I. INTRODUCTION

A. State of Louisiana's Drinking Water Revolving Loan Fund

In 1996, Congress passed federal amendments to the Safe Drinking Water Act (SDWA) establishing the Drinking Water State Revolving Fund (DWSRF) program. The State of Louisiana is eligible for a \$6,741,000 grant for federal fiscal year (FFY) 2023.

This document is the State of Louisiana's Intended Use Plan (IUP) detailing how the State will utilize this allotment of funds available to its Drinking Water Revolving Loan Fund (DWRLF) Program as authorized under the Drinking Water Revolving Loan Fund Act (R.S. 40:2821 et seq). The IUP must describe the use of a state's

capitalization grant, state match funds, principal and interest from loan repayments, other interest earnings of the DWRLF, bond proceeds, funds designated for set-aside activities, and any other monies deposited into the DWRLF.

Our IUP is the central component of our DWRLF grant application and communicates our plans to stakeholders who include: public water systems, the public, EPA, and other state departments. This IUP provides specific details on key aspects of the program including our state's short- and long-term goals, the priority setting process we use to rank projects and the list of projects eligible to receive funding from available DWRLF funding.

B. Program Overview

This IUP provides details on our plans for all funds available in the DWRLF. This plan is based on receiving a capitalization grant award totaling \$6,741,000 from EPA. This IUP also addresses the use of our required 20% state match of \$1,348,200. We have established the following primary objectives for the DWRLF:

- Provide technical and financial assistance to eligible public water systems confronted with the most serious drinking water public health risks.
- Ensure that the assistance provided will help systems come into or maintain compliance with the SDWA.
- Operate the DWRLF as a permanent funding program to provide low-cost assistance to eligible systems into the foreseeable future.

To meet these objectives we will offer low-interest loans below market interest rates and other forms of financial aid, as described throughout this IUP to public water systems for the construction of facilities that will provide affordable, safe drinking water to the public. We also intend to use part of the federal capitalization grant as "set-aside" funding, to address other non-infrastructure activities which have public health benefits and assist in compliance with the SDWA. The major facets of the DWRLF program are summarized below.

Low-Interest Loans

We will provide low-interest loans to public water systems in the order of priority determined by the DWRLF Project Priority System. The total funding available for loans from the FFY23 grant is \$7,967,400. (This includes \$6,741,000 Federal dollars minus \$2,070,000 for set asides leaving \$6,619,200 for loans plus \$1,348,200 State match) The DWRLF finance charge and administrative charge on loans for eligible projects is set by the Secretary of LDH and results in below-market rate loans. The rates will be reviewed periodically by the DWRLF staff and if an adjustment is deemed appropriate, will be requested from the Secretary of LDH. The DWRLF staff members are in contact with the responsible parties of water systems on a continual basis. They question them about the

market rates that are available to them. Their responses have ranged from 4% to 12% with variables such as credit worthiness, corporate structure, size, existing debt, etc. as the reasons for the variations. DWRLF staff members also attend the monthly bond commission meetings at the state legislature to glean the market rates of bond issuances for similar type projects. Finally, the DWRLF is contracted with bond attorneys who advise them as to the current market rates and make recommendations therein. As a result, the rates are reviewed monthly by the staff, and the date of the last review was January 2024. Loans are made for up to 100% of the eligible costs with long-term financing of up to thirty years.

Disadvantaged Community System Assistance

The maximum funding available for this type of financial aid will be \$2,359,350 or 35% of \$6,741,000. To the extent that there is not adequate demand for the full 35%, monies not used for the disadvantaged community system assistance may be made available to eligible applicants on the Comprehensive/Fundable list in accordance with procedures in section VI.C of this document. To the extent that there are

sufficient applications, \$2,359,350 or 35% of \$6,741,000 shall be used to provide additional subsidy to eligible disadvantaged communities.

Refinancing

Louisiana may buy or refinance local debt obligations of municipal, inter-municipal, or interstate agencies where the debt obligation was incurred and the project was initiated after July 1, 1993. Projects must have met the eligibility requirements under section 1452 of the Act and 40 CFR Part 35.3523 to be eligible for refinancing. Privately owned systems are not eligible for refinancing. To date the DWRLF has refinanced one loan (Town of Slaughter) in the amount of \$1,355,000.

Set-Asides

The SDWA allows states to use part of the federal capitalization grant to support various drinking water programs commonly known as set-asides. Louisiana proposes to use \$1,813,186 of this grant and use 256,814 of the unspecified funds from prior grants to pay for set-aside activities for a total of \$2,070,000 (30.71% of FFY 23 Capitalization Grant) to help ensure compliance with the SDWA regulations and to address public health priorities. Set-aside funded activities will include the following:

- ◆ DWRLF program administration
- ◆ Technical assistance to small systems
- ◆ Implementation of the state's capacity development strategy
- ◆ Strengthen and enhance the administering of the Public Water Supply Supervision (PWSS) program
- ◆ Assist OPH with implementing an operator certification program
- ◆ Assistance to individual systems in capacity development

Transfer Process

CFR Part 35.3530 (c) (6) states The Governor of a State, or a State official acting pursuant to authorization from the Governor, may transfer an amount equal to 33 percent of a fiscal year's DWSRF program capitalization grant to the CWSRF program or an equivalent amount from the CWSRF program to the DWSRF program. To date, Louisiana has not had the need to transfer funds between the programs for base funds.

Cross-Collateralization Process

The State of Louisiana has not used fund assets for either the Clean Water or Drinking Water programs as security for bond issues to enhance the lending capacity of either program. Consequently, no cross-collateralization process exists.

C. Public Input, Review and Comment Procedures

To ensure that the public had an opportunity to review our proposed plans for the DWRLF, the draft IUP will be made available 30 days prior to the public hearing held on March 29, 2024.

The written notice was placed in the Baton Rouge Advocate on February 26, 2024 stating that the Louisiana Department of Health, Office of Public Health is applying for the Federal Fiscal Year 2023 allotment of the US EPA Drinking Water State Revolving Loan capitalization grant

fund for its Drinking Water Revolving Loan Fund Program.

We welcome input on all elements of the IUP at the public meeting. The meeting is designed to provide a forum for discussing the overall purpose, format, and content of the IUP including the amount of the grants and the state match required, the priority system used to rank individual projects, and the proposed list of projects to receive funding from FFY23 funds. A comment period will remain open during the 30 days prior to the meeting. A summary of the results of these public participation activities is included in Attachment 3.

II. DWRLF LONG-TERM and SHORT TERM GOALS

In establishing the national Drinking Water State Revolving Fund program, Congress gave Louisiana and other states the flexibility to design a program that can be tailored to meet the needs of local public water systems. The long and short term goals developed for the DWRLF are presented next.

A. Long-Term Goals

1. Assist water systems throughout the State in achieving and maintaining the health and compliance objectives of the Safe Drinking Water Act by providing below-market rate loans to fund infrastructure needs in a prioritized manner.
2. Promote the efficient use of all funds, and ensure that the Fund corpus is available in perpetuity for providing financial assistance to public water systems.
3. Use the DWRLF set-aside funds strategically and in coordination with the program loans to maximize the DWRLF loan account's impact on achieving affordable compliance and public health protection.
4. Promote the development of the technical, managerial, and financial capability of all public water systems to maintain or come into compliance with state drinking water and federal SDWA requirements.
5. Provide needed investment in green and energy efficient technology.
6. Make the water systems throughout the state more water efficient to ensure the continued availability of sufficient quantities of safe drinking water for future generations of the state.

7. Invest in infrastructure that will provide long term economic and environmental benefits to public water systems.

B. Short-Term Goals

1. Develop policy and procedures that help expedite project draws to expend this FFY23 grant within 2 years of the award.
2. It is anticipated that approximately 16 binding commitments will be entered into by the end of State fiscal year (SFY) 2024 and 2025 totaling \$44,046,125
3. Louisiana hopes to close 16 loans totaling approximately \$44,046,125 during SFY 2024 and 2025. The population total for these projects is approximately 385,376.
4. Louisiana intends to maintain our fund utilization rate at 85%.
5. To provide at least 35% of the available DWRLF loan funds in SFY 2022 to assist public water systems which regularly serve fewer than 10,000 persons to the extent that there are sufficient projects eligible and ready to receive such assistance.
6. To promote the benefits of the program to as many water systems as possible to assure equitable distribution of available financing resources.
7. Apply for FFY24 capitalization grant before the close of state fiscal year 2025.
8. To provide expedited financial aid to those systems qualifying as disadvantaged community systems.
9. Continue to partner with other funding agencies by jointly funding projects to assist public water systems.
10. Maximize our principal forgiveness funds to ensure that as many communities as possible across the state can be helped in the current economic environment.

III. STRUCTURE OF THE DWRLF

The DWRLF consists of three accounts that will be used to provide assistance to accomplish its goals.

A. DWRLF Loan Fund Account

This account will provide assistance for the planning, design, and construction of improvements to publicly and privately owned community water systems and nonprofit, non-community water systems. Federally owned facilities are not eligible for funding. This account will consist of all federal funds used for infrastructure loan assistance, all state match funds transferred in, bond proceeds, loan repayments, and interest earnings of the Fund. The types of projects that can be funded under the loan account include the following:

- ◆ Construction or upgrade of treatment facilities
- ◆ Replacement of contaminated sources with new water sources
- ◆ Installation or upgrade of disinfection facilities
- ◆ Restructuring or acquisition and interconnection of systems to address technical, financial, and managerial capacity issues
- ◆ Planning and engineering associated with eligible projects
- ◆ Replacement of aging infrastructure
- ◆ Transmission lines and finished water storage
- ◆ Distribution system replacement/rehabilitation

- ◆ Acquisition of land that is integral to an SRF eligible project
- ◆ Refinancing eligible projects where debt was incurred after July 1, 1993
- ◆ Other projects necessary to address compliance and enforcement issues

Limitations of the DWRLF Loan Fund Account

The SDWA allows states to buy or refinance debt obligations of municipal, inter-municipal, or interstate agencies where the debt obligation was incurred and the project was initiated after July 1, 1993. We will only consider these applications after all projects addressing public health protection and compliance have been considered. Funds in the loan fund account will be invested in interest bearing accounts; however, funds will not remain in the account primarily to earn interest.

The federal DWRLF rules and regulations (CFR 40:35.3520) specifically lists the following projects that cannot be funded through the DWRLF:

- ◆ Dams, or rehabilitation of dams
- ◆ Water rights, except if the water rights are owned by a system that is being purchased through consolidation as a part of a capacity development strategy
- ◆ Reservoirs, except finished water reservoirs and those reservoirs that are part of the treatment process and are on the property where the treatment facility is located
- ◆ Laboratory fees for monitoring
- ◆ Operation and maintenance expenses
- ◆ Projects needed primarily for fire protection
- ◆ Projects for systems that lack adequate technical, financial, and managerial capacity, unless assistance will ensure compliance
- ◆ Projects for systems in significant noncompliance, unless funding will ensure compliance
- ◆ Projects primarily intended to serve future growth

B. DWRLF Set-Aside Account

This account will provide assistance for set-aside activities funded through the DWRLF. The types of projects to be funded by the DWRLF set-aside account include, for example, technical assistance to small systems, enhancement of the Administration of the Public Water Supply Supervision (PWSS) Program, implementation of the capacity development program, and enhancement of the operator certification program. A complete description of set-aside activities is provided in Section V.

Each set-aside activity will have a separate sub-account that will be tracked separately in the state accounting and financial reporting system. Sub-account reports will provide expenditures to date for tracking purposes and will be a source of

reporting for the DWRLF annual report required by the SDWA. Sub-accounts have been established for the following set-asides:

- ◆ *Small system technical assistance*—for assistance to small systems through state personnel or agreements with third party assistance providers.
- ◆ *State Program Management*—for PWSS program support, capacity development strategy implementation, and operator certification program support.
- ◆ *Administration*—for reasonable costs of administering the DWSRF program
- ◆ *Local Assistance and other state programs*—for providing assistance, including technical and financial assistance, to public water systems as part of a capacity development strategy.

C. DWRLF Administrative Fee Fund Account

Fund resources from this account will be used to support the state operation and management of the DWRLF. This account will hold the 0.5% fee charged on the outstanding loan balances

collected by the State of Louisiana from applicants. Funds in this account will be used to ensure the long-term operation and administration of the program. This fund currently contains approximately \$11, 700,000 and is accounted for separately outside of the loan fund.

IV. FINANCIAL STATUS OF THE DWRLF

This section reports on all sources of funding available to the DWRLF program and indicates their intended uses. This section also describes the financial assistance terms available through the program.

A. Sources and Uses of Funds

The total amount of funds in the DWRLF available and the intended allocation to each activity is presented in Attachment 2-Sources & Uses of Funds. It reflects the allotment of funds from the federal capitalization grant for FFY23 to the state of Louisiana and identifies Louisiana's total funding sources. \$877,802,713 in cumulative resources is estimated to be available to the State of Louisiana's DWRLF in SFY24 and SFY25, including capitalization grants for FFY 97 through FFY23, BIL funds, loan repayments, and state matching funds. Of the cumulative available resources, \$51,882,638 (as amended) has been

specified for set-aside activities, \$63,046,080 of interest collected has been used to retire state match bonds, and \$547,289,826 has been loaned to water systems. The result is \$877,802,713 available for new loans.

Appendix A demonstrates how the State of Louisiana plans to disperse these available funds for qualifying projects. It depicts projects which are working through the loan process toward closing a loan. All of these projects will be used for equivalency reporting purposes.

B. State Match Source

In order to receive each of the EPA capitalization grants (excluding the ARRA grant), the federal capitalization grant must be matched with either state funds or a letter of credit like instrument equal to at least 20 percent of the grant payments. To meet this requirement, the DWRLF secures its state match through a bond issuance. The bonds are structured as a non-revolving line

of credit secured by the revenue of the loan portfolio. The interest collected on the existing loan portfolio is used to retire the state match revenue bonds. State match totaling \$1,500,000 will be provided through the sale of revenue bonds to match the FFY 23 federal funds deposited into the DWRLF.

FFY 23 Capitalization Grant breakdown is as follows:

Capitalization Grant	\$6,741,000
<u>20% State Match</u>	<u>\$ 1,348,200</u>
Total Funds	\$8,089,200

Set-Asides (Specified) \$2,070,000

The EPA Administrator, or his/her duly authorized representative, and the State of Louisiana shall jointly establish a schedule of payments under which the EPA Administrator, or his duly authorized representative, will pay to the State of Louisiana the amount of each grant to be made to the State. This payment schedule is based on Louisiana's projection of binding commitments (these commitments take place when the loan is closed) and use of set-aside funds as stated in this IUP. States must take all

payments within the earlier of 8 quarters after grant award or 12 quarters of the allotment. Louisiana reserves the right to request grant payment amounts on an accelerated basis; however, the total grant payment amounts will not exceed the amounts shown in the following schedule unless the following grant payment schedule is amended in accordance with EPA regulations. The draw ratio for the FFY 23 capitalization grant is 77.60% federal funds and 22.40% state funds.

The FFY 23 Capitalization Grant Payment Schedule is as follows:

Federal Fiscal Year Quarter

Grant Payment Amount

~~First Quarter 2024~~

\$6,741,000

4th Quarter 2023

The FFY 23 Capitalization Grant draw ratio: 77.60% Federal 22.40% State

C. Financial Terms of Loans

The SDWA allows states to charge interest rates ranging from 0 percent to the market rate for DWRLF loans. The secretary of LDH sets the interest rate for the DWRLF. The interest rate has been set at 1.95% with the ability to raise it or lower it as the market dictates. An administrative fee of 0.5% of the outstanding balance is charged on all loans. The DWRLF provides interim construction financing to eligible recipients. Loan proceeds are disbursed to the recipient periodically as project expenses are

incurred and after corresponding invoices are approved by LDH. During the construction of the project, interest and administrative fees are due every six months. Once the project is complete, the loan is written down to the actual amount needed for the project and a final debt service schedule is provided for the recipient. Interest and administrative fees are due every six months for the life of the loan. Principal payments are due annually for the life of the loan, not to exceed twenty, twenty five or thirty years.

D. Disadvantaged Community Systems

Disadvantaged Community Project:

A disadvantaged community project is one which assistance is necessary to correct an imminent threat to public health as a result of a noncompliance issue with the SDWA resulting in an Administrative Order. This determination will be made by the Louisiana LDH utilizing one of the following requirements:

- The public water system is located in a state where the median household income is below the national median household income of the United States according to the U.S. Census Bureau.
- Assistance is necessary to resolve noncompliance issues with the SDWA that have resulted in being placed on the EET list or has received an Administrative Order being issued against the water system.
- The public water system serves a community with a population under 10,000.

Disadvantaged Community Additional Subsidy Authority

The SDWA now mandates that states use at least 12 percent but no more than 35 percent of the capitalization grant amount for additional subsidy for state-defined disadvantaged communities. Before AWIA, the floor was zero percent and the ceiling was 30 percent. This requirement begins with capitalization grants awarded by the EPA to states after October 23, 2018. For most states, this is the federal fiscal year 2020 grant. This subsidy authority has existed since the DWSRF's inception, yet this is the first time Congress has mandated its use. States must establish or continue to implement their Disadvantaged Community Program and solicit applications from water systems. Note that, by law, additional subsidy provided from this authority must be in the form of a loan (e.g., a

loan including principal forgiveness or negative interest rates) and not a grant. 35% or \$2,359,350 of the FFY 2023 Drinking Water Capitalization Grant dollars will be targeted for additional subsidies to any eligible recipient. To the extent that funds are available, the additional subsidy will be in the form of principal forgiveness of at least 30% of the loan principal, with a maximum amount of 100% loan principal forgiveness per project. Principal forgiveness will be specified in the DWRLF Loan & Pledge Agreement for the amount forgiven. Priority for these funds will be given to projects that resolve Administrative Orders for noncompliance with the SDWA and consolidation projects across the state that would eliminate public water systems that are not in compliance with the SDWA requirements and pose a threat to public health.

E. Financial Terms for Refinancing Local Debt

Debt obligations of municipal, inter-municipal, or interstate agencies where the debt obligation was incurred and the project was initiated after July 1, 1993 may be refinanced by the DWRLF. The

terms of the loans made to refinance debt will be the same as those of other loans made by the DWRLF as stipulated in section IV.B of this IUP.

V. SET-ASIDE ACTIVITIES

The SDWA allows each state to set-aside up to 31% of its federal capitalization grant to support various drinking water programs including administration, technical assistance, state program management, and special activities. The State of Louisiana is specifying \$1,930,472 of this grant to fund set-aside activities and using \$256,814 of previously unspecified funds from prior grant years to fund set-aside activities for a total of \$2,070,000 (30.71% of FFY23 Capitalization Grant) (Attachment 1). We will continue to operate under the existing detailed work plans and submit new ones this year to fund

these activities which are further described in the next sections. Attachment 5 depicts those set-asides previously specified and those spent to date. We will report the progress of the set-aside activities to EPA in the annual report. There is \$374,100 in new unspecified funds from the FFY23 grant. We will retain the ability to take these and previously unspecified monies from a future capitalization grant to fund set-aside activities in the future. We will transfer any set-aside funding that is unused back to the DWRLF loan fund account.

A. DWRLF Administrative Expenses (SDWA reference - 1452(g)(2), Option: *1 /5 percent of the current valuation of the fund-* \$693,366 of FFY23 grant)

The loan program is administered by the Louisiana Department of Health–Office of Public Health (LDH-OPH). The administration set-aside will be used to pay salaries and associated expenses of new and existing personnel of LDH-OPH devoting time to the administration of the program. Administration set-aside funds can also be used to procure supplies and training necessary for the adequate performance of the staff.

The State reserves \$693,366 (1/5 percent of the current valuation of the fund at June 30th 2023

which is \$346,686,810 from the FFY23 cap grant to fund the administration set-aside. Louisiana specifies \$693,366 of the FFY23 cap grant and reclaims \$56,634 of previously unspecified dollars for a total of \$750,000 to fund these activities. The cumulative remaining balance of unspecified funds of \$377,168 will be retained to take from a future capitalization grant to fund administrative activities in future years. (Attachment 1) The expenses associated with this set-aside for SFY '24 will be funded from this capitalization grant and any unexpended funds from previous years.

B. Small System Technical Assistance (SDWA

reference - 1452(g) (2), Max allowed: 2%; up to \$134,820 of FFY23 grant)

These funds will be used to accomplish the goal of providing technical assistance to public water supplies serving fewer than 10,000 people. Louisiana uses this set-aside to fund personnel and assistance providers. Personnel and the contracted assistance providers provide specific activities such as the following:

- ◆ Assisting small systems in meeting SDWA compliance: The State of Louisiana's major SDWA compliance problem is bacteriological maximum contaminant level (MCL) violations occurring in small PWSs under the Total Coliform Rule. Louisiana is addressing the prevention of bacteriological MCL violations in two ways: (1) holding quarterly Safe Drinking Water Compliance Training Schools and (2) conducting on-site visits with the

owners/operators of systems experiencing compliance problems.

- ◆ Review of source water problems and drinking water needs; identification and evaluation of technical options.
- ◆ Assisting small systems in preparing the applications for DWRLF assistance.
- ◆ Assisting small systems in complying with all cross cutting requirements of the DWRLF and other state requirements.
- ◆ Assisting small systems with locating and procuring sources of funding in addition to the DWRLF to meet their needs at the lowest possible cost.

The State reserves \$134,820 (2.0% of \$6,741,000) from the FFY23 cap grant dollars to fund the small system technical assistance set-aside. Louisiana specifies \$134,820 of the FFY23 cap grant and reclaims \$200,180 from previously unspecified dollars for a total of \$335,000 to fund these activities. The cumulative remaining balance of unspecified funds of \$1,763,830 will be retained to take from a future capitalization grant to fund small system technical assistance activities in future years. (Attachment 1) The expenses associated with this set-aside for SFY '25 will be funded from any unexpended funds from previous years.

C. State Program Management
(SDWA reference - 1452(g)(2), Max
allowed: 10%; up to \$674,100 of FFY23
grant)

These funds will be used to enhance the State's administration of its Public Water Supply Supervision (PWSS) program outlined by the SDWA, to implement the capacity development strategy, and to implement an operator certification program. The State reserves \$674,100 (10% of \$6,741,000) from the FFY23 cap grant to fund the state program management set-aside. Louisiana specifies \$300,000 from this

grant and classifies the remaining \$374,100 as unspecified. The cumulative unspecified funds of \$15,677,132 will be retained to take from a future capitalization grant to fund state program activities in future years. (Attachment 1) The expenses associated with this set-aside for SFY '24 will be funded from this capitalization grant and any unexpended funds from previous years.

This set-aside no longer requires a one to one state match beyond the 20 percent state match for federal capitalization grants.

Sub-Category of State Programs Set-Aside	Amount Budgeted
Public Water Supply Supervision	300,000.00
Capacity Development	-
Operator Certification	
Total Specified Set-Aside Funds	300,000.00

PWSS Program

Louisiana will use the state program management set-aside funds to support PWSS activities. This activity provides funding to accomplish augmentation of the PWSS Grant

and assist in administration of the PWSS program activities. We will assist the PWSS program to accomplish its goals and objectives.

Capacity Development Program

Louisiana can use a portion of the State Program Management set-aside funds to support its capacity development program. Staff positions and outside contractors will be funded to provide public water systems with the tools and financial assistance they need to obtain and maintain the technical, financial, and managerial capacity needed to ensure a supply of safe drinking water for Louisiana citizens. The goal of the program is to identify the technical, financial, and managerial impediments confronted by water systems in

their efforts to provide safe and sustainable drinking water. After identifying the impediments we will be able to more appropriately determine and accomplish solutions to capacity problems. Such solutions could include technical or financial assistance or encouragement of consolidation, collaboration, regionalization, and contract operations and maintenance cooperatives. LDH agrees to demonstrate compliance with the capacity development authority and the capacity development strategy.

Operator Certification Program

Louisiana can use the state program management set-aside funds to support its operator certification program. If needed due to budget constraints, we will assist the operator

certification program accomplish its goals and objectives with funding. LDH agrees to demonstrate compliance with the operator certification program provisions.

D. Local Assistance and Other State Programs (SDWA reference - 1452(g)(2), Max allowed: 10% for any one activity; overall up to 15% or \$1,011,150 of FFY23 grant)

Louisiana will use \$685,000 of this set-aside fund as shown in Attachment 5 to provide assistance, including technical, managerial, and financial assistance, to public water systems as part of its

capacity development strategy in SFY '24. Louisiana will use \$685,000 of these set-aside funds from the FFY23 grant.

VI. CRITERIA AND METHOD FOR DISTRIBUTION OF FUNDS

A. Distribution of Funds

The SDWA provides each state with flexibility to determine how much of their grant should be used for infrastructure loans, disadvantaged assistance, and set-aside activities. However, with this flexibility comes responsibility to determine how to best direct funds to address the problems in our state. We believe it is critical to evaluate and understand the impact of our decisions in order to ensure that assistance will be available in the future. There is a direct relationship between set-aside funding and the long-term loan capacity of the DWRLF. This impact is significant and might suggest that we should limit our set-aside use. After consultation with the stakeholders, we determined to use 30.71 percent of the FFY23 funds for set-aside activities. Many of the activities conducted under the set-asides can have a direct impact on preventing future problems in the public water systems. Ensuring that operators are properly

trained and enhancing the technical, financial and managerial capacity of small water systems can also reduce the need for costly infrastructure improvements. We will reevaluate our use of set-asides on an annual basis as we develop the IUP to determine whether set-asides levels should be reduced or increased in the future.

Section 1452 authorizes the establishment of a drinking water revolving loan fund to provide financial assistance to eligible water systems. . The Federal allotment for FFY23, including the state match, is \$8,089,200. Louisiana reserved 29.74% or \$2,187,286 of the grant for set-aside activities, specified \$1,813,186 and reclaims \$256,814 in funds from previously unspecified set-asides, resulting in \$2,070,000 (30.71%) specified for the set-aside activities described previously. This results in \$7,967,400 available for loans through the drinking water revolving loan fund program, for this funding cycle.

B. Capacity Assessment 1452 (a) (3) (A)

The SDWA requires that a public water system applying for a DWRLF loan must show that it has the technical, financial, and managerial capacity to ensure compliance. If a system does not have adequate capacity, assistance may only be provided if it will help the system to achieve

capacity. The goal of this requirement is to ensure that DWRLF assistance is not used to create or support non-viable systems. The Business Plan and the System Improvement Plan are completed as part of the DWRLF loan application process.

Technical Capacity

To demonstrate technical capacity, DWRLF loan applicants must show that drinking water sources are adequate, that the system's source, treatment, distribution and storage infrastructure are adequate and that personnel have the technical knowledge to efficiently operate and maintain the system. As part of reviewing a loan applicant's System Improvement Plan, Louisiana reviews the system's records to assure that the system is being properly operated and

maintained. The water system must not have outstanding water compliance problems unless the DWRLF project is intended to correct those problems. The engineering reports, plans, and specifications for the proposed DWRLF-funded project and the system's System Improvement Plan will all be evaluated during the loan application process for technical capacity compliance.

Financial Capacity

To demonstrate financial capacity, the applicant must show that the system has sufficient and dedicated revenues to cover necessary costs and demonstrate credit worthiness and adequate fiscal controls. Louisiana reviews the applicant's

business plan, which includes 5-year projections, the project budget, the three (3) most recent annual financial reports, and/or audits, and other financial information to ensure adequate financial capacity of the applicant.

Managerial Capacity

To demonstrate managerial capacity, the water system must have personnel with expertise to manage the entire water system operation. Louisiana reviews the applicant's managerial capacity via the Business Plan and supporting documentation to assure that management is involved in the day to day supervision of the water system, is responsive to all required regulations, is available to respond to

emergencies, and is capable of identifying and addressing all necessary capital improvements and assuring financial viability. The water system must have a qualified water operator in accordance with the state's operator certification program. The management personnel of the water system are strongly encouraged to attend a state approved 4-hour management training session.

Long-Term Capacity

Louisiana will assess whether each water system has a long-term plan to undertake feasible and appropriate changes in operations necessary to develop adequate capacity. In making these assessments, Louisiana will consult with local public health units and review any available Water Resource Management Strategies, Comprehensive Studies, the Drinking Water Needs Survey and other available engineering

reports in an effort to improve the overall capacity of systems requesting assistance. Louisiana will encourage consolidation efforts when two or more systems can benefit and also encourage other options, such as contract management or partnerships with other communities in their area. The priority-ranking criterion provides additional points to encourage this objective.

C. Establishing Project Priority

The Project Priority System developed and utilized by Louisiana meets the requirements of the SDWA (Attachment 4). Projects will be ranked against all other projects competing for funds. Single projects will be limited to a total of 30% of the capitalization grants available unless

- ◆ Elimination of adverse public health effects
- ◆ Unacceptable/undesirable physical conditions
- ◆ Environmental criteria
- ◆ Affordability criteria

The first step in developing the Comprehensive Project Priority List is a determination of project eligibility. Systems eligible for assistance are community water systems, both publicly and privately owned and non-profit non-community water systems. Once projects are determined to be eligible, they will be rated in six (6) categories to determine their project priority ranking for funding under the DWRLF. These specific categories are:

- ◆ *Compliance History* - This is evaluated by reviewing the SDWA MCL violations assessed in the last eight (8) quarterly reports.
- ◆ *System Consolidation* - This area examines the population that is proposed to be absorbed into the subject system from other public water systems.
- ◆ *Affordability* - If the service area lies within a census tract where the Median Household Income is 25% or more below the State average the system is awarded priority points.
- ◆ *Physical Conditions* - Priority points will be awarded for certain specific, existing physical conditions IF the proposal would correct the identified condition.
- ◆ *Sanitary Code Violations* - priority points may be awarded to the system for

adequate projects are not available to commit all available funds. The LDH may waive this maximum amount depending upon the number of applications. The principal elements addressed by the project priority system are:

violations of each of the Sanitary Code sections, which would be, corrected by/under the proposal.

◆ *Other Considerations* - Additional priority points (or penalty points) may be awarded (or subtracted) for a variety of other factors. They are:

- Additional points if the proposal represents part of a new multi-year, multi-phase project or a project that has received prior DWRLF funding and is a loan in good standing.
- Additional points if the project has also secured a partial project funding commitment from another source (e.g., Rural Development Grant, a grant and/or loan from the Rural Utilities Service, Community Development Block Grant, etc.)
- The system's priority rating may be reduced by points if the proposal addresses problems which could be resolved by normal repair and maintenance.
- The system's priority rating may also be reduced by points if the proposal includes work that is not necessary to address the stated public health problem.

The DWRLF has a policy in place to provide the Deputy Chief Engineer of the State's Safe Drinking Water Program a copy of the Selected Plan Description from any potential loan project's System Improvement Plan (SIP). The Deputy Chief Engineer then provides the SIP's Selected Plan Description to the SDWP Enforcement Section and the SDWP's District and Regional Offices in which the project is located for their review concerning any significant enforcement issues that may need to be addressed as part of the proposed project. Additionally, the SIP must contain a 'Compliance Status' section that contains a copy of the system's latest Sanitary Survey, a list of all violations received within the last 3 years, and a list of all Administrative Orders/Boil Notices received/issued within the last 3 years. These are then verified by the reviewing DWRLF Project Engineer and

considered as part of the SIP review process in order to determine if there are any significant enforcement issues that should be dealt with through the use of the funds. Lastly, the application contains a Project Priority Criteria Worksheet which includes providing additional priority points for selecting projects that have and are addressing current or potential future enforcement issues. Amendments to the Project Priority System will be considered, as appropriate, to reflect the changing character of the program. Projects are identified through a solicitation of all eligible water systems. Once the systems have submitted pre-applications, the projects are rated. They are ranked based on assigned priority points and two lists are compiled. Those two lists are referred to as the Comprehensive Priority List and the Fundable List. These lists are as follows:

The Comprehensive Priority List includes all the public water systems, which have submitted a completed DWRLF Application. The proposed projects are listed and ranked on this list in priority order based upon the priority ranking system. (Appendix A)

The Fundable List is the estimated projects that will close during the fiscal year. This list is only an estimate and is not binding toward which projects actually receive funds. The DWRLF closes loan on a 'ready to proceed' basis. (Appendix B)

The systems on either of the lists described above will be given six months to submit a complete loan application package. The basic components of the complete loan application package include a loan application form, approved environmental review checklist, resolution, site certificate for easement or title to project site(s), agreements for professional services, approved business plan, and an approved System Improvement Plan (SIP) (including an Environmental Impact Document). A project on the Fundable List may be bypassed and removed from consideration during the funding year because of failure to meet all program requirements.

Once one or more systems on the Fundable List have been bypassed, the agency will then turn its attention to those projects existing on the Comprehensive Priority List. Any system(s) on

the Comprehensive Priority List which have submitted a complete loan application will then be advanced up into the Fundable List based upon their priority order until the available funding is consumed.

Information for listing projects will be accepted by OPH on a continuous basis. However, deadlines for projects in a particular FFY IUP will be established each year. New projects will be ranked and added to the Comprehensive Priority List as they are identified by applicants interested in DWRLF Financing.

Any project that has had no written communication with the Drinking Water Revolving Loan Fund staff for a period of two (2) years and has presented no other evidence of progress toward completion of items that are prerequisites to funding during the two-year period shall be deemed to be a dormant project

and may be removed from the DWRLF Comprehensive Priority List. To maintain an up to date Comprehensive List for public review, the DWRLF keeps a constantly

revised list posted on our website at www.dhh.louisiana.gov/index.cfm/page/430

D. Small System Funding

Louisiana will review the Fundable and Comprehensive Lists to determine if at least 15 percent of the projected funding amount will be for public water systems that regularly serve fewer than 10,000 people, as required by the SDWA. Due to various non-controllable time lags, some projects proceed toward loan closing faster than others. Additionally, large projects are usually phased in resulting in multiple loans over multiple

years. LDH can also limit the amount borrowed by systems exceeding the population requirements when necessary to meet the requirements of the Act. Consequently, these lists will not be adjusted at this time, but constant monitoring of projects proceeding through the loan process will be accomplished to maintain the required 15 percent funding for small systems.

E. Tie Breaking Procedure

When two or more projects other than emergency projects and disadvantaged community system projects score equally under the project priority systems a tie breaking procedure will be used.

The project with the smallest number of existing customers served will receive higher ranking.

F. Bypass Procedure/Readiness to Proceed

The LDH reserves the right to allow lower priority projects to bypass higher priority projects for funding if, in the opinion of the DWRLF Program Manager, a higher priority project has not taken the necessary steps to expeditiously prepare for funding and is not ready to proceed with construction. Where it becomes evident to the OPH-DWRLF Program Manager that a project on the Fundable List is not proceeding to construction within the specified time during the current funding year, he may remove the project from the Fundable List and return it to the Comprehensive Priority List.

If a project must be by-passed because it has been delayed, this may affect the project's priority ranking in the following year. The LDH may also, in cases of a public health or environmental emergency, (e.g., source contamination, flood, hurricane, etc.) raise the priority of a project currently on the Comprehensive Priority List above that of a project on the Fundable List.

G. Refinancing Existing Loans

The DWRLF may be used to buy or refinance debt obligations for DWRLF projects. The long-term debt must have been incurred after July 1, 1993 to be eligible for refinancing. Consideration for these applications will be entertained only

after projects addressing public health protection and compliance have been considered and the loan term cannot exceed the useful life of the project.

VII. FFY 23 PROGRAM REQUIREMENTS

A. Green Project Reserve (GPR)

For federal fiscal year 2023, funds may, at the discretion of each state, be used to address green infrastructure improvements. As the GPR is not mandatory for the FFY 2023 grant, the Louisiana DWRLF will not set aside funds specifically for projects deemed 'green' based on EPA's established definition.

In the past, the Louisiana DWRLF has advertised/solicited Green Projects through public announcement and targeted emails to water systems and consulting engineers, has met with the Louisiana Department of Natural Resources (LDNR) to discuss energy efficiency projects, has discussed potentially jointly funding green projects with the Louisiana CWSRF, has requested from the Louisiana Safe Drinking Water Program a list of non-metered water systems, and has called non-metered water systems to solicit potential green projects. The Louisiana DWRLF is also continuing to review current project applications for green potential eligibility, contacting and working with consulting engineers to find potential green components in existing applications for projects, continuing to work with LDNR to find and possibly jointly fund potential energy efficiency projects, and working with consulting engineers of current projects with identified green components to develop business cases for EPA approval.

B. Additional Subsidy Funds- *Public Health Water Infrastructure Consolidation Initiative*

The FY2023 Appropriation Bill also contains an additional subsidies provision. The provision states that not less than 14 percent of the funds made available under this capitalization grant shall be used to provide additional subsidy to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants (or any combination of these). To fulfill this requirement, Louisiana will start a Public Health Water Infrastructure Consolidation Initiative. This initiative will provide 100% principal forgiveness loans for consolidation projects across the state that would eliminate public water systems that are not in compliance with the SDWA requirements and pose a threat to public health.

Fourteen percent or \$943,740 of the FFY 2023 Drinking Water Capitalization Grant dollars will be targeted for additional subsidies to any recipient that is willing to consolidate a system that is not in SDWA compliance. The additional subsidy will be in the form of 100% principal forgiveness of the loan principal. Principal forgiveness will be specified in the DWRLF Loan & Pledge Agreement for the amount forgiven.

C. Build America, Buy America Requirement

The 2021 Infrastructure Investment and Jobs Act (IIJA) Bill includes a "Build America, Buy America Act" requirement that requires Clean Water State Revolving Fund (CWSRF) and Drinking Water State Revolving Fund (DWSRF) assistance recipients to use iron, steel, manufactured products, and construction materials products that are produced in the United States for

projects including the construction, alteration, maintenance, or repair of a public water system or treatment works if the project is funded through an assistance agreement., EPA may waive Build America, Buy America requirements in certain circumstances.

D. Davis-Bacon Requirements

For this fiscal year, the requirements of section 1450(e) of the Safe Drinking Water Act (42 U.S .C. 300j-9(e)) shall apply to any construction project carried out in whole or in part with assistance made available by a drinking water treatment revolving loan fund as authorized by section 1452 of that Act (42 U.S .C . 300j-12). In order to comply with this provision, the Louisiana DWRLF must include in all assistance agreements, whether in the form of a

loan, bond purchase, grant, or any other vehicle to provide financing for a project, executed on or after October 30, 2009 (date of enactment of P .L. 111-88), for the construction of any works under the DWSRF, a provision requiring the application of Davis-Bacon Act requirements for the entirety of the construction activities financed by the assistance agreement through completion of construction, no matter when construction commences.

E. Sustainability Policy

EPA has developed a Sustainability Policy that “encouraging communities to develop sustainable systems that employ effective utility management practices to build and maintain the level of technical, financial and managerial capacity necessary to ensure long-term sustainability.” The Louisiana DWSRF program maintains a strong capacity development program which includes a comprehensive review of each loan applicant for technical, financial and managerial capacity. This program is the platform for Louisiana’s sustainability program because it already incorporates the three tiered review. Applicants are evaluated through detailed technical reviews, financial audits and managerial checklists. The Louisiana Capacity

Development Program, funded through the use of set-asides provides communities that lack the technical, managerial, and financial capacity technical assistance free of charge to help these communities reach the overall goal of sustainability. An annual Capacity Development Report is provided to EPA each year, prior to September 30th, detailing all of the activities which are incorporated into the ongoing strategy for ensuring sustainability for public water supply systems. The report provides information on Louisiana’s efforts through enforcement, permitting, operator certification, source water assessment, Area-Wide Optimization Program, small system technical assistance program and the PWS Sanitary Survey Program.

F. Self-Certification for Certain Systems Serving 500 or Fewer Persons

The Water Infrastructure Improvements for the Nation Act (Public Law 114-322) requires DWSRF assistance recipients serving 500 or fewer persons to consider publicly-owned wells (individual, shared or community) as an option for their drinking water supply. Any applicable project involving the construction, replacement or rehabilitation of a drinking water system which is not already using a publicly-owned well for the source are required to self-certify. If the community already uses a publicly-owned well (including a privately owned well for a public water system) and the project does not involve a new water source, then the self-certification is not needed. The self-certification is only for projects which do not involve a publicly-owned well source to ensure that this was one of the water supply options considered but not selected as the best alternative.

G. Reporting Requirements

Louisiana must report in the SRF Data System (40 CFR 35.3545(b)). This information will also need to be included in the Annual Report. Quarterly reporting shall include use of the funds for the GPR and additional subsidization, as well as information on the environmental benefits of SRF assistance. All projects that submit an application and are put on Comprehensive Priority List must comply with all Federal Crosscutters; Single Audit Act; and follow federal requirements to comply with the Disadvantaged Business Enterprise Program to receive funding thru the DWRLF. Louisiana must also report

into The FFATA Sub award Reporting System (FSRS) under the Federal Funding Accountability and Transparency Act (FFATA) of 2006. The intent of FFATA is to empower every American with the ability to hold the government accountable for each spending decision. The end result is to reduce wasteful spending in the government. The FFATA legislation requires information on federal awards (federal financial assistance and expenditures) be made available to the public via a single, searchable website, which is www.USASpending.gov. The FSRS is the reporting tool federal prime awardees (i.e. prime contractors and prime grants recipients) use to capture and report sub award and executive compensation data regarding their first-tier sub awards to meet the FFATA reporting requirements.

VIII. INTENDED USE PLAN AMENDMENT PROCEDURES

The DWRLF will keep EPA updated on the status of this situation and provide any amendments to this IUP that are necessary. Revisions to this Intended Use Plan (IUP) that are determined material will require public notice and EPA notification and approval. Revisions to this IUP that are determined not to be material shall be made by DWRLF with notification to EPA or through EPA's required annual reporting.

PUBLIC HEARING –May 29, 2024 @10am

DHH Building at 628 North 4th Street, Room 130, Baton Rouge, LA

Good Morning. My name is Carrie Creel and I am the Loan Coordinator for the Drinking Water Revolving Loan Fund Program. The Program falls under Engineering Services of the Office of Public Health, Department of Health and Hospitals. Each time we apply for a Capitalization Grant from the United States Environmental Protection Agency, we are required to hold a public hearing giving the public the opportunity to make any comments regarding the State's proposed uses of the funds being applied for. This public hearing is being conducted in conjunction with our application to EPA for the Federal Fiscal Year 2023 Capitalization Grant. The document that describes the proposed uses of the grant funds, the Intended Use Plan, has been available in draft form for public inspection for 30 days here at 628 North 4th Street in room 130 and on our website. I ask that each of you present sign the roll sheet to document to EPA and other interested parties your attendance here today.

I will now give a brief synopsis of the Intended Use Plan.

Do we have any comments or questions from the floor?

The comment period will remain open until close of business today or 4:30 CT. Any comments, questions, or lack thereof will be documented. This documentation, the roll sheet, and the proof of advertisement will be included in the final Intended Use Plan submitted to EPA as part of the formal application for the Capitalization Grant discussed today.

There being no further discussion, this public hearing is closed.

Synopsis of the Intended Use Plan

The Intended Use Plan includes proposed uses for the FFY23 Capitalization Grant. The FFY Grant amount available to Louisiana is \$6,741,000. The State is required to provide a 20% match to obtain these grant funds and notify EPA of their method of providing this match. The State of Louisiana intends to negotiate another bond sale for the required match for this grant as well as any future grants that the State Legislature does not provide match for. The amount of state match required for the FFY23 Grant is \$1,348,200. The total amount of funds available to the program from this grant, including Federal and State money, is \$8,089,200.

In its Draft Intended Use Plan, Louisiana proposes to utilize \$7,967,400 for making loans to Public Drinking Water Systems. Up to 31% of the funds are allowed to be set-aside for other uses; Louisiana intends to reserve these funds, which means that they can be drawn from future grants received from EPA. However, 30.71% or \$2,070,000 has been specified for set-aside use from the FFY23 Grant.

Louisiana previously solicited applications from public water systems interested in obtaining loans from the program. These projects were ranked based upon their public health need, those with the most need at the top of the list. Appendix A of the IUP lists those projects that can be funded utilizing the funds available for loans. The draft has been amended to correct typographical and mathematical errors discovered during the 30-day public inspection period.

The Fundable list-Appendix B does not depict only projects that will be funded, because if a system on this list does not proceed through the loan process, it can be by-passed so that the funds are available to a system further down on the list that is proceeding appropriately.

Federal Fiscal Year 2023 Capitalization Grant-

PUBLIC HEARING – May 29, 2024- 10am

LDH Building at 628 North 4th Street, Room 130, Baton Rouge, LA

PHYSICAL CRITERIA

For each **YES** answer to the questions below, provide the appropriate number of points in the blank.

Physical Conditions

System Condition	Condition to be Addressed	Pts	
Pressure less than 35 psi (but greater than 15 psi)	<input type="radio"/> Yes <input type="radio"/> No	1	
Leaks/Water Loss of 15% to 25% of production	<input type="radio"/> Yes <input type="radio"/> No	1	
Leaks/Water Loss greater than 25% of production	<input type="radio"/> Yes <input type="radio"/> No	2	
Dead Ends will be eliminated	<input type="radio"/> Yes <input type="radio"/> No	2	
Asbestos Cement Pipe or Lead Pipe (replacement)	<input type="radio"/> Yes <input type="radio"/> No	2	
No disinfection-PWS has a variance from mandatory disinfection	<input type="radio"/> Yes <input type="radio"/> No	3	
Production less than 85% of potable (non-fire) demand	<input type="radio"/> Yes <input type="radio"/> No	3	
Storage less than 2 day potable demand	<input type="radio"/> Yes <input type="radio"/> No	2	
No meters or non-functioning meters	<input type="radio"/> Yes <input type="radio"/> No	5	
Source capacity inadequate	<input type="radio"/> Yes <input type="radio"/> No	2	
Industrial activity, Agricultural activity, Oil/Gas Spills, etc. are within source recharge area	<input type="radio"/> Yes <input type="radio"/> No	3	
Directly impacted by point source discharge	<input type="radio"/> Yes <input type="radio"/> No	2	
Unprotected Watershed	<input type="radio"/> Yes <input type="radio"/> No	2	
Will serve area not on community sewerage	<input type="radio"/> Yes <input type="radio"/> No	2	
Proposed system will replace private wells	<input type="radio"/> Yes <input type="radio"/> No	2	
Project includes system redundancy	<input type="radio"/> Yes <input type="radio"/> No	2	
Components exceeding design life to be replaced	<input type="radio"/> Yes <input type="radio"/> No	4	

NOTE: None of the above physical conditions are violations of the Louisiana Administrative Code, Title 51, Chapter XXII shown below.

Sanitary Code Violations

Louisiana Administrative Code Section Violated (Formerly Chapter 12 of the LA State Sanitary Code)	Violation to be Corrected	Pts	
LAC 51:XII.309 (formerly 12:003-2) Plant Supervision and Control	<input type="radio"/> Yes <input type="radio"/> No	1	
LAC 51:XII.327 (formerly 12:008-1 thru -17) Ground Water Supplies	<input type="radio"/> Yes <input type="radio"/> No	1	
LAC 51:XII.331 (formerly 12:010) Well Abandonment	<input type="radio"/> Yes <input type="radio"/> No	1	
LAC 51:XII.333 (formerly 12:011-1 thru -5) Reservoir Sanitation	<input type="radio"/> Yes <input type="radio"/> No	1	
LAC 51:XII.335 (formerly 12:012-1 thru -4) Distribution	<input type="radio"/> Yes <input type="radio"/> No	1	
LAC 51:XII.337 (formerly 12:013-1 thru -4) Storage	<input type="radio"/> Yes <input type="radio"/> No	1

CASH FLOW PROJECTIONS

A requirement for the program by the EPA is that projections of cash be made for a term of 20 years. EPA has reiterated the importance of using the projections as a tool to monitor and manage the program. These assumptions and projections were prepared for the United States Environmental Protection Agency for the purpose of receiving capitalization grants and for management of the program; therefore, they should not be used for any other purpose. Furthermore, even if the hypothetical assumptions described in this exhibit materialize, there will usually be differences between the projected and actual results because events and circumstances frequently do not occur as expected, and those differences may be material. **The following 7 pages contain the cash flow projections for the FFY23 Intended Use Plan.**

State of Louisiana
Drinking Water Revolving Loan Fund
Capacity Analysis as of November 21, 2019
Scenario: Loan Rate at 2.45% (1.95% + 0.50% fee) | With Only Direct Loans and No Leveraging

Summary of Capacity Analysis

Fiscal Year	Federal Cap Grant	State Match	Leverage Bonds Par Amount	State Match Bonds Par Amount	Projected Draws of Existing Committed Loans	[1] New Loans Funded By Program Equity	[2] New Loans Funded By Bond Proceeds	[3] New Loans Principal Forgiveness	[4=1+2+3] Total New Loans Funded
Total:	32,000,000.00	6,400,000.00	-	6,470,000.00	70,612,029.79	398,000,000.00	-	6,400,000.00	404,400,000.00

LA DHH- OPH Competency Statements**Competency Demonstration #1 – Documented successful demonstrations of competency with applicable sampling and/or analytical equipment.**

Competency is demonstrated through the sample collector's Initial Demonstration of Capability of performing the sample collection method and/or field measurement or through the staff collecting samples and/or using water quality monitoring equipment (HACH Test Kit Pocket Colorimeter II) for 3+ years.

Competency is demonstrated through the laboratory scientist's Initial Demonstration of Capability Certification (DOC) Statement for the method the scientist performs. The DOC statement includes an Initial Demonstration of Capability (IDC) study, which denotes the scientist's accuracy and precision, Method Detection Limit (MDL) study, and training checklist.

Competency Demonstration #2 - References of past performance (Other similar project grants is acceptable).

Competency is demonstrated through the maintenance of Quality Assurance Project Plans and Standard Operating Procedures for the Office of Public Health sample collection, analytical practices and data management for drinking water monitoring and compliance determination with the State and Federal Drinking Water Regulations.

Competency Demonstration #3 - Recent reports of technical and/or quality system assessments/audits of the organization, including associated corrective action plans.

Competency is demonstrated by the triennial audits of the Office of Public Health Laboratory by the USEPA Region 6 Drinking Water Laboratory Certification Program.

Competency is demonstrated by the triennial data verification audits and end of year reviews of the Office of Public Health Safe Drinking Water Program by the USEPA Region 6 Drinking Water Section.

Competency Demonstration #4 - Documented position descriptions for key personnel detailing major responsibilities and qualifications (e.g., education, training certificates, job experience, and active participation in professional associations).

Competency is demonstrated through the Quality Management Plan and the Quality Assurance Project Plans for Sample Collection/Data Management and Laboratory Practices that states position descriptions for key personnel detailing major responsibilities and qualifications and provides descriptions of the quality policies.

Competency is demonstrated through laboratory scientist's successful analysis of annual Proficiency Test samples and the requirement of licensure by the Louisiana State Board of Medical Examiners or the National Registry of Certified Chemists.

Competency Demonstration #5 - Organizational quality documentation, such as a QMP, laboratory QA manuals, field quality manuals that provide descriptions of the organization's quality policies. Such documents should include: all requirements described in EPA Requirements for Quality Management Plans (EPA QA/R-2) <http://www.epa.gov/quality/qs-docs/r2-final.pdf>.

See first competency statement for competency demonstration #4.

Competency Demonstration #6 - Technical/Project Level quality documentation, such as QAPPs, Sampling and Analysis Plans (SAPs) and/or standard operating procedures (SOPs). Such documents should include: auditing practices, descriptions of applicable equipment, method sensitivities, reporting practices, capacity, etc.

Competency is demonstrated through the USEPA Region 6 approval of the Quality Assurance Project Plans for Sample Collection/ Data Management and Laboratory Practices, Public Water System Supervision Work Plan and Quality Management Plan.

APPENDICES

DWRLF COMPREHENSIVE LIST OF APPLICANTS

System Name	PWSID	Est. Loan Amount	Points	Rank	Population	Project Description	Est. Date to Close Loan
Atlanta Water System, Inc	1127001	1,918,000	59	1	900	Construction of a production well, booster station, aeration system, standpipe rehab, emergency power system, meter replacement and distribution improvements and related items to allow Atlanta Water to consolidate the Wheeling System	October-24
City of Opelousas	1097010	14,679,975	57	2	20,397	The proposed facilities include the following:a. Rehabilitation of existing water wells b. Rehabilitation of existing storage facilities c. Replacement of existing City owned galvanized steel water mains and service lines d. Replacement of defective fire hydrants e. Replacement of existing valves or installation of new isolation valves on existing mains throughout the water system f. Setting up an Asset Management Plan including GIS mapping of existing facilities g. Construct hydraulic model of water system (including report) h. Assist the City with implementation of a Backflow Prevention Program i. Assist the City with training and organizational management as it relates to the operations of the water system j. Other capital improvements as determined from hydraulic modeling or as outlined in the System Improvement Plan	September-24
River Road Water Works, Inc.	1083008	2,380,000	51	3	3,510	The WS proposes new treatment specifically for iron removal and DBP remediation.The proposed project will include the following renovations: River Road Station shall include a new GST, booster station, iron removal system, disinfection system, electrical and control upgrades. Goose Hollow Station a new GST, booster station, disinfection, electrical and control upgrades, and the South EST is to be fully rehabbed.	October-24
City of Morgan City	1101005	7,000,000	51	4	11,472	BIL GS Funding Install new filters and high service pumps, and new clear-well to improve the water production capacity and reliability of the existing water treatment plant. The improved system is part of Phase 2 of the improvements. Phase 1 included the clarifiers.	April-24
Tri Water System	1111020	250,000	50	5	1,245	Proposed change from Chlorine water Disinfection to chloramines water disinfection in all four well location within the system.	December-24
Grand Coteau Water System	1097001	6,800,000	50	6	6,800	The proposed improvements include the construction of a new water treatment plant consisting of: a new building, filters, service pumps, a ground storage tank, a separate chlorine building, an emergency generator, and piping all on property currently owned by the Town of Grand Coteau. BIL EC Funding	October-24
City of Opelousas	1097010	10,500,000	50	7	20,397	The purpose of the proposed project is to upgrade the existing 3 MGD WTP to treat high levels of iron and manganese. The system's raw water wells contain high levels of iron and manganese. Iron and <u>manganese</u> levels exceed the secondary maximum containment levels as established by the EPA. Accordingly, this project is proposed under the Emerging Containments program of DWRLF	September-24

System Name	PWSID	Est. Loan Amount	Points	Rank	Population	Project Description	Est. Date to Close Loan
Town of Many	1085016	5,400,000	48	8	4,575	The majority of the Town of Many water supply comes from its surface water treatment plant which takes raw water from the Hurricane Creek outfall into Toledo Bend. Because of its location in the creek outfall, the turbidity of the water spikes after rain events, and manganese levels as high as 1.7 mg/L have been recorded. The intake does not have the capability of varying the elevation that water is taken from, so droughts and low lake level are also problematic. To improve the quality of source water, construction of a new intake is proposed where Bayou La Nana connects to the lake, preferably close to the river channel so as to provide the most flexibility for depth of water. A new raw water pumping station will be built, and water will be pumped through a new raw water transmission main from the intake/pumping station to the current treatment plant. The new transmission piping will also allow for the existing asbestos cement transmission main to be abandoned. te surface water intake.	January-25
Calcasieu Parish WW District No. 5	1019084	10,000,000	47	9	4,680	BIL GS Funding Construction of a new 0.65MG ground storage tank, installation of automated meter reading technology, rehabilitation of two (2) elevated storage tanks, and necessary waterline connection from improved transmission/distribution in the water system.	July-24
Creston Water System, Inc.	1069003	1,310,000	43	10	660	The purpose of the proposed project is to construct improvements to the Creston Water System, Inc. to resolve ongoing deficiencies. The project includes select distribution system replacement, ground storage tank, booster station, electrical & control upgrades, iron/manganese treatment system, generators, site work, site piping and related work. The system's raw water wells contain high levels of iron and manganese. Iron and <i>manganese</i> levels exceed the secondary maximum containment levels as established by the EPA. Accordingly, this project is proposed under the BIL Emerging Containments program of DWRLF	November-24
Backwood Village Water System, Inc.	1127022	2,060,000	43	11	750	Construction of a GAC treatment unit, GST, booster station, chloramination system, site piping and associated items. BIL GS funding	November-24
Hebert Water System, Inc.	1021006	3,985,715	38	12	2,585	New main pump station with Ground Storage Tank, new ground storage tank with pump station at well site, painting elevated tank, new elevated storage tank, and distribution main upgrades to supply the elevated storage tank. BIL GS funding	December-24
Bastrop Water System, Inc.	1067003	4,150,000	37	13	18,105	The proposed project includes construction of 2 production well, chlorination systems, emergency power, transmission mains, aeration systems, site work, site piping and related work. BIL Emerging Containments	December-24
Bastrop Water System, Inc.	1067003	8,700,000	37	14	18,105	The proposed project includes construction of a new booster station, ground storage tank, treatment systems, site piping, site work, and related items at the Donaldson Facility / replace existing metering system with electronic read meters. BIL Base Supplemental	November-24
Tannehill Water System, Inc. (Loan 2)	1073060	1,600,000	36	15	4,800	The proposed project is to construct two new GAC treatment plants one at the Tannehill site and the other at the Hanna's Mill site and associated items. The project also provides for a new booster station enclosures and electrical at both stations. A new ground storage tank is also proposed at the Tannehill Station.	December-24

System Name	PWSID	Est. Loan Amount	Points	Rank	Population	Project Description	Est. Date to Close Loan
L and R Utilities: Country Estates Water System (North)	1073011	2,000,000	35	16	1,073	The proposed project consist of constructing a new ground storage tank, booster station, chlorination equipment and enclosure, granular activated carbon (GAC) treatment plant, and a new production water well and associated items at the North site. Ouachita Parish is co-funding project with \$500,000. AO: C-17-073-016-ETT	October-24
Jefferson Parish (Loan 2)	1051001	30,000,000	33	17	432,552	Rehabilitate the raw water intake pump station. Construct a new 40MGD treatment facility including: flow split/flash mixing, flocculation/sedimentation, filtration, chemical storage/feed facilities, clearwell and high service pump, solid handling. Construct a new 10,000 sqft chemistry laboratory, and rehabilitate plant 3 to a facility capable of treating 62MGD.	June-26
Southwest Ouachita Waterworks, Inc	1073047	6,120,000	32	18	10,092	System wide meter replacements and distribution system renovations	August-24
City of Scott (Loan 2)	1055026	6,400,000	30	19	3,131	This project will consist of upgrading and improving the City of Scott Water System. This will be accomplished by purchasing property, constructing a water well (to produce approx 40% of the water it now purchases from LUS nad provide for source redundancy), constructing a water treatment facility to treat water produced from the new water well, constructing an onsite ground storage tank (to provide up to 2 days of potable water storage) with transmission pumps, installing water mains to tie into the existing City water system, installing larger water mains in existing areas of the City water system to eliminate low pressure areas, installing SCADA programming and controls for the system, and installing associated appurtenances.	December-24
City of Natchitoches (Loan 4)	1069007	2,110,000	28	20	17,831	Phase I of the project shall provide the complete replacement of several sections of the water distribution system within the City of Natchitoches that have recorded many leaks and complaints of pressure loss. The project shall include mains, meters, valves, hydrants, erosion control and related work.	December-24
Village of Provencal	1069009	600,000	26	21	825	Proposed facilities will include new water well, emergency backup connection to Belwood Water System, new emergency backup generator, chlorine facilities, water transmission main and related work	November-24
City of Grambling Water System	1061006	2,200,000	26	22	5,000	Proposed project involves renovation of the City's distribution system. The project shall install various distribution piping, valving, and metering improvements to eliminate excessive water losses. Currently the City has an excess water loss of 25%. BIL GS funding	June-24
L & R Utilities(Lincoln Subdivision)	1073090	431,500	25	23	965	All four systems consolidating together will then purchase water from Better Waterworks PWS ID NO. LA1073003 (Pop Served 2160 Service Connections 720) Four WS to consolidate to Lincoln PWS ID NO. 1073090 ;Lincoln PWS ID NO: LA1073090 (Private for Profit, Community GW System);Population Served 490 via 163 Service Connections (SDWIS States 150 via 50 SCs);Hidden WS PWS ID No. LA1073061 (Private Not for Profit, Community GW System) Population Served 390 via 130 SCs;Wildwood WS PWS ID No. LA1073110 (Private Not for Profit, Community GW System) Population Served 72 via 24 SCs;Pecan WS PWS ID No. LA1073063 (Private Not for Profit, Community GW System) Population Served 50 via 17 SCs;Ouachita, OPH Region 8, District 4	October-24
