

Bobby Jindal  
GOVERNOR

Bruce D. Greenstein  
SECRETARY

**State of Louisiana**  
Department of Health and Hospitals  
Office of Public Health

October 18, 2012

Mr. Martin S. Triche  
4554 Highway 1  
Napoleonville, LA 70390

Dear Mr. Triche,

The Louisiana Department of Health and Hospitals/Office of Public Health (DHH) is reviewing environmental data collected in the vicinity of Bayou Corne to determine the potential for the general public's exposure to contaminants. If a completed exposure pathway is identified, available data will be evaluated to determine if exposure through ingestion, inhalation and/or dermal contact to measured levels could result in health effects.

The DHH has received and reviewed the following data related to the Bayou Corne event:

DATE (S) SAMPLED	DESC.	# of SAMPLES/ READINGS	SAMPLED BY	PARAMETERS ANALYZED	DATE(S) REVIEWED BY OPH
9/28/2012- 10/13/2012	Indoor residential air samples	41 samples at 6 residences (private property)	LDEQ	H2S, VOCs, LEL	10/16/2012

Based on the limited data reviewed to date, it does not appear that chemical exposure of site-related contaminants poses a public health risk to individual households in the immediate area of Bayou Corne for the time period and chemicals sampled.

DHH encourages local residents to heed evacuation orders issued, avoid restricted areas, and discuss any health concerns they may have with their physician. DHH will continue to monitor the situation for possible impacts on public health and review environmental data as it is made available to the agency. If you have any questions, please call me at 504-458-5428.

Sincerely,

Raoult Ratard, MD, MS, MPH, FACPM  
State Epidemiologist  
LDHH/Office of Public Health
