

Louisiana Ryan White HIV/AIDS Part B CBO Program Statewide Quarterly Report July 1, 2016 - September 30, 2016

Community Based Organizations (CBOs) funded by Louisiana's Ryan White (RW) Part B program served 2,043 individuals living with HIV, approximately 10% (2,043/21,041) of individuals living with HIV in Louisiana.

The program served a larger proportion of individuals who are female, white, and older compared to the larger HIV+ population in Louisiana.

Nearly 70% (n=1,429) of clients served live below the federal poverty level (FPL).

The majority of clients served (86%) had health insurance.

* Includes all clients who received a service between July 1, 2016 and September 30, 2016 from a RW Part B CBO.

† Includes all individuals diagnosed with HIV on or before September 30, 2016 who were last known to be alive and living in Louisiana.

Louisiana Ryan White HIV/AIDS Part B CBO Program Statewide Quarterly Report July 1, 2016 - September 30, 2016

UTILIZATION

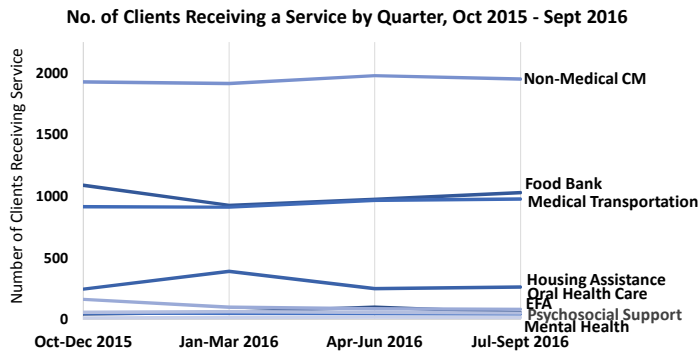

Non-medical case management was provided to 95% (n=1,950) of clients.

Food bank/home-delivered meals and medical transportation were the second and third most utilized services with 50% (n=1,029) and 48% (n=978) respectively of clients receiving these services.

Encounters for non-medical case management were most frequently classified as follow-up or monitoring, followed by treatment adherence counseling, referral/advocacy, and case conferencing.

Louisiana Ryan White HIV/AIDS Part B CBO Program

Statewide Quarterly Report

July 1, 2016 - September 30, 2016

CLINICAL OUTCOMES

A total of 96% (1,955/2,043) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-five percent (1,539/2,043) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

For clients served by RW Part B CBO program who were in care, 79% (1,539/1,955) were virally suppressed. For the larger HIV+ population living in Louisiana who were in care, 81% (11,791/14,586) were virally suppressed.

Clients who are white, older and have higher incomes were more likely to be virally suppressed.

Clients with who are uninsured are less likely to be virally suppressed. Only 62% (155/251) of those who are uninsured achieved viral suppression compared to 84% (391/463) of those with private health insurance.

Louisiana Ryan White HIV/AIDS Part B CBO Program

Statewide Quarterly Report

July 1, 2016 - September 30, 2016

UNMET NEED

Unmet need includes individuals who are defined as out of care. These individuals know their positive HIV status and are not receiving HIV-related medical care. Individuals living with HIV who have no evidence of receiving a viral load test or CD4 count within a 12-month period meet the definition of unmet need.

Twenty-seven percent (5,366/19,952) of PLWH in Louisiana met the definition for unmet need between October 1, 2015 and September 30, 2016.

Males, Hispanics, and persons 65 years and older were most likely not to be receiving HIV-related medical care.

Regions supported by Ryan White Part B CBOs with the largest proportion of people with unmet need include Lake Charles and Shreveport.

NUMBER OF PEOPLE LIVING WITH HIV WHO MEET UNMET NEED CRITERIA * 5,366

Gender
