## Subpart 7. Targeted Case Management

### Chapter 101. General Provisions

#### §10101. Program Description

A. This Subpart 7 governs the provision of case management services to targeted population groups and certain home and community based services waiver groups. The primary objective of case management is the attainment of the personal outcomes identified in the recipient's comprehensive plan of care. All case management agencies shall be required to incorporate personal outcome measures in the development of comprehensive plans of care and to implement procedures for self-evaluation of the agency. All case management agencies must comply with the policies contained in this Subpart 7 and the *Medicaid Case Management Services Provider Manual* issued March 1, 1999 and all subsequent changes. Case management is defined as services provided to individuals to assist them in gaining access to the full range of needed services including:

1. medical;
2. social;
3. educational; and
4. other support services.

B. The department utilizes a broker model of case management in which recipients are referred to other agencies for the specific services they need. These services are determined by individualized planning with the recipient's family, and other persons/professionals deemed appropriate. Services are provided in accordance with a written comprehensive plan of care which includes measurable person-centered outcomes.

C. Recipient Freedom of Choice. Recipients have the right to select the provider of their case management services from among those available agencies enrolled to participate in the Program. Recipients are requested to indicate a first and second choice of a provider from among those available providers in the region. If the recipient fails

### Chapter 103. Core Elements

#### §10301. Services

A. All Medicaid-enrolled case management agencies are required to perform the following core elements of case management services.

1. Case Management Intake. The purpose of intake is to serve as an entry point for case management services and to gather baseline information to determine the recipient's need, appropriateness, eligibility and desire for case management.

2. Case Management Assessment. Assessment is the process of gathering and integrating formal and informal information regarding a recipient's goals, strengths, and

needs to assist in the development of a person centered comprehensive plan of care. The purpose of the assessment is to establish a contract between the case manager and recipient for the provision of service. The assessment shall be performed in the recipient's home.

3. **Comprehensive Plan of Care Development.** The comprehensive plan of care (CPOC) is a written plan based upon assessment data (which may be multidisciplinary), observations and other sources of information which reflect the recipient's needs, capacities and priorities. The purpose of the CPOC is to identify the services required and the resources available to meet these needs.

a. The CPOC must be developed through a collaborative process involving the recipient, family, case manager, other support systems, appropriate professionals and service providers. It shall be developed in the presence of the recipient; therefore, it cannot be completed prior to a meeting with the recipient. The recipient, family, case manager, support system and appropriate professional personnel must be directly involved and agree to assume specific functions and responsibilities.

b. The CPOC must be completed and submitted for approval within 35 calendar days of the referral for case management services.

4. **Case Management Linkage.** Linkage is the arranging of services agreed upon with the recipient and identified in the CPOC. Upon the request of the recipient or responsible party, attempts must be made to meet service needs with informal resources as much as possible.

5. **Case Management Follow-Up/Monitoring.** Follow-up/monitoring is the mechanism used by the case manager to assure the appropriateness of the CPOC. Through follow-up/monitoring activity, the case manager not only determines the effectiveness of the CPOC in meeting the recipient's needs, but identifies when changes in the recipient's status necessitate a revision in the CPOC. The purpose of follow-up/monitoring contacts is to determine:

- a. if services are being delivered as planned;
- b. if services are effective and adequate to meet the recipient's needs; and
- c. whether the recipient is satisfied with the services.

6. **Case Management Reassessment.** Reassessment is the process by which the baseline assessment is reviewed and information is gathered for evaluating and revising the overall CPOC. At least every quarter, a complete review of the CPOC must be performed to assure that the goals and services are appropriate to the recipient's needs as identified in the assessment/reassessment process. A reassessment is also required when a major change occurs in the status of the recipient and/or his family.

7. **Case Management Transition/Closure**

a. Provided that the recipient has satisfied the requirements of linkage under §10301.A.4, discharge from a case management agency must occur when the recipient:

- i. no longer requires services;
- ii. desires to terminate services;
- iii. becomes ineligible for services; or
- iv. chooses to transfer to another case management agency.

b. The closure process must ease the transition to other services or care systems. The agency shall not retaliate in any way against the recipient for terminating services or transferring to another agency for case management services.

B. In addition to the provision of the core elements, a minimum of one home visit per quarter is required for all recipients of optional targeted and waiver case management services. The agency shall ensure that more frequent home visits are performed if indicated in the recipient's CPOC. The purpose of the home visit, if it is determined necessary, is to:

1. assess the effectiveness of support strategies and to assist the individual to address problems;
2. maximize opportunities; and/or
3. revise support strategies or personal outcomes.

C. The case management agency shall also be responsible for monitoring service providers quarterly through telephone monitoring, on-site observation of service visits and review of the service providers' records. The agency must also ensure that the service provider and recipient are given a copy of the recipient's most current CPOC and any subsequent updates.

**AUTHORITY NOTE:** Promulgated in accordance with R.S. 36:254 and Title XIX of the Social Security Act.

**HISTORICAL NOTE:** Promulgated by the Department of Health and Human Resources, Office of Family Security, LR 12:834 (December 1986) amended by the Department of Health and Hospitals, Office of the Secretary, Bureau of Health Services Financing, LR 19:648 (May 1993), LR 23:732 (June 1997), repealed and promulgated LR 25:1251 (July 1999), repromulgated LR 30:1036 (May 2004).
