Surveillance Breakout	

Surveillance Summary

Data in this report includes cases diagnosed with HIV, AIDS, and Early and Congenital Syphilis

- In 2022, Louisiana ranked 4th in the nation for HIV diagnosis rates (18.6 new diagnoses per 100,000 population) and 12th in the estimated number of HIV diagnoses. The Baton Rouge MSA ranked 5th and the New Orleans MSA ranked 11th for HIV diagnosis rates (22.0 new diagnoses and 19.3 new diagnoses per 100,000, respectively), among the large metropolitan areas in the nation. The CDC HIV Surveillance Report (vol. 35) was released in May 2024. The CDC no longer provides AIDS rankings in the annual report.
- In 2022, Louisiana ranked 9th in the nation for primary and secondary (P&S) syphilis diagnoses rates (26.7 new diagnoses per 100,000 population) according to the 2022 CDC STD Surveillance Report.
- As of March 31, 2024, a total of **23,126** people were living with HIV (PLWH) in Louisiana; of these individuals, **10,969** people (47%) have an AIDS diagnosis.
- In 2023, **875** people were newly diagnosed with HIV in Louisiana. Of people newly diagnosed, **25**% (n=218) occurred in Region 1 (New Orleans) and **19**% (n=165) occurred in Region 2 (Baton Rouge).
- Between January 1 and March 31, 2023, a total of **370** people were diagnosed with early syphilis* in Louisiana; **201** people were diagnosed with P&S syphilis, and **169** people were diagnosed with early non-P&S syphilis. Among all early syphilis diagnoses, **20%** (n=75) occurred in Region 1 (New Orleans) and **16%** (n=60) occurred in Region 2 (Baton Rouge).
- The primary risk factor for people newly diagnosed with HIV in Louisiana is gay, bisexual, and other men who have sex with men (GBM). In 2023, among new diagnoses who reported a risk factor, **60%** reported being GBM, and an additional **3%** reported being GBM and a person who injects drugs. As of March 31, 2024, **47%** of all people with a reported risk factor living with HIV in Louisiana were GBM.
- The primary risk factor for people diagnosed with early syphilis in Louisiana is heterosexual activity. As of March 31, 2024, of the people who reported a risk factor, 62% reported heterosexual activity, and 31% reported engaging in any type of illegal drug use. Additionally, 39% reported being gay, bisexual, or other men who have sex with men. People could report multiple risk factors for syphilis diagnoses.
- In Louisiana, **75**% of people newly diagnosed with HIV, **69**% of people newly diagnosed with AIDS, and **66**% of people diagnosed with early syphilis were men.
- Black people in Louisiana experience severe health disparities in regards to HIV and STDs. In 2023, 68% of people
 newly diagnosed with HIV and 69% of people newly diagnosed with AIDS were Black. As of March 31, 2024, 59%
 of early syphilis cases with a reported race/ethnicity were Black. Only 32% of Louisiana's overall population is
 Black.
- A large percentage of new HIV and syphilis diagnoses occurred among adolescents and young adults. In 2023, 24% of people newly diagnosed with HIV were 13-24 years old and an additional 34% were 25-34 years old. As of March 31, 2024, 20% of people diagnosed with early syphilis were 13-24 years old and an additional 38% were 25-34 years old.
- In 2022, Louisiana ranked 7th in the nation for congenital syphilis case rates (200.2 per 100,000 live births). Between January 1 and March 31 2024, a total of 10 mothers and 10 infants have been linked to a congenital syphilis case. Among the mothers linked to a congenital syphilis case, 40% (n=4) resided in Region 8 (Monroe) and 30% (n=3) resided in Region 9 (Hammond/Slidell). During that same period, 60% (n=6) of cases were among Black mothers, and 80% (n=8) were between the ages of 20 to 29 at delivery.

^{*} A syphilis diagnosis with less than one year duration is considered to be "early syphilis." This designation covers the primary, secondary, and early non-P&S stages of syphilis.

Changes to Gender Variable

The gender variable now encompasses five genders: man, woman, transgender man, transgender woman, and additional gender identity. The gender category "additional gender identity" was added to include those who identified as gender queer, gender non-conforming, or non-binary. Gender defaults to birth sex unless a gender identity different from birth sex has been collected from medical chart review, case management notes, or during a partner services interview. People of transgender and additional gender identities are likely undercounted.

Changes to Syphilis Case Definition

The Quarterly Report includes revisions to the surveillance case definition for syphilis as approved by the Council of State and Territorial Epidemiologists (CSTE) effective January 1, 2018. Of note, the nomenclature for "Early latent syphilis" has been changed to "Early non-primary non-secondary syphilis." Throughout the Quarterly Report it has been abbreviated to "Early non-P&S syphilis." Please refer to the following documentation for additional information on all other syphilis case definition revisions: https://www.cdc.gov/std/stats/DCL-syph-case-def-sept-4-2017.pdf.

Congenital Syphilis Case Definition

A case of congenital syphilis (CS) occurs when an infant is exposed to inadequately treated syphilis in utero or during delivery. This may result in stillbirth, death of the newborn, or significant future health and developmental problems. A wide spectrum of severity exists, from inapparent infection to severe cases that are clinically apparent at birth. An infant or child (aged less than 2 years) may have signs such as hepatosplenomegaly, rash, condyloma lata, snuffles, jaundice (nonviral hepatitis), pseudoparalysis, anemia, or edema (nephrotic syndrome and/or malnutrition). An older child may have stigmata (e.g., interstitial keratitis, nerve deafness, anterior bowing of shins, frontal bossing, mulberry molars, Hutchinson teeth, saddle nose, rhagades, or Clutton joints).

Time Periods for this Quarterly Report (First Quarter 2024 Report):

People Living with HIV – As of March 31, 2024

People Newly Diagnosed with HIV- Calendar Year 2023

People Newly Diagnosed with AIDS- Calendar Year 2023

People Newly Diagnosed with P&S Syphilis- January 1 to March 31, 2024

People Newly Diagnosed with Early non-P&S Syphilis- January 1 to March 31, 2024

Cases of Congenital Syphilis- January 1 to March 31, 2024

Future Quarterly Report:

Second Quarter 2024 Report: Release in August 2024

Persons Living with HIV, as of June 30, 2024

People Diagnosed with HIV and AIDS, Calendar Year 2023

People Diagnosed with P&S Syphilis, January-June 2024

People Diagnosed with Early non-P&S, January-June 2024

Cases of Congenital Syphilis, January-June 2024

^{* &}gt;1 reported risk per case possible. Cases with No Reported Risk excluded from denominator for risk percent calculations.

2022 National CDC HIV Rates, Diagnoses, and Rankings LDH Office of Public Health STD/HIV/Hepatitis Program May 2024

On May 21, 2024, the CDC released their annual *HIV Surveillance Report*, 2022; Vol 35. This report presents 2022 data for diagnoses of HIV infection, death and HIV prevalence. The HIV diagnoses rate for the United States increased to an overall rate of 11.3 per 100,000 as compared to 10.8 per 100,000 in 2021. The South accounted for 52% of all people newly diagnosed with HIV in the country.

Louisiana ranked 4th in HIV diagnosis rates in 2022 (18.6 per 100,000). This ranking is for persons of all ages. In 2022, **Louisiana ranked 12th** in the number of HIV diagnoses.

STATE	HIV Diagnosis Rate, 2022 (per 100,000)	Number of HIV Diagnoses, 2022
District of Columbia	31.4	211
Georgia	23.0	2,514
Florida	19.3	4,302
Louisiana	18.6	<i>856</i>
Nevada	16.7	530
Texas	16.3	4,898
Mississippi	15.3	449
Alabama	13.8	702
South Carolina	13.6	718
North Carolina	12.7	1,355
United States	11.3	37,663

The **Baton Rouge MSA ranked 5th** (22.0 per 100,000) and the **New Orleans MSA ranked 11th** (19.3 per 100,000) in HIV diagnosis rates in 2022. This ranking is for persons of all ages. In 2022, **New Orleans ranked 32th** and **Baton Rouge ranked 40th** in the reported number of new HIV diagnoses.

MSA	HIV Diagnosis Rate, 2022 (per 100,000)	Number of HIV Diagnoses, 2022
Miami, FL	30.8	1,890
Memphis, TN	29.8	397
Atlanta, GA	27.6	1,719
Bakersfield, CA	22.2	203
Baton Rouge, LA	22.0	192
Orlando, FL	21.0	581
Las Vegas, NV	20.9	485
Houston, TX	20.9	1,532
Jackson, MS	19.5	114
Fayetteville, NC	19.5	103
New Orleans, LA	19.3	240

HIV Rates, Number of Diagnoses, and Rankings, 2021 & 2022

Please note: In the 2022 Surveillance Report, only HIV rates were reported and ranked. AIDS counts and rates are no longer published. The table below includes data for Louisiana, the New Orleans MSA and the Baton Rouge MSA.

	Louisiana			Ne	New Orleans MSA				Baton Rouge MSA			
	2021 2022		20	21	1 2022		2021		2022			
	#	Rank	#	Rank	#	Rank	#	Rank	#	Rank	#	Rank
