allowance for doubtful accounts at beginning of period	**$ 137**	$ 135	$ 135
Charged to costs and expenses	**114**	60	74
Reduction to allowance for customer deductions and write-offs	**(111)**	(58)	(74)
Allowance for doubtful accounts at end of period	**$ 139**	$ 137	$ 135
Allowance as a percentage of customer receivables	**1.8%**	1.7%	1.8%
Allowance as a percentage of revenue	**0.10%**	0.11%	0.11%

The sum of the components may not equal the total due to rounding.

Inventories

A substantial portion of our inventories (56 percent at both June 30, 2018 and 2017) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These are primarily merchandise inventories at the core pharmaceutical distribution facilities within our Pharmaceutical segment ("distribution facilities"). The LIFO impact on the consolidated statements of earnings depends on pharmaceutical manufacturer price appreciation or deflation and our fiscal year-end inventory levels, which can be meaningfully influenced by customer buying behavior immediately preceding our fiscal year-end. Historically, prices for branded pharmaceuticals have generally tended to rise, resulting in an increase in cost of products sold, whereas prices for generic pharmaceuticals generally tend to decline, resulting in a decrease in cost of products sold. See Note 1 of the "Notes to Consolidated Financial Statements" for further information on our policy for Inventories.

Using LIFO, if there is a decrease in inventory levels that have experienced pharmaceutical price appreciation, the result generally will be a decrease in future cost of products sold as our older inventory is held at a lower cost. Conversely, if there is a decrease in inventory levels that have experienced a pharmaceutical price decline, the result generally will be an increase in future cost of products sold as our older inventory is held at a higher cost.

We believe that the average cost method of inventory valuation provides a reasonable approximation of the current cost of replacing inventory within these distribution facilities. As such, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation. If we had used the average cost method of inventory valuation for all inventory within the distribution facilities, the value of our inventories would not have changed in fiscal 2018 or 2017 because inventories valued at LIFO were $92 million and $46 million higher than the average cost value at June 30, 2018 and 2017 , respectively. We do not record inventories in excess of replacement cost. As such, we did not record a LIFO reserve in fiscal 2018 and 2017 .

Our remaining inventory that is not valued at the lower of LIFO or market is stated at the lower of cost, using the first-in, first-out method, or market. Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $147 million and $76 million at June 30, 2018 and 2017 , respectively. The increase in the reserves for excess and obsolete inventory during fiscal 2018 was driven by increased inventory reserves within our Medical segment Cordis business and the Patient Recovery acquisition.

We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory, age and expiration dates of on-hand inventory and manufacturer return policies. If actual conditions are less favorable than our assumptions, additional inventory reserves may be required.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. For further discussion of the Business Combinations accounting policy, see Note 1 of the “Notes to Consolidated Financial Statements.”

Critical estimates and assumptions include: expected future cash flows for customer relationships, trademarks, trade names, patents, developed technology, in-process research and development ("IPR&D") and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. See Note 2 of the “Notes to Consolidated Financial Statements” for additional information regarding our acquisitions.

Goodwill and Other Indefinite-Lived Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are tested for impairment annually or when indicators of impairment exist. Goodwill impairment testing involves a comparison of the estimated fair value of reporting units to the respective carrying amount, which may be performed utilizing either a qualitative or quantitative assessment. Qualitative factors are first assessed to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If it is determined that it is more likely than not that the fair value does not exceed the carrying amount, then a quantitative test is performed. The quantitative goodwill impairment test involves a comparison of the estimated fair value of the reporting unit to the respective carrying amount. A reporting unit is defined as an operating segment or one level below an operating segment (also known as a component).

We have two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. These operating segments are comprised of divisions (which are components), for which discrete financial information is available. Components are aggregated into reporting units for purposes of goodwill impairment testing to the extent that they share similar economic characteristics. Our reporting units are: Pharmaceutical operating segment (excluding our Nuclear Pharmacy Services division); Nuclear Pharmacy Services division; Medical operating segment (excluding our Cardinal Health at Home division and naviHealth division) (“Medical Unit”); Cardinal Health at Home division; and naviHealth division.

Goodwill impairment testing involves judgment, including the identification of repo rting units, qualitative evaluation of events and circumstances to determine if it is more likely than not that an impairment exists, and, if necessary, the estimation of the fair value of the applicable reporting unit. Our qualitative evaluation considers the weight of evidence and significance of all identified events and circumstances and most relevant drivers of fair value, both positive and negative, in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

Our determination of estimated fair value of our reporting units is based on a combination of the income-based and market-based approaches (using discount rates ranging from 8.5 percent to 13.5 percent) . We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets. We also use the guideline transaction method to determine fair value based on pricing multiples derived from the sale of companies that are similar to our reporting units.

Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment. If a reporting unit fails to achieve expected earnings or otherwise fails to meet current financial plans, or if there were changes to any other key assumptions used in the tests, the reporting unit could incur a goodwill impairment in a future period.

We performed annual impairment testing in fiscal 2018, 2017 and 2016 and, with the exception of our Medical Unit in fiscal 2018, concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value. As discussed further in Note 5 of the "Notes to Consolidated Financial Statements," during the fourth quarter of fiscal 2018 we recognized a $1.4 billion goodwill impairment charge related to our Medical Unit, which is included in impairments and loss on disposal of assets in our consolidated statements of earnings. The impairment was primarily driven by inventory and cost challenges within our Cordis business which furthered in the fourth quarter of fiscal 2018. There was no tax benefit related to the goodwill impairment charge. If the fair value of the Medical Unit were to decline below its carrying value in subsequent periods, additional impairment would be recognized in those periods. For any of our other reporting units, there would not have been an impairment for fiscal 2018 if we raised the discount rate by 1 percent.

The impairment test for indefinite-lived intangibles other than goodwill (primarily IPR&D) involves first assessing qualitative factors to determine if it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying amount. If so, then a quantitative test is performed to compare the estimated fair value of the indefinite-lived intangible asset to the respective asset's carrying amount. Our qualitative evaluation requires the use of estimates and significant judgments and considers the weight of evidence and significance of all identified events and circumstances and most relevant drivers of fair value, both positive and negative, in determining whether it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying amount.

See Note 1 of "Notes to Consolidated Financial Statements" for additional information regarding goodwill and other intangible assets.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputed transactions are researched and resolved based upon findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the type of claim and status of review. For further discussion on the Vendor Reserves, see Note 1 of “Notes to Consolidated Financial Statements.”

Vendor reserves were $45 million and $50 million at June 30, 2018 and 2017 , respectively. Approximately 69 percent of the vendor reserve at the end of fiscal 2018 pertained to the Pharmaceutical segment compared to 77 percent at the end of fiscal 2017 . The reserve balance will fluctuate due to variations in outstanding claims from period-to-period, timing of resolutions and specific vendor issues.

The ultimate outcome of specific claims may be different than our original estimate and may require adjustment. We believe, however, that reserves recorded for such disputes are reasonable based upon current facts and circumstances.

Loss Contingencies and Self-Insurance

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or outcomes can occur, assessing contingencies is highly subjective and requires judgments about future events.

We also self-insure for employee healthcare, certain product liability matters, auto liability, property and workers' compensation and maintain insurance for individual losses exceeding certain limits when available.

Self-insurance accruals include an estimate for expected settlements on pending claims, defense costs, administrative fees, claims adjustment costs and an estimate for claims incurred but not reported. For certain types of exposures, we develop the estimate of expected ultimate costs to settle each claim based on specific information related to each claim if available. Other estimates are based on an assessment of outstanding claims, historical analysis and current payment trends. For claims incurred but not reported, the liabilities are calculated and derived in accordance with generally accepted actuarial practices or using an estimated lag period.

We regularly review contingencies and self-insurance accruals to determine whether our accruals and related disclosures are adequate. Examples of such contingencies include the New York Opioid Stewardship Act, various lawsuits related to the distribution of prescription opioid pain medications and the Cordis IVC filter lawsuits. The amount of loss may differ from these estimates. See Note 9 of the “Notes to Consolidated Financial Statements” for additional information regarding loss contingencies and product liability lawsuits.

Provision for Income Taxes

We account for income taxes using the asset and liability method. Deferred tax assets and liabilities are measured using enacted tax rates in the respective jurisdictions in which we operate. Our income tax expense, deferred income tax assets and liabilities, and unrecognized tax benefits reflect management's assessment of estimated future taxes to be paid on items in the consolidated financial statements.

The following table presents information about our tax position at June 30:

(in millions)	2018	2017
Total deferred income tax assets (1)	**$ 848**	$ 692
Valuation allowance for deferred income tax assets (2)	**(412)**	(237)
Net deferred income tax assets	**436**	455
Total deferred income tax liabilities	**(2,213)**	(2,331)
Net deferred income tax liability	**$ (1,777)**	$ (1,876)

(1) Total deferred income tax assets included $526 million and $378 million of loss and tax credit carryforwards at June 30, 2018 and 2017 , respectively.

(2) The valuation allowance primarily relates to federal, state and international loss and credit carryforwards for which the ultimate realization of future benefits is uncertain.

Expiring or unusable loss and credit carryforwards and the required valuation allowances are adjusted quarterly when it is more likely than not that at least a portion of the respective deferred tax assets will not be realized. After applying the valuation allowances, we do not anticipate any limitations on our use of any of the other net deferred income tax assets described above. Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement.

Our assumptions and estimates around uncertain tax positions require significant judgment; the actual amount of tax benefit related to uncertain tax positions may differ from these estimates. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information regarding unrecognized tax benefits.

We believe that our estimates for the valuation allowances against deferred tax assets and unrecognized tax benefits are appropriate based on current facts and circumstances. The amount we ultimately pay when matters are resolved may differ from the amounts accrued. Changes in our current estimates due to unanticipated market conditions, tax law changes or other factors could have a material effect on our ability to utilize deferred tax assets. For a further discussion on Provision for Income Taxes, see Note 8 of the "Notes to the Consolidated Financial Statements."

The calculation of our tax liabilities includes estimates for uncertainties in the application of broad and complex changes to the U.S. tax code as per the Tax Cuts and Jobs Act ("the Tax Act") as enacted by the United States government on December 22, 2017. Although we are still completing our accounting for the tax effects of the Tax Act, we have made reasonable estimates and recorded provisional amounts based on management judgment and our current understanding of the Tax Act which is subject to further interpretation by the Internal Revenue Service ("IRS"). See Note 8 of the "Notes to Consolidated Financial Statements" for additional information regarding the Tax Act.

Share-Based Compensation

Employee share-based compensation is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The grant date market price of our common shares determines the fair value of restricted share units and performance share units. The fair value of stock options is determined using a lattice valuation model. We believe the lattice model provides reasonable estimates because it takes into account employee exercise patterns based on changes in our stock price and other variables and it provides for a range of input assumptions.

We analyze historical data to estimate option exercise behaviors and post-vesting forfeitures. The expected life of the options granted, which represents the length of time in years that the options granted are expected to be outstanding, is calculated from the option valuation model. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years).

Forfeiture estimates for all types of awards are adjusted as circumstances change and ultimately reflect actual forfeitures when an award vests. Actual forfeitures in future reporting periods could be higher or lower than our current estimates.

Compensation expense for nonvested performance share units depends on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. See Note 17 of the "Notes to Consolidated Financial Statements" for additional information regarding share-based compensation.

Explanation and Reconciliation of Non-GAAP Financial Measures

This report, including the "Fiscal 2018 Overview" section within MD&A, contains financial measures that are not calculated in accordance with GAAP. In addition to analyzing our business based on financial information prepared in accordance with GAAP, we use these non-GAAP financial measures internally to evaluate our performance, evaluate the balance sheet, engage in financial and operational planning, and determine incentive compensation because we believe that these measures provide additional perspective on and, in some circumstances are more closely correlated to, the performance of our underlying, ongoing business. We provide these non-GAAP financial measures to investors as supplemental metrics to assist readers in assessing the effects of items and events on our financial and operating results on a year-over-year basis and in comparing our performance to that of our competitors. However, the non-GAAP financial measures that we use may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. The non-GAAP financial measures disclosed by us should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations to those financial statements set forth below should be carefully evaluated.

Exclusions from Non-GAAP Financial Measures

Management believes it is useful to exclude the following items from the non-GAAP measures presented in this report for its own and for investors' assessment of the business for the reasons identified below:

- LIFO charges and credits are excluded because the factors that drive last-in first-out ("LIFO") inventory charges or credits, such as pharmaceutical manufacturer price appreciation or deflation and year-end inventory levels (which can be meaningfully influenced by customer buying behavior immediately preceding our fiscal year-end), are largely out of our control and cannot be accurately predicted. The exclusion of LIFO charges and credits from non-GAAP metrics facilitates comparison of our current financial results to our historical financial results and to our peer group companies' financial results.
- Restructuring and employee severance costs are excluded because they are not part of the ongoing operations of our underlying business.
- Amortization and other acquisition-related costs, which include transaction costs, integration costs, and changes in the fair value of contingent consideration obligations, are excluded primarily for consistency with the presentation of the financial results of our peer group companies. Additionally, costs for amortization of acquisition-related intangible assets are non-cash amounts, which are variable in amount and frequency and are significantly impacted by the timing and size of acquisitions, so their exclusion facilitates comparison of historical, current and forecasted financial results. We also exclude other acquisition-related costs, which are directly related to an acquisition but do not meet the criteria to be recognized on the acquired entity's initial balance sheet as part of the purchase price allocation. These costs are also significantly impacted by the timing, complexity and size of acquisitions.
- Impairments and gain or loss on disposal of assets are excluded because they do not occur in or reflect the ordinary course of our ongoing business operations and are inherently unpredictable in timing and amount, and in the case of impairments, are non-cash amounts, so their exclusion facilitates comparison of historical, current and forecasted financial results.
- Litigation recoveries or charges, net are excluded because they often relate to events that may have occurred in prior or multiple periods, do not occur in or reflect the ordinary course of our business and are inherently unpredictable in timing and amount.
- Loss on extinguishment of debt is excluded because it does not typically occur in the normal course of business and may obscure analysis of trends and financial performance. Additionally, the amount and frequency of this type of charge is not consistent and is significantly impacted by the timing and size of debt extinguishment transactions.
- Transitional tax benefit, net related to the Tax Cuts and Jobs Act is excluded because it results from the one-time impact during the one-year measurement period of a very significant change in the U.S. federal corporate tax rate and, due to the significant size of the benefit, obscures analysis of trends and financial performance. The transitional tax benefit includes the initial estimate and measurement period adjustments for the re-measurement of deferred tax assets and liabilities due to the reduction of the U.S. federal corporate income tax rate and the repatriation tax on undistributed foreign earnings, both of which are subject to adjustment during an up to 12 month measurement period.

The tax effect for each of the items listed above, other than the transitional tax benefit item, is determined using the tax rate and other tax attributes applicable to the item and the jurisdiction(s) in which the item is recorded. The gross, tax and net impact of each item are presented with our GAAP to non-GAAP reconciliations.

Explanation and Reconciliation of Non-GAAP Financial Measures

Definitions

Growth rate calculation : growth rates in this report are determined by dividing the difference between current period results and prior period results by prior period results.

Non-GAAP operating earnings : operating earnings excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets and (5) litigation (recoveries)/charges, net.

Non-GAAP earnings before income taxes : earnings before income taxes excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net and (6) loss on extinguishment of debt.

Non-GAAP Net Earnings attributable to Cardinal Health, Inc.: net earnings attributable to Cardinal Health, Inc. excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net, (6) loss on extinguishment of debt, each net of tax, and (7) transitional tax benefit related to the Tax Cuts and Jobs Act.

Non-GAAP effective tax rate : (provision for income taxes adjusted for (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net, (6) loss on extinguishment of debt, and (7) transitional tax benefit, (net) divided by (earnings before income taxes adjusted for the first six items).

Non-GAAP diluted EPS attributable to Cardinal Health, Inc. : non-GAAP net earnings attributable to Cardinal Health, Inc. divided by diluted weighted-average shares outstanding.

Explanation and Reconciliation of Non-GAAP Financial Measures

1 from continuing operations

2 attributable to Cardinal Health, Inc.

3 Reflects the estimated net transitional benefit from the re-measurement of our deferred tax assets and liabilities partially offset by the repatriation tax on cash and earnings of foreign subsidiaries. We have not yet completed our analysis of the impact of the Tax Act and, as such, these amounts are provisional estimates and we may record additional provisional amounts or adjustments to the provisional amounts in future periods.

4 Fiscal year 2018 includes a goodwill impairment charge of $1.4 billion related to our Medical segment. There was no tax benefit related to this goodwill impairment charge.

The sum of the components may not equal the total due to rounding.
We apply varying tax rates depending on the item's nature and tax jurisdiction where it is incurred.

Selected Financial Data

The consolidated financial data below includes all business combinations as of the date of acquisition that occurred during these periods. The following selected consolidated financial data should be read in conjunction with the consolidated financial statements and related notes and MD&A.

(in millions, except per common share amounts)	2018 [1,2]	2017	2016	2015	2014
Earnings Data:					
Revenue	**$ 136,809**	$ 129,976	$ 121,546	$ 102,531	$ 91,084
Operating earnings	**126**	2,120	2,459	2,161	1,885
Earnings from continuing operations	**259**	1,294	1,431	1,212	1,163

Discontinued operations	**—**	—	—	0.01	0.01
Net basic earnings per common share attributable to Cardinal Health, Inc.	**$ 0.82**	$ 4.06	$ 4.36	$ 3.66	$ 3.42
Diluted earnings per common share attributable to Cardinal Health, Inc.:					
Continuing operations	**$ 0.81**	$ 4.03	$ 4.32	$ 3.61	$ 3.37
Discontinued operations	**—**	—	—	0.01	0.01
Net diluted earnings per common share attributable to Cardinal Health, Inc.	**$ 0.81**	$ 4.03	$ 4.32	$ 3.62	$ 3.38
Cash dividends declared per common share	**$ 1.8635**	$ 1.8091	$ 1.6099	$ 1.4145	$ 1.2500
Balance Sheet Data:					
Total assets	**$ 39,951**	$ 40,112	$ 34,122	$ 30,142	$ 26,033
Long-term obligations, less current portion	**8,012**	9,068	4,952	5,211	3,171
Total Cardinal Health, Inc. shareholders' equity	**6,059**	6,808	6,554	6,256	6,401

[1] During the fourth quarter of fiscal 2018, we recognized a non-cash goodwill impairment charge of $1.4 billion related to our Medical segment. There was no tax benefit related to this goodwill impairment charge.

[2] During fiscal 2018, the United States enacted the Tax Cuts and Jobs Act. See Note 8 for more information.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to cash flow and earnings fluctuations as a result of certain market risks. These market risks primarily relate to foreign exchange, interest rate, and commodity price-related changes. We maintain a hedging program to manage volatility related to some of these market exposures which employs operational, economic, and derivative financial instruments in order to mitigate risk. See Note 1 and Note 12 of the "Notes to Consolidated Financial Statements" for further discussion regarding our use of derivative instruments.

Foreign Exchange Rate Sensitivity

By the nature of our global operations, we are exposed to cash flow and earnings fluctuations resulting from foreign exchange rate variation. These exposures are transactional and translational in nature. The following foreign currencies represent the principal drivers of our foreign exchange exposure: Canadian dollar, Euro, Thai baht, Mexican peso and Chinese renminbi.

We apply a Value-At-Risk ("VAR") methodology to our transactional and translational exposures. The VAR model is a risk estimation tool and is not intended to represent actual losses in fair value that could be incurred.

Transactional Exposure

Transactional exposure arises from the purchase and sale of goods and services in currencies other than our functional currency or the functional currency of our subsidiaries. At the end of each fiscal year we perform sensitivity analyses on our forecasted transactional exposure for the upcoming fiscal year. These analyses include the estimated impact of our hedging program, which is designed to mitigate transactional exposure. Applying a VAR methodology to our transactional exposure and including the impact of our hedging program, the potential maximum loss in earnings for the upcoming fiscal year is estimated to be $26 million, which is based on a one-year horizon and a 95 percent confidence level. Under the same methodology, at June 30, 2017, our potential maximum loss in earnings for the upcoming fiscal year was estimated to be $19 million.

Translational Exposure

We have exposure related to the translation of financial statements of our foreign operations into U.S. dollars, our functional currency. Applying a VAR methodology to our translational exposure, the potential maximum loss in earnings for the upcoming fiscal year is estimated to be $9 million, which is based on a one-year horizon and a 95 percent confidence level. Under the same methodology, at June 30, 2017, our potential maximum loss in earnings for the upcoming fiscal year was estimated to be $14 million.

Interest Rate Sensitivity

We are exposed to changes in interest rates primarily as a result of our borrowing and investing activities to maintain liquidity and fund operations. The nature and amount of our long-term and short-term debt can be expected to fluctuate as a result of business requirements, market conditions and other factors. Our policy is to manage exposures to interest rates using a mix of fixed and floating rate debt as deemed appropriate by management. We utilize interest rate swap instruments to mitigate our exposure to interest rate movements.

As part of our risk management program, we perform an annual sensitivity analysis on our forecasted exposure to interest rates for the upcoming fiscal year. This analysis assumes a hypothetical 50 basis point change in interest rates. At June 30, 2018 and 2017 , the potential increase or decrease in annual interest expense under this analysis as a result of this hypothetical change was $15 million and $16 million, respectively.

We are also exposed to market risk from changes in interest rates related to our cash and cash equivalents, which includes marketable securities that are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. The fair value of our cash and cash equivalents is subject to change primarily as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness. At June 30, 2018 , a hypothetical increase or decrease of 50 basis points in interest rates would result in no change in the estimated fair value. At June 30, 2017 , a hypothetical increase or decrease of 50 basis points in interest rates would result in a potential increase or decrease of $1 million in the estimated fair value.

Commodity Price Sensitivity

We are directly exposed to market price changes for certain commodities, including oil-based resins, nitrile, cotton, diesel fuel and latex. We typically purchase raw materials at either market prices or prices tied to a commodity index and some finished goods at prices based in part on a commodity price index.

As part of our risk management program, we perform sensitivity analysis on our forecasted direct commodity exposure for the upcoming fiscal year. Our forecasted direct commodity exposure at June 30, 2018 increased approximately $190 million from June 30, 2017 primarily due to the acquisition of the Patient Recovery Business. At June 30, 2018 and 2017 , we had hedged a portion of these direct commodity exposures (see Note 12 of the "Notes to Consolidated Financial Statements" for further discussion).

Our forecasted direct commodity exposures for the upcoming fiscal years were $424 million and $234 million at June 30, 2018 and 2017, respectively. The potential gain/loss given a hypothetical 10 percent fluctuation in commodity prices, assuming pricing collectively shifts in the same direction and we are unable to change customer pricing in response to those shifts, for the upcoming fiscal year were $42 million and $23 million at June 30, 2018 and 2017, respectively. The hypothetical offsetting impact of hedges in both periods was minimal. In prior years, we forecasted both direct and indirect exposure to commodity pricing changes. Beginning in fiscal 2018, we began only estimating direct exposure because it is the primary way that we view and manage commodity risk. Under the prior methodology, our exposure in fiscal 2017 for the next fiscal year was estimated to be $411 million and the potential gain/loss was $41 million.

Business

General

Cardinal Health, Inc. is a global integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. We provide medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home.

Pharmaceutical Segment

In the United States, our Pharmaceutical segment:

- distributes branded and generic pharmaceutical and over-the-counter healthcare and consumer products through its Pharmaceutical Distribution division to retailers (including chain and independent drug stores and pharmacy departments of supermarkets and mass merchandisers), hospitals and other healthcare providers. This division:
  - maintains prime vendor relationships that streamline the purchasing process resulting in greater efficiency and lower costs for our retail, hospital and other healthcare provider customers;
  - provides services to pharmaceutical manufacturers, including distribution, inventory management, data reporting, new product launch support and chargeback administration;
  - provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers, and operates pharmacies in community health centers; and
  - repackages generic pharmaceuticals and over-the-counter healthcare products;
- through its Specialty Solutions division, distributes specialty pharmaceutical products to hospitals and other healthcare providers and provides consulting, patient support and other services for specialty pharmaceutical products to pharmaceutical manufacturers and healthcare providers; and
- operates nuclear pharmacies and manufacturing facilities through its Nuclear Pharmacy Services division, which manufactures, prepares and delivers radiopharmaceuticals for use in nuclear imaging and other procedures in hospitals and physician offices. This division also contract manufactures a radiopharmaceutical treatment (Xofigo) and holds the North American rights to manufacture and distribute Lymphoseek, a radiopharmaceutical diagnostic imaging agent.

See Note 16 of the “Notes to Consolidated Financial Statements” for Pharmaceutical segment revenue, profit and assets for fiscal 2018 , 2017 and 2016 .

Pharmaceutical Distribution

Our Pharmaceutical Distribution division’s gross margin includes margin from our generic pharmaceutical program, from distribution services agreements with branded pharmaceutical manufacturers and from over-the-counter healthcare and consumer products. It also includes manufacturer cash discounts.

Margin from our generic pharmaceutical program includes price discounts and rebates from manufacturers and may in some instances include price appreciation. Our earnings on generic pharmaceuticals are generally highest during the period immediately following the initial launch of a product, because generic pharmaceutical selling prices are generally highest during that period and tend to decline over time.

Margin from distribution services agreements with branded pharmaceutical manufacturers is derived primarily from compensation we receive for providing a range of distribution and related services to manufacturers. Our compensation typically is a percentage of the wholesale acquisition cost that is set by manufacturers. In addition, under a limited number of agreements, branded pharmaceutical price appreciation, which is determined by the manufacturers, also serves as part of our compensation.

Sourcing Venture With CVS Health Corporation

In July 2014, we established Red Oak Sourcing, a U.S.-based generic pharmaceutical sourcing venture with CVS with an initial term of 10 years. Red Oak Sourcing negotiates generic pharmaceutical supply contracts on behalf of both companies.

Specialty Pharmaceutical Products and Services

We refer to products and services offered by our Specialty Solutions division as “specialty pharmaceutical products and services.” The Specialty Solutions division distributes oncology, rheumatology, urology, nephrology and other pharmaceutical products ("specialty pharmaceutical products") and human-derived plasma products to hospitals, dialysis clinics, physician offices and other healthcare providers; provides consulting, patient support, logistics, group purchasing and other services to pharmaceutical manufacturers and healthcare providers primarily supporting the development, marketing and distribution of specialty pharmaceutical products; and provides specialty pharmacy services. Our use of the terminology "specialty pharmaceutical products and services" may not be comparable to the terminology used by other industry participants.

Medical Segment

Our Medical segment manufactures and sources Cardinal Health branded medical, surgical and laboratory products, including cardiovascular and endovascular products; wound care products; single-use surgical drapes, gowns and apparel; exam and surgical gloves; and fluid suction and collection systems. We further expanded this segment's portfolio of Cardinal Health Brand products through the acquisition of the Patient Recovery Business from Medtronic in July 2017, which includes incontinence, wound care, enteral feeding, urology, operating room supply, electrode and needle, syringe and sharps disposal product lines. Our Cardinal Health Brand products are sold directly or through third-party distributors in the United States, Canada, Europe, Asia and other markets.

The Medical segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States and Canada.

This segment also distributes medical products to patients' homes in the United States through our Cardinal Health at Home division.

This segment also assembles and sells sterile and non-sterile procedure kits. It also provides supply chain services, including spend management, distribution management and inventory management services, to healthcare providers.

naviHealth Partnership

In August 2018, we entered into a partnership with CD&R through which we own 44% of the ownership interests in the naviHealth business. naviHealth partners with health plans, hospital systems, physician groups and other healthcare providers to manage post-acute care through value-based programs.

See Note 16 of the “Notes to Consolidated Financial Statements” for Medical segment revenue, profit and assets for fiscal 2018 , 2017 and 2016 .

Acquisitions and Divestitures

Acquisitions

We have acquired a number of businesses over the years that have enhanced our core strategic areas of Cardinal Health Brand medical products, generic pharmaceutical distribution and services, specialty pharmaceutical products and services, international and post-acute care. We expect to continue to pursue additional acquisitions in the future.

During the last five fiscal years, we completed the following three large acquisitions:

Date	Company	Location	Lines of Business	Acquisition Price (in billions)
07/17	Patient Recovery Business of Medtronic, plc	Mansfield, MA	Patient Care, Deep Vein Thrombosis and Nutritional Insufficiency	$6.1
10/15	Cordis business of Johnson & Johnson	Fremont, CA	Cardiovascular and endovascular products	$1.9
07/15	The Harvard Drug Group	Livonia, MI	Pharmaceutical product distribution	$1.1

We have also completed several smaller acquisitions during the last five fiscal years, including: in fiscal 2017, the acquisition of the North American rights to Lymphoseek, a radiopharmaceutical diagnostic imaging agent, from Navidea Biopharmaceuticals, Inc.; in fiscal 2015, the acquisitions of Tradex International, Inc., a supplier of disposable gloves, and Metro Medical Supply, Inc., a distributor of specialty pharmaceuticals and medical and surgical products; and in fiscal 2014, the acquisition of Access Closure, Inc., a manufacturer and distributor of extravascular closure devices.

Divestitures

Over the past year, we have also completed several divestitures, including, in February 2018, selling our pharmaceutical and medical products distribution business in China to Shanghai Pharmaceuticals Holding Co., Ltd. for proceeds of $861 million (after adjusting for third party indebtedness and preliminary transaction adjustments).

Additionally, in August 2018, we completed the sale of our ownership interest in naviHealth, Inc. to investor entities controlled by CD&R for proceeds of $736 million (after adjusting for certain fees and expenses) and a 44% equity interest in a partnership that owns the naviHealth business.

We had acquired our ownership interest in naviHealth through a series of transactions, beginning in fiscal 2016, when we acquired a 71% ownership interest. As of the end of fiscal 2018, we owned 98% of the interests in naviHealth.

Customers

Our largest customers, CVS and OptumRx accounted for 25 percent and 11 percent of our fiscal 2018 revenue, respectively. In the aggregate, our five largest customers, including CVS and OptumRx, accounted for 47 percent of our fiscal 2018 revenue. Our pharmaceutical distribution agreements with CVS extend through June 2019.

We have agreements with group purchasing organizations ("GPOs") that act as agents to negotiate vendor contracts on behalf of their members. Our two largest GPO relationships in terms of member revenue are with Vizient, Inc. and Premier, Inc. Sales to members of these two GPOs, under numerous contracts across all of our businesses, collectively accounted for 22 percent of our revenue in fiscal 2018 .

Suppliers

We rely on many different suppliers. Products obtained from our five largest suppliers accounted for an aggregate of 29 percent of our revenue during fiscal 2018 , but no single supplier's products accounted for more than 8 percent of revenue.

Competition

We operate in a highly competitive environment in the distribution of pharmaceuticals and consumer healthcare products. We also operate in a highly competitive environment in the development, manufacturing and distribution of medical devices and surgical products. We compete on many levels, including price, service offerings, support services, breadth of product lines and product quality and efficacy.

In the Pharmaceutical segment, we compete with wholesale distributors with national reach, including McKesson Corporation and AmerisourceBergen Corporation, regional wholesale distributors, self-warehousing chains, specialty distributors, third-party logistics companies, companies that provide specialty pharmaceutical services and nuclear pharmacies, among others. In addition, the Pharmaceutical segment has experienced competition from a number of organizations offering generic pharmaceuticals, including telemarketers. We also compete with manufacturers that sell their products directly.

In the Medical segment, we compete with many diversified healthcare companies and national medical product distributors, such as Medline Industries, Inc., Owens & Minor, Inc. and Becton, Dickinson and Company, as well as regional medical product distributors and companies that are focused on specific product categories. We also compete with companies that distribute medical products to patients' homes and third-party logistics companies.

Employees

At June 30, 2018 , we had approximately 32,300 employees in the United States and approximately 17,900 employees outside of the United States.

Intellectual Property

We rely on a combination of trade secret, patent, copyright and trademark laws, nondisclosure and other contractual provisions, and technical measures to protect our products, services and intangible assets. We hold patents, and continue to pursue patent protection throughout the world, relating to the manufacture, operation and use of various medical and surgical products, to certain distribution and logistics systems, to the production and distribution of our nuclear pharmacy products and to other service offerings. We also operate under licenses for certain proprietary technologies, and in certain instances we license our technologies to third parties.

We believe that we have taken all necessary steps to protect our proprietary rights, but no assurance can be given that we will be able to successfully enforce or protect our rights in the event that they are infringed upon by a third party. While all of these proprietary rights are important to our operations, we do not consider any particular patent, trademark, license, franchise or concession to be material to our overall business.

Regulatory Matters

Our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. Depending upon the specific business, we may be subject to regulation by government entities including:

- the U.S. Drug Enforcement Administration (the “DEA”);
- certain agencies within the U.S. Department of Health and Human Services, including the U.S. Food and Drug Administration (the “FDA”), the Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights;
- state health departments, insurance departments, Medicaid departments or other comparable state agencies;
- state boards of pharmacy and other controlled substance authorities;
- the U.S. Nuclear Regulatory Commission (the “NRC”);
- the U.S. Federal Trade Commission (the "FTC");
- U.S. Customs and Border Protection; and
- agencies comparable to those listed above in markets outside the United States.

These regulatory agencies have a variety of civil, administrative and criminal sanctions at their disposal for failure to comply with applicable legal or regulatory requirements. They can suspend our ability to manufacture and distribute products, initiate product recalls, seize products or impose criminal, civil and administrative sanctions.

Distribution

State Boards of Pharmacy, FDA, DEA and various other state authorities regulate the marketing, purchase, storage and distribution of pharmaceutical and medical products under various federal and state statutes including the federal Prescription Drug Marketing Act of 1987, Drug Quality and Security Act of 2013 (the “DQSA”), and Controlled Substances Act (the "CSA"). The CSA governs the sale, packaging, storage and distribution of controlled substances. Wholesale distributors of controlled substances must hold valid DEA registrations and state-level licenses, meet various security and operating standards, and comply with the CSA. They must also comply with state requirements relating to controlled substances that differ from state to state.

Manufacturing and Marketing

We sell our manufactured products in the United States, Canada, Europe, Asia and other markets. The FDA and other governmental agencies in the United States, as well as foreign governmental agencies, administer requirements that cover the design, testing, safety, effectiveness, manufacturing (including good manufacturing practices), quality systems, labeling, promotion and advertising (including restrictions on promoting or advertising a product other than for the product's cleared or approved uses), distribution, importation and post-market surveillance for most of our manufactured products. In addition, we need specific approval or clearance from, and registrations with, regulatory authorities before we can market and sell some products in the United States and certain other countries, including countries in the European Union ("EU").

In the United States, authorization to commercially market a medical device is generally received in one of two ways. The first, known as pre-market notification or the 510(k) process, requires us to demonstrate that a medical device is substantially equivalent to a legally marketed medical device. The second more rigorous process, known as pre-market approval (“PMA”), requires us to independently demonstrate that a medical device is safe and effective. Many of our Medical segment products are cleared through the 510(k) process and certain Cordis products must be approved through the PMA process.

In the EU, we are required to comply with applicable Medical Device Directives ("MDDs") and obtain CE Mark Certification in order to market medical devices. The EU regulatory bodies finalized a new Medical Device Regulation ("MDR") in 2017, which replaces the existing MDDs after a three-year transition period. Among other things, the MDR clarifies that private label distributors are deemed to be the manufacturer, which will increase our regulatory obligations in the EU with respect to private label products.

It can be costly and time-consuming to obtain regulatory approvals, clearances and registrations of medical devices, and they might not be granted on a timely basis, if at all. Even after we obtain approval or clearance to market a product or obtain product registrations, the product and our manufacturing processes are subject to continued regulatory oversight, including periodic inspection of manufacturing facilities by FDA and other regulatory authorities both in the United States and internationally.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements or published standards. When we or a regulatory agency identify a quality or regulatory issue, we investigate and take appropriate corrective action, which may include recalling the product, correcting the product at the customer location, revising product labeling and notifying customers.

Health and Personal Information Practices

We collect, handle and maintain patient-identifiable health information. The U.S. Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as augmented by the Health Information Technology for Economic and Clinical Health Act, and state laws regulate the use and disclosure of patient-identifiable health information, including requiring specified privacy and security measures. We also collect, handle and maintain other sensitive personal and financial information that is subject to U.S. federal and state laws protecting such information.

The processing and disclosure of personal information is also highly regulated in many other countries in which we operate. In Europe, for example, we are subject to the EU data protection regulations, including the current EU Directive on Data Protection, which requires member states to impose minimum restrictions on the collection, use

and transfer of personal data. The EU General Data Protection Regulation ("GDPR") includes, among other things, a requirement for prompt notice of data breaches to data subjects and supervisory authorities in certain circumstances and significant fines for non-compliance. The GDPR also requires companies processing personal data of individuals residing in the EU to comply with EU privacy and data protection rules.

Nuclear Pharmacies and Related Businesses

Our nuclear pharmacies and radiopharmaceutical manufacturing facilities (including for Xofigo) require licenses or permits and must abide by regulations issued by the NRC, applicable state boards of pharmacy and the radiologic health agency or department of health of each state in which we operate, including pharmacy sterile compounding standards and practices. In addition, our radiopharmaceutical manufacturing facilities also must comply with FDA regulations, including good manufacturing practices.

Product Tracing and Supply Chain Integrity

Title II of the DQSA, known as the Drug Supply Chain Security Act or "Track and Trace," establishes a phased-in national system for tracing pharmaceutical products through the pharmaceutical distribution supply chain to prevent the introduction of counterfeit, adulterated or mislabeled drugs. The first phase of implementation began in 2015, and upon full implementation in 2023, we and other supply chain stakeholders will participate in an electronic, interoperable, prescription drug tracing system. In addition, the FDA also has issued regulations requiring most medical device labeling to bear a unique device identifier. These regulations are being phased in through 2020. The MDR finalized in the EU in 2017 also introduces a new unique device identifier requirement with a three-year transition period.

Government Healthcare Programs

We are subject to U.S. federal healthcare fraud and abuse laws. These laws generally prohibit persons from soliciting, offering, receiving or paying any compensation in order to induce someone to order, recommend or purchase products or services that are in any way paid for by Medicare, Medicaid or other federally-funded healthcare programs. They also prohibit submitting any fraudulent claim for payment by the federal government. There are similar state healthcare fraud and abuse laws that apply to Medicaid and other state-funded healthcare programs. Violations of these laws may result in criminal or civil penalties, as well as breach of contract claims and *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments).

Some businesses within each of our segments are Medicare-certified suppliers or participate in other federal and state healthcare programs, such as state Medicaid programs and the federal 340B drug pricing program. These businesses are subject to accreditation and quality standards and other rules and regulations, including applicable reporting, billing, payment and record-keeping requirements. Other businesses within each segment manufacture pharmaceutical or medical products or repackage pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs. Failure to comply with applicable eligibility requirements, standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

Our U.S. federal and state government contracts are subject to specific procurement requirements. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

Antitrust Laws

The U.S. federal government, most U.S. states and many foreign countries have laws that prohibit certain types of conduct deemed to be anti-competitive. Violations of these laws can result in various sanctions, including criminal and civil penalties. Private plaintiffs also could bring civil lawsuits against us in the United States for alleged antitrust law violations, including claims for treble damages.

Environmental, Health and Safety Laws

In the United States and other countries, we are subject to various federal, state and local environmental laws, as well as laws relating to safe working conditions and laboratory practices.

Laws Relating to Foreign Trade and Operations

U.S. and foreign laws require us to abide by standards relating to the import and export of finished goods, raw materials and supplies and the handling of information. We also must comply with various export control and trade embargo laws, which may require licenses or other authorizations for transactions within some countries or with some counterparties.

Similarly, we are subject to U.S. and foreign laws concerning the conduct of our foreign operations, including the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and other foreign anti-bribery laws. Among other things, these laws generally prohibit companies and their intermediaries from offering, promising or making payments to officials of foreign governments for the purpose of obtaining or retaining business.

Other Information

Although our agreements with manufacturers sometimes require us to maintain inventory levels within specified ranges, our distribution businesses are generally not required by our customers to maintain particular inventory levels other than as needed to meet service level requirements. Certain supply contracts with U.S. government entities require us to maintain sufficient inventory to meet emergency demands, but we do not believe those requirements materially affect inventory levels.

Our customer return policies generally require that the product be physically returned, subject to restocking fees. We only allow customers to return products that can be added back to inventory and resold at full value, or that can be returned to vendors for credit.

We offer market payment terms to our customers.

Revenue and Long-Lived Assets by Geographic Area

See Note 16 of the "Notes to Consolidated Financial Statements" for revenue and long-lived assets by geographic area.

Risk Factors

The risks described below could materially and adversely affect our results of operations, financial condition, liquidity or cash flows. These are not the only risks we face. Our businesses also could be affected by risks that we are not presently aware of or that we currently consider immaterial to our operations.

We could continue to suffer the adverse effects of competitive pressures.
As described in greater detail in the "Business" section, we operate in markets that are highly competitive and dynamic. In addition, competitive pressures in our pharmaceutical and medical distribution may be increased by new business models, new entrants, new regulations, or changes in consumer demand. Our businesses face continued pricing pressure from these factors, which adversely affects our margins. If we are unable to offset margin reductions caused by these pricing pressures through steps such as sourcing or cost control measures, additional service offerings and sales of higher margin products, our results of operations could continue to be adversely affected.

Our Pharmaceutical segment's generic pharmaceutical program may continue to be adversely affected by pricing changes and fewer product launches.
The performance of our Pharmaceutical segment's generic pharmaceutical program declined in fiscal 2018 and 2017 and is expected to decline in fiscal 2019. The decline has been due to generic pharmaceutical customer pricing deflation and less benefit from new generic pharmaceutical launches, which have more than offset the benefits from sourcing generic pharmaceuticals through our Red Oak Sourcing venture with CVS. If we continue to be unable to offset this decline, our Pharmaceutical segment profit and consolidated operating earnings will continue to be adversely affected.

The extent and magnitude of generic pharmaceutical pricing changes is uncertain in future fiscal years and may vary from what we anticipate. Similarly, the number of new generic pharmaceutical launches also varies from year to year, and the margin impact of these launches varies from product to product. Finally, the benefit from Red Oak Sourcing could be less than we anticipate.

CVS is a large customer that generates a significant amount of our revenue.
Our sales and credit concentration is significant. CVS accounted for 25 percent of our fiscal 2018 revenue and 22 percent of our gross trade receivable balance at June 30, 2018. Our pharmaceutical distribution agreements with CVS expire in June 2019. If CVS does not renew our agreements, renews our agreements at a reduced price or significantly reduces its purchases from us, our results of operations and financial condition could be adversely affected.

Changes in manufacturer approaches to pricing branded pharmaceutical products could have an adverse effect on our Pharmaceutical segment's margins.

Our compensation under contractual arrangements with manufacturers for the purchase of branded pharmaceutical products is set as a percentage of the wholesale acquisition cost set by the manufacturer. Sales prices of branded pharmaceutical products to our customers generally are a percentage discount from wholesale acquisition cost.

In recent years, pharmaceutical manufacturers have generally increased the wholesale acquisition cost of their branded pharmaceuticals each year. In May 2018, the U.S. government announced plans to, among other things, adopt policies to encourage manufacturers to limit increases in (or reduce) wholesale acquisition cost. If manufacturers change their historical approach to setting and increasing wholesale acquisition cost and we are unable to negotiate alternative ways to be compensated by manufacturers or customers for the value of our services, our Pharmaceutical segment profit and consolidated operating earnings could be adversely affected.

Our Pharmaceutical segment's margins under a limited number of our distribution services agreements with branded pharmaceutical manufacturers are affected by prices established by the manufacturers.
Our distribution services agreements with branded pharmaceutical manufacturers generally provide that we receive fees from the manufacturers to compensate us for services we provide them. Under a limited number of agreements, branded pharmaceutical price appreciation, which is determined by the manufacturers currently also serves as a part of our compensation. If manufacturers decide not to increase prices or to implement only small increases and we are unable to negotiate alternative ways to be compensated by manufacturers or customers for the value of our services, our margins could be adversely affected.

Our business is subject to rigorous regulatory and licensing requirements.
As described in greater detail in the "Business" section, our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. If we fail to comply with regulatory requirements, or if allegations are made that we fail to comply, our results of operations and financial condition could be adversely affected.

To lawfully operate our businesses, we are required to obtain and hold permits, product registrations, licenses and other regulatory approvals from, and to comply with operating and security standards of, numerous governmental bodies. For example, as a wholesale distributor of controlled substances, we must hold valid DEA registrations and state-level licenses, meet various security and operating standards, and comply with the CSA. Failure to maintain or renew necessary permits, product registrations, licenses or approvals, or to comply with required standards, could have an adverse effect on our results of operations and financial condition.

Products that we manufacture, source, distribute or market must comply with regulatory requirements. Noncompliance or concerns over noncompliance may result in suspension of our ability to distribute, import or manufacture products, product bans, recalls or seizures, or criminal or civil sanctions, which, in turn, could result in product liability claims and lawsuits, including class actions. In addition, it can be costly and time-consuming to obtain regulatory approvals or product registrations to market a medical device, and

such approvals or registrations might not be granted on a timely basis, if at all.

We collect, handle and maintain patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information. Regulations currently in place continue to evolve, and new laws in this area could further restrict our ability to collect, handle and maintain personal or patient information, or could require us to incur additional compliance costs, either of which could have an adverse impact on our results of operations. Violations of federal, state or foreign laws concerning privacy and data protection could subject us to civil or criminal penalties, breach of contract claims, costs for remediation and harm to our reputation.

We are required to comply with laws relating to healthcare fraud and abuse. The requirements of these laws are complex and subject to varying interpretations, and it is possible that regulatory authorities could challenge our policies and practices. If we fail to comply with these laws, we could be subject to federal or state government investigations or *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments), which could result in civil or criminal sanctions, including the loss of licenses or the ability to participate in Medicare, Medicaid and other federal and state healthcare programs. Such sanctions and damages could adversely affect our results of operations and financial condition.

Some businesses within each of our segments are Medicare-certified suppliers or participate in other federal and state healthcare programs, such as state Medicaid program and the federal 340B drug pricing program. In addition, other businesses within each segment manufacture pharmaceutical or medical products or repackage pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs. Failure to comply with applicable eligibility requirements, standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

Our government contracts are subject to specific procurement requirements. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

Our global operations are required to comply with the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and similar anti-bribery laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws. If we fail to comply with any of these laws, we could suffer civil or criminal sanctions.

We could be subject to adverse changes in the tax laws or challenges to our tax positions.

We are a large multinational corporation with operations in the United States and many foreign countries. As a result, we are subject to the tax laws of many jurisdictions.

The Tax Act was enacted in December 2017. The Tax Act, among other things, reduced the U.S. federal corporate tax rate from 35 percent to 21 percent and required companies to pay a one-time tax to repatriate, for U.S. purposes, earnings of certain foreign subsidiaries that were previously deferred for tax purposes. In addition, beginning in our fiscal year 2019, the Tax Act limits certain deductions and creates new taxes on certain foreign sourced earnings. While we generally expect the impact of the Tax Act to be positive, it is possible that the limitation of certain deductions and the creation of new taxes could be more detrimental to us than anticipated.

From time to time, initiatives are proposed in the United States and other jurisdictions in which we operate that could adversely affect our tax positions, effective tax rate or tax payments. Specific initiatives that may impact us include the repeal of the LIFO (last-in, first-out) method of inventory accounting for income tax purposes, the establishment or increase in taxation at the U.S. state level on the basis of gross revenues, recommendations of the base erosion and profit shifting project undertaken by the Organization for Economic Cooperation and Development and the European Commission's investigation into illegal state aid.

Tax laws are complex and subject to varying interpretations. Tax authorities have challenged some of our tax positions and it is possible that they will challenge others. These challenges may adversely affect our effective tax rate or tax payments.

Changes to the U.S. healthcare environment may not be favorable to us.

In recent years, the U.S. healthcare industry has undergone significant changes designed to increase access to medical care, improve safety and patient outcomes, contain costs and increase efficiencies. These changes include adoption of the Patient Protection and Affordable Care Act, a general decline in Medicare and Medicaid reimbursement levels, efforts by healthcare insurance companies to limit or reduce payments to pharmacies and providers, the basis for payments beginning to transition from a fee-for-service model to value-based payments and risk-sharing models, and the industry shifting away from traditional healthcare venues like hospitals and into clinics, physician offices and patients' homes.

We expect the U.S. healthcare industry to continue to change significantly in the future. Possible changes include repeal and replacement of major parts of the Patient Protection and Affordable Care Act, further reduction or limitations on governmental funding at the state or federal level, efforts by healthcare insurance companies to further limit payments for products and services or changes in legislation or regulations governing prescription pharmaceutical pricing, healthcare services or mandated benefits. These possible changes, and the uncertainty surrounding these possible changes, may cause healthcare industry participants to reduce the amount of products and services they purchase from us or the price they are willing to pay for our products and services, which could adversely affect us.

Our business and operations depend on the proper functioning of information systems, critical facilities and distribution networks. Our business could be adversely affected if we experience a cyber-attack or other systems breach.

We rely on our and third-party service providers' information systems for a wide variety of critical operations, including to obtain, rapidly process, analyze and manage data to:

- facilitate the purchase and distribution of inventory items from numerous distribution centers;
- receive, process and ship orders on a timely basis;
- manage accurate billing and collections for thousands of customers;
- process payments to suppliers;
- facilitate manufacturing and assembly of medical products; and
- generate financial information.

Our business also depends on the proper functioning of our critical facilities, including our national logistics center, and our distribution networks. Our results of operations could be adversely affected if our or a service provider's information systems, critical facilities or distribution networks are disrupted (including disruption of access), are damaged or fail, whether due to physical disruptions, such as fire, natural disaster, pandemic or power outage, or due to cyber-security incidents, ransomware or other actions of third parties, including labor strikes, political unrest and terrorist attacks. Manufacturing disruptions also can occur due to regulatory action, production quality deviations, safety issues or raw material shortages or defects, or because a key product is manufactured at a single manufacturing facility with limited alternate facilities.

From time to time, our businesses perform business process improvements or infrastructure modernizations or use service providers for key systems and processes, such as receiving and processing customer orders, customer service and accounts payable. If any of these initiatives are not successfully or efficiently implemented or maintained, they could adversely affect our business and our internal control over financial reporting.

Our business relies on the secure transmission, storage and hosting of patient-identifiable health information, financial information and other sensitive information relating to our customers, company and workforce. We have programs in place to detect, contain and respond to information security incidents. However, because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or to implement adequate preventative measures. In addition, hardware, software or applications developed internally or procured from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Unauthorized parties also may attempt to gain access to our or a service provider's systems or facilities through fraud, trickery or other forms of deception. Any compromise of our or a service provider's information systems, including unauthorized access to or use or disclosure of sensitive information, could adversely impact our operations, results of operations or our ability to satisfy legal requirements, including those related to patient-identifiable health information and the new EU general data protection regulation (GDPR).

Consolidation in the U.S. healthcare industry may negatively impact our results of operations.

In recent years, U.S. healthcare industry participants, including distributors, manufacturers, healthcare providers, insurers and pharmacy chains, have consolidated or formed strategic alliances. Consolidations create larger enterprises with greater negotiating power, and also could result in the possible loss of a customer where the combined enterprise selects one distributor from two incumbents. If this consolidation trend continues, it could adversely affect our results of operations.

We may become involved in legal proceedings that could adversely impact our cash flows or results of operations.

Due to the nature of our business, which includes the distribution of controlled substances and the manufacture of medical products, we may from time to time become involved in disputes, litigation and regulatory matters. Litigation is inherently unpredictable and the unfavorable outcome of one or more of these legal proceedings could adversely affect our results of operations or financial condition.

For example, we are subject to a number of lawsuits and investigations related to the national health crisis involving the abuse of opioid pain medication as described below in the Risk Factor titled "The public health crisis involving the abuse of prescription opioid pain medication could negatively affect our business" and in Note 9 to the "Notes to Consolidated Financial Statements."

Additionally, some of the products that we distribute or manufacture have been and may in the future be alleged to cause personal injury, subjecting us to product liability claims. For example, we are a defendant in product liability lawsuits that allege personal injuries associated with the use of Cordis OptEase and TrapEase inferior vena cava (IVC) filter products. We have accrued an amount for losses and legal defense costs related to these lawsuits, which are discussed in Note 9 of the "Notes to Consolidated Financial Statements." Any settlement of or judgment for a product liability claim that is not covered by insurance and is in excess of any prior accruals could adversely affect our results of operations and financial condition.

We also operate in an industry characterized by extensive intellectual property litigation. Patent litigation can result in significant damage awards and injunctions that could prevent the manufacture and sale of affected products or force us to make royalty payments in order to continue selling the affected products.

The public health crisis involving the abuse of prescription opioid pain medication could negatively affect our business.

Our Pharmaceutical segment distributes prescription opioid pain medications. In recent years, the abuse of prescription opioid pain medication has received heightened public attention. These developments heighten a number of risks that we face and may present new risks that could adversely affect our operations or financial condition.

A significant number of counties, municipalities and other plaintiffs, including a number of state attorneys general, have filed lawsuits against pharmaceutical manufacturers, pharmaceutical wholesale distributors (including us), retail chains and others relating to the manufacturing, marketing or distribution of prescription opioid pain medications. In addition, we are currently being investigated by about 40 other states for the same activities and may be named as a defendant in additional lawsuits in the future. We are vigorously defending ourselves in these lawsuits. The defense and resolution of current and future lawsuits could adversely affect our results of operations and financial condition or have adverse reputational or operational effects on our business. See Note 9 of the "Notes to the Consolidated Financial Statements" for more information regarding these matters.

Other legislative, regulatory or industry measures related to the public health crisis could affect our business in ways that we may not be able to predict. For example, in April 2018, the State of New York created an aggregate $100 million annual assessment on all manufacturers and distributors licensed to sell or distribute opioids in New York. In addition, legislation has been proposed in some states that, if enacted, could require distributors to pay taxes on the distribution of opioid medications in those states. These proposed bills vary in the tax amounts and the means of calculation. Liabilities for taxes or assessments under any such laws could have an adverse impact on our results of operations unless we are able to mitigate them through operational changes or commercial arrangements where permitted.

Unfavorable publicity regarding the abuse or misuse of prescription opioid pain medications and the role of wholesale distributors in the supply chain of such prescription medications, as well as the continued proliferation of the opioid lawsuits, investigations, regulations and legislative actions discussed above could adversely affect our reputation and results of operations.

Our ability to manage and complete acquisitions and divestitures could impact our strategic objectives and financial condition.

An important element of our growth strategy has been to acquire other businesses that expand or complement our existing businesses. In fiscal 2018, we spent $6.1 billion to acquire other businesses including, in July 2017, the acquisition of the Patient Recovery Business from Medtronic for $6.1 billion and divested our China distribution business as well as our majority interest in naviHealth.

The acquisition of the Patient Recovery Business as well as other acquisitions involve the following risks: we may overpay for a business or fail to realize the synergies and other benefits we expect from the acquisition; our management's attention may be diverted to integration efforts; we may fail to retain key personnel of the acquired business; future developments may impair the value of our purchased goodwill or intangible assets; we may face difficulties or delays establishing, integrating or combining operations and systems; we may assume liabilities related to legal proceedings involving the acquired business; we may face challenges retaining the customers of the acquired business; or we may encounter unforeseen internal control, regulatory or compliance issues.

When we decide to sell assets or a business, we may encounter difficulty finding buyers or alternative exit strategies, which could delay the achievement of our strategic objectives. We could also experience greater dis-synergies than expected and the impact of the divestiture on our results of operations could be greater than anticipated.

We depend on certain suppliers to make their raw materials and products available to us and are subject to fluctuations in costs of raw materials and products.

We depend on the availability of various components, compounds, raw materials and energy supplied by others for our operations. In some instances, for reasons of quality assurance, cost effectiveness, or availability, we procure certain components and raw materials from a sole supplier. Any of our supplier relationships could be interrupted due to events beyond our control, including natural disasters, or could be terminated. In addition, due to the stringent regulations and requirements of the FDA regarding the manufacture of our products, we may not be able to quickly establish additional or replacement sources for certain components or materials. A sustained supply reduction or interruption, and an inability to develop alternative sources for such supply, could have an adverse effect on our business.

Our manufacturing businesses use oil-based resins, pulp, cotton, latex and other commodities as raw materials in many products. Prices of oil and gas also affect our distribution and transportation costs. Prices of these commodities are volatile and can fluctuate significantly, causing our costs to produce and distribute our products to fluctuate. Due to competitive dynamics and contractual limitations, we may be unable to pass along cost increases through higher prices. If we cannot fully offset cost increases through other cost reductions, or recover these costs through price increases or surcharges, our results of operations could be adversely affected.

Our results of operations may suffer upon the bankruptcy, insolvency, or other credit failure of a customer that has a substantial amount owed to us.

Most of our customers buy products and services from us on credit, which is made available to customers based on our assessment of creditworthiness. The bankruptcy, insolvency or other credit failure of any customer that has a substantial amount owed to us could adversely affect our results of operations.

As a result of our international operations, we have exposure to economic, political and currency risks, including changes in tariffs.

We conduct our operations in various regions of the world outside of the United States, including Europe, Asia and Latin America. Global developments can affect our business in many ways. Our global operations are affected by local economic environments, including inflation, recession and competition. Additionally, divergent or unfamiliar regulatory systems and labor markets also can increase the risks and burdens of operating in numerous countries.

Changes or uncertainty in U.S. or foreign policy, including any changes or uncertainty with respect to U.S. or international trade

policies or tariffs, also can disrupt our global operations, as well as our customers and suppliers, in a particular location and may require us to spend more money to source certain products or materials that we purchase.

In addition, we conduct our business in U.S. dollars and various functional currencies of our foreign subsidiaries. Changes in foreign currency exchange rates could adversely affect our financial results, which are reported in U.S. dollars. We may not be able to hedge to protect us against these exposures, and any hedges may not successfully mitigate these exposures.

Our goodwill may be further impaired, which would require us to record a significant charge to earnings in accordance with generally accepted accounting principles.

U.S. GAAP requires us to test our goodwill for impairment on an annual basis, or more frequently if indicators for potential impairment exist. This year, as a result of the required annual test, we have recorded a $1.4 billion impairment to goodwill within our Medical segment. The testing required by GAAP involves estimates and judgments by management. Although we believe our assumptions and estimates are reasonable and appropriate, any changes in key assumptions, including a failure to meet business plans or other unanticipated events and circumstances such as a rise in interest rates, may affect the accuracy or validity of such estimates. In addition to the impairment to goodwill in our Medical segment, it is possible that we may record significant charges related to other business units or we may record additional charges in our Medical segment, which charge or charges could adversely affect our results of operations. See "Critical Accounting Policies and Sensitive Accounting Estimates" in MD&A above for more information regarding goodwill impairment testing.

Properties

In the United States and Puerto Rico, at June 30, 2018 , the Pharmaceutical segment operated 24 primary pharmaceutical distribution facilities and one national logistics center; seven specialty distribution facilities; and more than 140 nuclear pharmacy and radiopharmaceutical manufacturing facilities. The Medical segment operated more than 70 medical-surgical distribution, assembly, manufacturing and other operating facilities in the United States and Puerto Rico. Our U.S. operating facilities are located in 45 states.

Outside the United States and Puerto Rico, at June 30, 2018 , our Medical segment operated 25 facilities in Canada, Costa Rica, the Dominican Republic, Germany, Ireland, Japan, Malaysia, Malta, Mexico and Thailand that engage in manufacturing, distribution or research.

At June 30, 2018 , we owned more than 75 operating facilities and leased more than 200 operating facilities around the world. Our principal executive offices are headquartered in an owned building located at 7000 Cardinal Place in Dublin, Ohio.

We consider our operating properties to be in satisfactory condition and adequate to meet our present needs. However, we regularly evaluate operating properties and may make further additions and improvements or consolidate locations as we seek opportunities to expand or enhance the efficiency of our business.

Legal Proceedings

The legal proceedings described in Note 9 of the "Notes to Consolidated Financial Statements" are incorporated in this "Legal Proceedings" section by reference.

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common shares are listed on the New York Stock Exchange under the symbol "CAH." The following table reflects the range of the reported high and low closing prices of our common shares as reported on the New York Stock Exchange Composite Tape and the per share dividends declared for the fiscal years ended June 30, 2018 and 2017 and paid quarterly. It also reflects the range of the reported high and low closing prices of our common shares from July 1, 2018 through the period ended on July 31, 2018 and the per share dividends declared from July 1, 2018 through the period ended on July 31, 2018:

	High	Low	Dividends Declared
Fiscal 2017			
Quarter Ended:			
September 30, 2016	$ 84.92	$ 75.26	$ 0.4489
December 31, 2016	76.71	65.17	0.4489
March 31, 2017	83.80	72.47	0.4489
June 30, 2017	82.71	71.18	0.4624
Fiscal 2018			
Quarter Ended:			
September 30, 2017	$ 78.69	$ 64.36	$ 0.4624
December 31, 2017	68.24	55.00	0.4624
March 31, 2018	75.23	61.22	0.4624
June 30, 2018	65.82	48.83	0.4763
Fiscal 2019	$ 50.80	$ 48.80	$ —

At July 31, 2018 there were approximately 7,817 shareholders of record of our common shares.

We anticipate that we will continue to pay quarterly cash dividends in the future. The payment and amount of future dividends remain, however, within the discretion of our Board of Directors and will depend upon our future earnings, financial condition, capital requirements and other factors.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs (2)	Approximate Dollar Value of Shares That May Yet be Purchased Under the Programs (2) (in millions)
April 2018	292	$ 63.07	—	$ 993
May 2018	449,113	52.22	448,675	970
June 2018	1,433,537	53.41	1,433,244	893
Total	**1,882,942**	**$ 53.13**	**1,881,919**	**$ 893**

(1) Reflects 292 , 438 and 293 common shares purchased in April, May and June 2018 , respectively, through a rabbi trust as investments of participants in our Deferred Compensation Plan.

(2) On February 7, 2018 our Board of Directors approved a $1.0 billion share repurchase program that expires on December 31, 2020. During the three months ended June 30, 2018 , we repurchased two million common shares under this program at June 30, 2018. We have $893 million available under this program. On August 16, 2018 we entered into an ASR program to purchase shares of our common stock for an aggregate purchase price of $ 600 million and received an initial delivery of 9.5 million shares of common stock using a reference price of $ 50.45 . The program is expected to conclude in the second quarter of fiscal 2019.

Market for Registrant's Common Equity

Five Year Performance Graph

The following line graph compares the cumulative total return of our common shares with the cumulative total return of the Standard & Poor's Composite—500 Stock Index (the "S&P 500 Index") and the Standard & Poor's Composite—500 Healthcare Index (the "S&P 500 Healthcare Index"). The line graph assumes, in each case, an initial investment of $100 on June 30, 2013, based on the market prices at the end of each fiscal year through and including June 30, 2018 , and reinvestment of dividends. The S&P 500 Index and S&P 500 Healthcare Index investments are weighted on the basis of market capitalization at the beginning of each period.

	June 30					
	2013	2014	2015	2016	2017	**2018**

Management Reports

Evaluation of Disclosure Controls and Procedures

We evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of June 30, 2018 . Based on this evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of June 30, 2018 to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Our internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, controls deemed effective now may become inadequate in the future because of changes in conditions, or because compliance with policies or procedures has deteriorated or been circumvented.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2018 . In making this assessment, management used the criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria"). Based on management's assessment and the COSO criteria, management believes that our internal control over financial reporting was effective as of June 30, 2018 .

Our independent registered public accounting firm, Ernst & Young LLP, has issued a report on our internal control over financial reporting. Ernst & Young LLP's report appears following this "Management Reports" section and expresses an unqualified opinion on the effectiveness of our internal control over financial reporting.

On July 29, 2017, we completed the acquisition of the Patient Recovery business. As permitted by guidelines established by the SEC, management excluded the Patient Recovery business from the scope of its assessment of the effectiveness of internal control over financial reporting as of June 30, 2018. The Patient Recovery business constituted 17% and 11% of our total and net assets, respectively, as of June 30, 2018 and approximately 2% of our revenue for the fiscal year then ended.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

The Shareholders and the Board of Directors of Cardinal Health, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Cardinal Health, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Cardinal Health, Inc. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of June 30, 2018, based on the COSO criteria.

As indicated in the accompanying "Management's Report on Internal Control Over Financial Reporting," management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of the Patient Recovery Business, which is included in the 2018 consolidated financial statements of the Company and constituted 17% and 11% of total and net assets, respectively; as of June 30, 2018 and 2% of revenues for the year then ended. Our audit of internal control over financial reporting of the Company also did not include an evaluation of the internal control over financial reporting of the Patient Recovery Business.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of Cardinal Health, Inc. and subsidiaries as of June 30, 2018 and 2017 and the related consolidated statements of earnings, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended June 30, 2018, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) and our report dated August 22, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying "Management's Report on Internal Control Over Financial Reporting." Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ Ernst & Young LLP

Grandview Heights, Ohio
August 22, 2018

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Cardinal Health, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Cardinal Health, Inc. and subsidiaries (the Company) as of June 30, 2018 and 2017, the related consolidated statements of earnings, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended June 30, 2018, and the related notes and the financial statement schedule listed in the Index at Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at June 30, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended June 30, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of June 30, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated August 22, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2002.

The accompanying notes are an integral part of these consolidated statements.

Notes to Consolidated Financial Statements

1. Basis of Presentation and Summary of Significant Accounting Policies

Cardinal Health, Inc. is a globally integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. The company provides medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency. References to “we”, “our” and similar pronouns in these consolidated financial statements are to Cardinal Health, Inc. and its majority-owned or controlled subsidiaries unless the context otherwise requires.

Our fiscal year ends on June 30. References to fiscal 2018 , 2017 and 2016 in these consolidated financial statements are to the fiscal years ended June 30, 2018 , 2017 and 2016 , respectively.

Basis of Presentation

Our consolidated financial statements include the accounts of all majority-owned or controlled subsidiaries, and all significant intercompany transactions and amounts have been eliminated. To conform to the current year presentation, certain prior year amounts have been reclassified. The results of businesses acquired or disposed of are included in the consolidated financial statements from the date of the acquisition or up to the date of disposal, respectively.

Use of Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of financial statements in accordance with GAAP requires us to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Estimates, judgments and assumptions are used in the accounting and disclosure related to, among other items, allowance for doubtful accounts, inventory valuation and reserves, business combinations, goodwill and other intangible asset impairment, vendor reserves, loss contingencies, self-insurance accruals, income taxes and share-based compensation. Actual amounts could ultimately differ from these estimated amounts.

Cash Equivalents

We consider liquid investments purchased with an initial maturity of three months or less to be cash equivalents. The carrying value of cash equivalents approximates fair value.

Receivables and Allowance for Doubtful Accounts

Trade receivables are presented net of an allowance for doubtful accounts of $139 million and $137 million at June 30, 2018 and 2017 , respectively. An account is considered past due on the first day after its due date. In accordance with contract terms, we generally have the ability to charge customers service fees or higher prices if an account is considered past due. We regularly monitor past due accounts and establish appropriate reserves to cover potential losses, which are based primarily on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

We provide financing to various customers. Such financing arrangements range from 1 year to 5 years at interest rates that are generally subject to fluctuation. Interest income on these arrangements is recognized as it is earned. The financings may be collateralized, guaranteed by third parties or unsecured. Finance notes, net and related accrued interest were $136 million (current portion $26 million) and $171 million (current portion $53 million) at June 30, 2018 and 2017 , respectively, and are included in other assets (current portion is included in prepaid expenses and other) in the consolidated balance sheets. Finance notes receivable allowance for doubtful accounts were $7 million and $9 million at June 30, 2018 and 2017 , respectively. We estimate an allowance for these financing receivables based on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

Concentrations of Credit Risk

We maintain cash depository accounts with major banks, and we invest in high quality, short-term liquid instruments, and in marketable securities. Our short-term liquid instruments mature within three months and we have not historically incurred any related losses. Investments in marketable debt securities consist of a portfolio of high-grade instruments. Such investments are made only in instruments issued by highly-rated institutions, whose financial condition we monitor. We had none of these investments at June 30, 2018.

Our trade receivables and finance notes and related accrued interest are exposed to a concentration of credit risk with certain large customers and with customers in the retail and healthcare sectors. Credit risk can be affected by changes in reimbursement and other economic pressures impacting the healthcare industry. With respect to customers in the retail and healthcare sectors, such credit risk is limited due to supporting collateral and the diversity of the customer base, including its wide geographic dispersion. We perform regular credit evaluations of our customers’ financial conditions and maintain reserves for losses through the established allowance for doubtful accounts. Historically, such losses have been within our expectations. Refer to the "Receivables and Allowance for Doubtful Accounts" section within this Note for additional information on the accounting treatment of reserves for allowance for doubtful accounts.

Major Customers

CVS Health Corporation ("CVS") and OptumRx, are our only customers that individually account for at least 10 percent of revenue and gross trade receivables. These customers are primarily serviced through our Pharmaceutical segment.

The following table summarizes historical percent of revenue and gross trade receivables from CVS and OptumRx:

	Percent of Revenue			Percent of Gross Trade Receivables at June 30	
	2018	2017	2016	**2018**	2017
CVS	**25%**	23%	25%	**22%**	20%
OptumRx	**11%**	11%	7%	**4%**	1%

Our pharmaceutical distribution contract with OptumRx began in fiscal 2016 and did not exceed 10 percent until fiscal 2017.

We have entered into agreements with group purchasing organizations ("GPOs") which act as purchasing agents that negotiate vendor contracts on behalf of their members. Vizient, Inc. and Premier, Inc. are our two largest GPO member relationships in terms of revenue. Sales to members of these two GPOs collectively accounted for 22 percent , 21 percent and 17 percent of revenue for fiscal 2018 , 2017 and 2016 , respectively. Our trade receivable balances are with individual members of the GPO, and therefore no significant concentration of credit risk exists with these types of arrangements.

Inventories

A substantial portion of our inventories (56 percent at both June 30, 2018 and 2017) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These inventories are included within the core pharmaceutical distribution facilities of our Pharmaceutical segment ("distribution facilities") and are primarily merchandise inventories. The LIFO method presumes that the most recent inventory purchases are the first items sold, so LIFO helps us better match current costs and revenue. We believe that the average cost method of inventory valuation provides a reasonable approximation of the current cost of replacing inventory within the distribution facilities. As such, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation.

If we had used the average cost method of inventory valuation for all inventory within the distribution facilities, the value of our inventories would not have changed in fiscal 2018 or 2017 because inventories valued at LIFO were $92 million and $46 million higher than the average cost value at June 30, 2018 and 2017 , respectively. We do not record inventories in excess of replacement cost. As such, we did not record any changes in our LIFO reserve in fiscal 2018 and 2017 .

Our remaining inventory that is not valued at the lower of LIFO or market is stated at the lower of cost, using the first-in, first-out method, or net realizable value. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $147 million and $76 million at June 30, 2018 and 2017 , respectively. The increase in the reserves for excess and obsolete inventory during fiscal 2018 was driven by increased Cordis inventory reserves and the Patient Recovery acquisition. We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory and age of on-hand inventory.

Cash Discounts

Manufacturer cash discounts are recorded as a component of inventory cost and recognized as a reduction of cost of products sold as inventory is sold.

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Property and equipment held for sale are recorded at the lower of cost or fair value less cost to sell. When certain events or changes in operating conditions occur, an impairment assessment may be performed on the recoverability of the carrying amounts.

Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets, including capital lease assets which are depreciated over the terms of their respective leases. We generally use the following range of useful lives for our property and equipment categories: buildings and improvements— 3 to 39 years ; machinery and equipment— 3 to 20 years ; and furniture and fixtures— 3 to 7 years . We recorded depreciation and amortization expense of $446 million , $314 million and $277 million for fiscal 2018 , 2017 and 2016 , respectively.

The following table presents the components of property and equipment, net at June 30:

(in millions)		**2018**		2017
Land, building and improvements	**$**	**2,115**	$	1,637
Machinery and equipment		**3,006**		2,860
Furniture and fixtures		**139**		130
Total property and equipment, at cost		**5,260**		4,627
Accumulated depreciation and amortization		**(2,773)**		(2,748)
Property and equipment, net	**$**	**2,487**	$	1,879

Repairs and maintenance expenditures are expensed as incurred. Interest on long-term projects is capitalized using a rate that approximates the weighted-average interest rate on long-term obligations, which was 4 percent at June 30, 2018 . The amount of capitalized interest was immaterial for all periods presented.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. The excess of the purchase price over the estimated fair value of the identifiable net assets acquired is recorded as goodwill. We base the fair values of identifiable intangible assets on detailed valuations that require management to make significant judgments, estimates and assumptions. Critical estimates and assumptions include: expected future cash flows for customer relationships, trade names and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. When an acquisition involves contingent consideration, we recognize a liability equal to the fair value of the contingent consideration obligation at the acquisition date. The estimate of fair

value of a contingent consideration obligation requires subjective assumptions to be made regarding future business results, discount rates, discount periods and probabilities assigned to various potential business result scenarios. See Note 2 for additional information regarding our acquisitions.

Goodwill and Other Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment annually or when indicators of impairment exist.

Purchased goodwill is tested for impairment at least annually. Qualitative factors are first assessed to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If it is determined that it is more likely than not that the fair value does not exceed the carrying amount, then a quantitative test is performed. The quantitative goodwill impairment test involves a comparison of the estimated fair value of the reporting unit to the respective carrying amount.

Goodwill impairment testing involves judgment, including the identification of reporting units, qualitative evaluation of events and circumstances to determine if it is more likely than not that an impairment exists, and, if necessary, the estimation of the fair value of the applicable reporting unit. Our qualitative evaluation considers the weight of evidence and significance of all identified events and circumstances and most relevant drivers of fair value, both positive and negative, in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

We have two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. These operating segments are comprised of divisions (components), for which discrete financial information is available. Components are aggregated into reporting units for purposes of goodwill impairment testing to the extent that they share similar economic characteristics. Our reporting units are: Pharmaceutical operating segment (excluding our Nuclear Pharmacy Services division); Nuclear Pharmacy Services division; Medical operating segment (excluding our Cardinal Health at Home division and naviHealth division) (“Medical Unit”); Cardinal Health at Home division; and naviHealth division.

Fair value can be determined using market, income or cost-based approaches. Our determination of estimated fair value of the reporting units is based on a combination of the income-based and market-based approaches. Under the income-based approach, we use a discounted cash flow model in which cash flows anticipated over several future periods, plus a terminal value at the end of that time horizon, are discounted to their present value using an appropriate risk-adjusted rate of return. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for each reporting unit. Actual results may differ materially from those used in our forecasts. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Discount rates used in our reporting unit valuations ranged from 8.5 percent to 13.5 percent .

Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets. We also use the guideline transaction method to determine fair value based on pricing multiples derived from the sale of companies that are similar to our reporting units. To further confirm fair value, we compare the aggregate fair value of our reporting units to our total market capitalization. Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including forecasted operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment.

We performed annual impairment testing in fiscal 2018 , 2017 and 2016 and with the exception of our Medical Unit in fiscal 2018, concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value. As discussed further in Note 5 of the "Notes to Consolidated Financial Statements," during the fourth quarter of fiscal 2018 we recognized a $1.4 billion goodwill impairment charge related to our Medical Unit, which is included in impairments and loss on disposal of assets in our consolidated statements of earnings. There was no tax benefit related to this goodwill impairment charge.

The impairment test for indefinite-lived intangibles other than goodwill (primarily IPR&D) involves first assessing qualitative factors to determine if it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying amount. If so, then a quantitative test is performed to compare the estimated fair value of the indefinite-lived intangible asset to the respective asset's carrying amount. Our qualitative evaluation requires the use of estimates and significant judgments and considers the weight of evidence and significance of all identified events and circumstances and most relevant drivers of fair value, both positive and negative, in determining whether it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying amount.

Intangible assets with finite lives, primarily customer relationships; trademarks, trade names and patents; and developed technology, are amortized using a combination of straight-line and accelerated methods based on the expected cash flows from the asset over their estimated useful lives. We review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment loss occurred requires a comparison of the carrying amount to the sum of the future forecasted undiscounted cash flows expected to be generated by the asset group. Actual results may differ materially from those used in our forecasts.

Assets Held for Sale

We classify assets and liabilities (the “disposal group”) as held for sale when management commits to a plan to sell the disposal group in its present condition and at a price that is reasonable in relation to its current fair value. We also consider whether an active program to locate a buyer has been initiated and if it is probable that the sale will

occur within one year without significant changes to the plan to sell. Upon classification of the disposal group as held for sale, we test the assets for impairment and cease related depreciation and amortization.

Investments

Investments in non-marketable equity securities are accounted for under either the cost or equity method of accounting and are included in other assets in the consolidated balance sheets. For investments in which we can exercise significant influence, we use the equity method of accounting. Our share of the earnings and losses was immaterial, both individually and in the aggregate, for all periods presented and is recorded in other income, net in the consolidated statements of earnings. We closely monitor our investments for other-than-temporary impairment by considering factors such as the operating performance of the investment and current economic and market conditions.

Marketable securities are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Unrealized gains and losses on available-for-sale securities, net of applicable taxes, are included within shareholders' equity in accumulated other comprehensive income ("AOCI"). We monitor these securities for other-than-temporary impairment by considering factors such as the duration that, and the extent to which, the fair value is below cost, the operating performance and credit worthiness of the issuer of the securities and current economic and market conditions. See Note 6 for additional information regarding available-for-sale securities.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputes are researched and resolved based upon the findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the type of claim and status of review. Though the claim types are relatively consistent, we periodically refine our methodology by updating the reserve estimate percentages to reflect actual historical experience. The ultimate outcome of certain claims may be different than our original estimate and may require an adjustment. Adjustments to vendor reserves are included in cost of products sold. In addition, the reserve balance will fluctuate due to variations of outstanding claims from period-to-period, timing of settlements and specific vendor issues, such as bankruptcies. Vendor reserves were $45 million and $50 million at June 30, 2018 and 2017 , respectively, excluding third-party returns. See Third-Party Returns section within this Note for a description of third-party returns.

Distribution Services Agreement and Other Vendor Fees

Our Pharmaceutical segment recognizes fees received from distribution services agreements and other fees received from vendors related to the purchase or distribution of the vendors' inventory when those fees have been earned and we are entitled to payment. Since the benefit provided to a vendor is related to the purchase and distribution of the vendor's inventory, we recognize the fees as a reduction in the carrying value of the inventory that generated the fees, and as such, a reduction of cost of products sold in our consolidated statements of earnings when the inventory is sold.

Loss Contingencies and Self-Insurance

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We also self-insure for employee healthcare, general liability, certain product liability matters, auto liability, property and workers' compensation. Self-insurance accruals include an estimate for expected settlements or pending claims, defense costs, administrative fees, claim adjustment costs and an estimate for claims incurred but not reported. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies and other liabilities is highly subjective and requires judgments about future events. We regularly review contingencies and our self-insurance accruals to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates. We recognize these estimated loss contingencies, income from favorable resolution of litigation and certain defense costs in litigation (recoveries)/charges in our consolidated statements of earnings. See Note 9 for additional information regarding loss contingencies and product liability lawsuits.

Income Taxes

We account for income taxes using the asset and liability method. Deferred tax assets and liabilities are measured using enacted tax rates in the respective jurisdictions in which we operate . We assess the realizability of deferred tax assets on a quarterly basis and provide a valuation allowance for deferred tax assets when it is more likely than not that at least a portion of the deferred tax assets will not be realized. The realizability of deferred tax assets depends on our ability to generate sufficient taxable income within the carryback or carryforward periods provided for in the tax law for each applicable tax jurisdiction and also considers all available positive and negative evidence.

Deferred taxes for non-U.S. liabilities are not provided on the unremitted earnings of subsidiaries outside of the United States when it is expected that these earnings are indefinitely reinvested.

Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation processes. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement. See Note 8 for additional information regarding income taxes.

Other Accrued Liabilities

Other accrued liabilities represent various current obligations, including certain accrued operating expenses and taxes payable.

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests represent the portion of net earnings, comprehensive income and net assets that is not attributable to Cardinal Health, Inc.

The redeemable noncontrolling interests relate to our ownership interest in naviHealth Holdings, LLC ("naviHealth"), which we acquired during fiscal 2016. The redeemable noncontrolling interests are redeemable at the option of the third-party noncontrolling interest holders at any time after the two-year anniversary of the closing, or earlier if a trigger event occurs. As such, the noncontrolling interests have been presented as redeemable noncontrolling interests in our consolidated balance sheets. The noncontrolling interests will be adjusted each period for net earnings and dividends attributable to the noncontrolling interests and changes in the noncontrolling ownership interests, if any. An additional adjustment to the carrying value of the noncontrolling interests may be required if the redemption value under the terms of the agreement exceeds the carrying value. Changes in the carrying value of the noncontrolling interests related to a change in the redemption value will be recorded through retained earnings and will not affect net earnings attributable to Cardinal Health, Inc. See Note 13 for additional information regarding redeemable noncontrolling interests.

In June 2018, we signed a securities purchase agreement and a contribution and rollover agreement with investor entities controlled by Clayton, Dubilier & Rice ("CD&R") to sell our ownership interest in naviHealth. For more information on this divestiture see Note 4 .

Share-Based Compensation

Share-based compensation provided to employees is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The fair value of stock options is determined on the grant date using a lattice valuation model. The fair value of restricted share units and performance share units is determined by the grant date market price of our common shares. The compensation expense associated with nonvested performance share units is dependent on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. The compensation expense recognized for share-based awards is net of estimated forfeitures and is recognized ratably over the service period of the awards. All income tax effects of share-based awards are recognized in the statement of earnings as awards vest or are settled. We classify share-based compensation expense in distribution, selling, general and administrative ("SG&A") expenses to correspond with the same line item as the majority of the cash compensation paid to employees. If awards are modified in connection with a restructuring activity, the incremental share-based compensation expense is classified in restructuring and employee severance. See Note 17 for additional information regarding share-based compensation.

Dividends

We paid cash dividends per common share of $1.85 , $1.80 and $1.55 in fiscal 2018 , 2017 and 2016 , respectively.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, product delivery has occurred or the services have been rendered, the price is fixed or determinable, and collectability is reasonably assured.

Pharmaceutical Segment

The Pharmaceutical segment recognizes distribution revenue when title transfers to its customers and we have no further obligation to provide services related to such merchandise.

Revenue for deliveries that are directly shipped to customers from the manufacturer when we act as an intermediary in the ordering and delivery of products is recorded gross. This is in accordance with accounting standards addressing reporting revenue on a gross basis as a principal versus on a net basis as an agent. This revenue is recorded on a gross basis since we incur credit risk from the customer, are primarily responsible for fulfillment, bear the risk of loss for incomplete shipments and do not receive a separate fee or commission for the transaction and, as such, are the primary obligor. Revenue from these sales is recognized when title transfers to the customer and we have no further obligation to provide services related to such merchandise.

Radiopharmaceutical revenue is recognized upon delivery of the product to the customer and we have no further obligation to provide services related to such merchandise.

Medical Segment

The Medical segment recognizes revenue when title transfers to its customers and we have no further obligation to provide services related to such products.

Sales Returns and Allowances

Revenue is recorded net of sales returns and allowances. Our customer return policies generally require that the product be physically returned, subject to restocking fees, in a condition suitable to be added back to inventory and resold at full value, or returned to vendors for credit (“merchantable product”). Product returns are generally consistent throughout the year and typically are not specific to any particular product or customer.

We accrue for estimated sales returns and allowances at the time of sale based upon historical customer return trends, margin rates and processing costs. Our accrual for sales returns is reflected as a reduction of revenue and cost of products sold for the sales price and cost, respectively. At June 30, 2018 and 2017 , the accrual for estimated sales returns and allowances was $479 million and $347 million , respectively, the impact of which is reflected in trade receivables, net and inventories, net in the consolidated balance sheets. Sales returns and allowances were $2.4 billion , $2.3 billion and $2.2 billion , for fiscal 2018 , 2017 and 2016 , respectively.

Third-Party Returns

We generally do not accept non-merchantable pharmaceutical product returns from our customers, so many of our customers return non-merchantable pharmaceutical products to the manufacturer through third parties. Since our customers generally do not have a direct relationship with manufacturers, our vendors pass the value of such returns to us (usually in the form of an accounts payable

deduction) for distribution to customers. We, in turn, pass the value received, less an administrative fee, to our customer. In certain instances, we pass the estimated value of the return to our customer prior to our receipt of the value from the vendor. Although we believe we have satisfactory protections, we could be subject to claims from customers or vendors if our administration of this overall process was deficient in some respect or our contractual terms with vendors are in conflict with our contractual terms with our customers. We have maintained reserves for some of these situations based on their nature and our historical experience with their resolution.

Shipping and Handling

Shipping and handling costs are primarily included in SG&A expenses in our consolidated statements of earnings. Shipping and handling costs include all delivery expenses as well as all costs to prepare the product for shipment to the end customer. Shipping and handling costs were $543 million , $496 million and $504 million , for fiscal 2018 , 2017 and 2016 , respectively. Revenue received for shipping and handling was immaterial for all periods presented.

Restructuring and Employee Severance

Restructuring activities are programs that are not part of the ongoing operations of our underlying business, such as closing and consolidating facilities, changing the way we manufacture or distribute our products, moving manufacturing of a product to another location, changes in production or business process outsourcing or insourcing, employee severance (including rationalizing headcount or other significant changes in personnel) and realigning operations (including realignment of the management structure in response to changing market conditions). See Note 3 for additional information regarding our restructuring activities.

Amortization and Other Acquisition-Related Costs

We classify certain costs incurred in connection with acquisitions as amortization and other acquisition-related costs in our consolidated statements of earnings. These costs consist of amortization of acquisition-related intangible assets, transaction costs, integration costs and changes in the fair value of contingent consideration obligations. Transaction costs are incurred during the initial evaluation of a potential acquisition and primarily relate to costs to analyze, negotiate and consummate the transaction as well as due diligence activities. Integration costs relate to activities required to combine the operations of an acquired enterprise into our operations and, in the case of the Cordis and Patient Recovery businesses, to stand-up the systems and processes needed to support an expanded geographic footprint. We record changes in the fair value of contingent consideration obligations relating to acquisitions as income or expense in amortization and other acquisition-related costs. See Note 5 for additional information regarding amortization of acquisition-related intangible assets and Note 11 for additional information regarding contingent consideration.

Translation of Foreign Currencies

Financial statements of our subsidiaries outside the United States are generally measured using the local currency as the functional currency. Adjustments to translate the assets and liabilities of these foreign subsidiaries into U.S. dollars are accumulated in shareholders' equity through AOCI utilizing period-end exchange rates. Revenues and expenses of these foreign subsidiaries are translated using average exchange rates during the year.

The foreign currency translation gains/(losses) included in AOCI at June 30, 2018 and 2017 are presented in Note 14 . Foreign currency transaction gains and losses for the period are included in the consolidated statements of earnings in the respective financial statement line item.

Interest Rate, Currency and Commodity Risk

All derivative instruments are recognized at fair value on the consolidated balance sheets and all changes in fair value are recognized in net earnings or shareholders' equity through AOCI, net of tax.

For contracts that qualify for hedge accounting treatment, the hedge contracts must be effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the contract. Hedge effectiveness is assessed periodically. Any contract not designated as a hedge, or so designated but ineffective, is adjusted to fair value and recognized immediately in net earnings. If a fair value or cash flow hedge ceases to qualify for hedge accounting treatment, the contract continues to be carried on the balance sheet at fair value until settled and future adjustments to the contract's fair value are recognized immediately in net earnings. If a forecasted transaction is probable not to occur, amounts previously deferred in AOCI are recognized immediately in net earnings. See Note 12 for additional information regarding our derivative instruments, including the accounting treatment for instruments designated as fair value, cash flow and economic hedges.

Fair Value Measurements

Fair value is defined as the price that would be received upon selling an asset or the price paid to transfer a liability on the measurement date. It focuses on the exit price in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants. A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair values are:

Level 1 - Observable prices in active markets for identical assets and liabilities.

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities.

See Note 11 for additional information regarding fair value measurements.

Recent Financial Accounting Standards

In March 2018, the Financial Accounting Standards Board (the "FASB") issued amended accounting guidance to codify guidance

pursuant to SEC staff accounting bulletin 118 ("SAB 118"), which was issued in connection with the Tax Cuts and Jobs Act (the "Tax Act") of December 2017. The guidance allows companies to use provisional estimates to record the effects of the Tax Act and also provides a measurement period (not to exceed one year from the date of enactment) to complete the accounting for the impacts of the Tax Act. We adopted this guidance in the second quarter of fiscal 2018 when it was initially issued as SAB 118. We are still completing our accounting for the tax effects of the Tax Act because all the necessary information is not currently available, prepared, or analyzed. As such, we have made reasonable estimates of the effects of the Tax Act on our financial results. As we complete our analysis of the accounting for the tax effects of enactment of the Tax Act, we may record additional provisional amounts or adjustments to provisional amounts as discrete items in future periods. See Note 8 for additional information regarding income taxes.

In August 2017, the FASB issued accounting guidance which is intended to improve and simplify accounting rules around hedge accounting. The guidance will be effective for us in the first quarter of fiscal 2020 and early adoption is permitted. While we are currently evaluating the timing of adoption, we do not expect the impact of this standard to have a material impact on our consolidated financial statements.

In March 2016, the FASB issued amended accounting guidance that changed the accounting for certain aspects of share-based compensation to employees. The guidance requires all income tax effects of share-based awards to be recognized in the statement of earnings as awards vest or are settled. Additionally, the guidance increases the amount employers can withhold in shares to cover employee income taxes without requiring liability classification and allows a policy election for accounting for forfeitures. The primary impact of adoption is the recognition of excess tax benefits in the statement of earnings on a prospective basis, rather than as a component of equity. The impact on the presentation in the consolidated statement of cash flows is also prospective. We adopted this guidance in the first quarter of fiscal 2018. The impact of adoption on the provision for/(benefit from) income taxes on our consolidated statement of earnings was immaterial. The inclusion of excess tax benefits and deficiencies as a component of our income tax expense will increase volatility within our provision for/(benefit from) income taxes as the amount of excess tax benefits or deficiencies from share- based compensation awards depends on our stock price at the date the awards vest or settle.

In February 2016, the FASB issued amended accounting guidance that requires lessees to recognize most leases on the balance sheet as a lease liability and corresponding right-of-use asset. The guidance also requires disclosures that meet the objective of enabling financial statement users to assess the amount, timing, and uncertainty of cash flows arising from leases. This guidance will be effective for us in the first quarter of fiscal 2020 and we expect to elect the practical expedient which will allow us to not apply the amended lease accounting guidance to comparative periods that will be presented. The majority of our lease spend relates to certain real estate with the remaining lease spend primarily related to equipment.

We are continuing to evaluate the impact of this standard on our consolidated financial statements and the methods of adoption.

In May 2014, the FASB issued amended accounting guidance related to revenue recognition which is effective for us in the first quarter of fiscal 2019. This guidance is based on the principle that revenue is recognized in an amount that reflects the consideration to which an entity expects to be entitled in exchange for the transfer of goods or services to customers. The guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The FASB also subsequently issued several amendments to the standard, including clarification on principal versus agent considerations, performance obligations and licensing, and certain scope improvements and practical expedients.

During fiscal 2018 we finalized our evaluation and assessment of the amended revenue recognition guidance. Our revenue is primarily distribution revenue, which we recognize at a point in time when title transfers to customers and we have no further obligation to provide services related to such merchandise. The timing of recognition of our distribution revenue will be unchanged under the amended guidance. The adoption of the amended accounting guidance will not have a material impact on our consolidated financial statements.

In May 2017, the FASB issued final guidance that clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. Entities will apply the modification accounting guidance if the value, vesting conditions or classification of the award changes. This guidance will be effective for us in the first quarter of fiscal 2019 and the impact of this new guidance is dependent on future events.

In February 2017, the FASB clarified the guidance on how to account for the derecognition of nonfinancial assets (e.g., real estate, land, buildings, intangibles) and in-substance nonfinancial assets once an entity adopts the new revenue recognition guidance that is discussed in more detail above. The guidance also defines what constitutes an in-substance nonfinancial asset. This guidance will be effective for us in the first quarter of fiscal 2019. We anticipate the adoption of this guidance will not impact our consolidated financial statements.

In January 2017, the FASB issued amended accounting guidance that simplifies the accounting for goodwill impairment by eliminating the step of measuring a goodwill impairment by estimating the implied fair value of goodwill. Instead, goodwill impairment will be measured as the amount by which the reporting unit's carrying value exceeds its fair value, limited to the carrying value of the goodwill. We adopted this guidance in the second quarter of fiscal 2018. During the fourth quarter of fiscal 2018, we measured the Medical Unit's impairment at the amount by which the reporting unit's carrying value exceeded its fair value, resulting in an impairment charge of $1.4 billion . Refer to Note 5 for further discussion.

Also in January 2017, the FASB issued new accounting guidance that changes the definition of a business when evaluating whether a set of transferred assets and activities is considered a business. This

guidance will be effective for us in the first quarter of fiscal 2019. The impact of adoption is dependent on future events.

In October 2016, the FASB issued amended accounting guidance that requires an entity to recognize the income tax effect of intercompany sales and transfers of assets other than inventory at the time that the transfer occurs rather than when the asset is sold to a third party. This amendment will be effective for us in the first quarter of fiscal 2019. We are currently evaluating the impact of this standard on our consolidated financial statements.

In August 2016, the FASB issued accounting guidance which clarifies the classification of certain cash receipts and cash payments in the statement of cash flows, including those related to contingent consideration payments made after a business combination, distributions received from equity method investees, debt prepayment or debt extinguishment costs and proceeds from the settlement of insurance claims. This guidance will be effective for us in the first quarter of fiscal 2019. We are currently evaluating the impact of this standard on our consolidated financial statements.

In June 2016, the FASB issued amended accounting guidance that will require entities to measure credit losses on trade and other receivables, held-to-maturity debt securities, loans and other instruments using an "expected credit loss" model that considers historical experience, current conditions and reasonable supportable forecasts. This guidance also requires that credit losses on available-for-sale debt securities with unrealized losses be recognized as allowances rather than as deductions in the amortized cost of the securities. This guidance will be effective for us in the first quarter of fiscal 2021. We are currently evaluating the impact of adoption on our consolidated financial statements.

2. Acquisitions

D uring fiscal 2018 , we completed several acquisitions, the most significant of which is the Patient Recovery Business described in more detail below. T he pro forma results of operations and the results of operations for acquired businesses since the acquisition dates have not been separately disclosed because the effects were not significant compared to the consolidated financial statements, individually or in the aggregate.

Patient Recovery Business

On July 29, 2017, we acquired the Patient Care, Deep Vein Thrombosis, and Nutritional Insufficiency businesses (the "Patient Recovery Business") from Medtronic plc for $6.1 billion in cash. The Patient Recovery Business manufactures 23 categories of medical products sold into multiple healthcare channels. The acquisition further expanded the Medical segment's portfolio of self-manufactured products. We closed the Patient Recovery Business acquisition in 28 principal countries on July 29, 2017, and acquired control of, for GAAP purposes, and the rights to the net economic benefit from the entire Patient Recovery Business in the remaining countries at the closing. We are in the process of transitioning legal ownership in the remaining non-principal countries, which we expect to complete in early calendar 2019.

The results for the entire Patient Recovery Business in all countries are included in the consolidated financial statements beginning July 29, 2017. We funded the acquisition through $4.5 billion in long-term debt, existing cash and borrowings under our existing credit arrangements.

Transaction and integration costs associated with the acquisition of the Patient Recovery business were $109 million during the fiscal year ended June 30, 2018 and are included in amortization and other acquisition-related costs in the consolidated statements of earnings.

Fair Value of Assets Acquired and Liabilities Assumed

The allocation of the purchase price for the acquisition of the Patient Recovery Business is not yet finalized and is subject to adjustment as we complete the valuation analysis for this acquisition.

The valuation of identifiable intangible assets utilizes significant unobservable inputs and thus represents a Level 3 nonrecurring fair value measurement. The estimated fair value of the identifiable intangible assets was determined using income-based approaches, which includes market participant expectations of the cash flows that an asset could generate over its economic life, discounted back to present value using an appropriate rate of return. The weighted- average discount rate used to arrive at the present value of the identifiable intangible assets was 8.0 percent, and considers the inherent risk of each intangible asset relative to the internal rate of return and weighted-average cost of capital.

The following table summarizes the estimated fair value of the assets acquired and liabilities assumed as of the acquisition date for the Patient Recovery Business:

(in millions)		Patient Recovery Business
Identifiable intangible assets:		
Customer relationships (1)	$	1,733
Trade names (2)		187
Developed technology and other (3)		732
Total identifiable intangible assets acquired		2,652
Cash and equivalents		22
Inventories		425
Prepaid expenses and other		252
Property and equipment, net		741
Other accrued liabilities		(322)
Deferred income taxes and other liabilities		(982)
Total identifiable net assets acquired/(liabilities assumed)		2,788
Goodwill		3,292
Total net assets acquired	**$**	**6,080**

(1) The range of useful lives for customer relationships is 10 to 18 years.

(2) The useful life of trade names is 15 years.

(3) The useful life of developed technology is 15 years.

3. Restructuring and Employee Severance

The following tables summarize restructuring and employee severance costs:

(in millions)	2018	2017	2016
Employee-related costs (1)	$ 34	$ 51	$ 15
Facility exit and other costs (2)	142	5	10
Total restructuring and employee severance	**$ 176**	$ 56	$ 25

(1) Employee-related costs primarily consist of termination benefits provided to employees who have been involuntarily terminated and duplicate payroll costs during transition periods.

(2) Facility exit and other costs primarily consist of product distribution and lease contract termination costs, accelerated depreciation, equipment relocation costs, project consulting fees and costs associated with restructuring our delivery of information technology infrastructure services.

In September 2017, we entered into an agreement to transition the distribution of our Medical segment's surgeon gloves in certain international markets from a third-party distribution arrangement to a direct distribution model. The costs with this restructuring include $125 million , on a pre-tax basis, of contract termination costs which have been paid and are reflected in facility exit and other costs in the consolidated statement of earnings during the fiscal year ended 2018.

The following table summarizes activity related to liabilities associated with restructuring and employee severance:

(in millions)	Employee-Related Costs	Facility Exit and Other Costs	Total
Balance at June 30, 2016	$ 15	$ 1	**$ 16**
Additions	43	1	**44**
Payments and other adjustments	(17)	(2)	**(19)**
Balance at June 30, 2017	41	—	**41**
Additions	19	131	**150**
Payments and other adjustments	(36)	(127)	**(163)**
Balance at June 30, 2018	**$ 24**	**$ 4**	**$ 28**

4. Divestitures and Assets Held for Sale

China Divestiture

In February 2018, we sold our pharmaceutical and medical products distribution business in China ("China distribution business") for proceeds of $861 million (after adjusting for third party indebtedness and preliminary transaction adjustments) to Shanghai Pharmaceuticals Holding Co., Ltd. The proceeds are not reflective of tax obligations due in connection with the sale, for which we have recorded a liability of $59 million . The purchase price is subject to adjustment based on working capital requirements as set forth in the definitive agreement, which would impact the loss related to this divestiture.

We determined that the sale of the China distribution business does not meet the criteria to be classified as discontinued operations. The China distribution business primarily operated within our Pharmaceutical segment, and a smaller portion operated within our Medical segment.

During the fiscal year ended 2018, we recognized a pre-tax loss of $41 million related to this divestiture.

naviHealth Assets Held for Sale

In June 2018, we entered into a Securities Purchase Agreement and related Contribution and Rollover Agreement with investor entities controlled by CD&R. Pursuant to those agreements, on August 1, 2018, we sold our 98% ownership interest in naviHealth Holdings, LLC in exchange for proceeds of $736 million (after adjusting for certain fees and expenses) and a 44% equity interest in a partnership that owns 100% of the equity interest of naviHealth. We also have certain call rights to reacquire naviHealth.

Upon signing the agreement, we met the criteria for the related assets and liabilities of naviHealth to be classified as held for sale. At June 30, 2018, we determined that the fair value less cost to sell exceeded the book value of the disposal group and there were no other indicators of asset impairment. We recognized a provisional tax benefit of $12 million related to the transaction during the three months ended June 30, 2018. See Note 8 for additional information regarding income taxes. We determined that the sale of naviHealth does not meet the criteria to be classified as discontinued operations. The naviHealth business operated within our Medical segment.

The following table presents information related to the assets and liabilities that were classified as held for sale at June 30, 2018 in the consolidated balance sheets:

(in millions)	June 30, 2018
Trade Receivables, net	**$ 74**
Goodwill and other intangibles, net	**642**
Other assets	**40**
Total assets held for sale	**$ 756**
Deferred revenue	**35**
Deferred income taxes	**38**
Other liabilities	**140**
Total liabilities related to assets held for sale	**$ 213**

5. Goodwill and Other Intangible Assets

Goodwill

The following table summarizes the changes in the carrying amount of goodwill by segment and in total:

(in millions)	Pharmaceutical (1)	Medical (2)	Total
Balance at June 30, 2016	$ 2,919	$ 4,248	**$ 7,167**
Goodwill acquired, net of purchase price adjustments	29	35	**64**
Foreign currency translation adjustments and other	(9)	(1)	**(10)**
Balance at June 30, 2017	2,939	4,282	**7,221**
Goodwill acquired, net of purchase price adjustments	1	3,342	**3,343**
Foreign currency translation adjustments and other	28	6	**34**
Goodwill divested with the sale of our China distribution business	(347)	(54)	**(401)**
naviHealth goodwill reclassified to assets held for sale	—	(509)	**(509)**
Impairment	—	(1,372)	**(1,372)**
Balance at June 30, 2018	**$ 2,621**	**$ 5,695**	**$ 8,316**

(1) At June 30, 2018 and 2017, the Pharmaceutical segment accumulated goodwill impairment loss was $829 million .

(2) At June 30, 2018 , the Medical segment accumulated goodwill impairment loss was $1.4 billion . The Medical segment had no accumulated goodwill impairment loss at June 30, 2017.

The increase in the Medical segment goodwill during fiscal 2018 is primarily due to the Patient Recovery Business acquisition. Goodwill recognized in connection with the Patient Recovery Business acquisition primarily represents the expected benefits from certain synergies of integrating the business, the existing workforce of the acquired entity, and the expected growth from new customers. See Note 2 for further discussion of this acquisition.

In conjunction with the preparation of our consolidated financial statements for fiscal 2018, we recently completed our annual quantitative goodwill impairment test, which we perform annually in the fourth quarter. This quantitative test resulted in a $1.4 billion goodwill impairment charge related to our Medical Unit, which is included in impairments and loss on disposal of assets in our consolidated statements of earnings. The impairment was primarily driven by inventory and cost challenges within our Cordis business which furthered in the fourth quarter of fiscal 2018. This impairment charge does not impact our liquidity, cash flows from operations, or compliance with debt covenants. There was no tax benefit related to the goodwill impairment charge. The goodwill balance for our Medical Unit, after recognizing the impairment, was $4.3 billion at June 30, 2018.

Using a combination of income and market-based approaches (using a discount rate of 8.5 percent), the carrying amount exceeded the fair value and resulted in an impairment of $1.4 billion for the Medical unit. Our fair value estimates utilize significant unobservable inputs and thus represent Level 3 fair value measurements.

During fiscal 2018, goodwill was also reduced by $401 million and $509 million in connection with the sale of our China distribution business and reclassification of naviHealth's assets and liabilities to held for sale, respectively.

See Note 4 for further discussion of this divestiture and assets held for sale.

Other Intangible Assets

The following tables summarize other intangible assets by class at June 30:

	2018			
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible	Weighted-Average Remaining Amortization Period (Years)
Indefinite-life intangibles:				
IPR&D, trademarks and other	**$ 62**	**$ —**	**$ 62**	**N/A**
Total indefinite-life intangibles	**62**	**—**	**62**	**N/A**
Definite-life intangibles:				
Customer relationships	**3,513**	**1,191**	**2,322**	**15**
Trademarks, trade names and patents	**667**	**246**	**421**	**15**
Developed technology and other	**1,562**	**454**	**1,108**	**12**
Total definite-life intangibles	**5,742**	**1,891**	**3,851**	**14**
Total other intangible assets	**$ 5,804**	**$ 1,891**	**$ 3,913**	**N/A**

	2017		
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible
Indefinite-life intangibles:			
IPR&D, trademarks and other	$ 61	$ —	$ 61
Total indefinite-life intangibles	61	—	61
Definite-life intangibles:			
Customer relationships	1,966	967	999
Trademarks, trade names and patents	509	195	314
Developed technology and other	916	304	612
Total definite-life intangibles	3,391	1,466	1,925
Total other intangible assets	$ 3,452	$ 1,466	$ 1,986

Total amortization of intangible assets was $574 million , $395 million and $355 million for fiscal 2018 , 2017 and 2016 , respectively. The estimated annual amortization for intangible assets for fiscal 2019 through 2023 is as follows: $529 million , $501 million , $430 million , $398 million and $348 million .

During fiscal 2018, other intangible assets were reduced by $62 million and $133 million in connection with the sale of our China distribution business and reclassification of naviHealth's assets and liabilities to held for sale, respectively.

See Note 4 for further discussions of this divestiture and assets held for sale.

6. Available-for-Sale Securities

We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. We held the following investments in marketable securities at fair value at June 30:

(in millions)	2018	2017
Current available-for-sale securities:		
Treasury bills	—	25
International bonds	—	3
Corporate bonds	—	30
U.S. agency bonds	—	3
Asset-backed securities	—	3
International equity securities	—	1
Total available-for-sale securities	**$ —**	$ 65

In July 2017, we liquidated our marketable securities. There were no unrealized gains or losses at June 30, 2018 and unrealized gains and losses were immaterial at June 30, 2017 . During fiscal 2018 , 2017 and 2016 , gross realized gains and losses were immaterial and we did not recognize any other-than-temporary-impairments.

7. Long-Term Obligations and Other Short-Term Borrowings

The following table summarizes long-term obligations and other short-term borrowings at June 30:

(in millions) (1)	2018	2017
1.7% Notes due 2018	**$ —**	$ 400
1.95% Notes due 2018	**—**	547
1.948% Notes due 2019	**998**	996
2.4% Notes due 2019	**448**	453
4.625% Notes due 2020	**514**	519
2.616% Notes due 2022	**1,143**	1,142
3.2% Notes due 2022	**243**	248
Floating Rate Notes due 2022	**348**	347
3.2% Notes due 2023	**525**	544
3.079% Notes due 2024	**742**	744
3.5% Notes due 2024	**390**	396
3.75% Notes due 2025	**460**	481
3.41% Notes due 2027	**1,340**	1,340
4.6% Notes due 2043	**346**	346
4.5% Notes due 2044	**342**	341
4.9% Notes due 2045	**445**	445
4.368% Notes due 2047	**594**	594
7.0% Debentures due 2026	**124**	124
Other obligations	**11**	388
Total	**9,013**	10,395
Less: current portion of long-term obligations and other short-term borrowings	**1,001**	1,327
Long-term obligations, less current portion	**$ 8,012**	$ 9,068

(1) Maturities are presented on a calendar year basis.

Maturities of existing long-term obligations and other short-term borrowings for fiscal 2019 through 2023 and thereafter are as follows: $1.0 billion , $452 million , $516 million , $1.7 billion , $526 million and $4.8 billion .

Long-Term Debt

All the notes represent unsecured obligations of Cardinal Health, Inc. and rank equally in right of payment with all of our existing and future unsecured and unsubordinated indebtedness. The 7.0% Debentures represent unsecured obligations of Allegiance Corporation (a wholly-owned subsidiary), which Cardinal Health, Inc. has guaranteed. None of these obligations are subject to a sinking fund and the Allegiance obligations are not redeemable prior to maturity. Interest is paid pursuant to the terms of the obligations. These notes are effectively subordinated to the liabilities of our subsidiaries, including trade payables of $19.7 billion .

In June 2018, we repaid the full principal of the 1.95% Notes due 2018 at maturity for $550 million . In July 2017, we redeemed the 1.7% Notes due 2018 early in full with a portion of the proceeds from the June 2017 issuance for $400 million .

In June 2017, we issued additional debt with the aggregate principal amount of $5.2 billion to fund a portion of the acquisition of the Patient Recovery Business from Medtronic, which closed on July 29, 2017 , to redeem the 1.7% Notes due 2018 and for general corporate purposes. The notes issued in conjunction with the acquisition are 1.948% Notes due 2019, 2.616% Notes due 2022, 3.079% Notes due 2024, 3.41% Notes due 2027, 4.368% Notes due 2047, and floating rate Notes due 2022. The amount of the notes issued net of discounts, premiums, mark-to-market of any interest rate swaps and debt issuance costs was $5.2 billion .

If we undergo a change of control, as defined in the notes, and if the notes receive specified ratings below investment grade by each of Standard & Poors Ratings Services, Moody's Investors Services and Fitch Ratings, any holder of the notes, excluding the debentures, can require with respect to the notes owned by such holder, or we can offer, to repurchase the notes at 101% of the principal amount plus accrued and unpaid interest.

Other Financing Arrangements

In addition to cash and equivalents and operating cash flow, other sources of liquidity include a $2.0 billion revolving credit facility and a $1.0 billion committed receivables sales facility program, which we increased in August 2017 from $1.75 billion to $2.0 billion . In November 2016, we renewed our committed receivables sales facility program through Cardinal Health Funding, LLC ("CHF") through November 1, 2019. CHF was organized for the sole purpose of buying receivables and selling undivided interests in those receivables to third-party purchasers. Although consolidated with Cardinal Health, Inc. in accordance with GAAP, CHF is a separate legal entity from Cardinal Health, Inc. and from our subsidiary that sells receivables to CHF. CHF is designed to be a special purpose, bankruptcy-remote entity whose assets are available solely to satisfy the claims of its creditors.

We also maintain a $2.0 billion commercial paper program backed by a $2.0 billion revolving credit facility. At June 30, 2018 , we had no amounts outstanding under the revolving credit facility; however, availability was reduced by outstanding letters of credit of $24 million and $20 million at June 30, 2018 and 2017 , respectively. We also had no amounts outstanding under the committed receivables sales facility program; however, availability was reduced by outstanding standby letters of credit of $34 million and $46 million at June 30, 2018 and 2017 , respectively. Under our commercial paper and committed receivables programs, we had a maximum amount outstanding of $1.7 billion and an average daily amount outstanding of $277 million during fiscal 2018 . We had no amounts outstanding under the commercial paper program as of June 30, 2018 .

Our revolving credit facility and committed receivables sales facility program require us to maintain, as of the end of any calendar quarter, a consolidated leverage ratio of no more than 4.25 -to-1, which will reduce to 3.25-to-1 in March 2019. As of June 30, 2018 , we were in compliance with these financial covenants.

We also maintain other short-term credit facilities and an unsecured line of credit that allowed for borrowings up to $8 million and $690 million at June 30, 2018 and 2017 , respectively. The $11 million and $388 million balance of other obligations at June 30, 2018 and 2017 , respectively, consisted of short-term borrowings and capital leases.

In fiscal 2018 we sold our China distribution business, including its debt which was $378 million as of June 30, 2017. See Note 4 for further discussion of this divestiture.

8. Income Taxes

Earnings/(loss) before Income Taxes and Provision for Income Taxes
The following table summarizes earnings/(loss) before income taxes:

(in millions)	2018	2017	2016
U.S. operations	$ 391	$ 1,772	$ 2,050
Non-U.S. operations	(619)	152	226
Earnings/(loss) before income taxes	$ (228)	$ 1,924	$ 2,276

The following table summarizes the components of provision for/(benefit from) income taxes:

(in millions)	2018	2017	2016
Current:			
Federal	$ 341	$ 273	$ 633
State and local	41	10	52
Non-U.S.	143	56	73
Total current	$ 525	$ 339	$ 758
Deferred:			
Federal	$ (1,003)	$ 258	$ 96
State and local	16	37	12
Non-U.S.	(25)	(4)	(21)
Total deferred	(1,012)	291	87
Provision for/(benefit from) income taxes	$ (487)	$ 630	$ 845

Effective Tax Rate

The following table presents a reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate:

	2018 (1)	2017 (2)	2016 (2)
Provision at Federal statutory rate	**28.1 %**	35.0 %	35.0 %
State and local income taxes, net of federal benefit	**(16.0)**	1.0	1.5
Foreign tax rate differential	**(48.4)**	(7.3)	(0.6)
Nondeductible/nontaxable items	**(10.2)**	0.2	1.0
Goodwill impairment	**(124.7)**	—	—
Tax Act	**410.9**	—	—
Capital loss	**71.4**	—	—
Change in valuation allowances	**(76.9)**	7.7	0.1
Foreign tax credits	**27.3**	(1.6)	(0.1)
China tax related to divestiture	**(25.8)**	—	—
Other	**(21.9)**	(2.3)	0.2
Effective income tax rate	**213.8 %**	32.7 %	37.1 %

(1) The effective income tax rate for fiscal 2018 represents an income tax benefit tax rate.

(2) The effective income tax rates for fiscal 2017 and 2016 represents income tax expense tax rates.

The income tax benefit rate in fiscal 2018 was 213.8% compared to income tax expense rates of 32.7% in fiscal 2017 and 37.1% in fiscal 2016. Fluctuations in the effective tax rates are primarily due to net benefits from the enactment of the Tax Act, the impact of nondeductible goodwill impairment charges, and a benefit from a capital loss due to international legal entity reorganization. There were also changes in valuation allowances related to capital losses, credit carryforwards and net operating loss carryforwards in U.S. federal, U.S. state and international jurisdictions.

On December 22, 2017, the United States enacted the Tax Act. The Tax Act makes broad and complex changes to the U.S. tax code that affect our fiscal year 2018 financial results in two primary ways. First, effective as of January 1, 2018, the Tax Act reduces the U.S. federal corporate tax rate from 35 percent to 21 percent. Second, it requires companies to pay a one-time U.S. repatriation tax on certain undistributed earnings of foreign subsidiaries. Because our fiscal year ends in June, we have a blended U.S. Federal statutory tax rate for fiscal 2018 of 28.1 percent under the Tax Act. The Tax Act also establishes new tax provisions that will affect us beginning July 1, 2018 including, (1) eliminating the U.S. manufacturing deduction; (2) establishing new limitations on deductible interest expense and certain executive compensation; (3) eliminating the corporate alternative minimum tax; (4) creating the base erosion anti-abuse tax; (5) creating a new provision designed to tax global intangible low-tax income ("GILTI"); (6) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries; and (7) changing rules related to uses and limitations of net operating loss carryforwards created in tax years beginning after December 31, 2017.

Regarding the new GILTI tax rules, we are allowed to make an accounting policy election to either (1) treat taxes due on future GILTI exclusions in U.S. taxable income as a current period expense when incurred or (2) reflect such portion of the future GILTI exclusions in U.S. taxable income that relate to existing basis differences in our measurement of deferred taxes. Our analysis of the new GILTI rules and how they may impact us is incomplete. Accordingly, we have not made a policy election regarding the treatment of the GILTI tax.

As a result of the enactment of a lower tax rate, we remeasured our U.S. deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future. While we are still analyzing certain aspects of the Tax Act and refining our calculations, we have recorded a provisional net benefit of $977 million related to this required remeasurement. The provisional estimate is based on currently available information related to deferred tax assets and liabilities which is subject to change as additional information becomes available, prepared, and analyzed.

At June 30, 2018 , we had $110 million of undistributed earnings from non-U.S. subsidiaries. In connection with the required one-time U.S. repatriation tax on undistributed earnings of foreign subsidiaries, we recorded a provisional tax expense of $41 million which may change when our calculation is complete. The Tax Act permits the payment of this tax in eight installments over an eight-year period beginning in fiscal 2019. Though these foreign earnings have been deemed to be repatriated from a U.S. federal tax perspective, we have not yet completed our assessment of the Tax Act on our plans to reinvest foreign earnings and as such have not changed our prior conclusion that the earnings are indefinitely reinvested. The repatriation tax is based on currently available information and technical guidance related to the new tax law. The provisional estimate will be updated when additional information related to undistributed foreign earnings, foreign taxes and foreign cash and equivalents becomes available, prepared and analyzed.

Our effective tax rate was unfavorably impacted by goodwill impairment charges related to our Medical operating segment for the portion attributable to nondeductible goodwill for income tax purposes.

On June 28, 2018, we executed an international legal entity reorganization. This transaction resulted in a US capital loss and a tax benefit of $163 million . Due to the uncertainty of the future utilization of the capital loss, we recorded a valuation allowance of $72 million on the carryforward.

We had other changes in valuation allowances related to federal credits and various international and state net operating losses that we believe are more likely than not to expire unutilized.

Deferred Income Taxes

Deferred income taxes arise from temporary differences between financial reporting and tax reporting bases of assets and liabilities and operating loss and tax credit carryforwards for tax purposes.

The following table presents the components of the deferred income tax assets and liabilities at June 30:

(in millions)	2018	2017
Deferred income tax assets:		
Receivable basis difference	**$ 41**	$ 42
Accrued liabilities	**110**	125
Share-based compensation	**40**	53
Loss and tax credit carryforwards	**526**	378
Deferred tax assets related to uncertain tax positions	**30**	51
Other	**101**	43
Total deferred income tax assets	**848**	692
Valuation allowance for deferred income tax assets	**(412)**	(237)
Net deferred income tax assets	**$ 436**	$ 455
Deferred income tax liabilities:		
Inventory basis differences	**$ (1,103)**	$ (1,578)
Property-related	**(176)**	(183)
Goodwill and other intangibles	**(934)**	(570)
Total deferred income tax liabilities	$ (2,213)	$ (2,331)
Net deferred income tax liability	**$ (1,777)**	$ (1,876)

Deferred income tax assets and liabilities in the preceding table, after netting by taxing jurisdiction, are in the following captions in the consolidated balance sheets at June 30:

(in millions)	2018	2017
Noncurrent deferred income tax asset (1)	**37**	73
Noncurrent deferred income tax liability (2)	**(1,814)**	(1,949)
Net deferred income tax liability	**$ (1,777)**	$ (1,876)

(1) Included in other assets in the consolidated balance sheets.

(2) Included in deferred income taxes and other liabilities in the consolidated balance sheets.

At June 30, 2018 we had gross federal, state and international loss and credit carryforwards of $794 million , $2.0 billion and $1.1 billion , respectively, the tax effect of which is an aggregate deferred tax asset of $526 million . Substantially all of these carryforwards are available for at least three years. Approximately $379 million of the valuation allowance at June 30, 2018 applies to certain federal, state and international loss carryforwards that, in our opinion, are more likely than not to expire unutilized. However, to the extent that tax benefits related to these carryforwards are realized in the future, the reduction in the valuation allowance would reduce income tax expense.

Unrecognized Tax Benefits

We had $423 million , $417 million and $527 million of unrecognized tax benefits at June 30, 2018 , 2017 and 2016 , respectively. The June 30, 2018 , 2017 and 2016 balances include $262 million , $268 million and $355 million , respectively, of unrecognized tax benefits that, if recognized, would have an impact on the effective tax rate. The remaining unrecognized tax benefits relate to tax positions for which ultimate deductibility is highly certain but for which there is uncertainty as to the timing of such deductibility. Recognition of these tax benefits would not affect our effective tax rate. We include the full amount of unrecognized tax benefits in deferred income taxes and other liabilities in the consolidated balance sheets. The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

(in millions)	2018	2017	2016
Balance at beginning of fiscal year	**$ 417**	$ 527	$ 542
Additions for tax positions of the current year	**15**	29	22
Additions for tax positions of prior years (1)	**141**	23	42
Reductions for tax positions of prior years	**(40)**	(8)	(48)
Settlements with tax authorities (1)	**(99)**	(154)	(30)
Expiration of the statute of limitations (1)	(11)	—	(1)
Balance at end of fiscal year	**$ 423**	$ 417	$ 527

(1) Included in additions for tax positions of prior years is $110 million related to exposures acquired as part of the Patient Recovery Business for which we are indemnified. Settlements of $81 million related to the Patient Recovery Business as well as $11 million of statute expirations.

It is reasonably possible that there could be a change in the amount of unrecognized tax benefits within the next 12 months due to activities of the U.S. Internal Revenue Service ("IRS") or other taxing authorities, possible settlement of audit issues, reassessment of existing unrecognized tax benefits or the expiration of statutes of limitations. We estimate that the range of the possible change in unrecognized tax benefits within the next 12 months is a net decrease of $0 million to $35 million , exclusive of penalties and interest.

We recognize accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes. At June 30, 2018 , 2017 and 2016 , we had $110 million , $99 million and $145 million , respectively, accrued for the payment of interest and penalties. These balances are gross amounts before any tax benefits and are included in deferred income taxes and other liabilities in the consolidated balance sheets. During fiscal 2018 and 2017, we recognized $8 million and $12 million of expense for interest and penalties in income tax expense, respectively. During fiscal 2016 , we recognized $9 million of benefit for interest and penalties in income tax expense.

Other Tax Matters

We file income tax returns in the U.S. federal jurisdiction, various U.S. state and local jurisdictions, and various foreign jurisdictions. With few exceptions, we are subject to audit by taxing authorities for fiscal years 2008 through the current fiscal year.

We are a party to a tax matters agreement with CareFusion Corporation ("CareFusion"), which has been acquired by Becton, Dickinson and Company. Under the tax matters agreement, CareFusion is obligated to indemnify us for certain tax exposures and transaction taxes prior to our fiscal 2010 spin-off of CareFusion. The indemnification receivable was $151 million and $142 million at June 30, 2018 and 2017 , respectively, and is included in other assets in the consolidated balance sheets.

As a result of the acquisition of the Patient Recovery Business, Medtronic plc is obligated to indemnify us for certain tax exposures and transaction taxes related to periods prior to the acquisition under the purchase agreement. The indemnification receivable was $21 million at June 30, 2018 and is included in Other assets in the consolidated balance sheet.

9. Commitments, Contingent Liabilities and Litigation

Commitments

Operating Leases

The future minimum rental payments for operating leases having initial or remaining non-cancelable lease terms in excess of one year at June 30, 2018 for fiscal 2019 through 2023 and thereafter are as follows: $113 million , $97 million , $77 million , $58 million , $41 million and $103 million . Rental expense relating to operating leases was $172 million , $159 million and $126 million in fiscal 2018 , 2017 and 2016 , respectively. Sublease rental income was immaterial for all periods presented.

Generic Sourcing Venture With CVS Health Corporation

Red Oak Sourcing, LLC ("Red Oak Sourcing") is a U.S.-based generic pharmaceutical sourcing venture with CVS Health for an initial term through June 2024. Red Oak Sourcing negotiates generic pharmaceutical supply contracts on behalf of its participants. Due to the achievement of predetermined milestones, we are required to make quarterly payments of $45.6 million to CVS Health for the initial term.

Contingencies

New York Opioid Stewardship Act

In April 2018, the State of New York passed a budget which included the Opioid Stewardship Act (the "OSA"). The OSA created an aggregate $100 million annual assessment on all manufacturers and distributors licensed to sell or distribute opioids in New York. Each licensed manufacturer and distributor will be required to pay a portion of the assessment based on its ratable share, as determined by the state, of the total morphine milligram equivalents sold or distributed in New York during the applicable calendar year. The initial payment is due on January 1, 2019 for opioids sold or distributed during calendar year 2017.

We accrue for contingencies if it is probable that a liability has been incurred and the amount can be reasonably estimated. At this time, we believe that it is probable that we owe an amount under the OSA for calendar years 2017 and 2018, but we are unable to estimate the amount because of uncertainties with respect to the implementation of the assessment and because the information necessary to determine our share of the assessment is not yet available.

Legal Proceedings

We become involved from time to time in disputes, litigation and regulatory matters.

We may be named from time to time in *qui tam* actions initiated by private third parties. In such actions, the private parties purport to act on behalf of federal or state governments, allege that false claims have been submitted for payment by the government and may receive an award if their claims are successful. After a private party has filed a *qui tam* action, the government must investigate the private party's claim and determine whether to intervene in and take control over the litigation. These actions may remain under seal while the government makes this determination. If the government declines to intervene, the private party may nonetheless continue to pursue the litigation on his or her own purporting to act on behalf of the government .

From time to time, we become aware through employees, internal audits or other parties of possible compliance matters, such as complaints or concerns relating to accounting, internal accounting controls, financial reporting, auditing, or other ethical matters or relating to compliance with laws such as healthcare fraud and abuse, anti-corruption or anti-bribery laws. When we become aware of such possible compliance matters, we investigate internally and take appropriate corrective action. In addition, from time to time, we receive subpoenas or requests for information from various federal or state agencies relating to our business or to the business of a customer, supplier or other industry participants. Internal investigations, subpoenas or requests for information could lead to the assertion of claims or the commencement of legal proceedings against us or result in sanctions.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements, or published standards. When we or a regulatory agency identify a potential quality or regulatory issue, we investigate and take appropriate corrective action. Such actions can lead to product recalls, costs to repair or replace affected products, temporary interruptions in product sales, action by regulators and product liability claims and lawsuits, including class actions. Even absent an identified regulatory or quality issue or product recall, we can become subject to product liability claims and lawsuits.

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review contingencies to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates.

We recognize income from the favorable outcome of litigation when we receive the associated cash or assets.

We recognize estimated loss contingencies for certain litigation and regulatory matters and income from favorable resolution of litigation in litigation (recoveries)/charges in our consolidated statements of earnings.

Opioid Lawsuits

Pharmaceutical wholesale distributors, including us, have been named as defendants in over 1,000 lawsuits relating to the distribution of prescription opioid pain medications. These lawsuits have been filed in various federal, state, and other courts by a variety of plaintiffs, which are primarily counties, municipalities and political subdivisions from 48 states. Plaintiffs also include state attorneys general, unions and other health and welfare funds, hospital systems and other healthcare providers. Of these lawsuits, 32 are purported class actions. The lawsuits seek equitable relief and monetary damages based on a variety of legal theories including various common law claims, such as negligence, public nuisance, unjust enrichment as well as violations of controlled substance laws and various other

statutes. Many also name pharmaceutical manufacturers, retail pharmacy chains and other entities as defendants.

The vast majority of these lawsuits have been filed in U.S. federal court and have been transferred for consolidated pre-trial proceedings in a Multi-District Litigation proceeding in the United States District Court for the Northern District of Ohio. The court, among other things, ordered that three lawsuits proceed to trial in 2019 depending on the outcome of pre-trial motions. As a part of these proceedings, distributors have engaged in preliminary discussions with various parties, including state attorneys general, regarding possible resolution structures.

In addition, 39 state attorneys general have formed a multi-state task force to investigate the manufacturing, distribution, dispensing and prescribing practices of opioid medications. We have received requests related to this multi-state investigation, as well as civil investigative demands, subpoenas or requests for information from these and other state attorneys general offices. We are cooperating with the offices conducting these investigations.

We are vigorously defending ourselves in all of these opioid matters. Since all of the above-referenced lawsuits and investigations are in early stages, we are unable to predict their outcome or estimate a range of reasonably possible losses.

Product Liability Lawsuits

As of August 20, 2018, we are named as a defendant in 174 product liability lawsuits filed in Alameda County Superior Court in California involving claims by approximately 1,918 plaintiffs that allege personal injuries associated with the use of Cordis OptEase and TrapEase inferior vena cava (IVC) filter products. Another 20 lawsuits involving similar claims by approximately 21 plaintiffs are pending in other jurisdictions. These lawsuits seek a variety of remedies, including unspecified monetary damages. We are vigorously defending ourselves in these lawsuits.

At June 30, 2018, we had a total of $259 million , net of expected insurance recoveries, accrued for losses and legal defense costs related to the Cordis IVC filter lawsuits. While we have recorded accruals based on our assessment of these matters, because these lawsuits are in early stages, we are unable to estimate a range of reasonably possible losses in excess of this accrued amount.

10. Guarantees

In the ordinary course of business, we agree to indemnify certain other parties under acquisition and disposition agreements, customer agreements, intellectual property licensing agreements, and other agreements. Such indemnification obligations vary in scope and, when defined, in duration. In many cases, a maximum obligation is not explicitly stated, and therefore the overall maximum amount of the liability under such indemnification obligations cannot be reasonably estimated. Where appropriate, such indemnification obligations are recorded as a liability. Historically, we have not, individually or in the aggregate, made payments under these indemnification obligations in any material amounts. In certain circumstances, we believe that existing insurance arrangements, subject to the general deduction and exclusion provisions, would cover portions of the liability that may arise from these indemnification obligations. In addition, we believe that the likelihood of a material liability being triggered under these indemnification obligations is not probable.

From time to time we enter into agreements that obligate us to make fixed payments upon the occurrence of certain events. Such obligations primarily relate to obligations arising under acquisition transactions, where we have agreed to make payments based upon the achievement of certain financial performance measures by the acquired business. Generally, the obligation is capped at an explicit amount. See Note 11 for detail regarding contingent consideration obligations.

11. Fair Value Measurements

The following tables present the fair values for assets and (liabilities) measured on a recurring basis at June 30:

	2018			
(in millions)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents	$ 200	$ —	$ —	$ 200
Other investments (2)	117	—	—	117
Liabilities:				
Contingent consideration (3)	—	—	(1)	(1)
Forward contracts (4)	—	(76)	—	(76)

	2017			
(in millions)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents	$ 739	$ —	$ —	$ 739
Available-for-sale securities (1)	—	65	—	65
Other investments (2)	116	—	—	116
Liabilities:				
Contingent consideration (3)	—	—	(32)	(32)
Forward contracts (4)	—	(21)	—	(21)

(1) We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Observable Level 2 inputs such as quoted prices for similar securities, interest rate spreads, yield curves and credit risk are used to determine the fair value. See Note 6 for additional information regarding available-for-sale securities.

(2) Level 1 other investments balance includes investments in mutual funds, which are used to offset fluctuations in deferred compensation liabilities. These mutual funds primarily invest in the equity securities of companies with large market capitalization and high quality fixed income debt securities. The fair value of these investments is determined using quoted market prices.

(3) Contingent consideration represents the obligations incurred in connection with acquisitions. We do not deem the fair value of the contingent consideration obligations under any single acquisition to be significant. The estimate of fair value of the contingent consideration obligations requires subjective assumptions to be made regarding future business results, discount rates, discount periods, and probabilities assigned to various potential business result scenarios and was determined using probability assessments with respect to the likelihood of reaching various targets or of achieving certain milestones. The fair value measurement is based on significant inputs unobservable in the market and thus represents a Level 3 measurement. Changes in current expectations of progress could change the probability of achieving the targets within the measurement periods and result in an increase or decrease in the fair value of the contingent consideration obligation.

(4) The fair value of interest rate swaps, foreign currency contracts and commodity contracts is determined based on the present value of expected future cash flows considering the risks involved, including non-performance risk, and using discount rates appropriate for the respective maturities. Observable Level 2 inputs are used to determine the present value of expected future cash flows. The fair value of these derivative contracts, which are subject to master netting arrangements under certain circumstances, is presented on a gross basis in the consolidated balance sheets.

The following table presents those liabilities measured at fair value on a recurring basis using unobservable inputs (Level 3):

(in millions)	Contingent Consideration Obligation
Balance at June 30, 2016	$ 19
Additions from acquisitions	21
Changes in fair value of contingent consideration (1)	(5)
Payment of contingent consideration	(3)
Balance at June 30, 2017	32
Additions from acquisitions	5
Changes in fair value of contingent consideration (1)	(2)
Payment of contingent consideration	(35)
Balance at June 30, 2018	**$ 1**

The sum of the components may not equal the total due to rounding.

(1) Amount is included in amortization and other acquisition-related costs in the consolidated statements of earnings.

12. Financial Instruments

We utilize derivative financial instruments to manage exposure to certain risks related to our ongoing operations. The primary risks managed through the use of derivative instruments include interest rate risk, currency exchange risk, and commodity price risk. We do not use derivative instruments for trading or speculative purposes. While the majority of our derivative instruments are designated as hedging instruments, we also enter into derivative instruments that are designed to hedge a risk, but are not designated as hedging instruments. These derivative instruments are adjusted to current fair value through earnings at the end of each period.

We are exposed to counterparty credit risk on all of our derivative instruments. Accordingly, we have established and maintain strict counterparty credit guidelines and only enter into derivative instruments with major financial institutions that are investment grade or better. We do not have significant exposure to any one counterparty and we believe the risk of loss is remote. Additionally, we do not require collateral under these agreements.

Interest Rate Risk Management

We are exposed to the impact of interest rate changes. Our objective is to manage the impact of interest rate changes on cash flows and the market value of our borrowings. We utilize a mix of debt maturities along with both fixed-rate and variable-rate debt to manage changes in interest rates. In addition, we enter into interest rate swaps to further manage our exposure to interest rate variations related to our borrowings and to lower our overall borrowing costs.

Currency Exchange Risk Management

We conduct business in several major international currencies and are subject to risks associated with changing foreign exchange rates. Our objective is to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus its attention on business operations. Accordingly, we enter into various contracts that change in value as foreign exchange rates change to protect the value of existing foreign currency assets and liabilities, commitments and anticipated foreign currency revenue and expenses.

Commodity Price Risk Management

We are exposed to changes in the price of certain commodities. Our objective is to reduce earnings and cash flow volatility associated with forecasted purchases of these commodities to allow management to focus its attention on business operations. Accordingly, we enter into derivative contracts when possible to manage the price risk associated with certain forecasted purchases.

The following table summarizes the fair value of our assets and liabilities related to derivatives designated as hedging instruments and the respective line items in which they were recorded in the consolidated balance sheets at June 30:

(in millions)	2018	2017
Assets:		
Foreign currency contracts (1)	**$ 3**	$ 3
Commodity contracts (1)	**2**	—
Total assets	**$ 5**	$ 3
Liabilities:		
Foreign currency contracts (3)	**$ 3**	$ 2
Pay-floating interest rate swaps (2)	**78**	19
Pay-floating interest rate swaps (3)	**$ —**	$ 2
Commodity contracts (3)	**—**	1
Total liabilities	**$ 81**	$ 24

(1) Included in prepaid expenses and other in the consolidated balance sheets.
(2) Included in deferred income taxes and other liabilities in the consolidated balance sheets.
(3) Included in other accrued liabilities in the consolidated balance sheets.

Fair Value Hedges

We enter into pay-floating interest rate swaps to hedge the changes in the fair value of fixed-rate debt resulting from fluctuations in interest rates. These contracts are designated and qualify as fair value hedges. Accordingly, the gain or loss recorded on the pay-floating interest rate swaps is directly offset by the change in fair value of the underlying debt. Both the derivative instrument and the underlying debt are adjusted to market value at the end of each period with any resulting gain or loss recorded in interest expense, net in the consolidated statements of earnings.

During fiscal 2018 and 2017 we entered into pay-floating interest rate swaps with total notional amounts of $1.1 billion and $700 million , respectively. These swaps have been designated as fair value hedges of our fixed rate debt and are included in deferred income taxes and other liabilities in the consolidated balance sheets.

During fiscal 2017 we terminated notional amounts of $600 million of pay-floating interest rate swaps that were previously designated as fair value hedges. During fiscal 2018 and 2017 , $550 million and $250 million , respectively, of pay-floating interest rate swaps matured.

The following tables summarize the outstanding interest rate swaps designated as fair value hedges at June 30:

	2018	
(in millions)	Notional Amount	Maturity Date
Pay-floating interest rate swaps	$ 2,313	Nov 2019 - Sep 2025

	2017	
(in millions)	Notional Amount	Maturity Date
Pay-floating interest rate swaps	$ 1,813	Jun 2018 - Sep 2025

The following table summarizes the gain/(loss) recognized in earnings for interest rate swaps designated as fair value hedges:

(in millions)	2018	2017	2016
Pay-floating interest rate swaps (1)	$ 11	$ 17	$ 23
Fixed-rate debt (1)	(11)	(17)	(23)

(1) Included in interest expense, net in the consolidated statements of earnings.

There was no ineffectiveness associated with these derivative instruments for any periods presented.

Cash Flow Hedges

We enter into derivative instruments to hedge our exposure to changes in cash flows attributable to interest rate, foreign currency and commodity price fluctuations associated with certain forecasted transactions. These derivative instruments are designated and qualify as cash flow hedges. Accordingly, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction and in the same period during which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative instrument is recognized in earnings immediately.

During fiscal 2017 we entered into forward interest rate swaps with a total notional amount of $700 million to hedge probable, but not firmly committed, future transactions associated with our debt.

During fiscal 2017 we terminated $1.0 billion in forward interest rate swaps that were previously designated as cash-flow hedges.

We enter into foreign currency contracts to protect the value of anticipated foreign currency revenues and expenses. At June 30, 2018 and 2017 , we held contracts to hedge probable, but not firmly committed, revenue and expenses. The principal currencies hedged are the Canadian dollar, Thai baht, Euro, and Mexican peso.

We enter into commodity contracts to manage the price risk associated with forecasted purchases of certain commodities used in our Medical segment.

The following tables summarize the outstanding cash flow hedges at June 30:

	2018	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 124	Jul 2018 - Jun 2019
Commodity contracts	12	Jul 2018 - Oct 2020

	2017	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 162	Jul 2017 - Jun 2018
Commodity contracts	17	Jul 2017 - Apr 2020

The following table summarizes the gain/(loss) included in AOCI for derivative instruments designated as cash flow hedges at June 30:

(in millions)	2018	2017
Commodity contracts	2	(1)
Foreign currency contracts	(2)	—

The following table summarizes the gain/(loss) reclassified from AOCI into earnings for derivative instruments designated as cash flow hedges:

(in millions)	2018	2017	2016
Foreign currency contracts (1)	$ 1	$ (1)	$ 1
Foreign currency contracts (2)	—	(1)	5
Foreign currency contracts (3)	(2)	2	(3)
Commodity contracts (3)	—	(3)	(5)

(1) Included in revenue in the consolidated statements of earnings.

(2) Included in cost of products sold in the consolidated statements of earnings.

(3) Included in SG&A expenses in the consolidated statements of earnings.

The amount of ineffectiveness associated with these derivative instruments was immaterial for all periods presented.

Economic (Non-Designated) Hedges

We enter into foreign currency contracts to manage our foreign exchange exposure related to sales transactions, intercompany financing transactions and other balance sheet items subject to revaluation that do not meet the requirements for hedge accounting treatment. Accordingly, these derivative instruments are adjusted to current market value at the end of each period through earnings. The gain or loss recorded on these instruments is substantially offset by the remeasurement adjustment on the foreign currency denominated asset or liability. The settlement of the derivative instrument and the remeasurement adjustment on the foreign currency denominated asset or liability are both recorded in other (income)/expense, net. The principal currencies managed through foreign currency contracts are the Euro, Canadian dollar, British pound, Japanese yen, and Chinese renminbi.

The following tables summarize the outstanding economic (non-designated) derivative instruments at June 30:

	2018	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 550	Jul 2018 - Jun 2019

	2017	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 558	Jul 2017

The following table summarizes the gain/(loss) recognized in earnings for economic (non-designated) derivative instruments:

(in millions)	2018	2017	2016
Foreign currency contracts (1)	**$ (5)**	$ (5)	$ (17)

(1) Included in other income, net in the consolidated statements of earnings.

Fair Value of Financial Instruments

The carrying amounts of cash and equivalents, trade receivables, net, accounts payable, and other accrued liabilities at June 30, 2018 and 2017 approximate fair value due to their short-term maturities.

The following table summarizes the estimated fair value of our long-term obligations and other short-term borrowings compared to the respective carrying amounts at June 30:

(in millions)	2018	2017
Estimated fair value	**$ 8,852**	$ 10,713
Carrying amount	**9,013**	10,395

The fair value of our long-term obligations and other short-term borrowings is estimated based on either the quoted market prices for the same or similar issues or other inputs derived from available market information, which represents a Level 2 measurement.

The following table is a summary of the fair value gain/(loss) of our derivative instruments based upon the estimated amount that we would receive (or pay), considering counter-party credit risk, to terminate the contracts at June 30:

	2018		2017	
(in millions)	**Notional Amount**	**Fair Value Gain/(Loss)**	Notional Amount	Fair Value Gain/(Loss)
Pay-floating interest rate swaps	**$ 2,313**	**$ (78)**	$ 1,813	$ (19)
Foreign currency contracts	**674**	**—**	720	1
Commodity contracts	**12**	**—**	17	(1)

13. Redeemable Noncontrolling Interests

In connection with the acquisition of a 71 percent ownership interest in naviHealth during fiscal 2016 , we recognized redeemable noncontrolling interests with a fair value of $119 million at the acquisition date.

In August 2017, certain third-party noncontrolling interest holders exercised their put right on the noncontrolling interest representing 16 percent of naviHealth with a redemption value of $ 103 million and a carrying value of $ 109 million . We settled the put in September 2017 and our ownership in naviHealth increased to 98 percent , up from 82 percent at June 30, 2017 and 2016.

In June 2018, we entered into a Securities Purchase Agreement and related Contribution and Rollover Agreement to sell our 98 percent ownership interest in naviHealth, which closed on August 1, 2018. See Note 4 and Note 19 for more information.

The reconciliation of the changes in redeemable noncontrolling interests are as follows:

(in millions)	**Redeemable Noncontrolling Interests**
Balance at June 30, 2016	$ 117
Net earnings attributable to redeemable noncontrolling interests	4
Net purchase of redeemable noncontrolling interests	(3)
Balance at June 30, 2017	118
Net earnings attributable to redeemable noncontrolling interest	2
Net purchase of redeemable noncontrolling interests	(103)
Adjustment of redeemable noncontrolling interests to redemption value	(5)
Balance at June 30, 2018	**$ 12**

14. Shareholders' Equity

At June 30, 2018 and 2017 , authorized capital shares consisted of the following: 750 million Class A common shares, without par value; 5 million Class B common shares, without par value; and 500 thousand non-voting preferred shares, without par value. The Class A common shares and Class B common shares are collectively referred to below as “common shares”. Holders of common shares are entitled to share equally in any dividends declared by the Board of Directors and to participate equally in all distributions of assets upon liquidation. Generally, the holders of Class A common shares are entitled to one vote per share, and the holders of Class B common shares are entitled to one-fifth of one vote per share on proposals presented to shareholders for vote. Under certain circumstances, the holders of Class B common shares are entitled to vote as a separate class. Only Class A common shares were outstanding at June 30, 2018 and 2017 .

We repurchased $1.8 billion of our common shares, in the aggregate, through share repurchase programs during fiscal 2018 , 2017 and 2016 , as described below. We funded the repurchases with available cash and short term borrowings. The common shares repurchased are held in treasury to be used for general corporate purposes.

During fiscal 2018 , we repurchased 8.4 million common shares having an aggregate cost of $550 million . The average price paid per common share was $65.30 . These repurchases include $300 million purchased under an accelerated share repurchase ("ASR") program, which began on February 14, 2018 and was completed on March 21, 2018. We repurchased 4.3 million shares under the ASR at an average price paid per share of $69.26 .

During fiscal 2017 , we repurchased 8.1 million common shares having an aggregate cost of $600 million . The average price paid per common share was $74.08 .

During fiscal 2016 , we repurchased 8.2 million common shares having an aggregate cost of $651 million . The average price paid per common share was $78.98 .

During fiscal 2017 , we retired 37 million common shares in treasury. The retirement of these shares had no impact on total shareholders' equity; however, it did impact certain individual components of

shareholders' equity as follows: $2.5 billion decrease in common shares in treasury, $302 million decrease in common shares, and $2.2 billion decrease in retained earnings.

Accumulated Other Comprehensive Income/(Loss)

The following table summarizes the changes in the balance of accumulated other comprehensive income/(loss) by component and in total:

(in millions)	Foreign Currency Translation Adjustments and other	Unrealized Gain/(Loss) on Derivatives, net of tax	**Accumulated Other Comprehensive Income/(Loss)**
Balance at June 30, 2016	$ (123)	$ 7	**$ (116)**
Other comprehensive income/(loss), net before reclassifications	(25)	19	**(6)**
Amounts reclassified to earnings	—	(3)	**(3)**
Total other comprehensive loss attributable to Cardinal Health, Inc., net of tax of $9 million	(25)	16	**(9)**
Balance at June 30, 2017	(148)	23	**(125)**
Other comprehensive income/(loss), before reclassifications	58	—	**58**
Amounts reclassified to earnings	(23)	(2)	**(25)**
Total comprehensive income/(loss) attributable to Cardinal Health, Inc., net of tax of $1 million	35	(2)	**33**
Balance at June 30, 2018	**$ (113)**	**$ 21**	**$ (92)**

Activity related to realized and unrealized gains and losses on available-for-sale securities, as described in Note 6 , was immaterial during fiscal 2018 and 2017 .

15. Earnings Per Share Attributable to Cardinal Health, Inc.

The following table reconciles the computation of basic and diluted earnings per share attributable to Cardinal Health, Inc.:

(in millions, except per share amounts)	**2018**	2017	2016
Net earnings	**$ 259**	$ 1,294	$ 1,431
Net earnings attributable to noncontrolling interest	**(3)**	(6)	(4)
Net earnings attributable to Cardinal Health, Inc.	**$ 256**	$ 1,288	$ 1,427
Weighted-average common shares–basic	**313**	317	327
Effect of dilutive securities:			
Employee stock options, restricted share units, and performance share units	**2**	3	3
Weighted-average common shares–diluted	**315**	320	330
Basic earnings per common share attributable to Cardinal Health, Inc.:	**$ 0.82**	$ 4.06	$ 4.36
Diluted earnings per common share attributable to Cardinal Health, Inc.:	**0.81**	4.03	4.32

The potentially dilutive employee stock options, restricted share units and performance share units that were antidilutive for fiscal 2018 , 2017 and 2016 were 6 million , 3 million and 2 million , respectively.

16. Segment Information

Our operations are principally managed on a products and services basis and are comprised of two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. The factors for determining the reportable segments include the manner in which management evaluates performance for purposes of allocating resources and assessing performance combined with the nature of the individual business activities.

The Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical and over-the-counter healthcare and consumer products in the United States. This segment also provides services to pharmaceutical manufacturers and healthcare providers to support the development, marketing, and distribution of specialty pharmaceutical products; operates nuclear pharmacies and radiopharmaceutical manufacturing facilities; provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers; and repackages generic pharmaceuticals and over-the-counter healthcare products.

Our Medical segment manufactures, sources and distributes Cardinal Health branded medical, surgical and laboratory products, which are sold in the United States, Canada, Europe, Asia and other markets. We further expanded this segment's portfolio of manufactured products through the acquisition of the Patient Recovery Business from Medtronic in July 2017, which includes incontinence, wound care, enteral feeding, urology, operating room supply, electrode and needle, syringe and sharps disposal product lines. In addition to distributing Cardinal Health branded products, this segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States and Canada .

The following table presents revenue for each reportable segment and Corporate:

(in millions)	**2018**	2017	2016
Pharmaceutical	**$ 121,241**	$ 116,463	$ 109,131
Medical	**15,581**	13,524	12,430
Total segment revenue	**136,822**	129,987	121,561
Corporate (1)	**(13)**	(11)	(15)
Total revenue	**$ 136,809**	$ 129,976	$ 121,546

(1) Corporate revenue consists of the elimination of inter-segment revenue and other revenue not allocated to the segments.

We evaluate segment performance based on segment profit, among other measures. Segment profit is segment revenue, less segment cost of products sold, less segment distribution, selling, general, and administrative ("SG&A") expenses. Segment SG&A expenses include share-based compensation expense as well as allocated corporate expenses for shared functions, including corporate

management, corporate finance, financial and customer care shared services, human resources, information technology, and legal and compliance. The results attributable to noncontrolling interests of consolidated entities are recorded within segment profit. Corporate expenses are allocated to the segments based on headcount, level of benefit provided, and other ratable allocation methodologies.

We do not allocate the following items to our segments: LIFO inventory charges/(credits); restructuring and employee severance; amortization and other acquisition-related costs; impairments and (gain)/loss on disposal of assets; litigation (recoveries)/charges, net; other income/expense, net; interest expense, net; loss on extinguishment of debt; and provision for/(benefit from) income taxes.

In addition, certain investment spending, certain portions of enterprise-wide incentive compensation, and other spending are not allocated to the segments. Investment spending generally includes the first-year spend for certain projects that require incremental investments in the form of additional operating expenses. We encourage our segments and corporate functions to identify investment projects that will promote innovation and provide future returns. As approval decisions for such projects are dependent upon executive management, the expenses for such projects are often retained at Corporate. Investment spending within Corporate was $43 million , $17 million and $34 million for fiscal 2018 , 2017 and 2016 , respectively.

The following tables present segment profit by reportable segment and Corporate:

(in millions)	2018	2017	2016
Pharmaceutical	$ 1,992	$ 2,187	$ 2,488
Medical	662	572	457
Total segment profit	2,654	2,759	2,945
Corporate	(2,528)	(639)	(486)
Total operating earnings	$ 126	$ 2,120	$ 2,459

The following tables present depreciation and amortization and additions to property and equipment by reportable segment and Corporate:

(in millions)	2018	2017	2016
Pharmaceutical	$ 156	$ 122	$ 128
Medical	278	156	136
Corporate	598	439	377
Total depreciation and amortization	$ 1,032	$ 717	$ 641

(in millions)	2018	2017	2016
Pharmaceutical	$ 58	$ 50	$ 88
Medical	127	123	96
Corporate	199	214	281
Total additions to property and equipment	$ 384	$ 387	$ 465

The following table presents total assets for each reportable segment and Corporate at June 30:

(in millions)	2018	2017	2016
Pharmaceutical	$ 21,421	$ 21,848	$ 20,662
Medical	16,066	10,688	10,236
Corporate	2,464	7,576	3,224
Total assets	$ 39,951	$ 40,112	$ 34,122

The following tables present revenue and property and equipment, net by geographic area:

(in millions)	2018	2017	2016
United States	$ 132,526	$ 125,006	$ 116,864
International	4,283	4,970	4,682
Total revenue	$ 136,809	$ 129,976	$ 121,546

(in millions)	2018	2017	2016
United States	$ 1,950	$ 1,623	$ 1,558
International	537	256	238
Property and equipment, net	$ 2,487	$ 1,879	$ 1,796

17. Share-Based Compensation

We maintain stock incentive plans (collectively, the “Plans”) for the benefit of certain of our officers, directors and employees. At June 30, 2018 , 19 million shares remain available for future grants under the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan ("2011 LTIP"). Under the 2011 LTIP's fungible share counting provisions, stock options are counted against the plan as one share for every share issued ; awards other than stock options are counted against the plan as two and one-half shares for every share issued . This means that only 8 million shares could be issued under awards other than stock options while 19 million shares could be issued under stock options. Shares are issued out of treasury shares when stock options are exercised and when restricted share units and performance share units vest.

The following table provides total share-based compensation expense by type of award:

(in millions)	2018	2017	2016
Restricted share unit expense	$ 73	$ 69	$ 69
Employee stock option expense	22	19	21
Performance share unit expense	(10)	8	21
Total share-based compensation expense	$ 85	$ 96	$ 111

The total tax benefit related to share-based compensation was $23 million , $34 million and $38 million for fiscal 2018 , 2017 and 2016 , respectively.

Restricted Share Units

Restricted share units granted under the Plans generally vest in equal annual installments over three years . Restricted share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to restricted share units under the Plans:

(in millions, except per share amounts)	Restricted Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2016	2	$ 71.73
Granted	1	82.34
Vested	(1)	69.23
Canceled and forfeited	—	—
Nonvested at June 30, 2017	2	76.72
Granted	1	65.97
Vested	(1)	78.92
Canceled and forfeited	—	—
Nonvested at June 30, 2018	**2**	**$ 71.58**

The following table provides additional data related to restricted share unit activity:

(in millions)	2018	2017	2016
Total compensation cost, net of estimated forfeitures, related to nonvested restricted share and share unit awards not yet recognized, pre-tax	**$ 78**	$ 73	$ 79
Weighted-average period in years over which restricted share and share unit cost is expected to be recognized (in years)	**2**	2	2
Total fair value of shares vested during the year	**$ 65**	$ 64	$ 65

Stock Options

Employee stock options granted under the Plans generally vest in equal annual installments over three years and are exercisable for a period up to ten years from the grant date. All stock options are exercisable at a price equal to the market value of the common shares underlying the option on the grant date.

The following table summarizes all stock option transactions under the Plans:

(in millions, except per share amounts)	Stock Options	Weighted-Average Exercise Price per Common Share
Outstanding at June 30, 2016	7	$ 54.09
Granted	1	83.09
Exercised	(2)	37.79
Canceled and forfeited	—	—
Outstanding at June 30, 2017	6	63.44
Granted	2	66.39
Exercised	(1)	43.12
Canceled and forfeited	—	—
Outstanding at June 30, 2018	**7**	**$ 64.50**
Exercisable at June 30, 2018	**5**	**$ 59.60**

The following table provides additional detail related to stock options:

(in millions, except per share amounts)	2018	2017	2016
Aggregate intrinsic value of outstanding options at period end	**$ 13**	$ 109	$ 181
Aggregate intrinsic value of exercisable options at period end	**13**	106	161
Aggregate intrinsic value of exercised options	**14**	73	63
Net proceeds/(withholding) from share-based compensation	**(3)**	26	6
Excess tax benefits from share based compensation	**10**	34	33
Total compensation cost, net of estimated forfeitures, related to unvested stock options not yet recognized, pre-tax	**17**	22	22
Total fair value of shares vested during the year	**19**	19	20
Weighted-average grant date fair value per stock option	**13.50**	16.67	17.40

(in years)	2018	2017	2016
Weighted-average remaining contractual life of outstanding options	**7**	7	6
Weighted-average remaining contractual life of exercisable options	**5**	6	5
Weighted-average period over which stock option compensation cost is expected to be recognized	**2**	2	2

Stock options are granted to our officers and certain employees. The fair values were estimated on the grant date using a lattice valuation model. We believe the lattice model provides reasonable estimates because it has the ability to take into account individual exercise patterns based on changes in our stock price and other variables, and it provides for a range of input assumptions, which are disclosed in the table below. The risk-free rate is based on the U.S. Treasury yield curve at the time of the grant. We analyzed historical data to estimate option exercise behaviors and employee terminations to be used within the lattice model. The expected life of the options granted was calculated from the option valuation model and represents the length of time in years that the options granted are expected to be outstanding. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years).

The following table provides the range of assumptions used to estimate the fair value of stock options:

	2018	2017	2016
Risk-free interest rate	**2.1%**	1.4% - 2.0%	1.5% - 1.9%
Expected volatility	**25%**	24%	23%
Dividend yield	**2.7% - 2.8%**	2.2% - 2.5%	1.8% - 2.0%
Expected life in years	**7**	7	7

Performance Share Units

Performance share units vest over a three -year performance period based on achievement of specific performance goals. Based on the extent to which the targets are achieved, vested shares may range from zero to 200 percent of the target award amount. Performance share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to performance share units under the Plans (based on target award amounts):

(in millions, except per share amounts)	Performance Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2016	0.8	$ 63.96
Granted	0.2	83.19
Vested (1)	(0.4)	51.49
Canceled and forfeited	—	—
Nonvested at June 30, 2017	0.6	77.83
Granted	0.2	66.43
Vested (2)	(0.2)	71.57
Canceled and forfeited	(0.2)	—
Nonvested at June 30, 2018	**0.4**	**$ 66.13**

(1) Vested at 170 percent of the target performance share units granted.

(2) Vested at 133 percent of the target performance share units granted.

The following table provides additional data related to performance share unit activity:

(in millions)	2018	2017	2016
Total compensation cost, net of estimated forfeitures, related to nonvested performance share units not yet recognized, pre-tax	**$ 1**	$ 13	$ 17
Weighted-average period over which performance share unit cost is expected to be recognized (in years)	**2**	2	2
Total fair value of shares vested during the year	**$ 14**	$ 19	$ 16

Employee Retirement Savings Plans

Substantially all of our domestic non-union employees are eligible to be enrolled in our company-sponsored contributory retirement savings plans, which include features under Section 401(k) of the Internal Revenue Code of 1986, and provide for matching and profit sharing contributions by us. Our contributions to the plans are determined by the Board of Directors subject to certain minimum requirements as specified in the plans. The total expense for our employee retirement savings plans was $129 million , $49 million and $84 million for fiscal 2018 , 2017 and 2016 , respectively.

18. Selected Quarterly Financial Data (Unaudited)

The following is selected quarterly financial data for fiscal 2018 and 2017 . The sum of the quarters may not equal year-to-date due to rounding.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2018				
Revenue	$ 32,641	$ 35,186	$ 33,633	**$ 35,349**
Gross margin (1)	1,672	1,861	1,913	**1,735**
Distribution, selling, general and administrative expenses	1,062	1,131	1,132	**1,270**
Net earnings/(loss) (2)	117	1,053	255	**(1,166)**
Less: Net earnings attributable to noncontrolling interests	(2)	—	—	—
Net earnings/(loss) attributable to Cardinal Health, Inc.	115	1,053	255	**(1,166)**
Net earnings/(loss) attributable to Cardinal Health, Inc. per common share:				
Basic	$ 0.36	$ 3.35	$ 0.81	**$ (3.76)**
Diluted (3)	0.36	3.33	0.81	**(3.76)**

(1) Gross margin was not impacted by LIFO benefit/(charges) in fiscal 2018.

(2) During the fourth quarter of fiscal 2018, we recognized a goodwill impairment charge of $ 1.4 billion related to our Medical segment. There was no tax benefit related to this goodwill impairment charge.

(3) Due to the net loss during the fourth quarter of fiscal 2018, dilutive potential common shares have not been included in the denominator of the dilutive per share computation due to their antidilutive effect.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2017				
Revenue	$ 32,039	$ 33,150	$ 31,821	$ 32,966
Gross margin (4)	1,590	1,602	1,728	1,623
Distribution, selling, general and administrative expenses	920	910	960	983
Net earnings	310	324	382	278
Less: Net earnings attributable to noncontrolling interests	(1)	—	(1)	(4)
Net earnings attributable to Cardinal Health, Inc.	309	324	381	274
Net earnings attributable to Cardinal Health, Inc. per common share:				
Basic	$ 0.97	$ 1.02	$ 1.21	$ 0.87
Diluted	0.96	1.02	1.20	0.86

(4) Gross margin is impacted by LIFO benefit/(charges) of $ 9 million and $(9) million in the second and third quarter, respectively. We did not have LIFO benefits/(charges) in the fourth quarter.

19. Subsequent Events

In June 2018, we entered into a Securities Purchase Agreement and related Contribution and Rollover Agreement with investor entities controlled by CD&R. Pursuant to those agreements, on August 1, 2018, we sold our 98% ownership interest in naviHealth in exchange for proceeds of $736 million (after adjusting for certain fees and expenses) and a 44% equity interest in a partnership that owns 100% of the equity interest of naviHealth. We also have certain call rights to reacquire naviHealth.

On August 16, 2018 we entered into an ASR program to purchase shares of our common stock for an aggregate purchase price of $ 600 million and received an initial delivery of 9.5 million shares of common stock using a reference price of $ 50.45 . The program is expected to conclude in the second quarter of fiscal 2019.

Schedule II **Valuation and Qualifying Accoun** ts

Cardinal Health, Inc. and Subsidiaries

Schedule II - Valuation and Qualifying Accounts [1]

(in millions)	Balance at Beginning of Period	Charged to Costs and Expenses (1)	Charged to Other Accounts (2)	Deductions (3)	Balance at End of Period
Fiscal 2018					
Accounts receivable	**$ 137**	**$ 113**	**$ 1**	**$ (111)**	**$ 139**
Finance notes receivable	**9**	**(2)**	**—**	**—**	**7**
Sales returns and allowances	**347**	**2,402**	**—**	**(2,270)**	**479**
Other	**1**	**—**	**—**	**—**	**1**
	$ 494	**$ 2,513**	**$ 1**	**$ (2,381)**	**$ 626**
Fiscal 2017					
Accounts receivable	$ 135	$ 59	$ 1	$ (58)	$ 137
Finance notes receivable	19	3	—	(13)	9
Sales returns and allowances	386	2,285	—	(2,324)	347
Other	1	—	—	—	1
	$ 541	$ 2,347	$ 1	$ (2,395)	$ 494
Fiscal 2016					
Accounts receivable	$ 135	$ 72	$ 2	$ (74)	$ 135
Finance notes receivable	14	6	—	(1)	19
Sales returns and allowances	305	2,207	—	(2,126)	386
Other	1	—	—	—	1
	$ 455	$ 2,285	$ 2	$ (2,201)	$ 541

(1) Fiscal 2018 , 2017 and 2016 include $3 million , $5 million and $5 million , respectively, for reserves related to customer pricing disputes, excluded from provision for bad debts on the consolidated statements of cash flows and classified as a reduction in revenue in the consolidated statements of earnings.

(2) Recoveries of amounts provided for or written off in prior years were $1 million , $1 million and $2 million for fiscal 2018 , 2017 and 2016 , respectively.

(3) Write-off of uncollectible accounts or actual sales returns.

The sum of the components may not equal the total due to rounding.

Directors, Executive Officers and Corporate Governance

The following is a list of our executive officers:

Name	Age	Position
George S. Barrett	63	Executive Chairman of the Board
Michael C. Kaufmann	55	Chief Executive Officer
Jorge M. Gomez	50	Chief Financial Officer
Jon L. Giacomin	53	Chief Executive Officer, Medical segment
Michele A. M. Holcomb	50	Executive Vice President, Strategy and Corporate Development
Pamela O. Kimmet	60	Chief Human Resources Officer
Craig S. Morford	59	Chief Legal and Compliance Officer
Patricia B. Morrison	59	Executive Vice President, Customer Support Services and Chief Information Officer

The business experience summaries provided below for our executive officers describe positions held during the last five years (unless otherwise indicated).

Mr. Barrett has served as Executive Chairman of the Board since January 2018. Prior to that, he served as Chairman and Chief Executive Officer from August 2009. He will retire in November 2018.

Mr. Kaufmann has served as Chief Executive Officer since January 2018. From November 2014 through December 2017, he served as Chief Financial Officer. From August 2009 until November 2014, he served as Chief Executive Officer, Pharmaceutical segment.

Mr. Gomez has served as Chief Financial Officer since January 2018. From June 2015 through December 2017, he served as Senior Vice President and CFO, Medical Segment. From February 2012 until June 2015, he was Senior Vice President and CFO, Pharmaceutical segment.

Mr. Giacomin has served as Chief Executive Officer, Medical segment since February 2018. From November 2014 to February 2018, he served as Chief Executive Officer, Pharmaceutical segment. From January 2011 until November 2014, he served as President, U.S. Pharmaceutical Distribution.

Ms. Holcomb has served as Executive Vice President, Strategy and Corporate Development since January 2017. She joined us from Teva Pharmaceutical Industries Ltd., where she served as Senior Vice President, Strategy, Portfolio, Search, and Partnerships and Chief Operating Officer, Global R&D from October 2015 to December 2016 and Senior Vice President, Chief Operating Officer, Global R&D from September 2012 to September 2015.

Ms. Kimmet has served as Chief Human Resources Officer since June 2016. Prior to joining us, Ms. Kimmet served as Senior Vice President, Human Resources at Coca-Cola Enterprises, Inc. from October 2010 to June 2016.

Mr. Morford has served as Chief Legal and Compliance Officer since May 2009.

Ms. Morrison has served as Executive Vice President, Customer Support Services and Chief Information Officer since June 2011. She will retire on September 1, 2018.

We have adopted *Standards of Business Conduct* that apply to all of our directors, officers and employees. The *Standards of Business Conduct* outline our corporate values and standards of integrity and behavior and are designed to protect and promote our reputation. The full text of the *Standards of Business Conduct* is posted on our website at www.cardinalhealth.com under "About Us — Corporate Citizenship — Ethics and Governance — Ethics and Compliance."

Any waiver of the *Standards of Business Conduct* for directors or executive officers must be approved by the Audit Committee. As required under SEC and New York Stock Exchange rules, we will disclose future amendments to our *Standards of Business Conduct* and waivers from the *Standards of Business Conduct* for our principal executive officer, principal financial officer, and principal accounting officer, or persons performing similar functions, and our other executive officers and directors on our website within four business days following the date of the amendment or waiver.

The other information called for by Item 10 of Form 10-K is incorporated by reference to our Definitive Proxy Statement (which will be filed with the SEC pursuant to Regulation 14A under the Exchange Act) relating to our 2018 Annual Meeting of Shareholders (our "2018 Proxy Statement") under the captions "Corporate Governance" and "Share Ownership Information."

Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The table below summarizes information relating to our equity compensation plans at June 30, 2018.

Equity Compensation Plan Information

Plan Category	Common Shares to be Issued Upon Exercise of Outstanding Options and Rights (#)	Weighted Average Exercise Price of Outstanding Options ($)	Common Shares Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column (a)) (#)
	(a)	(b)	(c)
Equity compensation plans approved by shareholders	**10,320,017** (1)	$ 64.50 (1)	19,305,951 (2)
Equity compensation plans not approved by shareholders	**4,203** (3)	— (3)	—
Total at June 30, 2018	**10,324,220**		19,305,951

(1) In addition to stock options outstanding under the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan (the "2011 LTIP") and the Cardinal Health, Inc. 2005 Long-Term Incentive Plan (the "2005 LTIP"), also includes 827,766 PSUs and 2,165,340 RSUs outstanding under the 2011 LTIP, 10,241 PSUs and 61,861 RSUs outstanding under the 2005 LTIP, and 165,024 RSUs outstanding under the 2007 Nonemployee Directors Equity Incentive Plan that are payable solely in common shares. PSUs and RSUs do not have an exercise price, and therefore were not included for purposes of computing the weighted-average exercise price. PSUs granted in fiscal 2015 are not reported in this table because they expired without any shares vesting. PSUs granted in fiscal 2016 and 2017 are reported in this table at the maximum payout level (200% of target) in accordance with SEC rules.

(2) Reflects common shares available under the 2011 LTIP in the form of stock options and other stock-based awards. Under the 2011 LTIP's fungible share counting provisions, stock options are counted against the plan as one share for every common share issued; awards other than stock options are counted against the plan as two and one-half shares for every common share issued. This means that only 7,722,380 shares could be issued under awards other than stock options while 19,305,951 shares could be issued under stock options.

(3) RSUs outstanding under the Cardinal Health, Inc. Amended and Restated Outside Directors Equity Incentive Plan that are payable solely in common shares. RSUs do not have an exercise price, and therefore were not included for purposes of computing the weighted-average exercise price.

The other information called for by Item 12 of Form 10-K is incorporated by reference to our 2018 Proxy Statement under the caption “Share Ownership Information.”

Exhibits, Financial Statement Schedules

(a)(1) The following financial statements are included in the "Financial Statements" section of this report:

(a)(2) The following Supplemental Schedule is included in this report:

All other schedules not listed above have been omitted as not applicable or because the required information is included in the Consolidated Financial Statements or in the Notes thereto.

Exhibit Number	Exhibit Description
2.1.1	Stock and Asset Purchase Agreement, dated April 18, 2017, between Cardinal Health, Inc. and Medtronic plc (incorporated by reference to Exhibit 2.1 to Cardinal Health's Current Report on Form 8-K filed on April 18, 2017, File No. 1-11373)
2.1.2	Amendment No. 1, dated as of July 28, 2017, to Stock and Asset Purchase Agreement, dated April 18, 2017, between Cardinal Health, Inc. and Medtronic plc (incorporated by reference to Exhibit 2.2.2 to Cardinal Health's Annual Report on Form 10-K for the year ended June 30, 2017, File No. 1-11373)
2.1.3	Letter Agreement, dated November 21, 2017, by and between Cardinal Health, Inc. and Medtronic, plc (incorporated by reference to Exhibit 2.2 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended December 31, 2017, File No. 1-11373)

Exhibit 10.12.1

Confidentiality and Business Protection Agreement

This Confidentiality and Business Protection Agreement (“Agreement”) is hereby entered into by and between Patrice B. Morrison (“Executive”) and Cardinal Health, Inc., an Ohio Corporation (the “Company”), effective as of June 28, 2018.

It is hereby agreed as follows:

1. Consideration and Acknowledgements . The parties acknowledge that the provisions and covenants contained in this Agreement are ancillary and material to, and in consideration of, retirements benefits being negotiated between the parties and that the limitations contained herein are reasonable in geographic and temporal scope and do not impose a greater restriction or restraint than is necessary to protect the goodwill and other legitimate business interests of the Company. The parties also acknowledge and agree that the provisions of this Agreement do not adversely affect Executive's ability to earn a living in any capacity that does not violate the covenants contained herein. The parties further acknowledge and agree that the provisions of Section 9(a) below are accurate and necessary because (i) this Agreement is entered into in the State of Ohio, (ii) Ohio has a substantial relationship to the parties and to this transaction, (iii) Ohio is the headquarters state of the Company, which has operations worldwide and has a compelling interest in having its employees treated uniformly, (iv) the use of Ohio law provides certainty to the parties in any covenant litigation in the United States, and (v) enforcement of the provisions of this Agreement would not violate any fundamental public policy of Ohio or any other jurisdiction.

2. Confidential Information . Executive shall hold in a fiduciary capacity for the benefit of the Company and all of its subsidiaries, partnerships, joint ventures, limited liability companies and other affiliates (collectively, the "Cardinal Group"), all secret or confidential information, knowledge or data relating to the Cardinal Group and its businesses (including, without limitation, any proprietary and not publicly available information concerning any processes, methods, trade secrets, research, secret data, costs, names of users or purchasers of their respective products or services, business methods, operating procedures or programs or methods of promotion and sale) that Executive has obtained or obtains during Executive's employment by the Cardinal Group and that is not public knowledge (other than as a result of Executive's violation of this Agreement) ("Confidential Information"). For the purposes of this Agreement, information shall not be deemed to be publicly available merely because it is embraced by general disclosures or because individual features or combinations thereof are publicly available. Executive shall not communicate, divulge or disseminate Confidential Information at any time during or after Executive's employment with the Cardinal Group, except with prior written consent of the applicable Cardinal Group company, or as otherwise required by law or legal process. All records, files, memoranda, reports, customer lists, drawings, plans, documents and the like that Executive uses, prepares or comes into contact with during the course of Executive's employment shall remain the sole property of the Company or the Cardinal Group company, as applicable, and shall be turned over to the applicable Cardinal Group company upon termination of Executive's employment.

3. Non-Recruitment of Cardinal Group Employees, etc . Executive shall not, at any time during the Restricted Period (as defined below), without the prior written consent of the Company, engage in the following conduct (a "Solicitation"): (i) directly or indirectly, including via social media or professional networking services, solicit, recruit or employ (whether as an employee, officer, director, agent, consultant or independent contractor) any person who is or was at any time during the previous twelve months an employee, representative, officer or director of the Cardinal Group; or (ii) take any action to encourage or induce any employee, representative,

officer or director of the Cardinal Group to cease his or her relationship with the Cardinal Group for any reason. A "Solicitation" does not include any recruitment of employees within or for the Cardinal Group. The "Restricted Period" means the period from the date of this Agreement until twenty-four months after Executive's retirement date. The Restricted Period shall be extended and its expiration tolled by the time period in which Executive is in breach of any covenant in this Agreement to ensure that Executive does not benefit from any breach and that the Company receives the full benefit of two years protection from unfair competition on which it has relied in entering into this Agreement.

4. No Competition -- Solicitation of Business . During the Restricted Period, Executive shall not (either directly or indirectly or as an officer, agent, employee, partner, consultant or director of any other company, partnership or entity) solicit, service or accept on behalf of any competitor of the Cardinal Group the business of (i) any customer of the Cardinal Group during the time of Executive's employment or at date of termination of employment, or (ii) any potential customer of the Cardinal Group which Executive knew to be an identified, prospective purchaser of products or services of the Cardinal Group.

5. No Competition -- Employment by Competitor . During the Restricted Period, Executive shall not invest in (other than in a publicly traded company with a maximum investment of no more than 1% of outstanding shares), counsel, advise or be otherwise engaged or employed by any entity or enterprise that is in competition with the business conducted by any member of the Cardinal Group (other than a business that is not a significant business to the Cardinal Group as a whole or to the entity or enterprise as a whole).

6. No Disparagement .

(a) Executive and the Company shall at all times refrain from taking actions or making statements, written or oral, that (i) denigrate, disparage or defame the goodwill or reputation of Executive or the Cardinal Group, as the case may be, or any of its trustees, officers, security holders, partners, agents or former or current employees and directors, or (ii) are intended to, or may be reasonably expected to, adversely affect the morale of the employees of the Cardinal Group. Executive further agrees not to make any negative statements to third parties relating to Executive's employment or any aspect of the businesses of the Cardinal Group and not to make any statements to third parties about the circumstances of the termination of Executive's employment or about the Cardinal Group or its trustees, directors, officers, security holders, partners, agents or former or current employees and directors, except as may be required by a court or governmental body.

(b) Executive further agrees that, following termination of employment for any reason, Executive shall assist and cooperate with the Company with regard to any matter or project in which Executive was involved during Executive's employment with the Company, including but not limited to any litigation that may be pending or may arise after such termination of employment. Further, Executive agrees to notify the Company at the earliest opportunity of any contact that is made by any third parties concerning any such matter or project. The Company shall not unreasonably request such cooperation of Executive and shall cooperate with Executive in scheduling any assistance by Executive, taking into account Executive's business and personal affairs, and shall compensate Executive for any lost wages or expenses associated with such cooperation and assistance.

7. Inventions . All plans, discoveries and improvements, whether patentable or unpatentable, made or devised by Executive, whether alone or jointly with others, from the date of Executive's initial employment by the Company and continuing until the end of any period during which Executive is employed by the Cardinal Group, relating or pertaining in any way to

Executive's employment with or the business of the Cardinal Group, shall be promptly disclosed in writing to the Company's Chief Legal and Compliance Officer and are hereby transferred to and shall redound to the benefit of the Company, and shall become and remain its sole and exclusive property. Executive agrees to execute any assignment to the Company or its nominee, of Executive's entire right, title and interest in and to any such discoveries and improvements and to execute any other instruments and documents requisite or desirable in applying for and obtaining patents, trademarks or copyrights, at the expense of the Company, with respect thereto in the United States and in all foreign countries, that may be required by the Company. Executive further agrees at all times to cooperate to the extent and in the manner required by the Company in the prosecution or defense of any patent or copyright claims or any litigation or other proceeding involving any trade secrets, processes, discoveries or improvements covered by this Agreement, but all necessary expenses thereof shall be paid by the Company.

8. Acknowledgement and Enforcement . Executive acknowledges and agrees that: (a) the purpose of the foregoing covenants, including without limitation the noncompetition covenants of Sections 4 and 5, is to protect the goodwill, trade secrets and other Confidential Information of the Company; (b) because of the nature of the business in which the Cardinal Group is engaged and because of the nature of the Confidential Information to which Executive has access, the Company would suffer irreparable harm and it would be impractical and excessively difficult to determine the actual damages of the Cardinal Group in the event Executive breached any of the covenants of this Agreement; and (c) remedies at law (such as monetary damages) for any breach of Executive's obligations under this Agreement would be inadequate. Executive therefore agrees and consents that if Executive commits any breach of a covenant under this Agreement or threatens to commit any such breach, the Company shall have the right (in addition to, and not in lieu of, any other right or remedy that may be available to it) to temporary and permanent injunctive relief from a court of competent jurisdiction, without posting any bond or other security and without the necessity of proof of actual damage. If any of the covenants contained in this Agreement are finally held by a court to be invalid, illegal or unenforceable (whether in whole or in part), such covenant shall be deemed modified to the extent, but only to the extent, of such invalidity, illegality or unenforceability and the remaining covenants shall not be affected thereby; provided , however , that if any of such covenants is finally held by a court to be invalid, illegal or unenforceable because it exceeds the maximum scope or duration determined to be acceptable to permit such provision to be enforceable, such covenant will be deemed to be modified to the minimum extent necessary to modify such scope or duration in order to make such provision enforceable hereunder.

9. Miscellaneous .

(a) This Agreement shall be governed by and construed in accordance with the laws of the State of Ohio, without reference to principles of conflict of laws. If, under any such law, any portion of this Agreement is at any time deemed to be in conflict with any applicable statute, rule, regulation or ordinance, such portion shall be deemed to be modified or altered to conform thereto. The parties hereto irrevocably agree to submit to the jurisdiction and venue of the courts of the State of Ohio in any action or proceeding brought with respect to or in connection with this Agreement. The captions of this Agreement are not part of the provisions hereof and shall have no force or effect. This Agreement constitutes the entire agreement of the parties with respect to the subject matter hereof. This Agreement may not be amended or modified otherwise than by a written agreement executed by the parties hereto or their respective successors and legal representatives. This Agreement is the product of negotiation and shall not be construed strictly for or against any party.

(b) All notices and other communications under this Agreement shall be in writing and shall be given by hand delivery to the other party or by registered or certified mail, return receipt requested, postage prepaid, addressed as follows:

If to Executive:	At the most recent address on file for Executive at the Company
If to the Company:	Cardinal Health, Inc. 7000 Cardinal Place Dublin, OH Attn: Chief Legal and Compliance Officer

or to such other address as either party shall have furnished to the other in writing in accordance herewith. Notice and communications shall be effective when actually received by the addressee.

(c) The invalidity or unenforceability of any provision of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement. If any provision of this Agreement shall be held invalid or unenforceable in part, the remaining portion of such provision, together with all other provisions of this Agreement, shall remain valid and enforceable and continue in full force and effect to the fullest extent consistent with the law.

(d) Executive's or the Company's failure to insist upon strict compliance with any provision of this Agreement or the failure to assert any right Executive or the Company may have hereunder, shall not be deemed to be a waiver of such provision or right or any other provision or right of this Agreement.

IN WITNESS WHEREOF, Executive has hereunto set Executive's hand and the Company has caused these presents to be executed in its name and on its behalf, all as of the day and year first above written.

Exhibit 10.12.2

[Cardinal Health Letterhead]

July 17, 2018

Ms. Patricia B. Morrison
#####
####### ######## #####

Dear Patty:

The purpose of this letter (referred to as this "Agreement") is to confirm the agreement between Cardinal Health, Inc. and its subsidiaries ("the Company") and you concerning your retirement from the Company and the retirement benefits to be provided to you in consideration of your many years of service and significant contributions to the Company.

Retirement Date
You will retire and cease to be an officer and employee of the Company on August 31, 2018 ("Retirement Date"). You agree to provide a letter of resignation to this effect for our corporate records.

Long-term incentive awards
You will be deemed to have "retired" for purposes of your long-term incentive awards. As a result, subject to the terms of the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan and the applicable award agreements, (i) a ratable portion of each unvested installment of your outstanding stock options will immediately vest and become exercisable upon your Retirement Date, and options, to the extent vested, may be exercised until their grant expiration term, (ii) a ratable portion of each unvested installment of your outstanding restricted share units will immediately vest upon your Retirement Date, and (ii) following the end of the applicable performance period, a ratable portion of your unvested performance share units, which would have vested if you had remained employed through the payment date, will vest.

In accordance with the Company's standard procedures, for receipt of this retirement treatment, you hereby release the Company and all of its affiliates and related entities, predecessors, successors and assigns (whether to all or any part of such entities' businesses), and all of such entities' officers, directors, agents, representatives, attorneys, and employees (current and former) and their employee benefit plans and programs and their administrators and fiduciaries from any and all claims and causes of action that may exist, whether known or unknown, as of the date of your execution of this Agreement, with the exception of any other claims that cannot be waived by law.

Successors
You, and anyone who succeeds to your rights and responsibilities, are bound by this Agreement, and this Agreement will accrue to the benefit of and may be enforced by the Company and its successors and assigns.

Severability
You agree that the validity or unenforceability of any part of this Agreement shall not affect the validity or enforceability of any remaining provisions.

Governing Law
You agree that all questions concerning the intention, validity or meaning of this Agreement shall be construed and resolved according to the laws of the State of Ohio. You also designate the federal and state courts in

Franklin County, Ohio as the courts of competent jurisdiction and venue for any actions or proceedings related to this Agreement, and hereby irrevocably consent to such designation, jurisdiction and venue.

By signing below, you agree to and accept all of the terms in this Agreement.

Sincerely,

CARDINAL HEALTH, INC.

/s/ Pamela O. Kimmet

Pamela O. Kimmet
Chief Human Resources Officer

Agreed to:

/s/ Patricia B. Morrison July 20, 2018
Patricia B. Morrison Date

Exhibit 12.1

Computation of Ratio of Earnings to Fixed Charges

(in millions, except ratios)	2014	2015	2016	2017	**2018**
Earnings/(loss) from continuing operations before income taxes	$ 1,798	$ 1,967	$ 2,276	$ 1,924	**$ (228)**
Plus fixed charges:					
Interest expense	129	137	178	187	**328**
Capitalized interest	1	2	6	9	**4**
Amortization of debt offering costs	4	8	6	6	**11**
Interest portion of rent expense	10	10	12	14	**16**
Fixed charges (1)	144	156	201	217	**359**
Plus: amortization of capitalized interest	3	2	3	4	**4**
Less: capitalized interest	(1)	(2)	(6)	(9)	**(4)**
Earnings (1)	$ 1,944	$ 2,124	$ 2,473	$ 2,135	**$ 131**
Ratio of earnings to fixed charges (1) (2)	13.5	13.6	12.3	9.9	**0.4**

(1) The sum of the components may not equal the total due to rounding.
(2) The ratio of earnings to fixed charges is computed by dividing fixed charges into earnings/(loss) from continuing operations before income taxes plus fixed charges and amortization of capitalized interest less capitalized interest. Fixed charges include interest expense, amortization of debt offering costs and the portion of rent expense that is deemed to be representative of the interest factor. Interest expense recorded on tax exposures has been recorded in income tax expense and has therefore been excluded from the calculation.

I, Michael C. Kaufmann , certify that:

1. I have reviewed this Form 10-K of Cardinal Health, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
    (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Statement Regarding Forward-Looking Information

As used in this exhibit, “we,” “our,” “us” and similar pronouns refer to Cardinal Health, Inc. and its subsidiaries, unless the context requires otherwise. Our filings with the Securities and Exchange Commission, including this Annual Report on Form 10-K for the fiscal year ended June 30, 2018 (the “2018 Form 10-K”), our quarterly reports on Form 10-Q and our current reports on Form 8-K (along with any exhibits and amendments to such reports), as well as our news releases or any other written or oral statements made by or on behalf of us, including materials posted on our website, may include, directly or by incorporation by reference, forward-looking statements that reflect our current view (as of the date the forward-looking statement is first made) about future events, prospects, projections or financial performance. The matters discussed in these forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied in or by such statements. These risks and uncertainties include:

- competitive pressures in the markets in which we operate, including pricing pressures;
- uncertainties relating to the pricing of generic pharmaceuticals;
- uncertainties relating to the timing, frequency and profitability of generic pharmaceutical launches;
- our ability to maintain the benefits of our generic pharmaceutical sourcing venture with CVS Health Corporation;
- with respect to our distribution services agreements with branded pharmaceutical manufacturers, changes in the amount of service fees we receive or, in cases where part of our compensation under these agreements is based on branded pharmaceutical price appreciation, changes in the frequency or magnitude of such price appreciation;
- changes in manufacturer approaches to pricing branded pharmaceutical products and risks related to our compensation under contractual arrangements with manufacturers being set as a percentage of the wholesale acquisition cost of branded pharmaceuticals;
- changes in the timing or frequency of the introduction of branded pharmaceuticals;
- our high sales concentration with certain key customers, including CVS Health Corporation and OptumRx;
- actions of regulatory bodies and other governmental authorities, including the U.S. Drug Enforcement Administration, certain agencies within the U.S. Department of Health and Human Services (including the U.S. Food and Drug Administration, Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights), the U.S. Nuclear Regulatory Commission, the U.S. Federal Trade Commission, the U.S. Customs and Border Protection, various state boards of pharmacy, state controlled substance authorities, state health departments, state insurance departments, state Medicaid departments or comparable regulatory bodies or governmental authorities or foreign equivalents that, in each case, could delay, limit or suspend product development, manufacturing, distribution, importation or sales or result in warning letters, recalls, seizures, injunctions or monetary sanctions;
- any compromise of our information systems or of those of a third-party service provider, including unauthorized access to or use or disclosure of company or customer information, and ancillary risks associated with our ability to effectively manage any issues arising from any such compromise;
- possible losses that may arise or expenses that we may incur from the resolution and defense of the lawsuits and investigations in which we have been named relating to the distribution of prescription opioid pain medication;
- potential damage to our reputation, adverse operational impacts or other effects that may result from the national opioid epidemic and the allegations that have been made about our role in such epidemic;
- potential adverse impact to our financial results resulting from enacted and proposed state taxes or other assessments on the sale and distribution of opioid medications;
- risks and uncertainties relating to the acquisition of the Patient Care, Deep Vein Thrombosis and Nutritional Insufficiency businesses from Medtronic plc (the "Patient Recovery Business"), including the ability to retain the acquired business' customers and employees; the ability to successfully integrate the acquired business into our operations; the ability to achieve the expected synergies and accretion in earnings; unforeseen internal control, regulatory or compliance issues; and additional risks relating to regulatory matters, legal proceedings, tax laws or positions or foreign exchange rate volatility;
- uncertainties related to our ability to manage inventory and cost challenges within the Cordis business and to stop the decline in Cordis' performance;
- difficulties or delays in the development, production, manufacturing, sourcing and marketing of new or existing products and services, including difficulties or delays associated with obtaining requisite regulatory consents or approvals associated with those activities;
- manufacturing disruptions, whether due to regulatory action, production quality deviations, safety issues or raw material shortages or defects, or because a key product is manufactured at a single manufacturing facility with limited alternate facilities;
- risks arising from possible violations of healthcare fraud and abuse laws;
- costs or claims resulting from potential errors or defects in our manufacturing of medical devices or other products or in our compounding, repackaging, information systems or pharmacy management services that may injure persons or damage property or operations, including costs from remediation efforts or recalls and related product liability claims and lawsuits, including class action lawsuits;
- risks arising from possible violations of the U.S. Foreign Corrupt Practices Act and other similar anti-corruption laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws;

- risks arising from our collecting, handling and maintaining patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information;
- risks arising from certain of our businesses being Medicare-certified suppliers or participating in other federal and state healthcare programs, such as state Medicaid programs and the federal 340B drug pricing program, which businesses are subject to accreditation and quality standards and other rules and regulations, including applicable reporting, billing, payment and record-keeping requirements;
- risks arising from certain of our businesses manufacturing pharmaceutical and medical products or repackaging pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs, which businesses are subject to federal and state laws that establish eligibility for reimbursement by such programs and other applicable standards and regulations;
- changes in laws or changes in the interpretation or application of laws or regulations, as well as possible failures to comply with applicable laws or regulations, including as a result of possible misinterpretations or misapplications;
- material reductions in purchases, pricing changes, non-renewal, early termination, or delinquencies or defaults under contracts with key customers;
- unfavorable changes to the terms of key customer or supplier relationships, or changes in customer mix;
- risks arising from changes in U.S. or foreign tax laws, including our ability to effectively implement and account for the recently enacted Tax Cuts and Jobs Act and unfavorable challenges to our tax positions and payments to settle these challenges;
- uncertainties due to government healthcare reform, including possible repeal or replacement of major parts of the Patient Protection and Affordable Care Act;
- reductions or limitations on governmental funding at the state or federal level or efforts by healthcare insurance companies to limit payments for products and services;
- changes in manufacturers' pricing, selling, inventory, distribution or supply policies or practices;
- changes in legislation or regulations governing prescription drug pricing, healthcare services or mandated benefits;
- changes in hospital buying groups or hospital buying practices;
- changes in distribution or sourcing models for pharmaceutical and medical and surgical products, including an increase in direct and limited distribution;
- the risks of counterfeit products in the supply chain;
- changes to the prescription drug reimbursement formula and related reporting requirements for generic pharmaceuticals under Medicaid;
- increasing consolidation in the healthcare industry, which could give the resulting enterprises greater bargaining power and may increase pressure on prices for our products and services or result in the loss of customers;
- disruption, damage or lack of access to, or failure of, our or our third-party service providers' information systems, our critical facilities, including our national logistics center, or our distribution networks;
- risks to our business and information and controls systems in the event that business process improvements, infrastructure modernizations or initiatives to use third-party service providers for key systems and processes are not effectively implemented;
- the results, costs, effects or timing of any commercial disputes, government contract compliance matters, patent infringement claims, *qui tam* actions, government investigations or other legal proceedings;
- possible losses relating to product liability lawsuits and claims regarding products for which we cannot obtain product liability insurance or for which such insurance may not be adequate to cover our losses, including the product liability lawsuits we are currently defending relating to alleged personal injuries associated with the use of Cordis inferior vena cava filter products;
- our ability to maintain adequate intellectual property protections;
- the costs, difficulties and uncertainties related to the integration of acquired businesses, including liabilities relating to the operations or activities of such businesses prior to their acquisition, and uncertainties relating to our ability to achieve the anticipated results from acquisitions;
- our ability to manage and complete divestitures or other strategic business combination transactions, including our ability to find buyers or other strategic exit opportunities and risks associated with the possibility that we could experience greater dis-synergies than anticipated or otherwise fail to achieve our strategic objectives;
- increased costs for commodities and other materials used in the Medical segment manufacturing, including various components, compounds, raw materials or energy such as oil-based resins, pulp, cotton, latex and other commodities;
- shortages in commodities, components, compounds, raw materials or energy used by our businesses, including supply disruptions of radioisotopes;
- the loss of, or default by, one or more key suppliers for which alternative suppliers may not be readily available;
- bankruptcy, insolvency or other credit failure of a customer or supplier that owes us a substantial amount;

- risks associated with global operations, including the effect of local economic environments, inflation, recession, currency volatility and global competition, in addition to risks associated with compliance with U.S. and international laws relating to global operations including currently proposed tariffs;
- risks associated with our use of and reliance on the global capital and credit markets, including our ability to access credit and our cost of credit, which may adversely affect our ability to efficiently fund our operations or undertake certain expenditures;
- our ability to introduce and market new products and our ability to keep pace with advances in technology;
- the costs, effects, timing or success of restructuring programs or plans;
- significant charges to earnings if goodwill or intangible assets become impaired;
- uncertainties relating to general political, business, industry, regulatory and market conditions; and
- other factors described in the “Risk Factors” section of the 2018 Form 10-K.

The words “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions generally identify “forward-looking statements,” which speak only as of the date the statements were made, and also include statements reflecting future results or guidance, statements of outlook and expense accruals. We undertake no obligation to update or revise any forward-looking statements, except to the extent required by applicable law.

Introduction

References to Cardinal Health and Fiscal Years

As used in this report, "we," "our," "us," "Cardinal Health" and similar pronouns refer to Cardinal Health, Inc. and its subsidiaries, unless the context requires otherwise. Our fiscal year ends on June 30. References to fiscal 2017 , 2016 , 2015 , 2014 and 2013 and to FY17 , FY16 , FY15 , FY14 and FY13 are to the fiscal years ended June 30, 2017 , 2016 , 2015 , 2014 and 2013 , respectively. Except as otherwise specified, information in this report is provided as of June 30, 2017 .

Non-GAAP Financial Measures

In this report, including in the "Fiscal 2017 Overview" section of Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), we use financial measures that are derived from consolidated financial data but are not presented in our financial statements that are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). These measures are considered “non-GAAP financial measures” under the Securities and Exchange Commission (“SEC”) rules. The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures are included in the “Explanation and Reconciliation of Non-GAAP Financial Measures” section following MD&A in this report.

Important Information Regarding Forward-Looking Statements

This report (including information incorporated by reference) includes forward-looking statements addressing expectations, prospects, estimates and other matters that are dependent upon future events or developments. Many forward-looking statements appear in MD&A, but there are others throughout this report, which may be identified by words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions, and include statements reflecting future results or guidance, statements of outlook and expense accruals. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied. The most significant of these risks and uncertainties are described in “Risk Factors” in this report and in Exhibit 99.1 to the Form 10-K included in this report. Forward-looking statements in this report speak only as of the date of this document. Except to the extent required by applicable law, we undertake no obligation to update or revise any forward-looking statement.

Available Information

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports are available free of charge on our website (www.cardinalhealth.com), under the “Investors — Financial Reporting — SEC Filings” caption, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. You may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website (www.sec.gov) where you can search for annual, quarterly and current reports, proxy and information statements, and other information regarding us and other public companies.

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

About Cardinal Health

Cardinal Health, Inc. is an Ohio corporation formed in 1979 and is a global, integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. We provide medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency. We connect patients, providers, payers, pharmacists and manufacturers for integrated care coordination and better patient management. We manage our business and report our financial results in two segments: Pharmaceutical and Medical.

Pharmaceutical Segment

Our Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical, and over-the-counter healthcare and consumer products in the United States. This segment also provides services to pharmaceutical manufacturers and healthcare providers to support the development, marketing, and distribution of specialty pharmaceutical products; operates nuclear pharmacies and radiopharmaceutical manufacturing facilities; provides pharmacy management services to hospitals, as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers; and repackages generic pharmaceuticals and over-the-counter healthcare products. This segment also imports and distributes pharmaceuticals, over-the-counter healthcare and consumer products and provides specialty pharmacy and other services in China.

Medical Segment

Our Medical segment manufactures, sources and distributes Cardinal Health branded medical, surgical and laboratory products, which are sold in the United States, Canada, Europe, Asia and other markets. In addition to distributing Cardinal Health branded products, this segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China. This segment also distributes medical products to patients' homes and provides post-acute care management and transition services and software to hospitals, other healthcare providers and payers in the United States.

Consolidated Results

Fiscal 2017 Overview

Revenue
Revenue for fiscal 2017 was $130.0 billion , a 7 percent increase from the prior year, due primarily to sales growth from pharmaceutical distribution customers.

GAAP and Non-GAAP Operating Earnings

(in millions)	2017	2016	Change
GAAP	**$ 2,120**	$ 2,459	**(14)%**
Restructuring and employee severance	**56**	25	
Amortization and other acquisition-related costs	**527**	459	
Impairments and (gain)/loss on disposal of assets	**18**	21	
Litigation (recoveries)/charges, net	**48**	(69)	
Non-GAAP	**$ 2,769**	$ 2,895	**(4)%**

The sum of the components may not equal the total due to rounding.

During fiscal 2017 , GAAP operating earnings decreased 14 percent to $2.1 billion and non-GAAP operating earnings decreased 4 percent to $2.8 billion . The decreases in both GAAP and non-GAAP operating earnings were primarily due to generic pharmaceutical customer pricing changes and the previously disclosed loss of a large pharmaceutical distribution customer. The decreases were partially offset by the benefits of Red Oak Sourcing within our Pharmaceutical segment generics program and growth from our Medical segment. Changes in litigation (recoveries)/charges, net and amortization of acquisition-related intangible assets related to the acquisition of Cordis also contributed to the decrease in GAAP operating earnings during fiscal 2017 .

GAAP and Non-GAAP Diluted EPS

($ per share)	2017	2016	Change
GAAP	**$ 4.03**	$ 4.32	**(7)%**
Restructuring and employee severance	**0.11**	0.05	
Amortization and other acquisition-related costs	**1.13**	0.96	
Impairments and (gain)/loss on disposal of assets	**0.04**	0.04	
Litigation (recoveries)/charges, net	**0.09**	(0.13)	
Non-GAAP	**$ 5.40**	$ 5.24	**3 %**

The sum of the components may not equal the total due to rounding.

During fiscal 2017 , GAAP diluted earnings per share from continuing operations attributable to Cardinal Health, Inc. ("diluted EPS") decreased 7 percent to $4.03 and non-GAAP diluted EPS increased 3 percent to $5.40 . GAAP diluted EPS decreased due to lower GAAP operating earnings, partially offset by a lower effective tax rate and fewer shares outstanding as a result of share repurchases. Non-GAAP diluted EPS increased primarily due to a lower effective tax rate and fewer shares outstanding as a result of share repurchases, partially offset by lower non-GAAP operating earnings.

Cash and Equivalents
Our cash and equivalents balance was $6.9 billion at June 30, 2017 compared to $2.4 billion at June 30, 2016 . The increase in cash and equivalents during fiscal 2017 was driven by the proceeds from a $5.2 billion debt issuance and $1.2 billion provided by operating activities, partially offset by $600 million paid for share repurchases, $577 million paid in dividends, $387 million in capital expenditures and $310 million in debt repayments.

In July 2017, we used $6.1 billion to fund the acquisition of the Patient Care, Deep Vein Thrombosis and Nutritional Insufficiency businesses from Medtronic plc, as discussed below, and used $403 million to redeem our 1.7% notes due 2018.

Significant Developments in Fiscal 2017 and Trends

Acquisition of Medtronic's Patient Recovery Business

On July 29, 2017, we acquired the Patient Care, Deep Vein Thrombosis, and Nutritional Insufficiency businesses (the "Patient Recovery Business") from Medtronic plc ("Medtronic") for $6.1 billion in cash. The Patient Recovery Business manufactures 23 medical product categories sold into multiple healthcare channels, and includes numerous industry-leading brands, such as Curity, Kendall, Dover, Argyle and Kangaroo. The acquisition further expands the Medical segment's portfolio of self-manufactured products. We funded the acquisition through $4.5 billion in new long-term debt, the use of existing cash, and borrowings under our existing credit arrangements .

Trends

Within our Pharmaceutical segment, we expect fiscal 2018 segment profit to be less than our fiscal 2017 segment profit due primarily to generic pharmaceutical customer pricing changes, which also negatively impacted Pharmaceutical segment profit during fiscal 2017. However, as is generally the case, the frequency, timing, magnitude, and profit impact of pharmaceutical customer pricing changes and branded and generic pharmaceutical manufacturer pricing changes remain uncertain and their impact on Pharmaceutical segment profit and consolidated operating earnings in fiscal 2018 could be more or less than we expect.

In fiscal 2018, we expect the acquisition of the Patient Recovery Business will significantly increase the Medical segment's revenue and segment profit. We also expect the acquisition will significantly increase amortization and acquisition-related costs in fiscal 2018 due to the size and complexity of the acquisition. We expect our interest expense, net to increase in fiscal 2018 primarily due to the debt issued to fund a portion of the purchase price of the acquisition of the Patient Recovery Business.

Results of Operations

Revenue

	Revenue			Change	
(in millions)	**2017**	2016	2015	**2017**	2016
Pharmaceutical	**$ 116,463**	$109,131	$ 91,116	**7%**	20%
Medical	**13,524**	12,430	11,395	**9%**	9%
Total segment revenue	**129,987**	121,561	102,511	**7%**	19%
Corporate	**(11)**	(15)	20	**N.M.**	N.M.
Total revenue	**$ 129,976**	$121,546	$102,531	**7%**	19%

Fiscal 2017 Compared to Fiscal 2016

Pharmaceutical Segment
Fiscal 2017 Pharmaceutical segment revenue grew primarily due to sales growth from the addition of OptumRx and from other pharmaceutical distribution customers, including continued branded pharmaceutical price appreciation, all of which increased revenue by $7.0 billion.

Medical Segment
Fiscal 2017 Medical segment revenue grew primarily due to sales growth from new and existing customers and $212 million in contributions from acquisitions.

Fiscal 2016 Compared to Fiscal 2015

Pharmaceutical Segment
Fiscal 2016 Ph armaceutical segment revenue grew primarily due to sales growth from the addition of OptumRx and from other pharmaceutical distribution customers, including continued branded pharmaceutical price appreciation, all of which increased revenue by $16.9 billion. Acquisitions also contributed $2.1 billion to revenue growth.

Medical Segment
Fiscal 2016 Medical segment revenue grew primarily due to acquisitions, net of divestitures, which contributed $645 million, and sales growth from existing businesses.

Cost of Products Sold

Cost of products sold f or fiscal 2017 and 2016 increased $8.4 billion (7 percent) and $18.2 billion (19 percent) compared to the prior-year periods, respectively, as a result of the same factors affecting the changes in revenue and gross margin.

Gross Margin

	Consolidated Gross Margin			Change	
(in millions)	**2017**	2016	2015	**2017**	2016
Gross margin	**$ 6,544**	$ 6,543	$ 5,712	**N.M.**	15%

Fiscal 2017 Compared to Fiscal 2016

Fiscal 2017 consolidated gross margin was essentially flat versus the prior-year period.

Consolidated gross margin for fiscal 2017 was positively impacted by sales growth from pharmaceutical distribution customers ($260 million) and acquisitions in both segments ($132 million) and was negatively impacted by the previously disclosed loss of a large pharmaceutical distribution customer.

Gross margin rate contracted during fiscal 2017 , primarily due to generic pharmaceutical customer pricing changes, partially offset by the benefits from Red Oak Sourcing within our Pharmaceutical segment generics program.

Fiscal 2016 Compared to Fiscal 2015

Fiscal 2016 consolidated gross margin increased $831 million (15 percent), and was favorably impacted by sales growth from pharmaceutical distribution customers ($510 million) and acquisitions, net of divestitures ($576 million).

Gross margin rate contracted during fiscal 2016 , primarily due to changes in product mix driven by the on-boarding of a new mail order customer, OptumRx, starting in October 2015, and also due to the adverse impact of customer pricing changes. Our gross margin rate was favorably impacted by performance under our Pharmaceutical segment generics program. Our generics program had strong year-over-year performance from Red Oak Sourcing.

Distribution, Selling, General and Administrative ("SG&A") Expenses

	SG&A Expenses			Change	
(in millions)	**2017**	2016	2015	**2017**	2016
SG&A expenses	**$ 3,775**	$ 3,648	$ 3,240	**3%**	13%

Fiscal 2017 Compared to Fiscal 2016

Fiscal 2017 SG&A expenses increased primarily due to acquisitions ($112 million) and costs related to a multi-year project to replace certain Pharmaceutical segment finance and operating information systems, partially offset by reduced enterprise-wide incentive compensation.

Fiscal 2016 Compared to Fiscal 2015

Fiscal 2016 SG&A expenses increased primarily due to acquisitions, net of divestitures ($370 million).

Segment Profit

We evaluate segment performance based on segment profit, among other measures. See Note 15 of the "Notes to Consolidated Financial Statements" for additional information on segment profit.

	Segment Profit and Operating Earnings			Change	
(in millions)	**2017**	2016	2015	**2017**	2016
Pharmaceutical	**$ 2,187**	$ 2,488	$ 2,094	**(12)%**	19%
Medical	**572**	457	433	**25 %**	6%
Total segment profit	**2,759**	2,945	2,527	**(6)%**	17%
Corporate	**(639)**	(486)	(366)	**31 %**	33%
Total consolidated operating earnings	**$ 2,120**	$ 2,459	$ 2,161	**(14)%**	14%

Fiscal 2017 Compared to Fiscal 2016

Pharmaceutical Segment Profit
Fiscal 2017 Pharmaceutical segment profit decreased largely due to generic pharmaceutical customer pricing changes. The previously disclosed loss of a large pharmaceutical distribution customer, the adverse impact of customer repricings and reduced levels of branded pharmaceutical price appreciation also contributed to the decrease in Pharmaceutical segment profit. These were partially offset by the benefits of Red Oak Sourcing within our generics program.

Medical Segment Profit
Fiscal 2017 Medical segment profit increased due to strong performance from naviHealth, contributions from Cardinal Health branded products, reduced enterprise-wide incentive compensation, and contributions from distribution services. Cardinal Health branded products growth includes the prior year unfavorable impact on cost of products sold from the Cordis inventory fair value step up.

Corporate
As discussed further in sections that follow, the principal drivers for the change in Corporate during fiscal 2017 were the change in litigation (recoveries)/charges, net and higher amortization and other acquisition-related costs.

Fiscal 2016 Compared to Fiscal 2015

Pharmaceutical Segment Profit
Fiscal 2016 Pharmaceutical segment profit increased due to sales growth from pharmaceutical distribution customers and performance under our generics program, partially offset by the adverse impact of customer pricing changes. Acquisitions also contributed to Pharmaceutical segment profit growth. Our generics program benefited from strong year-over-year performance from Red Oak Sourcing.

Medical Segment Profit
Fiscal 2016 Medical segment profit increased due to the contribution from Cardinal Health branded products. Acquisitions, net of divestitures, which included the unfavorable impact on cost of products sold from the fair value step up of inventory acquired with Cordis, also contributed to segment profit growth. Fiscal 2016 Medical segment profit growth was partially offset by a decline in the results from our Canada business.

Corporate
As discussed further in sections that follow, the principal driver for the change in Corporate in fiscal 2016 was increased amortization and other acquisition-related costs primarily related to the acquisitions of Cordis and Harvard Drug, partially offset by litigation recoveries.

Other Components of Consolidated Operating Earnings

In addition to revenue, gross margin, and SG&A expenses discussed previously, consolidated operating earnings were impacted by the following:

(in millions)	2017	2016	2015
Restructuring and employee severance	**$ 56**	$ 25	$ 44
Amortization and other acquisition-related costs	**527**	459	281
Impairments and (gain)/loss on disposal of assets, net	**18**	21	(19)
Litigation (recoveries)/charges, net	**48**	(69)	5

Amortization and Other Acquisition-Related Costs
Amortization of acquisition-related intangible assets was $392 million, $355 million and $189 million for fiscal 2017 , 2016 and 2015 , respectively. The increase in amortization of acquisition-related intangible assets during fiscal 2017 and fiscal 2016 was largely due to the acquisition of Cordis. Transaction and integration costs associated with the Cordis acquisition were $61 million and $78 million during fiscal 2017 and 2016 , respectively.

Transaction and integration costs associated with the acquisition of the Patient Recovery Business were $54 million during fiscal 2017 .

Litigation (Recoveries)/Charges, Net
During fiscal 2017 , we incurred litigation charges of $45 million due to accrued expenses relating to the Cordis-related IVC filter product liability claims and the settlement of the State of West Virginia matter. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information.

During fiscal 2016 and 2015 , we received and recognized income of $80 million and $71 million, respectively, from settlements of class action antitrust lawsuits in which we were a class member. During fiscal 2015 , we incurred litigation charges of $68 million related to government investigations.

Earnings From Continuing Operations Before Income Taxes

In addition to the items discussed above, earnings from continuing operations before income taxes was impacted by the following:

	Earnings from Continuing Operations Before Income Taxes			Change	
(in millions)	2017	2016	2015	2017	2016
Other (income)/expense, net	**$ (5)**	$ 5	$ (7)	**N.M.**	N.M.
Interest expense, net	**201**	178	141	**13%**	26 %
Loss on extinguishment of debt	**—**	—	60	**N.M.**	(100)%

Interest Expense, Net
Fiscal 2017 interest expense increased primarily due to $5.2 billion of new long-term debt issued in June 2017, $4.5 billion of which was used to fund the acquisition of the Patient Recovery Business in July 2017. Fees relating to a commitment for an unsecured bridge term loan facility obtained in connection with the acquisition also contributed to the increase in interest expense. No amounts were drawn under the bridge loan facility and we terminated the commitment letter in June 2017.

Fiscal 2016 interest expense increased primarily as a result of the additional $1.5 billion of debt issued in June 2015 to fund the Harvard Drug and Cordis acquisitions.

Loss on Extinguishment of Debt
In fiscal 2015, we redeemed certain debt resulting in a loss on the extinguishment of debt of $60 million ($37 million, net of tax).

Provision for Income Taxes

The provision for income taxes decreased in fiscal 2017 primarily due to a decrease in earnings from continuing operations and a 4.4 percentage point decrease in the effective tax rate as discussed below.

Generally, fluctuations in the effective tax rate are due to changes in the distribution of income among non-U.S. taxing jurisdictions with lower income tax rates and other reconciling items. A reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate from continuing operations is as follows (see Note 7 of the "Notes to Consolidated Financial Statements" for additional information):

	2017	2016	2015
Provision at Federal statutory rate	**35.0 %**	35.0 %	35.0 %
State and local income taxes, net of federal benefit	**1.0**	1.5	4.1
Foreign tax rate differential	**(0.2)**	(0.6)	(2.4)
Nondeductible/nontaxable items	**0.2**	1.0	0.7
Other	**(3.3)**	0.2	1.0
Effective income tax rate	**32.7 %**	37.1 %	38.4 %

Fiscal 2017

The fiscal 2017 effective income tax rate was favorably impacted by the change in other items, which decreased 3.5 percentage points from fiscal 2016 primarily due to the realignment of foreign subsidiaries in anticipation of closing the acquisition of the Patient Recovery Business and also with deductions related to U.S. production activities. The state and local income tax rate decreased 0.5 percentage points primarily due to resolutions with state taxing authorities.

Ongoing Audits

The IRS is currently conducting audits of fiscal years 2008 through 2014.

Fiscal 2016 and Fiscal 2015

The fiscal 2016 effective income tax rate was favorably impacted by the state and local income tax rate, which decreased 2.6 percentage points from fiscal 2015 due to resolutions with state taxing authorities and a shift in the distribution of income among jurisdictions. The foreign tax rate differential decreased 1.8 percentage points primarily due to the deferred tax benefits recognized in fiscal 2015.

The fiscal 2015 effective income tax rate was unfavorably impacted by the state and local income tax rate, which increased 1.9 percentage points due to the de-recognition of certain state tax benefits. The foreign tax rate differential also increased 1.2 percentage points primarily due to recognition of deferred tax benefits resulting from new tax legislation. In addition, the change in measurement of uncertain tax positions increased 1.3 percentage points primarily as a result of proposed assessment of additional tax.

Liquidity and Capital Resources

We currently believe that, based on available capital resources (cash on hand and committed credit facilities) and projected operating cash flow, we have adequate capital resources to fund working capital needs; currently anticipated capital expenditures; currently anticipated business growth and expansion; contractual obligations; tax payments; and current and projected debt service requirements, dividends, and share repurchases. If we decide to engage in one or more additional acquisitions, depending on the size and timing of such transactions, we may need to access capital markets for additional financing.

Cash and Equivalents

Our cash and equivalents balance was $6.9 billion at June 30, 2017 compared to $2.4 billion at June 30, 2016 . The increase in cash and equivalents during fiscal 2017 was driven by the proceeds from the $5.2 billion debt issuance and $1.2 billion provided by operating activities, partially offset by $600 million paid for share repurchases, $577 million paid in dividends, $387 million in capital expenditures and $310 million in debt repayments. The $1.8 billion decrease in net cash provided by operating activities was primarily due to an increase in working capital as a result of changes in timing of customer and vendor payments, some of which related to implementation of the new Pharmaceutical segment finance and operating information systems. At June 30, 2017 , our cash and equivalents were held in cash depository accounts with major banks or invested in high quality, short-term liquid investments. On July 29, 2017, we acquired the Patient Recovery Business for $6.1 billion in cash.

The cash and equivalents balance at June 30, 2017 included $569 million of cash held by subsidiaries outside of the United States. Although the vast majority of cash is available for repatriation, bringing the cash into the United States could trigger U.S federal, state and local income tax obligations. Because the earnings are considered permanently reinvested, no U.S. tax provision has been accrued related to the repatriation of these earnings. It is not practicable to evaluate the amount of U.S. tax that might be payable on the remittance of such earnings.

The decrease in cash and equivalents during fiscal 2016 of $2.2 billion was driven by $3.6 billion deployed for acquisitions, $651 million paid for share repurchases, $512 million paid in dividends and $465 million in capital expenditures, partially offset by net cash provided by operating activities of $3.0 billion , which was positively impacted by increased net earnings and working capital improvements.

During fiscal 2015 we deployed $1.0 billion of cash on share repurchases, $503 million on acquisitions and $460 million on dividends. Net cash provided by operating activities of $2.5 billion benefited from a net working capital decrease in excess of $500 million as a result of the Walgreens contract expiration.

Changes in working capital, which impact operating cash flow, can vary significantly depending on factors such as the timing of customer payments, inventory purchases and payments to vendors in the regular course of business, as well as fluctuating working capital needs driven by customer and product mix.

Other Financing Arrangements and Financial Instruments

Credit Facilities and Commercial Paper

In addition to cash and equivalents and operating cash flow, other sources of liquidity at June 30, 2017 include a $1.75 billion revolving credit facility and a $700 million committed receivables sales facility program. We also have a $1.75 billion commercial paper program, backed by our revolving credit facility. At June 30, 2017 , we had no amounts outstanding under our revolving credit facility or our committed receivables sales facility program. Under our commercial paper program, we had a maximum amount outstanding of $855 million and an average daily amount outstanding of $58 million during fiscal 2017.

Our revolving credit facility and committed receivables sales facility programs require us to maintain a consolidated leverage ratio of no more than 3.25-to-1 as of the last day of each quarter. As a result of the acquisition of the Patient Recovery Business , we temporarily increased this ratio to 4.25-to-1. As of June 30, 2017 , we were in compliance with these financial covenants.

Long-Term Obligations

At June 30, 2017 , we had total long-term obligations of $9.1 billion .

In June 2017, we sold $1 billion aggregate principal amount of 1.948% notes due 2019, $1.15 billion aggregate principal amount of 2.616% notes due 2022, $350 million aggregate principal amount of floating rate notes due 2022, $750 million aggregate principal amount of 3.079% notes due 2024, $1.35 billion aggregate principal amount of 3.410% notes due 2027 and $600 million aggregate principal amount of 4.368% notes due 2047. In addition to funding a portion of the purchase price of the acquisition of the Patient Recovery Business described below, in July 2017 we used a portion of the debt proceeds to redeem our $400 million 1.7% notes due 2018.

Funding for Acquisition of Medtronic's Patient Recovery Business

On July 29, 2017 , we acquired the Patient Recovery Business from Medtronic for $6.1 billion in cash. We funded the acquisition using $4.5 billion of the proceeds from long-term debt issued in June 2017, cash on hand, $400 million in commercial paper and $300 million borrowed under our receivables sales facility. The new long-term debt was issued in June 2017 primarily to fund a portion of the purchase price of this acquisition. We also had obtained a commitment letter in April 2017 from a financial institution for a $4.5 billion unsecured bridge term loan facility that could have been used to complete the acquisition. We incurred fees related to the facility, which are included in interest expense, net. No amounts were drawn under the bridge term loan facility and we terminated the commitment letter in June 2017.

Available-for-Sale Securities

At June 30, 2017 and 2016 , we held $65 million and $200 million , respectively, of marketable securities, which are classified as available-for-sale. In July 2017, we liquidated $65 million of our marketable securities.

Risk Management

We use interest rate swaps, foreign currency contracts and commodity contracts to manage our exposure to cash flow variability. We also use interest rate swaps to protect the value of our debt and use foreign currency forward contracts to protect the value of our existing and forecasted foreign currency assets and liabilities. See the "Quantitative and Qualitative Disclosures About Market Risk" section as well as Note 1 and Note 11 of the “Notes to Consolidated Financial Statements” for information regarding the use of financial instruments and derivatives as well as foreign currency, interest rate and commodity exposures.

Capital Deployment

Capital Expenditures

Capital expenditures during fiscal 2017 , 2016 and 2015 were $387 million , $465 million and $300 million , respectively.

We expect capital expenditures in fiscal 2018 to be between $500 million and $540 million primarily for information technology projects, growth projects in our core business and for integration of the acquisition of the Patient Recovery Business.

Dividends

During fiscal 2017 , we paid quarterly dividends totaling $1.80 per share, an increase of 16 percent from fiscal 2016 .

On May 3, 2017, our Board of Directors approved a quarterly dividend of $0.4624 per share, or $1.85 per share on an annualized basis, which was paid on July 15, 2017 to shareholders of record on July 3, 2017.

Share Repurchases

During fiscal 2017, we repurchased $600 million of our common shares. We funded the repurchases with available cash. At June 30, 2017, we had $443 million remaining under our existing $1.0 billion share repurchase program.

Acquisition of Medtronic's Patient Recovery Business

Described above under "Funding for Acquisition of Medtronic's Patient Recovery Business."

Long-Term Obligations Repayment Plans

We plan to reduce our long-term obligations by approximately $500 million in each of fiscal 2018, 2019 and 2020 by paying off long-term debt as it comes due.

Contractual Obligations

At June 30, 2017 , our contractual obligations, including estimated payments due by period, are as follows:

(in millions)	2018	2019 to 2020	2021 to 2022	There-after	Total
Long-term debt and short-term borrowings (1)	$ 1,328	$ 1,950	$ 1,750	$ 5,424	**$ 10,452**
Interest on long-term debt	320	590	542	2,250	**3,702**
Capital lease obligations (2)	2	5	2	2	**11**
Other liabilities (3)	4	—	—	—	**4**
Operating leases (4)	110	171	100	107	**488**
Purchase obligations and other payments (5)	341	331	234	244	**1,150**
Total contractual obligations (6)	**$ 2,105**	**$ 3,047**	**$ 2,628**	**$ 8,027**	**$ 15,807**

(1) Represents maturities of our long-term debt obligations and other short-term borrowings excluding capital lease obligations described below. See Note 6 of the "Notes to Consolidated Financial Statements" for further information.

(2) Represents maturities of our capital lease obligations included within long-term obligations in our consolidated balance sheets.

(3) Represents cash outflows by period for certain of our liabilities in which cash outflows could be reasonably estimated. Long-term liabilities, such as unrecognized tax benefits and deferred taxes, have been excluded from the table above because of the inherent uncertainty of the underlying tax positions or because of the inability to reasonably estimate the timing of any cash outflows. See Note 7 of the "Notes to Consolidated Financial Statements" for further discussion of income taxes. Additionally, the carrying value of redeemable noncontrolling interests are excluded from the table, as the ultimate amount and timing of any future cash payments related to the redemption amount are uncertain. See Note 1 and Note 12 of the "Notes to Consolidated Financial Statements" for additional information regarding redeemable noncontrolling interests.

(4) Represents minimum rental payments for operating leases having initial or remaining non-cancelable lease terms as described in Note 8 of the "Notes to Consolidated Financial Statements."

(5) A purchase obligation is defined as an agreement to purchase goods or services that is legally enforceable and specifies all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and approximate timing of the transaction. The purchase obligation amounts disclosed above represent estimates of the minimum for which we are obligated and the time period in which cash outflows will occur. Purchase orders and authorizations to purchase that involve no firm commitment from either party are excluded from the above table. In addition, contracts that can be unilaterally canceled with no termination fee or with proper notice are excluded from our total purchase obligations except for the amount of the termination fee or the minimum amount of goods that must be purchased during the requisite notice period. Purchase obligations and other payments also includes quarterly payments of $45.6 million that we are required to pay CVS Health Corporation ("CVS"), in connection with the establishment of Red Oak Sourcing and will be in place for the remaining seven years of the agreement. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information.

(6) Excludes obligations from acquisitions not closed as of June 30, 2017.

Off-Balance Sheet Arrangements

We had no significant "off-balance sheet arrangements" at June 30, 2017 , as that term is defined in the SEC rules.

Recent Financial Accounting Standards

See Note 1 of the "Notes to Consolidated Financial Statements" for a discussion of recent financial accounting standards.

Critical Accounting Policies and Sensitive Accounting Estimates

Critical accounting policies are those accounting policies that (i) can have a significant impact on our financial condition and results of operations and (ii) require the use of complex and subjective estimates based upon past experience and management's judgment. Other people applying reasonable judgment to the same facts and circumstances could develop different estimates. Because estimates are inherently uncertain, actual results may differ. In this section, we describe the significant policies applied in preparing our consolidated financial statements that management believes are the most dependent on estimates and assumptions. For further discussion of accounting policies for items within this section and of additional accounting policies, see Note 1 of the "Notes to Consolidated Financial Statements."

Allowance for Doubtful Accounts

The allowance for doubtful accounts includes general and specific reserves. We determine our allowance for doubtful accounts by reviewing accounts receivable aging, industry trends, customer financial strength and credit standing, historical write-off trends and payment history. We regularly evaluate how changes in economic conditions may affect credit risks. See Note 1 of the "Notes to Consolidated Financial Statements" for further information on our policy for Receivables and Allowance for Doubtful Accounts.

A hypothetical 0.1 percent increase or decrease in the reserve as a percentage of trade receivables at June 30, 2017 , would result in an increase or decrease in bad debt expense of $8 million . We believe the reserve maintained and expenses recorded in fiscal 2017 are appropriate. At this time, we are not aware of any analytical findings or customer issues that are likely to lead to a significant future increase in the allowance for doubtful accounts as a percentage of revenue.

The following table presents information regarding the allowance for doubtful accounts over the past three fiscal years:

(in millions, except percentages)	2017	2016	2015
Allowance for doubtful accounts	**$ 137**	$ 135	$ 135
Reduction to allowance for customer deductions and write-offs	**58**	74	66
Charged to costs and expenses	**60**	74	64
Allowance as a percentage of customer receivables	**1.7%**	1.8%	2.0%
Allowance as a percentage of revenue	**0.11%**	0.11%	0.13%

Inventories

A substantial portion of our inventories (56 percent and 58 percent at June 30, 2017 and 2016 , respectively) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These are primarily merchandise inventories at the core pharmaceutical distribution facilities within our Pharmaceutical segment ("distribution facilities"). The LIFO impact on the consolidated statements of earnings depends on pharmaceutical manufacturer price appreciation or deflation and our fiscal year-end inventory levels, which can be meaningfully influenced by customer buying behavior immediately preceding our fiscal year-end. Prices for branded pharmaceuticals generally tend to rise, resulting in an increase in cost of products sold, whereas prices for generic pharmaceuticals generally tend to decline, resulting in a decrease in cost of products sold. See Note 1 of the "Notes to Consolidated Financial Statements" for further information on our policy for Inventories.

Using LIFO, if there is a decrease in inventory levels that have experienced pharmaceutical price appreciation, the result generally will be a decrease in future cost of products sold as our older inventory is held at a lower cost. Conversely, if there is a decrease in inventory levels that have experienced a pharmaceutical price decline, the result generally will be an increase in future cost of products sold as our older inventory is held at a higher cost.

We believe that the average cost method of inventory valuation provides a reasonable approximation of the current cost of replacing inventory within these distribution facilities. As such, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation. If we had used the average cost method of inventory valuation for all inventory within the distribution facilities, the value of our inventories would not have changed in fiscal 2017 or 2016 because inventories valued at LIFO were $46 million and $9 million higher than the average cost value at June 30, 2017 and 2016 , respectively. We do not record inventories in excess of replacement cost. As such, we did not record any changes in our LIFO reserve in fiscal 2017 and 2016 .

Our remaining inventory that is not valued at the lower of LIFO or market is stated at the lower of cost, using the first-in, first-out method, or market. Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $76 million and $79 million at June 30, 2017 and 2016 , respectively. We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory, age of on-hand inventory and manufacturer return policies. If actual conditions are less favorable than our assumptions, additional inventory reserves may be required.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. For further discussion of the Business Combinations accounting policy, see Note 1 of the "Notes to Consolidated Financial Statements."

Critical estimates and assumptions include: expected future cash flows for customer relationships, trademarks, trade names, patents, developed technology, in-process research and development ("IPR&D") and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. See Note 2 of the "Notes to Consolidated Financial Statements" for additional information regarding our acquisitions.

Goodwill and Other Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are tested for impairment annually or when indicators of impairment exist. Goodwill impairment testing involves a comparison of the estimated fair value of reporting units to the respective carrying amount, which may be performed utilizing either a qualitative or quantitative assessment. A reporting unit is defined as an operating segment or one level below an operating segment (also known as a component).

We have two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. These operating segments are comprised of divisions (components), for which discrete financial information is available. Components are aggregated into reporting units for purposes of goodwill impairment testing to the extent that they share similar economic characteristics. Our reporting units are: Pharmaceutical operating segment (excluding our Nuclear Pharmacy Services division and Cardinal Health China - Pharmaceutical division); Nuclear Pharmacy Services division; Cardinal Health China - Pharmaceutical division; Medical operating segment (excluding our Cardinal Health at Home division and naviHealth division) ("Medical Unit"); Cardinal Health at Home division; and naviHealth division.

Goodwill impairment testing involves judgment, including the identification of reporting units and the estimation of the fair value of each reporting unit and, if necessary, the estimation of the implied fair value of goodwill. Our determination of estimated fair value of our reporting units is based on a combination of the income-based and market-based approaches. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets.

Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment. If a reporting unit fails to achieve expected earnings or otherwise fails to meet current financial plans, or if there were changes to any other key assumptions used in the tests, the reporting unit could incur a goodwill impairment in a future period.

We performed annual impairment testing in fiscal 2017, 2016 and 2015 and concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value. For our annual impairment test in fiscal 2017, the fair value of our Medical Unit exceeded its carrying value of $6.8 billion by approximately 6 percent, which is lower than in past years due to recent performance of our Cordis acquisition. For this test, we used a discount rate of 8.5 percent and a terminal growth rate of 2.0 percent. The goodwill balance for our Medical Unit is $2.6 billion. A decrease in future cash flows, an increase in the discount rate or a decrease in the terminal growth rate, among other things, could result in a goodwill impairment for the Medical Unit. If we were to alter our impairment testing in fiscal 2017 by increasing the discount rate by 1.0 percent, there would have been an impairment indicator for our Medical Unit and we would have performed Step 2 of the goodwill impairment test. Similarly, changes in other key assumptions used in the test could result in an impairment indicator for our Medical Unit. For any of our other reporting units, there would not have been an impairment indicator for fiscal 2017 if we raised the discount rate by 1.0 percent. Subsequent to June 30, 2017, we acquired the Patient Recovery Business as discussed in Note 18, which will be included in the Medical Unit going forward and is expected to significantly contribute to the profit of this unit.

Intangible assets with finite lives are amortized using a combination of straight-line and accelerated methods based on the expected cash flows from the asset over their estimated useful lives. We review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable.

The impairment test for indefinite-lived intangibles other than goodwill (primarily IPR&D) requires comparing the fair value of the indefinite-lived intangible asset to the carrying value of the asset as of the impairment testing date.

We estimate the fair value of our indefinite-lived intangibles under the income approach using a discounted cash flow model. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for the indefinite-lived intangible including, among other factors, assumptions on regulatory approval for IPR&D.

Determining whether an impairment of indefinite-lived intangibles occurred requires estimating future undiscounted cash flows expected to be generated by the asset group. Actual results may differ materially from those used in our forecasts.

See Note 1 of "Notes to Consolidated Financial Statements" for additional information regarding goodwill and other intangible assets.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputed transactions are researched and resolved based upon findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the type of claim and status of review. For further discussion on the Vendor Reserves, see Note 1 of "Notes to Consolidated Financial Statements."

Vendor reserves were $50 million and $62 million at June 30, 2017 and 2016 , respectively. Approximately 77 percent of the vendor reserve at the end of fiscal 2017 pertained to the Pharmaceutical segment compared to 66 percent at the end of fiscal 2016 . The reserve balance will fluctuate due to variations in outstanding claims from period-to-period, timing of resolutions and specific vendor issues.

The ultimate outcome of specific claims may be different than our original estimate and may require adjustment. We believe, however, that reserves recorded for such disputes are reasonable based upon current facts and circumstances.

Loss Contingencies and Self-Insurance

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated.

Because these matters are inherently unpredictable and unfavorable developments or outcomes can occur, assessing contingencies is highly subjective and requires judgments about future events.

We also self-insure for employee healthcare, certain product liability matters, auto liability, property and workers' compensation and maintain insurance for individual losses exceeding certain limits when available.

Self-insurance accruals include an estimate for expected settlements on pending claims, defense costs, administrative fees, claims adjustment costs and an estimate for claims incurred but not reported.

For certain types of exposures, we develop the estimate of expected ultimate costs to settle each claim which is based on specific information related to each claim if available. Other estimates are based on an assessment of outstanding claims, historical analysis and current payment trends. For claims incurred but not reported, the liabilities are calculated and derived in accordance with generally accepted actuarial practices or using an estimated lag period.

We regularly review contingencies and self-insurance accruals to determine whether our accruals and related disclosures are adequate. The amount of loss may differ from these estimates. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information regarding loss contingencies and product liability lawsuits.

Provision for Income Taxes

Our income tax expense, deferred income tax assets and liabilities, and unrecognized tax benefits reflect management's assessment of estimated future taxes to be paid on items in the consolidated financial statements.

The following table presents information about our tax position at June 30:

(in millions)	2017	2016
Total deferred income tax assets (1)	**$ 692**	$ 567
Valuation allowance for deferred income tax assets (2)	**(237)**	(93)
Net deferred income tax assets	**455**	474
Total deferred income tax liabilities	**(2,331)**	(2,130)
Net deferred income tax liability	**$ (1,876)**	$ (1,656)

(1) Total deferred income tax assets included $378 million and $193 million of loss and tax credit carryforwards at June 30, 2017 and 2016 , respectively.

(2) The valuation allowance primarily relates to federal, state and international loss carryforwards for which the ultimate realization of future benefits is uncertain.

Expiring loss and credit carryforwards and the required valuation allowances are adjusted quarterly. After applying the valuation allowances, we do not anticipate any limitations on our use of any of the other net deferred income tax assets described above.

We believe that our estimates for the valuation allowances against deferred tax assets and unrecognized tax benefits are appropriate based on current facts and circumstances. The amount we ultimately pay when matters are resolved may differ from the amounts accrued. For a further discussion on Provision for Income Taxes, see Note 1 of the "Notes to the Consolidated Financial Statements."

Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation processes. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement.

If any of our assumptions or estimates were to change, an increase or decrease in our effective income tax rate by 1 percent would have caused income tax expense to increase or decrease $19 million for fiscal 2017 . See Note 7 of the "Notes to Consolidated Financial Statements" for additional information regarding unrecognized tax benefits.

Share-Based Compensation

Employee share-based compensation is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The grant date market price of our common shares determines the fair value of restricted share units and performance share units. The fair value of stock options is determined using a lattice valuation model. We believe the lattice model provides reasonable estimates because it takes into account employee exercise patterns based on changes in our stock price and other variables and it provides for a range of input assumptions.

We analyze historical data to estimate option exercise behaviors and post-vesting forfeitures to be used within the lattice model. The expected life of the options granted, which represents the length of time in years that the options granted are expected to be outstanding, is calculated from the option valuation model. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years).The forfeiture estimates are adjusted as circumstances change and ultimately reflect actual forfeitures when an award vests. Actual forfeitures in future reporting periods could be higher or lower than our current estimates. Compensation expense for nonvested performance share units depends on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. See Note 16 of the "Notes to Consolidated Financial Statements" for additional information regarding share-based compensation.

Explanation and Reconciliation of Non-GAAP Financial Measures

This report, including the "Fiscal 2017 Overview" section within MD&A, contains financial measures that are not calculated in accordance with GAAP. In addition to analyzing our business based on financial information prepared in accordance with GAAP, we use these non-GAAP financial measures internally to evaluate our performance, evaluate the balance sheet, engage in financial and operational planning, and determine incentive compensation because we believe that these measures provide additional perspective on and, in some circumstances are more closely correlated to, the performance of our underlying, ongoing business. We provide these non-GAAP financial measures to investors as supplemental metrics to assist readers in assessing the effects of items and events on our financial and operating results on a year-over-year basis and in comparing our performance to that of our competitors. However, the non-GAAP financial measures that we use may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. The non-GAAP financial measures disclosed by us should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations to those financial statements set forth below should be carefully evaluated.

Exclusions from Non-GAAP Financial Measures

Management believes it is useful to exclude the following items from the non-GAAP measures presented in this report for its own and for investors' assessment of the business for the reasons identified below:

- LIFO charges and credits are excluded because the factors that drive last-in first-out ("LIFO") inventory charges or credits, such as pharmaceutical manufacturer price appreciation or deflation and year-end inventory levels (which can be meaningfully influenced by customer buying behavior immediately preceding our fiscal year-end), are largely out of our control and cannot be accurately predicted. The exclusion of LIFO charges from non-GAAP metrics allows for a better comparison of our current financial results to our historical financial results and to our peer group companies' financial results.
- Restructuring and employee severance costs are excluded because they relate to programs in which we fundamentally change our operations and because they are not part of the ongoing operations of our underlying business.
- Amortization and other acquisition-related costs are excluded primarily for consistency with the presentation of the financial results of our peer group companies. Additionally, costs for amortization of acquisition-related intangible assets are non-cash amounts, which are variable in amount and frequency and are significantly impacted by the timing and size of acquisitions, so their exclusion allows for better comparison of historical, current and forecasted financial results. We also exclude other acquisition-related costs, which are directly related to an acquisition but do not meet the criteria to be recognized on the acquired entity's initial balance sheet as part of the purchase price allocation. These costs are also significantly impacted by the timing, complexity and size of acquisitions.
- Impairments and gain or loss on disposal of assets are excluded because they do not occur in or reflect the ordinary course of our ongoing business operations and their exclusion results in a metric that more meaningfully reflects the sustainability of our operating performance.
- Litigation recoveries or charges, net are excluded because they often relate to events that may have occurred in prior or multiple periods, do not occur in or reflect the ordinary course of our business and are inherently unpredictable in timing and amount. Beginning in the third quarter of fiscal 2017, consistent with the presentation of financial results by peer medical device companies, in litigation recoveries or charges, net we began to classify accrued losses and legal fees, net of expected recoveries, related to mass tort product liability claims, including claims for injuries allegedly caused by Cordis OptEase and TrapEase inferior vena cava (IVC) filter products. Such amounts would not have materially affected litigation recoveries or charges, net in prior periods, so have not been reclassified for those periods.
- Loss on extinguishment of debt is excluded because it does not typically occur in the normal course of business and may obscure analysis of trends and financial performance. Additionally, the amount and frequency of this type of charge is not consistent and is significantly impacted by the timing and size of debt financing transactions.

The tax effect for each of the items listed above is determined using the tax rate and other tax attributes applicable to the item and the jurisdiction(s) in which the item is recorded. The gross, tax and net impact of each item are presented with our GAAP to non-GAAP reconciliations.

Definitions

Growth rate calculation : growth rates in this report are determined by dividing the difference between current period results and prior period results by prior period results.

Non-GAAP operating earnings : operating earnings excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets and (5) litigation (recoveries)/charges, net.

Non-GAAP earnings before income taxes : earnings before income taxes excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net and (6) loss on extinguishment of debt.

Non-GAAP net earnings attributable to Cardinal Health, Inc. : net earnings attributable to Cardinal Health, Inc. excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net and (6) loss on extinguishment of debt, each net of tax.

Non-GAAP diluted EPS attributable to Cardinal Health, Inc. : non-GAAP net earnings attributable to Cardinal Health, Inc. divided by diluted weighted-average shares outstanding.

Explanation and Reconciliation of Non-GAAP Financial Measures

1 from continuing operations
2 attributable to Cardinal Health, Inc.

The sum of the components may not equal the total due to rounding.
We apply varying tax rates depending on the item's nature and tax jurisdiction where it is incurred.

Selected Financial Data

The consolidated financial data below includes all business combinations as of the date of acquisition that occurred during these periods. The following selected consolidated financial data should be read in conjunction with the consolidated financial statements and related notes and MD&A.

(in millions, except per common share amounts)	2017	2016	2015	2014	2013 (1)
Earnings Data:					
Revenue	**$ 129,976**	$ 121,546	$ 102,531	$ 91,084	$ 101,093
Operating earnings	**2,120**	2,459	2,161	1,885	996
Earnings from continuing operations	**1,294**	1,431	1,212	1,163	335
Earnings/(loss) from discontinued operations, net of tax	**—**	—	3	3	(1)
Net earnings	**1,294**	1,431	1,215	1,166	334
Less: Net earnings attributable to noncontrolling interests	**(6)**	(4)	—	—	—
Net earnings attributable to Cardinal Health, Inc.	**$ 1,288**	$ 1,427	$ 1,215	$ 1,166	$ 334
Basic earnings per common share attributable to Cardinal Health, Inc.:					
Continuing operations	**$ 4.06**	$ 4.36	$ 3.65	$ 3.41	$ 0.98
Discontinued operations	**—**	—	0.01	0.01	—
Net basic earnings per common share attributable to Cardinal Health, Inc.	**$ 4.06**	$ 4.36	$ 3.66	$ 3.42	$ 0.98
Diluted earnings per common share attributable to Cardinal Health, Inc.:					
Continuing operations	**$ 4.03**	$ 4.32	$ 3.61	$ 3.37	$ 0.97
Discontinued operations	**—**	—	0.01	0.01	—
Net diluted earnings per common share attributable to Cardinal Health, Inc.	**$ 4.03**	$ 4.32	$ 3.62	$ 3.38	$ 0.97
Cash dividends declared per common share	**$ 1.8091**	$ 1.6099	$ 1.4145	$ 1.2500	$ 1.0900
Balance Sheet Data:					
Total assets	**$ 40,112**	$ 34,122	$ 30,142	$ 26,033	$ 25,819
Long-term obligations, less current portion	**9,068**	4,952	5,211	3,171	3,686
Total Cardinal Health, Inc. shareholders' equity	**6,808**	6,554	6,256	6,401	5,975

(1) During fiscal 2013, we recognized a non-cash goodwill impairment charge of $829 million ($799 million, net of tax) related to our Nuclear Pharmacy Services division.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to cash flow and earnings fluctuations as a result of certain market risks. These market risks primarily relate to foreign exchange, interest rate, and commodity price-related changes. We maintain a hedging program to manage volatility related to these market exposures which employs operational, economic, and derivative financial instruments in order to mitigate risk. See Note 1 and Note 11 of the "Notes to Consolidated Financial Statements" for further discussion regarding our use of derivative instruments.

Foreign Exchange Rate Sensitivity

By the nature of our global operations, we are exposed to cash flow and earnings fluctuations resulting from foreign exchange rate variation. These exposures are transactional and translational in nature. Principal drivers of this foreign exchange exposure include the Canadian dollar, Euro, Thai baht, Mexican peso, Japanese yen, Chinese renminbi, Philippine peso, Singapore dollar, Russian ruble, and Australian dollar.

Transactional Exposure

Transactional exposure arises from the purchase and sale of goods and services in currencies other than our functional currency or the functional currency of our subsidiaries. As part of our risk management program, at the end of each fiscal year we perform a sensitivity analysis on our forecasted transactional exposure for the upcoming fiscal year. These analyses include the estimated impact of our hedging program, which is designed to mitigate transactional exposure. Our forecasted transactional exposure at June 30, 2017 increased from the prior year primarily as a result of the increased transaction volume in foreign currencies due to the acquisition of Cordis, and we expect our transactional exposure to further increase in fiscal 2018 due to our acquisition of the Patient Recovery Business . At June 30, 2017 and 2016 , we had hedged approximately 25 and 29 percent of transactional exposures, respectively.

The following table summarizes the analysis as it relates to transactional exposure and the impact of a hypothetical 10 percent fluctuation in foreign currency exchange rates, assuming rates collectively shift in the same direction and we are unable to change customer pricing in response to those shifts, for the upcoming fiscal year:

	June 30	
(in millions)	**2017 (1)**	2016
Net hypothetical transactional exposure	**$ 638**	$ 621
Sensitivity gain/loss	**$ 64**	$ 62
Estimated offsetting impact of hedges	**(16)**	(18)
Hypothetical net gain/loss	**$ 48**	$ 44

(1) This analysis excludes exposures that may be added as a result of acquisitions that have not yet closed as of June 30, 2017.

Translational Exposure

We have exposure related to the translation of financial statements of our foreign operations into U.S. dollars, our functional currency. We perform a similar analysis to that previously described related to this translational exposure. Our forecasted translational exposure at June 30, 2017 was essentially flat compared to the prior period, however we expect our translational exposure to increase in fiscal 2018 due to our acquisition of the Patient Recovery Business . We have not typically hedged any of our translational exposure and no hedging impact was included in our analysis at June 30, 2017 and 2016 .

The following table summarizes translational exposure and the impact of a hypothetical 10 percent strengthening or weakening in the U.S. dollar, assuming rates collectively shift in the same direction, for the upcoming fiscal year:

	June 30	
(in millions)	**2017 (1)**	2016
Net hypothetical translational exposure	**$ 199**	$ 201
Sensitivity gain/loss	**20**	20

(1) This analysis excludes exposures that may be added as a result of acquisitions that have not yet closed as of June 30, 2017.

Interest Rate Sensitivity

We are exposed to changes in interest rates primarily as a result of our borrowing and investing activities to maintain liquidity and fund operations. The nature and amount of our long-term and short-term debt can be expected to fluctuate as a result of business requirements, market conditions and other factors. Our policy is to manage exposures to interest rates using a mix of fixed and floating rate debt as deemed appropriate by management. We utilize interest rate swap instruments to mitigate our exposure to interest rate movements.

As part of our risk management program, we perform an annual sensitivity analysis on our forecasted exposure to interest rates for the upcoming fiscal year. This analysis assumes a hypothetical 50 basis point change in interest rates. At June 30, 2017 and 2016 , the potential increase or decrease in annual interest expense under this analysis as a result of this hypothetical change was $16 million and $9 million, respectively.

We are also exposed to market risk from changes in interest rates related to our cash and cash equivalents, which includes marketable securities that are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. The fair value of our cash and cash equivalents is subject to change primarily as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness. At both June 30, 2017 and 2016 , a hypothetical increase or decrease of 50 basis points in interest rates would cause a potential increase or decrease of up to $1 million and $11 million, respectively, in the estimated fair value.

Commodity Price Sensitivity

We are directly exposed to market price changes for certain commodities, including oil-based resins, nitrile, cotton, diesel fuel and latex. We typically purchase raw materials at either market prices or prices tied to a commodity index and some finished goods at prices based in part on a commodity price index. We also are indirectly exposed to fluctuations in certain commodity prices through the purchase of finished goods and various energy-related commodities, including natural gas and electricity, through our normal course of business where our contracts are not directly tied to a commodity index. As part of our risk management program, we perform sensitivity analysis on our forecasted commodity exposure for the upcoming fiscal year. Our forecasted commodity exposure at June 30, 2017 was essentially flat compared to the prior period, however we expect our commodity exposure to increase in fiscal 2018 due to our acquisition of the Patient Recovery Business . At June 30, 2017 and 2016 , we had hedged a portion of these direct commodity exposures (see Note 11 of the “Notes to Consolidated Financial Statements” for further discussion).

The table below summarizes our analysis of these forecasted direct and indirect commodity exposures and the potential gain/loss given a hypothetical 10 percent fluctuation in commodity prices, assuming pricing collectively shifts in the same direction and we are unable to change customer pricing in response to those shifts, for the upcoming fiscal year:

	June 30	
(in millions)	**2017 (1)**	2016
Hypothetical commodity exposure	**$ 411**	$ 417
Sensitivity gain/loss	**$ 41**	$ 42
Hypothetical offsetting impact of hedges	**(1)**	(1)
Hypothetical net gain/loss	**$ 40**	$ 41

(1) This analysis excludes exposures that may be added as a result of acquisitions that have not yet closed as of June 30, 2017.

We believe our total gross range of direct and indirect exposure to commodities, excluding exposure that may be added as a result of the acquisition of the Patient Recovery Business , is $400 million to $500 million for fiscal 2018.

Business

General

Cardinal Health, Inc. is a global, integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. We provide medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home. We connect patients, providers, payers, pharmacists and manufacturers for integrated care coordination and better patient management.

Pharmaceutical Segment

In the United States, our Pharmaceutical segment:

- distributes branded and generic pharmaceutical and over-the-counter healthcare and consumer products through its Pharmaceutical Distribution division to retailers (including chain and independent drug stores and pharmacy departments of supermarkets and mass merchandisers), hospitals and other healthcare providers. This division:
  - maintains prime vendor relationships that streamline the purchasing process resulting in greater efficiency and lower costs for our retail, hospital and other healthcare provider customers;
  - provides services to pharmaceutical manufacturers, including distribution, inventory management, data reporting, new product launch support and chargeback administration;
  - provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers, and operates pharmacies in community health centers; and
  - repackages generic pharmaceuticals and over-the-counter healthcare products;
- distributes specialty pharmaceutical products to hospitals and other healthcare providers; provides consulting, patient support and other services for specialty pharmaceutical products to pharmaceutical manufacturers and healthcare providers; and provides specialty pharmacy services through its Specialty Solutions division; and
- operates nuclear pharmacies and manufacturing facilities through its Nuclear Pharmacy Services division, which manufactures, prepares and delivers radiopharmaceuticals for use in nuclear imaging and other procedures in hospitals and physician offices. During fiscal 2017, this division also began operating a facility to contract manufacture a radiopharmaceutical treatment (Xofigo) and acquired the North American rights to Lymphoseek, a radiopharmaceutical diagnostic imaging agent.

In China, the Pharmaceutical segment distributes branded, generic and specialty pharmaceutical, over-the-counter healthcare and consumer products, provides logistics, marketing and other services and operates direct-to-patient specialty pharmacies through Cardinal Health China. In July 2017, we announced that we are exploring strategic alternatives for the Cardinal Health China pharmaceutical and medical distribution businesses. Our other medical product businesses in China, including Cordis and the Patient Recovery Business acquired from Medtronic, are not part of this exploration.

See Note 15 of the "Notes to Consolidated Financial Statements" for Pharmaceutical segment revenue, profit and assets for fiscal 2017 , 2016 and 2015 .

Pharmaceutical Distribution

Our Pharmaceutical Distribution division's gross margin includes margin from our generic pharmaceutical program, from distribution services agreements with branded pharmaceutical manufacturers and from over-the-counter healthcare and consumer products. It also includes manufacturer cash discounts.

Margin from our generic pharmaceutical program includes price discounts and rebates from manufacturers and may include price appreciation on some products. Our earnings on generic pharmaceuticals are generally highest during the period immediately following the initial launch of a product, because generic pharmaceutical selling prices are generally highest during that period and tend to decline over time.

Margin from distribution services agreements with branded pharmaceutical manufacturers relates primarily to fees we receive for providing a range of distribution and related services to manufacturers and also, to a lesser extent, includes benefits from price appreciation on branded pharmaceutical products.

Sourcing Venture With CVS Health Corporation

In July 2014, we established Red Oak Sourcing, a U.S.-based generic pharmaceutical sourcing venture with CVS with an initial term of 10 years. Red Oak Sourcing negotiates generic pharmaceutical supply contracts on behalf of both companies.

Specialty Pharmaceutical Products and Services

We refer to products and services offered by our Specialty Solutions division as "specialty pharmaceutical products and services." The Specialty Solutions division distributes oncology, rheumatology, urology, nephrology and other pharmaceutical products ("specialty pharmaceutical products") and human-derived plasma products to hospitals, dialysis clinics, physician offices and other healthcare providers; provides consulting, patient support, logistics, group purchasing and other services to pharmaceutical manufacturers and healthcare providers primarily supporting the development, marketing and distribution of specialty pharmaceutical products; and provides specialty pharmacy services. Our use of the

terminology "specialty pharmaceutical products and services" may not be comparable to the terminology used by other industry participants.

Medical Segment

Our Medical segment manufactures and sources Cardinal Health branded medical, surgical and laboratory products, including cardiovascular and endovascular products; wound care products; single-use surgical drapes, gowns and apparel; exam and surgical gloves; and fluid suction and collection systems. We further expanded this segment's portfolio of manufactured products through the acquisition of the Patient Recovery Business from Medtronic in July 2017, which includes incontinence, wound care, enteral feeding, urology, operating room supply, electrode and needle, syringe and sharps disposal product lines. Our manufactured products are sold directly or through third-party distributors in the United States, Canada, Europe, Asia and other markets.

The Medical segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China.

This segment also distributes medical products to patients' homes in the United States through our Cardinal Health at Home division and provides services and software to hospitals, other healthcare providers and payers to help manage the complex processes of patient discharge from an acute-care facility (“post-acute care”) through naviHealth.

This segment also assembles and sells sterile and non-sterile procedure kits. It also provides supply chain services, including spend management, distribution management and inventory management services, to healthcare providers.

See Note 15 of the “Notes to Consolidated Financial Statements” for Medical segment revenue, profit and assets for fiscal 2017 , 2016 and 2015 .

Acquisitions

We have acquired a number of businesses over the years that have enhanced our core strategic areas of self-manufactured medical products, generic pharmaceutical distribution and services, specialty pharmaceutical products and services, international and post-acute care. We expect to continue to pursue additional acquisitions in the future.

During the last five fiscal years, we completed the following three large acquisitions:

Date	Company	Location	Lines of Business	Acquisition Price (in millions)
10/15	Cordis business of Johnson & Johnson	Fremont, CA	Cardiovascular and endovascular products	$1,944
07/15	The Harvard Drug Group	Livonia, MI	Pharmaceutical product distribution	$1,115
03/13	AssuraMed, Inc.	Twinsburg, OH	Medical product distribution to patients' homes	$2,070

We have also completed several smaller acquisitions during the last five fiscal years, including: in fiscal 2017, the acquisition of the North American rights to Lymphoseek, a radiopharmaceutical diagnostic imaging agent, from Navidea Biopharmaceuticals, Inc.; in fiscal 2016, the acquisition of an 82 percent ownership interest in naviHealth, a provider of post-acute care management services, and CuraSpan Health Group, Inc., a provider of discharge planning and care transition software; in fiscal 2015, the acquisitions of Tradex International, Inc., a supplier of disposable gloves, and Metro Medical Supply, Inc., a distributor of specialty pharmaceuticals and medical and surgical products; and in fiscal 2014, the acquisition of Access Closure, Inc., a manufacturer and distributor of extravascular closure devices.

As discussed above, on July 29, 2017, we acquired the Patient Recovery Business from Medtronic for $6.1 billion in cash.

Customers

Our largest customers, CVS and OptumRx, accounted for 23 percent and 11 percent of our fiscal 2017 revenue, respectively. In the aggregate, our five largest customers, including CVS and OptumRx, accounted for 50 percent of our fiscal 2017 revenue. Our pharmaceutical distribution agreements with CVS extend through June 2019.

We have agreements with group purchasing organizations ("GPOs") that act as agents to negotiate vendor contracts on behalf of their members. Our two largest GPO relationships in terms of member revenue are with Vizient Inc. and Premier, Inc. Sales to members of these two GPOs, under numerous contracts across all of our businesses, collectively accounted for 21 percent of our revenue in fiscal 2017 .

Suppliers

We rely on many different suppliers. Products obtained from our five largest suppliers accounted for an aggregate of 27 percent of our revenue during fiscal 2017 , but no single supplier's products accounted for more than 7 percent of revenue.

Competition

We operate in a highly competitive environment in the distribution of pharmaceuticals and related healthcare services. We also operate in a highly competitive environment in the development, manufacturing and distribution of medical and surgical products. We compete on many levels, including price, service offerings, support services, breadth of product lines and product quality and efficacy.

In the Pharmaceutical segment, we compete with wholesale distributors with national reach (including McKesson Corporation and AmerisourceBergen Corporation), regional wholesale distributors, self-warehousing chains, specialty distributors, third-party logistics companies, companies that provide specialty pharmaceutical services and nuclear pharmacies, among others. In addition, the Pharmaceutical segment has experienced competition from a number of organizations offering generic pharmaceuticals, including telemarketers. We also compete with manufacturers that sell their products directly.

In the Medical segment, our manufacturing and procedural kit businesses compete with diversified healthcare companies as well as companies that are more focused on specific product categories. We also compete with many different national medical product distributors, including Medline Industries, Inc. and Owens & Minor, Inc., regional medical product distributors, companies that distribute medical products to patients' homes and third-party logistics companies. In addition, we compete with manufacturers that sell their products directly.

Employees

At June 30, 2017 , we had approximately 28,000 employees in the United States and approximately 12,400 employees outside of the United States. In July 2017, we added approximately 3,500 employees in the United States and approximately 5,900 employees outside the United States through the acquisition of the Patient Recovery Business . Overall, we consider our employee relations to be good.

Intellectual Property

We rely on a combination of trade secret, patent, copyright and trademark laws, nondisclosure and other contractual provisions, and technical measures to protect our products, services and intangible assets. We hold patents, and continue to pursue patent protection throughout the world, relating to the manufacture, operation and use of various medical and surgical products, to certain distribution and logistics systems, to the production and distribution of our nuclear pharmacy products and to other service offerings. We also operate under licenses for certain proprietary technologies, and in certain instances we license our technologies to third parties.

We believe that we have taken all necessary steps to protect our proprietary rights, but no assurance can be given that we will be able to successfully enforce or protect our rights in the event that they are infringed upon by a third party. While all of these proprietary rights are important to our operations, we do not consider any particular patent, trademark, license, franchise or concession to be material to our overall business.

Regulatory Matters

Our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. Depending upon the specific business, we may be subject to regulation by government entities including:

- the U.S. Drug Enforcement Administration (the “DEA”);
- state controlled substance authorities and boards of pharmacy;
- certain agencies within the U.S. Department of Health and Human Services, including the U.S. Food and Drug Administration (the “FDA”), the Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights;
- state health departments, insurance departments, Medicaid departments or other comparable state agencies;
- the U.S. Nuclear Regulatory Commission (the “NRC”);
- the U.S. Federal Trade Commission (the "FTC");
- U.S. Customs and Border Protection; and
- agencies comparable to those listed above in markets outside the United States.

These regulatory agencies have a variety of civil, administrative and criminal sanctions at their disposal for failure to comply with applicable legal or regulatory requirements. They can suspend our ability to manufacture and distribute products, initiate product recalls, seize products or impose criminal, civil and administrative sanctions.

Distribution

The FDA, DEA and various state authorities regulate the marketing, purchase, storage and distribution of pharmaceutical and medical products under various federal and state statutes including the federal Prescription Drug Marketing Act of 1987, Drug Quality and Security Act of 2013 (the “DQSA”), and Controlled Substances Act (the "CSA"). The CSA governs the sale, packaging, storage and distribution of controlled substances. Wholesale distributors of controlled substances must hold valid DEA registrations and state-level licenses, meet various security and operating standards, and comply with the CSA.

Manufacturing and Marketing

We sell our manufactured products in the United States, Canada, Europe, Asia and other markets. The FDA and other governmental agencies in the United States, as well as foreign governmental agencies, administer requirements that cover the design, testing, safety, effectiveness, manufacturing (including good manufacturing practices), quality systems, labeling, promotion and advertising (including restrictions on promoting or advertising a product other than for the product's cleared or approved uses), distribution, importation and post-market surveillance for most of our manufactured products. In addition, we need specific approval or clearance from, and registrations with, regulatory authorities before we can market and sell some products in the United States and certain other countries, including countries in the European Union ("EU").

In the United States, authorization to commercially market a medical device is generally received in one of two ways. The first, known as pre-market notification or the 510(k) process, requires us to demonstrate that a medical device is substantially equivalent to a legally marketed medical device. The second more rigorous process, known as pre-market approval (“PMA”), requires us to independently demonstrate that a medical device is safe and effective. Many of our Medical segment products are cleared through the 510(k) process and certain Cordis products must be approved through the PMA process.

In the EU, we are required to comply with applicable Medical Device Directives ("MDDs") and obtain CE Mark Certification in order to market medical devices. The EU regulatory bodies finalized a new Medical Device Regulation ("MDR") in 2017, which replaces the existing MDDs after a three-year transition period. Among other things, the MDR clarifies that private label distributors are deemed to be the manufacturer, which will increase our regulatory obligations in the EU with respect to private label products.

It can be costly and time-consuming to obtain regulatory approvals, clearances and registrations of medical devices, and they might not be granted on a timely basis, if at all. Even after we obtain approval or clearance to market a product or obtain product registrations, the product and our manufacturing processes are subject to continued regulatory oversight, including periodic inspection of manufacturing facilities by FDA and other regulatory authorities both in the United States and internationally.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements or published standards. When we or a regulatory agency identify a quality or regulatory issue, we investigate and take appropriate corrective action, which may include recalling the product, correcting the product at the customer location, revising product labeling and notifying customers.

Nuclear Pharmacies and Related Businesses

Our nuclear pharmacies and radiopharmaceutical manufacturing facilities (including for Xofigo) require licenses or permits and must abide by regulations issued by the NRC, applicable state boards of pharmacy and the radiologic health agency or department of health of each state in which we operate, including pharmacy sterile compounding standards and practices. In addition, our radiopharmaceutical manufacturing facilities also must comply with FDA regulations, including good manufacturing practices.

Product Tracing and Supply Chain Integrity

Title II of the DQSA, known as the Drug Supply Chain Security Act, establishes a phased-in national system for tracing pharmaceutical products through the pharmaceutical distribution supply chain to prevent the introduction of counterfeit, adulterated or mislabeled drugs. The first phase of implementation began in 2015, and upon full implementation in 2023, we and other supply chain stakeholders will participate in an electronic, interoperable, prescription drug tracing system. In addition, the FDA also has issued regulations requiring most medical device labeling to bear a unique device identifier. These regulations are being phased in through 2020. The

MDR finalized in the EU in 2017 also introduces a new unique device identifier requirement with a three-year transition period.

Government Healthcare Programs

We are subject to U.S. federal healthcare fraud and abuse laws. These laws generally prohibit persons from soliciting, offering, receiving or paying any compensation in order to induce someone to order, recommend or purchase products or services that are in any way paid for by Medicare, Medicaid or other federally-funded healthcare programs. They also prohibit submitting any fraudulent claim for payment by the federal government. There are similar state healthcare fraud and abuse laws that apply to Medicaid and other state-funded healthcare programs. Violations of these laws may result in criminal or civil penalties, as well as breach of contract claims and *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments).

Some businesses within each of our segments are Medicare-certified suppliers or participate in other federal and state healthcare programs, such as state Medicaid programs and the federal 340B drug pricing program. These businesses are subject to accreditation and quality standards and other rules and regulations, including applicable reporting, billing, payment and record-keeping requirements. Other businesses within each segment manufacture pharmaceutical or medical products or repackage pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs. Failure to comply with applicable eligibility requirements, standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

Our U.S. federal and state government contracts are subject to specific procurement requirements. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

Health and Personal Information Practices

We collect, handle and maintain patient-identifiable health information. The U.S. Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as augmented by the Health Information Technology for Economic and Clinical Health Act, and state laws regulate the use and disclosure of patient-identifiable health information, including requiring specified privacy and security measures. We also collect, handle and maintain other sensitive personal and financial information that is subject to U.S. federal and state laws protecting such information.

The processing and disclosure of personal information is also highly regulated in many other countries in which we operate. In Europe, for example, we are subject to the EU data protection regulations, including the current EU Directive on Data Protection, which requires member states to impose minimum restrictions on the collection, use and transfer of personal data. A new EU General Data Protection Regulation ("GDPR") that will become effective in 2018 and will apply uniformly across the EU includes, among other things, a requirement for prompt notice of data breaches to data subjects and supervisory authorities in certain circumstances and significant fines for non-compliance. The GDPR also requires companies processing personal data of individuals residing in the EU to comply with EU privacy and data protection rules.

Antitrust Laws

The U.S. federal government, most U.S. states and many foreign countries have laws that prohibit certain types of conduct deemed to be anti-competitive. Violations of these laws can result in various sanctions, including criminal and civil penalties. Private plaintiffs also could bring civil lawsuits against us in the United States for alleged antitrust law violations, including claims for treble damages.

Environmental, Health and Safety Laws

In the United States and other countries, we are subject to various federal, state and local environmental laws, as well as laws relating to safe working conditions and laboratory practices.

Laws Relating to Foreign Trade and Operations

U.S. and foreign laws require us to abide by standards relating to the import and export of finished goods, raw materials and supplies and the handling of information. We also must comply with various export control and trade embargo laws, which may require licenses or other authorizations for transactions within some countries or with some counterparties.

Similarly, we are subject to U.S. and foreign laws concerning the conduct of our foreign operations, including the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws, the U.K. Bribery Act and other foreign anti-bribery laws. Among other things, these laws generally prohibit companies and their intermediaries from offering, promising or making payments to officials of foreign governments for the purpose of obtaining or retaining business.

Other Information

Although our agreements with manufacturers sometimes require us to maintain inventory levels within specified ranges, our distribution businesses are generally not required by our customers to maintain particular inventory levels other than as needed to meet service level requirements. Certain supply contracts with U.S. government entities require us to maintain sufficient inventory to meet emergency demands, but we do not believe those requirements materially affect inventory levels.

Our customer return policies generally require that the product be physically returned, subject to restocking fees. We only allow customers to return products that can be added back to inventory and resold at full value, or that can be returned to vendors for credit.

We offer market payment terms to our customers.

Revenue and Long-Lived Assets by Geographic Area

See Note 15 of the "Notes to Consolidated Financial Statements" for revenue and long-lived assets by geographic area.

Risk Factors

The risks described below could materially and adversely affect our results of operations, financial condition, liquidity or cash flows. These are not the only risks we face. Our businesses also could be affected by risks that we are not presently aware of or that we currently consider immaterial to our operations.

We could suffer the adverse effects of competitive pressures.
As described in greater detail in the "Business" section, we operate in markets that are highly competitive. Because of competition, our businesses face continued pricing pressure from our customers and suppliers. If we are unable to offset margin reductions caused by these pricing pressures through steps such as sourcing or cost control measures, additional service offerings and sales of higher margin products, our results of operations and financial condition could be adversely affected.

Our Pharmaceutical segment's generic pharmaceutical program could be adversely affected by pricing changes and fewer product launches.
Prices for generic pharmaceuticals generally decline over time. During fiscal 2017, generic pharmaceutical customer pricing changes negatively impacted Pharmaceutical segment profit and our consolidated operating earnings and are expected to have a similar negative effect in fiscal 2018. At times, some generic pharmaceuticals may experience price appreciation, which can positively affect our margins. The number of generic pharmaceuticals experiencing price appreciation or declines and the magnitude of pricing changes is uncertain in future fiscal years, and could adversely affect our margins.

The number of new generic pharmaceutical launches also varies from year to year, and the margin impact of these launches varies from product to product. Fewer product launches or launches that are less profitable than prior launches could adversely affect our margins.

Our generic pharmaceutical program has benefited from sourcing generic pharmaceuticals through our Red Oak Sourcing venture with CVS, which sources for both us and CVS. If the venture does not continue to be successful, our margins could be adversely affected.

Our Pharmaceutical segment's margins under our distribution services agreements with branded pharmaceutical manufacturers are affected by service fees we receive from the manufacturers and prices established by the manufacturers.
Our distribution services agreements with branded pharmaceutical manufacturers generally provide that we receive fees from the manufacturers to compensate us for the services we provide them. Under some agreements, branded pharmaceutical price appreciation also serves as part of our compensation. If our service fees are reduced or, in cases where our compensation is based in part on branded pharmaceutical price appreciation, if manufacturers determine not to increase prices or to implement only small increases, our margins could be adversely affected.

Our business is subject to rigorous regulatory and licensing requirements.
As described in greater detail in the "Business" section, our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. If we fail to comply with regulatory requirements, or if allegations are made that we fail to comply, our results of operations and financial condition could be adversely affected.

To lawfully operate our businesses, we are required to obtain and hold permits, product registrations, licenses and other regulatory approvals from, and to comply with operating and security standards of, numerous governmental bodies. For example, as a wholesale distributor of controlled substances, we must hold valid DEA registrations and state-level licenses, meet various security and operating standards, and comply with the CSA. Failure to maintain or renew necessary permits, product registrations, licenses or approvals, or to comply with required standards, could have an adverse effect on our results of operations and financial condition.

Products that we manufacture, source, distribute or market must comply with regulatory requirements. Noncompliance or concerns over noncompliance may result in suspension of our ability to distribute, import or manufacture products, product bans, recalls or seizures, or criminal or civil sanctions, which, in turn, could result in product liability claims and lawsuits, including class actions. In addition, it can be costly and time-consuming to obtain regulatory approvals or product registrations to market a medical device, and such approvals or registrations might not be granted on a timely basis, if at all.

We are required to comply with laws relating to healthcare fraud and abuse. The requirements of these laws are complex and subject to varying interpretations, and it is possible that regulatory authorities could challenge our policies and practices. If we fail to comply with these laws, we could be subject to federal or state government investigations or *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments), which could result in civil or criminal sanctions, including the loss of licenses or the ability to participate in Medicare, Medicaid and other federal and state healthcare programs. Such sanctions and damages could adversely affect our results of operations and financial condition.

Some businesses within each of our segments are Medicare-certified suppliers or participate in other federal and state healthcare programs, such as state Medicaid program and the federal 340B drug pricing program. In addition, other businesses within each segment manufacture pharmaceutical or medical products or repackage pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs. Failure to comply with applicable eligibility requirements, standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

Our government contracts are subject to specific procurement requirements. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

We collect, handle and maintain patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information. Regulations currently in place continue to evolve, and new laws in this area could further restrict our ability to collect, handle and maintain personal or patient information, or could require us to incur additional compliance costs, either of which could have an adverse impact on our results of operations. Violations of federal, state or foreign laws concerning privacy and data protection could subject us to civil or criminal penalties, breach of contract claims, costs for remediation and harm to our reputation.

Our global operations are required to comply with the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws, the U.K. Bribery Act and similar anti-bribery laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws. If we fail to comply with any of these laws, we could suffer civil or criminal sanctions.

Our China operations are subject to national, regional and local regulations. The regulatory environment in China is evolving, and officials in the Chinese government exercise broad discretion in deciding how to interpret and apply regulations. It is possible that the Chinese government's current or future interpretation and application of existing or new regulations will negatively impact our China operations, result in regulatory investigations or lead to fines or penalties.

CVS is a large customer that generates a significant amount of our revenue.
Our sales and credit concentration is significant. CVS accounted for 23 percent of our fiscal 2017 revenue and 20 percent of our gross trade receivable balance at June 30, 2017 . Our pharmaceutical distribution agreements with CVS extend through June 2019. If CVS does not renew our agreements with them, terminates the agreements due to an alleged default by us, defaults in payment or significantly reduces its purchases from us, our results of operations and financial condition could be adversely affected.

We could be subject to adverse changes in the tax laws or challenges to our tax positions.
We are a large multinational corporation with operations in the United States and many foreign countries. As a result, we are subject to the tax laws of many jurisdictions.

From time to time, legislative initiatives are proposed in the United States and other jurisdictions in which we operate that could adversely affect our tax positions, effective tax rate or tax payments. Examples of such initiatives include the repeal of the LIFO (last-in, first-out) method of inventory accounting for income tax purposes, a change in the current U.S. taxation treatment of income from foreign operations, new U.S. import tariffs or taxes, the establishment or increase in taxation at the U.S. state level on the basis of gross revenues, recommendations of the base erosion and profit shifting project undertaken by the Organization for Economic Cooperation and Development and the European Commission's investigation into illegal state aid.

Tax laws are complex and subject to varying interpretations. Tax authorities have challenged some of our tax positions and it is possible that they will challenge others. These challenges may adversely affect our effective tax rate or tax payments.

Changes to the U.S. healthcare environment may not be favorable to us.
In recent years, the U.S. healthcare industry has undergone significant changes designed to increase access to medical care, improve safety and patient outcomes, contain costs and increase efficiencies. These changes include adoption of the Patient Protection and Affordable Care Act, a general decline in Medicare and Medicaid reimbursement levels, efforts by healthcare insurance companies to limit or reduce payments to pharmacies and providers, the basis for payments beginning to transition from a fee-for-service model to value-based payments and risk-sharing models, and the industry shifting away from traditional healthcare venues like hospitals and into clinics, physician offices and patients' homes.

We expect the U.S. healthcare industry to continue to change significantly in the future. Possible changes include repeal and replacement of major parts of the Patient Protection and Affordable Care Act, further reduction or limitations on governmental funding at the state or federal level, efforts by healthcare insurance companies to further limit payments for products and services or changes in legislation or regulations governing prescription pharmaceutical pricing, healthcare services or mandated benefits. These possible changes, and the uncertainty surrounding these possible changes, may cause healthcare industry participants to reduce the amount of products and services they purchase from us or the price they are willing to pay for our products and services, which could adversely affect us.

Consolidation in the U.S. healthcare industry may negatively impact our results of operations.
In recent years, U.S. healthcare industry participants, including distributors, manufacturers, healthcare providers, insurers and pharmacy chains, have consolidated or formed strategic alliances. Consolidations create larger enterprises with greater negotiating power, and also could result in the possible loss of a customer where the combined enterprise selects one distributor from two incumbents. If this consolidation trend continues, it could adversely affect our results of operations.

Our business and operations depend on the proper functioning of information systems, critical facilities and distribution networks. Our business could be adversely affected if we experience a cyber-attack or other systems breach.
We rely on our and third-party service providers' information systems for a wide variety of critical operations, including to obtain, rapidly process, analyze and manage data to:

- facilitate the purchase and distribution of inventory items from numerous distribution centers;

- receive, process and ship orders on a timely basis;
- manage accurate billing and collections for thousands of customers;
- process payments to suppliers;
- facilitate manufacturing and assembly of medical products; and
- generate financial information.

Our business also depends on the proper functioning of our critical facilities, including our national logistics center, and our distribution networks. Our results of operations could be adversely affected if our or a service provider's information systems, critical facilities or distribution networks are disrupted (including disruption of access), are damaged or fail, whether due to physical disruptions, such as fire, natural disaster, pandemic or power outage, or due to cyber-security incidents, ransomware or other actions of third parties, including labor strikes, political unrest and terrorist attacks. Manufacturing disruptions also can occur due to regulatory action, production quality deviations, safety issues or raw material shortages or defects, or because a key product is manufactured at a single manufacturing facility with limited alternate facilities.

The Pharmaceutical segment is in a multi-year project to replace certain of its finance and operating information systems. If these new systems are not effectively implemented or they fail to operate as intended, it could adversely affect the Pharmaceutical segment's supply chain operations and our internal control over financial reporting. In addition, from time to time, other businesses perform business process improvements or infrastructure modernizations or use service providers for key systems and processes, such as receiving and processing customer orders, customer service and accounts payable. If any of these initiatives are not successfully or efficiently implemented or maintained, they could adversely affect our business and our internal control over financial reporting.

Our business relies on the secure transmission, storage and hosting of patient-identifiable health information, financial information and other sensitive information relating to our customers, company and workforce. We have programs in place to detect, contain and respond to information security incidents. However, because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or to implement adequate preventative measures. In addition, hardware, software or applications developed internally or procured from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Unauthorized parties also may attempt to gain access to our or a service provider's systems or facilities through fraud, trickery or other forms of deception. Any compromise of our or a service provider's information systems, including unauthorized access to or use or disclosure of sensitive information, could adversely impact our operations, results of operations or our ability to satisfy legal requirements, including those related to patient-identifiable health information.

We may become involved in legal proceedings that could adversely impact our cash flows or results of operations.

Due to the nature of our business, which includes the distribution of controlled substances and the manufacture of medical products, we may from time to time become involved in disputes, litigation and regulatory matters. Litigation is inherently unpredictable and the unfavorable outcome of one or more of these legal proceedings could adversely affect our results of operations or financial condition.

For example, a number of governmental entities (including counties and municipalities) have filed lawsuits against pharmaceutical wholesale distributors (including us), pharmaceutical manufacturers and retail chains relating to the distribution of prescription opioid pain medications. Some states and other governmental entities have indicated they are considering filing similar lawsuits. We are vigorously defending ourselves in these lawsuits. The defense and resolution of these current and future lawsuits could adversely affect our results of operations and financial condition. See Note 8 of the "Notes to Consolidated Financial Statements" regarding these matters.

Some of the products that we distribute or manufacture have been and may in the future be alleged to cause personal injury, subjecting us to product liability claims. For example, we are a defendant in product liability lawsuits that allege personal injuries associated with the use of Cordis OptEase and TrapEase inferior vena cava (IVC) filter products and we have accrued an amount for losses and legal defense costs related to these lawsuits, which are discussed in Note 8 of the "Notes to Consolidated Financial Statements." Any settlement of or judgment for a product liability claim that is not covered by insurance and is in excess of any prior accruals could adversely affect our results of operations and financial condition.

We also operate in an industry characterized by extensive intellectual property litigation. Patent litigation can result in significant damage awards and injunctions that could prevent the manufacture and sale of affected products or force us to make royalty payments in order to continue selling the affected products.

Acquisitions can have unanticipated results.

An important element of our growth strategy has been to acquire other businesses that expand or complement our existing businesses. In fiscal 2017 , we spent $132 million to acquire other businesses and in July 2017, we acquired the Patient Recovery Business from Medtronic for $6.1 billion . The acquisition of the Patient Recovery Business as well as other acquisitions involve the following risks: we may overpay for a business or fail to realize the synergies and other benefits we expect from the acquisition; our management's attention may be diverted to integration efforts; we may fail to retain key personnel of the acquired business; future developments may impair the value of our purchased goodwill or intangible assets; we may face difficulties or delays establishing, integrating or combining operations and systems; we may assume liabilities related to legal proceedings involving the acquired business; we may face challenges retaining the customers of the acquired business; or we may encounter unforeseen internal control, regulatory or compliance issues.

We depend on certain suppliers to make their raw materials and products available to us and are subject to fluctuations in costs of raw materials and products.

We depend on the availability of various components, compounds, raw materials and energy supplied by others for our operations. In some instances, for reasons of quality assurance, cost effectiveness, or availability, we procure certain components and raw materials from a sole supplier. Any of our supplier relationships could be interrupted due to events beyond our control, including natural disasters, or could be terminated. In addition, due to the stringent regulations and requirements of the FDA regarding the manufacture of our products, we may not be able to quickly establish additional or replacement sources for certain components or materials. A sustained supply reduction or interruption, and an inability to develop alternative sources for such supply, could have an adverse effect on our business.

Our manufacturing businesses use oil-based resins, pulp, cotton, latex and other commodities as raw materials in many products. Prices of oil and gas also affect our distribution and transportation costs. Prices of these commodities are volatile and can fluctuate significantly, causing our costs to produce and distribute our products to fluctuate. Due to competitive dynamics and contractual limitations, we may be unable to pass along cost increases through higher prices. If we cannot fully offset cost increases through other cost reductions, or recover these costs through price increases or surcharges, our results of operations could be adversely affected.

Our results of operations may suffer upon the bankruptcy, insolvency, or other credit failure of a customer that has a substantial amount owed to us.
Most of our customers buy products and services from us on credit, which is made available to customers based on our assessment of creditworthiness. The bankruptcy, insolvency or other credit failure of any customer that has a substantial amount owed to us could adversely affect our results of operations.

Recent acquisitions have increased the extent of our exposure to the economic, political and currency risks of international operations.
We conduct our operations in various regions of the world outside of the United States, including Europe and Asia. The scope and complexity of our international operations expanded with the acquisitions of Cordis and the Patient Recovery Business and we may continue to expand our operations outside the United States. Global developments can affect our business in many ways. Our global operations are affected by local economic environments, including inflation, recession and competition. In addition, we conduct our business in U.S. dollars and various functional currencies of our foreign subsidiaries. Changes in foreign currency exchange rates could adversely affect our financial results, which are reported in U.S. dollars. We may not be able to hedge to protect us against these exposures, and any hedges may not successfully mitigate these exposures. Political changes also can disrupt our global operations, as well as our customers and suppliers, in a particular location. Divergent or unfamiliar regulatory systems and labor markets also can increase the risks and burdens of operating in numerous countries.

Our goodwill may become impaired, which would require us to record a significant charge to earnings in accordance with generally accepted accounting principles.
U.S. GAAP requires us to test our goodwill for impairment on an annual basis, or more frequently if indicators for potential impairment exist. The testing required by GAAP involves estimates and judgments by management. Although we believe our assumptions and estimates are reasonable and appropriate, any changes in key assumptions, including a failure to meet business plans or other unanticipated events and circumstances such as a rise in interest rates, may affect the accuracy or validity of such estimates. We may be required to record a significant charge to earnings in our consolidated financial statements during the period in which any impairment of our goodwill is determined, which charge could adversely affect our results of operations. See "Critical Accounting Policies and Sensitive Accounting Estimates" in MD&A above for more information regarding goodwill impairment testing.

Economic conditions may adversely affect demand for our products and services.
Deterioration in general economic conditions in the United States and other countries in which we do business could adversely affect the amount of prescriptions filled and the number of medical procedures undertaken and, therefore, reduce purchases of our products and services, which could adversely affect our results of operations. In addition, deteriorating economic conditions may increase bankruptcies, insolvencies or other credit failures of customers or suppliers, which, if they have a substantial amount owed to us, also could adversely affect our results of operations.

Properties

In the United States and Puerto Rico, at June 30, 2017 , the Pharmaceutical segment operated 24 primary pharmaceutical distribution facilities and one national logistics center; six specialty distribution facilities; and more than 140 nuclear pharmacy and radiopharmaceutical manufacturing facilities. The Medical segment operated more than 70 medical-surgical distribution, assembly, manufacturing and other operating facilities in the United States and Puerto Rico. Our U.S. operating facilities are located in 45 states.

Outside the United States and Puerto Rico, at June 30, 2017 , our Medical segment operated 20 facilities in Canada, the Dominican Republic, Malaysia, Malta, Mexico and Thailand that engage in manufacturing, distribution or research. In addition, our Pharmaceutical and Medical segments utilized various distribution and pharmacy facilities in China.

At June 30, 2017 , we owned more than 70 operating facilities and leased more than 230 operating facilities around the world. Our principal executive offices are headquartered in an owned building located at 7000 Cardinal Place in Dublin, Ohio.

In connection with the acquisition of the Patient Recovery Business in July 2017, we acquired nine manufacturing facilities in the United States and eight manufacturing facilities outside the United States in Canada, Costa Rica, Germany, Ireland, Japan, Malaysia, Mexico and Thailand.

We consider our operating properties to be in satisfactory condition and adequate to meet our present needs. However, we regularly evaluate operating properties and may make further additions and improvements or consolidate locations as we seek opportunities to expand or enhance the efficiency of our business.

Legal Proceedings

The legal proceedings described in Note 8 of the "Notes to Consolidated Financial Statements" are incorporated in this "Legal Proceedings" section by reference.

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common shares are listed on the New York Stock Exchange under the symbol “CAH.” The following table reflects the range of the reported high and low closing prices of our common shares as reported on the New York Stock Exchange Composite Tape and the per share dividends declared for the fiscal years ended June 30, 2017 and 2016 and paid quarterly. It also reflects the range of the reported high and low closing prices of our common shares from July 1, 2017 through the period ended on July 31, 2017 and the per share dividends declared from July 1, 2017 through the period ended on July 31, 2017:

	High	Low	Dividends Declared
Fiscal 2016			
Quarter Ended:			
September 30, 2015	$ 87.02	$ 76.72	$ 0.3870
December 31, 2015	90.85	77.12	0.3870
March 31, 2016	89.68	76.16	0.3870
June 30, 2016	87.20	73.69	0.4489
Fiscal 2017			
Quarter Ended:			
September 30, 2016	$ 84.92	$ 75.26	$ 0.4489
December 31, 2016	76.71	65.17	0.4489
March 31, 2017	83.80	72.47	0.4489
June 30, 2017	82.71	71.18	0.4624
Fiscal 2018	$ 78.69	$ 76.29	$ —

At July 31, 2017 there were approximately 8,239 shareholders of record of our common shares.

We anticipate that we will continue to pay quarterly cash dividends in the future. The payment and amount of future dividends remain, however, within the discretion of our Board of Directors and will depend upon our future earnings, financial condition, capital requirements and other factors.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs (2)	Approximate Dollar Value of Shares That May Yet be Purchased Under the Programs (2) (in millions)
April 2017	104	$ 72.21	—	$ 443
May 2017	104	72.33	—	443
June 2017	104	75.55	—	443
Total	**312**	**$ 73.36**	—	**$ 443**

(1) Reflects 104 , 104 and 104 common shares purchased in April, May and June 2017 , respectively, through a rabbi trust as investments of participants in our Deferred Compensation Plan.

(2) On May 4, 2016, our Board of Directors approved a $1.0 billion share repurchase program that expires on December 31, 2019. During the three months ended June 30, 2017 , we repurchased no common shares under this program. We have $443 million available under this program.

Market for Registrant's Common Equity

Five Year Performance Graph

The following line graph compares the cumulative total return of our common shares with the cumulative total return of the Standard & Poor's Composite—500 Stock Index (the "S&P 500 Index") and the Standard & Poor's Composite—500 Healthcare Index (the "S&P 500 Healthcare Index"). The line graph assumes, in each case, an initial investment of $100 on June 30, 2012, based on the market prices at the end of each fiscal year through and including June 30, 2017 , and reinvestment of dividends. The S&P 500 Index and S&P 500 Healthcare Index investments are weighted on the basis of market capitalization at the beginning of each period.

	June 30					
	2012	2013	2014	2015	2016	**2017**

Management Reports

Evaluation of Disclosure Controls and Procedures

We evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of June 30, 2017 . Based on this evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of June 30, 2017 to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Our internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, controls deemed effective now may become inadequate in the future because of changes in conditions, or because compliance with policies or procedures has deteriorated or been circumvented.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2017 . In making this assessment, management used the criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria"). Based on management's assessment and the COSO criteria, management believes that our internal control over financial reporting was effective as of June 30, 2017 .

Our independent registered public accounting firm, Ernst & Young LLP, has issued a report on our internal control over financial reporting. Ernst & Young LLP's report appears following this "Management Reports" section and expresses an unqualified opinion on the effectiveness of our internal control over financial reporting.

Changes in Internal Control Over Financial Reporting

The Pharmaceutical segment is in a multi-year project to replace certain finance and operating information systems, which is affecting internal control over financial reporting. During the quarter ended June 30, 2017, we continued to transition selected processes to the new systems. If these new systems are not effectively implemented or fail to operate as intended, it could adversely affect our internal control over financial reporting. Except for the changes made in connection with implementing the new systems described above, there were no changes in our internal control over financial reporting during the quarter ended June 30, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Reports

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

The Board of Directors and Shareholders of Cardinal Health, Inc.

We have audited Cardinal Health, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2017 , based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Cardinal Health, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying “Management's Report on Internal Control Over Financial Reporting.” Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cardinal Health, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of June 30, 2017 , based on the COSO criteria .

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cardinal Health, Inc. and subsidiaries as of June 30, 2017 and 2016 and the related consolidated statements of earnings, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended June 30, 2017 of Cardinal Health, Inc. and subsidiaries and our report dated August 10, 2017 expressed an unqualified opinion thereon.

Columbus, Ohio

August 10, 2017

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Cardinal Health, Inc.

We have audited the accompanying consolidated balance sheets of Cardinal Health, Inc. and subsidiaries as of June 30, 2017 and 2016 , and the related consolidated statements of earnings, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended June 30, 2017 . Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cardinal Health, Inc. and subsidiaries at June 30, 2017 and 2016 , and the consolidated results of their operations and their cash flows for each of the three years in the period ended June 30, 2017 , in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cardinal Health, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2017 , based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated August 10, 2017 expressed an unqualified opinion thereon.

Cash payments for interest	**$ 200**	$ 174	$ 150
Cash payments for income taxes	**686**	635	529

The accompanying notes are an integral part of these consolidated statements.

Notes to Consolidated Financial Statements

1. Basis of Presentation and Summary of Significant Accounting Policies

Cardinal Health, Inc. is a global, integrated healthcare services and products company providing customized solutions for hospitals, healthcare systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices. The company provides medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home. Cardinal Health, Inc. connects patients, providers, payers, pharmacists, and manufacturers for integrated care coordination and better patient management. References to “we”, “our” and similar pronouns in these consolidated financial statements are to Cardinal Health, Inc. and its majority-owned or controlled subsidiaries unless the context otherwise requires.

Our fiscal year ends on June 30. References to fiscal 2017 , 2016 and 2015 in these consolidated financial statements are to the fiscal years ended June 30, 2017 , 2016 and 2015 , respectively.

Basis of Presentation

Our consolidated financial statements include the accounts of all majority-owned or controlled subsidiaries, and all significant intercompany transactions and amounts have been eliminated. To conform to the current year presentation, certain prior year amounts have been reclassified. The results of businesses acquired or disposed of are included in the consolidated financial statements from the date of the acquisition or up to the date of disposal, respectively.

Use of Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of financial statements in accordance with GAAP requires us to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Estimates, judgments and assumptions are used in the accounting and disclosure related to, among other items, allowance for doubtful accounts, inventory valuation, business combinations, goodwill and other intangible asset impairment, vendor reserves, loss contingencies, self-insurance accruals, income taxes and share-based compensation. Actual amounts could ultimately differ from these estimated amounts.

Cash Equivalents

We consider liquid investments purchased with an initial maturity of three months or less to be cash equivalents. The carrying value of cash equivalents approximates fair value.

Receivables and Allowance for Doubtful Accounts

Trade receivables are presented net of an allowance for doubtful accounts of $137 million and $135 million at June 30, 2017 and 2016 , respectively. An account is considered past due on the first day after its due date. In accordance with contract terms, we generally have the ability to charge customers service fees or higher prices if an account is considered past due. We regularly monitor past due accounts and establish appropriate reserves to cover potential losses, which are based primarily on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

We provide financing to various customers. Such financing arrangements range from 1 year to 5 years at interest rates that are generally subject to fluctuation. Interest income on these arrangements is recognized as it is earned. The financings may be collateralized, guaranteed by third parties or unsecured. Finance notes and related accrued interest were $171 million (current portion $53 million) and $145 million (current portion $31 million) at June 30, 2017 and 2016 , respectively, and are included in other assets (current portion is included in prepaid expenses and other) in the consolidated balance sheets. Finance notes receivable allowance for doubtful accounts were $9 million and $19 million at June 30, 2017 and 2016 , respectively. We estimate an allowance for these financing receivables based on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

Concentrations of Credit Risk

We maintain cash depository accounts with major banks, and we invest in high quality, short-term liquid instruments, and in marketable securities. Our short-term liquid instruments mature within three months and we have not historically incurred any related losses. Investments in marketable debt securities consist of a portfolio of high-grade instruments. Such investments are made only in instruments issued by highly-rated institutions, whose financial condition we monitor.

Our trade receivables and finance notes and related accrued interest are exposed to a concentration of credit risk with customers in the retail and healthcare sectors. Credit risk can be affected by changes in reimbursement and other economic pressures impacting the healthcare industry. Such credit risk is limited due to supporting collateral and the diversity of the customer base, including its wide geographic dispersion. We perform regular credit evaluations of our customers’ financial conditions and maintain reserves for losses through the established allowance for doubtful accounts. Historically, such losses have been within our expectations. Refer to the "Receivables and Allowance for Doubtful Accounts" section within this Note for additional information on the accounting treatment of reserves for allowance for doubtful accounts.

Major Customers

CVS Health Corporation ("CVS") and OptumRx, which are primarily serviced through our Pharmaceutical segment, are our only customers that individually account for at least 10 percent of revenue and gross trade receivables.

The table below summarizes historical percent of revenue and gross trade receivables from CVS and OptumRx.

	Percent of Revenue			Percent of Gross Trade Receivables at June 30	
	2017	2016	2015	**2017**	2016
CVS	**23%**	25%	27%	**20%**	22%
OptumRx	**11%**	7%	0%	**1%**	1%

Our pharmaceutical distribution contract with OptumRx began in fiscal 2016 and did not exceed 10 percent until fiscal 2017 .

We have entered into agreements with group purchasing organizations (“GPOs”) which act as purchasing agents that negotiate vendor contracts on behalf of their members. Vizient, Inc. and Premier, Inc. are our two largest GPO member relationships in terms of revenue. Sales to members of these two GPOs collectively accounted for 21 percent , 17 percent and 18 percent of revenue for fiscal 2017 , 2016 and 2015 , respectively. Our trade receivable balances are with individual members of the GPO, and therefore no significant concentration of credit risk exists with these types of arrangements.

Inventories

A substantial portion of our inventories (56 percent and 58 percent at June 30, 2017 and 2016 , respectively) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These inventories are included within the core pharmaceutical distribution facilities of our Pharmaceutical segment (“distribution facilities”) and are primarily merchandise inventories. The LIFO method presumes that the most recent inventory purchases are the first items sold, so LIFO helps us better match current costs and revenue. We believe that the average cost method of inventory valuation provides a reasonable approximation of the current cost of replacing inventory within the distribution facilities. As such, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation.

If we had used the average cost method of inventory valuation for all inventory within the distribution facilities, the value of our inventories would not have changed in fiscal 2017 or 2016 because inventories valued at LIFO were $46 million and $9 million higher than the average cost value at June 30, 2017 and 2016 , respectively. We do not record inventories in excess of replacement cost. As such, we did not record any changes in our LIFO reserve in fiscal 2017 and 2016 .

Our remaining inventory that is not valued at the lower of LIFO or market is stated at the lower of cost, using the first-in, first-out method, or market. Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $76 million and $79 million at June 30, 2017 and 2016 , respectively. We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory and age of on-hand inventory.

Cash Discounts

Manufacturer cash discounts are recorded as a component of inventory cost and recognized as a reduction of cost of products sold when the related inventory is sold.

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Property and equipment held for sale are recorded at the lower of cost or fair value less cost to sell. When certain events or changes in operating conditions occur, an impairment assessment may be performed on the recoverability of the carrying amounts.

Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets, including capital lease assets which are depreciated over the terms of their respective leases. We generally use the following range of useful lives for our property and equipment categories: buildings and improvements— 3 to 39 years ; machinery and equipment— 3 to 20 years ; and furniture and fixtures— 3 to 7 years . We recorded depreciation expense of $314 million , $277 million and $254 million for fiscal 2017 , 2016 and 2015 , respectively.

The following table presents the components of property and equipment, net at June 30:

(in millions)		**2017**		2016
Land, building and improvements	**$**	**1,637**	$	1,735
Machinery and equipment		**2,860**		2,608
Furniture and fixtures		**130**		133
Total property and equipment, at cost		**4,627**		4,476
Accumulated depreciation and amortization		**(2,748)**		(2,680)
Property and equipment, net	**$**	**1,879**	$	1,796

Repairs and maintenance expenditures are expensed as incurred. Interest on long-term projects is capitalized using a rate that approximates the weighted-average interest rate on long-term obligations, which was 3 percent at June 30, 2017 . The amount of capitalized interest was immaterial for all periods presented.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. The excess of the purchase price over the estimated fair value of the identifiable net assets acquired is recorded as goodwill. We base the fair values of identifiable intangible assets on detailed valuations that require management to make significant judgments, estimates and assumptions. Critical estimates and assumptions include: expected future cash flows for customer relationships, trade names and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. When an acquisition involves contingent consideration, we recognize a liability equal to the fair value of the contingent consideration obligation at the acquisition date. The estimate of fair value of a contingent consideration obligation requires subjective assumptions to be made regarding future business results, discount rates, discount periods and probabilities assigned to various potential business result scenarios. See Note 2 for additional information regarding our acquisitions.

Goodwill and Other Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment annually or when indicators of impairment exist.

Goodwill impairment testing involves a comparison of the estimated fair value of reporting units to the respective carrying amount, which may be performed utilizing either a qualitative or quantitative assessment. A reporting unit is defined as an operating segment or one level below an operating segment (also known as a component). Goodwill impairment testing involves judgment, including the identification of reporting units and the estimation of the fair value of each reporting unit and, if necessary, the estimation of the implied fair value of goodwill.

We have two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. These operating segments are comprised of divisions (components), for which discrete financial information is available. Components are aggregated into reporting units for purposes of goodwill impairment testing to the extent that they share similar economic characteristics. Our reporting units are: Pharmaceutical operating segment (excluding our Nuclear Pharmacy Services division and Cardinal Health China - Pharmaceutical division); Nuclear Pharmacy Services division; Cardinal Health China - Pharmaceutical division; Medical operating segment (excluding our Cardinal Health at Home division and naviHealth division); Cardinal Health at Home division; and naviHealth division.

Fair value can be determined using market, income or cost-based approaches. Our determination of estimated fair value of the reporting units is based on a combination of the income-based and market-based approaches. Under the income-based approach, we use a discounted cash flow model in which cash flows anticipated over several future periods, plus a terminal value at the end of that time horizon, are discounted to their present value using an appropriate risk-adjusted rate of return. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for each reporting unit. Actual results may differ materially from those used in our forecasts. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Discount rates used in our reporting unit valuations ranged from 8.5 percent to 12.5 percent . Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets. To further confirm fair value, we compare the aggregate fair value of our reporting units to our total market capitalization. Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including forecasted operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment.

We performed annual impairment testing in fiscal 2017 , 2016 and 2015 and concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value.

The impairment test for indefinite-lived intangibles other than goodwill (primarily in-process research and development ("IPR&D")) consists of a comparison of the fair value of the indefinite-lived intangible asset to the carrying value of the asset as of the impairment testing date. If the carrying amount of the indefinite-lived intangible exceeds its fair value, an impairment loss must be recognized in an amount equal to that excess. We estimate the fair value of our indefinite-lived intangibles under the income approach using a discounted cash flow model. We use our internal forecasts, which we believe are consistent with those of a market participant, to estimate future cash flows and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for the indefinite-lived intangible including, among other factors, assumptions on regulatory approval for IPR&D.

Intangible assets with finite lives, primarily customer relationships; trademarks, trade names and patents; and developed technology, are amortized using a combination of straight-line and accelerated methods based on the expected cash flows from the asset over their estimated useful lives. We review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment loss occurred requires a comparison of the carrying amount to the sum of the future forecasted undiscounted cash flows expected to be generated by the asset group. Actual results may differ materially from those used in our forecasts.

Investments

Investments in non-marketable equity securities are accounted for under either the cost or equity method of accounting and are included in other assets in the consolidated balance sheets. For investments in which we can exercise significant influence, we use the equity method of accounting. Our share of the earnings and losses was immaterial, both individually and in the aggregate, for all periods presented and is recorded in other income, net in the consolidated statements of the earnings. We monitor investments for other-than-temporary impairment by considering factors such as the operating performance of the investment and current economic and market conditions.

Marketable securities are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Unrealized gains and losses on available-for-sale securities, net of applicable taxes, are included within shareholders' equity in accumulated other comprehensive income ("AOCI"). We monitor these securities for other-than-temporary impairment by considering factors such as the duration that, and the extent to which, the fair value is below cost, the operating performance and credit worthiness of the issuer of the securities and current economic and market conditions. See Note 5 for additional information regarding available-for-sale securities.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputes are researched and resolved based upon the findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the type of claim and status of review. Though the claim types are relatively consistent, we periodically refine our methodology by updating the reserve estimate percentages to reflect actual historical experience. The ultimate outcome of certain claims may be different than our original estimate and may require an adjustment. All adjustments to vendor reserves are included in cost of products sold. In addition, the reserve balance will fluctuate due to variations of outstanding claims from period-to-period, timing of settlements and specific vendor issues, such as bankruptcies. Vendor reserves were $50 million and $62 million at June 30, 2017 and 2016 , respectively, excluding third-party returns. See separate section within this Note for a description of third-party returns.

Distribution Services Agreement and Other Vendor Fees

Our Pharmaceutical segment recognizes fees received from distribution services agreements and other fees received from vendors related to the purchase or distribution of the vendors' inventory when those fees have been earned and we are entitled to payment. Since the benefit provided to a vendor is related to the purchase and distribution of the vendor's inventory, we recognize the fees as a reduction in the carrying value of the inventory that generated the fees, and as such, a reduction of cost of products sold in our consolidated statements of earnings when the inventory is sold.

Loss Contingencies and Self-Insurance

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We also self-insure for employee healthcare, general liability, certain product liability matters, auto liability, property and workers' compensation. Self-insurance accruals include an estimate for expected settlements or pending claims, defense costs, administrative fees, claim adjustment costs and an estimate for claims incurred but not reported. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies and other liabilities is highly subjective and requires judgments about future events. We regularly review contingencies and our self-insurance accruals to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates. See Note 8 for additional information regarding loss contingencies and product liability lawsuits.

Income Taxes

We account for income taxes using the asset and liability method. Deferred tax assets and liabilities are measured using enacted tax rates in the respective jurisdictions in which we operate. Deferred taxes are not provided on the unremitted earnings of subsidiaries outside of the United States when it is expected that these earnings are permanently reinvested.

Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation processes. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement. See Note 7 for additional information regarding income taxes.

Other Accrued Liabilities

Other accrued liabilities represent various current obligations, including certain accrued operating expenses and taxes payable.

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests represent the portion of net earnings, comprehensive income and net assets that is not attributable to Cardinal Health, Inc.

The redeemable noncontrolling interests relate to our ownership interest in naviHealth Holdings, LLC ("naviHealth"), which we acquired during fiscal 2016. The redeemable noncontrolling interests are redeemable at the option of the third-party noncontrolling interest holders at any time after the two-year anniversary of the closing, or earlier if a trigger event occurs. As such, the noncontrolling interests have been presented as redeemable noncontrolling interests in our consolidated balance sheets. The noncontrolling interests will be adjusted each period for net earnings and dividends attributable to the noncontrolling interests and changes in the noncontrolling ownership interests, if any. An additional adjustment to the carrying value of the noncontrolling interests may be required if the redemption value under the terms of the agreement exceeds the carrying value. Changes in the carrying value of the noncontrolling interests related to a change in the redemption value will be recorded through retained earnings and will not affect net earnings attributable to Cardinal Health, Inc. See Note 2 and Note 12 for additional information regarding redeemable noncontrolling interests.

Share-Based Compensation

Share-based compensation provided to employees is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The fair value of stock options is determined on the grant date using a lattice valuation model. The fair value of restricted share units and performance share units is determined by the grant date market price of our common shares. The compensation expense associated with nonvested performance share units is dependent on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. The compensation expense recognized for share-based awards is net of estimated forfeitures and is recognized ratably over the service period of the awards. We classify share-based compensation expense in distribution, selling, general and administrative ("SG&A") expenses to correspond with the same line item as the majority of the cash compensation paid to employees. If awards are modified in connection with a restructuring activity, the incremental share-based

compensation expense is classified in restructuring and employee severance. See Note 16 for additional information regarding share-based compensation.

Dividends

We paid cash dividends per common share of $1.80 , $1.55 and $1.37 in fiscal 2017 , 2016 and 2015 , respectively.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, product delivery has occurred or the services have been rendered, the price is fixed or determinable, and collectability is reasonably assured.

Pharmaceutical Segment

The Pharmaceutical segment recognizes distribution revenue when title transfers to its customers and we have no further obligation to provide services related to such merchandise.

Revenue for deliveries that are directly shipped to customers from the manufacturer when we act as an intermediary in the ordering and delivery of products is recorded gross. This is in accordance with accounting standards addressing reporting revenue on a gross basis as a principal versus on a net basis as an agent. This revenue is recorded on a gross basis since we incur credit risk from the customer, bear the risk of loss for incomplete shipments and do not receive a separate fee or commission for the transaction and, as such, are the primary obligor. Revenue from these sales is recognized when title transfers to the customer and we have no further obligation to provide services related to such merchandise.

Radiopharmaceutical revenue is recognized upon delivery of the product to the customer and we have no further obligation to provide services related to such merchandise.

Medical Segment

The Medical segment recognizes revenue when title transfers to its customers and we have no further obligation to provide services related to such products.

Sales Returns and Allowances

Revenue is recorded net of sales returns and allowances. Our customer return policies generally require that the product be physically returned, subject to restocking fees, in a condition suitable to be added back to inventory and resold at full value, or returned to vendors for credit (“merchantable product”). Product returns are generally consistent throughout the year and typically are not specific to any particular product or customer.

We accrue for estimated sales returns and allowances at the time of sale based upon historical customer return trends, margin rates and processing costs. Our accrual for sales returns is reflected as a reduction of revenue and cost of products sold for the sales price and cost, respectively. At June 30, 2017 and 2016 , the accrual for estimated sales returns and allowances was $347 million and $386 million , respectively, the impact of which is reflected in trade receivables, net and inventories, net in the consolidated balance sheets. Sales returns and allowances were $2.3 billion , $2.2 billion and $2.0 billion , for fiscal 2017 , 2016 and 2015 , respectively.

Third-Party Returns

Since we generally do not accept non-merchantable product returns from our customers, many of our customers return non-merchantable pharmaceutical products to the manufacturer through third parties. Since our customers generally do not have a direct relationship with manufacturers, our vendors pass the value of such returns to us (usually in the form of an accounts payable deduction) for distribution to customers. We, in turn, pass the value received, less an administrative fee, to our customer. In certain instances, we pass the estimated value of the return to our customer prior to our receipt of the value from the vendor. Although we believe we have satisfactory protections, we could be subject to claims from customers or vendors if our administration of this overall process was deficient in some respect or our contractual terms with vendors are in conflict with our contractual terms with our customers. We have maintained reserves for some of these situations based on their nature and our historical experience with their resolution.

Shipping and Handling

Shipping and handling costs are primarily included in SG&A expenses in our consolidated statements of earnings. Shipping and handling costs include all delivery expenses as well as all costs to prepare the product for shipment to the end customer. Shipping and handling costs were $496 million , $504 million and $454 million , for fiscal 2017 , 2016 and 2015 , respectively. Revenue received for shipping and handling was immaterial for all periods presented.

Restructuring and Employee Severance

We consider restructuring activities to be programs by which we fundamentally change our operations, such as closing and consolidating facilities, changing the way we manufacture or distribute our products, moving manufacturing of a product to another location, changes in production or business process sourcing, employee severance (including rationalizing headcount or other significant changes in personnel) and realigning operations (including realignment of the management structure of a business unit in response to changing market conditions). See Note 3 for additional information regarding our restructuring activities.

Amortization and Other Acquisition-Related Costs

We classify certain costs incurred in connection with acquisitions as amortization and other acquisition-related costs in our consolidated statements of earnings. These costs consist of amortization of acquisition-related intangible assets, transaction costs, integration costs and changes in the fair value of contingent consideration obligations. Transaction costs are incurred during the initial evaluation of a potential acquisition and primarily relate to costs to analyze, negotiate and consummate the transaction as well as due diligence activities. Integration costs relate to activities required to combine the operations of an acquired enterprise into our operations and, in the case of the Cordis business, to stand-up the systems and processes needed to support its global footprint. We record changes in the fair value of contingent consideration obligations relating to acquisitions as income or expense in amortization and other acquisition-related costs. See Note 4 for additional information regarding amortization of acquisition-related intangible assets and

Note 10 for additional information regarding contingent consideration.

Translation of Foreign Currencies

Financial statements of our subsidiaries outside the United States are generally measured using the local currency as the functional currency. Adjustments to translate the assets and liabilities of these foreign subsidiaries into U.S. dollars are accumulated in shareholders' equity through AOCI utilizing period-end exchange rates. Revenues and expenses of these foreign subsidiaries are translated using average exchange rates during the year.

The foreign currency translation gains/(losses) included in AOCI at June 30, 2017 and 2016 are presented in Note 13 . Foreign currency transaction gains and losses for the period are included in the consolidated statements of earnings in their respective financial statement line item.

Interest Rate, Currency and Commodity Risk

All derivative instruments are recognized at fair value on the consolidated balance sheets and all changes in fair value are recognized in net earnings or shareholders' equity through AOCI, net of tax.

For contracts that qualify for hedge accounting treatment, the hedge contracts must be effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the contract. Hedge effectiveness is assessed periodically. Any contract not designated as a hedge, or so designated but ineffective, is adjusted to fair value and recognized immediately in net earnings. If a fair value or cash flow hedge ceases to qualify for hedge accounting treatment, the contract continues to be carried on the balance sheet at fair value until settled and future adjustments to the contract's fair value are recognized immediately in net earnings. If a forecasted transaction is probable not to occur, amounts previously deferred in AOCI are recognized immediately in net earnings. See Note 11 for additional information regarding our derivative instruments, including the accounting treatment for instruments designated as fair value, cash flow and economic hedges.

Fair Value Measurements

Fair value is defined as the price that would be received upon selling an asset or the price paid to transfer a liability on the measurement date. It focuses on the exit price in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants. A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair values are:

Level 1 - Observable prices in active markets for identical assets and liabilities.

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities.

See Note 10 for additional information regarding fair value measurements.

Recent Financial Accounting Standards

In May 2017, the Financial Accounting Standards Board ("FASB") issued final guidance that clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. Entities will apply the modification accounting guidance if the value, vesting conditions or classification of the award changes. This guidance will be effective for us in the first quarter of fiscal 2019 and the impact of this new guidance is dependent on future events.

In February 2017, the FASB clarified the guidance on how to account for the derecognition of nonfinancial assets (e.g., real estate, land, buildings, intangibles) and in-substance nonfinancial assets once an entity adopts the new revenue recognition guidance that is discussed in more detail in this section below. The guidance also defines what constitutes an in-substance nonfinancial asset. This guidance will be effective for us in the first quarter of fiscal 2019. We are currently evaluating the impact of this standard on our consolidated financial statements.

In January 2017, the FASB issued amended accounting guidance that simplifies the accounting for goodwill impairment by eliminating the step of measuring a goodwill impairment by estimating the implied fair value of goodwill. Instead, goodwill impairment will be measured as the amount by which the reporting unit's carrying value exceeds its fair value, limited to the carrying value of the goodwill. This guidance will be effective for us in the first quarter of fiscal 2021, with early adoption permitted. We are currently evaluating the timing of adoption. The impact of this new guidance is dependent on future events.

Also in January 2017, the FASB issued new accounting guidance that changes the definition of a business when evaluating whether a set of transferred assets and activities is considered a business. This guidance will be effective for us in the first quarter of fiscal 2019, with early adoption permitted. We are currently evaluating the timing of adoption. The impact of adoption is dependent on future events.

In November 2016, the FASB issued amended accounting guidance on the presentation of restricted cash and restricted cash equivalents in the statement of cash flows. The guidance requires an entity to include restricted cash and restricted cash equivalents with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. This amendment will be effective for us in the first quarter of fiscal 2019, with early adoption permitted. We are currently evaluating the timing of adoption and the impact of this standard on our consolidated financial statements.

In October 2016, the FASB issued amended accounting guidance that requires an entity to recognize the income tax effect of intercompany sales and transfers of assets other than inventory at the time that the transfer occurs rather than when the asset is sold

to a third party. This amendment will be effective for us in the first quarter of fiscal 2019. We are currently evaluating the impact of this standard on our consolidated financial statements.

In August 2016, the FASB issued accounting guidance which clarifies the classification of certain cash receipts and cash payments in the statement of cash flows, including those related to contingent consideration payments made after a business combination, distributions received from equity method investees, debt prepayment or debt extinguishment costs and proceeds from the settlement of insurance claims. This guidance will be effective for us in the first quarter of fiscal 2019. We are currently evaluating the impact of this standard on our consolidated financial statements.

In June 2016, the FASB issued amended accounting guidance that will require entities to measure credit losses on trade and other receivables, held-to-maturity debt securities, loans and other instruments using an "expected credit loss" model that considers historical experience, current conditions and reasonable supportable forecasts. This guidance also requires that credit losses on available-for-sale debt securities with unrealized losses be recognized as allowances rather than as deductions in the amortized cost of the securities. This guidance will be effective for us in the first quarter of fiscal 2021. We are currently evaluating the impact of adoption on our consolidated financial statements.

In March 2016, the FASB issued amended accounting guidance that will change the accounting for certain aspects of share-based compensation to employees. The guidance requires all income tax effects of share-based awards to be recognized in the statement of earnings as awards vest or are settled. Additionally, the guidance increases the amount employers can withhold in shares to cover employee income taxes without requiring liability classification and allows a policy election for accounting for forfeitures. We anticipate the primary impact of the adoption will result in the recognition of excess tax benefits in the income statement on a prospective basis, rather than as a component of equity, and therefore we expect to recognize an immaterial discrete tax benefit or expense in income tax expense on our consolidated financial statements upon adoption in the first quarter of fiscal 2018. The inclusion of excess tax benefits and deficiencies as a component of our income tax expense will increase volatility within our provision for income taxes as the amount of excess tax benefits or deficiencies from share-based compensation awards depends on our stock price at the date the awards vest.

In February 2016, the FASB issued amended accounting guidance that requires lessees to recognize most leases on the balance sheet as a lease liability and corresponding right-of-use asset. This guidance will be effective for us in the first quarter of fiscal 2020, with early adoption permitted. We are currently evaluating the impact of the adoption on our consolidated financial statements.

In July 2015, the FASB issued amended accounting guidance that simplifies the current guidance surrounding the measurement of inventory. Under this amended guidance, inventory is measured at the lower of cost and net realizable value, which eliminates the need to determine replacement cost and evaluate whether the inventory is above or below net realizable value. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amended guidance does not apply to inventory measured under the LIFO method. We adopted this guidance in the fourth quarter of fiscal 2017. The adoption of this guidance did not impact our consolidated financial statements.

In April 2015, the FASB issued amended accounting guidance that clarifies the circumstances under which a cloud computing customer would account for the arrangement as a license of internal-use software. If it is determined that a software license does not exist in the arrangement, the customer would account for this arrangement as a service contract. We adopted this guidance in the first quarter of fiscal 2017. The adoption of this guidance did not have a material impact on our financial position or results of operations.

Also in April 2015, the FASB issued amended accounting guidance related to the presentation of debt issuance costs in the financial statements. This guidance requires an entity to present such costs in the balance sheet as a direct deduction from the related debt rather than as an asset. We adopted this guidance in the first quarter of fiscal 2017. Upon adoption of this guidance, debt issuance costs of $29 million were reclassified from other assets to long-term obligations, less current portion within the consolidated balance sheet.

In August 2014, the FASB issued amended accounting guidance related to uncertainties about an entity's ability to continue as a going concern. This guidance requires management to evaluate whether there is substantial doubt about a company's ability to continue as a going concern. We adopted this guidance in the fourth quarter of fiscal 2017. The adoption of this guidance did not impact our financial statement disclosures.

In May 2014, the FASB issued amended accounting guidance related to revenue recognition. This guidance is based on the principle that revenue is recognized in an amount that reflects the consideration to which an entity expects to be entitled in exchange for the transfer of goods or services to customers. The guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The FASB also subsequently issued several amendments to the standard, including clarification on principal versus agent considerations, performance obligations and licensing, and certain scope improvements and practical expedients.

We continue to make progress on our evaluation of the amended guidance, including identification of revenue streams and customer contract reviews. Our revenue is primarily distribution revenue, which we recognize at a point in time when title transfers to customers and we have no further obligation to provide services related to such merchandise. Although we are continuing to assess the impact of the amended guidance, we generally anticipate that the timing of recognition of distribution revenue will be substantially unchanged under the amended guidance.

The amended guidance will be effective for us in the first quarter of fiscal 2019 and permits adoption under either the full retrospective

approach (recognize effects of the amended guidance in each prior reporting period presented) or the modified retrospective approach (recognize the cumulative effect of adoption as an adjustment to retained earnings at the date of initial application). We are still evaluating our method of adoption.

2. Acquisitions

While we have completed acquisitions impacting the Pharmaceutical segment during fiscal 2017 , the pro forma results of operations and the results of operations for acquired businesses since the acquisition dates have not been separately disclosed because the effects were not significant compared to the consolidated financial statements, individually or in the aggregate. The cash paid for these acquisitions, net of cash acquired, was $ 132 million . During the three months ended June 30, 2017 , we completed the largest of these acquisitions for a purchase price of approximately $ 80 million , which was paid in cash, and potential maximum contingent payments of $ 230 million . As of June 30, 2017 , we recorded a $19 million contingent consideration obligation in connection with this acquisition.

Cordis

On October 2, 2015 , we acquired Cordis from Ethicon, Inc., a wholly-owned subsidiary of Johnson & Johnson, for $1.9 billion using cash on hand and proceeds from our debt offering in June 2015 . The acquisition of Cordis, a global manufacturer and distributor of interventional cardiology devices and endovascular solutions with operations in more than 50 countries, expands our Medical segment's portfolio of self-manufactured products and its geographic scope. We closed the Cordis acquisition in 20 principal countries on October 2, 2015 , and acquired control of, as described in GAAP, and the rights to, the net economic benefit from the entire Cordis business in the remaining countries at that time.

Transaction and integration costs associated with the acquisition of Cordis were $61 million and $78 million during fiscal 2017 and 2016 , respectively, and are included in amortization and other acquisition-related costs in the consolidated statements of earnings.

naviHealth

On August 26, 2015 , we acquired a 71 percent ownership interest in naviHealth for $238 million , net of cash acquired of $53 million . We funded the acquisition with cash on hand. The acquisition of naviHealth, a leader in post-acute care management solutions, expands our ability to serve hospitals, other healthcare providers, and payers. We consolidate the results of naviHealth in our consolidated financial statements and report its consolidated results in our Medical segment. The terms of the agreement provide us with the option to acquire any remaining noncontrolling interests at any time after the two -year anniversary of the closing. The third-party noncontrolling interest holders also hold an option, which allows them to sell their noncontrolling interests to us at any time after the two-year anniversary of the closing, or earlier if a trigger event occurs. Refer to Note 12 for further information on the redeemable noncontrolling interests. We also completed acquisitions within naviHealth during fiscal 2016 for $242 million , which were paid in cash and increased our ownership interest to 82 percent .

Harvard Drug

On July 2, 2015 , we completed the acquisition of The Harvard Drug Group ("Harvard Drug") for $1.1 billion using cash on hand and proceeds from our debt offering in June 2015 . The acquisition of Harvard Drug, a distributor of generic pharmaceuticals, over-the-counter healthcare and related products to retail, institutional, and alternate care customers, enhances our Pharmaceutical segment's generic pharmaceutical distribution and related services businesses. Harvard Drug also repackages generic pharmaceuticals and over-the-counter healthcare products.

Fair Value of Assets Acquired and Liabilities Assumed

The allocation of the fair value of assets acquired and liabilities assumed for the acquisitions of Cordis, Harvard Drug and naviHealth were finalized during the fiscal year ended June 30, 2017 .

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed as of the acquisition dates for Cordis, naviHealth and Harvard Drug:

(in millions)	Cordis	naviHealth	Harvard Drug
Identifiable intangible assets:			
Customer relationships (1)	$ 225	$ 38	$ 470
Trade names (2)	125	16	130
Developed technology (3)	395	61	—
In-process research and development (4)	55	—	—
Total identifiable intangible assets acquired	800	115	600
Cash and equivalents	—	53	44
Trade receivables	—	31	67
Inventories	205	—	49
Prepaid expenses and other	4	14	11
Property and equipment	97	5	16
Other assets	44	1	—
Accounts payable	(82)	(2)	(47)
Other accrued liabilities	(85)	(95)	(37)
Deferred income taxes and other liabilities	(13)	(33)	(188)
Redeemable noncontrolling interests	—	(119)	—
Total identifiable net assets/(liabilities) acquired	970	(30)	515
Goodwill	914	321	634
Total net assets acquired	**$ 1,884**	**$ 291**	**$ 1,149**

(1) The weighted-average useful lives of customer relationships range from 4 to 13 years.

(2) The weighted-average useful lives of trade names range from 10 to 20 years.

(3) The weighted-average useful life of developed technology is 10 years.

(4) Acquired in-process research and development intangible assets have an indefinite life.

3. Restructuring and Employee Severance

The following tables summarize restructuring and employee severance costs:

(in millions)	2017	2016	2015
Employee-related costs (1)	$ 51	$ 15	$ 34
Facility exit and other costs (2)	5	10	10
Total restructuring and employee severance	**$ 56**	$ 25	$ 44

(1) Employee-related costs primarily consist of termination benefits provided to employees who have been involuntarily terminated and duplicate payroll costs during transition periods.

(2) Facility exit and other costs primarily consist of lease termination costs, accelerated depreciation, equipment relocation costs, project consulting fees and costs associated with restructuring our delivery of information technology infrastructure services.

The following table summarizes activity related to liabilities associated with restructuring and employee severance:

(in millions)	Employee-Related Costs	Facility Exit and Other Costs	Total
Balance at June 30, 2015	$ 22	$ —	**$ 22**
Additions	17	2	**19**
Payments and other adjustments	(24)	(1)	**(25)**
Balance at June 30, 2016	15	1	**16**
Additions	43	1	**44**
Payments and other adjustments	(17)	(2)	**(19)**
Balance at June 30, 2017	**$ 41**	**$ —**	**$ 41**

4. Goodwill and Other Intangible Assets

Goodwill

The following table summarizes the changes in the carrying amount of goodwill by segment and in total:

(in millions)	Pharmaceutical (1)	Medical	Total
Balance at June 30, 2015	$ 2,199	$ 2,871	**$ 5,070**
Goodwill acquired, net of purchase price adjustments	738	1,382	**2,120**
Foreign currency translation adjustments and other	(18)	(5)	**(23)**
Balance at June 30, 2016	2,919	0 4,248	**7,167**
Goodwill acquired, net of purchase price adjustments	29	35	**64**
Foreign currency translation adjustments and other	(9)	(1)	**(10)**
Balance at June 30, 2017	**$ 2,939**	**$ 4,282**	**$ 7,221**

(1) At June 30, 2017 the accumulated goodwill impairment loss was $829 million .

The increase in the Pharmaceutical segment goodwill during fiscal 2017 is due to acquisitions. Goodwill recognized in connection with acquisitions primarily represents the expected benefits from synergies of integrating this business, the existing workforce of the acquired entity and the expected growth from new customers.

The increase in the Medical segment goodwill during fiscal 2017 is primarily due to the Cordis acquisition. During fiscal 2017, we recorded additional goodwill for Cordis, substantially all of which was to increase an accrual for assumed pre-acquisition product liability lawsuits. The majority of the goodwill acquired in connection with the acquisition of Cordis is deductible for tax purposes. See Note 8 for further discussion of the product liability lawsuits.

See Note 2 for further discussion of these acquisitions.

Other Intangible Assets

The following tables summarize other intangible assets by class at June 30:

	2017			
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible	Weighted-Average Remaining Amortization Period (Years)
Indefinite-life intangibles:				
IPR&D, trademarks and other	**$ 61**	**$ —**	**$ 61**	**N/A**
Total indefinite-life intangibles	**61**	**—**	**61**	**N/A**
Definite-life intangibles:				
Customer relationships	**1,966**	**967**	**999**	**9**
Trademarks, trade names, and patents	**509**	**195**	**314**	**14**
Developed technology and other	**916**	**304**	**612**	**10**
Total definite-life intangibles	**3,391**	**1,466**	**1,925**	**10**
Total other intangible assets	**$ 3,452**	**$ 1,466**	**$ 1,986**	**N/A**

	2016		
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible
Indefinite-life intangibles:			
IPR&D, trademarks and other	$ 72	$ —	$ 72
Total indefinite-life intangibles	72	—	72
Definite-life intangibles:			
Customer relationships	1,946	737	1,209
Trademarks, trade names, and patents	508	140	368
Developed technology and other	808	198	610
Total definite-life intangibles	3,262	1,075	2,187
Total other intangible assets	$ 3,334	$ 1,075	$ 2,259

Total amortization of intangible assets was $395 million , $355 million and $191 million for fiscal 2017 , 2016 and 2015 , respectively. The estimated annual amortization for intangible assets, excluding intangible assets that may be added as a result of acquisitions that had not yet closed as of June 30, 2017, for fiscal 2018 through 2022 is as follows: $370 million , $301 million , $270 million , $219 million and $195 million .

5. Available-for-Sale Securities

We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. We held the following investments in marketable securities at fair value at June 30:

(in millions)	2017	2016
Current available-for-sale securities:		
Commercial paper	$ —	$ —
Treasury bills	25	3
International bonds	3	2
Corporate bonds	30	58
U.S. agency bonds	3	6
Asset-backed securities	3	28
International equity securities	1	2
U.S. agency mortgage-backed securities	—	14
Total current available-for-sale securities	65	113
Long-term available-for-sale securities:		
Treasury bills	—	10
International bonds	—	1
Corporate bonds	—	36
U.S. agency bonds	—	9
Asset-backed securities	—	17
U.S. agency mortgage-backed securities	—	14
Total long-term available-for-sale securities	—	87
Total available-for-sale securities	$ 65	$ 200

Gross unrealized gains and losses were immaterial at both June 30, 2017 and 2016 . During fiscal 2017 , 2016 and 2015 gross realized gains and losses were immaterial and we did not recognize any other-than-temporary-impairments. At June 30, 2017 , the weighted-average effective maturity of our current investments is approximately 7 months .

6. Long-Term Obligations and Other Short-Term Borrowings

The following table summarizes long-term obligations and other short-term borrowings at June 30:

(in millions) (1)	2017	2016
1.9% Notes due 2017	$ —	$ 251
1.7% Notes due 2018	400	405
1.95% Notes due 2018	547	554
1.948% Notes due 2019	996	—
2.4% Notes due 2019	453	461
4.625% Notes due 2020	519	528
2.616% Notes due 2022	1,142	—
3.2% Notes due 2022	248	253
Floating Rate Notes due 2022	347	—
3.2% Notes due 2023	544	549
3.079% Notes due 2024	744	—
3.5% Notes due 2024	396	398
3.75% Notes due 2025	481	505
3.410% Notes due 2027	1,340	—
4.6% Notes due 2043	346	349
4.5% Notes due 2044	341	345
4.9% Notes due 2045	445	450
4.368% Notes due 2047	594	—
7.8% Debentures due 2016	—	37
7.0% Debentures due 2026	124	124
Other obligations	388	330
Total	10,395	5,539
Less: current portion of long-term obligations and other short-term borrowings	1,327	587
Long-term obligations, less current portion	$ 9,068	$ 4,952

(1) Maturities are presented on a calendar year basis.

Maturities of existing long-term obligations and other short-term borrowings for fiscal 2018 through 2022 and thereafter are as follows: $1,327 million , $998 million , $454 million , $521 million , $1,738 million and $5,357 million .

Long-Term Debt

All the notes represent unsecured obligations of Cardinal Health, Inc. and rank equally in right of payment with all of our existing and future unsecured and unsubordinated indebtedness. The 7.0% and 7.8% Debentures represent unsecured obligations of Allegiance Corporation (a wholly-owned subsidiary), which Cardinal Health, Inc. has guaranteed. None of these obligations are subject to a sinking fund and the Allegiance obligations are not redeemable prior to maturity. Interest is paid pursuant to the terms of the obligations. These notes are effectively subordinated to the liabilities of our subsidiaries, including trade payables of $17.9 billion .

In June 2017, we issued additional debt with the aggregate principal amount of $5.2 billion to fund a portion of the acquisition of the Patient Care, Deep Vein Thrombosis and Nutritional Insufficiency businesses (the " Patient Recovery Business ") from Medtronic plc ("Medtronic"),

which closed on July 29, 2017 , to redeem the 1.7% Notes due 2018 and for general corporate purposes. The notes issued in conjunction with the acquisition are 1.948% Notes due 2019, 2.616% Notes due 2022, 3.079% Notes due 2024, 3.410% Notes due 2027, 4.368% Notes due 2047, and floating rate Notes due 2022. The amount of the notes issued net of discounts, premiums, mark-to-market of any interest rate swaps and debt issuance costs was $5.2 billion . We also had obtained a commitment letter in April 2017 from a financial institution for a $4.5 billion unsecured bridge term loan facility that could have been used to complete the acquisition of the Patient Recovery Business. We incurred fees related to the facility, which are included in interest expense, net. No amounts were drawn under the bridge term loan facility and we terminated the commitment letter in June 2017.

In June 2015, we sold $550 million aggregate principal amount of 1.95% Notes that mature on June 15, 2018, $500 million aggregate principal amount of 3.75% Notes that mature on September 15, 2025, and $450 million aggregate principal amount of 4.9% Notes that mature on September 15, 2045. We used the net proceeds from the offering to pay part of the purchase price to acquire Harvard Drug on July 2, 2015 and Cordis on October 2, 2015 , as discussed further in Note 2 .

In November 2014, we sold $450 million aggregate principal amount of 2.4% Notes that mature on November 15, 2019, $400 million aggregate principal amount of 3.5% Notes that mature on November 15, 2024 and $350 million aggregate principal amount of 4.5% Notes that mature on November 15, 2044.

In December 2014, we redeemed certain outstanding notes at a redemption price equal to 100% of the principal amount and any accrued but unpaid interest, plus the applicable make-whole premium. As a result of the redemption, we incurred a loss on the extinguishment of debt of $60 million ($37 million , net of tax), which included a make-whole premium of $80 million , write-off of $2 million of unamortized debt issuance costs, and an offsetting $22 million fair value adjustment to the respective debt related to previously terminated interest rate swaps.

If we undergo a change of control, as defined in the notes, and if the notes receive specified ratings below investment grade by each of Standard & Poors Ratings Services, Moody's Investors Services and Fitch Ratings, any holder of the notes, excluding the debentures, can require with respect to the notes owned by such holder, or we can offer, to repurchase the notes at 101% of the principal amount plus accrued and unpaid interest.

Other Financing Arrangements

In addition to cash and equivalents and operating cash flow, other sources of liquidity include a $1.75 billion revolving credit facility and a $700 million committed receivables sales facility program. In November 2016, we renewed our committed receivables sales facility program through Cardinal Health Funding, LLC ("CHF") through November 1, 2019. CHF was organized for the sole purpose of buying receivables and selling undivided interests in those receivables to third-party purchasers. Although consolidated with Cardinal Health, Inc. in accordance with GAAP, CHF is a separate legal entity from Cardinal Health, Inc. and from our subsidiary that sells receivables to CHF. CHF is designed to be a special purpose, bankruptcy-remote entity whose assets are available solely to satisfy the claims of its creditors.

We also maintain a commercial paper program, backed by our revolving credit facility, which we increased in December 2015 from $1.5 billion to $1.75 billion . At June 30, 2017 , we had no amounts outstanding under the revolving credit facility; however, availability was reduced by outstanding letters of credit of $20 million and $14 million at June 30, 2017 and 2016 , respectively. We also had no amounts outstanding under the committed receivables sales facility program; however, availability was reduced by outstanding standby letters of credit of $46 million and $40 million at June 30, 2017 and 2016 , respectively. Under our commercial paper program, we had a maximum amount outstanding of $855 million and an average daily amount outstanding of $58 million during the fiscal year ended June 30, 2017 . We had no amount outstanding as of June 30, 2017 .

Our revolving credit facility and committed receivables sales facility program require us to maintain a consolidated leverage ratio of no more than 3.25 -to-1. As a result of the acquisition of the Patient Recovery Business, we temporarily increased this ratio to 4.25 -to-1. As of June 30, 2017 , we were in compliance with these financial covenants.

We also maintain other short-term credit facilities and an unsecured line of credit that allowed for borrowings up to $690 million and $699 million at June 30, 2017 and 2016 , respectively. The $388 million and $330 million balance of other obligations at June 30, 2017 and 2016 , respectively, consisted of short-term borrowings and capital leases.

7. Income Taxes

The following table summarizes earnings from continuing operations before income taxes:

(in millions)	2017	2016	2015
U.S. operations	$ 1,772	$ 2,050	$ 1,733
Non-U.S. operations	152	226	234
Earnings from continuing operations before income taxes	$ 1,924	$ 2,276	$ 1,967

The following table summarizes the components of provision for income taxes from continuing operations:

(in millions)	2017	2016	2015
Current:			
Federal	$ 273	$ 633	$ 424
State and local	10	52	83
Non-U.S.	56	73	29
Total current	$ 339	$ 758	$ 536
Deferred:			
Federal	$ 258	$ 96	$ 196
State and local	37	12	24
Non-U.S.	(4)	(21)	(1)
Total deferred	291	87	219
Provision for income taxes	$ 630	$ 845	$ 755

The following table presents a reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate from continuing operations:

	2017	2016	2015
Provision at federal statutory rate	**35.0 %**	35.0 %	35.0 %
State and local income taxes, net of federal benefit	**1.0**	1.5	4.1
Foreign tax rate differential	**(0.2)**	(0.6)	(2.4)
Nondeductible/nontaxable items	**0.2**	1.0	0.7
Other	**(3.3)**	0.2	1.0
Effective income tax rate	**32.7 %**	37.1 %	38.4 %

At June 30, 2017 , we had $700 million of undistributed earnings from non-U.S. subsidiaries that are intended to be permanently reinvested in non-U.S. operations. Because these earnings are considered permanently reinvested, no U.S. tax provision has been accrued related to the repatriation of these earnings. It is not practicable to estimate the amount of U.S. tax that might be payable on the eventual remittance of such earnings. This amount decreased from the prior year due to the realignment of foreign subsidiaries in anticipation of closing the acquisition of the Patient Recovery Business.

Deferred income taxes arise from temporary differences between financial reporting and tax reporting bases of assets and liabilities and operating loss and tax credit carryforwards for tax purposes. The following table presents the components of the deferred income tax assets and liabilities at June 30:

(in millions)	2017	2016
Deferred income tax assets:		
Receivable basis difference	**$ 42**	$ 44
Accrued liabilities	**125**	133
Share-based compensation	**53**	56
Loss and tax credit carryforwards	**378**	193
Deferred tax assets related to uncertain tax positions	**51**	95
Other	**43**	46
Total deferred income tax assets	**692**	567
Valuation allowance for deferred income tax assets	**(237)**	(93)
Net deferred income tax assets	**$ 455**	$ 474
Deferred income tax liabilities:		
Inventory basis differences	**$ (1,578)**	$ (1,351)
Property-related	**(183)**	(172)
Goodwill and other intangibles	**(570)**	(607)
Total deferred income tax liabilities	$ (2,331)	$ (2,130)
Net deferred income tax liability	**$ (1,876)**	$ (1,656)

Deferred income tax assets and liabilities in the preceding table, after netting by taxing jurisdiction, are in the following captions in the consolidated balance sheets at June 30:

(in millions)	2017	2016
Noncurrent deferred income tax asset (1)	**73**	42
Noncurrent deferred income tax liability (2)	**(1,949)**	(1,698)
Net deferred income tax liability	**$ (1,876)**	$ (1,656)

(1) Included in other assets in the consolidated balance sheets.

(2) Included in deferred income taxes and other liabilities in the consolidated balance sheets.

At June 30, 2017 we had gross federal, state and international loss and credit carryforwards of $225 million , $1,406 million and $590 million , respectively, the tax effect of which is an aggregate deferred tax asset of $378 million . Substantially all of these carryforwards are available for at least three years. Approximately $223 million of the valuation allowance at June 30, 2017 applies to certain federal, state and international loss carryforwards that, in our opinion, are more likely than not to expire unutilized. However, to the extent that tax benefits related to these carryforwards are realized in the future, the reduction in the valuation allowance would reduce income tax expense. The increase in international loss carryforwards and valuation allowances are due to the realignment of foreign subsidiaries in anticipation of closing the acquisition of the Patient Recovery Business.

We had $417 million , $527 million and $542 million of unrecognized tax benefits at June 30, 2017 , 2016 and 2015 , respectively. The June 30, 2017 , 2016 and 2015 balances include $268 million , $355 million and $357 million , respectively, of unrecognized tax benefits that, if recognized, would have an impact on the effective tax rate. The remaining unrecognized tax benefits relate to tax positions for which ultimate deductibility is highly certain but for which there is uncertainty as to the timing of such deductibility. Recognition of these tax benefits would not affect our effective tax rate. We include the full amount of unrecognized tax benefits in deferred income taxes and other liabilities in the consolidated balance sheets. The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

(in millions)	2017	2016	2015
Balance at beginning of fiscal year	**$ 527**	$ 542	$ 510
Additions for tax positions of the current year	**29**	22	15
Additions for tax positions of prior years	**23**	42	69
Reductions for tax positions of prior years	**(8)**	(48)	(42)
Settlements with tax authorities	**(154)**	(30)	(10)
Expiration of the statute of limitations	**—**	(1)	—
Balance at end of fiscal year	**$ 417**	$ 527	$ 542

It is reasonably possible that there could be a change in the amount of unrecognized tax benefits within the next 12 months due to activities of the U.S. Internal Revenue Service ("IRS") or other taxing authorities, possible settlement of audit issues, reassessment of existing unrecognized tax benefits or the expiration of statutes of

limitations. We estimate that the range of the possible change in unrecognized tax benefits within the next 12 months is a net decrease of $0 million to $45 million , exclusive of penalties and interest.

We recognize accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes. At June 30, 2017 , 2016 and 2015 , we had $99 million , $145 million and $169 million , respectively, accrued for the payment of interest and penalties. These balances are gross amounts before any tax benefits and are included in deferred income taxes and other liabilities in the consolidated balance sheets. During fiscal 2017 and 2015 , we recognized $12 million and $24 million of expense for interest and penalties in income tax expense, respectively. During fiscal 2016 , we recognized $9 million of benefit for interest and penalties in income tax expense.

We file income tax returns in the U.S. federal jurisdiction, various U.S. state and local jurisdictions, and various foreign jurisdictions. During the twelve months ended June 30, 2017 , the IRS closed audits of fiscal years 2006 and 2007, which is reflected in our consolidated financial statements and in our evaluation of uncertain tax positions. The settlement had an immaterial impact to our provision for income taxes. With few exceptions, we are subject to audit by taxing authorities for fiscal years 2008 through the current fiscal year.

We are a party to a tax matters agreement with CareFusion Corporation ("CareFusion"), which has been acquired by Becton, Dickinson and Company. Under the tax matters agreement, CareFusion is obligated to indemnify us for certain tax exposures and transaction taxes prior to our fiscal 2010 spin-off of CareFusion. The indemnification receivable was $142 million and $172 million at June 30, 2017 and 2016 , respectively, and is included in other assets in the consolidated balance sheets.

8. Commitments, Contingent Liabilities and Litigation

Commitments

Operating Leases

The future minimum rental payments for operating leases having initial or remaining non-cancelable lease terms in excess of one year at June 30, 2017 for fiscal 2018 through 2022 and thereafter are as follows: $110 million , $94 million , $77 million , $59 million , $41 million and $107 million . Rental expense relating to operating leases was $159 million , $126 million and $104 million in fiscal 2017 , 2016 and 2015 , respectively. Sublease rental income was immaterial for all periods presented.

Generic Sourcing Venture With CVS Health Corporation

In July 2014 , we established Red Oak Sourcing, LLC ("Red Oak Sourcing"), a U.S.-based generic pharmaceutical sourcing venture with CVS for an initial term of 10 years . Red Oak Sourcing negotiates generic pharmaceutical supply contracts on behalf of both companies. Due to the achievement of predetermined milestones, we are required to make quarterly payments of $45.6 million to CVS for the remainder of the initial term.

Legal Proceedings

We become involved from time to time in disputes, litigation and regulatory matters.

We may be named from time to time in *qui tam* actions initiated by private third parties. In such actions, the private parties purport to act on behalf of federal or state governments, allege that false claims have been submitted for payment by the government and may receive an award if their claims are successful. After a private party has filed a *qui tam* action, the government must investigate the private party's claim and determine whether to intervene in and take control over the litigation. These actions may remain under seal while the government makes this determination. If the government declines to intervene, the private party may nonetheless continue to pursue the litigation on his or her own purporting to act on behalf of the government.

From time to time, we become aware through employees, internal audits or other parties of possible compliance matters that we investigate internally, such as complaints or concerns relating to accounting, internal accounting controls, financial reporting, auditing, or other ethical matters or relating to compliance with laws such as healthcare fraud and abuse, anti-corruption or anti-bribery laws. In addition, from time to time, we receive subpoenas or requests for information from various government agencies relating to our business or to the business of a customer, supplier or other industry participants. Internal investigations, subpoenas or requests for information could lead to the assertion of claims or the commencement of legal proceedings against us or result in sanctions.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements, or published standards. When we or a regulatory agency identify a quality or regulatory issue, we investigate and take appropriate corrective action. Such actions can lead to product recalls, costs to repair or replace affected products, temporary interruptions in product sales, action by regulators and product liability claims and lawsuits, including class actions. Even absent an identified regulatory or quality issue or product recall, we can become subject to product liability claims and lawsuits.

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review contingencies to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates.

We recognize income from the favorable outcome of litigation when we receive the associated cash or assets.

We recognize estimated loss contingencies for certain litigation and regulatory matters, including mass tort product liability claims, and income from favorable resolution of litigation in litigation (recoveries)/charges, net in our consolidated statements of earnings.

State of West Virginia vs. Cardinal Health, Inc.

In January 2017, we agreed , without admitting liability, to pay $20 million to the State of West Virginia to settle a lawsuit filed against us by the West Virginia Attorney General in June 2012. As previously

disclosed, the West Virginia Attorney General had filed complaints in the Circuit Court of Boone County, West Virginia against a number of pharmaceutical wholesale distributors, including us, alleging, among other things, that, between 2007 and 2012, the distributors had failed to maintain effective controls to guard against diversion of controlled substances in West Virginia and had failed to report suspicious orders of controlled substances in accordance with the West Virginia Uniform Controlled Substances Act.

Opioid Lawsuits

As of August 8, 2017, 26 counties and municipalities in New York, Ohio, Oregon and West Virginia, as well as the Cherokee Nation, have filed lawsuits against pharmaceutical wholesale distributors (including us), pharmaceutical manufacturers and retail chains relating to the distribution of prescription opioid pain medications. The lawsuits, which have been filed in various federal, state and other courts, allege violations of controlled substance laws and various other statutes as well as common law claims, including negligence, public nuisance and unjust enrichment, and seek equitable relief and monetary damages. We are vigorously defending ourselves in these lawsuits. Since these lawsuits are at early stages, we are unable to predict the outcome of these lawsuits or estimate a range of reasonably possible losses.

Product Liability Lawsuits

As of August 8, 2017, we are named as a defendant in 68 product liability lawsuits filed in Alameda County Superior Court in California involving claims by approximately 750 plaintiffs that allege personal injuries associated with the use of Cordis OptEase and TrapEase inferior vena cava (IVC) filter products. Another 8 similar lawsuits involving claims by approximately 10 plaintiffs are pending in other jurisdictions. These lawsuits seek a variety of remedies, including unspecified monetary damages. We are vigorously defending ourselves in these lawsuits.

In fiscal 2017, we recorded an accrual of $79 million ($53 million , net of tax) for estimated losses and legal defense costs as an adjustment to pre-acquisition liabilities assumed in the Cordis acquisition. We record additional accruals for losses and legal defense costs as litigation (recoveries)/charges, net in our consolidated statements of earnings. At June 30, 2017, we had a total of $98 million , net of expected insurance recoveries, accrued for losses and legal defense costs related to the Cordis IVC filter lawsuits, which includes the $79 million accrual referenced above. While we have recorded accruals based on our assessment of these matters, because these lawsuits are at early stages, we are unable to estimate a range of reasonably possible losses in excess of this accrued amount.

Antitrust Litigation Proceeds

We received and recognized income resulting from settlements of class action antitrust lawsuits, in which we were a class member, of $1 million , $80 million and $71 million during fiscal 2017 , 2016 and 2015 , respectively.

9. Guarantees

In the ordinary course of business, we agree to indemnify certain other parties under acquisition and disposition agreements, customer agreements, intellectual property licensing agreements, and other agreements. Such indemnification obligations vary in scope and, when defined, in duration. In many cases, a maximum obligation is not explicitly stated, and therefore the overall maximum amount of the liability under such indemnification obligations cannot be reasonably estimated. Where appropriate, such indemnification obligations are recorded as a liability. Historically, we have not, individually or in the aggregate, made payments under these indemnification obligations in any material amounts. In certain circumstances, we believe that existing insurance arrangements, subject to the general deduction and exclusion provisions, would cover portions of the liability that may arise from these indemnification obligations. In addition, we believe that the likelihood of a material liability being triggered under these indemnification obligations is not probable.

From time to time we enter into agreements that obligate us to make fixed payments upon the occurrence of certain events. Such obligations primarily relate to obligations arising under acquisition transactions, where we have agreed to make payments based upon the achievement of certain financial performance measures by the acquired business. Generally, the obligation is capped at an explicit amount. See Note 10 for detail regarding contingent consideration obligations.

10. Fair Value Measurements

The following tables present the fair values for assets and (liabilities) measured on a recurring basis at June 30:

	2017			
(in millions)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents	$ 739	$ —	$ —	$ 739
Forward contracts (1)	—	(21)	—	(21)
Available-for-sale securities (2)	—	65	—	65
Other investments (3)	116	—	—	116
Liabilities:				
Contingent consideration (4)	—	—	(32)	(32)

	2016			
(in millions)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents	$ 516	$ —	$ —	$ 516
Forward contracts (1)	—	19	—	19
Available-for-sale securities (2)	—	200	—	200
Other investments (3)	103	—	—	103
Liabilities:				
Contingent consideration (4)	—	—	(19)	(19)

(1) The fair value of interest rate swaps, foreign currency contracts and commodity contracts is determined based on the present value of expected future cash flows considering the risks involved, including non-performance risk, and using discount rates appropriate for the respective maturities. Observable Level 2 inputs are used to determine the present value of expected future cash flows. The fair value of these derivative contracts, which are subject to master netting arrangements under certain circumstances, is presented on a gross basis in the consolidated balance sheets.

(2) We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Observable Level 2 inputs such as quoted prices for similar securities, interest rate spreads, yield curves and credit risk are used to determine the fair value. See Note 5 for additional information regarding available-for-sale securities.

(3) Level 1 other investments balance includes investments in mutual funds, which are used to offset fluctuations in deferred compensation liabilities. These mutual funds primarily invest in the equity securities of companies with large market capitalization and high quality fixed income debt securities. The fair value of these investments is determined using quoted market prices.

(4) Contingent consideration represents the obligations incurred in connection with acquisitions. We do not deem the fair value of the contingent consideration obligations under any single acquisition to be significant. The estimate of fair value of the contingent consideration obligations requires subjective assumptions to be made regarding future business results, discount rates, discount periods, and probabilities assigned to various potential business result scenarios and was determined using probability assessments with respect to the likelihood of reaching various targets or of achieving certain milestones. The fair value measurement is based on significant inputs unobservable in the market and thus represents a Level 3 measurement. Changes in current expectations of progress could change the probability of achieving the targets within the measurement periods and result in an increase or decrease in the fair value of the contingent consideration obligation.

The following table presents those liabilities measured at fair value on a recurring basis using unobservable inputs (Level 3):

(in millions)	Contingent Consideration Obligation
Balance at June 30, 2015	$ 53
Additions from acquisitions	7
Changes in fair value of contingent consideration (1)	(16)
Payment of contingent consideration	(25)
Balance at June 30, 2016	19
Additions from acquisitions	21
Changes in fair value of contingent consideration (1)	(5)
Payment of contingent consideration	(3)
Balance at June 30, 2017	**$ 32**

(1) Amount is included in amortization and other acquisition-related costs in the consolidated statements of earnings.

11. Financial Instruments

We utilize derivative financial instruments to manage exposure to certain risks related to our ongoing operations. The primary risks managed through the use of derivative instruments include interest rate risk, currency exchange risk, and commodity price risk. We do not use derivative instruments for trading or speculative purposes. While the majority of our derivative instruments are designated as hedging instruments, we also enter into derivative instruments that are designed to hedge a risk, but are not designated as hedging instruments. These derivative instruments are adjusted to current fair value through earnings at the end of each period.

We are exposed to counterparty credit risk on all of our derivative instruments. Accordingly, we have established and maintain strict counterparty credit guidelines and only enter into derivative instruments with major financial institutions that are investment grade or better. We do not have significant exposure to any one counterparty and we believe the risk of loss is remote. Additionally, we do not require collateral under these agreements.

Interest Rate Risk Management

We are exposed to the impact of interest rate changes. Our objective is to manage the impact of interest rate changes on cash flows and the market value of our borrowings. We utilize a mix of debt maturities along with both fixed-rate and variable-rate debt to manage changes in interest rates. In addition, we enter into interest rate swaps to further manage our exposure to interest rate variations related to our borrowings and to lower our overall borrowing costs.

Currency Exchange Risk Management

We conduct business in several major international currencies and are subject to risks associated with changing foreign exchange rates. Our objective is to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus its attention on business operations. Accordingly, we enter into various contracts that change in value as foreign exchange rates change to protect the value of existing foreign currency assets and liabilities, commitments and anticipated foreign currency revenue and expenses.

Commodity Price Risk Management

We are exposed to changes in the price of certain commodities. Our objective is to reduce earnings and cash flow volatility associated with forecasted purchases of these commodities to allow management to focus its attention on business operations. Accordingly, we enter into derivative contracts when possible to manage the price risk associated with certain forecasted purchases.

The following table summarizes the fair value of our assets and liabilities related to derivatives designated as hedging instruments and the respective line items in which they were recorded in the consolidated balance sheets at June 30:

(in millions)	2017	2016
Assets:		
Foreign currency contracts (1)	$ 3	$ 1
Pay-floating interest rate swaps (2)	—	33
Pay-floating interest rate swaps (1)	—	1
Total assets	$ 3	$ 35
Liabilities:		
Foreign currency contracts (3)	$ 2	$ 3
Forward interest rate swaps (4)	—	10
Pay-floating interest rate swaps (3)	2	—
Pay-floating interest rate swaps (4)	19	—
Commodity contracts (3)	1	2
Commodity contracts (4)	—	1
Total liabilities	$ 24	$ 16

(1) Included in prepaid expenses and other in the consolidated balance sheets.
(2) Included in other assets in the consolidated balance sheets.
(3) Included in other accrued liabilities in the consolidated balance sheets.
(4) Included in deferred income taxes and other liabilities in the consolidated balance sheets.

Fair Value Hedges

We enter into pay-floating interest rate swaps to hedge the changes in the fair value of fixed-rate debt resulting from fluctuations in interest rates. These contracts are designated and qualify as fair value hedges. Accordingly, the gain or loss recorded on the pay-floating interest rate swaps is directly offset by the change in fair value of the underlying debt. Both the derivative instrument and the underlying debt are adjusted to market value at the end of each period with any resulting gain or loss recorded in interest expense, net in the consolidated statements of earnings.

During fiscal 2017 and 2016 we entered into pay-floating interest rate swaps with total notional amounts of $700 million and $600 million , respectively. These swaps have been designated as fair value hedges of our fixed rate debt and are included in deferred income taxes and other liabilities in the consolidated balance sheets.

During fiscal 2017 and 2016 we terminated notional amounts of $600 million and $250 million , respectively, of pay-floating interest rate swaps that were previously designated as fair value hedges. In June 2017, $250 million of pay-floating interest rate swaps matured.

The following tables summarize the outstanding interest rate swaps designated as fair value hedges at June 30:

	2017	
(in millions)	Notional Amount	Maturity Date
Pay-floating interest rate swaps	$ 1,813	Jun 2018 - Sep 2025

	2016	
(in millions)	Notional Amount	Maturity Date
Pay-floating interest rate swaps	$ 1,963	Jun 2017 - Sep 2025

The following table summarizes the gain/(loss) recognized in earnings for interest rate swaps designated as fair value hedges:

(in millions)	2017	2016	2015
Pay-floating interest rate swaps (1) (2)	$ 17	$ 23	$ 14
Fixed-rate debt (1)	(17)	(23)	(14)

(1) Included in interest expense, net in the consolidated statements of earnings.
(2) Fiscal 2015 excludes $22 million fair value adjustment to the previously terminated interest rate swaps as a result of the December 2014 debt extinguishment as disclosed in Note 6 .

There was no ineffectiveness associated with these derivative instruments for any periods presented.

Cash Flow Hedges

We enter into derivative instruments to hedge our exposure to changes in cash flows attributable to interest rate, foreign currency and commodity price fluctuations associated with certain forecasted transactions. These derivative instruments are designated and qualify as cash flow hedges. Accordingly, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction and in the same period during which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative instrument is recognized in earnings immediately.

During fiscal 2017 and 2016 we entered into forward interest rate swaps with a total notional amount of $700 million and $300 million , respectively, to hedge probable, but not firmly committed, future transactions associated with our debt.

Additionally, during fiscal 2017 we terminated $1.0 billion in forward interest rate swaps that were previously designated as cash-flow hedges. At June 30, 2017 , we had no outstanding forward interest rate swaps.

We enter into foreign currency contracts to protect the value of anticipated foreign currency revenues and expenses. At June 30, 2017 and 2016 , we held contracts to hedge probable, but not firmly committed, revenue and expenses. The principal currencies hedged are the Canadian dollar, Euro, Thai baht, Mexican peso and Chinese renminbi.

We enter into commodity contracts to manage the price risk associated with forecasted purchases of certain commodities used in our Medical segment.

The following tables summarize the outstanding cash flow hedges at June 30:

	2017	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	**162**	**Jul 2017 - Jun 2018**
Commodity contracts	**17**	**Jul 2017 - Apr 2020**

	2016	
(in millions)	Notional Amount	Maturity Date
Forward interest rate swaps	$ 300	Jun 2018 - Jun 2028
Foreign currency contracts	183	Jul 2016 - Jun 2017
Commodity contracts	22	Jul 2016 - Mar 2019

The following table summarizes the gain/(loss) included in AOCI for derivative instruments designated as cash flow hedges at June 30:

(in millions)	2017	2016
Forward interest rate swaps	**$ —**	$ (10)
Commodity contracts	**(1)**	(3)
Foreign currency contracts	**—**	(4)

The following table summarizes the gain/(loss) reclassified from AOCI into earnings for derivative instruments designated as cash flow hedges:

(in millions)	2017	2016	2015
Foreign currency contracts (1)	**$ (1)**	$ 1	$ 1
Foreign currency contracts (2)	**(1)**	5	4
Foreign currency contracts (3)	**2**	(3)	(2)
Commodity contracts (3)	**(3)**	(5)	(1)

(1) Included in revenue in the consolidated statements of earnings.

(2) Included in cost of products sold in the consolidated statements of earnings.

(3) Included in SG&A expenses in the consolidated statements of earnings.

The amount of ineffectiveness associated with these derivative instruments was immaterial for all periods presented.

Economic (Non-Designated) Hedges

We enter into foreign currency contracts to manage our foreign exchange exposure related to intercompany financing transactions and other balance sheet items subject to revaluation that do not meet the requirements for hedge accounting treatment. Accordingly, these derivative instruments are adjusted to current market value at the end of each period through earnings. The gain or loss recorded on these instruments is substantially offset by the remeasurement adjustment on the foreign currency denominated asset or liability. The settlement of the derivative instrument and the remeasurement adjustment on the foreign currency denominated asset or liability are both recorded in other (income)/expense, net. The principal currencies managed through foreign currency contracts are the Canadian dollar, Euro, Thai baht, British pound and Chinese renminbi.

The following tables summarize the outstanding economic (non-designated) derivative instruments at June 30:

	2017	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	**$ 558**	**Jul 2017**

	2016	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 492	Jul 2016

The following table summarizes the gain/(loss) recognized in earnings for economic (non-designated) derivative instruments:

(in millions)	2017	2016	2015
Foreign currency contracts (1)	**$ (5)**	$ (17)	$ (45)

(1) Included in other income, net in the consolidated statements of earnings.

Fair Value of Financial Instruments

The carrying amounts of cash and equivalents, trade receivables, net, accounts payable, and other accrued liabilities at June 30, 2017 and 2016 approximate fair value due to their short-term maturities.

The following table summarizes the estimated fair value of our long-term obligations and other short-term borrowings compared to the respective carrying amounts at June 30:

(in millions)	2017	2016
Estimated fair value	**$ 10,713**	$ 5,780
Carrying amount	**10,395**	5,539

The fair value of our long-term obligations and other short-term borrowings is estimated based on either the quoted market prices for the same or similar issues or other inputs derived from available market information, which represents a Level 2 measurement.

The following table is a summary of the fair value gain/(loss) of our derivative instruments based upon the estimated amount that we would receive (or pay), considering counter-party credit risk, to terminate the contracts at June 30:

	2017		2016	
(in millions)	Notional Amount	Fair Value Gain/(Loss)	Notional Amount	Fair Value Gain/(Loss)
Pay-floating interest rate swaps	**$ 1,813**	**$ (19)**	$ 1,963	$ 34
Foreign currency contracts	**720**	**1**	675	(2)
Forward interest rate swaps	**—**	**—**	300	(10)
Commodity contracts	**17**	**(1)**	22	(3)

12. Redeemable Noncontrolling Interests

In connection with the acquisition of a 71 percent ownership interest in naviHealth during fiscal 2016 as described in Note 2 , we recognized redeemable noncontrolling interests with a fair value of $119 million at the acquisition date. Our ownership interest in naviHealth was 82 percent at both June 30, 2017 and 2016 .

The reconciliation of the changes in redeemable noncontrolling interests are as follows:

(in millions)	Redeemable Noncontrolling Interests
Balance at June 30, 2015	$ —
Redeemable noncontrolling interests acquired	119
Net earnings attributable to redeemable noncontrolling interests	1
Net purchase of redeemable noncontrolling interests	(3)
Balance at June 30, 2016	117
Net earnings attributable to redeemable noncontrolling interests	4
Net purchase of redeemable noncontrolling interests	(3)
Balance at June 30, 2017	**$ 118**

13. Shareholders' Equity

At June 30, 2017 and 2016 , authorized capital shares consisted of the following: 750 million Class A common shares, without par value; 5 million Class B common shares, without par value; and 500 thousand non-voting preferred shares, without par value. The Class A common shares and Class B common shares are collectively referred to below as “common shares”. Holders of common shares are entitled to share equally in any dividends declared by the Board of Directors and to participate equally in all distributions of assets upon liquidation. Generally, the holders of Class A common shares are entitled to one vote per share, and the holders of Class B common shares are entitled to one-fifth of one vote per share on proposals presented to shareholders for vote. Under certain circumstances, the holders of Class B common shares are entitled to vote as a separate class. Only Class A common shares were outstanding at June 30, 2017 and 2016 .

We repurchased $2.3 billion of our common shares, in the aggregate, through share repurchase programs during fiscal 2017 , 2016 and 2015 , as described below. We funded the repurchases with available cash. The common shares repurchased are held in treasury to be used for general corporate purposes.

During fiscal 2017 , we repurchased 8.1 million common shares having an aggregate cost of $600 million . The average price paid per common share was $74.08 .

During fiscal 2016 , we repurchased 8.2 million common shares having an aggregate cost of $651 million . The average price paid per common share was $78.98 .

During fiscal 2015 , we repurchased 13.1 million common shares having an aggregate cost of $1.0 billion . The average price paid per common share was $79.02 .

During fiscal 2017 , we retired 37 million common shares in treasury. The retirement of these shares had no impact on total shareholders' equity; however, it did impact certain individual components of shareholders' equity as follows: $2.5 billion decrease in common shares in treasury, $302 million decrease in common shares, and $2.2 billion decrease in retained earnings.

Accumulated Other Comprehensive Income/(Loss)

The following table summarizes the changes in the balance of accumulated other comprehensive income/(loss) by component and in total:

(in millions)	Foreign Currency Translation Adjustments and other	Unrealized Gain/(Loss) on Derivatives, net of tax	Accumulated Other Comprehensive Income/(Loss)
Balance at June 30, 2015	$ (41)	$ 18	**$ (23)**
Other comprehensive income/(loss), net before reclassifications	(82)	(9)	**(91)**
Amounts reclassified to earnings	—	(2)	**(2)**
Total other comprehensive loss, net of tax of $6 million	(82)	(11)	**(93)**
Balance at June 30, 2016	(123)	7	**(116)**
Other comprehensive income/(loss), before reclassifications	(25)	19	**(6)**
Amounts reclassified to earnings	—	(3)	**(3)**
Total comprehensive net loss of tax of $9 million attributable to Cardinal Health, Inc.	(25)	16	**(9)**
Balance at June 30, 2017	**$ (148)**	**$ 23**	**$ (125)**

Activity related to realized and unrealized gains and losses on available-for-sale securities, as described in Note 5 , was immaterial during fiscal 2017 and 2016 .

14. Earnings Per Share Attributable to Cardinal Health, Inc.

The following table reconciles the computation of basic and diluted earnings per share attributable to Cardinal Health, Inc.:

(in millions, except per share amounts)	2017	2016	2015
Earnings from continuing operations	$ 1,294	$ 1,431	$ 1,212
Net earnings attributable to noncontrolling interest	(6)	(4)	—
Net earnings from continuing operations attributable to Cardinal Health, Inc.	1,288	1,427	1,212
Earnings from discontinued operations, net of tax	—	—	3
Net earnings attributable to Cardinal Health, Inc.	**$ 1,288**	$ 1,427	$ 1,215
Weighted-average common shares–basic	317	327	332
Effect of dilutive securities:			
Employee stock options, restricted share units, and performance share units	3	3	3
Weighted-average common shares–diluted	**320**	330	335
Basic earnings per common share attributable to Cardinal Health, Inc.:			
Continuing operations	$ 4.06	$ 4.36	$ 3.65
Discontinued operations	—	—	0.01
Net basic earnings per common share attributable to Cardinal Health, Inc.	**$ 4.06**	$ 4.36	$ 3.66
Diluted earnings per common share attributable to Cardinal Health, Inc.:			
Continuing operations	$ 4.03	$ 4.32	$ 3.61
Discontinued operations	—	—	0.01
Net diluted earnings per common share attributable to Cardinal Health, Inc.	**$ 4.03**	$ 4.32	$ 3.62

The potentially dilutive employee stock options, restricted share units and performance share units that were antidilutive for fiscal 2017 , 2016 and 2015 were 3 million , 2 million and 1 million , respectively.

15. Segment Information

Our operations are principally managed on a products and services basis and are comprised of two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. The factors for determining the reportable segments include the manner in which management evaluates performance for purposes of allocating resources and assessing performance combined with the nature of the individual business activities.

The Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical and over-the-counter healthcare and consumer products in the United States. This segment also provides services to pharmaceutical manufacturers and healthcare providers to support the development, marketing, and distribution of specialty pharmaceutical products; operates nuclear pharmacies and radiopharmaceutical manufacturing facilities; provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers; and repackages generic pharmaceuticals and over-the-counter healthcare products. This segment also imports and distributes pharmaceuticals, over-the-counter healthcare and consumer products and provides specialty pharmacy and other services in China.

Our Medical segment manufactures, sources and distributes Cardinal Health branded medical, surgical and laboratory products, which are sold in the United States, Canada, Europe, Asia and other markets. In addition to distributing Cardinal Health branded products, this segment also distributes a broad range of national brand products and provides supply chain services and solutions to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China. This segment also distributes medical products to patients' homes and provides post-acute care management and transition services and software to hospitals, other healthcare providers and payers in the United States.

The following table presents revenue for each reportable segment and Corporate:

(in millions)	2017	2016	2015
Pharmaceutical	$ 116,463	$ 109,131	$ 91,116
Medical	13,524	12,430	11,395
Total segment revenue	129,987	121,561	102,511
Corporate (1)	(11)	(15)	20
Total revenue	**$ 129,976**	$ 121,546	$ 102,531

(1) Corporate revenue consists of the elimination of inter-segment revenue and other revenue not allocated to the segments.

We evaluate segment performance based on segment profit, among other measures. Segment profit is segment revenue, less segment cost of products sold, less segment distribution, selling, general, and administrative ("SG&A") expenses. Segment SG&A expenses include share-based compensation expense as well as allocated corporate expenses for shared functions, including corporate management, corporate finance, financial and customer care shared services, human resources, information technology, and legal and compliance. The results attributable to noncontrolling interests of consolidated entities are recorded within segment profit. Corporate expenses are allocated to the segments based on headcount, level of benefit provided, and other ratable allocation methodologies.

We do not allocate the following items to our segments: LIFO inventory charges/(credits); restructuring and employee severance; amortization and other acquisition-related costs; impairments and (gain)/loss on disposal of assets; litigation (recoveries)/charges, net; other income, net; interest expense, net; loss on extinguishment of debt; and provision for income taxes.

In addition, certain investment spending, certain portions of enterprise-wide incentive compensation, and other spending are not allocated to the segments. Investment spending generally includes the first-year spend for certain projects that require incremental investments in the form of additional operating expenses. We encourage our segments and corporate functions to identify investment projects that will promote innovation and provide future

returns. As approval decisions for such projects are dependent upon executive management, the expenses for such projects are often retained at Corporate. Investment spending within Corporate was $17 million , $34 million and $26 million for fiscal 2017 , 2016 and 2015 , respectively.

The following tables present segment profit by reportable segment and Corporate:

(in millions)	2017	2016	2015
Pharmaceutical	$ 2,187	$ 2,488	$ 2,094
Medical	572	457	433
Total segment profit	2,759	2,945	2,527
Corporate	(639)	(486)	(366)
Total operating earnings	$ 2,120	$ 2,459	$ 2,161

The following tables present depreciation and amortization and additions to property and equipment by reportable segment and Corporate:

(in millions)	2017	2016	2015
Pharmaceutical	$ 122	$ 128	$ 124
Medical	156	136	119
Corporate	439	377	208
Total depreciation and amortization	$ 717	$ 641	$ 451

(in millions)	2017	2016	2015
Pharmaceutical	$ 50	$ 88	$ 90
Medical	123	96	87
Corporate	214	281	123
Total additions to property and equipment	$ 387	$ 465	$ 300

The following table presents total assets for each reportable segment and Corporate at June 30:

(in millions)	2017	2016	2015
Pharmaceutical	$ 21,848	$ 20,662	$ 17,385
Medical	10,688	10,236	7,095
Corporate	7,576	3,224	5,662
Total assets	$ 40,112	$ 34,122	$ 30,142

The following tables present revenue and property and equipment, net by geographic area:

(in millions)	2017	2016	2015
United States	$ 125,006	$ 116,864	$ 98,435
International	4,970	4,682	4,096
Total revenue	$ 129,976	$ 121,546	$ 102,531

(in millions)	2017	2016	2015
United States	$ 1,623	$ 1,558	$ 1,327
International	256	238	179
Property and equipment, net	$ 1,879	$ 1,796	$ 1,506

16. Share-Based Compensation

We maintain stock incentive plans (collectively, the “Plans”) for the benefit of certain of our officers, directors and employees. At June 30, 2017 , 23 million shares remain available for future grants under the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan ("2011 LTIP"). Under the 2011 LTIP's fungible share counting provisions, stock options are counted against the plan as one share for every share issued ; awards other than stock options are counted against the plan as two and one-half shares for every share issued . This means that only 9 million shares could be issued under awards other than stock options while 23 million shares could be issued under stock options. Shares are issued out of treasury shares when stock options are exercised and when restricted share units and performance share units vest.

The following table provides total share-based compensation expense by type of award:

(in millions)	2017	2016	2015
Restricted share unit expense	$ 69	$ 69	$ 69
Employee stock option expense	19	21	21
Performance share unit expense	8	21	20
Total share-based compensation expense from continuing operations	$ 96	$ 111	$ 110

The total tax benefit related to share-based compensation was $34 million , $38 million and $38 million for fiscal 2017 , 2016 and 2015 , respectively.

Restricted Share Units

Restricted share units granted under the Plans generally vest in equal annual installments over three years . Restricted share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to restricted share units under the Plans:

(in millions, except per share amounts)	Restricted Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2015	3	$ 59.69
Granted	1	83.89
Vested	(2)	54.29
Canceled and forfeited	—	—
Nonvested at June 30, 2016	2	71.73
Granted	1	82.34
Vested	(1)	69.23
Canceled and forfeited	—	—
Nonvested at June 30, 2017	**2**	**$ 76.72**

The following table provides additional data related to restricted share unit activity:

(in millions)	2017	2016	2015
Total compensation cost, net of estimated forfeitures, related to nonvested restricted share and share unit awards not yet recognized, pre-tax	$ 73	$ 79	$ 77
Weighted-average period in years over which restricted share and share unit cost is expected to be recognized (in years)	2	2	2
Total fair value of shares vested during the year	$ 64	$ 65	$ 61

Stock Options

Employee stock options granted under the Plans generally vest in equal annual installments over three years and are exercisable for periods ranging from seven to ten years from the grant date. All stock options are exercisable at a price equal to the market value of the common shares underlying the option on the grant date.

The following table summarizes all stock option transactions under the Plans:

(in millions, except per share amounts)	Stock Options	Weighted-Average Exercise Price per Common Share
Outstanding at June 30, 2015	8	$ 46.50
Granted	1	84.11
Exercised	(2)	39.06
Canceled and forfeited	—	—
Outstanding at June 30, 2016	7	54.09
Granted	1	83.09
Exercised	(2)	37.79
Canceled and forfeited	—	—
Outstanding at June 30, 2017	**6**	**$ 63.44**
Exercisable at June 30, 2017	**4**	**$ 52.86**

The following table provides additional detail related to stock options:

(in millions, except per share amounts)	2017	2016	2015
Aggregate intrinsic value of outstanding options at period end	$ 109	$ 181	$ 281
Aggregate intrinsic value of exercisable options at period end	106	161	193
Aggregate intrinsic value of exercised options	73	63	132
Net proceeds from share-based compensation	26	6	72
Excess tax benefits from share based compensation	34	33	52
Total compensation cost, net of estimated forfeitures, related to unvested stock options not yet recognized, pre-tax	22	22	23
Total fair value of shares vested during the year	19	20	20
Weighted-average grant date fair value per stock option	16.67	17.40	15.80

(in years)	2017	2016	2015
Weighted-average remaining contractual life of outstanding options	7	6	6
Weighted-average remaining contractual life of exercisable options	6	5	5
Weighted-average period over which stock option compensation cost is expected to be recognized	2	2	2

Stock options are granted to our officers and certain employees. The fair values were estimated on the grant date using a lattice valuation model. We believe the lattice model provides reasonable estimates because it has the ability to take into account individual exercise patterns based on changes in our stock price and other variables, and it provides for a range of input assumptions, which are disclosed in the table below. The risk-free rate is based on the U.S. Treasury yield curve at the time of the grant. We analyzed historical data to estimate option exercise behaviors and employee terminations to be used within the lattice model. The expected life of the options granted was calculated from the option valuation model and represents the length of time in years that the options granted are expected to be outstanding. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years).

The following table provides the range of assumptions used to estimate the fair value of stock options:

	2017	2016	2015
Risk-free interest rate	**1.4% - 2.0%**	1.5% - 1.9%	1.8% - 2.1%
Expected volatility	**24%**	23%	26%
Dividend yield	**2.2% - 2.5%**	1.8% - 2.0%	1.7% - 1.9%
Expected life in years	**7**	7	7

Performance Share Units

Performance share units vest over a three -year performance period based on achievement of specific performance goals. Based on the extent to which the targets are achieved, vested shares may range

from zero to 200 percent of the target award amount. Performance share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to performance share units under the Plans (based on target award amounts):

(in millions, except per share amounts)	Performance Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2015	0.9	$ 50.31
Granted	0.3	84.26
Vested (1)	(0.4)	39.81
Canceled and forfeited	—	—
Nonvested at June 30, 2016	0.8	63.96
Granted	0.2	83.19
Vested (2)	(0.4)	51.49
Canceled and forfeited	—	—
Nonvested at June 30, 2017	**0.6**	**$ 77.83**

(1) Vested based on achievement of 133 percent of the target performance goal.

(2) Vested based on achievement of 170 percent of the target performance goal.

The following table provides additional data related to performance share unit activity:

(in millions)	2017	2016	2015
Total compensation cost, net of estimated forfeitures, related to nonvested performance share units not yet recognized, pre-tax	**$ 13**	$ 17	$ 16
Weighted-average period over which performance share unit cost is expected to be recognized (in years)	**2**	2	2
Total fair value of shares vested during the year	**$ 19**	$ 16	$ 8

Employee Retirement Savings Plans

Substantially all of our domestic non-union employees are eligible to be enrolled in our company-sponsored contributory retirement savings plans, which include features under Section 401(k) of the Internal Revenue Code of 1986, and provide for matching and profit sharing contributions by us. Our contributions to the plans are determined by the Board of Directors subject to certain minimum requirements as specified in the plans. The total expense for our employee retirement savings plans was $49 million , $84 million and $91 million for fiscal 2017 , 2016 and 2015 , respectively.

17. Selected Quarterly Financial Data (Unaudited)

The following is selected quarterly financial data for fiscal 2017 and 2016 . The sum of the quarters may not equal year-to-date due to rounding.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2017				
Revenue	$ 32,039	$ 33,150	$ 31,821	**$ 32,966**
Gross margin (1)	1,590	1,602	1,728	**1,623**
Distribution, selling, general and administrative expenses	920	910	960	**983**
Earnings from continuing operations	310	324	382	**278**
Earnings from discontinued operations, net of tax	—	—	—	—
Net earnings	310	324	382	**278**
Less: Net earnings attributable to noncontrolling interests	(1)	—	(1)	**(4)**
Net earnings attributable to Cardinal Health, Inc.	309	324	381	**274**
Net earnings from continuing operations attributable to Cardinal Health, Inc. per common share:				
Basic	$ 0.97	$ 1.02	$ 1.21	**$ 0.87**
Diluted	0.96	1.02	1.20	**0.86**

(1) Gross margin is impacted by LIFO benefit/(charges) of $9 million and ($9) million in the second and third quarter, respectively. We did not have LIFO benefits/(charges) in the fourth quarter.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2016				
Revenue	$ 28,055	$ 31,445	$ 30,662	$ 31,384
Gross margin (2)	1,579	1,609	1,689	1,665
Distribution, selling, general and administrative expenses	842	922	914	970
Earnings from continuing operations	384	326	386	335
Earnings from discontinued operations, net of tax	—	—	—	—
Net earnings	384	326	386	335
Less: Net earnings attributable to noncontrolling interests	(1)	—	—	(2)
Net earnings attributable to Cardinal Health, Inc.	383	326	386	333
Net earnings from continuing operations attributable to Cardinal Health, Inc. per common share:				
Basic	$ 1.17	$ 0.99	$ 1.18	$ 1.03
Diluted	1.15	0.98	1.17	1.02

(2) Gross margin is impacted by LIFO benefit/(charges) of ($39) million , ($12) million and $51 million in the second, third and fourth quarter, respectively.

18. Subsequent Events

On July 29, 2017 , we acquired the Patient Recovery Business from Medtronic for $6.1 billion in cash. We funded the acquisition using $4.5 billion in long-term debt issued in June 2017, cash on hand, $400 million in commercial paper and $300 million borrowed under our committed receivables sales facility program. The Patient Recovery Business manufactures 23 medical product categories sold into multiple healthcare channels, and includes numerous industry-leading brands, such as Curity, Kendall, Dover, Argyle and Kangaroo. The acquisition further expands the Medical segment's portfolio of self-manufactured products.

The information needed to perform a preliminary assessment of the fair value of assets acquired and liabilities assumed in the acquisition of the Patient Recovery Business was not available at the time these consolidated financial statements were prepared.

In July 2017, we redeemed our 1.7% notes due 2018 before maturity for $403 million , including a make-whole premium and accrued interest.

Cardinal Health, Inc. and Subsidiaries

Schedule II - Valuation and Qualifying Accounts [1]

(in millions)	Balance at Beginning of Period	Charged to Costs and Expenses (2)	Charged to Other Accounts (3)	Deductions (4)	Balance at End of Period
Fiscal 2017					
Accounts receivable	**$ 135**	**$ 59**	**$ 1**	**$ (58)**	**$ 137**
Finance notes receivable	**19**	**3**	**—**	**(13)**	**9**
Sales returns and allowances	**386**	**2,285**	**—**	**(2,324)**	**347**
Other	**1**	**—**	**—**	**—**	**1**
	$ 541	**$ 2,347**	**$ 1**	**$ (2,395)**	**$ 494**
Fiscal 2016					
Accounts receivable	$ 135	$ 72	$ 2	$ (74)	$ 135
Finance notes receivable	14	6	—	(1)	19
Sales returns and allowances	305	2,207	—	(2,126)	386
Other	1	—	—	—	1
	$ 455	$ 2,285	$ 2	$ (2,201)	$ 541
Fiscal 2015					
Accounts receivable	$ 137	$ 59	$ 5	$ (66)	$ 135
Finance notes receivable	18	—	—	(4)	14
Sales returns and allowances	273	1,988	—	(1,956)	305
Other	1	—	—	—	1
	$ 429	$ 2,047	$ 5	$ (2,026)	$ 455

(1) Amounts included herein pertain to the continuing operations of the Company.

(2) Fiscal 2017 , 2016 and 2015 include $5 million , $5 million and $7 million , respectively, for reserves related to customer pricing disputes, excluded from provision for bad debts on the consolidated statements of cash flows and classified as a reduction in revenue in the consolidated statements of earnings.

(3) Recoveries of amounts provided for or written off in prior years were $1 million , $2 million and $1 million for fiscal 2017 , 2016 and 2015 , respectively.

(4) Write-off of uncollectible accounts or actual sales returns.

Directors, Executive Officers and Corporate Governance

The following is a list of our executive officers:

Name	Age	Position
George S. Barrett	62	Chairman and Chief Executive Officer
Michael C. Kaufmann	54	Chief Financial Officer
Donald M. Casey, Jr.	57	Chief Executive Officer, Medical segment
Jon L. Giacomin	52	Chief Executive Officer, Pharmaceutical segment
Michele A. M. Holcomb	49	Executive Vice President, Strategy and Corporate Development
Pamela O. Kimmet	59	Chief Human Resources Officer
Craig S. Morford	58	Chief Legal and Compliance Officer
Patricia B. Morrison	58	Executive Vice President, Customer Support Services and Chief Information Officer

The business experience summaries provided below for our executive officers describe positions held during the last five years (unless otherwise indicated).

Mr. Barrett has served as Chairman and Chief Executive Officer since August 2009.

Mr. Kaufmann has served as Chief Financial Officer since November 2014. From August 2009 until November 2014, he served as Chief Executive Officer, Pharmaceutical segment.

Mr. Casey has served as Chief Executive Officer, Medical segment, since April 2012.

Mr. Giacomin has served as Chief Executive Officer, Pharmaceutical segment since November 2014. From January 2011 until November 2014, he served as President, U.S. Pharmaceutical Distribution.

Ms. Holcomb has served as Executive Vice President, Strategy and Corporate Development since January 2017. She joined us from Teva Pharmaceutical Industries Ltd., where she served as Senior Vice President, Strategy, Portfolio, Search, and Partnerships and Chief Operating Officer, Global R&D from October 2015 to December 2016, Senior Vice President, Chief Operating Officer, Global R&D from September 2012 to September 2015 and Vice President, Corporate Strategy and Operational Planning from April 2010 to September 2012.

Ms. Kimmet has served as Chief Human Resources Officer since June 2016. Prior to joining us, Ms. Kimmet served as Senior Vice President, Human Resources at Coca-Cola Enterprises, Inc. from October 2010 to June 2016.

Mr. Morford has served as Chief Legal and Compliance Officer since May 2009.

Ms. Morrison has served as Executive Vice President, Customer Support Services and Chief Information Officer since June 2011.

We have adopted *Standards of Business Conduct* that apply to all of our directors, officers and employees. The *Standards of Business Conduct* outline our corporate values and standards of integrity and behavior and are designed to protect and promote our reputation. The full text of the *Standards of Business Conduct* is posted on our website at www.cardinalhealth.com under "About Us — Corporate Citizenship — Ethics and Governance — Ethics and Compliance."

Any waiver of the *Standards of Business Conduct* for directors or executive officers must be approved by the Audit Committee. As required under SEC and New York Stock Exchange rules, we will disclose future amendments to our *Standards of Business Conduct* and waivers from the *Standards of Business Conduct* for our principal executive officer, principal financial officer, and principal accounting officer, or persons performing similar functions, and our other executive officers and directors on our website within four business days following the date of the amendment or waiver.

The other information called for by Item 10 of Form 10-K is incorporated by reference to our Definitive Proxy Statement (which will be filed with the SEC pursuant to Regulation 14A under the Exchange Act) relating to our 2017 Annual Meeting of Shareholders (our "2017 Proxy Statement") under the captions "Proposal 1—Election of Directors," "Share Ownership Information" and "Corporate Governance."

Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The table below summarizes information relating to our equity compensation plans at June 30, 2017.

Equity Compensation Plan Information

Plan Category	Common Shares to be Issued Upon Exercise of Outstanding Options and Rights (#)	Weighted Average Exercise Price of Outstanding Options ($)	Common Shares Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column (a)) (#)
	(a)	(b)	(c)
Equity compensation plans approved by shareholders	**9,320,347** (1)	$ 63.35 (1)	23,114,284 (2)
Equity compensation plans not approved by shareholders	**4,203** (3)	— (3)	—
Total at June 30, 2017	**9,324,550**		23,114,284

(1) In addition to stock options outstanding under the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan (the "2011 LTIP") and the Cardinal Health, Inc. 2005 Long-Term Incentive Plan (the "2005 LTIP"), also includes 849,674 PSUs and 1,723,379 RSUs outstanding under the 2011 LTIP, 10,214 PSUs and 61,681 RSUs outstanding under the 2005 LTIP, and 167,471 RSUs outstanding under the 2007 Nonemployee Directors Equity Incentive Plan that are payable solely in common shares. PSUs and RSUs do not have an exercise price, and therefore were not included for purposes of computing the weighted-average exercise price. PSUs granted in fiscal 2015 are reported in this table at the actual amount that vested (133% of target). PSUs granted in fiscal 2016 and 2017 are reported in this table at the maximum payout level (200% of target) in accordance with SEC rules.

(2) Reflects common shares available under the 2011 LTIP in the form of stock options and other stock-based awards. Under the 2011 LTIP's fungible share counting provisions, stock options are counted against the plan as one share for every common share issued; awards other than stock options are counted against the plan as two and one-half shares for every common share issued. This means that only 9,245,714 shares could be issued under awards other than stock options while 23,114,284 shares could be issued under stock options.

(3) RSUs outstanding under the Cardinal Health, Inc. Amended and Restated Outside Directors Equity Incentive Plan that are payable solely in common shares. RSUs do not have an exercise price, and therefore were not included for purposes of computing the weighted-average exercise price.

The other information called for by Item 12 of Form 10-K is incorporated by reference to our 2017 Proxy Statement under the caption “Share Ownership Information.”

Exhibits

Exhibits, Financial Statement Schedules

(a)(1) The following financial statements are included in the "Financial Statements" section of this report:

(a)(2) The following Supplemental Schedule is included in this report:

All other schedules not listed above have been omitted as not applicable or because the required information is included in the Consolidated Financial Statements or in the Notes thereto.

Exhibit Number	Exhibit Description
2..1.1	Stock and Asset Purchase Agreement, dated March 1, 2015, between Ethicon, Inc. and Cardinal Health, Inc. (incorporated by reference to Exhibit 2.1 to Cardinal Health's Current Report on Form 8-K filed on May 28, 2015, File No. 1-11373)
2.1.2	Letter Agreement, dated May 29, 2015, between Ethicon, Inc. and Cardinal Health, Inc. relating to mechanics of agreeing to purchase price allocation (incorporated by reference to Exhibit 2.3 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2015, File No. 1-11373)
2.1.3	Amendment No. 1, dated as of October 2, 2015, to the Stock and Asset Purchase Agreement, dated as of March 1, 2015, between Ethicon, Inc. and Cardinal Health, Inc. (incorporated by reference to Exhibit 2.1 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015, File No. 1-11373)
2.1.4	Letter Agreement, dated August 8, 2016, between Ethicon, Inc. and Cardinal Health, Inc. relating to pre-closing product registration transfer process for certain Day 2 Countries (incorporated by reference to Exhibit 2.1 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended September 30, 2016, File No. 1-11373)
2.2.1	Stock and Asset Purchase Agreement, dated April 18, 2017, between Cardinal Health, Inc. and Medtronic plc (incorporated by reference to Exhibit 2.1 to Cardinal Health's Current Report on Form 8-K filed on April 18, 2017, File No. 1-11373)
2.2.2	Amendment No. 1, dated as of July 28, 2017, to Stock and Asset Purchase Agreement, dated April 18, 2017, between Cardinal Health, Inc. and Medtronic plc
3.1	Amended and Restated Articles of Incorporation of Cardinal Health, Inc., as amended (incorporated by reference to Exhibit 3.1 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended September 30, 2008, File No. 1-11373)
3.2	Cardinal Health, Inc. Restated Code of Regulations (incorporated by reference to Exhibit 3.2 to Cardinal Health's Current Report on Form 8-K filed on June 30, 2016, File No. 1-11373)
4.1	Specimen Certificate for Common Shares of Cardinal Health, Inc. (incorporated by reference to Exhibit 4.01 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2001, File No. 1-11373)
4.2.1	Indenture, dated as of June 2, 2008, between Cardinal Health, Inc. and The Bank of New York Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on June 2, 2008, File No. 1-11373)
4.2.2	Form of 4.625% Notes due 2020 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on December 14, 2010, File No. 1-11373)
4.2.3	Form of 1.900% Notes due 2017 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on May 21, 2012, File No. 1-11373)
4.2.4	Form of 3.200% Notes due 2022 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on May 21, 2012, File No. 1-11373)
4.2.5	Form of 1.700% Notes due 2018 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on February 22, 2013, File No. 1-11373)
4.2.6	Form of 3.200% Notes due 2023 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on February 22, 2013, File No. 1-11373)

EXHIBIT 2.2.2

AMENDMENT NO. 1

TO

STOCK AND ASSET PURCHASE AGREEMENT

This AMENDMENT NO. 1, dated as of July 28, 2017 (this " Amendment "), to the Stock and Asset Purchase Agreement, dated as of April 18, 2017 (the " Purchase Agreement "), is by and between Medtronic plc, an Irish public limited company (" Seller "), and Cardinal Health, Inc., an Ohio corporation (" Buyer ").

WHEREAS, pursuant to and in accordance with Section 11.05 of the Purchase Agreement, the parties desire to amend certain provisions of the Purchase Agreement as set forth in this Amendment; and

WHEREAS, terms used herein and not defined shall have the meanings ascribed thereto in the Purchase Agreement.

NOW, THEREFORE, in consideration of the mutual agreements set forth in the Purchase Agreement and this Amendment, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Buyer and Seller hereby agree as follows:

RECITALS

The second recital of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"WHEREAS, Seller desires to sell (or to cause to be sold), and Buyer desires to purchase or cause certain of its Affiliates to purchase (or otherwise acquire), certain assets, including the Transferred Equity Interests (as defined below), related to the Business as a going concern and Buyer is willing to assume or cause certain of its Affiliates to assume certain liabilities related to the Business, in each case upon the terms and subject to the conditions set forth herein."

ARTICLE 1
Purchase Agreement; Disclosure Letter; Other Matters

Section 1.01 Definitions . Section 1.01(a) of the Purchase Agreement (Definitions) is hereby amended as follows:

(i) The definition of the term " Ancillary Agreements " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Ancillary Agreements ' means, other than this Agreement, the agreements and instruments, including any Country Transfer Agreements and any related instruments of transfer, the General Assignment, the Assumption Agreement,

the Patent Assignment, the Trademark Assignment, the U.S. Merger Agreement, the Transition Services Agreement, the Master Manufacturing and Supply Agreement, the Sorting Service Agreement, the Undisclosed Agency Agreement, the Escrow Agreement, the French Offer Letter, the Dutch Offer Letter, the Lease Assignment and Assumption Agreements and the Trademark License Agreements, executed and delivered in connection with the transactions contemplated by this Agreement."

(ii) The definition of the term " Assumed Liabilities " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Assumed Liabilities ' means the obligations and liabilities set forth or described on Annex 2.02(c) , which expressly exclude the Excluded Liabilities."

(iii) The definition of the term " Buyer Tax Act " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Buyer Tax Act ' means the following: (A) at or after the Closing, any election made by Buyer or any of its Affiliates (including any Transferred Company) under any provision of the Code or non-U.S. Tax Law for any Pre-Closing Tax Period, which election is made at or after the Closing with respect to any Transferred Company, the Transferred Assets or the Business, but not (i) any such election that is set forth on a Tax Return required to be filed by Buyer under Section 7.08(a)(i) or Section 7.08(a)(ii) and which election is consistent with past practice, (ii) any such election that is expressly required by this Agreement, or (iii) any such election that is made with Seller's consent (which consent shall not be unreasonably withheld, conditioned or delayed), (B) any failure to comply with Item 2, 3 or 4 of Schedule 1.01(a) to the Disclosure Letter or any failure of the statement in Item 1 of Schedule 1.01(a) to the Disclosure Letter to be true, correct, and complete, and (C) any action taken by Buyer on the Closing Date after such Closing other than (i) in the ordinary course of business, (ii) as required or contemplated by this Agreement or applicable Law, or (iii) with Seller's consent (which consent shall not be unreasonably withheld, conditioned or delayed). For the absence of doubt, none of the Section 338(g) Elections or any action undertaken by Seller and its Affiliates, prior to the Closing, pursuant to the Internal Restructuring Steps shall constitute a Buyer Tax Act."

(iv) The definition of the term " Disclosure Letter " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Disclosure Letter ' means the confidential disclosure letter delivered to Buyer by Seller prior to or simultaneously with entering into the Purchase Agreement, as amended by Amendment No. 1 to the Purchase Agreement, dated as of July 28, 2017."

(v) The definition of the term " Employee of the Business " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Employee of the Business ' means each employee of Seller or its Affiliates who is set forth on Schedule 1.01(b) to the Disclosure Letter (as such schedule may be updated in accordance with this Agreement), including each such employee who, as of the Closing Date (or, with respect to Deferred Employees, the applicable Deferred Closing Date) is on leave of absence (including medical leave, military leave, workers compensation leave and short-term or long-term disability or vacation)."

(vi) The definition of the term " Inventory " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Inventory ' means the inventory of all finished Products (including consignment stock) (" Finished Goods Inventory "), Product specific work in process and Product specific raw materials."

(vii) The definition of the term " Legacy Product " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Legacy Product ' means any product that is not a Product as of the Closing, but (a) is a prior product design, form, version or implementation (whether commercialized or not) of Seller, an Affiliate of Seller or a Transferred Company which product design, form, version or implementation (whether commercialized or not) was at any time prior to the Closing superseded by a Product design, form, version or implementation, (b) was within one of the product groups set forth on Exhibit A-1 and (c) in which product design, form, version or implementation by Seller, any of its Affiliates or any Transferred Company owns or has the valid right to use the IP Rights."

(viii) The definition of the term " Permitted Liens " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Permitted Liens ' means (a) mechanics', carriers', workmen's, repairmen's or other like Liens imposed by Law arising or incurred in the ordinary course of business, (b) Liens arising under purchase price conditional sales contracts or equipment leases with third parties entered into in the ordinary course of business consistent with past practice, (c) Liens for Taxes or other governmental charges that are not yet delinquent and may thereafter be paid without penalty, or that the taxpayer is contesting in good faith through appropriate proceedings and for which adequate reserves have been established in the accounting books and records prior to the date hereof, (d) restrictions under leases, subleases, licenses or occupancy agreements that constitute Transferred Assets, none of which materially interferes with the present use of the related real property, (e) easements, covenants, rights-of-

way and other similar restrictions of record, none of which materially interferes with the present use of the related real property, (f) zoning, building and other similar restrictions, none of which materially interferes with the present use of the related real property, (g) Liens created by or for the benefit of Buyer or its Affiliates, (h) Liens that are removed prior to the Closing or, with respect to Deferred Assets, the applicable Deferred Closing and (i) with respect to real property, other imperfections of title or encumbrances, if any, which do not materially interfere with the present use of such real property."

(ix) The definition of the term " Transactions " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Transactions ' mean, collectively, the transactions contemplated by this Agreement and the other Transaction Documents, including the purchase and sale of the Transferred Assets and the Transferred Equity Interests (including pursuant to the U.S. Merger) and the assumption of the Assumed Liabilities."

(x) The definition of the term " Transferred Employee " in Section 1.01(a) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"' Transferred Employee ' means each Employee of the Business who, as of the Closing Date (or, with respect to Deferred Employees, the applicable Deferred Closing Date) (or, if applicable, such later date that such employee commences employment with Buyer or one of its Affiliates), becomes an employee of Buyer or one of its Affiliates whether by operation of Law, pursuant to the transfer (directly or indirectly) of the Transferred Equity Interests to Buyer or by acceptance of Buyer's or one of its Affiliate's offer of employment pursuant to Section 8.01 ."

(xi) Section 1.01(a) of the Purchase Agreement is amended to include the following new definitions in the appropriate alphabetical positions:

"' Cardinal Merger Sub Common Stock ' means common stock, par value $0 per share, of Cardinal Merger Sub."

"' Deferred Beneficiary ' means Buyer or its applicable Affiliate designated in accordance with Section 2.02(f) that will be entitled to receive the relevant Deferred Assets and the relevant Deferred Liabilities at the applicable Deferred Closing."

"' Deferred Business ' means the part of the Business in respect of which a Deferred Title Holder has Deferred Assets or Deferred Liabilities. For the avoidance of doubt, the portion of the Business conducted by any of the Transferred Companies shall not be part of the Deferred Business in any country."

"‘ Deferred Business Taxes ’ means, with respect to any Deferred Asset, any Deferred Liability or any portion of the Deferred Business in each Deferred Closing Country, all Taxes (other than Excluded Deferred Taxes) in each case, incurred by the applicable Deferred Title Holder and/or its Affiliates in connection with (a) the operation (or ownership) of the Deferred Assets, Deferred Liabilities or any portion of the Deferred Business during the Deferred Period or (b) the receipt of goods or services in support and furtherance of the operation (or ownership) of the Deferred Assets, Deferred Liabilities, or Deferred Business during the Deferred Period."

"‘ Deferred Inventory Closing Date ’ means the date on which the Undisclosed Agency Agreement is terminated, pursuant to the terms thereof, with respect to the relevant Deferred Inventory or Distribution Services."

"‘ Deferred Inventory Period ’ means, with respect to the Deferred Inventory and the provision of Distribution Services, the period from the Closing until the applicable Deferred Inventory Closing Date."

"‘ Deferred Inventory Taxes ’ means, with respect to any Deferred Inventory or any Distribution Services, all Taxes (other than Excluded Deferred Taxes) in each case, incurred by Seller and/or its Affiliates in connection with (a) the ownership of the Deferred Inventory during the Deferred Inventory Period, or (b) the receipt of goods or services in support and furtherance of the ownership of the Deferred Inventory during the Deferred Inventory Period."

"‘ Deferred Period ’ means, with respect to the Deferred Business in each Deferred Closing Country, the period from the Closing until the applicable Deferred Closing."

"‘ Deferred Taxes ’ means, together, Deferred Business Taxes and Deferred Inventory Taxes."

"‘ Deferred Title Holder ’ means Seller or one or more of its Affiliates that has Deferred Assets or Deferred Liabilities during the applicable Deferred Period."

"‘ Escrow Account ’ means the segregated escrow trust account established pursuant to the Escrow Agreement to hold the Escrow Amount (or any replacement therefor contemplated by the last sentence of Section 2.03(a))."

"‘ Escrow Agent ’ means U.S. Bank National Association (or any replacement therefor contemplated by the last sentence of Section 2.03(a))."

"‘ Estimated Swiss Tax Basis ’ means the amount set forth in Schedule 6.11(a) to the Disclosure Letter."

"‘ Excluded Deferred Business Taxes ’ means (a) sales Taxes, VAT and other Taxes imposed on Seller or any of its Affiliates (including, for the avoidance of doubt, any Deferred Title Holder) to the extent Seller or any of its Affiliates (including, for the avoidance of doubt, any Deferred Title Holder) actually receives, in cash (or through a reduction of amounts otherwise payable), reimbursement or payment in respect of such Tax such that neither Seller nor any of its Affiliates (including, for the avoidance of doubt, any Deferred Title Holder) bears economic responsibility for such Tax, (b) Recoverable VAT, (c) Taxes (other than VAT) attributable to the NEB Return on Sales Amount owed to Seller or its Affiliates, and (d) except to the extent otherwise provided pursuant to any Ancillary Agreement, Taxes attributable to amounts owed to Seller or any of its Affiliates (including, for the avoidance of doubt, any Deferred Title Holder) under the Ancillary Agreements; provided, that for the avoidance of doubt, any Taxes allocated to any party pursuant to any Ancillary Agreement shall continue to be the responsibility of such party."

"‘ Excluded Deferred Inventory Taxes ’ means (a) sales Taxes, VAT and other Taxes imposed on Seller or any of its Affiliates to the extent Seller or any of its Affiliates actually receives, in cash (or through a reduction of amounts otherwise payable), reimbursement or payment in respect of such Tax such that neither Seller nor any of its Affiliates bears economic responsibility for such Tax, (b) Recoverable VAT, and (c) except to the extent otherwise provided pursuant to any Ancillary Agreement, Taxes attributable to amounts owed to Seller or any of its Affiliates under the Ancillary Agreements; provided that, for the avoidance of doubt, any Taxes allocated to any party pursuant to any Ancillary Agreement shall continue to be the responsibility of such party."

"‘ Excluded Deferred Taxes ’ means, together, Excluded Deferred Business Taxes and Excluded Deferred Inventory Taxes."

"‘ InnerDyne Common Stock ’ means common stock, par value $1.00 per share, of InnerDyne Holdings."

"‘ Integration Amount ’ means the amount set forth on Schedule 2.09(h) to the Disclosure Letter, which payment is, subject to the terms of this Agreement, to be made in respect of integration and other information technology costs and expenses incurred or to be incurred by Seller and its Affiliates in connection with the transactions contemplated hereby."

"‘ NEB Distribution Fee ’ means, for any given period during the Deferred Period: (a) the NEB Revenue Amount, *minus* (b) the NEB Return on Sales Amount, *minus* (c) the NEB Services Reimbursement Amount."

"‘ NEB Return on Sales Amount ’ means, for any given period during the Deferred Period, solely with respect to the Deferred Business in each

Deferred Closing Country, an amount equal to (i) the percentage set forth under the heading 'ROS%' on Annex A to the Disclosure Letter corresponding to the Deferred Closing Country set forth opposite such percentage on Annex A to the Disclosure Letter *multiplied by* (ii) the net sales (determined using the Accounting Policies) of the Deferred Business derived in such Deferred Closing Country during the Deferred Period."

"' NEB Revenue Amount ' means, for any given period during the Deferred Period, solely with respect to the Deferred Business in each Deferred Closing Country, an amount equal to the net sales (determined using the Accounting Policies) of the Deferred Business (" Net Sales "), *minus* an amount equal to the applicable percentage of such net sales set forth in Annex C to the Disclosure Letter with respect to the region containing the Deferred Closing Country for which the applicable portion of such NEB Revenue Amount relates (such percentage, the " Bad Debt Rate ")."

"' NEB Services Reimbursement Amount ' means, for any given period during the Deferred Period, solely with respect to the Deferred Business in each Deferred Closing Country, an amount equal to the aggregate of (i) freight and duties expenses, (ii) sales force salary and commissions, (iii) ordinary course marketing expenses incurred consistent with past practice, (iv) any other expenses to the extent incurred at Buyer's or its Affiliates' direction and (v) Deferred Business Taxes, which in the case of clauses (i), (ii) and (iii) shall be determined by multiplying the Net Sales for such Deferred Closing Country by the percentage set forth under the heading 'Reimbursement % (OPC and DD)' on Annex A to the Disclosure Letter opposite such Deferred Closing Country; provided , that for the avoidance of doubt 'NEB Services Reimbursement Amount' shall not include (x) any general and administrative expenses and (y) solely to avoid any duplication of Buyer or its Affiliates paying for the same expense more than once, expenses that have otherwise been reimbursed to Seller or its Affiliates by Buyer or its Affiliates pursuant to any Ancillary Agreement."

"' Non-Commercial Employees ' means the Employees of the Business set forth in Annex D to the Disclosure Letter."

"' Recoverable VAT ' means any VAT to the extent Seller and/or any of its Affiliates (including, for the avoidance of doubt, any Deferred Title Holder) actually receives in cash (or through a reduction of Taxes otherwise payable) a refund, deduction, or credit of such VAT from the relevant Taxing Authority; provided , however , that, notwithstanding anything to the contrary herein, if and to the extent the relevant Taxing Authority subsequently disallows such refund, deduction, or credit, Buyer shall promptly pay to Seller or its Affiliates an amount equal to such disallowed refund, deduction, or credit, except where the disallowance of

such refund, deduction or credit results from the fraud, willful misconduct or intentional breach of this Agreement by Seller and/or any of its Affiliates."

"' Transferred Inventory ' means all Inventory owned or held by Seller or any of its Affiliates at the time of the Closing."

Section 1.02 Interpretation and Construction . Section 1.02 of the Purchase Agreement (Interpretation and Construction) is hereby amended as follows:

(i) Section 1.02(c) of the Purchase Agreement is hereby amended and restated in its entirety as follows:

"Except as provided in Section 2.03(b) and Section 8.02(a) , whenever conversion of values from any Foreign Currency for a particular date or period shall be required, such conversion shall be made using the rate provided by Bloomberg at 7:00 a.m. New York City time (the " Exchange Rate ") three (3) business days prior to the applicable date or dates."

(ii) Section 1.02(d) of the Purchase Agreement is hereby amended by adding the following to the end of the section:

"For purposes of Section 2.11 , Section 7.08 and Article X , to the extent permitted by applicable Law and foreign currency regulations, if requested by either Seller or Buyer to the other party to make or receive payments through any of their respective Affiliates, the parties agree to cooperate in good faith with respect to such request, taking into account, among other matters, the costs or other burdens of complying with such request."

Section 1.03 Closing; Deferred Closings . Article II of the Purchase Agreement (Closing; Deferred Closings) is hereby amended as follows:

(i) Section 2.01 of the Purchase Agreement (Closing) is hereby amended and restated in its entirety as follows:

"The closing of the purchase and sale of the Transferred Assets and Transferred Equity Interests (including the U.S. Merger) and the assumption of the Assumed Liabilities (the " Closing ") shall take place at the offices of Wachtell, Lipton, Rosen & Katz in New York, New York, at 10:00 a.m., New York City time, on the later of (a) the second business day following the satisfaction (or, to the extent permitted by applicable Law, waiver) of the conditions set forth in Article V and (b) the first calendar day of the first fiscal month of Seller immediately following the fiscal month of Seller in which such satisfaction (or waiver) occurs (excluding in each case those conditions intended to be satisfied at the Closing but subject to their satisfaction or, to the extent permitted by

applicable Law, waiver at such time) (provided that the Closing shall not occur prior to July 29, 2017), or on such other date as the parties hereto may agree. The date on which the Closing occurs is referred to in this Agreement as the " Closing Date ." The Closing shall be deemed to occur and be effective at 12:01 A.M., local time, on the Closing Date. The parties hereto specifically acknowledge that time is of the essence because Seller's intention to exit the Business is or will become known to its employees, customers, suppliers and others having dealings with Seller."

(ii) Section 2.02(a) of the Purchase Agreement (Transferred Assets and Transferred Equity Interests) is hereby amended and restated in its entirety as follows:

"Pursuant to the terms and subject to the conditions set forth in this Agreement, at the Closing, Seller will, and will cause the relevant Asset Selling Affiliates to, in accordance with Exhibit L (the " Closing Structure "), sell, convey, assign, and transfer to Buyer, and Buyer will purchase, acquire and accept, the Transferred Assets, free and clear of all Liens other than Permitted Liens. Accordingly, Seller will, or will cause the relevant Asset Selling Affiliates to, execute and deliver at the Closing a general assignment and bill of sale substantially in the form of Exhibit B (the " General Assignment "), a general patent assignment substantially in the form of Exhibit C (the " Patent Assignment ") and a general trademark assignment substantially in the form of Exhibit D (the " Trademark Assignment ") and at the Closing such other instruments of conveyance, assignment and transfer as Buyer reasonably requests (the form and substance of which shall be mutually agreed between the parties), in each case to convey to Buyer all of Seller's and/or each Asset Selling Affiliate's right, title and interest in and to the applicable Transferred Assets. In addition, pursuant to the terms and subject to the conditions set forth in this Agreement, at the Closing, Seller will, and will cause the relevant Stock Selling Affiliates to, in accordance with the Closing Structure, sell, convey, assign, and transfer to Buyer or Buyer's applicable Affiliates designated in accordance with Section 2.02(f) , and Buyer or its applicable Affiliates designated in accordance with Section 2.02(f) will purchase, acquire and accept (including indirectly by means of the U.S. Merger), the Transferred Equity Interests (and will indirectly acquire and accept by means of such purchase acquisition and acceptance, the Transferred Equity Interests in any Transferred Company that is a subsidiary of another Transferred Company), free and clear of all Liens. Accordingly, Seller will, or will cause the relevant Stock Selling Affiliates to, deliver at the Closing stock certificates representing the Transferred Equity Interests, together with a stock power endorsed in blank, to the extent that such Transferred Equity Interests are in certificated form, and to the extent such Transferred Equity Interests are not in certificated form, other evidence of assignment."

(iii) Section 2.02(e) of the Purchase Agreement (Country Transfer Agreements) is hereby amended and restated in its entirety as follows:

> "To the extent required by applicable Law or as deemed necessary by either of the parties hereto, the transfer of each Country Unit will be effected pursuant to a short-form agreement or one or more instruments of transfer, such as a bill of sale, share transfer agreement, business transfer agreement, real estate transfer agreement or other asset assignment document, which agreement shall be prepared by Seller and shall be on terms mutually agreed between the parties hereto and consistent with and as close as reasonably possible to the applicable terms of this Agreement (each, a " Country Transfer Agreement "). Unless otherwise agreed by Buyer and Seller, the parties shall enter into the Country Transfer Agreements as soon as reasonably practicable after the date hereof and not later than the Closing. For the avoidance of doubt, Country Transfer Agreements with respect to each Deferred Closing Country will not be executed or delivered prior to or on the Closing Date, but shall instead be executed in connection with the applicable Deferred Closing."

(iv) Section 2.02(f) of the Purchase Agreement (Designation of Affiliates) is hereby amended and restated in its entirety as follows:

> "To the extent that any of the Transferred Assets or Transferred Equity Interests are under the control of any of Seller's Affiliates, Seller shall cause its Affiliates to promptly take such legal action as may be necessary to consummate the transfer to Buyer and its Affiliates of such Transferred Assets or Transferred Equity Interests under terms and conditions which are consistent with and subject to the terms of this Agreement. Prior to, and in any event at least thirty (30) days in advance of, the Closing or the applicable Deferred Closing (as applicable), Buyer may designate, with the consent of Seller (which consent shall not be unreasonably withheld), one or more Affiliates to, at the Closing or the applicable Deferred Closing (as applicable), (i) acquire all or part of the Transferred Assets (or applicable Deferred Assets) or Transferred Equity Interests, (ii) assume all or part of the Assumed Liabilities (or applicable Deferred Liabilities) or (iii) pay the Deferred Closing Country Amount pursuant to Section 2.11(h) , in each case related to the applicable Country Unit, as the case may be, in which event all references herein to Buyer will be deemed to refer to such Affiliates, as appropriate; provided , however , that no such designation will in any event limit or affect the obligations of Buyer under this Agreement to the extent not performed by such Affiliates."

(v) Section 2.02(g) of the Purchase Agreement (Transferred Assets Subject to Third-Party Consent) is hereby amended and restated in its entirety as follows:

> "With respect to each Product, the parties shall use reasonable best efforts to ensure that, effective as of the Closing or the applicable Deferred Closing (as applicable), or as soon as reasonably practicable thereafter, either (A) (1) the Product Registrations that constitute Transferred Assets shall have transferred to, or shall have been approved in writing by the applicable Governmental Entity for transfer to, Buyer or its designee or (2) Buyer shall have obtained a Product Registration (including any re-registrations) that enables Buyer or its designee to manufacture, distribute and market such Product in each applicable jurisdiction, or (B) Buyer or its designee otherwise shall have either (1) acceded to Seller's or its Affiliate's rights in respect of manufacturing, distributing and marketing such Products under such Product Registrations, including by Seller or an Affiliate of Seller designating Buyer or its designee as an authorized agent with respect to such Products, or (2) been designated as a manufacturing, sales or distribution agent with respect to the Products under such Product Registrations, in the case of this clause (B), pursuant to reasonable, lawful and customary arrangements to effectuate the foregoing (the time at which any of the foregoing occurs with respect to a Product Registration (or, if earlier, the expiration of such Product Registration in accordance with its terms), the " Product Registration Transfer Time "). If the Product Registration Transfer Time shall not have occurred on the Closing Date or the applicable Deferred Closing Date (as applicable) with respect to any such Product Registration, until such Product Registration Transfer Time with respect to such Product Registration, (X) the parties will continue to use reasonable best efforts to ensure that the Product Registration Transfer Time with respect to such Product occurs as soon as reasonably practicable after the Closing or the applicable Deferred Closing Date (as applicable), (Y) Seller shall, and shall cause its subsidiaries to, consent to Buyer's and its Affiliates' use of such Product Registration for the continued operation of the Business with respect to such Product after the Closing or the applicable Deferred Closing Date (as applicable), and (Z) if requested by Buyer, Seller shall, and shall cause its subsidiaries to, provide Buyer, to the fullest extent possible, pursuant to an arrangement reasonably satisfactory to Seller and Buyer, the exclusive net benefit of such Product Registration (including, to the extent not able to be conducted by Buyer and its Affiliates after the Closing or the applicable Deferred Closing Date (as applicable) as result of the failure of the Product Registration Transfer Time to occur, by Seller and its subsidiaries continuing to conduct the Business with respect to such Product in substantially the same manner and with substantially the same level of efforts and resources as conducted by Seller and its subsidiaries prior to the Closing) by passing through all revenues received by Seller and its

subsidiaries with respect to the Products under such Product Registration from the Closing Date or the applicable Deferred Closing Date (as applicable) through such Product Registration Transfer Time, less only such amount of costs and expenses (including Taxes) as Seller and its Affiliates incur or become liable for in connection with any such arrangements with respect to such Products (other than any such costs and expenses that are duplicative of documented costs and expenses actually incurred by Buyer and its Affiliates in connection the conduct of the Business with respect to such Products). The parties agree they will cooperate to minimize the costs and expenses incurred in connection with the foregoing arrangements, including by using commercially reasonable efforts to avoid duplicative or incremental costs and expenses. Furthermore, the parties agree that Seller and its Affiliates shall be permitted to utilize their respective ordinary course transfer pricing in connection with the foregoing arrangements, including in connection with any sale of Products from Seller or its Affiliates to Buyer or its Affiliates. In the case of the occurrence of the Product Registration Transfer Time under clause (B) of the definition thereof with respect to any Product Registration, (x) unless the parties agree otherwise, the arrangements contemplated by such clause (B) with respect to a Product shall terminate reasonably promptly upon the occurrence of any of the events contemplated by clause (A) of the definition of Product Registration Transfer Time and (y) unless Buyer requests otherwise, the parties will continue to use reasonable best efforts to ensure that one of the events contemplated by clause (A) of the definition of Product Registration Transfer Time occurs with respect to such Product Registration as soon as reasonably practicable after the Closing or the applicable Deferred Closing (as applicable). In addition to the foregoing, to the extent that the sale, assignment, transfer, conveyance or delivery or attempted sale, assignment, transfer, conveyance or delivery to Buyer (or one of its Affiliates) of any Transferred Asset is prohibited by any applicable Law or would require any governmental or third-party authorizations, approvals (including Anti-Trust Approvals), consents or waivers and such authorizations, approvals, consents or waivers shall not have been obtained prior to the Closing or the applicable Deferred Closing (as applicable), this Agreement shall not constitute a sale, assignment, transfer, conveyance or delivery thereof. From the date hereof until eighteen (18) months after the Closing Date, the parties shall use their respective reasonable best efforts to cooperate with each other to obtain promptly such authorizations, approvals, consents or waivers and to give any notices required for the transfer of such Transferred Asset and to obtain from third parties an approval or consent to establish a new contract with Buyer or its designated Affiliate with respect to the portion of any Commingled Contract related to the Business, pursuant to which Buyer or its designated Affiliate will have access to the rights and benefits of such

Commingled Contract with respect to the Business on substantially the same terms and conditions provided to Seller and its Affiliates prior to the Closing, or to assign such portion to Buyer or its designated Affiliate; provided , however , that Seller shall not be required to pay any consideration (other than customary filing and application fees typically paid by a seller or transferee) or make any concession therefor. If such authorization, approval, consent or waiver is obtained, Seller shall promptly assign, transfer, convey or deliver any such Transferred Asset or, if applicable, that portion of any Commingled Contract, as the case may be, to Buyer or its designee pursuant to Section 2.02(f) at no additional cost. Pending the earlier of obtaining such authorization, approval, consent or waiver or the expiration of such eighteen-month (18 month) period, insofar as reasonably practicable and to the extent permitted by applicable Law, Seller shall hold such Transferred Assets for the benefit of Buyer and shall operate such Transferred Assets in a manner to place Buyer in a substantially similar position as if such Transferred Assets had been sold, conveyed, assigned and transferred. Buyer shall use its reasonable best efforts to cooperate with Seller in connection with any actions taken by Seller pursuant to this Section 2.02(g) . Buyer further agrees that, if Seller shall have complied with its obligations under this Agreement with respect to using reasonable best efforts to obtain such authorization, approval, consent or waiver, Seller shall not be in breach of this Agreement solely as a result of the failure to obtain any such authorization, approval, consent or waiver. From the date hereof until eighteen (18) months after the Closing Date, the parties shall use their respective reasonable best efforts to cooperate with each other with respect to the portion of any Commingled Contracts set forth on Schedule 2.02(a)(xi) such that Seller or its designated Affiliate will have access to the rights and benefits of such Commingled Contract with respect to the portion of the Commingled Contract not related to the Business on substantially the same terms and conditions provided to Seller and its Affiliates prior to the Closing; provided, however, that Buyer shall not be required to pay any consideration (other than customary filing and application fees typically paid by a seller or transferee) or make any concession therefor."

(vi) Section 2.03(a) of the Purchase Agreement (Purchase Price; Purchase Price Escrow) is hereby amended and restated in its entirety as follows:

"On or prior to the last business day before the anticipated Closing Date, Seller, Buyer and the Escrow Agent shall execute and deliver the Escrow Agreement. On the last business day before the anticipated Closing Date, subject to the terms and conditions of this Agreement, Buyer shall (or shall cause one or more of its Affiliates as Buyer may designate pursuant to Section 2.02(f) to) deposit in immediately available funds by wire transfer

to the Escrow Account cash in U.S. dollars in an amount exclusive of any Transfer Taxes equal to the Purchase Price plus the Integration Amount (such aggregate, the " Escrow Amount "). The Escrow Amount shall be held in the Escrow Account in accordance with the terms of this Agreement and the Escrow Agreement, and, in connection with the Closing, Buyer shall deliver to the Escrow Agent the Escrow Instructions to release and pay to Seller (or one or more of its Affiliates as Seller may designate) the Escrow Amount by wire transfer of immediately available funds on the next business day immediately following the Closing Date, and subject to the next two succeeding sentences, upon Buyer's delivery of the Escrow Instructions, Buyer shall have no other obligations hereunder in respect of payment of the Purchase Price. Buyer shall not, and shall cause its subsidiaries and representatives not to, take any action that would prevent, impede or delay the Escrow Agent from so delivering the Escrow Amount to Seller pursuant to the preceding sentence and the Escrow Agreement. If the Closing occurs, Buyer shall remain liable to Seller for the Escrow Amount if the Escrow Amount is not so received by Seller as a result of a breach of the preceding sentence. In the event that the Closing does not occur on such anticipated Closing Date, the parties shall enter into a replacement escrow agreement substantially in the form of the Escrow Agreement (or in a form the parties otherwise reasonably agree) (with references to the Escrow Agreement herein being deemed to be references to such replacement escrow agreement) with an escrow agent (who may be the Escrow Agent) and shall follow the steps set forth in the foregoing provisions of this Section 2.03(a) , *mutatis mutandis.* "

(vii) Section 2.03(b) of the Purchase Agreement (Purchase Price; Purchase Price Escrow) is hereby amended and restated in its entirety as follows:

"The parties acknowledge that the portion of the Purchase Price allocable to the Country Unit specified on Schedule 2.03(b) to the Disclosure Letter as set forth in the Initial Allocation (the " Required Local Payment ") will be paid by Buyer to Seller on the Closing Date in U.S. dollars. Within three (3) business days following the Closing Date, (i) Seller shall reimburse to Buyer, in U.S. dollars, the amount of such Required Local Payment and (ii) Buyer's local country Affiliate shall (and Buyer will cause such local country Affiliate to) pay Seller's local country Affiliate an amount, in local currency, equal to the local currency equivalent of such Required Local Payment (as determined using the Exchange Rate) by wire transfer of immediately available funds to the bank account designated by Seller on the date of this Agreement."

(viii) Section 2.04(b) of the Purchase Agreement (Purchase Price Adjustment) is hereby amended and restated in its entirety as follows:

> "Within ninety (90) days after the Closing Date, Seller shall prepare and deliver to Buyer a statement (the " Price Adjustment Statement "), setting forth the following amounts, in each case as of immediately prior to the Closing: (i) the book value of the Inventory, prepared in accordance with the Accounting Policies (the " Closing Inventory ") (it being understood that the Closing Inventory shall include the Inventory of the entire Business as of immediately prior to the Closing) and (ii) the Cash Amount. If the book value of the Closing Inventory is greater than the Inventory Target or less than the Inventory Target by the amounts specified in Section 2.04(f) below, the Purchase Price shall be adjusted as described in Section 2.04(f) below (all of which, for the avoidance of doubt, shall be determined assuming each Deferred Closing occurred at the Closing). If the Cash Amount is greater than the Estimated Cash Amount or less than the Estimated Cash Amount, the Purchase Price shall be adjusted as described in Section 2.04(f) below (all of which, for the avoidance of doubt, shall be determined assuming each Deferred Closing occurred at the Closing)."

(ix) Section 2.05(b) of the Purchase Agreement (Allocation of Purchase Price) is hereby amended and restated in its entirety as follows:

> "Within sixty (60) calendar days after the Closing Date, Buyer shall deliver a reasonable draft of the allocation of the Purchase Price and Assumed Liabilities among each of the Transferred Assets and Transferred Equity Interests (and among the assets held by any Transferred Company disregarded as separate from its owner for U.S. federal income Tax purposes) in a manner that incorporates, reflects and is consistent with the Allocation Method, the Initial Allocation, and Sections 1060 and 338 of the Code (the " Allocation ") to Seller (the " Proposed Allocation "). Except as provided in this subparagraph (b), subparagraph (c) and subparagraph (d) of this Section 2.05 , at the close of business on the thirtieth (30th) calendar day after delivery of the Proposed Allocation, the Proposed Allocation shall become binding upon Buyer and Seller, shall be set forth on Schedule 2.05(b) to the Disclosure Letter (the " Allocation Schedule "), and shall be the Allocation."

(x) Section 2.05(g) of the Purchase Agreement (Allocation of Purchase Price) is hereby amended and restated in its entirety as follows:

> "In the event that the Initial Allocation has not become final pursuant to this Section 2.05 by the Closing, the allocated purchase prices included in the Proposed Initial Allocation shall be used for the purpose of (A) including allocated purchase prices in the Country Transfer Agreements

for each applicable Country Unit and (B) determining the amount of any payments made on the Closing Date to the applicable Selling Affiliate with respect to such Country Unit. The inclusion of such allocated purchase prices shall not be deemed to waive, amend or otherwise alter any of the rights or obligations of the parties set forth in this Section 2.05 and shall not be used for any purpose in resolving, or result in any prejudice with respect to, any dispute with respect to the Proposed Initial Allocation or the Proposed Allocation."

(xi) Section 2.05(h) of the Purchase Agreement (Allocation of Purchase Price) is hereby amended and restated in its entirety as follows:

"In the event that the Allocation has not become final pursuant to this Section 2.05 by the Closing, to the extent that the amounts paid to any Selling Affiliate on the Closing Date are not equal to the portion of the Purchase Price allocated to such Selling Affiliate in the Allocation (with respect to any Selling Affiliate, the " Allocated Purchase Price "), the parties shall and shall cause their respective Affiliates to take all necessary actions to refund, repay and redistribute as promptly as reasonably practicable any amounts paid to any Selling Affiliate in excess of such Selling Affiliate's Allocated Purchase Price, such that, after giving effect to any such refunds, repayments and redistributions, the amounts received by each Selling Affiliate shall be equal to such Selling Affiliate's Allocated Purchase Price."

(xii) Section 2.05 of the Purchase Agreement (Allocation of Purchase Price) is hereby amended and supplemented by adding the following new Section 2.05(i) , which provides as follows:

"With respect to any Deferred Closing Country, if, in connection with the applicable Deferred Closing, an allocation of the relevant portion of the Purchase Price among the assets and liabilities transferred in such Deferred Closing is required by applicable Law, and the Allocation has not become final pursuant to this Section 2.05 at the time of such Deferred Closing, the parties shall agree on an allocation of the relevant portion of the Purchase Price and Assumed Liabilities among the applicable Deferred Assets and Deferred Liabilities of the applicable Deferred Business (each, a " Suballocation "). Any such Suballocation shall be consistent with the Initial Allocation. If Seller and Buyer are unable to mutually agree on any such Suballocation, such disagreement shall be referred to the Accounting Firm promptly for review and resolution (in accordance with the procedure set forth in Section 2.04)."

(xiii) The reference to "Delivery by Seller" in Section 2.08 of the Purchase Agreement is hereby replaced with a reference to "Closing Deliveries by Seller," and the lead-in to Section 2.08 is hereby amended by adding the phrase "or prior to" between "At" and "the Closing."

(xiv) Section 2.08(c) of the Purchase Agreement (Closing Deliveries by Seller) is hereby amended and restated in its entirety as follows:

"duly executed counterparts of the Ancillary Agreements contemplated by Section 7.09 ;"

(xv) Section 2.08(f) of the Purchase Agreement (Closing Deliveries by Seller) is hereby amended and restated in its entirety as follows:

"duly executed counterparts of any Country Transfer Agreement (except for those Country Units subject to Section 2.11);"

(xvi) Section 2.08 of the Purchase Agreement (Closing Deliveries by Seller) is hereby amended and supplemented by adding the following new Section 2.08(k) , which provides as follows:

"an irrevocable written authorization substantially in the form set forth as Exhibit Q hereto (" Merger Authorization ") and a counterpart signature page to the Agreement and Plan of Merger substantially in the form set forth as Exhibit R hereto (the " U.S. Merger Agreement "), executed by InnerDyne Holdings."

(xvii) The reference to "Delivery by Buyer" in Section 2.09 of the Purchase Agreement is hereby replaced with a reference to "Closing Deliveries by Buyer," and the lead-in to Section 2.09 is hereby amended by adding the phrase "or prior to" between "At" and "the Closing."

(xviii) Section 2.09(a) of the Purchase Agreement (Closing Deliveries by Buyer) is hereby amended and restated in its entirety as follows:

"a true and valid copy of the Escrow Instructions delivered to the Escrow Agent;"

(xix) Section 2.09(d) of the Purchase Agreement (Closing Deliveries by Buyer) is hereby amended and restated in its entirety as follows:

"duly executed counterparts of the Ancillary Agreements contemplated by Section 7.09 ;"

(xx) Section 2.09(e) of the Purchase Agreement (Closing Deliveries by Buyer) is hereby amended and restated in its entirety as follows:

> "duly executed counterparts of any Country Transfer Agreement (except for those Country Units subject to Section 2.11);"

(xxi) Section 2.09(h) of the Purchase Agreement (Closing Deliveries by Buyer) is hereby amended and restated in its entirety as follows:

> "a counterpart signature page to the U.S. Merger Agreement, executed by Cardinal Merger Sub."

(xxii) The following text is hereby inserted at the end of Section 2.09 of the Purchase Agreement (Closing Deliveries by Buyer):

> "In addition, at the Closing, consistent with Section 2.03(a) , Buyer will deliver or cause to be delivered to the Escrow Agent (with a copy to Seller and its counsel) irrevocable written instructions in form and substance as set forth in the Escrow Agreement (the " Escrow Instructions ")."

(xxiii) Article II is hereby amended and supplemented by adding the following new Section 2.10 titled "U.S. Merger.", which provides as follows:

> "(a) Notwithstanding anything to the contrary in this Agreement, conveyance, assignment, transfer and delivery by Seller or its Affiliates, and acceptance by Buyer, of InnerDyne Holdings, Inc., a Delaware corporation (" InnerDyne Holdings "), shall be effected by the merger of Cardinal Health 527, Inc., a Delaware corporation and a wholly owned subsidiary of Buyer (" Cardinal Merger Sub "), with and into InnerDyne Holdings. On the terms and subject to the conditions set forth in this Agreement and the U.S. Merger Agreement, and in accordance with the General Corporation Law of the State of Delaware (the " DGCL "), on the Closing Date, the parties shall cause Cardinal Merger Sub to be merged with and into InnerDyne Holdings (the " U.S. Merger "), as provided in this Section 2.10 . At the U.S. Merger Effective Time, the separate corporate existence of Cardinal Merger Sub shall cease, and InnerDyne Holdings shall continue as the surviving corporation in the U.S. Merger (the " U.S. Surviving Corporation ").
>
> (b) On the last business day before the Closing Date, Buyer and Seller shall, pursuant to Section 103(c)(4) of the DGCL, through Buyer's counsel, deliver to (but not file with) the Secretary of State of the State of Delaware (the " Delaware Secretary ") a certificate of merger in the form set forth as Exhibit S hereto (or otherwise as mutually agreed by Seller and Buyer), dated as of the Closing Date, relating to the U.S. Merger (the " U.S. Certificate of Merger ") with instructions that the Delaware Secretary

not file the U.S. Certificate of Merger until written instructions (which may be by email) are received from Buyer or its counsel to make such filing. Buyer hereby agrees that neither it nor any of its subsidiaries or representatives shall instruct or authorize the Delaware Secretary or any other Person to file or cause to be filed the U.S. Certificate of Merger unless and until the Merger Authorization is received from Seller at the Closing.

(c) After receipt of the Merger Authorization from Seller, as soon as practicable after the Closing and on the Closing Date, Buyer shall send or cause to be sent an email to the Delaware Secretary authorizing the Delaware Secretary to file (or shall cause to be filed) the U.S. Certificate of Merger with an effective time of the Closing (the time the U.S. Merger becomes effective, the " U.S. Merger Effective Time "). Seller shall not, and shall cause its subsidiaries and representatives not to, take any action that would prevent, impede or delay the Delaware Secretary from filing the U.S. Certificate of Merger pursuant to the preceding sentence.

(d) The U.S. Merger shall have the effects set forth in this Agreement and the applicable provisions of the DGCL.

(e) At the U.S. Merger Effective Time, by virtue of the U.S. Merger and without any action on the part of any holders of any shares of InnerDyne Common Stock or Cardinal Merger Sub Common Stock, (i) each share of InnerDyne Common Stock issued and outstanding immediately prior to the U.S. Merger Effective Time shall be cancelled for no consideration, shall cease to exist and shall no longer be outstanding and (ii) each share of Cardinal Merger Sub Common Stock issued and outstanding immediately prior to the U.S. Merger Effective Time shall be converted into one fully paid and nonassessable share of common stock, par value $0 per share, of the U.S. Surviving Corporation, and be owned by Buyer, and shall constitute the only outstanding shares of capital stock of the U.S. Surviving Corporation.

(f) The certificate of incorporation and bylaws of InnerDyne Holdings, as in effect immediately prior to the U.S. Merger Effective Time, shall be, as of the U.S. Merger Effective Time, amended to be identical to that set forth as Exhibit A and Exhibit B , respectively, to the U.S. Merger Agreement and shall be the certificate of incorporation and bylaws, respectively, of the U.S. Surviving Corporation until thereafter changed or amended as provided therein or by applicable Law.

(g) The directors of Cardinal Merger Sub immediately prior to the U.S. Merger Effective Time shall be, as of the U.S. Merger Effective Time, the directors of the U.S. Surviving Corporation until the earlier of their resignation or removal or until their respective successors are duly elected and qualified, as the case may be, in accordance with the certificate of

incorporation and bylaws of the U.S. Surviving Corporation. The officers of Cardinal Merger Sub immediately prior to the U.S. Merger Effective Time shall be, as of the U.S. Merger Effective Time, the officers of the U.S. Surviving Corporation until the earlier of their resignation or removal or until their respective successors are duly elected or appointed and qualified, as the case may be, in accordance with the certificate of incorporation and bylaws of the U.S. Surviving Corporation."

(xxiv) Article II is hereby amended and supplemented by adding the following new Section 2.11 titled "Deferred Closings.", which provides as follows:

"(a) Notwithstanding anything to the contrary contained in this Agreement (but subject to this Section 2.11(a)), (i) the conveyance, assignment, transfer and delivery by Seller or its Affiliates, and acceptance by Buyer or its Affiliates, of the Transferred Assets not owned by any Transferred Company located in the Country Units set forth on Annex B to the Disclosure Letter (the " Deferred Closing Countries ") and owned or held by a Deferred Title Holder (the " Deferred Assets "), (ii) the transfer to Buyer or its Affiliates of the Employees of the Business who are employed in such Deferred Closing Countries (other than any Non-Commercial Employees) (the " Deferred Employees "), and (iii) the assumption (and obligation to satisfy and discharge when due) by Buyer of the Assumed Liabilities to the extent arising from or relating to the Business conducted in the Deferred Closing Countries or the applicable Deferred Assets or Deferred Employees (the " Deferred Liabilities "), in each case, shall not occur on the Closing Date. For purposes of Article X , however, Buyer shall be deemed to have assumed the Deferred Liabilities on the Closing Date; provided , that (A) the Seller Indemnitees shall not be entitled to indemnification pursuant to Article X for any Damages incurred or suffered by any Seller Indemnitees to the extent resulting from the Deferred Liabilities or the Deferred Business during the Deferred Period to the extent resulting from the fraud, willful misconduct or intentional breach of this Agreement by Seller or its subsidiaries during the Deferred Period, and (B) the Seller Indemnitees shall not be entitled to indemnification pursuant to Article X for any Damages incurred or suffered by any Seller Indemnitees as a result of a third-party Claim to the extent resulting from the Deferred Liabilities or the Deferred Business during the Deferred Period to the extent resulting from the gross negligence of Seller or its subsidiaries during the Deferred Period. For purposes of clarity, the transfer of Non-Commercial Employees shall not be deferred pursuant to this Section 2.11(a) and the Non-Commercial Employees shall transfer as of the Closing Date (or, if applicable, such later date that such employee commences employment with Buyer or one of its Affiliates) pursuant to Section 8.01(c) (provided , that offer letters with respect to such Non-Commercial Employees shall not be required to be issued at least 10 days prior to the Closing Date).

(b) The conveyance, assignment, transfer, delivery and acceptance of the Deferred Assets, the transfer of Deferred Employees and the assumption of the Deferred Liabilities, with respect to a Deferred Closing Country (each such closing, a " Deferred Closing ") shall take place at 10:00 a.m., New York City time, at the offices of Wachtell, Lipton, Rosen & Katz, 51 West 52 Street, New York, New York 10019, or such other time and location specified in the applicable Country Transfer Agreement for such Deferred Closing Country, on the second business day after the date on which Seller (or its Affiliates) no longer has to provide the "finance / accounting" function for such Deferred Closing Country pursuant to the Transition Services Agreement to Buyer (or its Affiliates) (each date on which a Deferred Closing takes place, a " Deferred Closing Date "); provided that, if there is a Closing Legal Impediment in effect with respect to such Deferred Closing, then such Deferred Closing shall occur on the second business day after the date on which such Closing Legal Impediment is no longer in effect and provided , further , that the Deferred Closing for any Deferred Closing Country may occur on an earlier date if agreed in writing by Buyer and Seller. If any earlier Deferred Closing occurs pursuant to the preceding sentence, Buyer and Seller agree to cause their Affiliates to amend the Undisclosed Agency Agreement to include the Country Unit(s) for which such earlier Deferred Closing occurred on terms to be mutually agreed but substantially consistent with those set forth in the Undisclosed Agency Agreement.

(c) At each Deferred Closing, Seller and Buyer shall, or shall cause their respective Affiliates to, execute and deliver such documents and instruments, as may be reasonably necessary to transfer the Deferred Assets and Deferred Liabilities in such Deferred Closing Country to Buyer or its applicable Affiliate (designated in accordance with Section 2.02(f)), in each case consistent with the terms of this Agreement.

(d) It is the intention of the Parties that Buyer shall be entitled to the "net economic benefit" relating to the applicable Deferred Business arising during the applicable Deferred Period, and in connection therewith, each Deferred Title Holder shall retain such title as it has to the Deferred Assets of the applicable Deferred Business and hold such Deferred Assets for the benefit and expense of the applicable Deferred Beneficiary during the applicable Deferred Period. Solely to the extent related to the Deferred Business in a Deferred Closing Country, except as otherwise permitted by this Agreement or consented to by Buyer in writing (such consent not to be unreasonably withheld), (i) Seller agrees to (and to cause the applicable Deferred Title Holders to), (A) use commercially reasonable efforts to run the Deferred Business in the ordinary course consistent with past practice and in good faith and (B) comply with the covenants and agreements set forth in Section 6.01(b) (except Sections 6.01(b)(iv) , 6.01(b)(viii) , 6.01(b)(ix) , 6.01(b)(x) and 6.01(b)(xi) , and Section 6.01(b)(xiv) to the extent related to the

foregoing exclusions), in each case, until the Deferred Closing Date in such Deferred Closing Country, and (ii) Buyer agrees to grant Seller (and the Deferred Title Holders) a right to distribute the Products during the Deferred Period (the " Distribution Right ").

(e) Notwithstanding anything herein to the contrary, Seller's and its Affiliates' obligations to operate the Deferred Business is expressly conditioned on receipt of Products from applicable Affiliates of Buyer that applicable Affiliates of Seller need to operate the Deferred Business in compliance with this Agreement, and Seller and its Affiliates shall have no obligation to otherwise manufacture or procure any products. Applicable Affiliates of Buyer may invoice applicable Affiliates of Seller for such Products; provided that neither Seller or any Affiliate of Seller shall have any obligation to settle any such invoices and that the only payments to be made to Buyer or its applicable Affiliates with respect to such Products (or the Deferred Business) are the payments of any NEB Distribution Fee as provided in Section 2.11(f) .

(f) Following each fiscal month of Seller covering any portion of the Deferred Period, Buyer shall prepare an invoice (using trial balances provided by or on behalf of Seller to Buyer pursuant to the Transition Services Agreement) with respect to the NEB Distribution Fee for such fiscal month and deliver such invoice to Seller (if such NEB Distribution Fee is positive, it will be paid by Seller or its Affiliates for their respective Distribution Right, as provided herein). Seller or its applicable Affiliates shall settle such invoices with Buyer or its applicable Affiliates (in the applicable local currency in which the corresponding sales were made) in accordance with the country specific days sales outstanding (DSO) schedules of Seller set forth in Annex E to the Disclosure Letter (the " DSO Schedules ") in full satisfaction of any open invoices relating to such sales; provided that if any invoice provides for a negative NEB Distribution Fee, Buyer shall pay to Seller or as directed by Seller the absolute value of such negative NEB Distribution Fee within 30 days of such invoice. Any invoices prepared pursuant to this Section 2.11(f) shall comply with applicable VAT and Transfer Tax Laws. For the avoidance of doubt, neither Seller nor any Affiliate of Seller shall have any obligation to pay for any unpaid accounts receivable. Notwithstanding the foregoing, if the percentage of actual bad debt expense associated with the operation of the Deferred Business in any Deferred Closing Country in a particular fiscal month of Seller (calculated in a manner consistent with the Accounting Policies, including with respect to the allocation of any such debt as between the sales of Products of the Deferred Business and sales of products of Seller's other businesses) exceeds three (3) times the Bad Debt Rate applicable for such country, then Buyer agrees to pay or cause its applicable Affiliates to pay to Seller or its applicable Affiliates the amount by which such bad debt expense exceeds the product of (i) the Net Sales in such country in such fiscal

month *multiplied* by (ii) the Bad Debt Rate applicable for such country. Upon payment to Seller or its applicable Affiliates of any amount required to be paid by Buyer pursuant to the previous sentence, Seller or its applicable Affiliates shall convey, assign, and transfer to Buyer all bad debts to which such payment relates, including the rights to receive, collect or enforce such bad debts (provided that the parties shall cooperate in good faith with respect to such collection or enforcement).

(g) Subject to customary confidentiality undertakings comparable to those included in the Confidentiality Agreements, to the extent reasonably required to prepare or review any invoices required to be prepared or prepared pursuant to Section 2.11(f) or any calculation of the bad debt expense associated with the sales of Products of the Deferred Business to the extent Seller asserts such expense is payable, or to the extent such expense has been paid, pursuant to the second to last sentence of Section 2.11(f) , Seller will, during normal business hours (upon at least two (2) business days' written notice from Buyer), (i) make available its relevant personnel as shall be reasonably necessary in connection with the foregoing and (ii) permit Buyer and its duly authorized representatives access to all contracts, books, records and other data relating to the Deferred Businesses and/or the calculation of any NEB Distribution Fee (or any calculation of the bad debt expense associated with the sales of Products of the Deferred Business to the extent Seller asserts such expense is payable, or to the extent such expense has been paid, pursuant to the second to last sentence of Section 2.11(f)) as shall be reasonably necessary in connection with the foregoing, except where such access is prohibited by applicable Law or Contract.

(h) The parties acknowledge that the portion of the Purchase Price allocable to any Deferred Closing Country as set forth in the Initial Allocation (each, a " Deferred Closing Country Amount ") will be paid by Buyer to Seller on the Closing Date in U.S. dollars. On each Deferred Closing Date for each Deferred Closing Country in which a "local payment" is required by applicable Law to purchase the relevant Deferred Assets (as set forth on Schedule 2.11(h) to the Disclosure Letter), (i) Seller shall reimburse to Buyer, in U.S. dollars, the amount of such Deferred Closing Country Amount and (ii) the applicable Deferred Beneficiary shall (and Buyer shall cause such Deferred Beneficiary to) pay to the applicable Deferred Title Holder an amount, in local currency, equal to the local currency equivalent of such Deferred Closing Country Amount (as determined using the Exchange Rate) by wire transfer of immediately available funds to the bank account to be designated by the party that will be receiving such reimbursement or payment, as applicable. Schedule 2.11(h) to the Disclosure Letter sets forth Seller's good-faith estimate as of the date of this Agreement of the portion of the Purchase Price to be allocated to each Deferred Country Unit identified therein for payment in a Foreign Currency."

(xxv) Article II is hereby amended and supplemented by adding the following new Section 2.12 titled "Transferred Inventory.", which provides as follows:

"(a) Notwithstanding anything to the contrary contained in this Agreement (but subject to the last two sentences of this Section 2.12(a)), except (i) for Transferred Inventory that constitutes Finished Goods Inventory not in excess of $50,000 U.S. dollars in the aggregate as of Closing held by Covidien Deutschland GmbH, (ii) for Transferred Inventory that constitutes Finished Goods Inventory owned by Covidien AG on behalf of or for the benefit of Especialidades Medicas Kenmex SA de CV and (iii) for Transferred Inventory that constitutes Finished Goods Inventory for which title is held by any of the Transferred Companies, the conveyance, assignment, transfer and delivery by Seller or its Affiliates, and acceptance by Buyer or its Affiliates, of legal title to Transferred Inventory that constitutes Finished Goods Inventory shall not occur on the Closing Date (the " Deferred Inventory "). For the avoidance of doubt, Deferred Inventory will include Transferred Inventory held by Medtronic Australasia Pty. Limited. For purposes of Article X , however, Buyer shall be deemed to have assumed the Assumed Liabilities relating to or arising out of such Deferred Inventory on the Closing Date (without limiting clause (b) below). This Section 2.12 shall not be applicable to the determination of Closing Inventory, and Closing Inventory shall be determined assuming this Section 2.12 was not applicable.

(b) Seller and/or its Affiliates shall hold the Deferred Inventory for the benefit of, and at the expense and risk of loss to, Buyer and its Affiliates, and provide distribution services with respect to the Deferred Inventory on behalf of Buyer and/or its Affiliates pursuant to the terms of the Transition Services Agreement (such services, the " Distribution Services "). Subject to the express liability allocation provisions of the Transition Services Agreement with respect to Services to the extent relating to Deferred Inventory, Buyer and/or its Affiliates shall bear all risk of loss or damage to such Deferred Inventory, regardless of whether such Deferred Inventory is held by Seller or any of its Affiliates in the course of Seller and/or its Affiliates' provision of the Distribution Services; provided that neither Buyer nor any Affiliate thereof shall bear any risk of loss or similar liability for any loss or damage of any Deferred Inventory to the extent resulting from the fraud, willful misconduct or intentional breach of this Agreement by Seller or its Affiliates following the Closing.

(c) Upon the conclusion of all Distribution Services in a Country Unit, Seller will, and will cause the relevant Asset Selling Affiliates to, sell, convey, assign, and transfer to Buyer or its designee all Deferred Inventory in the applicable Country Unit, free and clear of all Liens other than Permitted Liens."

Section 1.04 Representations and Warranties of Seller . Article III of the Purchase Agreement (Representations and Warranties of Seller) is hereby amended as follows:

(i) The first paragraph of Article III of the Purchase Agreement is hereby amended and restated in its entirety as follows:

> "Buyer acknowledges and agrees that the Transferred Assets are sold "as is, where is" and Buyer agrees to accept the Transferred Assets on the Closing Date or the applicable Deferred Closing Date (as applicable) in the condition they are in at the place they are located on such Closing Date or the applicable Deferred Closing Date (as applicable) based on its own inspection, examination and determination with respect to all matters, and without reliance upon any express or implied representations or warranties of any nature made by, on behalf of or imputed to Seller, other than the representations and warranties of Seller expressly set forth in this Agreement. BUYER AGREES THAT THE REPRESENTATIONS AND WARRANTIES GIVEN HEREIN BY SELLER ARE IN LIEU OF, AND BUYER HEREBY EXPRESSLY WAIVES ALL RIGHTS TO, ANY IMPLIED WARRANTIES THAT MAY OTHERWISE BE APPLICABLE BECAUSE OF THE PROVISIONS OF THE UNIFORM COMMERCIAL CODE OR ANY OTHER STATUTE, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE."

Section 1.05 Certain Covenants . Article VI of the Purchase Agreement (Certain Covenants) is hereby amended as follows:

(i) Section 6.05(e) of the Purchase Agreement (Commercially Reasonable Efforts; Regulatory Approvals; Access) is hereby amended and restated in its entirety as follows:

> "Seller shall give Buyer and its accountants, legal counsel and other representatives reasonable access, during normal business hours and without undue interruption of the Business throughout the period prior to the Closing or, in the case of the Deferred Business, the applicable Deferred Closing (as applicable), to all of the properties, books and records (other than records relating to Income Taxes and attorney-client privileged communications and, for the avoidance of doubt, other than where access to such information is prohibited by applicable Law) relating to the Business, and will furnish, at Buyer's expense, Buyer, its accountants, legal counsel and other representatives during such period all such information (other than records relating to Income Taxes and attorney-client privileged communications and, for the avoidance of doubt, other than where access to such information is prohibited by applicable Law) concerning the affairs of the Business as Buyer may reasonably request; provided that this Section 6.05(e) shall not entitle Buyer or its accountants, legal counsel or other representatives to contact any third party doing business with Seller or access the properties, books or

records of any such third party, in each case without Seller's prior written consent (which consent shall not be unreasonably withheld). Buyer will hold in confidence all information so obtained in accordance with Section 7.12 . Nothing in this Agreement shall limit any of the parties' rights of discovery."

(ii) Section 6.07 of the Purchase Agreement (Transferred Companies Assets and Liabilities) is hereby amended and restated in its entirety as follows:

"Prior to the Closing, Seller shall take or cause to be taken, such action as is necessary or appropriate to transfer, assign or convey (i) any assets owned or held by the Transferred Companies other than those that would constitute Transferred Assets or (ii) any liabilities or obligations of the Transferred Companies other than those that would constitute Assumed Liabilities, in each case, to Seller or an Affiliate of Seller such that as of the Closing, (x) the assets owned or held by the Transferred Companies consist solely of assets that would otherwise constitute Transferred Assets pursuant to clauses (i)–(xvi) and (xviii) of Annex 2.02(a) and (y) the liabilities and obligations of the Transferred Companies consist solely of liabilities and obligations that would otherwise constitute Assumed Liabilities pursuant to clauses (i)–(x) of Annex 2.02(c) . Prior to or following the Closing, Buyer shall provide to Seller the necessary information and deliver such assignments, transfers, consents and other documents and instruments as may be reasonably required to permit Seller at its expense to effect and perfect the transfer of any registrations of Patents and Trademarks that constitute Excluded Assets but which are held by a Transferred Company. Notwithstanding anything in this Agreement to the contrary (but without limiting Seller's and Buyer's obligations after the Closing under Article VII and Article X in respect of Pre-Closing Accounts Receivable and Pre-Closing Accounts Payable), Seller and its Affiliates shall not be required to transfer, assign or convey any Pre-Closing Accounts Receivable that are owned or held by any of the Transferred Companies or any Pre-Closing Accounts Payable that are liabilities or obligations of any of the Transferred Companies at or prior to the Closing (it being understood that following the Closing any Pre-Closing Accounts Receivable (including any cash received in respect thereof) shall in any event be treated as Excluded Assets and any Pre-Closing Accounts Payable shall in any event be treated as Excluded Liabilities). Seller shall deliver or cause to be delivered to Buyer a schedule setting forth Pre-Closing Accounts Receivable and Pre-Closing Accounts Payable within thirty (30) days of the Closing Date. Notwithstanding anything in this Agreement to the contrary, certain equipment that would constitute Excluded Assets may continue to be owned following the Closing by Kendall-Gammatron Limited and Covidien Manufacturing Solutions, S.A., and such equipment shall be subject to the provisions of the Master Manufacturing and Supply Agreement, including with respect to the transfer thereof to Seller or its applicable Affiliate as provided therein."

(iii) The reference to "Innerdyne Holdings, Inc." in Section 6.09(c) of the Purchase Agreement (Closing Structure) is hereby replaced with a reference to "InnerDyne Holdings, Inc."

(iv) Section 6.11(a) of the Purchase Agreement (Certain Swiss Tax Matters) is hereby amended and restated in its entirety as follows:

> "Subject to Section 6.11(b) , Seller shall use its reasonable best efforts to minimize the Swiss Tax Rate. To the extent Seller receives, prior to the Closing, a Swiss Tax Ruling, the Purchase Price shall be reduced by an amount equal to the Swiss Sale Amount, less (i) the sum of (A) the Estimated Swiss Gain and (B) (x) the Estimated Swiss Gain multiplied by the Swiss Tax Rate, further multiplied by (y) the Swiss Gross-Up, less (ii) the Estimated Swiss Tax Basis."

Section 1.06 Post-Closing Covenants . Article VII of the Purchase Agreement (Post-Closing Covenants) is hereby amended as follows:

(i) Section 7.01 of the Purchase Agreement (Certain IP Matters) is hereby amended and supplemented by adding a new Section 7.01(d) , which provides as follows:

> "Buyer hereby grants, and shall cause its Affiliates to grant, to Seller and its subsidiaries a non-exclusive, royalty free, fully paid-up, irrevocable and worldwide license under all of Buyer's and its Affiliates' IP Rights to the Transferred IP to (A) make, have made, import, use, offer to sell, sell, distribute and otherwise commercialize any Products and services, and (B) use, copy, distribute, disclose, display, sublicense and otherwise exploit in any manner any technology, Products and services, in each case to the extent necessary to own and operate the applicable Deferred Business in the applicable Deferred Closing Countries for Buyer's or its Affiliates' benefit. If Buyer or any of its Affiliates incorporates any of Buyer or its Affiliates' other IP Rights into any of the Products or services being sold or provided by Seller or any of its Affiliates on Buyer's or any of its Affiliates' behalf in connection with the operation of the Deferred Business, Buyer grants (and shall cause its applicable Affiliates to grant) to Seller and its subsidiaries a non-exclusive, royalty free, fully paid-up, irrevocable, worldwide and non-sublicenseable (except to distributors of the Products) license under such other IP Rights to make, have made, import, use, offer to sell, sell, distribute and otherwise commercialize any such Products and services, and to own and operate the applicable Deferred Business, in each case to the extent necessary to provide services to Buyer or its Affiliates with respect to the applicable Deferred Business in the applicable Deferred Closing Countries for Buyer's or its Affiliates' benefit until the applicable Deferred Closing. Buyer and Seller shall in good faith cooperate with the objective that all products and all materials using the Buyer and its Affiliates' IP Rights as described in this paragraph in the operation of the Deferred Business meet at least the same

high standards of quality, appearance, service and other standards that are observed immediately prior to the Closing Date by Seller and its Affiliates (or Buyer and its Affiliates with respect to Buyer's and its Affiliates' other IP Rights). Seller's use of any Transferred IP or Buyer's and its Affiliates' other IP Rights and any goodwill generated thereby will inure to the benefit of Buyer and its Affiliates. Seller's rights hereunder shall terminate immediately, fully and completely, upon the final Deferred Closing."

(ii) Section 7.04 of the Purchase Agreement (Insurance) is hereby amended and restated in its entirety as follows:

"(a) Except (1) with respect to insurance proceeds that constitute Transferred Assets pursuant to clause (xiv) of Annex 2.02(a) , or (2) as provided in Section 7.04(b) or Section 7.04(c) , the coverage under all insurance policies related to the Business and arranged or maintained by Seller or its Affiliates is only for the benefit of Seller and its Affiliates, and not for the benefit of Buyer or the Business. Except as set forth in Section 7.04(b) or Section 7.04(c) , as of the Closing Date (or, solely with respect to the Deferred Business, the applicable Deferred Closing Date), Buyer agrees to arrange for its own insurance policies (including self-insurance or similar arrangements funded directly or indirectly by Buyer or any of its Affiliates) with respect to the Business covering all periods following the Closing (or, solely with respect to the Deferred Business, the applicable Deferred Closing Date) and, without prejudice to any right to indemnification pursuant to this Agreement or any other Transaction Document, agrees not to seek, through any means, to benefit from any of Seller's or its Affiliates' insurance policies which may provide coverage for claims relating in any way to the Business.

(b) Solely to the extent required for Buyer and its Affiliates to comply with applicable Law that requires Buyer and its Affiliates to maintain workers compensation insurance coverage for Transferred Employees for the period prior to the Closing (or with respect to the Deferred Employees, the applicable Deferred Closing), with respect to claims relating to acts, omissions, events or circumstances relating to Transferred Employees that occurred or existed prior to the Closing (or solely with respect to the Deferred Employees, the applicable Deferred Closing) (" Pre-Closing WC Claims ") that are covered by Seller's or its Affiliates' workers compensation insurance policies relating to Transferred Employees (or the Deferred Employees, as applicable) (" Workers Compensation Policies "), Seller hereby authorizes Buyer, to the extent permitted by such Workers Compensation Policies, to report Pre-Closing WC Claims directly to the provider of such Workers Compensation Policies and shall use commercially reasonable efforts (at Buyer's expense), to the extent permitted by such Workers Compensation Policies, to assist Buyer's efforts to obtain the benefit of such insurance coverage with respect to such Pre-Closing WC Claims; provided that Buyer shall keep Seller reasonably informed of

each claim and Buyer shall exclusively bear and shall promptly either directly pay (in lieu of Seller or its Affiliates having to first pay) or repay or reimburse Seller or its Affiliates for the amount of each claim and related costs or expenses (including increased premiums) and for the amount of any deductibles or self-insured retentions (including captive insurance amounts) associated with any such claims under the Workers Compensation Policies and Buyer and its Affiliates shall be liable for any and all uninsured, uncovered, unavailable or uncollectible amounts of such payments; and provided further that Buyer and its Affiliates shall use commercially reasonable efforts (including prior to the Closing) to obtain, as soon as reasonably practicable, replacement insurance policies (including self-insurance) such that Buyer and its Affiliates are no longer legally required to have access to the Workers Compensation Policies. For the avoidance of doubt, nothing in this Agreement shall require Seller or its Affiliates to extend or purchase any insurance policy.

(c) Solely to the extent required for Buyer and its Affiliates to comply with applicable Law that requires Buyer and its Affiliates to maintain automobile liability insurance coverage for the Business or the Transferred Employees for the period prior to the Closing (or solely with respect to the Deferred Business or Deferred Employees, the applicable Deferred Closing), with respect to claims relating to events or incidents relating to the Business or the Transferred Employees that occurred prior to the Closing (or solely with respect to the Deferred Business or Deferred Employees, the applicable Deferred Closing) (" Pre-Closing Auto Claims ") that are covered by Seller's or its Affiliates' automobile liability insurance policies relating to the Business or the Transferred Employees (" Auto Policies "), Seller hereby authorizes Buyer, to the extent permitted by such Auto Policies, to report Pre-Closing Auto Claims directly to the provider of such Auto Policies and shall use commercially reasonable efforts (at Buyer's expense), to the extent permitted by such Auto Policies, to assist Buyer's efforts to obtain the benefit of such insurance coverage with respect to such Pre-Closing Auto Claims; provided that Buyer shall keep Seller reasonably informed of each claim and Buyer shall exclusively bear and shall promptly either directly pay (in lieu of Seller or its Affiliates having to first pay) or repay or reimburse Seller or its Affiliates for the amount of each claim and related costs or expenses (including increased premiums) and for the amount of any deductibles or self-insured retentions (including captive insurance amounts) associated with any such claims under the Auto Policies and Buyer and its Affiliates shall be liable for any and all uninsured, uncovered, unavailable or uncollectible amounts of such payments; and provided further that Buyer and its Affiliates shall use commercially reasonable efforts (including prior to the Closing) to obtain, as soon as reasonably practicable, replacement insurance policies (including self-insurance) such that Buyer and its Affiliates are no longer legally required to have access to the Auto Policies. For the avoidance of doubt, nothing in this

Agreement shall require Seller or its Affiliates to extend or purchase any insurance policy.

(d) Buyer or its Affiliates may from time to time during the Deferred Period arrange for its own insurance with respect to Deferred Assets pursuant to this Agreement. Seller and its Affiliates shall use commercially reasonable efforts, at Buyer's sole cost and expense, to assist Buyer's or its Affiliates' efforts to obtain the benefits of any such insurance with respect to claims relating to any loss or damage of any such Deferred Assets."

(iii) Section 7.06 of the Purchase Agreement (Assurances) is hereby amended and restated in its entirety as follows:

"From and after the Closing Date or the applicable Deferred Closing Date, as applicable, if either Buyer or Seller becomes aware that any of the Transferred Assets has not been transferred to Buyer or that any of the Excluded Assets has been transferred to Buyer, it shall promptly notify the other and the parties hereto shall, as soon as reasonably practicable and, subject to Section 2.02(g) and Section 2.06 , ensure that such property is transferred, with any necessary prior third-party consent or approval, to:

(a) Buyer, in the case of any Transferred Asset which was not transferred at the Closing or the applicable Deferred Closing, as applicable; or

(b) Seller, in the case of any Excluded Asset which was transferred at the Closing or the applicable Deferred Closing, as applicable.

With respect to any Pre-Closing Accounts Receivable held by Buyer at Closing pursuant to Section 6.07 , (A) Buyer and Seller shall cooperate in good faith to establish reasonable payment mechanics for Buyer to comply with this Section 7.06 upon its or its Affiliates' (including the Transferred Companies') receipt of cash received in respect of Pre-Closing Account Receivable and (B) Buyer's obligations under this Section 7.06 with respect to any Pre-Closing Accounts Receivable shall terminate one (1) year after the Closing Date."

(iv) Section 7.07 of the Purchase Agreement (Further Assurances) is hereby amended and restated in its entirety as follows:

"Subject to the terms and conditions of this Agreement, from and after the Closing Date or the Deferred Closing Date, as applicable, each party will execute and deliver, or cause its Affiliates to execute and deliver, all such documents and instruments and will take, or cause its Affiliates to take, all such further actions, in each case as may be reasonably necessary to consummate the transactions contemplated by this Agreement."

(v) Section 7.08(a)(i) of the Purchase Agreement (Preparation and Filing of Tax Returns; Payment of Taxes) is hereby amended and restated in its entirety as follows:

> "Seller shall prepare and file all Tax Returns of the Transferred Companies or in respect of the Transferred Assets or the Business, in each case, that are due (including applicable extensions) before the Closing. Seller shall prepare (x) all income Tax Returns of the Transferred Companies for all taxable periods ending on or before the Closing Date that are due after the Closing (" Pre-Closing Entity Tax Returns "), (y) all income Tax Returns of the Seller or any of its subsidiaries and (z) all Tax Returns in respect of the Deferred Assets, the Deferred Liabilities, the Deferred Business, and the Deferred Inventory for all taxable periods (or portions thereof) beginning on or prior to (A) the applicable Deferred Closing Date (in the case of any Tax Return reflecting Deferred Business Taxes) or (B) the applicable Deferred Inventory Closing Date (in the case of any Tax Return reflecting Deferred Inventory Taxes) (" Deferred Period Tax Returns "). Seller shall prepare all Tax Returns (other than Tax Returns of the Transferred Companies) in respect of the Transferred Assets or the Business for all taxable periods ending on or before the Closing Date that are due after the Closing (" Pre-Closing Business Tax Returns " and, together with Pre-Closing Entity Tax Returns and Deferred Period Tax Returns, " Pre-Closing Tax Returns "). Seller shall also prepare and file all Tax Returns for Transferred Companies that are required to be included in (or filed with) a Tax Return of an affiliated, consolidated, combined, unitary or aggregate group of which Seller or any of its Affiliates (other than a Transferred Company) is parent for Pre-Closing Tax Periods. With respect to any Pre-Closing Tax Return required to be prepared by Seller pursuant to this Section 7.08(a)(i) , (1) such Pre-Closing Tax Returns shall be prepared on a basis consistent with the past practices of the Transferred Companies or with respect to the Transferred Assets or the Business, respectively, unless a different position is required by Law and the parties mutually agree on the resolution of such issue (and each party shall reasonably endeavor to reach such mutual agreement), (2) Seller shall deliver to Buyer for its review and comment, at least thirty (30) days prior to the due date for the filing of such Pre-Closing Tax Return in the case of a separate income Tax Return of the Transferred Companies, and at least ten (10) days prior to the due date for the filing of such Pre-Closing Tax Return in the case of a separate non-income Tax Return of the Transferred Companies or in respect of the Transferred Assets or the Business (in each case taking into account any applicable extensions), a copy of such Tax Return, together with any additional information that Buyer may reasonably request, and (3) Seller shall consider in good faith any reasonable comments submitted by Buyer at least fifteen (15) days prior to the due date of such Pre-Closing Tax Return in the case of a separate income Tax Return of the Transferred Companies, and at least five (5) days prior to the due date for the filing of such Pre-Closing Tax Return in the case of a separate non-income Tax Return of the Transferred Companies or

in respect of the Transferred Assets or the Business (in each case taking into account any applicable extensions). If applicable, Seller shall deliver a revised Pre-Closing Tax Return to Buyer before the due date for the filing of such Pre-Closing Tax Return (taking into account any applicable extensions), and Buyer shall timely file or cause to be timely filed any Pre-Closing Tax Returns."

(vi) Section 7.08(b)(i) of the Purchase Agreement (Refunds) is hereby amended and restated in its entirety as follows:

"Seller shall be entitled to retain, or receive prompt payment from Buyer or any of its subsidiaries or Affiliates (including the Transferred Companies) of, any refund (including any credit in lieu of a refund, which credit arises as a result of an overpayment and which otherwise would have been payable in cash by the relevant Taxing Authority at the election of the taxpayer) received or realized in cash with respect to (x) Taxes attributable to any Transferred Company, the Transferred Assets or the Business for any Pre-Closing Tax Period (other than Transfer Taxes, but including any VAT for which Seller is responsible pursuant to Section 2.06(e)) or (y) Excluded Deferred Taxes, including any such amounts arising by reason of amended Tax Returns filed after the Closing Date, but only to the extent that (A) such refund (or credit) is not the result of an event that occurred after the Closing Date (or after the applicable Deferred Closing Date, in the case of any such refund (or credit) in respect of Excluded Deferred Business Taxes, or after the applicable Deferred Inventory Closing Date, in the case of any such refund (or credit) in respect of Excluded Deferred Inventory Taxes), and (B) such refund (or credit) is not attributable to, and does not result from, a carry back or other use of any item of loss, deduction, credit or other similar item arising in a Post-Closing Tax Period (or in a taxable period beginning after the applicable Deferred Closing Date, in the case of any item arising with respect to Excluded Deferred Business Taxes, or in a taxable period beginning after the applicable Deferred Inventory Closing Date, in the case of any item arising with respect to Excluded Deferred Inventory Taxes) or, in the case of a refund (or credit) of Taxes for a Straddle Period, the use of any such item arising in a Post-Closing Tax Period (or in the case of a refund (or credit) of Excluded Deferred Business Taxes for a taxable period beginning on or prior to the applicable Deferred Closing Date and ending after the applicable Deferred Closing Date, the use of any such item arising in a taxable period beginning after the applicable Deferred Closing Date; or in the case of a refund (or credit) of Excluded Deferred Inventory Taxes for a taxable period beginning on or prior to the applicable Deferred Inventory Closing Date and ending after the applicable Deferred Inventory Closing Date, the use of any such item arising in a taxable period beginning after the applicable Deferred Inventory Closing Date). In connection with the foregoing, if Seller determines that any of the Transferred Companies is entitled to file or make a formal or informal claim

for a refund (to which Seller would be entitled under the first sentence of this Section 7.08(b)(i)) of (x) Taxes (including by filing an amended Tax Return) with respect to a Pre-Closing Tax Period (other than Transfer Taxes or VAT, but including any VAT for which Seller is responsible pursuant to Section 2.06(e)) or (y) Excluded Deferred Taxes, Seller shall be entitled, at Seller's expense, to file or make, or to request that Buyer cause the applicable Transferred Company to file or make, such formal or informal claim for refund, and Seller shall be entitled to control the prosecution of such claim for refund, provided that Seller shall not take any action in connection therewith that would bind Buyer or any of its Affiliates (including any Transferred Company) for a Post-Closing Tax Period (or a taxable period beginning after the applicable Deferred Closing Date, in the case of any refund (or credit) of Excluded Deferred Business Taxes, or a taxable period beginning after the applicable Deferred Inventory Closing Date, in the case of any refund (or credit) of Excluded Deferred Inventory Taxes) or otherwise adversely affect Buyer or any of its Affiliates (including any Transferred Company). Buyer will cooperate, and cause the Transferred Companies to cooperate, with respect to such claim for refund, and will pay, or cause the relevant Transferred Company to pay, to Seller the amount (including interest received from any Taxing Authority) of any related refund (including any credit in lieu of a refund, which credit arises as a result of an overpayment and which otherwise would have been payable in cash by the relevant Taxing Authority at the election of the taxpayer) (to which Seller would be entitled under the first sentence of this Section 7.08(b)(i)) received or realized in cash by Buyer or any Affiliate thereof (including any Transferred Company), net of any unreimbursed costs incurred by Buyer and its Affiliates in respect of such refund and reduced by the amount of any Taxes arising or that would arise as a result of the receipt of such refund or interest thereon, within five (5) days of receipt (or realization in cash) thereof. Buyer and the Transferred Companies shall be entitled to retain, or receive prompt payment from Seller with respect to, any other refund, credit, offset or other similar benefit received or realized with respect to Taxes attributable to any Transferred Company, the Transferred Assets or the Business (other than any such refund, credit, offset or other similar benefit received or realized with respect to Income Taxes of Seller or any of its subsidiaries, but only to the extent such Income Taxes were not Deferred Taxes borne by Buyer as part of the NEB Services Reimbursement Amount, under the Undisclosed Agency Agreement, or otherwise under this Agreement). Notwithstanding any other provision, (x) Seller shall be entitled to any refund, credit or reimbursement for any Transfer Taxes arising from, or relating to, the Internal Restructuring Steps, (y) Buyer shall be entitled to any refund, credit or reimbursement for any Transfer Taxes or VAT arising from, or relating to, any Transfer Taxes or VAT imposed on the transfer of the Transferred Equity Interests and the Transferred Assets to Buyer and assumption of the Assumed Liabilities by Buyer and (z) Buyer shall be entitled to any refund, credit or reimbursement for any Deferred Taxes borne

by Buyer."

(vii) Section 7.08(c)(ii) of the Purchase Agreement (Tax Indemnification) is hereby amended and restated in its entirety as follows:

"Buyer and its Affiliates (including the Transferred Companies) shall indemnify, defend and hold Seller and its Affiliates harmless from and against: (A) for any Post-Closing Tax Period (x) all Tax liabilities (which shall include any costs and expenses, including reasonable legal fees and expenses, attributable to such Tax liabilities) of the Transferred Companies and (y) all Tax liabilities (which shall include any costs and expenses, including reasonable legal fees and expenses, attributable to such Tax liabilities) with respect to the Transferred Assets or the Business (including, for the avoidance of doubt, any Deferred Taxes), in the case of each of clauses (x) and (y), other than any such Tax liabilities that are Excluded Taxes or Excluded Deferred Taxes, (B) all liability for Transfer Taxes for which Buyer is responsible pursuant to Section 2.06(a), (C) all Tax liabilities (which shall include any costs and expenses, including reasonable legal fees and expenses, attributable to such Tax liabilities) attributable to a Buyer Tax Act, unless such Buyer Tax Act is effected with the written consent of Seller, (D) Tax liabilities (which shall include any costs and expenses, including reasonable legal fees and expenses, attributable to such Tax liabilities) attributable to any breach by Buyer or its Affiliates (including, after the Closing, any Transferred Company) of any covenant or other agreement hereunder, or (E) any Taxes (which shall include any costs and expenses, including reasonable legal fees and expenses, attributable to such Taxes) imposed with respect to the excess of, if any, (x) any amount required to be included by Seller or any of its Affiliates in income under Section 951(a) of the Code with respect to a Transferred Company for the tax year of Seller or such Affiliate that includes the Closing Date, over (y) the amount that would have been required to be included by Seller or any of its Affiliates in income under Section 951(a) of the Code with respect to a Transferred Company for the tax year of Seller or such Affiliate that includes the Closing Date had the taxable year of such Transferred Company ended on the Closing Date;"

(viii) Section 7.08(d) of the Purchase Agreement (Tax Contests) is hereby amended and restated in its entirety as follows:

"(i) Buyer shall notify Seller within ten (10) business days of a Tax Proceeding for a Pre-Closing Tax Period with respect to a Transferred Company, provided that the failure to so notify Seller shall not affect Seller's indemnification obligation under Section 7.08(c) except to the extent of any material prejudice actually incurred by Seller.

(ii) With respect to any Tax Proceeding relating to (A) a Pre-Closing Tax Period with respect to a Transferred Company, the Transferred Assets or

the Business (other than a Straddle Period or a Tax Proceeding with respect to any Transfer Taxes or VAT, but including any Tax Proceeding with respect to any VAT for which Seller is responsible pursuant to Section 2.06(e)), (B) a consolidated Tax Return of which Seller or any of its subsidiaries (other than a Transferred Company) is the common parent, or (C) an Income Tax Return (other than a Deferred Period Tax Return) of Seller of any of its subsidiaries (other than a Transferred Company), Seller may choose in its sole discretion (at its expense) to control all Tax Proceedings and may make all decisions taken in connection with such Tax Proceeding (including selection of counsel), and, without limiting the foregoing, may, in its sole discretion, pursue or forego any and all administrative appeals, proceedings, hearings and conferences with any Taxing Authority with respect thereto, and may, in its sole discretion, either pay the applicable Tax liability and sue for a refund or contest the Tax at issue in such Tax Proceeding, provided that, to the extent such Tax Proceeding or the resolution or settlement thereof could have an impact on Buyer or any of its Affiliates (including the Transferred Companies) after the Closing Date, (x) Seller shall provide Buyer with a timely and reasonably detailed account of each phase of such Tax Proceeding and shall consult with Buyer before taking any significant action in connection with such Tax Proceeding and (y) Seller shall not settle, compromise or abandon any such Tax Proceeding without obtaining the prior written consent of Buyer, which consent shall not be unreasonably withheld.

(iii) With respect to any Tax Proceeding relating to a Straddle Period with respect to a Transferred Company, the Transferred Assets or the Business, Buyer may choose in its sole discretion (at its expense) to control all Tax Proceedings and may make all decisions taken in connection with such Tax Proceeding (including selection of counsel), and, without limiting the foregoing, may, in its sole discretion, pursue or forego any and all administrative appeals, proceedings, hearings and conferences with any Taxing Authority with respect thereto, and may, in its sole discretion, either pay the applicable Tax liability and sue for a refund or contest the Tax at issue in such Tax Proceeding, provided that, to the extent such Tax Proceeding or the resolution or settlement thereof could have an impact on Seller or any of its Affiliates with respect to the Pre-Closing Tax Period resulting in an increase of Seller's liability for Taxes pursuant to this Agreement, (x) Buyer shall provide Seller with a timely and reasonably detailed account of each phase of such Tax Proceeding and shall consult with Seller before taking any significant action in connection with such Tax Proceeding and (y) Buyer shall not settle, compromise or abandon any such Tax Proceeding without obtaining the prior written consent of Seller, which consent shall not be unreasonably withheld.

(iv) With respect to any Tax Proceeding relating to both (A) any Deferred Taxes and (B) any Excluded Taxes or Excluded Deferred Taxes (any such Tax Proceeding, a " Joint Tax Proceeding ") (it being understood that a Tax Proceeding relating to a Tax Return that reflects both Deferred Taxes, on the one hand, and Excluded Taxes or Excluded Deferred Taxes, on the other hand, is a Joint Tax Proceeding), Seller may choose in its sole discretion to control all Joint Tax Proceedings and may make all decisions taken in connection with any such Joint Tax Proceeding (including selection of counsel), and, without limiting the foregoing, may, in its sole discretion, pursue or forego any and all administrative appeals, proceedings, hearings and conferences with any Taxing Authority with respect thereto, and may, in its sole discretion, either pay the applicable Tax liability and sue for a refund or contest the Tax at issue in such Joint Tax Proceeding, provided that, to the extent such Joint Tax Proceeding relates to Deferred Taxes, (v) Seller shall provide Buyer with a timely and reasonably detailed account of each phase of such Joint Tax Proceeding and shall consult with Buyer before taking any significant action in connection with such Joint Tax Proceeding, (w) Seller shall consult with Buyer and offer Buyer an opportunity to comment before submitting any written materials prepared or furnished in connection with such Joint Tax Proceeding, (x) Seller shall defend such Joint Tax Proceeding diligently and in good faith as if it were the only party in interest in connection with such Joint Tax Proceeding, (y) Buyer shall be entitled to participate (at its expense) in such Joint Tax Proceeding and, to the extent permitted by the relevant Taxing Authority, attend any meetings or conferences with the relevant Taxing Authority, and (z) Seller shall not settle, compromise or abandon any such Joint Tax Proceeding without obtaining the prior written consent of Buyer, which consent shall not be unreasonably withheld. Buyer and Seller shall bear the expenses of conducting such Joint Tax Proceeding in proportion to the amount of Deferred Taxes, on the one hand, and Excluded Taxes and Excluded Deferred Taxes, on the other hand, at issue in such Joint Tax Proceeding.

(v) Except as otherwise provided in Section 7.08(d)(iv) , with respect to any Tax Proceeding relating to Deferred Taxes (such Tax Proceeding, a " Deferred Tax Proceeding "), Buyer may choose in its sole discretion (at its expense) to control all Deferred Tax Proceedings and may make all decisions taken in connection with any such Deferred Tax Proceeding (including selection of counsel), and, without limiting the foregoing, may, in its sole discretion, pursue or forego any and all administrative appeals, proceedings, hearings and conferences with any Taxing Authority with respect thereto, and may, in its sole discretion, either pay the applicable Tax liability and sue for a refund or contest the Tax at issue in such Deferred Tax Proceeding, provided that, to the extent any such Deferred Tax Proceeding relates to a taxable period (or portion thereof) beginning on or prior to (1) the applicable Deferred Closing Date (in the case of any Deferred Tax Proceeding with respect to

Deferred Business Taxes) or (2) the applicable Deferred Inventory Closing Date (in the case of any Deferred Tax Proceeding with respect to Deferred Inventory Taxes), (v) Buyer shall provide Seller with a timely and reasonably detailed account of each phase of such Deferred Tax Proceeding and shall consult with Seller before taking any significant action in connection with such Deferred Tax Proceeding, (w) Buyer shall consult with Seller and offer Seller an opportunity to comment before submitting any written materials prepared or furnished in connection with such Deferred Tax Proceeding, (x) Buyer shall defend such Deferred Tax Proceeding diligently and in good faith as if it were the only party in interest in connection with such Deferred Tax Proceeding, (y) Seller shall be entitled to participate (at its expense) in such Deferred Tax Proceeding and, to the extent permitted by the relevant Taxing Authority, attend any meetings or conferences with the relevant Taxing Authority, and (z) Buyer shall not settle, compromise or abandon any such Deferred Tax Proceeding without obtaining the prior written consent of Seller, which consent shall not be unreasonably withheld.

(vi) Except as otherwise provided in Section 7.08(d)(ii) , Section 7.08(d)(iii) , Section 7.08(d)(iv) and Section 7.08(d)(v) , Buyer shall exclusively control all Tax Proceedings with respect to the Transferred Companies or otherwise relating to the Transferred Assets or the Business. Notwithstanding anything in Section 7.08(d)(ii) and Section 7.08(d)(iv) to the contrary, Buyer shall have the exclusive right to control any Tax Proceeding described in Section 7.08(d)(i) if Seller fails to, or notifies Buyer in writing that Seller elects not to, defend such Tax Proceeding.

(vii) Buyer, the Transferred Companies and each of their respective Affiliates, on the one hand, and Seller and its respective Affiliates, on the other hand, shall cooperate in contesting any Tax Proceeding, which cooperation shall include the retention and, upon request, the provision to the requesting party of records and information which are reasonably relevant to such Tax Proceeding, and making employees available on a mutually convenient basis to provide additional information or explanation of any material provided hereunder or to testify at proceedings relating to such Tax Proceeding. Buyer and Seller shall execute and deliver such powers of attorney and other documents as are necessary to carry out the intent of this Section 7.08(d) ."

(ix) Section 7.09 of the Purchase Agreement (Ancillary Agreements) is hereby amended and restated in its entirety as follows:

"At the Closing, Buyer and Seller shall enter into, execute and deliver the Transition Services Agreement, substantially in the form attached as Exhibit G-1 (the " Transition Services Agreement "), the Master Manufacturing and Supply Agreement, substantially in the form attached as Exhibit H (the

" Master Manufacturing and Supply Agreement "), the Trademark License Agreement (Buyer as Licensee), substantially in the form attached as Exhibit I-1 (the " Trademark License Agreement 1 "), the Trademark License Agreement (Seller as Licensee), substantially in the form attached as Exhibit I-2 (the " Trademark License Agreement 2 "), the Sorting Service Agreement, substantially in the form attached as Exhibit N (the " Sorting Service Agreement "), the Escrow Agreement, substantially in the form attached as Exhibit O (the " Escrow Agreement ") and the Undisclosed Agency Agreement, substantially in the form attached as Exhibit P (the " Undisclosed Agency Agreement "). Trademark License Agreement 1 and Trademark License Agreement 2 are collectively referred to as the " Trademark License Agreements ". Between the date hereof and the Closing, the parties shall negotiate in good faith to agree on the fees for the services to be provided pursuant to the Transition Services Agreement based on the principles set forth in Exhibit G-2 ."

(x) Section 7.11(c)(iv) of the Purchase Agreement (Non-Solicitation of Employees; Non-Competition) is hereby amended and restated in its entirety as follows:

"exercising its rights or performing or complying with its obligations under or as contemplated by this Agreement or any of the Transaction Documents, including the provision of the Distribution Services and the ownership and/or operation of the Deferred Business in accordance with this Agreement or any Ancillary Agreement; or"

(xi) Section 7.12 of the Purchase Agreement (Confidentiality) is hereby amended and restated in its entirety as follows:

"(a) Each party acknowledges that the information being provided to it in connection with the Transaction and the other transactions contemplated hereby is subject to the terms of each of (1) that certain confidentiality agreement between Buyer and Seller, dated as of December 2, 2016 (the " Business Confidentiality Agreement "), and (2) that certain confidentiality agreement between Buyer and Seller, dated as of April 5, 2017 (together with the Business Confidentiality Agreement, the " Confidentiality Agreements "), the terms of which are incorporated herein by reference in their entirety and shall, subject to the following sentence, survive the Closing; provided that actions taken by the parties to the extent necessary in order to comply with their respective obligations under Section 6.05 hereunder shall not be deemed to be in violation of this Section 7.12 or of the Confidentiality Agreements; provided that the foregoing shall not affect Section 6.05(b) to the extent that Section 6.05(b) specifies that it is subject to this Section 7.12 or the Confidentiality Agreements. Effective upon, and only upon, the Closing, the Business Confidentiality Agreement shall terminate with respect to information relating solely to the Business, the Transferred Companies, the

Transferred Assets and the Assumed Liabilities (including, for avoidance of doubt, any Deferred Assets or Deferred Liabilities); provided , further , that Buyer acknowledges that its obligations of confidentiality and non-disclosure with respect to any and all other information provided to it by or on behalf of Seller, the Selling Affiliates, the Transferred Companies or any of their respective Affiliates or Representatives, concerning Seller or any of its Affiliates (other than solely with respect to the Business, the Transferred Companies, the Transferred Assets and the Assumed Liabilities, including, for avoidance of doubt, the Deferred Business, Deferred Assets and Deferred Liabilities) shall continue to remain subject to the terms and conditions of the Business Confidentiality Agreement (but subject to the term therein).

(b) For two (2) years after the Closing, unless Buyer has otherwise consented in writing, Seller agrees to, and shall cause its subsidiaries and shall instruct its Representatives to, retain in confidence, and not use, any and all confidential or proprietary information to the extent relating to the Business and the Transferred Assets (collectively, " Confidential Business Information "), and not disclose such Confidential Business Information to any other Person; provided that Confidential Business Information shall not include any information (i) which is or becomes generally available to the public other than as a result of disclosure in violation of this Section 7.12(b) , (ii) that Seller or any of its Affiliates receives after the Closing from a source that is not, to the knowledge of Seller, under any obligation of confidentiality with respect to such information, or (iii) that is independently developed by or on behalf of Seller or any of its Affiliates without reference to or use of such Confidential Business Information. In addition, the foregoing will not prohibit Seller or its Affiliates from disclosing Confidential Business Information which is required by applicable Law or order of a Governmental Entity or rule or policy of any securities exchange to be disclosed. The parties acknowledge and agree that (x) Seller and its Affiliates currently, and, subject to Section 7.11(c) , may continue following the Closing to, maintain and expand business and commercial relationships (whether as a customer, supplier or otherwise) with the same Persons, and engage in commercial relationships with such Persons and with Buyer and the other Transferred Companies, and, subject to Section 7.11(c) , may employ, or continue to employ, individuals who previously worked in or with the Business and possess knowledge and Know-How used in, relating to, or arising from the Business and (y) nothing in this Section 7.12(b) shall prohibit or restrict the maintenance or expansion of any such relationships or employment of any such individuals. In addition, the foregoing shall not prohibit the use or disclosure of such Confidential Business Information to the extent reasonably necessary to comply with the terms of, or perform under, any of the Transaction Documents or any Transferred Contract or Commingled Contract that has not been assigned or transferred to Buyer or its Affiliates, or to provide the Distribution Services or operate Deferred Business in accordance

with this Agreement or any Ancillary Agreement. Furthermore, the provisions of this Section 7.12(b) will not prohibit any use or disclosure in connection with the preparation and filing of financial statements with a Governmental Entity (including the U.S. Securities and Exchange Commission) or Tax Returns of Seller or its Affiliates or in connection with the enforcement of any right or remedy relating to this Agreement, the other Transaction Documents or the transactions contemplated hereby and thereby."

(xii) Section 7.13(b) of the Purchase Agreement (Replacement of Guarantees) is hereby amended and restated in its entirety as follows:

"Following the Closing (or a Deferred Closing, as applicable), Buyer and Seller will reasonably cooperate with one another so that Buyer will obtain, or cause an Affiliate of Buyer to provide or obtain, replacement Guarantees with respect to each Guarantee issued by Seller or an Affiliate of Seller for the benefit of any Transferred Company or with respect to any Transferred Asset or Assumed Liability that was not replaced on or prior to the Closing Date (or a Deferred Closing Date, as applicable) (each, an " Existing Guarantee "). Buyer and Seller shall reasonably cooperate to obtain any necessary release of Seller and its Affiliates from such Existing Guarantees in form and substance reasonably satisfactory to Buyer and Seller."

Section 1.07 Employees . Article VIII of the Purchase Agreement (Employees) is hereby amended as follows:

(i) Section 8.01(a) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"From and after the date of this Agreement until the Closing Date or the applicable Deferred Closing Date, as applicable, Buyer shall consult with Seller and obtain Seller's consent (which consent shall not be unreasonably withheld, conditioned or delayed) before distributing any communications to any Employee of the Business whether relating to employee benefits, post-Closing or post the applicable Deferred Closing, as applicable, terms of employment or otherwise; provided that this sentence shall not apply to any (i) offer letters or other individual communications regarding post-Closing or post the applicable Deferred Closing, as applicable, employment of Employees of the Business (including proposed terms of employment, compensation and employee benefits, or role and organizational structure) or (ii) individual conversations or communications regarding matters not covered by any of the Transaction Documents."

(ii) Section 8.01(b) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

> "To the extent permitted by applicable Law and as soon as practicable, but in no event later than five (5) business days after the date of this Agreement, Seller shall provide Buyer with a list on Schedule 8.01(b)(i) to the Disclosure Letter containing an identification number (with the corresponding names tying to these identification numbers to be provided concurrently to one person Buyer specifies), date of hire, position, location, and base salary, wage rate and bonus opportunity (and, in no event later than thirty (30) calendar days after the date of this Agreement, for sales employees, sales incentive targets, as well as actual sales incentive paid during the prior fiscal year), employee benefit plan participation, outstanding equity awards (including vesting schedule and exercise price, as applicable), expatriate status and any additional information that is necessary for Buyer to establish payroll systems or employee benefit plans as of the Transfer Time, as applicable, of each individual identified by Seller as expected to be an Employee of the Business, and Seller shall update such information periodically prior to the Closing Date (or the applicable Deferred Closing Date, as applicable, to the extent such employment actions are permitted by this Agreement, including the next succeeding sentence), to reflect new hires, leaves of absence and employment terminations and any other material changes thereto and provide copies of such updated lists and information to Buyer. In addition, Seller shall periodically update Schedule 1.01(b) to the Disclosure Letter (including during the Deferred Period with respect to employees in a Deferred Closing Country) to reflect (i) any new hires and employment terminations permitted pursuant to Section 6.01(b)(iii) , and (ii) any other employee of Seller and its Affiliates proposed by Seller to be an "Employee of the Business"; provided that, in the case of clause (ii), if Buyer objects to any such addition proposed to be made to such schedule by Seller, such addition shall be reviewed and agreed by the Vice President of Human Resources, MITG of Seller and the Senior Vice President, HR Bus Partner Medical of Buyer and if the Vice President of Human Resources, MITG of Seller and the Senior Vice President, HR Bus Partner Medical of Buyer cannot agree, then such addition shall not be included. With respect to those Transferred Companies set forth on Schedule 8.01(b)(ii) to the Disclosure Letter, Buyer and Seller will use commercially reasonable efforts to establish or ensure continuation of (as applicable) for each such Transferred Company payroll, human resources and employee benefit administration Contracts and processes, effective as of or prior to the Closing. On the Closing Date and the applicable Deferred Closing Date, Seller shall provide Buyer with an updated Schedule 8.01(b)(i) to the Disclosure Letter reflecting the applicable information as of such date."

(iii) Section 8.01(c) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

> "Prior to the Closing or the applicable Deferred Closing, as applicable, Seller shall, or shall cause its Affiliates to, take all actions necessary to transfer the employment of any individual who is employed by a Transferred Company and who is not an Employee of Business to Seller or any of its Affiliates (other than the Transferred Companies), as designated by Seller. In the event the employment of an Employee of the Business does not automatically transfer to Buyer or its Affiliates upon the occurrence of the Closing or the applicable Deferred Closing, as applicable, by operation of Law or pursuant to the transfer (directly or indirectly) of the Transferred Equity Interests to Buyer or its Affiliates, (i) Seller shall take, or cause its respective Affiliates to take, all actions required in accordance with applicable Law in respect of the transfer of employment of such Employees of the Business to Buyer or one of its Affiliates, and Seller shall encourage each Employee of the Business to accept any offers of employment pursuant to this Section 8.01(c) in its communications with such individuals; provided that, for the avoidance of doubt, nothing herein shall be interpreted as requiring Seller or any of its subsidiaries to provide any such Employee of the Business with any additional compensation or benefits or otherwise incur any material liability; and (ii) not less than ten (10) business days prior to the Closing or the applicable Deferred Closing, as applicable, Buyer or one of its Affiliates will offer employment, effective at 12:01 a.m., local time, on the Closing Date or the applicable Deferred Closing Date, as applicable (the " Transfer Time "), to such Employee of the Business in accordance with this Agreement. Offers pursuant to this Section 8.01(c) shall (A) be for a position commensurate with the skills and experience of such Employee of the Business and at a geographic work location within fifty (50) miles of the applicable Employee of the Business' primary work location immediately prior to the Closing Date or the applicable Deferred Closing Date, as applicable (or, to the extent applicable in jurisdictions other than the United States, within such lesser radius as is necessary to ensure severance is not due in connection with such relocation), and (B) otherwise comply in all respects with applicable Law (including with respect to compensation and benefits). With respect to any Employee of the Business to whom Buyer or one of its Affiliates is required to make an offer of employment pursuant to this Section 8.01(c) , and who, as of the Closing Date or the applicable Deferred Closing Date, as applicable, is on approved leave of absence from work with Seller or its Affiliates (each, an " Inactive Employee "), Buyer shall offer employment to such individual on the earliest practicable date following the return of such individual to work with Seller and its Affiliates and otherwise on terms and conditions consistent with this Section 8.01 ; provided that such employee returns to work within one hundred eighty (180) days following the Closing Date or the applicable Deferred Closing Date, as applicable, or such later time as required by applicable Law

or the terms of the applicable Collective Bargaining Agreement upon presenting themselves for duty to the Business. Seller shall promptly notify Buyer of the occurrence and end of any such leave of absence. In the case of any Inactive Employee who becomes a Transferred Employee following the Closing Date or the applicable Deferred Closing Date, as applicable, all references in this Agreement to (1) the Closing Date or the applicable Deferred Closing Date, as applicable, shall be deemed to be references to the date on which such individual becomes a Transferred Employee and (2) the Transfer Time shall be deemed to be references to 12:01 a.m., local time, on the date that such individual becomes a Transferred Employee. In any jurisdiction where the employment of an Employee of the Business can transfer automatically to Buyer and its Affiliates upon the occurrence of the Closing or Deferred Closing, as applicable, by operation of Law or pursuant to the transfer (directly or indirectly) of the Transferred Equity Interests to Buyer, Buyer and Seller agree to take, or cause their respective Affiliates to take, all actions required under applicable Law and all other actions as are necessary or appropriate such that the employment of such Employee of the Business will transfer to Buyer or its Affiliates automatically as of the Transfer Time. Seller shall provide a list to Buyer of each Inactive Employee no later than ten (10) business days prior to the Closing or Deferred Closing Date, as applicable, and shall update such list as of the Closing or Deferred Closing Date, as applicable. The Employee of the Business employed in France for whom the transfer of employment contemplated by this Section 8.01(c) is subject to the authorization of the *inspection du travail* shall transfer to Buyer or its Affiliates automatically on the day after such authorization is given. If such authorization is not granted within four (4) months following the Closing Date, such Employee of the Business shall not become a Transferred Employee. Seller shall use commercially reasonable efforts to obtain such authorization following the Closing and shall keep Buyer and its Affiliates informed of the status of such procedure."

(iv) Section 8.01(d) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"Buyer or its Affiliates shall bear all the liabilities, obligations and costs relating to, and shall indemnify and hold harmless Seller and the Selling Affiliates from and against, any claims made by any Employee of the Business for any statutory or common law severance or other separation benefits, any contractual or other severance or separation benefits and any other legally mandated payment obligations (including any compensation payable during a mandatory termination notice period and any payments pursuant to a Judgment of a court having jurisdiction over the parties) and for any other claim, cost, liability or obligation (whether related to compensation, benefits or otherwise), in each case, arising out of (i) Buyer's breach of its obligations under this Article VIII , including any failure of Buyer to provide

to U.S. Transferred Employees the benefits described in Section 8.01(e) , (ii) Buyer making an offer to an Employee of the Business that does not meet the requirements of (A) Section 8.01(e) with respect to an Employee of the Business in the United States or (B) Section 8.01(j)(i) with respect to an Employee of the Business outside of the United States (whether or not located in a Specified Non-U.S. Jurisdiction), or (iii) any claims for severance or other separation benefits in connection with the involuntary termination of employment by Buyer or its Affiliates of any Transferred Employee after the Transfer Time. Seller or its Affiliates shall bear all the liabilities, obligations and costs relating to, and shall indemnify and hold harmless Buyer and its Affiliates from and against, any claims made by any Employee of the Business for any statutory or common law severance or other separation benefits, any contractual or other severance or separation benefits and any other legally mandated payment obligations (including any compensation payable during a mandatory termination notice period and any payments pursuant to a Judgment of a court having jurisdiction over the parties) and for any other claim, cost, liability or obligation (whether related to compensation, benefits or otherwise), in each case, not arising out of Buyer's breach of its obligations under this Article VIII or under clause (ii) or (iii) above, including (A) any such claim arising out of the applicable Employee of the Business' refusal to accept an offer of employment made in compliance with this Article VIII from (or to commence employment with), or objection to the automatic transfer of employment to, Buyer or its Affiliates, and (B) any claims made by any Employee of the Business in China or other jurisdictions for any statutory severance or other separation benefits (including statutory economic compensation and statutory compensation payable in respect of accrued but not yet taken vacation days or other paid time off for the calendar year in which the Closing Date or the applicable Deferred Closing Date, as applicable, occurs) that arise as a result of any such employee who accepts an offer of employment from Buyer or any of its Affiliates making a request that such severance or other separation benefits be paid or provided by Seller or any of its subsidiaries. Buyer shall not encourage any Employee of the Business regarding a request described in the immediately preceding sentence, and in the event an Employee of the Business asks Buyer a question regarding such request, Buyer shall refer such Employee of the Business to an applicable representative of Seller with respect to such request."

(v) Section 8.01(i) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"Subject to Seller providing all reasonably necessary support and information in a timely manner, no later than the Closing Date or the applicable Deferred Closing Date, as applicable, Buyer shall establish or cause to be established (or utilize existing Buyer Plans), at its own expense, all necessary retirement, pension, employee welfare and employee benefit plans for Transferred

Employees, as applicable. Effective as of the Transfer Time, each Transferred Employee shall cease to be an employee of Seller or the applicable Affiliate and shall cease to participate in any Business Employee Benefit Plan (other than any Assumed Benefit Plan) as an active employee. Other than with respect to a government-sponsored benefit plan, (i) Seller shall be, or shall cause its Affiliates to be, responsible for all (A) medical, vision, dental and prescription drug claims for expenses incurred by any Transferred Employee or his or her dependents, (B) claims for short-term and long-term disability income benefits incurred by any Transferred Employee, (C) claims for group life, travel and accident, and accidental death and dismemberment insurance benefits incurred by any Transferred Employee and (D) claims relating to COBRA coverage attributable to "qualifying events" with respect to any Transferred Employee and his or her beneficiaries and dependents, in each case, prior to or as of the Transfer Time and (ii) Buyer shall be, or shall cause its Affiliates to be, responsible for all (A) medical, vision, dental and prescription drug claims for expenses incurred by any Transferred Employee or his or her dependents, (B) claims for short-term and long-term disability income benefits incurred by any Transferred Employee, (C) claims for group life, travel and accident, and accidental death and dismemberment insurance benefits incurred by any Transferred Employee and (D) claims relating to COBRA coverage attributable to 'qualifying events' with respect to any Transferred Employee and his or her beneficiaries and dependents, in each case, after the Transfer Time. Except in the event of any claim for workers compensation benefits, for purposes of this Agreement, the following claims and liabilities shall be deemed to be incurred as follows: (1) medical, vision, dental and/or prescription drug benefits (including hospital expenses), upon provision of the services, materials or supplies comprising any such benefits and (2) short and long-term disability, life, accidental death and dismemberment and business travel accident insurance benefits, upon the death, illness, injury or accident giving rise to such benefits. Seller and its Affiliates shall be responsible for all claims for workers compensation benefits that are incurred prior to the Transfer Time by any Transferred Employee. Buyer and its Affiliates shall be responsible for all claims for workers compensation benefits that are incurred on or after the Transfer Time by any Transferred Employee. A claim for workers compensation benefits shall be deemed to be incurred on the date the injury giving rise to the claim occurs."

(vi) Section 8.01(m) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"To the extent (i) permitted by applicable Law and (ii) that doing so would not require the consent of any other Person, as soon as reasonably practicable following the Closing or the applicable Deferred Closing Date, as applicable, Seller and its Affiliates shall use their commercially reasonable efforts to

assign to Buyer and its Affiliates any nondisclosure and confidentiality agreements, non-competition agreements or other restrictive covenant agreements applicable to any Transferred Employee to the extent that such agreements relate exclusively to the Business."

(vii) Section 8.01(q) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"No later than forty-five (45) business days following the Closing or the applicable Deferred Closing Date, as applicable, Seller or its applicable Affiliate shall pay (i) an annual bonus (prorated through the Closing Date or the applicable Deferred Closing Date, as applicable, and based on the lesser of (A) the amount accrued with respect to such bonus and (B) the target amount to each Transferred Employee who is or would be eligible as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, to receive an annual bonus under any Business Employee Benefit Plan pursuant to the terms thereof); and (ii) sales incentives or commissions (prorated through the Closing Date or the applicable Deferred Closing Date, as applicable, and based on actual performance through the Closing Date or the applicable Deferred Closing Date, as applicable) to each Transferred Employee who participated in any Business Employee Benefit Plan that provides for sales incentives or commissions as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, and who was eligible to earn sales incentives or commissions for the applicable performance period in which the Closing or the applicable Deferred Closing, as applicable, occurs."

(viii) Section 8.01(r) of the Purchase Agreement (Employee Benefits Matters) is hereby amended and restated in its entirety as follows:

"Prior to the Closing or the applicable Deferred Closing, as applicable, Seller shall take all actions as are necessary to provide as follows:

(i) Each outstanding option (each, a " Seller Option ") to purchase ordinary shares, par value $0.0001 (" Seller Ordinary Shares "), other than any Integration Incentive Stock Option, that is held by a Transferred Employee as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, shall, effective as of the Closing or the applicable Deferred Closing, as applicable, become fully vested and exercisable and shall remain outstanding for the remainder of the term of such Seller Option.

(ii) Each outstanding Integration Incentive Stock Option held by a Transferred Employee as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, shall remain outstanding and shall vest at the end of the performance period applicable to such Integration Incentive Stock Option to the extent the applicable performance criteria are satisfied.

(iii) Each outstanding restricted share unit award in respect of Seller Ordinary Shares (each, a " Seller RSU Award ") that is held by a Transferred Employee as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, and vests solely based on continued service shall, as of the Closing or the applicable Deferred Closing, as applicable, become fully vested and shall be settled by Seller in accordance with its terms.

(iv) Each outstanding Seller RSU Award that is held by a Transferred Employee as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, and subject to performance-based vesting conditions shall remain outstanding, shall vest at the end of the performance period applicable to such Seller RSU Award to the extent the applicable performance criteria are satisfied and shall be settled by Seller in accordance with its terms.

(v) As of the Closing or the applicable Deferred Closing, as applicable, each Employee of the Business who is eligible to receive a long-term cash retention bonus under Seller's Retention Bonus Plan shall become fully vested in his or her long-term cash retention bonus, which amount shall be paid by Seller or its applicable Affiliate in accordance with such plan.

(vi) No later than forty-five (45) business days following the Closing or the applicable Deferred Closing, as applicable, Seller or its applicable Affiliate shall pay a bonus under Seller's Long-Term Performance Plan (prorated through the Closing Date or the applicable Deferred Closing Date, as applicable, and based on actual performance through the Closing Date or the applicable Deferred Closing Date, as applicable, as determined by Seller) to each Transferred Employee who is or would be eligible to receive a bonus under such plan pursuant to the terms thereof."

(ix) Section 8.01 of the Purchase Agreement (Employee Benefits Matters) is hereby amended and supplemented by adding a new Section 8.01(v) , which provides:

"The parties agree to and covenant to perform the matters set forth in Schedule 8.01(v) of the Disclosure Letter."

(x) Section 8.02(a) of the Purchase Agreement (Pension Plan Adjustment) is hereby amended and restated in its entirety as follows:

"Within six (6) months following the Closing Date, Seller and Buyer shall determine the aggregate value of the underfunded pension liabilities as of the Closing Date under the Assumed Benefit Plans set forth on Schedule 8.02(a) to the Disclosure Letter (the absolute value of such underfunded liabilities, the " Aggregate Underfunded Amount "). The Aggregate Underfunded Amount shall be calculated on the same basis that was used to determine the estimate referred to in Section 3.13(b)(iii) and, if applicable, the conversion rate from the applicable Foreign Currency to U.S. dollars shall be the closing rate

provided by Bloomberg at 7:00 a.m. New York City time on the Closing Date."

Section 1.08 Indemnification . Section 10.03 of the Purchase Agreement (Indemnification by Buyer) is hereby amended and restated in its entirety as follows:

"Subject to the provisions of this Article X , from and after the Closing Date, in addition to the indemnification set forth in Section 6.06(a) , Section 7.08(c) and Section 8.01(d) , Buyer shall indemnify and hold harmless Seller against and from any and all Damages which Seller and any of its directors, officers, employees, Affiliates (other than the Transferred Companies), agents and representatives (collectively, the " Seller Indemnitees " and, together with the Buyer Indemnitees, the " Indemnitees ") may incur or suffer to the extent such Damages arise out of or result from (a) the breach of any representation or warranty made by Buyer in this Agreement as if made on the Closing Date, (b) any breach by Buyer or any of its Affiliates of its covenants or agreements contained herein or (c) without limiting the indemnification obligations of Seller pursuant to Section 10.02 , any of the Assumed Liabilities (including any Deferred Liabilities). Notwithstanding that a claim for Damages may fall into multiple categories of this Section 10.03 , a Seller Indemnitee may recover such Damages one time only."

Section 1.09 Miscellaneous . The first sentence of Section 11.04 of the Purchase Agreement (Waivers) is amended by inserting the words "or after" between "prior to" and "the Closing."

Section 1.10 Transferred Assets . Annex 2.02(a) of the Purchase Agreement (Transferred Assets) is hereby amended as follows:

(i) The lead-in to Annex 2.02(a) is hereby amended by inserting at the end of the lead-in section the words "or, solely with respect to the applicable Deferred Business, the applicable Deferred Closing:"

(ii) Annex 2.02(a)(ii) of the Purchase Agreement (Inventory) is hereby amended by inserting to the end of the section the words "or the applicable Deferred Closing, as applicable;"

(iii) Annex 2.02(a)(v) of the Purchase Agreement (Permits) is hereby amended by inserting to the end of the section the words "or the applicable Deferred Closing Date, as applicable;"

(iv) Annex 2.02(a)(xi) of the Purchase Agreement (Contracts) is hereby amended and restated in its entirety as follows:

" Contracts . All leases, licenses (other than Transferred Real Property Leases and Transferred IP Licenses which are identified separately on this Annex

2.02(a)), bids, tenders, purchase orders, consulting agreements, supply agreements, distribution contracts, manufacturing contracts, maintenance contracts, agreements, commitments and other contracts, whether or not reduced to writing (collectively, " Contracts ") exclusively relating to the Business or any of the Transferred Assets, and the Commingled Contracts set forth on Schedule 2.02(a)(xi) of the Disclosure Letter, but specifically excluding the Excluded Contracts (collectively, the " Transferred Contracts ");"

(v) Annex 2.02(a)(xiv) of the Purchase Agreement (Insurance Proceeds) is hereby amended and restated in its entirety as follows:

" Insurance Proceeds . All insurance proceeds actually received by Seller or any of its Affiliates prior to or after the Closing under any insurance policy written prior to the Closing (or, solely with respect to Deferred Assets, the applicable Deferred Closing) in connection with (i) the damage or destruction of any of the Transferred Assets from and after the date hereof and prior to the Closing (or, solely with respect to Deferred Assets, the applicable Deferred Closing) that is, or would have been but for such damage or destruction, included in the Transferred Assets or (ii) any Assumed Liability (other than, in the case of this clause (ii), where insurance proceeds are directly or indirectly funded by Seller or any of its Affiliates through self-insurance or other similar arrangement);"

(vi) Annex 2.02(a)(xv) of the Purchase Agreement (Cash Amount; Cash Proceeds of Sales and Dispositions) is hereby amended and restated in its entirety as follows:

" Cash Amount; Cash Proceeds of Sales and Dispositions . (1) Cash and cash equivalents of the Transferred Companies to the extent included in the Cash Amount and (2) all net cash proceeds actually received by Seller or any of its Affiliates prior to or after the Closing in connection with any sales or other dispositions from and after the date hereof through the Closing (or, solely with respect to Deferred Assets, the applicable Deferred Closing) of any asset that would have been included in the Transferred Assets but for such sale or disposition, other than with respect to sales of Inventory in the ordinary course of business consistent with past practice;"

(vii) Annex 2.02(a)(xvi) of the Purchase Agreement (Claims; Settlement Proceeds) is hereby amended and restated in its entirety as follows:

" Claims; Settlement Proceeds . Any and all claims, causes of action, defenses and rights of offset or counterclaim, or settlement agreements (in any manner arising or existing, whether choate or inchoate, known or unknown, contingent or non-contingent) arising out of the Transferred Contracts (other than any Pre-Closing Accounts Receivable) and all proceeds of any settlement from and after the date hereof through the Closing (or, solely with respect to

Deferred Assets, the applicable Deferred Closing) of any such claims, causes of action, defenses and rights of offset or counterclaim that would have been included in the Transferred Assets but for such settlement;"

Section 1.11 Excluded Assets . Annex 2.02(b) of the Purchase Agreement (Excluded Assets) is hereby amended as follows:

(i) Annex 2.02(b)(i) of the Purchase Agreement (Accounts Receivable/Other Current Assets) is hereby amended and restated in its entirety as follows:

" Accounts Receivable/Other Current Assets . (1) All accounts receivable, notes receivable and similar rights to receive payments of Seller or any of its Affiliates existing on the Closing Date or the applicable Deferred Closing Date, as applicable (" Pre-Closing Accounts Receivable "), (2) all other assets as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, arising out of the operation or conduct of the Business before the Closing or the applicable Deferred Closing, as applicable, that would be classified as current assets under GAAP on a balance sheet of the Business as of immediately prior to the Closing or the applicable Deferred Closing, as applicable, calculated in a manner consistent with the Financial Information;"

(ii) Annex 2.02(b)(ii) of the Purchase Agreement (Cash and Cash Equivalents) is hereby amended and restated in its entirety as follows:

" Cash and Cash Equivalents . All cash and cash equivalents and marketable securities and other investment assets, other than cash and cash equivalents in respect of clauses (xiv), (xv) and (xvi) of Annex 2.02(a) , held by Seller or any of its Affiliates on the Closing Date or the applicable Deferred Closing Date, as applicable;"

(iii) Annex 2.02(b)(iii) of the Purchase Agreement (Hedging or Other Currency Exchange Agreements) is hereby amended and restated in its entirety as follows:

" Hedging or Other Currency Exchange Agreements . All rights to receive payments of Seller or any of its Affiliates pursuant to a hedging or other currency exchange agreement existing before, on or after the Closing Date;"

(iv) Annex 2.02(b)(v) of the Purchase Agreement (Certain Records) is hereby amended and restated in its entirety as follows:

" Certain Records . Any records and files not identified as Transferred Records, including (A) the personnel records maintained by Seller or any of its Affiliates, (B) Tax Returns (other than Tax Returns solely related to any Transferred Company), (C) records (including accounting records) relating to Taxes paid or payable by Seller or any of its Affiliates and all financial and Tax records relating to the Business that form part of Seller's or any of its

Affiliates' general ledger or otherwise constitute accounting records, (D) records prepared in connection with the Transactions, including bids received from other Persons and analyses relating to the Business and (E) file copies of the Transferred Records retained by Seller, in each case whether generated before, on or after the Closing Date;"

(v) Annex 2.02(b)(vi) of the Purchase Agreement (Certain Contracts and Contract Rights) is hereby amended and restated in its entirety as follows:

" Certain Contracts and Contract Rights . All rights of Seller and its Affiliates under (A) this Agreement and the Ancillary Agreements, (B) the Commingled Contracts (subject to Section 2.02(g)), except for those Commingled Contracts set forth on Schedule 2.02(a)(xi) of the Disclosure Letter, (C) those Contracts related to Shared Services, and (D) any contracts between Seller and any of its Affiliates or between Affiliates of Seller, whether arising before, on or after the Closing Date (collectively, the " Excluded Contracts ");"

(vi) Annex 2.02(b)(vii) of the Purchase Agreement (Insurance) is hereby amended and restated in its entirety as follows:

" Insurance . Other than insurance proceeds specified in clause (xiv) of Annex 2.02(a) , all current and prior insurance policies arranged or maintained by Seller or any of its Affiliates and all rights of any nature with respect thereto, including all rights to insurance recoveries thereunder and to assert claims with respect to any such insurance recoveries, whether arising before, on or after the Closing Date;"

Section 1.12 Assumed Liabilities . Annex 2.02(c) of the Purchase Agreement (Assumed Liabilities) is hereby amended as follows:

(i) The lead-in to Annex 2.02(c) is hereby amended by inserting the phrase "(including the Deferred Business and Deferred Assets but without duplication of any amounts included in the NEB Services Reimbursement Amount)" between "any Transferred Asset" and ", in each case other than the Excluded Liabilities".

(ii) Annex 2.02(c)(ii) of the Purchase Agreement (Transferred Contract Liabilities) is hereby amended and restated in its entirety as follows:

" Transferred Contract Liabilities . All liabilities and obligations under the Transferred Contracts, whether arising before, on or after the Closing Date, but excluding those in respect of the Pre-Closing Accounts Payable;"

(iii) Annex 2.02(c)(iv) of the Purchase Agreement (Product Claims) is hereby amended and restated in its entirety as follows:

" Product Claims . Liabilities and obligations to the extent arising from or

relating to lawsuits or other claims, regardless of when commenced or made and irrespective of the legal theory asserted, with respect to the design, manufacture, testing, advertising, marketing, distribution or sale of the Products, whether prior to or after the Closing, including all liabilities and obligations to the extent arising from or relating to (A) warranty obligations, (B) infringement, dilution, misappropriation or other violation of IP Rights, (C) alleged or actual hazard or defect in design, manufacture, materials or workmanship, including any failure to warn or alleged or actual breach of express or implied warranty or representation or (D) the return after the Closing of any Product sold prior to, on or after the Closing (collectively, " Product Claims "), in each case other than any Excluded Liability;"

(iv) Annex 2.02(c)(v) of the Purchase Agreement (Environmental Liabilities) is hereby amended and restated in its entirety as follows:

" Environmental Liabilities . All liabilities and obligations to the extent arising from or relating to the Transferred Real Property, the Business or any Transferred Asset (or, in each case, the ownership or operation thereof) and arising under any Environmental Law, or with respect to any Environmental Claim or Hazardous Materials, in each case, whether arising before, on or after the Closing Date;"

(v) Annex 2.02(c)(vi) of the Purchase Agreement (Business Claims) is hereby amended and restated in its entirety as follows:

" Business Claims. Except as otherwise set forth in this Agreement and except for the matters specifically identified as Excluded Liabilities, all obligations and liabilities in respect of any criminal, civil or administrative suit, action or proceeding, pending or threatened, and claims, whether or not presently asserted, to the extent arising from or relating to the Business before, on or after the Closing Date (collectively, " Business Claims ");"

Section 1.13 Excluded Liabilities . Annex 2.02(d) of the Purchase Agreement (Excluded Liabilities) is hereby amended as follows:

(i) Annex 2.02(d)(iii) of the Purchase Agreement (Excluded Asset Liabilities) is hereby amended and restated in its entirety as follows:

" Excluded Asset Liabilities . Each liability, obligation or commitment to the extent arising from or relating to any Excluded Asset or the distribution to, or ownership by, Seller or any of the Selling Affiliates of any Excluded Asset or associated with the realization of the benefits of any Excluded Asset, whether arising before, on or after the Closing Date;"

Section 1.14 Disclosure Letter. The Disclosure Letter is hereby amended as set forth on Exhibit A hereto.

Section 1.15 Exhibits. The Exhibits of the Purchase Agreement are hereby amended as follows:

(i) Exhibit 1 of the Purchase Agreement (Maximum Cash Amount of Transferred Companies) is hereby amended and restated in its entirety in the form set forth as Annex B attached hereto.

(ii) Exhibit L of the Purchase Agreement (Closing Structure) is hereby amended and restated in its entirety in the form set forth as Annex C attached hereto.

(iii) Exhibit M of the Purchase Agreement (Allocation Method) is hereby amended and restated in its entirety in the form set forth as Annex D attached hereto.

(iv) The Purchase Agreement is hereby amended and supplemented by inserting a new Exhibit O titled "Form of Escrow Agreement" in the form set forth as Annex E attached hereto.

(v) The Purchase Agreement is hereby amended and supplemented by inserting a new Exhibit P titled "Form of Undisclosed Agency Agreement" in the form set forth as Annex F attached hereto.

(vi) The Purchase Agreement is hereby amended and supplemented by inserting a new Exhibit Q titled "Form of Merger Authorization" in the form set forth as Annex G attached hereto.

(vii) The Purchase Agreement is hereby amended and supplemented by inserting a new Exhibit R titled "Form of U.S. Merger Agreement" in the form set forth as Annex H attached hereto.

(viii) The Purchase Agreement is hereby amended and supplemented by inserting a new Exhibit S titled "Form of U.S. Certificate of Merger" in the form set forth as Annex I attached hereto.

ARTICLE 2
General Provisions

Section 2.01 Effect of Amendment. This Amendment shall not constitute an amendment or waiver of any provision of the Purchase Agreement not expressly amended or waived herein and shall not be construed as an amendment, waiver or consent to any action that would require an amendment, waiver or consent except as expressly stated herein. The Purchase Agreement, as amended by this Amendment, is and shall continue to be in full force and effect.

Section 2.02 Counterparts. This Amendment may be executed in counterparts and such counterparts may be delivered in electronic format (including by fax or in portable

document format (.pdf)), each of which shall be deemed to be an original and all of which shall be deemed to constitute the same Amendment.

Section 2.03 Other Miscellaneous Terms . The provisions of Article XI (Miscellaneous) of the Purchase Agreement shall apply *mutatis mutandis* to this Amendment, and to the Purchase Agreement, taken together as a single agreement, reflecting the terms as modified hereby.

FIRST AMENDMENT TO THE
AMENDED CARDINAL HEALTH, INC. 2011 LONG-TERM INCENTIVE PLAN

1. Effective June 29, 2017, Section 2(ii) of the Plan is hereby deleted in its entirety and in replacement thereof shall be the following:

   "" **Retirement** " means, unless the Administrator determines otherwise, Termination of Employment (other than by death or Disability and other than in the event of Termination for Cause) of an Awardee from the Company and its Affiliates after attaining either (i) age 55 and at least 10 years of continuous service with the Company and its Affiliates or (ii) solely with respect to Awards granted on or after July 1, 2017, age 60 and at least five years of continuous service with the Company and its Affiliates, in each case including service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company."

2. Effective August 8, 2017, Section 4(b)(x) of the Plan is hereby deleted in its entirety and in replacement thereof shall be the following:

   (x) "to modify or amend each Award, including, but not limited to, providing for the continuation or acceleration of vesting and/or exercisability; provided, however, that any such modification or amendment is subject to (A) the minimum vesting provisions set forth in Sections 8(e), 11(a) and 12(a) of the Plan, and (B) the Plan amendment provisions set forth in Section 17 of the Plan;"

3. Effective August 8, 2017, the first three sentences of Section 8(e) of the Plan are hereby deleted in their entirety and in replacement thereof shall be the following:

   (e) "Options granted under the Plan will vest and/or be exercisable at such time and in such installments during the period prior to the expiration of the Option's term as determined by the Administrator, except that no Option may first become exercisable within one year from its Grant Date, other than (i) upon a Change of Control as specified in Section 16(b) of the Plan, (ii) upon the death or Disability of the Awardee, in each case as specified in the Option Agreement, or (iii) for up to a number of Shares subject to Options that, when added to the number of Shares subject to Stock Awards and Other Stock-Based Awards granted under the Plan that on or after August 8, 2017 vest within less than one year, does not in the aggregate exceed 5% of the total number of Shares provided in Section 3(a) of the Plan . The Administrator has the right to make the timing of the ability to exercise any Option granted under the Plan subject to continued active employment, the passage of time, and/or such performance requirements as deemed appropriate by the Administrator. At any time after the grant of an Option, the Administrator may reduce or eliminate any restrictions surrounding any Participant's right to exercise all or part of the Option, subject to the restrictions set forth above."

4. Effective August 8, 2017, the following sentence is hereby inserted at the end of Section 11(a) of the Plan:

   "No condition that is based upon performance criteria and level of achievement versus such criteria shall be based on performance over a period of less than one year and no condition that is based solely upon continued employment or the passage of time shall provide for vesting in full of a Stock Award in less than one year from its Grant Date,

other than (i) upon a Change of Control as specified in Section 16(b) of the Plan, (ii) upon the death or Disability of the Awardee, in each case as specified in the Stock Award Agreement, or (iii) for up to a number of Shares subject to Stock Awards that, when added to the number of Shares subject to Options and Other Stock-Based Awards granted under the Plan that on or after August 8, 2017 vest within less than one year, does not in the aggregate exceed 5% of the total number of Shares provided in Section 3(a) of the Plan ."

5. Effective August 8, 2017, the following sentence is hereby inserted at the end of Section 12(a) of the Plan:

"No condition that is based upon performance criteria and level of achievement versus such criteria shall be based on performance over a period of less than one year and no condition that is based solely upon continued employment or the passage of time shall provide for vesting in full of an Other Stock-Based Award in less than one year from its Grant Date, other than (i) upon a Change of Control as specified in Section 16(b) of the Plan, (ii) upon the death or Disability of the Awardee, in each case as specified in the Other Stock-Based Award Agreement, or (iii) for up to a number of Shares subject to Other Stock-Based Awards that, when added to the number of Shares subject to Options and Stock Awards granted under the Plan that on or after August 8, 2017 vest within less than one year, does not in the aggregate exceed 5% of the total number of Shares provided in Section 3(a) of the Plan ."

6. Effective June 29, 2017, Section 13(d) of the Plan is hereby deleted in its entirety and in replacement thereof shall be the following:

" (d) *Termination of Employment* . The following provisions shall apply to Cash Awards upon Termination of Employment unless the Administrator determines otherwise.

(i) *Termination of Employment Due to Disability, Retirement or Death* . In the event that a Participant's Termination of Employment occurs by reason of Disability, Retirement or death before the date the Cash Award is paid for the applicable performance period, the Cash Award determined by the Administrator to be paid will be prorated based upon the length of time that the Participant was employed by the Company during the applicable performance period. In the case of a Participant's Disability, Termination of Employment will be deemed to occur as of the date that the Administrator determines was the date on which the definition of Disability was satisfied. The Cash Award will be paid at the same time payments are made to Participants who did not terminate employment during the applicable performance period and will be based on the level of financial, business or operational performance actually achieved, to the extent applicable to such Award. The right of the Participant to receive any payment under this Plan will pass to the Participant's estate in the event of the Participant's death.

(ii) *Certain Involuntary Terminations of Employment (Not Disability or Retirement Eligible)* . In the event that (A) a Participant's Termination

of Employment by the Company (other than as a Termination for Cause) occurs on or after the first day of the last one-fourth of the applicable performance period and before the date the Cash Award is paid for the applicable performance period, or (B) solely with respect to Cash Award opportunities granted on or after July 1, 2017, (1) Sections 13(d)(i) and 13(d)(ii)(A) of the Plan are not applicable, but the Participant has attained either (a) age 53 and at least eight years of continuous service with the Company and its Affiliates or (b) age 59 and at least four years of continuous service with the Company and its Affiliates, in each case including service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company, and (2) a Participant's Termination of Employment by the Company (other than as a Termination for Cause) occurs and no later than 45 days after the Termination of Employment, the Participant enters into a written separation agreement and general release of claims with the Company and its Affiliates (in such form as may reasonably be presented by the Company) (a "Separation Agreement") and the Participant does not timely revoke such Separation Agreement, in each case the Cash Award determined by the Administrator to be paid will be prorated based upon the length of time that the Participant was employed by the Company during the applicable performance period. The Cash Award will be paid at the same time payments are made to Participants who did not terminate employment during or after completion of the applicable performance period and will be based on the level of financial, business or operational performance actually achieved, to the extent applicable to such Award.

(iii) *Other Terminations of Employment* . Except as set forth in Sections 13(d)(i) and (ii) above, in the event that a Participant's Termination of Employment occurs before the date the Cash Award is paid for the applicable performance period, all of the Participant's rights to any Cash Award for that performance period will be forfeited."

7. Effective August 8, 2017, the following sentence is hereby inserted before the last sentence of Section 20 of the Plan:

"Further, the Administrator may, in its discretion, require that all or any portion of any Cash Award paid or payable after June 30, 2018 to a Participant who is or was an "executive officer" (as that term is defined under Rule 3b-7 under the Exchange Act) be repaid or forfeited to the Company upon a determination by the Administrator that the Participant engaged in a material violation of law or of the Company's Standards of Business Conduct during the performance or vesting period of the Cash Award and that this conduct caused material financial harm to the Company."

Exhibit 10.2.3

CARDINAL HEALTH, INC.
NONQUALIFIED STOCK OPTION AGREEMENT

This Nonqualified Stock Option Agreement (this "Agreement") is entered into in Franklin County, Ohio. On [date of grant] (the "Grant Date"), Cardinal Health, Inc., an Ohio corporation (the "Company"), has awarded to [employee name] ("Awardee"), a Nonqualified Stock Option (the "Option") to purchase [# of shares] common shares, without par value, of the Company (the "Shares") for an exercise price of [$X.XX] per share. The Option has been granted under the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan (the "Plan"), and will include and be subject to all provisions of the Plan, which are incorporated in this Agreement by reference, and will be subject to the provisions of this Agreement. Capitalized terms used in this Agreement which are not specifically defined will have the meanings ascribed to such terms in the Plan. [CLIFF ALTERNATIVE: This Option vests and becomes exercisable on the [ ] anniversary of the Grant Date (the "Vesting Date"), subject to the provisions of this Agreement, including those relating to Awardee's continued employment with the Company and its Affiliates (collectively, the "Cardinal Group").] [INSTALLMENT ALTERNATIVE: This Option vests and becomes exercisable in [ ] installments, which will be as nearly equal as possible, on the [ ] anniversaries of the Grant Date (each a "Vesting Date" with respect to the portion of the Option scheduled to vest on such date), subject in each case to the provisions of this Agreement, including those relating to Awardee's continued employment with the Company and its Affiliates (collectively, the "Cardinal Group").] This Option will expire on [date of expiration] (the "Grant Expiration Date").

1. Method of Exercise and Payment of Price .

(a) Method of Exercise . At any time when all or a portion of the Option is exercisable under the Plan and this Agreement, some or all of the exercisable portion of the Option may be exercised from time to time by written notice to the Company, or such other method of exercise as may be specified by the Company, including without limitation, exercise by electronic means on the web site of the Company's third-party equity plan administrator, which will:

(i) state the number of whole Shares with respect to which the Option is being exercised; and

(ii) if the Option is being exercised by anyone other than Awardee, if not already provided, be accompanied by proof satisfactory to counsel for the Company of the right of such person or persons to exercise the Option under the Plan and all applicable laws and regulations.

(b) Payment of Price . The full exercise price for the portion of the Option being exercised shall be paid to the Company as provided below:

(i) in cash;

(ii) by check acceptable to the Company or wire transfer (denominated in U.S. Dollars);

(iii) subject to any conditions or limitations established by the Administrator, other Shares owned by Awardee that have a Fair Market Value on the date of surrender equal to or greater than the aggregate exercise price of the Shares as to which said Option is exercised (it being agreed that the excess of the Fair Market Value over the aggregate exercise price will be refunded to Awardee, with any fractional Share being repaid in cash);

(iv) if permitted by the Administrator, consideration received by the Company under a broker-assisted sale and remittance program acceptable to the Administrator;

(v) if permitted by the Administrator, and subject to any conditions or limitations established by the Administrator, the Company's withholding Shares otherwise issuable upon exercise of the Option pursuant to a "net exercise" arrangement; or

(vi) any combination of the foregoing methods of payment.

2. Transferability . The Option is transferable (a) at Awardee's death, by Awardee by will or pursuant to the laws of descent and distribution, and (b) by Awardee during Awardee's lifetime, without payment of consideration, to (i) the spouse, former spouse, parents, stepparents, grandparents, parents-in-law, siblings, siblings-in-law, children, stepchildren, children-in-law, grandchildren, nieces or nephews of Awardee, or any other persons sharing Awardee's household (other than tenants or employees) (collectively, "Family Members") or (ii) a trust, partnership or other entity controlled by Awardee or Awardee's Family Members and in which Awardee or Awardee's Family Members have 100% of the pecuniary interest; provided, however, that subsequent transfers of the transferred Option are prohibited, except (X) if the transferee is an individual, at the transferee's death by the transferee by will or pursuant to the laws of descent and distribution, and (Y) without payment of consideration to the individuals or entities listed in Paragraphs (b)(i) or (ii) above, with respect to the original Awardee. The Administrator may, in its discretion, permit transfers to other persons and entities as permitted by the Plan. Neither a transfer under a domestic relations order in settlement of marital property rights nor a transfer to an entity in which more than 50% of the voting interests are owned by Awardee or Family Members in exchange for an interest in that entity will be considered to be a transfer for consideration. Within 10 days of any transfer, Awardee shall notify the Company in writing of the transfer. Following transfer, the Option continues to be subject to the same terms and conditions as were applicable immediately prior to transfer and, except as otherwise provided in the Plan or this Agreement, references to the original Awardee are deemed to refer to the transferee. The events of a Termination of Employment of Awardee provided in Paragraph 3 continue to be applied with respect to the original Awardee, following which the Option is exercisable by the transferee only to the extent, and for the periods, specified in Paragraph 3. The Company has no obligation to notify any transferee of Awardee's Termination of Employment with the Cardinal Group for any reason. The conduct prohibited of Awardee in Paragraph 5 continues to be prohibited of Awardee following transfer to the same extent as immediately prior to transfer and the Option (or its economic value, as applicable) is subject to forfeiture by the transferee and recoupment from Awardee to the same extent as would have been the case of Awardee had the Option not been transferred. Awardee remains subject to the recoupment provisions of Paragraphs 5 and 15 of this Agreement and tax withholding provisions of Section 31 of the Plan following transfer of the Option.

3. Termination of Employment .

(a) Termination of Employment by Reason of Death or Disability . If a Termination of Employment by reason of death or Disability occurs at least six months after the Grant Date, then any outstanding unvested portion of the Option vests upon and becomes exercisable in full from and after such Termination of Employment. The Option may thereafter be exercised by Awardee, any transferee of Awardee, if applicable, or by the legal representative of the estate or by the legatee of Awardee under the will of Awardee from the date of such Termination of Employment until the Grant Expiration Date.

(b) Termination of Employment by Reason of Retirement . If a Termination of Employment by reason of Retirement occurs at least six months after the Grant Date, then a Ratable Portion of each

unvested installment of the outstanding Option immediately vests and becomes exercisable. Such "Ratable Portion," with respect to the applicable installment, is an amount equal to such installment of the Option scheduled to vest on a future Vesting Date multiplied by a fraction, the numerator of which is the number of days from the Grant Date through the date of the Termination of Employment, and the denominator of which is the number of days from the Grant Date through such Vesting Date. The Option, to the extent vested, may be exercised by Awardee (or any transferee, if applicable) until the Grant Expiration Date. If Awardee dies after Retirement, but before the Grant Expiration Date, the Option, to the extent vested, may be exercised by any transferee of the Option, if applicable, or by the legal representative of the estate or by the legatee of Awardee under the will of Awardee from and after such death until the Grant Expiration Date.[1]

(c) Involuntary Termination of Employment with Severance . If (i) Paragraph 3(b) is not applicable, but Awardee has attained either (A) age 53 and at least eight years of continuous service with the Cardinal Group, or (B) age 59 and at least four years of continuous service with the Cardinal Group, in each case including service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company, (ii) a Termination of Employment by the Cardinal Group (other than a Termination for Cause) occurs at least six months after the Grant Date, and (iii) no later than 45 days after the Termination of Employment, Awardee enters into a written separation agreement and general release of claims with the Cardinal Group (in such form as may reasonably be presented by the Cardinal Group) (a "Separation Agreement"), and Awardee does not timely revoke such Separation Agreement, then a Ratable Portion of each unvested installment of the outstanding Option immediately vests and becomes exercisable. The Option, to the extent vested, may be exercised by Awardee (or any transferee, if applicable) until the Grant Expiration Date. If Awardee dies after such Termination of Employment, but before the Grant Expiration Date, the Option, to the extent vested, may be exercised by any transferee of the Option, if applicable, or by the legal representative of the estate or by the legatee of Awardee under the will of Awardee from and after such death until the Grant Expiration Date.

(d) Change of Control . In the event of a Change of Control prior to the Participant's Termination of Employment, any outstanding unvested portion of the Option vests in full, except to the extent a Replacement Award is provided to the Participant in accordance with Section 16(b) of the Plan.

(e) Other Termination of Employment . Except as set forth in Paragraphs 3(a), (b), (c) and (d), if a Termination of Employment occurs, any unexercised portion of the Option that has not vested on such date of Termination of Employment is automatically forfeited. Unless a longer period is applicable as specified in Section 16(b)(iv) of the Plan or Paragraphs 3(a) through (c), Awardee (or any transferee, if applicable) has 90 days from the date of Termination of Employment or until the Grant Expiration Date, whichever period is shorter, to exercise any portion of the Option that is vested and exercisable on the date of Termination of Employment; provided, however, that if the Termination of Employment was a Termination for Cause, as determined by the Administrator, the Option may be immediately canceled by the Administrator (whether then held by Awardee or any transferee).

4. Restrictions on Exercise . The Option is subject to all restrictions in this Agreement and in the Plan. As a condition of any exercise of the Option, the Company may require Awardee or his or her transferee or successor to make any representation and warranty to comply with any applicable law or regulation or to confirm any factual matters (including Awardee's compliance with the terms of Paragraph

[1] This provision is an alternative that may not be included in every award agreement.

5 or any employment or severance agreement between the Cardinal Group and Awardee) reasonably requested by the Company. The Option is not exercisable if such exercise would involve a violation of any Applicable Law.

5. Special Forfeiture and Repayment Rules . This Agreement contains special forfeiture and repayment rules intended to encourage conduct that protects the Cardinal Group's legitimate business assets and discourage conduct that threatens or harms those assets. The Company does not intend to have the benefits of this Agreement reward or subsidize conduct detrimental to the Company, and therefore will require the forfeiture of the benefits offered under this Agreement and the repayment of gains obtained from this Agreement, according to the rules specified below. Activities that trigger the forfeiture and repayment rules are divided into two categories: Misconduct and Competitor Conduct.

(a) Misconduct . During employment with the Cardinal Group and for three years after the Termination of Employment for any reason, Awardee agrees not to engage in Misconduct. If Awardee engages in Misconduct during employment or within three years after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Option (or any part of the Option that has not been exercised) which automatically terminates, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay to the Company in cash an amount equal to (A) the gross gain to Awardee or any transferee from each and every exercise of the Option at any time within three years prior to the date the Misconduct first occurred less (B) $1.00. The gross gain is calculated by subtracting the exercise price paid for the Shares from the Fair Market Value of the Shares on the exercise date.

As used in this Agreement, " **Misconduct** " means

(A) disclosing or using any of the Cardinal Group's confidential information (as defined by the applicable Cardinal Group policies and agreements) without proper authorization from the Cardinal Group or in any capacity other than as necessary for the performance of Awardee's assigned duties for the Cardinal Group;

(B) violation of the Standards of Business Conduct or any successor code of conduct or other applicable Cardinal Group policies, including but not limited to conduct which would constitute a breach of any representation or certificate of compliance signed by Awardee;

(C) fraud, gross negligence or willful misconduct by Awardee, including but not limited to fraud, gross negligence or willful misconduct causing or contributing to a material error resulting in a restatement of the financial statements of any member of the Cardinal Group;

(D) directly or indirectly soliciting or recruiting for employment or contract work on behalf of a person or entity other than a member of the Cardinal Group, any person who is an employee, representative, officer or director in the Cardinal Group or who held one or more of those positions at any time within the 12 months prior to Awardee's Termination of Employment;

(E) directly or indirectly inducing, encouraging or causing an employee of the Cardinal Group to terminate his/her employment or a contract worker to terminate his/her contract with a member of the Cardinal Group;

(F) any action by Awardee and/or his or her representatives that either does or could reasonably be expected to undermine, diminish or otherwise damage the relationship between the Cardinal Group and any of its customers, prospective customers, vendors, suppliers or employees known to Awardee; or

(G) breaching any provision of any employment or severance agreement with a member of the Cardinal Group.

Nothing in this Agreement will prevent Awardee from testifying truthfully as required by law, prohibit or prevent Awardee from filing a charge with or participating, testifying or assisting in any investigation, hearing, whistleblower proceeding or other proceeding before any federal, state or local government agency (e.g., Equal Employment Opportunity Commission, National Labor Relations Board, Securities and Exchange Commission, etc.), or prevent Awardee from disclosing Cardinal Group's confidential information in confidence to a federal, state or local government official for the purpose of reporting or investigating a suspected violation of law.

(b) Competitor Conduct . If Awardee engages in Competitor Conduct during employment or within one year after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Option (or any part of the Option that has not been exercised) which automatically terminates, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay to the Company in cash an amount equal to (A) the gross gain to Awardee or any transferee from each and every exercise of the Option at any time since the earlier of one year prior to the date the Competitor Conduct first occurred and one year prior to the Termination of Employment, if applicable, less (B) $1.00. The gross gain is calculated by subtracting the exercise price paid for the Shares from the Fair Market Value of the Shares on the exercise date.

As used in this Agreement, " **Competitor Conduct** " means accepting employment with, or directly or indirectly providing services to, a Competitor in the United States. If Awardee has a Termination of Employment and Awardee's responsibilities to the Cardinal Group were limited to a specific territory or territories within or outside the United States during the 24 months prior to the Termination of Employment, then Competitor Conduct will be limited to that specific territory or territories. A "Competitor" means any person or business that competes with the products or services provided by a member of the Cardinal Group for which Awardee had business responsibilities within 24 months prior to Termination of Employment or about which Awardee obtained confidential information (as defined by the applicable Cardinal Group policies or agreements).

(c) General .

(i) Nothing in this Paragraph 5 constitutes or is to be construed as a "noncompete" covenant or other restraint on employment or trade. The provisions of this Paragraph 5 do not prevent, nor are they intended to prevent, Awardee from seeking or accepting employment or other work outside the Cardinal Group. The execution of this Agreement is voluntary. Awardee is free to choose to comply with the terms of this Agreement and receive the benefits offered or else reject this Agreement with no adverse consequences to Awardee's employment with the Cardinal Group.

(ii) Awardee agrees to provide the Company with at least 10 days' written notice prior to accepting employment with or providing services to a Competitor prior to one year after Termination of Employment.

(iii) Awardee acknowledges receiving sufficient consideration for the requirements of this Paragraph 5, including Awardee's receipt of the Option. Awardee further acknowledges that the Company would not provide the Option to Awardee without Awardee's promise to abide by the terms of this Paragraph 5. The parties also acknowledge that the provisions contained in this Paragraph 5 are ancillary to, or part of, an otherwise enforceable agreement at the time this Agreement is made.

(iv) Awardee may be released from the obligations of this Paragraph 5 if and only if the Administrator determines, in writing and in the Administrator's sole discretion, that a release is in the best interests of the Company.

6. Right of Set-Off . By accepting the Option, Awardee consents to a deduction from, and set-off against, any amounts owed to Awardee that are not treated as "non-qualified deferred compensation" under Section 409A of the Code by any member of the Cardinal Group from time to time (including, but not limited to, amounts owed to Awardee as wages, severance payments or other fringe benefits) to the extent of the amounts owed to the Cardinal Group by Awardee under this Agreement.

7. Withholding Tax .

(a) Generally . Awardee is liable and responsible for all taxes owed in connection with the exercise of the Option, regardless of any action the Company takes with respect to any tax withholding obligations that arise in connection with the Option. The Company does not make any representation or undertaking regarding the tax treatment or the treatment of any tax withholding in connection with the exercise of the Option. The Company does not commit and is under no obligation to structure the Option or the exercise of the Option to reduce or eliminate Awardee's tax liability.

(b) Payment of Withholding Taxes . Concurrently with the payment of the exercise price pursuant to Paragraph 1, Awardee is required to arrange for the satisfaction of the minimum amount of any domestic or foreign tax withholding obligation, whether national, federal, state or local, including any employment tax obligation (the "Tax Withholding Obligation") in a manner acceptable to the Company. Any manner provided for in Paragraph 1(b) is an acceptable manner to satisfy the Tax Withholding Obligation unless otherwise determined by the Administrator.

8. Governing Law/Venue for Dispute Resolution/Costs and Legal Fees . This Agreement is governed by the laws of the State of Ohio, without regard to principles of conflicts of law, except to the extent superseded by the laws of the United States of America. **The parties agree and acknowledge that the laws of the State of Ohio bear a substantial relationship to the parties and/or this Agreement and that the Option and benefits granted in this Agreement would not be granted without the governance of this Agreement by the laws of the State of Ohio. In addition, all legal actions or proceedings relating to this Agreement must be brought exclusively in state or federal courts located in Franklin County, Ohio and the parties executing this Agreement hereby consent to the personal jurisdiction of such courts.** Awardee acknowledges that the covenants contained in Paragraph 5 are reasonable in nature, are fundamental for the protection of the Company's legitimate business and proprietary interests, and do not adversely affect Awardee's ability to earn a living. In the event that it becomes necessary for the Company to institute legal proceedings under this Agreement, Awardee is responsible to the Company for all costs and reasonable legal fees incurred by the Company in

connection with the proceedings. Any provision of this Agreement which is determined by a court of competent jurisdiction to be invalid or unenforceable or to disqualify the Award under any Applicable Law should be construed or limited in a manner that is valid and enforceable and that comes closest to the business objectives intended by the provision, without invalidating or rendering unenforceable the remaining provisions of this Agreement.

9. Defend Trade Secrets Act Notice . Under the U.S. Defend Trade Secrets Act of 2016, Awardee will not be held criminally or civilly liable under any federal or state trade secret law for the disclosure of a trade secret that: (a) is made (i) in confidence to a federal, state or local government official, either directly or indirectly, or to an attorney, and (ii) solely for the purpose of reporting or investigating a suspected violation of law; (b) is made to Awardee's attorney in relation to a lawsuit for retaliation against Awardee for reporting a suspected violation of law; or (c) is made in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal.

10. Action by the Administrator . The parties agree that the interpretation of this Agreement rests exclusively and completely within the sole discretion of the Administrator. The parties agree to be bound by the decisions of the Administrator with regard to the interpretation of this Agreement and with regard to any and all matters set forth in this Agreement. In fulfilling its responsibilities, the Administrator may rely upon documents, written statements of the parties, financial reports or other material as the Administrator deems appropriate. The parties agree that there is no right to be heard or to appear before the Administrator and that any decision of the Administrator relating to this Agreement, including without limitation whether particular conduct constitutes Misconduct or Competitor Conduct, is final and binding. The Administrator may delegate its functions under this Agreement to an officer of the Cardinal Group designated by the Administrator, to the extent permitted under the Plan.

11. Prompt Acceptance of Agreement . The Option grant evidenced by this Agreement will, at the discretion of the Administrator, be forfeited if this Agreement is not manually executed and returned to the Company, or electronically executed by Awardee by indicating Awardee's acceptance of this Agreement in accordance with the acceptance procedures set forth on the Company's third-party equity plan administrator's web site, within 90 days of the Grant Date.

12. Electronic Delivery and Consent to Electronic Participation . The Company may, in its sole discretion, decide to deliver any documents related to the Option grant under and participation in the Plan or future options that may be granted under the Plan by electronic means or to request Awardee's consent to participate in the Plan by electronic means. Awardee hereby consents to receive such documents by electronic delivery and to participate in the Plan through an on-line or electronic system established and maintained by the Company or another third party designated by the Company, including the acceptance of option grants and the execution of option agreements through electronic signature.

13. Notices . All notices, requests, consents and other communications required or provided under this Agreement to be delivered by Awardee to the Company will be in writing and will be deemed sufficient if delivered by hand, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to the Company at the address set forth below:

Cardinal Health, Inc.
7000 Cardinal Place
Dublin, Ohio 43017
Attention: Deputy General Counsel

All notices, requests, consents and other communications required or provided under this Agreement to be delivered by the Company to Awardee may be delivered by e-mail or in writing and will be deemed sufficient if delivered by e-mail, hand, facsimile, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to Awardee.

14. Employment Agreement, Offer Letter or Other Arrangement . To the extent a written employment agreement, offer letter or other arrangement ("Employment Arrangement") that was approved by the Human Resources and Compensation Committee or the Board of Directors or that was approved in writing by an officer of the Company pursuant to delegated authority of the Human Resources and Compensation Committee provides for greater benefits to Awardee with respect to (a) vesting of the Option on Termination of Employment by reason of specified events or (b) exercisability of the Option following Termination of Employment, than provided in this Agreement or in the Plan, then the terms of such Employment Arrangement with respect to vesting of the Option on Termination of Employment by reason of such specified events or exercisability of the Option following Termination of Employment supersede the terms of this Agreement to the extent permitted by the terms of the Plan.

15. Recoupment . This Agreement will be administered in compliance with Section 10D of the Exchange Act and any applicable rules or regulations promulgated by the Securities and Exchange Commission or any national securities exchange or national securities association on which the Shares may be traded. In its discretion, moreover, the Administrator may require repayment to the Company of all or any portion of this Award if the amount of the Award was calculated based upon the achievement of financial results that were subsequently the subject of a restatement of the Company's financial statements, Awardee engaged in misconduct that caused or contributed to the need for the restatement of the financial statements, and the amount payable to Awardee would have been lower than the amount actually paid to Awardee had the financial results been properly reported. This Paragraph 15 is not the Company's exclusive remedy with respect to such matters. Except as otherwise required by Applicable Law, this Paragraph 15 will not apply after a Change of Control.

16. Amendments. Any amendment to the Plan will be deemed to be an amendment to this Agreement to the extent that the amendment is applicable hereto; provided, however, that no amendment will impair the rights of Awardee with respect to an outstanding Award unless agreed to by Awardee and the Company, which agreement must be in writing and signed by Awardee and the Company. Other than following a Change of Control, no such agreement is required if the Administrator determines in its sole discretion that such amendment either (a) is required or advisable in order for the Company, the Plan or the Option to satisfy any Applicable Law or to meet the requirements of any accounting standard or (b) is not reasonably likely to significantly diminish the benefits provided under the Option, or that any such diminishment has been adequately compensated, including pursuant to Section 16(c) of the Plan.

17. Adjustments . The number of Shares issuable subject to the Option and the other terms and conditions of the grant evidenced by this Agreement are subject to adjustment as provided in Section 16 of the Plan.

18. No Right to Future Awards or Employment . The grant of the Option under this Agreement to Awardee is a voluntary, discretionary award being made on a one-time basis and it does not

constitute a commitment to make any future awards. The grant of the Option and any related payments made to Awardee will not be considered salary or other compensation for purposes of any severance pay or similar allowance, except as otherwise required by law. Nothing contained in this Agreement confers upon Awardee any right with respect to continuance of employment or other service with the Company or any Affiliate, nor interferes in any way with any right the Company or any Affiliate would otherwise have to terminate Awardee's employment or other service at any time.

19. Successors and Assigns . Without limiting Paragraph 2, the provisions of this Agreement shall inure to the benefit of, and be binding upon, the successors, administrators, heirs, legal representatives and assigns of Awardee, and the successors and assigns of the Company.

ACCEPTANCE OF AGREEMENT

Awardee hereby: (a) acknowledges that he or she has received a copy of the Plan, a copy of the Company's most recent annual report to shareholders and other communications routinely distributed to the Company's shareholders, and a copy of the Plan Description pertaining to the Plan; (b) accepts this Agreement and the Option granted to him or her under this Agreement subject to all provisions of the Plan and this Agreement, including the provisions in the Agreement regarding "Special Forfeiture and Repayment Rules" set forth in Paragraph 5 and "Recoupment" set forth in Paragraph 15; (c) represents that he or she understands that the acceptance of this Agreement through an on-line or electronic system, if applicable, carries the same legal significance as if he or she manually signed the Agreement; and (d) agrees that no transfer of the Shares delivered in respect of the Option may be made unless the Shares have been duly registered under all applicable Federal and state securities laws pursuant to a then-effective registration which contemplates the proposed transfer or unless the Company has received a written opinion of, or satisfactory to, its legal counsel that the proposed transfer is exempt from such registration.

Exhibit 10.2.4

CARDINAL HEALTH, INC.
RESTRICTED SHARE UNITS AGREEMENT

This Restricted Share Units Agreement (this "Agreement") is entered into in Franklin County, Ohio. On [grant date] (the "Grant Date"), Cardinal Health, Inc., an Ohio corporation (the "Company"), has awarded to [employee name] ("Awardee") [# of shares] Stock Units (the "Restricted Share Units" or "Award"), representing an unfunded unsecured promise of the Company to deliver common shares, without par value, of the Company (the "Shares") to Awardee as set forth in this Agreement. The Restricted Share Units have been granted pursuant to the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan (the "Plan"), and are subject to all provisions of the Plan, which are incorporated in this Agreement by reference, and are subject to the provisions of this Agreement. Capitalized terms used in this Agreement which are not specifically defined have the meanings ascribed to such terms in the Plan.

1. Vesting of Restricted Share Units .

(a) General . [CLIFF ALTERNATIVE: The Restricted Share Units vest on the [ ] anniversary of the Grant Date (the "Vesting Date"), subject to the provisions of this Agreement, including those relating to Awardee's continued employment with the Company and its Affiliates (collectively, the "Cardinal Group").] [INSTALLMENT ALTERNATIVE: The Restricted Share Units vest in [ ] installments, which will be as nearly equal as possible, on the [ ] anniversaries of the Grant Date (each a "Vesting Date" with respect to the portion of the Restricted Share Units scheduled to vest on such date), subject in each case to the provisions of this Agreement, including those relating to Awardee's continued employment with the Company and its Affiliates (collectively, the "Cardinal Group").]

(b) Change of Control . In the event of a Change of Control prior to a Termination of Employment, the Restricted Share Units (to the extent not previously vested or forfeited) vest in full, except to the extent that a Replacement Award is provided to Awardee in accordance with Section 16(b) of the Plan. Any Replacement Award must vest in full upon (i) a Termination for Good Reason by Awardee, (ii) a Termination of Employment by the Company or its successor in the Change of Control other than a Termination for Cause, or (iii) Awardee's death or Disability, in each case, occurring at or during the period of two years after the Change of Control. In addition, if a Replacement Award is provided, any Restricted Share Units that would vest in accordance with Paragraphs 3(b) or (c) in connection with Awardee's Retirement or Disability if Awardee's Termination of Employment occurred on the date of the Change of Control will for purposes of this Agreement vest at the time of the Change of Control.

2. Transferability . The Restricted Share Units are not transferable.

3. Termination of Employment .

(a) General . Except as set forth in Paragraphs 1(b) and 3(b), (c) and (d), if a Termination of Employment occurs, then any unvested Restricted Share Units are forfeited by Awardee immediately after such Termination of Employment.

(b) Death or Disability . If a Termination of Employment by reason of Awardee's death or Disability occurs at least 6 months after the Grant Date, then any outstanding unvested Restricted Share Units immediately vest in full and are not forfeited.

(c) Retirement . If a Termination of Employment by reason of Awardee's Retirement occurs at least 6 months after the Grant Date, then a Ratable Portion of each unvested installment of the

outstanding Restricted Share Units immediately vests and is not forfeited. Such "Ratable Portion," with respect to the applicable installment, is an amount equal to such installment of the Restricted Share Units scheduled to vest on a future Vesting Date multiplied by a fraction, the numerator of which is the number of days from the Grant Date through the date of the Termination of Employment, and the denominator of which is the number of days from the Grant Date through such Vesting Date. [1]

(d) Involuntary Termination with Severance . If (i) Paragraph 3(c) is not applicable, but Awardee has attained either (A) age 53 and at least eight years of continuous service with the Cardinal Group or (B) age 59 and at least four years of continuous service with the Cardinal Group, in each case including service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company, (ii) a Termination of Employment by the Cardinal Group (other than a Termination for Cause) occurs at least 6 months after the Grant Date, and (iii) no later than 45 days after the Termination of Employment, Awardee enters into a written separation agreement and general release of claims with the Cardinal Group (in such form as may reasonably be presented by the Company) (a "Separation Agreement"), and Awardee does not timely revoke such Separation Agreement, then a Ratable Portion of each unvested installment of the outstanding Restricted Share Units immediately vests and is not forfeited.

4. Special Forfeiture and Repayment Rules . This Agreement contains special forfeiture and repayment rules intended to encourage conduct that protects the Cardinal Group's legitimate business assets and discourage conduct that threatens or harms those assets. The Company does not intend to have the benefits of this Agreement reward or subsidize conduct detrimental to the Company, and therefore will require the forfeiture of the benefits offered under this Agreement and the repayment of gains obtained from this Agreement, according to the rules specified below. Activities that trigger the forfeiture and repayment rules are divided into two categories: Misconduct and Competitor Conduct.

(a) Misconduct . During employment with the Cardinal Group and for three years after the Termination of Employment for any reason, Awardee agrees not to engage in Misconduct. If Awardee engages in Misconduct during employment or within three years after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Restricted Share Units that have not yet vested or that vested at any time within three years prior to the date the Misconduct first occurred and have not yet been paid pursuant to Paragraph 5, and those forfeited Restricted Share Units automatically terminate, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay to the Company in cash an amount equal to (A) the gross gain to Awardee resulting from the payment of Restricted Share Units pursuant to Paragraph 5 that had vested at any time within three years prior to the date the Misconduct first occurred less (B) $1.00. The gross gain is the Fair Market Value of the Shares represented by the Restricted Share Units on the date of receipt.

As used in this Agreement, " **Misconduct** " means

(A) disclosing or using any of the Cardinal Group's confidential information (as defined by the applicable Cardinal Group policies and agreements) without proper authorization

[1] This provision is an alternative that may not be included in every award agreement.

from the Cardinal Group or in any capacity other than as necessary for the performance of Awardee's assigned duties for the Cardinal Group;

(B) violation of the Standards of Business Conduct or any successor code of conduct or other applicable Cardinal Group policies, including but not limited to conduct which would constitute a breach of any representation or certificate of compliance signed by Awardee;

(C) fraud, gross negligence or willful misconduct by Awardee, including but not limited to fraud, gross negligence or willful misconduct causing or contributing to a material error resulting in a restatement of the financial statements of any member of the Cardinal Group;

(D) directly or indirectly soliciting or recruiting for employment or contract work on behalf of a person or entity other than a member of the Cardinal Group, any person who is an employee, representative, officer or director in the Cardinal Group or who held one or more of those positions at any time within the 12 months prior to Awardee's Termination of Employment;

(E) directly or indirectly inducing, encouraging or causing an employee of the Cardinal Group to terminate his/her employment or a contract worker to terminate his/her contract with a member of the Cardinal Group;

(F) any action by Awardee and/or his or her representatives that either does or could reasonably be expected to undermine, diminish or otherwise damage the relationship between the Cardinal Group and any of its customers, prospective customers, vendors, suppliers or employees known to Awardee; or

(G) breaching any provision of any employment or severance agreement with a member of the Cardinal Group.

Nothing in this Agreement will prevent Awardee from testifying truthfully as required by law, prohibit or prevent Awardee from filing a charge with or participating, testifying or assisting in any investigation, hearing, whistleblower proceeding or other proceeding before any federal, state or local government agency (e.g., Equal Employment Opportunity Commission, National Labor Relations Board, Securities and Exchange Commission, etc.), or prevent Awardee from disclosing Cardinal Group's confidential information in confidence to a federal, state or local government official for the purpose of reporting or investigating a suspected violation of law.

(b) Competitor Conduct . If Awardee engages in Competitor Conduct during employment or within one year after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Restricted Share Units that have not yet vested or that vested at any time within one year prior to the date the Competitor Conduct first occurred and have not yet been paid pursuant to Paragraph 5, and those forfeited Restricted Share Units automatically terminate, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay to the Company in cash an amount equal to (A) the gross gain to Awardee resulting from the payment of Restricted Share Units pursuant to Paragraph 5 that had vested at any time since the

earlier of one year prior to the date the Competitor Conduct first occurred or one year prior to the Termination of Employment, if applicable, less (B) $1.00. The gross gain is the Fair Market Value of the Shares represented by the Restricted Share Units on the date of receipt.

As used in this Agreement, " **Competitor Conduct** " means accepting employment with, or directly or indirectly providing services to, a Competitor in the United States. If Awardee has a Termination of Employment and Awardee's responsibilities to the Cardinal Group were limited to a specific territory or territories within or outside the United States during the 24 months prior to the Termination of Employment, then Competitor Conduct will be limited to that specific territory or territories. A "Competitor" means any person or business that competes with the products or services provided by a member of the Cardinal Group for which Awardee had business responsibilities within 24 months prior to Termination of Employment or about which Awardee obtained confidential information (as defined by the applicable Cardinal Group policies or agreements).

(c) General .

(i) Nothing in this Paragraph 4 constitutes or is to be construed as a "noncompete" covenant or other restraint on employment or trade. The provisions of this Paragraph 4 do not prevent, nor are they intended to prevent, Awardee from seeking or accepting employment or other work outside the Cardinal Group. The execution of this Agreement is voluntary. Awardee is free to choose to comply with the terms of this Agreement and receive the benefits offered or else reject this Agreement with no adverse consequences to Awardee's employment with the Cardinal Group.

(ii) Awardee agrees to provide the Company with at least 10 days' written notice prior to accepting employment with or providing services to a Competitor within one year after Termination of Employment.

(iii) Awardee acknowledges receiving sufficient consideration for the requirements of this Paragraph 4, including Awardee's receipt of the Restricted Share Units. Awardee further acknowledges that the Company would not provide the Restricted Share Units to Awardee without Awardee's promise to abide by the terms of this Paragraph 4. The parties also acknowledge that the provisions contained in this Paragraph 4 are ancillary to, or part of, an otherwise enforceable agreement at the time this Agreement is made.

(iv) Awardee may be released from the obligations of this Paragraph 4 if and only if the Administrator determines, in writing and in the Administrator's sole discretion, that a release is in the best interests of the Company.

5. Payment .

(1) General . Subject to the provisions of Paragraph 4 and Paragraphs 5(b), (c), (d) and (e), Awardee is entitled to receive from the Company (without any payment by or on behalf of Awardee other than as described in Paragraph 9) the Shares represented by the vested Restricted Share Units on the Vesting Date.

(a) Death . To the extent that Restricted Share Units are vested on the date of Awardee's Termination of Employment due to death, Awardee is entitled to receive the corresponding Shares from the Company on the date of death.

(b) Disability, Retirement and Other Separations from Service . To the extent that Restricted Share Units are vested as the result of Disability, Retirement or otherwise on the date of Awardee's "separation from service" (determined in accordance with Section 409A of the Code), Awardee is entitled to receive the corresponding Shares from the Company on the date that is 60 days after Awardee's "separation from service"; provided, however, that if Awardee on the date of separation from service is a "specified employee" (certain employees of the Cardinal Group within the meaning of Section 409A of the Code determined using the identification methodology selected by the Company from time to time), to the extent necessary to avoid the imposition of tax under Section 409A of the Code, Awardee is entitled to receive the corresponding Shares from the Company on the first day of the seventh month after the date of Awardee's separation from service or, if earlier, the date of Awardee's death.

(c) Change of Control . To the extent that Restricted Share Units are vested on the date of a Change of Control, Awardee is entitled to receive the corresponding Shares from the Company on the date of the Change of Control; provided, however, that if such Change of Control would not qualify as a permissible date of distribution under Section 409A(a)(2)(A)(v) of the Code and the regulations thereunder, and where Section 409A of the Code applies to such distribution as a deferral of compensation, Awardee is entitled to receive the corresponding Shares from the Company on the date that would have otherwise applied pursuant to Paragraphs 5(a), (b) or (c).

(d) Elections to Defer Receipt . Elections to defer receipt of the Shares beyond the date of payment provided in this Agreement may be permitted in the discretion of the Administrator pursuant to procedures established by the Administrator in compliance with the requirements of Section 409A of the Code.

6. Dividend Equivalents . Awardee is not entitled to receive cash dividends on the Restricted Share Units, but will receive a dividend equivalent payment from the Company in an amount equal to the dividends that would have been paid on each Share underlying the Restricted Share Units if it had been outstanding between the Grant Date and the payment date of any such Share (i.e., based on the record date for cash dividends). Subject to an election to defer receipt as permitted under Paragraph 5(e), the Company shall pay dividend equivalent payments in cash as soon as reasonably practicable after the payment date of the Restricted Share Units to which such dividend equivalents relate.

7. Right of Set-Off . By accepting the Restricted Share Units, Awardee consents to a deduction from, and set-off against, any amounts owed to Awardee that are not treated as "non-qualified deferred compensation" under Section 409A of the Code by any member of the Cardinal Group from time to time (including, but not limited to, amounts owed to Awardee as wages, severance payments or other fringe benefits) to the extent of the amounts owed to the Cardinal Group by Awardee under this Agreement.

8. No Shareholder Rights . Awardee has no rights of a shareholder with respect to the Restricted Share Units, including no right to vote the Shares represented by the Restricted Share Units, until such Shares vest and are paid to Awardee.

9. Withholding Tax .

(a) Generally . Awardee is liable and responsible for all taxes owed in connection with the Restricted Share Units (including taxes owed with respect to the cash payments described in Paragraph 6), regardless of any action the Company takes with respect to any tax withholding obligations that arise in connection with the Restricted Share Units. The Company does not make any representation or undertaking regarding the tax treatment or the treatment of any tax withholding in connection with the

grant, vesting or payment of the Restricted Share Units or the subsequent sale of Shares issuable pursuant to the Restricted Share Units. The Company does not commit and is under no obligation to structure the Restricted Share Units to reduce or eliminate Awardee's tax liability.

(b) Payment of Withholding Taxes . Prior to any event in connection with the Restricted Share Units (e.g., vesting or payment) that the Company determines may result in any domestic or foreign tax withholding amounts being paid by the Company, whether national, federal, state or local, including any employment tax obligation (the "Tax Withholding Obligation"), Awardee is required to arrange for the satisfaction of the minimum amount of such Tax Withholding Obligation in a manner acceptable to the Company. Awardee's acceptance of this Agreement constitutes Awardee's instruction and authorization to the Company to withhold on Awardee's behalf the number of Shares from those Shares issuable to Awardee under this Award as the Company determines to be sufficient to satisfy the Tax Withholding Obligation. In the case of any amounts withheld for taxes pursuant to this provision in the form of Shares, the amount withheld may not exceed the amount legally required, and withholding above the minimum withholding requirements shall be available only if and to the extent that the Administrator has authorized such. The Company has the right to deduct from all cash payments paid pursuant to Paragraph 6 the amount of any taxes which the Company is required to withhold with respect to such payments.

10. Governing Law/Venue for Dispute Resolution/Costs and Legal Fees . This Agreement is governed by the laws of the State of Ohio, without regard to principles of conflicts of law, except to the extent superseded by the laws of the United States of America. **The parties agree and acknowledge that the laws of the State of Ohio bear a substantial relationship to the parties and/or this Agreement and that the Restricted Share Units and benefits granted in this Agreement would not be granted without the governance of this Agreement by the laws of the State of Ohio. In addition, all legal actions or proceedings relating to this Agreement must be brought exclusively in state or federal courts located in Franklin County, Ohio and the parties executing this Agreement hereby consent to the personal jurisdiction of such courts.** Awardee acknowledges that the covenants contained in Paragraph 4 are reasonable in nature, are fundamental for the protection of the Company's legitimate business and proprietary interests, and do not adversely affect Awardee's ability to earn a living. In the event that it becomes necessary for the Company to institute legal proceedings under this Agreement, Awardee is responsible to the Company for all costs and reasonable legal fees incurred by the Company in connection with the proceedings. Any provision of this Agreement which is determined by a court of competent jurisdiction to be invalid or unenforceable or to disqualify the Award under any Applicable Law should be construed or limited in a manner that is valid and enforceable and that comes closest to the business objectives intended by the provision, without invalidating or rendering unenforceable the remaining provisions of this Agreement.

11. Defend Trade Secrets Act Notice . Under the U.S. Defend Trade Secrets Act of 2016, Awardee will not be held criminally or civilly liable under any federal or state trade secret law for the disclosure of a trade secret that: (a) is made (i) in confidence to a federal, state or local government official, either directly or indirectly, or to an attorney, and (ii) solely for the purpose of reporting or investigating a suspected violation of law; (b) is made to Awardee's attorney in relation to a lawsuit for retaliation against Awardee for reporting a suspected violation of law; or (c) is made in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal.

12. Action by the Administrator . The parties agree that the interpretation of this Agreement rests exclusively and completely within the sole discretion of the Administrator. The parties agree to be bound by the decisions of the Administrator with regard to the interpretation of this Agreement and with

regard to any and all matters set forth in this Agreement. In fulfilling its responsibilities under this Agreement, the Administrator may rely upon documents, written statements of the parties, financial reports or other material as the Administrator deems appropriate. The parties agree that there is no right to be heard or to appear before the Administrator and that any decision of the Administrator relating to this Agreement, including whether particular conduct constitutes Misconduct or Competitor Conduct, is final and binding. The Administrator may delegate its functions under this Agreement to an officer of the Cardinal Group designated by the Administrator, to the extent permitted under the Plan.

13. Prompt Acceptance of Agreement . The Restricted Share Unit grant evidenced by this Agreement will, at the discretion of the Administrator, be forfeited if this Agreement is not manually executed and returned to the Company, or electronically executed by Awardee by indicating Awardee's acceptance of this Agreement in accordance with the acceptance procedures set forth on the Company's third-party equity plan administrator's web site, within 90 days of the Grant Date.

14. Electronic Delivery and Consent to Electronic Participation . The Company may, in its sole discretion, decide to deliver any documents related to the Restricted Share Unit grant under and participation in the Plan or future Restricted Share Units that may be granted under the Plan by electronic means or to request Awardee's consent to participate in the Plan by electronic means. Awardee hereby consents to receive such documents by electronic delivery and to participate in the Plan through an on-line or electronic system established and maintained by the Company or another third party designated by the Company, including the acceptance of restricted share unit grants and the execution of restricted share unit agreements through electronic signature.

15. Notices . All notices, requests, consents and other communications required or provided under this Agreement to be delivered by Awardee to the Company will be in writing and will be deemed sufficient if delivered by hand, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to the Company at the address set forth below:

Cardinal Health, Inc.
7000 Cardinal Place
Dublin, Ohio 43017
Attention: Deputy General Counsel

All notices, requests, consents and other communications required or provided under this Agreement to be delivered by the Company to Awardee may be delivered by e-mail or in writing and will be deemed sufficient if delivered by e-mail, hand, facsimile, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to Awardee.

16. Employment Agreement, Offer Letter or Other Arrangement . To the extent a written employment agreement, offer letter or other arrangement ("Employment Arrangement") that was approved by the Human Resources and Compensation Committee or the Board of Directors or that was approved in writing by an officer of the Company pursuant to delegated authority of the Human Resources and Compensation Committee provides for greater benefits to Awardee with respect to vesting of the Award on Termination of Employment by reason of specified events than provided in this Agreement or in the Plan, then the terms of such Employment Arrangement with respect to vesting of the Award on Termination of Employment by reason of such specified events supersede the terms of this Agreement to the extent permitted by the terms of the Plan.

17. Recoupment . This Agreement will be administered in compliance with Section 10D of the Exchange Act and any applicable rules or regulations promulgated by the Securities and Exchange Commission or any national securities exchange or national securities association on which the Shares may be traded. In its discretion, moreover, the Administrator may require repayment to the Company of all or any portion of this Award if the amount of the Award was calculated based upon the achievement of financial results that were subsequently the subject of a restatement of the Company's financial statements, Awardee engaged in misconduct that caused or contributed to the need for the restatement of the financial statements, and the amount payable to Awardee would have been lower than the amount actually paid to Awardee had the financial results been properly reported. This Paragraph 17 is not the Company's exclusive remedy with respect to such matters. Except as otherwise required by Applicable Law, this Paragraph 17 will not apply after a Change of Control.

18. Amendment . Any amendment to the Plan is deemed to be an amendment to this Agreement to the extent that the amendment is applicable hereto; provided, however, that no amendment may impair the rights of Awardee with respect to an outstanding Restricted Share Unit unless agreed to by Awardee and the Company, which agreement must be in writing and signed by Awardee and the Company. Other than following a Change of Control, no such agreement is required if the Administrator determines in its sole discretion that such amendment either (a) is required or advisable in order for the Company, the Plan or the Restricted Share Units to satisfy any Applicable Law or to meet the requirements of any accounting standard or (b) is not reasonably likely to significantly diminish the benefits provided under the Restricted Share Units, or that any such diminishment has been adequately compensated, including pursuant to Section 16(c) of the Plan.

19. Adjustments . The number of Shares issuable for each Restricted Share Unit and the other terms and conditions of the Award evidenced by this Agreement are subject to adjustment as provided in Section 16 of the Plan.

20. Compliance with Section 409A of the Code . To the extent applicable, it is intended that this Agreement comply with the provisions of Section 409A of the Code. This Agreement shall be administered in a manner consistent with this intent, and any provision that would cause this Agreement or the Plan to fail to satisfy Section 409A of the Code shall have no force or effect until amended to comply with Section 409A of the Code (which amendment may be retroactive to the extent permitted by Section 409A of the Code and may be made by the Company without the consent of Awardee).

21. No Right to Future Awards or Employment . The grant of the Restricted Share Units under this Agreement to Awardee is a voluntary, discretionary award being made on a one-time basis and it does not constitute a commitment to make any future awards. The grant of the Restricted Share Units and any payments made under this Agreement will not be considered salary or other compensation for purposes of any severance pay or similar allowance, except as otherwise required by law. Nothing contained in this Agreement confers upon Awardee any right to be employed or remain employed by the Company or any of its Affiliates, nor limits or affects in any manner the right of the Company or any of its Affiliates to terminate the employment or adjust the compensation of Awardee.

22. Successors and Assigns . Without limiting Paragraph 2, the provisions of this Agreement shall inure to the benefit of, and be binding upon, the successors, administrators, heirs, legal representatives and assigns of Awardee, and the successors and assigns of the Company.

Exhibit 10.2.5

CARDINAL HEALTH, INC.
PERFORMANCE SHARE UNITS AGREEMENT

This Performance Share Units Agreement (this "Agreement") is entered into in Franklin County, Ohio. On [grant date] (the "Grant Date"), Cardinal Health, Inc., an Ohio corporation (the "Company"), has awarded to [employee name] ("Awardee") [target # of units] performance-based Stock Units (the "Performance Share Units" or "Award"). The Performance Share Units have been granted pursuant to the Amended Cardinal Health, Inc. 2011 Long-Term Incentive Plan (the "Plan"), and are subject to all provisions of the Plan, which are incorporated in this Agreement by reference, and are subject to the provisions of this Agreement. Capitalized terms used in this Agreement which are not specifically defined have the meanings ascribed to them in the Plan.

1. Vesting of Performance Share Units . Subject to the provisions of this Agreement, zero to [maximum percentage] of the Performance Share Units vest when the Administrator certifies the payout level ("Payout Level") as a result of achievement of: (a) specific performance criteria (the "Performance Goals") for a performance period ("Performance Period") set forth in Exhibit A attached hereto; and (b) Qualifying Performance Criteria set by the Administrator for a Performance Period, if the Award is intended to satisfy the requirements for "performance-based compensation" under Section 162(m) of the Code.

2. Transferability . The Performance Share Units are not transferable.

3. Termination of Employment .

(a) General . Except to the extent that vesting occurs pursuant to Paragraphs 3(b), (c), (d) or (e) or Paragraph 5, if a Termination of Employment occurs prior to the applicable payment date in Paragraph 6(a) (the "Payment Date") associated with a Performance Period, any Performance Share Units allocated to that Performance Period, whether vested or unvested, are forfeited by Awardee.

(b) Death or Disability . If a Termination of Employment by reason of Awardee's death or Disability occurs at least 6 months after the Grant Date, then the outstanding unvested Performance Share Units for a Performance Period will vest as if Awardee had remained employed through the Payment Date.

(c) Retirement . If a Termination of Employment by reason of Awardee's Retirement occurs at least 6 months after the Grant Date, then the outstanding unvested Performance Share Units for a Performance Period will vest in an amount equal to the number of Performance Share Units that would have vested if Awardee had remained employed through the Payment Date multiplied by a fraction, the numerator of which is the number of days in the Performance Period up to the date of such Termination of Employment, and the denominator of which is the total number of days in such Performance Period. [1]

(d) Involuntary Termination with Severance . If (i) neither Paragraph 3(c) nor Paragraph 3(e) is applicable, but Awardee has attained either (A) age 53 and at least eight years of continuous service with the Company and its Affiliates (collectively, the "Cardinal Group"), or (B) age 59 and at least four years of continuous service with the Cardinal Group, in each case including service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company, (ii) a Termination of Employment by the Cardinal Group (other than a Termination for Cause) occurs at least 6 months after

[1] This provision is an alternative that may not be included in every award agreement.

the Grant Date, and (iii) no later than 45 days after the Termination of Employment, Awardee enters into awritten separation agreement and general release with the Cardinal Group (in such form as may reasonably be presented by the Company) (a "Separation Agreement"), and Awardee does not timely revoke such Separation Agreement, then the outstanding unvested Performance Share Units for a Performance Period will vest in an amount equal to the number of Performance Share Units that would have vested if Awardee had remained employed through the Payment Date multiplied by a fraction, the numerator of which is the number of days in the Performance Period up to the date of such Termination of Employment, and the denominator of which is the total number of days in such Performance Period.

(e) Involuntary Termination After Completion of a Performance Period . If a Termination of Employment by the Cardinal Group (other than a Termination for Cause) occurs after the completion of a Performance Period but prior to the Payment Date, then the Performance Share Units for the applicable Performance Period will vest as if Awardee had remained employed through the Payment Date.

4. Special Forfeiture and Repayment Rules . This Agreement contains special forfeiture and repayment rules intended to encourage conduct that protects the Cardinal Group's legitimate business assets and discourage conduct that threatens or harms those assets. The Company does not intend to have the benefits of this Agreement reward or subsidize conduct detrimental to the Company, and therefore will require the forfeiture of the benefits offered under this Agreement and the repayment of gains obtained from this Agreement, according to the rules specified below. Activities that trigger the forfeiture and repayment rules are divided into two categories: Misconduct and Competitor Conduct.

(a) Misconduct . During employment with the Cardinal Group and for three years after the Termination of Employment for any reason, Awardee agrees not to engage in Misconduct. If Awardee engages in Misconduct during employment or within three years after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Performance Share Units that have not yet vested or that vested at any time within three years prior to the date the Misconduct first occurred and have not yet been paid pursuant to Paragraph 6, and those forfeited Performance Share Units automatically terminate, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay to the Company in cash an amount equal to: (A) the gross gain to Awardee resulting from the payment of the Performance Share Units pursuant to Paragraph 6 that had vested at any time within three years prior to the date the Misconduct first occurred less (B) $1.00. The gross gain is the Fair Market Value of the Shares represented by the Performance Share Units on the Payment Date.

As used in this Agreement, " **Misconduct** " means

(A) disclosing or using any of the Cardinal Group's confidential information (as defined by the applicable Cardinal Group policies and agreements) without proper authorization from the Cardinal Group or in any capacity other than as necessary for the performance of Awardee's assigned duties for the Cardinal Group;

(B) violation of the Standards of Business Conduct or any successor code of conduct or other applicable Cardinal Group policies, including but not limited to conduct which would constitute a breach of any representation or certificate of compliance signed by Awardee;

(C) fraud, gross negligence or willful misconduct by Awardee, including but not limited to fraud, gross negligence or willful misconduct causing or contributing to a material error resulting in a restatement of the financial statements of any member of the Cardinal Group;

(D) directly or indirectly soliciting or recruiting for employment or contract work on behalf of a person or entity other than a member of the Cardinal Group, any person who is an employee, representative, officer or director in the Cardinal Group or who held one or more of those positions at any time within the 12 months prior to Awardee's Termination of Employment;

(E) directly or indirectly inducing, encouraging or causing an employee of the Cardinal Group to terminate his/her employment or a contract worker to terminate his/her contract with a member of the Cardinal Group;

(F) any action by Awardee and/or his or her representatives that either does or could reasonably be expected to undermine, diminish or otherwise damage the relationship between the Cardinal Group and any of its customers, prospective customers, vendors, suppliers or employees known to Awardee; or

(G) breaching any provision of any employment or severance agreement with a member of the Cardinal Group.

Nothing in this Agreement will prevent Awardee from testifying truthfully as required by law, prohibit or prevent Awardee from filing a charge with or participating, testifying or assisting in any investigation, hearing, whistleblower proceeding or other proceeding before any federal, state or local government agency (e.g., Equal Employment Opportunity Commission, National Labor Relations Board, Securities and Exchange Commission, etc.), or prevent Awardee from disclosing Cardinal Group's confidential information in confidence to a federal, state or local government official for the purpose of reporting or investigating a suspected violation of law.

(b) Competitor Conduct . If Awardee engages in Competitor Conduct during employment or within one year after the Termination of Employment for any reason, then

(i) Awardee immediately forfeits the Performance Share Units that have not yet vested or that vested at any time within one year prior to the date the Competitor Conduct first occurred and have not yet been paid pursuant to Paragraph 6, and those forfeited Performance Share Units automatically terminate, and

(ii) Awardee shall, within 30 days following written notice from the Company, pay the Company an amount equal to: (A) the gross gain to Awardee resulting from the payment of Performance Share Units pursuant to Paragraph 6 that had vested at any time since the earlier of one year prior to the date the Competitor Conduct first occurred or one year prior to the Termination of Employment, if applicable, less (B) $1.00. The gross gain is the Fair Market Value of the Shares represented by the Performance Share Units on the Payment Date.

As used in this Agreement, " **Competitor Conduct** " means accepting employment with, or directly or indirectly providing services to, a Competitor in the United States. If Awardee has a Termination of

Employment and Awardee's responsibilities to the Cardinal Group were limited to a specific territory or territories within or outside the United States during the 24 months prior to the Termination of Employment, then Competitor Conduct is limited to that specific territory or territories. A "Competitor" means any person or business that competes with the products or services provided by a member of the Cardinal Group for which Awardee had business responsibilities within 24 months prior to Termination of Employment or about which Awardee obtained confidential information (as defined by the applicable Cardinal Group policies or agreements).

(c) General .

(i) Nothing in this Paragraph 4 constitutes or is to be construed as a "noncompete" covenant or other restraint on employment or trade. The provisions of this Paragraph 4 do not prevent, nor are they intended to prevent, Awardee from seeking or accepting employment or other work outside the Cardinal Group. The execution of this Agreement is voluntary. Awardee is free to choose to comply with the terms of this Agreement and receive the benefits offered or else reject this Agreement with no adverse consequences to Awardee's employment with the Cardinal Group.

(ii) Awardee agrees to provide the Company with at least 10 days written notice prior to accepting employment with or providing services to a Competitor within one year after Termination of Employment.

(iii) Awardee acknowledges receiving sufficient consideration for the requirements of this Paragraph 4, including Awardee's receipt of the Performance Share Units. Awardee further acknowledges that the Company would not provide the Performance Share Units to Awardee without Awardee's promise to abide by the terms of this Paragraph 4. The parties also acknowledge that the provisions contained in this Paragraph 4 are ancillary to, or part of, an otherwise enforceable agreement at the time this Agreement is made.

(iv) Awardee may be released from the obligations of this Paragraph 4 if and only if the Administrator determines, in writing and in the Administrator's sole discretion, that a release is in the best interests of the Company.

5. Change of Control .

(a) Valuation . In the event of a Change of Control prior to a Payment Date, the Administrator, as constituted immediately before such Change of Control, shall determine and certify the Payout Level (the "Change of Control Payout Level") based on (i) actual performance through the most recent date prior to the Change of Control for which achievement of the Performance Goals can reasonably be determined; and (ii) the expected performance for the remainder of the Performance Period based on information reasonably available.

(b) Vesting and Substitute Awards .

(i) In the event of a Change of Control prior to a Payment Date, the percentage of the Performance Share Units determined in accordance with Exhibit A at the Change of Control Payout Level vests unless an award meeting the requirements of Paragraph 5(b)(ii) (a "Substitute Award") is provided to Awardee to replace or adjust the Award. If a Substitute Award is provided, any Performance Share Units that (A) except to the extent that clause (B) applies, would vest in accordance with Paragraphs 3(b) or (c) in connection with Awardee's Retirement or Disability if

Awardee's Termination of Employment occurred on the date of the Change of Control or (B) are eligible to vest in accordance with Paragraph 3(d) as a result of Awardee's Termination of Employment that actually occurs prior to the Change of Control, vest at the time of the Change of Control. No Substitute Award will be provided in the event of Awardee's Termination of Employment by reason of death, Disability, Retirement or the circumstances described in Paragraph 3(d) prior to a Change of Control.

(ii) An award meets the conditions of this Paragraph 5(b)(ii) (and hence qualifies as a Substitute Award) if, as determined by the Administrator as constituted immediately before the Change of Control, (A) it has a value at the time of grant or adjustment at least equal to the value of the Performance Share Units that would vest under Paragraph 5(b)(i) if there were no Substitute Award; (B) it is paid in publicly traded equity securities of the Company or its successor in the Change of Control or another entity that is affiliated with the Company or its successor following the Change of Control; (C) it is a restricted stock unit award with vesting and payment not conditioned on the achievement of any performance criteria or conditions; (D) it vests in full upon (1) a Termination for Good Reason by Awardee, (2) a Termination of Employment by the Company or its successor in the Change of Control other than a Termination for Cause, or (3) Awardee's death or Disability, in each case, occurring at or during the period of two years after the Change of Control; (E) if Awardee is subject to U.S. federal income tax under the Code, the tax consequences to Awardee under the Code of the Substitute Award are not less favorable to Awardee than the tax consequences of the Award; and (F) its other terms and conditions are not less favorable to Awardee than the terms and conditions of the Award (including the provisions that would apply in the event of a subsequent Change of Control). Without limiting the generality of the foregoing, the Substitute Award may take the form of a continuation of the Award if the modifications required by the preceding sentence are satisfied.

6. Payment .

(a) General . The Company shall pay Performance Share Units in Shares. Subject to the provisions of Paragraph 4 and Paragraphs 6(b) and (c), Awardee is entitled to receive from the Company (without any payment on behalf of Awardee other than as described in Paragraph 10) one Share for each vested Performance Share Unit not later than the 60th day after the end of a Performance Period, except that if Awardee's Termination of Employment occurs due to death after the end of the Performance Period, Awardee is entitled to receive the corresponding Shares from the Company on the date of death.

(b) Change of Control . Notwithstanding Paragraph 6(a), to the extent that the performance and service vesting requirements have been satisfied for the Performance Share Units on the dates set forth below, payment with respect to the Performance Share Units will be made as follows:

(i) On the date of a Change of Control, Awardee is entitled to receive one Share for each vested Performance Share Unit, subject to any adjustments made pursuant to Section 16(a) of the Plan, from the Company; provided, however, that if such Change of Control would not qualify as a permissible date of distribution under Section 409A(a)(2)(A)(v) of the Code and the regulations thereunder, and where Section 409A of the Code applies to such distribution as a deferral of compensation, Awardee is entitled to receive the corresponding Shares from the Company on the date that would have otherwise applied pursuant to Paragraphs 6(a), 6(b)(ii) or 6(b)(iii).

(ii) If Awardee's separation from service occurs during the period of two years following a Change of Control (and such Change of Control constitutes a change of control event as defined in accordance with Section 409A(a)(2)(A)(v) of the Code and the regulations thereunder), Awardee is entitled to receive one Share for each vested Performance Share Unit from the Company on the date of Awardee's separation from service; provided, in such event that if Awardee on the date of separation from service is a "specified employee" (certain employees of the Cardinal Group within the meaning of Section 409A of the Code determined using the identification methodology selected by the Company from time to time), Awardee is entitled to receive the corresponding Shares from the Company on the first day of the seventh month after the date of Awardee's separation from service or, if earlier, the date of Awardee's death.

(iii) On the date of Awardee's Termination of Employment due to death following a Change of Control, Awardee is entitled to receive one Share for each vested Performance Share Unit from the Company on the date of death.

(c) Elections to Defer Receipt. Elections to defer receipt of the Shares beyond the Payment Date may be permitted in the discretion of the Administrator pursuant to procedures established by the Administrator in compliance with the requirements of Section 409A of the Code.

7. Dividend Equivalents. Awardee is not entitled to receive cash dividends on the Performance Share Units, but will receive a dividend equivalent payment from the Company in an amount equal to the dividends that would have been paid on each Share underlying the Performance Share Units if it had been outstanding between the Grant Date and the payment date of any such Share (i.e., based on the record date for cash dividends). Subject to an election to defer receipt as permitted under Paragraph 6(c), the Company shall pay dividend equivalent payments in cash as soon as reasonably practicable after the payment date of (and to the same extent as) the Performance Share Units to which such dividend equivalents relate.

8. Right of Set-Off. By accepting the Performance Share Units, Awardee consents to a deduction from, and set-off against, any amounts owed to Awardee that are not treated as "non-qualified deferred compensation" under Section 409A of the Code by any member of the Cardinal Group from time to time (including, but not limited to, amounts owed to Awardee as wages, severance payments or other fringe benefits) to the extent of the amounts owed to the Cardinal Group by Awardee under this Agreement.

9. No Shareholder Rights. Awardee has no rights of a shareholder with respect to the Performance Share Units, including no right to vote any Shares represented by the Performance Share Units, until such Shares are paid to Awardee.

10. Withholding Tax.

(a) Generally. Awardee is liable and responsible for all taxes owed in connection with the Performance Share Units (including taxes owed with respect to the cash payments described in Paragraph 7), regardless of any action the Company takes with respect to any tax withholding obligations that arise in connection with the Performance Share Units. The Company does not make any representation or undertaking regarding the tax treatment or the treatment of any tax withholding in connection with the grant, vesting or payment of the Performance Share Units or the subsequent sale of Shares issuable pursuant to vested Performance Share Units. The Company does not commit and is under no obligation to structure the Performance Share Units to reduce or eliminate Awardee's tax liability.

(b) Payment of Withholding Taxes. Prior to any event in connection with the Performance Share Units (e.g., vesting or payment) that the Company determines may result in any domestic or foreign tax withholding amounts being paid by the Company, whether national, federal, state or local, including any employment tax obligation (the "Tax Withholding Obligation"), Awardee is required to arrange for the satisfaction of the minimum amount of such Tax Withholding Obligation in a manner acceptable to the Company. Awardee's acceptance of this Agreement constitutes Awardee's instruction and authorization to the Company to withhold on Awardee's behalf the number of Shares from those Shares issuable to Awardee under this Award as the Company determines to be sufficient to satisfy the Tax Withholding Obligation. In the case of any amounts withheld for taxes pursuant to this provision in the form of Shares, the amount withheld may not exceed the amount legally required, and withholding above the minimum withholding requirements shall be available only if and to the extent that the Administrator has authorized such. The Company has the right to deduct from all cash payments paid pursuant to Paragraph 7 the amount of any taxes which the Company is required to withhold with respect to such payments.

11. Governing Law/Venue for Dispute Resolution/Costs and Legal Fees. This Agreement is governed by the laws of the State of Ohio, without regard to principles of conflicts of law, except to the extent superseded by the laws of the United States of America. **The parties agree and acknowledge that the laws of the State of Ohio bear a substantial relationship to the parties and/or this Agreement and that the Performance Share Units and benefits granted in this Agreement would not be granted without the governance of this Agreement by the laws of the State of Ohio. In addition, all legal actions or proceedings relating to this Agreement must be brought exclusively in state or federal courts located in Franklin County, Ohio and the parties executing this Agreement hereby consent to the personal jurisdiction of such courts.** Awardee acknowledges that the covenants contained in Paragraph 4 are reasonable in nature, are fundamental for the protection of the Company's legitimate business and proprietary interests, and do not adversely affect Awardee's ability to earn a living. In the event that it becomes necessary for the Company to institute legal proceedings under this Agreement, Awardee is responsible to the Company for all costs and reasonable legal fees incurred by the Company in connection with the proceedings. Any provision of this Agreement which is determined by a court of competent jurisdiction to be invalid or unenforceable or to disqualify the Award under any Applicable Law should be construed or limited in a manner that is valid and enforceable and that comes closest to the business objectives intended by the provision, without invalidating or rendering unenforceable the remaining provisions of this Agreement.

12. Defend Trade Secrets Act Notice. Under the U.S. Defend Trade Secrets Act of 2016, Awardee will not be held criminally or civilly liable under any federal or state trade secret law for the disclosure of a trade secret that: (a) is made (i) in confidence to a federal, state or local government official, either directly or indirectly, or to an attorney, and (ii) solely for the purpose of reporting or investigating a suspected violation of law; (b) is made to Awardee's attorney in relation to a lawsuit for retaliation against Awardee for reporting a suspected violation of law; or (c) is made in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal.

13. Action by the Administrator. The parties agree that the interpretation of this Agreement rests exclusively and completely within the sole discretion of the Administrator. The parties agree to be bound by the decisions of the Administrator with regard to the interpretation of this Agreement and with regard to any and all matters set forth in this Agreement. In fulfilling its responsibilities under this Agreement, the Administrator may rely upon documents, written statements of the parties, financial reports or other material as the Administrator deems appropriate. The parties agree that there is no right to be heard or to appear before the Administrator and that any decision of the Administrator relating to

this Agreement, including whether particular conduct constitutes Misconduct or Competitor Conduct, is final and binding. The Administrator may delegate its functions under this Agreement to an officer of the Cardinal Group designated by the Administrator, to the extent permitted under the Plan.

14. Prompt Acceptance of Agreement . The Performance Share Units grant evidenced by this Agreement will, at the discretion of the Administrator, be forfeited if this Agreement is not manually executed and returned to the Company, or electronically executed by Awardee by indicating Awardee's acceptance of this Agreement in accordance with the acceptance procedures set forth on the Company's third-party equity plan administrator's web site, within 90 days of the Grant Date.

15. Electronic Delivery and Consent to Electronic Participation . The Company may, in its sole discretion, decide to deliver any documents related to the Performance Share Unit grant under and participation in the Plan or future Performance Share Units that may be granted under the Plan by electronic means or to request Awardee's consent to participate in the Plan by electronic means. Awardee hereby consents to receive such documents by electronic delivery and to participate in the Plan through an on-line or electronic system established and maintained by the Company or another third party designated by the Company, including the acceptance of performance share unit grants and the execution of performance share unit agreements through electronic signature.

16. Notices . All notices, requests, consents and other communications required or provided under this Agreement to be delivered by Awardee to the Company will be in writing and will be deemed sufficient if delivered by hand, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to the Company at the address set forth below:

Cardinal Health, Inc.
7000 Cardinal Place
Dublin, Ohio 43017
Attention: Deputy General Counsel

All notices, requests, consents and other communications required or provided under this Agreement to be delivered by the Company to Awardee may be delivered by e-mail or in writing and will be deemed sufficient if delivered by e-mail, hand, facsimile, nationally recognized overnight courier, or certified or registered mail, return receipt requested, postage prepaid, and will be effective upon delivery to Awardee.

17. Employment Agreement, Offer Letter or Other Arrangement . To the extent a written employment agreement, offer letter or other arrangement ("Employment Arrangement") that was approved by the Human Resources and Compensation Committee or the Board of Directors or that was approved in writing by an officer of the Company pursuant to delegated authority of the Human Resources and Compensation Committee provides for greater benefits to Awardee with respect to vesting of the Award on Termination of Employment by reason of specified events than provided in this Agreement or in the Plan, then the terms of such Employment Arrangement with respect to vesting of the Award on Termination of Employment by reason of such specified events supersede the terms of this Agreement to the extent permitted by the terms of the Plan.

18. Recoupment . This Agreement will be administered in compliance with Section 10D of the Exchange Act and any applicable rules or regulations promulgated by the Securities and Exchange Commission or any national securities exchange or national securities association on which the Shares may be traded. In its discretion, moreover, the Administrator may require repayment to the Company of all or any portion of this Award if the amount of the Award was calculated based upon the achievement of

financial results that were subsequently the subject of a restatement of the Company's financial statements, Awardee engaged in misconduct that caused or contributed to the need for the restatement of the financial statements, and the amount payable to Awardee would have been lower than the amount actually paid to Awardee had the financial results been properly reported. This Paragraph 18 is not the Company's exclusive remedy with respect to such matters. Except as otherwise required by Applicable Law, this Paragraph 18 will not apply after a Change of Control.

19. Amendment . Any amendment to the Plan is deemed to be an amendment to this Agreement to the extent that the amendment is applicable hereto; provided, however, that no amendment may impair the rights of Awardee with respect to an outstanding Performance Share Unit unless agreed to by Awardee and the Company, which agreement must be in writing and signed by Awardee and the Company. Other than following a Change of Control, no such agreement is required if the Administrator determines in its sole discretion that such amendment either (a) is required or advisable in order for the Company, the Plan or the Performance Share Units to satisfy any Applicable Law or to meet the requirements of any accounting standard or (b) is not reasonably likely to significantly diminish the benefits provided under the Performance Share Units, or that any such diminishment has been adequately compensated, including pursuant to Section 16(c) of the Plan.

20. Adjustments . The number of Shares issuable for each Performance Share Unit and the other terms and conditions of the Award evidenced by this Agreement are subject to adjustment as provided in Section 16 of the Plan.

21. Compliance with Section 409A of the Code . To the extent applicable, it is intended that this Agreement comply with the provisions of Section 409A of the Code. This Agreement shall be administered in a manner consistent with this intent, and any provision that would cause this Agreement or the Plan to fail to satisfy Section 409A of the Code shall have no force or effect until amended to comply with Section 409A of the Code (which amendment may be retroactive to the extent permitted by Section 409A of the Code and may be made by the Company without the consent of Awardee).

22. No Right to Future Awards or Employment . The grant of the Performance Share Units under this Agreement to Awardee is a voluntary, discretionary award being made on a one-time basis and it does not constitute a commitment to make any future awards. The grant of the Performance Share Units and any payments made under this Agreement will not be considered salary or other compensation for purposes of any severance pay or similar allowance, except as otherwise required by law. Nothing contained in this Agreement confers upon Awardee any right to be employed or remain employed by the Company or any of its Affiliates, nor limits or affects in any manner the right of the Company or any of its Affiliates to terminate the employment or adjust the compensation of Awardee.

23. Successors and Assigns . Without limiting Paragraph 2, the provisions of this Agreement shall inure to the benefit of, and be binding upon, the successors, administrators, heirs, legal representatives and assigns of Awardee, and the successors and assigns of the Company.

CARDINAL HEALTH, INC.

Its: _____

ACCEPTANCE OF AGREEMENT

Awardee hereby: (a) acknowledges that he or she has received a copy of the Plan, a copy of the Company's most recent annual report to shareholders and other communications routinely distributed to the Company's shareholders, and a copy of the Plan Description pertaining to the Plan; (b) accepts this Agreement and the Performance Share Units granted to him or her under this Agreement subject to all provisions of the Plan and this Agreement, including the provisions in this Agreement regarding "Special Forfeiture and Repayment Rules" set forth in Paragraph 4 and "Recoupment" set forth in Paragraph 18; (c) represents that he or she understands that the acceptance of this Agreement through an on-line or electronic system, if applicable, carries the same legal significance as if he or she manually signed the Agreement; and (d) agrees that no transfer of the Shares delivered in respect of the Performance Share Units may be made unless the Shares have been duly registered under all applicable Federal and state securities laws pursuant to a then-effective registration which contemplates the proposed transfer or unless the Company has received a written opinion of, or satisfactory to, its legal counsel that the proposed transfer is exempt from such registration.

Exhibit A

CARDINAL HEALTH, INC.

Statement of Performance Goals

A-1

Exhibit 12.1

Computation of Ratio of Earnings to Fixed Charges

(in millions, except ratios)	2013	2014	2015	2016	**2017**
Earnings from continuing operations before income taxes	$ 888	$ 1,798	$ 1,967	$ 2,276	**$ 1,924**
Plus fixed charges:					
Interest expense	119	129	137	178	**187**
Capitalized interest	2	1	2	6	**9**
Amortization of debt offering costs	4	4	8	6	**6**
Interest portion of rent expense	8	10	10	12	**14**
Fixed charges (1)	133	144	156	201	**217**
Plus: amortization of capitalized interest	3	3	2	3	**4**
Less: capitalized interest	(2)	(1)	(2)	(6)	**(9)**
Earnings (1)	$ 1,023	$ 1,944	$ 2,124	$ 2,473	**$ 2,135**
Ratio of earnings to fixed charges (1) (2)	8	14	14	12	**10**

(1) The sum of the components may not equal the total due to rounding.
(2) The ratio of earnings to fixed charges is computed by dividing fixed charges into earnings from continuing operations before income taxes plus fixed charges and capitalized interest. Fixed charges include interest expense, amortization of debt offering costs and the portion of rent expense that is deemed to be representative of the interest factor. Interest expense recorded on tax exposures has been recorded in income tax expense and has therefore been excluded from the calculation.

Exhibit 31.1

I, George S. Barrett, certify that:

1. I have reviewed this Form 10-K of Cardinal Health, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
    (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Statement Regarding Forward-Looking Information

As used in this exhibit, "we," "our," "us" and similar pronouns refer to Cardinal Health, Inc. and its subsidiaries, unless the context requires otherwise. Our filings with the Securities and Exchange Commission, including our Annual Report on Form 10-K for the fiscal year ended June 30, 2017 (the "2017 Form 10-K"), our quarterly reports on Form 10-Q and our current reports on Form 8-K (along with any exhibits and amendments to such reports), as well as our news releases or any other written or oral statements made by or on behalf of us, may include, directly or by incorporation by reference, forward-looking statements that reflect our current view (as of the date the forward-looking statement is first made) about future events, prospects, projections or financial performance. The matters discussed in these forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied in or by such statements. These risks and uncertainties include:

- competitive pressures in the markets in which we operate, including pricing pressures;
- uncertainties relating to the pricing of generic pharmaceuticals;
- uncertainties relating to the timing, frequency and profitability of generic pharmaceutical launches;
- our ability to maintain the benefits of our generic pharmaceutical sourcing venture with CVS Health Corporation;
- with respect to our distribution services agreements with branded pharmaceutical manufacturers, changes in the amount of service fees we receive or, in cases where part of our compensation under these agreements is based on branded pharmaceutical price appreciation, changes in the frequency or magnitude of such price appreciation;
- changes in the timing or frequency of the introduction of branded pharmaceuticals;
- actions of regulatory bodies and other governmental authorities, including the U.S. Drug Enforcement Administration, certain agencies within the U.S. Department of Health and Human Services (including the U.S. Food and Drug Administration, Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights), the U.S. Nuclear Regulatory Commission, the U.S. Federal Trade Commission, the U.S. Customs and Border Protection, various state boards of pharmacy, state controlled substance authorities, state health departments, state insurance departments, state Medicaid departments or comparable regulatory bodies or governmental authorities or foreign equivalents that, in each case, could delay, limit or suspend product development, manufacturing, distribution, importation or sales or result in warning letters, recalls, seizures, injunctions or monetary sanctions;
- difficulties or delays in the development, production, manufacturing, sourcing and marketing of new or existing products and services, including difficulties or delays associated with obtaining requisite regulatory consents or approvals associated with those activities;
- risks arising from possible violations of healthcare fraud and abuse laws;
- costs or claims resulting from potential errors or defects in our manufacturing of medical devices or other products or in our compounding, repackaging, information systems or pharmacy management services that may injure persons or damage property or operations, including costs from remediation efforts or recalls and related product liability claims and lawsuits, including class action lawsuits;
- risks arising from possible violations of the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws and other similar anti-corruption laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws;
- risks arising from our collecting, handling and maintaining patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information;
- risks arising from certain of our businesses being Medicare-certified suppliers or participating in other federal and state healthcare programs, such as state Medicaid programs and the federal 340B drug pricing program, which businesses are subject to accreditation and quality standards and other rules and regulations, including applicable reporting, billing, payment and record-keeping requirements;
- risks arising from certain of our businesses manufacturing pharmaceutical and medical products or repackaging pharmaceuticals that are purchased or reimbursed through, or are otherwise governed by, federal or state healthcare programs, which businesses are subject to federal and state laws that establish eligibility for reimbursement by such programs and other applicable standards and regulations;
- changes in laws or changes in the interpretation or application of laws or regulations, as well as possible failures to comply with applicable laws or regulations, including as a result of possible misinterpretations or misapplications;
- material reductions in purchases, non-renewal or early termination of contracts, or delinquencies or defaults by key customers;
- unfavorable changes to the terms of key customer or supplier relationships, or changes in customer mix;
- adverse changes in U.S. or foreign tax laws, including proposals relating to new taxes or import tariffs, unfavorable challenges to our tax positions and payments to settle these challenges, or failure to permanently repeal the U.S. medical device tax;
- uncertainties due to government healthcare reform, including possible repeal or replacement of major parts of the Patient Protection and Affordable Care Act;
- reductions or limitations on governmental funding at the state or federal level or efforts by healthcare insurance companies to limit payments for products and services;
- changes in manufacturers' pricing, selling, inventory, distribution or supply policies or practices;
- changes in legislation or regulations governing prescription drug pricing, healthcare services or mandated benefits;
- changes in hospital buying groups or hospital buying practices;

- changes in distribution or sourcing models for pharmaceutical and medical and surgical products, including an increase in direct and limited distribution;
- the risks of counterfeit products in the supply chain;
- changes to the prescription drug reimbursement formula and related reporting requirements for generic pharmaceuticals under Medicaid;
- increasing consolidation in the healthcare industry, which could give the resulting enterprises greater bargaining power and may increase pressure on prices for our products and services or result in the loss of customers;
- disruption, damage or lack of access to, or failure of, our or our third-party service providers' information systems, our critical facilities, including our national logistics center, or our distribution networks;
- manufacturing disruptions, whether due to regulatory action, production quality deviations, safety issues or raw material shortages or defects, or because a key product is manufactured at a single manufacturing facility with limited alternate facilities;
- risks to our business and information and controls systems in the event that the Pharmaceutical segment's multi-year systems replacement project or other business process improvements, infrastructure modernizations or initiatives to use third-party service providers for key systems and processes are not effectively implemented;
- any compromise of our information systems or of those of a third-party service provider, including unauthorized access to or use or disclosure of sensitive information;
- the results, costs, effects or timing of any commercial disputes, government contract compliance matters, product liability claims or lawsuits, patent infringement claims, *qui tam* actions or other legal proceedings;
- possible losses relating to product liability claims regarding products for which we cannot obtain product liability insurance or for which such insurance is not adequate to cover our losses;
- our ability to maintain adequate intellectual property protections;
- risks and uncertainties relating to the acquisition of the Patient Care, Deep Vein Thrombosis and Nutritional Insufficiency businesses from Medtronic plc (the "Patient Recovery Business"), including the following: we may fail to realize the synergies and other benefits we expect from the acquisition; we may fail to retain key personnel of the acquired businesses; future developments may impair the value of our purchased goodwill or intangible assets; we may face difficulties or delays establishing, integrating or combining operations and systems; we may face challenges retaining the customers of the acquired businesses; we may encounter unforeseen internal control, regulatory or compliance issues; and we may face other additional risks relating to regulatory matters, legal proceedings, tax laws or positions, supply interruptions, commodity price volatility and global operations, including the effects of local economic environments and currency volatility;
- risks relating to the use of a significant amount of cash, including borrowings under our existing credit arrangements, to fund the acquisition of the Patient Recovery Business, which is expected to result in increased short-term borrowings in the course of our operations during fiscal 2018;
- risks and uncertainties relating to the acquisition of Cordis, including the ability to achieve the expected synergies and positive impact to operating results and the additional risks the Cordis acquisition subjects us to relating to regulatory matters, legal proceedings, tax laws or positions and global operations, including the effects of local economic environments and currency volatility;
- the costs, difficulties and uncertainties related to the integration of acquired businesses, including liabilities relating to the operations or activities of such businesses prior to their acquisition, and uncertainties relating to our ability to achieve the anticipated results from acquisitions;
- increased costs for commodities used in the Medical segment including various components, compounds, raw materials or energy such as oil-based resins, pulp, cotton, latex and other commodities;
- shortages in commodities, components, compounds, raw materials or energy used by our businesses, including supply disruptions of radioisotopes;
- the loss of, or default by, one or more key suppliers for which alternative suppliers may not be readily available;
- bankruptcy, insolvency or other credit failure of a customer or supplier that owes us a substantial amount;
- risks associated with global operations, including the effect of local economic environments, inflation, recession, currency volatility and global competition, in addition to risks associated with compliance with U.S. and international laws relating to global operations;
- risks associated with our use of and reliance on the global capital and credit markets, including our ability to access credit and our cost of credit, which may adversely affect our ability to efficiently fund our operations or undertake certain expenditures;
- our ability to introduce and market new products and our ability to keep pace with advances in technology;
- the costs, effects, timing or success of restructuring programs or plans;
- significant charges to earnings if goodwill or intangible assets become impaired;
- uncertainties relating to general political, business, industry, regulatory and market conditions; and
- other factors described in the “Risk Factors” section of the 2017 Form 10-K.

The words “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions generally identify “forward-looking statements,” which speak only as of the date the statements were made, and also include statements reflecting future results or guidance, statements of outlook and expense accruals. We undertake no obligation to update or revise any forward-looking statements, except to the extent required by applicable law.

Cardinal Health

Fiscal 2016 Form 10-K

Table of Contents

Introduction

This "Key Highlights" section provides a brief overview of Cardinal Health, Inc. and does not contain all of the information you should consider. Please read the entire Form 10-K carefully before voting or making an investment decision. As used in this report, “we,” “our,” “us” and similar pronouns refer to Cardinal Health, Inc. and its subsidiaries, unless the context requires otherwise.

References to Fiscal Years

Our fiscal year ends on June 30. References to fiscal 2016, 2015, 2014, 2013 and 2012 and to FY16, FY15, FY14, FY13 and FY12 are to the fiscal years ended June 30, 2016, 2015, 2014, 2013 and 2012, respectively. Except as otherwise specified, information in this Form 10-K is provided as of June 30, 2016.

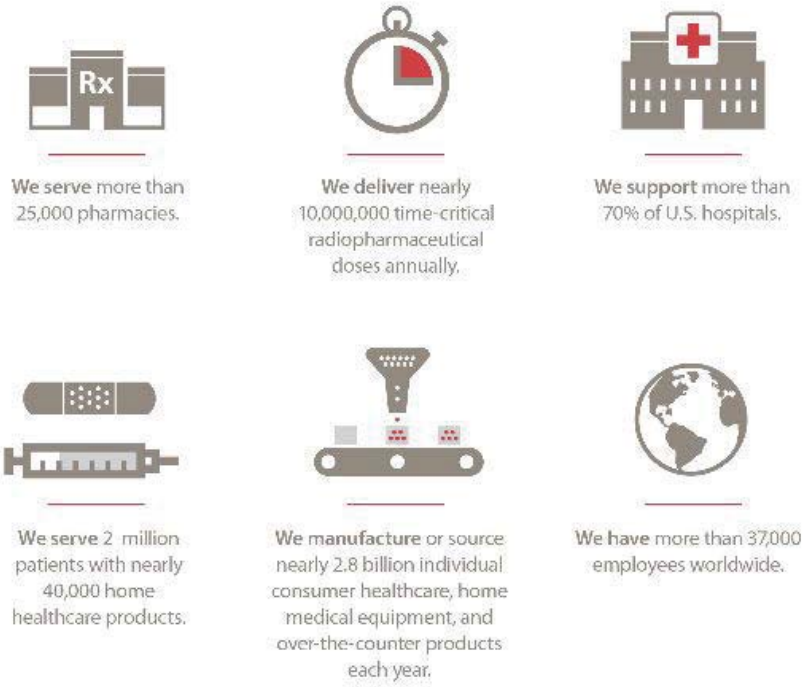
Non-GAAP Financial Measures

In this "Key Highlights" section and the "Fiscal 2016 Overview" section of Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), we use financial measures that are derived from consolidated financial data but are not presented in our financial statements that are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). These measures are considered “non-GAAP financial measures” under the Securities and Exchange Commission (“SEC”) rules. The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures are included in the “Explanation and Reconciliation of Non-GAAP Financial Measures” section following MD&A in this Form 10-K.

Important Information Regarding Forward-Looking Statements

This Form 10-K (including information incorporated by reference) includes forward-looking statements addressing expectations, prospects, estimates and other matters that are dependent upon future events or developments. Many forward-looking statements appear in MD&A, but there are others throughout this document, which may be identified by words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions, and include statements reflecting future results or guidance, statements of outlook and expense accruals. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied. The most significant of these risks and uncertainties are described in “Risk Factors” and in Exhibit 99.1 to this Form 10-K. Forward-looking statements in this document speak only as of the date of this document. Except to the extent required by applicable law, we undertake no obligation to update or revise any forward-looking statement.

Key Highlights



Key Highlights

For those tasked with navigating the complexities of healthcare, Cardinal Health brings scaled solutions that help our customers thrive in a changing world.

We apply our nearly 100 years of experience and expertise to reduce the total cost of healthcare and to improve the lives of patients. Our scale and experience lead to solutions across the entire care continuum — from hospital to home and everywhere in between — through **logistics, business, product and patient solutions**.

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

About Cardinal Health

Cardinal Health, Inc. is an Ohio corporation formed in 1979 and is a global integrated healthcare services and products company providing customized solutions for hospital systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices worldwide. We provide clinically proven medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home. We connect patients, providers, payers, pharmacists, and manufacturers for integrated care coordination and better patient management.

We manage our business and report our financial results in two segments: Pharmaceutical and Medical.

Pharmaceutical Segment

Our Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical, over-the-counter healthcare and consumer products in the United States. This segment also operates nuclear pharmacies and cyclotron facilities, provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers, provides services to healthcare companies supporting the development, marketing, and distribution of specialty pharmaceutical products, and repackages generic pharmaceuticals and over-the-counter healthcare products. This segment also imports and distributes pharmaceuticals, over-the-counter healthcare and consumer products as well as provides specialty pharmacy and other services in China.

Medical Segment

Our Medical segment distributes a broad range of medical, surgical and laboratory products and provides services to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China. This segment distributes medical products to patients in the home in the United States. This segment also manufactures, sources and develops our own Cardinal Health brand medical and surgical products, which are sold in the United States, Canada, Europe and other regions internationally. This segment also provides post-acute care management and transition services and software to hospitals, other healthcare providers and payers.

Non-GAAP Financial Measures

We use "non-GAAP financial measures" as well as GAAP financial measures in the "Fiscal 2016 Overview" section. We include the reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures in the “Explanation and Reconciliation of Non-GAAP Financial Measures” section following MD&A. The remaining sections of MD&A refer to GAAP measures only.

Consolidated Results

Fiscal 2016 Overview

Revenue

Revenue for fiscal 2016 was $121.5 billion , a 19 percent increase from the prior year, due primarily to sales growth from existing and new pharmaceutical distribution customers and from acquisitions.

GAAP and Non-GAAP Operating Earnings

(in millions)	2016	2015	Change
GAAP	**$ 2,459**	**$ 2,161**	**14%**
Restructuring and employee severance	**25**	**44**	
Amortization and other acquisition-related costs	**459**	**281**	
Impairments and (gain)/loss on disposal of assets	**21**	**(19)**	
Litigation (recoveries)/charges, net	**(69)**	**5**	
Non-GAAP	**$ 2,895**	**$ 2,472**	**17%**

The sum of the components may not equal the total due to rounding.

During fiscal 2016 , GAAP operating earnings increased 14 percent to $2.5 billion and non-GAAP operating earnings increased 17 percent to $2.9 billion . The increases in both GAAP and non-GAAP operating earnings were due to sales growth from existing and new pharmaceutical distribution customers, performance under our Pharmaceutical segment generics program, and acquisitions, partially offset by the adverse impact of customer pricing changes. GAAP operating earnings were negatively impacted by increased acquisition-related amortization, partially offset by litigation recoveries.

GAAP and Non-GAAP Diluted EPS

($ per share)	2016	2015	Change
GAAP	**$ 4.32**	**$ 3.61**	**20%**
Restructuring and employee severance	**0.05**	**0.09**	
Amortization and other acquisition-related costs	**0.96**	**0.54**	
Impairments and (gain)/loss on disposal of assets	**0.04**	**(0.03)**	
Litigation (recoveries)/charges, net	**(0.13)**	**0.06**	
Loss on extinguishment of debt	**—**	**0.11**	
Non-GAAP	**$ 5.24**	**$ 4.38**	**20%**

The sum of the components may not equal the total due to rounding.

During fiscal 2016 , GAAP diluted earnings per share attributable to Cardinal Health, Inc. ("diluted EPS") increased 20 percent to $4.32 and non-GAAP diluted EPS increased 20 percent to $5.24 . GAAP and non-GAAP diluted EPS increased primarily due to the same factors impacting GAAP and non-GAAP operating earnings described above. The increase in fiscal 2016 GAAP diluted EPS also reflects the prior-year loss on extinguishment of debt.

Cash and Equivalents

Our cash and equivalents balance was $2.4 billion at June 30, 2016 compared to $4.6 billion at June 30, 2015 . The decrease in cash and equivalents during the fiscal 2016 was driven by $3.6 billion deployed for acquisitions, $512 million paid in dividends, $651 million paid for share repurchases, and $465 million in capital expenditures, partially offset by $3.0 billion in cash provided by operating activities.

Significant Developments in Fiscal 2016 and Trends

Acquisitions

Cordis
On October 2, 2015, we completed the acquisition of the Cordis business ("Cordis") from Ethicon, Inc., a wholly-owned subsidiary of Johnson & Johnson, for $1.9 billion using cash on hand and proceeds from our debt offering in June 2015. The acquisition of Cordis, a global manufacturer and distributor of interventional cardiology devices and endovascular solutions with operations in more than 50 countries, expands our Medical segment's portfolio of self-manufactured products and its geographic scope.

naviHealth
On August 26, 2015, we acquired a 71 percent ownership interest in naviHealth Holdings, LLC ("naviHealth") for $238 million, net of cash acquired of $53 million. We funded the acquisition with cash on hand. The acquisition of naviHealth, a leader in post-acute care management solutions, expands our ability to help hospitals, other healthcare providers, and payers manage the complex processes of patient discharge. We consolidate the results of naviHealth in our consolidated financial statements and report its results in our Medical segment. The portion of naviHealth net earnings attributable to third-party interest holders is reported as a reduction to net earnings in the consolidated statements of earnings. At June 30, 2016 , our ownership interest in naviHealth was 82 percent due to an additional capital contribution in connection with an acquisition by naviHealth. Refer to Note 12 for further information on this acquisition.

Harvard Drug
On July 2, 2015 , we completed the acquisition of The Harvard Drug Group ("Harvard Drug") for $1.1 billion using cash on hand and proceeds from our debt offering in June 2015. The acquisition of Harvard Drug, a distributor of generic pharmaceuticals, over-the-counter healthcare and related products to retail, institutional, and alternate care customers, enhances our Pharmaceutical segment's generic pharmaceutical distribution and related services businesses. Harvard Drug also repackages generic pharmaceuticals and over-the-counter healthcare products.

Refer to Note 2 of the "Notes to Consolidated Financial Statements" for additional information on acquisitions.

Trends

Within our Pharmaceutical segment, we expect segment profit for fiscal 2017 to be essentially flat compared to fiscal 2016. The factors contributing to our expectation include less profit growth from the segment’s generics program and the loss of a large pharmaceutical distribution customer beginning April 1, 2016, combined with the adverse impact of customer pricing changes similar to those in fiscal 2016. While we expect that the segment’s generics program will be positively impacted by benefits from both Red Oak Sourcing and new generic pharmaceutical launches, we expect that both of these items will have significantly less of a year-over-year positive segment profit impact in fiscal 2017 than fiscal 2016. The impact of these factors will be more pronounced in the first quarter of fiscal 2017, when we expect Pharmaceutical segment profit to be significantly less than in the prior-year period and consolidated operating earnings to be less than in the prior-year period. However, as is generally the case, the frequency, magnitude and profit impact of future generic pharmaceutical product launches (as well as other factors impacting our generics program) are uncertain, and their impact on fiscal 2017 Pharmaceutical segment profit and consolidated operating earnings could be more or less than we expect.

Results of Operations

Revenue

	Revenue			Change	
(in millions)	**2016**	2015	2014	**2016**	2015
Pharmaceutical	**$ 109,131**	$ 91,116	$ 80,110	**20%**	14%
Medical	**12,430**	11,395	10,962	**9%**	4%
Total segment revenue	**121,561**	102,511	91,072	**19%**	13%
Corporate	**(15)**	20	12	**N.M.**	N.M.
Total revenue	**$ 121,546**	$ 102,531	$ 91,084	**19%**	13%

Fiscal 2016 Compared to Fiscal 2015

Pharmaceutical Segment
Fiscal 2016 Pharmaceutical segment revenue grew primarily due to sales growth from existing and new pharmaceutical distribution customers, including continued branded pharmaceutical price appreciation, all of which increased revenue by $16.9 billion. Acquisitions also contributed $2.1 billion to revenue growth.

Medical Segment
Fiscal 2016 Medical segment revenue grew primarily due to acquisitions, net of divestitures, which contributed $645 million, and sales growth from existing businesses.

Fiscal 2015 Compared to Fiscal 2014

Pharmaceutical Segment
Fiscal 2015 Pharmaceutical segment revenue grew primarily due to sales growth from existing and new pharmaceutical distribution customers, which increased revenue by $13.7 billion. The growth was primarily driven by increased sales to existing customers, including continued branded pharmaceutical price appreciation and newly launched hepatitis C pharmaceutical products. The increase was partially offset by $3.3 billion due to the Walgreens contract expiration in the prior-year period.

Medical Segment
Fiscal 2015 Medical segment revenue grew primarily due to acquisitions which contributed $344 million.

Cost of Products Sold

As a result of the same factors affecting the change in revenue, consolidated cost of products sold increased $18.2 billion (19 percent) and $10.9 billion (13 percent) during fiscal 2016 and 2015 , respectively. See the gross margin discussion for additional drivers impacting cost of products sold.

Gross Margin

	Consolidated Gross Margin			Change	
(in millions)	**2016**	2015	2014	**2016**	2015
Gross margin	**$ 6,543**	$ 5,712	$ 5,161	**15%**	11%

Fiscal 2016 Compared to Fiscal 2015

Fiscal 2016 consolidated gross margin increased $831 million (15 percent), and was favorably impacted by sales growth from existing and new pharmaceutical distribution customers ($510 million) and acquisitions, net of divestitures ($576 million).

Gross margin rate contracted during fiscal 2016 , primarily due to changes in product mix driven by the on-boarding of a new mail order customer starting in October 2015, and also due to the adverse impact of customer pricing changes. Our gross margin rate was favorably impacted by performance under our Pharmaceutical segment generics program. Our generics program had strong year-over-year performance from Red Oak Sourcing.

Fiscal 2015 Compared to Fiscal 2014

Fiscal 2015 consolidated gross margin increased $551 million (11 percent), and was favorably impacted by sales growth from existing and new pharmaceutical distribution customers, offset in part by the Walgreens contract expiration in the prior year. The net impact of these factors increased consolidated gross margin by $516 million. In addition, acquisitions favorably impacted gross margin by $101 million.

Gross margin rate contracted slightly during fiscal 2015 , reflecting the adverse impact of customer pricing changes, the lower margin rate impact of newly launched hepatitis C pharmaceutical products, and new customer mix, largely offset by strong performance from our Pharmaceutical segment generics program, including benefits from Red Oak Sourcing.

Distribution, Selling, General, and Administrative ("SG&A") Expenses

	SG&A Expenses			Change	
(in millions)	**2016**	2015	2014	**2016**	2015
SG&A expenses	**$ 3,648**	$ 3,240	$ 3,028	**13%**	7%

Fiscal 2016 Compared to Fiscal 2015

Fiscal 2016 SG&A expenses increased primarily due to acquisitions, net of divestitures ($370 million).

Fiscal 2015 Compared to Fiscal 2014

Fiscal 2015 SG&A expenses increased primarily due to acquisitions ($97 million) and an overall increase in volume of sales to existing and new customers.

Segment Profit

We evaluate segment performance based on segment profit, among other measures. See Note 15 of the "Notes to Consolidated Financial Statements" for additional information on segment profit.

	Segment Profit and Operating Earnings			Change	
(in millions)	**2016**	2015	2014	**2016**	2015
Pharmaceutical	**$ 2,488**	$ 2,094	$ 1,745	**19%**	20 %
Medical	**457**	433	444	**6%**	(3)%
Total segment profit	**2,945**	2,527	2,189	**17%**	15 %
Corporate	**(486)**	(366)	(304)	**33%**	20 %
Total consolidated operating earnings	**$ 2,459**	$ 2,161	$ 1,885	**14%**	15 %

Fiscal 2016 Compared to Fiscal 2015

Pharmaceutical Segment Profit
Fiscal 2016 Pharmaceutical segment profit increased due to sales growth from existing and new pharmaceutical distribution customers and performance under our generics program, partially offset by the adverse impact of customer pricing changes. Acquisitions also contributed to Pharmaceutical segment profit growth. Our generics program benefited from strong year-over-year performance from Red Oak Sourcing.

Medical Segment Profit
Fiscal 2016 Medical segment profit increased due to the contribution from Cardinal Health Brand products. Acquisitions, net of divestitures, which included the unfavorable impact on cost of products sold from the fair value step up of inventory acquired with Cordis, also contributed to segment profit growth. Fiscal 2016 Medical segment profit growth was partially offset by a decline in the results from our Canada business.

Corporate
As discussed further in sections that follow, the principal driver for the change in Corporate during fiscal 2016 were increased amortization and other acquisition-related costs primarily related to the acquisitions of Cordis and Harvard Drug, partially offset by litigation recoveries.

Fiscal 2015 Compared to Fiscal 2014

Pharmaceutical Segment Profit
Fiscal 2015 Pharmaceutical segment profit increased due to sales growth from existing and new pharmaceutical distribution customers and strong performance from our generics program, including benefits from Red Oak Sourcing, partially offset by the adverse impact of customer pricing changes and the Walgreens contract expiration in the prior-year period.

Medical Segment Profit
Fiscal 2015 Medical segment profit decreased primarily due to a decline in contribution from distribution of national brand products. This was partially offset by contributions from the strategic expansion of our portfolio of Cardinal Health Brand products and services, driven by acquisitions and targeted cost reductions.

Corporate
As discussed further in sections that follow, the principal driver for the change in Corporate in fiscal 2015 were increased amortization and other acquisition-related costs primarily due to costs incurred in connection with the acquisition of Cordis.

Other Components of Consolidated Operating Earnings

In addition to revenue, gross margin, and SG&A expenses discussed previously, consolidated operating earnings were impacted by the following:

(in millions)	2016	2015	2014
Restructuring and employee severance	**$ 25**	$ 44	$ 31
Amortization and other acquisition-related costs	**459**	281	223
Impairments and (gain)/loss on disposal of assets, net	**21**	$ (19)	$ 15
Litigation (recoveries)/charges, net	**(69)**	5	(21)

Amortization and Other Acquisition-Related Costs
Amortization of acquisition-related intangible assets was $355 million, $189 million and $187 million for fiscal 2016 , 2015 and 2014 , respectively. The increase in amortization of acquisition-related intangible assets during fiscal 2016 was largely due to the Cordis and Harvard Drug acquisitions. Transaction and integration costs associated with the Cordis acquisition were $78 million and $44 million during fiscal 2016 and 2015 , respectively.

Litigation (Recoveries)/Charges, Net
During fiscal 2016 and 2015 , we received and recognized income of $80 million and $71 million , respectively, from settlements of class action antitrust lawsuits in which we were a class member.

During fiscal 2015 , we incurred litigation charges of $68 million related to government investigations.

Earnings From Continuing Operations Before Income Taxes

In addition to the items discussed above, earnings from continuing operations before income taxes was impacted by the following:

	Earnings from Continuing Operations Before Income Taxes			Change	
(in millions)	2016	2015	2014	2016	2015
Other (income)/expense, net	**$ 5**	$ (7)	$ (46)	**N.M.**	N.M.
Interest expense, net	**178**	141	133	**26%**	6%
Loss on extinguishment of debt	**—**	60	—	**N.M.**	N.M.

Other Income, Net
Other income, net for fiscal 2014 included a $32 million pre-tax gain related to the sale of our minority interest in two investments.

Interest Expense, Net
Fiscal 2016 interest expense increased primarily as a result of the additional $1.5 billion of debt issued in June 2015 to fund the Harvard Drug and Cordis acquisitions.

Loss on Extinguishment of Debt
In December 2014, we redeemed certain debt resulting in a loss on the extinguishment of debt of $60 million ($37 million, net of tax).

Provision for Income Taxes

The provision for income taxes increased $90 million in fiscal 2016 due to an increase in earnings from continuing operations before income taxes. Our effective tax rate decreased 1.3 percentage points during fiscal 2016 .

Generally, fluctuations in the effective tax rate are due to changes in the distribution of income among non-U.S. taxing jurisdictions with lower income tax rates and discrete items. A reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate from continuing operations is as follows (see Note 7 of the "Notes to Consolidated Financial Statements" for additional information):

	2016	2015	2014
Provision at Federal statutory rate	**35.0 %**	35.0 %	35.0 %
State and local income taxes, net of federal benefit	**1.5**	4.1	2.2
Foreign tax rate differential	**(0.6)**	(2.4)	(1.2)
Nondeductible/nontaxable items	**1.0**	0.7	(0.2)
Other	**0.2**	1.0	(0.5)
Effective income tax rate	**37.1 %**	38.4 %	35.3 %

Fiscal 2016

The fiscal 2016 effective income tax rate was favorably impacted by the state and local income tax rate, which decreased 2.6 percentage points due to resolutions with state taxing authorities and a shift in the distribution of income among jurisdictions. The foreign tax rate differential decreased 1.8 percentage points primarily due to the deferred tax benefits recognized in fiscal 2015.

Ongoing Audits

The IRS is currently conducting audits of fiscal years 2006 through 2014.

Fiscal 2015 and Fiscal 2014

The fiscal 2015 effective income tax rate was unfavorably impacted by the state and local income tax rate, which increased 1.9 percentage points due to the de-recognition of certain state tax benefits. The foreign tax rate differential also increased 1.2 percentage points primarily due to recognition of deferred tax benefits resulting from new tax legislation. In addition, the change in measurement of uncertain tax positions increased 1.3 percentage points primarily as a result of proposed assessment of additional tax.

The fiscal 2014 effective tax rate was impacted by net favorable discrete items of $37 million, which reduced the rate by 2.1 percentage points. The discrete items include the favorable impact of the settlement of federal and state tax controversies ($80 million) and release of valuation allowances ($12 million) and the unfavorable impact of remeasurement of unrecognized tax benefits ($65 million), primarily as a result of proposed assessments of additional tax.

Liquidity and Capital Resources

We currently believe that, based on available capital resources (cash on hand and committed credit facilities) and projected operating cash flow, we have adequate capital resources to fund working capital needs; currently anticipated capital expenditures; currently anticipated business growth and expansion; contractual obligations; tax payments; and current and projected debt service requirements, dividends, and share repurchases. If we decide to engage in one or more additional acquisitions, depending on the size and timing of such transactions, we may need to access capital markets for additional financing.

Cash and Equivalents

Our cash and equivalents balance was $2.4 billion at June 30, 2016 compared to $4.6 billion at June 30, 2015 . The decrease in cash and equivalents during fiscal 2016 was driven by $3.6 billion deployed for acquisitions, $512 million paid in dividends, $651 million paid for share repurchases, and $465 million in capital expenditures, partially offset by $3.0 billion in cash provided by operating activities. Net cash provided by operating activities was positively impacted by increased net earnings and working capital improvements. At June 30, 2016 , our cash and equivalents were held in cash depository accounts with major banks or invested in high quality, short-term liquid investments.

The cash and equivalents balance at June 30, 2016 included $475 million of cash held by subsidiaries outside of the United States. Although the vast majority of cash is available for repatriation, bringing the cash into the United States could trigger U.S federal, state and local income tax obligations. Because the earnings are considered permanently reinvested, no U.S. tax provision has been accrued related to the repatriation of these earnings. It is not practicable to evaluate the amount of U.S. tax that might be payable on the eventual remittance of such earnings.

During fiscal 2015 , net cash provided by operating activities of $2.5 billion was positively impacted by working capital improvements. These funds were deployed for $1.0 billion of share repurchases, $503 million of acquisitions and $460 million of cash dividends. In addition, during the second quarter of fiscal 2015 , we refinanced $1.2 billion of long-term debt at lower interest rates and longer maturities and during the fourth quarter of fiscal 2015 we received proceeds from the issuance of additional long-term debt of $1.5 billion to fund the Harvard Drug and Cordis acquisitions.

During fiscal 2014 we deployed $673 million of cash on share repurchases, $519 million on acquisitions and $415 million on dividends. Net cash provided by operating activities of $2.5 billion benefited from a net working capital decrease in excess of $500 million as a result of the Walgreens contract expiration.

Changes in working capital, which impact operating cash flow, can vary significantly depending on factors such as the timing of customer payments, inventory purchases and payments to vendors in the regular course of business, as well as fluctuating working capital needs driven by customer and product mix.

Other Financing Arrangements and Financial Instruments

Credit Facilities and Commercial Paper

In addition to cash and equivalents and operating cash flow, other sources of liquidity at June 30, 2016 include a $1.75 billion revolving credit facility and a $700 million committed receivables sales facility program. In June 2016, we increased our revolving credit facility from $1.5 billion to $1.75 billion and decreased our committed receivables facility program from $950 million to $700 million . We also have a commercial paper program of up to $1.5 billion , backed by the revolving credit facility. At June 30, 2016 , we had no amounts outstanding under the revolving credit facility. Availability on the revolving credit facility was reduced by outstanding letters of credit of $14 million at June 30, 2016. We also had standby letters of credit of $40 million issued under the committed receivables sales facility program at June 30, 2016 .

Our revolving credit facility and committed receivables sales facility program require us to maintain a consolidated leverage ratio of no more than 3.25-to-1 and our committed receivables sales facility also requires us to maintain a consolidated interest coverage ratio, as of the end of any calendar quarter, of at least 4-to-1. As of June 30, 2016 , we were in compliance with these financial covenants.

Available-for-Sale Securities

At June 30, 2016 and 2015 , we held $200 million and $193 million , respectively, of marketable securities, which are classified as available-for-sale.

Long-Term Obligations

At June 30, 2016 , we had total long-term obligations of $5.0 billion .

Risk Management

We use interest rate swaps, foreign currency contracts and commodity contracts to manage our exposure to cash flow variability. We also use interest rate swaps to protect the value of our debt and use foreign currency forward contracts to protect the value of our existing and forecasted foreign currency assets and liabilities. See the "Quantitative and Qualitative Disclosures About Market Risk" section as well as Notes 1 and 11 of the “Notes to Consolidated Financial Statements” for information regarding the use of financial instruments and derivatives as well as foreign currency, interest rate and commodity exposures.

Capital Deployment

Capital Expenditures

Capital expenditures during fiscal 2016 , 2015 and 2014 were $465 million , $300 million and $249 million , respectively.

We expect capital expenditures in fiscal 2017 to be between $400 million and $450 million primarily for information technology projects, growth projects in our core business and integration of the Cordis acquisition.

Dividends

During fiscal 2016 , we paid quarterly dividends totaling $1.55 per share, an increase of 13 percent from fiscal 2015 .

On May 4, 2016, our Board of Directors approved a quarterly dividend of $0.4489 per share, or $1.80 per share on an annualized basis, payable on July 15, 2016 to shareholders of record on July 1, 2016.

Share Repurchases

Our Board of Directors has approved a $2.0 billion share repurchase program, which was completed in July 2016. On May 4, 2016, our Board of Directors also approved an additional $1.0 billion share repurchase program that expires on December 31, 2019. During fiscal 2016 , we repurchased $651 million of our common shares and from July 1, 2016 through August 5, 2016, we repurchased an additional $250 million of our common shares. We funded the repurchases with available cash. At August 5, 2016, we had $793 million remaining under the new repurchase authorization.

Acquisitions

On July 2, 2015, August 26, 2015 and October 2, 2015, we acquired Harvard Drug, naviHealth and Cordis for $1.1 billion (net of cash acquired of $44 million), $238 million (net of cash acquired of $53 million) and $1.9 billion, respectively.

Contractual Obligations

At June 30, 2016 , our contractual obligations, including estimated payments due by period, are as follows:

(in millions)	2017	2018 to 2019	2020 to 2021	There-after	Total
Long-term debt and short-term borrowings (1)	$ 585	$ 959	$ 989	$ 2,973	**$ 5,506**
Interest on long-term debt	164	308	278	1,465	**2,215**
Capital lease obligations (2)	2	26	3	2	**33**
Other liabilities (3)	3	—	—	—	**3**
Operating leases (4)	119	181	117	127	**544**
Purchase obligations and other payments (5)	386	329	254	313	**1,282**
Total contractual obligations	**$ 1,259**	**$ 1,803**	**$ 1,641**	**$ 4,880**	**$ 9,583**

(1) Represents maturities of our long-term debt obligations and other short-term borrowings excluding capital lease obligations described below. See Note 6 of the "Notes to Consolidated Financial Statements" for further information.

(2) Represents maturities of our capital lease obligations included within long-term obligations in our consolidated balance sheets.

(3) Represents cash outflows by period for certain of our liabilities in which cash outflows could be reasonably estimated. Long-term liabilities, such as unrecognized tax benefits and deferred taxes, have been excluded from the table above because of the inherent uncertainty of the underlying tax positions or because of the inability to reasonably estimate the timing of any cash outflows. See Note 7 of the "Notes to Consolidated Financial Statements" for further discussion of income taxes. Additionally, the carrying value of redeemable noncontrolling interests are excluded from the table, as the ultimate amount and timing of any future cash payments related to the redemption amount are uncertain. See Note 1 and Note 12 of the "Notes to Consolidated Financial Statements" for for additional information regarding redeemable noncontrolling interests.

(4) Represents minimum rental payments for operating leases having initial or remaining non-cancelable lease terms as described in Note 8 of the "Notes to Consolidated Financial Statements."

(5) A purchase obligation is defined as an agreement to purchase goods or services that is legally enforceable and specifies all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and approximate timing of the transaction. The purchase obligation amounts disclosed above represent estimates of the minimum for which we are obligated and the time period in which cash outflows will occur. Purchase orders and authorizations to purchase that involve no firm commitment from either party are excluded from the above table. In addition, contracts that can be unilaterally canceled with no termination fee or with proper notice are excluded from our total purchase obligations except for the amount of the termination fee or the minimum amount of goods that must be purchased during the requisite notice period. Purchase obligations and other payments also includes quarterly payments of $25.6 million that we are required to pay CVS Health Corporation ("CVS Health"), which commenced in October 2014 in connection with the establishment of Red Oak Sourcing and will be in place for the remaining eight years of the agreement. Purchase obligations and other payments does not include contingent payments under the sourcing venture that were not yet determined as of June 30, 2016, including the quarterly $10 million increase that began in fiscal 2016 and the additional $10 million beginning in the first quarter of fiscal 2017. See Note 8 of the "Notes to Consolidated Financial Statements" for additional information.

Off-Balance Sheet Arrangements

We had no significant "off-balance sheet arrangements" at June 30, 2016 , as that term is defined in the SEC rules.

Recent Financial Accounting Standards

See Note 1 of the "Notes to Consolidated Financial Statements" for a discussion of recent financial accounting standards.

Critical Accounting Policies and Sensitive Accounting Estimates

Critical accounting policies are those accounting policies that (i) can have a significant impact on our financial condition and results of operations and (ii) require the use of complex and subjective estimates based upon past experience and management's judgment. Other people applying reasonable judgment to the same facts and circumstances could develop different estimates. Because estimates are inherently uncertain, actual results may differ. In this section, we describe the significant policies applied in preparing our consolidated financial statements that management believes are the most dependent on estimates and assumptions. For further discussion of accounting policies for items within this section and of additional accounting policies, see Note 1 of the "Notes to Consolidated Financial Statements."

Allowance for Doubtful Accounts

Trade receivables are presented net of an allowance for doubtful accounts of $135 million at both June 30, 2016 and 2015 . We must use judgment when deciding whether to extend credit to customers and when estimating the required allowance for doubtful accounts.

The allowance for doubtful accounts includes general and specific reserves. We determine the appropriate allowance by reviewing accounts receivable aging, industry trends, customer financial strength and credit standing, historical write-off trends and payment history. We also regularly evaluate how changes in economic conditions may affect credit risks.

Our methodology for estimating the general reserve is assessed annually based on historical losses and economic, business and market trends. In addition, the allowance is reviewed quarterly and updated if appropriate. We may adjust the allowance for doubtful accounts if changes in customers' financial condition or general economic conditions make defaults more frequent or severe.

The following table gives information regarding the allowance for doubtful accounts over the past three fiscal years:

(in millions, except percentages)	2016	2015	2014
Allowance for doubtful accounts	$ **135**	$ 135	$ 137
Reduction to allowance for customer deductions and write-offs	**74**	66	50
Charged to costs and expenses	**74**	64	53
Allowance as a percentage of customer receivables	**1.8%**	2.0%	2.5%
Allowance as a percentage of revenue	**0.11%**	0.13%	0.15%

A hypothetical 0.1 percent increase or decrease in the reserve as a percentage of trade receivables at June 30, 2016 , would result in an increase or decrease in bad debt expense of $8 million .

We believe the reserve maintained and expenses recorded in fiscal 2016 are appropriate. At this time, we are not aware of any analytical findings or customer issues that are likely to lead to a significant future increase in the allowance for doubtful accounts as a percentage of revenue.

Inventories

A substantial portion of our inventories (58 percent at both June 30, 2016 and 2015) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These are primarily merchandise inventories at the core pharmaceutical distribution facilities within our Pharmaceutical segment. The LIFO impact on the consolidated statements of earnings in a given year depends on pharmaceutical price appreciation and the level of inventory. Prices for branded pharmaceuticals generally tend to rise, which results in an increase in cost of products sold, whereas prices for generic pharmaceuticals generally tend to decline, which results in a decrease in cost of products sold.

The LIFO method presumes that the most recent inventory purchases are the first items sold, so LIFO helps us better match current costs and revenue. Using LIFO, if there is a decrease in inventory levels that have experienced pharmaceutical price appreciation, the result generally will be a decrease in future cost of products sold as our older inventory is held at a lower cost. Conversely, if there is a decrease in inventory levels that have experienced a pharmaceutical price decline, the result generally will be an increase in future cost of products sold as our older inventory is held at a higher cost. We believe that the average cost method of inventory valuation reasonably approximates the current cost of replacing inventory within the core pharmaceutical distribution facilities. Accordingly, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation.

If we had used the average cost method of inventory valuation for all inventory within the core pharmaceutical distribution facilities, the value of our inventories would not have changed in fiscal 2016 or 2015 because inventories valued at LIFO were $9 million and $114 million higher than the average cost value at June 30, 2016 and June 30, 2015 , respectively. We do not record inventories in excess of replacement cost. As such, the LIFO reserve was zero at both June 30, 2016 and 2015 . Our remaining inventory is stated at the lower of cost, using the first-in, first-out method, or market.

Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $79 million and $57 million at June 30, 2016 and 2015 , respectively. The increase primarily reflects inventory reserves pertaining to Cordis.

We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory and age of on-hand inventory. If actual conditions are less favorable than our assumptions, additional inventory reserves may be required.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. The excess of the purchase price over the estimated fair value of the identifiable net assets acquired is recorded as goodwill. We base the fair values of identifiable intangible assets on detailed valuations that require management to make significant judgments, estimates and assumptions. Critical estimates and assumptions include: expected future cash flows for customer relationships, trademarks, trade names, patents, developed technology, in-process research and development and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. See Note 2 of the “Notes to Consolidated Financial Statements” for additional information regarding our acquisitions.

Goodwill and Other Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are tested for impairment annually or when indicators of impairment exist.

Goodwill impairment testing involves judgment, including the identification of reporting units, the estimation of the fair value of each reporting unit and, if necessary, the estimation of the implied fair value of goodwill.

Our determination of estimated fair value of our reporting units is based on a combination of the income-based and market-based approaches. Under the income-based approach, we use a discounted cash flow model in which cash flows anticipated over several future periods, plus a terminal value at the end of that time horizon, are discounted to their present value using an appropriate risk-adjusted rate of return. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for each reporting unit. Actual results may differ materially from those used in our forecasts. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Discount rates used in our reporting unit valuations ranged from 8.5 percent to 12.5 percent . Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets. Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment.

We performed annual impairment testing in fiscal 2016, 2015 and 2014 and concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value. If we were to alter our impairment testing by increasing the discount rate in the discounted cash flow analysis by 1 percent, there still would not be any impairment indicated for any of our reporting units for fiscal 2016, 2015 or 2014.

The impairment test for indefinite-lived intangibles other than goodwill (primarily in-process research and development ("IPR&D")) requires comparing the fair value of the indefinite-lived intangible asset to the carrying value of the asset as of the impairment testing date. We estimate the fair value of our indefinite-lived intangibles under the income approach using a discounted cash flow model. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for the indefinite-lived intangible including, among other factors, assumptions on regulatory approval for IPR&D.

Intangible assets with finite lives, primarily customer relationships; trademarks, trade names and patents; and developed technology, are amortized using a combination of straight-line and accelerated methods based on the expected cash flows from the asset over their estimated useful lives. We review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment loss occurred requires estimating future undiscounted cash flows expected to be generated by the asset group. Actual results may differ materially from those used in our forecasts.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputed transactions are researched and resolved based upon findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the type of claim and status of review. Though the transaction types are relatively consistent, we periodically refine our methodology by updating the reserve estimate percentages to reflect actual historical experience. Changes to the estimate percentages affect the cost of products sold in the period in which the change was made.

Vendor reserves were $62 million and $88 million at June 30, 2016 and 2015 , respectively. Approximately 66 percent of the vendor reserve at the end of fiscal 2016 pertained to the Pharmaceutical segment compared to 75 percent at the end of fiscal 2015 . The reserve balance will fluctuate due to variations in outstanding claims from period-to-period, timing of settlements and specific vendor issues.

The ultimate outcome of specific claims may be different than our original estimate and may require adjustment. We believe, however, that reserves recorded for such disputes are reasonable based upon current facts and circumstances.

Loss Contingencies

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies is highly subjective and requires judgments about future events.

We regularly review contingencies to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates. See Note 8 of the “Notes to Consolidated Financial Statements” for additional information regarding loss contingencies.

Provision for Income Taxes

Our income tax expense, deferred income tax assets and liabilities, and unrecognized tax benefits reflect management’s assessment of estimated future taxes to be paid on items in the consolidated financial statements.

The following table presents information about our tax position at June 30:

(in millions)	2016	2015
Total deferred income tax assets (1)	**$ 567**	$ 585
Valuation allowance for deferred income tax assets (2)	**(93)**	(87)
Net deferred income tax assets	**474**	498
Total deferred income tax liabilities	**(2,130)**	(1,853)
Net deferred income tax liability	**$ (1,656)**	$ (1,355)

(1) Total deferred income tax assets included $193 million and $197 million of loss and tax credit forwards at June 30, 2016 and 2015 , respectively.

(2) This valuation allowance primarily relates to federal, state and international loss carryforwards for which the ultimate realization of future benefits is uncertain.

Expiring loss and credit carryforwards and the required valuation allowances are adjusted quarterly. After applying the valuation allowances, we do not anticipate any limitations on our use of any of the other net deferred income tax assets described above.

We believe that our estimates for the valuation allowances against deferred tax assets and unrecognized tax benefits are appropriate based on current facts and circumstances. However, others applying reasonable judgment to the same facts and circumstances could develop different estimates. The amount we ultimately pay when matters are resolved may differ from the amounts accrued.

Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation processes. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement. See Note 7 of the “Notes to Consolidated Financial Statements” for additional information regarding unrecognized tax benefits.

If any of our assumptions or estimates were to change, an increase or decrease in our effective income tax rate by 1 percent would have caused income tax expense to increase or decrease $23 million for fiscal 2016 .

Share-Based Compensation

Share-based compensation provided to employees is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The fair value of restricted share units and performance share units is determined by the grant date market price of our common shares. The compensation expense associated with nonvested performance share units is dependent on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. The fair value of stock options is determined using a lattice valuation model. We believe the lattice model provides reasonable estimates because it has the ability to take into account employee exercise patterns based on changes in our stock price and other variables and it provides for a range of input assumptions.

We analyze historical data to estimate option exercise behaviors and post-vesting forfeitures to be used within the lattice model. The expected life of the options granted is calculated from the option valuation model and represents the length of time in years that the options granted are expected to be outstanding. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years). As required, the forfeiture estimates are adjusted to reflect actual forfeitures when an award vests. The actual forfeitures in future reporting periods could be higher or lower than our current estimates. See Note 16 of the "Notes to Consolidated Financial Statements" for additional information regarding share-based compensation.

Explanation and Reconciliation of Non-GAAP Financial Measures

The "Key Highlights" section and "Fiscal 2016 Overview" section within MD&A in this Form 10-K contains financial measures that are not calculated in accordance with GAAP.

In addition to analyzing our business based on financial information prepared in accordance with GAAP, we use these non-GAAP financial measures internally to evaluate our performance, evaluate the balance sheet, engage in financial and operational planning, and determine incentive compensation because we believe that these measures provide additional perspective on and, in some circumstances are more closely correlated to, the performance of our underlying, ongoing business. We provide these non-GAAP financial measures to investors as supplemental metrics to assist readers in assessing the effects of items and events on our financial and operating results on a year-over-year basis and in comparing our performance to that of our competitors. However, the non-GAAP financial measures that we use may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. The non-GAAP financial measures disclosed by us should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations to those financial statements set forth below should be carefully evaluated.

Exclusions from Non-GAAP Financial Measures

The differences between the non-GAAP measures presented in this Form 10-K and the most directly comparable GAAP measure are represented by the following items, which management believes are useful to exclude for its own and for investors' assessment of the business for the reasons identified below:

- restructuring and employee severance costs , which include charges for programs in which we fundamentally change our operations and are excluded because they are not part of the ongoing operations of our underlying business, which includes normal levels of reinvestment in the business;
- amortization and other acquisition-related costs. We began excluding amortization costs in fiscal 2013 primarily for consistency with the presentation of the financial results of our peer group companies. Additionally, these non-cash amounts are variable in amount and frequency and are significantly impacted by the timing and size of acquisitions, so their exclusion allows for better comparison of forecasted, current and historical financial results. Other acquisition-related costs are excluded because they are directly related to an acquisition but do not meet the criteria to be recognized on the acquired entity's initial balance sheet as part of the purchase price allocation. They are also significantly impacted by the timing and size of acquisitions;
- impairments and gains or loss on disposal of assets , which are excluded because they do not occur in or reflect the ordinary course of our ongoing business operations and their exclusion results in a metric that more meaningfully reflects the sustainability of our operating performance;
- litigation recoveries or charges, net , which often relate to events that may have occurred in prior or multiple periods, do not occur in or reflect the ordinary course of our business and are inherently unpredictable in timing and amount;
- LIFO charges and credits , which we began excluding in fiscal 2015 because the factors that drive LIFO charges or credits such as pharmaceutical manufacturer price appreciation/deflation and year-end inventory levels (which can be meaningfully influenced by customer buying behavior immediately preceding our fiscal year-end), are largely out of our control and cannot be accurately predicted. We also believe that exclusion of LIFO charges from non-GAAP metrics allows for better comparison of our financial results to our historical operations and to our peer group companies;
- loss on extinguishment of debt , which does not typically occur in the normal course of business and may obscure analysis of trends and financial performance. Additionally, the amount and frequency of these notable one-time charges is not consistent and is significantly impacted by the timing and size of debt financing transactions.
- other spin-off costs , incurred in connection with our spin-off of CareFusion, which are included in distribution, selling, general and administrative expenses and are excluded because they do not relate to or reflect our ongoing business operations.

The tax effect for each of the non-GAAP items described above is determined using the tax rate and other tax attributes applicable to the item and the jurisdiction(s) in which the item is recorded. The gross, tax and net impact of each item are presented with our GAAP to non-GAAP reconciliations.

Definitions

Growth rate calculation : Except for compound annual growth rates ("CAGR"), growth rates in this Form 10-K are determined by dividing the difference between current period results and prior period results by prior period results. CAGR is determined by subtracting one from ((the ending value divided by the beginning value) raised to the power of (one divided by the number of years)).

Non-GAAP operating earnings : operating earnings excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net, and (6) other CareFusion spin-off costs.

Non-GAAP Earnings from continuing operations before income taxes : earnings from continuing operations before income taxes excluding (1) LIFO charges/(credits), (2) restructuring and employee severance, (3) amortization and other acquisition-related costs, (4) impairments and (gain)/loss on disposal of assets, (5) litigation (recoveries)/charges, net, and (6) loss on extinguishment of debt.

Non-GAAP net earnings from continuing operations attributable to Cardinal Health, Inc. : net earnings attributable to Cardinal Health, Inc. excluding (1) earnings from discontinued operations (2) LIFO charges/(credits), (3) restructuring and employee severance, (4) amortization and other acquisition-related costs, (5) impairments and (gain)/loss on disposal of assets, (6) litigation (recoveries)/charges, net, (7) loss on extinguishment of debt, and (8) other CareFusion spin-off costs, each net of tax.

Non-GAAP diluted EPS from continuing operations attributable to Cardinal Health, Inc. or "Non-GAAP diluted EPS" : non-GAAP net earnings from continuing operations attributable to Cardinal Health, Inc. divided by diluted weighted-average shares outstanding.

Explanation and Reconciliation of Non-GAAP Financial Measures

Total Cardinal Health, Inc. shareholders' equity	**6,554**	6,256	6,401	5,975	6,244

(1) During fiscal 2013, we recognized a non-cash goodwill impairment charge of $829 million ($799 million, net of tax) related to our Nuclear Pharmacy Services division.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to cash flow and earnings fluctuations as a result of certain market risks. These market risks primarily relate to foreign exchange, interest rate, and commodity price-related changes. We maintain a hedging program to manage volatility related to these market exposures which employs operational, economic, and derivative financial instruments in order to mitigate risk. See Note 1 and Note 11 of the "Notes to Consolidated Financial Statements" for further discussion regarding our use of derivative instruments.

Foreign Exchange Rate Sensitivity

By nature of our global operations, we are exposed to cash flow and earnings fluctuations resulting from foreign exchange rate variation. These exposures are transactional and translational in nature. Principal drivers of this foreign exchange exposure include the Canadian dollar, euro, Thai baht, Chinese renminbi, Japanese yen, Mexican peso, British pound, Singapore dollar, Australian dollar, Malaysian ringgit.

Transactional Exposure

Transactional exposure arises from the purchase and sale of goods and services in currencies other than our functional currency or the functional currency of our subsidiaries. As part of our risk management program, at the end of each fiscal year we perform a sensitivity analysis on our forecasted transactional exposure for the upcoming fiscal year. These analyses include the estimated impact of our hedging program, which is designed to mitigate transactional exposure. Our forecasted transactional exposure at June 30, 2016 increased from the prior year primarily as a result of changes in the volume of transactions in foreign currencies due to the acquisition of Cordis. At June 30, 2016 and 2015 , we had hedged approximately 29 and 37 percent of transactional exposures, respectively.

The following table summarizes the analysis as it relates to transactional exposure and the impact of a hypothetical 10 percent fluctuation in foreign currencies, assuming rates collectively shift in the same direction and we are unable to change customer pricing in response to those shifts, for the upcoming fiscal year:

	June 30	
(in millions)	**2016**	2015
Net hypothetical transactional exposure	**$ 621**	$ 392
Sensitivity gain/loss	**$ 62**	$ 39
Estimated offsetting impact of hedges	**(18)**	(15)
Hypothetical net gain/loss	**$ 44**	$ 24

Translational Exposure

We have exposure related to the translation of financial statements of our foreign operations into U.S. dollars, our functional currency. We perform a similar analysis to that previously described related to this translational exposure. Our forecasted translational exposure at June 30, 2016 increased from the prior year primarily as a result of changes in the number of financial statements translated from foreign currencies due to the acquisition of Cordis. We do not typically hedge any of our translational exposure and no hedging impact was included in our analysis at June 30, 2016 and 2015 .

The following table summarizes translational exposure and the impact of a hypothetical 10 percent strengthening or weakening in the U.S. dollar, assuming rates collectively shift in the same direction, for the upcoming fiscal year:

	June 30	
(in millions)	**2016**	2015
Net hypothetical translational exposure	**$ 201**	$ 55
Sensitivity gain/loss	**20**	6

Interest Rate Sensitivity

We are exposed to changes in interest rates primarily as a result of our borrowing and investing activities to maintain liquidity and fund operations. The nature and amount of our long-term and short-term debt can be expected to fluctuate as a result of business requirements, market conditions and other factors. Our policy is to manage exposures to interest rates using a mix of fixed and floating rate debt as deemed appropriate by management. We utilize interest rate swap instruments to mitigate our exposure to interest rate movements.

As part of our risk management program, we perform an annual sensitivity analysis on our forecasted exposure to interest rates for the upcoming fiscal year. This analysis assumes a hypothetical 10 percent change in interest rates. At June 30, 2016 and 2015 , the potential increase or decrease in annual interest expense under this analysis as a result of this hypothetical change was $3 million for both periods.

During fiscal 2016 and 2015 , we held marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. The fair value is subject to change primarily as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness. At both June 30, 2016 and 2015 , a hypothetical increase or decrease of one percentage point in interest rates would cause a potential increase or decrease of up to $2 million in the estimated fair value.

Commodity Price Sensitivity

We are directly exposed to market price changes for certain commodities, including oil-based resins, nitrile, cotton, diesel fuel and latex. We typically purchase raw materials at either market prices or prices tied to a commodity index and some finished goods at prices based in part on a commodity price index. We also are indirectly exposed to fluctuations in certain commodity prices through the purchase of finished goods and various energy-related commodities, including natural gas and electricity, through our normal course of business where our contracts are not directly tied to a commodity index. As part of our risk management program, we perform sensitivity analysis on our forecasted commodity exposure for the upcoming fiscal year. Our forecasted commodity exposure at June 30, 2016 increased from the prior year primarily as a result of changes in purchasing volumes and commodity pricing. At June 30, 2016 and 2015 , we had hedged a portion of these direct commodity exposures (see Note 11 of the “Notes to Consolidated Financial Statements” for further discussion).

The table below summarizes our analysis of these forecasted direct and indirect commodity exposures and the potential gain/loss given a hypothetical 10 percent fluctuation in commodity prices, assuming pricing collectively shifts in the same direction and we are unable to change customer pricing in response to those shifts, for the upcoming fiscal year:

	June 30	
(in millions)	**2016**	2015
Hypothetical commodity exposure	**$ 417**	$ 405
Sensitivity gain/loss	**$ 42**	$ 41
Hypothetical offsetting impact of hedges	**(1)**	(1)
Hypothetical net gain/loss	**$ 41**	$ 40

We believe our total gross range of direct and indirect exposure to commodities is $400 million to $525 million for fiscal 2017.

Business

General

Cardinal Health, Inc. is a global integrated healthcare services and products company providing customized solutions for hospital systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices worldwide. We provide clinically proven medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home. We connect patients, providers, payers, pharmacists and manufacturers for integrated care coordination and better patient management.

Pharmaceutical Segment

In the United States, our Pharmaceutical segment:

- distributes branded and generic pharmaceutical, over-the-counter healthcare and consumer products through its Pharmaceutical Distribution division to retailers (including chain and independent drug stores and pharmacy departments of supermarkets and mass merchandisers), hospitals and other healthcare providers. This division:
  - maintains prime vendor relationships that streamline the purchasing process resulting in greater efficiency and lower costs for our customers;
  - provides services to pharmaceutical manufacturers including distribution, inventory management, data reporting, new product launch support and contract pricing and chargeback administration;
  - provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers; and
  - repackages generic pharmaceuticals and over-the-counter healthcare products;
- operates nuclear pharmacies and cyclotron facilities through its Nuclear Pharmacy Services division that manufacture, prepare and deliver radiopharmaceuticals for use in nuclear imaging and other procedures in hospitals and physician offices; and
- distributes specialty pharmaceutical products to hospitals and other healthcare providers; provides consulting, patient support and other services for specialty pharmaceutical products to pharmaceutical manufacturers and healthcare providers; and provides specialty pharmacy services through its Specialty Solutions division.

The Pharmaceutical segment is also constructing a sterile facility to contract manufacture a radiopharmaceutical for prostate cancer treatment.

In China, the Pharmaceutical segment distributes branded, generic and specialty pharmaceutical, over-the-counter healthcare and consumer products, provides logistics, marketing and other services and operates direct-to-patient specialty pharmacies through Cardinal Health China.

See Note 15 of the “Notes to Consolidated Financial Statements” for Pharmaceutical segment revenue, profit and assets for fiscal 2016 , 2015 and 2014 .

Pharmaceutical Distribution

Our Pharmaceutical Distribution division’s gross margin includes margin from our generic pharmaceutical program, margin from pharmaceutical distribution agreements with branded manufacturers and margin from over-the-counter healthcare and consumer products. It also includes cash discounts. Margin from our generic pharmaceutical program includes price discounts and rebates from manufacturers and may include price appreciation on some products. Our earnings on generic pharmaceuticals are generally highest during the period immediately following the initial launch of a generic product because generic pharmaceutical selling prices are generally highest during that period and tend to decline over time. Overall, our generic pharmaceutical program's performance is driven by several factors, including increased utilization of generic pharmaceuticals, our ability to sell generic pharmaceuticals to new customers, our ability to sell more generic pharmaceuticals to existing customers, generic pharmaceutical price appreciation, our data and analytic capabilities to predict market trends, enhanced sourcing of generic pharmaceuticals through Red Oak Sourcing (which is discussed below) and new generic product launches. Margin from pharmaceutical distribution agreements with branded manufacturers refers primarily to fees we receive for providing a range of distribution and related services to manufacturers and also includes benefits from pharmaceutical price appreciation on branded pharmaceutical products.

Sourcing Venture With CVS Health

In July 2014, we established Red Oak Sourcing, a U.S.-based generic pharmaceutical sourcing venture with CVS Health with an initial term of 10 years. Red Oak Sourcing negotiates generic pharmaceutical supply contracts on behalf of both companies.

Specialty Pharmaceutical Products and Services

We refer to products and services offered by our Specialty Solutions division as “specialty pharmaceutical products and services.” The Specialty Solutions division distributes oncology, rheumatology, urology, nephrology and other pharmaceutical products ("specialty pharmaceutical products") and human-derived plasma products to hospitals, dialysis clinics, physician offices and other healthcare

providers; provides consulting, patient support, logistics, group purchasing and other services to pharmaceutical manufacturers and healthcare providers primarily supporting the development, marketing and distribution of specialty pharmaceutical products; and provides specialty pharmacy services. Our use of the terminology "specialty pharmaceutical products and services" may not be comparable to the terminology used by other industry participants.

Medical Segment

Our Medical segment distributes a broad range of national and Cardinal Health Brand medical, surgical and laboratory products and provides services to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China. It also distributes medical products to patients in the home in the United States through our Cardinal Health at Home division.

This segment also manufactures, sources and develops higher-margin, Cardinal Health Brand medical and surgical products. Manufactured products include: single-use surgical drapes, gowns and apparel; exam and surgical gloves; fluid suction and collection systems; cardiovascular and endovascular products; wound care products; and orthopedic products. In fiscal 2016, we completed the acquisition of Cordis, a global manufacturer and distributor of interventional cardiology devices and endovascular solutions with operations in more than 50 countries . We expect to continue to expand our lines of manufactured products through acquisitions, strategic partnerships and internal development. Our manufactured products are sold directly or through third-party distributors in the United States, Canada, Europe, Asia, Latin America and other regions internationally. We are expanding our direct distribution network through Cordis.

Through naviHealth and other companies acquired within naviHealth during fiscal 2016, the Medical segment provides services and software to hospitals, other healthcare providers and payers that help manage the complex processes of patient discharge from an acute-care facility (“post-acute care”).

This segment also assembles and offers sterile and non-sterile procedure kits. In addition, the segment provides supply chain services, including spend management, distribution management and inventory management services, to healthcare providers.

See Note 15 of the “Notes to Consolidated Financial Statements” for Medical segment revenue, profit and assets for fiscal 2016 , 2015 and 2014 .

Acquisitions

We have acquired a number of businesses over the last several years that have enhanced our core strategic areas of generics, health systems and hospital solutions (including manufactured medical products), specialty pharmaceutical products and services, international and post-acute care. We expect to continue to pursue additional acquisitions in the future.

Since July 1, 2011, we have completed the following three large acquisitions:

Date	Company	Location	Line of Business	Acquisition Price (in millions)
10/15	Cordis business of Johnson & Johnson	Fremont, CA	Cardiovascular and endovascular products	$1,944
07/15	The Harvard Drug Group	Livonia, MI	Pharmaceutical product distribution	$1,115
03/13	AssuraMed, Inc.	Twinsburg, OH	Medical product distribution	$2,070

In addition, we completed several smaller acquisitions during the last five fiscal years, including: in fiscal 2016, the acquisition of a 71 percent ownership interest in naviHealth, a provider of post-acute care management services, and CuraSpan Health Group, Inc., a provider of discharge planning and care transition software; in fiscal 2015, Tradex International, Inc., a supplier of disposable gloves, and Metro Medical Supply, Inc., a distributor of specialty pharmaceuticals and medical and surgical products; in fiscal 2014, Access Closure, Inc., a manufacturer and distributor of extravascular closure devices; and in fiscal 2012, Futuremed Healthcare Products Corporation, a Canadian medical product distributor.

Customers

Our largest customer, CVS Health, accounted for 25 percent of our fiscal 2016 revenue. In the aggregate, our five largest customers, including CVS Health, accounted for 40 percent of our fiscal 2016 revenue. Our pharmaceutical distribution agreements with CVS Health extend through June 2019.

In addition, we have agreements with group purchasing organizations ("GPOs") that act as agents to negotiate vendor contracts on behalf of their members. Our two largest GPO relationships in terms of member revenue are with Vizient (formerly Novation, LLC) and Premier, Inc. Sales to members of these two GPOs, under numerous contracts across all of our businesses, collectively accounted for 17 percent of our revenue in fiscal 2016 .

Suppliers

We rely on many different suppliers. Products obtained from our five largest suppliers accounted for an aggregate of 27 percent of our revenue during fiscal 2016 , but no single supplier's products accounted for more than 8 percent of revenue.

Competition

We operate in a highly competitive environment in the distribution of pharmaceuticals and related healthcare services. We also operate in a highly competitive environment in the development, manufacturing and distribution of medical and surgical products. We compete on many levels, including price, service offerings, support services and breadth of product lines.

In the Pharmaceutical segment, we compete with wholesale distributors with national reach (including McKesson Corporation and AmerisourceBergen Corporation), regional wholesale distributors, self-warehousing chains, specialty distributors, third-party logistics companies, companies that provide specialty pharmaceutical services and nuclear pharmacies, among others. In addition, the Pharmaceutical segment has experienced competition from a number of organizations offering generic pharmaceuticals, including telemarketers. We also compete with manufacturers that sell their products directly.

In the Medical segment, we compete with many different national medical product distributors, including Owens & Minor, Inc., Medline Industries, Inc. and McKesson Corporation. We also compete with regional medical product distributors and companies that distribute medical products to patients in the home as well as third-party logistics companies. In addition, we compete with manufacturers that sell their products directly. Competitors of the Medical segment's manufacturing and procedural kit businesses include diversified healthcare companies as well as companies that are more focused on specific product categories.

Employees

At June 30, 2016 , we had approximately 26,500 employees in the United States and approximately 10,800 employees outside of the United States. Overall, we consider our employee relations to be good.

Intellectual Property

We rely on a combination of trade secret, patent, copyright and trademark laws, nondisclosure and other contractual provisions, and technical measures to protect our products, services and intangible assets. We hold patents relating to medical and surgical products and to distribution of our nuclear pharmacy products and service offerings. We also operate under licenses for certain proprietary technologies, and in certain instances we license our technologies to third parties.

We believe that we have taken all necessary steps to protect our proprietary rights, but no assurance can be given that we will be able to successfully enforce or protect our rights in the event that they are infringed upon by a third party. While all of these proprietary rights are important to our operations, we do not consider any particular patent, trademark, license, franchise or concession to be material to our overall business.

Regulatory Matters

Our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. Depending upon their specific business, our subsidiaries may be subject to regulation by government entities including:

- the U.S. Drug Enforcement Administration (the “DEA”);
- certain agencies within the U.S. Department of Health and Human Services, including the U.S. Food and Drug Administration (the “FDA”), the Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights;
- the U.S. Nuclear Regulatory Commission (the “NRC”);
- the U.S. Federal Trade Commission (the "FTC");
- U.S. Customs and Border Protection;
- state boards of pharmacy;
- state controlled substance agencies;
- state health departments, insurance departments, Medicaid departments or other comparable state agencies; and
- agencies comparable to those listed above in various regions, such as Europe, Asia and Latin America.

These regulatory agencies have a variety of civil, administrative and criminal sanctions at their disposal for failure to comply with applicable legal or regulatory requirements. They can suspend our ability to manufacture and distribute products, initiate product recalls, seize products or impose criminal, civil and administrative sanctions.

Distribution

The FDA, DEA and various state authorities regulate the marketing, purchase, storage and distribution of pharmaceutical and medical products under various federal and state statutes including the federal Prescription Drug Marketing Act of 1987, Drug Quality and Security Act of 2013 (the “DQSA”), and Controlled Substances Act (the "CSA"). The CSA governs the sale, packaging, storage and distribution of controlled substances. Wholesale distributors of controlled substances must hold valid DEA registrations and state-level licenses, meet various security and operating standards, and comply with the CSA.

Manufacturing and Marketing

The FDA and other domestic and foreign governmental agencies administer requirements that cover the design, testing, safety, effectiveness, manufacturing (including good manufacturing practices), quality systems, labeling, promotion and advertising (including restrictions on promoting or advertising a product other than for the uses set forth in the approved product label), distribution, importation and post-market surveillance of most of our manufactured products. In addition, we need specific approval or clearance from regulatory authorities and may have to register products with regulatory authorities before we can market and sell some of these products in the United States and certain other countries.

In the United States, authorization to commercially distribute a new medical device is generally received in one of two ways. The first, known as pre-market notification or the 510(k) process, requires us to demonstrate that our new medical device is substantially equivalent to a legally marketed medical device. The second, more rigorous process, known as pre-market approval (“PMA”), requires us to independently demonstrate that the new medical device is safe and effective, and is much more detailed than the 510(k) process. Many of our Medical segment products are cleared through the 510(k) process and certain Cordis products must be approved through the PMA process. It can be costly and time-consuming to obtain regulatory approvals, clearances and registrations of medical devices, and such approvals, clearances and registrations might not be granted on a timely basis, if at all. Even after we obtain approval or clearance to market a product or obtain product registrations, the product and our manufacturing processes are subject to continued regulatory oversight.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements, or published standards. When we or a regulatory agency identify a quality or regulatory issue, we investigate and take appropriate corrective action, which may include recalling the product, correcting the product at the customer location, revising product labeling and notifying customers.

Nuclear Pharmacies and Related Businesses

Our nuclear pharmacies and radiopharmaceutical manufacturing facilities require licenses or permits and must abide by regulations issued by the NRC, applicable state boards of pharmacy and the radiologic health agency or department of health of each state in which we operate. In addition, our radiopharmaceutical manufacturing facilities must comply with the FDA's good manufacturing practices. Once completed, our sterile radiopharmaceutical manufacturing facility also will be subject to NRC and FDA regulation. Changes to pharmacy sterile compounding standards and practices are being considered by the FDA, state boards of pharmacy and standards setting organizations that may affect our Nuclear Pharmacy Services division and could require additional infrastructure requirements and modifications to our current practices and impose additional costs.

Product Tracing and Supply Chain Integrity

Title II of the DQSA, known as the Drug Supply Chain Security Act, establishes a phased-in national system for tracing pharmaceutical products through the pharmaceutical distribution supply chain to prevent the introduction of counterfeit, adulterated or mislabeled drugs. The first phase of implementation began on January 1, 2015, and upon full implementation in 2023, we and other supply chain stakeholders will participate in an electronic, interoperable, prescription drug tracing system. In addition, the FDA also has issued regulations requiring most medical device labeling to bear a unique device identifier. These regulations are being phased in through 2020.

Government Healthcare Programs

We are subject to U.S. federal healthcare fraud and abuse laws. These laws generally prohibit persons from soliciting, offering, receiving or paying any compensation in order to induce someone to order or purchase items or services that are in any way paid for by Medicare, Medicaid or other federally-funded healthcare programs. They also prohibit submitting or causing to be submitted any fraudulent claim for payment by the federal government. There are similar state healthcare fraud and abuse laws that apply to Medicaid and other state-funded healthcare programs. Violations of these laws may result in criminal or civil penalties, as well as breach of contract claims and *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments).

Our Cardinal Health at Home business and a few of our other businesses are Medicare-certified suppliers or participate in state Medicaid programs. These businesses are subject to accreditation and quality standards and other rules and regulations, including applicable billing, payment and record-keeping requirements. In addition, we manufacture pharmaceutical and medical products and repackage pharmaceuticals that are purchased through federal or state healthcare programs and are subject to laws that establish eligibility for reimbursement by federal and state healthcare programs. Failure to comply with applicable standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

In addition, our U.S. federal and state government contracts are subject to specific procurement regulations. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

Health and Personal Information Practices

We collect, handle and maintain patient-identifiable health information. The Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as augmented by the Health Information Technology for Economic and Clinical Health Act, as well as some state and foreign laws, regulate the use and disclosure of patient-identifiable health information, including requiring specified privacy and security measures.

We also collect, handle and maintain other sensitive personal and financial information that is subject to federal and state laws protecting such information. Security and disclosure of personal information is also highly regulated in many other countries in which we operate.

In Europe, we are subject to the European Union (“EU”) data protection regulations, including the EU Directive on Data Protection, which requires member states to impose minimum restrictions on the collection, use and transfer of personal data that, in some respects, are more stringent, and impose more significant burdens on subject businesses, than current privacy standards in the United States. A new EU General Data Protection Regulation that will apply uniformly across the EU will become effective in 2018 and includes, among other things, a requirement for prompt notice of data breaches to data subjects and supervisory authorities in certain circumstances and significant fines for non-compliance.

Antitrust Laws

The U.S. federal government, most U.S. states and many foreign countries have antitrust laws that prohibit certain types of conduct deemed to be anti-competitive. Violations of antitrust laws can result in various sanctions, including criminal and civil penalties. Private plaintiffs also could bring civil lawsuits against us in the United States for alleged antitrust law violations, including claims for treble damages. As previously disclosed, in April 2015, we settled allegations by the FTC resulting from an investigation into supplier arrangements involving our Nuclear Pharmacy Services division primarily focused on the period between 2003 and 2008.

Environmental, Health and Safety Laws

In the United States and other countries, we are subject to various federal, state and local environmental laws, as well as laws relating to safe working conditions and laboratory practices.

Laws Relating to Foreign Trade and Operations

U.S. and foreign laws require us to abide by standards relating to the import and export of finished goods, raw materials and supplies and the handling of information. We also must comply with various export control and trade embargo laws, which may require licenses or other authorizations for transactions within some countries or with some counterparties.

Similarly, we are subject to U.S. and foreign laws concerning the conduct of our foreign operations, including the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws, the U.K. Bribery Act and other foreign anti-bribery laws. Among other things, these laws generally prohibit companies and their intermediaries from offering, promising or making payments to officials of foreign governments for the purpose of obtaining or retaining business.

Other Information

Although our agreements with manufacturers sometimes require us to maintain inventory levels within specified ranges, our distribution businesses are generally not required by our customers to maintain particular inventory levels other than as needed to meet service level requirements. Certain supply contracts with U.S. government entities require us to maintain sufficient inventory to meet emergency demands, but we do not believe those requirements materially affect inventory levels.

Our customer return policies generally require that the product be physically returned, subject to restocking fees. We only allow customers to return products that can be added back to inventory and resold at full value, or that can be returned to vendors for credit.

We offer market payment terms to our customers.

Revenue and Long-Lived Assets by Geographic Area

See Note 15 of the "Notes to Consolidated Financial Statements" for revenue and long-lived assets by geographic area.

Available Information

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports are available free of charge on our website (www.cardinalhealth.com), under the "Investors — Financial Reporting — SEC Filings" caption, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC.

You may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website (www.sec.gov) where you can search for annual, quarterly and current reports, proxy and information statements, and other information regarding us and other public companies.

Risk Factors

The risks described below could materially and adversely affect our results of operations, financial condition, liquidity and cash flows. These are not the only risks we face. Our businesses also could be affected by risks that we are not presently aware of or that we currently consider immaterial to our operations.

We could suffer the adverse effects of competitive pressures.
As described in greater detail in the "Business" section, we operate in markets that are highly competitive. Because of competition, our businesses face continued pricing pressure from our customers and suppliers. If we are unable to offset margin reductions caused by these pricing pressures through steps such as sourcing or cost control measures, additional service offerings and sales of higher margin products, our results of operations and financial condition could be adversely affected.

Our Pharmaceutical segment's generic pharmaceutical program could be adversely affected by price declines and fewer generic product launches.
Prices for generic pharmaceuticals generally decline over time. Although some generic products may experience price appreciation which can positively affect our margins, we may not be able to predict whether (and if so, for how long and at what magnitude) such price appreciation will be sustained. The number of generic products experiencing price declines or appreciation and the magnitude of price changes is uncertain in future fiscal years, and could have a negative impact on our year-over-year margins.

The number of new generic pharmaceutical launches also varies from year to year, and the margin impact of these launches varies from product to product. Fewer generic product launches or launches that are less profitable than prior launches will have an adverse effect on our year-over-year margin growth.

Our generic pharmaceutical program has benefited from sourcing generic pharmaceuticals through our Red Oak Sourcing venture with CVS Health, which sources for both us and CVS Health. If the venture does not continue to be successful, our margins could be adversely affected.

Our Pharmaceutical segment's margins under our distribution agreements with branded pharmaceutical manufacturers are affected by service fees we receive from the manufacturers and prices established by the manufacturers.
Our distribution agreements with branded pharmaceutical manufacturers generally provide that we receive fees from the manufacturers to compensate us for the services we provide them. Under some agreements, branded pharmaceutical price appreciation also serves as part of our compensation. If our service fees are reduced or, in cases where part of our compensation is branded price appreciation, if manufacturers determine not to increase prices or to implement only modest increases, our margins may be adversely affected.

Our business is subject to rigorous regulatory and licensing requirements.
As described in greater detail in the "Business" section, our business is highly regulated in the United States, at both the federal and state level, and in foreign countries. If we fail to comply with regulatory requirements, or if allegations are made that we fail to comply, our results of operations and financial condition could be adversely affected.

To lawfully operate our businesses, we are required to obtain and hold permits, product registrations, licenses and other regulatory approvals from, and to comply with operating and security standards of, numerous governmental bodies. Failure to maintain or renew necessary permits, product registrations, licenses or approvals, or to comply with required standards, could have an adverse effect on our results of operations and financial condition.

Products that we manufacture, source, distribute or market must comply with regulatory requirements. Noncompliance or concerns over noncompliance may result in suspension of our ability to distribute, import or manufacture products, product bans, recalls or seizures or criminal or civil sanctions, which, in turn, could result in product liability claims and lawsuits, including class actions. In addition, it can be costly and time-consuming to obtain regulatory approvals or product registrations to market a medical device, and such approvals or registrations might not be granted on a timely basis, if at all.

We are required to comply with laws relating to healthcare fraud and abuse. The requirements of these laws are complex and subject to varying interpretations, and it is possible that regulatory authorities could challenge our policies and practices. If we fail to comply with these laws, we could be subject to federal or state government investigations or *qui tam* actions (false claims cases initiated by private parties purporting to act on behalf of federal or state governments), which could result in civil or criminal sanctions, including the loss of licenses or the ability to participate in Medicare, Medicaid and other federal and state healthcare programs. Such sanctions and damages could adversely affect our results of operations and financial condition.

Our Cardinal Health at Home business and a few of our other businesses are Medicare-certified suppliers or participate in state Medicaid programs. In addition, we manufacture pharmaceutical and medical products and repackage pharmaceuticals that are purchased through federal or state healthcare programs. Failure to comply with applicable standards and regulations could result in civil or criminal sanctions, including the loss of our ability to participate in Medicare, Medicaid and other federal and state healthcare programs.

Our government contracts are subject to specific procurement regulations. Failure to comply with applicable rules or regulations or with contractual or other requirements may result in monetary damages and criminal or civil penalties as well as termination of our government contracts or our suspension or debarment from government contract work.

We collect, handle and maintain patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information. Regulations currently in place continue to evolve, and new laws in this area could further restrict our ability to collect, handle and maintain personal or patient information, or could require us to incur additional compliance costs, either of which could have an adverse impact on our results of operations. Violations of federal, state or foreign laws concerning privacy and data protection could subject us to civil or criminal penalties, breach of contract claims, costs for remediation and harm to our reputation.

The U.S. federal government, most U.S. states and many foreign countries have antitrust laws that prohibit certain types of conduct deemed to be anti-competitive. Violations of antitrust laws can result in various sanctions, including criminal and civil penalties. Private plaintiffs also could bring civil lawsuits against us in the United States for alleged antitrust law violations, including claims for treble damages.

Our global operations are required to comply with the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws, the U.K. Bribery Act and similar anti-bribery laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws. If we fail to comply with any of these laws, we could suffer civil or criminal sanctions.

Our China operations are subject to national, regional and local regulations. The regulatory environment in China is evolving, and officials in the Chinese government exercise broad discretion in deciding how to interpret and apply regulations. It is possible that the Chinese government's current or future interpretation and application of existing or new regulations will negatively impact our China operations, result in regulatory investigations or lead to fines or penalties.

The acquisition of Cordis significantly expanded the number of countries in which we sell products directly. We are required to comply with the regulatory requirements of each of these countries, including requirements related to product registrations and licensing of medical devices. Additionally, as a result of the Cordis acquisition, we now manufacture and distribute a greater number of products that are implanted in the human body, subjecting us to more complex regulations within the United States and in the foreign countries in which Cordis operates. If we fail to comply with any of these laws, we could suffer civil or criminal sanctions.

CVS Health is a large customer that generates a significant amount of our revenue.

Our sales and credit concentration is significant. CVS Health accounted for 25 percent of our fiscal 2016 revenue and 22 percent of our gross trade receivable balance at June 30, 2016 . If CVS Health were to terminate our agreements with them due to an alleged default by us, default in payment or significantly reduce its purchases of our products and services, our results of operations and financial condition could be adversely affected.

We could be subject to adverse changes in the tax laws or challenges to our tax positions.

We are a large multinational corporation with operations in the United States and many foreign countries. As a result, we are subject to the tax laws of many jurisdictions.

From time to time, legislative initiatives are proposed in the United States and other jurisdictions in which we operate that could adversely affect our tax positions, effective tax rate, tax payments or financial condition. Examples of such initiatives include the repeal of the LIFO (last-in, first-out) method of inventory accounting for income tax purposes, a change in the current U.S. taxation treatment of income from foreign operations, the establishment or increase in taxation at the U.S. state level on the basis of gross revenues, recommendations of the base erosion and profit shifting project undertaken by the Organization for Economic Cooperation and Development and the European Commission’s investigation into illegal state aid.

Tax laws are complex and subject to varying interpretations. Tax authorities have challenged some of our tax positions and it is possible that they will challenge others. These challenges may adversely affect our effective tax rate, tax payments or financial condition.

The U.S. healthcare environment is changing in many ways, some of which may not be favorable to us.

The U.S. healthcare industry continues to undergo significant changes designed to increase access to medical care, improve safety and patient outcomes, contain costs and increase efficiencies. Medicare and Medicaid reimbursement levels have generally declined and the basis for payments is changing, shifting away from the traditional fee-for-service model towards value-based payments and risk-sharing models. The U.S. Department of Health and Human Services has set a goal of tying 50 percent of Medicare reimbursements to alternative payment models by the end of 2018. The use of managed care has increased. Distributors, manufacturers, healthcare providers, insurers and pharmacy chains have consolidated and have formed strategic alliances. Large purchasing groups are also prevalent. The industry is experiencing a shift away from traditional healthcare venues like hospitals and into clinics and physician offices, and, in some cases, patients’ homes. We could be adversely affected directly or indirectly (if our customers or suppliers are adversely affected) by these and other changes in the delivery, pricing or utilization of, or reimbursement for, pharmaceuticals, medical products or healthcare services.

Consolidation in the healthcare industry may negatively impact our results of operations.

In recent years, the healthcare industry has continued to consolidate. Manufacturers are combining, which may leave us less able to negotiate our service fees with them. Some of our customers also are consolidating, creating larger enterprises with greater negotiating power. Customer consolidations also could result in the possible loss of a customer where the combined enterprise selects one distributor from two incumbents. We expect this consolidation trend among manufacturers and customers to continue, which could adversely affect our results of operations.

Our business and operations depend on the proper functioning of information systems, critical facilities and distribution networks. Our business could be adversely affected if we experience a cyber-attack or other systems breach.

We rely on our information systems to obtain, rapidly process, analyze and manage data to:

- facilitate the purchase and distribution of inventory items from numerous distribution centers;
- receive, process and ship orders on a timely basis;
- manage the accurate billing and collections for thousands of customers;
- process payments to suppliers;
- facilitate the manufacturing and assembly of medical products; and
- generate financial information.

Our business also depends on the proper functioning of our critical facilities, including our national logistics center, and our distribution networks. Our results of operations could be adversely affected if:

- our information systems, critical facilities or distribution networks, or our customers' access to these systems, facilities or networks, are disrupted;
- our information systems, critical facilities or distribution networks are damaged; or
- our information systems, critical facilities or distribution networks fail,

whether due to physical disruptions, such as fire, natural disaster, pandemic or power outage, or due to cyber security incidents or other actions of third parties, including terrorism or labor strikes.

The Pharmaceutical segment is in a multi-year project to replace certain of its finance and operating information systems. If these new systems are not effectively implemented or they fail to operate as intended, it could adversely affect the Pharmaceutical segment's supply chain operations and our internal control over financial reporting. In addition, from time to time, other businesses perform business process improvements or infrastructure modernizations or may use third-party service providers for key systems and processes, such as order to cash, customer service and accounts payable. If any of these initiatives are not successfully or efficiently implemented or maintained, they could adversely affect our business and our internal control over financial reporting.

Our business relies on the secure transmission, storage and hosting of patient-identifiable health information, financial information and other sensitive information relating to our customers, company and workforce. We have programs in place to detect, contain and respond to information security incidents. However, because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or to implement adequate preventative measures. In addition, hardware, software or applications we develop or procure from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Unauthorized parties may also attempt to gain access to our systems or facilities, or to those of third parties with whom we do business, through fraud, trickery or other forms of deceiving our employees, contractors or vendors. Any compromise of our information systems or of the information systems of a third-party with whom we do business, including unauthorized access to or use or disclosure of sensitive information, could adversely impact our operations, results of operations or our ability to satisfy legal requirements, including those legal requirements related to patient-identifiable health information.

Because of the nature of our business, we may become involved in legal proceedings that could adversely impact our cash flows or results of operations.

Due to the nature of our businesses, which includes the manufacture and distribution of healthcare products, we may from time to time become involved in disputes or legal proceedings. These include commercial disputes, government contract compliance matters, product liability claims or lawsuits, patent infringement claims, *qui tam* actions or other legal proceedings.

Some of the products that we manufacture or distribute, including the cardiovascular and endovascular products manufactured and distributed by Cordis, have been and may in the future be alleged to cause personal injury, subjecting us to product liability claims. Although we maintain product liability insurance for many products that we manufacture, there are substantial self-insured retentions, conditions or exclusions. There are no guarantees that we can obtain product liability insurance for a particular product we manufacture or if we do obtain insurance, the amount maintained would be adequate to cover any or all current or future claims settlements or judgments. Where we self-insure, we establish reserves based on actuarial methodologies and historical loss trends. However, any settlement or judgment in excess of our insurance limits or that is not otherwise covered could adversely affect our results of operations and financial condition.

Our manufacturing businesses operate in an industry characterized by extensive intellectual property litigation. Patent litigation can result in significant damage awards and injunctions that could prevent the manufacture and sale of affected products or force us to make royalty payments in order to continue selling the affected products.

Litigation is inherently unpredictable, and the unfavorable resolution of one or more of these legal proceedings could adversely affect our cash flows or results of operations.

Acquisitions can have unanticipated results.

An important element of our growth strategy has been to acquire other businesses that expand or complement our existing businesses. In fiscal 2016 , we spent $3.6 billion to acquire other businesses, including $1.1 billion to acquire Harvard Drug and $1.9 billion to acquire Cordis. Acquisitions involve risks: we may overpay for a business or fail to realize the synergies and other benefits we expect from the acquisition; our management's attention may be diverted to integration efforts; we may fail to retain key personnel of the acquired business; future developments may impair the value of our purchased goodwill or intangible assets; we may face difficulties establishing or combining operations and systems; we may assume

liabilities related to litigation or other legal proceedings involving the acquired business; we may face challenges retaining the customers of the acquired business; or we may encounter unforeseen internal control, regulatory or compliance issues.

We depend on certain suppliers to make their raw materials and products available to us and are subject to fluctuations in costs of raw materials and products.
We depend on the availability of various components, compounds, raw materials (including radioisotopes) and energy supplied by others for our operations. Any of our supplier relationships could be interrupted due to events beyond our control, including natural disasters, or could be terminated. A sustained supply interruption could have an adverse effect on our business.

Our manufacturing businesses use oil-based resins, cotton, latex and other commodities as raw materials in many products. Prices of oil and gas also affect our distribution and transportation costs. Prices of these commodities are volatile and can fluctuate significantly, causing our costs to produce and distribute our products to fluctuate. Due to competitive dynamics and contractual limitations, we may be unable to pass along cost increases through higher prices. If we cannot fully offset cost increases through other cost reductions, or recover these costs through price increases or surcharges, our results of operations could be adversely affected.

Our results of operations may suffer upon the bankruptcy, insolvency, or other credit failure of a customer that has a substantial amount owed to us.
Most of our customers buy products and services from us on credit, which is made available to customers based on our assessment of creditworthiness. The bankruptcy, insolvency or other credit failure of any customer that has a substantial amount owed to us could adversely affect our results of operations.

Our Cordis acquisition increased the extent of our exposure to the economic, political and currency risks of international operations.
We conduct our operations in various regions of the world outside of the United States, including North America, South America, Europe and Asia. The scope and complexity of our international operations expanded with the acquisition of Cordis and we may continue to expand our operations outside the United States. Global developments can affect our business in many ways. Our global operations are affected by local economic environments, including inflation, recession and competition. In addition, we conduct our business in U.S. dollars and various functional currencies of our foreign subsidiaries. Changes in foreign currency exchange rates could adversely affect our financial results, which are reported in U.S. dollars. We may not be able to hedge to protect us against these exposures, and any hedges may not successfully mitigate these exposures. Political changes also can disrupt our global operations, as well as our customers and suppliers, in a particular location. Divergent or unfamiliar regulatory systems and labor markets also can increase the risks and burdens of operating in numerous countries.

Economic conditions may adversely affect demand for our products and services .
Deterioration in general economic conditions in the United States and other countries in which we do business could adversely affect the amount of prescriptions filled and the number of medical procedures undertaken and, therefore, reduce purchases of our products and services, which could adversely affect our results of operations. In addition, deteriorating economic conditions may increase bankruptcies, insolvencies or other credit failures of customers or suppliers, which, if they have a substantial amount owed to us, also could adversely affect our results of operations.

Properties

In the United States, at June 30, 2016 , the Pharmaceutical segment operated 24 primary pharmaceutical distribution facilities and one national logistics center; six specialty distribution facilities; and more than 140 nuclear pharmacy and cyclotron facilities. The Medical segment operated more than 70 medical-surgical distribution, assembly, manufacturing and other operating facilities. Our U.S. operating facilities are located in 45 states and in Puerto Rico.

Outside the United States, at June 30, 2016 , our Medical segment operated more than 20 facilities in Canada, the Dominican Republic, Malaysia, Malta, Mexico and Thailand that engage in manufacturing, distribution or research. In addition, our Pharmaceutical and Medical segments utilized various distribution and pharmacy facilities in China.

At June 30, 2016 , we owned more than 70 operating facilities and leased more than 240 operating facilities around the world. Our principal executive offices are headquartered in an owned building located at 7000 Cardinal Place in Dublin, Ohio.

We consider our operating properties to be in satisfactory condition and adequate to meet our present needs. However, we regularly evaluate operating properties and may make further additions and improvements or consolidate locations as we seek opportunities to expand or enhance the efficiency of our business.

Legal Proceedings

The legal proceedings described in Note 8 of the "Notes to Consolidated Financial Statements" are incorporated in this "Legal Proceedings" section by reference.

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common shares are listed on the New York Stock Exchange under the symbol "CAH." The following table reflects the range of the reported high and low closing prices of our common shares as reported on the New York Stock Exchange Composite Tape and the per share dividends declared for the fiscal years ended June 30, 2016 and 2015 and paid quarterly. It also reflects the range of the reported high and low closing prices of our common shares from July 1, 2016 through the period ended on July 29, 2016 and the per share dividends declared from July 1, 2016 through the period ended on August 5, 2016:

	High	Low	Dividends Declared
Fiscal 2015			
Quarter Ended:			
September 30, 2014	$ 77.66	$ 69.59	$ 0.3425
December 31, 2014	83.04	72.13	0.3425
March 31, 2015	91.25	79.19	0.3425
June 30, 2015	91.50	83.65	0.3870
Fiscal 2016			
Quarter Ended:			
September 30, 2015	$ 87.02	$ 76.72	$ 0.3870
December 31, 2015	90.85	77.12	0.3870
March 31, 2016	89.68	76.16	0.3870
June 30, 2016	87.20	73.69	0.4489
Fiscal 2017	$ 83.64	$ 78.23	$ 0.4489

At July 29, 2016 there were approximately 9,184 shareholders of record of our common shares.

We anticipate that we will continue to pay quarterly cash dividends in the future. The payment and amount of future dividends remain, however, within the discretion of our Board of Directors and will depend upon our future earnings, financial condition, capital requirements and other factors.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs (2)	Approximate Dollar Value of Shares That May Yet be Purchased Under the Programs (2) (in millions)
April 2016	191	$ 84.50	—	$ 393
May 2016	2,802,649	77.36	2,802,453	1,176
June 2016	1,711,419	77.67	1,711,249	1,043
Total	**4,514,259**	**$ 77.48**	**4,513,702**	**$ 1,043**

(1) Reflects 191 , 196 and 170 common shares purchased in April, May and June 2016, respectively, through a rabbi trust as investments of participants in our Deferred Compensation Plan.

(2) On October 29, 2013, our Board of Directors approved a $1.0 billion share repurchase program and on August 6, 2014, the Board of Directors authorized an additional $1.0 billion under the program, for a total of $2.0 billion. This program was completed in July 2016. On May 4, 2016, our Board of Directors also approved a $1.0 billion share repurchase program that expires on December 31, 2019. During the three months ended June 30, 2016 , we repurchased 4.5 million common shares under these programs. We repurchased an additional 3 million common shares from July 1, 2016 through August 5, 2016. After these repurchases, we have $793 million available under our new repurchase program.

Market for Registrant's Common Equity

Five Year Performance Graph

The following line graph compares the cumulative total return of our common shares with the cumulative total return of the Standard & Poor's Composite—500 Stock Index (the "S&P 500 Index") and the Standard & Poor's Composite—500 Healthcare Index (the "S&P 500 Healthcare Index"). The line graph assumes, in each case, an initial investment of $100 on June 30, 2011, based on the market prices at the end of each fiscal year through and including June 30, 2016 , and reinvestment of dividends. The S&P 500 Index and S&P 500 Healthcare Index investments are weighted on the basis of market capitalization at the beginning of each period.

	June 30

Management Reports

Evaluation of Disclosure Controls and Procedures

We evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of June 30, 2016 . Based on this evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of June 30, 2016 to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Our internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, controls deemed effective now may become inadequate in the future because of changes in conditions, or because compliance with policies or procedures has deteriorated or been circumvented.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2016 . In making this assessment, management used the criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria"). Based on management's assessment and the COSO criteria, management believes that our internal control over financial reporting was effective as of June 30, 2016 .

Our independent registered public accounting firm, Ernst & Young LLP, has issued a report on our internal control over financial reporting. Ernst & Young LLP's report appears following this "Management Reports" section and expresses an unqualified opinion on the effectiveness of our internal control over financial reporting.

On October 2, 2015 , we completed the acquisition of Cordis. As permitted by guidelines established by the SEC, management excluded Cordis from the scope of its assessment of the effectiveness of internal control over financial reporting as of June 30, 2016 . Cordis constituted 7 percent and 29 percent of our total and net assets, respectively, as of June 30, 2016 and less than 1 percent of both our revenue and operating earnings for the fiscal year then ended.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Implementation of New Software Systems

The Pharmaceutical segment is in a multi-year project implementing a replacement of certain finance and operating information systems, which is expected to affect internal control over financial reporting. This project did not impact internal control over financial reporting during fiscal 2016. If these new systems are not effectively implemented or fail to operate as intended, it could adversely affect our internal control over financial reporting.

Reports

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

The Board of Directors and Shareholders of Cardinal Health, Inc.

We have audited Cardinal Health, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2016 , based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Cardinal Health, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying “Management's Report on Internal Control Over Financial Reporting.” Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying “Management’s Report on Internal Control Over Financial Reporting”, management’s assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Cordis, which is included in the 2016 consolidated financial statements of Cardinal Health, Inc. and subsidiaries and constituted 7 percent and 29 percent of total and net assets, respectively, as of June 30, 2016 and less than 1 percent of both revenues and operating earnings for the year then ended. Our audit of internal control over financial reporting of Cardinal Health, Inc. and subsidiaries also did not include an evaluation of the internal control over financial reporting of Cordis.

In our opinion, Cardinal Health, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of June 30, 2016 , based on the COSO criteria .

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cardinal Health, Inc. and subsidiaries as of June 30, 2016 and 2015 and the related consolidated statements of earnings, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended June 30, 2016 of Cardinal Health, Inc. and subsidiaries and our report dated August 12, 2016 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Columbus, Ohio

Reports

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Cardinal Health, Inc.

We have audited the accompanying consolidated balance sheets of Cardinal Health, Inc. and subsidiaries as of June 30, 2016 and 2015 , and the related consolidated statements of earnings, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended June 30, 2016 . Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cardinal Health, Inc. and subsidiaries at June 30, 2016 and 2015 , and the consolidated results of their operations and their cash flows for each of the three years in the period ended June 30, 2016 , in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cardinal Health, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2016 , based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated August 12, 2016 expressed an unqualified opinion thereon.

Notes to Consolidated Financial Statements

1. Basis of Presentation and Summary of Significant Accounting Policies

Cardinal Health, Inc. is a global integrated healthcare services and products company providing customized solutions for hospital systems, pharmacies, ambulatory surgery centers, clinical laboratories and physician offices worldwide. The company provides clinically proven, medical products and pharmaceuticals and cost-effective solutions that enhance supply chain efficiency from hospital to home. Cardinal Health, Inc. connects patients, providers, payers, pharmacists, and manufacturers for integrated care coordination and better patient management. References to “we”, “our” and similar pronouns in these consolidated financial statements are to Cardinal Health, Inc. and its majority-owned or controlled subsidiaries unless the context otherwise requires.

Our fiscal year ends on June 30. References to fiscal 2016 , 2015 and 2014 in these consolidated financial statements are to the fiscal years ended June 30, 2016 , 2015 and 2014 , respectively.

Basis of Presentation

Our consolidated financial statements include the accounts of all majority-owned or controlled subsidiaries, and all significant intercompany transactions and amounts have been eliminated. The results of businesses acquired or disposed of are included in the consolidated financial statements from the date of the acquisition or up to the date of disposal, respectively.

Use of Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of financial statements in accordance with GAAP requires us to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Estimates, judgments and assumptions are used in the accounting and disclosure related to, among other items, allowance for doubtful accounts, inventory valuation, business combinations, goodwill and other intangible asset impairment, vendor reserves, loss contingencies, income taxes and share-based compensation. Actual amounts could ultimately differ from these estimated amounts.

Cash Equivalents

We consider liquid investments purchased with an initial maturity of three months or less to be cash equivalents. The carrying value of cash equivalents approximates fair value.

Receivables

Trade receivables are presented net of an allowance for doubtful accounts of $135 million at both June 30, 2016 and 2015 . An account is considered past due on the first day after its due date. In accordance with contract terms, we generally have the ability to charge customers service fees or higher prices if an account is considered past due. We regularly monitor past due accounts and establish appropriate reserves to cover potential losses, which are based primarily on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

We provide financing to various customers. Such financing arrangements range from 270 days to 5 years at interest rates that are generally subject to fluctuation. Interest income on these arrangements is recognized as it is earned. The financings may be collateralized, guaranteed by third parties or unsecured. Finance notes and related accrued interest were $145 million (current portion $31 million) and $161 million (current portion $53 million) at June 30, 2016 and 2015 , respectively, and are included in other assets (current portion is included in prepaid expenses and other) in the consolidated balance sheets. Finance notes receivable are reported net of an allowance for doubtful accounts of $19 million and $14 million at June 30, 2016 and 2015 , respectively. We estimate an allowance for these financing receivables based on historical collection rates and the credit worthiness of the customer. We write off any amounts deemed uncollectible against the established allowance for doubtful accounts.

Concentrations of Credit Risk

We maintain cash depository accounts with major banks, and we invest in high quality, short-term liquid instruments, and in marketable securities. Our short-term liquid instruments mature within three months and we have not historically incurred any related losses. Investments in marketable securities consist of a portfolio of high-grade instruments. Such investments are made only in instruments issued by highly-rated institutions, whose financial condition we monitor.

Our trade receivables and finance notes and related accrued interest are exposed to a concentration of credit risk with customers in the retail and healthcare sectors. Credit risk can be affected by changes in reimbursement and other economic pressures impacting the healthcare industry. Such credit risk is limited due to supporting collateral and the diversity of the customer base, including its wide geographic dispersion. We perform regular credit evaluations of our customers’ financial conditions and maintain reserves for credit losses. Historically, such losses have been within our expectations. Refer to the "Receivables" section within this Note 1 for additional information on the accounting treatment of reserves for credit losses.

Major Customers

CVS Health Corporation ("CVS Health"), which is primarily serviced through our Pharmaceutical segment, is our only customer that individually accounts for at least 10 percent of revenue and gross trade receivables. The table below summarizes historical percent of revenue and gross trade receivables from CVS Health.

	Percent of Revenue			Percent of Gross Trade Receivables at June 30	
	2016	2015	2014	**2016**	2015
CVS Health	**25%**	27%	28%	**22%**	20%

We have entered into agreements with group purchasing organizations (“GPOs”) which act as purchasing agents that negotiate vendor contracts on behalf of their members. Vizient (formerly Novation, LLC) and Premier, Inc. are our two largest GPO member relationships in terms of revenue. Sales to members of these two GPOs collectively accounted for 17 percent , 18 percent and 17 percent of revenue for fiscal 2016 , 2015 and 2014 , respectively. Our trade receivable balances are with individual members of the GPO, and therefore no significant concentration of credit risk exists with these types of arrangements.

Inventories

A substantial portion of our inventories (58 percent at both June 30, 2016 and 2015) are valued at the lower of cost, using the last-in, first-out ("LIFO") method, or market. These inventories are included within the core pharmaceutical distribution facilities of our Pharmaceutical segment (“distribution facilities”) and are primarily merchandise inventories. The LIFO method presumes that the most recent inventory purchases are the first items sold, so LIFO helps us better match current costs and revenue. We believe that the average cost method of inventory valuation provides a reasonable approximation of the current cost of replacing inventory within these distribution facilities. As such, the LIFO reserve is the difference between (a) inventory at the lower of LIFO cost or market and (b) inventory at replacement cost determined using the average cost method of inventory valuation.

Our remaining inventory is stated at the lower of cost, using the first-in, first-out method, or market. If we had used the average cost method of inventory valuation for all inventory within the core pharmaceutical distribution facilities, the value of our inventories would not have changed in fiscal 2016 or 2015 because inventories valued at LIFO were $9 million and $114 million higher than the average cost value at June 30, 2016 and June 30, 2015 , respectively. We do not record inventories in excess of replacement cost. As such, we did not record any changes in our LIFO reserve in fiscal 2016 and 2015 .

Inventories presented in the consolidated balance sheets are net of reserves for excess and obsolete inventory which were $79 million and $57 million at June 30, 2016 and 2015 , respectively. We reserve for inventory obsolescence using estimates based on historical experience, historical and projected sales trends, specific categories of inventory and age of on-hand inventory.

Cash Discounts

Manufacturer cash discounts are recorded as a component of inventory cost and recognized as a reduction of cost of products sold when the related inventory is sold.

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Property and equipment held for sale are recorded at the lower of cost or fair value less cost to sell. When certain events or changes in operating conditions occur, an impairment assessment may be performed on the recoverability of the carrying amounts.

Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets, including capital lease assets which are depreciated over the terms of their respective leases. We generally use the following range of useful lives for our property and equipment categories: buildings and improvements— 3 to 39 years ; machinery and equipment— 3 to 20 years ; and furniture and fixtures— 3 to 7 years . We recorded depreciation expense of $277 million , $254 million and $265 million for fiscal 2016 , 2015 and 2014 , respectively.

The following table presents the components of property and equipment, net at June 30:

(in millions)	2016	2015
Land, building and improvements	$ 1,735	$ 1,465
Machinery and equipment	2,608	2,440
Furniture and fixtures	133	129
Total property and equipment, at cost	4,476	4,034
Accumulated depreciation and amortization	(2,680)	(2,528)
Property and equipment, net	**$ 1,796**	$ 1,506

Repairs and maintenance expenditures are expensed as incurred. Interest on long-term projects is capitalized using a rate that approximates the weighted-average interest rate on long-term obligations, which was 3.38 percent at June 30, 2016 . The amount of capitalized interest was immaterial for all periods presented.

Business Combinations

The assets acquired and liabilities assumed in a business combination, including identifiable intangible assets, are recorded at their estimated fair values as of the acquisition date. The excess of the purchase price over the estimated fair value of the identifiable net assets acquired is recorded as goodwill. We base the fair values of identifiable intangible assets on detailed valuations that require management to make significant judgments, estimates and assumptions. Critical estimates and assumptions include: expected future cash flows for customer relationships, trade names and other identifiable intangible assets; discount rates that reflect the risk factors associated with future cash flows; and estimates of useful lives. When an acquisition involves contingent consideration, we recognize a liability equal to the fair value of the contingent consideration obligation at the acquisition date. The estimate of fair value of a contingent consideration obligation requires subjective assumptions to be made regarding future business results, discount rates, discount periods and probabilities assigned to various potential business result scenarios. See Note 2 for additional information regarding our acquisitions.

Goodwill and Other Intangible Assets

Purchased goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment annually or when indicators of impairment exist.

Goodwill impairment testing involves a comparison of the estimated fair value of reporting units to the respective carrying amount, which may be performed utilizing either a qualitative or quantitative assessment. A reporting unit is defined as an operating segment or one level below an operating segment (also known as a component). Goodwill impairment testing involves judgment, including the identification of reporting units, the estimation of the fair value of each

reporting unit and, if necessary, the estimation of the implied fair value of goodwill.

We have two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. These operating segments are comprised of divisions (components), for which discrete financial information is available. Components are aggregated into reporting units for purposes of goodwill impairment testing to the extent that they share similar economic characteristics. Our reporting units are: Pharmaceutical operating segment (excluding our Nuclear Pharmacy Services division and Cardinal Health China - Pharmaceutical division); Nuclear Pharmacy Services division; Cardinal Health China - Pharmaceutical division; Medical operating segment (excluding our Cardinal Health at Home division and naviHealth division); Cardinal Health at Home division; and naviHealth division.

Fair value can be determined using market, income or cost-based approaches. Our determination of estimated fair value of the reporting units is based on a combination of the income-based and market-based approaches. Under the income-based approach, we use a discounted cash flow model in which cash flows anticipated over several future periods, plus a terminal value at the end of that time horizon, are discounted to their present value using an appropriate risk-adjusted rate of return. We use our internal forecasts to estimate future cash flows, which we believe are consistent with those of a market participant, and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for each reporting unit. Actual results may differ materially from those used in our forecasts. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective reporting units and in our internally-developed forecasts. Discount rates used in our reporting unit valuations ranged from 8.5 percent to 12.5 percent . Under the market-based approach, we determine fair value by comparing our reporting units to similar businesses or guideline companies whose securities are actively traded in public markets. To further confirm fair value, we compare the aggregate fair value of our reporting units to our total market capitalization. Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including forecasted operating results. The use of alternate estimates and assumptions or changes in the industry or peer groups could materially affect the determination of fair value for each reporting unit and potentially result in goodwill impairment.

We performed annual impairment testing in fiscal 2016 , 2015 and 2014 and concluded that there were no impairments of goodwill as the estimated fair value of each reporting unit exceeded its carrying value.

The impairment test for indefinite-lived intangibles other than goodwill (primarily in-process research and development ("IPR&D")) consists of a comparison of the fair value of the indefinite-lived intangible asset to the carrying value of the asset as of the impairment testing date. If the carrying amount of the indefinite-lived intangible exceeds its fair value, an impairment loss must be recognized in an amount equal to that excess. We estimate the fair value of our indefinite-lived intangibles under the income approach using a discounted cash flow model. We use our internal forecasts, which we believe are consistent with those of a market participant, to estimate future cash flows and include an estimate of long-term growth rates based on our most recent views of the long-term outlook for the indefinite-lived intangible including, among other factors, assumptions on regulatory approval for IPR&D.

Intangible assets with finite lives, primarily customer relationships; trademarks, trade names and patents; and developed technology, are amortized using a combination of straight-line and accelerated methods based on the expected cash flows from the asset over their estimated useful lives. We review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment loss occurred requires a comparison of the carrying amount to the sum of the future forecasted undiscounted cash flows expected to be generated by the asset group. Actual results may differ materially from those used in our forecasts.

Investments

Investments in non-marketable equity securities are accounted for under either the cost or equity method of accounting and are included in other assets in the consolidated balance sheets. For investments in which we can exercise significant influence, we use the equity method of accounting. Our share of the earnings and losses was immaterial, both individually and in the aggregate, for all periods presented and is recorded in other income, net in the consolidated statements of the earnings. We monitor investments for other-than-temporary impairment by considering factors such as the operating performance of the investment and current economic and market conditions.

During fiscal 2014 , we sold our minority equity interests in two investments for proceeds of $47 million , which resulted in a pre-tax gain of $32 million ($20 million , net of tax) included in other income, net in the consolidated statements of earnings.

Marketable securities are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Unrealized gains and losses on available-for-sale securities, net of applicable taxes, are included within shareholders' equity in accumulated other comprehensive income ("AOCI"). We monitor these securities for other-than-temporary impairment by considering factors such as the duration that, and the extent to which, the fair value is below cost, the operating performance and credit worthiness of the issuer of the securities and current economic and market conditions. See Note 5 for additional information regarding available-for-sale securities.

Vendor Reserves

In the ordinary course of business, our vendors may dispute deductions taken against payments otherwise due to them or assert other disputes. These disputes are researched and resolved based upon the findings of the research performed. At any given time, there are outstanding items in various stages of research and resolution. In determining appropriate reserves for areas of exposure with our vendors, we assess historical experience and current outstanding claims. We have established various levels of reserves based on the

type of claim and status of review. Though the claim types are relatively consistent, we periodically refine our methodology by updating the reserve estimate percentages to reflect actual historical experience. The ultimate outcome of certain claims may be different than our original estimate and may require an adjustment. All adjustments to vendor reserves are included in cost of products sold. In addition, the reserve balance will fluctuate due to variations of outstanding claims from period-to-period, timing of settlements and specific vendor issues, such as bankruptcies. Vendor reserves were $62 million and $88 million at June 30, 2016 and 2015 , respectively, excluding third-party returns. See separate section in Note 1 for a description of third-party returns.

Distribution Service Agreement and Other Vendor Fees

Our Pharmaceutical segment recognizes fees received from its distribution service agreements and other fees received from vendors related to the purchase or distribution of the vendors' inventory when those fees have been earned and we are entitled to payment. Since the benefit provided to a vendor is related to the purchase and distribution of the vendor's inventory, we recognize the fees as a reduction in the carrying value of the inventory that generated the fees, and as such, a reduction of cost of products sold in our consolidated statements of earnings when the inventory is sold.

Loss Contingencies

We accrue for contingencies related to disputes, litigation and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review contingencies to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates. See Note 8 for additional information regarding loss contingencies.

Income Taxes

We account for income taxes using the asset and liability method. Deferred tax assets and liabilities are measured using enacted tax rates in the respective jurisdictions in which we operate. Deferred taxes are not provided on the unremitted earnings of subsidiaries outside of the United States when it is expected that these earnings are permanently reinvested.

Tax benefits from uncertain tax positions are recognized when it is more likely than not that the position will be sustained upon examination of the technical merits of the position, including resolutions of any related appeals or litigation processes. The amount recognized is measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement. See Note 7 for additional information regarding income taxes.

Other Accrued Liabilities

Other accrued liabilities represent various current obligations, including certain accrued operating expenses and taxes payable.

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests represent the portion of net earnings, comprehensive income and net assets that is not attributable to Cardinal Health, Inc.

The redeemable noncontrolling interests relate to our ownership interest in naviHealth Holdings, LLC. ("naviHealth"), which we acquired during fiscal 2016 . The redeemable noncontrolling interests are redeemable at the option of the third-party noncontrolling interest holders at any time after the two-year anniversary of the closing, or earlier if a trigger event occurs. As such, the noncontrolling interests have been presented as redeemable noncontrolling interests in our consolidated balance sheets. The noncontrolling interests will be adjusted each period for net earnings and dividends attributable to the noncontrolling interests and changes in the noncontrolling ownership interests, if any. An additional adjustment to the carrying value of the noncontrolling interests may be required if the redemption value under the terms of the agreement exceeds the carrying value. Changes in the carrying value of the noncontrolling interests related to a change in the redemption value will be recorded through retained earnings and will not affect net earnings attributable to Cardinal Health, Inc. See Note 2 and Note 12 for additional information regarding redeemable noncontrolling interests.

Share-Based Compensation

Share-based compensation provided to employees is recognized in the consolidated statements of earnings based on the grant date fair value of the awards. The fair value of stock options is determined on the grant date using a lattice valuation model. The fair value of restricted share units and performance share units is determined by the grant date market price of our common shares. The compensation expense associated with nonvested performance share units is dependent on our periodic assessment of the probability of the targets being achieved and our estimate, which may vary over time, of the number of shares that ultimately will be issued. The compensation expense recognized for share-based awards is net of estimated forfeitures and is recognized ratably over the service period of the awards. We classify share-based compensation expense in distribution, selling, general and administrative ("SG&A") expenses to correspond with the same line item as the majority of the cash compensation paid to employees. If awards are modified in connection with a restructuring activity, the incremental share-based compensation expense is classified in restructuring and employee severance. See Note 16 for additional information regarding share-based compensation.

Dividends

We paid cash dividends per common share of $1.55 , $1.37 and $1.21 in fiscal 2016 , 2015 and 2014 , respectively.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, product delivery has occurred or the services have been rendered, the price is fixed or determinable, and collectability is reasonably assured.

Pharmaceutical Segment
The Pharmaceutical segment recognizes distribution revenue when title transfers to its customers and we have no further obligation to provide services related to such merchandise.

Revenue for deliveries that are directly shipped to customers from the manufacturer when we act as an intermediary in the ordering and delivery of products is recorded gross. This is in accordance with accounting standards addressing reporting revenue on a gross basis as a principal versus on a net basis as an agent. This revenue is recorded on a gross basis since we incur credit risk from the customer, bear the risk of loss for incomplete shipments and do not receive a separate fee or commission for the transaction and, as such, are the primary obligor. Revenue from these sales is recognized when title transfers to the customer and we have no further obligation to provide services related to such merchandise.

Radiopharmaceutical revenue is recognized upon delivery of the product to the customer and we have no further obligation to provide services related to such merchandise.

Medical Segment
The Medical segment recognizes revenue when title transfers to its customers and we have no further obligation to provide services related to such products.

Sales Returns and Allowances

Revenue is recorded net of sales returns and allowances. Our customer return policies generally require that the product be physically returned, subject to restocking fees, in a condition suitable to be added back to inventory and resold at full value, or returned to vendors for credit ("merchantable product"). Product returns are generally consistent throughout the year and typically are not specific to any particular product or customer.

We accrue for estimated sales returns and allowances at the time of sale based upon historical customer return trends, margin rates and processing costs. Our accrual for sales returns is reflected as a reduction of revenue and cost of products sold for the sales price and cost, respectively. At June 30, 2016 and 2015 , the accrual for estimated sales returns and allowances was $386 million and $305 million , respectively, the impact of which is reflected in trade receivables, net and inventories, net in the consolidated balance sheets. Sales returns and allowances were $2.2 billion , $2.0 billion and $1.7 billion , for fiscal 2016 , 2015 and 2014 , respectively.

Third-Party Returns

Since we generally do not accept non-merchantable product returns from our customers, many of our customers return non-merchantable pharmaceutical products to the manufacturer through third parties. Since our customers generally do not have a direct relationship with manufacturers, our vendors pass the value of such returns to us (usually in the form of an accounts payable deduction) for distribution to customers. We, in turn, pass the value received, less an administrative fee, to our customer. In certain instances, we pass the estimated value of the return to our customer prior to our receipt of the value from the vendor. Although we believe we have satisfactory protections, we could be subject to claims from customers or vendors if our administration of this overall process was deficient in some respect or our contractual terms with vendors are in conflict with our contractual terms with our customers. We have maintained reserves for some of these situations based on their nature and our historical experience with their resolution.

Shipping and Handling

Shipping and handling costs are primarily included in SG&A expenses in our consolidated statements of earnings. Shipping and handling costs include all delivery expenses as well as all costs to prepare the product for shipment to the end customer. Shipping and handling costs were $504 million , $454 million and $430 million , for fiscal 2016 , 2015 and 2014 , respectively. Revenue received for shipping and handling was immaterial for all periods presented.

Restructuring and Employee Severance

We consider restructuring activities to be programs by which we fundamentally change our operations, such as closing and consolidating facilities, moving manufacturing of a product to another location, production or business process sourcing, employee severance (including rationalizing headcount or other significant changes in personnel) and realigning operations (including realignment of the management structure of a business unit in response to changing market conditions). See Note 3 for additional information regarding our restructuring activities.

Amortization and Other Acquisition-Related Costs

We classify certain costs incurred in connection with acquisitions as amortization and other acquisition-related costs in our consolidated statements of earnings. These costs consist of amortization of acquisition-related intangible assets, transaction costs, integration costs and changes in the fair value of contingent consideration obligations. Transaction costs are incurred during the initial evaluation of a potential acquisition and primarily relate to costs to analyze, negotiate and consummate the transaction as well as due diligence activities. Integration costs relate to activities required to combine the operations of an acquired enterprise into our operations and, in the case of the Cordis business, to stand-up the systems and processes needed to support its global footprint. We record changes in the fair value of contingent consideration obligations relating to acquisitions as income or expense in amortization and other acquisition-related costs. See Note 4 for additional information regarding amortization of acquisition-related intangible assets and Note 10 for additional information regarding contingent consideration.

Translation of Foreign Currencies

Financial statements of our subsidiaries outside the United States are generally measured using the local currency as the functional currency. Adjustments to translate the assets and liabilities of these foreign subsidiaries into U.S. dollars are accumulated in shareholders' equity through AOCI utilizing period-end exchange rates. Revenues and expenses of these foreign subsidiaries are translated using average exchange rates during the year.

The foreign currency translation gains/(losses) included in AOCI at June 30, 2016 and 2015 are presented in Note 13 . Foreign currency transaction gains and losses for the period are included in the

consolidated statements of earnings in their respective financial statement line item.

Interest Rate, Currency and Commodity Risk

All derivative instruments are recognized at fair value on the consolidated balance sheets and all changes in fair value are recognized in net earnings or shareholders' equity through AOCI, net of tax.

For contracts that qualify for hedge accounting treatment, the hedge contracts must be effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the contract. Hedge effectiveness is assessed periodically. Any contract not designated as a hedge, or so designated but ineffective, is adjusted to fair value and recognized immediately in net earnings. If a fair value or cash flow hedge ceases to qualify for hedge accounting treatment, the contract continues to be carried on the balance sheet at fair value until settled and future adjustments to the contract's fair value are recognized immediately in net earnings. If a forecasted transaction is probable not to occur, amounts previously deferred in AOCI are recognized immediately in net earnings. See Note 11 for additional information regarding our derivative instruments, including the accounting treatment for instruments designated as fair value, cash flow and economic hedges.

Fair Value Measurements

Fair value is defined as the price that would be received upon selling an asset or the price paid to transfer a liability on the measurement date. It focuses on the exit price in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants. A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair values are:

Level 1 - Observable prices in active markets for identical assets and liabilities.

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities.

See Note 10 for additional information regarding fair value measurements.

Recent Financial Accounting Standards

In June 2016, the Financial Accounting Standards Board ("FASB") issued amended accounting guidance that will require entities to measure credit losses on trade and other receivables, held-to-maturity debt securities, loans and other instruments using an "expected credit loss" model that considers historical experience, current conditions and reasonable supportable forecasts. This guidance also requires that credit losses on available-for-sale debt securities with unrealized losses be recognized as allowances rather than as deductions in the amortized cost of the securities. This guidance will be effective for us in the first quarter of fiscal 2021. We are currently evaluating the impact of adoption on our consolidated financial statements.

In March 2016, the FASB issued amended accounting guidance that will change the accounting for certain aspects of share-based compensation to employees. The guidance requires all income tax effects of share-based awards to be recognized in the statement of earnings as awards vest or are settled. Additionally, the guidance increases the amount employers can withhold in shares to cover employee income taxes without requiring liability classification and allows a policy election for accounting for forfeitures. This guidance will be effective for us in the first quarter of fiscal 2018, with early adoption permitted. We are currently evaluating the impact of the adoption on our consolidated financial statements and the timing of adoption.

In February 2016, the FASB issued amended accounting guidance that requires lessees to recognize most leases on the balance sheet as a lease liability and corresponding right-of-use asset. This guidance will be effective for us in the first quarter of fiscal 2020, with early adoption permitted. We are currently evaluating the impact of the adoption on our consolidated financial statements.

In January 2016, the FASB issued amended accounting guidance intended to improve the recognition and measurement of financial instruments. The amended guidance primarily changes the accounting for equity investments, financial liabilities under the fair value option, the method for assessing the realizability of deferred tax assets related to available-for-sale securities, and the presentation and disclosure requirements for financial instruments. This classification and measurement guidance will be effective for us in the first quarter of fiscal 2019, with early adoption permitted. We are currently evaluating the impact of the adoption on our consolidated financial statements.

In November 2015, the FASB issued amended accounting guidance that simplifies the accounting for income taxes. Under this amended guidance, deferred tax assets and liabilities must be classified as noncurrent on the balance sheet instead of separating deferred tax items into current and noncurrent amounts. We adopted this guidance on a prospective basis in the second quarter of fiscal 2016. In accordance with the adoption of this guidance, balances were not retrospectively adjusted. Upon adoption of this guidance, current deferred tax assets of $20 million and current deferred tax liabilities of $1.1 billion in our December 31, 2015 condensed consolidated balance sheet were reclassified as noncurrent. The adoption of this guidance had no impact on our consolidated statements of earnings, comprehensive income or cash flows.

In September 2015, the FASB issued amended accounting guidance that eliminates the requirement that an acquirer in a business combination account for measurement-period adjustments on a retrospective basis. Under this amended guidance, the acquirer will recognize a measurement-period adjustment during the period in which it determines the amount of the adjustment. We adopted this guidance in the second quarter of fiscal 2016. The adoption of this guidance did not materially impact our consolidated financial statements.

In July 2015, the FASB issued amended accounting guidance that simplifies the current guidance surrounding the measurement of inventory. Under this amended guidance, inventory is measured at the lower of cost and net realizable value, which eliminates the need to determine replacement cost and evaluate whether the inventory is above or below net realizable value. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amended guidance does not apply to inventory measured under the LIFO method. This amendment will be effective for us in the first quarter of fiscal 2018. We are currently evaluating the impact of adoption on our financial position and results of operations.

In April 2015, the FASB issued amended accounting guidance that clarifies the circumstances under which a cloud computing customer would account for the arrangement as a license of internal-use software. If it is determined that a software license does not exist in the arrangement, the customer would account for this arrangement as a service contract. This amendment will be effective for us in the first quarter of fiscal 2017. We do not expect the adoption to have a material impact on our financial position or results of operations.

Also in April 2015, the FASB issued amended accounting guidance related to the presentation of debt issuance costs in the financial statements. This guidance requires an entity to present such costs in the balance sheet as a direct deduction from the related debt rather than as an asset. This amendment will be effective for us in the first quarter of fiscal 2017. Adoption of the guidance would reclassify debt issuance costs from other assets to long-term obligations, less current portion within the consolidated balance sheet. We do not expect the adoption to have a material impact on our financial position or results of operations.

In August 2014, the FASB issued amended accounting guidance related to uncertainties about an entity's ability to continue as a going concern. This guidance requires management to evaluate whether there is substantial doubt about a company's ability to continue as a going concern. This amendment will be effective for us in the fourth quarter of fiscal 2017, with early adoption permitted. We do not expect the adoption of this guidance to impact our financial statement disclosures.

In May 2014, the FASB issued amended accounting guidance related to revenue recognition. This guidance is based on the principle that revenue is recognized in an amount that reflects the consideration to which an entity expects to be entitled in exchange for the transfer of goods or services to customers. The guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. In July 2015, the FASB deferred the effective date for one year beyond the originally specified effective date. This amendment will be effective for us in the first quarter of fiscal 2019. We are in the process of assessing any differences between the amended and existing guidance that could impact our consolidated financial statements and continuing to evaluate the options for adoption.

In April 2014, the FASB issued amended accounting guidance related to the reporting of discontinued operations and disclosures of disposals of components of an entity. The amended guidance changes the thresholds for disposals to qualify as discontinued operations and requires additional disclosures. We adopted this guidance in the first quarter of fiscal 2016. The adoption of this guidance did not impact our consolidated financial statements.

2. Acquisitions

During fiscal 2016 , we completed several acquisitions, the most significant of which are described in more detail below. The pro forma results of operations and the results of operations for acquired businesses since the acquisition dates have not been separately disclosed because the effects were not significant compared to the consolidated financial statements, individually or in the aggregate.

Cordis

On October 2, 2015 , we acquired Cordis from Ethicon, Inc., a wholly-owned subsidiary of Johnson & Johnson, for $1.9 billion using cash on hand and proceeds from our debt offering in June 2015 . The acquisition of Cordis, a global manufacturer and distributor of interventional cardiology devices and endovascular solutions with operations in more than 50 countries, expands our Medical segment's portfolio of self-manufactured products and its geographic scope. We closed the Cordis acquisition in 20 principal countries on October 2, 2015 , and acquired control of, as described in GAAP, and the rights to, the net economic benefit from the entire Cordis business in the remaining countries at that time. We are in the process of transitioning legal ownership in the remaining non-principal countries, which we expect to complete by the end of calendar 2017. The results for the entire Cordis business in all countries are included in the consolidated financial statements beginning October 2, 2015 .

Transaction and integration costs associated with the acquisition of Cordis were $78 million and $44 million during fiscal 2016 and 2015 , respectively, and are included in amortization and other acquisition-related costs in the consolidated statements of earnings.

naviHealth

On August 26, 2015 , we acquired a 71 percent ownership interest in naviHealth for $238 million , net of cash acquired of $53 million . We funded the acquisition with cash on hand. The acquisition of naviHealth, a leader in post-acute care management solutions, expands our ability to serve hospitals, other healthcare providers, and payers. We consolidate the results of naviHealth in our consolidated financial statements and report its consolidated results in our Medical segment. The terms of the agreement provide us with the option to acquire any remaining noncontrolling interests at any time after the two-year anniversary of the closing. The third-party noncontrolling interest holders also hold an option, which allows them to sell their noncontrolling interests to us at any time after the two-year anniversary of the closing, or earlier if a trigger event occurs. Refer to Note 12 for further information on the redeemable noncontrolling interests. We also completed acquisitions within naviHealth during fiscal 2016 for $242 million , which were paid in cash.

Harvard Drug

On July 2, 2015 , we completed the acquisition of The Harvard Drug Group ("Harvard Drug") for $1.1 billion using cash on hand and proceeds from our debt offering in June 2015 . The acquisition of Harvard Drug, a distributor of generic pharmaceuticals, over-the-counter healthcare and related products to retail, institutional, and alternate care customers, enhances our Pharmaceutical segment's generic pharmaceutical distribution and related services businesses. Harvard Drug also repackages generic pharmaceuticals and over-the-counter healthcare products.

Fair Value of Assets Acquired and Liabilities Assumed

The allocation of the purchase price for the acquisitions of Cordis, naviHealth and Harvard Drug are not yet finalized and are subject to adjustment as we complete the valuation analysis for these acquisitions. The purchase prices were subject to adjustment based on working capital requirements as set forth in the acquisition agreements.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed as of the acquisition dates for Cordis, naviHealth and Harvard Drug:

(in millions)	Cordis	naviHealth	Harvard Drug
Identifiable intangible assets:			
Customer relationships (1)	$ 225	$ 38	$ 470
Trade names (2)	125	16	130
Developed technology (3)	395	61	—
In-process research and development (4)	55	—	—
Total identifiable intangible assets acquired	800	115	600
Cash and equivalents	—	53	44
Trade receivables	—	38	67
Inventories	207	—	49
Prepaid expenses and other	4	14	11
Property and equipment	97	5	16
Other assets	20	1	—
Accounts payable	(93)	(2)	(47)
Other accrued liabilities	(16)	(95)	(37)
Deferred income taxes and other liabilities	(7)	(48)	(188)
Redeemable noncontrolling interests	—	(119)	—
Total identifiable net assets/(liabilities) acquired	1,012	(38)	515
Goodwill	861	329	634
Total net assets acquired	**$ 1,873**	**$ 291**	**$ 1,149**

(1) The weighted-average useful lives of customer relationships range from 4 to 13 years.

(2) The weighted-average useful lives of trade names range from 10 to 17 years.

(3) The weighted-average useful life of developed technology is 10 years.

(4) Acquired in-process research and development intangible assets have an indefinite life.

3. Restructuring and Employee Severance

The following tables summarize restructuring and employee severance costs:

(in millions)	2016	2015	2014
Employee-related costs (1)	**$ 15**	$ 34	$ 13
Facility exit and other costs (2)	**10**	10	18
Total restructuring and employee severance	**$ 25**	$ 44	$ 31

(1) Employee-related costs primarily consist of termination benefits provided to employees who have been involuntarily terminated and duplicate payroll costs during transition periods.

(2) Facility exit and other costs primarily consist of lease termination costs, accelerated depreciation, equipment relocation costs, project consulting fees and costs associated with restructuring our delivery of information technology infrastructure services.

The following table summarizes activity related to liabilities associated with restructuring and employee severance:

(in millions)	Employee-Related Costs	Facility Exit and Other Costs	Total
Balance at June 30, 2013	$ 55	$ 2	**$ 57**
Additions	23	1	**24**
Payments and other adjustments	(54)	(3)	**(57)**
Balance at June 30, 2014	$ 24	$ —	**$ 24**
Additions	34	1	**35**
Payments and other adjustments	(36)	(1)	**(37)**
Balance at June 30, 2015	$ 22	$ —	**$ 22**
Additions	17	2	**19**
Payments and other adjustments	(24)	(1)	**(25)**
Balance at June 30, 2016	**$ 15**	**$ 1**	**$ 16**

4. Goodwill and Other Intangible Assets

Goodwill

The following table summarizes the changes in the carrying amount of goodwill by segment and in total:

(in millions)	Pharmaceutical (1)	Medical	Total
Balance at June 30, 2014	$ 2,158	$ 2,720	**$ 4,878**
Goodwill acquired, net of purchase price adjustments	41	179	**220**
Foreign currency translation adjustments and other	—	(28)	**(28)**
Balance at June 30, 2015	$ 2,199	$ 2,871	**$ 5,070**
Goodwill acquired, net of purchase price adjustments	738	1,382	**2,120**
Foreign currency translation adjustments and other	(18)	(5)	**(23)**
Balance at June 30, 2016	**$ 2,919**	**$ 4,248**	**$ 7,167**

(1) At June 30, 2016 the accumulated goodwill impairment loss was $829 million .

The increase in the Pharmaceutical segment goodwill during fiscal 2016 is primarily due to the Harvard Drug acquisition. Goodwill recognized in connection with this acquisition primarily represents the expected benefits from synergies of integrating this business, the

existing workforce of the acquired entity and the expected growth from new customers. The goodwill acquired in connection with the Harvard Drug acquisition is not deductible for tax purposes.

The increase in the Medical segment goodwill during fiscal 2016 is primarily due to the Cordis and naviHealth acquisitions. Goodwill recognized in connection with the Cordis acquisition primarily represents the expected benefits from synergies of integrating the business, the existing workforce of the acquired entity, the expected growth from new customers and the expected growth from improvements to existing technology. The majority of the goodwill acquired in connection with the acquisition of Cordis is deductible for tax purposes. Goodwill recognized in connection with the naviHealth acquisition primarily represents the existing workforce of the acquired entity, expected growth from new customers, new service offerings and the expected growth from improvements to existing technology. The goodwill acquired in connection with the naviHealth acquisition is not deductible for tax purposes.

See Note 2 for further discussion of these acquisitions.

Other Intangible Assets

The following tables summarize other intangible assets by class at June 30:

	2016			
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible	Weighted-Average Remaining Amortization Period (Years)
Indefinite-life intangibles:				
IPR&D, trademarks and other	$ 72	$ —	$ 72	N/A
Total indefinite-life intangibles	72	—	72	N/A
Definite-life intangibles:				
Customer relationships	1,946	737	1,209	9
Trademarks, trade names, and patents	508	140	368	13
Developed technology and other	808	198	610	8
Total definite-life intangibles	3,262	1,075	2,187	10
Total other intangible assets	$ 3,334	$ 1,075	$ 2,259	N/A

	2015		
(in millions)	Gross Intangible	Accumulated Amortization	Net Intangible
Indefinite-life intangibles:			
Trademarks and other	$ 14	$ —	$ 14
Total indefinite-life intangibles	14	—	14
Definite-life intangibles:			
Customer relationships	1,103	501	602
Trademarks, trade names, and patents	237	91	146
Developed technology and other	320	134	186
Total definite-life intangibles	1,660	726	934
Total other intangible assets	$ 1,674	$ 726	$ 948

Total amortization of intangible assets was $355 million , $191 million and $188 million for fiscal 2016 , 2015 and 2014 , respectively. Estimated annual amortization of intangible assets for fiscal 2017 through 2021 is as follows: $376 million , $345 million , $276 million , $250 million and $203 million .

5. Available-for-Sale Securities

We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. We held the following investments in marketable securities at fair value at June 30:

(in millions)	2016	2015
Current available-for-sale securities:		
Commercial paper	$ —	$ 4
Treasury bills	3	12
International bonds	2	2
Corporate bonds	58	34
U.S. agency bonds	6	5
Asset-backed securities	28	8
International equity securities	2	—
U.S. agency mortgage-backed securities	14	26
Total current available-for-sale securities	113	91
Long-term available-for-sale securities:		
Treasury bills	10	—
International bonds	1	—
Corporate bonds	36	33
U.S. agency bonds	9	18
Asset-backed securities	17	41
U.S. agency mortgage-backed securities	14	10
Total long-term available-for-sale securities	87	102
Total available-for-sale securities	$ 200	$ 193

Gross unrealized gains and losses were immaterial at both June 30, 2016 and 2015 . During fiscal 2016 , 2015 and 2014 gross realized gains and losses were immaterial and we did not recognize any other-than-temporary impairments. At June 30, 2016 , the weighted-average effective maturity of our current and long-term investments was approximately 6 months and 15 months , respectively.

6. Long-Term Obligations and Other Short-Term Borrowings

The following table summarizes long-term obligations and other short-term borrowings at June 30:

(in millions)	2016	2015
1.7% Notes due 2018	$ 405	$ 404
1.9% Notes due 2017	251	251
1.95% Notes due 2018	554	550
2.4% Notes due 2019	461	450
3.2% Notes due 2022	253	249
3.2% Notes due 2023	549	549
3.5% Notes due 2024	398	398
3.75% Notes due 2025	505	500
4.5% Notes due 2044	345	345
4.6% Notes due 2043	349	349
4.625% Notes due 2020	528	524
4.9% Notes due 2045	450	450
7.0% Debentures due 2026	124	124
7.8% Debentures due 2016	37	37
Other obligations	330	312
Total	$ 5,539	$ 5,492
Less: current portion of long-term obligations and other short-term borrowings	587	281
Long-term obligations, less current portion	$ 4,952	$ 5,211

Maturities of existing long-term obligations and other short-term borrowings for fiscal 2017 through 2021 and thereafter are as follows: $587 million , $982 million , $3 million , $463 million , $529 million and $2,975 million .

Long-Term Debt

The 1.7% , 1.9% , 1.95% , 2.4% , 3.2% , 3.2% , 3.5% , 3.75% , 4.5% , 4.6% , 4.625% and 4.9% Notes represent unsecured obligations of Cardinal Health, Inc. and rank equally in right of payment with all of our existing and future unsecured and unsubordinated indebtedness. The 7.0% and 7.8% Debentures represent unsecured obligations of Allegiance Corporation (a wholly-owned subsidiary), which Cardinal Health, Inc. has guaranteed. None of these obligations are subject to a sinking fund and the Allegiance obligations are not redeemable prior to maturity. Interest is paid pursuant to the terms of the obligations. These notes are effectively subordinated to the liabilities of our subsidiaries, including trade payables of $17 billion .

In June 2015, we sold $550 million aggregate principal amount of 1.95% Notes that mature on June 15, 2018, $500 million aggregate principal amount of 3.75% Notes that mature on September 15, 2025, and $450 million aggregate principal amount of 4.9% Notes that mature on September 15, 2045. We used the net proceeds from the offering to pay part of the purchase price to acquire Harvard Drug on July 2, 2015 and Cordis on October 2, 2015 , as discussed further in Note 2 .

In November 2014, we sold $450 million aggregate principal amount of 2.4% Notes that mature on November 15, 2019, $400 million aggregate principal amount of 3.5% Notes that mature on November 15, 2024 and $350 million aggregate principal amount of 4.5% Notes that mature on November 15, 2044.

In December 2014, we used the net proceeds from the November 2014 offering, together with cash on hand, to redeem all of the outstanding 4.0% Notes due 2015, 5.8% Notes due 2016, 5.85% Notes due 2017 and 6.0% Notes due 2017 at a redemption price equal to 100% of the principal amount and any accrued but unpaid interest, plus the applicable make-whole premium. As a result of the redemption, we incurred a loss on the extinguishment of debt of $60 million ($37 million , net of tax), which included a make-whole premium of $80 million , write-off of $2 million of unamortized debt issuance costs, and an offsetting $22 million fair value adjustment to the respective debt related to previously terminated interest rate swaps.

The 1.7% Notes due 2018, 1.9% Notes due 2017, 1.95% Notes due 2018, 2.4% Notes due 2019, 3.2% Notes due 2022, 3.2% Notes due 2023, 3.5% Notes due 2024, 3.75% Notes due 2025, 4.5% Notes due 2044, 4.6% Notes due 2043, 4.625% Notes due 2020 and 4.9% Notes due 2045 require us to offer to purchase the notes at 101% of the principal amount plus accrued and unpaid interest if we undergo a change of control, as defined in the notes, and if the notes receive specified ratings below investment grade by each of Standard & Poors Ratings Services, Moodys Investors Service, Inc. and Fitch Ratings.

Other Financing Arrangements

In addition to cash and cash equivalents, our sources of liquidity include a revolving credit facility, which we increased from $1.5 billion at June 30, 2015 to $1.75 billion at June 30, 2016 and a commercial paper program of up to $1.5 billion , backed by the revolving credit facility. The revolving credit facility exists largely to support issuances of commercial paper as well as other short-term borrowings for general corporate purposes. We had no outstanding balance under the revolving credit facility at June 30, 2016 and 2015 , respectively. Availability on the revolving credit facility was reduced by outstanding letters of credit of $14 million and zero at June 30, 2016 and 2015 , respectively. We had no outstanding borrowings from the commercial paper program at June 30, 2016 and 2015 , respectively.

On November 3, 2014, we renewed our committed receivables sales facility program through Cardinal Health Funding, LLC ("CHF") until November 3, 2017 and increased the size of the facility from $700 million to $950 million . During fiscal 2016 , we reduced the size of the committed receivables sales facility program from $950 million to $700 million in connection with the increase of credit under the revolving credit facility as noted above. CHF was organized for the sole purpose of buying receivables and selling undivided interests in those receivables to third-party purchasers. Although consolidated with Cardinal Health, Inc. in accordance with GAAP, CHF is a separate legal entity from Cardinal Health, Inc. and from our subsidiary that sells receivables to CHF. CHF is designed to be a special purpose, bankruptcy-remote entity whose assets are available solely to satisfy the claims of its creditors. We had no outstanding balance under the committed receivable sales facility program at June 30, 2016 and 2015 . Availability on the committed

receivable sales facility program was reduced by outstanding letters of credit of $40 million and $41 million on June 30, 2016 and 2015 , respectively.

Our revolving credit facility and committed receivables sales facility program require us to maintain a consolidated leverage ratio of no more than 3.25 -to-1 and our committed receivables sales facility also requires us to maintain a consolidated interest coverage ratio, as of the end of any calendar quarter, of at least 4 -to-1. As of June 30, 2016 , we were in compliance with these financial covenants.

We also maintain other short-term credit facilities and an unsecured line of credit that allowed for borrowings up to $699 million and $439 million at June 30, 2016 and 2015 , respectively. The $330 million and $312 million balance of other obligations at June 30, 2016 and 2015, respectively, consisted of short-term borrowings and capital leases.

7. Income Taxes

The following table summarizes earnings from continuing operations before income taxes:

(in millions)	2016	2015	2014
U.S. Operations	$ 2,050	$ 1,733	$ 1,665
Non-U.S. Operations	226	234	133
Earnings from continuing operations before income taxes	$ 2,276	$ 1,967	$ 1,798

The following table summarizes the components of provision for income taxes from continuing operations:

(in millions)	2016	2015	2014
Current:			
Federal	$ 611	$ 424	$ 521
State and local	74	83	51
Non-U.S.	73	29	37
Total current	$ 758	$ 536	$ 609
Deferred:			
Federal	$ 96	$ 196	$ 24
State and local	12	24	3
Non-U.S.	(21)	(1)	(1)
Total deferred	87	219	26
Provision for income taxes	$ 845	$ 755	$ 635

The following table presents a reconciliation of the provision based on the federal statutory income tax rate to our effective income tax rate from continuing operations:

	2016	2015	2014
Provision at Federal statutory rate	35.0 %	35.0 %	35.0 %
State and local income taxes, net of federal benefit	1.5	4.1	2.2
Foreign tax rate differential	(0.6)	(2.4)	(1.2)
Nondeductible/nontaxable items	1.0	0.7	(0.2)
Other	0.2	1.0	(0.5)
Effective income tax rate	37.1 %	38.4 %	35.3 %

The fiscal 2016 effective tax rate was impacted by net favorable discrete items of $29 million , which decreased the rate by 1.3 percentage points. There were no individually significant discrete items.

The fiscal 2015 effective tax rate was impacted by net unfavorable discrete items of $15 million , which increased the rate by 0.8 percentage points. There were no individually significant discrete items.

The fiscal 2014 effective tax rate was impacted by net favorable discrete items of $37 million , which reduced the rate by 2.1 percentage points. The discrete items include the favorable impact of the settlement of federal and state tax controversies ($80 million) and release of valuation allowances ($12 million) and the unfavorable impact of remeasurement of unrecognized tax benefits ($65 million), primarily as a result of proposed assessments of additional tax.

At June 30, 2016 , we had $2.1 billion of undistributed earnings from non-U.S. subsidiaries that are intended to be permanently reinvested in non-U.S. operations. Because these earnings are considered permanently reinvested, no U.S. tax provision has been accrued related to the repatriation of these earnings. It is not practicable to estimate the amount of U.S. tax that might be payable on the eventual remittance of such earnings.

Deferred income taxes arise from temporary differences between financial reporting and tax reporting bases of assets and liabilities and operating loss and tax credit carryforwards for tax purposes. The following table presents the components of the deferred income tax assets and liabilities at June 30:

(in millions)	2016	2015
Deferred income tax assets:		
Receivable basis difference	$ 44	$ 47
Accrued liabilities	133	138
Share-based compensation	56	53
Loss and tax credit carryforwards	193	197
Deferred tax assets related to uncertain tax positions	95	100
Other	46	50
Total deferred income tax assets	567	585
Valuation allowance for deferred income tax assets	(93)	(87)
Net deferred income tax assets	$ 474	$ 498
Deferred income tax liabilities:		
Inventory basis differences	$ (1,351)	$ (1,344)
Property-related	(172)	(155)
Goodwill and other intangibles	(607)	(352)
Other	—	(2)
Total deferred income tax liabilities	$ (2,130)	$ (1,853)
Net deferred income tax liability	$ (1,656)	$ (1,355)

Deferred income tax assets and liabilities in the preceding table, after netting by taxing jurisdiction, are in the following captions in the consolidated balance sheets at June 30:

(in millions)	2016 (5)	2015
Current deferred income tax asset (1)	$ —	$ 22
Noncurrent deferred income tax asset (2)	42	17
Current deferred income tax liability (3)	—	(1,066)
Noncurrent deferred income tax liability (4)	(1,698)	(328)
Net deferred income tax liability	**$ (1,656)**	$ (1,355)

(1) Included in prepaid expenses and other in the consolidated balance sheets.

(2) Included in other assets in the consolidated balance sheets.

(3) Included in other accrued liabilities in the consolidated balance sheets.

(4) Included in deferred income taxes and other liabilities in the consolidated balance sheets.

(5) In the second quarter of fiscal 2016, we adopted amended accounting guidance that deferred tax assets and liabilities should be classified as noncurrent on the consolidated balance sheet. See Note 1 for further discussion.

At June 30, 2016 we had gross federal, state and international loss and credit carryforwards of $199 million , $1.2 billion and $94 million , respectively, the tax effect of which is an aggregate deferred tax asset of $193 million . Substantially all of these carryforwards are available for at least three years. Approximately $92 million of the valuation allowance at June 30, 2016 applies to certain federal, state and international loss carryforwards that, in our opinion, are more likely than not to expire unutilized. However, to the extent that tax benefits related to these carryforwards are realized in the future, the reduction in the valuation allowance would reduce income tax expense.

We had $527 million , $542 million and $510 million of unrecognized tax benefits at June 30, 2016 , 2015 and 2014 , respectively. The June 30, 2016 , 2015 and 2014 balances include $355 million , $357 million and $322 million , respectively, of unrecognized tax benefits that, if recognized, would have an impact on the effective tax rate. The remaining unrecognized tax benefits relate to tax positions for which ultimate deductibility is highly certain but for which there is uncertainty as to the timing of such deductibility. Recognition of these tax benefits would not affect our effective tax rate. We include the full amount of unrecognized tax benefits in deferred income taxes and other liabilities in the consolidated balance sheets. The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

(in millions)	2016	2015	2014
Balance at beginning of fiscal year	$ 542	$ 510	$ 650
Additions for tax positions of the current year	22	15	16
Additions for tax positions of prior years	42	69	94
Reductions for tax positions of prior years	(48)	(42)	(40)
Settlements with tax authorities	(30)	(10)	(210)
Expiration of the statute of limitations	(1)	—	—
Balance at end of fiscal year	**$ 527**	$ 542	$ 510

It is reasonably possible that there could be a change in the amount of unrecognized tax benefits within the next 12 months due to activities of the U.S. Internal Revenue Service or other taxing authorities, possible settlement of audit issues, reassessment of existing unrecognized tax benefits or the expiration of statutes of limitations. We estimate that the range of the possible change in unrecognized tax benefits within the next 12 months is a net decrease of zero to $155 million , exclusive of penalties and interest.

We recognize accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes. At June 30, 2016 , 2015 and 2014 , we had $145 million , $169 million and $143 million , respectively, accrued for the payment of interest and penalties. These balances are gross amounts before any tax benefits and are included in deferred income taxes and other liabilities in the consolidated balance sheets. During fiscal 2016 and 2014 , we recognized $9 million and $46 million of benefit for interest and penalties in income tax expense, respectively. During fiscal 2015 , we recognized $24 million of expense for interest and penalties in income tax expense.

We file income tax returns in the U.S. federal jurisdiction, various U.S. state and local jurisdictions, and various foreign jurisdictions. With few exceptions, we are subject to audit by taxing authorities for fiscal years 2006 through the current fiscal year.

During fiscal 2014 , the IRS closed audits of fiscal years 2003 through 2005. The IRS is currently conducting audits of fiscal years 2006 through 2014 , and our transfer pricing arrangements continue to be under consideration as part of these audits. While the IRS has made and could make proposed adjustments to our transfer pricing arrangements, or other matters, we are defending our reported tax positions, and have accounted for the unrecognized tax benefits associated with our tax positions.

We are a party to a tax matters agreement with CareFusion Corporation ("CareFusion"), which has been acquired by Becton, Dickinson and Company. Under the tax matters agreement, CareFusion is obligated to indemnify us for certain tax exposures and transaction taxes prior to our fiscal 2010 spin-off of CareFusion. The indemnification receivable was $172 million and $219 million at June 30, 2016 and 2015 , respectively, and is included in other assets in the consolidated balance sheets.

8. Commitments, Contingent Liabilities and Litigation

Commitments

Operating Leases

The future minimum rental payments for operating leases having initial or remaining non-cancelable lease terms in excess of one year at June 30, 2016 for fiscal 2017 through 2021 and thereafter are as follows: $119 million , $100 million , $81 million , $67 million , $50 million and $127 million . Rental expense relating to operating leases was $126 million , $104 million and $107 million in fiscal 2016 , 2015 and 2014 , respectively. Sublease rental income was immaterial for all periods presented.

Generic Sourcing Venture With CVS Health Corporation

In July 2014 , we established Red Oak Sourcing, LLC ("Red Oak Sourcing"), a U.S.-based generic pharmaceutical sourcing venture with CVS Health with an initial term of 10 years . Red Oak Sourcing

negotiates generic pharmaceutical supply contracts on behalf of both companies. We are required to pay 39 quarterly payments of $25.6 million to CVS Health which commenced in October 2014 . Due to the achievement of predetermined milestones, the quarterly payment to CVS Health increased by $10 million beginning in fiscal 2016 and by an additional $10 million beginning in the first quarter of fiscal 2017, resulting in a maximum quarterly payment of $45.6 million .

Legal Proceedings

We become involved from time to time in disputes, litigation, and regulatory matters.

We may be named from time to time in *qui tam* actions, which are initiated by private third parties purporting to act on behalf of federal or state governments and which allege that false claims have been submitted or have been caused to be submitted for payment by the government. After a private party has filed a *qui tam* action, the government must investigate the private party's claim and determine whether to intervene in and take control over the litigation. These actions may remain under seal while the government makes this determination. If the government declines to intervene, the private party may nonetheless continue to pursue the litigation on his or her own on behalf of the government.

From time to time, we receive subpoenas or requests for information from various government agencies relating to our business or to the business of a customer, supplier, or other industry participant. Most of these matters are resolved without incident; however, such subpoenas or requests can lead to the assertion of claims or the commencement of legal proceedings against us.

From time to time, we may determine that products we manufacture or market do not meet our specifications, regulatory requirements, or published standards. When we or a regulatory agency identify a quality or regulatory issue, we investigate and take appropriate corrective action. Such actions can lead to product recalls, costs to repair or replace affected products, temporary interruptions in product sales, action by regulators, and product liability claims and lawsuits, including class actions.

We accrue for contingencies related to disputes, litigation, and regulatory matters if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because these matters are inherently unpredictable and unfavorable developments or resolutions can occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review contingencies to determine whether our accruals and related disclosures are adequate. The amount of ultimate loss may differ from these estimates.

With respect to the matters described below, we are unable to estimate a range of reasonably possible loss for matters for which there is no accrual, or additional loss for matters for which we have recorded an accrual, since damages or fines have not been specified or the proceedings are at stages where significant uncertainty exists as to legal or factual issues and as to whether such matters will proceed to trial. We do not believe, based on currently available information, that the outcomes of these matters will have a material adverse effect on our financial position, results of operations, or cash flows. However, the outcome of one or more of these matters could be material to our results of operations for a particular quarterly period.

We recognize income from the favorable outcome of litigation when we receive the associated cash or assets.

We recognize estimated loss contingencies for litigation and regulatory matters and income from favorable resolution of litigation in litigation (recoveries)/charges, net in our consolidated statements of earnings.

DEA Investigation and Related Matters

In February 2012, the U.S. Drug Enforcement Administration (the "DEA") issued an order to show cause and immediate suspension of our Lakeland, Florida distribution center's registration to distribute controlled substances, asserting that we failed to maintain required controls against the diversion of controlled substances. In May 2012, we entered into a settlement agreement with the DEA that resolved the administrative aspects of the DEA's action but did not resolve potential liability for civil fines in Florida or elsewhere for the conduct covered by the settlement agreement. In that regard, we are continuing to discuss a settlement with the U.S. Department of Justice. We incurred litigation charges of $3 million and $41 million for this matter during fiscal 2016 and 2015 , respectively. Our total accrual for this matter at June 30, 2016 and 2015 was $44 million and $41 million , respectively, which is included in other accrued liabilities in the consolidated balance sheets.

State of West Virginia vs. Cardinal Health, Inc.

Since June 2012, the West Virginia Attorney General has filed complaints against a number of pharmaceutical wholesale distributors, including us. The complaints, which were filed in the Circuit Court of Boone County, West Virginia, allege, among other things, that the distributors failed to maintain effective controls to guard against diversion of controlled substances in West Virginia, failed to report suspicious orders of controlled substances in accordance with the West Virginia Uniform Controlled Substances Act, and were negligent in distributing controlled substances to pharmacies that serve individuals who abuse controlled substances. The complaints seek, among other things, injunctive and other equitable relief and monetary damages. We are vigorously defending ourselves in this matter.

Product Liability Lawsuits

We and our Cordis business have been named as defendants in product liability lawsuits, including at August 9, 2016, 18 lawsuits involving claims by approximately 180 plaintiffs that allege personal injuries associated with the use of Cordis OptEase and TrapEase inferior vena cava (IVC) filter products. These lawsuits seek a variety of remedies, including unspecified monetary damages. We are vigorously defending ourselves in these matters.

Antitrust Litigation Proceeds

We received and recognized income resulting from settlements of class action antitrust lawsuits, in which we were a class member, of $80 million , $71 million and $24 million during fiscal 2016 , 2015 and 2014 , respectively.

9. Guarantees

In the ordinary course of business, we agree to indemnify certain other parties under acquisition and disposition agreements, customer agreements, intellectual property licensing agreements, and other agreements. Such indemnification obligations vary in scope and, when defined, in duration. In many cases, a maximum obligation is not explicitly stated, and therefore the overall maximum amount of the liability under such indemnification obligations cannot be reasonably estimated. Where appropriate, such indemnification obligations are recorded as a liability. Historically, we have not, individually or in the aggregate, made payments under these indemnification obligations in any material amounts. In certain circumstances, we believe that existing insurance arrangements, subject to the general deduction and exclusion provisions, would cover portions of the liability that may arise from these indemnification obligations. In addition, we believe that the likelihood of a material liability being triggered under these indemnification obligations is not probable.

From time to time we enter into agreements that obligate us to make fixed payments upon the occurrence of certain events. Such obligations primarily relate to obligations arising under acquisition transactions, where we have agreed to make payments based upon the achievement of certain financial performance measures by the acquired business. Generally, the obligation is capped at an explicit amount. See Note 10 for detail regarding contingent consideration obligations.

10. Fair Value Measurements

The following tables present the fair values for assets and (liabilities) measured on a recurring basis at June 30:

	2016			
(in millions)	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets:				
Cash equivalents	**$ 516**	**$ —**	**$ —**	**$ 516**
Forward contracts (1)	**—**	**19**	**—**	**19**
Available-for-sale securities (2)	**—**	**200**	**—**	**200**
Other investments (3)	**103**	**—**	**—**	**103**
Liabilities:				
Contingent Consideration (4)	**—**	**—**	**(19)**	**(19)**

	2015			
(in millions)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents	$ 1,809	$ —	$ —	$ 1,809
Forward contracts (1)	—	5	—	5
Available-for-sale securities (2)	—	193	—	193
Other investments (3)	111	—	—	111
Liabilities:				
Contingent Consideration (4)	—	—	(53)	(53)

(1) The fair value of interest rate swaps, foreign currency contracts and commodity contracts is determined based on the present value of expected future cash flows considering the risks involved, including non-performance risk, and using discount rates appropriate for the respective maturities. Observable Level 2 inputs are used to determine the present value of expected future cash flows. The fair value of these derivative contracts, which are subject to master netting arrangements under certain circumstances, is presented on a gross basis in the consolidated balance sheets.

(2) We invest in marketable securities, which are classified as available-for-sale and are carried at fair value in the consolidated balance sheets. Observable Level 2 inputs such as quoted prices for similar securities, interest rate spreads, yield curves and credit risk are used to determine the fair value. See Note 5 for additional information regarding available-for-sale securities.

(3) The other investments balance includes investments in mutual funds, which are used to offset fluctuations in deferred compensation liabilities. These mutual funds primarily invest in the equity securities of companies with large market capitalization and high quality fixed income debt securities. The fair value of these investments is determined using quoted market prices.

(4) Contingent consideration represents the obligations incurred in connection with acquisitions. We do not deem the fair value of the contingent consideration obligations under any single acquisition to be significant. The estimate of fair value of the contingent consideration obligations requires subjective assumptions to be made regarding future business results, discount rates, discount periods, and probabilities assigned to various potential business result scenarios and was determined using probability assessments with respect to the likelihood of reaching various targets or of achieving certain milestones. The fair value measurement is based on significant inputs unobservable in the market and thus represents a Level 3 measurement. Changes in current expectations of progress could change the probability of achieving the targets within the measurement periods and result in an increase or decrease in the fair value of the contingent consideration obligation.

The following table presents those liabilities measured at fair value on a recurring basis using unobservable inputs (Level 3):

(in millions)	**Contingent Consideration Obligation**
Balance at June 30, 2014	$ 12
Additions from acquisitions	40
Changes in fair value of contingent consideration (1)	8
Payment of contingent consideration	(7)
Balance at June 30, 2015	$ 53
Additions from acquisitions	7
Changes in fair value of contingent consideration (1)	(16)
Payment of contingent consideration	(25)
Balance at June 30, 2016	**$ 19**

(1) Amount is included in amortization and other acquisition-related costs in the consolidated statements of earnings.

11. Financial Instruments

We utilize derivative financial instruments to manage exposure to certain risks related to our ongoing operations. The primary risks managed through the use of derivative instruments include interest rate risk, currency exchange risk, and commodity price risk. We do not use derivative instruments for trading or speculative purposes. While the majority of our derivative instruments are designated as hedging instruments, we also enter into derivative instruments that are designed to hedge a risk, but are not designated as hedging instruments. These derivative instruments are adjusted to current fair value through earnings at the end of each period.

We are exposed to counterparty credit risk on all of our derivative instruments. Accordingly, we have established and maintain strict

counterparty credit guidelines and only enter into derivative instruments with major financial institutions that are investment grade or better. We do not have significant exposure to any one counterparty and we believe the risk of loss is remote. Additionally, we do not require collateral under these agreements.

Interest Rate Risk Management

We are exposed to the impact of interest rate changes. Our objective is to manage the impact of interest rate changes on cash flows and the market value of our borrowings. We utilize a mix of debt maturities along with both fixed-rate and variable-rate debt to manage changes in interest rates. In addition, we enter into interest rate swaps to further manage our exposure to interest rate variations related to our borrowings and to lower our overall borrowing costs.

Currency Exchange Risk Management

We conduct business in several major international currencies and are subject to risks associated with changing foreign exchange rates. Our objective is to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus its attention on business operations. Accordingly, we enter into various contracts that change in value as foreign exchange rates change to protect the value of existing foreign currency assets and liabilities, commitments and anticipated foreign currency revenue and expenses.

Commodity Price Risk Management

We are exposed to changes in the price of certain commodities. Our objective is to reduce earnings and cash flow volatility associated with forecasted purchases of these commodities to allow management to focus its attention on business operations. Accordingly, we enter into derivative contracts when possible to manage the price risk associated with certain forecasted purchases.

The following table summarizes the fair value of our assets and liabilities related to derivatives designated as hedging instruments and the respective line items in which they were recorded in the consolidated balance sheets at June 30:

(in millions)	2016	2015
Assets:		
Foreign currency contracts (1)	**$ 1**	$ 3
Pay-floating interest rate swaps (2)	**33**	8
Pay-floating interest rate swaps (1)	**1**	—
Total assets	**$ 35**	$ 11
Liabilities:		
Foreign currency contracts (3)	**$ 3**	$ 2
Forward interest rate swaps (4)	**10**	—
Pay-floating interest rate swaps (4)	**—**	1
Commodity contracts (3)	**2**	2
Commodity contracts (4)	**1**	1
Total liabilities	**$ 16**	$ 6

(1) Included in prepaid expenses and other in the consolidated balance sheets.
(2) Included in other assets in the consolidated balance sheets.
(3) Included in other accrued liabilities in the consolidated balance sheets.
(4) Included in deferred income taxes and other liabilities in the consolidated balance sheets.

Fair Value Hedges

We enter into pay-floating interest rate swaps to hedge the changes in the fair value of fixed-rate debt resulting from fluctuations in interest rates. These contracts are designated and qualify as fair value hedges. Accordingly, the gain or loss recorded on the pay-floating interest rate swaps is directly offset by the change in fair value of the underlying debt. Both the derivative instrument and the underlying debt are adjusted to market value at the end of each period with any resulting gain or loss recorded in interest expense, net in the consolidated statements of earnings.

During fiscal 2016 , we entered into pay-floating interest rate swaps with total notional amounts of $600 million . These swaps have been designated as fair value hedges of our fixed rate debt and are included in other assets in the consolidated balance sheets.

During fiscal 2016 , we terminated notional amounts of $250 million of pay-floating interest rate swaps that were previously designated as fair value hedges.

During fiscal 2015 , we entered into pay-floating interest rate swaps with total notional amounts of $1,050 million , of which $250 million and $450 million was in connection with the registered debt offerings in June 2015 and November 2014, respectively. These swaps have been designated as fair value hedges of our fixed rate debt and are included in other assets in the consolidated balance sheets.

Also during fiscal 2015 , we terminated notional amounts of $875 million of pay-floating interest rate swaps in connection with the debt redemption in December 2014 as described in Note 6 . These swaps were previously designated as fair value hedges.

The following tables summarize the outstanding interest rate swaps designated as fair value hedges at June 30:

	2016		
(in millions)	Notional Amount	Maturity Date	
Pay-floating interest rate swaps	$ 1,963	Jun 2017 -	Sep 2025

	2015		
(in millions)	Notional Amount	Maturity Date	
Pay-floating interest rate swaps	$ 1,613	Jun 2017 -	Jun 2022

The following table summarizes the gain/(loss) recognized in earnings for interest rate swaps designated as fair value hedges:

(in millions)	2016	2015	2014
Pay-floating interest rate swaps (1) (2)	$ 23	$ 14	$ 23
Fixed-rate debt (1)	(23)	(14)	(23)

(1) Included in interest expense, net in the consolidated statements of earnings.

(2) Fiscal 2015 excludes $22 million fair value adjustment to the previously terminated interest rate swaps as a result of the December 2014 debt extinguishment as disclosed in Note 6 .

There was no ineffectiveness associated with these derivative instruments for any periods presented.

Cash Flow Hedges

We enter into derivative instruments to hedge our exposure to changes in cash flows attributable to interest rate, foreign currency and commodity price fluctuations associated with certain forecasted transactions. These derivative instruments are designated and qualify as cash flow hedges. Accordingly, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction and in the same period during which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative instrument is recognized in earnings immediately.

During fiscal 2016 and 2015 we entered into forward interest rate swaps with a total notional amount of $300 million and $850 million , respectively, to hedge probable, but not firmly committed, future transactions associated with our debt.

Additionally, during fiscal 2015 we terminated $1,150 million in forward interest rate swaps that were previously designated as cash-flow hedges.

We enter into foreign currency contracts to protect the value of anticipated foreign currency revenues and expenses. At June 30, 2016 and 2015 , we held contracts to hedge probable, but not firmly committed, revenue and expenses. The principal currencies hedged are the Canadian dollar, Mexican peso, Thai baht, Chinese renminbi and euro.

We enter into commodity contracts to manage the price risk associated with forecasted purchases of certain commodities used in our Medical segment.

The following tables summarize the outstanding cash flow hedges at June 30:

	2016		
(in millions)	Notional Amount	Maturity Date	
Forward interest rate swaps	$ 300	Jun 2018 -	Jun 2028
Foreign currency contracts	183	Jul 2016 -	Jun 2017
Commodity contracts	22	Jul 2016 -	Mar 2019

	2015		
(in millions)	Notional Amount	Maturity Date	
Foreign currency contracts	146	Jul 2015 -	Jun 2016
Commodity contracts	22	Jul 2015 -	Mar 2018

The following table summarizes the gain/(loss) included in AOCI for derivative instruments designated as cash flow hedges at June 30:

(in millions)	2016	2015
Forward interest rate swaps	$ (10)	$ —
Commodity contracts	(3)	(3)
Foreign currency contracts	(4)	2

The following table summarizes the gain/(loss) reclassified from AOCI into earnings for derivative instruments designated as cash flow hedges:

(in millions)	2016	2015	2014
Foreign currency contracts (1)	$ 1	$ 1	$ —
Foreign currency contracts (2)	5	4	2
Foreign currency contracts (3)	(3)	(2)	1
Commodity contracts (3)	(5)	(1)	—

(1) Included in revenue in the consolidated statements of earnings.

(2) Included in cost of products sold in the consolidated statements of earnings.

(3) Included in SG&A expenses in the consolidated statements of earnings.

The amount of ineffectiveness associated with these derivative instruments was immaterial for all periods presented.

Economic (Non-Designated) Hedges

We enter into foreign currency contracts to manage our foreign exchange exposure related to intercompany financing transactions and other balance sheet items subject to revaluation that do not meet the requirements for hedge accounting treatment. Accordingly, these derivative instruments are adjusted to current market value at the end of each period through earnings. The gain or loss recorded on these instruments is substantially offset by the remeasurement adjustment on the foreign currency denominated asset or liability. The settlement of the derivative instrument and the remeasurement adjustment on the foreign currency denominated asset or liability are both recorded in other (income)/expense, net. The principal currencies managed through foreign currency contracts are the Canadian dollar, Mexican peso, euro, Thai baht and Chinese renminbi.

The following tables summarize the outstanding economic (non-designated) derivative instruments at June 30:

	2016	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 492	Jul 2016 - Jul 2016

	2015	
(in millions)	Notional Amount	Maturity Date
Foreign currency contracts	$ 398	Jul 2015 - Jul 2015

The following table summarizes the gain/(loss) recognized in earnings for economic (non-designated) derivative instruments:

(in millions)	2016	2015	2014
Foreign currency contracts (1)	$ (17)	$ (45)	$ 12

(1) Included in other income, net in the consolidated statements of earnings.

Fair Value of Financial Instruments

The carrying amounts of cash and equivalents, trade receivables, net, accounts payable, and other accrued liabilities at June 30, 2016 and 2015 approximate fair value due to their short-term maturities.

The following table summarizes the estimated fair value of our long-term obligations and other short-term borrowings compared to the respective carrying amounts at June 30:

(in millions)	2016	2015
Estimated fair value	$ 5,780	$ 5,521
Carrying amount	5,539	5,492

The fair value of our long-term obligations and other short-term borrowings is estimated based on either the quoted market prices for the same or similar issues or other inputs derived from available market information, which represents a Level 2 measurement.

The following table is a summary of the fair value gain/(loss) of our derivative instruments based upon the estimated amount that we would receive (or pay), considering counter-party credit risk, to terminate the contracts at June 30:

	2016		2015	
(in millions)	Notional Amount	Fair Value Gain/(Loss)	Notional Amount	Fair Value Gain/(Loss)
Pay-floating interest rate swaps	$ 1,963	$ 34	$ 1,613	$ 7
Foreign currency contracts	675	(2)	544	1
Forward interest rate swaps	300	(10)	—	—
Commodity contracts	22	(3)	22	(3)

12. Redeemable Noncontrolling Interests

In connection with the acquisition of a 71 percent ownership interest in naviHealth during fiscal 2016 as described in Note 2 , we recognized redeemable noncontrolling interests with a fair value of $119 million at the acquisition date. At June 30, 2016 , our ownership interest in naviHealth was 82 percent . The increase in our ownership interest was due to an additional capital contribution in connection with an acquisition by naviHealth.

The reconciliation of the changes in redeemable noncontrolling interests are as follows:

(in millions)	
Balance at June 30, 2015	$ —
Redeemable noncontrolling interests acquired	119
Net earnings attributable to redeemable noncontrolling interests	1
Net purchase of redeemable noncontrolling interests	(3)
Balance at June 30, 2016	**$ 117**

13. Shareholders' Equity

At June 30, 2016 and 2015 , authorized capital shares consisted of the following: 750 million Class A common shares, without par value; 5 million Class B common shares, without par value; and 500 thousand non-voting preferred shares, without par value. The Class A common shares and Class B common shares are collectively referred to below as “common shares”. Holders of common shares are entitled to share equally in any dividends declared by the Board of Directors and to participate equally in all distributions of assets upon liquidation. Generally, the holders of Class A common shares are entitled to one vote per share, and the holders of Class B common shares are entitled to one-fifth of one vote per share on proposals presented to shareholders for vote. Under certain circumstances, the holders of Class B common shares are entitled to vote as a separate class. Only Class A common shares were outstanding at June 30, 2016 and 2015 .

We repurchased $2.4 billion of our common shares, in the aggregate, through share repurchase programs during fiscal 2016 , 2015 and 2014 , as described below. We funded the repurchases with available cash. The common shares repurchased are held in treasury to be used for general corporate purposes.

During fiscal 2016 , we repurchased 8.2 million common shares having an aggregate cost of $651 million . The average price paid per common share was $78.98 .

During fiscal 2015 , we repurchased 13.1 million common shares having an aggregate cost of $1.0 billion . The average price paid per common share was $79.02 .

During fiscal 2014 , we repurchased 9.9 million common shares having an aggregate cost of $673 million . The average price paid per common share was $67.85 .

Accumulated Other Comprehensive Income/(Loss)

The following table summarizes the changes in the balance of accumulated other comprehensive income/(loss) by component and in total:

(in millions)	Foreign Currency Translation Adjustments and other	Unrealized Gain/(Loss) on Derivatives, net of tax	**Accumulated Other Comprehensive Income/(Loss)**
Balance at June 30, 2014	$ 63	$ 7	**$ 70**
Other comprehensive income/(loss), net of tax before reclassifications	(104)	9	**(95)**
Amounts reclassified to earnings	—	2	**2**
Total other comprehensive income/(loss), net of tax of $7 million	(104)	11	**(93)**
Balance at June 30, 2015	$ (41)	$ 18	**$ (23)**
Other comprehensive loss, net of tax before reclassifications	(82)	(9)	**(91)**
Amounts reclassified to earnings	—	(2)	**(2)**
Total other comprehensive loss, net of tax of $6 million	(82)	(11)	**(93)**
Balance at June 30, 2016	**$ (123)**	**$ 7**	**$ (116)**

Activity related to realized and unrealized gains and losses on available-for-sale securities, as described in Note 5 , was immaterial during fiscal 2016 and 2015.

14. Earnings Per Share Attributable to Cardinal Health, Inc.

The following table reconciles the computation of basic and diluted earnings per share attributable to Cardinal Health, Inc.:

(in millions, except per share amounts)	**2016**	2015	2014
Earnings from continuing operations	**$ 1,431**	$ 1,212	$ 1,163
Net earnings attributable to noncontrolling interest	**(4)**	—	—
Net earnings from continuing operations attributable to Cardinal Health, Inc.	**1,427**	1,212	1,163
Earnings from discontinued operations, net of tax	**—**	3	3
Net earnings attributable to Cardinal Health, Inc.	**$ 1,427**	$ 1,215	$ 1,166
Weighted-average common shares–basic	**327**	332	341
Effect of dilutive securities:			
Employee stock options, restricted share units, and performance share units	**3**	3	4
Weighted-average common shares–diluted	**330**	335	345
Basic earnings per common share attributable to Cardinal Health, Inc.:			
Continuing operations	$ 4.36	$ 3.65	$ 3.41
Discontinued operations	—	0.01	0.01
Net basic earnings per common share attributable to Cardinal Health, Inc.	$ 4.36	$ 3.66	$ 3.42
Diluted earnings per common share attributable to Cardinal Health, Inc.:			
Continuing operations	**$ 4.32**	$ 3.61	$ 3.37
Discontinued operations	—	0.01	0.01
Net diluted earnings per common share attributable to Cardinal Health, Inc.	**$ 4.32**	$ 3.62	$ 3.38

The potentially dilutive employee stock options, restricted share units and performance share units that were antidilutive for fiscal 2016, 2015 and 2014 were 2 million , 1 million and zero , respectively.

15. Segment Information

Our operations are principally managed on a products and services basis and are comprised of two operating segments, which are the same as our reportable segments: Pharmaceutical and Medical. The factors for determining the reportable segments include the manner in which management evaluates performance for purposes of allocating resources and assessing performance combined with the nature of the individual business activities.

The Pharmaceutical segment distributes branded and generic pharmaceutical, specialty pharmaceutical, over-the-counter healthcare and consumer products in the United States. This segment also operates nuclear pharmacies and cyclotron facilities, provides pharmacy management services to hospitals as well as medication therapy management and patient outcomes services to hospitals, other healthcare providers and payers, provides services to healthcare companies supporting the development, marketing, and distribution of specialty pharmaceutical products, and

repackages generic pharmaceuticals and over-the-counter healthcare products. This segment also imports and distributes pharmaceuticals, over-the-counter healthcare and consumer products as well as provides specialty pharmacy and other services in China.

The Medical segment distributes a broad range of medical, surgical and laboratory products and provides services to hospitals, ambulatory surgery centers, clinical laboratories and other healthcare providers in the United States, Canada and China. This segment distributes medical products to patients in the home in the United States. This segment also manufactures, sources and develops our own Cardinal Health brand medical and surgical products, which are sold directly or through third-party distributors in the United States, Canada, Europe and other regions internationally. This segment also provides post-acute care management and transition services and software to hospitals, other healthcare providers, and payers.

The following table presents revenue for each reportable segment and Corporate:

(in millions)	2016	2015	2014
Pharmaceutical	**$ 109,131**	$ 91,116	$ 80,110
Medical	**12,430**	11,395	10,962
Total segment revenue	**121,561**	102,511	91,072
Corporate (1)	**(15)**	20	12
Total revenue	**$ 121,546**	$ 102,531	$ 91,084

(1) Corporate revenue consists of the elimination of inter-segment revenue and other revenue not allocated to the segments.

We evaluate segment performance based on segment profit, among other measures. Segment profit is segment revenue, less segment cost of products sold, less segment distribution, selling, general, and administrative ("SG&A") expenses. Segment SG&A expenses include share-based compensation expense as well as allocated corporate expenses for shared functions, including corporate management, corporate finance, financial and customer care shared services, human resources, information technology, and legal and compliance. The results attributable to noncontrolling interests of consolidated entities are recorded within segment profit. Corporate expenses are allocated to the segments based on headcount, level of benefit provided, and other ratable allocation methodologies.

We do not allocate the following items to our segments: LIFO inventory charges/(credits); restructuring and employee severance; amortization and other acquisition-related costs; impairments and (gain)/loss on disposal of assets; litigation (recoveries)/charges, net; other income, net; interest expense, net; loss on extinguishment of debt; and provision for income taxes.

In addition, certain investment spending, certain portions of enterprise-wide incentive compensation, and other spending are not allocated to the segments. Investment spending generally includes the first-year spend for certain projects that require incremental investments in the form of additional operating expenses. We encourage our segments and corporate functions to identify investment projects that will promote innovation and provide future returns. As approval decisions for such projects are dependent upon executive management, the expenses for such projects are often retained at Corporate. Investment spending within Corporate was $34 million , $26 million and $33 million for fiscal 2016 , 2015 and 2014, respectively.

Beginning in fiscal 2016, we changed our methodology for allocating certain portions of enterprise-wide incentive compensation expenses among Corporate and the segments. This change did not impact consolidated operating earnings or net earnings and did not materially impact either segment during fiscal 2016.

The following tables present segment profit by reportable segment and Corporate:

(in millions)	2016	2015	2014
Pharmaceutical	**$ 2,488**	$ 2,094	$ 1,745
Medical	**457**	433	444
Total segment profit	**2,945**	2,527	2,189
Corporate	**(486)**	(366)	(304)
Total operating earnings	**$ 2,459**	$ 2,161	$ 1,885

The following tables present depreciation and amortization and additions to property and equipment by reportable segment and Corporate:

(in millions)	2016	2015	2014
Pharmaceutical	**$ 128**	$ 124	$ 128
Medical	**136**	119	130
Corporate	**377**	208	201
Total depreciation and amortization	**$ 641**	$ 451	$ 459

(in millions)	2016	2015	2014
Pharmaceutical	**$ 88**	$ 90	$ 72
Medical	**96**	87	72
Corporate	**281**	123	105
Total additions to property and equipment	**$ 465**	$ 300	$ 249

The following table presents total assets for each reportable segment and Corporate at June 30 :

(in millions)	2016	2015	2014
Pharmaceutical	**$ 20,662**	$ 17,385	$ 15,361
Medical	**10,236**	7,095	6,768
Corporate	**3,224**	5,662	3,904
Total assets	**$ 34,122**	$ 30,142	$ 26,033

The following tables present revenue and property and equipment, net by geographic area:

(in millions)	2016	2015	2014
United States	**$ 116,864**	$ 98,435	$ 87,449
International	**4,682**	4,096	3,635
Total revenue	**$ 121,546**	$ 102,531	$ 91,084

(in millions)	2016	2015	2014
United States	$ 1,558	$ 1,327	$ 1,301
International	238	179	158
Property and equipment, net	**$ 1,796**	$ 1,506	$ 1,459

16. Share-Based Compensation

We maintain stock incentive plans (collectively, the "Plans") for the benefit of certain of our officers, directors and employees. At June 30, 2016 , 20 million shares remain available for future grants under the Cardinal Health, Inc. 2011 Long-Term Incentive Plan ("2011 LTIP"). Under the 2011 LTIP's fungible share counting provisions, stock options are counted against the plan as one share for every share issued ; awards other than stock options are counted against the plan as two and one-half shares for every share issued. This means that only 8 million shares could be issued under awards other than stock options while 20 million shares could be issued under stock options. Shares are issued out of treasury shares when stock options are exercised and when restricted share units and performance share units vest.

The following table provides total share-based compensation expense by type of award:

(in millions)	2016	2015	2014
Restricted share unit expense	$ 69	$ 69	$ 62
Employee stock option expense	21	21	21
Performance share unit expense	21	20	13
Total share-based compensation expense from continuing operations	**$ 111**	$ 110	$ 96

The total tax benefit related to share-based compensation was $38 million , $38 million and $33 million for fiscal 2016 , 2015 and 2014 , respectively.

Stock Options

Employee stock options granted under the Plans generally vest in equal annual installments over three years and are exercisable for periods ranging from seven to ten years from the grant date. All stock options are exercisable at a price equal to the market value of the common shares underlying the option on the grant date.

The following table summarizes all stock option transactions under the Plans:

(in millions, except per share amounts)	Stock Options	Weighted-Average Exercise Price per Common Share
Outstanding at June 30, 2014	10	$ 39.16
Granted	1	72.15
Exercised	(3)	36.21
Canceled and forfeited	—	—
Outstanding at June 30, 2015	8	46.50
Granted	1	84.11
Exercised	(2)	39.06
Canceled and forfeited	—	—
Outstanding at June 30, 2016	**7**	**$ 54.09**
Exercisable at June 30, 2016	**5**	**$ 42.82**

The following table provides additional detail related to stock options:

(in millions, except per share amounts)	2016	2015	2014
Aggregate intrinsic value of outstanding options at period end	$ 181	$ 281	$ 282
Aggregate intrinsic value of exercisable options at period end	161	193	185
Aggregate intrinsic value of exercised options	63	132	155
Net proceeds from share-based compensation	6	72	227
Excess tax benefits from share based compensation	33	52	39
Total compensation cost, net of estimated forfeitures, related to unvested stock options not yet recognized, pre-tax	22	23	24
Total fair value of shares vested during the year	20	20	20
Weighted-average grant date fair value per stock option	17.40	15.80	10.32

Stock options are granted to our officers and certain employees. The fair values were estimated on the grant date using a lattice valuation model. We believe the lattice model provides reasonable estimates because it has the ability to take into account individual exercise patterns based on changes in our stock price and other variables, and it provides for a range of input assumptions, which are disclosed in the table below. The risk-free rate is based on the U.S. Treasury yield curve at the time of the grant. We analyzed historical data to estimate option exercise behaviors and employee terminations to be used within the lattice model. The expected life of the options granted was calculated from the option valuation model and represents the length of time in years that the options granted are expected to be outstanding. Expected volatilities are based on implied volatility from traded options on our common shares and historical volatility over a period of time commensurate with the contractual term of the option grant (up to ten years).

The following table provides the range of assumptions used to estimate the fair value of stock options:

	2016	2015	2014
Risk-free interest rate	**1.5% - 1.9%**	1.8% - 2.1%	1.9% - 2.0%
Expected volatility	**23%**	26%	27%
Dividend yield	**1.8% - 2.0%**	1.7% - 1.9%	1.8% - 2.4%
Expected life in years	**7**	7	6

Restricted Share Units

Restricted share units granted under the Plans generally vest in equal annual installments over three years . Restricted share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to restricted share units under the Plans:

(in millions, except per share amounts)	Restricted Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2014	3	$ 45.65
Granted	1	72.33
Vested	(1)	44.94
Canceled and forfeited	—	—
Nonvested at June 30, 2015	3	59.69
Granted	1	83.89
Vested	(2)	54.29
Canceled and forfeited	—	—
Nonvested at June 30, 2016	**2**	**$ 71.73**

The following table provides additional data related to restricted share unit activity:

(in millions)	2016	2015	2014
Total compensation cost, net of estimated forfeitures, related to nonvested restricted share and share unit awards not yet recognized, pre-tax	**$ 79**	$ 77	$ 75
Weighted-average period in years over which restricted share and share unit cost is expected to be recognized (in years)	**2**	2	2
Total fair value of shares vested during the year	**$ 65**	$ 61	$ 55

Performance Share Units

Performance share units vest over a three -year performance period based on achievement of specific performance goals. Based on the extent to which the targets are achieved, vested shares may range from zero to 200 percent of the target award amount. Performance share units accrue cash dividend equivalents that are payable upon vesting of the awards.

The following table summarizes all transactions related to performance share units under the Plans (based on target award amounts):

(in millions, except per share amounts)	Performance Share Units	Weighted-Average Grant Date Fair Value per Share
Nonvested at June 30, 2014	0.9	$ 44.41
Granted	0.2	71.63
Vested (1)	(0.2)	41.59
Canceled and forfeited	—	—
Nonvested at June 30, 2015	**0.9**	**$ 50.31**
Granted	0.3	84.26
Vested (2)	(0.4)	39.81
Canceled and forfeited	—	—
Nonvested at June 30, 2016	**0.8**	**$ 63.96**

(1) Vested based on achievement of 120 percent of the target performance goal.

(2) Vested based on achievement of 133 percent of the target performance goal.

The following table provides additional data related to performance share unit activity:

(in millions)	2016	2015	2014
Total compensation cost, net of estimated forfeitures, related to nonvested performance share units not yet recognized, pre-tax	**$ 17**	$ 16	$ 15
Weighted-average period over which performance share unit cost is expected to be recognized (in years)	**2**	2	2
Total fair value of shares vested during the year	**$ 16**	$ 8	$ 7

Employee Retirement Savings Plans

Substantially all of our domestic non-union employees are eligible to be enrolled in our company-sponsored contributory retirement savings plans, which include features under Section 401(k) of the Internal Revenue Code of 1986, and provide for matching and profit sharing contributions by us. Our contributions to the plans are determined by the Board of Directors subject to certain minimum requirements as specified in the plans. The total expense for our employee retirement savings plans was $84 million , $91 million and $75 million for fiscal 2016 , 2015 and 2014 , respectively.

17. Selected Quarterly Financial Data (Unaudited)

The following is selected quarterly financial data for fiscal 2016 and 2015 . The sum of the quarters may not equal year-to-date due to rounding.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2016				
Revenue	$ 28,055	$ 31,445	$ 30,662	**$ 31,384**
Gross margin (1)	1,579	1,609	1,689	**1,665**
Distribution, selling, general and administrative expenses	842	922	914	**970**
Earnings from continuing operations	384	326	386	**335**
Earnings from discontinued operations, net of tax	—	—	—	**—**
Net earnings	384	326	386	**335**
Less: Net earnings attributable to noncontrolling interests	(1)	—	—	(2)
Net earnings attributable to Cardinal Health, Inc.	383	326	386	333
Net earnings from continuing operations attributable to Cardinal Health, Inc. per common share:				
Basic	$ 1.17	$ 0.99	$ 1.18	**$ 1.03**
Diluted	1.15	0.98	1.17	**1.02**

(1) Gross margin is impacted by LIFO benefit/(charges) of ($39) million , ($12) million and $51 million in the second, third and fourth quarter, respectively.

(in millions, except per common share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal 2015				
Revenue	$ 24,070	$ 25,537	$ 25,375	$ 27,547
Gross margin	1,341	1,454	1,459	1,458
Distribution, selling, general and administrative expenses	775	815	803	847
Earnings from continuing operations	266	289	365	293
Earnings from discontinued operations, net of tax	—	—	—	2
Net earnings	266	289	365	295
Less: Net earnings attributable to noncontrolling interests	—	—	—	—
Net earnings attributable to Cardinal Health, Inc.	266	289	365	295
Net earnings from continuing operations attributable to Cardinal Health, Inc. per common share:				
Basic	$ 0.79	$ 0.87	$ 1.10	$ 0.89
Diluted	0.78	0.86	1.09	0.88

18. Subsequent Events

We repurchased 3 million common shares having an aggregate cost of $250 million from July 1, 2016 through August 5, 2016 . The average price paid per common share was $81.45 . We funded the repurchases with available cash.

Cardinal Health, Inc. and Subsidiaries

Schedule II - Valuation and Qualifying Accounts [1]

(in millions)	Balance at Beginning of Period	Charged to Costs and Expenses (2)	Charged to Other Accounts (3)	Deductions (4)	Balance at End of Period
Fiscal 2016					
Accounts receivable	**$ 135**	**$ 72**	**$ 2**	**$ (74)**	**$ 135**
Finance notes receivable	**14**	**6**	**—**	**(1)**	**19**
Sales returns and allowances	**305**	**2,207**	**—**	**(2,126)**	**386**
Other	**1**	**—**	**—**	**—**	**1**
	$ 455	**$ 2,285**	**$ 2**	**$ (2,201)**	**$ 541**
Fiscal 2015					
Accounts receivable	$ 137	$ 59	$ 5	$ (66)	$ 135
Finance notes receivable	18	—	—	(4)	14
Sales returns and allowances	273	1,988	—	(1,956)	305
Other	1	—	—	—	1
	$ 429	$ 2,047	$ 5	$ (2,026)	$ 455
Fiscal 2014					
Accounts receivable	$ 134	$ 51	$ 2	$ (50)	$ 137
Finance notes receivable	17	—	2	(1)	18
Sales returns and allowances	291	1,735	—	(1,753)	273
Other	1	—	—	—	1
	$ 443	$ 1,786	$ 4	$ (1,804)	$ 429

(1) Amounts included herein pertain to the continuing operations of the Company.

(2) Fiscal 2016, 2015 and 2014 include $5 million , $7 million and $9 million , respectively, for reserves related to customer pricing disputes, excluded from provision for bad debts on the consolidated statements of cash flows and classified as a reduction in revenue in the consolidated statements of earnings.

(3) Recoveries of amounts provided for or written off in prior years were $2 million , $1 million and $3 million for fiscal 2016, 2015 and 2014, respectively.

(4) Write-off of uncollectible accounts or actual sales returns.

Directors, Executive Officers and Corporate Governance

The following is a list of our executive officers:

Name	Age	Position
George S. Barrett	61	Chairman and Chief Executive Officer
Michael C. Kaufmann	53	Chief Financial Officer
Donald M. Casey, Jr.	56	Chief Executive Officer, Medical segment
Jon L. Giacomin	51	Chief Executive Officer, Pharmaceutical segment
Pamela O. Kimmet	58	Chief Human Resources Officer
Craig S. Morford	57	Chief Legal and Compliance Officer
Patricia B. Morrison	57	Executive Vice President, Customer Support Services and Chief Information Officer

The business experience summaries provided below for our executive officers describe positions held during the last five years (unless otherwise indicated).

Mr. Barrett has served as Chairman and Chief Executive Officer since August 2009.

Mr. Kaufmann has served as Chief Financial Officer since November 2014. From August 2009 until November 2014, he served as Chief Executive Officer, Pharmaceutical segment.

Mr. Casey has served as Chief Executive Officer, Medical segment, since April 2012. Before joining us, he served as Chief Executive Officer of the Gary and Mary West Wireless Health Institute, a non-profit research organization focused on lowering the cost of healthcare through novel technology solutions, from March 2010 to March 2012.

Mr. Giacomin has served as Chief Executive Officer, Pharmaceutical segment since November 2014. From January 2011 until November 2014, he served as President, U.S. Pharmaceutical Distribution.

Ms. Kimmet has served as Chief Human Resources Officer since June 2016. Prior to joining us, Ms. Kimmet served as Senior Vice President, Human Resources at Coca-Cola Enterprises, Inc. from October 2010 to June 2016.

Mr. Morford has served as Chief Legal and Compliance Officer since May 2009.

Ms. Morrison has served as Executive Vice President, Customer Support Services and Chief Information Officer since June 2011, and prior to that was Executive Vice President and Chief Information Officer from August 2009 until June 2011.

We have adopted *Standards of Business Conduct* that apply to all of our directors, officers and employees. The *Standards of Business Conduct* outline our corporate values and standards of integrity and behavior and are designed to protect and promote our reputation. The full text of the *Standards of Business Conduct* is posted on our website at www.cardinalhealth.com under "About Us — Corporate Citizenship — Ethics and Governance — Ethics and Compliance."

Any waiver of the *Standards of Business Conduct* for directors or executive officers must be approved by the Audit Committee. As required under SEC and New York Stock Exchange rules, we will disclose future amendments to our *Standards of Business Conduct* and waivers from the *Standards of Business Conduct* for our principal executive officer, principal financial officer, and principal accounting officer, or persons performing similar functions, and our other executive officers and directors on our website within four business days following the date of the amendment or waiver.

The other information called for by Item 10 of Form 10-K is incorporated by reference to our Definitive Proxy Statement (which will be filed with the SEC pursuant to Regulation 14A under the Exchange Act) relating to our 2016 Annual Meeting of Shareholders (our "2016 Proxy Statement") under the captions "Proposal 1—Election of Directors," "Section 16(a) Beneficial Ownership Reporting Compliance" and "Corporate Governance."

Exhibits, Financial Statement Schedules

(a)(1) The following financial statements are included in the "Financial Statements" section of this report:

(a)(2) The following Supplemental Schedule is included in this report:

All other schedules not listed above have been omitted as not applicable or because the required information is included in the Consolidated Financial Statements or in the Notes thereto.

Exhibit Number	Exhibit Description
2.1	Final Binding Offer dated March 1, 2015 by and between Cardinal Health, Inc. and Ethicon, Inc. (incorporated by reference to Exhibit 10.1 to Cardinal Health's Current Report on Form 8-K filed on March 2, 2015, File No. 1-11373)
2.2	Stock and Asset Purchase Agreement, dated March 1, 2015 between Ethicon, Inc. and Cardinal Health, Inc. (incorporated by reference to Exhibit 2.1 to Cardinal Health's Current Report on Form 8-K filed on May 28, 2015, File No. 1-11373)
2.3	Amendment No. 1, dated as of October 2, 2015, to the Stock and Asset Purchase Agreement, dated as of March 1, 2015, by and between Ethicon, Inc. and Cardinal Health, Inc. (incorporated by reference to Exhibit 2.1 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended September 30, 2015, File No. 1-11373)
2.4	Letter Agreement between Ethicon, Inc. and Cardinal Health, Inc., dated May 29, 2015 relating to mechanics of agreeing to purchase price allocation (incorporated by reference to Exhibit 2.3 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2015, File No. 1-11373)
3.1	Amended and Restated Articles of Incorporation of Cardinal Health, Inc., as amended (incorporated by reference to Exhibit 3.1 to Cardinal Health's Quarterly Report on Form 10-Q for the quarter ended September 30, 2008, File No. 1-11373)
3.2	Cardinal Health, Inc. Restated Code of Regulations (incorporated by reference to Exhibit 3.2 to Cardinal Health's Current Report on Form 8-K filed on June 30, 2016, File No. 1-11373)
4.1	Specimen Certificate for Common Shares of Cardinal Health, Inc. (incorporated by reference to Exhibit 4.01 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2001, File No. 1-11373)
4.2.1	Indenture, dated as of April 18, 1997, between Cardinal Health, Inc. and Bank One, Columbus, NA, Trustee (incorporated by reference to Exhibit 1 to Cardinal Health's Current Report on Form 8-K filed on April 21, 1997, File No. 1-11373)
4.2.2	Supplemental Indenture, dated October 3, 2006, between Cardinal Health, Inc. and The Bank of New York Trust Company, N.A., as trustee (successor to J.P. Morgan Trust Company, National Association, successor to Bank One, N.A., formerly known as Bank One, Columbus, N.A.) (incorporated by reference to Exhibit 4.3 to Cardinal Health's Current Report on Form 8-K filed on October 4, 2006, File No. 1-11373)
4.2.3	Second Supplemental Indenture, dated June 8, 2007, between Cardinal Health, Inc. and The Bank of New York Trust Company, N.A., (successor to J.P. Morgan Trust Company, National Association, successor to Bank One, N.A., formerly known as Bank One, Columbus, N.A.), as trustee (incorporated by reference to Exhibit 4.01 to Cardinal Health's Current Report on Form 8-K filed on June 8, 2007, File No. 1-11373)
4.3.1	Indenture, dated as of June 2, 2008, between Cardinal Health, Inc. and The Bank of New York Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on June 2, 2008, File No. 1-11373)
4.3.2	4.625% Notes due 2020 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on December 14, 2010, File No. 1-11373)
4.3.3	1.900% Notes due 2017 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on May 21, 2012, File No. 1-11373)
4.3.4	3.200% Notes due 2022 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on May 21, 2012, File No. 1-11373)
4.3.5	1.700% Notes due 2018 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on February 22, 2013, File No. 1-11373)
4.3.6	3.200% Notes due 2023 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on February 22, 2013, File No. 1-11373)
4.3.7	4.600% Notes due 2043 (incorporated by reference to Exhibit 4.3 to Cardinal Health's Current Report on Form 8-K filed on February 22, 2013, File No. 1-11373)
4.3.8	2.400% Notes due 2019 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on November 19, 2014, File No. 1-11373)

Exhibits

4.3.9	3.500% Notes due 2024 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on November 19, 2014, File No. 1-11373)
4.3.10	4.500% Notes due 2044 (incorporated by reference to Exhibit 4.3 to Cardinal Health's Current Report on Form 8-K filed on November 19, 2014, File No. 1-11373)
4.3.11	1.950% Notes due 2018 (incorporated by reference to Exhibit 4.1 to Cardinal Health's Current Report on Form 8-K filed on June 23, 2015, File No. 1-11373)
4.3.12	3.750% Notes due 2025 (incorporated by reference to Exhibit 4.2 to Cardinal Health's Current Report on Form 8-K filed on June 23, 2015, File No. 1-11373)
4.3.13	4.900% Notes due 2045 (incorporated by reference to Exhibit 4.3 to Cardinal Health's Current Report on Form 8-K filed on June 23, 2015, File No. 1-11373)
4.4	Agreement to furnish to the Securities and Exchange Commission upon request a copy of instruments defining the rights of holders of certain long-term debt of Cardinal Health, Inc. and consolidated subsidiaries (incorporated by reference to Exhibit 4.07 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2005, File No. 1-11373)
10.1.1	Cardinal Health, Inc. 2011 Long-Term Incentive Plan (incorporated by reference to Exhibit 10.1 to Cardinal Health's Current Report on Form 8-K/A filed on November 4, 2011, File No. 1-11373)*
10.1.2	First Amendment to Cardinal Health, Inc. 2011 Long-Term Incentive Plan (incorporated by reference to Exhibit 10.1.2 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2014)*
10.1.3	Form of Nonqualified Stock Option Agreement under the Cardinal Health, Inc. 2011 Long-Term Incentive Plan (grant made to executive officer in April 2012) (incorporated by reference to Exhibit 10.2 to Cardinal Health's Current Report on Form 8-K/A filed on November 4, 2011, File No. 1-11373)*
10.1.4	Form of Nonqualified Stock Option Agreement under the Cardinal Health, Inc. 2011 Long-Term Incentive Plan (grants made to executive officers in August 2012) (incorporated by reference to Exhibit 10.1.3 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2012, File No. 1-11373)*
10.1.5	Form of Nonqualified Stock Option Agreement under the Cardinal Health, Inc. 2011 Long-Term Incentive Plan (grants made to executive officers in August 2013 and thereafter) (incorporated by reference to Exhibit 10.1.4 to Cardinal Health's Annual Report on Form 10-K for the fiscal year ended June 30, 2013, File No. 1-11373)*

Financial information
Comprehensive financial and other information about Cardinal Health can be obtained by visiting the Investors page at ir.cardinalhealth.com.

Available information includes historical stock information, research analyst coverage, past and present financial statements, recent company presentations, SEC filings, corporate governance guidelines and board committee charters. This information — including the Cardinal Health Forms 10-K, 10-Q, 8-K and other published corporate literature — is also available without charge upon written request to the Investor Relations department at the corporate office, or by calling Investor Relations at 614.757.4757.

Cardinal Health uses its website as a channel of distribution for material company information. Important information, including news releases, financial information, earnings and analyst presentations, and information about upcoming presentations and events is routinely posted and accessible on the Investors page at ir.cardinalhealth.com. In addition, the Cardinal Health website allows investors and other interested persons to sign up to automatically receive email alerts when the company posts news releases, SEC filings and certain other information on its website.

For non-investor related inquiries, please call the company's main telephone number at 614.757.5000.

Fiscal 2016 cash dividend declarations

Fiscal quarter	Record date	Payment date	Per common share amount
1st	October 1, 2015	October 15, 2015	$0.3870
2nd	January 2, 2016	January 15, 2016	$0.3870
3rd	April 1, 2016	April 15, 2016	$0.3870
4th	July 1, 2016	July 15, 2016	$0.4489

Exhibit 12.1

Computation of Ratio of Earnings to Fixed Charges

(in millions, except ratios)	2012	2013	2014	2015	2016
Earnings from continuing operations before income taxes	$ 1,698.1	$ 888.3	$ 1,798.3	$ 1,967.3	**$ 2,275.6**
Plus fixed charges:					
Interest expense	92.3	119.2	129.4	137.0	**178.2**
Capitalized interest	6.0	1.7	1.2	1.8	**5.6**
Amortization of debt offering costs	2.8	3.5	3.6	7.6	**5.6**
Interest portion of rent expense	7.8	8.3	9.8	9.6	**11.5**
Fixed charges	108.9	132.7	144.0	156.0	**200.9**
Plus: amortization of capitalized interest	3.2	3.4	2.9	2.4	**2.5**
Less: capitalized interest	(6.0)	(1.7)	(1.2)	(1.8)	**(5.6)**
Earnings	$ 1,804.2	$ 1,022.7	$ 1,944.0	$ 2,123.9	**$ 2,473.4**
Ratio of earnings to fixed charges (1)	16.6	7.7	13.5	13.6	**12.3**

(1) The ratio of earnings to fixed charges is computed by dividing fixed charges into earnings from continuing operations before income taxes plus fixed charges and capitalized interest. Fixed charges include interest expense, amortization of debt offering costs and the portion of rent expense that is deemed to be representative of the interest factor. Interest expense recorded on tax exposures has been recorded in income tax expense and has therefore been excluded from the calculation.

Exhibit 21.1

Subsidiaries of the Registrant

Listed below are majority-owned subsidiaries of Cardinal Health, Inc. as of June 30, 2016. Subsidiaries excluded from the list below would not, considered in the aggregate as a single subsidiary, constitute a "significant subsidiary" of Cardinal Health, Inc. as that term is defined in Rule 1-02(w) of SEC Regulation S-X.

I, George S. Barrett, certify that:

1. I have reviewed this Form 10-K of Cardinal Health, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Statement Regarding Forward-Looking Information

As used in this exhibit, “we,” “our,” “us” and similar pronouns refer to Cardinal Health, Inc. and its subsidiaries, unless the context requires otherwise. Our filings with the Securities and Exchange Commission, including our Annual Report on Form 10-K for the fiscal year ended June 30, 2016 (the “2016 Form 10-K”), our quarterly reports on Form 10-Q or our current reports on Form 8-K (along with any exhibits and amendments to such reports), as well as our news releases or any other written or oral statements made by or on behalf of us, may include, directly or by incorporation by reference, forward-looking statements that reflect our current view (as of the date the forward-looking statement is first made) about future events, prospects, projections or financial performance. The matters discussed in these forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied in or by such statements. These risks and uncertainties include:

- competitive pressures in the markets in which we operate, including pricing pressures;
- uncertainties relating to the pricing of generic pharmaceuticals;
- uncertainties relating to the timing, frequency and profitability of generic pharmaceutical launches;
- our ability to maintain the benefits our generic pharmaceutical sourcing venture with CVS Health Corporation;
- with respect to our distribution agreements with branded pharmaceutical manufacturers, changes in the amount of service fees we receive or, in cases where part of our compensation under these agreements is branded pharmaceutical price appreciation, changes in the frequency or magnitude of such price appreciation;
- changes in the timing or frequency of the introduction of branded pharmaceuticals;
- actions of regulatory bodies and other governmental authorities, including the U.S. Drug Enforcement Administration ("DEA"), certain agencies within the U.S. Department of Health and Human Services (including the U.S. Food and Drug Administration, Centers for Medicare and Medicaid Services, the Office of Inspector General and the Office for Civil Rights), the U.S. Nuclear Regulatory Commission, the U.S. Federal Trade Commission, the U.S. Customs and Border Protection, various state boards of pharmacy, state controlled substance agencies, state health departments, state insurance departments, state Medicaid departments or comparable regulatory bodies or governmental authorities or foreign equivalents that, in each case, could delay, limit or suspend product development, manufacturing, distribution, importation or sales or result in warning letters, recalls, seizures, injunctions or monetary sanctions;
- difficulties or delays in the development, production, manufacturing, sourcing and marketing of new or existing products and services, including difficulties or delays associated with obtaining requisite regulatory consents or approvals associated with those activities;
- risks arising from possible violations of healthcare fraud and abuse laws;
- costs or claims resulting from potential errors or defects in our manufacturing of medical devices or other products or in our compounding, repackaging, information systems or pharmacy management services that may injure persons or damage property or operations, including costs from remediation efforts or recalls and related product liability claims and lawsuits, including class actions;
- risks arising from possible violations of the U.S. Foreign Corrupt Practices Act, Chinese anti-corruption laws and other similar anti-corruption laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws;
- risks arising from our collecting, handling and maintaining patient-identifiable health information and other sensitive personal and financial information, which are subject to federal, state and foreign laws that regulate the use and disclosure of such information;
- risks arising from certain of our businesses being Medicare-certified suppliers or participating in state Medicaid programs, which businesses are subject to accreditation and quality standards and other rules and regulations, including applicable billing, payment and record-keeping requirements;
- risks arising from certain of our businesses manufacturing pharmaceutical and medical products or repackaging pharmaceuticals that are purchased through federal or state healthcare programs, which businesses are subject to federal and state laws that establish eligibility for reimbursement by such programs;
- the possibility of civil fines levied against us (in excess of the reserve we have accrued) by the U.S. Department of Justice for conduct covered by the settlement agreement that we entered into in connection with the DEA's suspension of our Lakeland, Florida distribution center's registration to distribute controlled substances;
- changes in laws or changes in the interpretation or application of laws or regulations, as well as possible failures to comply with applicable laws or regulations, including as a result of possible misinterpretations or misapplications;
- material reductions in purchases, non-renewal or early termination of contracts, or delinquencies or defaults by key customers;
- unfavorable changes to the terms of key customer or supplier relationships, or changes in customer mix;
- adverse changes in U.S. or foreign tax laws, unfavorable challenges to our tax positions and payments to settle these challenges;
- uncertainties due to government healthcare reform;
- changes in manufacturers' pricing, selling, inventory, distribution or supply policies or practices;
- changes in regulatory policies regarding pharmaceutical manufacturer product pricing practices;
- changes in hospital buying groups or hospital buying practices;

- changes in distribution or sourcing models for pharmaceutical and medical and surgical products, including an increase in direct and limited distribution;
- the risks of counterfeit products in the supply chain;
- changes to the prescription drug reimbursement formula and related reporting requirements for generic pharmaceuticals under Medicaid;
- increasing consolidation in the healthcare industry, which could give the resulting enterprises greater bargaining power and may increase pressure on prices for our products and services or result in the loss of customers;
- disruption or damage to, or failure of, our information systems, critical facilities, including our national logistics center, or distribution networks;
- risks to our business and information and controls systems in the event that the Pharmaceutical segment's planned multi-year systems replacement project or other business process improvements, infrastructure modernizations or initiatives to use a third-party service providers for key systems and processes are not effectively implemented;
- any compromise of our information systems or those of a third-party with whom we do business, including unauthorized access to or use or disclosure of sensitive information;
- the results, costs, effects or timing of any commercial disputes, government contract compliance matters, product liability claims or lawsuits, patent infringement claims, *qui tam* actions or other legal proceedings;
- whether we can obtain product liability insurance for a particular product and if so, whether such insurance is adequate to cover all future claims, settlements and judgments;
- our ability to maintain adequate intellectual property protections;
- the costs, difficulties and uncertainties related to the integration of acquired businesses, including liabilities relating to the operations or activities of such businesses prior to their acquisition, and uncertainties relating to our ability to achieve the anticipated results from acquisitions;
- risks and uncertainties relating to the acquisition of Cordis, including the ability to achieve the expected synergies and positive impact to operating results and the additional risks the Cordis acquisition subjects us to relating to regulatory matters, legal proceedings, tax laws or positions and global operations, including the effects of local economic environments and currency volatility;
- increased costs for commodities used in the Medical segment including various components, compounds, raw materials or energy such as oil-based resins, cotton, latex and other commodities;
- shortages in commodities, components, compounds, raw materials or energy used by our businesses, including supply disruptions of radioisotopes;
- the loss of, or default by, one or more key suppliers for which alternative suppliers may not be readily available;
- bankruptcy, insolvency or other credit failure of a customer or supplier that owes us a substantial amount;
- risks associated with global operations, including the effect of local economic environments, inflation, recession, currency volatility and global competition, in addition to risks associated with compliance with U.S and international laws relating to global operations;
- risks associated with volatility and disruption to the global capital and credit markets, which may adversely affect our ability to access credit, our cost of credit and the financial soundness of our customers and suppliers;
- our ability to introduce and market new products and our ability to keep pace with advances in technology;
- the costs, effects, timing or success of restructuring programs or plans;
- significant charges to earnings if goodwill or intangible assets become impaired;
- uncertainties relating to general political, business, industry, regulatory and market conditions; and
- other factors described in the “Risk Factors” section of the 2016 Form 10-K.

The words “expect,” “anticipate,” “intend,” “plan,” “believe,” “will,” “should,” “could,” “would,” “project,” “continue,” “likely,” and similar expressions generally identify “forward-looking statements,” which speak only as of the date the statements were made, and also include statements reflecting future results or guidance, statements of outlook and expense accruals. We undertake no obligation to update or revise any forward-looking statements, except to the extent required by applicable law.

Appendix D: Certification Statement

The undersigned hereby acknowledges she/he has read and understands all requirements and specifications of the Louisiana Medicaid Managed Care Organizations Request for Proposals (RFP), including attachments and appendices.

OFFICIAL CONTACT: The State requests that the Proposer designate one person to receive all documents and the method in which the documents are best delivered. Identify the Contact name and fill in the information below:

PROPOSER	Community Care Health Plan of Louisiana, Inc., dba Healthy Blue
VENDOR NUMBER	310066542
DATE	4/4/2019
LDR NUMBER	1356211
OFFICIAL CONTACT NAME	Aaron Lambert
EMAIL ADDRESS	aaron.lambert@healthybluela.com
FAX NUMBER	(225) 763-2179
PHONE NUMBER	(504) 836-8854
STREET ADDRESS	3850 N. Causeway Blvd. Suite 600
CITY, STATE, ZIP	Metairie, LA 70002

Proposer certifies that the above information is true and grants permission to the Department to contact the above named person or otherwise verify the information I have provided.

By its submission of this proposal and authorized signature below, Proposer certifies that:

1. The information contained in its response to this RFP is accurate.
2. Proposer complies with each of the mandatory requirements listed in the RFP and will meet or exceed the business and technical requirements specified therein.
3. Proposer accepts the procedures, evaluation criteria, mandatory contract terms and conditions, and all other administrative requirements set forth in this RFP.
4. Proposer's response is valid for at least one hundred and twenty (120) days from the date of Proposer’s signature below.
5. Proposer understands that if selected as the successful Proposer, he/she will have twenty (20) calendar days from the date of delivery of initial contract in which to complete contract negotiations, if any, and execute the final contract document. The Department has the option to waive this deadline if actions or inactions by the Department cause the delay.

6. Proposer certifies by signing and submitting a proposal for $25,000 or more, that their company, any subcontractors, or principals are not suspended or debarred by the General Services Administration (GSA) in accordance with the requirements in 2 C.F.R. §200 Subpart F. (A list of parties who have been suspended or debarred can be viewed via the internet at https://www.sam.gov.)
7. Proposer understands that, if selected as a contractor, the Louisiana Department of Revenue must determine that it is current in the filing of all applicable tax returns and reports and in payment of all taxes, interest, penalties, and fees owed to the State and collected by the LDR. Proposer shall comply with R.S. 39:1624(A)(10) by providing its seven-digit LDR account number in order for tax payment compliance status to be verified.
8. Proposer further acknowledges its understanding that issuance of a tax clearance certificate by LDR is a necessary precondition to the approval of any contract by the Office of State Procurement. The contracting agency reserves the right to withdraw its consent to any contract without penalty and proceed with alternate arrangements, should a prospective contractor fail to resolve any identified outstanding tax compliance discrepancies with the LDR within seven (7) days of such notification.
9. Proposer certifies and agrees that the following information is correct: In preparing its response, the Proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. Proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. The State reserves the right to reject the response of the proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.

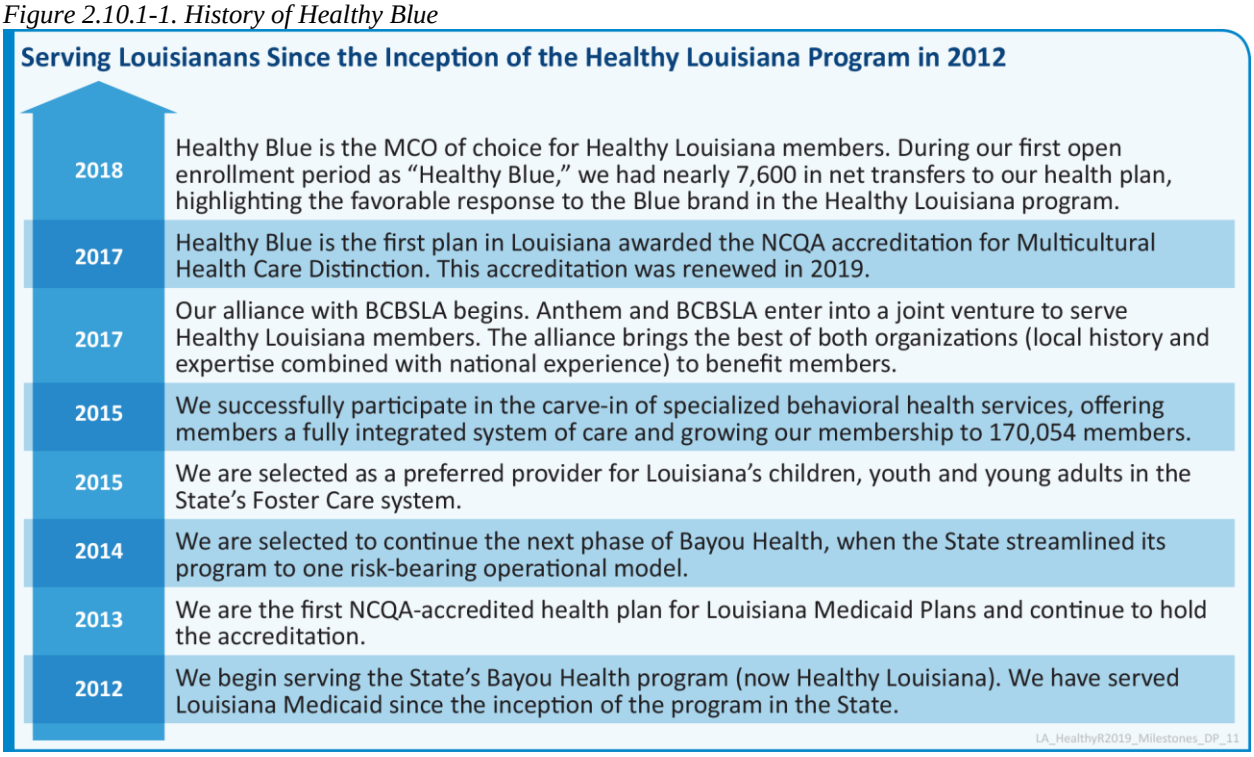
2.10.1 EXECUTIVE SUMMARY

Community Care Health Plan of Louisiana, Inc., dba Healthy Blue (Healthy Blue) is pleased to respond to the Louisiana Department of Health (LDH) and Bureau of Health Services Financing Request for Proposals for Louisiana Medicaid Managed Care Organizations. We have been a trusted partner to the State, our enrollees (members), our providers, and the communities we serve since the inception of the Healthy Louisiana program in 2012.

As seen in Figure 2.10.1-1, the Healthy Louisiana program has grown and evolved over the last seven years, our focus has remained the same: ***to be Louisiana's leader in improving health care outcomes for our members and communities***. What we do for Louisiana is personal to us. We care about the health of Louisianans and have remained steadfast in our pursuit to address the priorities, challenges, and needs of the members and communities we serve.

Our organizational mission and goals compliment and are aligned to the Institute for Health Improvement's Triple Aim (Triple Aim) framework of achieving better health, better care, and lower costs. Throughout our response, we place the Triple Aim icon near narrative that emphasizes the simultaneous pursuit of the three dimensions of the Triple Aim. At Healthy Blue, we understand that the pursuit of the Triple Aim will not be achieved through incremental modifications of the status quo, but through constant pursuit of solutions, innovations, and capabilities that truly optimize health system performance.

Figure 2.10.1-1. History of Healthy Blue



We Are Healthy Blue

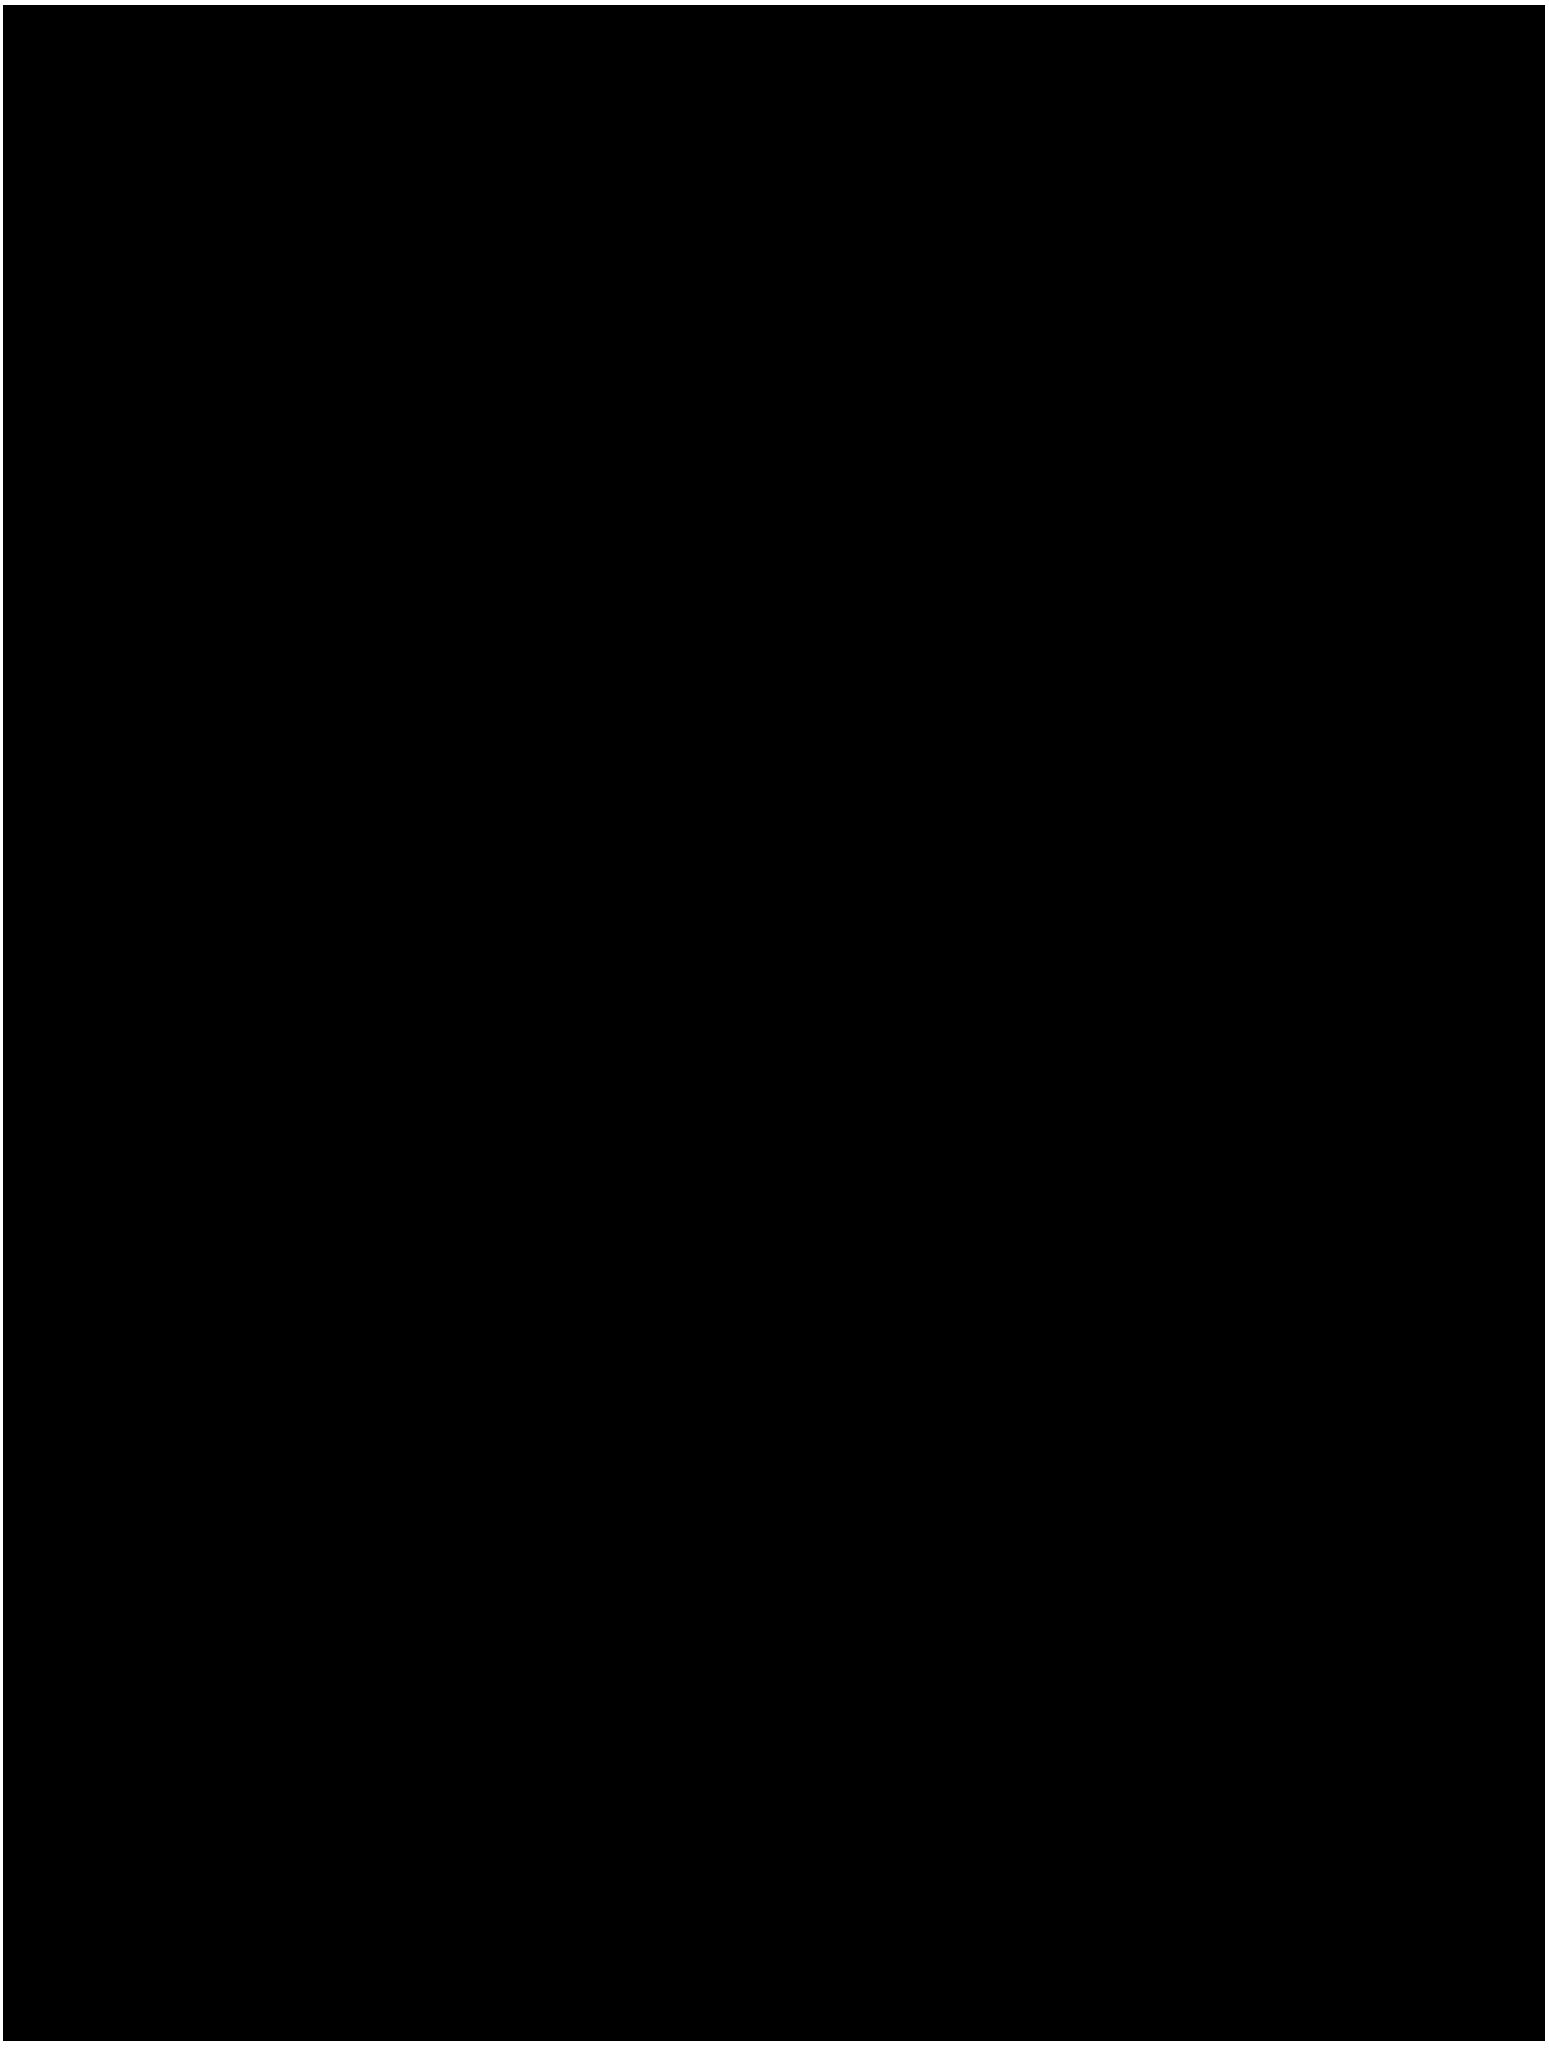
We are connected and committed to every parish in Louisiana and are proud to continue our impactful and important work to serve our communities and our members. Our organizational structure fosters innovation and local adaptability through team members who work across all of the parishes in the State, meeting one-on-one with members, providers, and stakeholders. We listen, learn, and develop solutions to meet evolving needs that improve member health, member experience, and administrative and fiscal efficiency.

Leveraging the Strength of Our Organization

Healthy Blue represents a joint venture between Anthem, Inc. (Anthem), one of the nation's leading Medicaid managed care organizations, and Blue Cross and Blue Shield of Louisiana (BCBSLA), the largest and most trusted choice for health care in the State of Louisiana. As Healthy Blue, we combine BCBSLA's stability, brand recognition, and established local presence with Anthem's best-in-class Medicaid solutions and capabilities. Healthy Blue is uniquely positioned to understand the broad spectrum of health issues and concerns facing Louisiana,

This page is intentionally left blank

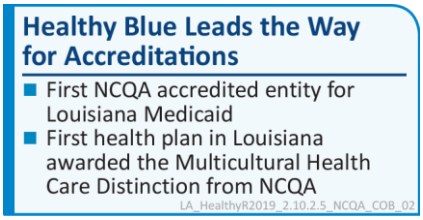
This page is intentionally left blank



2.10.2.5 NCQA Accreditation

At Healthy Blue, quality is foundational to everything we do. We continue to build on our accomplishments to provide a better health care experience for the enrollees (members) we serve. Our commitment to quality is demonstrated by our continued accreditation achievements. ***Neither Healthy Blue nor our affiliate health plans have experienced a suspension, denial, or revocation of accreditation.***

Healthy Blue Maintains "Commendable" NCQA Accreditation



Healthy Blue has been continuously accredited by NCQA since 2013 and our current certificate of accreditation is provided as Attachment 2.10.2.5-1, as well as certifications of accreditation in 20 other states where our affiliates operate. Healthy Blue currently holds a "commendable" status, as do many of our affiliates. Across Louisiana and our affiliates, ***we have a 100% success rate on accreditation applications***.

Healthy Blue was the first NCQA-accredited entity for Louisiana Medicaid, and we are proud to be the first health plan in Louisiana awarded the Multicultural Health Care Distinction from NCQA. This distinction is a symbol of quality in our organizational efforts to address the diverse needs of members across Louisiana. It recognizes our efforts to improve Culturally and Linguistically Appropriate Services (CLAS), and reflects that we meet or exceed standards in CLAS, including collecting race/ethnicity and language data, providing language assistance, being culturally responsive, upholding quality improvement guidelines of CLAS, and reducing health care disparities. In addition to Healthy Blue, 17 of our affiliates have achieved Multicultural Health Care Distinction from NCQA.

Healthy Blue's continued accreditation with NCQA underscores our ongoing commitment to quality and achieving the best outcomes for Healthy Louisiana enrollees. We constantly pursue solutions, innovations, and capabilities that maximize our performance and outcomes, and that support the Triple Aim framework and LDH's goals.

Our Healthy Blue members are served by NCQA-accredited disease management programs. Our organization's national disease management department holds NCQA Patient and Practitioner Oriented accreditation for asthma, coronary artery disease, congestive heart failure, COPD, depression, diabetes, HIV/AIDS, schizophrenia, and child/adolescent depression. Further, we recognize that NCQA has incorporated disease management into the new population health management standards that support the Triple Aim and the overall movement of the delivery system to holistic, fully integrated care. We follow these standards, which aim to encourage and reward health plans for aligning with the delivery system to achieve better population health outcomes.

Neither Healthy Blue nor our affiliate health plans have experienced a suspension, denial, or revocation of accreditation. Healthy Blue has completed one renewal cycle of both the NCQA Health Plan Accreditation and Multicultural Health Care Distinction, and our NCQA Health Plan Accreditation is scheduled for renewal in August 2019. We are fully prepared and expect to maintain or improve our accreditation status. We will continue to work diligently to sustain NCQA accreditation as part of our commitment to adhering to industry best practices so our Healthy Blue members receive the highest quality of services. Further, we will continue to collect, evaluate, and manage NCQA's rigorous health plan standards and use HEDIS® and other data measures to track and improve our performance. Figure 2.10.2.5-1 includes a list of all NCQA accreditations in the states where Healthy Blue and our affiliates operate.

Table 2.10.2.5-1. NCQA Accreditations for Healthy Blue and in States Where Our Affiliates Operate

State	Affiliate	Type of Accreditation & Status
Louisiana	***Community Care Health Plan of Louisiana, Inc., dba Healthy Blue***	Commendable, NCQA Health Plan with Distinction in Multicultural Health Care

**Our affiliate serves as subcontractor to MCOs in Minnesota and South Carolina, where those MCOs hold the accreditation and our affiliate performs delegated quality management functions.*

Healthy Blue Does Not Subcontract Behavioral Health Services

Healthy Blue does not use a material subcontractor to administer behavioral health (BH) services, which allows us to offer a truly integrated care management model that combines physical and BH care, allowing for better consistency and quality management and promoting a seamless member experience. Our ultimate parent organization, Anthem, Inc. holds Managed Behavioral Health Organization (MBHO) Accreditation, and scored 100% on associated standards. Organizations earn their NCQA MBHO accreditation by proving proficiency across standards that include Quality Management and Improvement, Care Coordination, Utilization Management, Credentialing, and Members' Rights and Responsibilities. We leverage this NCQA-accredited BH approach as part of providing services to Healthy Blue members in a seamlessly integrated manner through our local Care Management team.

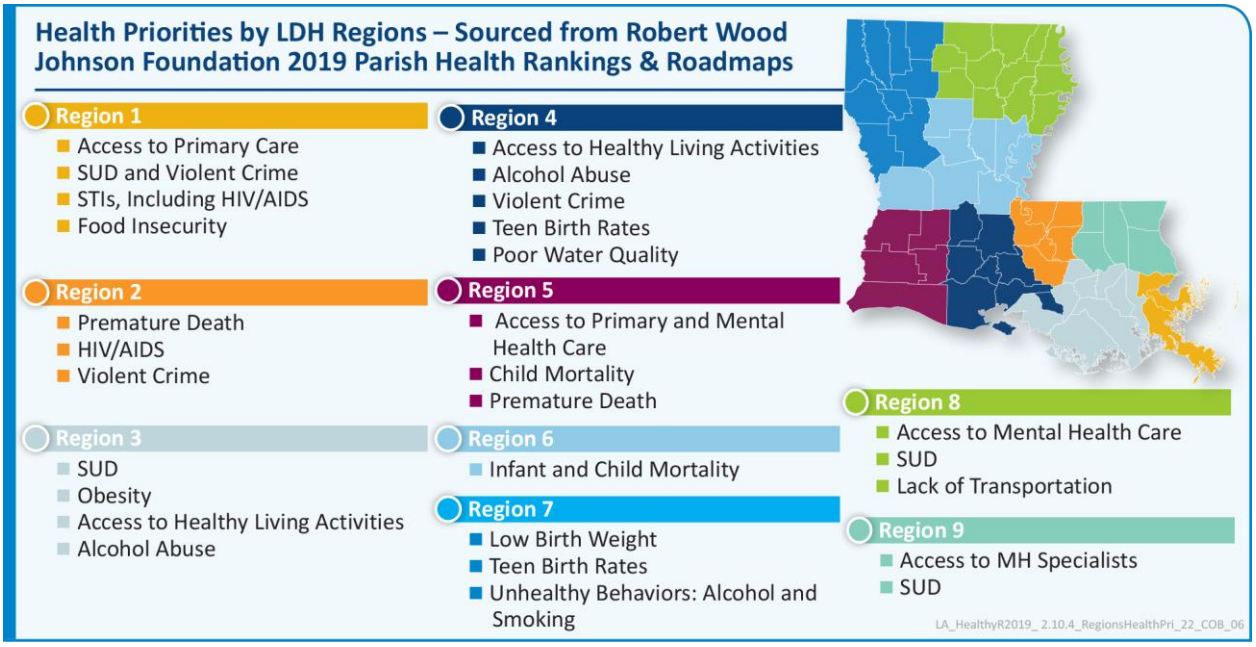
2.10.4 POPULATION HEALTH

2.10.4.1 Our Approach to Population Health Improvement

Healthy Blue's approach to population health management builds on our deep roots in the state and ongoing commitment to improving the health of Louisianans. We know that health is more than just the absence of illness — it is one's overall mental and physical well-being leading to a fulfilling life. Driven by enrollee (member) and community engagement, robust data informatics, integrated care management, and a commitment to quality, our population health program aligns with LDH's vision to improve the overall health rankings in Louisiana, by advancing health equity, increasing access, and removing barriers to health such as lack of stable housing and transportation, food insecurity, threats to physical safety and unhealthy environmental hazards. The key to our approach to population health management is our Healthcare Beyond program focused on social determinants of health (SDOH), such as affordable permanent or supportive housing and access to healthy, nutritious food and clean water, which impact the health and well-being of members and the communities in which they live.

Population health and its improvement over time is intrinsically connected to improved health equity and reduced health disparities. In Louisiana, parish health rankings indicate that poor health outcomes such as premature death and reported poor physical health days and mental health days, as well as negative health-related factors such as children living in poverty and teen births, disproportionately affect subpopulations of Black and Hispanic Americans.[1] America's Health Rankings of core measures in the state indicates that health disparities among Louisianans improved overall from 2017 to 2018.[2] However, population health-level data from our members, reflected in parish-level rankings, indicate clear health disparities and unique needs and gaps in care, preventive and acute. Additionally, Robert Wood Johnson Foundation[3] publishes an annual health rankings and roadmap for health priorities by LDH regions, as indicated in Figure 2.10.4.1-1. Healthy Blue, in partnership with community-based organizations and the Office of Public Health (OPH), has been and will continue to address these gaps through comprehensive population health services and programs.

Figure 2.10.4.1-1. Our Population Health Management Program Addresses Regional Needs Identified



[1] http://www.countyhealthrankings.org
[2] https://www.americashealthrankings.org/explore/annual/measure/Overall/state/LA
[3] http://www.countyhealthrankings.org

We are committed to partnering at a local level to address these priorities and nurture healthy parishes by supporting everyday needs. Healthy Blue's population health management program leverages a full spectrum of strategies derived from robust data and risk stratification, including Blue Cross and Blue Shield of Louisiana's (BCBSLA's) population health analytics that incorporate key data elements across multiple lines of business. We leverage this information to develop effective community-level and member-specific health promotion and prevention strategies along the care continuum — from care coordination and evidence-based condition-specific programs to episodic case management and our complex case management, based on the intensity of the member's and family's needs. Our multi-faceted program focuses on the unique needs of the individual from preventive to complex care, as well as an investment in programming and capacity to support the communities in which our members live. This is critical as we work to support LDH population health goals to transform health outcomes in Louisiana.

[redacted]

In accordance with the Model Contract, Section 2.6.1.1.1, Healthy Blue will develop a ***Population Health Strategic Plan*** aligned with the Louisiana Medicaid Managed Care Quality Strategy and submit it to LDH by March 1, 2020. Our current Population Health Strategic Plan provides us with a strong foundation. Our ***Population Health Management Workgroup***, including our Care Management, Utilization Management (UM), and Quality Management (QM) teams, focuses on four areas: keeping members healthy; members with emerging risk; patient safety or outcomes across settings; and multiple chronic illnesses. Informed by public health strategies such as using logic models to guide program development and link activities to measurable outcomes, we will build on our current efforts, continuing to listen to stakeholders to better understand their needs and preferences, and using data-driven analyses to understand the social, economic, familial, cultural, and physical environmental factors that are related to the distribution of health outcomes in Louisiana. Our plan will include specific strategies and tactics to address all of LDH's health priorities and use reliable measures to demonstrate our effectiveness in improving population health over time.

Identifying Baseline Health Outcome Measures and Targets

Our approach to population health management is data-driven and built on an understanding of multiple factors (social, economic, familial, cultural, and physical environment) and how these relate to the distribution of health conditions, health-related behaviors, and health outcomes among members in different geographic locations and diverse demographic groups (for example, socioeconomic, racial/ethnic, or age) in Louisiana. We know that measuring and analyzing data is critical to good decision-making and the development of meaningful interventions and assessing their impact on members' health outcomes.

Outcome Measures

Healthy Blue's long-term use of LDH Quality Performance Measures (RFP Attachment G), and participation in LDH Performance Improvement Projects (PIPs) to track health needs and health improvement of over 258,000 Louisiana Medicaid members gives us the data necessary to establish baseline health outcomes and identify targets for improvement. Our value-based programs and performance improvement and practice transformation strategies incent providers to align with and maximize opportunities for outcomes improvement. [redacted]. As a trusted partner of LDH, we commit to including new incentivized measures and related benchmarks based on 2018 performance, clinical priority, validation of LDH agency-wide priorities, and validation of technical specifications for state-specific measures.

Our collaboration with BCBSLA provides an expanded opportunity to use social mapping technology to capture community assessment results and identify areas of greatest need and opportunity for community-level interventions to improve health. Healthy Blue "adopted" Bastrop after identifying a roughly 6% increase in diabetes rates over a 10-year period. This increase, coupled with evidence of inadequate and unstable housing and poor access to nutritious food options, led to a collaboration between Healthy Blue and the City of Bastrop. Bastrop has a population of just over 25,000, nearly a quarter of whom are under age 18 and almost 20% whom are over age 65. Twenty-six percent of the population say they are in poor or fair health — 23% smoke, 41% are obese, 15% have limited access to healthy foods, and 40% get inadequate sleep. About 40% of the children in Morehouse Parish live in poverty.[4]

Healthy Blue's Community Service Partnership with the City of Bastrop

The City of Bastrop's 2018 partnership has been nothing short of fantastic!... Bastrop's Healthy Blue partnership has enabled the City of Bastrop to provide effective community outreach and support to assist Bastrop resident access to health care screenings and services beyond what is traditionally expected. In 2019, the City of Bastrop hopes to build on its Healthy Blue relationship...
– **Henry C. Cotton**
Mayor of Bastrop
Morehouse Parish
LA_HealthyR2019_2.10.4_Bastrop_22_TST_04

As we work with communities like Bastrop to improve population health, we will partner with the State to stratify quality measures by race/ethnicity and rural/urban status to narrow health disparities. This is a critical step toward advancing specific interventions that address key influencers of health.

Measuring Population Health

Annually, we conduct a population analysis which considers the cultural and socioeconomic needs of our membership. This analysis brings together internal and external data that we continuously review to inform our population health programs, identify baseline outcomes, and set targets so that we can adjust programs as needed to improve care and services. Our data sources include:

- Member demographic information, including age, gender, and self-reported race, ethnicity, and disability status
- Cultural needs and assessment reports, and social determinants such as literacy reports and crime rates
- U.S. Census Reports: U.S. census data on residents that speak a language other than English
- CAHPS® survey results on respondent race supplemental question related to satisfaction with doctors representing cultural and language needs
- Utilization data: top inpatient and outpatient diagnoses and reports on specific diseases/conditions
- Regular meetings with advocacy groups regarding the health concerns of specific populations

Setting Meaningful Targets

Our targets for tracking our members' measurable health improvements align with NCQA Quality Compass Scores and targets set by LDH related to Louisiana-specific measures. For example, we monitor 17P usage for members at high risk for preterm birth. Targets for non-HEDIS measures use baseline performance data, and goals are set using a 95% +/- confidence interval for the targeted population, or as set forth by LDH. We also look at benchmarks and targets from our affiliates in 21 other markets to better understand where our Louisiana members stand in comparison and identify best practices or innovations that might be suitable for adoption in Louisiana.

Measuring Population Health Status and Identifying Subpopulations

To measure population health status, Healthy Blue reviews all available data from the population/community level and the individual/member level. At the population level, we capture and review multiple data elements from community health needs assessments (HNAs), quantitative and qualitative data from primary and secondary sources about demographics, health needs and gaps in care, and data elements captured via social mapping tools and predictive modeling. At the individual/member level, we use multiple data elements from sources including claims and encounter data (financial) and utilization management data (under- and over-utilization), risk scoring, HNA results, and provider referral and member self-referral, balancing data sources to ensure a comprehensive picture. We then pinpoint the SDOH and clinical needs of our members to identify areas of greatest need for population-based interventions, as well as targeted programs to meet the needs of individuals.

Our ***Quality Improvement Program*** measures the success of our interventions for the population and the individual from initiation through implementation to track the health outcomes achieved. We can identify health outcome trends and commonalities in need of improvement, specific subpopulations most affected by disparate health

[4]http://www.countyhealthrankings.org/app/louisiana/2019/rankings/morehouse/county/outcomes/overall/snapshot

outcomes, and key determinants impacting health among those specific subpopulations. Using this comprehensive approach, we identify opportunities for targeted community and individual-level interventions.

In Louisiana, we have systematically assessed data about our population and members for over seven years, successfully leveraging lessons-learned to continually improve our data collection and analytic processes to identify high-risk subpopulations of members.

Healthy Blue actively employs several strategies to characterize, identify, and analyze our members with specialized and chronic care needs. In particular, claims data is periodically and systematically reviewed to identify member subgroups with high-risk characteristics. We use four major strategies of data analysis:

- Predictive Modeling using the Health Plan's Chronic Illness Intensity Index (CI^3)
- Ranking members from those with the highest use of emergency department (ED) and hospitalization to the lowest, then identifying statistical outliers for care management
- Identifying and analyzing trends related to chronic and wellness gaps in care, childhood screenings (including EPSDT), pre- and post-natal screenings, and ED utilization and hospital rapid readmissions
- Evidence-based literature reviews to identify national, Louisiana, and parish trends

Identifying Subpopulations to Target with Health Initiatives

An integrated, multidisciplinary care group — including associates from our Care Management, QM, and Network teams — is responsible for ensuring a comprehensive review of data. This group, headed by Dr. Cheryll Bowers-Stephens, BH Medical Director, holds administrative rounds to review population health data and identify areas for improvement. Through these reviews, we identify disparities in outcomes among members and specific subpopulations that may benefit from targeted interventions. In 2018, this group identified disparities and subpopulations affected by them and implemented the initiatives in Table 2.10.4.1-1.

Table 2.10.4.1-1. Subpopulations Identified and Health Initiatives Developed and Deployed

Subpopulation	Data Used to Identify Subpopulation	Targeted Initiatives and Strategies
Neonates with high-risk postpartum conditions	• Enhanced Inpatient Member Interaction (EIMI) data • Care management engagement/QM maternity PIP data • Health risk assessment, including key SDOH elements and prior pregnancy history	• Neonatal Intensive Care Unit (NICU)/care management intervention — increase 17P efforts • Deploy Navigators to meet face to face • Nurse family partnership referrals • Appropriate Emergency Room Utilization (AERU) program • Elli™ population health platform
High utilizers and rapid re-admitters of inpatient care and ED visits	• CI^3 reporting • Behavioral health (BH) dashboards • Short-length stay reporting	• Rapid Re-admitter program, including screening for homelessness • High Outreach for Patient Engagement (HOPE) • Pharmacy programs • Elli population health platform
Children < 6 years old who may be subject to over-prescribing for BH issues	• Claims and pharmacy reporting	• Parent and Child Interaction Therapy (PCIT) training for providers • ADHD PIP and ADHD Toolkit • Elli population health platform

As we did in Bastrop, Healthy Blue looks beyond clinical diagnoses to understand the impact of SDOH. [redacted]

INNOVATION [redacted]

Beyond analyzing quantitative data, we learn of members' unmet needs through Member Services Representatives, BH Crisis Line Representatives, 24/7 Nurse Line calls, and outreach activities by Healthy Blue peer-certified Outreach Specialists and Community Health Workers (CHWs). We also regularly engage with community organizations and advocacy groups to understand the broader needs within a specific community, such as the LGBTQ community and individuals with physical and emotional disabilities.

2.10.4.1.3 Identifying Key Determinants and Strategies for Targeted Interventions

To develop effective prevention and population health programs, we examine the distribution of outcomes across the population and identify the key determinants that drive these outcomes. We use data analytics, through tools such as Elli, and engage members, providers, and stakeholders in our shared communities.

In 2018, we conducted "listening sessions" and focus groups across the state on our behalf to gather feedback about Medicaid enrollees' unmet needs. The focus groups, conducted by a Hudson-certified business, solicited information about day-to-day life experiences and explored how enrollees use health benefits and community services. Focus group participants identified financial stress and instability as their primary barrier and reported that they value benefits that mitigate this stress, such as flexible funds. Results from the sessions informed our understanding of key SDOH impacting our members, and our development of programs and benefits described in our response to Section 2.10.3, Enrollee Value-Added Benefits.

First, We Listen

Our ***Community Connectors*** are liaisons between parishes, public health, and Healthy Blue. They identify opportunities to connect members with Healthy Rewards, VABs, and care management.

LA_HealthyR2019_2.10.3_CommConnectors_67_COB_02

Innovative Strategies in Housing

[redacted]

Healthy Blue Helps Members in Need of Stable Housing

In 2018, Healthy Blue helped members submit **82** PSH applications to the state. That same year, **52** members were selected for housing. As of Q1 2019, 446 Healthy Blue members are currently in PSH and **35** in Section 811 Project Rental Assistance (PRA) program.

In a case of just one Healthy Blue member housed in PSH, we realized a cost savings of over 63% per month while the member was housed, primarily due to savings in inpatient costs.

LA_HealthyR2019_2.10.4_Housing_22_DP_06

Homelessness Prevention

Our "upstream" homelessness prevention strategies wrap extra supports (low-risk case management or Community Health Workers (CHWs)) around those members who research shows are statistically at high risk of homelessness, such as young mothers; households with children between ages 0-6; members living in a hotel, at a friend's house,

bouncing between family members, or who need home modifications; and members who have experienced prior homelessness.

Identifying these members, offering care management and peer supports, and being prepared to provide financial or additional housing supports is crucial to helping them avoid potential housing instability and homelessness.

Homeless Member Engagement Program

INNOVATION

Many of Healthy Blue's highest utilizing members experience chronic homelessness, often in combination with comorbid health diagnoses such as serious mental illness (SMI), SUD, and complex physical health conditions. These members over-utilize inpatient and ED facilities to meet basic needs. Based on pilot programs in our affiliate health plans, we are launching a Homeless Member Engagement pilot program focused on housing our highest utilizers by collaborating with select housing providers, landlords, and BH providers to create radically flexible and individually tailored plans. Our goal is to "think outside of the box" with interventions that may include basic home modifications, landlord incentives, rent payment, peer support, care management, and other wraparound services.

Community Level Programs

Landlord Engagement Program. Healthy Blue will provide financial support for qualifying landlords to participate as part of the interdisciplinary team in ending homelessness and helping families remain stably housed. The program will provide flexible funding to landlords for:

- **Risk mitigation funds.** Reimbursement for lost rent or damage to units in excess of the security deposit
- **Stability bonuses.** Financial incentives at lease signing and lease renewal for serving high-barrier households
- **Upfitting costs.** Funds for small repairs to help pass inspection and use rental assistance programs
- **Barrier Buster Fees.** Flexible funding to overcome barriers to moving into a new unit
- **Community Landlord Liaisons.** Dedicated staff or agencies who provide customer service

Youth Rapid Rehousing Program for transition age youth ages 18 to 25 who are experiencing homelessness or transitioning out of foster care. We will partner with a housing services provider in the Baton Rouge region to fund the development or expansion of housing opportunities available to transition age youth.

Addressing Access to Nutritious Food and Food Insecurity

Since one in six Louisiana households struggle with food insecurity and Louisiana ranks toward the bottom of all states (45th) in the prevalence of obesity[5], Healthy Blue offers innovative programs to address access to healthy, nutritious foods to help improve these Louisiana outcomes. We are working with providers and communities to deploy a multi-pronged strategy aimed at improving access to healthier foods and decreasing reliance on convenience foods.

Food Insecurity Provider Incentive Program (FIPIP)

Healthy Blue is partnering with providers in the top 7 parishes with childhood food insecurity to assure Healthy Blue members have access to nutritious food, and make sure no child goes to bed hungry. Our Z-Code Incentive Program will financially incent our primary care providers (PCPs), OBs, and BH professionals to proactively evaluate Healthy Blue members' food security needs and refer those in need to local food banks. Providers will be asked to administer a short, two-question Hunger Vital Sign screening to our members. Upon completion of the assessment, providers can submit diagnosis code Z59.4 (Lack of adequate food and safe drinking water) on their claim form to receive their incentive. We will run claim reports to identify Healthy Blue members who received a Z59.4 diagnosis and send them to our Care Management team for outreach to provide assistance with appropriate services and interventions. In 2019, we will automate alert capability into our care management system, and in Member 360°SM for the members' PCPs, to trigger intervention and referrals.

LA_HealthyR2019_2.10.4_Z-Code_22_COB_04

Increasing Capacity for Fresh Foods

Recognizing the critical role that local food pantries play in addressing food insecurity, Healthy Blue invested in commercial grade refrigeration units at 10 pantries across the state to help them stock fresh foods. As part of our partnership with Louisiana Community and Technical College System (LCTCS), we also provided six refrigeration units to support pantries onsite at LCTCS campuses. Almost half of America's college students experience food insecurity[6] and providing supports for LCTCS students such as expanded food pantries and the Next Steps scholarships help them stay engaged in their education.

Building Healthy Habits through Education

Healthy Blue is focused on getting kids excited about fresh fruits and vegetables and helping parents find easy ways to feed their families nutritious foods to reverse trends in diet-related diseases.

---

[5] https://www.labudget.org/2018/09/food-insecurity-on-the-rise-in-louisiana/ and https://www.americashealthrankings.org/learn/reports/2018-annual-report/state-summaries-louisiana

[6] http://studentsagainsthunger.org/wp-content/uploads/2016/10/Hunger_On_Campus.pdf

- Since 2016, we have sponsored the Alexandria Farmer's Market, which encourages kids to try new fruits and vegetables. Our sponsorship added a Kids Club to teach kids about shopping, seasonality, and healthy eating.
- Through the Anthem Foundation, we funded Edible Schoolyard New Orleans at five locations at First Line Schools. Edible Schoolyard builds culturally diverse, intergenerational, and pluralistic communities of staff and volunteers committed to teaching, working, and growing together.
- Healthy Blue will bring the Green Bronx Machine (GBM) program to 20 Louisiana schools. GBM features year-round hydroponic tower gardens to engage children in growing vegetables in the classroom. This program has demonstrated increased test scores and attendance and gets kids excited about eating fruits and vegetables.
- To help support parents, Healthy Blue will work with Share Our Strength to promote resources available through their Cooking Matters program. Cooking Matters supports skill development to make cooking nutritious foods easy and provides digital meal planning and recipe tools, including an app and quick online videos.

Addressing Transportation Needs

Healthy Blue has been addressing transportation needs to improve the health of our members in Louisiana for over seven years and brings relevant Louisiana experience to our transportation strategy. While we continue to focus on expanding access to transportation, we also continue to look for opportunities to bring services to members. We partner with community organizations to provide mobile screenings, such as the Vision to Learn program that brings vision screenings and glasses to schools, and we continue to invest in telemedicine strategies. Healthy Blue has telemedicine programs that address both the physical and BH needs of our members, such as LiveHealth Online (LHO), currently available for physical health and soon to be available for BH, and OneTelemed to ensure 7- and 30-day follow-up appointments for members with BH crises.

[redacted]

Physical Safety

Crime and violence affecting individuals' physical safety can lead to premature death and cause non-fatal injuries, undue emotional distress, and reduced quality of life because people may be reluctant to engage in outdoor physical activity, contributing to higher body mass index scores and obesity. Children and adolescents exposed to violence are at risk for poor long-term behavioral and mental health outcomes throughout their lives, and Louisiana ranks at the top of all states (48th) with high rates of children experiencing at least two Adverse Childhood Experiences (ACEs). Healthy Blue supports the ***Playworks program*** to increase opportunities for physical activity and safe, meaningful play in Orleans and Jefferson Parishes. We will fund the program to expand in existing parishes and initiate new programs in East Baton Rouge and Shreveport Parishes. The program takes a proactive approach to bullying prevention and is focused on changing the underlying school environment by promoting respect, kindness and inclusion, and shifting school culture.

Healthy Blue staff and network providers can make a difference in the physical safety of our members through new trainings described in Table 2.10.4.1-2.

[redacted]

[redacted]

We have sponsored additional trainings and partnerships in the past, including a collaboration with Southern University at New Orleans (SUNO), and the Children's Bureau of New Orleans, coordinated training program to improve the trauma-informed system in Louisiana and to assist the Department of Child and Family Services (DCFS) in its mission to become a trauma-informed organization. We have also established collaborations with organizations dedicated to ensuring physical safety and ending interpersonal violence such as The Butterfly Society and The Louisiana Coalition Against Domestic Violence.

Care Management for Key Determinants of Health

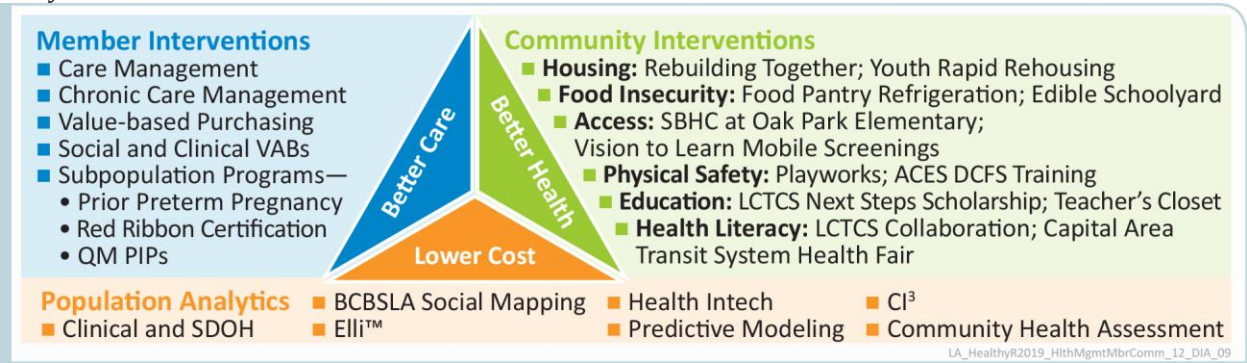
Healthy Blue supports members facing unmet social needs through our Care Management team, who will work with them to access care and service needs. Through person-centered care plans, CMs work with members, families or natural supports, and members' PCPs, building from the results of the HNA through the comprehensive assessment and care planning process to determine how they want to live their lives and identify the supports they need to achieve their goals.

[redacted]

2.10.4.1.4 Developing Integrated and Comprehensive Population Health Initiatives

Our multi-disciplinary care team reviews data, identifies areas in need of improvement, and develops, adapts, and deploys targeted population health programs. We know that our success improving member health depends on streamlined, comprehensive cross-functional collaboration of our QM, UM, Care Management, Pharmacy, Network, and Member Services teams. As outlined in Figure 2.10.4.1-2, our population health strategy weaves together programming across the continuum of member and community interventions, including provider education and incentives, targeted member supports, and community partnerships. These interventions, informed by diverse population analytics and LDH goals, work together to achieve the Triple Aim and ultimately, help change the health trajectory of Louisianans.

Figure 2.10.4.1-2. Population Health Strategy Incorporates Member and Community Interventions and Population Analytics



INNOVATION

As an example of our population health strategy, Healthy Blue is layering multiple approaches to help address housing and food insecurity and support measurable improvements. As outlined in Figure 2.10.4.1-2, population analytics indicate that housing and food insecurity are both opportunities for improving health outcomes through social interventions. Building from our existing

framework for connecting members with supports and services, we are expanding our identification strategy through two new provider incentive programs:

- [redacted]
- [redacted]

2.10.4.1.5 Other Considerations for Population Health Strategies

Healthy Blue, as part of a national organization with health plans operating Medicaid and similar programs in 22 markets, benefits from the sharing of best practices and lessons learned across a broad spectrum of populations and geographies.

Youth Rapid Rehousing Program

Healthy Blue is developing this program for Louisiana based on a partnership between our affiliate plan in Kentucky and Welcome House. In 2018, with the help of our Kentucky affiliate, Welcome House launched a program to support transition age youth ages 18-24. The Opportunity Youth Housing Initiative provides transitional housing supported by a Care Manager, access to food and hygiene items, and wraparound services focused on developing employment and life skills. The goal of the partnership is to stably house transition age youth to prevent them from becoming chronically homeless.

Homeless Member Engagement Program

Our Indiana affiliate partnered with the Indianapolis Mayor's office, a housing owner/manager, and an FQHC to develop a short-term housing program focused on transitional housing, connections to community services, physical health and BH services, and onsite peer support and care management. As of the end of 2018, the program has served 112 members, with 92% voluntarily participating in care management and life skills and 68% engaging with health care services. Initial results showed a 22% average decrease in total per member, per month cost, with a decrease in crisis utilization and an increase in preventive and chronic disease care and prescriptions. Based on the success of Indiana's program, Healthy Blue's Homeless Member Engagement program will target a similar population and leverage the approach to member support and engagement.

2.10.4.2 Population Health Strategies — Year 1 Milestones and Timeframes

Healthy Blue tracks, analyzes, and reports on member health outcome data. To measure population health, we know it is critical to develop plans with reasonable targets and establish detailed milestones that mark progress toward targets over time. Table 2.10.4.2-1 details population health strategies with milestones and timeframes for different LDH priorities. The table is not exhaustive of all Healthy Blue efforts; however, it demonstrates our capacity to clearly identify and measure critical, progressive milestones.

Table 2.10.4.2-1. Array of Population Health Priorities and Strategies for Healthy Blue Offering

Strategy	Description	Milestones	Timeframe (Year One)
Reduction of Key Communicable Diseases: HIV, HCV, and Syphilis			
Primary Care Training Program	Rural health training initiative, in partnership with Access Health AIDS Education & Training Center (AETC), through a combination of in-person and online trainings, publications, and direct mentorship.	• 2% Year-over-year (YOY) increase in HIV Suppression Rate • Increase HIV testing and provision of PrEP among priority populations	• Q2 • Q4
Reduce Infant Mortality			
Identification of High-risk Mothers with a	High-risk mothers who have had a previous preterm birth and are currently pregnant enroll into care management,	• Enroll 50% of identified high-risk moms	• Q4

Strategy	Description	Milestones	Timeframe (Year One)
Previous Pre-term Birth Engagement in Care Management	telehealth/at-home visits, or local care coordination to ensure appropriate referrals are made.	• 2% YOY decrease in low-birth weight (LBW) Measure	
Maternal Mortality and Morbidity			
New Baby, New Life℠	Our New Baby, New Life program is comprised of evidence-based member and provider interventions, and includes specialized interventions for women with high-risk pregnancies, including individualized OB care management focusing on an individual woman's specific risks and needs.	• 50th NCQA Percentile for Prenatal Care (PPC) • 2% YOY Improvement for Postpartum Care (PPV)	• Q4
Opioid Use Disorders			
Opioid Prescriber Management Program	The program will help reduce the opportunities of misuse of opioid treatment, including the development of opioid use disorders, by targeting outlier provider of opioid prescribing patterns, as well as assisting members in gaining access to more clinically appropriate treatment.	• Reduction of polypharmacy • 85% of providers identified by program receive intervention	• Q1-Q4
Obesity			
[redacted] Making Fitness Fun	In [redacted] Healthy Blue's Making Fitness Fun partners with a local organization to bring Zumba® classes into the community.	[redacted]	[redacted]
Diabetes			
Patient Safety and Clinical Pharmacy Services Program – Diabetes	Population health analysis showed that erratic ED use of diabetes medications is the top reason for ED visits and readmission. Members will receive patient education and comprehensive diabetes targeted intervention through care management and community outreach.	• 2% YOY increase in diabetic retinal exams, neuropathy and A1C testing	• Q1-Q4
Hypertension			
Hypertension Chronic Condition (HCC) Management	The purpose of the HCC management program is to provide secondary and tertiary prevention interventions based on a comprehensive, multidisciplinary, system-wide approach that encompasses evidence-based guidelines, provider practice, and member empowerment strategies to improve members' health outcomes. We also provide education to members about medication adherence and monitor this through our medication therapy management (MTM) program.	• 2% YOY Increase for Controlling High Blood Pressure (CBP) Measure	• Q1-Q4
Cardiovascular Disease			
Congestive Heart Failure (CHF) Chronic Condition Management	This program provides secondary and tertiary prevention interventions based on a comprehensive, multidisciplinary, system-wide approach that encompasses evidence-based guidelines, provider practice, and member empowerment strategies to improve members' health outcomes.	• 2% YOY Decrease in Heart Failure Admission Rate • 2% Improvement for (PBH) Measure • 2% Improvement YOY for SPC/SBD	• Q1-Q4
Tobacco Cessation			
[redacted]	[redacted]	[redacted]	[redacted]
Early Childhood Health and Development, Including ACEs			
Playworks Program	Healthy Blue has supported the implementation of the Playworks program to increase opportunities for physical activity and safe, meaningful play in Orleans and Jefferson Parishes. We will fund the program to expand in existing parishes and initiate in East Baton Rouge and Shreveport Parishes.	• Expand in existing parishes (Orleans and Jefferson) • Initiate program in new parishes (East Baton Rouge and Shreveport)	• Q2 • Q4
Additional Prevention and Population Health Management Programs to Encourage Improved Health and Wellness Among Members			
Addressing Food Insecurity – Refrigeration	Healthy Blue will address issues of food insecurity in areas of high need by supplying commercial refrigeration to 10 food banks across Louisiana for fresh produce storage.	• Identify areas with high rates of food insecurity • Donate 10 refrigerators to food banks in identified areas	• Q4

2.10.4.3 Our Experience Utilizing SDOH Data to Improve Health

Healthy Blue's ***Healthcare Beyond*** program to address SDOH is driven by our data analytics activities, leveraging multiple data sources and specialized analytical tools. While there is increasing attention on SDOH, BCBSLA and Healthy Blue have continually focused on member *and* community level social determinants in Louisiana as a critical component of integrated care and healthy communities.

Our Comprehensive HIV Intervention Addresses SDOH

Louisiana has one of the highest U.S. metropolitan rates of people diagnosed and living with HIV, with New Orleans-Metairie and Baton Rouge ranking second and third respectively. African-Americans in Louisiana are disproportionately affected by HIV, presenting 72% of new HIV cases, 74% of new AIDs cases, and 68% of all people living with HIV in the state. While the majority of people living with HIV (75%) are urban residents, a quarter (25%) live in rural areas, and as of 2017, 50% are over age 50.[7] A full 28% of Louisianans living with HIV are not in care, with those living in the Lake Charles and Monroe regions least likely to be in care.[8]

HIV Intervention Incorporates Prevention and Housing Strategies

Intervention. Our care management strategy for members living with HIV/AIDS includes interventions to address adverse SDOH they experience. We developed and continue to implement a high-touch care management intervention that prioritizes face-to-face member engagement. It is a multi-pronged approach that includes clinical and pharmacy, quality, and provider support and incorporates approaches to address members' housing needs. We have built relationships with "Continuum of Care" (COC) networks to help members experiencing homelessness directly access regional housing-related resources through coordinated entry, distinct from state-run PSH programs.

We established and sustain ongoing partnerships with organizations that offer housing such as HIV/AIDS Assistance for Region Two, Inc. (Baton Rouge), Acadiana Cares (Lafayette), Philadelphia Center (Shreveport), and Crescent Care (New Orleans) to identify all potential options available for Healthy Blue members. We included a leadership engagement strategy, reaching out to local organizations, such as NO AIDS Task Force in New Orleans (urban), GO CARE in Monroe (rural), and HEROES in Columbia (rural), inviting them to provide input from their communities and organizations. We plan to establish similar relationships in Baton Rouge, Lake Charles, and Shreveport.

Evaluation. To assess the effectiveness of our intervention, we gathered data related to housing and health outcomes. We kept track of the number of state PSH applications that members had completed and submitted with the support of our Supportive Housing Liaison, as well as the total number of members with HIV enrolled in the PSH program.

Health Outcomes. The results from our evaluation of the HIV intervention demonstrated improved health outcomes. For 128 members receiving care from Crescent Care providers, ***77% were retained in care***. As of Q3 2017, 72% reported successful viral suppression, a rate exceeding the HIV Affinity Group Action Plan goal of 70%.

SDOH Outcomes. As of September 2018, 23 members living with HIV were enrolled in the PSH program.

How Lessons Learned from This Intervention Can Be Applied to Other LDH Population Health Priorities. Through this initiative, we gained first-hand knowledge of the SDOH challenges facing our members with HIV and gained lessons learned knowledge as we helped them to navigate housing and access to providers and medication. CMs became more attuned to working with community partners and collaborating to

Along with five other payer organizations, Healthy Blue has been working with Shatterproof, an advocacy organization focused on improving the quality of SUD treatment at a national level. A component of this work includes market level pilots which will measure evidence-based care delivery elements that are shown to improve patient outcomes by using information from three sources: insurance claims, treatment program surveys, and consumer experience. Louisiana is one of five states that will be partnering with Shatterproof to assist with the creation of a provider rating system for addiction treatment programs.

identify correct funding streams for benefits and services. This knowledge can be applied to other LDH population health priorities.

2.10.4.4 Collaborating with Community-based Organizations and the Office of Public Health

Healthy Blue is committed to continuing to build strong relationships with community-based organizations and the OPH to coordinate population health improvement strategies. Our Healthy Blue offering will draw on our Louisiana knowledge and the national experience of our affiliate health plans to leverage past successes and build improvements in population health outcomes, as shown in Table 2.10.4.4-1 which outlines initiatives previously deployed by Healthy Blue and community-based organizations and OPH.

Table 2.10.4.4-1. Initiatives to Collaborate or Align with Community and Office of Public Health Programs

Objective, Methodology, and Outcome
Healthy Blue-Ribbon Event
Objective: Establish collaborations with school-based health centers.
Methodology: Healthy Blue (through our QM department) & School-based Health Centers collaborate to organize events to educate and inform students of the importance of wellness visits, relationships with their PCPs, and overall health, as well as encourage to complete their annual wellness visits.
Outcomes: Well-child Visits at the 3rd, 4th, 5th, and 6th years; Adolescent Well-child Visits; member education, and gap closure.
Blue Bikes and Helmet Donations
Objective: To support local efforts to increase physical activity by making fitness fun, and to address transportation challenges.
Methodology: Healthy Blue donated 1,000 bicycle helmets to BCBSLA's Blue Bikes program. Additionally, Blue Bikes is continuing its work with local bicycle safety and advocacy organization Bike Easy. The two organizations are partnering to encourage more community-based engagement in bike share, promote road-sharing safety, and advocate for enhanced, more secure biking infrastructure in the city.
Outcomes: 1,000 bicycle helmets distributed to community members in New Orleans in 2018.
Drug Take Back Day Sponsorship to Reduce Risk of SUD
Objective: To collaborate with community partners to reduce the risk of SUDs in Baton Rouge.
Methodology: Healthy Blue and BCBSLA are partnering with the Drug Enforcement Administration, the Baton Rouge Health District, Our Lady of the Lake, Woman's Hospital, Baton Rouge General, Ochsner, Louisiana State Police, Baton Rouge Fire Department, Acadian Ambulance, Little Caesar's Pizza, the Louisiana Society of Health System Pharmacists, and the Federal Bureau of Investigation to sponsor a Drug Take Back Day on April 27, 2019. Informational booths and activities to engage both adults and children will be included.
Outcomes: 156 people attended the 2018 Drug Take Back Day event and dropped off 600 pounds of unwanted, unused prescriptions.
Playworks Program to Increase Opportunities for Physical Activity and Safe, Meaningful Play
Objective: To improve the health and well-being of children by increasing opportunities for physical activity and safe, meaningful play.
Methodology: Healthy Blue is supporting Playworks to combat bullying in elementary schools in the Orleans, Jefferson, East Baton Rouge, and Shreveport Parishes. Playworks operates in Orleans and Jefferson Parishes, providing recess and anti-bullying strategy support to schools serving 2000 students. Healthy Blue will fund Playworks to expand their reach in these parishes and establish a program in East Baton Rouge. Playworks will provide six full day trainings, two in each district for up to 40 teaching staff from more than one school attending, a subscription to Playworks University, which contains online courses and materials to assist safe play and anti-bullying strategies, and six follow-up face-to-face consultation visits in each district.
Outcomes: Healthy Blue will fund the Playworks expansion in existing parishes (Orleans and Jefferson) and implementation in two new parishes (East Baton Rouge and Shreveport), making four parishes by the end of 2019.

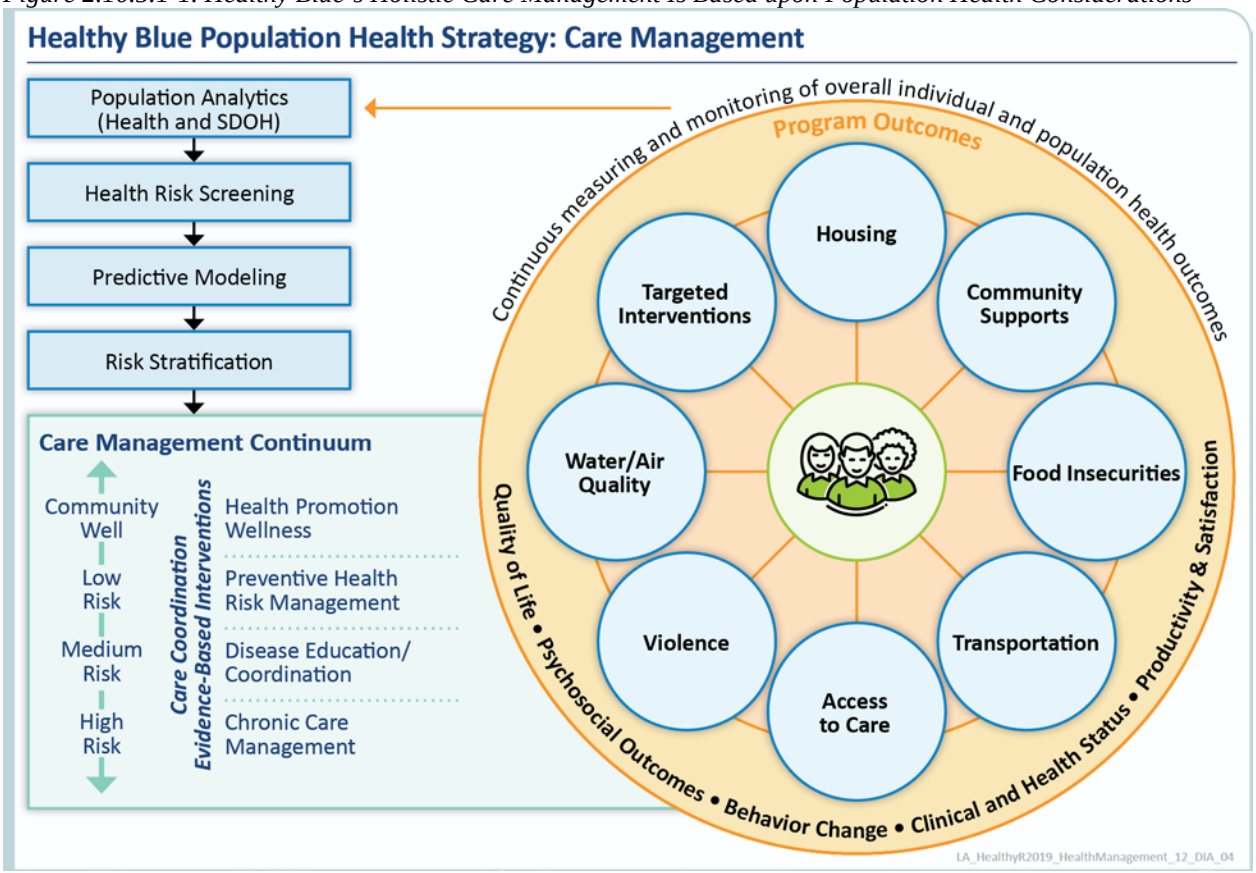
2.10.5 CARE MANAGEMENT

2.10.5.1 Healthy Blue's Approach to Care Management

Healthy Blue's care management mission is to support enrollees (members) in leading healthy lives and to be integrated into healthier communities. To create healthier communities, we support high-value care and service excellence. With members, we take a person-centered, holistic approach; build partnerships with community resources; work to identify and resolve their barriers to care; and facilitate equal access to health care for all. For providers, we support evidence-based practices and ongoing integrated care; consolidate therapeutic and social efforts on behalf of members; and reduce administrative burdens. For members and providers, education about mental health and substance use disorder and general health care are equal to the physical health (PH) care and social supports in our integrated care management model, delivering high-quality, cost-effective care that pursues all three domains of the Triple Aim.

Healthy Blue has been improving access to comprehensive primary care, specialty care, pharmacy, behavioral health (BH), and social supports and services in Louisiana since its inception in 2012. Our plan is influenced by the 85 years of experience and local expertise of BCBSLA, and by the resources and knowledge of Healthy Blue's affiliate health plans in 21 other markets. As of 2015, Healthy Blue is a fully integrated MCO in its organizational structure and operational functions: claims, quality data, electronic health records (EHR), clinical documentation systems, and BH and PH management. Through the years, we have continued to invest in programs and capabilities such as predictive data analytics that include social determinants to enhance our ability to improve the health of every population in Louisiana, at every level of acuity, as illustrated by Figure 2.10.5.1-1. As described in Section 2.10.4, Population Health, Healthy Blue's care management, quality management, and utilization management are integral components of population health management.

Figure 2.10.5.1-1. Healthy Blue's Holistic Care Management Is Based upon Population Health Considerations



Integrated Care that Improves Population Health and Cost Outcomes

First, We Listen [redacted] Our ability to listen and respond to the communities we serve improves outcomes. For example, Louisiana has the highest incidence of ADHD diagnoses in the country, according to the Centers for Disease Control.[1] Our Behavioral Health Medical Director, working to decrease fragmentation and improve integration of providers and care settings, developed and designed an ADHD training program with the community after receiving feedback through our Clinic Days program indicating an opportunity to better assist members and their families. Additionally, we conducted a Performance Improvement Project to coordinate integrated PH and BH service delivery along with pharmaceutical monitoring, identifying members of all ages with diagnoses of ADHD, depression, or anxiety in one of 10 primary care practices. Our ADHD training program achieved the following results:

- ***8% increase in members diagnosed with ADHD,*** stratified by age and foster care status, with documentation of BH pharmacotherapy (ADHD medication, antipsychotic medication, or other psychotropic medication)
- ***Use of a validated ADHD screening instrument increased from 22.7% to 46.67%***

Another vital aspect of our care management approach is outreach, which is described in Sections 2.10.4, Population Health. We have internal Outreach Specialists in Regions 1, 2, 4, 6, 7, 8, and 10 and in parts of Region 9 who are trained in peer support principles. We work with superutilizers of PH and BH services; external Navigators who focus on superutilizers with BH diagnoses and are trained in the principles of the Harold P. Freeman Center for Patient Navigation; and in 2020, will enhance our Community Outreach Strategy to deploy certified Community Health Workers (CHWs) for local care coordination to expand our current footprint. As illustrated by Roberto's story, Navigators have helped our members get aligned with community resources that improve psychosocial wellbeing as well as health outcomes.

The Navigator program has been operational since May 2017, resulting in a total savings in the first year of **$917 per member**, and has demonstrated reductions in both ED use and readmissions.
LA_HealthyR2019_Navigator_13_DP_03

Healthy Blue Navigator Supports Member on the Path to Success

Roberto, who lives with bipolar and major depressive disorders, faced numerous legal charges. He has been in the Navigator program for several months. Roberto's Navigator, trained in fundamental personal safety, maintaining professional boundaries with members and their families, situational awareness, and making her identity and role clear to all parties involved in Roberto's care, drove Roberto to his meetings with his parole officer 90 miles away. Roberto's PO informed the Navigator that he was concerned that a warrant would be soon be issued for charges against Roberto from 2010 for which Roberto had missed all court appearances. The Navigator and Roberto worked with the PO and the court to reduce the old charges and adjust the restitution requirement so that it was manageable for Roberto. The Navigator helped Roberto budget his income to make the restitution payments on time and continued to transport him to meetings with his PO and to court dates. Ultimately, the judge dropped the remaining charges against Roberto. His restitution was paid in full, and he is now completing his parole in full legal compliance. With the help of his Navigator, Roberto has found and maintained employment and become more mentally and emotionally stable. He hopes to visit with his son soon. Roberto's remarkable progress and motivation suggest that his chances for being hospitalized or incarcerated again are reduced; more importantly, Roberto is living a life more conducive to good mental and physical health.
LA_HealthyR2019_Roberto_RS_07

Integrated Care Management Team

Our ***Louisiana-based Care Management team*** has local knowledge of the providers and systems of care available to coordinate our response to members' needs. Seventy five percent of our Care Management staff have been with Healthy Blue since 2012. We have seen firsthand the impact that low health literacy, lack of access, and unmet social needs have on our members' health and ability to engage the services and supports that promote optimal health. Our approach provides acute care, inpatient, outpatient, and BH and social support services in a seamlessly integrated infrastructure. Our Louisiana-licensed PH and BH Medical Directors conduct twice-weekly integrated rounds with utilization management (UM) and Care Managers (CMs) to develop and implement solutions and interventions using evidence-based approaches to address the comprehensive PH, BH, and social support needs of each member enrolled in care management.

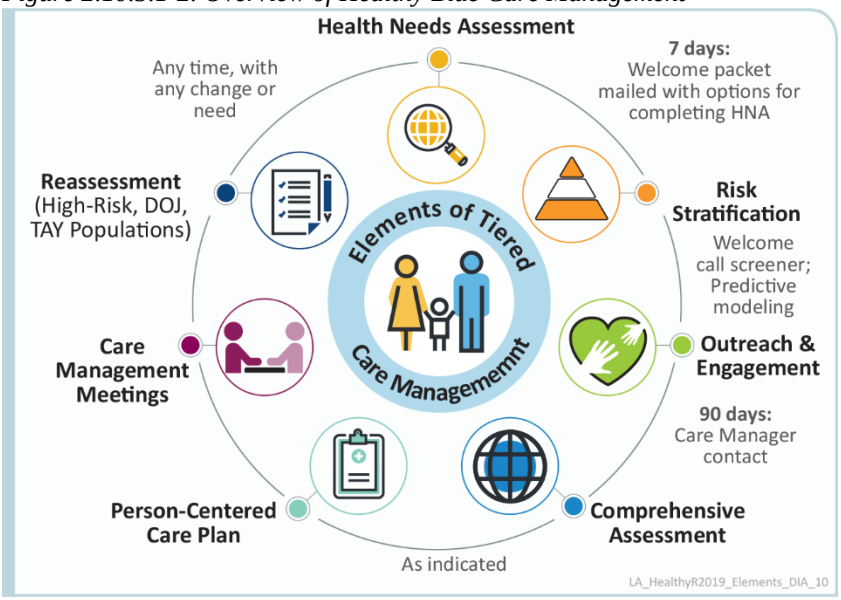
If a member with mental illness is experiencing homelessness, frequently visiting the local ED, and unable to maintain a supply of prescribed medications, our multidisciplinary care team, comprised of an Outreach Specialist and/or Navigator, BH clinicians, our Liaisons, a pharmacist, and a Housing Specialist, will gather resources from across our organization to assist that member. As soon as we know a member is pregnant, we activate prenatal supports and

[1] https://www.cdc.gov/ncbddd/adhd/prevalence.htm

services along with data analytics that assess utilization history and risk factors through every stage of her pregnancy. Our care management approach ensures that every member is surrounded by an active response team that might include any combination of system of care partners, primary care and specialist providers, family caregivers, virtual or face-to-face peer supports, community-based organizations, supportive programs like WIC and addiction recovery groups, or Healthy Blue Care Management team members.

Figure 2.10.5.1-2 is a diagram of our care management model, which begins with the health needs assessment (discussed in the next section) that new members are directed to within a week or two of enrollment. On a monthly basis, members are risk-stratified by predictive modeling, and those who are identified as at risk for hospital or frequent emergency department (ED) use or those with chronic, complex or specialized healthcare needs are contacted by a CM as soon as they are identified but no later than within 90 days. After making contact, the CM may perform more comprehensive or condition-specific assessments to aid in the development of a care plan in accord with the member's strengths and goals. The CM will bring in other resources as needed to address barriers to care such as a lack of transportation, food insecurity, unsafe housing, and social isolation. As the member's risk level changes (again, based upon monthly reports), reassessments are made to assist the CM in adjusting the person-centered care plan as described in more detail in Section 2.10.5.1.4, Healthy Blue Care Managers Develop Individualized, Meaningful Care Plans. Any contact between Healthy Blue and a member can trigger an assessment or reassessment.

Figure 2.10.5.1-2. Overview of Healthy Blue Care Management

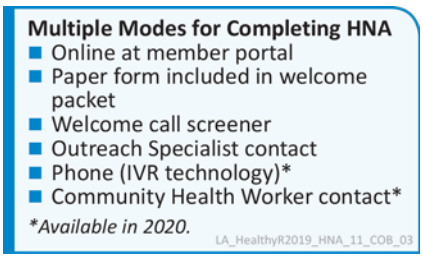


Our 24/7 Nurse Line and 24/7 BH Crisis Line are extensions of our local Care Management team. Staffed by nurses and BH clinicians, respectively, they are available to members around the clock for assessment of physical symptoms or to respond to a BH crisis, educate, and make referrals. All member interactions — even with the Nurse Line or BH Crisis Line — become part of their EHR, aggregated by Health Intech, our integrated managed care information system. Health Intech is a robust data infrastructure that guides the delivery of personalized and effective health interventions. It supports our care management functions and allows data sharing among providers, driving early identification of opportunities for intervention and health improvement. In the following sections, the icons from the Overview of Healthy Blue Care Management graphic will identify each stage of our care management process.

Process and Timeline for Health Needs Assessment

The health needs assessment (HNA) is one of our first opportunities to learn more about our members' health care conditions and barriers that they may be facing, so we work to make completing LDH's HNA as easy as possible by offering multiple, convenient options. We mail a printed copy of the HNA with the welcome packet to each new member or their caregiver within a week of enrollment, while at the same time initiating welcome calls to new members that help to identify any care or service needs. Outreach Specialists from our Healthy Blue Care Management team will directly contact new members who are in priority populations and who have Special Health Care Needs (SHCN). We continue to authorize and coordinate all existing health care services for members with SHCN for up to 90 calendar days or until we are able to conduct a full assessment of the member and complete a person-centered care plan. If a member loses Medicaid eligibility and is subsequently reinstated, and it has been more than 90 days from the member's previous eligibility, we will conduct an HNA within 90 days of reinstatement. In all matters related to the HNA and more comprehensive screenings, we will comply with Sections 2.7.2 and 3.1.15 of the Model Contract.

Welcome calls to new members offer a preliminary screening they can complete by phone or online. Even before an HNA is completed, the screener can tip off CMs to members who may have immediate physical, behavioral, or social needs. HNAs may be conducted any time a member experiences a transition or has contact with Member Services Representatives (MSRs), 24/7 Nurse Line Nurses, or 24/7 BH Crisis Line staff, has serial emergency encounters, is hospitalized, or when pharmacy use indicates that needs are not being adequately addressed. All Healthy Blue team employees who interact with members are trained to identify members' unmet SDOH needs such as housing, food, transportation, and interpersonal safety, as well as how to route each member to our Care Management team for further assessment of chronic or specific conditions and development of an individualized care plan. They are also trained to identify indicators of tobacco use and problem gaming, in accordance with the Model Contract.



The Healthy Blue HNA was designed to be brief to encourage completion while producing critical information about immediate needs and prioritizing outreach for care coordination and management. Our initial HNA collects demographic information, preferred language, information about current overall health, diagnoses and health history, medications, pregnancy and prenatal care, mental health, substance use, and unmet social needs. We have continued to actively pursue methods to increase member response to this valuable tool. In 2018, we built a link to the HNA in the member portal. In 2019, our MSRs are offering assistance in completing the HNA during the welcome call screener. When members agree to respond to the HNA, the MSR will capture the responses, and the information will be retained in the member's personal EHR in our Health Intech platform. [redacted]

Throughout 2019, we will be building strategic partnerships with trusted providers and organizations in Louisiana that specialize in member outreach and engagement as an additional strategy to increase HNA completion. We will be pursuing LDH approval to include text messaging as another option for completion of the HNA.

Identifying Enrollees for Care Management

Care management resources are focused on members who can be expected to benefit the most from management interventions. Our Health Care Analytics staff regularly use data from claims encounters, hospital discharge, UM, and pharmacy to assign a risk score to all eligible members.

Predictive Modeling

We recognize that the factors that accurately predict the PH and BH needs for adults covered under a Supplemental Security Income (SSI) or Medicare product may be quite different than those for children covered under the same SSI or Medicare product, adults receiving Temporary Assistance for Needy Families (TANF), or children covered under either TANF or the Children's Health Insurance Program (CHIP) products. Separate analysis of each subgroup allows flexibility in meeting the needs of these populations. We have also identified specific disease and condition cohorts based on predicted level of health risk and the likelihood that the risk can be reduced with care management.

Our predictive modeling Chronic Illness Intensity Index (CI^3) helps us proactively monitor and mine utilization data to identify members with high rates of utilization who may be at risk for ED visits, inpatient admission, medication adherence issues, or other problems that might be preventable. We notice when a member has three ED visits within a 60-day period because our data are continuously renewed and reviewed to spot individual or cohort patterns that can be corrected with intervention. CI^3 produces a risk profile of Low, Medium, or High, which serves as the initial basis for care management assignments and follow up. To accurately predict complexity and risk among members, our Likelihood of Inpatient Admission (LIPA) scale uses a combination of utilization (claims, encounter, and authorization data), [redacted]

demographic factors, and diagnostic information to predict the likelihood of inpatient admission within 60 days. With this information, we focus resources on members with the highest immediate risk.

Other predictive modeling tools help us generate risk scores for subpopulations to further stratify member risk level, prioritize outreach and assessment, and determine the scope and level of intervention needed:

- **ER TRIAGE** predicts the likelihood of low-level ER utilization
- **Statistical Obstetrical Risk (STORK)** determines risk of delivering an infant that may be admitted to the Newborn Intensive Care Unit
- **Readmission risk (RAR)** analyzes inpatient daily census report to determine likelihood of readmission
- **Behavioral Health First-time Admission (BH FTA)** identifies indicators of BH issues that may result in admission
- **Pharmacy** identifies indicators of underutilization, overutilization, and possible opioid use disorder

Additionally, our Continuous Case Finding process mines data from the previous 30 days to identify and prioritize our most current membership for care management. We are always looking for ways to enhance our predictive modeling and are adding BCBSLA's market-leading model as a supplement to the tools we have in place now.

In our first month of implementing Elli, we identified 39 members with diabetes, 6 with HIV/AIDS, and 7 with hemophilia (out of 1,838 new members) for outreach.
LA_HealthyR2019_Elli_DP_01

Our Health Care Analytics team recently developed an Early Warning Tool to identify new members with limited claims data who could potentially become superutilizers because of poor SDOH even sooner than our CI^3 predictive modeling does. We anticipate bringing the Early Warning Tool to Louisiana in 2020.

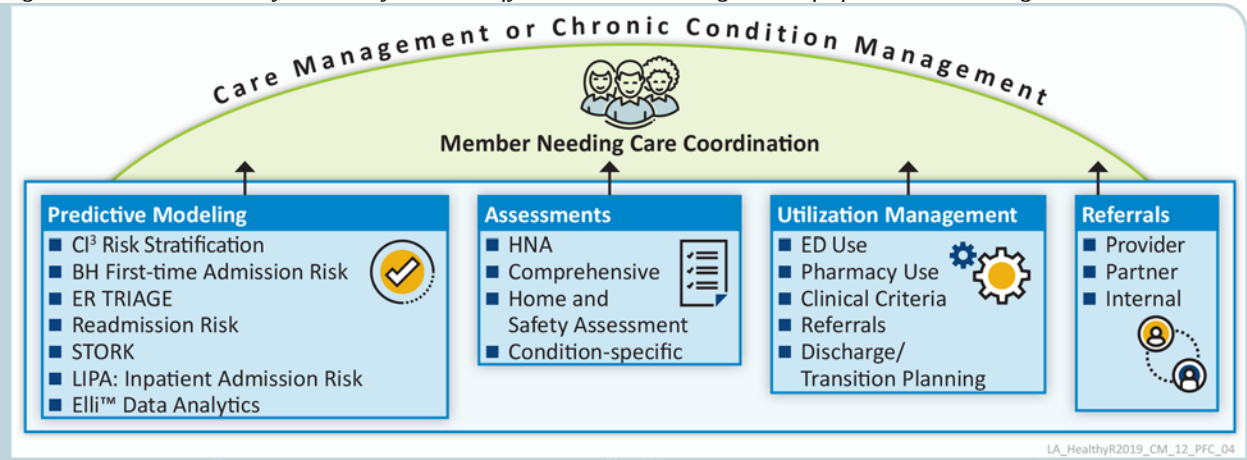
In addition to predictive analytics, we include clinical criteria to determine when a member may benefit from care management. Using inpatient/outpatient transitions; medical, BH, and pharmacy claims data; incident reports (suicide attempt, overdose); opioid patterns; and demographic variables to predict health risk may also result in identification for care management. Clinical criteria for referral to a CM may include, but are not limited to, the following:

- Subsequent readmission
- Three or more admissions within the previous 12 months
- Unplanned hospital admission of a member who was in care management in the previous 30 days
- Catastrophic illness and injury
- Chronic diseases not followed by Chronic Care Management
- Potential transplant candidates
- Patterns of inpatient and outpatient utilization
- Identified gaps in care
- Member-identified needs

Referrals

While data analytics are vital to our overview of population health, relationships with members are at the core of Healthy Blue's ability to quickly identify and respond to needs for care management. As mentioned in the previous section, all staff who interact with members are trained to recognize needs for referral and care management. Members are advised of care coordination and care management options and can request them, or self-refer. Furthermore, in our seven years in Louisiana, we have developed strong networks with providers and external organizations managing BH, dental care, and home- and community-based services. Any of those relationships could result in referral of a member to a CM. Figure 2.10.5.1-3 illustrates the many avenues by which we might identify members who need integrated care management.

Figure 2.10.5.1-3. Healthy Blue Ways to Identify Members Who Might Benefit from Care Management



Engaging Enrollees Who May Benefit from Care Management

Once members who may benefit from care management are identified, they are assigned to a designated CM based on their primary condition. Because Healthy Blue's care management model is fully integrated, we bring particular expertise to the task of managing care for members with comorbid PH and BH conditions with multidisciplinary support from our Community Outreach team, as well as our Housing Specialist and our Tribal Liaison. Regardless of member disease states, risk levels, or unique social or cultural concerns, our CMs and field-based Community Outreach team have access to the peers, resources, and knowledge to manage comorbid conditions and connect members to appropriate services and community-based supports.

Healthy Blue Is Privileged to Support Monica Johnson, Louisiana HIV/AIDS Activist

In 1984, while attending college, Monica received a blood transfusion. The following year, she was notified that the blood donor had died of AIDS. After five ELISA tests, she was told that her HIV test was "inconclusive." However, when she became pregnant in 1989, she learned that she was in fact HIV+. Monica's son Vaurice was born in 1990 and died in September 1993 from complications associated with AIDS. Since her son's death, and because of the stigma that she faced from her community due to her HIV status, Monica became an ardent HIV/AIDS activist. She founded H.E.R.O.E.S. (Helping Everyone Receive Ongoing Effective Support), a peer-based and peer-driven organization whose mission is to provide HIV education to people at-risk and to provide supportive services for HIV-infected individuals and their families with a primary focus on women and children.

When Monica joined Healthy Blue in 2017, her viral load had been at an undetectable level for more than 20 years, but she had been recently diagnosed with diabetes, as well as having diagnoses of high blood pressure, high cholesterol, neuropathy and arthritis — all in addition to her HIV diagnosis. Monica's Healthy Blue Care Manager has been meeting regularly with her to address her health needs and care concerns since she joined the plan in 2017. Since enrolling in Healthy Blue, Monica has gotten her diabetes, high blood pressure, and high cholesterol under control.

Monica told us that "the treatment that I have received through the Healthy Blue plan is state-of-the-art. I am very happy with my providers. In addition, I love the 'Making Fitness Fun' program. I highly recommend the Healthy Blue plan."

LA_HealthyR2019_Monica_RS_03

We use a myriad of methods to engage with identified members and offer care management support. All identified members are referred to our Care Management department and flagged for follow-up. The assigned CM attempts to connect with the member first by phone, at different times of the day and days of the week, and will send an "unable to contact" letter if phone calls are not successful. The CM or MSRs may search past enrollment files, claims information, and publicly available data sources such as Department of Corrections. Outreach Specialists will also search pharmacy, durable medical equipment, home delivery, and non-emergency transportation data to obtain updated contact information. In 2020, we anticipate gaining access to Homeless Management Information Services (HMIS), which collates information from homeless shelters, housing, and service providers, to identify members who may be experiencing homelessness.

After a third unsuccessful attempt to reach a member, CMs mail the member a letter offering assistance and encouraging the member to call back. Outreach Specialists and Community Connectors will contact providers and community partners who may have had recent contact with members who cannot be reached by any other means. Members prioritized for in-person outreach include those who are experiencing homelessness or who have other high-risk factors as indicated by prior claims history, admission/discharge/transfer alerts, or from internal and external referrals. [redacted] igure 2.10.5.1-4 shows our workflow for locating and engaging members in care management.

[redacted]

Our CMs engage members with motivational interviewing, coaching, recovery and resiliency protocols, suggestions for small, manageable modifications to assess member readiness for change, and person-centered care planning techniques. They explore and resolve barriers with the member, family members, caregivers, and health care providers as they emerge to help members actively self-manage and improve their quality of life. CMs build trusting relationships with members and their families and involve them directly in planning their care. They make telephonic and in-home visits for high-intensity intervention and clinical care management, as appropriate for each member's assessed needs and preferences and based upon the experience of our CMs. Because we want each member to have a trusted and familiar point of contact, we avoid disruption of that relationship.

We work with members toward their desired health care outcomes, empowering them to understand and use the benefits, services, and options available to help them meet their individual health needs. CMs inform members about telemedicine resources such as LiveHealth Online for PH needs; Bright Heart Health for pain management and medication-assisted therapy for substance use disorder; One Telemed for access to BH specialists; and Care Innovations remote health monitoring for select conditions. [redacted] CommonGround for BH education and support; and My Advocate™ for pregnancy education.

We were able to determine that **3097 out of 5149 (60.15%)** of members have utilized Telemed services in Q1 2019.
LA_HealthyR2019_2.10.4_Telemed_COB_01

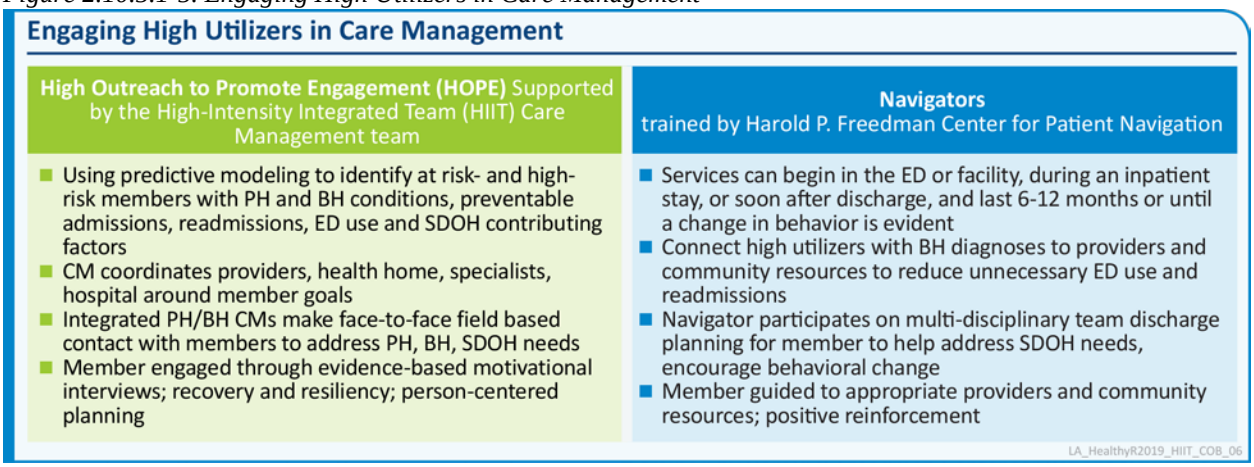
A Care Management Success Story

Dan, 62, had left-side weakness and paralysis as the result of two strokes, as well as hypertension, HIV, an enlarged prostate, and heart and kidney failure. He had relocated to Bunkie to get away from a New Orleans environment that had enabled his past cocaine use and had successfully overcome his addiction. Because of the strokes, his speech was slurred. With Dan's permission, his Care Manager initially worked with his brother to discern what Dan needed. Dan did not have a phone, so the Care Manager first arranged for him to have a SafeLink phone, and then helped him find a PCP, cardiologist, urologist, infectious disease specialist, and dental care. The Care Manager made sure Dan had transportation to every appointment and assisted with scheduling and medication management. The infectious disease specialist diagnosed Dan with hepatitis C and quickly started treatment for it. Today, free of hepatitis C, Dan's speech has improved and he schedules all his own appointments and transportation. Dan is one of Healthy Blue's care management success stories!
LA_HealthyR2019_Dan_13_RESU_01

Complementing these proactive engagement measures, our Louisiana-based Care Management team responds to inbound calls to properly route members to the appropriate CM. Medical Management Specialists are trained to connect callers to the most appropriate CM or warm-transfer urgent or crisis calls to the most appropriate responder. Every attempt to reach or respond to members is documented in Health Intech and is available to providers, the interdisciplinary team, and reportable to LDH on a monthly basis. Once members are enrolled in care management, CMs may make face-to-face visits and telephone calls to help them stay motivated and on track to make meaningful, incremental health and behavioral changes.

Our Healthy Blue Medical Advisory Committee (MAC), with representation from participating providers in Louisiana, is involved in the development, monitoring, and evaluation of the care management program. They give us excellent feedback based on their local understanding and influence our approaches to care management. They work with us to identify and address barriers to member engagement in care, offering practical experience and direction that continue to expand our outreach through community partners and providers as show in Figure 2.10.5.1-5

Figure 2.10.5.1-5. Engaging High Utilizers in Care Management



Tiers of Case Management

Data collected during the clinical intake and identification process described in Section 2.10.5.1.2, Identifying Enrollees for Care Management, is captured in our clinical data warehouse. Members who have not been identified with risk factors, gaps in care, or were not referred to care management are designated as Community Well. For them, care management emphasizes wellness and prevention, reinforcing healthy behavior with health promotions, health screening reminders, and care coordination to guide access to benefits, value-added benefits, enhanced benefits, and services. Members identified as likely to benefit from care management services are stratified to one of three tiers: Low, Medium, or High risk, as illustrated in Figure 2.10.5.1-6. These groupings trigger care management interventions. The risk levels build upon one another and define the types of services, supports, and resources for members at each level. Our tiers of case management comply with Section 2.7.2 of the Model Contract.

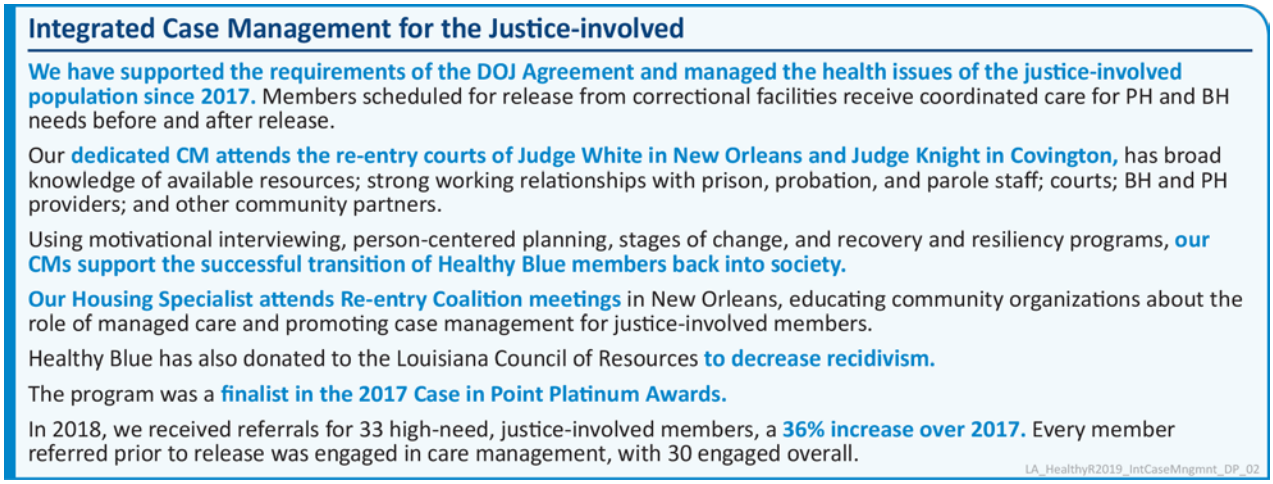


Figure 2.10.5.1-6. Services and Resources for Each Level of LDH Care Management Risk

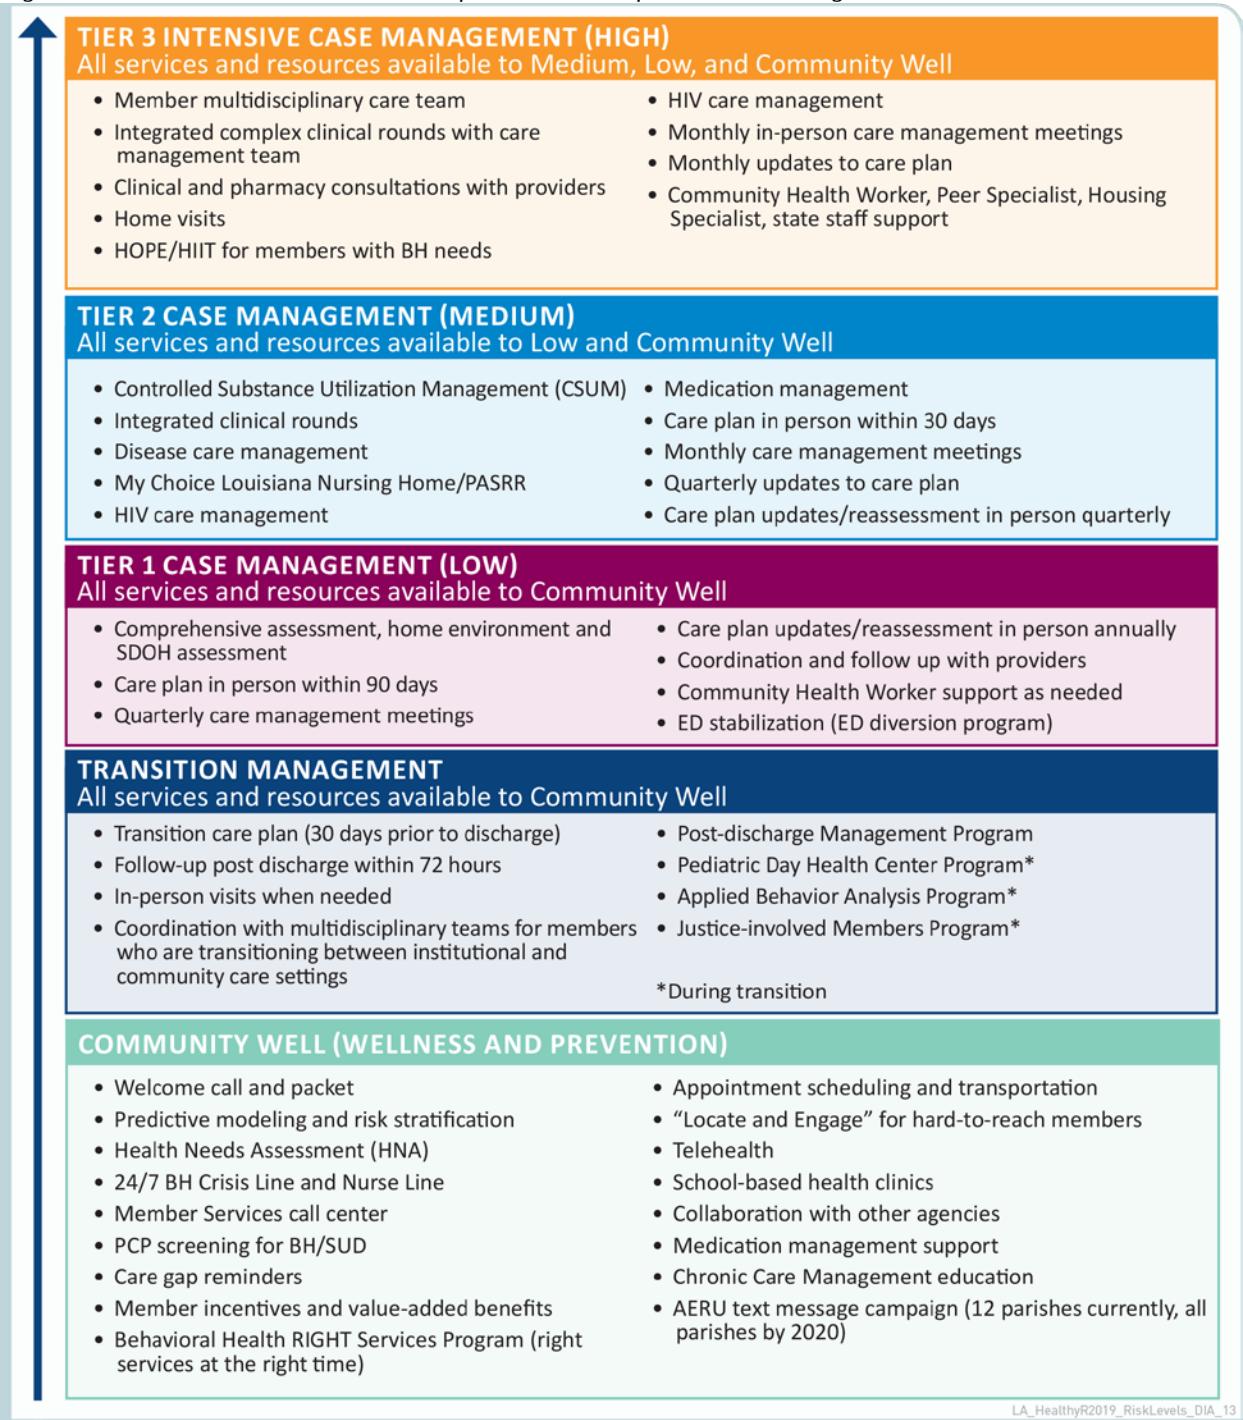


Note: *Currently, 96% of Healthy Blue members are in the Community Well category.*

Members in the Medium or High risk levels may benefit from additional resources such as CHWs, Peer or Housing Specialists, and LDH Transition Coordinators to address increased acuity. We understand that members' PH or BH risks and social circumstances might fluctuate over time, so risk stratification is regular and dynamic. We generate monthly risk profiles for each member and use our CMs' clinical judgment to identify changes in status and quickly respond to those changing needs. We also keep communication open with members so they can request a care management program or increase the intensity of our interventions to meet their needs.

All members will have ongoing access to our Member Services department to request coordination of care and benefits, including transportation, and will receive communications about self-care, management of chronic conditions, and reminders to complete all recommended preventive services. All members can request to speak to a CM at any time by calling our Member Services department. Community Well members will not be assigned a CM unless they request one.

Healthy Blue has been a steady presence at the table alongside us in working to transform the lives of the formerly incarcerated population. They truly demonstrate commitment to building relationships with partners at work on the ground, and show that they understand that an individual's well-being goes far beyond their ability to access health care. We believe that Healthy Blue will not only be a strong partner in Louisiana's Medicaid program, but also to the community organizations that support those individuals in need.
– **Kiksha Constantine Martin**
Senior Project Manager for Reentry
City of New Orleans
LA_HealthyR2019_Kiksha_TST_02

Members with Low, Medium, and High risk who consent to care management are assigned to an experienced CM. Assignments are based upon whether the member's primary concern is a PH or BH condition; what the member's primary language is; and where the member lives. We work hard to assign members to CMs who live in and are familiar with resources in the same community. Many of our CMs have been with the plan since its beginning and bring decades of experience with the Louisiana health care system and community resources to our members. Their work demonstrates their passion and purpose, strong technical and skills, cultural competence, and service ethic. Our Care Managers are RNs, LCSWs, LMFTs, LPCs, and LPNs. They receive further integrated PH/BH care management training through MyLearning, an internal employee instruction site. 18 of Healthy Blue's CMs have been trained in Person Centered Thinking®, shifting their orientation from caring *for* members to working *with* them to establish their own goals and make decisions that improve their overall health and quality of life. Caseloads for High-risk care management programs are about 1 CM to 45 members, based upon the complexity of the members' conditions.

Our CMs are available for members and providers with any questions or concerns. When a particular CM is unavailable, the member can be referred to a backup CM for assistance during business hours. Members also have access to an emergency backup CM via an after-hours phone line. Additionally, our CMs collaborate with and consult our integrated multidisciplinary care team of Medical Directors, psychologists, addictionologists, pharmacists, registered dieticians, and health educators. A primary CM may be supported with additional CMs or non-clinically trained specialists when members have complex PH and BH comorbidities, so even the most complex of members has a single point of care coordination. For members in any risk category, we offer specialized assistance with transitional case management in accordance with Section 2.7.6.4 of the Model Contract.

Members who are transitioning out of the justice system will be offered Medium- or High-risk care management according to need to ensure continuity of care. Justice-involved members transitioning from a nursing facility to the community will be eligible for transitional care management (Medium- or High-risk) for at least one year under the guidance of LDH. Healthy Blue and our providers comply with the mandates of the Americans with Disabilities Act in helping each member locate providers with the closest, most accessible facilities and least restrictive environments. CMs thoroughly review and comply with care plans formulated for members before they joined Healthy Blue and make any necessary adjustments for appropriate care in their updated risk ranking and circumstances. CMs carefully plan transitions out of inpatient settings in advance of discharge and record follow-up appointments, updated medications, self-management measures to be taken, and request prior authorizations. They will follow up with members within 72 hours of transition and phone, mail, or fax updates to providers as necessary. No transitions are made nor is information shared without the explicit consent of the member or their parent or guardian. The CM oversees the entire transition, safeguarding the member's goals and serving as their advocate in the health care system and community.

Healthy Blue Helps Member Henry Transition from a Nursing Facility Back into the Community

Henry, 62, has numerous health conditions, including diabetes, hypertension, anxiety, depression, and substance use disorder. He was a resident of Kinder Retirement and Rehabilitation Nursing Facility for approximately three years before he no longer met the criteria to be there. Henry was referred to Healthy Blue's BH case management program as part of My Choice Louisiana, which provides transition planning and support. Angie, Henry's Care Manager, quickly determined his needs and engaged Merakey Assertive Community Treatment (ACT) to assist with the transition.

Angie drove three and a half hours to Merakey's Lake Charles facility to meet face-to-face with the Social Services Director, the OBH Transition Coordinator, the Merakey Program Director, and Henry to create a treatment and transition plan that worked for him. Henry and his care team agreed that a senior housing complex in Mermentau would meet all of his needs. For the next month, Angie and the team worked to ensure that Henry had everything he needed for the transition, including furniture, cell phone, medications, and toiletries. **Henry moved into his new apartment less than two months after his referral to Healthy Blue. He said, "I didn't think I could do it. I was scared, but now I'm ready to be home."**
LA_HealthyR2019_Henry_RS_02

Healthy Blue Care Managers Develop Individualized, Meaningful Care Plans

Using our comprehensive assessment tool with hierarchy and branching logic that probes more than 20 potential clinical areas for risk factors and includes specialized, evidence-based assessment modules for specific conditions and populations, the CM will review the member's PH and BH history, diagnoses, unmet social and ongoing clinical needs (including dental), current or past substance use, medications, and formal and informal caregiver supports. We use assessment tools appropriate for adults and children, BH concerns, and specific conditions.

Through a comprehensive assessment, the CM learns about the member's needs in detail. CMs note any cognitive or physical limitations, evaluate risk behaviors, and assess psychosocial and environmental needs to develop a person-centered care plan at the required tier of service. They encourage each member to participate in planning for community integration and self-advocacy. The care plan clearly outlines the member's relevant history, health status, support system, and wellness goals, and communicates the role each person or service plays in helping the individual achieve those goals, along with personal details such as crisis plans and pets' names to facilitate a focused, individualized response at any level of care. It identifies all members of the interdisciplinary team and their contact information. It notes the times and dates for face-to-face visits with the member. It describes clearly how barriers will be addressed and when. The care plan is organized around evidence-based clinical practice guidelines, which the CM supports by confirming that the member is keeping appointments, completing appropriate screenings or lab work, and engaging in self-care measures such as diet modification and blood glucose testing as outlined in the plan.

The member, the member's family, caregiver, providers, and other community supports will be involved in the development of the care plan as part of an interdisciplinary team. The CM helps the member identify who will be involved in the interdisciplinary team, and obtains and documents the member's consent to participate in the care planning process. The CM will support the person-centered process by scheduling a date, time, and location for the assessment and care planning that is agreeable to the member. If the member wants the team to meet face-to-face, the CM will schedule the interdisciplinary team accordingly. The CM will also make any accommodations such as interpreters or other ancillary services to facilitate everyone's active participation.

With the results of the comprehensive assessment and the member's personal EHR in Health Intech, the CM will guide the member through the care planning process, identifying short- and long-term goals, preferences, needs, and desired outcomes. The CM will assist the member in understanding their choices for care, services, and supports available for their particular needs, including non-covered services and supports from other State programs. The CM will respond to all questions that the member has and follow up on any requests or preferences.

Ongoing Monitoring of the Care Plan

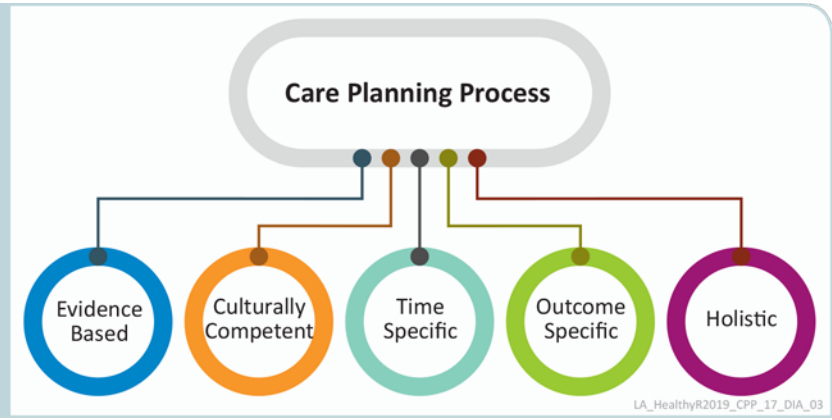
The CM and member will regularly review the care plan, reconvening the interdisciplinary team as needed, but no less than annually for Low-risk members, quarterly for Medium-risk members, and monthly for High-risk members. They will also review the care plan at the member's request, during reassessments, and when member circumstances or needs change significantly. The CM will gather information from the member's PCP, other providers, and interdisciplinary team participants identified by the member. Healthy Blue will make sure each care plan is documented and stored in Health Intech, and made available to the member and the PCP. The care plan is accessible to all CMs and providers, so teams can work in concert to assist members with comorbid conditions. For example, a BH CM coordinating hospital discharge for a member with depression may need assistance from a medical CM to verify that diabetes or other chronic conditions are well-controlled during the transition. CMs also link members with the social and community supports they need to stay on track. This is especially critical for members with BH conditions who may be homeless; who are involved with multiple agencies, such as juvenile justice and child welfare; or who have co-occurring substance use disorders or medical conditions that make it challenging for them to navigate the system. We include CHWs and home- and community-based organizations with whom we have built relationships when planning for a member's care.

If a member's condition deteriorates or improves, or as the member's interdisciplinary team or parent/guardian requests, the care plan is adjusted and communicated to the team. CMs prepare and present cases at rounds to get input from Medical and BH Directors, pharmacist, Utilization Managers, and subject matter experts on the care plan; to discuss suggested modifications; and to discuss community resources available to the member. At every point, the member and their current needs are at the center of the planning process.

Care Plans Address Social Determinants

Because we take a holistic view of our members, Healthy Blue care plans include goals related to supporting member SDOH needs. CMs, with support from our Outreach Specialists, will help to locate and connect the member to supports and service options within their community. [redacted]

Our Care Management team also includes key staff with knowledge and expertise in SDOH issues in Louisiana. For example, if a member is homeless, the CM will work with the Housing and Outreach Specialists to refer the member to the appropriate resources and assist with the completion of applications for housing.



If a member has serious mental illness but would like to get back into the work force, we reach out to our connections with the Capital Area Reentry Coalition, Louisiana Workforce Commission, or Job Corps to help the member gain or expand employment opportunities. For members with serious mental illness who live in nursing facilities, Healthy Blue can authorize and pay for mental health rehabilitation services, give them the option of living with a qualifying caretaker, or help them to get PSH placement. CMs and Navigators (see Section 2.10.5.1, *Supporting the Triple Aim with Effective Care Management*) can assist with transportation to appointments and agencies in the community to help members overcome barriers to care (for example, to meet with a recovery group or potential employer).

In 2019, we are introducing a program specifically designed to support provider identification of members with food access challenges. [redacted] In all of these examples, our CMs are identifying options for members and including those options in their person-centered care plans to help them live healthier lives in the environment of their choice.

A Better Path in Sight

Cedric is one of our members with a developmental disability and multiple medical and psychiatric conditions. Cedric, who is in the BH-only coverage group, was released from jail with a two-week supply of medications, no refills, and only a partial bottle of his glaucoma drops. Without the drops, he feared he would lose his eyesight. Cedric's CM located a 340 B pharmacy that would cover all of his medications except the eye drops, but was unable to find anyone to refill his glaucoma drops. Cedric began to worry that he might be better off in jail if he had to go without glaucoma treatment. His CM had attempted to contact every institution that might be able to help without success, so her supervisor contacted Karissa Page at LDH, who connected her to the Medical Director at the FIT Forensic Clinic at UMCNO. Even though the clinic was in the process of relocating, the Medical Director filled the prescription and hand-delivered it to Cedric at his home, taking some time to talk with him about his medical concerns and allaying some of the fears he expressed. Cedric was very grateful and now gets his treatment at the FIT clinic.

LA_HealthyR2019_Cedric_RS_02

Coordination with Providers and State Staff to Eliminate Duplication of Services

As an incumbent, Healthy Blue is familiar with the services and supports provided by LDH and the Office of Public Health. For members who are seeking or receiving these services, we will include these system-of-care partners in the member's interdisciplinary team and care plan as appropriate. We will also reach out to these other CMs for collaboration in care planning so as to not duplicate services. CMs can facilitate information-sharing with the entire health care team to make sure services are synchronized, unduplicated, and consistently delivered. We also want providers to view our Navigators and CMs as care management partners who reduce their administrative burden and improve the quality of care for Louisianans, helping them avoid unnecessary or duplicative services. Providers can access all data on member care plans, assessments, and progress as well as services being provided to that member. We make it easy for providers to notify us through the provider portal if they discover any duplication of services. Providers and LDH staff with access to Health Intech can review care plans and assessment information to spot any duplication of services, medications, outreach, or support. Having all treating providers equally involved in the care management planning process with the coordination of a primary CM prevents duplication between providers.

Coordinated Service Improves a Member's Quality of Life

Twenty-year-old Ben was evaluated by the Office of Developmental Disabilities in 2018 and met the criteria for one of their waiver programs. Ben, who has DiGeorge syndrome, has been wheelchair-bound since he suffered anoxic brain damage after a stroke during open heart surgery at age seven. Because of his contractures, Ben cannot extend his arms, and his ability to use his hands is limited to a pincher grasp. He is incontinent and wears diapers. Ben was placed on the waiting list, which made him eligible to be a Chisholm Class member. His mother chose to have a state Support Coordinator to ensure that she and Ben had knowledge about and access to covered and non-covered Medicaid services while waiting for the waiver to be issued. The Support Coordinator called Healthy Blue to request assistance in locating a Personal Care Services provider in Ben's region. All calls involving Chisholm Class members are referred to our Prior Authorization Liaison (PAL), who provided a list of agencies for the Support Coordinator to contact. All Chisholm Class members are offered care management, and any Chisholm Class member who is having difficulty obtaining services is automatically referred to a Care Manager (CM), whose goal is to gain an in-depth understanding of the needs of the member and his caregiver. When he entered care management, Ben's mother reported that his wheelchair was broken and that he had outgrown it. He was using a bath chair that someone had made for them but had outgrown that as well. His mother was paying for his diapers and said she had been trying without success to get help with Ben for years. Ben's CM worked with his mother, our PAL, the Support Coordinator, and DME providers to get Ben a new wheelchair and bath chair, diapers, and Personal Care Services. To make sure the chairs fit and were the appropriate type, a physical therapist visited Ben's home. Ben's mother was very appreciative of the coordinated effort to make her son more comfortable and safe.

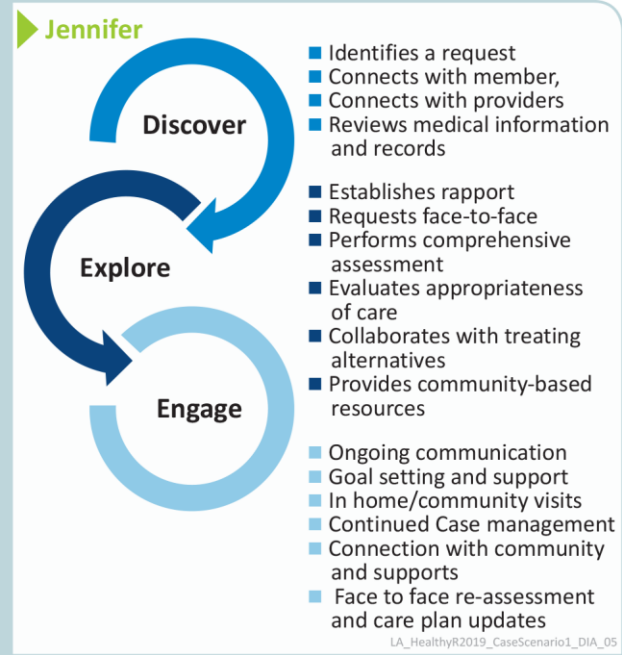
2.10.6 CASE SCENARIOS

2.10.6.1 Case 1: Jennifer Needs Help with Chronic Pain

At Healthy Blue, ***everything we do begins and ends with the enrollee (member)***. We focus on supporting members to be the drivers of their care using a holistic, person-centered approach and coordinating physical health (PH), behavioral health (BH), medications, and social supports that address their needs. We focus on members' strengths, abilities, preferences, and goals, assuring the ***right care occurs, in the right place, and at the right time***.

Discover

Healthy Blue's priority is to address Jennifer's immediate need — to alleviate her back pain.



Jennifer, who has been participating in our care management program, recently had a third visit to the emergency department (ED) for her back pain. Sarah, her Care Manager (CM), has routine meetings with Jennifer on her health needs, and learns that Jennifer visited an Adventist Health St. Helena surgeon who submitted a prior authorization request for orthopedic spinal surgery. Sarah reached out to the utilization management (UM) reviewer who is addressing Jennifer's health concern. Together, they discovered that the Medical Director recommended Jennifer receive physical therapy services prior to surgery. While coordinating Jennifer's overall care, the UM reviewer has been working with Jennifer's primary care provider (PCP) and surgeon to explore and identify physical therapy providers near her home. Sarah convenes a meeting with Jennifer and an interdisciplinary conference that includes her PCP, OB/GYN, surgeon, the UM reviewer, and Healthy Blue Medical Director to ensure service planning addresses her most immediate need of pain reduction and management. Sarah reviews Jennifer's personal health record in our Health Intech platform and gathers additional information from the surgeon, PCP, Jennifer's OB/GYN, and other providers with whom she has been working. These comprehensive details assist the team to develop options for Jennifer's care plan that will impact her future health outcomes.

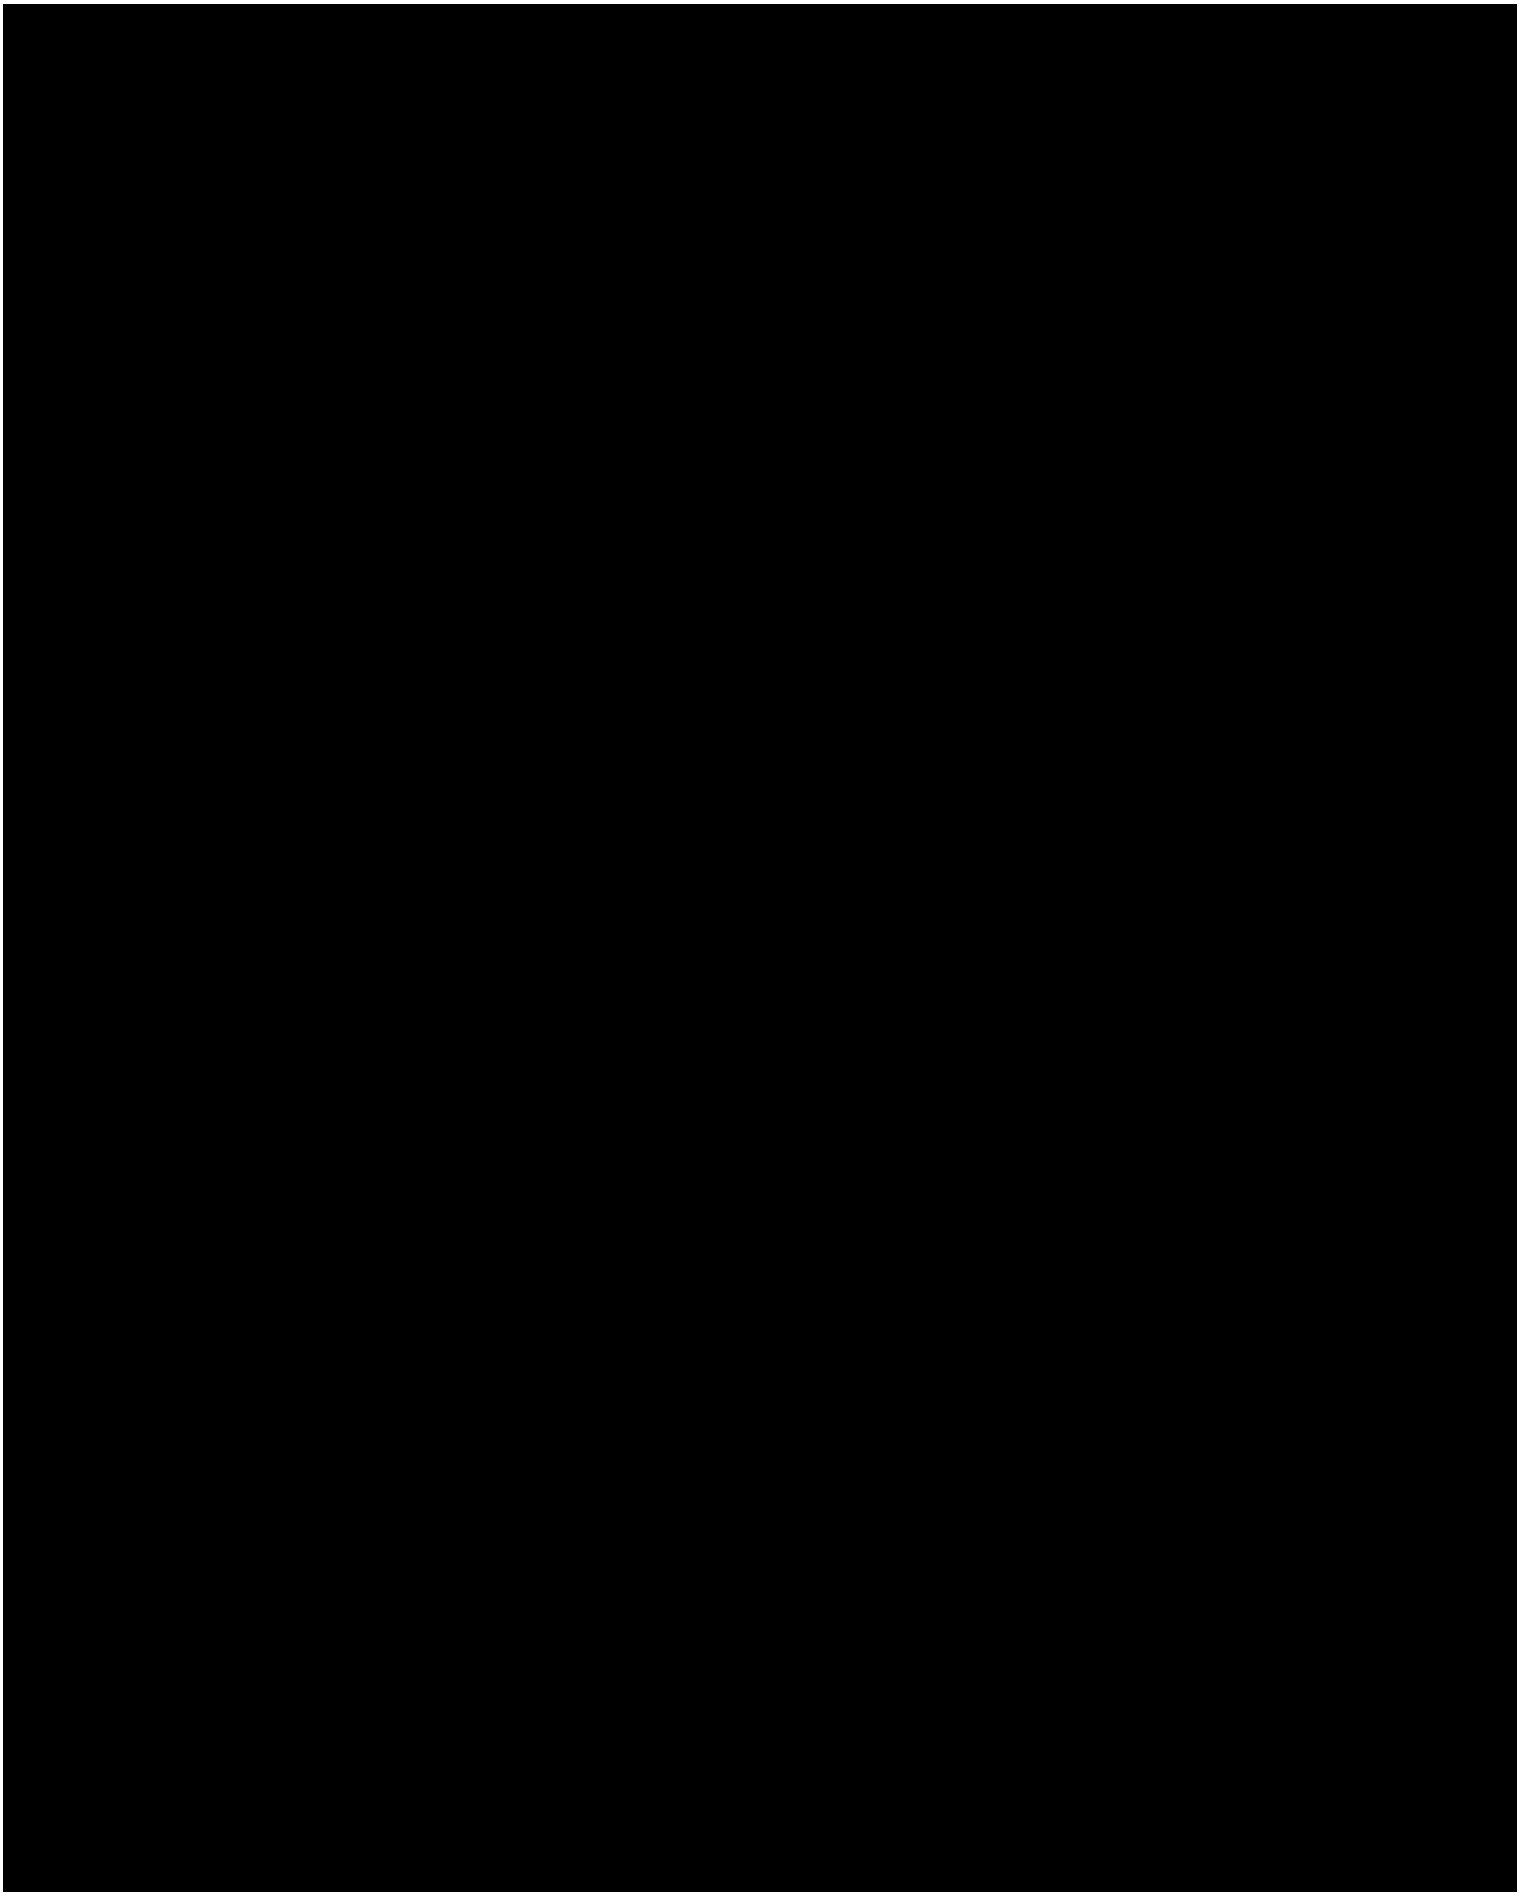
Additional information includes, but is not limited to:

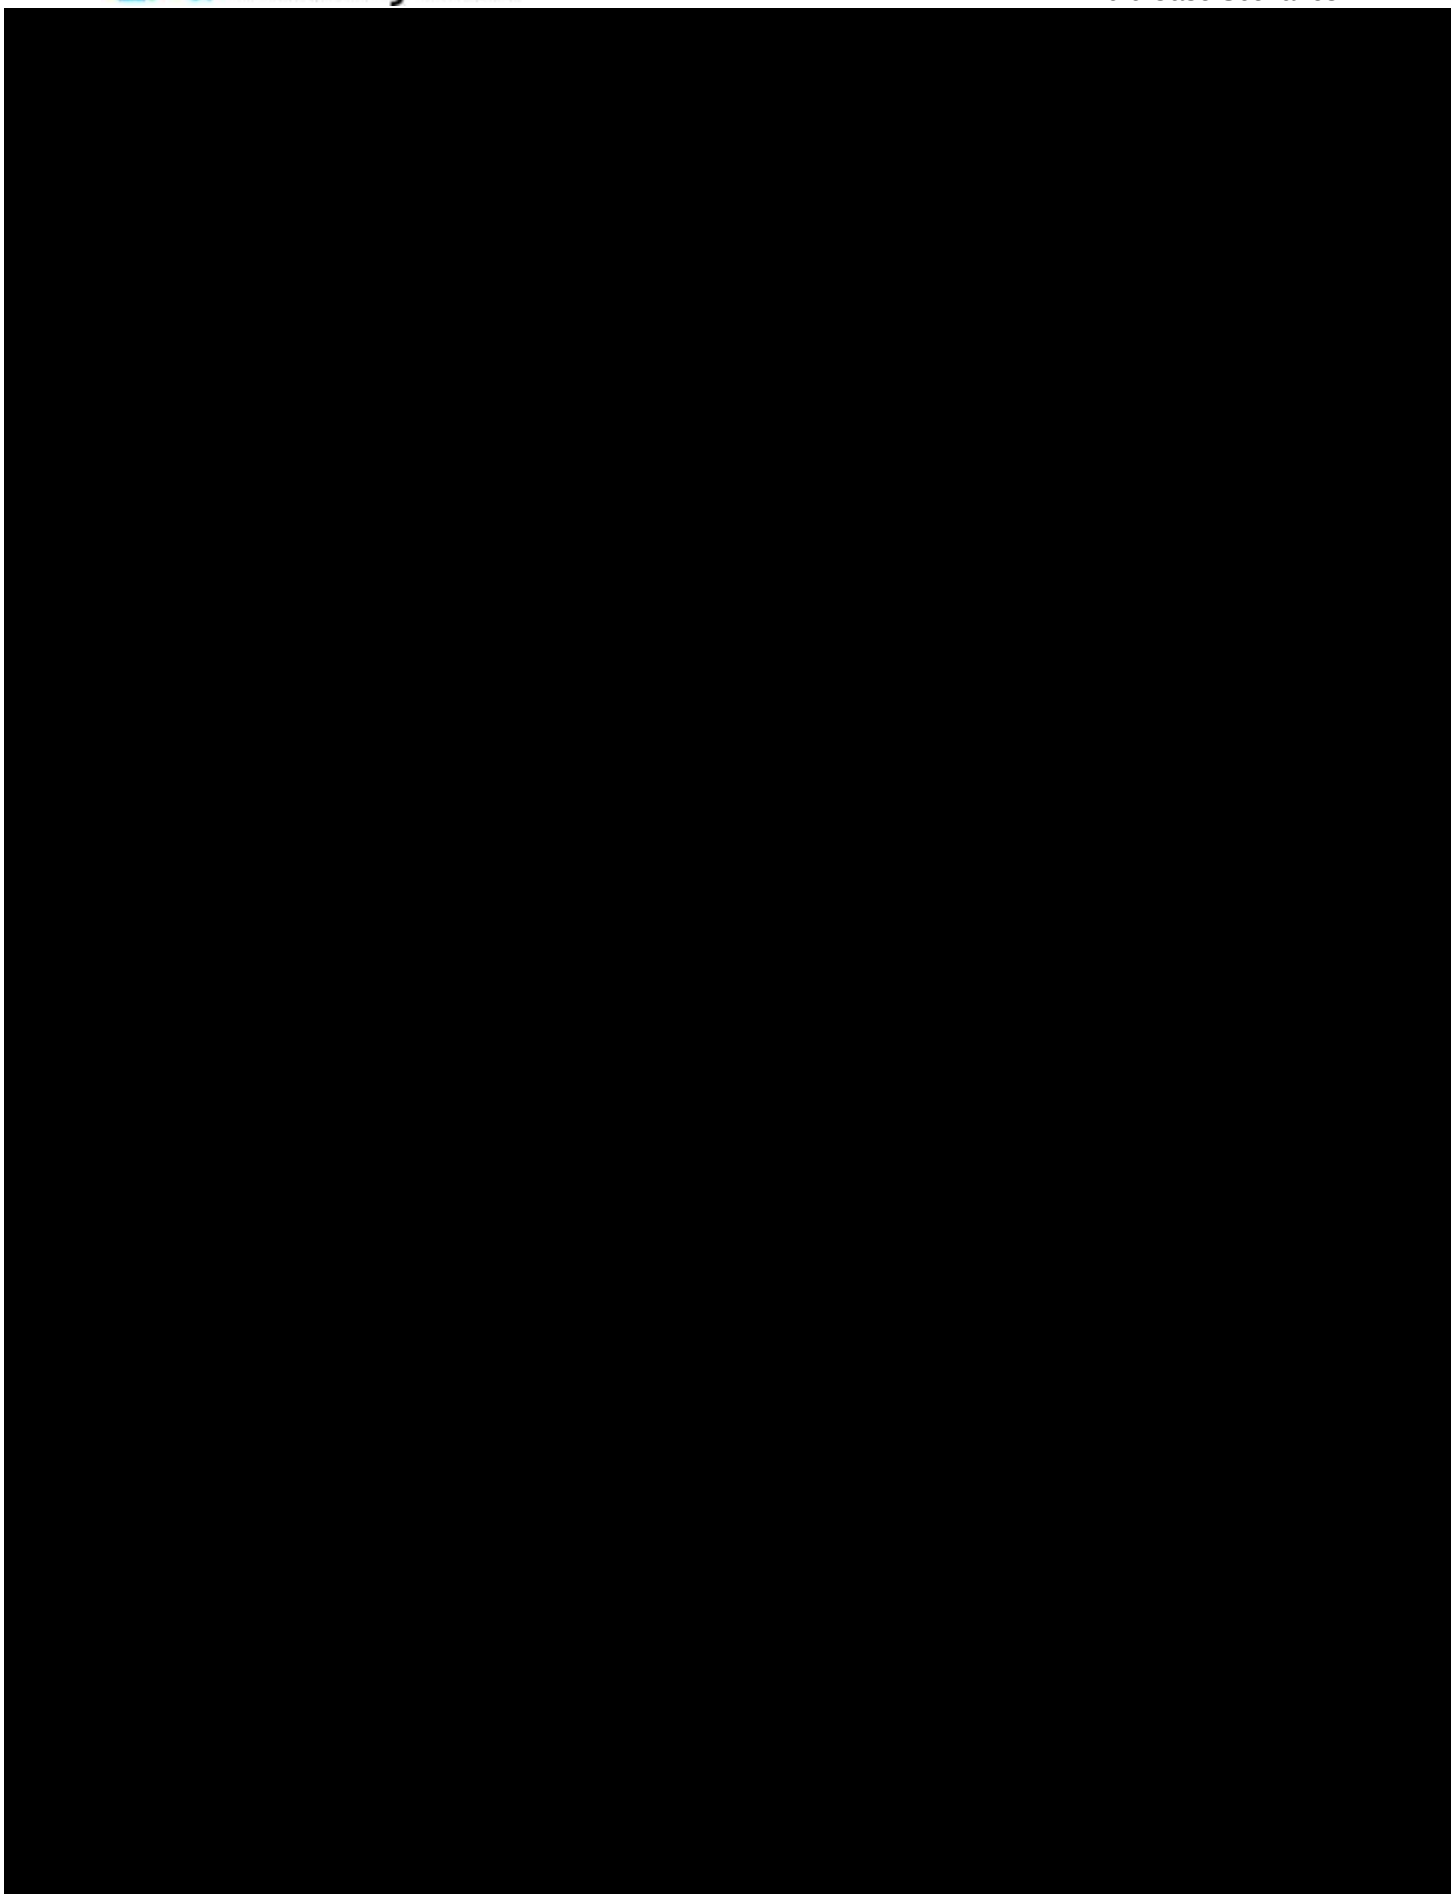
- Pain management treatment that Jennifer has been receiving and if she is still taking it
- Less invasive treatments, like Physical Therapy, that have been attempted and if they meet AIM Spine Surgery Guideline criteria
- Current plans to treat Jennifer's Hepatitis C (HCV)
- Status of Jennifer's diabetes and hypertension and provision of any guidance for weight control
- Current interventions to address her frequent use of the ED
- If Jennifer's children are currently diagnosed with or at risk for any BH or PH conditions
- Current gaps or needs based on social determinants of health (SDOH), such as lack of healthy nutrition resources, transportation, housing, social connections, childcare needs, or other factors

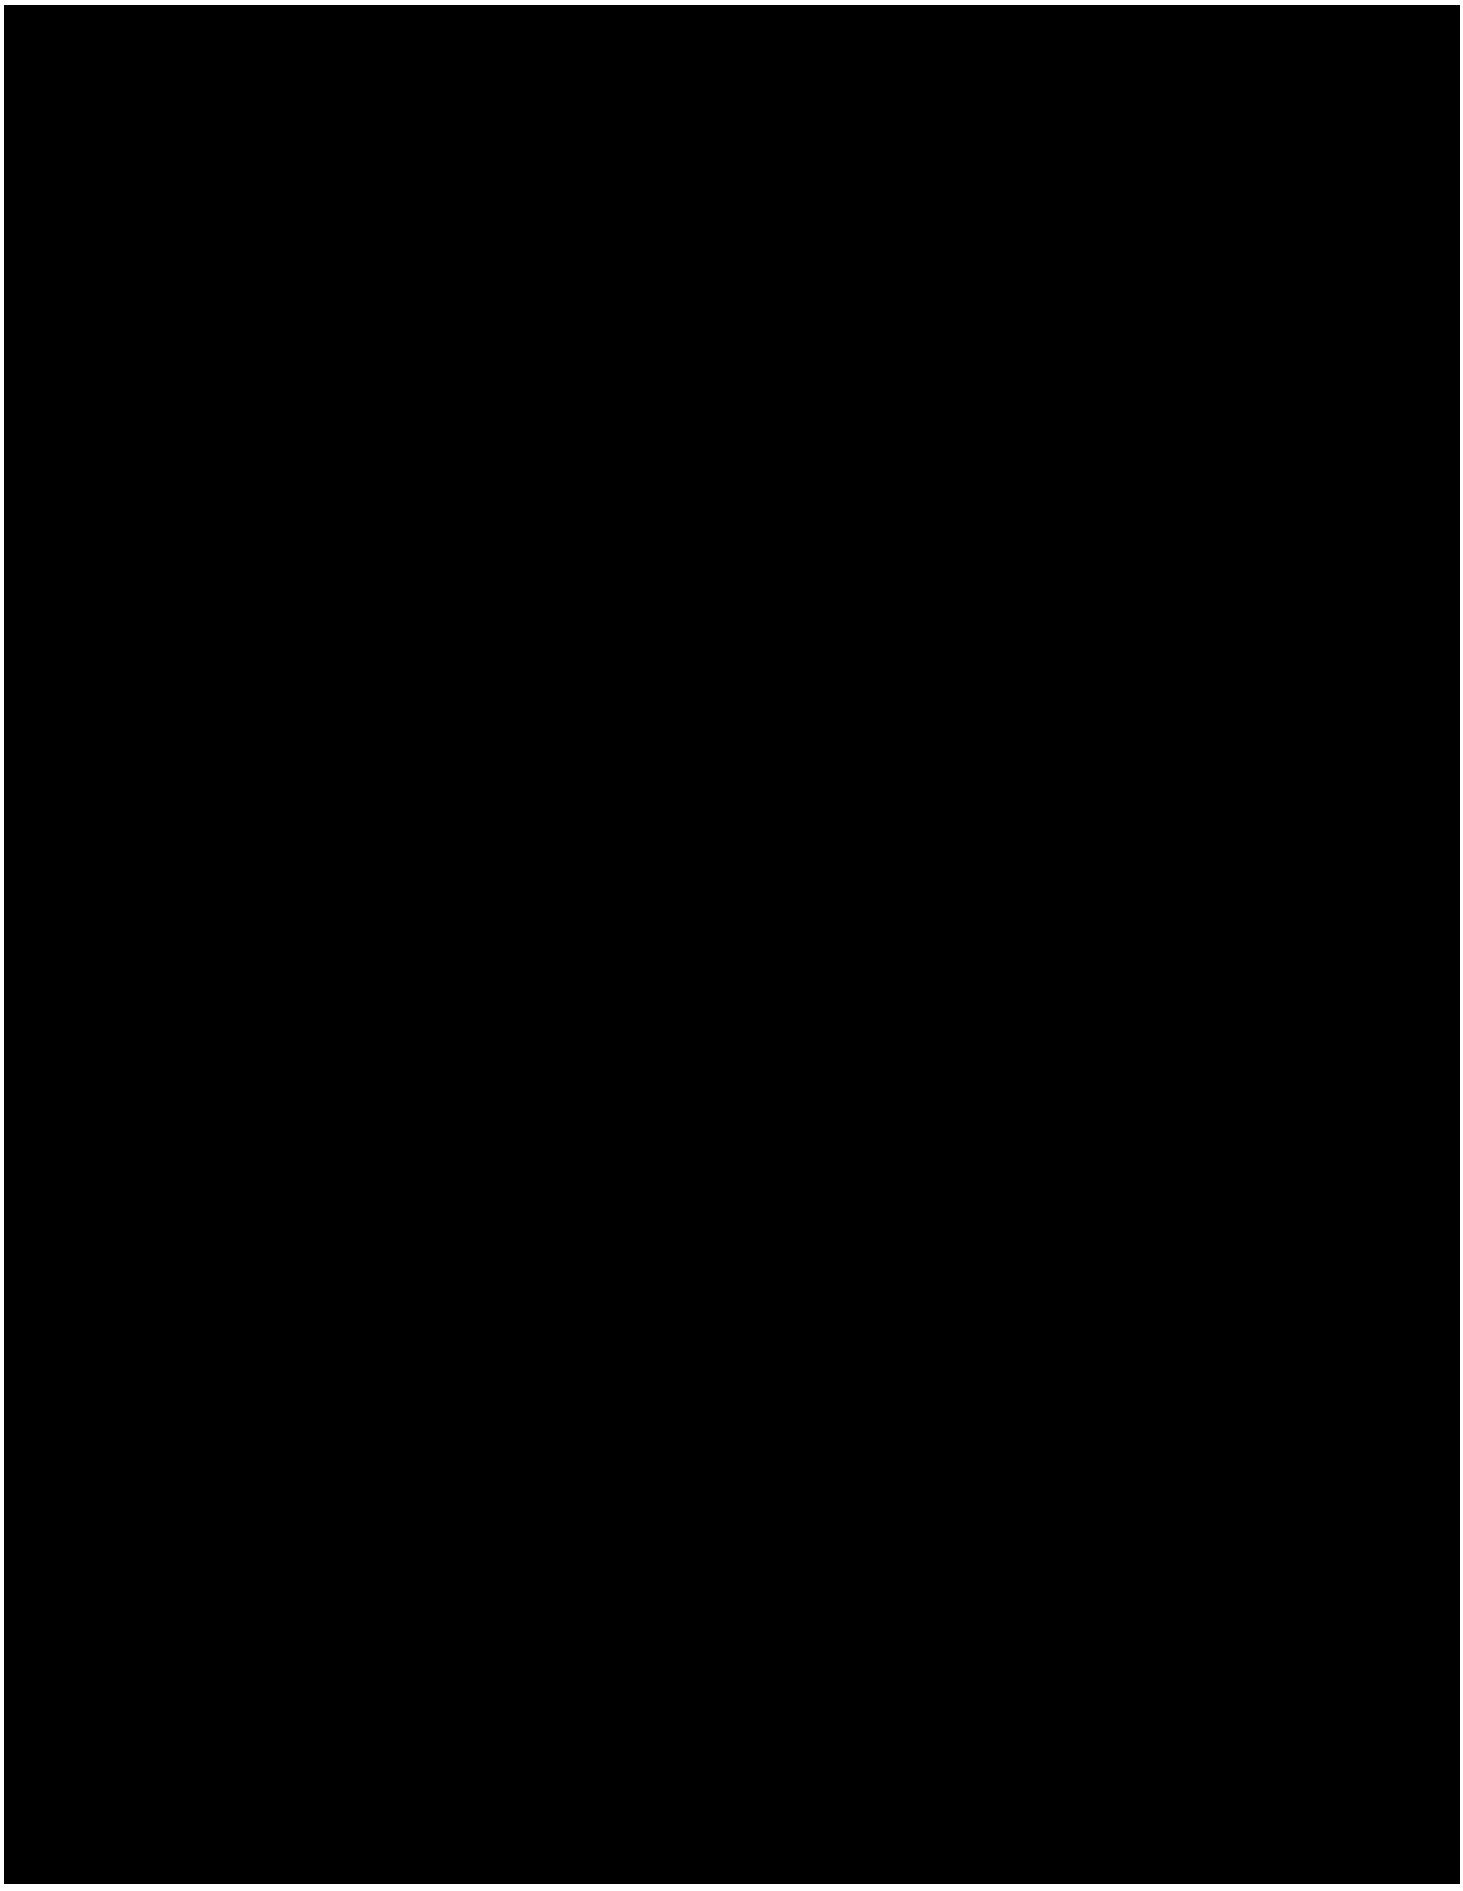
St. Helena Parish is sparsely populated with about **12,000 residents**, **27%** of whom are at or below the poverty rate and **50%** are single-parent households. Only **6%** of the residents have access to a readily available source of food and **21%** are experiencing some level of food insecurity. About **37%** of the adult population are obese.
LA_HealthyR2019_StHelena2_COB_02

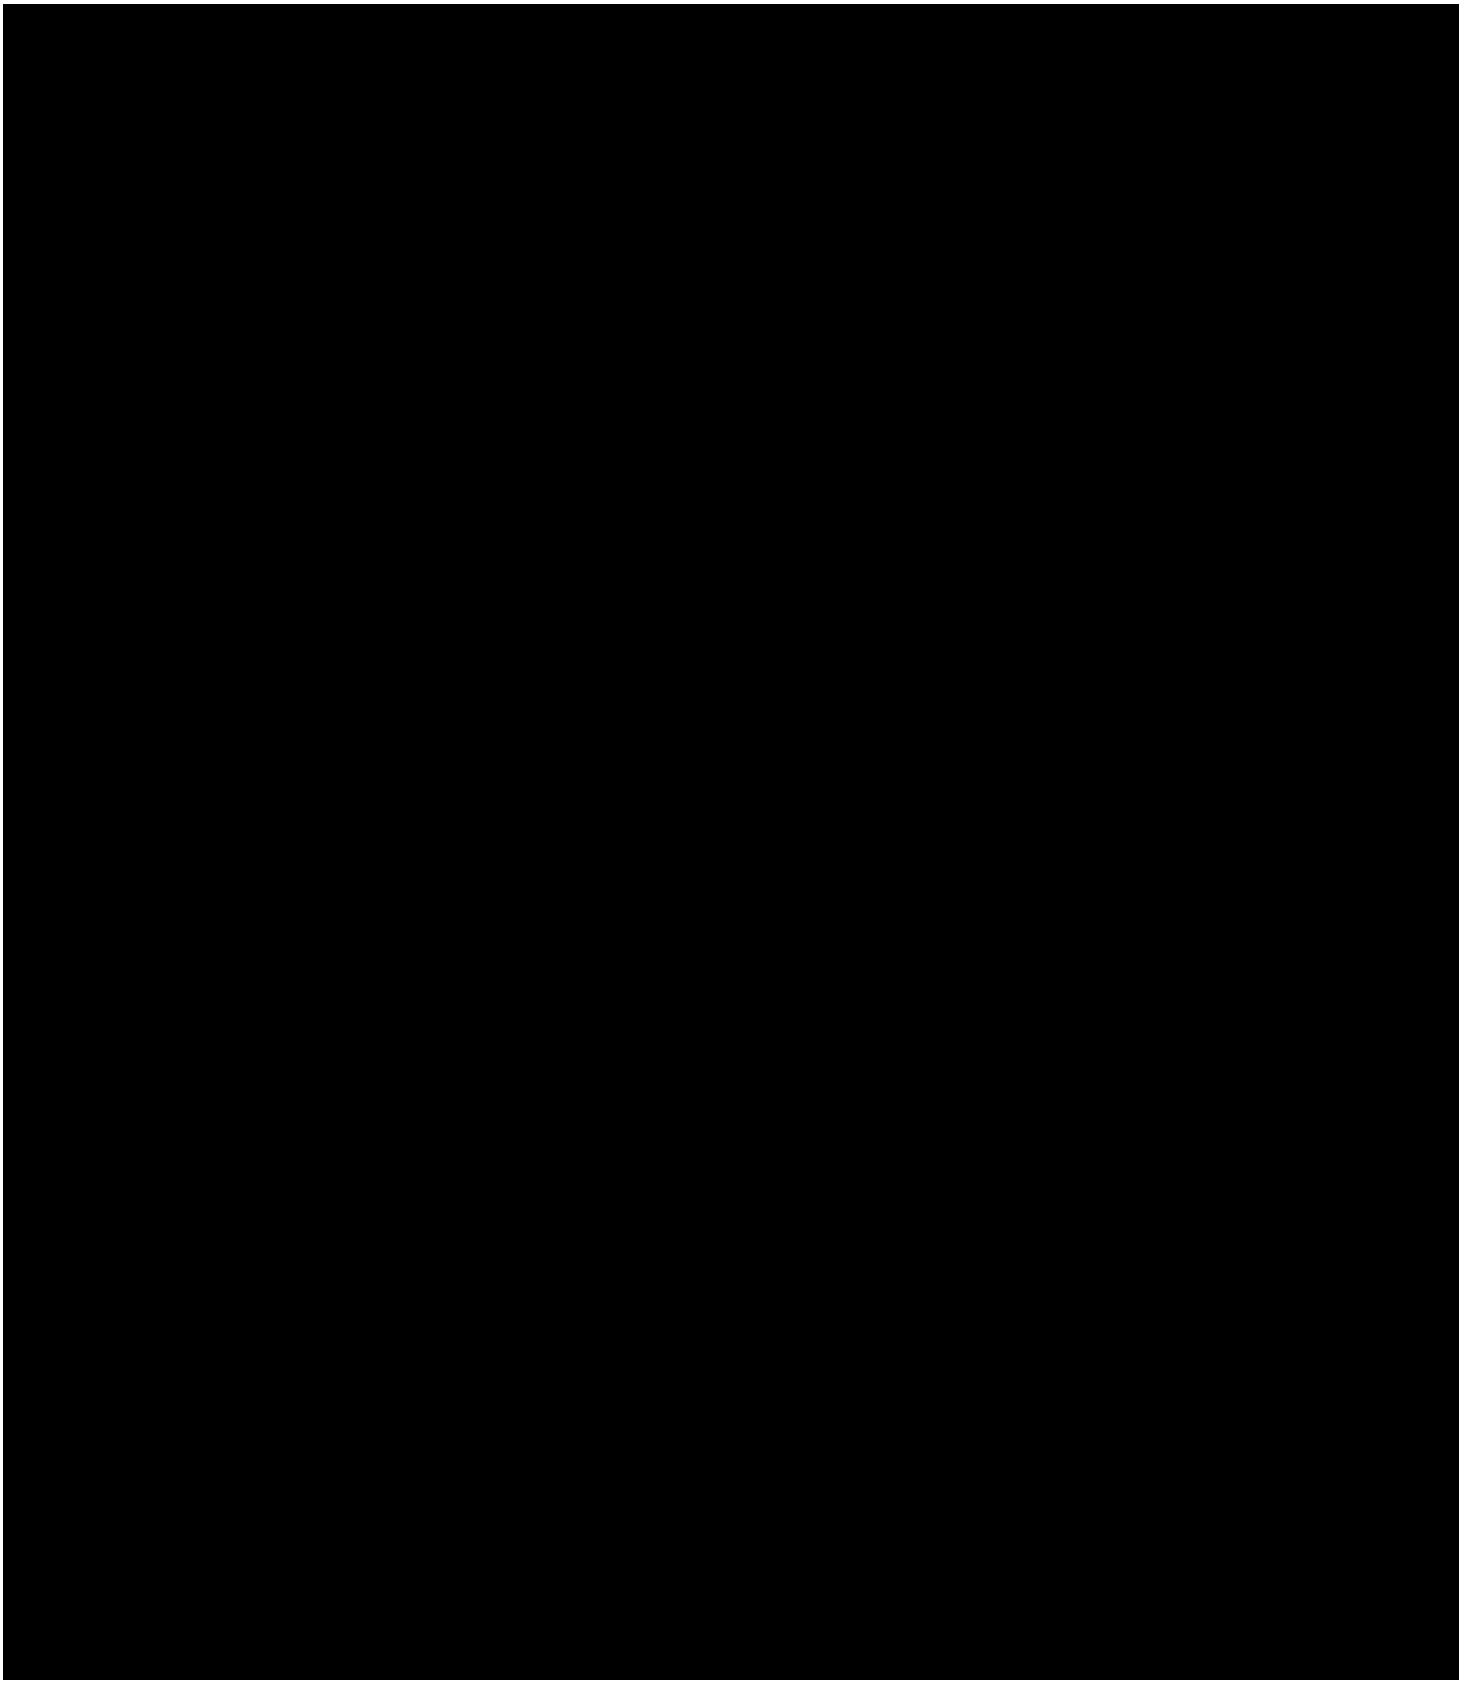
Gathering comprehensive information based on Jennifer's unique needs helps us to holistically address them from her perspective. Our integrated, multidisciplinary UM process leverages relevant evidence-based practices and industry-recognized clinical guidelines, while partnering with treating providers and working with Jennifer to improve her health, well-being, and quality of life. We respond to Jennifer's unique needs and situation, and consider her home environment, family and caregiver supports and resources, and characteristics of the local health care system that is serving her when making medical necessity decisions.

Jennifer's holistic needs encompass more than the initial service request, so Sarah will continue to interact with Jennifer to begin the reassessment and care plan revision process, described in the following subsections.









2.10.6.2 Case 2: Jacob Needs Immediate Attention for BH Issues

We coordinate all aspects of a member's care through our person-centered care management approach. For children and adolescents like Jacob, we work with families and/or caregivers with awareness of, and sensitivity to, the personal experiences and preferences of members and their families. Our focus is on supporting families so that we can help achieve the best possible outcomes for the child and equip parents or guardians with the resources, tools, and information they need to be the best advocate for their child and the family's overall health.

Discover

Healthy Blue's primary focus is to identify and address Jacob's need for the least restrictive setting and to achieve the best health care outcome for him and his family. Jacob is currently in the ED and the evaluator is recommending a brief psychiatric inpatient stay for Jacob to stabilize his current symptoms. However, the ED is unable to locate an available bed in a facility. While Jacob is waiting in the ED, his father and stepmother contact Healthy Blue, explaining that the hospital is recommending an inpatient stay but that they are unable to locate a bed for Jacob. After Jacob's parents share the details of Jacob's situation — outlining to the UM reviewer his history of abuse and the current worsening symptoms of post-traumatic stress disorder (PTSD) and self-harm behavior — the UM reviewer, working with Jacob's family, notifies Jacob's CM, Michael. The original assessment of Jacob's health conditions has already resulted in a high-risk Tier 3 stratification, so the UM reviewer and Michael immediately ***mobilize the Healthy Blue Clinical team and BH Coordinator to intervene and address Jacob's need for inpatient treatment***. Michael engages with the BH Coordinator and goes to the ED to meet with Jacob and his family in person to discuss the situation and to assist with coordination of services for Jacob. We also contact Dr. Hammer, a psychiatrist on our advisory board, to go to the ED and complete an evaluation of Jacob's current needs, including validation of a Certificate of Need to determine the right care currently for Jacob.

While Michael is with the family, he completes the screening questions for a referral to the LDH Coordinated System of Care (CSoC). ***Building shared capacity to improve health care quality through data and collaboration between MCOs and providers, we work closely with the administrator of the CSoC to conduct weekly rounds for the members we have in common and will contact them to let them know of this new referral.***

Our team takes an intensified approach to engage Jacob and his family while also leveraging relationships with providers and resources to locate needed bed availability. This integrated approach includes our UM and Care Management teams, our BH Coordinator, our Liaison to the Office for Citizens with Developmental Disabilities (OCDD), with which Jacob is already involved, and our BH Medical Director. These teams work together with Jacob's providers, the hospital and their evaluation staff, and Jacob's family to stabilize the psychiatric crisis and quickly identify resources to find relief for the family. This includes connecting with Capitol Area Human Services (CAHS) for potential crisis stabilization availability that can provide the recommended services. ***The Healthy Blue Clinical team immediately begins a search for the next available inpatient bed for Jacob, regardless of whether the availability is within our provider network or with an out-of-network provider.***

The UM reviewer, after relaying the next steps to Jacob's family, contacts the ED to gather the needed clinical information to complete a prior authorization for services, so that when a bed is available, a transfer can happen expeditiously. This discussion includes the recent visit to the ED, discharge or provider recommendations, current symptom and behaviors, history, and any medication changes. Michael and the UM reviewer speak with the ED discharge planning staff to review the discharge plan from the prior visit and to determine if it included a crisis plan. If there was a crisis plan, we also seek to find out what it was about the plan that didn't work. This step affords our Care Management and UM teams the opportunity to coordinate how effectively ED staff and Healthy Blue are communicating regarding Jacob's needs when he presents at the ED. As a result of shared identification of gaps, we ***work to partner with the ED to enhance our notification processes when Jacob is in need of emergency services,***

including the use of admission, discharge, and transfer tools that can provide real-time information about Jacob's condition to the Healthy Blue and ED teams. This will help both the facility and Healthy Blue to put in place the necessary care coordination for Jacob and his family and mitigate lengthy ED stays while hospital staff are waiting for resources to be available to Jacob.

The UM reviewer and Michael work in tandem to develop a solution for Jacob and his family so that services are not delayed and he can be safely transitioned into the most appropriate treatment setting.

Explore

Person-centered Approach

Michael convenes a meeting of Jacob's interdisciplinary team, which has been established since Jacob began receiving care management services from Healthy Blue, and reaches out to Jacob and his father and stepmother to begin the process of conducting a reassessment with Jacob, his family, and Jacob's providers to create an individualized care plan that will align with provider treatment plans. As we mobilize our internal clinical staff to locate provider and facility resources and coordinate with CSoC, Michael concurrently collects information regarding Jacob's BH and PH conditions, his treatment history, abuse history, and the SDOH that may be directly or indirectly impacting the development and treatment of Jacob's PH and BH conditions. ***Michael partners with Jacob's providers to obtain the most complete and accurate picture of his health and treatment from their perspective.***

East Baton Rouge Parish is the largest parish in Louisiana, with **22.7% of its population** below 18 years old. Approximately **75% of children** in the parish are eligible for free or reduced lunch and **25% of parish children** live in poverty. It is primarily urban and suburban and is the most highly educated parish in the state, with about **13% of families** living below the poverty line. LA_HealthyR2019_BatonRouge_DP_01

Michael spends face-to-face time with Jacob and his family in the ED, keeping them informed on our ability to identify the most appropriate treatment setting based on Jacob's individual needs and the needs of his family to accomplish the best possible outcome. Michael continues to establish trust, develop a relationship with them, and reassures them that this process will not delay the search for an inpatient bed for Jacob. Michael is familiar with East Baton Rouge Parish and the surrounding parishes, so he can identify potential providers for Jacob, such as the Cognitive Development Center of Baton Rouge, Start, Lighthouse Community Care, Merakey Pennsylvania, and Volunteers of America in Greater Baton Rouge.

Jacob is reported to have experienced early childhood abuse over several years and has an existing diagnosis of autism spectrum disorder, so Michael reaches out to our OCDD Liaison to determine if Jacob is receiving any Home and Community-Based Services (HCBS) through state-funded programs, such as Individual and Family Support and/or the Flexible Family Fund. We will also inquire about Medicaid HCBS Waiver programs.

Michael also meets privately with Jacob's father and stepmother to discuss their current mental status, find out how they are feeling, and to help identify their treatment needs to address the resurgence of their BH conditions. They are not members of Healthy Blue, but as part of a holistic, coordinated approach, we want to be sure that they are receiving the care they need. Michael encourages them to reconnect with their individual providers and to participate in the family treatment services that will be provided through the hospital, CSoC, and the Children's Choice Waiver, if Jacob qualifies. Michael will assist Jacob's parents in requesting the required assessment for waiver eligibility and inclusion in the Children's Choice or other appropriate waiver programs. If they need referrals or recommendations to providers, Michael will assist them in this effort. ***We strive to achieve positive health outcomes for Jacob by focusing on his family as a whole, with him as an integral part of it, rather than treating Jacob in isolation.***

Key Areas of Jacob's Comprehensive Assessment
Bio-psychological
• Multiple ED admissions • PTSD • Anxiety • Depression • Self-harm behavior • Autism spectrum disorder
Social and Supports
• Relationship with family, including stressors and past abuse history — is there a need for family therapy or parenting education? • Assessment of barriers to accessing educational resources — does Jacob have a current IEP? Is there a need for an education re-evaluation? • Access to autism spectrum disorder supports and services — has Jacob been receiving these supports and services? • Discussion of possible CSoC, Children's Choice, and other supports — which supports will be most appropriate? • Father and stepmother access to individual treatment for their BH issues — would they like to return to previous providers?

Screening and Assessment Tailored to Jacob's Needs

Time is of the essence for our response to Jacob and his family. The interdisciplinary team takes a person-centered, multi-agency approach to how they gather information regarding Jacob's health status and treatment history, along with addressing his father's and stepmother's current diagnoses and the escalations that they have experienced with their symptoms. Jacob's father and stepmother are engaged in a discussion about their treatment

history and how they want to move forward. If there is a need for their own treatment or to revisit medication options, Michael offers support and referrals to connect them to services addressing their BH conditions.

Michael also engages with our CSoC program liaison. CSoC provides a Wraparound Facilitator to develop a care plan to identify services and supports to meet the needs of children with BH concerns and their families, as well as other needed services and supports that affect their well-being. Children and youth who qualify for the CSoC program are referred to the CSoC program administrator to specifically address BH service needs. Michael and our Clinical team coordinate closely with CSoC through our multi-agency approach.

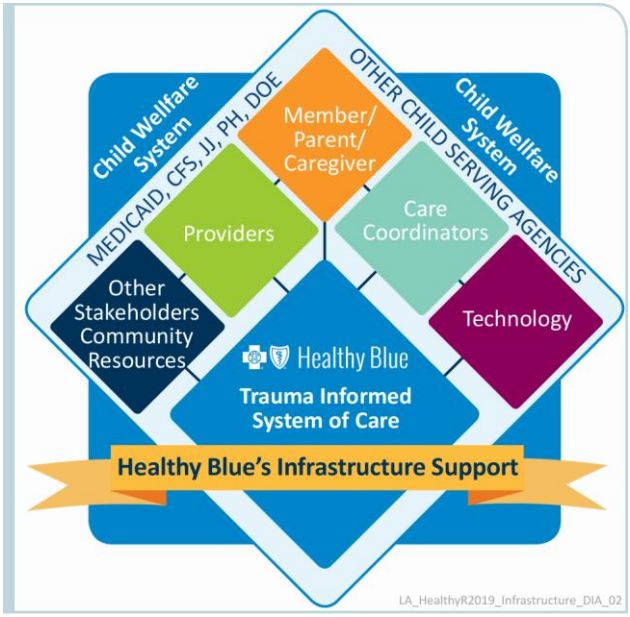
We also need to learn about Jacob's school situation. Michael asks Jacob's family if Jacob has an Individualized Education Plan (IEP) and is enrolled in any special education programs. If Jacob is receiving services in school, Michael seeks permission from the family to speak to the school personnel to obtain any pertinent information and education records. It is especially important to speak with his teacher(s) to obtain their insights into Jacob's behavior and educational challenges. Michael also requests results of assessments, including psychological testing, administered in school as part of the IEP eligibility process, to augment our screening and assessment process. During the reassessment process, Michael collects information about Jacob's functional and accessibility needs and goals. ***A critical part of this interaction is for Michael to find out the goals for Jacob and his family along with planning for their desired outcomes of treatment.***

Engage

Michael takes this information and works with Jacob and his family to explore and identify the most appropriate placement that will meet Jacob's needs once his symptoms are stabilized. This, along with any other health and SDOH needs, are incorporated into Jacob's care plan, which represents the goals that Jacob and his family have identified and addresses his health issues from a whole-person approach.

Addressing Jacob's Immediate Needs

Our task is to determine the safest placement for Jacob as quickly as possible to address his distress. We seek to locate an appropriate facility, regardless of its network status with Healthy Blue that is closest to Jacob's home to reduce the travel burden on his family. The Healthy Blue Clinical team secures a bed at River Oaks Hospital in New Orleans for immediate transfer and initiation of treatment. River Oaks Hospital provides comprehensive therapy services in addition to a trauma unit which will address Jacob's past trauma history. While at the hospital, Jacob can be evaluated for trauma-informed care, Adverse Childhood Experiences, and other trauma experience information that is helpful for his treatment plan. Jacob and his family are safely transported to River Oaks Hospital via LogistiCare's secure patient transport.

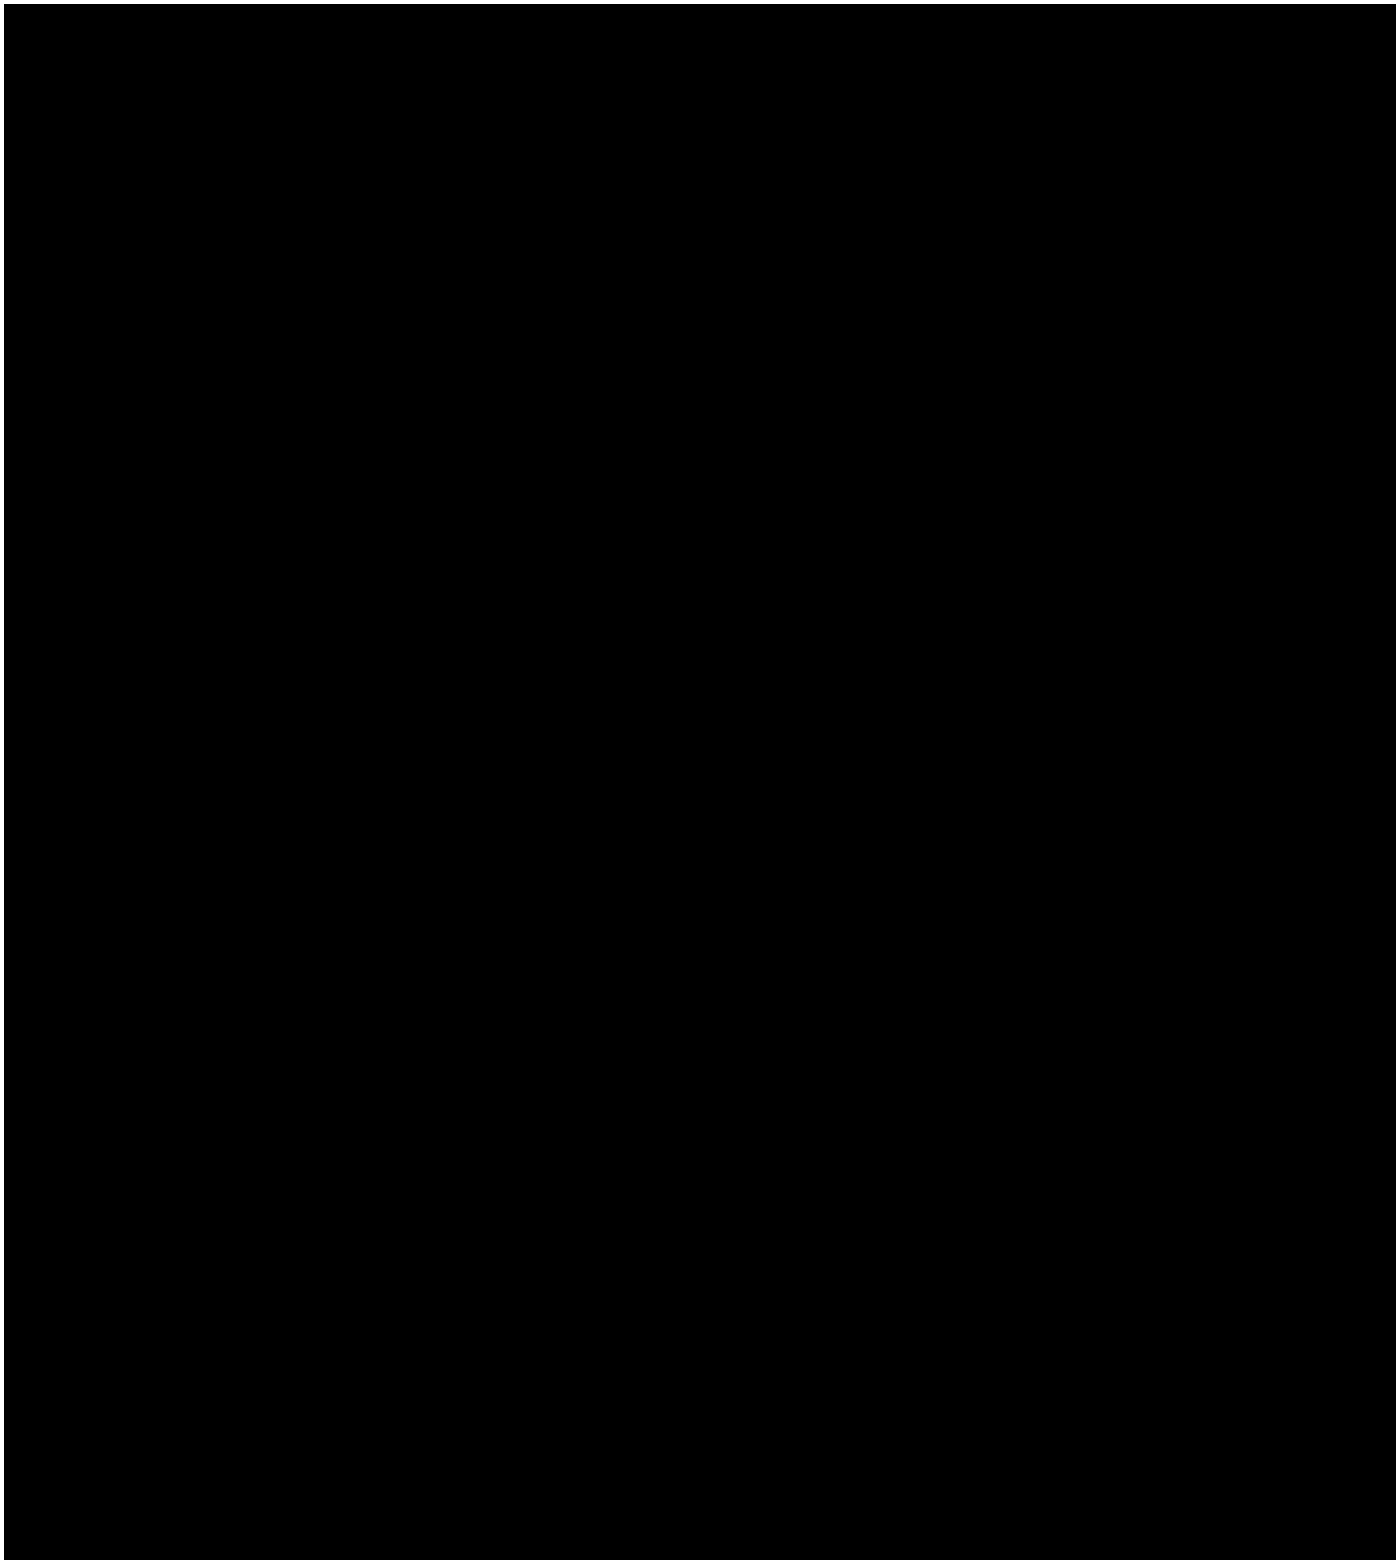


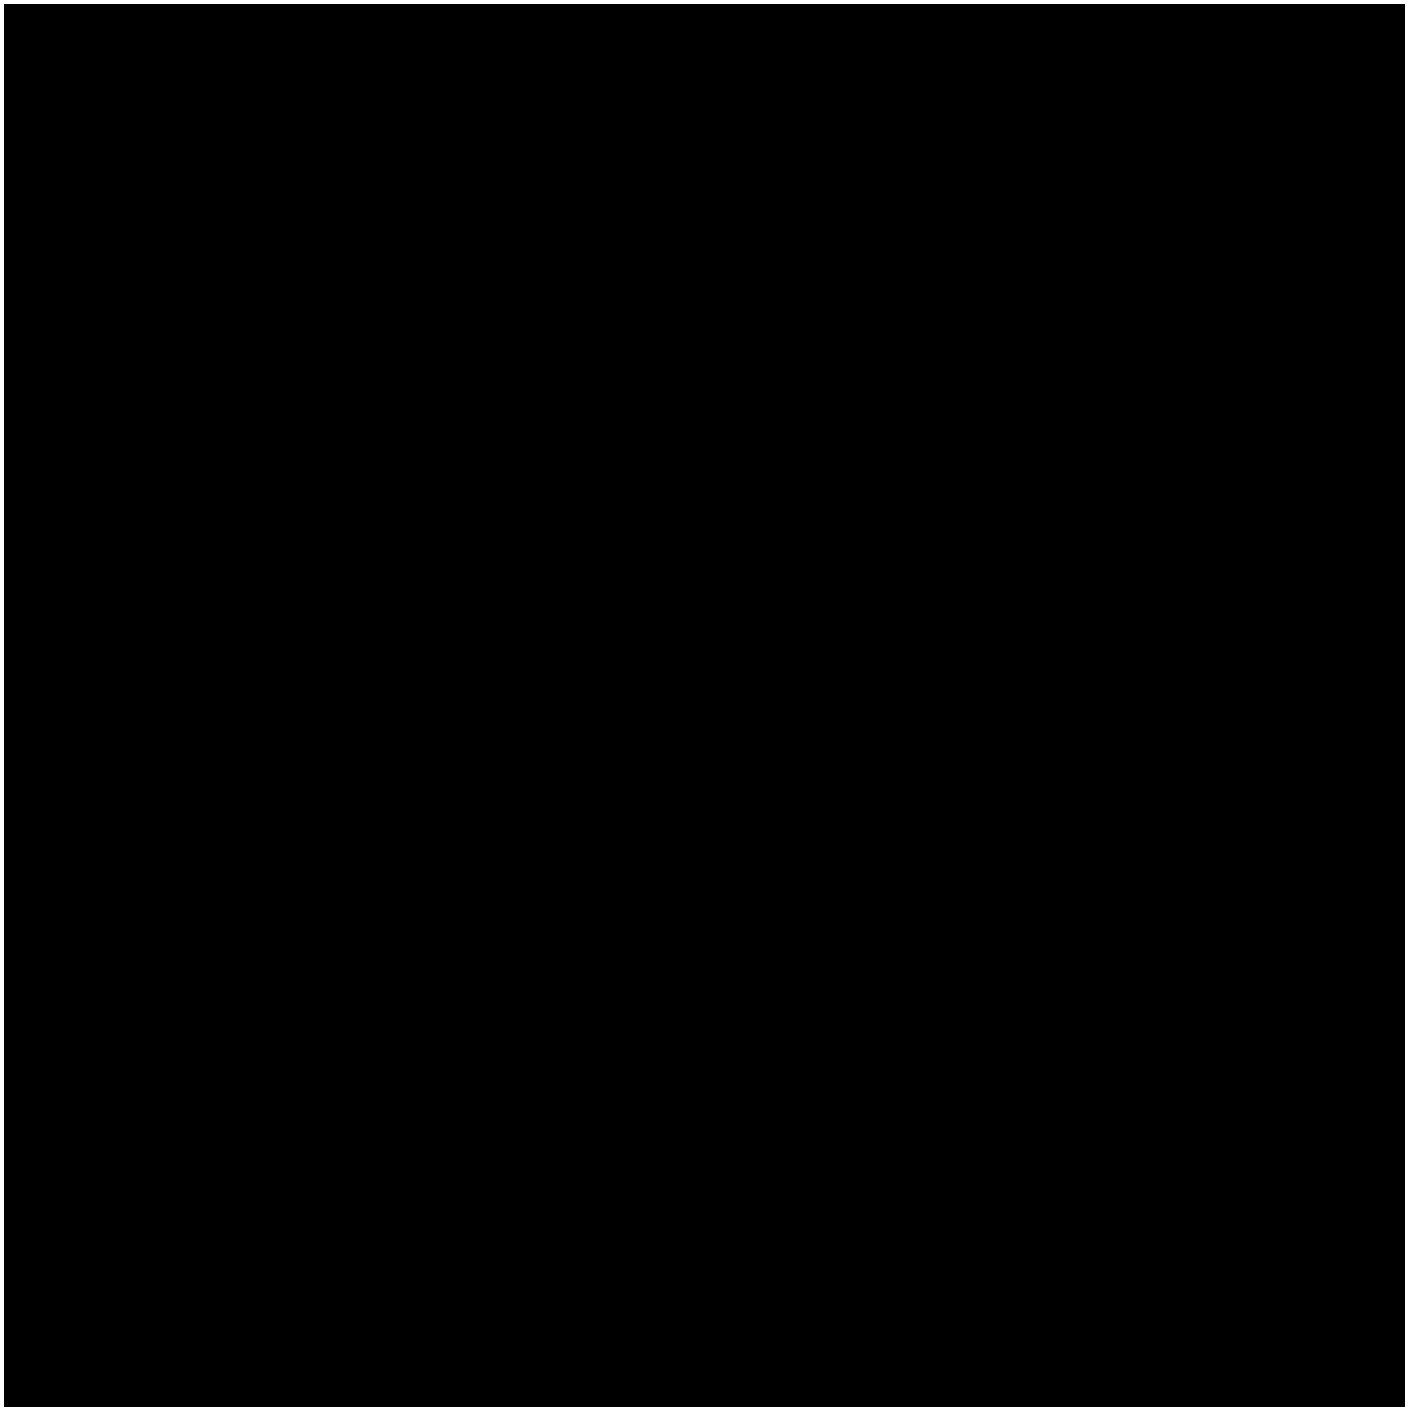
Jacob's stay at River Oaks Hospital is intended for short-term stabilization while the Healthy Care Manager works with Jacob and his family to develop a plan for the services they will need once he is discharged. Potential services include a brief stay in a Therapeutic Group Home and then return home with wraparound support.

Development of Jacob's Person-centered Care Plan

Once Jacob is safely in treatment, Michael convenes Jacob's interdisciplinary team to focus on what Jacob wants and needs in this process. The team also takes Jacob's family's desires regarding Jacob's treatment future into account in the care plan. The team now includes CSoC and Children's Choice representatives, educational representatives, wraparound and other in-home support providers, or any other caregivers or resources with which they are now working, in addition to the participants that Jacob and his family chose when the team was originally formed. This multi-agency approach is an effective method to verify that all involved parties and organizations are informed and aware of Jacob's status and needs at any given time.

As a critical component of Jacob's care plan, ***the team develops a crisis plan that can be deployed by Jacob's family in case of an emergency***, as demonstrated in Table 2.10.6.2-1. The crisis plan includes instructions for both Jacob and his family when his symptoms escalate. The crisis plan also helps Jacob identify the steps he needs to recognize when he is



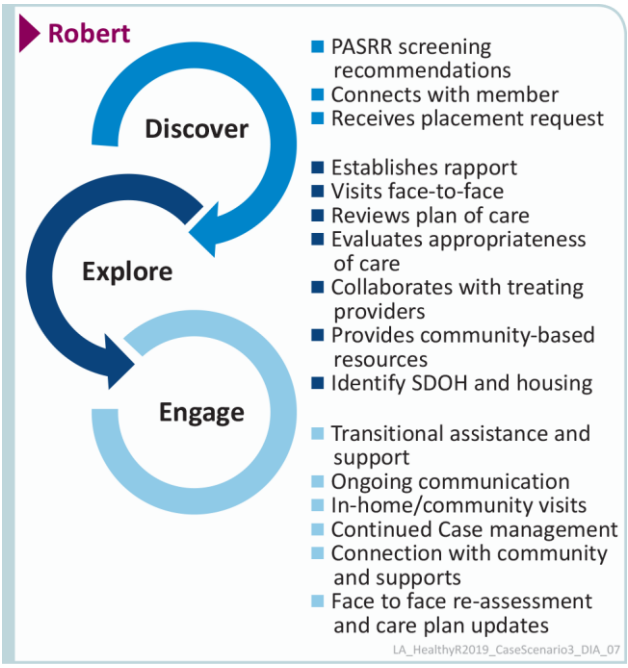


2.10.6.3 Case 3: Robert is Ready to Return to the Community

Healthy Blue is committed to safely transitioning members who qualify to transition home or other community-based settings through ongoing communications with the member, family members, and long-term care (LTC) facility staff. In the transition planning process, we work with members like Robert and their natural supports to identify risks and resources that can support the member in the new setting. We convene interdisciplinary transition conferences, including LTC staff, to develop transition plans that address our members' needs, priorities, and preferences. Our primary focus for members in LTC facilities is to promote best practices for care coordination that provide our members with the right combination of excellent, holistic care and services in a supportive setting that prioritize their desires and goals.

Discover

Healthy Blue's Nursing Home Care Manager, Amanda, was contacted by the Office of Aging and Adult Services (OAAS) through My Choice Louisiana, a program specifically designed for individuals with serious mental illness to transition from a nursing facility back to the community. This communication guided Amanda in her next visit with Robert at Kinder Retirement and Rehabilitation Center to continue discussing transition to the community. Robert's recent Pre-Admission Screening and Resident Review (PASRR) Level II assessment has been completed and indicates he no longer meets criteria and nursing home placement is not recommended. Robert is also interested in returning to the community.



Amanda has already been collaborating with Robert and the facility's Social Services Director (SSD) to develop a plan and begin the process of transitioning Robert to an alternative residence in or near Jefferson Davis Parish, where he currently lives and wants to remain. Amanda is a contributing member of our Population Health Management Workgroup; she understands the resources of Jefferson Davis Parish and the impact they have on Robert on his path to better sustained health. Amanda focuses heavily on coordination of care with other relevant facility staff, including the Director of Nursing; Robert's PCP, psychiatrist, and chosen pharmacy; community-based BH providers; occupational therapy providers; and other non-clinical community resources, such as senior recreation, churches, or clubhouse programs. Since Robert is also Medicare-eligible, Amanda assists with his application for Medicare enrollment. Amanda continues to work with Robert on transition planning while Medicare eligibility is being determined. Once Medicare is active, Amanda aids Robert in coordinating services with his selected Medicare providers. Our aim is to assist Robert to create a support network before his transition to independent living. ***Amanda has partnered with providers and resources and has identified the Merakey Assertive Community Treatment (ACT) team and Riverbend Senior Apartments in Mermentau as possible choices for Robert. The Permanent Supportive Housing and PRA 811 Housing programs, including the Volunteers of America, will also identify potential housing choices for Robert, if he is approved.***

2.10.8 NETWORK MANAGEMENT

Healthy Blue has a well-established, comprehensive, statewide Medicaid network of more than 21,600 unique providers that currently serves more than 258,000 Healthy Louisiana enrollees (members). As an incumbent Managed Care Organization (MCO) in Louisiana for over seven years, we partner with traditional and non-traditional, urban and rural providers to improve timely access to care, promote healthy lifestyles, and effectively manage costs.

Our Network Management strategy complements LDH's goals for member access to high-value care, innovation, a culture of continuous quality improvement, and service excellence by assuring members are cared for by high-performing, engaged providers that collaborate with us in a consistent and on-going basis. We are committed to deploying an on-going effort of support and collaboration through our ***Provider Promise: to deliver a best-in-class experience by simplifying health care so our providers can focus on member health***. We bring this commitment to life through the following distinct pillars that align our suite of provider programs and solutions:

- **Capacity for Efficient Care.** Assuring cost-effective provider capacity and compiling the appropriate mix of network providers and resources capable of delivering a culturally sensitive, effective model of care
- **Accountable Reimbursement.** Enhancing the fiscal ability of providers to transform care delivery in their practice to a model based on population health that emphasizes high quality and improved efficiency outcomes
- **Administrative Simplification.** Making it easier for providers to efficiently and effectively care for their patients through administrative simplification, specialized service models, and technical supports that reduce administrative burdens and increase provider and patient satisfaction
- **Health Advocacy.** Connecting, in a personal way, the highest performing and most appropriate providers of care with our members to optimize health outcomes and assure effective management of member social determinants of health (SDOH)

A distinction of Healthy Blue is our collaboration with BCBSLA, which gives us an incredible opportunity to influence and strengthen the health care delivery system across Louisiana. As a respected organization in the state of Louisiana — and with over 85 years of experience — BCBSLA's commitment to Louisiana has been unwavering. Providers and members alike know that the Blue brand means quality. Through our collaboration with BCBSLA, we have been able to expand our provider and community partnerships, opening the door for increased access to services and resources for our members.

Healthy Blue and BCBSLA work together to educate providers on our collective ability to best serve our members. In a highly personalized approach, senior leadership from Healthy Blue conduct provider visits at least monthly that offer individualized discussions with large provider groups to deepen and solidify our network relationships. Our leaders discuss the overall health care landscape, specific benefits of being a Healthy Blue network provider, the value of our work with BCBSLA, and our combined approaches to improve the health of members and their families. [redacted]

In 2018, our leaders met with key provider groups throughout Louisiana, including:

- Affinity Health Group
- Children's International Medical Group
- Bryan Sibley
- David Raines Community Health Centers
- Louisiana State University (LSU) – Shreveport
- Sulphur Pediatric Center
- Ochsner Medical Center
- Tulane University
- Access Health
- Daughters of Charity
- Franciscan Missionaries of Our Lady Health System (FMOLHS)

LA_HealthyR2019_2.10.8_KeyProviderList_55_COB_02

Healthy Blue provides our members with timely access to an extensive, statewide network of culturally competent primary and specialty care services providers, ***which includes more than 2,780 primary care providers (PCPs) — including more than 2,400 that treat adults and over 2,500 that treat children and adolescents, as well as over 200 hospitals, more than 15,000 specialists and ancillary providers, and over 4,600 BH professionals***. Our strong relationships with Louisiana's providers position us as we monitor our network, identify network gaps, and solve for those gaps. We maintain and manage our network according to our detailed, comprehensive Provider Network Development and Management Plan for monitoring our network, identifying network gaps, and expeditiously resolving those gaps. Our Network Development team continually focuses on network enhancements to expand access. [redacted]

[redacted]

Our dedicated Provider Relations team live and work in their local communities and build trusting and collaborative relationships with providers through a "boots on the ground" approach. They monitor the network as well as key access measures, and educate and service providers using a high-touch, one-to-one methodology. ***In 2018, our Provider Relations Representatives (PRRs) met with more than 1,820 providers and provider groups, in addition to conducting numerous Joint Operating Committee (JOC) and Care Delivery Transformation (CDT) meetings with providers across the state.***

Our Provider Solutions department is organized into dedicated Network Development and Provider Relations teams to maximize their effectiveness in monitoring and expanding our network access and supporting our network providers. Our Network Development team is responsible for:

- Identifying network gaps to maximize member access
- Deploying strategies to increase provider capacity to meet the needs of members where gaps have been identified
- Monitoring the network to assure compliance with Contract requirements
- Recruiting and retaining providers, and monitoring their success in meeting goals for quality and access
- Assuring our network meets the multi-lingual, multi-cultural, and disability needs of our members

We discuss each of these responsibilities in detail in the following subsections. We affirm we will provide or assure the provision of all MCO-covered services specified in the Contract and that availability and accessibility of those services, including geographic access, and appointment and wait times for members will be in accordance with the access and network adequacy standards set forth in the Contract, applicable federal regulations, and Attachment D, Provider Network Standards.

2.10.8.1 Identification of Network Gaps

We continuously monitor, maintain, and update our network to offer our Healthy Blue members full access to core benefits and covered services within LDH standards for timely access to care and services.

To evaluate the current accessibility of our network and project future needs, we consider:

- The anticipated number of members
- The multi-lingual, multi-cultural, and disability needs of members
- The expected member utilization of services
- The numbers and types of providers, and provider-to-member ratios
- The geographic location of providers and members

We review multiple sources of data to identify network gaps and enhancement opportunities based on patterns, trends, and service demands specific to the region and parish. These data sources include:

- **Monthly Network Changes.** We review all network additions, deletions, and PCP capacity changes, by provider type and location, every week. We compare results to LDH time and distance standards, and deploy targeted provider recruitment (discussed in Section 2.10.8.4) and contracting strategies (discussed in Section 2.10.8.2) to address gaps and increase provider capacity
- **Annual Member Satisfaction Surveys.** Our Quality Management department engages a qualified, LDH-approved vendor to administer the most current version of the CAHPS® survey. We review results to identify areas where members indicate gaps may be preventing full satisfaction. Based on results, we deploy targeted provider recruitment and contracting strategies to mitigate gaps, and additional provider training through our PRRs and Provider Training Specialists to improve service excellence.
- **Annual Provider Satisfaction Surveys.** Findings from our provider satisfaction surveys are supplemented by findings from LDH's surveys, and results from both are used to identify improvement opportunities. These surveys include key questions about the quality and adequacy of our provider network. We place great emphasis on provider satisfaction to assure our members are being cared for by high-performing, engaged providers. Based on survey results, we deploy strategies designed to increase retention and provider satisfaction.
- **Continuous Employee Feedback.** Our PRRs, Care Managers (CMs), Quality Management employees, and Member Services Representatives (MSRs) provide feedback on the quality, access, and availability of our provider network to maximize success. They are in the field daily working with stakeholders — members, families, providers, and community-based organizations. These stakeholders are best poised to provide feedback concerning needs and opportunities, help us solve challenges, and assure we are delivering the best possible array of services to meet member needs.
- **Network Strategy Workgroup Meetings.** This cross-functional workgroup meets twice per month and includes representatives from Provider Relations, Network Development, Medical Management, Quality Management,

Compliance, Community Outreach, Government Relations, and Finance. It provides valuable insight and feedback to assure our network has the right number, mix, and geographic distribution of providers to meet the needs of our members. Led by our Provider Services Manager, participants include our Chief Executive Officer, Chief Medical Officer, Behavioral Health Medical Director, and Chief Operating Officer. A key focus of this workgroup is assuring data accuracy related to our provider network and its ability to address member access issues.

- **Provider Advisory Committees.** Serving as our Provider Advisory Council, our Provider Advisory Committee (PAC) is key to gathering provider input and feedback on our programs, value-based strategies, clinical policies and practice guidelines, and the services we deliver to providers as well as members. We use the PAC to advance State goals and objectives. For example, during our February 27, 2019 meeting, we discussed our new Food Insecurity Value-Based Payment (VBP) program and our ADHD Toolkit and training to advance evidence-based practices. ***Additionally, Healthy Blue and BCBSLA deploy a cross-pollination strategy at respective PACs by assuring that at least one member is common to both committees. This allows us to gain insight into and leverage strategies that have been successful for BCBSLA, and vice versa.***
- **Joint Operating Committee (JOC) Meetings.** Each of our network provider groups that participate in our Category 3 Alternative Payment Models (APMs) host JOCs at least quarterly to discuss strategies to unify and simplify resource coordination, enhance provider and member experiences, and coordinate education and co-education initiatives. JOCs create a forum to proactively address evolving areas of potential concern, organizational changes, and clinical care initiatives that enhance member outcomes. Provider participants include representatives from Quality, Operations, Regulatory, Payer Relations, Population Health, and Marketing; Healthy Blue participants include our Executive Leadership team, Clinical Directors and leads, Care Management, Quality, Operations, Finance, Network Solutions, and Member Services.
- **Quarterly Health Education Advisory Committee Meetings.** This committee includes Healthy Blue and representatives from community-based organizations that provide services to members. During the meetings, we solicit feedback for ways to improve timely access to care, promote healthy lifestyles, and effectively manage costs. For example, in March 2018, we received feedback that the number of materials provided to members, including information related to providers and covered services, overwhelmed them. Based on this feedback, in December 2018, we introduced a streamlined member welcome packet with a quick reference card for accessing provider-related information from our member website. Similarly, in June 2018, we received feedback related to member SDOH that transportation was needed to address food insecurities. In addition to adding provider training related to available member transportation modes, we donated 15 commercial refrigerators to local food pantries across the state to help increase access to fresh fruit and vegetables.
- **Member Grievance Information.** We review member grievances and provider complaints to monitor provider adherence to access standards. Our MSRs review, log, and categorize grievances by cause, disposition, and type. This includes grievances regarding access to care. Action plans are developed, and results are tracked to closure.

We also use various sources of member input to identify gaps in our provider network. For example, we conduct research and obtain information using focus groups (with LDH approval) and one-to-one member interactions. We also conduct online and third party provider network comparisons. For example, we utilize Zelis (formerly known as Strenuus), a market-leading provider of health care competitive analysis, to assess our network in comparison to other MCOs to help us identify additional providers for contracting to fill gaps. The resulting data is used to evaluate our network access at both the provider and group levels.

We will leverage our relationship with BCBSLA to address the operational, day-to-day aspects of providing care to our members. BCBSLA representatives participate in our Network Strategy Workgroup meetings to address both provider and member needs, identify network gaps, and assure timely access to culturally competent primary and specialty care services necessary to promote LDH's goals.

In addition, we will closely monitor LDH's implementation of the centralized Credentials Verification Organization (CVO) for credentialing providers across MCOs. Upon CVO implementation, we will outreach to targeted providers, including PCPs, pediatricians, pediatric specialty providers, and OB/GYNs, within 30 days of being notified by LDH that a given provider has been credentialed by the CVO to invite them to join our network. Additionally, we will direct providers that are not already enrolled in Louisiana's Medicaid program, but are interested in joining our network, to the CVO to complete the credentialing process. Our provider website will also include a link to the CVO website. We will notify LDH should we be informed that a credentialing determination has not been made within 30 calendar days of the provider's application.

Time and Distance Standards

We use GeoAccess® reports to identify gaps related to time and distance standards. On a quarterly basis, using data analytic tools, we conduct a network assessment against LDH time and distance standards to verify that our network

(including hospitals, groups, PCPs, specialty providers, and BH providers) meets adequacy and accessibility standards to deliver covered services to our members. We generate and review GeoAccess reports to determine any network gaps based on where our members live.

We submit the results to LDH using our Provider Services/Network Adequacy Report, which includes analysis of GeoAccess Miles and Minutes reports, physical health (PH) and BH network adequacy, and required provider to member ratios. Based on our ongoing evaluation of our statewide network adequacy, we identify areas of focus for ongoing network development activities to further assure gaps are addressed proactively.

After-hours Clinic Availability

To measure and verify compliance with acceptable after-hours coverage, Healthy Blue conducts a quarterly After-hours Access to Care Audit of a random, statistically valid sampling of providers in each provider category, using the following data sources to formally assess our performance against our own standards and LDH standards:

- Accessibility of Services surveys conducted by an NCQA-certified survey vendor
- CAHPS Survey (Adult and Child)
- Complaints or grievances related to appointment access

Results from our most recent After-hours Access to Care Audit showed 76% of our members received after-hours care within 30 minutes. Additionally, 80% of members reported that they received care as soon as it was needed, when care was needed right away.

Our Provider Relations team also monitors and validates after-hours clinic and appointment availability during their in-person visits to provider offices. When they identify a provider who is not complying with after-hours coverage, they investigate the issue and determine whether to take corrective action.

Our Access and Availability Compliance Committee meets monthly to review and analyze the data and assist with prioritization of opportunities to improve continuity and coordination of care. This committee includes stakeholders and staff from Provider Relations, Network Development, Utilization Management, and Quality Management. The Committee is solely dedicated to making sure that appropriate steps are swiftly taken to address deficiencies in compliance by providers who serve our Healthy Blue members.

We implement focused initiatives to improve access to after-hours clinics and reduce the number of members presenting to the emergency department (ED) for after-hours care, including enhancing our network of urgent care facilities. [redacted]. In addition, ***we are strategically collaborating with PCPs affiliated with St. Martin Parish Hospitals and Natchitoches Regional Medical Center, compensating them with additional reimbursement to incent them to expand office hours and encourage their participation in our After-hours Primary Care program***, which also offers additional reimbursement for extended evening and weekend hours.

Closed Panels

Healthy Blue historically maintains a high percentage of PCP locations with open panels. This can be attributed to the strong partnerships we have developed. Our Provider Relations team is the hub for provider support, communication, and problem solving. Every member of our team lives in the communities we serve in Louisiana. We are the local touchpoint in the provider's back yard, and we bring consistent leadership and continuity to Louisiana's Medicaid provider community. ***Of all of our network PCP group locations across the state, 83% have open panels.***

Our PRRs review panel status reports on an ongoing basis and our Network Strategy workgroup reviews reports twice monthly. Should we identify a need for additional PCPs with open panels, we develop a detailed action plan — including staffing, responsibilities, resources, and a timeline to mitigate the situation. Some of our strategies include: (1) working with existing providers with closed panels to meet requirements for re-opening their panels, or asking them to accept the member on an exception basis; (2) collaborating with providers to open new practice sites and use physician extenders and Community Health Workers; (3) leveraging relationships with Independent Practice Associations (IPAs) and other provider organizations to recruit additional physicians; (4) referring members to out-of-network (OON) providers through single case agreements (SCAs) in the event care is unavailable within a reasonable distance to the member; and (5) facilitating transportation services as needed.
In addition, our value-based model contracting language also promotes increased access to primary and preventive care and wellness through a variety of program measures and participation criteria that include appointment availability, after-hours access, and open panels.

2.10.8.2 Increasing Provider Capacity and Meeting Needs Where Gaps Have Been Identified

Our members and their care are our priority. We deploy resources, tools, and strategies around assuring their goals and well-being. We are driven by purpose and excel through innovation in our efforts to improve access to care, promote healthy lifestyles, and effectively manage costs. To this end, Healthy Blue is committed to the following strategies and innovations to increase provider capacity for our members.

1. Targeted Provider Contracting to Increase Network Capacity

Our targeted provider contracting initiatives are based on and driven by our GeoAccess gap analyses. Our Network Development team is dedicated to reducing provider complexity and administrative burden; and focusing on continuously improving access to care, increasing provider capacity, and looking for ways to integrate PH and BH. In response to our gap analyses, we have initiated the following strategies to increase access and provider capacity, and effectively address the needs of our Healthy Blue members.

PCPs. Healthy Blue continues to expand primary care access by leveraging our work with BCBSLA and targeting key practices across Louisiana that have limited participation under Louisiana Medicaid. For example, based on the strength of our collaboration with BCBSLA, ***North Oaks Pediatric Clinic and Pontchartrain Pediatrics*** are now contracted with our network resulting in expanded PCP access in Region 9 (the North Shore).

Psychiatric Residential Treatment Facilities (PRTFs). Louisiana has a deficiency of PRTFs throughout the state. ***We have diligently worked to attract PRTFs and have dedicated a Network Development Specialist for contracting these providers.*** [redacted]

Patient-Centered Medical Homes (PCMHs) and Patient-Centered Specialty Practices (PCSPs). PCMHs and PCSPs are an effective way to expand provider capacity through implementation of a person-centered, team-based care model. Within our Network Development team, we have a dedicated PCMH/PCSP Medical Practice Consultant to work with non-PCMH/PCSP providers so that they can become NCQA-recognized. ***In Louisiana, our network includes 38 PCMH recognized provider groups representing 91 practice locations.*** In 2018, we expanded the program to include PCSP recognition with a focus on BH providers to further facilitate integration of PH and BH. To assist providers with the costs of NCQA recognition, we reimburse practices 20% of their NCQA PCMH/PCSP application fee. We will also provide practices who achieve PCMH/PCSP recognition with 50% reimbursement of their application fees up to $1,000 when they achieve NCQA recognition. We educate providers one-to-one through provider services site visits and personal outreach about the benefits of NCQA recognition, and how Healthy Blue will assist them in achieving recognition. Our PRRs and PCMH/PCSP Medical Practice Consultant reach out to targeted PCPs, FQHCs, RHCs, and specialty groups to provide technical assistance toward becoming a PCMH/PCSP recognized practice.

> *Your support for our organization will help us to expand our mobile integrated healthcare program, which will equip us to better serve our community. I am impressed with your company's early investment in better understanding the new populations you seek to serve in Louisiana.*
> – **Asbel Montes**
> VP, Acadian Ambulance Service
> LA_HealthyR2019_2.10.9_Asbel_TST_03

Community Paramedicine Program. [redacted] Healthy Blue CMs are available telephonically, and as a team, they coordinate the immediate health needs of the member, including scheduling provider office visits, transportation, and medications. Additionally, they educate the member on community resources, health education, and provide a safety check for smoke detectors, carbon monoxide detectors, and overloaded electrical circuits.

[redacted]

Single Case Agreements. ***To assure no member goes without medically necessary care,*** our Network Development team works diligently to secure SCAs when options are unavailable in network. SCAs are also a conduit — once we have an SCA in place, we work with the provider to bring them into our network. [redacted]

2. Supporting Provider Workforce Expansion

Healthy Blue benefits from the resources of The Anthem Foundation and the BCBS Foundation, the philanthropic arms of Anthem and BCBSLA. ***In December 2018, the BCBSLA Foundation provided a $300,000 grant and worked with the Workforce Development Board to train 180 nurses and six clinical instructors to help ease the shortage of nurses in the 12-parish Monroe Region in northeast Louisiana. The program is expected to provide more than 15,000 additional patient care services by the end of the three-year funding period.*** This grant is focused on redesigning the way various higher education and provider organizations work together to solve a workforce shortage permanently and sustainably.

3. Value-based Provider Incentive Programs

We incent providers to expand and offer additional services in rural areas, and provide after-hours and weekend appointments. We encourage providers to participate in our After-hours Primary Care program, which offers additional reimbursement for extended evening and weekend hours. Our value-based contracting models promote increased access to primary and preventive care and wellness through a variety of program measures and participation criteria that include appointment availability and after-hours access. In addition, our models encourage providers to expand their capacity and operational efficiency, and to enhance patient education and engagement through the use of physician extenders. Our comprehensive array of provider incentive programs is designed to enable providers to expand capacity by requiring open panels as an eligibility requirement while rewarding them for their performance and progress in meeting LDH and Healthy Blue program goals. We have developed these programs using our experience in the Healthy Louisiana program, our understanding of LDH priorities, the knowledge we have gained from serving Louisiana members, and our relationships with providers statewide. A detailed description of all of our value-based provider incentive programs can be found in our response to Section 2.10.12, Value-Based Purchasing.

4. Employing Innovative Telemedicine Solutions

Healthy Blue and our affiliates are leaders in implementing innovative telemedicine solutions to increase provider capacity and expand member access to services. Our comprehensive telemedicine solutions are designed to meet members where they are, whether in their home, or at a primary care clinic, a BH or SUD clinic, or other provider location.

Our telemedicine strategy supports: (1) increased access to specialists by enabling PCPs to use telemedicine technology, distance learning (through Project ECHO® (Extension for Community Healthcare Outcomes)), and e-consults; (2) leveraging provider capabilities to offer virtual visits, enabling member access to specialty care and BH/SUD treatment within seven days and 30 days of hospital and ED visits; (3) improved person-centered care in areas where access is limited or unavailable by offering low acuity urgent care and BH care through telemedicine; and (4) member access to Direct to Consumer (DTC) telemedicine visits via a smartphone, tablet, or computer. Figure 2.10.8.2-1 provides an overview of our [redacted]

2.10.8.3 Strategies for Monitoring Compliance with Provider Network Standards

Inclusive of Provider Types Specified in 2.10.8.3.1 – 2.10.5.3.10

Healthy Blue is committed to assuring timely access to all providers, including cardiologists for pediatric and adult members, dermatologists, endocrinologists, licensed mental health specialists for pediatric and adult members, neurologists for pediatric and adult members, OB/GYNs, pediatric orthopedists, PCPs for pediatric and adult members, psychiatrists for pediatric and adult members, and pulmonologists for pediatric and adult members. We are also committed to timely access to BH and SUD services.

We continuously monitor access and availability to confirm compliance with provider network standards and assure provider accessibility for members, as well as anticipated Medicaid enrollment. We use GeoAccess reports to evaluate member driving distance to PCPs, specialists, ancillary providers, and hospitals. Access to providers is also monitored through member-to-provider ratio reports. Specific GeoAccess reports include:

- **Geographic Overview Maps** that display PCP and specialty care provider locations by geographic area
- **Provider and Member Maps** that plot members and providers of any or all specialties and overlay the provider network against the membership base with the appropriate radius encompassing each provider to identify geographic coverage in a particular area
- **Member Accessibility Summaries** that provide an overview of the entire analysis displayed in a given report and detail the number and percentage of members with and without access to a PCP or key specialist
- **Accessibility Details** which provide the total number of members, providers, and the member-to-provider ratio for a specified demographic or geographic area, as well as a detailed analysis of a member's choice of up to five providers, and the average distance to achieve access

Our experienced Network Development Analysts review access data and compare the needs of the member population in each parish against the adequacy of our network to verify the strength of our network in terms of access and ability to provide needed care to members. Our Provider Relations and Quality departments measure and verify compliance with Contract access to care requirements for all providers, including those listed in RFP Subsections 2.10.8.3.1-2.10.8.3.10, as summarized in Table 2.10.8.3-1.

We continually evaluate the efficacy, capacity, and accessibility of our providers and seek to maximize member interaction with providers who consistently deliver high-quality care. We utilize our Appointment Availability Audit survey, which measures wait times for various appointment types, including BH/SUD services; and our After-hours Access to Care Audit survey, which measures access to providers (including BH/SUD service providers) outside of normal business hours to determine provider adherence to Healthy Blue and LDH goals. When we determine a provider is not in compliance with Healthy Blue and LDH's goals, our PRRs engage with the provider to identify performance improvement opportunities and support member needs.

Table 2.10.8.3-1. Our Network Analysts Use Multiple Means to Assure Our Network Meets the Needs of Members

Frequency	Activity
Ongoing	• Conduct provider profiling and benchmarking to identify outliers • Review network adequacy reporting from LDH in comparison to our network data for each provider type • Monitor member comments or complaints, appointment availability, OON utilization, and provider compliance with after-hours coverage through surveys or selective on-site and desktop audits (for providers under targeted reviews) • Analyze Member Advocate, Member Advisory Group, and Clinical and Administrative Advisory Committee input, which offer important local insight into access and availability • Communicate with our Utlization and Care Management teams to make sure members have adequate access to the appropriate providers • Constant collaboration between the Network Development team, Utilization Management, and Care Management team to identify areas and specialties where services are difficult to secure
Monthly	• Monitor OON referral patterns for each provider type
Quarterly	• Assess network access related to LDH standards for each provider type, including review of GeoAccess reports to identify and fill any network gaps • Review trends based on feedback from our Access Navigators
Semi-Annually	• Review the network in compliance with NCQA standards and Healthy Blue's own policies

Supporting Members and Providers with Scheduling of Appointments

Members always have direct access to specialists; Healthy Blue does not require referrals. We are committed to providing continuity, coordination, and quality of health care services for our members. Our model provides hands-on assistance to both members and providers when seeking qualified specialists.

Healthy Blue is adding Access Navigators to our team. Access Navigators will help providers find the right specialist to meet a member's needs. Our Access Navigators will take into consideration not just medical specialty, but also direct experience with the member's very specific needs based on our assessment.

In addition to the Access Navigators, our Care Management team is available to help members access a specialist or answer questions about direct access to specialists. The assistance does not end with finding a specialist — we coordinate schedules, help make appointments, and facilitate information sharing in advance of the appointment for a seamless care experience.

In addition, when we identify an area of BH expertise needed by our members, our Access Navigators, working in collaboration with our integrated Provider Relations team, help members, providers, and BH clinicians identify specialized BH providers with the required expertise in our network.

Healthy Blue trains our CMs and MSRs on covered services, making referrals when they identify needs, coordinating services, and supporting members with the scheduling of appointments. We staff our Member Services Line with MSRs specially trained to assist our Healthy Blue members. This assistance includes helping members schedule appointments, arranging for transportation if needed, identifying community resources, and addressing any other barriers to care members may have. Our MSRs also perform warm transfers, as necessary, including to appropriate BH clinicians (via our 24/7 BH Crisis Line) or clinical RNs (via our 24/7 Nurse Line), to further assure we fully meet each member's needs.

To assist our providers with scheduling appointments, our Provider Services Line (844-521-6942) is available 24/7. Our PRRs are available to help providers with questions, verify member eligibility, obtain authorization requests, make referrals, and schedule appointments.

2.10.8.4 Strategies for Provider Recruitment and Retention

Healthy Blue has in-depth knowledge of the provider landscape in Louisiana and extensive experience recruiting and contracting providers to support the Healthy Louisiana program. Meeting the needs of our members requires creativity and collaborative approaches to enhance service delivery. As shown in our Section 2.10.7 Provider Network Listing and Provider Network Capacity (PNC) submission, Healthy Blue boasts a robust statewide network to meet the needs our members. However, from our experience, we know that a small percentage of members in some zip codes and parishes may need to travel further in order to access these services, and that in some instances, there are no providers available within the prescribed time and distance standard.

Table 2.10.8.4-1 summarizes our provider network access percentages for the listed provider types (per our PNC submission).

Table 2.10.8.4-1. Healthy Blue Provider Network Access by Provider Type

Provider Type	Access Percentage	
Cardiologists (Adult/Pediatric)	100%	
Dermatologists	98.5%	
Endocrinologists	Adult: 95.6%	Pediatric: 95.4%
Licensed Mental Health Specialists (Adult)	Urban: 99.3%	Rural: 100.0%
Licensed Mental Health Specialists (Pediatric)	Urban: 99.4%	Rural: 100.0%
Neurologists (Adult/Pediatric)	Adult: 99.6%	Pediatric: 99.6%
Obstetricians/Gynecologists	Urban: 92.5%	Rural: 91.7%
Orthopedists (Pediatric)	Urban 99.7%	Rural 99.7%
Primary Care Providers (Adult)	Urban 96.7%	Rural 100.0%
Primary Care Providers (Pediatric)	Urban 96.7%	Rural 100.0%
Psychiatrists (Adult)	Urban 95.7%	Rural 97.5%
Psychiatrists (Pediatric)	Urban 95.8%	Rural 97.7%
Pulmonologists (Adult/Pediatric)	98.9%	

Provider Recruitment Strategies

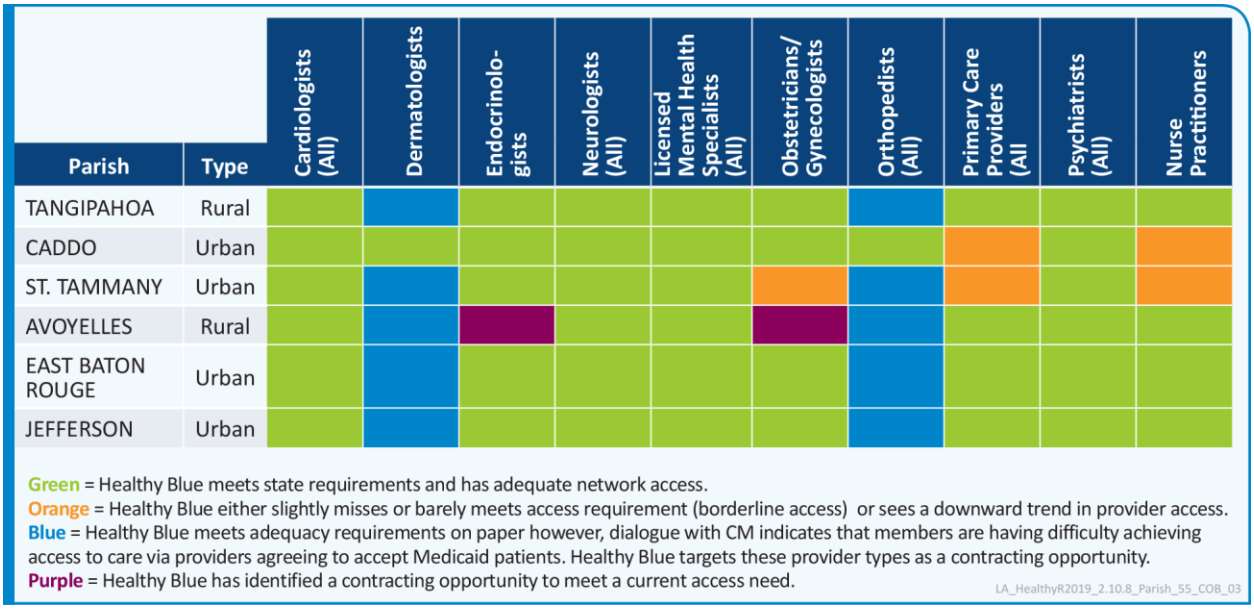
To better meet our members' needs and provide access to a comprehensive array of PH and BH services, Healthy Blue's dedicated Network Development team focuses on expanding the system of care by developing innovative programs and provider contracts. Led by our Director of Network Development, our Network Development team is divided to service specific regions in the state (Lafayette/Lake Charles/Alexandria; Bayou/Jefferson; Baton Rouge/Northshore; Shreveport/Monroe). Team members offer in-person contact to providers within the regions they support and are responsible for collaborating with providers to identify the types of services needed in each region, assessing providers' capabilities and interest in developing new or enhanced services, providing technical assistance in program development, and recruiting and contracting for new types of services.

Our targeted provider recruitment focus our recruiting efforts on areas of greatest need based on our analysis, such as geographic coverage, cultural competency, and providers with expertise in serving members with disabilities and complex needs. We utilize our proven recruitment strategy as shown in Figure 2.10.8.4-1.

Figure 2.10.8.4-1. Healthy Blue's Recruiting Strategy

We work closely with our Utilization Management team to identify gaps in services based on the unique characteristics of the populations we serve, including child, adolescent, and young adult members with complex needs, chronic conditions, and/or disabilities. We identify gaps using multiple data sources such as GeoAccess reports, network adequacy analysis, and feedback from our members and our Clinical team. Our zip code and parish level analytics tools (an example of which is below in Figure 2.10.8.4-2) allow us to zero in on areas where network enhancement opportunities exist.

Figure 2.10.8.4-2. Example of Healthy Blue's Network Development Analytics Tools



We use various sources to identify potential providers, including: (1) input from members and their families; (2) Provider Advisory Committee and Member Advisory Committee recommendations regarding members' needs and preferences for services; (3) recommendations from local stakeholders, advocates such as the Louisiana Federation of Families for Children's Mental Health and the Louisiana Behavioral Health Advisory Council, and provider associations and medical societies; and (4) recommendations from our clinical leadership and Care Management teams; (5) assessments of our network in comparison to other MCOs. We also target key practices across Louisiana that either have limited participation under Healthy Louisiana or are choosing to work with only one MCO.

Our targeted provider recruitment strategy has resulted in significant new network additions to close gaps and enhance access in areas of need. Figure 2.10.8.4-2 shows newly added providers as the result of our network analytics in parishes identified in Table 2.10.8.4-2.

Table 2.10.8.4-2. Newly Added Providers to Address Identified Access Gaps

Parish	Newly Added Providers Since 2016
Tangipahoa	6 PCPs
Caddo	5 PCPs, 1 Endocrinologist, 1 Orthopedist, 1 OB/GYN
St. Tammany	2 PCPs, 1 Pulmonologist
Avoyelles	6 PCPs (Avoyelles Hospital RHC)
East Baton Rouge	10 PCPs, 4 Dermatologists, 4 Neurologists, 1 OB/GYN
Jefferson	6 PCPs, 3 Orthopedists

Provider Retention Strategies

Our locally-based Provider Relations team members are embedded in their communities across the state, engaging providers in person, virtually, and through telephonic and other means to build trusting, open communication and develop collaborative relationships. We leverage our deep understanding of Louisiana's Medicaid provider community and the health care needs of our members to inform our provider retention strategy. As a result, ***less than 1% of providers voluntarily terminate from our provider network***. With our focus on reducing providers' administrative burden so they can take care of our members, our successful Louisiana provider retention strategy includes:

- Extensive, one-to-one provider engagement from our PRRs.
- On-demand technical assistance to help providers succeed, such as proactively contacting providers if we identify possible provider submission errors through ongoing claims review.
- Proactive, comprehensive, regionally-focused provider education that begins prior to contracting and includes our innovative multi-modality intentional trainings through our Healthy Blue Training Academy.
- Assistance for providers at the point of care by providing actionable information using a variety of delivery methods to help providers manage their members' care, including alerting providers to care gaps through online clinical alerts, providing periodic gaps in care reports for their assigned members, and providing access to Health Intech. In addition, our extensive use of VBP programs rewards providers for high-quality, cost-effective care, leading to increased provider satisfaction and deepening the level of provider collaborative care engagement.
- Practices to simplify and minimize the provider's administrative burden, including technology solutions such as online claims and prior authorization submission, and leveraging our relationship with BCBSLA to identify opportunities for joint provider trainings and offer a one-stop-shop to address needs related to both Healthy Blue and BCBSLA.

Healthy Blue's Provider Concierge Program is designed to increase retention and provider satisfaction by rewarding high-performing providers with differentiated concierge-type service, tailored to their practice, that includes a single point of contact for operational support functions and payment matters including onboarding, claims, data updates, and credentialing. That point of contact is responsible for hosting planned, proactive, and regular communication between provider groups and the Healthy Blue Provider Relations and Network Development teams. They also serve as a centralized navigator for expedited access to various shared services teams. Our Provider Concierge program is focused on continually making it easier for the provider to do business and is one of the ways we deliver on our Provider Promise to simplify health care so providers can focus on health.

Metrics Used to Determine Provider's Success in Meeting Quality and Access Goals

Guided by LDH's goal to improve access to care, promote healthy lifestyles, and effectively manage costs, we use quality and performance metrics to determine a provider's success in making progress toward access and quality performance:

- Open panel status
- Appointment availability and timeliness (measured through a quarterly appointment availability survey of emergent, urgent, and routine appointment availability); PRRs check appointment access during provider visits
- After-hours accessibility through a quarterly survey
- After-hours visit rates based on claims analysis of after-hours billing
- Potentially avoidable ED visit rates by PCP, which are an indicator of PCP accessibility
- Potentially avoidable readmission rates, which are an indicator of provider accessibility and follow-up care
- Improvement in HEDIS measures performance
- Reduction in or closure of HEDIS gaps in care

We assure members have ready access to care; support innovation and a culture of continuous quality improvement; and advance evidence-based practices, high-value care, and service excellence by aligning our members with higher performing providers and creating a reimbursement platform for providers that incents advancement along the value-based continuum. Providers achieve high performer designation by developing their capabilities to deliver enhanced levels of care, simultaneously affording them opportunities to reap financial benefits as true partners invested in creating healthier communities.

Our VBP programs are our biggest driver of performance. The programs incentivize providers to improve both access and quality and offer providers the opportunity to earn additional reimbursement through meeting value-based quality targets, which they can then use to build practice infrastructure to further expand capacity.

2.10.8.5 Strategies to Meet Member Multi-lingual/Multi-cultural/Disability Needs

Healthy Blue is committed to assuring that our provider network is able to meet the multi-lingual, multi-cultural, and disability needs of the individuals and families in the communities we serve. A testament of this commitment, in 2016, we received NCQA's Multicultural Health Care Distinction, which is awarded to organizations that engage in efforts to improve Culturally and Linguistically Appropriate Services (CLAS) and reduce health care disparities. The Multicultural Health Care Distinction recognizes how well Healthy Blue is improving quality by adhering to collection standards for race/ethnicity and language data, facilitating language assistance, cultural responsiveness, quality improvement of CLAS, and reducing health care disparities.

Addressing disparities and promoting more equitable health outcomes are goals we share with LDH. In April 2019, our ultimate parent organization, Anthem, was awarded the *Innovation in Advancing Health Equity Award* from the National Business Group on Health for its efforts to advance health equity by addressing the demographic and socio-economic influences that impact environments where people live, learn, work, and play.

Our network providers are required to deliver services in a culturally competent manner to all members, including those with limited English proficiency and diverse cultural and ethnic backgrounds; and disabilities, including, but not limited to, cerebral palsy, developmental delays, muscular dystrophies, paraplegia, quadriplegia, spina bifida, Alzheimer's, dementia, and Parkinson's; and regardless of gender, sexual orientation, or gender identity. We detail our cultural competency and ADA compliance requirements in our provider handbook, online directory, and through ongoing communications.

Cultural competency, multi-lingual support, accessibility to the provider's premises, and any special communication abilities are an integral part of our provider network development efforts. We ask providers to disclose race, languages spoken at provider offices, ADA compliance, and any special accommodations for members with disabilities on their application and credentialing paperwork. Members can access this information through our provider directory, or they can contact Member Services.

We maintain a database that includes languages spoken by our network providers, and whether offices are able to accommodate special access needs (for example, extra-large wheelchairs, wide hallways, or adjustable examination tables). This information is required on provider credentialing applications, entered into our database, and used to produce and update our provider directory. For example, our database indicates network providers with office staff that speak 32 different languages, including sign language. Additionally, our language interpretation staff are available upon request 24/7 to support member and caregiver telephonic communications with BH and other providers during appointments, in over 200 languages. Healthy Blue interpretation staff are versed in health care, including PH and BH terminology to support "meaning-for-meaning" interpretation.

Updates to provider demographic data, including language and disability information, are entered into the database as received from provider offices, during in-person visits by our Network Development and Provider Relations teams, and during recredentialing activities. We identify network disparities and barriers to care and address them through increased provider recruiting efforts.

Cultural Competency Training and Resources

We are committed to making sure our providers are fully trained in the delivery of culturally appropriate services for our members, their families, and their communities. All providers receive cultural competency training during initial onboarding, educational outreach from Provider Relations, and annual training thereafter. Our Healthy Blue Training Academy also provides training and resources specifically related to cultural competency. Training is offered in a variety of formats, including webinars, online recourses through our provider portal, and individual training as needed.

Our cultural competency training helps make certain our providers understand that delivering services to people of all cultures, races, ethnic backgrounds, sexual orientations, abilities, and

beliefs must occur in a manner that recognizes, values, affirms, and respects the worth and dignity of all members. For example, Robert Blue, our Tribal & I/DD Liaison and Cultural Competency Trainer, incorporates training on Tribal-specific processes and protocols to strengthen the relationships between providers and Tribal health programs.

Our training curriculum builds the skills necessary to deliver knowledgeable and accessible assistance and services to Louisiana members of all cultures and abilities. It includes definitions, benefits of cultural competency, government regulations, values, language resources, health-related beliefs, culturally-specific health disparities, and SDOH. Our Cultural Competency Training module is continuously updated to provide the most current content.

Through our website, providers have on-demand access to training and other resources related to cultural competency, such as; (1) our Cultural Competency Plan; (2) examples of best practices; (3) a review of the 15 national CLAS standards with a link to the U.S. Department of Health and Human Services website for more information; (4) "My Diverse Patient Trainings," including Breast Cancer Screening for African American Women, and Creating an LGBT-Friendly Practice; (5) intentional training programs that support foster care, adoption assistance, serious mental illness (SMI), intellectual/developmental disabilities (I/DD), Moving Toward Equity in Asthma Care, and other person-centered topics that facilitate improved quality and outcomes; (6) a new program created by the Industry Collaboration Effort (ICE) Cultural & Linguistic workgroup regarding culture and the impact on health care; and (7) a link offering providers no-cost medical education credits from Georgetown University for further study of cultural competency topics.

Healthy Blue's Tribal & I/DD Liaison and Cultural Competency Trainer, Robert Blue (center), Chief Johnny Ellis 'Jed' Duhon of the Louisiana Atakapa Eagle Tribe (right), and Chief James 'Graywolf' Gill of the Louisiana Choctaw Turtle Tribe (left)
LA_HealthyR2019_2.10.8_TribalLiason_PICT_01

Our Cultural Competency Toolkit provides resources to help address the very specific operational needs that often arise in a busy practice because of the changing service requirements and legal mandates. It also helps providers assess their level of competency.

Assuring that our network management and care coordination strategies meet the disability needs of our members is a key priority for Healthy Blue. All of our network providers are expected to meet federal and State accessibility standards and those standards defined in the Americans with Disabilities Act of 1990. Our PRRs also verify physical accessibility for members with disabilities during visits to provider offices. Through our Healthy Blue Training Academy, we educate providers about identifying and working with members with physical and I/DDs. We also allow vulnerable populations, including persons with multiple disabilities, to select their attending specialists as their PCP as long as the specialist is willing to perform the responsibilities of a PCP.

We have been actively engaged with the Office of Citizens With Developmental Disability (OCDD) and are aware of concerns related to members with I/DDs. Robert Blue has worked with LDH and has attended every listening tour session along with Secretary Gee to better understand the needs of the I/DD community. As a result, we know that one of LDH's biggest concerns is about members with both developmental disabilities and co-occurring BH conditions. Through our PRTF contracting initiative, we have been working with several BH facilities, including ***Restorative House of Bogalusa, Acadia Healthcare, and Louisiana Methodist Children's Home***, to convert beds and open units to increase capacity for PRTF services.

Healthy Blue's I/DD Liaison, CMs, and BH clinical leadership participate in care coordination conferences with OCDD's Resource Center team members, OCDD's State Office leadership, and the Louisiana Office of Behavioral Health. When there is a child with a co-occurring BH condition who has involvement with OCDD, we convene care coordination telephonic meetings with OCDD representatives to support treatment planning and service integration for the child's care in the most appropriate treatment setting.

2.10.8.6 Protocols for Terminating Network Providers for No Cause

We work diligently to contract with and retain providers in our network. Termination of providers without cause from our network is rare. However, should there ever be a need to terminate a terminate a provider agreement without cause, we will identify and provide LDH with an accounting of all members who have received services from the impacted provider within the past 12 months by, at minimum, claims analysis and PCP selection. Providers terminated without cause receive, via certified mail, notice of our termination and appeal procedures, and LDH is immediately notified. We give hospitals and provider groups 90 days prior notice to a contract termination without cause. We also comply with termination reporting requirements of State licensing agencies and the National Practitioner Data Bank, the Federal Healthcare Quality Improvement Act, and other organizations as required by law. Healthy Blue's

procedure, Timely Notification of Participating Provider Termination, is designed to assure timely notification to the appropriate State agency, our affiliates, our vendors, and our members, of the termination of providers from our participating provider panel, as the result of regulation, contract requirements, or direction of LDH representatives. In accordance with this procedure, Healthy Blue will provide written notice to LDH no later than seven business days of any network provider contract termination by Healthy Blue or the provider, should it materially impact our provider network. We will state the reason(s) for the proposed action in our notification to LDH. If the termination is related to our operations, we will also include our plan for assuring that there will be no stoppage or interruption of services to members. Healthy Blue will also submit, as needed, as assurance when there has been a significant change in operations that would affect adequate capacity and services. These changes include, but are not limited to, changes in value-added benefits and services, payments, or eligibility of a new population.

Minimizing Member Impact

Our members are our first priority. Healthy Blue is committed to connecting members with the services they need, when they need them, and in the setting they choose. We recognize that our members' needs change frequently and supporting them during critical transitions between care settings is one of the most crucial care coordination functions. These transitions exemplify some of the most vulnerable times for our members; therefore, our CMs are dedicated to facilitating safe and successful member transitions between health care settings. We support member voice and choice and help our members prepare for transitions before they occur by providing information on continuity of care, coordination of care, and how they can access supports.

We give a written notice of a provider's termination to each member who either received primary care from the provider, or who was seen on a regular basis by the provider. When a treating provider terminates from our network for any reason other than for cause, we enable members in active treatment to continue care with that provider. Medically necessary care from that provider may continue through completion of treatment or until the member selects another treating provider, up to 90 days or until the member is reasonably transferred without interruption of care. If a provider is unavailable to deliver previously authorized services in a timely fashion, we work with the member to identify an equally qualified alternative provider in or out of our network, as needed. When members transition between providers, we facilitate the sharing of existing treatment plans between the providers and send the new provider the member's care plan. Our network providers are contractually required to share treatment plans when they are transferring or coordinating care. Table 2.10.8.6-1 describes each of the critical components of our approach to facilitating continuity of care for all members.

Table 2.10.8.6-1. Components of Effective Continuity of Care

Component	Description
Authorizations	We honor all existing authorizations with the same provider, including those with external organizations providing carved out services, and frequency of service identified on the member's care plan for up to 90 days following enrollment. During this time, CMs complete an assessment as needed and develop a new care plan with the same or alternate services and supports based on the member's holistic needs. CMs continually monitor the member's progress and continued need for authorized services. Our clinicians complete the necessary prior authorization request to prevent disruption in care.
Dedicated Care Managers	During the initial assessment, CMs take the time to get to know the member, learning about their preferences, family, and supports, and identify and understand the member's needs. By proactively obtaining a copy of the member's plan of care, past assessments, and open service authorizations, and through outreach to the providers with established relationships with the member, the CM lays the foundation for continuity of care.
Care Plans	CMs review new members' care plans for appropriateness of care, arrange for all medically necessary services, and identify any gaps in care. They review and honor new members' care plans. The health plan completes a thorough review that supports the existing care plan or work with the member, family members, caregiver, and providers to develop a new care plan. We identify any gaps in care and refer the member for additional services, if needed.
Timely and Accurate Information	Our clinical support tool, Member 360°$_{SM}$, combines member data and information from various sources into a single record to provide a holistic picture of the member's utilization, care management services, and gaps in care. Member 360° includes such information as member health risk assessments, care plans, longitudinal member health records, and clinical data. Elli™, a risk intelligence solution that delivers population analytics and individual member profiles, incorporates Louisiana-specific encounter data and maps socioeconomic to clinical data to support a 360° view of our members, resulting in lower costs and better member health.
Non-contracted Providers	Our Clinical team identifies members receiving services from out-of-network providers and contacts our Provider Relations department for outreach and contracting. If we are not able to contract with the provider, we work closely with the member to choose another provider; or, if in the best interest of the member, we work with the provider to establish on SCA to provide on-going care. We do not enter into SCAs with any providers who have sanctions.
Member Grievance Information	We continuously review member grievances to monitor provider adherence to access and availability standards as our members transition to and from our health plan. Additionally, our Member Advisory Committees, focus groups, and one-on-one member interactions provide us information on the adequacy and availability of network providers that help to shape our focus and management of our provider network.

This page is intentionally left blank

2.10.9 Provider Support

Recognizing the importance of supporting our network providers, our Provider Solutions team is the hub for provider support, communication, and problem solving. ***Every member of our team lives in the communities we serve in Louisiana.*** We know the provider community because we are neighbors and friends, our children go to the same schools, and we attend the same community events. When a provider seeks help, we answer the call with a personalized, open door approach. ***We are the local touchpoint in the provider's backyard and we bring consistent leadership and continuity to Louisiana's Medicaid provider community.***

Healthy Blue understands the important role providers serve in the health care delivery system. Not only do providers deliver health care services, they also serve as the member's primary health advocate and health champion. Positive provider experiences are critical to our success because satisfied providers contribute to our ability to improve member access to care, promote healthy lifestyles, and effectively manage costs. To transform the current state of health care, we empower providers through our ***Provider Promise: to deliver a best-in-class provider experience by simplifying health care so our providers can focus on member health***. As we detail in Section 2.10.8, Network Management, our Provider Promise encompasses four distinct pillars that align our suite of provider programs and solutions with LDH goals: a capacity for efficient care, accountable reimbursement, administrative simplification, and health advocacy. Together, these four pillars guide our processes for effectively engaging and supporting providers over the course of the Contract, including improving quality and reducing costs through delivery system and payment reform.

A distinction of Healthy Blue is our relationship with BCBSLA. ***Our companies are joined together by the strength of the Blue brand, and we are known as trusted partners to providers who are contracted with both Healthy Blue and BCBSLA. We have the distinction of being able to work together to support providers with multiple touchpoints in the field, in a highly personalized manner.*** For example, if a provider question or concern related to Healthy Blue comes up during an interaction with a BCBSLA Provider Relations Representative (PRR), a seamless referral is made to Healthy Blue's Provider Relations team to assist the provider, and vice versa. In addition, ***senior leadership from both companies strive to conduct provider meetings or participate in mutual forums like health fairs at least monthly that offer individualized discussions to deepen and solidify our network relationships***. Topics include the value of our collaboration and our combined approaches to improve the health of members and their families.

Our provider support strategies are tailored to advance state priorities and assure each provider's ability to achieve the goals for quality, and we are committed to supporting our network providers in clinical transformation and care improvement efforts at a regional and practice level as they are outlined by our Provider Support Plan and the State's Model Contract.

2.10.9.1 Healping Providers to Assure They Receive Timely Payment and Appropriate Support over the Course of the Contract

Our network providers are the most critical component of care delivery. As such, in line with our ***Provider Promise of administrative simplification***, and ***LDH's goal of reducing complexity and administrative burden***, our provider support model is designed to offer our network providers support so they are able to spend most of their time delivering care, instead of on administrative tasks. Our commitment to administrative simplification and provider support guides our processes for effectively managing provider relations and communications, as well as our development and implementation of specialized service models and technical supports that promote accuracy, reduce administrative burden, and increase provider and patient satisfaction.

Healthy Blue has extensive experience working with the many different provider types in Louisiana and blends best practices and innovative solutions to assure our network providers receive timely payment. For example, we offer multiple billing methods, including both paper and electronic, with the flexibility to support non-standard billing processes for non-traditional services that are not easily supported using standard claim forms. We adjudicate claims daily; run payment cycles nightly, Monday through Saturday; and make claims payments twice weekly.

Our team is knowledgeable in administering a wide range of provider payment methodologies supporting State policy, as well as a variety of industry-standard claim adjudication controls. We understand that providers have different levels of experience with billing processes, and believe that it is important to meet them where they are, providing the right assistance, to the right provider, at the right time. Therefore, we educate providers on claims and encounters submission as part of our new provider orientation, and offer providers individualized training as needed until they feel comfortable navigating the system on their own. This may include test claims and denial monitoring designed to avert downstream problems.

Our claims processes are highly efficient and accurate and support both physical health and behavioral health (BH) operations. This enables us to achieve the highest degree of claims adjudication accuracy, and increased provider satisfaction through prompt claims payment and focused attention to claims inquiries, as well as performance and scalability to support current volumes and future growth.

Processes to Effectively Manage Provider Relations and Communications

We place value and emphasis on flexibility and process adjustment as we employ the following processes to effectively manage provider relations and timely communications:

- ***Empower*** our locally-based Provider Solutions team as the hub for all provider support and problem solving.
- Offer ***high-touch, personalized*** provider assistance and training, meeting face-to-face with large and small, urban and rural providers in their offices.
- Obtain ***provider feedback and input*** on policies and programmatic solutions through, Provider Advisory Group (PAG) meetings, Joint Operating Committee (JOC) meetings, Care Delivery Transformation (CDT) meetings, and joint statewide provider workshops in collaboration with BCBSLA.
- ***Increase investments*** in enhanced email communication capabilities, including the use of email blasts.
- Provide ***multiple communication channels***, including electronic venues like our provider website, provider portal, and traditional communication methods, including fax blasts and mailings. Our provider website is a critical tool to enhance provider communication, deliver actionable information, and streamline plan administration. It features tools that promote convenience and transparency while simplifying practice management. Through these channels, we are able to disseminate information to our providers quickly and efficiently, providing immediate access to important information and connecting them with the tools and resources they need to deliver appropriate care.

> *...When problems arise, regardless of whether they are related to claims, credentialing, membership, or something else, Healthy Blue has a team of individuals that are diligent about following them to resolution.*
> **– Greg W. Ivey**
> Chief Operating Officer
> The Pediatric Center
> January 9, 2019
> LA_HealthyR2019_2.10.9_Greg_55_TST_04

Through our hands-on, personal touch approach to provider relations, our flexible and proactive approach to issue resolution, and our comprehensive approach to communications, we are able to meet the needs and preferences of our providers.

Activities and Approaches to Minimize Provider Complaints, Contracting Issues, and Prior Authorization, and Claims Concerns

Our Provider Solutions team is dedicated to supporting our network providers with complaints resolution, contracting issues, and concerns related to prior authorizations and claims, as well as processes related to credentialing, needs assessments, electronic remittance advice/electronic funds transfer (ERA/EFT), and issues resolution. Within our Provider Relations department, our PRRs are the local touchpoint for technical support. They are available to meet face-to-face with providers and offer immediate support. They also help educate providers on the resources available through our provider website that promote communication, convenience, and support the complaint and resolution process. This includes links to online training, our provider manual, provider bulletins, and network e-updates that include important information on claims submission processes, pharmacy, BH, and the prior authorization process. Additionally, we closely monitor our social media platforms in a proactive effort to field potential provider complaints. If a provider voices dissatisfaction on one of our social media platforms, such as Facebook, we immediately outreach to that provider in an effort to resolve the issue.

On a 24/7 basis, providers also have access to our toll-free provider call center (1-844-521-6942) for any help needed, questions, or concerns. The general Provider Services Line hours of operation are 7:00 a.m. – 7:00 p.m. CT with interactive voice response (IVR) self-service available after hours. Providers can also contact us through email. We monitor our Healthy Louisiana-dedicated email inbox (lainterpr@healthybluela.com) Monday-Friday.

Process for Determining Adequate Provider Relations Staffing

Our Provider Relations staffing model uses several factors to project required staff to support the needs of our providers. For example, we know that primary care providers (PCPs) and other high-volume providers require more intensive support. Our staffing model is designed to assure all of our providers receive the highest level of service and support aligned with their needs and our Provider Promise.

Our Provider Solutions department is organized into two distinct teams, our Network Development team dedicated to provider contracting, and our Provider Relations team dedicated to provider support. To determine adequate staffing in our Provider Solutions department, we:

- Analyze the total number of network providers by category (for example, PCPs, specialists, Rural Health Clinics (RHCs), Federally Qualified Health Centers (FQHCs), hospitals, and BH providers), and locations where they serve our members.
- Inventory the number of providers participating in one or more of our Value-Based Payment (VBP) programs.
- Evaluate anticipated provider training needs, including webinars, seminars, and meetings (for example, JOC and CDT meetings).
- Project the anticipated number of new providers per year, and providers currently in contract negotiation or credentialing.
- Categorize our providers into tier levels based on provider type, volume of members, and services provided to our members. For example, Tier 1 (PCPs including FQHCs and RHCs, BH including mental health rehabilitation, hospitals, and groups participating in our VBP programs) receive scheduled monthly visits; Tier 2 (licensed mental health professionals and high-volume specialists such as OB/GYNs) receive scheduled quarterly visits; Tier 3 (all other providers) receive scheduled semi-annual or annual visits, and unscheduled visits.
- Estimate the number of face-to-face visits, per PRR, per month based on the number of assigned providers in each tier.

We continually review our staffing model, taking into account feedback from various sources, including our providers, Network Strategy Workgroup, PAG, JOC, CDT, and Quality Management (QM) department. Additionally, each manager and department routinely reviews their specific responsibilities and determines whether a sufficient number of employees are committed to the department to meet staffing needs. Changes in volume, service delivery, and products are reviewed, and staffing is adjusted based on these changes. For example, based on feedback, ***in July 2018, we added a dedicated Network Education Representative to our Provider Solutions department, and are further expanding provider training support to include additional Provider Training Specialists as part of our commitment to addressing provider education needs***. Our ***Provider Training Specialists*** support our PRRs with delivering frequent provider contact communication and education, helping to assure providers receive the timely and relevant information they need in the way that is most convenient for them.

Strategies to Provide Effective and Timely Communications

Healthy Blue is committed to maintaining a strong communication link with our network providers. Our strategies to assure effective and timely communication are outlined earlier in Section 2.10.9.1, and include our Provider Solutions team, a hub for all provider support, communications, and problem solving. This also includes our provider website, providers.healthybluela.com, which offers links to our training and resources including our prior authorization lookup tool (PLUTO), claims status inquiry, eligibility and benefits inquiry, member reports, pharmacy information, provider newsletters, LDH communications, and provider updates.

In an effort to deliver information in a timely and efficient manner, we deploy a comprehensive communications strategy that includes email blasts, fax blasts, letter and newsletter mailings, and more. Communication preferences vary from provider to provider, and our many flexible communication methods allow us to provide information in whatever way works best for a particular provider, whether they are a large practice, hospital, or small rural PCP.

A testament to the effectiveness of our provider communications — on our 2018 Provider Satisfaction Survey, more than 82% of provider respondents indicated they were satisfied with our general provider communications.

Strategies to Develop a Provider Education Program

We have developed and deployed a robust provider education program administered through our Healthy Blue Training Academy. Our provider education encompasses a comprehensive approach to all LDH-required and Healthy Blue-offered provider training. Our Healthy Blue Training Academy incorporates multi-modality delivery training processes (in-person, online courses, tailored webinars, and written materials), as well as mechanisms for tracking, monitoring, alerting, and reporting compliance and completion of training.

Through our Healthy Blue Training Academy's robust features, we offer required, regionally identified, population-specific, and culturally competent education. Ongoing training occurs several times per year, and on an as-needed basis for program and regulation updates. Our Provider Relations staff, including our Provider Training Specialists, support individual and on-site training sessions on-demand, or when we identify a need. We also offer group presentations, webinars, and quarterly statewide workshops. Trainings are specific to provider type and are tailored to meet each provider's individual needs. Our Training Academy is described in more detail in Section 2.10.9.3.6.

Collaborative Provider Education Strategy

We leverage our alliance with BCBSLA and work together to educate providers on our collective ability to best serve our members. For example, BCBSLA and Healthy Blue identify opportunities to jointly offer training on topics that include opioid management, HEDIS®-related care gap management, integrated BH best practices, and optimal management of hypertension and diabetes. While great emphasis is placed on clinical education opportunities, we also recognize the importance of providing joint trainings that address the operational, day-to-day aspects of providing care to our members. ***The combination of BCBSLA and Healthy Blue gives us the unmatched ability to tailor training topics based on our experience in Louisiana and our combined approaches to improve the health of members and their families.***

Healthy Blue also joins BCBSLA at its statewide provider workshops to address questions that may come up regarding Healthy Blue processes including credentialing, billing and claims, fraud, waste, and abuse (FWA), care management, online services, authorizations and appeals, Alternative Payment Models (APMs), and other opportunities for advancing provider partnerships. ***Our joint participation in these forums saves providers time by offering a one-stop-shop to address their needs.***

2019: Healthy Blue and BCBSLA Co-host an Event in Shreveport
LA_HealthyR2019_2.10.9_Events_PICT_02

We place great value on collaborative provider education. We also work with other MCOs to host educational events and address Healthy Louisiana provider education needs around important health care issues that affect our member populations. We participate in monthly meetings with representatives from the other MCOs to discuss current collaborations and brainstorm around future collaborations. This has resulted in coordinated provider trainings focused on Level of Care Utilization System (LOCUS) and Child and Adolescent Level of Care Utilization System (CALOCUS), Parent-Child Interaction Therapy (PCIT), FWA training, and more.

Supporting Providers with High Claims Denial Rates

We have an established process to support providers with high claims denial rates. ***Our process is in compliance with ACT 710.*** We proactively conduct a root cause analysis of providers with a high volume, or a high dollar value of denied claims using our internal Denied Claims Report. This report is generated weekly, and on-demand as needed, and includes detailed information related to all claims where the total claim paid amount is equal to zero. The report includes the provider ID, name, and the number of denied claims. A denial explanation code is used to categorize each denial. In 2018, the top three reasons for denials were: duplicate claim or charges processed under original submission, preauthorization not obtained, and member termination. In an effort to address these issues, we have implemented an enhanced provider onboarding process where we generate test claims and thoroughly demonstrate the claims submittal process, as well as demonstrate appropriate PLUTO preauthorization processes and verifying member eligibility via our provider website.

Our PRRs work with our Claims Analysts, Appeals Specialists, Internal Resolution Analysts, Provider Claims Educator, and other operational units and employees who are dedicated to assuring our Healthy Louisiana network providers receive timely claims payment, and to identify the primary cause for denials. Our PRRs and Network Education Representative also meet with providers one-to-one, and work with them and their billing offices to understand claims denials, and if applicable, resubmit claims for payment.

Evaluating and Resolving Provider Disputes

First, We Listen

Healthy Blue offers providers a “no wrong door” approach with many avenues to voice a concern or file a dispute; including by phone call, email, through our provider self-service website, in writing, verbally during visits with our PRRs, through our provider call center, or in-person by visiting our local health plan offices. Our Provider Solutions team and our PRRs intently listen to all provider concerns with the goal of resolving every issue in a timely manner. ***Using the information registered in all levels of the dispute process, we work to perform root-cause and trending analysis to minimize future disputes.***

All of our employees who may have contact with providers receive training on our processes for accepting, evaluating, and resolving provider disputes, whether they are verbal or written. Some disputes are evaluated and resolved instantaneously during in-person provider visits by our PRRs. Other dispute resolutions may take more time as they involve more focused research. All issues that result from an in-person visit with a PRR are documented in Salesforce, a web-based application that allows our PRRs and local leadership to track and trend information. Additionally, disputes are recorded and tracked in our centralized provider grievance and appeals system.

In the event a provider becomes dissatisfied with our resolution efforts, our team of dedicated local complaint resolution experts will engage. This Baton Rouge-based team is responsible for acknowledging all formal complaints by telephone within 24 hours of receipt, and via email within two business days of receipt. The acknowledgement includes direct contact information for one point of contact in Baton Rouge responsible for assisting the provider with follow-up questions related to the complaint, and outlining the steps that will be taken to resolve the dispute. We conduct thorough research into each provider complaint using applicable statutory, regulatory, contractual, and provider contract provisions, collecting all pertinent facts from all parties and applying Healthy Blue written policies and procedures to determine additional actions required. Final resolution is communicated to the provider within one business day of completion, and includes the opportunity to notify us if they are dissatisfied with the outcome. The final resolution email also requests feedback on every closed complaint to provide real-time feedback on providers' satisfaction with our process. As seen in Table 2.10.9-3 in Section 2.10.9.4, ***100% of respondents indicated their issue was resolved to their satisfaction, and over 95% responded as being "very satisfied" with our resolution of the complaint***.

Disputes Specific to the Automatic Assignment Policy and the Assignment of an Individual Enrollee

We educate providers on the automatic assignment policy, as well as the provider's right and methods to dispute member assignment during new provider orientation and via our provider website and provider bulletins.

Providers identified as having members who are eligible for PCP reassignment, defined in HPA 19-5 and IB 19-6, are allowed 15 business days to review and have the right to dispute reassignment. To dispute a reassignment, the provider must submit valid documentation, such as a medical record, proof of billed claim, or Third Party Liability demonstrating they have seen the member within a 12-month lookback period. Following review by our Provider Solutions team, if the dispute is determined to be a valid request, the member will remain in the provider's panel.

Our Provider Solutions team is also responsible for handling disputes related to members being assigned to a provider. These disputes are promptly reviewed by a cross-functional committee, which includes leaders from Healthy Blue Operations, Quality, and Provider Relations. The committee speaks with both the member and the provider, and reviews any applicable documentation, such as claims. If the committee finds that the request to move the member out of the provider's panel is a valid request — meaning not discriminatory or related to cost savings under a VBP arrangement — the member will be moved out of the provider's panel and placed with an appropriate alternative provider. If the committee finds that there is no basis for removal of the member from the provider's panel, the member will remain with the provider, and our Provider Relations team will provide coaching if necessary.

In cases where a member has been or becomes abusive towards the provider or the provider's staff, as well as instances related to providers who drop members from their panels due to the high cost of treatment, our PRRs work with the affected provider and member to address and resolve the situation.

2.10.9.2 Supporting Providers to Improve Quality and Reduce Costs through Delivery System and Payment Reform Strategies

To transform the current state of health care, we are empowering providers through our Provider Promise and our commitment to accountable reimbursement — our strategy for partnering with physicians, facilities, and non-traditional providers to accelerate the shift from volume-based care to patient-centered, value-based care that improves member access, promotes healthy lifestyles, and effectively manages costs. We are changing the health care landscape by aligning our members with higher performing providers and creating an accountability platform for providers that incents advancement along the value-based continuum, to achieve high performer designation by developing their capabilities to deliver enhanced levels of care. Simultaneously, we afford providers opportunities to reap financial benefits as true partners invested in creating healthier communities. A complete list of VBP programs with a description of each is detailed in Section 2.10.12, Value-Based Payment.

Our strategy is to maximize each member's use of higher performing providers in terms of cost and quality. ***We understand that successful managed care models for all members, including our most vulnerable and underserved populations who face significant social determinant of health (SDOH) challenges, requires adequate geographical access to the right combination of high performing providers and customized, community-based resources with specialized knowledge and capabilities to attain better health outcomes.*** Therefore, in addition to accountable reimbursement, our teams of dedicated PRRs, CDT Consultants, and Practice Consultants empower both VBP and non-VBP providers to attain and excel at the highest level of performance.

We support providers to improve quality and reduce costs with a combination of clinical, financial, and operations data, and shared decision-making initiatives that facilitate care coordination. These initiatives offer further provider insight into understanding the needs of the population so that services can be better planned, coordinated, and

delivered, thereby improving member engagement. We believe the most effective way to align quality and performance outcomes to optimize value is the overlay of our VBP programs with state-specific provider reimbursement strategies that focus on the evolving needs of the state and our members.

Supporting Primary Care Providers in Delivery System Reform

Our delivery system reform model was initially developed as a result of working with providers to transform their practices into Patient-Centered Medical Homes (PCMHs) using NCQA standards. ***Our network currently includes 38 PCMH-recognized provider groups, representing 91 practice locations.*** We reimburse practices 20% of their NCQA PCMH application fee and 50% reimbursement of their application fees up to $1,000 when they achieve NCQA recognition. Our model reflects tenets established by the American Academy of Pediatrics, the American College of Physicians, the American Academy of Family Physicians, and the American Osteopathic Association. It adds value to our members, providers, and LDH by:

- Promoting primary and preventive health care services that improve health outcomes and cost savings
- Supporting providers who transform their practices to a more population-centric model using nationally recognized standards
- Reporting data to providers to help them better understand the health status and needs of their member panel through useful, specific quality and medical cost management reports
- Providing a dedicated Louisiana team of CDT Consultants who engage with each PCMH to support practice improvements and facilitate information-sharing
- Offering participating practices opportunities to earn additional compensation for meeting quality and other health care access targets
- Actively engaging members with a high-touch approach that empowers them to manage their health

Our PRRs are the individual touchpoint for PCPs and link them with our dedicated CDT Consultants, and/or our cross-functional team of Maternal Child Health/EPSDT Coordinator, Medical Directors, Health Promotion Representatives, and HEDIS and quality experts to promote population health priorities. For example, our PRRs can link PCPs to our QM Practice Consultant, who is available to help with care reporting related to diabetes, and conduct member classes at PCP locations related to diabetes prevention and living with diabetes. Similarly, our Maternal Child Health/EPSDT Coordinator is available to meet face-to-face with providers to review OB Profile reports, discuss areas for improvement, and develop provider-specific quality improvement goals related to maternal and infant health. Our Health Promotions Representatives are also available to assist PCPs with addressing gaps in care with a focus on well child treatments.

Our CDT model yields best practices of high-performing providers, such as improved patient access and communication, coordination of care, and more engaging patient relationships. Our coordinated team assists providers by delivering and disseminating patient profiles, predictive modeling analysis, risk stratification data, and clinical intervention alerts that enable physicians to identify and build individualized care plans for their highest-risk patients, while assuring that all patients receive care that meets evidence-based preventive, acute, and chronic care guidelines. Members become more active participants in their own health and well-being when network physicians treat them like true health care partners. Our CDT Consultants empower our VBP providers to do this by actively engaging in planning a truly integrated care delivery model and taking the time to understand what is important to members as we jointly establish practice goals.

I very much appreciate your support of our efforts as a multispecialty health group to serve the citizens of Northeast Louisiana. Your support and efforts to work on a team-based approach have allowed us to provide critical services for the region. I believe that your innovations in child obesity and asthma will make a significant contribution to improving the lives of people who participate in the Healthy Louisiana Program.
– Michael C. Echols,
Director of Business Development
Affinity Health Group
LA_HealthyR2019_2.10.9_Michael_TST_02

Our local CDT model continually improves VBP performance. For example, we offer programs for physicians including PCPs, OB/GYNs, and psychiatrists, as well as non-physicians. Our progressive model also offers a diverse mix of incentives to organizational provider entities, provider office staff, and hospitals. As our CDT team envisions beyond VBP, collectively they strive to develop additional network strategies to enhance delivery of integrated physical health (PH) and BH care, care delivery reform, and the incorporation of SDOH, which are recognized as significant influencers of our members' health outcomes.

Our ***Provider Concierge Program***, as described in Section 2.10.8.4, is designed to increase retention and provider satisfaction by supporting high-performing providers through differentiated concierge-type service, tailored to their practice, that includes a single point of contact for operational support functions and payment matters including onboarding, claims, data updates, and credentialing. For example, the program includes Account Service Coordinators who provide differentiated concierge-type service for our high-performing providers. They are the single point of contact for expedited access to various Healthy Blue shared services teams, and facilitate group

training for all provider education needs and requests. The program also includes a dedicated Account Manager who serves as a liaison between the provider and key stakeholders. The Account Manager works collaboratively with the provider to learn their business model, advocates for the provider, proactively identifies provider needs, and recommends ways to improve existing relationships through lessons learned. At our highest level, the premier level, the Account Manager provides a full suite of additional consultative services including strategic planning for successful practice transformation. Our Provider Concierge Program is focused on continually making it easier for the provider to do business and is one of the ways we deliver on our Provider Promise to simplify health care so providers can focus on health. [redacted]

Supporting Behavioral Health and Other Specialty Providers in Delivery System Reform

Our Provider Promise provider collaboration strategy fully supports LDH's goal to decrease fragmentation and increase integration as part of delivery system reform across providers and care settings, particularly for members with BH and OB needs. We work to improve cross-agency BH coordination to make sure members have a greater awareness of and access to mental health, substance use disorder (SUD), and PH care services. We offer provider education and administrative supports, including integrated PH and BH service management and tools, such as evidence-based screenings and virtual specialty consultations, to help identify members' holistic needs, make timely referral to services, and effectively coordinate clinical care. We provide training to network PCPs for screening and identifying BH disorders and referring members for BH services. This includes clinical coordination and BH Screening, Brief Intervention, and Referrals to Treatment (SBIRT) techniques. We work closely with PCPs to share evidence-based practices and offer the tools and training to complete SBIRT processes, and we reimburse PCPs for SBIRT services as permitted.

We have integrated our dedicated Provider Relations team of PRRs to more effectively focus on helping providers promote a holistic approach to integrated PH and BH care. For example, we offer BH providers education related to referring members with untreated PH issues to their PCP for examination, as well as their responsibility to send the PCP quarterly reports on members' BH status. Our online Coordination of Care form helps BH providers share information with PCPs and other specialists when a member enters BH treatment. This form provides the physician with a better understanding of the member's BH treatment needs. We encourage the use of this form during our interactions with providers and ask that they incorporate it into each member's treatment plan.

[redacted]

Our PRRs and PCMH Consultant reach out to targeted PCPs, FQHCs, RHCs, and specialty groups to provide technical assistance toward becoming NCQA-recognized Patient-Centered Specialty Practices (PCSPs) to further facilitate integration of PH and BH. To assist providers with the costs of NCQA recognition, we reimburse practices 20% of their NCQA PCSP application fee. We will also provide practices who achieve PCSP recognition with 50% reimbursement of their application fees up to $1,000 when they achieve NCQA recognition.

Supporting Behavioral Health and Other Specialty Providers

Healthy Blue has been a beacon in the community in advocating and improving healthcare access to Louisiana Residents. They have been a major supporter of one of our organization's longest running educational programs, the Annual Education Conference on Alzheimer's Disease. Healthy Blue understands the importance of Alzheimer's education for caregivers and has been a supporter of the conference since 2015. They help our organization further its mission to teach, care for, and connect with individuals with Alzheimer's and other memory-related impairments.

– Kristi Mellion, MPH
Program Supervisor
Alzheimer's Services of the Capital Area

LA_HealthyR2019_2.10.9_Kristi_55_TST_01

We work closely with BH providers, clinics, multi-specialty groups, group practices, and individual practitioners to make sure members have access to necessary services and community supports, and to assure that providers have information and help to meet each member's holistic needs. Specifically, we offer:

- Notification of a member's inpatient admission and of those needing community outreach
- Support coordinating a member's inpatient visit and assisting with discharge planning
- Help identifying gaps in or barriers to care and making sure members receive necessary services
- Support monitoring for quality of care concerns, assessing next steps, and implementing action plans to resolve issues during scheduled provider meetings where we share data and clinical information
- Hosting of community events and summits to strengthen provider relationships and improve the delivery of care

Sharing Timely, Actionable Provider Performance Data

At Healthy Blue, we know that collaboration and sharing of timely, actionable performance data is essential to helping providers improve their performance. Sharing provider performance data is an important component of our Quality Assurance and Performance Improvement (QAPI) program, discussed in detail in Section 2.10.11.3, which informs our overall approach to provider performance improvement. Our strategies for sharing provider performance data are in accordance with the Louisiana Medicaid MCO Model Contract, Section 2.17.7, VBP Data Sharing and Collaborative Efforts, and Section 2.17.12, Data Sharing in VBP Arrangements.

We work collaboratively with providers participating in our VBP programs and align provider profiles with our VBPs to drive performance improvement. We promptly share data with providers through an enhanced array of performance reporting including scorecards, action plans, and interactive management tools to improve efficiency, minimize administrative burden, and drive performance improvement.

We collect and analyze quality and performance data (including medical, behavioral, ancillary, lab, and pharmacy) to support our VBP programs including enrollment data, claims and encounters data, authorization data, grievances and appeals data, provider and member satisfaction surveys, and HEDIS results.

Our Health Intech member dashboard is available to all providers through our secure provider website. It gives electronic access to member data and allows providers access to a single view that displays data in an easy to navigate dashboard including HEDIS care alerts, authorizations, prescriptions, and claims; and organized by type, such as inpatient, emergency department (ED), and office visits. The dashboard serves as our primary method for sharing member care management information, including plans of care. Data is updated daily with near real-time provider availability on demand.

Our PRRs offer providers outreach and education related to our VBP programs and practice transformation, and offer assistance with data and report interpretation and other activities that support the provider's performance improvement. An expansive description of our provider performance improvement reports and data sharing tools are detailed in Section 2.10.12.4, Value-Based Payment; and an overview of our strategies to advance provider quality measures through performance data is discussed in Section 2.10.11.1, Organizational Commitment to Quality Improvement.

To further enhance our provider performance data sharing strategy, Healthy Blue will participate in the Louisiana Health Information Network (LHIN) Encounter Notification Service (ENS). LHIN ENS is the largest statewide all-payer health information exchange. Through LHIN ENS participation, we will be able to access real-time admission, discharge, and transfer (ADT) information to alert our Care Managers and our members' PCPs of an ADT event. LHIN ENS participation will complement and enhance our already robust clinical information and provider performance data sharing tools.

2.10.9.3 Provider Engagement Model

As the hub of our provider engagement model, our locally-based integrated Provider Solutions team employs a high-touch approach, with significant emphasis on proactive and local provider engagement, towards our common goal of improving member access to care, promoting healthy lifestyles, and effectively managing costs. We accomplish this by:

- Developing collaborative relationships, including extensive, one-to-one outreach through local PRRs
- Offering proactive, comprehensive provider education in a variety of venues and participation methods from face-to-face meetings and workshops to webinars and online tutorials
- Implementing provider incentive programs that reward providers who deliver measurable better care and achieve more positive patient outcomes
- Assisting at the point of care by providing member utilization data to identify gaps in care and to assure that the member receives all appropriate services
- Delivering sound reimbursement practices, including prompt and accurate claims payment
- Streamlining utilization management practice, including electronic submission of authorization requests
- Simplifying and minimizing administrative burden, including online claim submission tools

We engage providers to foster a mutually beneficial relationship and encourage feedback at multiple touch points. These include visits by our PRRs, Account Service Coordinators, and other members of our Provider Relations department. We also include providers in our monthly JOC, CDT, PAG, and our National Provider Advisory Group meetings. ***Through our alliance with BCBSLA, we are able to deploy a unified provider engagement approach at our respective Provider Advisory Committees by assuring that at least one member is common to both committees. This allows us to gain insight into BCBSLA provider engagement best practices, and vice versa.***

Our approach i ncludes our PRRs as the main point of contact for coordination and engagement with other departments, functional areas, subject matter experts, and the resources of our national organization to emphasize relationship development with our network providers. We visit all providers at least annually, but we also routinely and regularly visit high-volume providers more frequently based on their volume of members, claims, and encounters. All visits are planned and tracked with our Provider Relations Visit Checklist and Salesforce (described in detail in the following section, Mechanisms to Track Interventions with Providers). Our market leadership, in developing practice administrator and physician consultative councils for our current network, further supports the sharing of information and collaboration with our provider clients.

For our Healthy Blue providers, our comprehensive, secure provider portal offers access to program and provider-specific information as well as a variety of tools and resources, including a downloadable copy of our provider manual and a variety of training and education resources, such as the latest provider communications toolkits, like our Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Toolkit, all designed to make our providers' jobs easier. We showcase basic information and tools such as prior authorization procedures, formularies, and reimbursement policies, and use the portal to deliver information to providers, including announcements, alerts, and forms. The latest forms and training materials are always available on the provider portal.

Additionally our Provider Relations team works diligently with our Provider Data Management department to assure we have correct information on file for our providers, as this information is reflected in our provider directory. Having accurate and up-to-date provider practice details is key to assuring access to care for our members. In addition to providers' ability to update their information through our provider portal at any time, we proactively reach out to providers to confirm and update their information through surveys, fax blasts, and during one-on-one visits with our PRRs.

Staff that Play a Role in Provider Engagement

Healthy Blue is fully invested in the Healthy Louisiana program and Louisiana's provider community. [redacted]. This team brings longevity and consistency to the program. Our Provider Solutions leadership team has been with Healthy Blue since the beginning of our existing contract. In addition, we are proud of the longevity of our Network Development/PRR staff. Our Provider Solutions team has had no turnover since 2017, an indicator of their commitment to our providers and members. [redacted] Our complete staffing model with organizational charts can be found in Section 2.10.2.2, Staff Experience and Organizational Structure.

Presence and Role of Provider Field Representatives

Our PRRs are our primary face to our network providers. They are ***the local touchpoint for providers and represent a unified front in the field***. Because they physically live and work in the areas they serve, they are highly approachable and able to proactively answer and resolve contract questions, reimbursement disputes, non-routine claim issues, and billing questions. They are committed to providing excellent customer service that results in superior provider satisfaction. Our PRRs make regularly scheduled and as-needed visits to each provider, and make it their mission to offer technical assistance and guidance related to resolution of issues that require the intervention of the Network Development department. They offer collaborative provider training, and deliver a best-in-class provider network experience by simplifying health care so our providers can focus on member health. They also validate provider data and demographics.

The role of our PRRs is evolving towards becoming highly proficient CDT extenders, adjunctive team members who cross-functionally target and qualify providers with well-matched APM programs. After engagement is triggered, our PRRs assist with the onboarding of providers into their selected APM program. To support the onboarding process, and as an increasing ongoing role of critical value, provider education is coordinated by our PRRs and dedicated Provider Training Specialists using the multiple modalities found within our Healthy Blue

Training Academy curriculum. Our PRRs are crucial to our ability to improve member access to care, promote healthy lifestyles, and effectively manage costs.

Mechanisms to Track Interactions with Providers

As part of our Provider Engagement model, we use Salesforce as our primary mechanism to track Provider Solutions department engagement with providers. All of our Provider Solutions employees are required to document scheduled and ad hoc visits, website and email interactions, verbal interactions, and any other direct or indirect provider engagement in this system.

We use our Provider Relations Visit Checklist to track provider visits. This Checklist is a comprehensive document that covers all key areas a PRR or other Healthy Blue representative should touch on during a provider visit including:

- Any operational issues
- Any contracting issues (the PRR pulls this information from our Provider Contract Repository prior to the visit)
- Present and anticipated quality initiatives and present and future provider quality incentive programs (the PRR obtains this information from our QM department prior to the visit)
- Current training with upcoming requirements (the PRR reviews the provider's training record and conducts web portal training if required)
- Current claims summary, sharing payment and denial trends as applicable (prior to the visit, the PRR conducts an accounts receivables financial review including reviewing the IRU Provider Experience Report, Detailed Summary Report, Demographic Detail Report, Claims Detail by TIN and Date of service, and Appeals and Grievance Report)

Our Checklist includes an area to record and track action items. Provider signatures are required on each Checklist to confirm their participation in the visit and acknowledge their agreement to any follow-up action items identified. Prior to the visit, an agenda is developed and any needed materials are distributed. The checklist is stored in our Provider Relations tracking system housed on SharePoint.

Following the visit, a written follow-up is sent to the provider; information is entered into Salesforce; and the PRR initiates internal meetings as appropriate, assigns action items, and assures deliverables are met and action items are closed.

Collecting and Analyzing Utilization Data and Provider Feedback to Identify Training Needs

We use multiple tools and reports to collect and analyze utilization data and provider feedback that informs training needs. For example, we review claims, including our internal Denied Claims Report; billing and coding data; prior authorization data; utilization management (UM) and case management (CM) data; and physician referrals, single case agreements (SCAs), and out-of-network (OON) authorizations on a weekly basis to identify trends and patterns. We also review provider feedback surveys and UM/CM feedback as it becomes available. We collect and analyze feedback from our PAG related to the implementation of new programs, policies, initiatives, and incentive programs to minimize provider abrasion. Our QM oversight process includes review of quality data (for example, HEDIS measures) to identify gaps and provider practice patterns that would be indicative of a quality issue. For instance, we reviewed ADHD medication utilization to identify outlier providers and developed a specialized CME ADHD training for these providers.

In addition to our internal analyses, we work with various provider associations (including ***the Louisiana Primary Care Association (LPCA), the Louisiana Rural Health Association (LRHA), and the Louisiana Hospital Association (LHA), Louisiana Academy of Family Physicians, and Louisiana Medical Group Management Association***) who do direct outreach to their membership to identify provider training needs and provide feedback during CDT meetings and clinical workshops. As additional training needs are identified, we work collaboratively to develop and deliver the appropriate trainings to providers. For example, we recently collaborated with the LHA to conduct a multi-MCO training to the hospitals related to operations, claims, and UM policies and procedures. In addition, we are leveraging the power of our relationship with BCBSLA for opportunities to jointly conduct provider workshops and trainings which expand opportunities for data collection and provider feedback to inform and enhance our provider training offerings.

When we identify a negative trend or pattern, we perform a root cause analysis to determine if there is an internal problem, and to identify areas that would benefit from additional internal or external training. We take immediate action to remediate internal issues and, if required, initiate additional training for employees. If we identify a provider issue, we personally engage the provider(s) involved to discuss the issue and develop an action plan, including the implementation of additional training.

Metrics Used to Measure Provider Satisfaction

Our annual provider satisfaction survey (PSAT) process includes an objective, systematic review of activities and systems that assesses quality of care and service that meets or exceeds all acceptable prevailing standards. This NCQA-approved survey is fielded annually in the summer and is jointly managed by the Quality Management and Provider Relations departments. PSAT targets a randomized sample of provider types (PCPs, specialists, BH specialists, and OBs), prioritizing high-volume providers in each region or parish. Providers may complete the survey online or in hard copy. Our PRRs encourage non-responders in person or via telephone to complete the survey to reach an appropriate sample size for analysis. All completed surveys are processed to produce detailed summaries of results, and results are compared to prior years' metrics to identify upward and downward trends. We evaluate provider satisfaction with our communications, services, and procedures, then use the results as part of our continuous quality improvement efforts to provide strategic direction for efforts to strengthen provider engagement and relationships. We gauge satisfaction with Healthy Blue in the following areas:

- Overall satisfaction and loyalty
- Claims processing and provider reimbursement
- Utilization management and Chronic Care Management
- Local health plan provider services
- Provider training and education
- Communication and technology
- Continuity and coordination of care
- Cultural competency
- Language
- Provider complaints resolution

In 2018, our PSAT sampling methodology targeted 1,000 contracted practitioners: 50% PCPs, 30% specialists, 10% OB/GYNs, 10% BH/LTSS/nursing facilities. Overall Satisfaction as indicated by the 2018 survey results are shown in Figure 2.10.9-2, and our strategies to address provider dissatisfaction are detailed in Table 2.10.9-1.

PSAT information helps us better understand our provider network, its needs, challenges, and opportunities for member-focused, cost-saving innovations. PSAT feedback also enables us to identify training needs by asking providers what information they would like from our offerings. Training topics may include Chronic Care Management programs, HEDIS measures, participation in a quality incentive program, innovative programs to implement, after-hours care, electronic claims processing, and any other subjects they specify.

In addition to our annual PSAT, we conduct ongoing quality assurance by offering providers the opportunity to fill out a provider satisfaction survey after each web-based, call center, or in-person interaction with one of our PRRs and monitoring our operational performance to ensure we meet our service commitments. Our ongoing operational monitoring will yield reports that we use to identify individual providers experiencing problems with claims submission or other needs.

Approach and Frequency Provider Training

Our approach to training our network providers, including LDH reporting requirements, is in accordance with the Model Contract, Section 2.10.7. Through our Healthy Blue Training Academy, we give training to all providers and their staff on contract requirements. They receive initial training within 30 days of becoming a Healthy Blue network provider, with ongoing provider training sessions several times per year, and on demand as-needed. Our provider training is delivered in-person by our regionally-based PRRs and our dedicated Provider Training Specialists; as well as online via webinar, and in various meeting forums. In addition to in-person training, we also use our provider portal, provider bulletins/fax blasts, newsletters, email blasts, conference calls, and more to offer training.

Our training curriculum is tailored to address Healthy Louisiana-specific benefits and LDH requirements for all provider types. Additionally, we offer specialized training for various provider types to better meet the needs of our members; for example, BH providers receive specialized training related to fail first, step-therapy, approved prescribing caps, Child and Adolescent Needs and Strengths (CANS), Level of Care Utilization System (LOCUS), and Office of Behavioral Health (OBH) standardized training for non-licensed providers. ***Working in collaboration with LSU School of Public Health, Auburn University, and another MCO, we have developed and recently implemented parent-child interaction therapy (PCIT) training. In addition, we are working with Tulane University to develop and deploy trauma-informed care (TIC) and post-traumatic stress disorder (PTSD) training for providers in 2019.***

We deploy group training in the form of statewide "Road Shows" when we recognize the need for training around a topic that affects many of our providers. Most recently, we hosted several seminars across Louisiana to discuss how precise and accurate ICD-10-CM coding can help providers meet HEDIS measures and close care gaps. Nearly 50 providers from the New Orleans, Baton Rouge, and Monroe areas attended the seminars and received Continuing Education Units (CEUs) for their participation.

As shown in Figure 2.10.9.3-1, we incorporate convenient, on-demand access and multi-modality delivery channels into our training to maximize provider participation, increase efficiency, reduce administrative burden, and promote enhanced service quality to our Healthy Blue members. We continuously update our training to assure it contains current, relevant program information aligned with provider and member needs.

Table 2.10.9.3-1 provides a summarized listing of training topics. Cultural competency training is completed as part of initial provider orientation, as well as part of ongoing training.

Figure 2.10.9.3-1. The Healthy Blue Training Academy Offers Convenient, On-demand Training

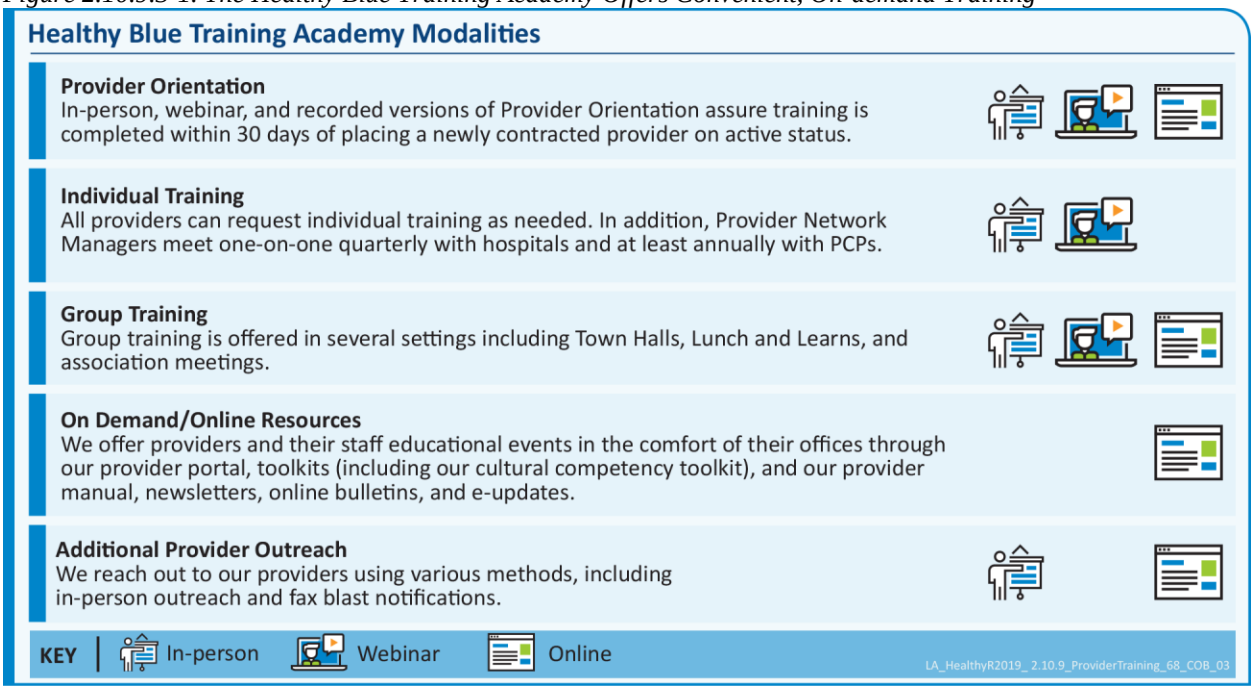


Table 2.10.9.3-1. Healthy Blue's Provider Training Topics at a Glance

New Provider Orientation	
• Introduction to Healthy Blue, our Provider Solutions department, and working with an MCO • Review of the Healthy Louisiana Program Policies, Priorities, and Processes • Benefits and Covered Services (Including Early and Periodic Screening, Diagnosis and Treatment (EPSDT); Emergency Services; and Pharmacy) • Overview of Enrollment and Credentialing Processes • Provider Roles and Responsibilities • Verifying Eligibility, Pre-authorization, Referral and/or Authorization of Services • Person-centered Care Planning • Integrating Physical and Behavioral Health • Early Childhood Intervention (ECI) • Appointment Access Standards and Timeframes • Billing Procedures, Claims Submission, Processing, Required Documentation, and Payment • Provider Manual, Web Portal, and Resources	• Provider Grievances and Appeals, Dispute Resolution Processes, Helping Members File Grievances and Appeals • Preventive Health Care Guidelines • Medical Necessity Criteria • Healthy Blue's Quality Management Program, HEDIS, and the Provider's Role in the Program • Reporting Requirements, including Communicable Disease Reporting; and Fraud, Waste, and Abuse • Privacy/Confidentiality of Protected Health Information • Use of Evidence-based and Clinical Practice Guidelines • Value-added Benefits and Social Supports • Social Determinants of Health • Mental Health and Substance Use Disorder Protocols and Resources • Alternative Payment Model (APM) training, including enabling provider readiness for value-based reimbursement • Member and Provider Satisfaction Surveys • The Importance of Encounter Data
Cultural Competency Training	
• The Healthy Blue Cultural Competency Plan • Cultural Competency Assessment Tools • Understanding and increasing awareness of the multi-lingual, multicultural, and disability needs of the individuals and families in Louisiana communities • Review of the 15 National Standards for Culturally and Linguistically Appropriate Services (CLAS) • Culture and the impact on Health Care • Understanding SDOH	• Expectations for providers and staff (including mandate to continually expand cultural competency knowledge and skills) • Compliance with physical access requirements and ADA accessibility standards for members, including those with physical or cognitive disabilities • My Diverse Patient Trainings (including Breast Cancer Screening for African American Women, and Creating an LGBT-Friendly Practice) • Examples of Best Practices

Behavioral Health Disorders Training	
• Screening for, Identifying, and Coordinating BH Disorders (including screening tools) • Responding to members with Co-occurring Mental Health and Substance Use Disorders • Referring Members to a BH Specialist • Supporting Integrated Care at the Pediatric Practice Level	• Collaborating with Other Providers Involved in Member Care • Behavioral Health and Substance Use Disorder (SUD) training, including provider skills trainings • Community Mental Health program and provider trainings related to suicide risk, prevention and post-intervention, and claims submission procedures

2.10.9.4 Provider Satisfaction Survey Results

Healthy Blue places great emphasis on results of our annual Provider Satisfaction Survey, as these results aid us in identifying improvement opportunities. As illustrated by Figure 2.10.9.4-2, most providers are satisfied overall and provider participation in the survey has increased year over year.

Addressing Provider Dissatisfaction and Monitoring Improvement

Findings from Healthy Blue's annual Provider Satisfaction Survey are supplemented by findings in LDH's annual Provider Satisfaction Survey, allowing us to have a full view of provider needs. The Healthy Blue Provider Satisfaction Taskforce analyzes results from both surveys to identify improvement opportunities, as well as necessary actions to address satisfaction in these areas.

Figure 2.10.9.4-2. Healthy Blue Provider Satisfaction Survey Results: Overall Satisfaction (2016-2018)

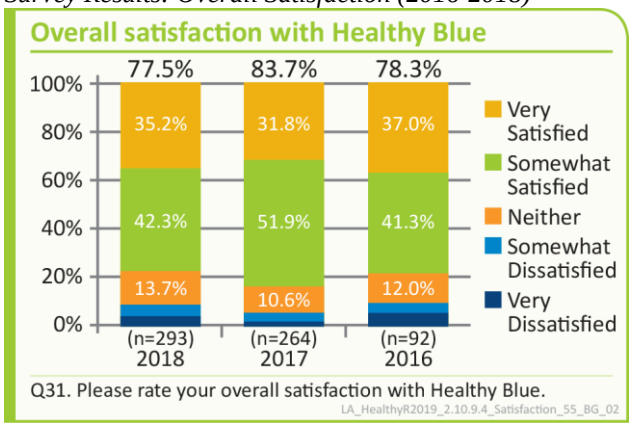

Table 2.10.9.4-2 illustrates improvement opportunities identified as a result of the 2018 Provider Satisfaction Surveys, and includes interventions/actions and evaluations of effectiveness.

Table 2.10.9.4-2. Healthy Blue Provider Satisfaction Improvement Opportunities (2018)

Improvement Opportunity	Interventions, Actions, and Evaluation of Effectiveness
Provider Enrollment Process	• We worked with other MCOs to develop a recommendation for LDH to contract with a Credentials Verification Organization (CVO) to improve verification operations and protect members by ensuring a consistent, effective, and diligent verification process. • We implemented email communication to providers with applicable instructions to submit data missing from credentialing applications. • We updated the process to build provider profiles in claims systems with minimum data requirements to begin the credentialing process.
Provider Complaints System	• We created a local complaints team (as discussed in Section 2.10.9.1.4, Evaluating and Resolving Provider Disputes) with service level agreements of less than 30 days and 24-48 hour response time to providers with both oral (phone) and written (email) communications. • We monitor the effectiveness by including a provider survey, through which mostly positive feedback has been received. Providers who do not indicate 100% satisfaction receive outreach from the health plan.
• Coordination of Care • Accuracy/Timeliness of Information Exchange • Sufficiency of Information to Coordinate Care	• We educate providers on Member 360°$_{SM}$, which gives providers instant access to all member medical data including visits, labs, pharmacy, and care management. • We educate providers on Availity functionality, including eligibility and benefit inquiries, claims submissions, PCP member panel listings, and precertification requests. The Availity portal optimizes the flow of information between health care stakeholders (professional and facility providers, health plans, pharmacies, and others) through a secure web-based exchange.
• Claims Processing • Timeliness and Accuracy of Claims Payment	We have deployed ongoing claims-specific provider education in the form of Provider Bulletins, as well as face-to-face education from PRRs, to educate providers on the timeline for configuration updates and claims payment corrections.
• Communication • Quality/Effectiveness of Provider Newsletters	We transitioned from a quarterly to bi-monthly newsletter. We work with our National Provider Communications team on an ongoing basis to determine what content should be included in the newsletter as opposed to, or in addition to, another communication avenue.

The specific interventions and actions noted are monitored on an ongoing basis by the Healthy Blue Provider Satisfaction Taskforce. This taskforce, which is dedicated solely to improving provider satisfaction, meets monthly to assess the impact of interventions that have been implemented in an effort to improve the overall provider experience. Internal goals are set for each measure and are reassessed as new survey results or provider feedback is received. We anticipate that the focused effort of this taskforce will improve our satisfaction scores, as we continue our "Drive to 85," our ultimate goal of 85% provider satisfaction.

Provider Dissatisfaction in the Form of Provider Complaints

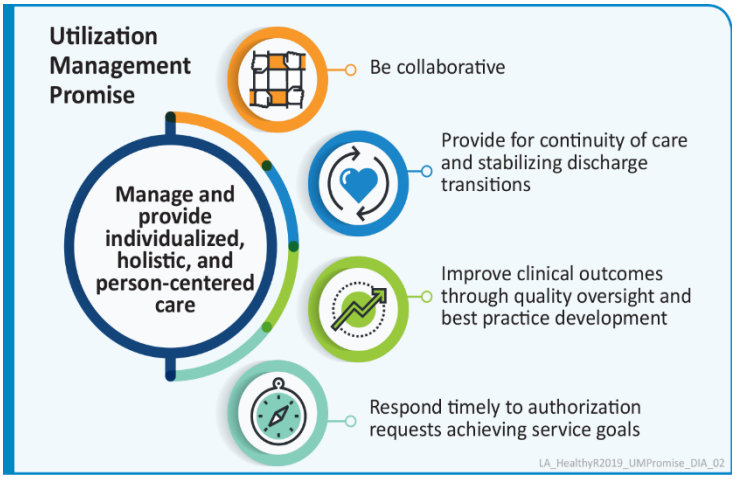
We are committed to expeditiously resolving provider dissatisfaction. If provider dissatisfaction is submitted to Healthy Blue in the form of a formal complaint, our complaint team (as detailed in Section 2.10.9.1.4, Evaluating and Resolving Provider Disputes) is engaged to address the complaint and trigger prompt response and assistance for the provider. In an effort to continually improve provider satisfaction, we solicit provider feedback through the distribution of a Provider Complaint Resolution Satisfaction Survey, which is included in every provider resolution notification email. Table 2.10.9.4-3 shows an example our high provider satisfaction for this survey.

Table 2.10.9.4-3. 2018 Provider Complaint Resolution Satisfaction Survey Results

Questions	Answers
Was your issue resolved to your satisfaction?	100% - 'Yes'
How responsive have we been to your questions or concerns?	80.95% - 'Extremely Responsive' 14.29% - 'Very Responsive' 4.76% - 'Somewhat Responsive'
Overall, how satisfied/dissatisfied are you with our resolution of your complaint?	95.24% - 'Very Satisfied' 4.76% - 'Somewhat Satisfied'
Based on this experience, how would you rate Healthy Blue's customer service?	90.48% - 'Excellent' 9.52% - 'Average'

2.10.10 UTILIZATION MANAGEMENT

Utilization management (UM) is a key component of Healthy Blue's successful integrated care management program. Our coordinated comprehensive approach ensures that enrollees (members) receive timely, appropriate care through individualized, innovative programs and coordination of services and community resources. We follow an evidence-based hierarchy of established medical necessity criteria, supported by policies and procedures when applying medical necessity criteria to service authorization requests ***based on individual member needs***. Our Louisiana strategies for managing high-quality care and services include the following:



- Working collaboratively with our providers to deliver the right care, in the right place, at the right time
- Applying industry-recognized, evidence-based clinical criteria to each individual service request
- Employing Louisiana-based clinical and non-clinical staff who are familiar with the health needs of their communities, local practitioners, and ancillary support providers
- Implementing specialty programs focused where evidence has indicated prior authorization (PA) and education can result in improved access to quality care and reduction in low-value care: high-tech radiology, cardiology, medical and radiation oncology, sleep medicine, musculoskeletal and pain management, and genetic testing
- Working with providers to identify and enroll members in the most appropriate options using Alternative Payment Models (APMs) that focus on high-quality, high-performing providers
- Facilitating provider access to data, information, and systems that ease administrative burden of review and approval processes and support efficient delivery of services (for example, as a direct result of our analysis, we recently removed PA for pediatric echocardiograms when requested by cardiologists)
- Systematically capturing and reporting over- and under-utilization data to identify performance opportunities

Guidance and Quality Oversight

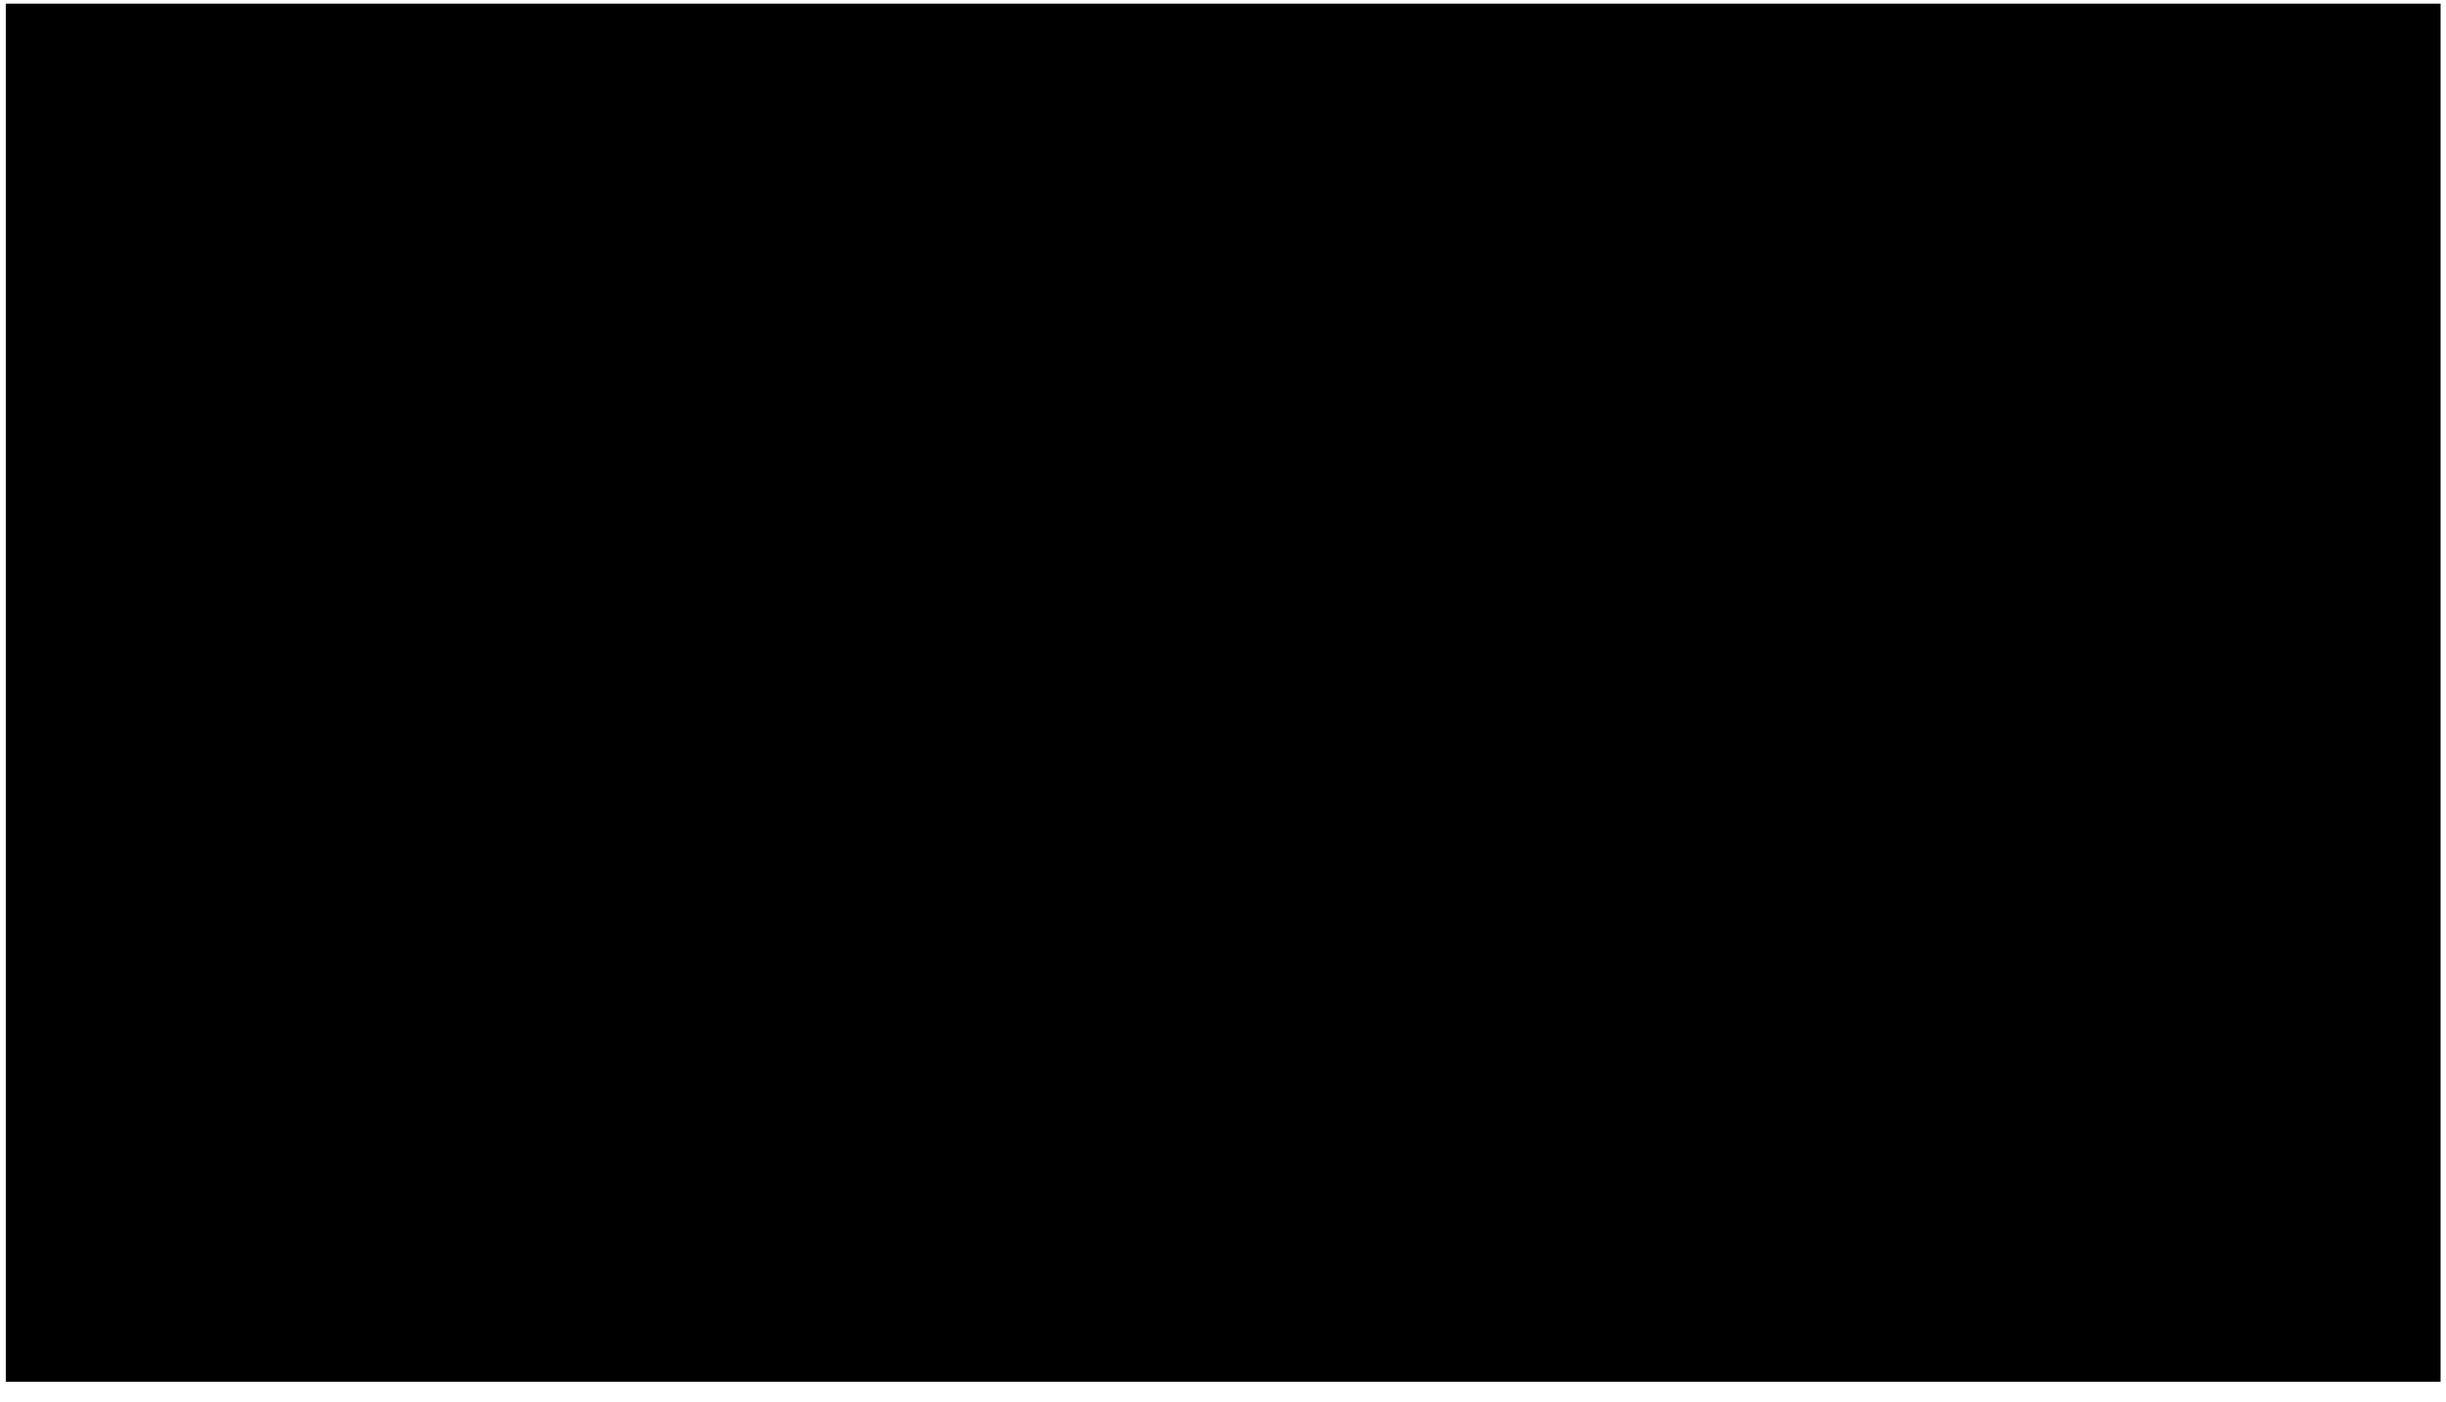
Healthy Blue reviews and updates UM clinical guidelines and practices at least semi-annually and more often when State requirements or utilization trends require revisions. Medical necessity guidelines are adjusted after review of clinical indications for new medical services or procedures and new uses of existing services or procedures. We promote health using an integrated and holistic UM approach that addresses both physical and behavioral health (PH and BH) conditions as well as social determinants of health, responding to the unique needs and situation of each member. We consider members' home environments, family and caregiver supports and resources, cultural and linguistic needs, social circumstances, and characteristics of the local health care system in making medical necessity decisions. The Utilization Management Committee (UMC), Quality Management Committee (QMC), and Medical Advisory Committees (MAC) review and annually approve the Healthy Blue UM program description, assuring local accountability and consideration of regional practice variations. The UM program routinely connects our Regulatory, Compliance, Provider Relations, Pharmacy, Medical Finance, and our National Customer Care teams, including Member Services and other key stakeholder groups, to identify quality-of-care concerns, disproportionate utilization trends, duplicative services, adverse access patterns, lack of continuity, and coordination of care processes. Together with our NCQA-accredited programs for Chronic Care Management, data analysis, and a drive to continue to improve, Healthy Blue has a robust and proven approach to UM.

2.10.10.1 Authorization of Services

Our integrated approach starts with Louisiana-based Medical Director leadership. The daily operations of our UM clinical teams are overseen jointly by our Chief Medical Officer/Medical Director, Dr. Raymond Poliquit, and Dr. Cheryll Bowers-Stephens, BH Medical Director. Our daily processes and workflows integrate UM/care management functions to address whole-person care. Figure 2.10.10.1-1 outlines our PA workflow, with timing of expedited determinations, pre-service, concurrent, and pharmacy requests for services requiring PA, concurrent, or retrospective review. Our medical necessity review process ensures that each request is reviewed on a case-by-case basis, considering the specific needs of each member at the time of the request.

Our goal is for members and providers alike to easily understand and identify which services require PA. While authorization requests may typically begin with a treating provider, we also accept authorization requests directly

from our members. Emergency services do not require PA. Most routine outpatient services, like visits with a primary care provider (PCP), screening and evaluations for Early and Periodic Screening, Diagnosis and Treatment (EPSDT) or well-child visits, do not require PA, so members have easy access to routine and evaluation-based services. We focus our PA efforts on inpatient admissions, outpatient surgeries and procedures, out-of-network services, home care, durable medical equipment, rehabilitation services, select medications, and diagnostic procedures. We disseminate changes in authorization requirements by immediately sending out provider notices, posting changes at the provider portal and member websites, and updating member and provider handbooks. Provider Relations Representatives (PRRs) also update providers in person and over the phone. We are continuously evaluating opportunities to reduce administrative burden and eliminate barriers to medically necessary PH and BH services, while at the same time developing systems to avoid the provision of unnecessary or inappropriate care.



This page is intentionally left blank

We designed our workflow, policies, and processes for timely utilization decisions that accommodate the clinical urgency and necessity of any situation. ***Our UM clinical staff are available 24/7 to assist providers with urgent or emergent requests.*** Healthy Blue takes a "no wrong door" approach to authorization requests; we receive authorization requests via telephone, facsimile, and our provider portal. When we receive an authorization request, our UM reviewer begins to put the clinical information into our integrated Health Intech platform and evaluate the clinical information against appropriate medical necessity guidelines. The UM reviewer may discuss with the treating provider the services being requested, and when indicated, may also discuss potential alternatives to the requested services. When the information provided for services meets medical necessity, the authorization is completed and documented in our system. If an alternative service or level of care is recommended, the UM reviewer works in conjunction with the provider and Care Management team to arrange for the alternative service and secures PA, if applicable. Should the UM reviewer be unable to ascertain sufficient or additional information to determine medical necessity, the request is routed to a Louisiana-licensed Medical Director, who makes the final determination. In fact, any adverse determination regarding medical necessity is made by a Louisiana-licensed Medical Director. Providers can request a peer-to-peer consultation to discuss the case and potential treatment or service alternatives. As part of our appeal procedures, we include an Informal Reconsideration process that allows the member (or provider/agent on behalf of a member) a reasonable opportunity to present evidence and allegations of fact or law in person as well as in writing. At the time of any adverse determination or partial adverse determination, we advise the member and provider in writing, detailing the specific reasons for the determination, the factors considered, and any additional information or actions available to the member or provider.

We are advancing the Triple Aim objectives of better care, better health, and lower costs. We agree that members should be treated in the least restrictive settings possible, and that they should have a choice of where they go for services. We inform our members of these rights in the member handbook and in all of our care management interactions.

Authorization Processes

We cover out-of-network services when emergency services are needed by a member either in or outside the service area. If a member is engaged with an out-of-area provider, we develop a strategy with the member and provider(s) to transition the member to a network provider once stable, or if the care requires long-term treatment available from a network provider. No pre- or post-authorization is required for emergency services. In an out-of-network emergency situation, it is not necessary for the member or provider to contact us prior to treatment. While we do not deny claims based on failure to receive notification of emergency services, we encourage members and providers to contact us within 24 hours of treatment so we can begin care management and facilitate any necessary authorizations for ongoing service or transfers to network providers. Follow-up activity is based on the severity of the member's health issue.

Our UM program is designed to reduce the likelihood of avoidable hospital stays and readmissions by using evidence-based criteria to validate the appropriateness of admission and initiating discharge planning to verify that each member transitions safely to outpatient services. In the proposed Contract period, we will continue to honor all existent medically necessary covered services for enrollees coming to Healthy Blue from other MCOs, regardless of whether they are in or out of network, for up to 90 days. During this time, we work with the provider and the member to minimize service disruption and assure a smooth transition to a network provider.

Once a member is admitted into treatment, the UM team monitors our daily census reports for open cases and prioritizes those requiring immediate action for continued-stay review and discharge planning. They also monitor data and trends in weekly or monthly reports to identify opportunities to re-evaluate workflows or processes. We begin discharge planning at admission. Daily integrated rounds involve discussion of the member's treatment and identify supports to promote safe discharge. Our discharge plans cover all basic living requirements and access to safe and affordable housing, education, employment, and food assistance, when indicated, to advance member health.

Inter-rater Reliability (IRR) and Performance Improvement and Enhancement (PIE) Audits

Our UM policies and review practices affirm that covered services are medically necessary and not arbitrarily or inappropriately approved, denied, or reduced in number, duration, or scope because of a diagnosis, type of illness, or condition. We train all licensed clinical staff to apply medical necessity criteria, and we thoroughly review their decisions. Healthy Blue uses IRR to confirm that we have consistently applied medical necessity criteria. We conduct annual IRR reviews of our clinical teams to verify consistency and accuracy in application of medical necessity criteria. ***Overall, our UM team scored a total of 95% on the 2018 IRR review.*** Results are reported to the Medical Directors, UM Committee, Quality Management Committee, and Medical Advisory Committee annually.

Our PIE program supports consistent application of review criteria for authorization decisions and continuously evaluates our UM program using monthly clinical and non-clinical audits (including call reviews), outcomes reporting, and process validation for compliance with UM policies. Since implementation of the PIE program, we

have seen clinical staff adherence to process and UM criteria improvement. ***Our 2018 PIE Audit score indicated that our UM reviewers are currently performing at 97.6% compliance.***

The audits identify staff who need additional training, as well as opportunities for new training modules or refreshers that would benefit the entire UM team. We report IRR and PIE results to our Quality Management Committee to also identify areas for improvement and develop action plans. If a reviewer falls below our IRR compliance threshold of 90%, and PIE compliance threshold of 96%, we develop an individual corrective action plan to address the deficiency. These evaluations may also be used to inform areas of workflow adjustments, identify areas for improvement, and create enterprise trend comparisons.

2.10.10.2 Meeting Contract Requirements for Utilization Management

UM Criteria and Their Application

To inform our UM team and support evidence-based medical necessity decisions, Healthy Blue uses Milliman Care Guidelines® (MCG), our MAC-approved medical policies, medical specialty society guidelines, clinical drug policies and procedures, and nationally recognized references such as the American Society of Addiction Medicine (ASAM). Our criteria and guidelines have a comprehensive range of level-of-care alternatives sensitive to the differing needs of adults, adolescents, and children. We adapt these criteria to follow all requirements established by LDH for administering Louisiana covered Medicaid benefits, including State and federal EPSDT standards, to better meet members' needs. Specifically for our members, in collaboration with LDH, provider partners, and other MCOs, we use Louisiana-specific guidelines for Applied Behavioral Analysis (ABA), Community Psychiatric Support and Treatment (CPST), Psychosocial Rehabilitation (PSR), Assertive Community Treatment (ACT), Therapeutic Group Home (TGH), and Clinical Observation services. Our contracts with LDH and regulatory guidelines from CMS supersede MCG and our medical policy criteria. Our UM medical necessity criteria and practice guidelines are posted on our Healthy Blue website and are available upon request by members or providers.

We are acutely aware of, and responsive to, the different needs of members with multiple chronic conditions. UM reviewers consider the severity of illness, presence of multiple conditions (complex medical conditions, pregnant women, substance use disorder, durable medical equipment, and pharmacy requests), episode-specific variables, and level-of-care alternatives for the needs of adults, adolescents, and children. We evaluate application of our criteria based on individual member needs and preferences, an assessment of the availability of services within the local delivery system, and the treating provider's request. We also consider community-based supports and services to make sure that services are not duplicated. We work with our Care Management team to be sure our comprehensive range of level-of-care assessments is sensitive to the needs of children, adolescents, and adults, as well as members with Special Health Care Needs. When using the criteria to match a level of care to a member's current condition, UM reviewers also consider social determinants such as safe housing, food security, transportation, and employment needs. Our team remains involved with members, their families, and providers throughout their care and continually works to determine the most appropriate services and settings, levels of care, availability of services, and providers in the community where our members live.

Healthy Blue Puts Member Needs First

When 10-year-old Lexi was admitted to the hospital with acute cholangitis, her condition did not appear to meet MCG criteria, despite the fact that she had a history of liver transplant: she was afebrile, had no leukocytosis, her urinalysis was clear, and she was hemodynamically stable. However, she required IV antibiotics for the cholangitis. Her case was referred to Dr. Poliquit, who explored alternative levels of care for administration of the IV antibiotics with the inpatient UM reviewer. Because there were no pediatric home health services in Lexi's area and the regimen was more intensive than an outpatient treatment would be, Dr. Poliquit approved Lexi's admission for IV antibiotics and she got the treatment she required.

LA_HealthyR2019_Lexi_RS_02

Consideration of Complex Variables in Applying UM Criteria

We consider multiple factors in authorizing services. For hospitalized members with chronic or complex comorbidities who require more intensive or integrated coordination, our UM reviewer will connect with our Care Managers (CMs) to increase the intensity of interventions in the member's care plan. The CM may conduct a face-to-face visit with the member at the inpatient setting, or with providers, family members, or others involved in the member's care. For all members, but especially for those with complex or comorbid conditions and multiple admissions, we consider the member's home situation and authorize more days based upon clinical need to assure safety and support for the member. When we receive requests for BH inpatient services, we consider suicidal risk or danger to others, presence of acute psychotic symptoms, level of functional impairment, self-injury, or uncontrolled risk-taking behaviors. Our integrated care management and UM programs are beneficial here. For example, if a Healthy Blue child member goes to the emergency department (ED) experiencing a BH crisis, the UM Manager contacts the CM to confer on the case as soon as UM is notified. If the facility uses the Louisiana Health Information Exchange (LaHIE), we are notified electronically. A children's CM is assigned according to the

presenting issue. The CM contacts the hospital representative to identify the best placement option, and contacts the parents or guardian to give them their name and contact information to begin transitioning the child to the best care setting.

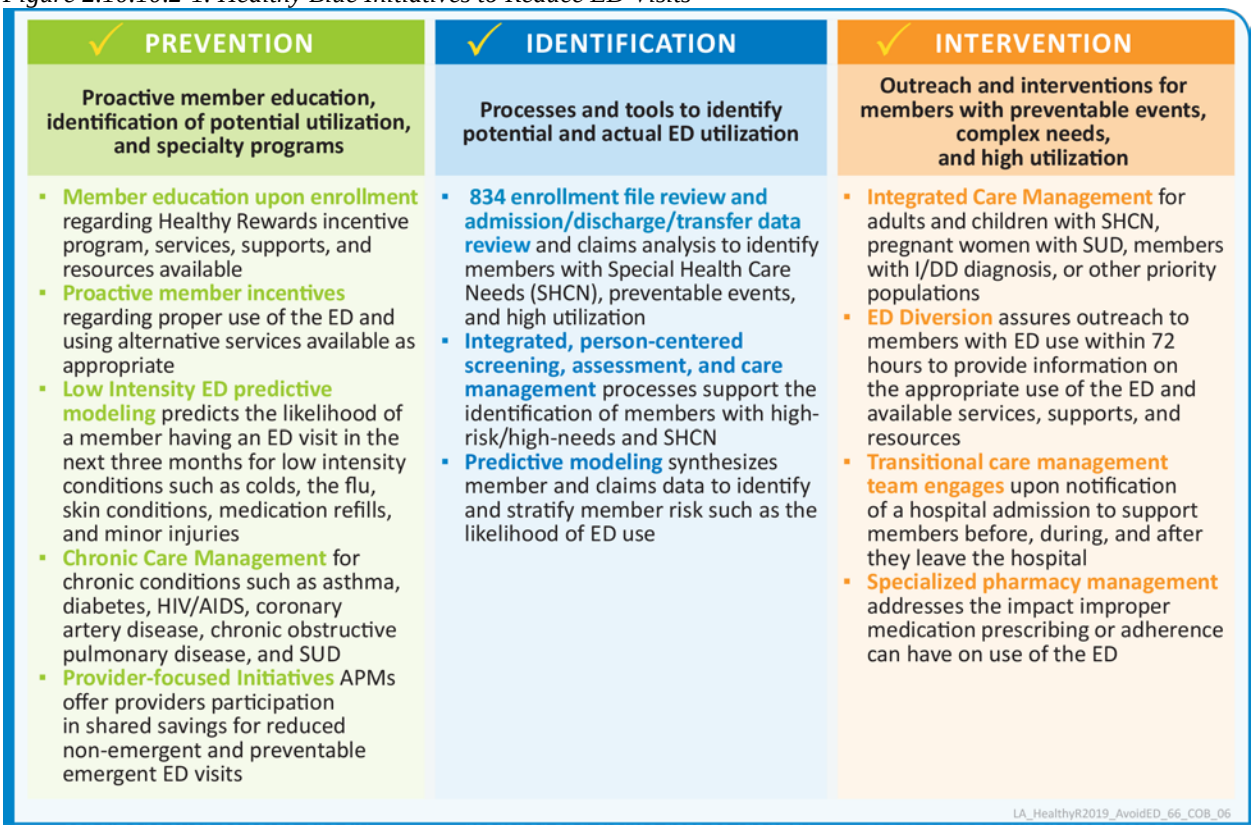
Some members with substance use disorder (SUD) have difficulty complying with treatment. CMs connect these members with providers and community and peer supports that can assist in their recovery. For example, we might offer the member a sober-living environment to encourage recovery if their home environment enables substance use, or we may offer a specialized residential program for a pregnant member with a history of substance use to reduce the potential for harm to her and her baby. In all of these cases, we apply guidelines in ways that will produce good outcomes for our members and their community.

For members who receive Medicaid and Medicare services, our integrated model and "no wrong door" approach cuts across traditional Medicare-Medicaid service boundaries. We address the member's PH, BH, and social support needs through coordinated contacts with the Medicare benefits administrator and our CM. We monitor Medicare provider claims for all dual-eligible members to identify gaps in care. We collaborate with members and their PCPs or other providers to close care gaps. We identify and address HEDIS® alerts generated by our Health Intech platform for both Medicaid- and Medicare-covered gaps in care.

Monitoring and Addressing Frequent ED Use

Healthy Blue has a number of active strategies to reduce avoidable use of the ED: member education, promotion of alternative settings, identification of care coordination and care management needs using tools such as the comprehensive health needs assessment, and intervention and outreach to resolve barriers to care such as lack of transportation. Our strategies are designed to help members, their families, and caregivers anticipate, identify, and respond to potential emergencies, improving the safety of the member and facilitating the use of the most appropriate care and settings. Our broad array of tools and resources identifies, predicts, and tracks ED utilization, and our Care Management team engages members with education and supportive relationships. Figure 2.10.10.2-1 illustrates our multifaceted, integrated care management (UM/CM) approach: prevention, identification, and intervention.

Figure 2.10.10.2-1. Healthy Blue Initiatives to Reduce ED Visits



Using Data, Predictive Modeling, and Care Management Interventions

We identify individuals with emerging or high risk of an ED visit with proven predictive modeling tools, and proactively coordinate their services and supports to achieve optimal outcomes. We can calibrate solutions and track changes in member risk levels over time. ***We have developed specific screening tools to support early identification of members at risk for ED usage and who may benefit from our diversion programs based on severity of illness:***

- **Predictive models.** Chronic Illness Intensity Index (CI[3]); Likelihood of Inpatient Admission (LIPA) Index; Readmission Assessment Risk (RAS); Behavioral Health First-time Readmitters Program
- **ED TRIAGE tool.** Synthesizes member data and assigns risk scores to indicate likelihood of ED visits for ambulatory care sensitive conditions
- **Low-intensity ED tool.** Predicts the likelihood of a member having an ED visit in the next three months for low-intensity conditions; scores will trigger proactive outreach by our CMs, assessment, and service planning as needed to mitigate ED utilization
- **Louisiana Health Information Exchange (LaHIE).** Allows secure, statewide exchange of health information
- [redacted] INNOVATION

To predict the risk for readmission within 30 days of a hospitalization, Healthy Blue enters ICD-10 codes, length of inpatient stay, medical service (surgical, OB), age, and discharge diagnosis and disposition to the pool of information about the member, which includes demographic and diagnostic information. The details of a member's inpatient stay and their likelihood of readmission scores are recorded on an Admit/Discharge Report, which is distributed to our local governing entities (LGEs).

Using these tools, we identify likely ED utilizers or rapid re-admitters with a BH diagnosis and two or more ED visits in a 30-day period (for any reason) for integrated assessment and care planning, monitoring, provider partnerships, and improved care transition supports. We also look for opportunities to engage our local care coordinators, such as Navigators or Outreach Specialists, as extensions of our care management interventions to reduce readmission risk (see Section 2.10.5.1, Supporting the Triple Aim with Effective Care Management).

At least monthly, our ED Task Force, a multidisciplinary care team, gauges the effect of our ED strategy by reviewing ED visits, inpatient admissions, readmissions, medical and pharmacy utilization metrics, follow-up after hospitalization for mental illness, and follow-up after ED visit for alcohol or other substance use or dependence.

ED Diversion Strategy: Connecting Members to Primary Care and BH Providers

We know that members with gaps in preventive care use emergency services more frequently than those who are engaged in their health care, and that they have the most positive outcomes and fewer avoidable ED visits when they are regularly engaged with their PCP or BH provider. Our ED Task Force, using focused data mining, created a program called Appropriate Emergency Room Utilization Program (AERU). We piloted the program in Jefferson, Lafayette, Orleans, East Baton Rouge, and Ouachita Parishes, which are service areas with the highest volume of members with two or more visits to an ED within a 12-month period. We identify members who have not had contact with a PCP or who have a PCP but may be at risk for frequent emergencies. They receive a directed educational call that reminds them to visit their PCP, what kinds of conditions typically present for urgent care instead of emergent care, and where to go for urgent care. The CM reminds members of our non-emergency resources such as the 24/7 Nurse Line, 24/7 BH Crisis Line, and urgent care clinics where they are available. The 24/7 clinical call teams provide members with evidence-based service recommendations that may prevent an unnecessary ED visit:

AERU Program to Reduce Unnecessary ED Use

Results: Over 2,500 members in Orleans, Jefferson, Ouachita, Lafayette, Rapides, East Baton Rouge, Tangipahoa, St. Tammany, and St. Charles Parishes enter the health care system at the appropriate level of care. Savings from the AERU program between 2017 and 2018 were $490,391, and we expect to see further significant decreases by reducing preventable ED visits and hospitalizations.

LA_HealthyR2019_AERU_66_COB_05

- Nurse Line clinicians can assess physical symptoms and severity; address many non-emergent conditions and their treatment with sophisticated decision tree software to support their clinical judgment; assess each caller's needs; suggest self-care for non-emergent conditions; recommend next steps for treatment of common ailments such as upper respiratory infections and urinary tract infections; and direct the member to the most appropriate point of care
- BH clinicians can engage with members to address emergent issues; suggest referrals for treatment; provide education on behavioral health services; direct the member to emergent care; and coordinate with local crisis response resources

We promoted the AERU program at marketing and member events, on a radio ad campaign, in social media, with website/portal information on proper ED utilization and member alternatives to the ED, and on informational magnets. Members were engaged in AERU for at least 30 days and up to a year depending on individual member need. The Clinical team met routinely to discuss members in interdisciplinary rounds, identify barriers, and develop best practices to promote engagement in the program. Information from AERU is shared with our Quality Management team to help identify HEDIS gaps and assist providers in closing gaps in care. By incorporating home visits with a nurse practitioner, AERU closed HEDIS gaps and connected members to a PCP follow-up.

Proactively Addressing Chronic Pain, Substance Use, and Medication Safety

Chronic pain is another leading cause of high-frequency ED use and puts members at risk for opioid use and dependence, which can further lead to injuries and overdose that require ED treatment. Our ED strategy and care management program addresses adolescent and adult pain management, ED frequency, outlier opioid use, and hepatitis C diagnosis without substance use as a cluster.

- **Sickle cell disease.** Our Data Analytics team associates a particular diagnosis and claim type as a proxy for missed care opportunities. When they examined ED use by members with sickle cell disease, they found a high rate of ED use was associated with poor access to, or use of, primary or urgent care settings for pain management. By connecting these members with a provider and establishing an ED diversion program with an interdisciplinary team approach, we supported planned access to care that eliminated long, uncomfortable waits in the ED. As an adjunct to this program, our pharmacy clinical quality program focuses on hydroxyurea non-compliance in diagnosed members and closing the gap for members not taking it to reduce ED use for pain management. Our efforts to close gaps in care for members with sickle cell disease in Louisiana resulted in an improvement of 10.19% in hydroxyurea treatment in 2018. Most importantly, medication compliance improves the quality of life for our members' with sickle cell disease.
- **Hepatitis C.** Hepatitis C is another intermittently or chronically painful condition that can lead to inappropriate ED use. To expand awareness of this condition, our specialty Pharmacy team sends mailers and automated calls to help new patients understand the importance of medication adherence and to remind them to fill their medications on time. We immediately engage diagnosed members in care management, helping them understand the options available to them, encouraging treatment completion to circumvent the need for pain control.
- **Substance use disorder (SUD).** Nationally, we are seeing increases in opioid-related ED visits. When we see indicators of potential substance use (including obtaining prescriptions from numerous physicians and/or pharmacies without providers' knowledge, or obtaining or dispersing prescriptions by fraudulent actions), we reach out to the member and their providers, gather information, and help arrange a screening, brief intervention, referral, and treatment. Our Clinical team evaluates trends using data related to ED admissions with an overdose diagnosis as well as SUD diagnoses from similar services and across populations to compare utilization rates of members with similar diagnoses and acuity.
- **Medication therapy management (MTM).** Healthy Blue offers MTM for members managing multiple chronic disease states and medications. Pharmacists conduct a comprehensive medication review and consult the members' provider(s) if they detect a potential interaction or adverse reaction; educate members about their medications; monitor therapeutic goals; prevent medication errors; and follow up with members on a medication regimen as part of an effort to improve their safety. They also generate personal medication lists for members to take with them to medical visits. Member qualifications of chronic disease states were modified after an analysis in 2017 to prioritize members who would receive the most benefit from a comprehensive medication review. An outcomes analysis will be made mid-2019. In 2018, Healthy Blue members received 2,099 comprehensive medication reviews from community pharmacists, with 8,006 interventions from a pharmacist regarding medication adherence, diabetic education, and gaps in drug therapy. Also in 2018, Healthy Blue's Dr. Poliquit piloted our ***Patient Safety and Clinical Pharmacy Services*** program for diabetic members managed by Louisiana Federally Qualified Health Centers (FQHCs). The program was designed to address ED use by diabetics who were not medically compliant and ended up in EDs with poorly controlled diabetes.

Expanding Alternatives to the ED

We continually work with our provider community and LDH to give members alternatives to ED visits. [redacted]

crisis stabilization services.

[redacted]

We take a focused approach when a Healthy Blue youth or the Department of Children and Family Services (DCFS) member goes to the ED experiencing a BH crisis. Once the Utilization department is notified, the UM Manager engages with the CM to confer on the case. If the facility is in the LaHIE, we are notified electronically. Our BH Liaison, part of our youth-focused Care Management team, deploys a CM to assist based on the presenting issue. The CM contacts the hospital representative to assist with identifying the best placement option. The CM also contacts the parent or guardian to inform them of the CM's name and contact information, and begin the collaboration process of transitioning the child to the right setting at the right time in the safest manner.

Finally, our Community Outreach Strategy, which includes Community Outreach Care Specialists, Peer Support Specialists, and Navigators, reach out to members who have high ED utilization for direct support and care coordination in the communities in which they live, as described in Section 2.10.4.5, Piloting a Community Health Worker Demonstration Project. Table 2.10.10.3-2 lists our offerings to assist members with alternatives to the ED, such as telehealth, expanding access to specialty providers, and value added benefits available to members.

Pre-admission Screening and Concurrent Review

We recognize the role we play in the prescreening of inpatient admissions, nursing facilities, Psychiatric Residential Treatment Facilities (PRTFs), and Coordinated System of Care (CSoC) services, as well as continued-stay reviews. These screening mechanisms assist both the MCO and LDH with assessing availability of member services, ensuring consistent application of medical necessity criteria for level-of-care determinations, promoting consultation with the requesting provider, collaboration between agencies, and the ability to arrange for another level of care if appropriate. Our LDH-informed policies and processes comply with requirements as identified within the MCO Manual and Contract regarding prescreening and concurrent reviews.

Pre-admission Screening and Resident Review (PASRR)

We receive referrals from the Office of Behavioral Health (OBH) to assess the appropriateness of nursing facility placement and the need for, and facilitation of, BH services. Every member with a serious mental illness (SMI) or an intellectual disability in the application to Medicaid-certified nursing facilities gets a PASRR Level II evaluation to determine need, least-restrictive setting, and recommended services in compliance with the Americans with Disabilities Act. Using the criteria set forth in 42 C.F.R. Part 483, Subpart C and the PASRR Level II standardized evaluation form provided by LDH, Healthy Blue conducts PASRR Level II evaluations of members upon referral from LDH to determine the need for nursing facility services or the need for specialized services to address mental health issues while the member is in a nursing facility. In compliance with 42 C.F.R. §483.130, we monitor members in nursing facilities who have been through the PASRR process, who are identified with SMI, and those receiving specialized services. We defer to State findings on PASRR Level II. In compliance with 42 C.F.R. §483.120 and the DOJ Agreement, we will report all PASRR specialized BH to LDH on a quarterly basis, and all PASRR Level II evaluations will be repeated annually.

At present, **21 Healthy Blue members** with SMI have been identified for transition from a nursing facility back into the community; **3 have successfully transitioned**; and **12** other transitions are under negotiation. Only **6** were identified as inappropriate to transition or changed their minds about the transition.

LA_HealthyR2019_SMI_DP_01

Psychiatric Residential Treatment Facilities (PRTFs)

Prescreening is completed within 24 hours for members under 21 who are referred to PRTFs. In consultation with the member's guardian or the referring party, we will identify a facility with in- or out-of-network availability. When there is an admission to any facility, on-site concurrent review nurses immediately begin planning for each member's discharge. They assess member progress and anticipated needs at discharge; work with the facility to verify the medical necessity of continued stays; and coordinate discharge planning to facilitate a safe transition to the next level of care. We verify that the right services are integrated, not duplicated, and are provided at the right time based on the member's changing needs. For youth transitioning from a secure setting to a PRTF under Healthy Blue management, we will coordinate completion of a Certificate of Need. BH and PH Medical Directors make a ruling when medical necessity is in question, and when a request is denied, we inform the member and their parent or guardian in writing within 48 hours and offer information about alternatives and their right to appeal. Once a member is admitted, we seek recertification of the stay every 60 calendar days. For PRTF screens to be complete, we meet with the multidisciplinary care team to determine other community-based options.

Louisiana's Coordinated System of Care (CSoC)

Healthy Blue completes the initial screening for children and youth who may qualify for CSoC waiver services. We administer the three-question, State-mandated screening as part of our UM and CM processes when a member is identified as at-risk for hospitalization and resides in a home or community setting, or at least 90 days prior to an expected discharge from a residential service. Should the member screen positive, we refer and coordinate with the CSoC administrator. After screening, we inform and educate families about specialized services and how to contact the contract administrator. We also collaborate with the contract administrator on the outcomes of those who are enrolled in CSoC services in our weekly rounds. We enroll those who are not enlisted in CSoC in our care management program.

	2017	2018
Number of CSoC Initial Risk Screeners performed	423	495
Number of youth who screened positive	402	471
Percent of youth who screened positive	95.0%	95.2%
Number of youth who screened positive who were referred to CSoC contractor	379	455
Percent of youth who screened positive who were referred to CSoC contractor	94.3%	96.6%

LA_HealthyR2019_CSoC_COB_01

Concurrent Reviews

We conduct concurrent review for all inpatient and residential services if the provider and member determine that treatment should continue beyond initial authorization. During this process, the UM reviewer will engage CM coordination, Chronic Care Management functions, and discharge planning for placement, medications, and authorizations as needed. In performing concurrent reviews, UM reviewers assess individual member progress and needs during the episode of care and coordinate before discharge to facilitate the member's smooth transition between levels of care or home, and to prevent delays in discharge caused by unanticipated care needs. UM reviewers apply clinical UM guidelines to requested services and the member's assessed needs to determine the necessity of the service and continued length of stay. The UM reviewer may seek additional information from the member, provider, and Care Coordination team to affirm the requested service is the most appropriate to meet the member's documented need. If it appears that criteria are not met for continued services, we consult a Medical Director. The Medical Director and provider might also meet to discuss the necessity for the service and other relevant information. Discharge planning before a member leaves the hospital helps avoid a costly readmission or another acute episode.

Healthy Blue Complies with Mental Health Parity Requirements

Healthy Blue brings all of our health care resources and experience to Medicaid members with mental health and substance use issues. Our PA, medical necessity criteria, network policy, and procedures are in compliance with the federal Mental Health Parity and Addiction Equity Act of 2008 and 42 C.F.R. Part 438 Subpart K. Criteria for medical necessity determinations for mental health and SUD benefits to any member, potential member, or provider are available on our website and by request, per 42 C.F.R. §438.236(c) and 438.915(a). We adjust services and subcontractor relationships as needed to remain in compliance with LDH parity reviews. Healthy Blue also participates in Anthem's Parity Governance Committee, which reports into the Medical Compliance Committee as well as other clinical committees regarding overall parity compliance. Anthem's Parity Governance Committee activity supports our individual health plan efforts and gives us oversight and guidance in sustaining compliance with the Mental Health Parity and Addiction Equity Act.

How We Identify and Mitigate Overutilization

Healthy Blue uses analytical tools to proactively and retroactively identify overutilization. These tools include ***predictive modeling, member trending, provider ranking, services from highest to lowest utilization, and data analysis of ED use and rapid hospital readmission***. When indicated, we may seek additional quality of care guidance and identification of potential fraud, waste, and abuse (FWA). We review both primary care utilization patterns and servicing provider billing patterns in the context of local, regional, and national benchmarks to identify providers whose utilization patterns are atypical. The Analytics team identifies outlier members and providers based on relative distribution of services and then refers to the appropriate Healthy Blue functional area for intervention. For example, using gap-in-care algorithms, our analytics team looks for certain services when the member is pregnant, has a diagnosis such as sickle cell disease, or uses the ED, and refers those members to care management.

Our retrospective drug utilization program analyzes historical drug utilization data and identifies opportunities to encourage clinically appropriate utilization while promoting medication compliance and safety. We will continue to track medication utilization, helping us ensure that all medications are dispensed with information about proper use

Healthy Blue's Toolbox for Identifying Overutilization

Data- and information-sharing helps providers act on opportunities to improve their performance and ensure continuity, coordination, and the delivery of integrated care. Using profile reports, we compare provider performance to a peer cohort on established benchmarks. Healthy Blue's access to the Health Intech platform gives interdisciplinary teams actionable medical, BH, and pharmacy information in near-real time. It alerts providers to gaps in care and prompts them to engage the member in appropriate services. Member 360°SM gives a comprehensive view of all member interactions, authorizations, claims, clinical history, utilization, assessments, care management, and care plans in a central, single, personal health record.

Daily reports on members awaiting approvals, data needed to complete approvals, amount of time members have been in care and at a certain level of care, number engaged in intensive outpatient care or receiving outpatient hospital services, and the number in inpatient care inform UM and CM teams on utilization trends, confirms members are getting the right care, and how well we are meeting our fiduciary responsibilities.

Dashboard clearly presents weekly readmission trends, average length of stay, days per thousand, and outpatient services, most common diagnoses, and top admitting providers.

Over-and Under-utilization reports are evaluated for member aggregate data and provider-specific trends that indicate that a peer review with our Medical Directors or support from our Provider Relations Representatives might be beneficial.

Pharmacy claims data review helps us flag both over-utilization and under-utilization of medications.

LA_HealthyR2019_Toolbox_66_COB_03

and potential side effects or interactions. They too can quickly spot polypharmacy patterns that warrant further investigation or coordination of care. Our PBM's Clinical Pharmacy Care Center is staffed with pharmacists and nationally certified pharmacy technicians who can prompt member outreach or education in cases of atypical medication utilization.

[redacted]

he information will be presented to prescribers in the form of a report card, and we will offer providers multimodal support to reduce opioid misuse and abuse. Additionally, we will assess members' risk of opioid misuse, and for those identified as at-risk or high-risk, a clinical pharmacist will call the prescriber to discuss medication-related concerns and develop an action plan.

Continual data mining identifies both overutilization and underutilization. We conduct ongoing review and analysis of our claims and encounter data to identify member subgroups at-risk for high utilization of acute, chronic, or preventive services. The reports generated from these analyses help us identify outliers and opportunities for intervention. Quality Management and Provider Relations information is also integrated into these reports. Populations we identify as having high utilization risk are:

- Neonates with high-risk postpartum conditions
- Children under six with BH concerns, like ADHD
- Pregnant women with prior preterm delivery
- Members of any age with specialized health care needs
- Members with SUD
- High-frequency ED users and rapid readmitters
- Members with chronic pain
- Members with high predictive modeling scores

Our Performance Improvement Projects (PIPs) also support our effort toward an integrated UM and care management approach.

[redacted]

Twice weekly, we assemble our UM and CM teams to meet with our Medical Directors and Addictionologist to discuss members who are not progressing optimally, such as those with long lengths of stay or complex discharge plans. In integrated rounds, we can identify barriers that may interfere in discharge planning, opportunities for intervention, and strategies for positive wellness outcomes. Healthy Blue used a similar approach in evaluating BH services for members receiving mental health rehabilitation (MHR). We formed dedicated teams to review these services and members, successfully shifting members to traditional outpatient BH services by reducing CPST units per 1,000 by 8.74% and PSR units per 1,000 by 3.47%.

Healthy Blue works to identify and reduce overutilization among members with chronic conditions. For example, if claims suggest a member is using a rescue inhaler for asthma and not using a prescribed controller, or has not had a follow-up visit for persistent asthma, a message is sent to both the provider and member to prompt a review of symptoms and their acuity and to adjust medication regimens as needed. If a report on stimulants prescribed by age band indicates that a child under the age of seven is taking four or more psychotropic medications (regardless of whether they are stimulants, antidepressants, antipsychotics, or sedative hypnotics), our Medical Director, Pharmacy Director, and BH CM, in partnership with our PRRs, will conduct outreach and education to the provider as well as record reviews.

When utilization patterns suggest the need to reach out to members, our interdisciplinary team collaborates to determine an appropriate strategy. Healthy Blue's UMC feeds into our parent organization's UMC for review of over- and underutilization from a multidisciplinary perspective. [redacted] We recently identified a gap in the continuum of care between inpatient psychiatric hospitals and outpatient services. To effectively align members with appropriate care while also reducing unnecessary inpatient admissions and readmissions, we contracted with Oceans Behavioral Hospital Intensive Outpatient Program to provide a minimum of three hours per day for psychiatric intensive outpatient services for members not meeting inpatient criteria.

We mitigate under- and overutilization by continually educating providers on clinical practice guidelines and evidence-based clinical practices. We share data with providers with potentially aberrant patterns to discern possible root causes and coach them on resolving any over- or underutilization patterns. When appropriate, we work with providers to develop corrective action plans that guide them in improving their overall performance. Our PRRs subsequently monitor their performance for six months to align practice patterns with norms. We support providers in independently recognizing members in need of services. For example, we provide PCPs with reports listing members who are due or overdue for wellness visits, immunizations, or screenings. Finally, we report any suspicious billing to our organization's Special Investigation Unit.

2.10.10.3 Historical Experience with UM

Healthy Blue has been providing UM services in Louisiana since 2012. Our history here guides our daily work and enforces our efforts to facilitate the ***right care, in the right place, at the right time***. We are further supported by BCBSLA's 85 years of experience working with local communities and managing care with local resources and by Anthem and our affiliate health plans in coordinating care for members in Medicaid and CHIP programs in 21 markets. Healthy Blue has been providing skilled nursing facility coverage in lieu of long-term acute care services since 2012, placing eligible members in least-restrictive services while ensuring medical needs are met. With our combined national background and local expertise, we bring a wealth of best practices and a depth of expertise to UM.

Challenges Associated with High Utilization and Medical Trends

Challenges we face with regard to current medical trends and high utilization are managing the historical pattern of delivery of services, addressing the needs of our expansion population, the psychosocial determinants of our members, and our ability to identify and use in lieu of services or non-covered benefits for treatment alternatives. We discern trends and variables that affect the State and try to improve them on as many fronts as possible. With our service delivery providers, we want to connect members to the least-restrictive services, promote a community engagement structure, and bridge gaps in care with in lieu of and intermediate services. Our multifaceted UM procedures improve access to care. Also, Healthy Blue participated in the development of the Common Observation policy with LDH in MCO workgroup meetings, drafting several policy points that were incorporated into the final product.

Initiatives to Manage High Utilization

In addition to previously mentioned programs and measures, we have current and upcoming initiatives to address high utilizers. Our AERU outreach and BH Patient Navigation initiatives work to reduce avoidable hospital admissions and readmissions, as described in this Section and Section 2.10.5.1, Supporting the Triple Aim with Effective Care Management. The VBP models described in Sections 2.10.9, Provider Support, 2.10.11, Quality, and 2.10.12, Value-Based Payment also encourage appropriate utilization.

In collaboration with LDH, we sought to reduce overall MHR and PSR costs by 14%. As mentioned earlier, we met with our Medical Directors to refine understanding of medical necessity guidelines and the delivery of PSR services. We increased the frequency of medical necessity reviews for children and youth in those services, and incorporated the evidence-based Child and Adolescent Service Intensity Instrument and the Child and Adolescent Needs and Strengths survey. We also participated in provider trainings related to level-of-care screenings for PSR and MHR

services throughout 2018. Our joint effort resulted in a continued trend of 20% redirection of services from MHR and PSR to outpatient treatment in 2018.

The **Healthy Blue Pediatric Day Health Care** (PDHC) program was developed for members needing a level of care that is not available in an integrated setting. Our PDHC program provides services to meet the medical, social, and developmental needs of children from birth to 21 years of age who have complex medical conditions that require skilled nursing care or ongoing therapeutic interventions to preserve and maintain functionality, prevent death, treat disease, ameliorate disability or other adverse health conditions, or to prolong life. PDHC is a community-based alternative to long-term and extended in-home nursing care. PDHC does not provide respite care, and it is not intended to be a backup for respite care. PA is required for all PDHC services. Services may be provided seven days a week and up to 12 hours per day for qualified Medicaid recipients as documented in the care plan. The PDHC facility Medicaid per diem rate covers:

- Nursing care
- Respiratory care
- Physical therapy
- Occupational therapy
- Speech-language therapy
- Social services
- Personal care assistance with Activities of Daily Living (ADLs)
- Transportation to/from the PDHC facility

[redacted] The program requires collaboration between Medical Directors, UM, CMs, and a liaison to get the best outcome for member. CMs made two face-to-face visits to all members who requested this level of service and spoke with parents or DCFS caregivers and providers to get a complete picture of the member. Each case was presented at rounds twice per week to discuss the scope of the child's needs and situation. We work to transition these children to school systems, Early Steps, and home health when they are medically stable. We have engaged patient care services, private-duty nursing, and permanent residential treatment facilities to ensure they are receiving appropriate care. ***Louisiana has recognized the best practice of keeping members in care management or PDHC programs, and we are now assisting other MCOs in the state with similar programs.***

Reducing Readmission Risk with Discharge Planning and Integration

We recognize that the key to reducing readmission and continued inpatient services is coordinated discharge management and follow-up. So that members can recover in the least-restrictive setting, at home, in their own communities, we connect them to the care, support, and resources they need and make sure that they clearly understand their discharge plan, risks, and medication directions to prevent a return to the hospital.

Our dedicated Readmission Reduction CM presents cases at rounds within three days of member admission to the hospital, working with our UM reviewer, other CMs, hospital staff, and discharge planners to assess needs and set up providers for post-transition care. CMs are stationed in high-volume inpatient facilities to facilitate short-term transitional care for members moving from inpatient to outpatient care or at risk for an ED visit after a hospitalization. They identify and reinforce member strengths and preferences. They work with each hospital's discharge planner to establish a safe, comprehensive discharge plan, often on interdisciplinary teams that include people from community agencies, family members, and Navigators. Discharge planning considers home environment; dietary needs; mobility and activity restrictions; medication reconciliation CMs educate members about signs and symptoms that would indicate a turn for the worse and anticipate and address barriers to follow-up care. CMs work with members to review the situation or condition that led to the hospitalization and to provide condition-specific education and monitoring. CMs follow up with calls at seven and 30 days after a hospitalization to confirm that members have the services and care they need for a successful transition out of the inpatient setting. Table 2.10.10.3-1 presents other elements of our readmission reduction efforts and their results.

Table 2.10.10.3-1. Programs Designed to Reduce Hospital Readmissions

Program	Description	Results
Enhanced Inpatient Member Interaction (EIMI)	After a deep dive into re-admissions data identifying key partners and member specifics [developed to reduce admissions and bed days]	• Since October 2018, prevented 27 admissions
High Outreach to Promote Engagement (HOPE) (supported by High-intensity Integrated Team, or HIIT)	Supplement to CM; home visits according to the needs of individual member; work in conjunction with UM reviewers and directly with facility providers and staff to coordinate discharge planning (for example, conducting medication reconciliation with a member to strengthen treatment adherence after discharge)	• 75 members engaged in program • 3.9% overall claims reduction PMPM after six months of engagement
ED Readmisison Task Force	Multidisciplinary committee leveraging data and analytics and a Critical Incidents dashboard with member metrics indicating who might present to the ED after suicide attempt, with suicide ideation, or with SUD during pregnancy	• Development and oversight of EIMI, AERU, HOPE, PIP, Navigators, and member outreach

Chronic Care Management for PH and BH Conditions

Our care management programs continue to grow in focus and efficiency, as do options for telehealth and integrated care solutions. Healthy Blue offers NCQA-accredited care management for any combination of the following conditions:

- Pregnancy, preconception health, and NICU
- Schizophrenia
- Depression
- Major depression in children and adolescents
- Asthma
- Coronary artery disease
- Diabetes
- Congestive heart failure
- HIV/AIDS

For members engaged in Chronic Care Management, inpatient utilization decreased by 25% among members with HIV/AIDS, by 15.5% for members with depression, by 10.8% for members with hypertension, and by 10.3% for members with diabetes. In 2017, there was a 380% increase in members engaged in care management for depression, a 175% increase in members engaged in care management for coronary artery disease, and a 144% increase in care management for congestive heart failure. Overall active engagement increased 41.3% between 2017 and 2016. Members enrolled in Chronic Care Management rated the program and their CMs 4.9 out of 5 in a recent survey. Strong, positive relationships with CMs circumvent escalation of conditions to clinical levels. Our care management program is greatly reducing utilization rates and having a positive effect on population health.

2017 Provider MedReview Outcomes for Eligible Members

- **25.6% overall improvement** in medication adherence
- **20.5% increase** in diabetics started on a statin
- **23.8% increase** in members started on statin post-MI
- **34.5% increase** in members discontinuing PPI after appropriate length of time
- **52.5% decrease** in risk of drug-to-drug interactions
- **26.2% decrease** in risk of adverse reaction
- **30.8% decrease** in children under six on ADHD stimulants
- **43.4% decrease** in safety risks for potential drug-age interactions
- **40.7% resumption** of anticoagulant therapy among members for whom it was appropriate
- **38.8% resumption** of Tamoxifen therapy among members for whom it was appropriate

LA_HealthyR2019_MedReview_66_COB_03

Comprehensive Medication Management

Comprehensive medication reviews by pharmacists prevent medication duplications, inappropriate or extenuated use, and incorrect dosing, any of which could lead to an unnecessary encounter. Our BH polypharmacy program focuses on outreach to physicians of members with multiple prescribers and multiple psychotropic medications in the same class, and our BH Child/Age Appropriateness program addresses inappropriate prescribing in children under six taking psychotropic medications. Providers in those instances are prompted to confirm that the polypharmacy is appropriate, change the therapy, or consult with a clinical pharmacist to review and discuss medications. Every month, we fax providers MedReview summaries of their members identified as having a gap in maintenance medication refills, inappropriate polypharmacy, or omission of care for diabetes, asthma, hypercholesterolemia, hypertension, or depression.

Our controlled substance utilization monitoring (CSUM) program[1] is a retrospective drug utilization review that notifies prescribers of members who have filled 10 or more prescriptions for controlled substances (excluding diagnoses of cancer, palliative/hospice care, sickle cell, burns, or multiple sclerosis) in a three-month period. By law, initial opioid prescriptions are limited to seven days. Our CSUM program reduces FWA by addressing drug-seeking behavior and doctor or pharmacy shopping.

Furthermore, if a member is obtaining prescriptions from numerous physicians or pharmacies without provider knowledge or is suspected of selling or fraudulently redistributing their medication, Healthy Blue will activate its 24-month lock-in program for that member. Members are notified of this development via certified mail and given 30 days to designate their preferred pharmacy. Providers and the pharmacy are notified of the member's choice on the 31st day after notification of lock-in. Claims for lock-in members will only be reimbursed when filled at their designated pharmacy (excluding emergency prescriptions).

CMs educate members on appropriate pharmacy utilization, risks of their pattern of medication use, and the importance of regular medication renewal. This program supports care coordination and Chronic Care Management in a way that simultaneously maximizes member safety and controls Medicaid spending.

In 2018, our pharmacy lock-in program resulted in a **40% decrease** in the number of controlled substance prescriptions quarter over quarter for members in the program.

LA_HealthyR2019_Pharmacy_49_DP_01

[1] The CSUM program was temporarily suspended to allow for implementation of additional exclusions specific to Louisiana, but it will resume in June or July 2019.

Initiatives to Address Use of Low-value Care

Healthy Blue designs every process to drive high-value, low-cost care. We realize that changing health care culture and patient expectations is a slow process, but we make every effort to educate and review clinical practice guidelines with providers (and members, by request), to adopt the best practices promoted by experts, and to continually analyze data to produce optimal outcomes.

Healthy Blue mitigates overuse and overtreatment with constant attention to data: provider panel reports, disease-band groupings, PA requests, Symmetry Episode Treatment Groups®, and UM data gathering and sharing as described in Sections 2.10.10.2.2, Monitoring and Addressing Frequent ED Use, and 2.10.10.2.5, How We Identify and Mitigate Overutilization. See also Section 2.10.5.1.2, Identifying Enrollees for Care Management, for a comprehensive review of our data analytic applications and capabilities, and Section 2.10.11, Quality, to see how we detect and address FWA. We are actively exploring with our UMC an initiative to reduce high-level definitive drug testing to encourage providers to order the least-invasive drug screening to meet member need. Additionally, Healthy Blue participates in a provider outreach program regarding use of extended BH therapy services (using CPT®code 90837). This program pulls provider-specific data for a 12-month period. Providers identified as outliers are notified and sent clinical practice guidelines and information about key indicators.

Healthy Blue also supports the goals of *Choosing Wisely*. Several of Anthem's physicians used nationwide commercial health plan population data to quantify service trends for some of the early *Choosing Wisely* recommendations through a retrospective analysis of claims data. They found that there were significant decreases in the use of imaging for headache (from 14.9% to 13.4%) and for cardiac imaging (from 10.8% to 9.7%). Healthy Blue applied lessons learned from that study in developing our precertification list and clinical practice guidelines.

Initiatives for Managing Limited Availability of Mental Health and SUD Services

While educating members on appropriate ED use, Healthy Blue engages in prevention and support for members struggling with mental illness and/or SUDs. We understand that BH crises frequently result in ED use, but they are not the kind of crises for which many EDs are equipped. Not all EDs have psychiatrists or child psychiatrists available for consult when a member presents in a high state of acuity or agitation, so we contract with network psychiatrists for ED psychiatric evaluations. Table 2.10.10.3-2 outlines resources our members might use to avert crises before they occur and prevent a trip to the ED for BH conditions.

Initiatives to Reduce Denial of Prior Authorizations

We pay careful attention to provider input about whether a PA requirement is burdensome or unnecessary and systematically track provider complaints by subject every month as part of our quality management (QM) program. When there are denials, it is often due to a lack of information, so we try to guide providers to give us all the necessary information for an approval. QM staff report trends to Healthy Blue leadership. To the extent there are negative trends, we develop interventions or policy changes to address them. For example, in 2019, we adapted our PA processes for MHR to allow providers to complete their treatment plans during the first 90 days of services without PA. Our Addictionologist designed a training for providers at SUD facilities in Louisiana with patterns of high utilization by cross-referencing ASAM levels of care (3.3, 3.5, 3.7) with UM criteria and standardizing expectations at each level of care. Our UM department and facilities in Baton Rouge and New Orleans took the training, which also assisted in reducing underutilization for SUD detection.

Healthy Blue's provider website offers the latest provider communication, toolkits designed to make the provider's job easier, our PA lookup tool, formularies, and reimbursement policies. The website delivers timely and relevant information, announcements, alerts, forms, and a listing of Provider Relations Representatives by region for providers, their staffs, and other stakeholders. While we work hard to keep providers up-to-date and incorporate their input into our PA procedures, occasionally we do still have to intervene to correct PA patterns.

When we must intervene at the provider level, we often recommend review or continuing education with the provider in question. We re-examine provider performance within six months of any intervention. However, we may also revise provider contracts, redistribute provider panels, engage the provider in a quality incentive program, adjudicate pre- or post-payment claims, or, in the most concerning instances, conduct a FWA investigation.

Streamlined Processes for Pharmacy Enhance Ease of Use

We have made additional improvements to our pharmacy service authorization process. We implemented electronic prior authorization (ePA) to reduce administrative burden and expedite approvals for prescribers. It builds upon e-prescribing processes with which many providers are already familiar and automatically generates approval and denial notices to members and providers in accordance with State and federal requirements.

AutoPA at pharmacy points of sale uses intelligent and automated logic that checks the claims system against the member's prescription profile and medical claim data to determine if the prescription meets established PA criteria. If the prescription has autoPA rules attached and meets criteria, it will process without the need for a traditional PA. AutoPA reduces provider burden and eliminates delays for the member. In 2018, use of integrated claims data and autoPA resulted in a 14.4% reduction in PA volume for our providers.

This page is intentionally left blank

2.10.11 QUALITY

2.10.11.1 Organizational Commitment to Quality Improvement

Quality management and quality improvement (QM/QI) are an essential part of how Healthy Blue meets the needs of our enrollees (members), providers, and community partners and achieves LDH's goals and objectives. Quality is embedded in our organizational mission, embraced within our workplace culture, and is at the heart of everything we do. ***Every employee at Healthy Blue is a quality champion, practicing continuous quality improvement (CQI), supporting innovation, and being an essential stakeholder in our path to quality excellence.***

Our steadfast commitment to quality is demonstrated throughout Healthy Blue. We employ a rigorous approach to QM/QI, with every QM employee participating in our annual HEDIS® Boot Camp and QM Enrichment Training, providing all QM employees with the understanding needed to execute on core quality tasks. We also offer Quality trainings to all Healthy Blue staff. Our Quality Assessment and Performance Improvement (QAPI) Program reflects a CQI philosophy. [redacted]

Results & Successes

Healthy Blue, our parent organization, and affiliated health plans bring solid NCQA accreditation experience:

- Commendable Health Plan Accreditation (for Medicaid product)
- Disease Management Accreditation
- Health Information Product Certification
- Managed BH Organization Accreditation
- Multicultural Health Care Distinction

We are the only LDH MCO that offers this depth of accreditation.

LA_HealthyR2019_2.10.11_NCQA_48_RESU_04

Healthy Blue's QM/QI approach and QAPI Program align with LDH's priorities, goals, and objectives. Our program complies with the current LDH Contract, State and federal laws and regulations, Louisiana Department of Insurance requirements, and industry standards, including measures defined by NCQA, The Joint Commission, Agency for Healthcare Research and Quality, and others as specified in Attachment G. We have reviewed the Model Contract and are fully prepared to implement the necessary changes to meet, if not exceed, requirements.

Our data-driven QM/QI strategies are based on more than seven years of experience measuring, evaluating, and refining our Medicaid program. We also leverage the 85 years of experience BCBSLA has and the more than 28 years of Medicaid managed care experience our ultimate parent organization, Anthem, Inc. (Anthem), brings.

We continuously evaluate quality data, our membership and membership characteristics, utilization patterns, and year-over-year performance measures to develop innovative strategies to enhance our NCQA-accredited framework to improve health outcomes for our members, support network providers, and drive health plan performance. [redacted]

INNOVATION

All of our efforts have been designed around critical quality measures in alignment with LDH priorities that impact our membership. [redacted] From 2017 to 2018, we made significant improvements in several measures, including those in Tables 2.10.11.1-1 and 2.10.11.1-2.

Table 2.10.11.1-1. Healthy Blue Has Achieved Significant Improvements in HEDIS and CAHPS Measures

Measure	2017	2018	Percent Improvement
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC): BMI Percentile (Total)*	38.43	59.85	↑ 55.74%
Comprehensive Diabetes Care: Eye Exams*	47.45	55.96	↑ 17.93%
Antidepressant Medication Management: Effective Continuation Phase Treatment*	28.93	34.11	↑ 17.91%
Adult BMI Assessment*	71.46	81.75	↑ 14.40%
WCC: Counseling for Physical Activity (Total)*	33.56	37.71	↑ 12.37%
Antidepressant Medication Management: Effective Acute Phase Treatment*	43.51	48.79	↑ 12.14%
Rating of Specialist Seen Most Often- Child with Chronic Conditions	88.03	96.00	↑ 9.05%
WCC: Counseling for Nutrition (Total)*	43.52	47.20	↑ 8.46%

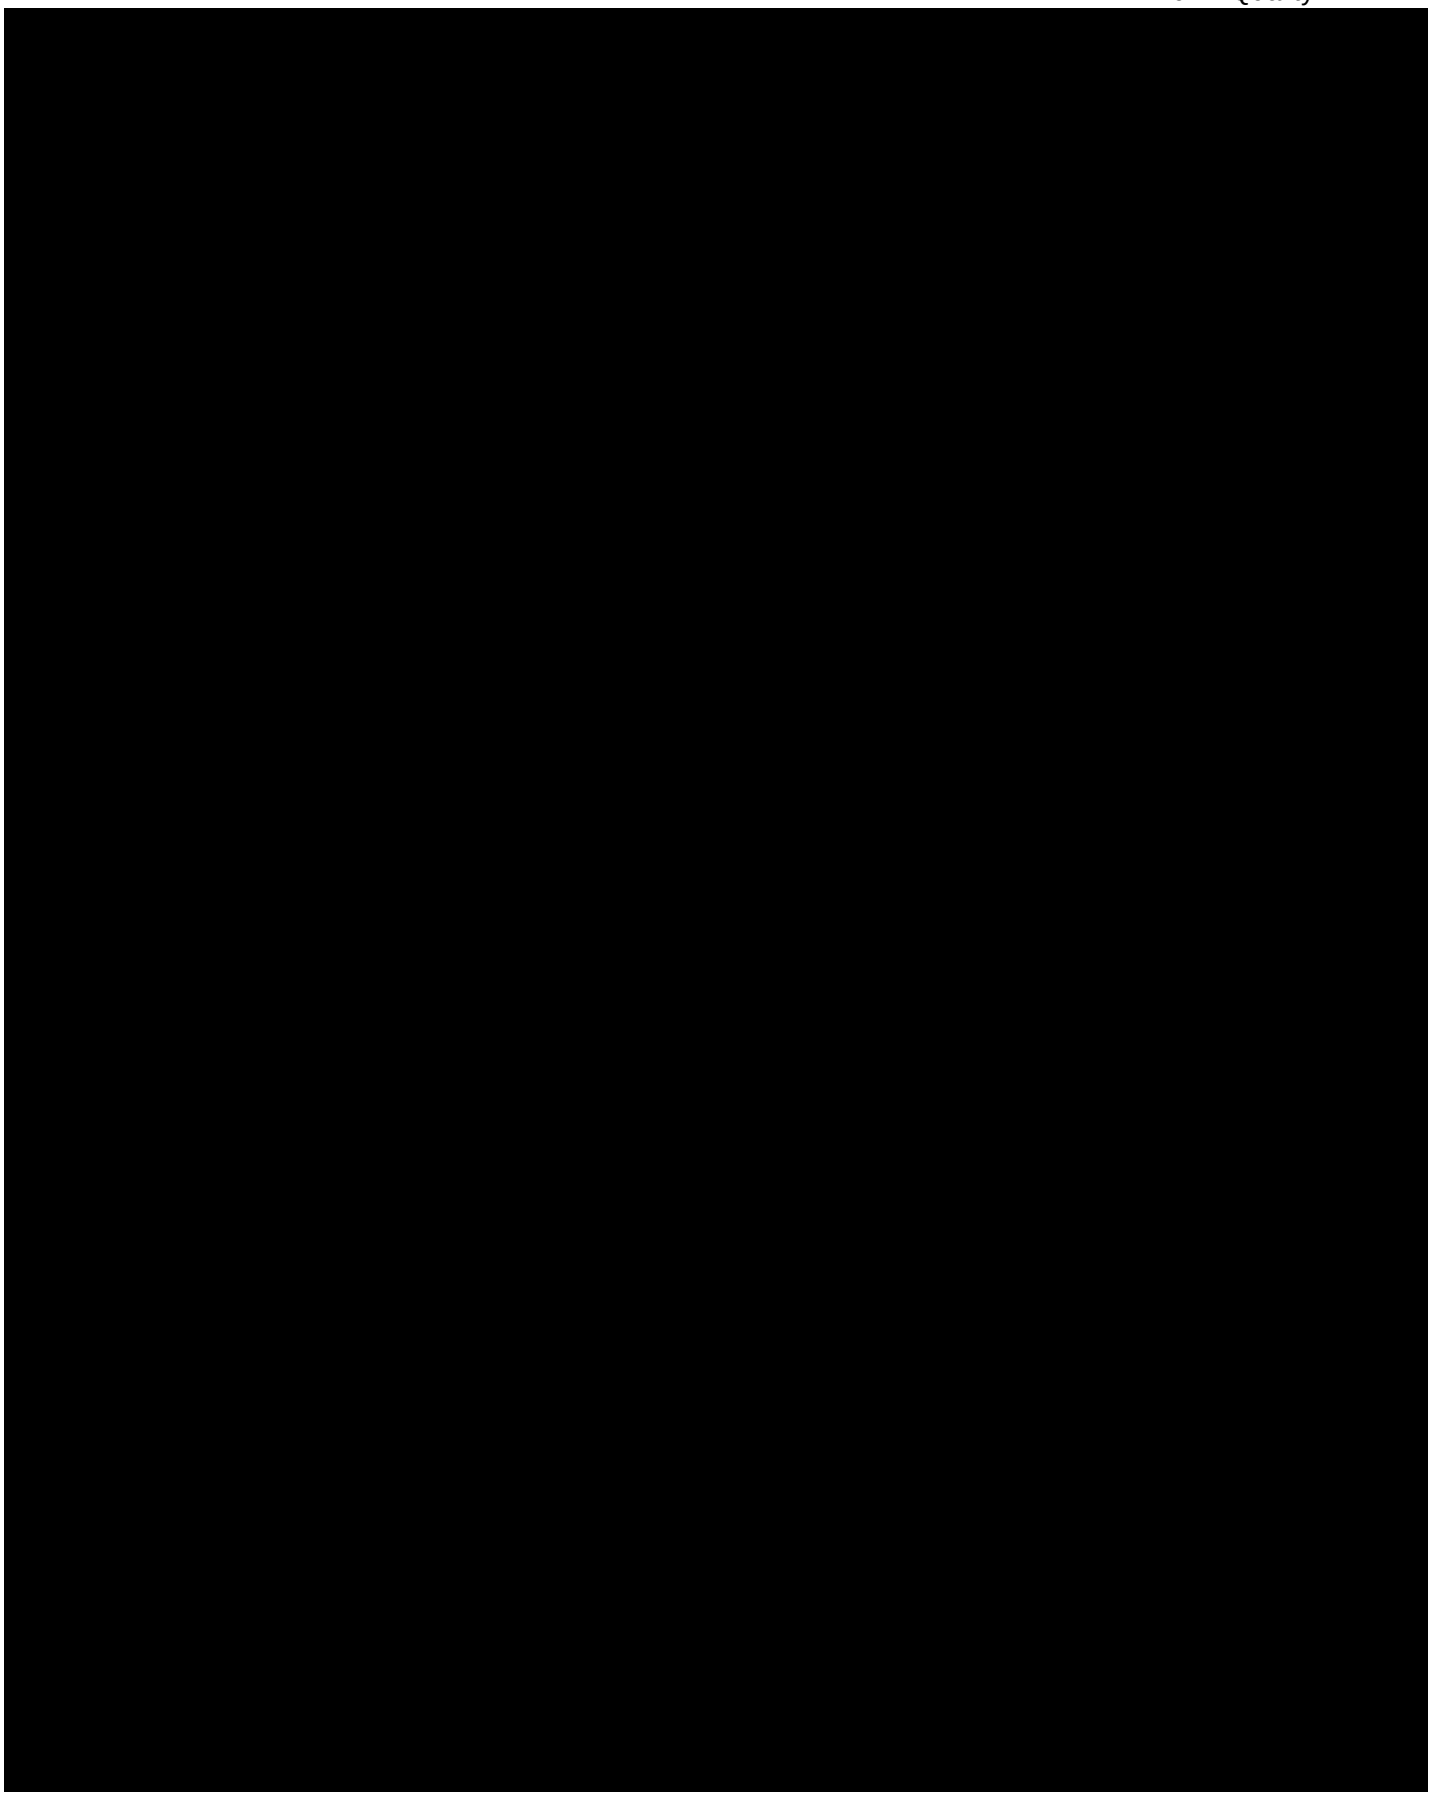
Measure	2017	2018	Percent Improvement
Adolescent Well-Care Visits*	47.24	51.09	↑ 8.15%
Well-Child Visits in the 3rd, 4th, 5th, and 6th Years of Life*	63.49	68.13	↑ 7.31%
Asthma Medication Ratio (Total)	58.72	61.66	↑ 5.01%
Rating of Health Plan- Child	84.9	87.7	↑ 2.79%
Rating of Health Plan- Adult	75.43	77.59	↑ 2.16%
Use of Multiple Concurrent Antipsychotics in Children and Adolescents (12-17 years): **Inverse Measure**	3.05	2.16	↓ 29.18%
Comprehensive Diabetes Care: Poor HbA1c Control: **Inverse Measure***	61.34	53.53	↓ 12.73%

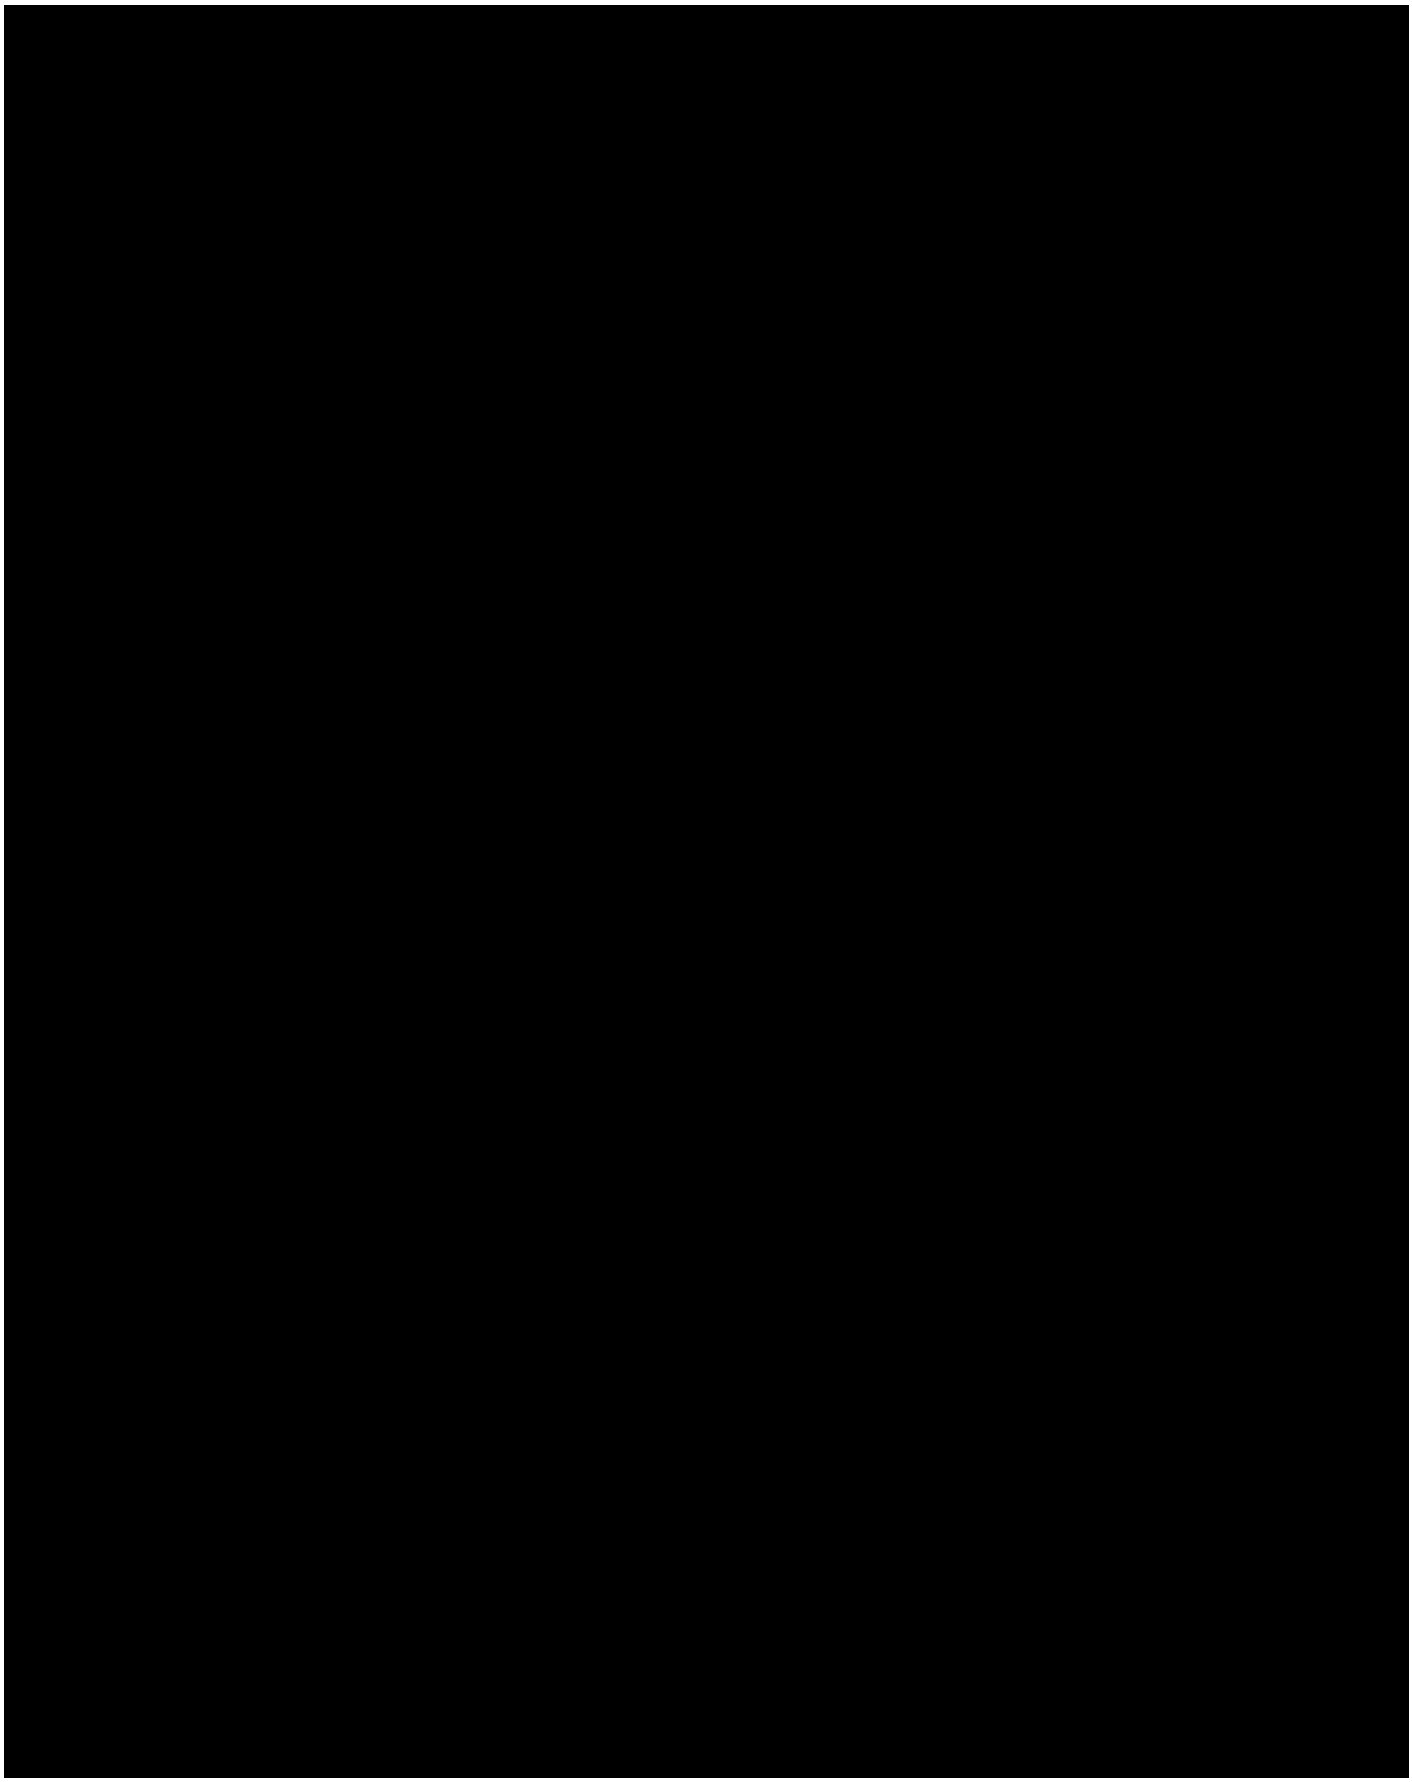
Table 2.10.11.1-2. Additional Sample of High-scoring Quality Measures

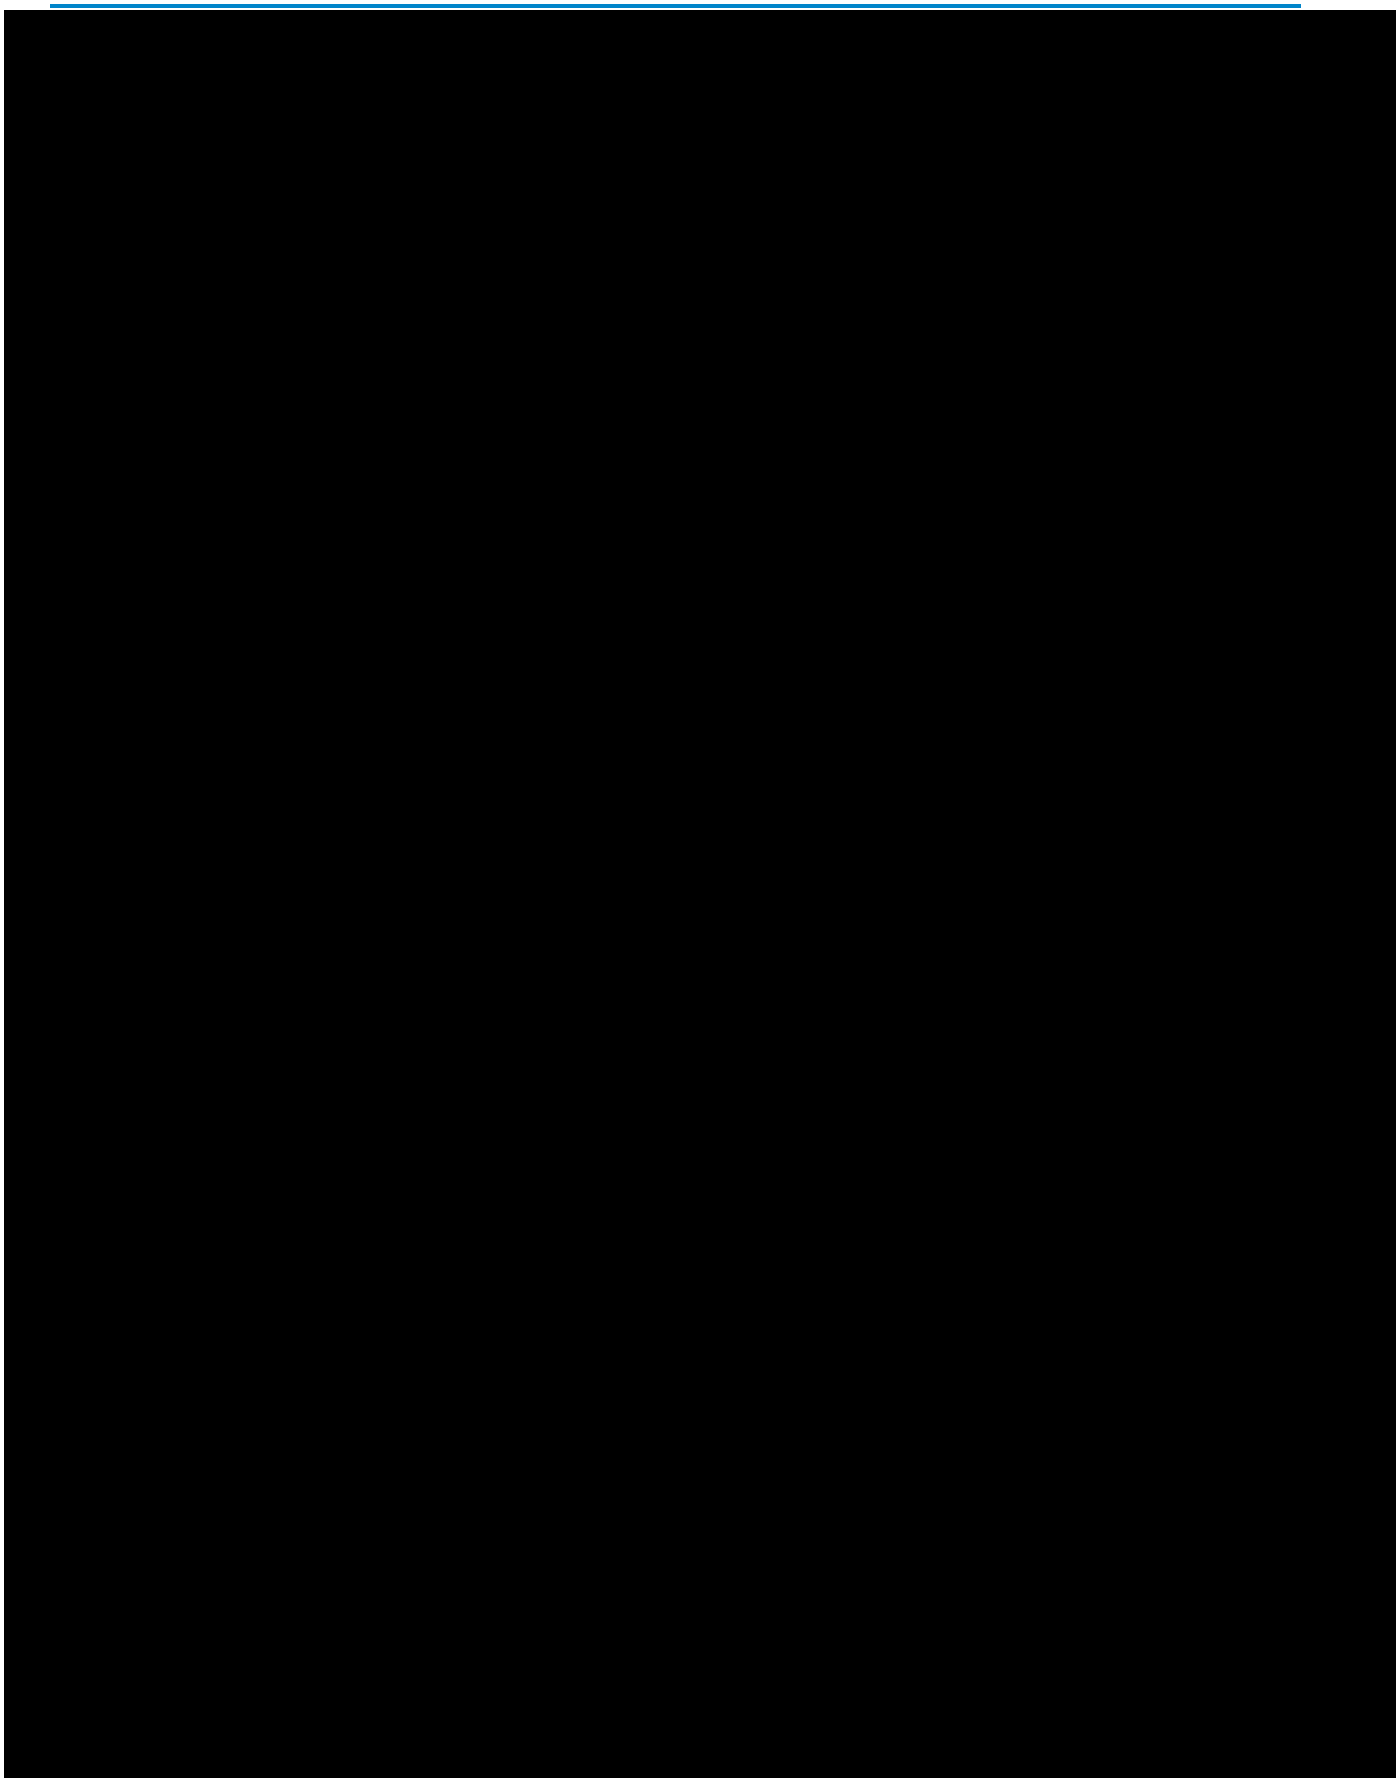
Measure	2018	NCQA Percentile
Initiation & Engagement of Alcohol & Other Drug Dependence Treatment: Initiation (Total)*	54.52	90th
Immunizations for Adolescents: Combination 1*	175.66	75th
Immunizations for Adolescents: Combination 2*	85.16	75th
Initiation & Engagement of Alcohol & Other Drug Dependence Treatment: Engagement (Total)*	18.07	75th
Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (Total)*	68.05	75th

** Model Contract Quality Performance Measure*

[redacted]





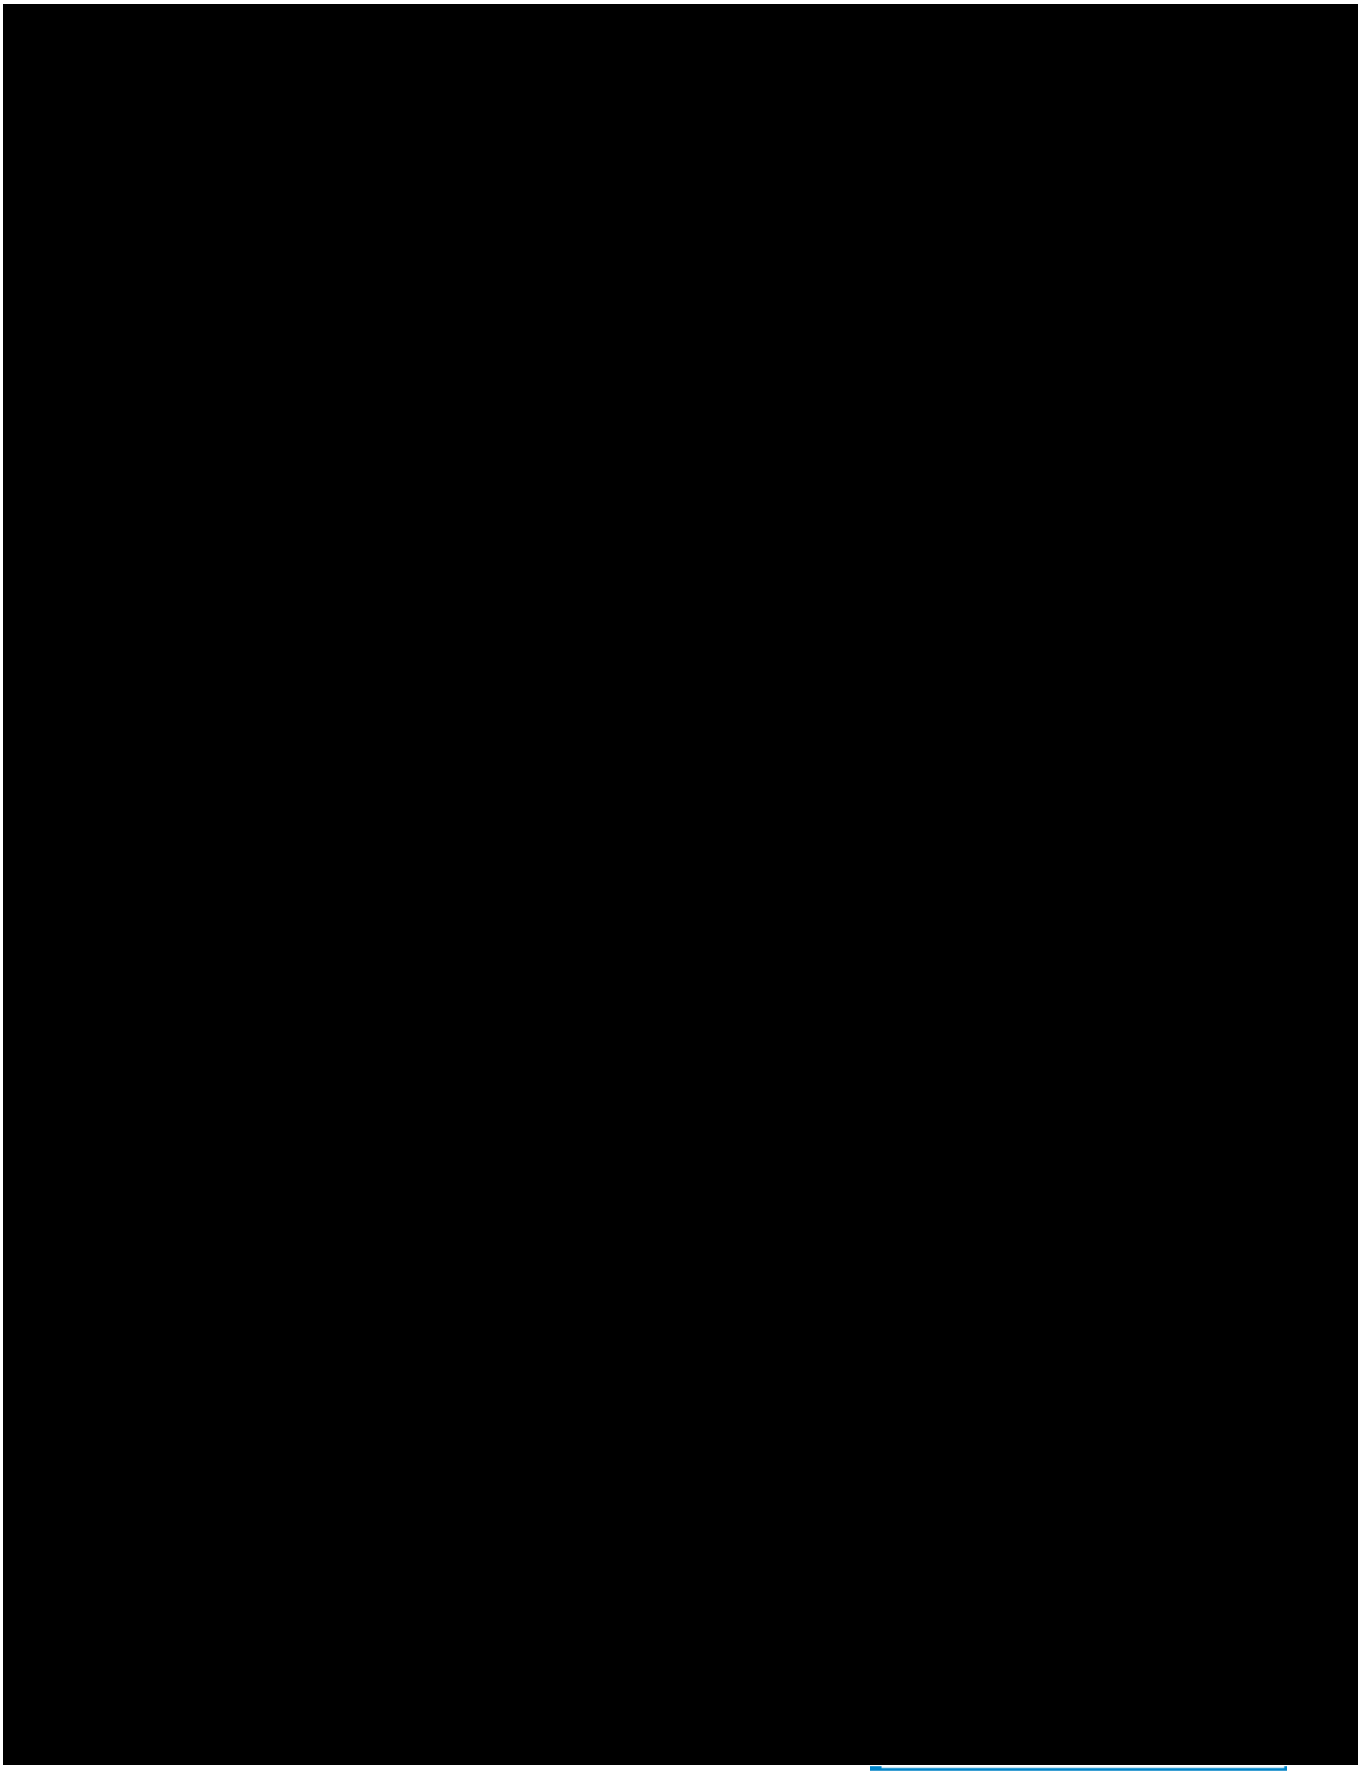


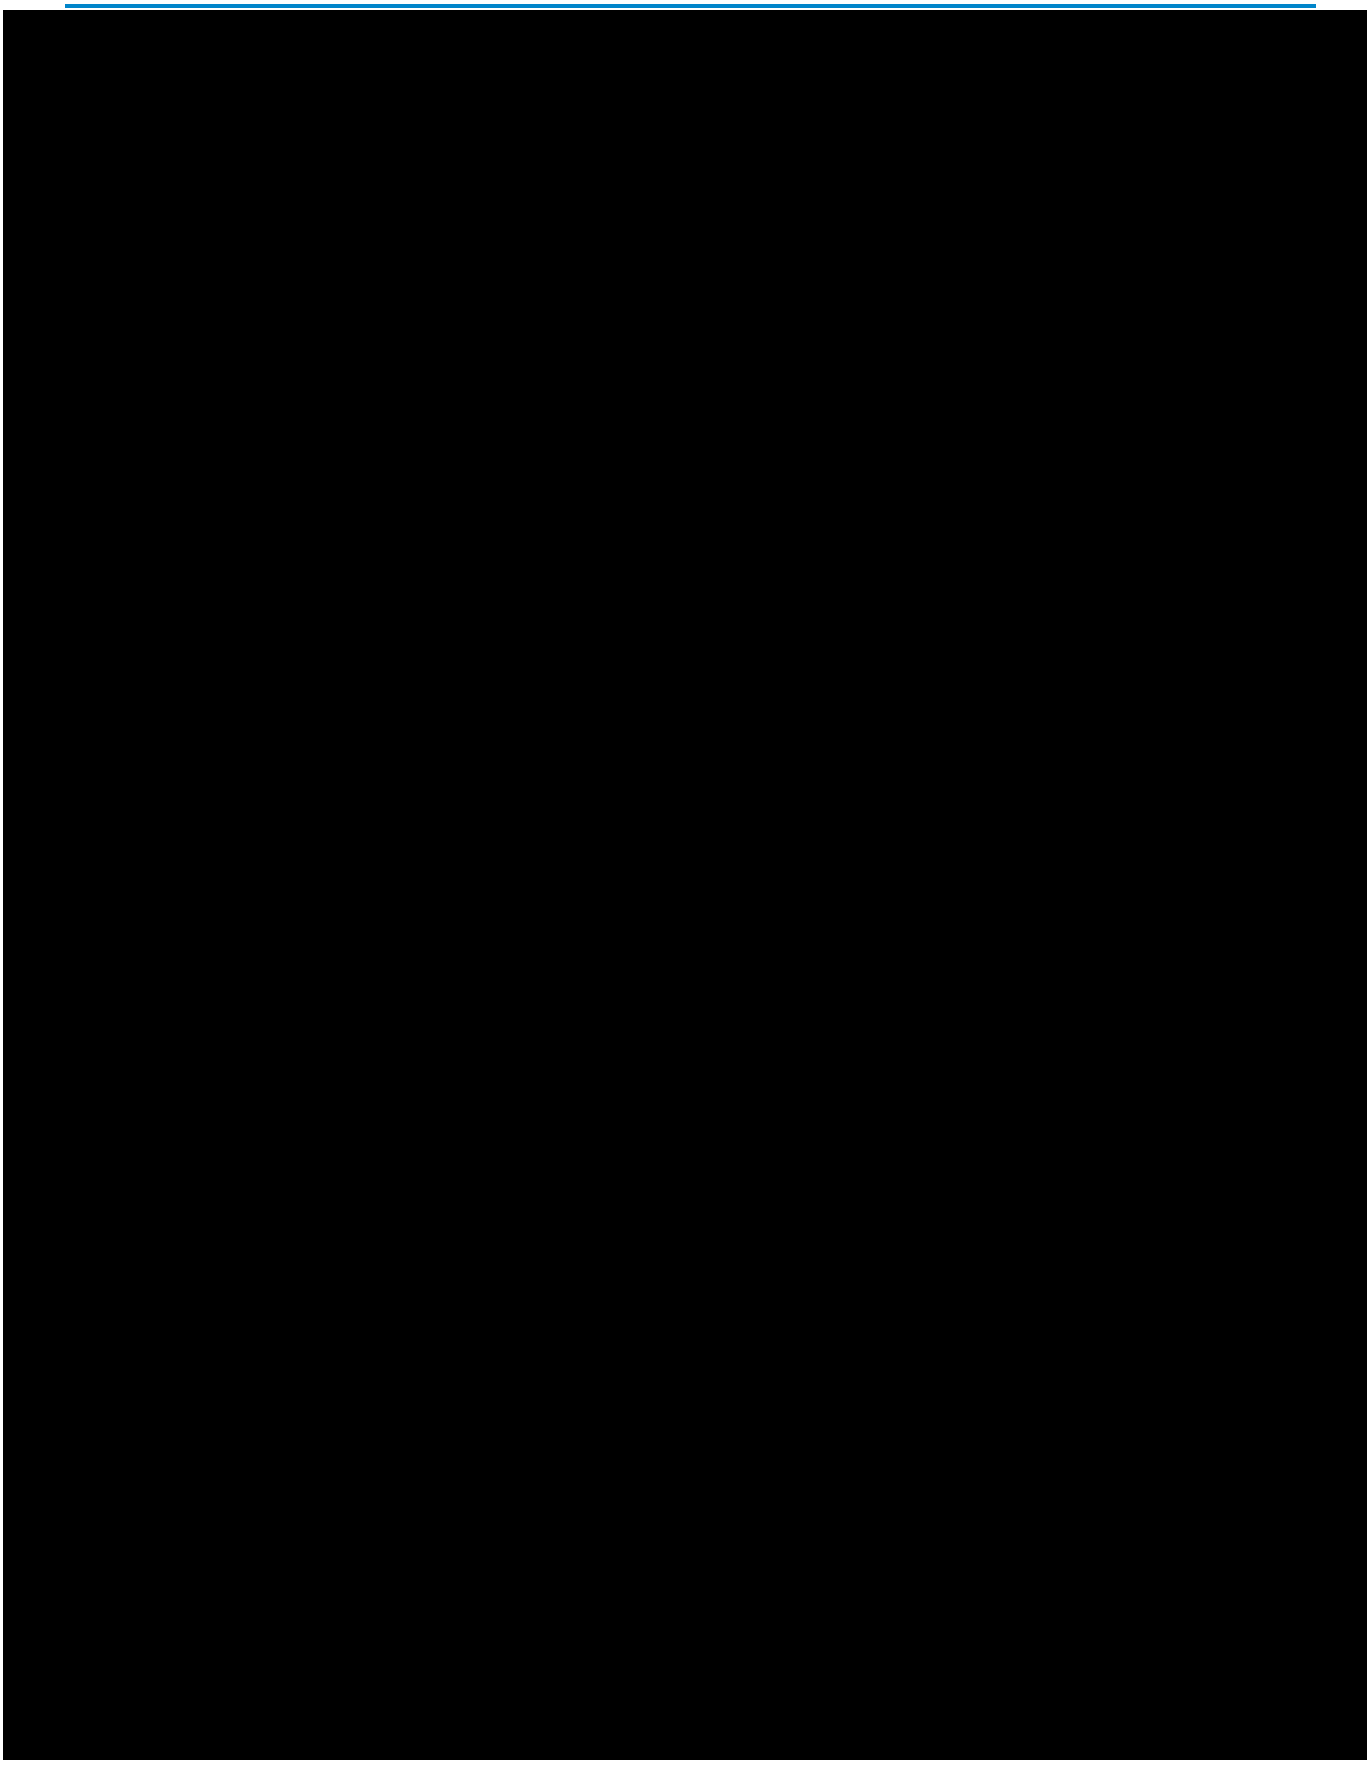
[redacted]

[redacted]

[redacted] Healthy Blue recently performed an analysis of utilization data related to Hospital Outpatient Surgery claims to identify potential opportunities for redirection to a lower, more appropriate level of ambulatory care. We identified an 11.2% increase in cost associated with hospital outpatient surgery visits; therefore, we launched a network expansion of Ambulatory Surgery Centers (ASCs) in an effort to appropriately manage outpatient costs. We were able to reduce our overall cost by 2% for Outpatient Surgery and there has also been a nearly 1% decrease in visits per 1000 for Hospital Outpatient Surgery and an increase of 6.1% in visits per 1000 with ASCs. Additionally, Healthy Blue is implementing an informative prompt to inform physician offices calling for prior authorizations that, if medically appropriate, an ASC could also be utilized.

[redacted]





[redacted]

2.10.11.2.3 Targeting Super-utilizers and Reducing Potentially Preventable Events

We have and will continue to work with LDH, providers, and other MCOs to drive innovation through evidence-based interventions and strategies. This includes reducing program complexity, member and provider administrative burden, and unnecessary costs and improving care coordination, Chronic Care Management, and integrated care.

Increased ED utilization for low-acuity complaints is a growing burden on the health care system. According to a 2013 article in the *Journal of the Society for Academic Emergency Medicine*, "Non-ED Interventions to Reduce ED Utilization: A Systematic Review," the interventions with the greatest number of studies showing reductions in ED use include patient financial incentives and managed care, while the greatest magnitude of reductions were in response to patient education. [redacted]

In addition, Healthy Blue has assessed available data on utilization rates and identified ED utilization as an area for continued improvement. Although utilization rates decreased from 2017 to 2018 (see Table 2.10.11.2-3), we believe there are opportunities for additional improvement. We aim to achieve at least the NCQA 50th percentile for this measure. We are also implementing a process to obtain real-time hospital data feeds, such as admissions, ED visits, and discharges throughout the State. This data assists us in targeting members almost immediately to help in care management and performance measure outcomes.

[redacted]

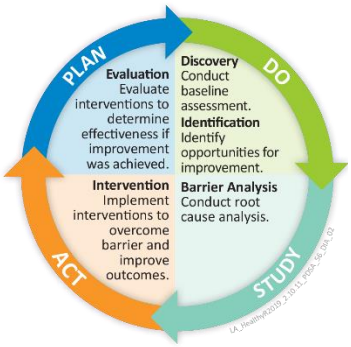
2.10.11.3 Healthy Blue's QAPI Program and Data-driven Clinical Initiative

Our QAPI Program meets current Contract requirements and 42 CFR § 438.330(a)(1). Our QAPI Program clearly defines specific goals and activities to drive results over a 12-month period, representing our road map for the upcoming year's priorities and performance targets.

We use the Plan Do Study Act (PDSA) process to drive performance improvement activities, including designing, implementing, maintaining, monitoring, and adjusting clinical and non-clinical initiatives. We train all employees that report into quality-related committees and the entire Quality team on PDSA and use this process to design, implement, and evaluate Performance Improvement Projects (PIPs).

We use a multifactorial evaluation approach to assess impact over time across multiple interventions and strategies. ***To identify and assess barriers to improvement, we use well-tested tools like Ishikawa or Fishbone Diagrams.*** Using rapid-cycle improvement methodology through the continuous PDSA cycle (see Figure 2.10.11.3-1), we conduct small tests with pilot populations to measure results in real time, facilitating prompt understanding of what works and does not work so we can re-tool, discontinue, or replace interventions that do not yield positive results and expand those showing quantifiable improvement. Lean Six Sigma principles also support and enhance our processes, providing a variety of performance improvement tools to drive lasting change.

Figure 2.10.11.3-1. A Structured Process



[redacted] To achieve our QM/QI goals, our Quality team works closely with our HEDIS data managers and meets weekly to review gaps in care reports to drive outreach and other interventions.

2.10.11.3.1-2.10.11.3.3 Functions to Improve the Health Status of Members

Healthy Blue leverages our sophisticated information technology and data infrastructure to drive consistent, timely, evidence-based decision-making and high-quality member outcomes. We follow best practices in Medicaid data management, utilizing a proven approach verified by national audit firms. [redacted]

Healthy Blue leverages our national Medicaid division's enterprise data warehouse to support operational processes, analytics, and reporting. This real-time data warehouse receives data directly from the system of record to promote quality, control, and consistency. It creates the flexibility needed to support rapid development and deployment of any new data exchange through secure data transfer. Table 2.10.11.3-1 summarizes the tools we deploy to trend performance over time and drive improvements.

Table 2.10.11.3-1. Healthy Blue's Data Tools Support Performance Improvement

NCQA-Certified HEDIS Data Mart and Reporting	• Information exchange across departments and committees to support a holistic QM/QI approach • Identify gaps in care to support member outreach and education during any touchpoint • Provide monthly trends by measure and track disparities across groups • Support provider profiling including quality payment incentive activities
Interactive Analytic Insights	• Visualize patterns in quality results by region, county, and ZIP code • Identify specific communities to target intensive interventions such as Clinic Days, SBHCs, and our other programs to address disparities
Predictive Modeling Tools	• Assess risk for ED visits, admissions and readmissions, high-risk pregnancies, BH issues, and pharmacy indicators with our Chronic Illness Intensity Index (CI^3) predictive modeling and other tools • Identify members with high utilization or at emerging risk, and coordinate services and supports
Health Intech Platform	• Consolidates member data and information from multiple sources into a single record • Delivers a holistic dashboard of utilization, care plan, and gaps in care to appropriate staff

Our staff are trained on the tools available to extract, aggregate, and format data for reporting, and have a thorough and detailed understanding of the data that assists us in meeting reporting needs. This integration continues to improve accuracy, timeliness, and usefulness — and supports data mining that benefits our members and providers as we enhance our ability to understand trends, utilize actionable information, and maximize outcomes.

[redacted]

[redacted]

Identifying and Analyzing Problems in Quality of Care

Our QM team investigates all potential quality of care issues, including provider preventable conditions. We have the capabilities to identify quality of care concerns when conducting utilization review; reviewing or trending provider complaints, member grievances, and appeals; and monitoring physician practice activities.

We may also learn of them from external sources, such as members, providers, CMS, or the State. [redacted]

Identifying Areas for Improvement

We also analyze data to identify areas for improvement, including management of chronic and acute care diseases and conditions. Our heat map capabilities, a tool our QM team uses to drive strategic interventions, include the ability to depict member gaps in care at the local level by zooming into a single parish. Heat maps are also viewable by individual quality measures.

[redacted] We will continue to design and implement new interventions and refine existing ones to address chronic conditions. [redacted]

Results & Successes

Data from our Provider MedReview Note found that in 2017:

- **26%** of eligible members improved medication adherence
- **53%** of eligible members had a decrease in safety risks for potential drug-drug interactions
- **21%** of eligible diabetic members added a statin, closing a gap in care

LA_HealthyR2019_2.10.11_MedReview_49_RESU_01

Reducing Disparities

Our QAPI Program includes an annual Culturally and Linguistically Appropriate Services (CLAS) and Health Disparities Program Description and Evaluation. Our CLAS and Health Disparities program objectives are to: (1) respond to current and projected demographic changes in our membership; (2) identify and address disparities in the health status of persons of diverse racial, ethnic, and cultural backgrounds; (3) improve the quality of services and care outcomes; and (4) meet legislative, regulatory, and accreditation mandates.

We collect, track, and trend member data to identify health care disparities, barriers to treatment, areas of dissatisfaction, and gaps in provider coverage related to cultural or linguistic representation. We educate providers on culturally competent communication and interactions. We collect demographic data on location, age, ethnicity, race, gender identity, sexual orientation, religion, primary language, disability status, and income level, as well as member self-reported demographics, SDOH, and HNA data. We compare this data against prior year performance and against regional and national benchmarks, making sure all potential disparities are identified and addressed.

Addressing disparities and promoting more equitable health outcomes are goals we share with LDH. In April 2019, our ultimate parent organization, Anthem, was awarded the ***Innovation in Advancing Health Equity Award*** from the National Business Group on Health for its efforts to advance health equity by addressing the demographic and socio-economic influences that impact environments where people live, learn, work, and play. We stratify key quality measures to address health disparities through responsive programs that are customized to meet the individual needs and cultural nuances of particular communities. For example, our stratification of Healthy Blue's

HEDIS data revealed unequal outcomes in Antidepressant Medication Adherence (AMM) among African Americans. Disparities continue to exist in health care delivery despite industry-wide efforts to reduce disparate access to and utilization of health care services. Providers are key allies in reducing disparities related to race, ethnicity, disability, BH, sexual orientation, socioeconomic status, and other factors. We offer providers cultural competency training on-demand through our provider website, as part of our orientation program, in monthly newsletters, and through our provider handbook. Our wide-ranging training includes topics such as addressing racial and ethnic disparities in asthma care, creating a LGBTQ-friendly practice, reducing health care stereotypes, and breast cancer screening for African-American women, many of which include free Continuing Medical Education (CME) credit.

[redacted] improvements.

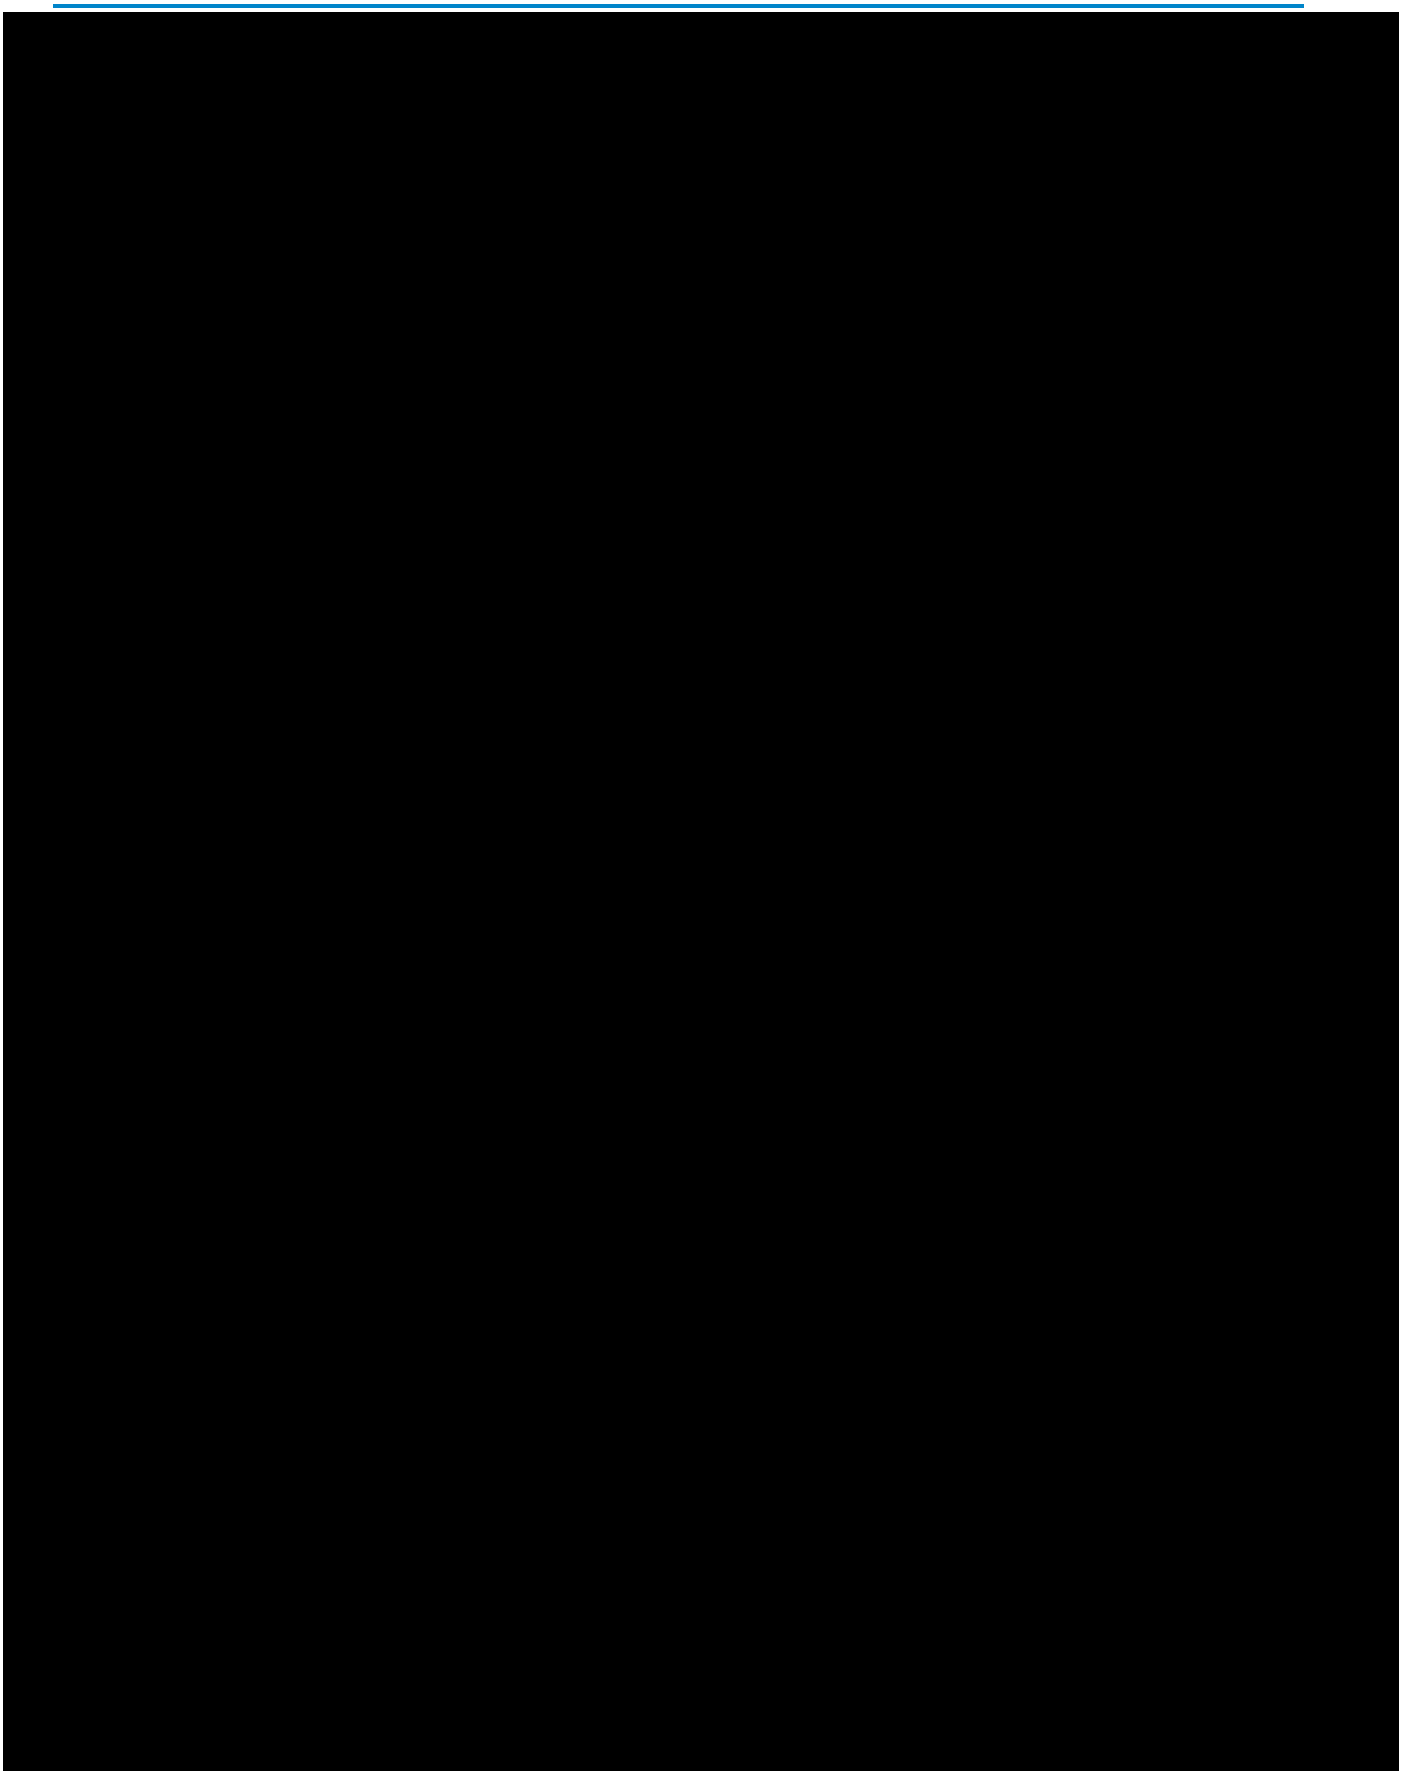
2.10.11.4 Proposed Approach to QM/QI

Healthy Blue's QM/QI organizational and program approach complies with all applicable provisions of 42 CFR Part 438, including, but not limited to, Subparts D and E.

2.10.11.4.1 QM/QI Organizational Plan, Goals, Committees, and Schedule of Activities

We maintain a QAPI Program structure that supports a culture of CQI; reinforces clear accountability and inclusive participation by a wide range of constituents, including providers and members; and blends local and national resources that align with LDH's goals and objectives.

[redacted]



[redacted]

We use our Provider Advisory Committee to advance state goals and objectives. During our February 27, 2019 committee meeting, we discussed Healthy Blue's new Food Insecurity VBP program and our ADHD Toolkit and training to advance evidence-based practices.
LA_HealthyR2019_2.10.11_Committee_56_COB_01

[redacted]

Schedule of QM Activities

Developed and implemented by our QAPI Committee with input from multidisciplinary business owners, our annual QM Work Plan reflects our strategic direction set forth by Healthy Blue's Board and strategy to implement our QAPI Program. As a living document, we continuously review and update our QM Work Plan throughout the year to ensure our program aligns with Healthy Blue, LDH, and State goals with maximum efficiency. Our Work Plan documents our objectives, staffing and staff training, role of providers, scope of activities, processes, systems, and strategies to evaluate the impact and effectiveness of our QAPI Program. We will submit our written QM Work Plan to LDH as part of readiness reviews and annually thereafter, as well as prior to implementation of revisions.

2.10.11.4.2 Staffing and Organizational Chart

We have the organizational infrastructure necessary to provide effective monitoring, reporting, and analysis, and to act on opportunities to improve clinical care and services. [redacted]

[redacted]

2.10.11.4.3 Participating in LDH's HEDIS/Other Measurement and Data-driven Initiatives

Healthy Blue will leverage our successful experience collecting, measuring, and reporting accurate and timely HEDIS data to meet LDH's expectations and Contract requirements. [redacted]

2.10.11.4.4 Example of Recent Successful Quality Improvement Activity

[redacted] highest among our 21 affiliated Medicaid health plans. Employing a data-driven, methodological approach (see Figure 2.10.11.4-3), our Medical Director, QM leadership, BH leadership, care management leadership, BH Liaison, and our Housing Expert began developing a new initiative that we ultimately named *Enhanced Inpatient Member Interaction (EIMI)*. We conducted a comprehensive review of evidence-based programs to shape EIMI. This included Boston University Medical Center's Re-Engineered Discharge (RED) program, an initiative supported by the Agency for Healthcare Research and Quality.

[redacted]

Our team-based model brings together clinical experts to support a person-centered, integrated approach. Each member in our EIMI program is engaged by an EIMI Hospital Coordinator and supported by an EIMI team that includes a UM clinician, Case Managers, and Hospital Coordinator. Our EIMI program includes four phases:
Inpatient Care. Our EIMI team meets daily, reviews daily census logs, and discusses individual member cases. The team focuses on members admitted due to complications of chronic disease processes, which would most likely not require an inpatient stay if managed appropriately using outpatient resources. Upon identification of a member for the EIMI program, our Hospital Coordinator meets face-to-face with the member and performs a Hospital Barrier Assessment. This specially designed tool helps us gather pertinent information (for example, current living situation and feeling safe at home) that could influence a member's ability to successfully transition home and avoid readmission and prompts our development of interventions to address them. The EIMI team addresses SDOH, such as housing and transportation, which might compromise a member's transition.

Approaching Discharge. As a member approaches discharge, our Hospital Coordinator schedules appropriate follow-up appointments for the member. The Hospital Coordinator explains the role of the Care Manager (CM) and the benefits they offer. The Coordinator will introduce the member to their CM via telephone, or a face-to-face meeting, and provides their contact information to them. We assign CMs based on whether the member's primary concern is a PH or BH condition: what the member's primary language is and where the member lives.

Care Management. Members enter our care management program upon discharge. Using a comprehensive HNA, the CM learns about the member's needs and note. CMs note any cognitive or physical limitations, evaluates risk behaviors, and assesses psychosocial and environmental needs to develop a person-centered care plan at the required level of service. The care plan is organized around evidence-based CPGs, which the CM supports by confirming the member is keeping appointments, completing appropriate screenings or lab work, and engaging in self-care measures, such as nutrition and blood glucose testing as outlined in the plan. One business day before any scheduled

[redacted]

2.10.11.4.5 Quality Improvement Plans and Projects

Identifying Projects

Our QM team tracks and trends our HEDIS and State-specified measures through monthly reports, which we share with other Healthy Blue departments and QM committees. Our HEDIS Task Force, PIP Workgroups, and QM staff use this data to identify opportunities for performance improvement, assess the impact of interventions, and monitor our performance relative to LDH performance measures. We select topics for QI plans and projects that reflect our members' needs, LDH's goals and priorities, and offer a meaningful opportunity for measurable improvement.

Potential Topics

[redacted]

2.10.11.5 Clinical Practice Guidelines (CPGs)

[redacted] This includes ADHD, diabetes, high-risk obstetrical, hypertension in adults, hypertension in children and adolescents, and substance use disorders. The guidelines keep providers informed about scientific advances, support consistent delivery of care, and positively impact health outcomes.

We adopt CPGs based on the health care needs of our members and identified opportunities for improvement. CPGs are not a substitute for the professional judgment of health professionals, and we do not use CPGs for medical necessity reviews. Attachment 2.10.11.5-1 includes a list of our CPGs and their source, and a sample guideline for HIV and Adolescents: Guidance for HIV Testing and Counseling and Care for Adolescents Living with HIV.

2.10.11.5.1 Process for Developing and Disseminating CPGs

[redacted]

Healthy Blue is already meeting with LDH MCOs to make sure our BH guidelines are consistent.
LA_HealthyR2019_2.10.11_LDH_56_COB_01

[redacted]

We distribute CPGs and notice of changes to providers through our provider handbook, newsletters, website, fax blast, and special mailings. We introduce providers to our CPGs during initial and ongoing training and our Provider Advisory Committee. We provide links to relevant resources on our provider website, and post new or revised CPGs within 30 days of adoption or revision. We distribute them to members and potential members upon request.

2.10.11.5.2 Incorporating Scientific Evidence and Provider Opinions

Our CPGs are reviewed, revised, and approved annually using nationally recognized, evidenced-based literature and expert opinion from the US Preventive Task Force, medical specialty societies (such as the American Diabetes Association, American Psychological Association, and American Congress of Obstetricians and Gynecologists), and other nationally recognized societies and organizations. These organizations produce evidence-based guidelines using medical literature, professional standards, and/or expert opinions.

We encourage providers to offer recommendations for new guidelines for inclusion in our CPG registry and to provide comments on existing ones. For instance, we may place an article in our provider newsletter or notice on our provider website about the new CPG, encouraging providers to contact Healthy Blue with questions, comments, or concerns. We also offer in-network providers and experts an opportunity to share feedback and opinions on CPGs as part of our Provider Advisory Committee, and we solicit feedback when Healthy Blue is onsite during provider medical record reviews. We will continue to encourage out-of-network providers and experts to share their opinions.

2.10.11.5.3 Evaluating Provider Adherence and Implementing Interventions

[redacted]

[redacted]

2.10.11.5.4 Updating and Revising CPGs

Board-certified and credentialed network providers and our Medical Director/CMO and BH Medical Director review, revise, and approve CPGs at least every two years using evidence-based literature from medical specialty societies, the U.S. Preventive Services Task Force, and similar entities.

2.10.11.6 Healthy Blue's NCQA Health Insurance Plan Ratings

Attachment 2.10.11.6-1 includes Healthy Blue's NCQA Health Insurance Plan Ratings (2018-2019) for Healthy Blue, our parent organization Anthem, and our affiliate managed care contracts with full NCQA accreditation.

Third Party Liability	Figure 2.10.13.2-15
Data Interactions	Figure 2.10.13.2-16

Member Eligibility and Enrollment Management. We currently process daily and monthly HIPAA-compliant 834 enrollment data files from LDH that identify member additions, deletions, and modifications, as shown in Figure 2.10.13.2-6. The enrollment file load process establishes begin and end dates for members under specific program eligibility categories. A member's eligibility information may change periodically, and that information is captured promptly and accurately while maintaining historical data. This enables us to provide appropriate services and the correct processing of current and delayed claims. Our MIS assigns each Healthy Blue member a unique identifier that is used on all member-specific materials and for all member-related processing. The member ID is cross-referenced to other member-unique numbers, such as social security number. We perform regularly scheduled transmissions of member data to our pharmacy, vision, and transportation subcontractors. Our member enrollment processes maintain the integrity of member information used by the claims and finance subsystems, among others.

Claims Processing. As part of claims processing, our MIS maintains and tracks information on claims and encounters for covered services processed on behalf of our Healthy Louisiana providers. We assign a unique number to each incoming claim and capture and maintain its receipt date. A series of edits (including National Correct Coding Initiative (NCCI)) and business rules validate data on all incoming claims (paper and electronic formats) to verify that claim data is compliant, complete, accurate, appropriate, and for eligible members and providers. The system adjudicates claims with valid data and rejects, suspends, or denies (as appropriate) claims with invalid information. We maintain comprehensive claim and line detail information with processing information, including any applicable interest payments.

Encounters Reporting. Healthy Blue is committed to delivering accurate, complete, and timely encounter data to LDH. We combine claims we process with encounters received from our subcontractors into a complete submission to LDH. We outline the encounter data submission process in Figure 2.10.13.2-7.

Customer Service. We recognize the importance of being available to members and providers whenever they need us. As shown in Figure 2.10.13.2-8, we have implemented a communications platform that ensures calls can be routed to the appropriate site where the caller can receive the help they need. This system allows load balancing across sites where all agents access the same information using the same system to provide consistently great service.

Care Management. The Health Intech care management platform utilizes data of several components of our MIS to support our member and service management efforts. This fully integrated health care management platform leverages information from our care management system and Core Service System, as well as clinical and social determinants of health (SDOH) information collected from referrals, screenings, and assessments conducted by our Care Management team and interactions with our BCBSLA team as seen in Figure 2.10.13.2-9.

Care Coordination. We streamline the sharing of information relative to care management, and coordinate sharing between MCOs. For our members who are transitioning to another MCO, Healthy Blue's MIS is capable of extracting care management data such as service plans, assessments, and active authorizations and providing them to the receiving MCO. We also are able to consume member data from exiting MCOs and load it into our systems, shown in Figures 2.10.13.2-10a and 2.10.13.2-10b.

Utilization and Quality Management. Our utilization and quality management approach incorporates a full range of data sources within the MIS. These data sources are used in a bidirectional manner to identify clinical initiatives and programs directed at efficient and effective service delivery and to guide continuous improvement as seen in Figure 2.10.13.2-11.

Authorizations. We recognize the importance of timely authorizations to ensure appropriate member care. Healthy Blue's MIS supports the intake, clinical review, and outbound communication of authorizations (Figure 2.10.13.2-12).

Financial Processing. Figure 2.10.13.2-13 details the various MIS functions that support critical financial management processes such as capitation reconciliation, fraud, waste, and abuse reviews and audits, medical loss ratio (MLR), and our financial statement and Generally Accepted Accounting Principles (GAAP).

Reporting. Healthy Blue collects and maintains 100% of the data required by LDH in compliance with our Contract reporting requirements. Our reporting process supports the collection and reporting of relevant data through both regulatory and ad hoc reports. Our MIS is modular in design, providing a flexible, configurable, and scalable system that can be expanded to deliver required functionality and information to support our program operations, including clinical and financial data. Our reporting process is show in Figure 2.10.13.2-14.

Third Party Liability (TPL). A strong TPL program is critically important to lowering costs for Louisiana Medicaid. To achieve success, our TPL program employs experienced personnel; automated applications; and consistent, replicable processes. Figure 2.10.13.2-15 shows the processes for documenting OHI and coordinating benefits.

2.10.13.2.5 We Support Medicaid Management Information System (MMIS) Exchanges

As a best practice to support continuity and streamline solutions, the IT team has a number of employees actively engaged in work that supports our Healthy Louisiana business operations. Additionally, our ***Information Technology Director, Braulio Bencosme*** supports Healthy Blue and LDH as an integral part of all technology-based implementations and ongoing operations. ***The Information Technology Director for Louisiana is a seasoned professional with more than 10 years of information technology experience in Medicaid managed care systems.*** He leverages industry, corporate, and health plan knowledge to partner with LDH in developing new system interfaces or resolving operational or system issues. Additionally, our Information Technology Director and representatives from key functional departments, such as enrollment and encounters, will continue as active participants in the MCO Systems Workgroup held by LDH.

Healthy Blue further devotes skilled and experienced resources to support LDH-required data exchanges and meet our operations and management needs, including: 1) onsite Louisiana data analysts and subject matter experts; 2) technical employees embedded in functional departments at both Healthy Blue and our national support areas; and 3) a dedicated Regulatory Reporting team within our IT team that specifically supports our Healthy Louisiana reporting requirements and collaborates closely with other technical teams to ensure alignment.
This staffing structure enables us to leverage employee skills and experience; share best practices and report logic used in other markets; and shift resources, as necessary, to meet changing demands for reporting and analysis.

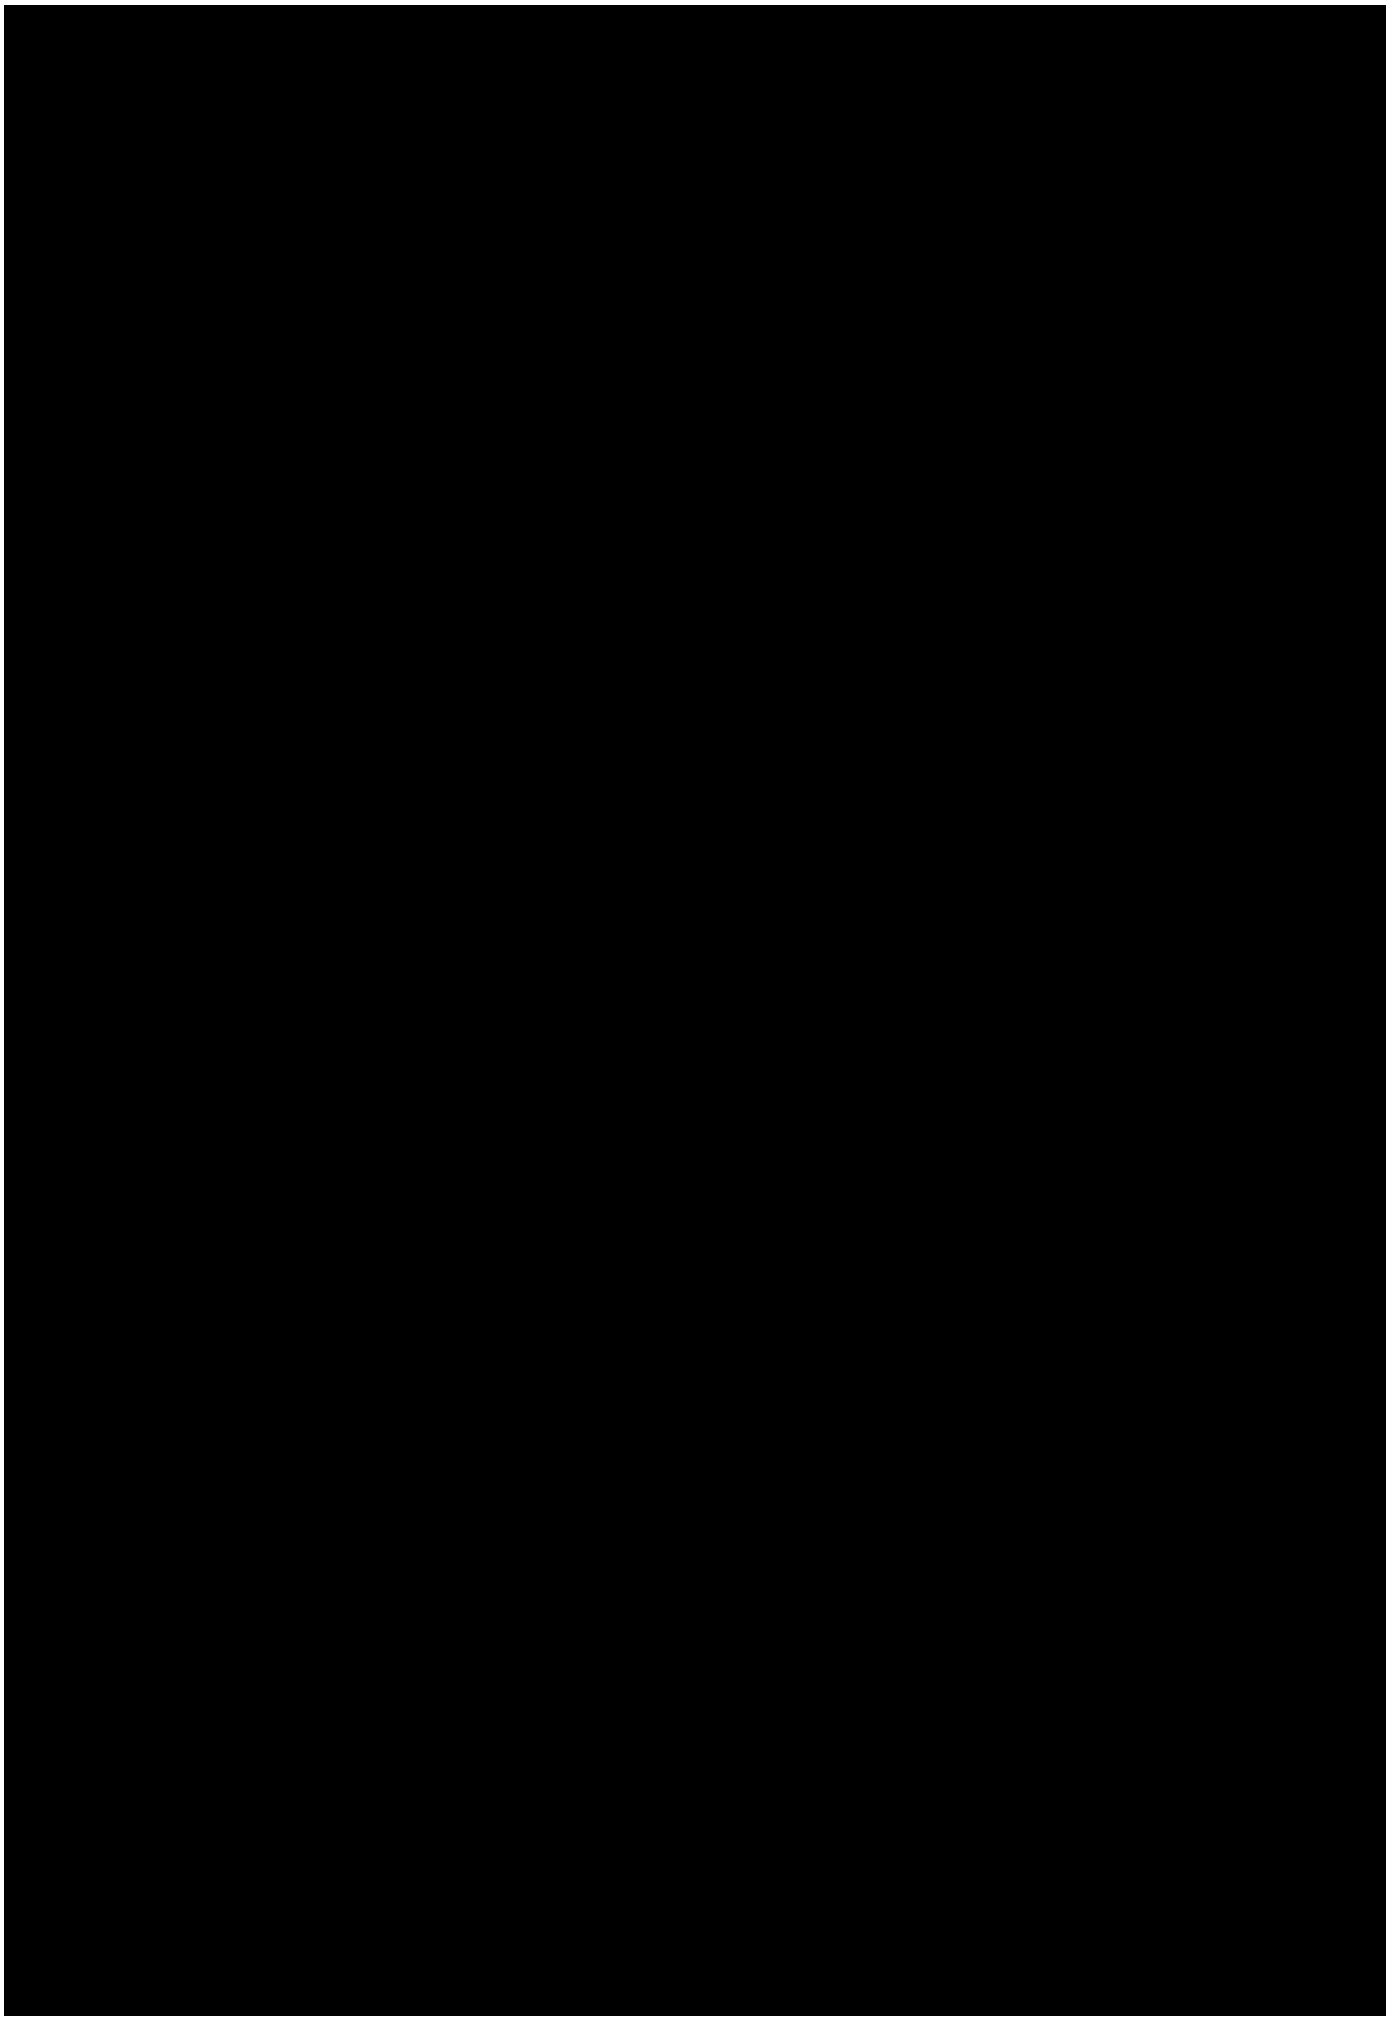
2.10.13.3 Robust Data that Supports Actionable Management Reports

Healthy Blue has collected and maintained 100% of the data required by LDH in compliance with the Model Contract and MCO Manual reporting requirements since the beginning of our work in Louisiana. We attest that our MIS captures and reports all of the data elements necessary to produce required management reports in the format, transmission method, and schedule specified. Our MIS supports generation of management and operational reports and delivers data to support all program analytics.

We apply rigorous edits and controls to preserve the integrity of all data, knowing that accurate operational systems provide a solid foundation for accurate reporting. Our integrated data warehouse consolidates data from internal and external sources to support the ongoing requirement for scheduled reports and specialized ad hoc reporting. Internal data include claims, member, provider, care management, and authorization information. Data from external sources include items such as historical claims data, laboratory results, and subcontractor encounters. The data warehouse is fed directly from source systems to drive data accuracy. Within our MIS, we electronically update data between components on a schedule designed to preserve consistency across systems and support business needs.

Integrating Subcontractor and LDH Information

Several subcontractors deliver critical services to our Healthy Blue members for pharmacy, dental, vision, and transportation, and we integrate data we receive from them into our MIS. By integrating subcontractor data with our own medical and BH service information, we can deliver a holistic view of utilization to providers and Care Managers and support reporting, data analytics, and other processes that promote a population health approach to maximize our members' health. Healthy Blue maintains scheduled data interfaces with each of our subcontractors. We send regularly scheduled member enrollment data to each subcontractor to support member access to services. Healthy Blue loads subcontractor encounter claim data into our data warehouse to support a variety of processes, including care coordination, population health, and fraud, waste, and abuse detection. We generate a series of operational reports against this subcontractor data to help us confirm their compliance with program requirements. In addition, we receive and review other information and reports from subcontractors to monitor performance against Healthy Blue and LDH standards in areas such as network adequacy, call center, and provider appeals. Health Blue reviews this information as part of our Subcontractor Oversight Program, and we include it in our regulatory report submissions to LDH. Through our Subcontractor Oversight Program, we will continue to confirm the ability of our material subcontractors to deliver data to Healthy Blue that enables us to meet LDH reporting requirements.



A Case Study: Applying a System Upgrade to the Core Service System

For system upgrades to our System, we receive notification from the software vendor two to three months prior to scheduled releases — typically twice annually. A project lead is assigned and a plan is built to track all of the key deliverables and checkpoints for the upgrade project, including impact, assessment, program modifications, testing, training, and appropriate internal and external notifications. Details of the release are shared with the technical team and designated system users, who are instructed to review and complete an Impact Assessment form for their areas. A kick-off meeting is also held to discuss the testing timeline and answer questions. The Systems Testing Group creates a test plan and establishes the required test data in Jira, which is used to automate testing and perform defect management.

Once the release is available, it is deployed first to a development environment for initial validation and then to a quality assurance (QA) environment where we run through the full set of test cases, which generally takes about five to six weeks. Any defects found during testing are logged and tracked, working with the software vendor as needed to resolve. Weekly testing meetings are held to make sure that everyone is on track with their assigned testing efforts.

Once testing is complete, we hold a Go/No-Go call with all areas to verify that there are no outstanding issues and we are confident that the release can be moved to production. To minimize impact, the release is scheduled to occur over a maintenance weekend with the designated technical teams actively engaged in all stages of the deployment process. During the process, we maintain an open communication channel with a project lead at the ready to pull the team together to address any issues or concerns. After all deployment tasks are complete, the team holds a final Go/No-Go meeting before releasing the System back into production. Any post-production issues are reported via our incident management process and triaged according to severity and impact. The project lead monitors all logged issues and escalates as needed. If a defect has a significant impact, we escalate to the vendor, who may provide an emergency hot-fix. The hot-fix is then scheduled, deployed, and tested as quickly as possible.

2.10.13.5 Ongoing Support for Data Interfaces

We currently have connectivity with LDH and its fiscal agents, MAXIMUS and DXC Technologies, and support all electronic standard health care transactions that are mandated by LDH, including, but not limited to, X12, NCPDP, XML, and JSON formats. Batch and real-time data exchanges are fully automated, with internal procedures and system-based controls in place to monitor the timing, format, and integrity of all data exchanges. We designed our internal data exchange systems and procedures so that we have the flexibility to work with LDH and other partners to establish mutually agreed-upon data exchange protocols.

Current Data Exchanges

Today, Healthy Blue supports the exchange of all required LDH interface files, conforming to HIPAA compliance standards as well as all State and federal standards for data management and information exchange. We use a system job scheduler to generate data extracts. The process includes regular monitoring of status notifications, extract files, and error logs to verify that each job executes correctly and that the results are consistent with expected record counts and transaction formats. Data extract changes required and outlined with the Louisiana MCO Systems Companion Guide are configured and implemented timely as defined by LDH. Table 2.10.13.5-1 provides a listing of the inbound and outbound data exchanges that are currently supported or will be supported for the Healthy Louisiana program. Figure 2.10.13.5-1 depicts our data interactions with LDH providers and subcontractors. Anthem's systems hardware and software architecture permit scalability of the technology platform and has the capacity to meet Healthy Blue's current and future data interface needs. Healthy Blue works with Anthem to assess system design and architectural framework on an ongoing basis, confirming software vendor upgrades, hardware capacity, security needs, and program operations requirements are met. We closely monitor core systems and have detailed policies and procedures as well as service level agreements on core system availability and connectivity.

Securely Sharing Information with Providers to Support Medical Management

Healthy Blue uses several secure mechanisms to share information with our providers to support care coordination and care management activities. These include our provider portal, secure FTP, secure email, and in 2019, the Louisiana Health Information Network (LHIN). To further enhance our provider performance data sharing strategy, Healthy Blue will participate in the LHIN Encounter Notification Service (ENS). LHIN ENS is the largest statewide all-payer health information exchange. Through our participation, Healthy Blue will be able to access real-time admission, discharge, and transfer (ADT) information for more effective member care coordination and to quickly identify opportunities such as how to reduce avoidable emergency department (ED) visits. This kind of access to member care issues and needs in near real time creates significant opportunities for proactive member engagement and education, and will help Healthy Blue further the State's goal of decreasing fragmentation and increasing integration across providers and care settings to drive towards more cost effective care.

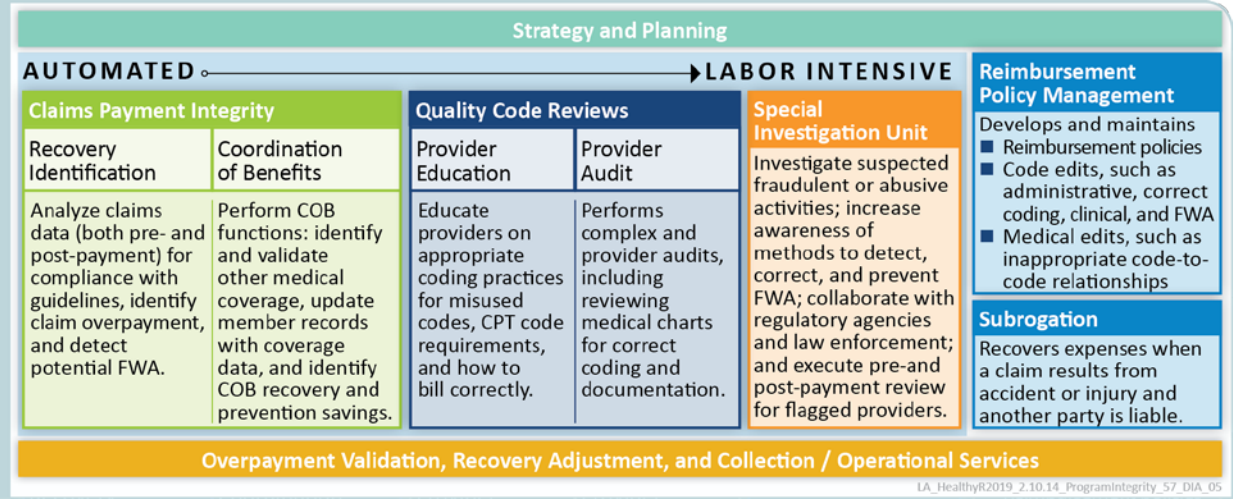
Table 2.10.14.1-1. Our FWA Plan Includes Comprehensive Processes to Prevent, Detect, and Correct FWA

Key Processes to Prevent, Detect, and Correct FWA	
Prevent	• Train employees, subcontractors, providers, and members about FWA • Confirm that credentialed providers have necessary licensure and monitor to make sure excluded providers are not credentialed or paid • Maintain clear provider billing policies and rules and adjudicate claims accurately (clinical and policy coding edits, Coordination of Benefits (COB) and Third Party Liability (TPL) identification and processing, and pre-payment review) • Maintain effective claims processor training and quality audit programs
Detect	• Promote a culture of vigilance among all employees and awareness of our compliance hotline and other FWA reporting mechanisms • Use advanced analytics and data algorithms and collaborate with LDH and the MFCU to identify membership errors, provider billing errors, and payment errors • Maintain a quality and compliance review program for providers • Provide explanation of benefits (EOBs) to a random sample of members to verify receipt of services billed
Correct	• Resolve over- and under-payments • Report suspected cases to LDH and MFCU promptly and in accordance with the Model Contract • Conduct preliminary investigations promptly and provide updates to LDH or the appropriate agency • Implement actions to change behavior, such as education, pre-payment review, and record audits • Flag providers and suspend payment when the State determines a credible allegation of fraud • Apply lock-in for pharmacy benefits • Terminate non-compliant providers, if necessary

Our Comprehensive FWA Organization

Healthy Blue's comprehensive FWA and program integrity efforts incorporate dedicated staff who are empowered by an integrated system of activities, processes, and controls that involve virtually every Healthy Blue department and our national support services team. Our Program Integrity organization (shown in Figure 2.10.14.1-1) includes multiple teams working together to make sure proper payments are being made to legitimate providers for reasonable services rendered to eligible members. The Program Integrity team uses advanced analytics and strong enterprise governance to prevent, detect, and correct FWA.

Figure 2.10.14.1-1. Healthy Blue's Efforts to Prevent FWA Include Multiple Program Integrity Teams



Our Louisiana SIU is a unique and critical part of Program Integrity. Our SIU (which is composed of a manager and six Louisiana-based investigators) includes one accredited health care fraud investigator, two certified fraud examiners, one certified professional coder, and one team member with a clinical certification. In addition, two of our investigators previously worked with MFCU and two have a law enforcement background. In addition to sharing data analytics and best practices with the national team, they leverage the skills of more than 35 pooled resources available to supplement the investigative process. The SIU receives and investigates all allegations of FWA, regardless of their referral source (employees, subcontractors, members, providers, or data mining). We notify LDH and MFCU promptly of all suspected instances of FWA.

Healthy Blue SIU team members collaborate and share information with their counterparts in affiliate health plans, expanding the network of highly skilled, seasoned professionals. This sharing of schemes and investigative techniques provides a valuable and constant supply of best practices and lessons learned from across the country.

The SIU also participates in a number of national initiatives, such as the Federal Healthcare Fraud Prevention Partnership and the National Health Care Anti-Fraud Association (NHCAA). As part of ongoing operations, the SIU interacts regularly with regulators and law enforcement, participating in or hosting task forces with various law enforcement and prosecuting agencies. Our investigators also will continue to attend the fall BCBSLA Law Enforcement/Blue Summit with local, State, and federal law enforcement, prosecutors, and private payors. Louisiana benefits from active and successful collaboration between government entities and health plans.

Healthy Blue's leadership team maintains a close and collaborative relationship with the SIU and the Program Integrity team through ad hoc and regularly scheduled meetings and oversight. Monthly meetings include a review of SIU processes and results, as well as a detailed review of cases and other information. Healthy Blue reviews and approves concepts for provider recovery and often suggests new overpayment concepts. Weekly reports detail recovery efforts, including project concepts and dollars. Monthly reports detail all open cases for members, providers, and payment holds, and we receive ongoing notification from the SIU regarding letters sent to providers.

We Execute Comprehensive Training and Awareness Programs

Protecting against FWA is ingrained in all we do, and we reinforce our organization's commitment through mandatory new hire and annual employee trainings, focused fraud prevention employee education initiatives, provider orientations, our provider handbook, our member handbook, and through well-publicized reporting channels, such as our website and SIU hotline. Employees, subcontractors, providers, and members represent the eyes and ears of Program Integrity and training and education programs create and reinforce awareness on how to identify and report FWA.

Our Healthy Blue Training Academy represents a comprehensive approach to training and incorporates multi-modality delivery processes (in-person, online courses, tailored webinars, and written materials), as well as mechanisms for training on tracking, monitoring, alerting, and reporting compliance and completion.

In addition, we are excited to announce that www.fighthealthcarefraud.com, a new website created and maintained by Anthem, will be linked to our Healthy Blue member and provider websites later this year under "Report Fraud, Waste, and Abuse." Shown in Figure 2.10.14.1-2, this website provides information about the impact of health care FWA on the entire industry. With examples, information on spotting scams, and a universal form for reporting, this website is an important step forward and a differentiator for Healthy Blue and our affiliates in the prevention of FWA.

Figure 2.10.14.1-2. A New Website Will Educate Members, Providers, and Others About the Impact of FWA

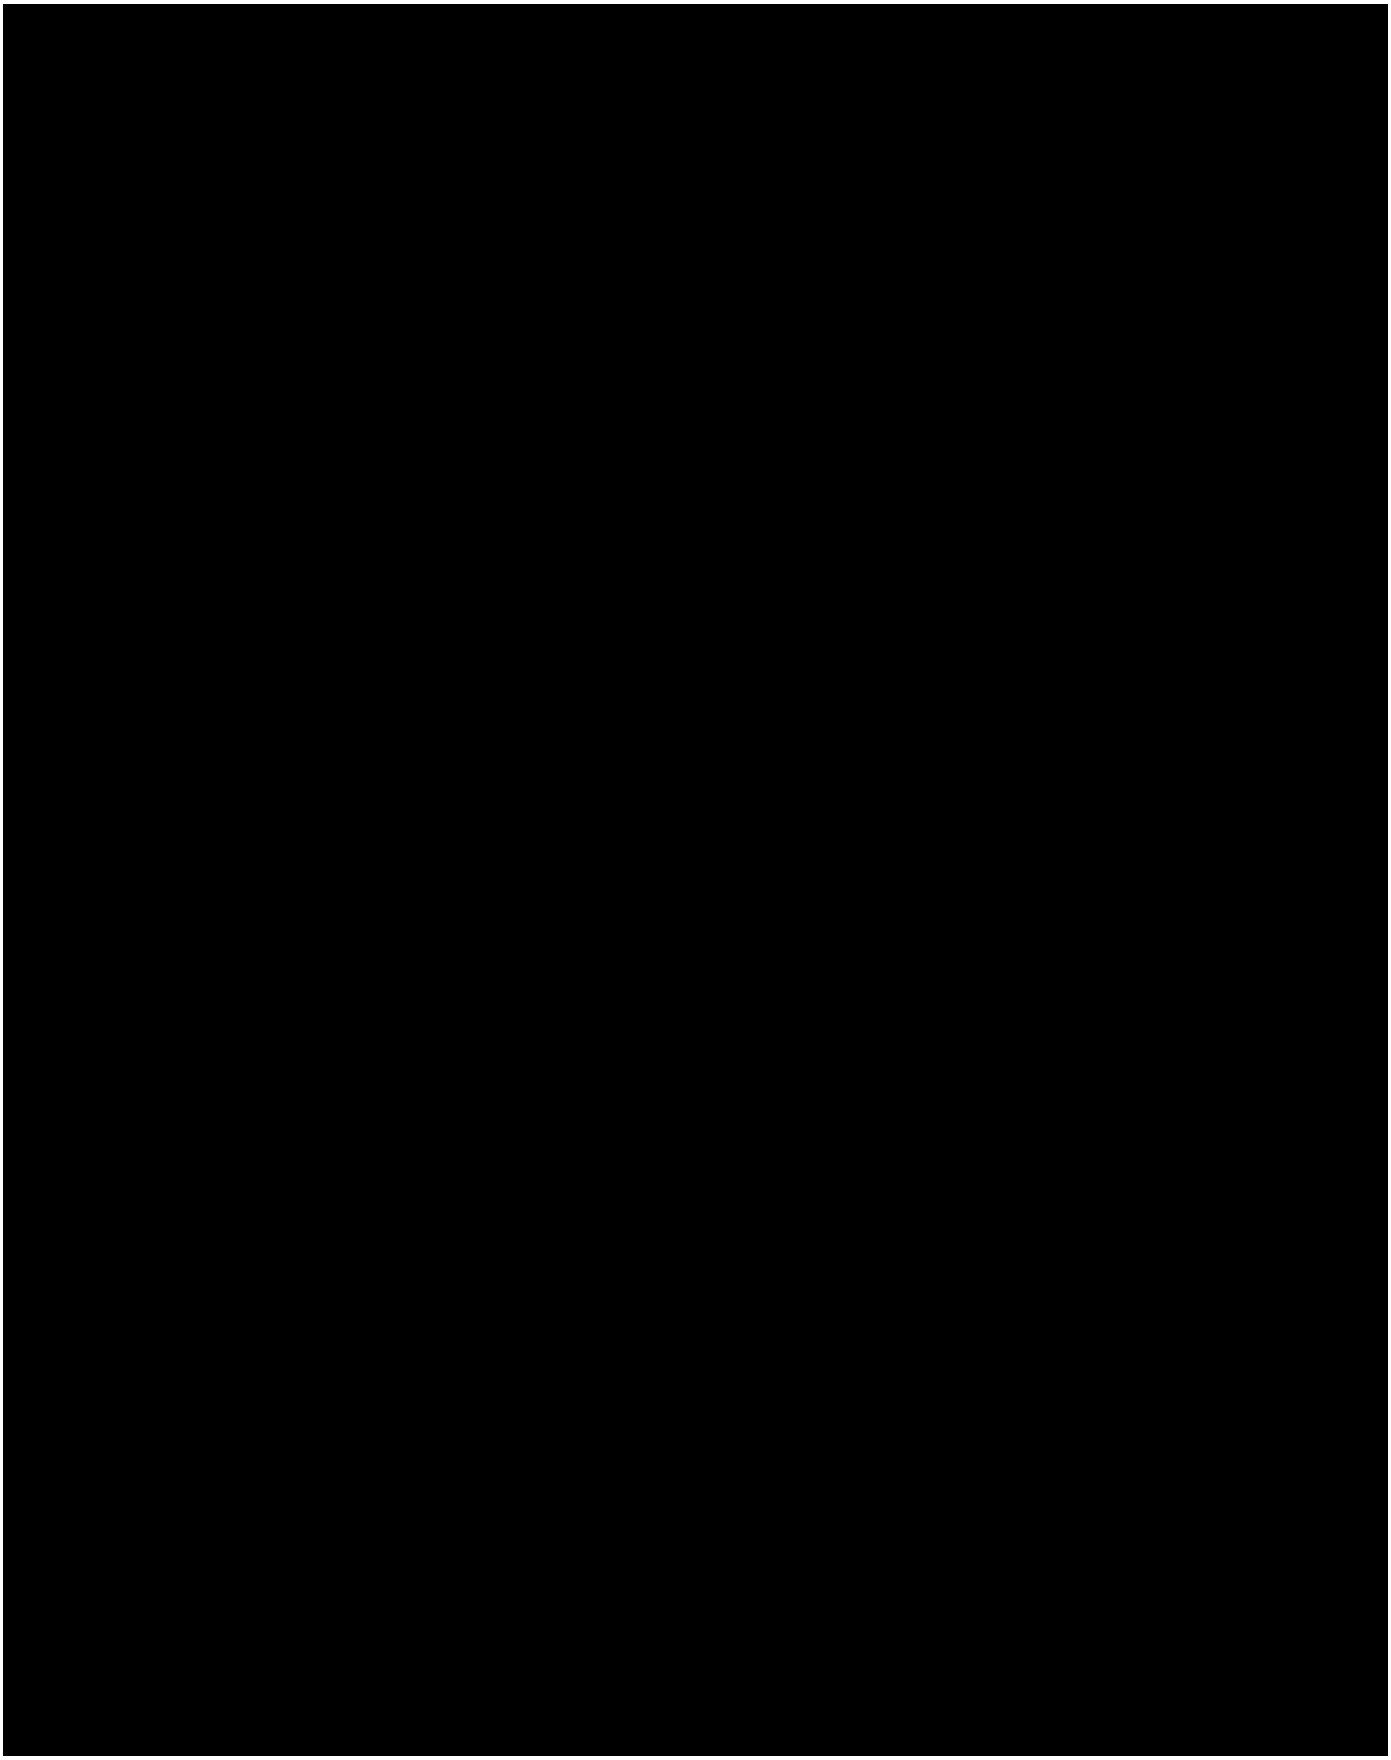
Healthy Blue Employees Receive New Hire and Annual FWA Training

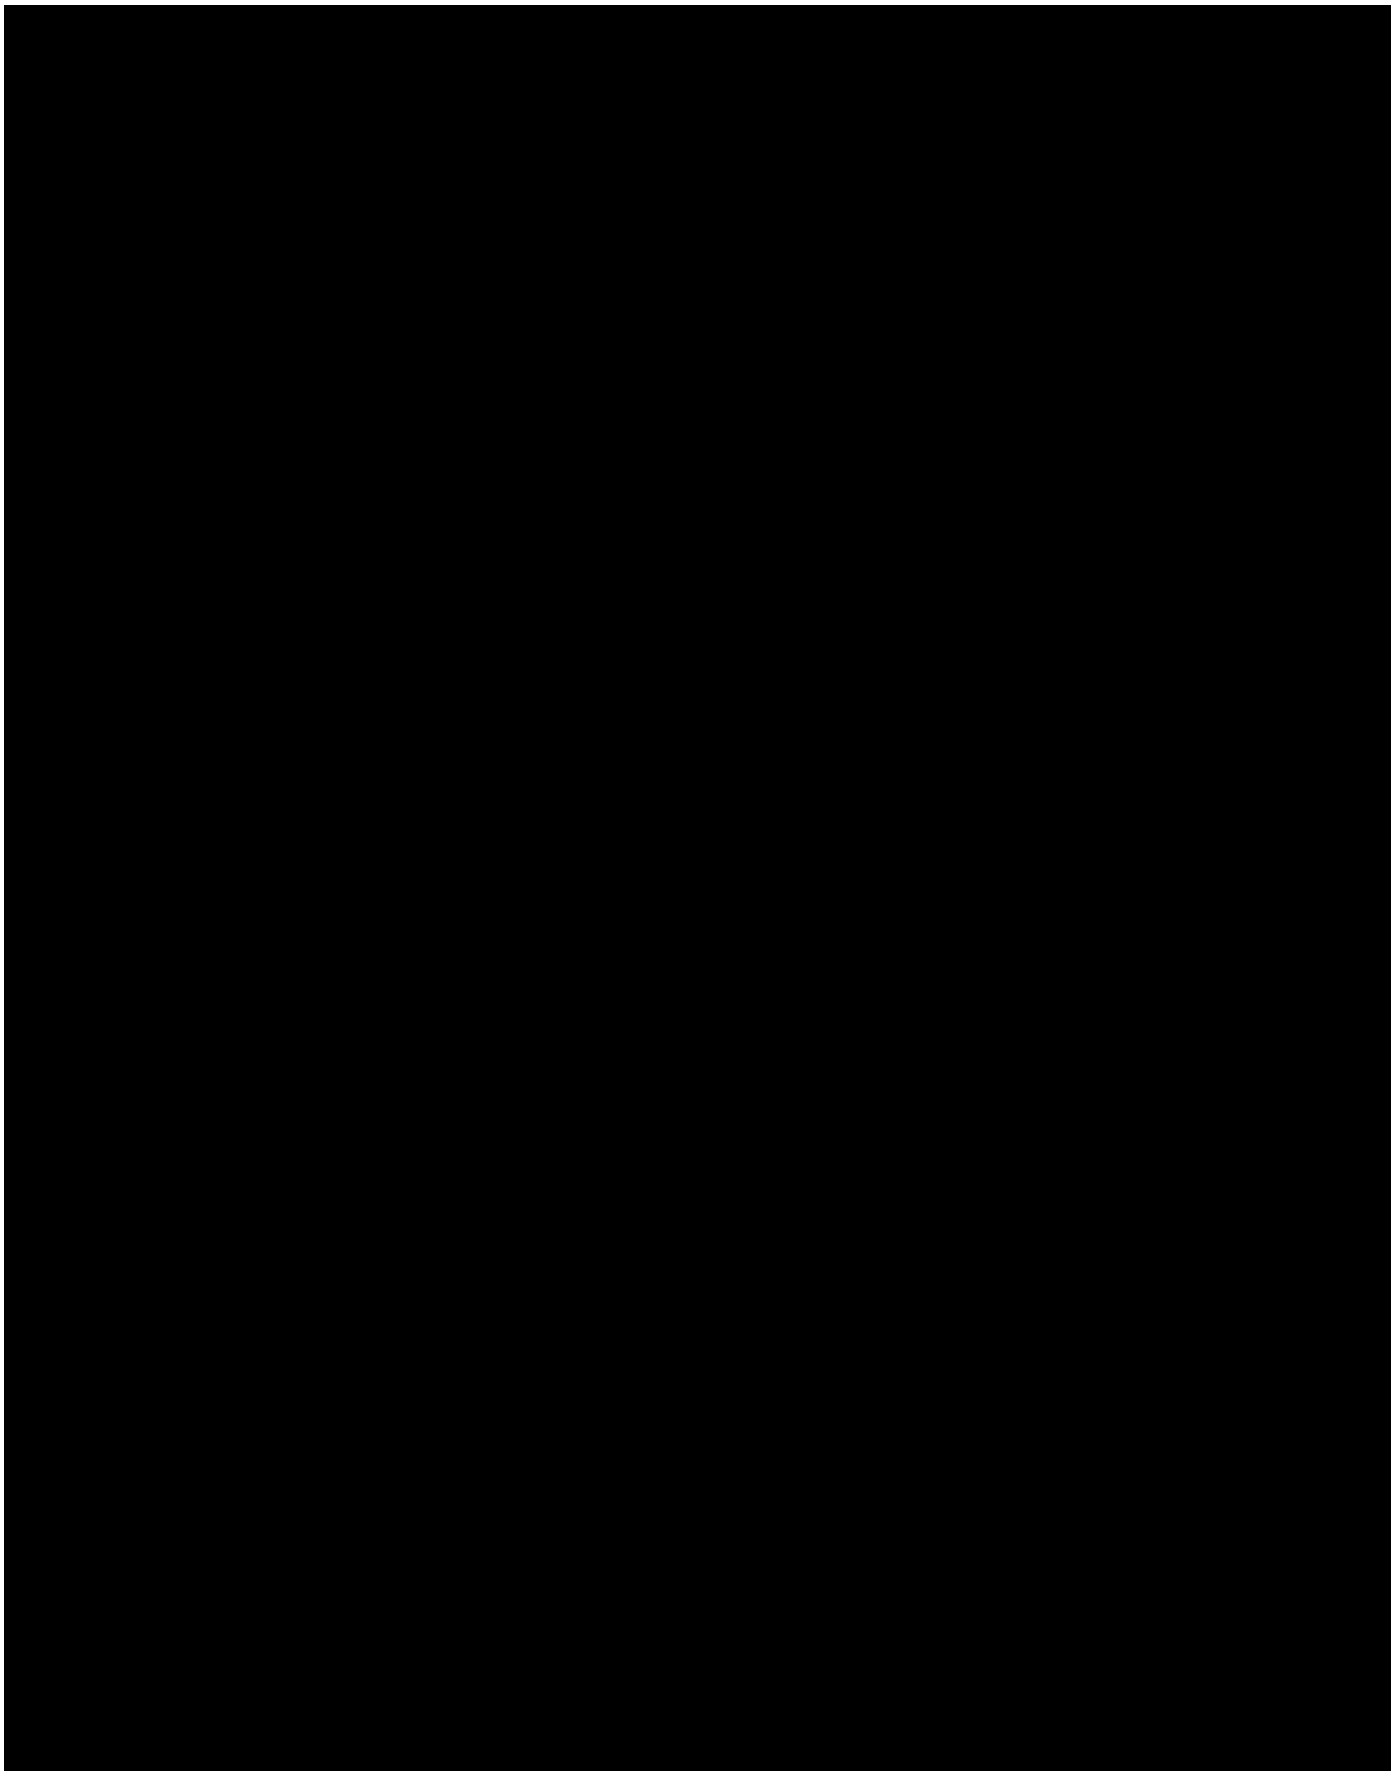
All Healthy Blue employees receive online ethics and compliance training, including modules on FWA, within 30 days of hire and annually thereafter. The new hire module defines FWA and its impact, explains the roles of employees and the SIU, how to submit a referral, and where to find more information. Periodic quizzes within the module measure and reinforce employee understanding. Annual training reviews topics such as how to spot and report suspected FWA and also includes a "Red Flag Checklist" that provides information about how to contact the SIU, along with examples and red flags for identifying provider and member fraud. The document also discusses handling suspicious events, including calls to our call centers. New hire and annual FWA training remind employees that information and resources are always available on the organization-wide intranet page.

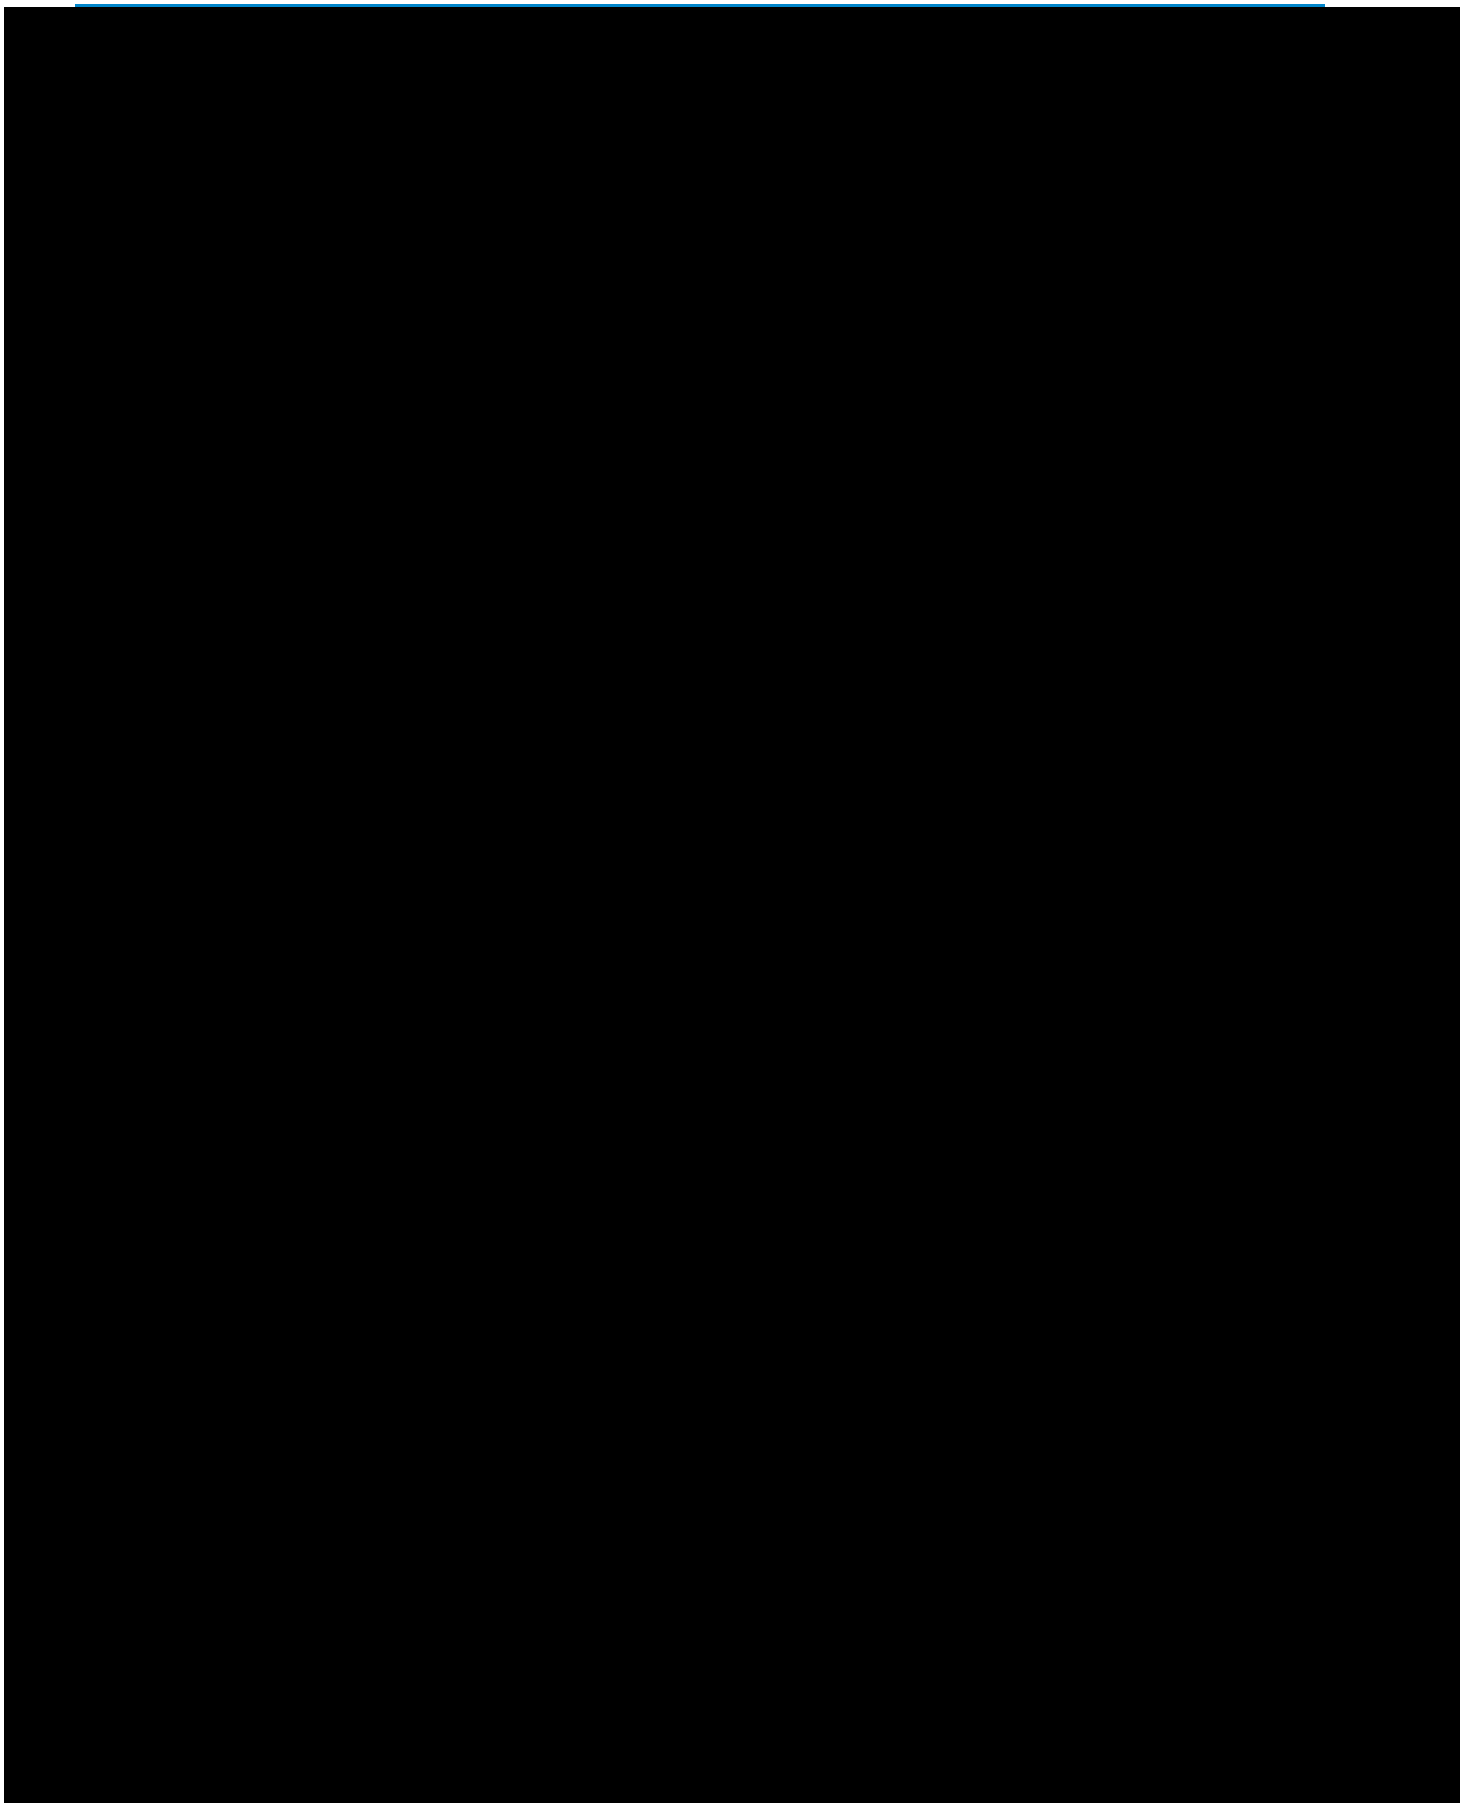
Our Compliance Team conducts a mandatory all-staff training session each fall (in-person and online) that covers a variety of compliance topics. For FWA, topics include organization and roles, provider fraud examples, referrals, information exchange and collaboration with LDH, and the multiple methods (anonymous and not) available to report FWA. Attendance is tracked and the Compliance team follows up with employees who are unable to attend.

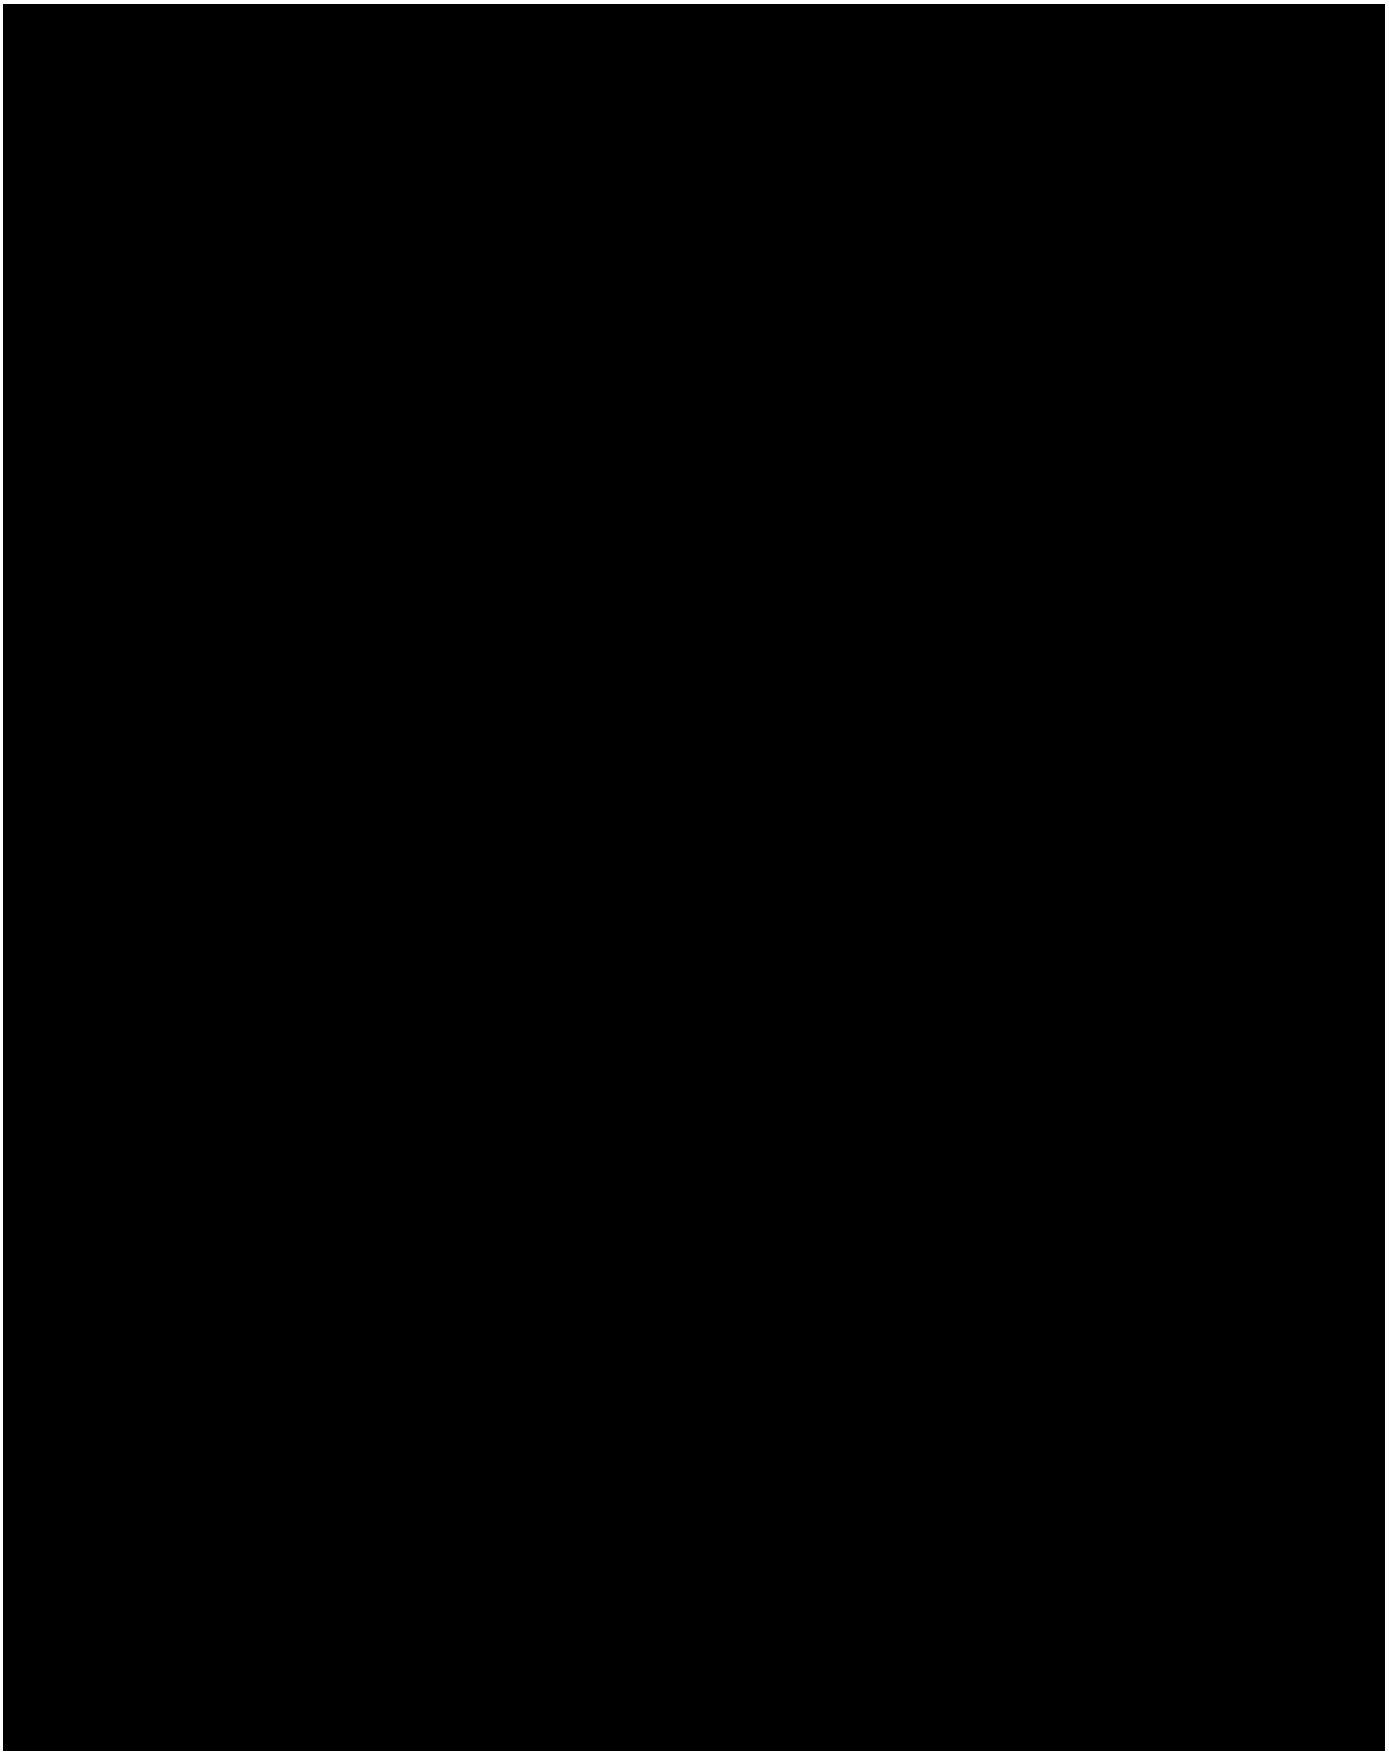
In addition, we use our electronic compliance education series "Did You Know" to maintain consistent awareness and provide information to all Healthy Blue employees. Sent several times each quarter, discussion topics often include FWA prevention, ethics and compliance, protecting member privacy, or a new bulletin issued by LDH.

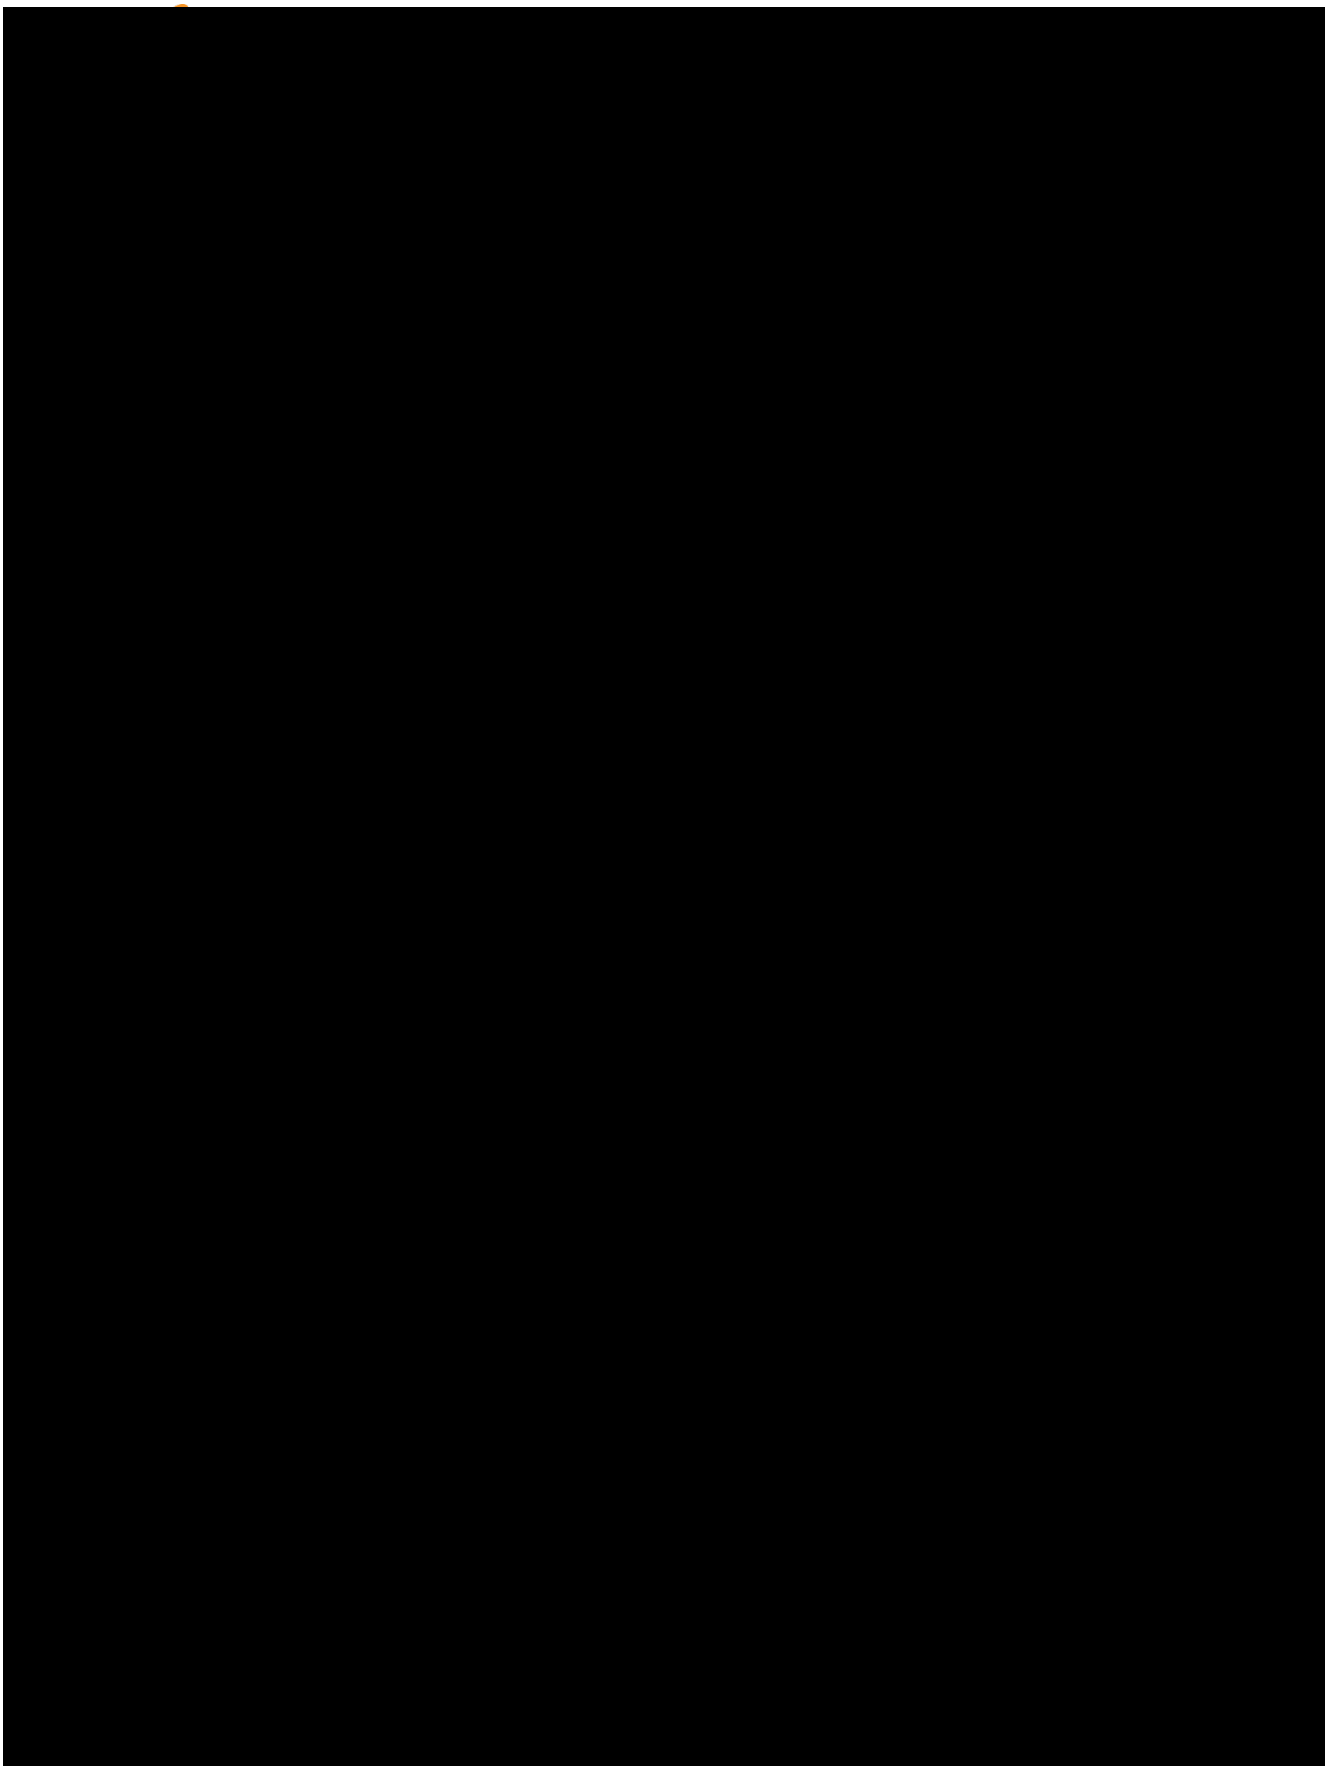
SIU Continuing Education. We understand the importance of adapting our program to evolving risks and monitoring new fraud schemes identified by various organizations. Our SIU staff regularly participate in CMS-











- **Adjust Claims.** If payment is received, we adjust original claim(s). If no payment is received, we adjust the system to recover from new claims payments.
- **System Recovery.** If recovery remains outstanding, the claims payment system will attempt to recover through new claims payments for 60 days.
- **Escalated Recovery.** We intensify internal efforts to resolve the balance through additional calls and letters, transferring the debt to a positive cash flow account under the same TIN, and direct outreach.
- **Third Party Collections.** After 150 days, we assign overpayment recovery efforts to third party collections.

If the provider submits a written response to the recovery notification letter, the sending team carefully reviews the statement and additional information submitted and, within 30 days, determines whether the facts justify recoupment. We mail a written notice of determination to the provider that includes the rationale for the determination. If overturned, recovery efforts cease and any money recovered is reimbursed. If upheld, the provider has the option to file a second appeal and recovery efforts continue.

If recovery collection efforts are unsuccessful in recovering any funds or a negative balance remains after third party collection efforts, we make a decision to close the case or continue recovery.

Regular reports and a monthly meeting help us monitor the status of provider recovery collection efforts, including prior month and year-to-date dollars recovered, as well as pipeline information on cases at each phase of the recovery life cycle. We review providers and associated claims identified for recovery before provider notification. This review step confirms the accuracy of the overpayment and keeps leadership and Provider Relations informed.

2.10.14.2 Capability to Produce Fraud, Waste, and Abuse Reports

As a current MCO, Healthy Blue already has operational processes to meet LDH reporting requirements as listed in the Model Contract, Section 2.20.5, and we will continue to devote the necessary attention and resources to maintain continued compliance. We have an excellent track record of meeting LDH requirements for report timeliness and quality, and will continue to deliver compliant, accurate, and timely reports under the new Contract. Healthy Blue knows that reports provide a critical vehicle for LDH to view the status of program operations and make important decisions. We also know that meeting LDH reporting requirements — for FWA and other operational and program areas — and delivering meaningful information to support LDH review and analysis requires the right combination of capabilities, including access to data and tools, knowledgeable resources, and quality controls.

Healthy Blue's Reporting Capability

We understand LDH reporting requirements and the operational commitment they require. Strong capabilities are critical for maximizing reporting and data analytics and ensuring consistency and accuracy. To that end, Healthy Blue will continue to:

- Promote reporting accuracy by applying consistent edits to incoming data and carefully monitor processing
- Use organized and structured databases and data warehouses to support reporting and analysis
- Provide data analytic tools companywide to help format, aggregate, and report data consistently and accurately
- Leverage the reporting and data analysis experience and resources of national support services and our affiliates to help expedite report deployment and create more meaningful reports

Meeting Reporting Requirements Requires People, Tools, and Data

Program Integrity maintains Business Analysts and technical staff to support our ability to generate FWA reports. Resources understand the data, data warehouses and tracking databases, and available tools, allowing them to meet current requirements and make any changes required under the new Contract. Direct access to resources helps Healthy Blue respond quickly and efficiently to reporting needs and adapt to future changes.

Employees have at their disposal industry-leading software and tools for data access and report development. We believe employees need "the right tool for the right job" and a variety of tools are available to accommodate and support a wide range of skills. Some tools support end-user query and data manipulation and analysis, while others require more advanced skill levels. These tools — combined with access to databases that contain a significant amount of demographic, service, utilization, and quality data — provide powerful reporting and analytic capabilities.

Just as there are multiple tools to support report development, more than one database supports operational and ad hoc reporting. A key resource is the Operational Data Warehouse (ODW). The ODW is a copy of transactional data specifically configured to support complex analytical and ad hoc queries using business intelligence tools. The ODW is an integrated repository fed directly from our Core Service System to deliver data quality, control, and consistency. The data warehouse also houses data from external sources, including encounter data from our pharmacy, transportation, vision, and dental subcontractors. Complementing the ODW, Program Integrity maintains additional systems to track specific activities, including tips, SIU investigations and pre-payment review, provider overpayment recovery collections, and audits.

Documented Processes for Meeting LDH Reporting Requirements

The Model Contract identifies two main types of FWA reporting: notifications to LDH for specific events and submission of regulatory data (including the quarterly program integrity (PI) 145 Fraud, Waste, and Abuse Activity Report). Additionally, Healthy Blue knows that LDH often requests ad hoc reports or data.

Whenever possible, reports are system-generated. System-generated reports or data extracts increase consistency and accuracy. The PI 145 report, for example, is completed with a combination of system-generated data extracts and reports to populate the detailed data tabs and manual analysis and review to complete the summary tab.

Healthy Blue maintains resources to create, maintain, and modify reports to support operational needs (including the analytic algorithms discussed earlier), as well as ad hoc and regulatory reporting. Documented processes and quality control checks help us to deliver consistent, accurate, and compliant reports.

Notifications to LDH. Healthy Blue maintains documented processes to make sure we comply fully with requirements to notify LDH within three business days of discovering suspected FWA or receiving notice of, or notice of actions that could result in exclusion, debarment, or suspension of an employee, network provider, subcontractor, or subcontractor's employee. Processes include accountable employees and departments, sources of notification, specific procedures by department, and tracking methods for LDH notification.

FWA Activity Report. Healthy Blue maintains detailed instructions for FWA Activity Report completion and will update them as necessary under the new Contract to make sure we continue to submit complete and accurate information. This report currently combines detailed information on tips, audits, prepayment review, and terminations with a set of summary totals for detection, recovery, and prevention. Our instructions break down each segment of the report and identify the specific data source, business owner, and specific process for completion. Business owners supply information from their area. For example, the Credentialing team provides the number of positive matches against the List of Excluded Individuals/Entities for the Summary tab, and regulatory compliance assembles the report.

Ad Hoc Requests for Information. Healthy Blue receives ad hoc requests for information from multiple entities, including LDH, MFCU, and the Surveillance Utilization Review System (SURS). We log requests into a tracking system, including the responsible business owner, nature of the request, the due date, and the date of response submission. This centralized approach to deliverable tracking not only drives timely and complete responses, but also streamlines and simplifies communications with LDH and others by creating a "one-stop shop" for any requests. Our Compliance Officer receives a weekly report that identifies requests nearing the due date and conducts outreach, as necessary.

Quality Controls Confirm Compliance and Accuracy

Healthy Blue maintains a defined process and method of quality control to drive reporting accuracy and timeliness. We execute quality reviews on all reports before submission, generating reports in advance of the LDH submission deadline to allow adequate time for a thorough review. Business owners and leadership review reports for completeness and accuracy prior to submitting to the Regulatory team and subsequently, LDH. Our report tracking system generates email alerts to business owners with reminders about upcoming report due dates and notification that a report is ready for review.

Proposed Innovations for Program Integrity Reporting Data

Healthy Blue welcomes the opportunity to collaborate with LDH on PI reporting and to discuss improvements that can further support the State's goal to minimize wasteful spending, abuse, and fraud. During the LDH onsite visit to Baton Rouge in September 2018, we discussed the PI 145 report with LDH, specifically focusing on ideas for improvement. At that time, we recommended the addition of several data fields, including adding a date overpayment identified field that would make it easier to tie the Audits tab back to the Summary tab and a similar field for the Referrals tab. Healthy Blue recommends that LDH move delivery of the PI 145 from quarterly to monthly. In addition, we recommend that the report be modified to increase the sharing of information related to FWA not specific to the Louisiana Medicaid environment. LDH has created an excellent set of FWA reporting requirements and standards for Healthy Louisiana MCOs. At this time, our 21 affiliates submit PI reports to their government partners that are similar to current LDH reports. If we see new reporting in our affiliates that can add value to Louisiana's FWA efforts, we will share it with LDH. With affiliate health plans across the country, Healthy Blue has access to an incredible amount of information on Program Integrity best practices and trends currently being experienced elsewhere. Sharing this information more broadly could help the State more proactively defend against FWA. In addition, our relationship with BCBSLA provides access to similar information related to non-Medicaid FWA occurring within Louisiana.

Acknowledgements

These guidelines were produced by the World Health Organization (WHO) Department of HIV/AIDS and Department of Maternal, Newborn, Child and Adolescent Health in collaboration with the Global Network of People living with HIV/AIDS (GNP+), the United Nations Educational, Scientific and Cultural Organization (UNESCO), the United Nations Populations Fund (UNFPA) and the United Nations Children's Fund (UNICEF).

WHO would like to thank the many individuals who contributed to the development of this document. We wish to especially thank the co-chairs of the Guidelines Expert Group meeting, Sabrina Bakeera-Kitaka and Shaffiq Essajee, as well as the Guideline Development Group (listed below).

Rachel Baggaley and Jane Ferguson were responsible for the overall technical coordination of the guidelines development, with the support of Gottfried Hirnschall, Elizabeth Mason and Susan Norris. The guidelines document was compiled by Mary Henderson and edited by Jura Editorial Services; additional technical input provided by Kathleen Fox, Jennifer Hinners, Omar Abdel Mannan, Elizabeth Marum, Katherine Noto, and Amitabh Suthar; Rosewiter Gwatiringa, Nadia Hilal and Claire Ory Scharer provided administrative and logistical support.

YFHS	youth-friendly health services

Funding

The funding to support this work – including the systematic reviews of evidence, evidence compilation, convening the expert meeting, development, editing, and printing of the draft guidelines – was provided by Joint United Nations Programme on HIV/AIDS (UNAIDS), United Nations Population Fund (UNFPA) and the United States Agency for International Development (USAID), with additional budget support and staff time from the WHO Department of HIV/AIDS and the WHO Department of Maternal, Newborn, Child and Adolescent Health. We would like to acknowledge the significant financial contribution from the United Nations Children's Fund (UNICEF) towards the systematic review and development of these guidelines.

Declarations of interest by participants were assessed and found to be insufficient to exclude them from full participation.

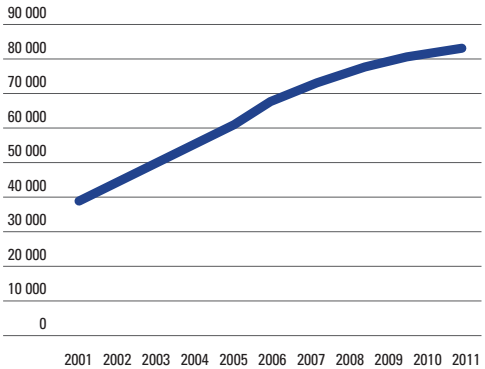
Executive summary

Adolescents (10–19 years) and young people (20–24 years) continue to be vulnerable,[1] both socially and economically, to HIV infection despite efforts to date *(1)*. This is particularly true for adolescents—especially girls—who live in settings with a generalized HIV epidemic or who are members of key populations at higher risk for HIV acquisition or transmission through sexual transmission and injecting drug use. In 2012, there were approximately 2.1 million adolescents living with HIV *(2)*. About one-seventh of all new HIV infections occur during adolescence *(2)*.

Access to and uptake of HIV counselling and testing (HTC) by adolescents is significantly lower than for adults. Survey data collected from sub-Saharan Africa indicate that only 10% of young men and 15% of young women (15–24 years) were aware of their HIV status. However, access and coverage vary considerably across countries and regions.

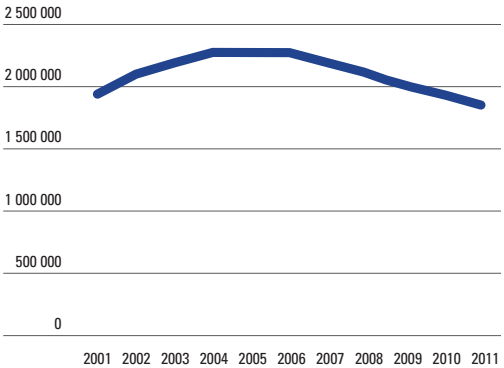
Between 2005 and 2012, HIV-related deaths among adolescents increased by 50%, while the global number of HIV-related deaths fell by 30% *(2)*. This increase in adolescent HIV-related deaths is due primarily to poor prioritization of adolescents in national HIV plans, inadequate provision of accessible and acceptable HTC and treatment services and lack of support for adolescents to remain in care and adhere to antiretroviral therapy (ART).

Total adolescent AIDS-related deaths



Source: Kasedde S et al *(3)*.

Total AIDS-related deaths



Source : UNAIDS *(2)*.

1 This document focuses on adolescents, ages 10–19 years. However, many programmes focus and report on youth, ages 15–24 years. Inconsistency in data collection often leads to overlapping age categories. This problem is compounded by different definitions of "child", "adolescent", "young person" and "young adult". As a result data specific to adolescents often get lost, as the adolescent age group is subsumed in various different age ranges.

Purpose of the guidelines

Guidance for HTC and on care for adolescents living with HIV (ALHIV) is needed that explicitly considers the range of adolescents' needs and issues. The World Health Organization (WHO), in collaboration with the United Nations Children's Fund (UNICEF), the United Nations Population Fund (UNFPA), the United Nations Educational, Scientific and Cultural Organization (UNESCO) and the Global Network of People Living with HIV (GNP+), has developed these guidelines to provide specific recommendations and expert suggestions—for national policy-makers and programme managers and their partners and stakeholders—on prioritizing, planning and providing HIV testing, counselling, treatment and care services for adolescents.

Scope of the guidelines

HIV testing and counselling

Previous WHO guidance on HTC has concentrated on supporting provider-initiated HTC (PITC) for individuals, with recent guidance issued in 2011 focusing on HTC for couples and in 2013 on augmenting these approaches with community-based HTC. United Nations guidance specifically addressing the needs of adolescents and their health-care providers has not been developed at the global level, although some countries and organizations (e.g. FHI 360, U.S. Centers for Disease Control and Prevention (CDC) and amfAR) have developed guidance for testing young people ages 10–24 years. Access to and uptake of HTC by adolescents (especially those who are members of key populations) is lower than for many other groups, leaving them disadvantaged in terms of seeking and being linked to HIV prevention, treatment and care services. Late diagnosis of HIV infection, resulting in delayed initiation of antiretroviral therapy (ART), for perinatally infected adolescents is increasingly being recognized as a significant problem.

Care for adolescents living with HIV

Access to treatment and care for adolescents with HIV also remains inadequate. Following HTC, there are poor linkages to and retention in care for most populations, and ART coverage rates for adolescents are lower than for other age groups. Interventions and support for sustained treatment adherence and retention in care are challenges in many settings, the inability to address these issues has led to treatment failure and the high levels of HIV related morbidity and mortality increasingly being recognised in this group. Addressing these challenges and adapting systems to deliver good quality, effective health care and social support for adolescents are urgently needed. The WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection (hereafter Consolidated ARV guidelines)* provides comprehensive clinical recommendations on the provision of ART for all populations *(4)*, including adolescents, and these adolescent HIV guidelines provide complementary recommendations and operational guidance to support better provision of services to help adolescents remain in care and adhere to ART.

Ways to support better adherence to treatment and retention in care for ALHIV, including **community-based service delivery** and **training for health workers** and a range of other service delivery recommendations from the *Consolidated ARV guidelines* are also discussed, with specific consideration given to these for adolescent service provision.

Key populations

For these guidelines, **key populations** are defined as those populations at higher risk of HIV (those populations disproportionately affected in all regions and epidemic types, specifically sex workers, men who have sex with men, transgender people and people who inject drugs). These guidelines specifically address adolescent key populations, i.e. those aged 10 to 19 years. In addition to the groups mentioned above, other adolescents who are vulnerable to HIV include those who are sexually abused and/or exploited and those in prisons and other closed settings.

Principles guiding the development of the recommendations

- Compulsory or mandatory HIV testing of individuals on public health grounds or for any other purpose is a violation of human rights and counterproductive to accessing acceptable testing, treatment and care services as well as retention in care. Therefore, these guidelines do not support it.
- The heterogeneity of adolescents is recognized and requires flexibility and adaption of services and approaches, in addition to the context and local epidemiology.
- The meaningful involvement of adolescents, particularly ALHIV, as well as those at risk of HIV infection, is critical for developing and delivering effective and acceptable HTC and HIV treatment and care services for adolescents.
- All forms of HTC must adhere to the five Cs: Consent, Confidentiality, Counselling, Correct test results and Connections to treatment, care and prevention services.
- Issues that may be particular to male, female or transgender adolescents must be recognized and addressed when developing, providing, monitoring and evaluating services for adolescents.
- All services must be provided within a robust human rights framework.[1]
- A supportive and conducive legal and policy environment is essential for effective and acceptable service provision.[2]
- For those under 18 years of age, testing and counselling services need to consider the best interests of the child as well as appropriate and safe referrals to child protection services when children have been abused and are at risk of abuse. Referral to legal/social services is also needed for adolescents aged 18–19 years.

This guidance highlights issues relating to adolescent **consent to HTC**. Policies related to age of consent to testing can pose barriers to adolescents' access to HTC and other health services. While policies on age of consent to HIV testing vary among countries, ministries of health are encouraged to revisit these policies in light of the need to uphold adolescents' rights to make choices about their own health and well-being (with consideration for different levels of maturity and understanding). The guidelines strongly encourage consideration of ways to strengthen **support for disclosure** by adolescents.

The guidelines consider **operational approaches** and options and provide a range of programme examples and guidelines principles for implementation. **Research gaps** identified in the course of the expert meeting and guideline development process are also documented.

1 See CRC, General Comment 4 – http://tb.ohchr.org/default.aspx?Symbol=CRC/GC/2003/4; General Comment No. 15 (2013) – The right of the child to the enjoyment of the highest attainable standard of health (Article. 24).

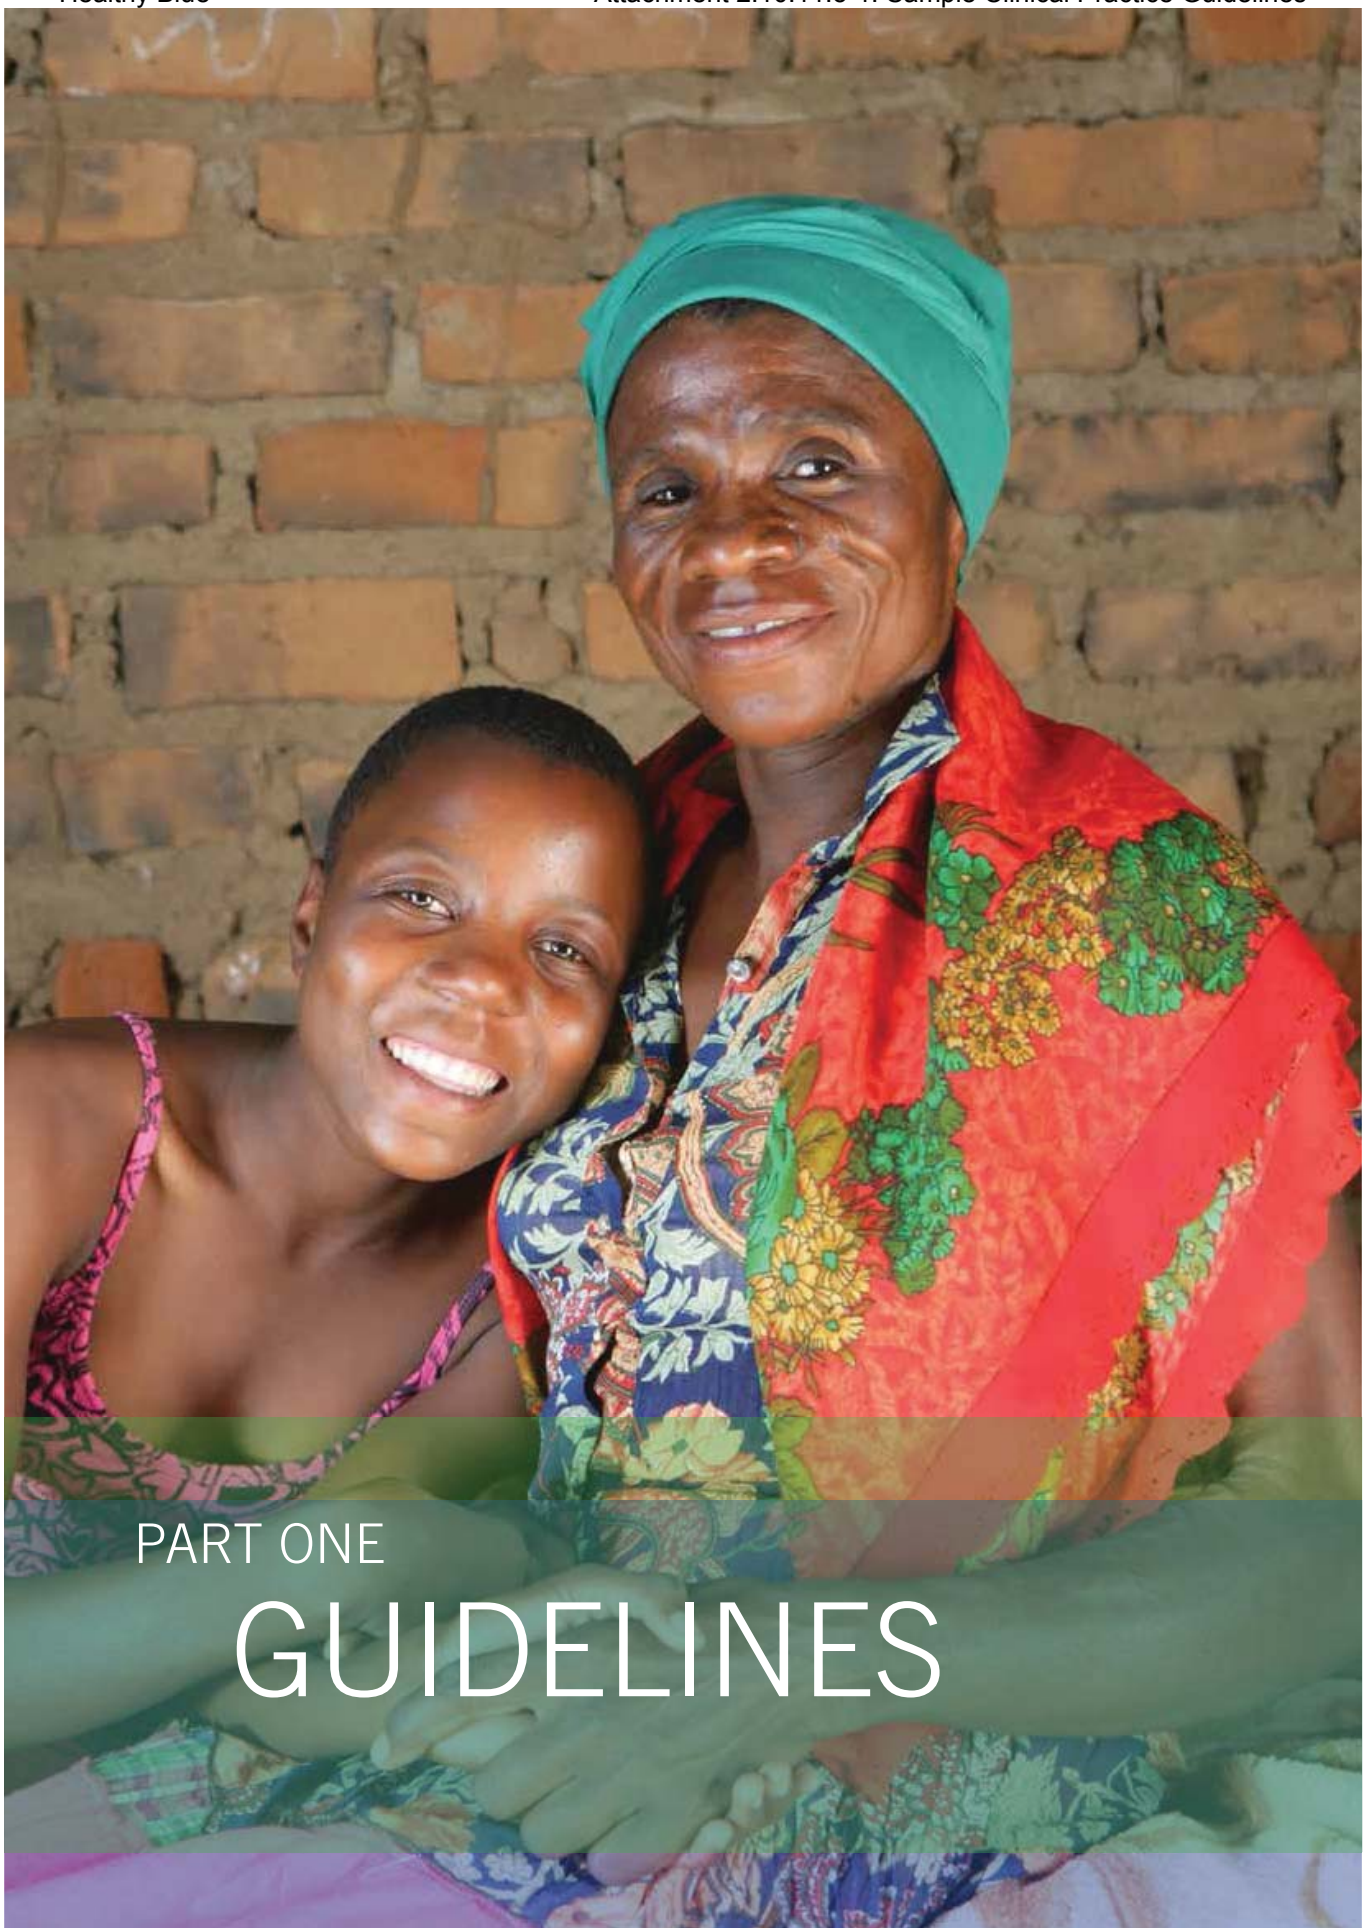
2 A supportive and conducive legal and policy environment is critical for adolescents to access and benefit from HIV testing, counselling and linkage to appropriate treatment and care. The criminalization of HIV transmission, exposure and non-disclosure restricts an adolescent's ability to access and benefit from a range of essential HIV-related services.

RECOMMENDATIONS

1. HIV testing and counselling, with linkages to prevention, treatment and care, is recommended for adolescents from key populations in all settings (generalized, low and concentrated epidemics).
2. In generalized epidemics, HIV testing and counselling with linkage to prevention, treatment and care is recommended for all adolescents.
3. In low and concentrated epidemics, HIV testing and counselling with linkage to prevention, treatment and care is recommended to be made accessible to all adolescents.
4. Adolescents should be counselled about the potential benefits and risks of disclosure of their HIV status to others and empowered and supported to determine if, when, how and to whom to disclose.
5. Community-based approaches can improve treatment adherence and retention in care of adolescents living with HIV.
6. Training of health-care workers can contribute to treatment adherence and improvement in retention in care of adolescents living with HIV.

The recommendations regarding HTC for adolescents, disclosure, community-based approaches and training for health-care workers imply significant benefits for all socio-economic and epidemiological contexts and should be considered as global guidance. At the same time, it is recognized that health services in low-resource settings face the greatest challenges in providing services tailored for adolescents and may benefit most from the guidance presented here. Countries are encouraged to consider this guidance in light of the nature of the HIV epidemic in their setting and their national policies, programmes and resources.

This guidance is informed by human rights considerations, systematic reviews of the published and gray literature, community consultations with adolescents and health workers, field experience and expert opinion. Published evidence in adolescent populations is, however, limited or lacking and considerable weight is given to expert opinion, to the values and preferences of adolescents and their health-care providers and to the field experience of practitioners.



PART ONE

GUIDELINES

1

OVERVIEW

1.1 Background

More than 35.3 million people are currently living with HIV, and 2.1 million (5.9%) of these are adolescents ages 10–19 years *(1, 2)*[1]. In 2012, there were more than 6300 new HIV infections each day worldwide *(2)*. Around 2500 of these new cases were adolescents and youth ages 15–24 *(2, 5)*.

While most of the approximately 712 new cases of HIV that are diagnosed each day in children under 15 years of age were due to vertical transmission, a small percentage were the result of horizontal transmission, including sexual transmission through sexual abuse or coercion, or early sex *(5)*. Adolescents and young people remain extremely vulnerable to acquiring HIV infection, especially girls who live in settings with a generalized HIV epidemic or who are members of populations at high risk for HIV acquisition or transmission. (See Part 1, Section 2.1.2 for discussion of adolescent key populations.)

The last decade witnessed significant progress in scaling up access to HIV treatment and care. By the end of 2012, more than 9.7 million people from low- and middle-income countries (LMIC) were receiving antiretroviral therapy (ART) *(1)*. Corresponding to this effort, HIV-related mortality has declined. However, global ART coverage is still inadequate at 61%[2], and most people living with HIV do not know their serostatus *(2)*.

Early diagnosis and treatment can reduce HIV progression and prevent transmission, but adolescents are less likely than adults to be tested, access care, remain in care and achieve viral suppression *(6, 7, 8, 9, 10)*. Although coverage data on adolescents receiving treatment is limited, adolescents' access to and uptake of treatment is often reported to be lower than for other age groups *(11, 12)*. It is urgent that ALHIV are identified and enrolled in treatment interventions with clear and consistent linkages to care and support.

As of 2012, about 630 000 infants, children, and young adolescents below 15 years had been started on ART, representing a 28% coverage rate among children who need paediatric ART *(1)*. This coverage follows increased emphasis on prevention of mother-to-child transmission (PMTCT) programmes that include early infant diagnosis and early initiation of treatment for infants.[3] Over the next decade, these infants and young children with HIV on ART will become adolescents and face the challenges of adolescence as well as those associated with coping with living with a chronic infection, developing relationships and preventing transmission.

A substantial epidemic of HIV in perinatally infected adolescents is emerging in southern Africa. These adolescents include both those who were started on ART as infants as part of PMTCT programmes and perinatally infected children who were not started on ART either because their mothers were not reached by PMTCT programmes or they were lost to follow-up and have survived into adolescence without ART (often referred to as slow progressors). Data suggest that up to one-third of infants infected with HIV who are not started on ART are slow progressors with a median survival of greater than 10 years *(13)*. The increasing cumulative number of slow progressors and infants and young children on ART (who must be supported to cope with the challenges of being on long-term treatment) highlights

1 See Annex 1 for a glossary of key terms and definitions.

2 Using the WHO 2010 ARV guidelines.

3 Some countries refer to this as prevention of parent-to-child transmission (PPTCT); the more common term, PMTCT, will be used in these guidelines.

the importance of urgently addressing the clinical needs of older children and adolescents with HIV *(14)*. HIV is increasingly being recognized as a common cause of acute admission and in-hospital death among adolescents in high-prevalence, generalized epidemics *(15, 16, 17)*.

Although rapid expansion of HIV treatment has significantly improved survival, life expectancy and quality of life for people living with HIV (PLHIV), delayed ART initiation remains a challenge in many settings, including high-income countries *(18, 19)*. Previous WHO guidelines recommended ART initiation below 350 cells/mm^3, and 42 LMIC had adopted this recommendation in their national ART guidelines *(20)*. WHO now recommends (in the 2013 *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection*) initiation of ART for all PLHIV with a CD4 count of 500 cells/mm^3 and below *(4)*[1]. However, most patients are currently initiated on ART at CD4 counts far below national guideline recommendations. Low CD4 count has a direct adverse impact on HIV treatment outcome and health-care costs associated with management of advanced stages of HIV infection, including hospital admissions.

Multiple factors related to health-care delivery systems contribute to delays in ART initiation and poor adherence to ART and retention in care. These include diagnosis of HIV at an advanced stage, poor linkage to and retention in HIV care after testing positive *(21, 22, 23)* and loss to follow-up (LTFU), which is particularly high in the period between testing and initiation of ART. Additional patient-related factors for delayed initiation of ART include legal and/or familial constraints around disclosure, and lack of emotional and financial support.

All of these issues pose potentially greater challenges to adolescents, who experience more actual or perceived barriers to HIV testing and treatment services than the general population. ALHIV can also face challenges in the transition from paediatric services—where parents and guardians commonly have primary responsibility for their care—to adult ART services, where they will need to take much greater responsibility for their own care. In the case of decentralized services, where there may be only one ART service available, the greatest challenge is not a transition from one set of services to another, but rather a transitioning of health-care responsibilities from parent or guardian to the adolescent. This is generally a longer process during which the adolescent assumes autonomy for specific health-care activities and decisions, as related to their evolving capacity.

1.1.1 HIV testing and counselling for adolescents

HIV testing and counselling (HTC) is an essential component of efforts to achieve universal access to HIV prevention, treatment, care and support. Regardless of HIV acquisition route, underutilization of testing and counselling services results in late diagnosis; increasing uptake of HTC could lead to earlier diagnosis and more effective care.[2] Due to the increasing availability of ART and prevention interventions, early diagnosis can reduce transmission and improve health outcomes, thereby decreasing HIV incidence and HIV-related morbidity and mortality.

HTC for adolescents, as for adults, offers many important benefits. Adolescents who learn that they have been diagnosed with HIV are more likely to obtain emotional

1 Also, to reduce HIV transmission to uninfected partners, WHO recommends that HIV-positive partners in serodiscordant couples should be offered ART, irrespective of their CD4 count.

2 Although data is not available, there is thought to be a significant percentage of adolescents who have been tested and know their status and have not been effectively linked to care and treatment and therefore have not initiated treatment when they need it. (G. Hainsworth, Pathfinder, personal communication, 2013).

support and practice preventive behaviours to reduce the risk of transmitting HIV to others, and more likely to obtain HIV treatment and care, assuming these services are available to them. Early access to care can help them to feel better and to live longer, than if they present for care when their disease is already at an advanced stage. Access to HTC is also important for adolescents who do not have HIV to reinforce prevention messages and facilitate access to prevention services and commodities. Recent data from South Africa suggest that adolescents who had taken a test had a lower incidence of HIV over time compared with those who had not *(24)*. HTC is also an essential component of the package of care included in voluntary medical male circumcision (VMMC) programmes for HIV prevention that are being scaled up in 14 priority countries in sub-Saharan Africa—in which adolescents are a key target group *(25)*.

Access to and uptake of HTC by adolescents is significantly lower than for adults.[1] Survey data collected from 2005 to 2010 in sub-Saharan Africa indicate that only 10% of young men and 15% of young women (15–24 years) were aware of their HIV status *(26)*. However, access and coverage vary considerably across countries and regions. For example, in Malawi and Zimbabwe data on the proportion of HTC clients who are 15–24 years of age show that they account for approximately 40% of all clients. Of these young clients, approximately 60% are females (R. Olson, UNICEF-South Africa, personal communication, 2013).

Because uptake of HTC by adolescents is currently low, and HTC services for adolescents have not been developed in many settings, these guidelines recommend expanding access to HTC for adolescents in different epidemic settings.[2] These guidelines also discuss service delivery approaches that have been acceptable and effective in increasing uptake of HTC among adolescents and highlight operational issues that must be addressed for effective implementation of the recommendations.

1.1.2 HIV treatment and care for adolescents living with HIV

Modes of transmission

Adolescents can acquire HIV infection in two ways—through vertical or horizontal transmission.

Vertical (mother-to-child) transmission

Adolescents living with HIV include long-term survivors of vertical transmission, some who are on treatment, as well as slow progressors (not on treatment). Some of these adolescents are receiving care having been followed through PMTCT programmes. However, a significant proportion has not been diagnosed due to loss to follow-up (LTFU) or poor coverage of PMTCT programmes.

Horizontal transmission

Horizontal transmission occurs in two ways:

Sexual transmission

Sexual activity begins during adolescence in most parts of the world, although age and conditions vary greatly. Risks for acquisition of HIV include sex without safe condom use, early coerced sex and sexual exploitation involving coercion and sometimes violence.

1 In countries where adolescents ages 15–19 years are considered adults, they may only have access to HTC in ANC services, which would exclude male adolescents and therefore reduce access for this group.

2 Expanded access includes making existing services more sensitive to the needs of adolescents.

Parenteral transmission

Non-sexual transmission among adolescents can involve injecting drug use (IDU), traditional practices (e.g. female genital mutilation (FGM), scarification with shared razor blades and traditional treatments requiring cutting of the skin) and certain medical procedures such as unsafe surgical procedures, injections and blood transfusions.

There are social and contextual factors that make adolescents vulnerable to HIV infection through horizontal transmission. These factors include: age and sex, gender, social and cultural norms and value systems about sexual activity, location (where the adolescent lives, learns and earns), economic and educational status and sexual orientation. Adolescents who are particularly vulnerable include those from key populations as well as orphans, migrants and refugees, prisoners and other groups that are socially marginalized and discriminated against, and adolescents affected by humanitarian crises. Conflict, displacement and food insecurity all can heighten risk. The HIV epidemic itself also increases vulnerability; for example, adolescents orphaned by AIDS can be more vulnerable to HIV if their circumstances lead them to engage in sex with older and/or concurrent partners for economic or emotional support.

Optimal HIV care for different groups of adolescents

There are several diverse groups of ALHIV who must be encouraged and able to access ART, care and support, and who will need support to adhere to treatment and remain in care. Optimal HIV care for different groups of ALHIV varies according to mode of transmission, age, sex, gender and social factors. Three broad groups, each with specific needs and challenges, need to be considered.

Adolescents infected vertically, diagnosed early and started on ART

In 2012, vertical transmission accounted for an estimated 260 000 new infections in children *(2)*. Current efforts to optimize PMTCT programmes will not, on their own, eliminate HIV in newborns. Access to maternal and child health services will need to be dramatically improved, as will prevention measures, such as preventing and treating HIV before pregnancy.

Successful early infant diagnosis and links to treatment in some settings has resulted in more than 630 000 children in developing countries being started on ART *(1)*. Intensive efforts will be needed over the next decade to support children with HIV on ART to remain engaged in care and to adhere to treatment as they become adolescents and need to transition to adult services. Health workers, even those experienced in caring for adults with HIV, are often ill-equipped to support the health-care needs of adolescents. In many countries, there is little experience with understanding and providing services for the particular needs of adolescents, and judgemental attitudes toward sexually active adolescents can hamper rapport and subsequent care.

A significant proportion of pregnant women are adolescents (approximately 16 million births per year are to adolescents) *(27)*. Adolescent girls with HIV have less access to PMTCT interventions than adult women, and they need improved access to maternal and other types of health care.

Adolescents infected vertically, not diagnosed early and not started on ART

In generalized epidemics, an increasing proportion of children entering adolescence have acquired HIV infection perinatally and remain undiagnosed *(28)*. These slow progressors have survived into adolescence without being diagnosed and started on ART. They may have chronic medical and developmental delay problems and would benefit from diagnosis and initiation on treatment, as well as long-term care and support.

Although there has been a significant increase in the provision of PMTCT interventions, many mothers still do not have access to antenatal services or PMTCT. In low- and middle-income countries, coverage of effective antiretroviral regimens for PMTCT reached only 57% in 2011 *(2)*. In sub-Saharan Africa, where 92% of the world's pregnant women with HIV live, only 59% received ART or prophylaxis during pregnancy and delivery.

Even where PMTCT services are in place, they are not completely effective in preventing all vertical transmission of HIV. Furthermore, there is significant LTFU in many programmes, resulting in exposed infants not getting tested, and a significant proportion of perinatally infected children not linked to early care. Without ART, these children often will develop HIV-related symptoms early in their lives, requiring urgent HIV treatment and care.

Late diagnosis of HIV infection for perinatally infected adolescents is increasingly being recognized as a significant problem leading to delayed initiation of ART and poor linkages to and retention in care. This can be complicated by the reluctance of some parents to allow children to be diagnosed and/or started on ART for fear of the potential stigma related to implications of their own status or possible revelation of abuse as the cause of infection. In some areas, anecdotal evidence suggests that greater trust in traditional healers and fear of the side effects of ART can cause parents and caregivers to delay diagnosis and treatment for children.

Adolescents acquiring HIV horizontally

The main mode of HIV transmission among male and female adolescents in generalized epidemic settings is unprotected heterosexual sex (sometimes forced or coerced). A growing body of evidence shows that the experience of sexual coercion is fairly prevalent among young people and is associated with high-risk sexual behaviour thereafter *(29)*. A review of nationally representative surveys in Burkina Faso, Ghana, Malawi and Uganda examined the prevalence of sexual coercion at sexual debut among adolescent females (12–19 years of age) *(30)*. Thirty-eight per cent of girls in Malawi said that they were "not willing at all" at their first sexual experience; girls in Ghana (30%), Uganda (23%), and Burkina Faso (15%) responded similarly. In-depth interviews collected in 2003 with the same demographic found that there are four primary types of sexual coercion: forced sex; pressure through money or gifts; flattery, pestering and threatening to have sex with other girls; and passive acceptance.

In many settings, adolescents are also vulnerable to HIV infection through injecting drug use and sexual exploitation—which often involves unprotected heterosexual and homosexual sex *(30)*—as well as a small number of cases of nosocomial transmission due to unsafe medical practices and procedures, or traditional practices.

Diagnosis through expanded access to HTC, with good linkages to treatment and care, will often require different approaches for adolescents infected horizontally than for adolescents infected vertically. These approaches should take into consideration the needs of adolescents who have been infected through early sex or sexual abuse.

Additional Concerns

In many resource-constrained and high-HIV burden settings, limited capacity in health-care delivery systems poses a serious challenge to expansion of HTC, treatment and care services for adolescents. It is essential to minimize inefficiencies across the continuum of HIV care, explore innovative approaches to service delivery, and optimize treatment outcomes through linkages and integration with other services. Additionally, provision of chronic care requires reorganizing service delivery models, which in most settings are designed primarily to provide acute care.

These guidelines also address support for disclosure by ALHIV to others and, as means to improve adherence and retention, community-based service delivery and improved training for health workers. They recognize the urgency of the need to initiate ART when clinically indicated, to support adherence to ART for eligible ALHIV, and to strengthen the retention of these adolescents in care. Age of consent to testing is also discussed as an issue for consideration when planning and providing services for adolescents.

1.2 Objectives

WHO acknowledges the need to give high priority to increased access to HTC for adolescents and to support approaches to improving adherence to treatment and retention in care for ALHIV.

These guidelines are intended to:

- provide recommendations and suggestions for policy-makers and national programme managers, civil society organizations and technical and financial partners on prioritizing, planning and providing HIV testing, counselling, treatment and care services for adolescents in resource-limited settings;
- support the provision of a comprehensive, accessible, appropriate and acceptable range of services for adolescents along the continuum of care (including testing, counselling, treatment and care and referral to sexual and reproductive and mental health services and community support);
- complement and include relevant recommendations from the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection*. WHO, UN partners, ministries of health and a wide range of other implementers have recognized the need to highlight the importance of effective and accessible services for adolescents living with HIV, to support adherence to ART and retention in care, and to focus specifically on this neglected population;
- provide countries and programmes with evidence-based recommendations together with consideration of related implementation issues.

It is expected that the guidance will support countries and programmes to accomplish the following objectives:[1]

1. **to provide universal access to HIV testing and counselling for adolescents** in generalized epidemics and for adolescents from key populations in all epidemics, with a full understanding of the particular nature, needs and challenges of adolescence;[2]
2. **to improve treatment and care for adolescents living with HIV**. It is essential to make it easier for adolescents to start treatment once they have been diagnosed and to help adolescents already on ART to make a safe and effective transition from paediatric to adult services. This objective also recognizes the need to reduce delayed initiation of ART for ALHIV and to support adherence to ART and retention in care.

It is anticipated that the accomplishment of these objectives will ensure that adolescents are managing their HIV infection effectively to ensure optimal health and survival, and that they are better equipped to take ownership of their health care and their lives as adults living with HIV.

1 These objectives also relate to the service delivery recommendations from the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection* that are listed in Section 2.3.

2 Achievement of Objective 1 will support ALHIV for ongoing treatment and care as well as support HIV-negative adolescents to remain HIV-negative.

1.3 Target audience

The primary target audiences for these comprehensive guidelines include policy-makers and programme managers. A more streamlined, electronic version of these guidelines will be produced for health workers providing HIV prevention and other health services for adolescents in all HIV epidemic settings, including lay counsellors and community health workers. These guidelines are also intended for governments, non-governmental and civil society organizations, donors, HIV advocacy organizations and patient-support groups that address HIV prevention, treatment and care for adolescents. Adaptation of the guidelines is recommended according to the HIV epidemic profile and country-specific cultural and socio-economic contexts.

1.4 Development of guidelines

The WHO Department of Maternal, Newborn, Child and Adolescent Health and the WHO Department of HIV/AIDS led the development of these guidelines in collaboration with UNICEF, UNFPA, UNESCO and GNP+. The evidence assessment for these guidelines included three complementary areas of work—systematic reviews, descriptive reports of community consultations and supplementary literature reviews of published and unpublished studies not included in the systematic review, and programmatic experience. This document presents a synthesis of the findings of that work as well as the expert opinion of the Guidelines Development Group and peer reviewers.

1.4.1 Systematic reviews of the evidence

Researchers developed search protocols and undertook systematic reviews of the available scientific evidence. Design of the search strategies employed in the systematic reviews, meta-analyses and GRADE profiles followed methodology described in the Cochrane Handbook for Systematic Reviews of Interventions *(31)*.

The systematic searches for studies relevant to the PICO questions were conducted online using common electronic databases (see Annexes 3 and 4). The quality of evidence and the strength of recommendations were assessed using the GRADE methodology *(32, 33)*. The GRADE process was used for all of the PICO questions, but it was not possible to develop relevant GRADE profiles for every question because there was a significant lack of GRADE-able research on the topic of adolescents and HTC, adherence to treatment and retention in care.

1.4.2 Values and preferences, literature reviews and programmatic experience

Commissioned qualitative work explored the values and preferences of adolescents with regard to HTC and of health-care providers who provide HTC services to adolescents. The full report (see Annex 10) documents findings gathered through workshops in two countries with generalized epidemics and one country with a low-level/concentrated epidemic, a multi-regional anonymous e-survey and interviews with selected service providers in the three countries where workshops were conducted. Similarly, a multi-regional anonymous e-survey of ALHIV explored their experiences with ART, disclosure and care and support services as well as their views on the health providers with whom they interact (see Annex 11 for full report).

Literature reviews of published and unpublished studies provided additional detail about HTC, adherence to HIV treatment and retention in HIV care.

Programmatic experience and observational studies have been used to illustrate the operational aspects of the recommendations, highlighting key inputs and processes for improving the access and effectiveness of HTC and treatment and care services for ALHIV. Case studies and programmatic data provide additional detail and value to the guidelines by documenting experiences in real programme and routine care settings, as contrasted with findings from research. They offer some insights into successful implementation of programmes designed specifically for adolescents, explaining why and how they worked and the types of challenges faced during implementation of activities.

1.4.3 Expert consultation and development of recommendations

WHO convened an expert consultation in October 2012 in Harare, Zimbabwe, to make recommendations regarding HTC, treatment adherence and retention in care for adolescents. Participants assessed the evidence for each PICO question, along with the risks and benefits associated with each possible recommendation, and reached consensus on recommendations. Disagreements were resolved through continued debate and revision of the recommendations to provide additional precision or qualifications not included in the original PICO questions.

The final recommendations and advice take into consideration the quality of the evidence, estimated costs, feasibility of implementing the recommendations and the values and preferences of adolescents who represent those whose lives will be affected by the guidelines and of their health-care providers.

Following the consultation, the full draft guidelines were prepared and circulated to the Guidelines Development Group and other international experts for comments that were incorporated into the final draft of the guidelines.

1.4.4 Scope of the guidelines

Health services in low-resource settings face the greatest challenges in providing services tailored for adolescents and may benefit most from the guidance presented here; however, as it is relevant for all HIV epidemic and economic settings, it should be considered global guidance. Regional and national meetings can be conducted to adapt these global recommendations to local needs, HIV epidemic context and existing services to facilitate implementation.

1.5 Evidence assessment

The development of a recommendation is guided by the quality of available evidence. Other factors affect whether recommendations are strong or conditional, especially when available evidence is of insufficient quantity or quality.

How to interpret the quality of evidence

In the GRADE assessment process, the quality of a body of evidence is defined as the extent to which one can be confident that the reported estimates of effect (desirable or undesirable) available from the evidence are close to the actual effects of interest. The usefulness of an estimate of the effect (of an intervention) depends on the level of confidence in that estimate. The higher the quality of evidence, the more likely a strong recommendation can be made. However, it is not always possible to prepare GRADE profiles for all research on interventions because of a lack of data and information to calculate the necessary risk ratios or because the evidence available to the GRADE methodologists is indirect.

The GRADE approach specifies four levels of quality of evidence *(34)*, as shown in Table 1.

Table 1. Significance of the four GRADE levels of evidence

Quality level	Definition
High	We are very confident that the true effect lies close to that of the estimate of the effect.
Moderate	We are moderately confident in the effect estimate: The true effect is likely to be close to the estimate of the effect, but there is a possibility that it is substantially different.
Low	Our confidence in the effect estimate is limited: The true effect may be substantially different from the estimate of the effect.
Very low	We have very little confidence in the effect estimate: The true effect is likely to be substantially different from the estimate of the effect.

Values and preferences among the groups of interest for the guidance (adolescents) or views of the Guidelines Development Group based on technical expertise or programmatic experience may differ with regard to desired outcomes, or there may be uncertainty about whether the intervention represents a wise use of resources. Despite clear benefits, it may not be feasible to implement a proposed recommendation in a particular setting. A judgment must then be made regarding the strength of the recommendation.

1.6 Strength of recommendations

The strength of a recommendation reflects the degree of confidence of the Guidelines Development Group that the desirable effects of adherence to or implementation of the recommendation outweigh the undesirable effects. Desirable effects may include beneficial health outcomes (e.g. reduced incidence of HIV and reduced morbidity and mortality); benefits from service delivery (e.g. increased uptake of HIV prevention services, improved uptake of and retention in treatment and care services and increased adherence to treatment); less burden on the individual and/or health services; and potential cost savings for the individual, programme and/or health system. Undesirable effects can affect health services, individuals or families. Additional burdens include the costs of implementing the recommendations that programmes, care providers or patients have to bear, such as infrastructure modifications, increased training requirements for providers working with adolescents, relationship difficulties for adolescents receiving a positive diagnosis or legal complications where certain practices are criminalized.

A strong recommendation (for or against) is one for which there is confidence that the desirable effects of adherence to the recommendation clearly outweigh the undesirable effects, or clearly do not.

A conditional recommendation (for or against) is one for which the quality of evidence is low or may apply only to specific groups or settings; or the panel concludes that the desirable effects of adherence to the recommendation probably outweigh the undesirable effects or are closely balanced, but the panel is not confident about these trade-offs in all situations. Reasons for not being confident can include: absence of high quality evidence, presence of imprecise estimates of benefits or harms, uncertainty or variation regarding how different individuals value the outcomes, small benefits and benefits that may not be worth the

costs (including the cost of implementing the recommendation). ***A conditional recommendation is not a recommendation against doing something.*** Instead, interventions based on these recommendations should be monitored closely and evaluated rigorously. Further research is needed to address the uncertainties and is likely to provide new evidence that may change the calculation of the balance of trade-offs.

Table 2. Additional domains considered in assessing the strength of recommendations

Domain	Rationale
Benefits and risks	When a new recommendation is developed, desirable effects (benefits) need to be weighed against undesirable effects (risks), considering any previous recommendation or an alternative. The larger the gap or gradient in favour of the benefits compared with the risks, the more likely that a strong recommendation will be made.
Values and preferences (acceptability)	If the recommendation is likely to be widely accepted or valued highly, it is likely that a strong recommendation will be made. If there is a great deal of variability or strong reasons that the recommended course of action is unlikely to be accepted, it is more likely that a conditional recommendation will be made.
Costs/financial implications	Lower costs (monetary, infrastructure, equipment or human resources) or greater cost-effectiveness will more likely result in a strong recommendation.
Feasibility	If an intervention is achievable in a setting where the greatest impact is expected, a strong recommendation is called for.

2

RECOMMENDATIONS AND RATIONALES[1]

2.1 HTC for adolescents

Two topics crosscut all issues addressed by these guidelines: the age of consent to testing and the recognition that adolescents from key populations must be a particular focus for increasing the accessibility and acceptability of HTC services for this age group.

The three recommendations on HTC and adolescents are then presented along with a summary of the evidence and a summary of the Guideline Development Group's discussion and other considerations. The evidence includes the systematic GRADE review of selected studies and the values and preferences obtained from community consultations and the e-surveys with adolescents and service providers. The summary of the discussion at the expert meeting in Harare is complemented by the findings of a review of published and unpublished studies and reports related to HTC and adolescents as well as contributions from peer reviewers.

2.1.1 Consent to HIV testing

Health-care decision-making requires individuals to exercise their right to independent decision-making. In most settings, however, adolescents' rights are limited, although the exact nature of this limitation varies considerably from country to country. In some settings, a regulatory framework on informed consent does not exist, while in other settings, the adolescent's rights are governed by a regulatory patchwork.

AGES OF CONSENT IN SOUTH AFRICA

In South Africa, different threshold ages of consent apply to HIV-related services such as treatment, surgery, voluntary medical male circumcision, provision of pharmaceutical drugs, contraception, and HIV testing. Consent for an HIV test on a child (defined in South Africa as an individual who is less than 18 years of age) may be given by (a) the child, if the child is either (i) 12 years of age or older or (ii) under the age of 12 years and of sufficient maturity to understand the benefits, risks and social implications of such a test; (b) the parent or caregiver, if the child is under the age of 12 years and is not of sufficient maturity to understand the benefits, risks and social implications of such a test. Thus, the child's legal capacity to consent to an HIV test depends upon the child satisfying particular biological (physical age) and cognitive ("sufficient maturity") criteria. Similarly, other countries consider both biological and cognitive criteria under "stage of development" assessments, and recognize the child's autonomy if the child demonstrates qualities implicit in a "mature minor" or "emancipated minor" (See Annex 15).

While stipulation of different ages of consent and qualifying criteria are intended to protect adolescents, policy-makers must carefully consider whether and how such pre-qualifying criteria could affect their access to health services. To this end, policy-makers should review their existing regulatory frameworks governing adolescent health care with a view to ensuring regulatory harmonization and facilitating linkage to care. For example, an adolescent who possesses the legal right to access HTC should have autonomous access to HIV prevention and treatment modalities as part of linkage to comprehensive care. Authorities should also consider especially how to facilitate access to HTC and linkage to care for orphans and vulnerable adolescents, including those living on the streets, adolescents in child-headed households, and particularly vulnerable adolescents from key populations, girls engaged in sex with older men and in multiple or concurrent sexual partnerships, and adolescent girls affected by sexual exploitation.

1 Decision-making tables in Annex 8 summarize the basis upon which the recommendations and suggestions are made.

Authorities should also consider the role of surrogate decision-makers in HTC. In some settings only parents or guardians may consent to a child accessing HTC. In contrast, in settings such as South Africa (see box on previous page), a child may self-consent to HIV testing if he or she is 12 years of age and above, or, if under 12 years of age, the child is of sufficient maturity to understand the benefits, risks, and social implications of a HIV test. However, for children under the age of 12 with insufficient maturity to understand the benefits, risks, and social implications of a HIV test, a parent or caregiver must give consent for the test. The recognition of a caregiver as a surrogate decision-maker for children in relation to HIV testing recognizes that the absence of a parent or guardian should not serve as a barrier to a child accessing HTC, if the child has a caregiver (a caregiver is defined in South African law as any person other than a parent or guardian who factually cares for a child).

Authorities should also bear in mind their legally binding obligations in respect of children under international law. In particular, Article 3 of the 1989 Convention on the Rights of the Child (CRC) states:

> In all actions concerning children, whether undertaken by public or private social welfare institutions, courts of law, administrative authorities or legislative bodies, the best interests of the child shall be a primary consideration.

Article 24 of CRC states:

> 1. States Parties recognize the right of the child to the enjoyment of the highest attainable standard of health and to facilities for the treatment of illness and rehabilitation of health. States Parties shall strive to ensure that no child is deprived of his or her right of access to such health-care services.
>
> 2. States Parties shall pursue full implementation of this right and, in particular, shall take appropriate measures:
> … (b) To ensure the provision of necessary medical assistance and health care to all children with emphasis on the development of primary health care.

Respecting these obligations entails facilitating adolescent access to HTC and linkage to care.

2.1.2 Key populations

In the context of these guidelines, **key populations** are defined as those populations at higher risk of HIV (those populations disproportionately affected in all regions and epidemic types, including sex workers, men who have sex with men, transgender people and people who inject drugs).

These guidelines specifically address adolescent key populations, ages 10–19 years. In addition to the groups mentioned above, other adolescents who are vulnerable to HIV include adolescents who are sexually abused and/or exploited and those in prisons and other closed settings.

Sex work by definition involves only adults. The involvement of children and adolescents under 18 in sex work is classified as sexual exploitation by and engagement in commercial sex.

There has been little explicit focus on the particular needs of adolescents within the groups considered most at risk for HIV. Four groups of adolescents considered to be most at risk for HIV (referred to as adolescents from key populations) are adolescent males who have sex with men (MSM), adolescents who are sexually exploited (and those ages 18 years and over engaged in sex work), adolescents who inject drugs (PWID) and transgender (TG) adolescents (male and female). Other groups of adolescents, especially in generalized epidemics, are also at higher risk of infection. These include adolescents affected by AIDS (orphans and children of chronically ill caregivers) *(35)*, clients of sex workers, the partners of these clients, HIV-negative partners in serodiscordant couples and, in high-prevalence settings, girls who are being sexually exploited by older men or having sex with adolescent MSM *(36)*. Programmes need to find ways to reach out to sexually active adolescents (whose STIs and unintended pregnancies indicate unsafe sexual practices) through tighter integration of HIV screening with sexual and reproductive health (SRH) services. Programmes also need to take into consideration the differing age-related capacities of adolescent members of key populations to access services.

Often there are policy and legal barriers to providing services for young key populations. In some cases certain behaviours and sexual orientations are criminalized, and in other cases restrictive education policies or conditions such as requirements for schools to disclose the HIV status of learners or lack of educators with training to provide counselling or support need to be reviewed and amended.

Given their marginalized social position and their reluctance to attend diagnostic and treatment services due to fears of stigma including possible legal consequences, increased access to HTC for adolescents from key populations is a priority in all epidemic settings.

2.1.3 Recommendations—HTC for adolescents

❶ HIV testing and counselling *with linkage to prevention, treatment and care* is recommended for adolescents from key populations in all settings (generalized, low and concentrated epidemics). *Strong recommendation, very low quality evidence*

❷ In generalized epidemics, HIV testing and counselling *with linkage to prevention, treatment, and care* is recommended for all adolescents. *Strong recommendation, very low quality evidence*

❸ In low and concentrated epidemics, HIV testing and counselling *with linkage to prevention, treatment and care* is recommended to be made accessible to all adolescents. *Conditional recommendation, very low quality evidence*

All three recommendations pointedly emphasize *linkage to prevention, treatment and care*. Health workers will likely face greater challenges ensuring adolescents are appropriately linked to services following HIV testing, than they face working with children who are accompanied by caregivers or when working with adult patients—who usually have more ability, experience and maturity to seek out and take responsibility for their care.

Any intervention related to counselling, care and support for adolescents must include elements of sexuality education. Furthermore, adolescent sexuality should be treated in a positive, non-judgmental way with all adolescents, regardless of their HIV status *(37, 38, 39)*.

Expansion of HTC for adolescents will identify greater numbers of horizontally infected individuals; even if many of them do not immediately require treatment, health services will be challenged to make sure that this group consistently accesses prevention, care and support services over the long term. For all ALHIV who are enrolled in treatment, linkage to services for adherence support and for retention in prevention, care and support will be essential.

Summary of the evidence

The particular characteristics and needs of adolescents often cannot be addressed by applying guidelines based on evidence and recommendations relating to paediatric or adult populations. Furthermore, adolescents themselves are not a homogeneous group. Physical and psychological (cognitive and emotional) development varies among adolescents, and differing social and cultural factors as well as their evolving capacities can affect both their ability to make important personal decisions and their access to services. For these reasons guidance should take into consideration the range of adolescents' needs and issues. As little research has been conducted related to HTC among adolescents and adolescents living with HIV to date, these guidelines have given considerable weight to expert opinion, the values and preferences of adolescents and health-care providers, and the field experience of practitioners.

Systematic review: summary of main results

See Annex 3 for the full report of the systematic review related to HTC for preventing HIV transmission and improving uptake of HIV treatment and care in adolescents.

Few randomized controlled trials (RCT) were found examining the impact of HIV testing on outcomes important to adolescents and young adults in either generalized epidemic settings or high-risk populations in low-level epidemics.

Generalized epidemic settings

In generalized epidemic settings there are no randomized trials conducted specifically among adolescent populations. However, indirect evidence, from RCTs conducted among adults, found that HTC is effective at reducing unprotected sexual intercourse with non-primary partners and reducing STI incidence among those at risk for HIV infection. Additionally, enhanced post-test counselling that includes community support agents is effective at improving uptake of pre-ART care among patients with HIV.

With new evidence to support treatment as prevention and the potential of potent antiretroviral regimens to reduce HIV-related morbidity and mortality, more data are needed on the impact of different HTC strategies on HIV incidence and linkage to HIV care for adolescents with HIV. Most data on the effectiveness of HTC are based on a voluntary counselling and testing (VCT) model that includes personalized risk assessment and development of a personalized risk reduction plan for each client. Interventions using brief discussions instead of such personalized counselling need further evaluation. Furthermore, data are needed on the most cost-effective strategies for testing adolescent populations, whether in facilities or in the community. Data are needed also on effective strategies to link adolescents who test positive to HIV treatment and care, and those who test negative to prevention services and commodities.

Low-level or concentrated epidemic settings

HTC has demonstrated efficacy in generalized settings among adults. In low-level epidemic settings among high-risk youth, sub-analysis of one RCT found that HTC reduced the incidence of STIs among heterosexual adolescents attending STI clinics. This interactive risk reduction counselling includes personalized risk assessment and risk reduction plans. This intervention has not been studied, however, in several important high-risk populations, including young MSM and

homeless and substance-abusing youth. The applicability of these data to such key populations of adolescents in low-level epidemic settings is unclear; there may be a need for specialized counselling and community outreach due to higher risk behaviours and lack of HIV knowledge. Data from another RCT among youth in community-based substance abuse services support the effectiveness of rapid, oral, point-of-care testing technologies in improving the uptake of HIV, HBV, and HCV testing. This may prove a model for high-risk populations. No studies evaluated the impact of HIV testing among adolescent populations in low-level epidemics on HIV incidence, morbidity and mortality. More data are needed from and about young MSM and other adolescent key populations on the efficacy of HTC interventions on outcomes important to patients and on linkage to care.

Quality of evidence

In this analysis the quality of evidence from RCTs varied from very low to moderate in generalized epidemic settings and from low to very low in low-level epidemics. The quality of evidence was moderate for the outcome of STI incidence, based on one RCT *(40)*, which was downgraded only for indirectness due to a largely adult population. However, for all other outcomes in both generalized and low-level epidemics, evidence from RCTs was either of low or very low quality, downgraded for imprecision (few participants and events) and indirectness (evidence from largely adult populations, or self-reported behavioural outcomes). Additionally, one study was also downgraded for indirectness, as the population was sick, hospitalized inpatients *(41)*.

In this analysis the quality of evidence from the observational studies was very low, downgraded for serious study design limitations (no comparator), imprecision (few participants and events), and indirectness (self-reported behavioural outcomes, or evidence from largely adult populations).

Values and preferences: HTC

A study of the values and preferences of adolescents and service providers facilitated the participation of those who will be most affected by improved access to HTC and to ensure that their perspectives were included in the guidelines development process (see full report in Annex 10). A series of 10 workshops, involving 98 participants (ages 15–24 years) was conducted in the Philippines, South Africa and Zimbabwe. An online survey was also conducted in four languages to ensure a broader geographical representation of the values and preferences of adolescents regarding HTC; 655 respondents from 92 countries completed the survey. Interviews with 16 service providers from various health-care settings in three countries were also conducted.

Motivations for and deterrents to testing

In community consultations in the Philippines, South Africa and Zimbabwe, young people (15–29 years) reported that, in spite of various barriers to testing, they recognize the benefits of testing and knowing their HIV status, including the autonomy it demonstrates in taking decisions about their own health and survival. They talked about taking control of their lives, the importance of looking after their own health, the need to *"take the right steps"* when receiving a positive diagnosis and, if the result is negative, being able to get the support and advice that they need to remain negative. Many participants mentioned a sense of responsibility to themselves, their partners, their families and society as a motivation for testing. Starting a new relationship was mentioned as a motivation by 15% of respondents of the survey, and 40% found that being offered HTC while seeking other health services was a useful motivator to testing. One of every six survey respondents indicated that encouragement from others was an important motivation for seeking a test.

At the same time, a number of participants talked about feeling pressured or required to test by parents or partners, while one participant made a stronger statement about pressure from heath providers: *"They don't treat you if you don't get tested when you are sick."*

The greatest barrier to testing for all participants is fear—of the process, of the result, of their parents' reactions, of disruption to their educations, of death. Almost 9% of young MSM and who had taken a test reported that they live with considerable fear that their parents will be informed; this was twice the rate of other male respondents. In contrast to findings from other countries, South African participants were very specific about the burden of living with HIV in terms of the changes to one's lifestyle: having to use condoms, adhere to ART, eat healthy foods and regularly attend clinic. Filipino participants observed, *"HTC seems so burdened with negatives"*, which can be a considerable deterrent to testing.

One of the main deterrents to testing is the potential to experience stigma and discrimination. Workshop participants repeatedly mentioned the expected consequence of being rejected, if the result is positive, by friends, family and the community as a reason for reluctance to seek a test. Concerns about stigma and its consequences were also evident in e-survey responses: 16% of tested respondents listed being afraid of what others may think as a concern when deciding to test. This concern was more evident (27%) for those who identified as MSM.

All workshop participants agreed that the lack of testing facilities is a barrier to access. Specific issues included location, costs, long waiting times and limited hours of operation. Some felt that there were not enough health staff and other resources to tend to all those who needed assistance. Regarding access, 27% of online respondents reported that they would like to get tested but did not know where to get tested or had not had the opportunity to test (34%). Only 17% of the 351 online respondents who had taken an HIV test reported referral and linkage to care following the test (regardless of test result), while 70% received no onward referrals and 13% did not answer the question.

Adolescents and young adults: improving access to and uptake of HTC for adolescents

Workshop participants and survey respondents offered suggestions for improving access to and uptake of HTC by adolescents. They proposed options for consideration at four different levels:

- **Engaging the community.** It is important to *"captivate young people"* in their own environment and to *"make testing less scary"*. Awareness-raising events and activities can be designed specifically for adolescents in places that are comfortable for them, such as schools, nightclubs, sporting venues and churches. Other suggestions for engaging the community included the involvement of celebrities and peers living with HIV as public role models and advocates for testing. This strategy depends significantly on the availability and accessibility of accurate and complete information and optimal use of social media, libraries and mass communication channels. "Normalization" was often mentioned as an essential step toward increasing understanding and decreasing stigma related to HIV and HTC.
- **The role of health service providers.** Adolescents consider it very important to be able to relate to the person providing HTC. In ideal situations this might mean engaging adolescent and ALHIV peers as health educators and HTC providers, thus bridging the gap between adolescents and health services. Above all, there is a need for respectful, accepting, friendly, understanding and supportive providers to encourage adolescents to test.
- **HTC service delivery.** Participants in the workshops consider the service environment as very important for adolescents seeking HTC. This includes several components: a youth-friendly atmosphere, flexible hours, separate waiting areas for adolescents, alternative service delivery settings (e.g. schools,

social centres and mobile services) and the assurance of confidentiality, which might include the option for self-testing.
- **Improvements to the health system.** These included increasing the number of testing sites (addressing capacity as well as issues of proximity/rural access), reducing fees and other costs of testing and strengthening referrals from community organizations and rural health clinics.

Service providers: improving access to and uptake of HTC for adolescents

Service providers recognize that adolescents in many settings can be at high risk of HIV infection, and they consider effective and accessible services for adolescents a high priority. At the same time providers note that policies and services concerning HTC often are not geared specifically towards adolescents, and the needs of this group are underserved.

Providers acknowledge that interactions with adolescents are challenging and emotionally draining. They attribute some of this to cultural norms or societal views concerning HIV and sex, the influence of religious restrictions and widespread stigma and discrimination. Many providers also note a lack of appropriate training in specific skills needed for working with adolescents. Additionally, understaffing is considered a problem in many places, preventing providers from spending the time required to address adolescents' particular needs and often resulting in long queues and waiting times that could discourage adolescents from testing. Expanding access to HTC through decentralization and greater involvement of community-based organizations could help to alleviate the pressure of workforce shortages in formal health facilities. Adolescent-friendly approaches that are centred on adolescents' own particular communities could increase the acceptability of services for adolescents, (especially for key populations). This might be easier to deliver through community-based organization than in larger or more formal facilities.

Many service providers raised the issue of age of consent. Inconsistencies in the practical application of consent laws emerged as significant concerns, even in South Africa where adolescents can get tested at age 12. Some providers noted that age of consent in their facilities was higher than that of the national law, while others admitted acting in defiance of the law *"to do what is best for the adolescent"*. There are concerns about having to choose between complying with the law and testing an underage adolescent, and facing the possible consequences of either choice. Some adolescents have no parent or guardian, while some seek services with an adult claiming to be their parent. Laws must be clarified and providers must be trained to adhere to laws or official guidelines while acting in the best interest of their adolescent clients.

Service providers suggested some strategies for improving access to and uptake of HTC for adolescents, including:
- **education** of adolescents to increase awareness and reduce the fear surrounding testing
- **adolescent-friendly testing environments**
- **involving adolescents** in the design and delivery of services
- **clarification of legal issues**, especially with regard to consent.

Summary of the expert panel discussion and other considerations

This section documents the key points raised during the discussion on HTC at the expert meeting in Harare as well as feedback and inputs provided as part of the review process.

Adolescence

Adolescents are less likely than adults to be tested and less likely to be linked to services if they test positive. Also, HIV-negative adolescents who have been tested

are frequently not actively linked to prevention services supporting them to remain HIV-negative.

People responsible for HIV programming need to understand that the changes that take place during adolescence affect:

- how adolescents understand information;
- what information and which channels of information influence their behaviour;
- how they think about the future and make decisions in the present;
- how they perceive risk in a period of experimentation and first-time experiences;
- how they perceive sex, which is common during late adolescence;
- how they form relationships, respond to the social values and norms that surround them, and are influenced by the attitudes (or perceived attitudes) of their peers and others.

It will be important for programme managers to ensure that interventions are modified as necessary to reflect the particular range of characteristics of adolescence and different sub-populations within the adolescent population, e.g. younger/older, male/female, and adolescents from key populations.

The "ecology" of the adolescent is, for most adolescents, the family and the community. Schools are especially important as educators have an important role to play in promoting HTC. Parents and guardians must be educated and be willing to support their child being tested (and accompanying the adolescent for testing if she or he chooses). The broader community needs a better understanding of the importance of testing as well as the importance of respecting the rights of adolescents, including the right to confidentiality. However, while efforts to enlist the support of parents are important, parents' involvement is not always beneficial and some adolescents will need additional support. This is especially true for adolescents from key populations who may be estranged from their families and who define their family and community very differently from other adolescents.

HIV testing

Testing should not be viewed as an end in itself. There need to be clearly defined linkages to post-test support services for both adolescents with and without HIV. Tracking and monitoring of service provision are also important.

Lack of linkages between testing and subsequent care discourages adolescents from seeking HIV testing in the first place. Post-test support is particularly important for adolescents, and standards for quality post-test counselling are needed. The potential adverse outcomes of inadequate or poor quality post-test counselling must be avoided. More guidance is needed on effective approaches to counselling (pre- and post-test), testing, links and pathways to prevention, treatment, care and protection.

Cost-effectiveness is important to deciding how to implement these guidelines. Expanding access to HTC is the overarching goal, but this does not imply that all adolescents should be tested regularly. Programmes should be informed by context-specific epidemiology to facilitate optimal use of resources. In all settings, HTC should be available to any adolescent who wishes to test. In settings with generalized epidemics, efforts should be made to increase access to HTC for all adolescents, and in all settings priority should go to providing services for adolescents from key populations. In settings with low-level or concentrated epidemics, it is important to understand groups that are disproportionately affected by or more vulnerable to HIV and encourage them to create demand for the uptake of HTC amongst their communities. "Test-for-the-test" risk assessments

and other screening tools are available to identify adolescents who may be at risk *(42)*. However, some adolescents, particularly those who are homeless or orphans, may have been sexually abused; they may not consider this abuse to be "sex", or they may be unable or reluctant to talk about it. This can make effective and predictive risk screening difficult. For all who test, consistent follow-up is necessary, including systems to track those lost to follow-up. It is also important to promote better integration of HTC with SRH services, especially for adolescents whose STIs and unintended pregnancies indicate their high-risk sexual behaviour. A better understanding of the extent of forced sexual activity among adolescents is needed, and better linkages between HTC and protection services are needed to refer those who have been the victims of violence and sexual abuse. When HTC uncovers issues of sexual abuse, there must be mechanisms to alert protective services to ensure that adolescents do not return to abusive settings.

Offering routine testing in clinical settings in generalized epidemics—that is, provider-initiated testing and counselling (PITC)—is particularly important for 10–14 year old adolescents so as to identify both slow progressors and symptomatic adolescents who have not yet been diagnosed despite clinical contacts. Both groups urgently need to be diagnosed so that they can be linked to treatment and care. However, providers must take care to avoid the misinterpretation of PITC as mandatory testing and to facilitate adolescents' ability to opt out of testing.

Ministries of health need to develop standards, guidance, models, monitoring and supervision protocols and accountability and recourse mechanisms.

Consent to testing

Studies have shown that requiring parental consent to HTC services might reduce adolescent access because of perceived negative reactions from parents/guardians or health-care providers and the fear of HIV-related stigma *(43, 44)*. Adolescents may opt not to seek care because they want to avoid telling their parents about their health problems and sexual activity *(45)*.

Some caution is advised: if the legal age of consent to HTC is too definitive and prescriptive, it may be more difficult for health workers to use their judgment when dealing with individual cases, as many currently do. Furthermore, the advantages of parental involvement and parental consent to facilitate psychological support—that is helpful for treatment adherence and retention in care—must be balanced with the negative aspects of required parental consent when parents/guardians are not supportive or when adolescents fear abuse or other adverse outcomes with regard to parents/guardians.

Current consent policies are a key barrier to uptake of services by adolescents.[1] Countries should consider how best to address these issues within their own legal and social context and how, in general, to lower the age of consent for HTC. A range of issues need to be considered, including options for which persons can provide consent on behalf of a minor, e.g. an older sibling or relative.[2] Where countries have lowered the age of consent to 12 years (e.g. Lesotho and South Africa), access to and uptake of HTC by adolescents has increased without adverse consequences (South African Ministry of Health, personal communication, 2013).

Countries are encouraged to examine their current consent policies and consider revising them to reduce age-related barriers to access and uptake of HTC and to linkages to prevention, treatment and care following testing.

1 See Annex 15 for a review of the current situation with regard to consent in sub-Saharan Africa.

2 In the case of parental death, guardianship is often not legally conferred, but tends to be the head of the household with whom the adolescent is living at that time.

Directness of evidence

Some experience with adults regarding expansion of access to HTC could be applicable to adolescents, with appropriate modifications made to adult-oriented services. However, certain issues, especially concerning age of consent, will require careful consideration and policy review to ensure that the needs of adolescents are being met and that their rights are being protected.

Benefits of HTC

Adolescents are underserved, and changes in the systems that deliver HTC, treatment and care services are needed to prioritize appropriate and acceptable care for adolescents. It is expected that increased uptake of improved services—including linkages to prevention, treatment and care—by adolescents will have benefits for the individual as well as for public health.

Increasing uptake of HTC by adolescents

Routine PITC, home-based HTC and rapid testing may help to increase uptake of HTC services among adolescents, especially for slow progressors and pregnant adolescents. In low-prevalence settings, where infection is often acquired sexually and is concentrated in key populations, outreach or special venue-based HTC services may better serve these adolescents who may be socially marginalized and have limited access to conventional clinic services as well as potentially facing considerable risk of discrimination and legal consequences.

Many adolescent women, who make up a high percentage of the pregnant population, are already being tested in PMTCT programmes.[1] Lessons from the successful scale-up of HTC in antenatal care (ANC) programmes can be applied to the development of routine testing programmes for adolescents, particularly in sub-Saharan Africa (in the Asian context, low coverage of PMTCT and ANC limit these opportunities). Some data suggests that adolescents are more likely to drop out of care after delivery than adult women. This should be addressed through youth-friendly linkages and retention-in-care programmes. PMTCT services often find it a challenge to provide referral and adequate preventive services to adolescents testing negative (G. Hainsworth, Pathfinder, personal communication, 2013).

Adolescents consistently indicate preferences for compassionate, friendly, and competent staff; counselling linked with testing and other services along the continuum of HIV care; and rapid testing free of charge.

The main barriers to testing include stigma and discrimination, perception of low HIV risk, fear of knowing one's HIV status and of living with HIV.

Approaches to increasing uptake of HTC that require further research include pre-test risk reduction education, social networking, computerized testing prompts, adolescent-friendly services, and outreach HTC services accompanied by motivational interviewing. Self-testing kits also may expand options for adolescents who are reluctant to seek any type of HTC services; research will also be needed to determine the effectiveness of this approach with this population.

1 About 16 million women 15–19 years of age give birth each year—about 11% of all births worldwide. See http://www.who.int/maternal_child_adolescent/topics/maternal/adolescent_pregnancy/en/index.html

Key populations

In all epidemic settings, accessible and acceptable HTC services must be available for adolescent key populations, and provided to them in ways that do not put them at risk.

Although the emphasis in low- and concentrated epidemics should be on providing acceptable HTC for adolescents from key populations, HTC services should be available to any adolescent who wishes to test. In low-level and concentrated epidemics, key populations are the most at risk, but it is important to ensure that they do not feel set apart or vulnerable to marginalization. Among the different epidemic settings, the delivery of testing and other services should take into consideration the social and legal environment of key populations, other socio-cultural factors for adolescents in general, and cost-effectiveness in different settings. Interventions to adapt delivery of services include outreach to places where adolescents from key populations congregate, social networking, and snowballing techniques to contact these adolescents in safe and acceptable ways.

Some countries have heterogeneous or mixed epidemics—where in some regions of a country the HIV epidemic is generalized, while in others it is concentrated. In many countries with generalized epidemics, there are also significant, more acute epidemics among adolescents from key populations. In resource-constrained countries it will be especially important to distinguish among sub-national epidemics to avoid misallocation of scarce resources. At the same time, targeting key populations can be extremely stigmatizing. For this reason it is essential that everyone has access to testing. In concentrated epidemics, testing should be available to any adolescent who requests a test; however, it is usually not cost-effective in these settings to conduct campaigns promoting testing to the general public.

Adolescents from key populations are frequently among the most underserved groups in society. Few health workers, or policy-makers in particular, address the needs of these groups—and most fail to acknowledge these adolescents at all—thus limiting services and policies to people 18 years of age and above.

Although key populations commonly refers to MSM, transgender people, sexually exploited adolescents, MSM and PWID, in many settings, particularly in generalized epidemics, other population groups such as adolescent girls and orphans should be prioritized and included in programme planning because of their increased vulnerability to HIV.[1]

It is essential for each country to understand the epidemiology of its own epidemic, i.e. which groups are most likely to be infected or at risk of infection and face the greatest barriers to accessing health services. These groups will require prioritization for accessible and acceptable testing and additional support.

Operational guidance in this area is urgently needed.

Agreement on the recommendations

Many countries have accreditation processes that require HTC services to provide good referrals/linkages to follow-up prevention, treatment and care, yet most referral systems are inconsistently implemented and rely on passive referrals from HTC sites, and adolescents in particular are not benefiting from appropriate referrals. All recommendations addressing HTC, therefore, include specific mention of

1 Orphans may face particular barriers when caregivers are unaware of the HIV status of a child they have taken responsibility for, or may be reluctant to disclose the status of the child if they do know.

linkages to prevention, treatment and care as an essential component of effective HTC services for adolescents.

For the first two recommendations, the WHO Guidelines Development Group considered the benefits and cost-effectiveness of HTC for all age groups and the urgent need to identify adolescents who require initiation of ART or more effective support for prevention. For that reason, there are strong recommendations regarding expanded access for key populations in all settings and for all adolescents in generalized epidemic settings.

For the third recommendation, there is uncertainty about resource availability and use for HTC interventions in concentrated epidemic settings. Still, the recommendation is considered important to enable adolescents who want to know their HIV status to receive support to do so.

2.2 Adolescents living with HIV: disclosure, adherence and retention

This section covers recommendations regarding support for disclosure by adolescents to others and approaches to strengthen support for adherence to treatment and retention in care, specifically through community-based interventions and training of health workers.

In these guidelines, disclosure refers to disclosure by adolescents to others to facilitate support for managing with a positive diagnosis, retention in care and adherence to treatment, and to reduce the likelihood of new infections.

The issue of disclosure of HIV status to children and adolescents by providers and parents is addressed in the WHO guidelines on HIV disclosure to children. These recommend that children of school age should be told their HIV status and that of their parent/s or caregiver/s; younger children should be told their status incrementally to accommodate their cognitive skills and emotional maturity, in preparation for full disclosure *(46)*. These WHO recommendations therefore apply to adolescents, as full disclosure is recommended for all primary school age children. However, in many settings, adolescents are often not aware of their own HIV status, and this non-disclosure is associated with significantly lower retention in HIV care *(47)*.

For ART to be effective in the long term, it is important that adolescents are supported to adhere to treatment and remain in care. These guidelines examine whether training of care providers can support better adherence and retention. They also review a wide range of community-based approaches and highlight operational issues, which are recommended in the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection (4)*. The recommendation concerning disclosure by adolescents and the two recommendations for improving adherence and retention are presented along with summaries of the evidence and summaries of the Guidelines Development Group discussions. The evidence includes the systematic GRADE review of selected studies and the values and preferences derived from an e-survey of adolescents living with HIV. The summaries of the Guidelines Development Group discussions are accompanied by complementary findings of a literature review of published and unpublished studies and reports related to ARV service delivery for adolescents as well as contributions from peer reviewers. The 13 service delivery recommendations presented in the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection* are also included *(4)*.

2.2.1 Recommendation—Disclosure

❹ Adolescents should be counselled about the potential health benefits and risks of disclosure of their HIV status to others and empowered and supported to determine if, when, how and to whom to disclose. *Conditional recommendation, very low quality evidence*

Summary of the evidence

Systematic review: summary of main results

See Annex 4 for a full report of the systematic review related to disclosure of HIV status by adolescents to others.

Overall, studies of adolescents have found that disclosure was associated with improved clinical outcomes as measured by increased CD4 cell counts *(48)*, decreased number of partners (but not with decreases in unprotected sex) *(49)* and increased distress when disclosure was to acquaintances, but with no statistically significant association with mental health symptoms with disclosure to family or close friends *(50)*.

Seven studies of adults showed disclosure was associated with better linkage to care and ART adherence *(51, 52, 53, 54, 55, 56, 57)*, only one found no association *(58)*. Other studies showed disclosure was associated with higher CD4 counts *(59)*, and nondisclosure was associated with virologic failure at 48 weeks *(60)*. Disclosure was associated with better HIV testing and nevirapine adherence in the infants of mothers who disclosed their positive HIV status to their partners *(61, 62)*, while nondisclosure was associated with suboptimal PMTCT outcomes *(63)*.

Other studies of adults reported on additional outcomes. Disclosure to sexual partners was associated with increased frequency of condom use and reduced number of sexual partners; those who disclosed to HIV-negative partners were significantly less likely to engage in unprotected anal sex compared with those who did not disclose their HIV status *(64, 65, 66, 67, 68, 69, 70)*. One study of adult women of three ethnic groups in the United States of America found no association between disclosure and depressed mood or health-related psychological distress except among Latinas, in whom a modest association was found *(71)*. In four studies of adults, disclosure was associated with higher levels of HIV stigma; women who disclosed to sexual partners reported negative experiences such as anger and blame, including one study where women reported that partners reacted with violence and terminated the relationship *(66, 72, 73, 74)*.

Small group discussions or group counselling supporting disclosure was shown in a trial of adolescents with HIV in the USA to significantly decrease the adolescents' report of unprotected sex, but there was no statistically significant difference in disclosure of HIV status to sexual partners *(75)*. In other studies in the USA, when small group discussions were used to support disclosure by parents with HIV *(75)*, there was no significant increase in disclosure to their adolescent children, and the parents had significantly higher mean depression scores at three months (but no significant difference at 15 or 24 months). Adult MSM living with HIV were no more likely to disclose to a higher number of family members (statistically non-significant) than was the control group *(76)*.

Structured support groups or workshops in Africa were shown to significantly increase disclosure by pregnant women with HIV at two and eight months of follow-up; there was no statistically significant difference in reported depression *(77)*. Another study *(78)* found no significant difference one week after women with HIV participated in empowerment workshops to help them deal with the emotional consequences of keeping their HIV status a secret.

One-on-one counselling significantly increased disclosure by mothers with HIV to their young children in one study *(79)*, but the quality of the evidence is very low.

Peer-led behavioural interventions were shown to significantly increase adult MSM's self-reported motivation to inform sexual partners *(80)*.

Nine additional studies were included, but were not amenable to GRADE analysis because of inadequate data. One study was a disclosure-only intervention *(81)*; the remaining were more comprehensive interventions designed to address multiple issues relating to HIV infection, but included disclosure as part of the intervention.

Small group discussions (adolescents). There was limited evidence from the one adolescent study *(82)* that professionally led small group sessions had a positive effect on the adolescents' mental health.

Small group discussions (adults). A cluster randomized controlled trial of pregnant women with HIV found small group teaching by peer mentors resulted in increased preventive behaviours, decreased maternal depression, and better infant outcomes; no significant effects of the intervention were observed with respect to disclosure of the women's HIV status to their children *(83)*. A randomized controlled trial found professional and peer-led support groups for low-income women with HIV increased condom use but not disclosure of HIV status to sexual partners *(84)*.

Community-based interventions with disclosure component. One study found less loss to follow-up, improved retention in care and improved community-wide promotion of disclosure among adults with HIV who received community-level support from case managers, adherence counsellors and community volunteers, as measured against facility baseline data *(85)*. Another study found that adults with HIV, with support from community health workers, were significantly more likely to disclose their serostatus to family members *(86)*.

Individual counselling-based interventions. One study found that adults with newly diagnosed HIV infection had a significant decrease in depression scores four weeks after assessment and a significant increase in their intention to disclose their status *(87)*. Another study found that adults with HIV who reported unprotected sex with a partner of negative or unknown serostatus all reduced unprotected sex, regardless of their randomized assignment to intervention or control group *(88)*.

Online, computer-based interventions. One study found no difference in the rate of HIV disclosure among MSM (both with and without HIV) after viewing an online intervention designed to promote critical thinking about HIV risk, but were less likely to report a new or casual sexual partner or unprotected anal intercourse than before the intervention *(89)*. Another study found that disclosure behaviours improved in terms of intentions and attitudes among MSM living with HIV after facilitated administration of an intervention tailored for disclosure to casual sexual partners *(81)*.

Values and preferences: disclosure

A study of the values and preferences of young people living with HIV (10–24 years of age) was conducted to obtain the views of those who will be most affected by HIV treatment and care services for ALHIV and to ensure the inclusion of their voices in the guidelines development process (see Part 1, Section 2.2.2 for summary and Annex 11 for full report).

A scoping review indicated that disclosure of HIV status was correlated with increased social support, social self-confidence and decreased problem behaviour. In some studies reviewed it was observed that disclosure of one's positive status to others is a skill that takes time to develop and can be improved through support and instruction by health workers.

The online, anonymous survey did not explore the issue of disclosure specifically, but some of the respondents' comments suggest that support for disclosure may be needed and beneficial for adolescents.

"Privacy is an issue . . . Not all of us are ready to disclose . . . When we queue at a window [labelled with a sign] 'ARVs' . . . everyone can see that we are HIV-positive and that makes the stigma to be worse. . .My family doesn't know yet . . . Teach us how to discuss [our HIV status] with family."

During the workshops in South Africa and Zimbabwe (part of the values and preferences work related to HTC, see Part 1, Section 2.1.3), participants agreed that disclosing one's HIV status is the decision or right of an individual. Opinions were divided, however, regarding whether one should share one's status and with whom. Some participants felt that *"you should share your status with those you can trust"*, as this provided a *"necessary means of support"*, especially for accepting a positive diagnosis. Other participants, notably those in the Philippines and South Africa, felt that "it was better to keep it [HIV status) to yourself". This view reflected concerns that *"someone could use your status against you in the future"* or *"spread it around to others without your permission"*, or that disclosure could result in rejection and loss of relationships.

Service providers interviewed during the community consultations on HTC expressed a more complex perspective than the adolescents. Many admitted that disclosure is very challenging to discuss and is often not adequately addressed with adolescents in pre- or post-test counselling. In the Philippines, some providers felt that guidance or policy on how to address disclosure was unclear or non-existent. While most providers asserted that disclosure was the adolescent's decision, a number of providers advocated disclosure to parents by providers. This was seen as essential for the practical support that most ALHIV will need. Others highlighted the need to take into account the willingness and readiness of each adolescent to disclose.

Summary of the expert panel discussion and other considerations

This section documents the key points raised during the discussion on disclosure among the participants at the expert meeting in Harare as well as feedback and inputs provided as part of the peer review process.

Benefits and risks of disclosure

Support from family and close friends can be particularly important for adolescents who may lack the maturity, experience or resources to cope with a positive diagnosis by themselves. They will be able to access this support only if trusted family members and close friends know their HIV status. From a public health perspective, disclosure is important for prevention of onward transmission.

However, adolescents who disclose their positive status face the potential of stigma, violence and abandonment, often at the hands of the people closest to them. Young married women and adolescent members of key populations may experience this more often and/or intensely than others.

It is important to emphasize that disclosure also comes with different degrees of risk, depending on who is disclosing to whom. Implications of disclosure by an adolescent to others, can include the risk of violence from sexual partners and risk of legal repercussions due to laws that criminalise HIV non-disclosure, exposure and transmission. For members of key populations in particular, disclosure may entail risk of persecution or other legal consequences if it suggests illegal behaviour or practices.

Disclosure to different people

Disclosure to sexual partners and disclosure to parents, friends, peers and others are very different processes, carried out for different reasons with very different implications. The possible support that can be gained from disclosing to a friend or family member can be a critical component of an adolescent's care and is a principle reason that an adolescent may choose to disclose. Disclosure to a sexual partner (either past or future) could provide support, but it could instead have significant negative implications for self-esteem and confidence in one's sexuality and for sexual and reproductive rights, and it is often done from a sense of responsibility.

Prevention of onward transmission

The primary benefits of disclosure should be to maximize support for the adolescent. Disclosure to sexual partners for the sake of their own health should be seen as only one of the ways that an adolescent could choose to prevent onward transmission and, therefore, is not explicitly part of the recommendation. The creation of safe environments for disclosure is the paramount for this recommendation. At the same time and to the extent possible, WHO recognizes that honesty in terms of disclosure to partners is a good stance and part of an adolescent's ethical development. Adolescents should be encouraged to take responsibility for onward transmission in some way, e.g. always using condoms, and partners should have access to post-exposure prophylaxis and emergency contraception if a condom breaks.

Operational guidance is needed for disclosure by adolescents specifically to their sexual partners. This should be considered within a "prevention package" including condom use, PMTCT and attention to legal frameworks and implications.

In general, disclosure to sexual partners is different for adolescents than for adults. Adolescents are often not in long-term stable relationships, and they may not have the knowledge and emotional skills to deal with the difficult issues raised by disclosure to partners, including dissolution of the relationship. Unequal power dynamics that are common among adolescents (e.g. between adolescent women and older partners) may also come into play, leaving the adolescent partner more vulnerable to isolation or abuse following disclosure. Moreover, there are major challenges with ensuring that ALHIV protect themselves and their partners from HIV transmission; e.g. poor or inconsistent condom use is a common problem. Alcohol, drug use, and other high-risk behaviours that often begin during adolescence also may constrain effective disclosure and safe sexual behaviour. Providers need to understand all the issues and dynamics involved with disclosure by adolescents in order to focus on the safety of the individual who is disclosing.

Support for disclosure from health-care providers

Disclosure of one's positive serostatus may involve disclosure about many other aspects of life (particularly for members of key populations). Health workers and peer counsellors need operational guidance on how to support adolescents to make decisions about disclosure, including their right to disclose and *not* to disclose. For adolescents, it is especially important to ensure that anonymous reporting systems are in place to ensure confidentiality and protection. Obligatory disclosure by health workers to authorities can be a powerful deterrent to HTC for members of key populations and other ALHIV. Also, it can lead to loss to follow-up among individuals who have not yet enrolled in treatment and care services, and it can also undermine retention in care for individuals who have already been enrolled in treatment and care. As part of HTC, service providers can discuss the issue of shared responsibility for prevention as well as disclosure of a positive diagnosis if an adolescent with HIV chooses to do this.

Disclosure by adolescents to others requires that they are aware of their own HIV status (see Part 1, Section 2.1.3 for discussion on the importance of HTC). In some cases adolescents may not know that they are living with HIV, even though they may have been diagnosed and may even be on treatment. When parents or other caregivers have not informed a vertically infected adolescent that he or she has HIV, it is possible that the parents may be more concerned about disclosure of their own HIV status than about their adolescent's health and well-being. All adolescents should be informed of their own HIV status, as this has significant benefits. Countries need to ensure that good policies, tools, training and programme support are in place to help health workers inform adolescents of their status when they have not already been told.

In situations where health workers are uncomfortable providing disclosure advice and support, or where there are health workforce shortages or other constraints on health staff, peer educators and community-based organizations could provide valuable support about disclosure.

Legal considerations

The Guidelines Development Group expressed considerable concern regarding the adoption and application of criminal law in relation to HIV and the potential implications of these laws for adolescents living with HIV. Safe and supportive disclosure is possible only in a legal and policy environment where adolescents do not risk harassment or arrest by police due to decisions to disclose or not to disclose their HIV status.

Adolescents are less knowledgeable about the law than their older counterparts. They may have a poor understanding of the legal environment in which they live and lack capacity to obtain legal support. The growing trend to introduce new laws that criminalize HIV transmission and exposure, and the use of existing laws to prosecute people living with HIV, could significantly deter adolescents from disclosing or from accessing services in the first place. An adolescent living with HIV can be much less inclined to disclose if they fear accusation by previous "disgruntled" sexual partners, followed by criminal prosecution. To avoid legal repercussions, individuals can elect not to disclose, denying themselves access to sources of support and links to vital treatment and care services. In such contexts the law continues to hinder access to essential HTC services and, in particular, to deter young people whose understanding of the law is limited. Where non-disclosure of HIV status is criminalized, the safest legal defence is ignorance of one's own serostatus, which is ultimately counterproductive to public health interventions and an individual's right to health and survival.

Other issues

Failure to disclose can be a particular problem among adolescents who are pregnant or delivering. If her partner or supportive family members do not know that a young woman has HIV, she will not have their support for safe infant feeding and uptake of PMTCT interventions and HIV care.

A scoping literature review (Annex 11) emphasized the notion of "skills" for disclosure. Developing these skills requires instruction and support from health-care providers and others. Some of the studies and reports reviewed suggest that disclosure may result in increased social support, self-confidence, and decreased risk-taking behaviour.

Some field practitioners and adolescents have noted that the notion "HIV stops with me" is gaining more importance and acceptability among people living with HIV, where individuals with HIV assume the responsibility to avoid putting someone else

at risk.[1] However, adolescents need to feel safe and protected from discrimination and other adverse consequences following disclosure. Legal, ethical and social issues therefore need to be considered in the context of this recommendation. Where relevant and acceptable, partners/couples counselling and mutual disclosure of serostatus should be considered (including in ANC) *(90)*.

Agreement on the recommendation

Although there was limited evidence on which to base a recommendation, the Guidelines Development Group felt that counselling and support for disclosure are extremely important and are represented in the guidance as a recommendation based on the best judgment of practitioners and advocates working in the field. The recommendation serves as the basis to support further operational research to evaluate approaches to implementation.

2.2.2 Recommendations—Adherence to treatment and retention in care

❺ Community-based approaches can improve treatment adherence and retention in care of adolescents living with HIV. *Conditional recommendation, very low quality evidence*

❻ Training of health-care workers can contribute to treatment adherence and improvement in retention in care of adolescents living with HIV. *Conditional recommendation, very low quality evidence*

Two key types of interventions that could support adherence to ART and retention in care—training of health workers and a range of community-based approaches—were specifically reviewed by the Guidelines Development Group for these guidelines in addition to the interventions recommended in the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection* (i.e. service integration, decentralization, task shifting and mobile text messages) as they related to adolescents.

Summary of evidence

Systematic review: summary of main results

See Annex 4 for full report of systematic reviews related to community-based approaches and training for improved adherence to treatment and retention in care for ALHIV.

Community-based approaches

Overall, findings were a mixture of positive effects and no effects attributable to a range of community-based approaches in different populations and contexts.

Sixteen of the 17 studies amenable to GRADE analysis included adult populations, and one involved only children less than 16 years old. Therefore, the findings of this review may not be generalizable to populations of adolescents. Other concerns are the financial costs of community-based strategies for improving health outcomes of populations with HIV, as well as how to optimize adherence to programme protocols and quality of care provided by community health workers. Also, there may be significant challenges to scaling up community-based programmes for supporting adherence where there is limited infrastructure for monitoring or supporting community health workers.

1 Adolescents in the focus group discussions (FGD) in Zimbabwe expressed this attitude, mentioning a sense of responsibility to themselves, their partners, their families and society (see Section 2.1.3, regarding motivations and deterrents to testing).

The 10 RCTs analysed provided low- to very low-quality evidence for the benefits of community-based interventions and very low-quality evidence for most outcomes due to the observational nature of the studies, the small number of events reported, and indirectness of the populations studied (i.e. adults or children less than 10 years old).

Home-based health assessment, education and support by community health workers. Community-based interventions that included home-based health assessment, education and support by community health workers were associated with better levels of ART adherence in one of three studies *(91)*, with viral suppression in one of three studies *(92)* and reduced mortality rates in two of four studies *(92, 93)*.

mHealth support intervention used by peer health workers at home visits. All studies involved adult populations. Exposure to an intervention delivered by peers and supported by mHealth was associated with greater viral suppression at 96 weeks after initiation of treatment in one study *(94)*. However, no significant association between exposure to an mHealth intervention and virologic suppression was observed at earlier time points *(94, 95, 96)*. None of four studies of mHealth-supported interventions showed an association with ART adherence *(94, 95, 96, 97)*. None of three mHealth studies that examined mortality showed differences in mortality rates between intervention and control groups *(94, 95, 96)*. Although the available evidence suggests that mHealth interventions for peer health workers may have a role in supporting patient adherence and retention in some settings, there is insufficient consistent evidence to give clear guidance on when and how these should be used to best effect. Further research on the impact of mHealth/peer health workers is needed.

With regard to mHealth interventions provided to patients, the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection* provides a strong recommendation to consider mobile phone text messages to adult patients reminding them to take their ART medications. This intervention holds considerable promise for adolescents, too, as mobile phone use is often widespread in low- and middle-income settings. However, careful monitoring and evaluation of this approach for adolescents is needed to ascertain acceptable and effective implementation.

Peer-support interventions. One of three peer-support interventions showed an association with better adherence *(98)*. One study of a peer-support intervention that examined the effect of the intervention on mortality showed no effect *(98)*. One study that examined the effect of an intervention on keeping follow-up appointments found no effect *(99)*.

Socioeconomic support. The one study of a socioeconomic support intervention showed a reduction in mortality *(100)*.

Community-based Directly Administered Antiretroviral Therapy (DAART). Neither of two studies of community-based DAART showed an association with better adherence *(101, 102)*. A study of community-based DAART that examined mortality did not show an intervention effect on mortality *(102)*. However, one of two studies showed an association between receipt of DAART and reduced mean viral load *(103)*. One study that examined community-based DAART showed no effect on retention on the first-line ART regimen *(103)*.

Ten studies were identified for inclusion in this review but presented insufficient information for GRADE analysis; they lacked regression parameters *(104)*, had no comparator or the comparator was not the comparator of interest (i.e. standard care) *(104, 105, 106, 107, 108, 109, 110, 111, 112)* or reported only odds ratios without numerators *(113)*. Therefore, associations are described only briefly below.

Mortality

One observational prospective cohort study of adolescents and adults with HIV (>15 years) at a community-based ART clinic in South Africa reported the probability of death in the first year of ART (7.9%, 95% CI 7.0%-8.9%) and the cumulative probability of death after six years (15.2%, 95% CI 13.1%-17.6%) *(110)*. Male sex, lower baseline CD4 cell count, and WHO stage III and IV were associated with higher mortality risk.

One observational study comparing adolescents with HIV (9–19 years) and young adults with HIV (20–28 years) at a public sector community-based ART programme in South Africa reported similar overall mortality rates—1.2 (95% CI 0.3–4.8) deaths per 100 person-years among adolescents and 3.1 (95% CI 2.4–3.9) deaths per 100 person-years among young adults *(111)*.

One observational retrospective cohort study conducted in Rwanda reported a low mortality rate (5%) at two years following ART initiation among adults with HIV in care at a community-based ART programme *(112)*.

One non-randomized prospective cohort study conducted in Uganda compared treatment outcomes and mortality in a rural community-based ART programme with those in a hospital-based programme in the same district *(108)*. In this study mortality at six months was not significantly different between the cohorts (11.9% versus 9.0%).

Viral failure or viral suppression

One observational study that evaluated outcomes of patients enrolled to a community-based, comprehensive ARV programme in Uganda staffed by peer health workers and nurses reported 86% of active patients (211 of 246 tested) to have a viral load of <400 copies/mL *(107)*. Virologic failure was significantly associated with lack of CD4 response and any history of prior ARV use. No external comparator was included in the study.

One observational retrospective cohort study of patients with HIV in government HIV treatment sites in South Africa found that a significantly higher proportion of patients with a community-based adherence supporter maintained a suppressed viral load of <400 copies/mL at six months of treatment compared with patients without a treatment supporter *(104)*. Also, a significantly greater proportion of patients in care at sites with a community-based adherence supporter services maintained a suppressed viral load and for a longer period compared with patients in care at clinics without a community-based adherence supporter service.

One observational prospective cohort study of adolescents and adults with HIV (i.e. >15 years) at a community-based ART clinic in South Africa reported high rates of virological suppression by 16 weeks after ART initiation and no significant variation between successive years of recruitment *(110)*. Lack of virological suppression was associated with younger age (<25 years) and high baseline viral load (>5 $\log_{10}$ copies/mL).

One observational study comparing adolescents with HIV (9–19 years) and young adults with HIV (20–28 years) at a public sector community-based ART programme in South Africa reported adolescents to have significantly lower rates of virological suppression at 48 weeks than did young adults *(111)*. In addition, adolescents had significantly higher risk of virological failure than young adults, although the association was not significant when the comparison was limited to those perinatally infected.

One observational retrospective cohort study conducted in Rwanda reported a high rate of virologic suppression at two years after ART initiation (97.5% with <500 copies/mL) among adults with HIV in a community-based ART programme *(112)*.

One observational prospective cohort study conducted in South Africa reported high and sustained rates of virologic suppression (<400 copies/mL) over a 3-year period (100%, 92% and 98% for 2002, 2003 and 2004 cohorts) among adults with HIV in care at a public sector community-based ART clinic *(106)*.

One observational retrospective cohort study conducted in Kenya reported that time to treatment failure was significantly longer in patients who participated in peer support groups and/or received home visits than in those who did not *(105)*. Further, risk of treatment failure was significantly lower among patients who participated in support groups than among those who did not.

One non-randomized prospective cohort study conducted in Uganda reported that virologic suppression at six months was not significantly different between patients enrolled in a rural community-based ART programme and patients in care at a hospital-based programme in the same district (90.1% versus 89.3%) *(108)*. However, in a later report *(109)* the authors reported that patients enrolled in the rural community-based ART programme were more likely to achieve viral suppression at two years of follow-up compared with patients in care at the hospital-based programme.

ART adherence

One observational retrospective cohort study of patients with HIV receiving care in government HIV treatment sites in South Africa showed that a significantly higher proportion of patients with a community-based adherence supporter attained a treatment pickup rate of over 95% than patients without a treatment supporter *(104)*.

One observational retrospective cohort study conducted in Mozambique reported that patients who had a treatment partner had significantly higher levels of adherence than patients who had no treatment partner *(113)*. No differences in adherence were observed between patients with community-based treatment partners and patients with self-selected treatment partners.

One observational retrospective cohort study conducted in Kenya reported that a significantly greater proportion of patients who participated in support groups achieved higher mean adherence than patients who did not participate in support groups *(105)*.

Retention in care

One observational retrospective cohort study of patients with HIV receiving care in government HIV treatment sites in South Africa showed that the median retention in care was significantly longer for patients in care at sites with community-based adherence supporter services than for patients at clinics without a community-based adherence supporter service *(104)*.

One observational retrospective cohort study conducted in Rwanda reported a high rate of retention in care two years after ART initiation (92.3%) among adults with HIV in care at a community-based ART programme *(112)*. In multivariate analysis attrition was associated with older age (>50 years). An interaction existed between WHO clinical stage at baseline and sex. Men, but not women, with WHO stage 3 or 4 disease at baseline were more likely to drop out of care than those with WHO stage 1 or 2 disease at baseline.

One observational prospective cohort study conducted in South Africa reported low rates of loss to follow-up over a 3-year period (2.9%) among adults with HIV in care at a public sector community-based ART clinic *(106)*.

Training of health workers

No studies were found evaluating the training of health workers who provide treatment and care to adolescents living with HIV and the effect of this training on adolescent adherence to treatment and retention in care. However, one study using a quasi-experimental design was identified. It evaluated the use of a set of tools to build the capacity of health workers to respond to their adolescent clients effectively and with sensitivity. As there was such limited available published literature in this field, the reviewers also considered studies relating to health workers providing other chronic care to adolescents. Two randomized control trials were found that evaluated the training of health workers providing care to adolescents with other chronic conditions and the effect of this training on quality of care and adolescent health outcomes.

The overall goal of an evaluation in Gujarat, India, *(114)* was to determine whether, for selected reproductive health services in primary health centres, the WHO *Orientation programme on adolescent health for health-care providers* and the WHO *Adolescent job aid* tools would improve the quality of service provision and experiences of care for young female clients, ages 15–25 years. The findings indicated a number of positive outcomes of training including:

- improving health-care providers' understanding of the need to ensure privacy for young female clients;
- improvements in the attitudes of health-care providers at the intervention site towards young female clients;
- increased adherence to recommended procedures for assessment, pre-examination explanations, examination and treatment;
- improved client perceptions of the quality of consultations and satisfaction with services.

The RCT results of the intervention "Talking Diabetes" was published in two papers *(115, 116)*. The intervention involved training providers in agenda-setting, communication style and a flexible menu of consultation strategies to support patient-led behaviour change. It found that training diabetes care teams had no effect on HbA1c levels (a marker for diabetes control) or on self-reported adherence to diabetic medications. The authors reported that improving glycaemic control in children attending specialist diabetes clinics might not be possible through brief, team-wide training in consultation skills.

The RCT results of a second intervention, in this case involving children with asthma, were published in one paper *(117)*. The study randomized children and adolescents, ages 3–17 years, living with asthma in the US to a "planned care" intervention arm (n=213), a "peer leader" intervention arm (n=226) or a control arm of standard care (n=199). The peer leader intervention consisted of training one physician per practice in asthma guidelines and peer teaching methods. The planned care arm combined the peer leader intervention supported by a nurse, planned visits with assessments, care planning and self-management support in collaboration with physicians. The planned care intervention had a significant effect on the number of asthma symptom days compared with the control arm and a non-significant trend favouring the peer leader intervention compared with the control arm. Both intervention arms had lower oral use than the control arm. The authors concluded that planned care is an effective model for improving asthma care in the primary care setting, and, while peer leader education on its own may also work, it is much less comprehensive than planned care.

Values and preferences: treatment and care

A survey and a comprehensive literature review of qualitative research on the treatment and care of ALHIV were conducted to better understand the significant facilitators of and barriers to accessing services and remaining in care and treatment services and to gain an adolescent perspective of HIV care and treatment services (Annex 11).

Survey

The survey consisted of two phases:

- **A scoping review of published and gray literature** identified key issues to include in the development of the anonymous global survey.
- **A survey of ALHIV** (in both electronic and paper form) was conducted to understand the range and depth of perspectives of respondents regarding the care they receive to treat and manage HIV as well as other health needs. The final survey comprised 36 questions, 33 close-ended and three open-ended, and it was translated into five languages in addition to English.

The survey of ALHIV was completed by 447 young people (10–24 years old)—215 female, 213 male, and 19 transgender, other, or undisclosed—from 57 countries. Adolescents already actively engaged in HIV care and treatment provided the highest number of responses. For this reason, the survey results were limited and not representative of all adolescents living with HIV who may not be linked to networks or receiving care.

Ease of access. For most of the adolescents and young people who took the survey, access to care and attending health-care appointments were either very easy or not a significant challenge. Twenty-six per cent of those who responded to the open-ended question asking what they liked the most about the care they receive, stated that it was access to treatment – from availability and cost of regular health check-ups and drug treatment (ART) services to proximity of services, short lines/queues, and specialized health workers. Several mentioned the importance of NGOs in supporting the provision of life-saving drugs and services.

Those who found access somewhat or very difficult identified barriers to access to services such as cost, ARV stock outs, lack of doctors or adequately trained health-care professionals, lack of HIV services in many (especially rural) areas, lack of youth-friendly services, and poor treatment and stigma by health-care providers.

Transition to adult services. The survey revealed that a majority of adolescents and young people either do not receive paediatric or adolescent services, or, if they do, have never discussed transitioning to adult services. Of the respondents who said they are currently receiving paediatric or adolescent services (n=282), 38% had discussed a transition to adult care with their provider on at least one occasion, 40% had discussed it two to three times with their provider, and 22% had discussed it more than three times with their provider.

Interactions with providers. Most survey respondents indicated they had good experiences interacting with health-care providers. Eighty-five per cent of respondents reported moderately good (51%) to very good (34%) interactions with their providers in terms of comfort in asking general health-related questions, while 15% reported less favourable interactions with their providers. Eighty-eight per cent of respondents reported moderately good (51%) to very good (38%) interactions with their providers in terms of comfort in asking HIV-related questions. Thirty-five per cent reported that a provider contacts them if they miss an appointment.

Autonomy. Responses regarding the extent to which respondents took responsibility for their health care suggest a high level of autonomy among the group surveyed. Autonomy was gauged by respondents' indications that they took responsibility for

a range of activities around seeking care and making appointments, interacting with providers and treatment adherence.

The most positive aspects of care reported by respondents included sensitive and caring treatment by health-care providers; home visits; opportunities for meeting other ALHIV to share experiences and to feel empathy with others; and interactions with providers who preserve a sense of optimism and hope. Twenty-three per cent of respondents to an open-ended question asking what they liked most about the care they receive, valued the support the received from peer groups, teen clubs, and peer mentors.

Suggestions for improvements in services for ALHIV included age-appropriate support,[1] material support (clothing, food, support for orphans), more protection from the damaging effects of stigma and discrimination, more comprehensive information about all the ways that HIV is transmitted, dedicated spaces and activities for ALHIV where they can be with peers who understand what it is like to live with HIV, and with educational opportunities for those who do not attend school.

Literature review

A comprehensive review of published literature examined the findings of a wide range of studies including randomized controlled trials, quasi-experimental, and descriptive research in order to gain insight into the values, preferences, perceptions, and attitudes of adolescents and young people regarding HIV treatment and care.

Confidentiality and disclosure. For ALHIV, privacy and confidentiality are major concerns in the provision of care. Those adolescents studied indicated that they are particularly sensitive to the stigma associated with HIV, and felt it is important for health-care providers to offer a safe environment that ensures the privacy of young patients or clients and confidentiality of their discussions, decisions, test results, and treatment. Disclosure best practice was articulated as a gradual process that should be based on the adolescent's development and readiness to reveal their HIV status to others, and that this process requires a wide range of support – from health-care providers, caregivers, peers, and the community – and skills development to increase self-confidence, self-efficacy, and empowerment. The major barriers to disclosure were fear of unintended or unwanted disclosure by teachers, parents, or friends, or because of inadequate privacy in clinics or pharmacies; and fear of negative reactions from family, friends, and the community.

Accessing care. Access to care is broadly defined to include physical access to treatment and care, as well as financial and social support. Those adolescents studied wanted universal access to care, as well as care designed specifically for their needs and provided in a youth-friendly atmosphere. Trusting relationships with and between parents or guardians and health-care providers, and the availability of counselling and support were the primary facilitators for adolescents accessing care. Provider and community stigma, and inadequate or incorrect information about HIV were considered major barriers to utilization of available services.

Adherence to ART. High adherence to ART by ALHIV was linked to psychological adjustment, effective coping mechanisms and adoption of explicit medication routines. ALHIV identified both positive and negative factors as facilitators for adherence to ART: positive – e.g. free or low-cost medications, electronic reminders, family and peer support, self-esteem and empowerment skills building and support; and negative – e.g. taking medication regularly so 'people won't know I'm sick', fear of consequences, and fear of re-infection or superinfection. Depression, regimen

1 E.g. the separation of adolescent and adult services by location, day, or time, to the provision of peer support in the forms of groups, mentoring, teen clubs, or camps.

fatigue, weak health-care systems, lack of youth-friendly services or privacy, and misinformation were articulated as the primary barriers to adherence to ART for ALHIV.

All health-care facilities or delivery sites should be safe spaces where adolescents can freely express their emotions and concerns, and where providers demonstrate patience, understanding, acceptance and knowledge about the choices and services available to the adolescent.

Retention in care. Also important was the strength of the relationship between the health-care provider and adolescent (and parent or guardian depending on the age and readiness of the adolescent). Like the other key findings, an ALHIV's level of self-esteem and feeling of empowerment to make decisions improved retention, as did supportive family or family-like environments and peer support. Similarly, barriers to retention in care included the lack of youth-focused services and privacy, poor communication with health-care providers, misinformation, and anxiety or depression.

Successful transition to adult services. It is vital that an adolescent has a clearly defined pathway into adult care and that the transition is carefully managed. Abrupt changes can be destabilizing and confusing; continuity of care and the transition to adult services should be a joint effort involving the adolescent, their parent or guardian, and the health-care provider, the balance of which should be determined by rights, readiness, and willingness of the adolescent to assume responsibility for various health-seeking and maintenance activities—e.g. taking medication, making appointments, asking questions of health-care providers, and helping to choose their own treatment plans. Facilitators for ALHIV taking responsibility for these types of activities included family-centred and peer support and counselling; self-esteem, empowerment, and coping skills-building activities and support; and a gradual developmental approach that takes into consideration the individual's particular needs. The greatest barriers to successful transition for ALHIV included the poor evaluation of adolescents' abilities to receive and process information, and the lack of or poor communication with health-care providers. The loss of a good relationship with a paediatric provider was also a major barrier to ALHIV successfully moving to adult services when developmentally appropriate.

Summary of the expert panel discussion and other considerations

This section documents the key points raised during the discussion on community-based approaches and training among the participants at the consultation in Harare as well as feedback and inputs provided as part of the draft review process. It also presents the main findings of a literature review exploring the facilitators and barriers to retention in care and adherence to treatment.

Literature review: retention and adherence considerations

A separate literature review of published and unpublished studies and reports was conducted to look specifically at facilitators and barriers to adolescents' adherence to treatment and retention in care (Annex 13).

Several of the studies and reports included in this review suggested that continuity of care in the transition from childhood to adulthood should be a focus for policy-makers and programme managers. Continuity of care and the transitions between different stages should be joint efforts involving the adolescent, service providers, families/caregivers, health facilities, schools and the broader community.[1]

1 The challenge of transition to adult care is common to the management of many chronic illnesses in adolescents; providers of services for ALHIV can link with and learn from health care workers treating adolescents for other chronic illnesses.

Attitudes of health-care providers are an important consideration in services for ALHIV. All service provision settings should be safe spaces, where patients can express anger, frustration, fear and confusion. Providers need to take time to answer questions, validate feelings, explain choices, identify and organize support and express unconditional acceptance.

Some aspects of clinic structure and the availability of tools and resources may help adolescents to access care, support, prevention and treatment when and as they wish. There are ways to make services more accessible and acceptable for adolescent clients. These include adolescent-only days or evening hours with flexible appointments or walk-in options as well as linkage to other supportive services and activities off-site.

Community-based interventions

Community-based service delivery is important for adolescents; it can minimize logistical and financial constraints and offer services in familiar and easily accessible settings. Community-based settings can refer to proximity to where adolescents live as well as services that are delivered in a specific community of adolescents with common characteristics or challenges, such as a key population. Nearby, accessible services can support adherence to treatment and retention in care for ALHIV and minimize risk behaviours and, when an individual tests negative, facilitate timely and low-cost referrals to further prevention support.

As with management of other chronic illnesses during adolescence, ALHIV have serious problems with adherence. Most research shows that this is a greater challenge for adolescents than for adults.

Community-based services can mitigate some of the burden faced by adolescents who need accessible and free/low-cost services to support adherence. Greater accessibility, acceptability and affordability also can help increase retention in care and reduce loss to follow-up.

However, in some cases, the “familiarity” of community-based services may be a disincentive for adolescents due to concerns about confidentiality. More research will be needed to determine how to address this issue.

Depending on the setting, one of the key challenges with decentralization and reliance on community-based services will be developing some degree of capacity at peripheral facilities to handle the array of HIV-related services required by adolescents. In some cases, particularly with vertically infected adolescents, complex health issues are likely to be harder to address in community-based settings, e.g. cardiac, lung, cognitive and pubertal delay issues. Additionally, adolescents on ART need to be monitored annually for long-term toxicity and co-morbidities; there may be limitations to the scope of services that community-based providers can offer.

Given the diversity of community-based approaches, it is important to note that there are aspects of some current programmes that may have no benefit, may increase stigma and discrimination or are considered to be harmful (e.g. in which patients are advised to suspend their medication). These concerns and lack of consensus resulted in a conditional recommendation.

Common elements or conditions needed for effective community-based interventions:

1. Adolescents should be involved in the design and implementation of community-based interventions so that these programmes reflect their knowledge, motivation and skills.

2. Community-based services should be considered an integral part of the continuum of care, with formal linkage to facility-based services.

3. Flexibility should be designed into community-based services for adolescents to accommodate the needs of diverse groups, especially young members of key populations and adolescents of various ages who were vertically infected and have been living with HIV for many years.[1]

4. There should be clearly defined selection criteria for community-based workers/agents as well as routine supervision and monitoring.

5. Careful monitoring and evaluation of community-based approaches as they are implemented remains a priority to assess acceptability, cost-effectiveness and efficacy.

Topics that are well-suited to collaboration between the community and health sectors include addressing myths about HIV and adherence, feelings associated with coping with HIV and seeking support for disclosure.

Training health workers

Although no studies were found evaluating the training of health workers providing services to ALHIV and the effect of this training on adherence to treatment and retention in care, there was consensus among the Guidelines Development Group that training is required for providing health services for adolescents. In the same way that health workers need training to deal with the range of issues faced and presented by adolescents, they also need training to support adherence to care and to retain patients in care.

Adolescents often find it difficult to think about the future consequences of today's actions. With emerging abilities to think about themselves and their social environment, they challenge authority, and seek new experiences, some involving risks. This behaviour has implications for the information and support that adolescents require and how they respond to advice. Adolescents are receptive to peer influence and to concerns about body image. They often have less structured lives than adults, which may make treatment adherence more difficult. Unemployment and poverty make it more likely that they have to rely on parents for financial and other support. These factors limit their ability to make independent decisions about using health care and other services.

Because of the ways that adolescents think and react—the ways in which they are influenced; their changing capacity and autonomy; their relative lack of information, skills and resources; and the values and norms that surround them (which influence how communities and health workers react to them)—there is a need to mobilize and train service providers at many levels if adolescents are to access and be retained by services.

Some adolescents who were vertically infected and diagnosed early may have already been on treatment for 10 or more years. They may have been started on sub-optimal HIV regimens or faced treatment interruptions. They may have complex HIV disease with various drug-resistance mutations, and they may face a variety of chronic illnesses and developmental delays as well as depression. Special skills are required for management of the complex health profiles of these adolescents.

1 Community-based interventions are essential for identifying and reaching adolescents in key populations, who may not seek facility-based services due to fears of stigma and/or legal consequences.

Health workers need training to help them understand and address the barriers to adherence that many adolescents with HIV on treatment have.

Assessment of these adolescent adherence barriers include consideration of the adolescent's cognitive skills, their buy-in to medication regimes, their home and family support situation, the adolescent's routines and when they are most likely to miss doses and ways to simplify regimens, including reducing the number of times a day medications must be taken.

Patients' transition from childhood to adolescence can be challenging for health workers. They often do not feel prepared to deal with the new issues this transition presents—sex and sexuality, a range of developmental issues. It is important that health workers are sensitized to how adolescents differ from adults and from small children and to know what resources in their communities are available to support adolescents. Health workers need to be able to link with a wide range of other practitioners and organizations that can help (e.g. community health workers, NGOs, community-based organizations (CBOs), ALHIV peer support groups).

At the same time, it is not necessary—and usually not feasible—to create a separate cadre of health workers specializing in the needs of ALHIV. While it would be ideal if there were more specialists and centres of excellence, it is of primary importance that health workers providing services to PLHIV in general are able to respond adequately to the needs of ALHIV in a decentralized and integrated way. For example, a retrospective cohort study in Zimbabwe found that involving adolescents in the planning and introduction of additional medical and social services for adolescents in a public sector ART clinic resulted in significant increases in initiation of ART and retention in care as well as lower mortality compared with data on other adolescent patient populations in the country *(118)*.

As summarized by one member of the Guidelines Development Group:

> *Training by itself rarely results in large changes in the quality of services or in provider attitudes. Rather, training needs to be part of a continuous quality improvement (CQI) process that includes a range of elements at the provider level such as job aids, supportive supervision, training follow-up and mentorship. At the facility level, CQI might include a range of actions including small infrastructure changes, modified admittance procedures or signage for increased privacy and confidentiality for adolescent clients. Informational materials and visual aids can help providers to be better able to communicate with ALHIV around their treatment and care needs; having the necessary equipment and commodities on hand facilitates appropriate and timely delivery of services. The involvement of peer educators and lay health workers can alleviate the workload of health workers and provide additional support.*

Negative attitudes of health workers affect adolescents more than adults, and they affect young people in key populations more than other adolescents. In this regard health-care providers must have the skills to listen attentively, speak clearly and be aware of adolescents reticence and uneasiness in communicating with providers. Training may be needed for health-care providers to better understand how to provide such care.

Health worker training on HIV-related services for adolescents needs urgent attention, especially regarding how to link it with and build on existing training. For example, adolescent-specific content can be integrated into existing HIV training on adults, or HIV-related content can be integrated into existing training on adolescent

health or adolescent-friendly health services. Attention is also needed to pre-service training (adolescent health, ALHIV, adolescent sexual and reproductive health, young key populations). Further, other professionals, e.g. social workers, play key roles in the support of ALHIV; their involvement needs to be taken into consideration when planning the strengthening of human resources.

Training of health workers should focus particularly on:

- **Primary care:** Chronic illnesses in ALHIV, psychological and emotional illness, contraception and sexual and reproductive health issues, nutrition;
- **Prevention:** Condoms, prevention of high-risk behaviours (e.g. alcohol and substance use), harm-reduction (for PWID) and communication skills;
- **HIV treatment and care:** Adherence, retention, self-management;
- **Mental health:** Positive and negative coping styles, depression and mental health issues, dealing with a history of abuse, dealing with history of parental death;
- **Disclosure:** Supporting adolescents to disclose (a) to others in order to obtain the support they need and (b) to sexual partners in order to contribute to safer sex/HIV prevention (although the priority for individuals should be adherence to treatment and correct, consistent condom use).

Other topics of particular importance to adolescents include:

- Learning about and coping with their feelings;
- Finding support;
- Learning about the impact of HIV on their bodies, how to live a healthy life and when and why ART and adherence are important;
- Learning about safer sex, relationships and fertility choices (i.e. whether or not to have children and being supported in either choice) and making plans for the future, including education and employment.

To some extent training health workers is about attitude and behaviour change, which is not likely to occur due to a single training event. However, the recommendation for training is a starting point and one component of working toward increased adherence to treatment and retention in care. Ongoing supervision and professional support are essential as part of the change process.

Agreement on the recommendations

With regard to support for treatment adherence and retention in care through community-based interventions and training of health workers, there was insufficient evidence in the systematic reviews or the review of the published descriptive and gray literature upon which to base recommendations. However, the interventions in question are important enough that they are represented in this guidance as the best judgment of practitioners and advocates and as the impetus for further research focused on implementation.

Both of the recommendations have weak evidence bases, but meet the criteria for conditional recommendations.

2.3 General service delivery recommendations

The WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection* present a number of service delivery recommendations, as shown in Table 3.[1] When GRADE reviews for the consolidated ARV guidelines —that led to these service delivery recommendations—were commissioned, the researchers were expressly tasked with identifying studies that were specific to

1 For background to these recommendations, please see the report on the Operational and Service Delivery Guideline Development Group Meeting, Geneva, Switzerland, 6–8 November 2012.

adolescents or had adolescent participants. However, they identified no studies of adolescent populations. These recommendations were also discussed at the adolescent expert meeting and specific considerations for adolescents were raised for each area, as follows.

Table 3. Service delivery recommendations from the WHO *Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection*

Community-based HIV testing and counselling	In generalized HIV epidemic settings, WHO recommends community-based HIV testing and counselling with linkage to prevention, care, and treatment services in addition to provider-initiated testing and counselling. (Strong recommendation, low quality evidence) In all HIV epidemic settings, WHO recommends community-based HIV testing and counselling with linkage to prevention, care, and treatment services for key populations in addition to provider-initiated testing and counselling. (Strong recommendation, low quality evidence)
Service integration and linkage	In generalized epidemic settings, ART should be initiated and maintained in eligible pregnant and postpartum women and in infants at maternal, newborn and child health-care settings, with linkage/referral to ongoing HIV care and ART, where appropriate. (Strong recommendation, very low quality evidence) In settings with a high HIV prevalence (≥5%) among TB patients, ART should be initiated for HIV-positive individuals with TB in TB treatment settings, with linkage to ongoing HIV care and ART. (Strong recommendation, very low quality evidence) In settings with a high burden of HIV and TB, TB treatment should be provided for individuals with HIV in HIV care settings where TB diagnosis has also been made. (Strong recommendation, very low quality evidence) In settings in which opioid substitution therapy is provided, ART should be initiated and maintained in people with HIV who are eligible for ART. (Strong recommendation, very low quality evidence)
Decentralization of treatment and care	The following options should be considered for decentralization of ART initiation and maintenance: • Initiation of ART in hospitals, with maintenance of ART in peripheral health facilities. (Strong recommendation, low quality evidence) • Initiation of ART with maintenance of ART in peripheral health facilities. (Strong recommendation, low quality evidence) • Initiation of ART at peripheral health facilities, with maintenance at the community level between regular clinical visits (i.e. outside of health facilities in settings such as outreach sites, health posts, home-based services or community-based organizations). (Strong recommendation, low quality evidence)
Task-shifting	Trained non-physician clinicians, midwives and nurses can initiate first-line ART. (Strong recommendation, moderate quality evidence) Trained non-physician clinicians, midwives and nurses can maintain ART. (Strong recommendation, moderate quality evidence) Trained and supervised community health workers can dispense ART between regular clinical visits. (Strong recommendation, moderate quality evidence)
Interventions to optimize ART adherence	Mobile phone text messages could be considered as a reminder tool for promoting adherence to ART. (Strong recommendation, moderate quality of evidence)

2.3.1 Community-based HTC[1]

The provision of HTC is very important for all adolescents, and all affordable, feasible and acceptable approaches for increasing the likelihood of adolescents being tested should be explored. It is particularly important for horizontally infected older adolescents, as this group is very inadequately tested in generalized epidemics.[2] However, while increasing HIV testing of adolescents is important, it is essential to also give adequate attention to:

- post-test counselling, links to services (prevention, treatment and care) and consent/confidentiality are major concerns for adolescents;
- understanding that adolescents testing positive for HIV may not yet require treatment, but do need care and retention by the health system;
- special issues for adolescents from key populations accessing testing and adequate counselling.

2.3.2 Integration of HIV treatment with TB, ANC/MNCH and IDU services

Integration of HIV services into other clinical settings may also be considered for adolescents, but these services will need to:

- have ways to encourage adolescents to enrol early for PMTCT/ANC (currently, late enrolment in ANC is a significant problem for adolescent pregnant women) and to support them through their pregnancy, including: access to ART and adherence counselling for PMTCT and ART for their own health; and support for making safe infant feeding choices, making post-delivery contraception choices, and involving the father of the child/partner(s) and supportive family members;
- consider linking to efforts to make all health services more responsive to the needs of adolescents (not just maternal, newborn and child health (MNCH), but MNC**A**H);
- understand that, for all aspects of programmes and policy, adolescents in key populations need specific consideration. For example, most young injecting drug users are less likely to use routine health services, so HIV treatment needs to be integrated into services that are provided for injecting drug users;
- ensure that national plans/strategies explicitly cover adolescents.

2.3.3 Decentralization of HIV treatment and care

Providing services near home can be important for adolescents, as this is likely to make their access to services easier. At the same time it is important to ensure that:

- service providers have at least minimal training to: respond to the specific needs of adolescents; support disclosure and adherence by adolescents; provide prevention education and support to adolescents (e.g. safe condom use); and link with others (e.g. community groups and community workers) who may be better able to support the particular needs and complex challenges that adolescents face;
- support groups for ALHIV are also decentralized, where appropriate (depending on the type of epidemic and context);
- special considerations are made for adolescents in key populations;
- there is adequate age (and sex) disaggregation of routinely collected data for monitoring and planning;
- there are effective systems of referral for other health issues (e.g. chronic illnesses, depression, sexual and reproductive health).

1 "Community-based" in this context refers to services (including HTC services provided by NGOs and CBOs) available within communities where adolescents live, with links to the formal health system.

2 Slow progressors are more likely to be diagnosed through PITC.

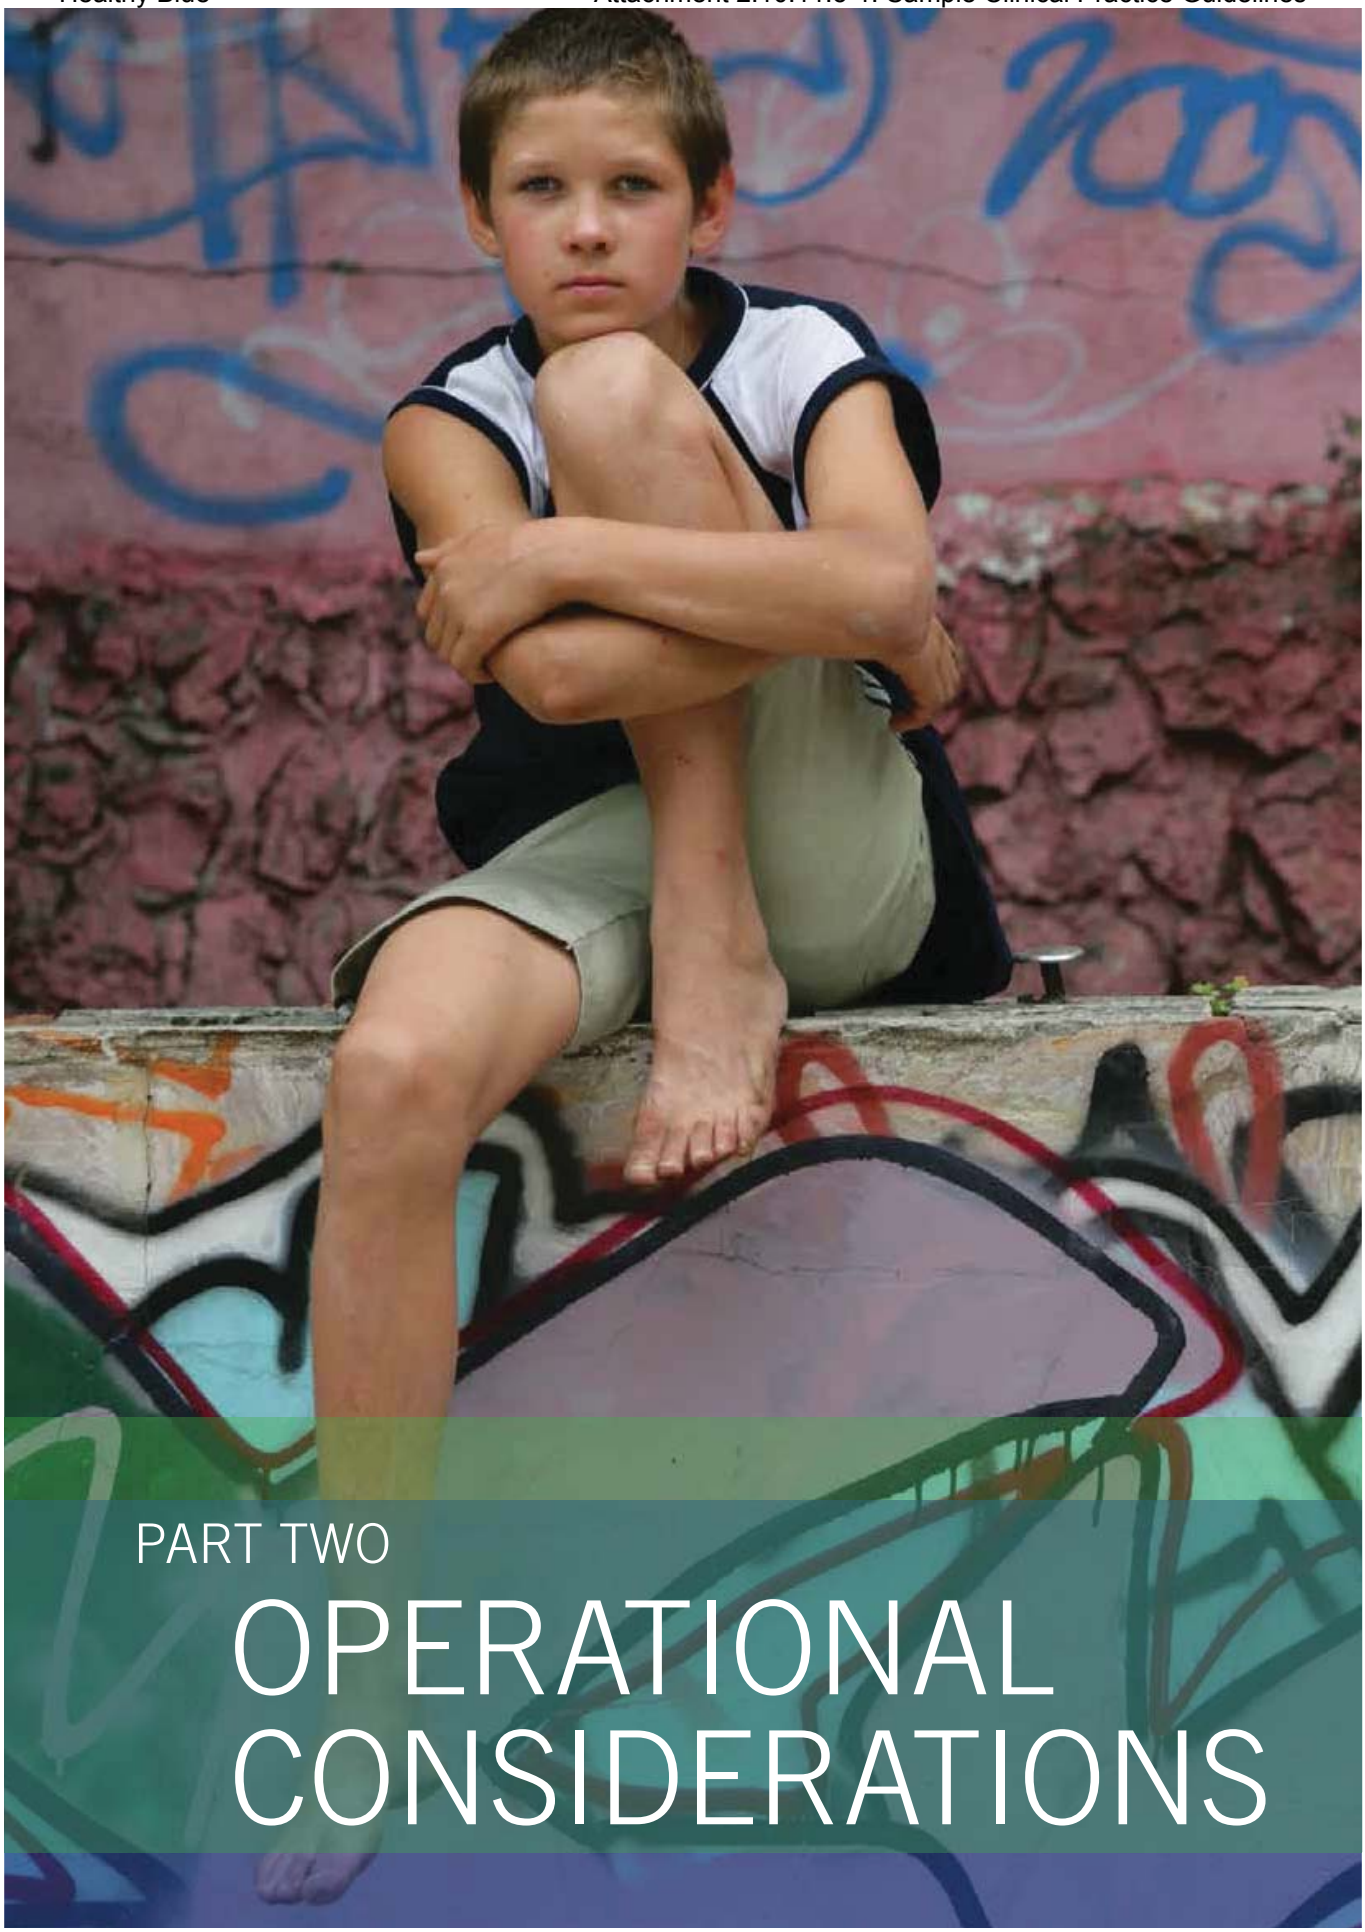
2.3.4 Task-shifting for HIV care and treatment

This could be considered for adolescents, but:

- The people to whom the tasks are shifted need to be trained to respond to the needs of adolescents.
- There must be strong linkages to NGOs and community groups working with adolescents/ALHIV that can support disclosure, adherence, etc.

2.3.5 Use of mobile technologies for adherence support and social support for PLHIV

Mobile technologies have been used successfully for other chronic illnesses among adolescents, and this is a technology that they are familiar with. Its use potentially can improve adherence and support, but it is essential that ALHIV are involved in the development of the programmes.



PART TWO

OPERATIONAL CONSIDERATIONS

1 GUIDING PRINCIPLES FOR IMPLEMENTATION

The following guiding principles should underpin the design, development, implementation, monitoring and evaluation of HTC and treatment and care services for adolescents.

1.1 Voluntary testing

While testing should be routinely offered and available, it should not be mandatory. National HTC policies and practices should be reviewed to eliminate all non-voluntary forms of testing. There should be no compulsory or mandatory testing of members of key populations at higher risk of HIV infection and other vulnerable populations, including pregnant women, people who inject drugs and their sexual partners, men who have sex with men, sex workers, prisoners, migrants, refugees and internally displaced persons, and transgender people.[1]

1.2 Heterogeneity of adolescents

Adolescents are not all the same. The heterogeneity of adolescents needs to be recognized, from the modes of their infection (vertical/horizontal) to their age, sex, sexual orientation, and from their roles and responsibilities in the family and community to the variability of their transitions to adulthood. Service delivery responses need to reflect this heterogeneity of adolescents as well as context-specific aspects of their lives.

1.3 Meaningful involvement of adolescents

Adolescents, including adolescents living with HIV and those from key populations, must be involved in the development and implementation of acceptable and appropriate programmes and in supporting country processes for development of policy.

1.4 HTC minimum standards: The 5 Cs

The following are key principles of HTC and apply to services for adolescents in all circumstances:

- Adolescents receiving HTC must give informed **consent** to be tested and counselled (see discussion in Part 1, Section 2.1.1 and guidance on consent as an operational issue in Part 2, Section 2.1). Adolescents should be informed of the process and understand the implications of learning their HIV status.
- Adolescent services must be **confidential**, meaning that what the HTC provider and the individual discuss will not be disclosed to anyone else without the express consent of the adolescent being tested. Decisions concerning to whom to disclose test results should be made with the support of the provider or counsellor and a family member or friend if possible. While confidentiality must be respected, it should not be allowed to reinforce secrecy, stigma or shame. Counsellors should raise the issue of whether the adolescent may wish to disclose to others, how she or he would like this to be done, etc.

1 See "Statement on HIV testing and counselling: WHO, UNAIDS re-affirm opposition to mandatory HIV testing." http://www.who.int/hiv/events/2012/world_aids_day/hiv_testing_counselling/en/index.html

- Adolescent HTC services must be accompanied by appropriate and high-quality pre-test information and post-test **counselling** (ensured by quality assurance mechanisms and supportive supervision systems).
- Programmes for adolescents should strive to assure the high quality of testing services, and quality assurance mechanisms should be in place to ensure the provision of **correct test results**. Quality assurance may include both internal and external measures and should include support from the National Reference Laboratory as needed.
- HTC services for adolescents must provide effective referrals for **connections/ linkage to appropriate care** and follow-up services as indicated, including long-term prevention and treatment support.

1.5 Gender issues

Gender issues must be considered in the implementation of all the recommendations, considering the specific needs of adolescent men, adolescent women and transgender adolescents.

1.6 Human rights perspective

A human rights perspective will ensure that all actions taken with respect to delivery of HTC, treatment and care services will be in the best interest of the adolescent. As specified in the Convention on the Rights of the Child, adolescents have:

- the right to non-discrimination;
- the right to privacy and confidentiality, including with respect to advice and counselling on health matters;
- the right to express views freely and to have them duly taken into account;
- the right to participate in decision-making processes that are relevant in adolescents' lives and to influence decisions taken on their behalf;
- the right to health and development, including the right to choose to have an HIV test and to use an array of HIV-related services;
- the right to a safe environment;
- the right to access to appropriate information, with particular regard to numerous health-related situations;
- the right to be free from disease and ill health;
- the right to be free from harm, and that children must have protection from all forms of sexual exploitation and sexual abuse;
- the best interests of the child should guide all actions concerning children.

These principles apply to all children, irrespective of their circumstances and the behaviours they practice (sell sex or use injectable drug), and entitle them to the protections and services (including harm-reduction), they need in order to avoid acquiring HIV and other infections, and to protect and improve their health and wellbeing.

1.7 Developmental appropriateness

Services must reflect developmentally appropriate considerations for a range of stages of cognitive and physical development. A continuum of care will respond to the evolving capacity of adolescents. While these guidelines focus on adolescence, service providers will need to consider the various transitions into appropriate types of care before and beyond adolescence and the importance of preparing adolescents to manage their lives and health needs as adults.

1.8 Supportive and conducive legal and policy environment

A supportive and conducive legal and policy environment is critical for adolescents to access and benefit from HIV testing, counselling and linkage to appropriate treatment and care. The criminalization of HIV transmission, exposure, non-disclosure and specific behaviours such as same sex relations, injecting drug use and involvement in commercial sexual exploitation significantly restricts an adolescent's ability to access and benefit from a range of essential HIV-related services.

1.9 Legal protection

In cases of sexual exploitation and violence, adolescents need referral to appropriate child protection services. Such services may be specialized legal and protection services that have experience with counselling adolescents—for example, police services and/or specialized child protection services and post-rape care services dealing with sexual abuse.

2

PROGRAMMATIC EXPERIENCE AND LESSONS LEARNED

There is strong consensus on the need to expand access to and uptake of HTC by adolescents in all settings, to improve the quality of health services for adolescents living with HIV, to scale them up and to increase adolescents' access to and use of available services. However, answers are needed to operational questions on:

- how best to deliver HTC services for adolescents and to increase uptake and linkages to appropriate care?
- how best to deliver interventions and services for adolescents living with HIV?
- how to integrate lessons learnt and best practices into existing systems, given limited resources and capacity?
- how to increase the quality, coverage and equity of services for adolescents living with HIV in a resource-constrained operating environment?
- how to increase cost-effectiveness and sustainability?

To shed light on these questions and to highlight relevant work being done in resource-poor settings, UNICEF has initiated the UNICEF ALHIV Lessons Learned project, developing a living document—with an emphasis on "how it was done"—that is intended as a repository for experiences that will stimulate and guide accelerated action to meet the needs of ALHIV (see Annex 14). In emerging areas of programming, while there is not always a substantive base of research evidence to develop programme guidelines, the experiences of pioneers can provide examples for others. The preliminary report on this project presents summaries of successful or promising programmes that are being or have the potential to be taken to scale. These programmes focus on testing, entry to and retention in treatment and care, adherence, prevention for ALHIV (e.g. avoidance of high-risk behaviours) and primary care for ALHIV (e.g. care for chronic illnesses and sexual and reproductive health).

This section examines the conditions and approaches that will facilitate effective expansion of HTC for adolescents and support adherence to treatment and retention in care. It draws on many of the examples and discussion points included in the UNICEF Lessons Learned report, as well as other programmatic experiences contributed by members of the Guidelines Development Group and other contributors.

Operational issues are often context-specific. WHO, UNESCO, UNICEF, UNFPA and GNP+ recognize the heterogeneity of adolescent populations, differences in epidemiology and social context and the diversity of health-care delivery systems across and within countries. Additional considerations are resource levels, disease burden and local health sector priorities. Policies regarding consent to test, disclosure and confidentiality also vary widely across countries and influence the implementation of a range of interventions. Adaptation of these operational options must take into consideration all of the context-specific realities.

2.1 HTC

2.1.1 Consent to HIV testing

A specific challenge that has implications for many aspects of programming, and for research, is the issue of consent. Obtaining the necessary informed consent can take significant time; it needs to be built into the planning of the programme. Informed consent needs to be based on human rights principles (e.g. the best interests of the child, the evolving capacity of the child) and involve ALHIV, parents, caregivers and health-care providers.

LOWERING THE AGE OF CONSENT FOR TESTING (SOUTH AFRICA)

Since July 2007, adolescents aged 12 years and older in South Africa have had the right to consent for an HIV test, if it is considered to be in his/her best interest—so long as s/he is of sufficient maturity to understand the benefits, risks and social implications of the test. According to South African HIV counselling and testing guidelines, an HIV test is in the best interests of a child if the test will result in access to the continuum of care and support for their physical and emotional welfare.

The age of consent for HIV testing was determined as part of a larger process. South Africa commenced a period of intense legislative review and reform shortly after the end of Apartheid. In 1997 the South African Law Commission was mandated to review the old Child Care Act (which allowed children above the age of 14 to consent to medical treatment and children above the age of 18 to consent to surgical procedures). The commission elicited comments and held public consultations between 1998 and 2002. As a result of the review and public consultations coinciding with the height of the Mbeki AIDS denialism era, the constitutional protection of children's rights in the face of the HIV/AIDS epidemic was prioritized. Notably, the Commission actively sought input from children themselves.

The outcome of the process was a progressive new Children's Act that removes age-related barriers to children's access to health care. The age of consent for medical interventions, including HTC, was at least partly informed by the age of sexual debut, rates of STI in adolescents and the realisation that the age threshold needed to be lowered to allow children younger than 14 years to access sexual and reproductive health services. In addition, however, the decision was informed by the desire to recognise and support the growing autonomy of adolescents.

The impact of the age of consent for HTC is difficult to quantify. Firstly, the change was relatively minor, having previously been set at 14 years of age. Secondly, routine health information data, including HTC data, are aggregated in a manner that precludes the assessment of adolescent health-care utilisation. Anecdotal reports from health-care providers indicate that 12–14 year old adolescents do request and receive HTC at health facilities, usually after having undergone schools-based HIV education. There are no documented instances of serious adverse consequences in those who test positive, with health workers indicating that adolescents undergo CD4 testing and commence ART if indicated.

✉ For more information contact Henry John Moultrie: hmoultrie@wrhi.ac.za

2.1.2 Linking testing with prevention, treatment and care

The recommendations of these guidelines related to HTC explicitly note the importance of linkages to prevention, treatment and care. All adolescents should have access to testing, but it is essential to ensure that those who are most vulnerable and those with high-risk behaviours are supported to access testing that is linked with adequate post-test counselling (something that is particularly important for adolescents) and prevention and/or treatment and care, depending on

the results of the test. Another important consideration is the role of counselling prior to HIV testing and how it encourages or discourages access among adolescents.

While specific programmes may be developed to test adolescents (e.g. through schools), all strategies directed to adults, such as community-based counselling/testing, PMTCT and PITC, need to take into equal consideration the particular needs of adolescents.

GROUP PROGRAMME FOR NEWLY DIAGNOSED ALHIV USING LAY COUNSELLORS (SOUTH AFRICA)

Hlanganani is an interactive modular (3–6 modules) group programme that equips newly diagnosed adolescents to link to care. Lay counsellors facilitate the group session, and a training module for them has been designed. Adolescents who took part really enjoyed the experience, and it seems from preliminary data that the adolescents who participated in the programme were more likely to commence ART if eligible than adolescents who did not participate.

While the group approach to counselling is not for everyone, for those who did join the group sessions the programme has been a great support. Longer follow-up will tell whether the adolescents who took part will have better outcomes and retention that those who do not. The plan is to adapt the programme for adolescents infected perinatally when transitioning into adolescent care, and subsequently into adult care.

With support from the Desmond Tutu HIV/AIDS Foundation (DTHF) and the Adolescent AIDS Programme in the Bronx, NY with funding from PEPFAR/CDC (SA).

2.1.3 Increasing uptake of services by adolescents

STRENGTHENING HTC AND REFERRAL FOR ADOLESCENTS (SUB-SAHARAN AFRICA)

UNICEF is supporting a multi-country initiative in sub-Saharan Africa aimed at strengthening HTC uptake and referral for adolescents. The work takes innovative approaches to communication and engagement with adolescents—through TV, radio, mobile phones, social media and a graphic novel (online, print and serial newspaper insert)—to provide adolescents with critical information and link them to services. This work is engaging with adolescents and young people in six sub-Saharan African countries with an extremely high burden of HIV to improve HIV knowledge and attitudes, to build demand for HTC, to help improve planning, coordination and referral systems for adolescents and young people and to monitor delivery of HIV services and referrals for this age group.

Preliminary data show good levels of knowledge regarding the benefits of condoms, but there is a persistence of attitudes among adolescents and young people that may constrain efforts to increase uptake of HTC. There is reluctance to request partners to test due to fear of raising suspicions and accusations of infidelity or negative past behaviour. It also seems that adolescent males with HIV have less favourable views of HTC and related services, and they are less likely to disclose, report experiences or seek help following rape or sexual violence.

There are a number of legal, logistical and administrative issues that need to be addressed in order to expand access and improve uptake of HTC among adolescents. Age of consent in many countries remains a significant barrier to uptake of HTC, as adolescents are often reluctant or afraid to seek services that require the consent of a parent or guardian. There are numerous system bottlenecks and inefficiencies such as supply chain challenges,

human resources capacity related to working with adolescents, and loopholes in patient management and follow-up, reflected in incomplete or parallel data records. Referrals for those testing positive are too reliant on self-motivation; for those testing negative, follow-up and referrals are weak to non-existent.

✉ For more information contact Susan Kasedde: skasedde@unicef.org

2.2 Disclosure

Adolescent sexual and reproductive health (ASRH) services for ALHIV need to have a strong focus on disclosure and building self-esteem. Many young people living with HIV are sexually active and make the choice to have children, and ASRH programmes need to stress their responsibilities for their own (and their partners') sexual health. Balancing positive living against sexual needs is a real challenge for this age group, particularly in terms of disclosure, due to fear that a potential partner may be put off by their HIV-positive status. Like other adolescents, ALHIV have rights to a pleasurable and healthy sexual and reproductive life and to programmes that respond to their different needs and challenges (e.g. can an HIV serodiscordant couple get access to post-exposure prophylaxis if a condom breaks?).

2.2.1 Support for disclosure and adherence to treatment

ADHERENCE AND DISCLOSURE FOR ADOLESCENT MOTHERS: THE "EVE FOR LIFE" EXPERIENCE (JAMAICA)

"Eve for Life", a local NGO, has been working with the Ministry of Health to provide a comprehensive approach to support and care for adolescent mothers who are living with HIV. Currently, the NGO is working to deliver services in support of adherence and disclosure in the three parishes with the highest rates of HIV infection.

Recruitment: Adolescents are recruited into the programme through antenatal or HIV treatment programmes. Adherence counsellors or social workers refer clients deemed especially vulnerable and in need of additional support. In this way, the Eve for Life Programme has grown increasingly collaborative with the public health sector.

Assessment: Upon recruitment, a needs assessment identifies issues that must be addressed to improve outcomes for the adolescents and their children. Additional data collected include demographic information, knowledge and attitudes around HIV primary and secondary prevention and treatment literacy, as well as emotional wellness, sexual health and history in terms of forced sex and other gender-based violence. Clients are then referred to other relevant educational, psychosocial and social security programmes to address their needs.

Engendering trust: The overall approach that the public sector has employed to encourage support for adherence among PLHIV is applied in this programme. This is done through the engagement of older women with HIV called "life coaches", and programme "graduates" called "mentor moms." These women form a key part of the care and support team. In the event of a breach of confidentiality, a reporting and redress system is in place, and the adolescents involved are informed when action is taken.

Support groups: Clients are able to discuss their challenges and successes in a safe environment, free of stigma, discrimination and judgment. Life skills are also reinforced in the support groups.

Adherence support: A team approach is taken to adherence. With the consent of clients, mentor moms liaise with adherence counsellors and social workers to monitor adherence and

assist in addressing the relevant barriers. Attention to psychosocial issues has led to good adherence, and less than 1% of the girls in the programme have repeat teen pregnancies.

Support for disclosure to parents/guardians and partners: Disclosure is viewed as a critical component of successful adherence, as it opens up an environment of trust and support. Disclosure to a loved one is an indicator used to measure success in the programme. It is encouraged throughout the programme, and as such, disclosure is treated as a life skill. Girls are walked through a process of disclosure and role-play discussions with their loved ones. The discussions address selection of the partner(s), family member(s) or friend(s) to whom the clients will disclose, how and whether they require the assistance of a life coach, mentor mom or trained counsellor. Each coach must have disclosed to their partner or a family member so they can be of optimal assistance to the girls in this area.

Strategy for scale-up: Increased cooperation with the MOH includes capacity building of health workers to improve their skills in service delivery for ALHIV. Additionally,

adolescents who have completed the programme are engaged as peer support links for adolescent mothers attending antenatal or HIV treatment programmes in the public health sector.

Factors contributing to the success of this work
- Close collaboration with government
- A team approach to adherence
- Peer-to-peer approaches to support
- Engagement of older women living with HIV as lay counsellors/mentors
- Disclosure of HIV status as a key component of the programme.

Challenges facing the programme
- Limited scope of the programme (it is present in only three parishes and targeted towards ALHIV who are mothers)
- Limited funding threatens sustainability.

✉ For more information contact Novia Condell: ncondell@unicef.org

2.3 Community-based approaches

When an adolescent tests negative, community-based service delivery can help to minimize risky behaviours and facilitate timely and low-cost referrals to further prevention support. The following are examples of approaches to assist those adolescents who test positive.

2.3.1 Support for adherence

As for treatment of other chronic diseases, ensuring adherence to ART is a challenge; support is needed from a variety of people to help adolescents adhere to their medications and care regimens. Various approaches involve home visits by health workers, lay counsellors and ALHIV peers to support the ALHIV and their families, and working to ensure that there are ongoing long-term relationships with health staff, establishing partnerships with the patients' guardians and the adolescents themselves and developing support groups for ALHIV.

COMMUNITY-BASED ADHERENCE SUPPORT THROUGH LAY COUNSELLORS (SOUTH AFRICA)

In this intervention, lay community-based adherence support (CBAS) workers provide regular adherence and psychosocial support for patients and undertake home visits to address household challenges affecting adherence. Family and household members are assessed

together with patients, and issues are discussed at clinic multidisciplinary team meetings.

The project was evaluated through a multicentre cohort study using routinely collected clinical data at public ART sites supported by Kheth'Impilo, a local NGO. ART-naïve adolescents and youth (ages 10–25 years) starting ART between 2004 and 2010 were included. All the parameters that were assessed were improved in the adolescents who received the CBAS intervention: patient retention, mortality, loss to follow-up and viral suppression.

Factors that contribute to the success of this work
- Relationships that are developed between adherence workers and adolescents, reinforcing positive adherence behaviours
- Long-term follow-up to encourage long-term treatment success
- Cost-efficiency for resource-poor settings.

Challenges facing the project
- Long-term funding in the face of the global economic downturn
- A database specific for community workers is still under development
- Serving patients who live far from clinics.

✉ For more information contact Nontuthuzelo Manjezi: Nontuthuzelo.Manjezi@khethimpilo.org

2.3.2 Strengthening the continuum of care for children and adolescents with HIV and improving retention in care

IN GENERALIZED EPIDEMICS: THE BOTSWANA-BAYLOR CHILDREN'S CLINICAL CENTRE OF EXCELLENCE (BOTSWANA)

The entry point into the Centre of Excellence (COE) is the HTC or Screening Clinic. For those testing positive for HIV, the goal is optimisation of treatment and adherence, retention in care, avoidance of high-risk behaviours and deliberate and seamless transition to adult care. Opened in 2003, the main clinic in Gaborone, with over 2300 child and adolescent patients, is able to reach an additional 4000 patients through its decentralized countrywide outreach and mentoring services. Thus, the COE is impacting over two-thirds of all paediatric patients who are receiving ART in the country.

Each patient is provided various multi-faceted but linked interventions that include: a simplified and sequential disclosure process; adherence classes for the primary caregiver and at least one other member of the household; nutritional support and counselling; home visits; morning play group; remedial classes for students having difficulty with schoolwork; a week-long annual camp; adolescent support; services centred around teen clubs (recreation, life skills and SRH); and a structured transitioning programme to usher adolescents into adult care. For pregnant adolescents there is a support group that teaches parenting skills and encourages them to return to school; for those who are unable or unwilling to return to school, there are income-generating activities available.

Key factors that have contributed to the success of this project
- HIV is the main focus of the COE
- Innovative and responsive staff
- The COE is an NGO working in partnership with the government.

Key challenges that have been met

- Reaching out to as many children as possible through outreach mentoring and the establishment of outreach teen clubs in partnership with local community service organizations and ART clinics (Airborne Lifeline, an international NGO has provided free flights to remote parts of the country for COE staff)
- Achieving excellent levels of retention in care through home visits and caregiver training.

✉ For more information on programme support tools, visit http://botswanateenclub.wordpress.com/
✉ For more general information contact the COE: ganabwani@baylorbotswana.org.bw

WORKING WITH ALHIV: THE EXPERIENCE OF UZBEKISTAN

The overall aim of the work with ALHIV is to improve their quality of life through the provision of information (about HIV/AIDS, modes of HIV transmission, ART, adherence to treatment, CD4 count, viral load, prevention and treatment of opportunistic infections, nutrition, hygiene, reproductive health, mental health); education (prevention for positives, life skills development, leadership/volunteering, the development of skills relating to specific interests); and comprehensive psychosocial support for disclosure of HIV-positive status.

Services for ALHIV have been integrated into the existing system of services for children with HIV and their families through the day-care centres (DCC) for children and families affected by HIV in Uzbekistan. More than 100 ALHIV are now attending the DCC, although only about 40 of them have received full disclosure about their HIV status.

Objectives of the services

- Provide psychosocial support for ALHIV and their families at all stages of disclosure of HIV-positive status;
- Create an enabling environment for the transition of adolescents into medical and non-medical services for adult PLHIV and coordination of the various types of care for ALHIV;
- Strengthen the connection between ALHIV in different regions of Uzbekistan to exchange experiences and provide mutual support.

Core strategies/activities include

- Psychological/social counselling, especially to support disclosure
- Regular self-support groups for adolescents who know their HIV status, activity groups for adolescents who know their HIV status, including knitting, beading, computer, and languages (Russian, English)
- Information materials for ALHIV (personal diary entries, art calendars, HIV/AIDS booklets), education activities for parents of ALHIV
- Development of an online platform to enhance the relationship between ALHIV from different regions of the country.

An additional activity that has only partially been carried out is camps/schools for ALHIV to build their capacity, leadership and ability to independently defend their rights at various levels. This involves training ALHIV on a number of themes, including:

- Promoting a healthy lifestyle
- Development of a broad range of life skills including combating stigma and discrimination
- Skills for responsible health maintenance
- Prevention for positives support trainings (training of trainers).

Planned activities include
- Implementation of the system for transitioning of ALHIV from paediatric AIDS services to adult AIDS services (using services of AIDS Centres, Maternal and Child Department of the MOH)
- Regulatory support of HIV disclosure for ALHIV
- Adaptation and adoption of WHO guidelines/protocols on disclosure of HIV status for children.

Reasons the programme is considered to be a success
- On a regular basis, support groups have been developed for ALHIV who know their HIV status in the DCCs in Tashkent and Andijan
- All parents report changes for the better among ALHIV who worked with DCC staff, including taking responsibility for their health and treatment adherence, greater interest in life, less conflict with parents and better communication skills with peers
- Partnerships for work with ALHIV (AIDS Centres, UNDP, GFATM Project, UNAIDS, UNFPA).

Factors that contributed to success
- Availability of a team of qualified professionals—social workers, psychologists, paediatricians and infectious disease specialists
- Financial support for support groups, trainings, office supplies, office equipment
- Mobilization of ALHIV, who have become leaders and volunteers to work with new adolescents whose status has not yet been disclosed.

Challenges facing the programme
- Lack of an enabling environment for ALHIV (misunderstanding in the public sector of the importance of working with adolescents, regulatory constraints or lack of regulatory framework for adolescents with HIV)
- Growth in the number of HIV cases among adolescents, poor health of the adolescent and delayed entry into care due to lack of disclosure to adolescent and denial among parents, and the related family stresses
- Lack of a support system for ALHIV after HIV diagnosis.

2.3.3 Involvement of adolescents and integration of services

THE ZVANDIRI MODEL OF INTEGRATED, ADOLESCENT-LED PREVENTION, TREATMENT, CARE AND SUPPORT (ZIMBABWE)

Africaid, a Zimbabwean NGO, is committed to helping children, adolescents and young people living with HIV from 5–24 years to develop the knowledge, skills and confidence to cope with their HIV status and to live happy, healthy, fulfilled lives. It is achieving this through the innovative "Zvandiri" programme that provides community-based treatment, care, support and prevention services that are integrated with government and private-sector clinical care services. This integration creates a robust continuum of care for children and young people with HIV and their families and aims to promote good health and psychosocial outcomes.

Zvandiri (meaning "as I am") is led by adolescents with HIV who are trained and mentored as service providers. Through community support groups, community outreach and clinic-based Zvandiri Centres, ALHIV identify children for HIV testing, link children living with HIV to treatment and care, provide sustained counselling for children, adolescents and their families and life skills training for their peers. Community Adolescent Treatment Supporters (CATS) are adolescents with HIV who provide adherence monitoring and support in clinics and homes, trace treatment defaulters and assist in identifying adolescents at risk of treatment failure. Zvandiri's SRH programme ensures young people living with HIV have the

knowledge, skills and confidence to make informed prevention decisions and that they are linked to care including STI, family planning services, PMTCT and Zvandiri's young parents support groups. Adolescents with HIV also provide training and counselling as caregivers and training of health workers, teachers, social welfare officers, church leaders and community members.

Zvandiri is being scaled up across Zimbabwe under the Government of Zimbabwe's National Action Plan for OVC. Zvandiri has been recognized as a highly effective, innovative model for the provision of sustainable treatment, care, support and prevention services for children and adolescents with HIV. It was documented by SADC [Southern African Development Community] in 2012 as a regional best practice and a national best practice by Zimbabwe's National Action Plan for OVC in 2009.

Key challenges that have been met

- Improving access through decentralization to the community level
- Meeting demand for scale-up of services by making it a national programme through the Government of Zimbabwe's National Action Plan for OVC
- Ensuring quality through robust coordination systems and standardized materials (e.g. weekly meetings with youth service providers for planning and supportive supervision, and training manuals and standard operating procedures in line with national and international guidelines for consistent delivery of quality services.

✉ For more information contact info@africaid-zvandiri.org or Nicola Willis: nicola@maruva.org

2.4 Training

2.4.1 Support for adherence to treatment and retention in care

An important aspect of counselling once ART has been initiated is support for adherence. In many places where the formal health workforce is insufficient to meet local needs, lay counsellors provide adherence counselling. Thus, one approach to supporting adherence to treatment involves ongoing training and supervision for lay adherence counsellors.

TRAINING AND SUPERVISION FOR BEHAVIOUR CHANGE COUNSELLING (SOUTH AFRICA)

An evaluation of standard-care ARV adherence in Western Cape, South Africa, found that the lay counsellors were not following international standards of client-centred, problem-management counselling that results in personalized plans for behaviour change *(119)*. Instead, they were mainly employing directive and health-advising techniques, assuming the role of "expert" in their sessions with clients. The study concluded that, at a minimum, counsellors should be provided with regular supervision focusing on micro-counselling skills and the avoidance of inappropriate strategies such as moralising, warning and confrontation. Supervision should also include case management, where the accepted counselling model, and problem-management techniques in particular, are revised and applied. The extent to which lay counsellors could adopt and implement more evidence-based models of adherence counselling was unclear.

Options for Health is a behaviour change intervention based on an approach called Motivational Interviewing (MI) *(120)*. Thirty-nine ARV adherence lay counsellors in the Western Cape were trained to deliver "Options" to their patients to help them optimize ART adherence. An assessment of counsellors' ability to deliver the intervention effectively after 35 hours of training revealed that counsellors failed to achieve proficiency in MI *(121)*. A follow-up study examined the impact of refresher training and supervision on the counsellors' proficiency in the intervention; it found that the recommendations of the assessment had been applied with promising results *(122)*. Over a 12-month period, with

18 hours of refresher training and supervision, lay counsellors were able to improve on basic counselling communication skills and therapeutic approaches. When compared to a group of control counsellors, their counselling was more collaborative, supportive, empathetic, and it featured more problem-solving… *(123)*. This study demonstrates the importance of ongoing training and supervision in achieving and maintaining the delivery of good quality service by lay health workers.

As large-scale lay health worker interventions involve considerable financial investment *(124)*, more research is needed—especially in contexts where lay health workers are a necessary and integral part of service delivery—to understand how the most benefit from such a significant investment can be achieved.

✉ For more information contact Cathy Mathews: cathy.mathews@mrc.ac.za

The establishment of peer support groups can reinforce and extend the efforts of lay counsellors to ensure that adolescents adhere to treatment.

TRAINING AND SUPPORT GROUPS TO IMPROVE ADHERENCE (MOZAMBIQUE)

Fundação Ariel Glaser supports the Ministry of Health to provide clinical care in all districts in Maputo and Cabo Delgado provinces, where HIV shows the characteristics of a generalized epidemic. In order to improve adherence to ART by the adolescents and improve retention of this group in care and treatment services, the Ariel Glaser Foundation staff, in collaboration with staff from the provincial health directorate, have conducted specific training on paediatric and adolescent psychosocial support for lay counsellors, psychologists and psychiatry medical officers, including an explicit focus on adherence reinforcement and HIV disclosure (to the adolescents). At the same time, staff received training and improved skills in creating and supporting child and adolescent support groups. The groups are now fully active in seven out of eight districts, with each group consisting of about 20 adolescents (10–19 years). To support the training, the participants were provided with a range of materials, including job aids, an adherence flip chart and a manual on support groups.

There are differences in adherence among adolescents attending the support groups, and the reasons for non-attendance need further exploration (sometimes related to distance, family and/or psychosocial issues). The support groups seem to positively influence not just adherence but also self-esteem and coping with HIV more generally.

From 2013, F. Ariel Glaser will be supporting youth- and adolescent-friendly services, known as SAAJ, now in the process of revitalization by the Ministry of Health, and there are plans to build on and link with the experiences of working with ALHIV.

✉ For more information contact Paula Vaz: pvaz@arielglaser.org.mz

2.5 Other important considerations

2.5.1 Key populations

The most vulnerable adolescents, especially those in key populations living with HIV, must be reached and their needs must be met. This section highlights issues that may affect all adolescents but may be particularly important to adolescent members of key populations.

Young MSM

Research has found that among young MSM factors such as stigma, discrimination *(125)*, less condom use, more alcohol and drug use, and having sex with older partners *(126)* contribute to even higher risk than older MSM for HIV acquisition.

This analysis found that young MSM were significantly less likely to use condoms during last sexual intercourse, more likely to drink alcohol or use drugs before last sexual intercourse, and more likely to have had four or more partners during their lifetimes than young men who had sexual intercourse only with females. These behaviours are associated with substantial risk for infection. In one study among MSM the attributable risk for new HIV infection was 29% for using alcohol or drugs before sex and 32% for having had four to nine sex partners *(127)*. Further, in a study of primarily young MSM, 75% of those with acute HIV infection reported sex under the influence of drugs or alcohol, compared with 31% of HIV-negative MSM. The risk for HIV infection doubled for MSM with a sex partner five years older and quadrupled with a sex partner ten years older *(3, 126)*.

Role of peers

The role of peer support or peer counselling is important for all adolescents living with HIV but particularly for young people in key populations.

Disclosure and confidentiality

There is a risk for adolescents in key populations of being "revealed" by undertaking certain necessary activities (e.g. collecting medications at primary health-care clinics). Similarly, some activities at the community level can pose significant personal safety and legal risks to these adolescents. Forced disclosure of HIV status or disclosure without the consent of the individual often drives those in key populations, and ALHIV in general, away from HTC services and discourages retention in care.

In settings where counsellors are uneasy about providing support for disclosure, peer educators and CBOs can provide valuable support to offset some of the risks, and anonymous reporting can be established as a routine practice. All services must establish a system of unique identifier codes, as name-based reporting for national requirements and donor reporting risks violating confidentiality.

Laws and legal environments

Laws governing access to opiate substitution treatment (OST) for young drug users and access to ART need to be harmonized with other policies, e.g. needle and syringe programmes. Eligibility requirements for these programmes also need to be clarified.

Policy and legal barriers to providing services need to be reviewed and amended. In some cases certain behaviours and sexual orientations are criminalized. In other cases, educational institutions require applicants to disclose their HIV status as a pre-condition for admission. Until such laws and practices are changed, many adolescents with HIV in key populations may need legal support following HTC.

2.5.2 Education sector response

Access to education must in no way be linked to health status. The education sector has an important role to play in the continuing development of ALHIV in their school environments and potentially in the actual delivery of HTC.[1] There are five essential components of a comprehensive education sector response to HIV and AIDS *(128)*:

1. **quality education**: Access to educational opportunities is widely recognized as an effective means for reducing the vulnerability of children and young people to HIV;
2. **content, curriculum and learning materials** that are evidence-based, that build knowledge and skills for protective behaviour, and that start early and are sequenced and appropriate for the age and development stage of the learner;

1 The potential involvement of the education sector in the delivery of HTC needs to be explored although currently there is not significant evidence for this.

3. **educator training and support** that includes pre- and in-service training on HIV knowledge, confidence and communication skills and supervision and that addresses educators' own vulnerabilities to HIV, especially those living with HIV themselves;
4. **policy, management and systems** that include workplace policies to ensure zero tolerance of violence, abuse and discrimination, and strategic plans that are funded to implement, enforce and monitor these policies;
5. **approaches and entry points** including school health programmes, peer education, communication and media interventions, and life skills education.

Practical recommendations for the education sector to address the needs and aspirations of ALHIV include *(129)*:

- **Know your epidemic** in order to recognize trends and appreciate the nature and implications of its impact on the education system and upon learners in relation to access, retention and achievement in school.
- **Recognize the presence of students living with HIV.** Some may know their status and others may not. Some will want to disclose and others may not. ALHIV have the same needs as other learners as well as needs that are HIV-specific.[1]
- **Establish and reinforce links with other sectors** to help ensure the education sector's participation in HIV response planning and resource allocation.
- **Review, adapt and reinvigorate existing policies and practices** in order that they benefit ALHIV. In particular, policies related to privacy and confidentiality in education contexts need to be reinforced.
- **Develop and set up monitoring and evaluation systems.**
- **Continue to improve knowledge about HIV** among teaching, management and administration staff.
- **Encourage and support the provision of non-formal education.**
- **Recognize the value of teachers, staff, parents and community members living with HIV** as part of the response and contact trade unions, support groups and PLHIV networks.

Treatment education is a sectoral initiative with a broader reach than school-based activities. It is a critical component of efforts to ensure universal access to prevention, treatment and care *(130)*. Treatment education engages communities and individuals to learn about ART in order to:

- encourage increased uptake of HTC
- improve understanding of ART and drug regimens
- understand and be prepared for treatment-related costs
- advocate greater and more equitable access to treatment (including gender equity)
- support adherence to treatment
- encourage protective behaviours and healthy living
- reduce stigma and discrimination against PLHIV
- link testing, prevention, care and treatment initiatives for a comprehensive response to HIV.

2.5.3 Involvement of adolescents

Involving ALHIV is important for programmes: Nobody understands their problems better than they do. Involvement also contributes to their personal development. Empowering young people living with HIV to serve as peer educators and play a key role in the programme, as counsellors, trainers and advocates, not only improves programmes, thanks to their enthusiasm and creativity, but also provides ALHIV with new skills, power, and knowledge. Furthermore, providing adolescents with a physical space that belongs to them helps to build a supportive long-term

1 Orientation for staff (e.g. at residential facilities particularly) is important for sensitivity to the needs of students who are on ART and who may be subjected to harassment (about medical supplies, personal behaviour, etc.), which can discourage adherence.

relationship, and demonstrates that the community is interested in addressing their health needs. Ministries of health need to ensure that adolescents' contributions to service delivery are formally included and recognized in national plans.

Meaningful and proactive involvement of adolescents in the programmes that provide services as well as in their own health care requires sustained patient education designed specifically for adolescents, accompanied by acceptable and effective support.

Adolescents must also be empowered and supported to make decisions about their own health care, with the ultimate goal of self-management, as part of the transition to adulthood.

2.5.4 Increasing acceptability and uptake of services

To increase the acceptability and uptake of services among adolescents while reducing direct and indirect costs to patients, there are a number of approaches to consider:

- minimizing the number of required facility visits;
- providing services at times when adolescents can attend without interfering with their education;
- reducing waiting times for all visits;
- providing separate waiting areas for adolescents that offer separation from adult waiting areas and of peer supporters and adolescent-friendly materials and activities.

Coordination of facility visits across services—e.g. clinical care, laboratory services, and pharmacy pickup—or across different points of care, when care is provided at different locations, are important to reduce the burden of care to patients and their care providers.

2.5.5 Living positively

BAYLOR TEEN CLUB (SWAZILAND)

Swaziland has the highest rate of HIV in the world. The Teen Club was born out of a desire to help adolescents living with HIV become powerful agents of change. Since starting in 2006, Teen Club has grown to include one monthly meeting in each of the four regions of Swaziland. There are currently four teen club centres—Mbabane, Manzini, Hlathikulu and Siphofaneni.

The mission of Teen Clubs is to empower adolescents with HIV in Swaziland to live positively and successfully transition into adulthood. Services offered at the clubs include emotional and educational support through structured activities designed to teach life skills, foster relationships, and build confidence. The clubs provide a forum for adolescents to constructively express themselves and discuss issues regarding their condition without the threat of stigma.

Each month more than 350 ALHIV attend the support groups on Saturday mornings. Every meeting begins with games and icebreakers that help new members quickly feel comfortable while making new friends. Teen Club members then participate in educational and empowering activities from the Baylor life skills curriculum. During their meetings the teens are split into different age groups, allowing the younger adolescents to participate in activity-based lessons, while the older teens engage in in-depth conversations with a more mature focus. With the help of adult Teen Club coordinators, the lessons are conducted by Teen Leaders, older members of Teen Club who have successfully completed the Teen Leadership Training programme. Topics include advocacy, body changes, disclosure, peer

pressure, self-expression, safer sex practices, grief and bereavement, self-expression and realizing your dreams. To help ease the financial burden on our members, each teen is provided a snack and travel reimbursement for public transportation.

Strong leadership, partnerships and ongoing training of adult volunteers and Teen Leaders ensure the sustainability of the Teen Club activities. With the expansion of support groups and the addition of a Teen Club office and a dedicated staff, Baylor has been able to increase participation of teens while decreasing average costs. Despite the accomplishments made over the past six years, there are still several challenges facing implementation of teen clubs.

Is it a success?
When adolescents living with HIV are given a voice and supported to overcome obstacles to good health, their strength, creativity and passion can engender hope, even in the most desperate situations. Teen Club helps build the capacity of Swaziland's civil society to support Swaziland's adolescents in the battle against HIV. A recent evaluation of the Teen Clubs has shown that adolescents with HIV appreciate the services provided through the clubs, and they provide a forum in which adolescents with HIV can come together to share their personal experiences and provide one another the much-needed psychological and emotional support. The teen club members benefit from being able to speak openly and freely without fear, stigma and discrimination. Restricting Teen Club membership to teens with HIV is believed to be one of the main reasons for the success of the clubs.

While there are many benefits of attending Teen Club, … what is accomplished is best described by the Teen Club members themselves: "I am not alone and I can help other teens living with HIV". "I want to learn life skills and how to improve my health". "I am going to be a leader".

Challenges facing the programme
- How best to provide nutritious food within a constrained budget?
- How best to decentralize Teen Club so that more adolescents living with HIV are able to get the vital support they need?
- How to empower the adolescents to successfully transition to adult health care and services?

2.5.6 Importance of parents and caregivers

It is important to give adequate attention to supporting the parents and caregivers of ALHIV, so that they in turn are better able to support their adolescents. A sense of partnership between health-care providers and the parents and caregivers of ALHIV can facilitate adherence to treatment and retention in care. It is also important for providers to recognize and resolve conflicts that may exist between parent/caregivers and ALHIV (and even with peer educators and counsellors) on issues such as how and when adolescents disclose their status to others, and what to do if an ALHIV becomes sexually active, is not adhering to treatment or care regimens, or becomes pregnant. Continuous support counselling and education for the caregivers of ALHIV is critical to the success of programmes. At the same time it is important to acknowledge the tension between autonomy and protection; the best interests of the adolescent and the adolescent's needs and rights may have to take precedence over the opinions of parents and caregivers.

Programmes will serve the interests of adolescents when they consider the challenges facing caregivers—especially in the case of those caring for orphans or other vulnerable children—who often are not compensated and who are caring for other family members as well.

Some adolescents do not have parents or have unsupportive or abusive parents. This may be a particular issue for adolescents in key populations and has important implications for the ability and the right of adolescents to provide informed consent for themselves. If a parent is unavailable, it is important to encourage the adolescent to identify another supportive adult.

THE IMPORTANCE OF RELATIONSHIPS BETWEEN HEALTH-CARE PROVIDERS AND FAMILIES—INSTITUTO DE INFECTOLOGIA EMILIO RIBAS (BRAZIL)

The HIV clinical group was created in 1985, the beginning of the HIV epidemic in Brazil, when the first child with HIV was referred to the hospital. The team is composed of infectious diseases specialists, paediatricians, nurses, social workers and psychologists.

Expertise was initially developed through research of medical literature, exchanging experiences with other groups worldwide and day-to-day learning through success and frustrations with patients. This learning approach helped staff respond to issues such as disclosure of the diagnosis, HIV testing, treatment adherence and social inclusion. Solutions were sought as the problems arose; as the first team in the country to deal with HIV infection in the paediatric population, creativity, innovation and patience were important.

The team now meets on a daily basis and all the emerging problems are fully discussed within the team. Furthermore, the same team works together on clinical research and on training young professionals, so everyone is always in contact with the most recent publications and experts from all over the world.

Key factor for success
The team has changed very little since 1985, and it has therefore been possible to establish good partnerships with the patients' guardians and the children and adolescents themselves.

✉ For more information contact Marinella Della Negra: aacphiv@uol.com.br

2.5.7 Integration of services

HIV prevention, diagnosis, treatment and care interventions for adolescents should, as far as possible, be integrated with those for adults and for children.[1] At the same time, the health sector must able to respond effectively to the specific needs of adolescents in general (e.g. adolescent-friendly health services) by utilizing non-judgemental staff who like and understand adolescents and by addressing issues such as accessibility of care and confidentiality.

Integration also needs to take place between community-based health, education and social welfare services and government services, staff and other local stakeholders. Partnerships and collaborations between state and civil society/communities are essential to expanding access to services and assuring the quality of services and a continuum of care at every level. State health systems must be closely linked to community-based services and providers. There must be established connections and referral systems along the continuum of care and in both directions—from the community to the formal health system and from the formal health system back to the community.

1 Some ALHIV need particular sensitivity with respect to physical appearance. The physical immaturity of many vertically infected adolescents may make them stand out more in adult clinics, and providers should be prepared to make accommodations that will put these individuals at ease if necessary.

SERVICES AND SUPPORT FOR ALHIV (NAMIBIA)

The programme focuses on adolescents aged 10–19 years in the Caprivi and Khomas regions of Namibia, including ALHIV, with the aim of strengthening the design, development and implementation of service delivery mechanisms for increased uptake and quality of HTC for adolescents and young people, including Post Test Support Services (PTSS), and improving service provision for ALHIV.

Activities include baseline data collection, collation and analysis; the development of training materials; training of adolescent facilitators who are living with HIV and their parents, caregivers and health-care providers; the establishment of peer support groups and spaces for them to meet; and the use of a disclosure tool with all adolescents with HIV attending the paediatric ART target site.

In addition, HTC is emphasized as an entry point to prevention as well as care, treatment and support services through: PTSS to support all adolescents and young people (with HIV or not); strengthened referral linkages between HTC, PTSS and other prevention, care and treatment, and support services; and community-based mobilization mechanisms, including interpersonal and mass media communication to reach out to adolescents and young people.

Reasons for success

- Initiated in one of the hospitals where there was already a functional teen club
- Establishment of a project steering committee to oversee the project implementation
- Technical assistance and funding for capacity building of ALHIV, parent/caregivers, and health-care providers
- Incorporating the teen club from the beginning
- "Ownership" of the project by ART site and hospital management
- Wider stakeholder involvement in the development of the national guidelines
- Adoption of the Adolescent-Friendly Health Services (AFHS)-ALHIV curriculum by the national health training centre within the MOH
- Engagement of NGOs working with children and adolescents on HIV and SRH matters in the projects.

Factors that contributed to the success of the project:

- Exposure of staff and ALHIV to a global consultation on programming for ALHIV
- Committed and dedicated staff
- Availability of space and incentives for participation (e.g. the provision of refreshments by the implementing site for teen club activities).

Challenges facing the programme

- Confidentiality: consent from parents and caregivers to health-care providers to allow them to introduce the paediatric disclosure tool to the children and adolescents; consent from parents and caregivers to allow health-care providers to engage an NGO to provide training to ALHIV and their caregivers; and consent for ALHIV to voluntarily enrol in the teen club. This took a long time, and delayed project implementation.
- Funding: the funding came to an end at a time when the need for resources was greater than when the project started (for training and for electronic devices for defaulter tracing);
- Unfriendly space: the space provided for the teen club corner in the implementing facility needs refurbishment, painting and extra equipment.

LINKS WITH ADOLESCENT-FRIENDLY SEXUAL AND REPRODUCTIVE HEALTH SERVICES (MOZAMBIQUE)

In 2004, the World Bank launched a pilot HIV/AIDS Treatment Acceleration Project (TAP) in Mozambique, Burkina Faso, and Ghana aimed at slowing the epidemic by increasing access to voluntary testing and counselling (VCT) and adherence to care and treatment. In Mozambique the four-year US$1.25 million Treatment Acceleration Project (TAP) was implemented by Pathfinder International in collaboration with the Government of Mozambique and with additional technical and financial support from UNFPA. TAP built and expanded on the successes of the national Geraçao Biz Programme. TAP was implemented in two provincial hospitals that offered youth-friendly SRH services (YFS) in Maputo and Xai-Xai in Gaza Province.

Through TAP, HIV counselling and testing, ART, and PMTCT were integrated into the YFS service delivery package for the first time. Young people testing positive were provided immediate support and counselling, given a CD4 test, and linked to treatment if needed. Pregnant adolescents who tested positive were linked to PMTCT services. In addition, a trained psychologist spent several hours a day at the YFS offering counselling and support for disclosure as well as positive and healthy living. Young people testing positive were immediately linked with a peer educator with HIV who had been trained to provide care and support and "sheltering".[1] Finally, all youth clients testing positive for HIV were urged to join a weekly support group at the YFS facility led by peer educators with support from providers and the psychologist. Over the course of the project, about 12, 000 young people were tested for HIV, with about 25% testing positive, and 656 young people began ART. The programme had high levels of retention for ART clients, with only 11% and 16% of ART clients dropping out over the course of the project in Maputo and Xai-Xai, respectively.

The programme was considered to be highly successful by the MOH and other partners in the country. It was a catalyst for the scale-up of HIV counselling and testing within all YFS sites in Mozambique. HIV counselling and testing is now offered at 335 Geraçao Biz YFS sites nationwide, and approximately 153 000 young people were tested in 2011. In addition, peer educators living with HIV remain active in the Geraçao Biz Programme, and in 2011 the Ministry of Health issued guidelines that all YFS facilities should have support groups for young people living with HIV. This is a big step in scaling up some of the key elements of TAP, but it has yet to be fully operationalized in the country.

Factors that contributed to the success of TAP

- Building on an existing national programme with well-known and successful youth-friendly services allowed young people to be aware of the services and increased participation of young people in the programme.
- Empowering young people living with HIV to serve as peer educators and play a key role in the programme not only improved the programme, but also equipped young people living with HIV with skills, power, and knowledge to improve their health and that of their peers.
- Support groups and "sheltering", including home visits, were crucial to adherence to treatment and maintaining follow-up care with young people living with HIV.

Challenges facing the programme

Psychologists play a key role in the programme, but there are few in Mozambique, especially in remote areas. Peer educators can be trained to fulfil some of these duties, but supervision is required to ensure quality.

✉ For more information contact Rita Badiani: rbadiani@pathfinder.org or Gwyn Hainsworth: ghainsworth@pathfinder.org

1 In this project "sheltering" refers to the role of the peer educator in providing support to newly diagnosed young people by accompanying him/her through counselling and medical appointments, providing insight and support related to treatment (including adherence), and offering social support inside and outside of the clinic walls. Sheltering also includes the role that the peer educator served in providing home visits to young clients and their families once the young person chooses to disclose.

IN CONCENTRATED EPIDEMICS: INTEGRATION OF SERVICES—SERVIÇO DE IMUNOLOGIA CLÍNICA E HOSPITAL-DIA DO IMIP, INSTITUTO DE MEDICINA INTEGRAL PROF. FERNANDO FIGUEIRA (BRAZIL)

The programme started in 1987, when the first paediatric AIDS case was diagnosed in the Northeast region of Brazil. In 1988, the service became a national reference centre for HIV infection among children and had started to train health professionals locally and from other regions of Brazil, expanding to incorporate the testing of all pregnant women for HIV, becoming Mother-Child HIV clinics. In 1998, treatment for other adults was added, and in 2003 the move to new facilities made it possible to put together a multi-professional team to offer comprehensive care and day-care services for adolescents and children.

Currently, IMIP´s complex provides an HIV reference service, with paediatricians, immunologists, infectious disease specialists, gynaecologists, rheumatologists, psychologists, dentists, nursing staff and social health assistance. Approximately 450 children and adolescents living with HIV have been registered with the service, of which 300 are alive and in follow-up. In addition, the clinic is following up 10 children born to mothers with HIV who themselves were perinatally infected; only one of these children has HIV.

Lessons learned

- Improving the skills of health workers is essential so that they can better understand and treat adolescents, who need strict adherence to antiretroviral drugs
- Flexible approaches to transitioning to adult services are important (at the same clinic)
- Since the beginning of the programme, the "AIDS clinic" was called the Immunodeficiency Outpatient Department and later the Clinical Immunological Service for HIV and Non-HIV Patients (including primary immunodeficiency, allergy and rheumatology). It is important to call the services something that helps to decrease stigma and discrimination (the day-care hospital is used mostly by non-HIV patients).

✉ For more information contact Edvaldo Souza: edvaldo.es@gmail.com or visit www.imip.org.br

2.5.8 Scaling up interventions

If programmes are to be scaled up in a sustainable way, it is important to work with and through the existing systems and structures, including the development of training materials and guidelines. Government health systems provide facilities through which services can be delivered, and integration helps to ensure that those with other chronic illnesses and vulnerable groups can benefit from the efforts to strengthen services for ALHIV. One of the challenges that have been mentioned in several programmes is the absence of relevant policies—for example, the lack of a formal policy for adolescents living with HIV, or more specifically the lack of a policy on disclosure of HIV status to children and adolescents who have HIV. Furthermore, there is a lack of specific standards and guidelines relating to adolescents—e.g. for adherence and psychosocial support. It is important to note that while many countries now have such guidance for small children, these documents are often not relevant to adolescents, especially older adolescents.

Programmes for/with ALHIV should link and integrate with programmes that provide health services to young people more generally, including services for other chronic illnesses, programmes for ASRH, and prevention interventions for young people. Building on existing and successful national programmes helps young people to be aware of, have confidence in, and increase the uptake of services. It can also engage NGOs that are focusing on adolescents to contribute to efforts to improve services for ALHIV as well. Providing services for ALHIV within general adolescent-friendly services (including HIV services) may help to decrease stigma that may be attached to going to an "HIV clinic".

In Asia, services for key populations are provided largely by NGOs and CBOs. These services need to be scaled up to include adolescent members of key populations (which involves issues of consent). By providing clear guidance, governments will support and legitimize NGOs in this work. In concentrated epidemic settings this approach may be more effective than services provided by public institutions.

Decentralization is also important to scaling up interventions for adolescents, as it takes services closer to the client, an important aspect in reducing barriers to adolescents' use of services. Successful decentralization of services for adolescents will require health worker training, decentralization of support groups to community venues or local health centres, monitoring systems that include data disaggregated by age, and robust referral systems for a range of problems affecting adolescents. Young people in key populations will require special attention.

Quality control

Although decentralization and scaling up improve ALHIV's access to support, it is also essential to ensure quality. Coordinated rollout of services has been achieved through robust coordination systems and standardized materials—e.g. weekly meetings with youth service providers for planning and supportive supervision; training manuals and standard operating procedures in line with national and international guidelines for consistent delivery of quality services. Continuous monitoring and evaluation allows the programme to evolve over time, continually adapting to meet the changing needs of the target population. At the same time it is essential to have mechanisms in place to check that the established standards are actually being observed (quality assurance).

Sustainability

CBOs and community-based service delivery are vulnerable to inconsistent funding and reliance on volunteers. Compensation and sustainability issues must be considered when expanding access to HTC and other services at the community level.

2.5.9 Messaging

Public health communication should address specific adolescent populations using non-traditional approaches that identify particular locations and activities for dissemination of information and key messages, e.g. sports clubs, bars, youth centres, vocational centres, markets, schools. Ideally, messages should be formulated by or with the involvement of adolescents themselves, ensuring that their perspectives are reflected; this is particularly true for adolescent members of key populations.

Other approaches for effective communication with adolescents involve social marketing of key products and services and peer role models, especially those living openly and positively with HIV. The role of new technology may be especially powerful for communication initiatives addressing adolescents. Online social networks, mobile technologies and related innovations can contribute to the increased connectedness of adolescents around the world and facilitate rapid and effective dissemination of life-saving information. Private–public partnerships can facilitate messaging and promotion of services for adolescents; these partnerships will have different purposes and channels of communication in different settings.

2.5.10 National-level issues

HIV as an opportunity to move the adolescent health agenda

As health systems dedicate new energy and resources to the needs of adolescents, every effort should be made to maximize the opportunities that treating ALHIV

provides to focus more generally on strengthening national efforts on behalf of adolescents with chronic illness and provision of services for adolescents more generally (e.g. SRH). National data collection and analysis by health management information systems (HMIS) will need improvement to gather and assess information specific to adolescents.

Disaggregation of data

There are gaps in the collection and analysis of strategic Information regarding ALHIV and adolescent members of key populations.

Disaggregation of data remains a challenge (or in many cases avoiding the aggregation of data as it moves up the reporting chain). There is still minimal knowledge about ALHIV because of the way in which data are aggregated: More generally, data are aggregated in broader groups (15–49 years or just greater than 15 years), or more specifically, younger adolescents are grouped with infants and children (0–14 years) and middle and late adolescents are grouped with young adults (15–24).

To strengthen services for adolescents, national health management systems will need to stratify data more appropriately into clear adolescent age groups (10–19 years) or sub-groups (10–14, 15–19 years), as well as by sex. This will advance a better understanding of the needs and practices of adolescents, allow for more effective monitoring and evaluation (M&E) for this age group (e.g. programme performance in relation to better serving ALHIV as well as exposing gaps in the continuum of care) and facilitate refinements to overall supply, procurement and distribution planning. Key indicators specific to adolescents include uptake of testing, linkages with treatment and care, and trends in LTFU.

To assess how well the needs of adolescents in key populations are addressed, several questions need answers:

- How do existing national data collection systems support addressing and monitoring those who need HIV services most?
- What are the characteristics of marginalized individuals who do not fit into key populations as currently understood?
- How best can M&E identify and document successful models and best practice of community-based delivery of services for key populations?

Policies and legislation addressing adolescent-specific issues

There are a number of policies that require attention—in particular, policies and legislation relating to informed consent by adolescents (without parental consent) and laws that criminalize the behaviours of adolescents in key populations.

2.5.11 Advocacy

EAST EUROPEAN AND CENTRAL ASIAN UNION OF PEOPLE LIVING WITH HIV (ECUO): MOBILIZATION OF ADOLESCENTS AFFECTED BY HIV/AIDS IN THE EECA REGION

The goal of the ECUO project was to ensure that the needs and concerns of adolescents living with HIV (ALHIV) would be better articulated and heard by adult PLWH, community leaders, local authorities, service providers, governments and other stakeholders. Project objectives included strengthening advocacy skills, increasing knowledge about issues relevant to ALHIV (including adherence, rights to health, education and other social services), and building networks to empower adolescents to advocate their rights in Ukraine, Russia, Kazakhstan, Uzbekistan, Kyrgyzstan and Belarus. The project included the development and monitoring of social networking platforms, advocacy events where adolescents promoted the rights of ALHIV among national and regional leaders, and strengthening psychosocial and other services. The project also included "mapping" of organizations that provide health and social services available to ALHIV in and beyond the project countries.

Lessons learned from the project

- Despite numerous trainings on advocacy skills, participation in local and regional events, support groups, etc., many adolescents still have not accepted their HIV diagnosis. Not all adolescents are ready to talk about their feelings related to HIV, let alone speak about their lives openly. Most of them still operate only with basic information about HIV/AIDS, ARV medications and adherence.
- HIV issues are often not a priority in the lives of adolescents affected by HIV since they are too busy coping with numerous other difficult life situations, including poverty, not attending school and not having a stable place to live due to termination of parental rights—many parents are drug users and they often do not care for their children.
- Adolescents are constantly living in stress and experiencing stigma and discrimination, all of which often lead them to stop taking their ARV medication.
- Weak government support reduces access to critical social services, such as placing ALHIV in foster families or boarding schools. Coordinators of projects and other initiatives end up dealing with the kinds of social issues that the government should be handling.
- By providing social assistance (either from community-based projects or sometimes from state social services), adolescents affected by HIV/AIDS receive help in solving issues that are not directly connected to HIV/AIDS, but their quality of life still improves.

2.5.12 Research

There is no single solution that responds to the needs of all ALHIV. Several of the programmes highlighted in this guidance emphasize being innovative and flexible and thinking outside the box. This is often easier for NGOs than for government health systems—which has implications for subsequent integration, decentralization and scaling up. NGOs can be testing grounds on behalf of government, and governments can be supported to implement demonstration projects with the intention from the beginning of scaling them up.

RESEARCH TO SUPPORT SERVICE PROVIDERS (ZIMBABWE) *(131)*

Objective: To develop an algorithm for primary-care health workers for identifying adolescents with HIV in populations at high risk through mother-to-child transmission.

Methods: Five hundred and six adolescent (10–18 years) attendees at two primary care clinics in Harare, Zimbabwe, were recruited. A randomly extracted "training" data set (n = 251) was used to generate an algorithm using variables identified as being associated with HIV through multivariable logistic regression. Performance characteristics of the algorithm were evaluated in the remaining ("test") records (n = 255) at different HIV prevalence rates.

Results: HIV prevalence was 17%, and infection was independently associated with client-reported orphanhood, past hospitalization, skin problems, presenting with sexually transmitted infection and poor functional ability. Classifying adolescents as requiring HIV testing if they reported >1 of these five criteria had 74% sensitivity and 80% specificity for HIV, with the algorithm correctly predicting the HIV status of 79% of participants. Even in low HIV prevalence settings (<2%), the algorithm would have a high negative predictive value (≥99.5%) and result in an estimated 60% decrease in the number of people needing to test to identify one individual with HIV, compared with universal testing.

Conclusions: The simple algorithm that was developed can identify which individuals are likely to be exposed to or infected with HIV with sufficient accuracy to provide a screening tool for use in settings not already implementing universal testing policies among this age group, for example, immigrants to low HIV prevalence countries.

3

ADAPTING THE GUIDELINES

Countries will have to adapt these guidelines for their particular contexts, taking into account explicit considerations of:

- the **heterogeneity of adolescents** (age, sex, marital status, different responsibilities in the family and community);
- the **rapid physical, cognitive and social development** that are features of this stage of life;
- the particular vulnerabilities of **adolescents in key populations**;
- the ways in which adolescent members of key populations **self-identify, form communities, and follow community norms and where they can be found**;
- the particular country-specific (national or sub-national) **characteristics of the epidemic** as well as the general characteristics of adolescents in the country in terms of age of sexual debut, how many are out of school, not in training, out of work, etc.

WHO normative guidelines are developed for a global audience; it is expected that each country will adapt the recommendations to suit its own circumstances. The implementation of some recommendations may be challenging in some settings in view of the differing prevalence of HIV and of limited available and promised resources. The new recommendations have the potential to increase substantially the number of people seeking HTC, treatment and care services and thus to increase the total cost of delivering services. Immediate and full implementation of these recommendations may not be practicable, feasible or affordable. However, country-level strategic planning should be directed towards eventually implementing these recommendations and achieving national universal access to HIV testing, treatment and care for adolescents.

4 RESEARCH GAPS

Research concerning interventions specifically addressing adolescents has not yet been prioritized. Urgent attention should be given to the increasing numbers of perinatally exposed infants and children on ART who are surviving into adolescence and adulthood—with evolving needs for care—and adolescent slow progressors who need diagnosis, treatment and care. Table 4 highlights areas identified by the Guidelines Development Group and other contributors as priorities for the research agenda on adolescents and ALHIV.

Table 4. Needs for research on HTC for adolescents and treatment and care for adolescents living with HIV

Theme	Reearch areas
General	• Implement programmes in a way that maximizes the evidence output; should include comparative effectiveness studies • Programmes need to strengthen M&E systems and disseminate data generated by these systems • Development of culturally specific and valid measures of mental health, stigma and adherence outcomes for adolescents • Research on the magnitude of the issues under consideration in these guidelines • Pragmatic RCTs • Consider applications for interventions for adolescents within paediatric as well as adult research.
HTC	• Cost-effectiveness of routine HTC in generalized epidemics • Innovative strategies for adolescent in key populations • In generalized epidemics understanding how HCT affects girls' and young women's behaviour • Pre-HIV testing "Screening questions/ tests" (risk screens) • Comparative effectiveness and cost-effectiveness of interventions to improve access to HTC and linkage to care in different settings • Feasibility, acceptability, ethics, effectiveness of self-testing • Feasibility, acceptability, ethics of school-based testing • HTC and effectiveness, e.g. one outcome would be individual-level impacts and behaviour change following testing for all adolescents (with HIV or not) • Investigation of interventions that successfully promote HTC for adolescent members of key populations • Research is needed in countries where the age of consent has been lowered to determine that this has not led to riskier behaviour among young people; there is already a framework to build upon with the work that has been done demonstrating that sex education does not lead to increases in risky behaviour. **Outcomes** a. Number needed to test and — linked to care/ANC — linked to prevention interventions (circumcision, contraception, preventive behavioural interventions) b. Cost-effectiveness data c. Cost per person with HIV identified and linked to prevention and care using different approaches.

Theme	Reearch areas
Access and linkage to care	• Magnitude of attrition and reasons for attrition at each step along the treatment cascade • Interventions (rigorously evaluated) to link adolescents to and retain them in HIV care • Interventions to link and retain young people in key populations in care • Gender-related barriers to retention in care • Integration of care into school-based settings • Feasibility/cost-effectiveness/outcomes of decentralization • Optimal pre-ART retention strategies (systematic review of models of pre-ART care for adolescents) • Integration with SRH services for youth with STI or other indicators of unsafe sex. **Outcomes** a. Access to care b. Linkage to care c. Retention in care
Disclosure	• Interventions to help parents/guardians support disclosure • Supportive interventions to help adolescents' decision-making about beneficial disclosure • Training of providers. **Outcomes** a. Short- and long-term psychosocial outcomes
Adherence	• Effective interventions for sustained adherence • Training of providers.
Community-based Interventions	• Identify effective components and combinations of community-based interventions that improve adherence, linkage and retention in care as well as proximal outcomes • Identify what aspects of community-based approaches work (e.g. psychosocial, economic, treatment literacy); not all community-based initiatives are effective.
Decentralization	• Clinical outcomes and patient preferences, especially in the age group considered. (There are data that suggests that retention in care might be better.)

UNICEF, with its partners, works to advocate for and support effective HIV prevention, treatment and care in adolescents. This involves efforts to overcome stigma and discrimination against people affected by the HIV and AIDS pandemic as well as efforts to strengthen national responses so that they respond comprehensively in order to fulfil the rights of the most vulnerable adolescents. We recognize, however, that stigma persists, and we take active steps to ensure that our communications work safeguards the identities of subjects in accordance with their wishes and with global standards of child rights and protection. We obtain written consent from people living with the virus before identifying them as such in photographs and other media. Unless otherwise noted, those depicted in images provided by UNICEF should not be assumed to be living with HIV. Any adolescents and young people shown have been reached through HIV prevention and adolescent development programmes, or are living in situations significant to an effective global HIV response.

Front cover
Boy holding puppy, Philippines, 2011
© UNICEF/Giacomo Pirozzi
Amsani, 12, is selling puppies in the streets of Manila, Philippines. In June 2011 in the Philippines, an estimated 250,000 children lived and worked on the streets, at increased risk of being trafficked, enduring abuse and sexual exploitation, forming dependence on illegal drugs and other harmful substances or coming into conflict with the law.

Top back cover and page 69
Girl in black, smiling, Chad, 2011
© UNICEF/Patricia Esteve
A girl laughs during a skit on the prevention of HIV, at a youth centre in Moundou, Chad. The centre teaches adolescents how to prevent the transmission of HIV and offers free HIV testing. The centre also has a small library and game centre and hosts a drama club and other extracurricular activities.

Centre left back cover and page 43
Boy from Ukraine sitting on a wall
© UNICEF/Giacomo Pirozzi
Artem, 14, sits on a wall outside 'Way Home', the shelter where he lives in the city of Odessa, Ukraine. The UNICEF-assisted shelter provides food, accommodation, literacy training and HIV/AIDS-awareness and prevention outreach programmes for children who live or work on the streets. Because of unsafe sex and injecting drug use, street adolescents are one of the groups most at risk of contracting HIV in Ukraine.

Centre right back
Indian girls
© UNICEF/Prashanth Vishwanathan
In Youth Information Centers located in Gujarat, India, engaged adolescents are trained to disseminate information on HIV/AIDS and other health issues.

Bottom back cover and page 1
Grandmother and Granddaughter, Zimbabwe, 2011
© UNICEF/Giacomo Pirozzi
HIV positive Monica and her granddaughter, Sympathy, 14, sitting at home on a bed in the village of Makuzeze, Zimbabwe.
