## HEALTHCARE FACILITY NOTICE/ORDER Pre-Admission Screening and Resident Review

### FOR IMMEDIATE RELEASE

TO: All Licensed Hospitals  
All Medicaid Certified Nursing Facilities

FROM: Ruth Johnson   
Medicaid Executive Director

RE: Temporary Suspension of Pre-Admission Screening and Resident Review (PASRR) Level II

DATE: September 14, 2020

.....

This Healthcare Facility Notice will provide information on the suspension of Pre-Admission Screening and Resident Review (PASRR) Level II activities for thirty (30) calendar days after nursing facility admission starting August 29, 2020. This directive is applicable to all licensed hospitals and nursing facilities in Louisiana.

The State of Louisiana, Department of Health ("LDH" or "Department"), is committed to taking critical steps to ensure public health and safety after Hurricane Laura. The State of Louisiana, Department of Health, is **DIRECTING** that all licensed hospitals and nursing facilities adhere to the following provisions, **EFFECTIVE IMMEDIATELY**:

### **PRE-ADMISSION SCREENING AND RESIDENT REVIEW LEVEL II**

The Centers for Medicare and Medicaid Services (CMS) has approved Louisiana's 1135 Waiver Request in regards to the PASRR requirements. Effective August 29, 2020, the Level II assessments required under PASRR are waived for thirty (30) days following a nursing facility admission. All new admissions will be treated like exempted hospital discharges and if continued Nursing Facility (NF) placement is still warranted at the end of the initial authorization period, the NF shall use the existing continued stay review process. At that time, persons admitted under the waiver who have suspected mental illness (MI) or intellectual disability (ID) will be identified and receive a resident review.

The facility/hospital should still call in a LOCET and complete the PASRR Level I process prior to proceeding with NF placement.

Nursing Facilities shall keep a list of all the individuals who are admitted to their facility for the next thirty days. The list must specify the individuals with suspected MI or ID.

Also, please note that in accordance with 42 CFR 438.106(b)(4), new PASRR Level I and Level II screens are not required for residents who are being transferred between nursing facilities without a break in service. If the nursing facility is not sure if a Level I was conducted at the resident's transferring facility, a Level I can be conducted at the admitting facility during the first few days of admission as part of intake and transfers with positive Level I screens requiring a Resident Review.

End of Memo.
