

Note on the Data: The Total Case Counts are cumulative counts and include all cases reported since the beginning of the outbreak, including those who have recovered, died, or have been moved out of the facility. Total cases should not be compared to the current census to determine percent infected, as the census counts for many facilities have decreased over time. Some nursing homes are actively accepting COVID+ patients from other facilities; case counts for these nursing homes may include individuals diagnosed at another facility. Currently, all deaths in individuals with COVID positive lab results are being counted, this may include individuals with pre-existing conditions or individuals ultimately determined to have another cause of death. "Recovery" is defined as having met the "discontinuation of transmission based precautions" criteria for residents or "return to work" criteria for staff. "New Cases" are determined by subtracting the most recent counts from last week's reported counts. Large increases in cases are often related to facility-wide testing and the detection of asymptomatic cases, some of whom may be out of their infectious period at the time of detection. All case investigations are considered ongoing and numbers may change as more information becomes available.

River Palm Nursing and Rehab	Orleans	176	50	0	36	12	27	0	25

Note on the Data: The Total Case Counts are cumulative counts and include all cases reported since the beginning of the outbreak, including those who have recovered, died, or have been moved out of the facility. Total cases should not be compared to the current census to determine percent infected, as the census counts for many facilities have decreased over time. Some nursing homes are actively accepting COVID+ patients from other facilities; case counts for these nursing homes may include individuals diagnosed at another facility. Currently, all deaths in individuals with COVID positive lab results are being counted, this may include individuals with pre-existing conditions or individuals ultimately determined to have another cause of death. "Recovery" is defined as having met the "discontinuation of transmission based precautions" criteria for residents or "return to work" criteria for staff. "New Cases" are determined by subtracting the most recent counts from last week's reported counts. Large increases in cases are often related to facility-wide testing and the detection of asymptomatic cases, some of whom may be out of their infectious period at the time of detection. All case investigations are considered ongoing and numbers may change as more information becomes available.
