

LOUISIANA BAT REMOVAL COMPANIES

The following is a short directory of bat exclusion personnel or companies that may be able to address bat exclusion from buildings in Louisiana.

The individuals or companies are listed in alphabetical order. The listing of any individual or company does not indicate an endorsement of services. It is usually recommended to seek at least two quotes for bat exclusion services before making a selection.

Representatives of companies on this list have informed OPH that they perform bat control in Louisiana. The Office of Public Health does not license or regulate bat control companies, nor does a company’s appearance on this list indicate that professional or occupational licenses are maintained in any particular municipal, parish or state jurisdiction. Appropriate licensure should be verified by customers before engaging these companies.

If any of this information is found to be inaccurate, or if any persons or companies wish to be included in the list, please contact the state Public Health Veterinarian, Dr. Amy Bunch at (504) 722-3094 or at amy.bunch@la.gov.
