

# New COVID-19 Vaccination Provider Trainings

**Thank you for joining us to support COVID-19 vaccination efforts! We appreciate you!**

There are many resources available to help you effectively meet the demands of your role as a vaccinator in the COVID-19 Vaccination Program. Information and guidance about COVID-19 vaccine products are constantly evolving as we learn more, so please continue to review updated CDC materials.

It is important that you are knowledgeable about COVID-19 vaccine products—even if you have administered other vaccines. COVID-19 vaccine guidance and recommendations vary from product to product and from other vaccines. We recommend that you begin by reviewing the [COVID-19 Vaccine Training Module](#) for the vaccine product you will be administering.

## Vaccination Skills for New and Experienced Providers

Skill	Importance: Why is this necessary?	Resource
How to prepare vaccines	Vaccines need to be prepared correctly to ensure patient safety.	<ul style="list-style-type: none"> <li><a href="#">Vaccine Training Modules</a></li> </ul>  
Vaccine administration	All COVID-19 vaccines must be given appropriately by intramuscular injection.	<ul style="list-style-type: none"> <li><a href="#">Vaccine Training Modules</a></li> <li><a href="#">You Call the Shots! Vaccine Administration module</a></li> </ul>  
Vaccine storage and handling	Without proper storage and handling, vaccines may not be as effective.	<ul style="list-style-type: none"> <li><a href="#">Vaccine Storage and Handling Toolkit: COVID-19 Addendum</a></li> </ul>  
Vaccine documentation	Reliable medical records and immunization information are critical for patient treatment and required as part of the COVID-19 Vaccination Program.	<ul style="list-style-type: none"> <li><a href="#">COVID-19 Vaccination Data Systems</a></li> </ul>  
Vaccine safety and monitoring	Accurate reporting of adverse events means faster detection of safety problems.	<ul style="list-style-type: none"> <li><a href="#">VAERS</a></li> </ul> 
Preventing vaccine administration errors	Variation from vaccine storage, preparation, and administration guidance can result in inadequate protection and jeopardize patient safety.	<ul style="list-style-type: none"> <li><a href="#">Preventing Vaccine Administration Errors: A Primer for Healthcare Workers webinar</a></li> <li><a href="#">Vaccine Administration: Preventing Vaccine Administration Errors</a></li> </ul>  
Program requirements	The COVID-19 Vaccination Program has specific requirements that all vaccination providers must comply with.	<ul style="list-style-type: none"> <li><a href="#">COVID-19 Vaccination Program Provider Requirements and Support</a></li> </ul>
