## Surveillance Summary

### Data in this report includes cases diagnosed with HIV, AIDS, or Early Syphilis

- In 2018, Louisiana ranked **4<sup>th</sup>** in the nation for HIV case rates (20.9 per 100,000 population) and **12<sup>th</sup>** in the estimated number of HIV cases. The Baton Rouge MSA ranked **3<sup>rd</sup>** and the New Orleans MSA ranked **7<sup>th</sup>** for HIV case rates (27.3 and 24.2 per 100,000, respectively), among the large metropolitan areas in the nation. The preliminary *CDC HIV Surveillance Report* (vol. 30) was released in November 2019 and provided the 2018 AIDS rankings. An updated *CDC HIV Surveillance Report* (vol. 31) was released in May 2020 and provided updated 2018 HIV rankings.
- According to the same report, Louisiana ranked **4<sup>th</sup>** highest in state AIDS case rates (9.1 per 100,000) and **12<sup>th</sup>** in the number of estimated AIDS cases in 2018. The New Orleans metropolitan area ranked **5<sup>th</sup>** in AIDS case rates (12.9 per 100,000) and the Baton Rouge metropolitan area ranked **10<sup>th</sup>** in AIDS case rates (9.4 per 100,000) in 2018 among the large metropolitan areas in the nation.
- In 2018, Louisiana ranked **7<sup>th</sup>** in the nation for primary and secondary (P&S) syphilis case rates (14.3 per 100,000 population) according to the 2018 *CDC STD Surveillance Report*.
- As of September 30, 2020, a total of **22,399** persons were living with HIV (PLWH) in Louisiana; of these individuals, **11,175** persons (50%) have an AIDS diagnosis.
- In 2019, **884** new HIV cases were diagnosed in Louisiana. Of these cases, **28%** (n=250) occurred in Region 1 (New Orleans) and **21%** (n=184) occurred in Region 2 (Baton Rouge).
- As of September 30, 2020, a total of **755** persons were diagnosed with early syphilis\* in Louisiana; **407** persons were diagnosed with P&S syphilis, and **348** persons were diagnosed with early non-P&S syphilis. Of the total early syphilis cases, **37%** (n=276) occurred in Region 1 (New Orleans) and **9%** (n=67) occurred in Region 2 (Baton Rouge).
- The primary risk factor for new HIV diagnoses in Louisiana is gay, bisexual, and other men who have sex with men (GBM). In 2019, among persons who reported a risk factor, **56%** reported being GBM, and an additional **2%** reported being GBM and a person who injects drugs. As of September 30, 2020, **45%** of all people with a reported risk factor living with HIV in Louisiana were GBM.
- The primary risk factor for early syphilis diagnoses in Louisiana is gay, bisexual, and other men who have sex with men (GBM). As of September 30, 2020, of the persons who reported a risk factor, **57%** reported being GBM, and **52%** reported engaging in heterosexual activity. *Persons could report multiple risk factors for syphilis diagnoses.*
- In Louisiana, **76%** of new HIV cases, **72%** of new AIDS cases, and **74%** of the early syphilis diagnoses were among men.
- African Americans in Louisiana experience severe health disparities in regards to HIV and STDs. In 2019, **66%** of newly diagnosed HIV cases and **74%** of newly diagnosed AIDS cases were among African Americans. As of September 30, 2020, **62%** of early syphilis cases with a reported race/ethnicity were among African Americans. African Americans make up only 32% of Louisiana's overall population.
- A large percentage of new HIV and syphilis diagnoses occurred among adolescents and young adults. In 2019, **21%** of all new HIV diagnoses occurred among persons 13-24 years old and an additional **37%** occurred among persons 25-34 years old. As of September 30, 2020, **51%** of all early syphilis diagnoses occurred among persons 13-29 years old and an additional **28%** occurred among persons 30-39 years old.

\* A syphilis diagnosis with less than one year duration is considered to be "early syphilis." This designation covers the primary, secondary, and early non-P&S stages of syphilis.

### **Changes to Syphilis Case Definition**

The Quarterly Report includes revisions to the surveillance case definition for syphilis as approved by the Council of State and Territorial Epidemiologists (CSTE) effective January 1, 2018. Of note, the nomenclature for “Early latent syphilis” has been changed to “Early non-primary non-secondary syphilis.” Throughout the Quarterly Report it has been abbreviated to “Early non-P&S syphilis.” Please refer to the following documentation for additional information on all other syphilis case definition revisions: <https://www.cdc.gov/std/stats/DCL-syph-case-def-sept-4-2017.pdf>.

### **Updates to HIV Transmission Categories**

Starting in 2019, the Quarterly Report has updated HIV transmission category names using people first language. Men who have sex with men (MSM) is now “Gay, bisexual, and other men who have sex with men” (GBM). Injection drug use (IDU) is now “Persons who inject drugs” (PWID).

A significant number of women living with HIV do not meet the stringent “high risk” criteria for “Heterosexual contact” and are classified as “No identified risk.” In an effort to better capture and present heterosexual transmission of HIV among women, the STD, HIV, & Hepatitis Program has used an algorithm from the Centers for Disease Control that re-categorizes many women formerly classified as “No identified risk” as now meeting the exposure criteria for “Female presumed heterosexual contact” (FPHC). The primary criteria for FPHC includes: sex at birth is female, answered ‘yes’ to sex with men, answered ‘no’ to injection drug use, and has no other documentation that would suggest an alternative mode of HIV acquisition.

### **Time Periods for this Quarterly Report (Third Quarter 2020 Report):**

Persons Living with HIV – As of September 30, 2020  
 New HIV Diagnoses – Calendar Year 2019 (Updated from 2<sup>nd</sup> Quarter Report)  
 New AIDS Diagnoses – Calendar Year 2019 (Updated from 2<sup>nd</sup> Quarter Report)  
 New P&S Syphilis Diagnoses – January 1 to September 30, 2020 (First Nine Months of 2020)  
 Early non-P&S Syphilis Diagnoses – January 1 to September 30, 2020 (First Nine Months of 2020)

### **Future Quarterly Report:**

*Fourth Quarter 2020 Report:* Release in February 2021  
 Persons Living with HIV- As of December 31, 2020  
 HIV and AIDS Diagnoses- Calendar Year 2019 (Final Update)  
 P&S Syphilis Diagnoses- Calendar Year 2020  
 Early non-P&S Syphilis Diagnoses- Calendar Year 2020

**Abbreviations**

Asian/PI	Asian/Pacific Islander
CDC	Centers for Disease Control and Prevention
FPHC	Female presumed heterosexual contact
FSF	Female sex with female
HRH	High risk heterosexual contact
PWID	Persons who inject drugs
GBM	Gay, bisexual, and other men who have sex with men
GBM/PWID	Gay, bisexual, and other men who have sex with men & inject drugs
NH	Non-Hispanic
PLWH	Persons living with HIV
P&S	Primary and secondary syphilis

45-years-old**

## How YOU can prevent HIV transmission:

If you are living with HIV,  
**take your HIV medicine**  
to stay healthy & reduce  
the risk of passing HIV  
on to a partner.

Know your status and  
your partner's status.  
**Get tested for HIV.**

**Avoid sharing needles**  
and other injecting  
equipment.

If you are HIV-negative, ask  
your doctor about **PrEP**.  
**The daily pill to prevent HIV.**

Use **condoms** correctly  
every time you have  
oral, anal, or vaginal sex.

**Get tested and treated** for  
other sexually transmitted  
diseases (STDs).
