

Going the Distance: Emerging Infections for Long-term Care Settings

Viral Respiratory Diseases Detection and Containment in Long-term Care Facilities Workshop 2020

October 22, 2020

9:00 a.m. until 12:30 p.m.

About this Activity

Preventing viral respiratory diseases in long-term care settings will reduce morbidity and mortality of vulnerable patients. The Infectious Disease Epidemiology Section of the Louisiana Office of Public Health will hold a virtual, half-day workshop. This educational activity targets infection preventionists employed in long-term care settings as well as infectious disease personnel across the provider spectrum who have roles in infection surveillance and reporting. This training is free of charge, but [registration](#) is required.
