

LA HAP

LA HAP stands for Louisiana Health Access Program, which is the AIDS Drug Assistance Program (ADAP) for the state of Louisiana. LA HAP is a federally funded program that provides access to medications for uninsured individuals and assistance with premiums and cost shares for insured individuals for the purpose of ensuring that clients access health care and achieve viral suppression. Please visit www.lahap.org for more information regarding the program.

LA HAP publishes quarterly factsheets for the entire state and each public health region. All LA HAP factsheets for the first quarter of 2016 are compiled in this document.

Louisiana Health Access Program Statewide Quarterly Report January 1, 2016 - March 31, 2016

ENROLLMENT SUMMARY

During the quarter, 6,844 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=479) were first time enrollees.

There were 641 clients who disenrolled from the program. The majority 87% (n=557) did not recertify, and another 7% (n=48) were eligible for Medicaid.

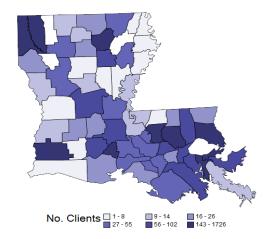

There were 1,844 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

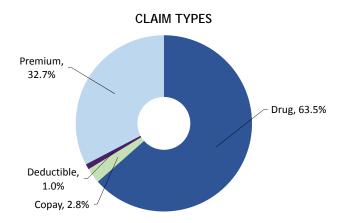

A total of 297 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The majority of clients live in the New Orleans and Baton Rouge regions, 37% (n=2,524) clients and 24% (n=1,614) clients respectively.

LA HAP's clients mirror the the larger HIV epidemic in Louisiana with similar race and gender breakdowns of those living with HIV in Louisiana.

CLINICAL OUTCOMES SUMMARY

A total of 98% (n=6,700) clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty percent (n=5,438) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to only 65% of uninsured clients.

Only 76% of blacks achieved viral suppression compared to 86% of whites despite having similar in care percentages.

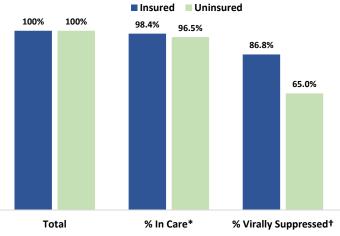

UTILIZATION SUMMARY

LA HAP assisted with 66,400 claims including 42,189 (64%) drug claims, 1,859 (3%) copays, 659 (1%) deductibles and 21,689 (33%) premiums. Of these, 58,305 (88%) were for insured claims and (12%) 8,095 were for uninsured claims.

There were an average of 9.7 claims per person.

There were 4,788 clients who utilized health insurance assistance and 1,614 clients who utilized uninsured assistance.

CARE CONTINUUM FOR INSURED & UNINSURED CLIENTS

*Clients defined as 'In Care' had at least one CD4 or Viral Load reported between April 1, 2015 and March 31, 2016

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between April 1, 2015 and March 31, 2016 with the most recent result <200 copies/mL

ENROLLMENT SUMMARY

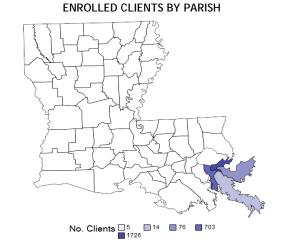

During the quarter, 2,524 clients from the New Orleans Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=176) were first time enrollees.

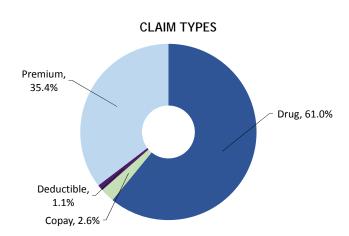

There were 225 clients who disenrolled from the program. The majority 88% (n=197) did not recertify, and another 8% (n=18) were eligible for Medicaid.

There were 707 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 103 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The largest number of clients enrolled in LA HAP reside in the New Orleans Region.

UTILIZATION SUMMARY

LA HAP assisted with 24,046 claims including 14,663 (61%) drug claims, 627 (3%) copays, 254 (1%) deductibles and 8,501 (35%) premiums. Of these, 21,279 (88%) were for insured claims and 2,782 (12%) were for uninsured claims.

There were an average of 9.5 claims per person.

There were 1,819 clients who utilized health insurance assistance and 596 clients who utilized uninsured assistance.

Thirty-six percent of all LA HAP claims were for clients from the New Orleans Region.

CLINICAL OUTCOMES SUMMARY

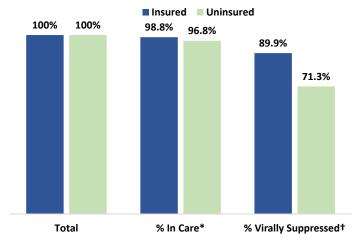

A total of 98% (n=2,483) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-five percent (n=2,132) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The New Orleans Region has the second highest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 90% of insured clients were virally suppressed compared to only 71% of uninsured clients.

Only 67% of transgender clients achieved viral suppression compared to 85% of female and male clients despite having similar in care percentages.

ENROLLMENT SUMMARY

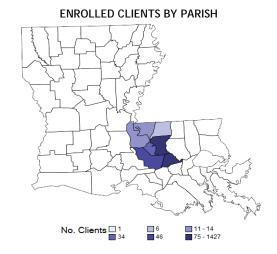

During the quarter, 1,614 clients from the Baton Rouge Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=113) were first time enrollees.

There were 163 clients who disenrolled from the program. The majority 88% (n=143) did not recertify, and another 9% (n=14) were eligible for Medicaid.

There were 472 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 77 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The second largest number of clients enrolled in LA HAP reside in the Baton Rouge Region.

Premium, 35.8% Deductible, 1.0% Copay, 2.5%

UTILIZATION SUMMARY

LA HAP assisted with 15,110 claims including 9,164 (61%) drug claims, 383 (3%) copays, 157 (1%) deductibles and 5,403 (36%) premiums. Of these, 13,871 (92%) were for insured claims and 1,239 (8%) were for uninsured claims.

There were an average of 9.4 claims per person.

There were 1,184 clients who utilized health insurance assistance and 296 clients who utilized uninsured assistance.

Twenty-three percent of all LA HAP claims were for clients from the Baton Rouge Region.

CLINICAL OUTCOMES SUMMARY

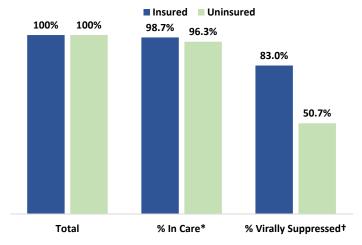

A total of 98% (n=1,585) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-three percent (n=1,185) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Baton Rouge Region has the lowest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 83% of insured clients were virally suppressed compared to only 51% of uninsured clients.

Only 72% of blacks achieved viral suppression compared to 86% of whites despite having similar in care percentages.

ENROLLMENT SUMMARY

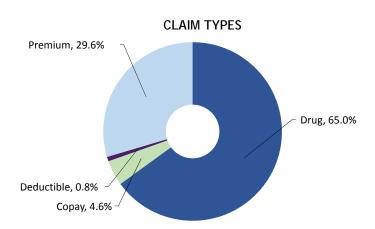

During the quarter, 312 clients from the Houma Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 8% (n=25) were first time enrollees.

There were 29 clients who disenrolled from the program. The majority 88% (n=25) did not recertify, and another 10% (n=3) were in eligible for other reasons.

There were 83 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 26 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Houma Region account for 5% of LA HAP enrollees.

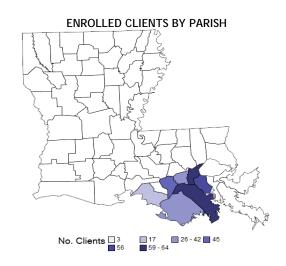

CLINICAL OUTCOMES SUMMARY

A total of 98% (n=305) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-five percent (n=265) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Houma Region has the highest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to only 81% of uninsured clients.

Only 82% of black clients achieved viral suppression compared to 90% of white clients despite having similar in care percentages.

UTILIZATION SUMMARY

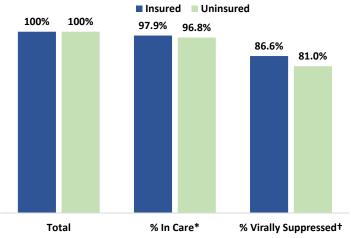

LA HAP assisted with 3,163 claims including 2,056 (65%) drug claims, 146 (5%) copays, 26 (1%) deductibles and 935 (30%) premiums. Of these, 2,671 (84%) were for insured claims and 492 (16%) were for uninsured claims.

There were an average of 10.1 claims per person.

There were 232 clients who utilized health insurance assistance and 76 clients who utilized uninsured assistance.

Five percent of all LA HAP claims were for clients from the Houma Region.

ENROLLMENT SUMMARY

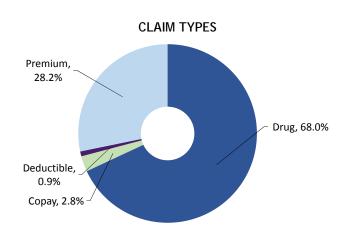

During the quarter, 548 clients from the Lafayette Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 6% (n=31) were first time enrollees.

There were 44 clients who disenrolled from the program. The majority 84% (n=37) did not recertify, and another 7% (n=3) were ineligible for other reasons.

There were 141 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 25 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lafayette Region account for 8% of LA HAP enrollees.

CLINICAL OUTCOMES SUMMARY

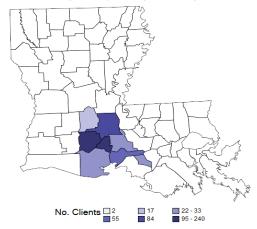

A total of 98% (n=538) of clients were defined as in care. The se clients had at least one CD4 or viral load test reported in t he past year.

Seventy-eight percent (n=427) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Lafayette Region is similar to the statewide percentage of 80%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 86% of insured clients were virally suppressed compared to only 67% of uninsured clients.

Only 73% of black clients achieved viral suppression compared to 84% of white clients despite having similar in care percentages.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

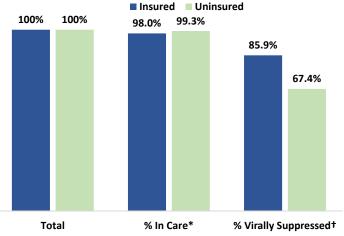

LA HAP assisted with 6,269 claims including 4,266 (68%) drug claims, 177 (3%) copays, 58 (1%) deductibles and 1,768 (28%) premiums. Of these, 5,520 (88%) were for insured claims and 749 (12%) were for uninsured claims.

There were an average of 11.4 claims per person.

There were 382 clients who utilized health insurance assistance and 141 clients who utilized uninsured assistance.

Nine percent of all LA HAP claims were for clients from the Lafayette Region.

ENROLLMENT SUMMARY

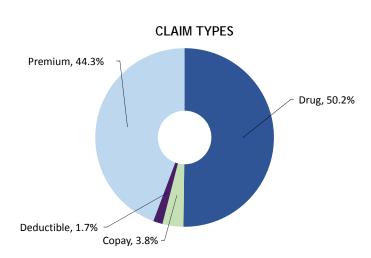

During the quarter, 333 clients from the Lake Charles Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 5% (n=16) were first time enrollees.

There were 28 clients who disenrolled from the program. The majority 82% (n=23) did not recertify, and another 14% (n=4) were ineligible for other reasons.

There were 95 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 8 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lake Charles Region account for 5% of LA HAP

CLINICAL OUTCOMES SUMMARY

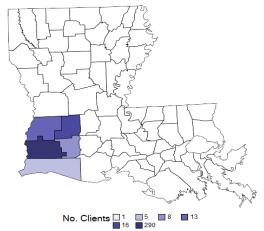

A total of 98% (n=325) of clients were defined as in care. The se clients had at least one CD4 or viral load test reported in the past year.

Seventy-seven percent (n=256) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Lake Charles Region is less than the statewide percentage of 80%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 82% of insured clients were virally suppressed compared to only 55% of uninsured clients.

Only 72% of black clients achieved viral suppression compared to 84% of white clients despite having similar in care percentages.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

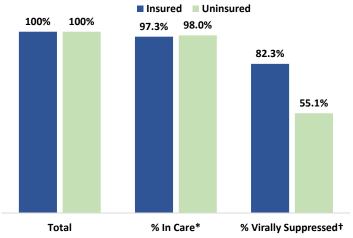

LA HAP assisted with 3,086 claims including 1,549 (50%) drug claims, 116 (4%) copays, 53 (2%) deductibles and 1,368 (44%) premiums. Of these, 2,918 (95%) were for insured claims and 168 (5%) were for uninsured claims.

There were an average of 9.3 claims per person.

There were 270 clients who utilized health insurance assistance and 45 clients who utilized uninsured assistance.

Five percent of all LA HAP claims were for clients from the Lake Charles Region.

ENROLLMENT SUMMARY

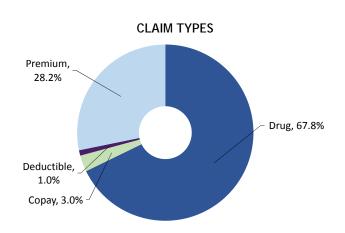

During the quarter, 198 clients from the Alexandria Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 10% (n=19) were first time enrollees.

There were 37 clients who disenrolled from the program. The majority 95% (n=35) did not recertify.

There were 64 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 10 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Alexandria Region account for 3% of LA HAP enrollees.

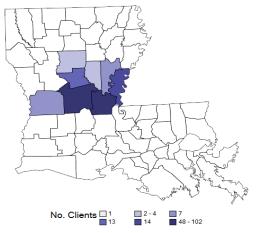

CLINICAL OUTCOMES SUMMARY

A total of 99% (n=196) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-five percent (n=149) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Alexandria Region had the second lowest percentage of clients virally suppressed in the state.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to only 69% of uninsured clients.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

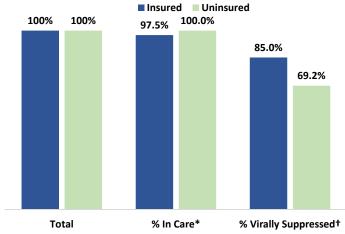

LA HAP assisted with 1,974 claims including 1,339 (68%) drug claims, 59 (3%) copays, 20 (1%) deductibles and 556 (28%) premiums. Of these, 1,685 (85%) were for insured claims and 289 (15%) were for uninsured claims.

There were an average of 10.0 claims per person.

There were 125 clients who utilized health insurance assistance and 59 clients who utilized uninsured assistance.

Three percent of all LA HAP claims were for clients from the Alexandria Region.

‡Clients defined as 'Virally Suppressed' had at least one Viral Load reported between April 1, 2015 and
March 31, 2016 with the most recent result <200 copies/mL

ENROLLMENT SUMMARY

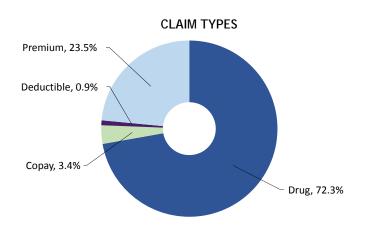

During the quarter, 526 clients from the Shreveport Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=38) were first time enrollees.

There were 48 clients who disenrolled from the program. The majority 85% (n=41) did not recertify, and another 10% (n=5) were eligible for Medicaid.

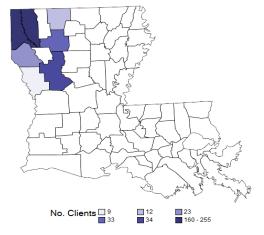

There were 114 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 23 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Shreveport Region account for 8% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 4,365 claims including 3,154 (72%) drug claims, 147 (3%) copays, 40 (1%) deductibles and 1,024 (24%) premiums. Of these, 2,979 (68%) were for insured claims and 1,386 (32%) were for uninsured claims.

There were an average of 8.3 claims per person.

There were 260 clients who utilized health insurance assistance and 206 clients who utilized uninsured assistance.

Seven percent of all LA HAP claims were for clients from the Shreveport Region.

CLINICAL OUTCOMES SUMMARY

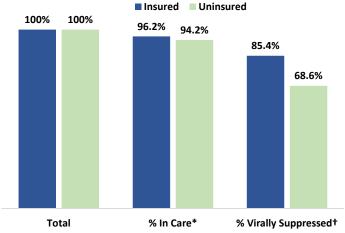

A total of 95% (n=500) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-six percent (n=401) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. Ther percentage of clients virally suppressed in the Shreveport Region is less than the statewide percentage of 80%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to only 69% of uninsured clients.

Only 73% of male clients achieved viral suppression compared to 85% of female clients despite having similar in care percentages.

ENROLLMENT SUMMARY

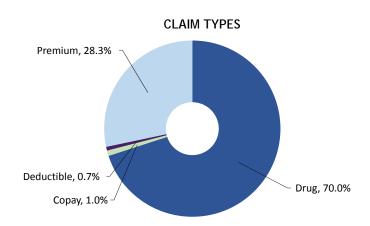

During the quarter, 354 clients from the Monroe Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 8% (n=29) were first time enrollees.

There were 41 clients who disenrolled from the program. The majority 80% (n=33) did not recertify, and another 12% (n=5) were eligible for Medicaid.

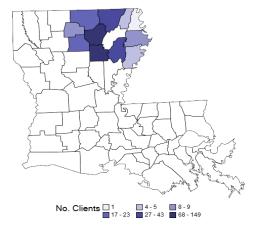

There were 99 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 15 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Monroe Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 4,251 claims including 2,975 (70%) drug claims, 42 (1%) copays, 29 (1%) deductibles and 1,205 (24%) premiums. Of these, 3,907 (92%) were for insured claims and 344 (8%) were for uninsured claims.

There were an average of 12.0 claims per person.

There were 253 clients who utilized health insurance assistance and 71 clients who utilized uninsured assistance.

Six percent of all LA HAP claims were for clients from the Monroe Region.

CLINICAL OUTCOMES SUMMARY

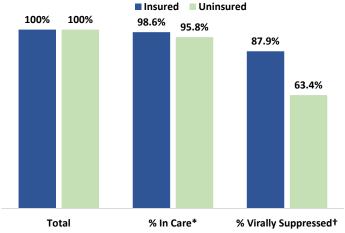

A total of 98% (n=347) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-nine percent (n=279) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. Ther percentage of clients virally suppressed in the Monroe Region is similar to the statewide percentage of 80%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 88% of insured clients were virally suppressed compared to only 63% of uninsured clients.

Only 77% of black clients achieved viral suppression compared to 84% of white clients despite having similar in care percentages.

ENROLLMENT SUMMARY

During the quarter, 435 clients from the Hammond/Slidell Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=32) were first time enrollees.

There were 26 clients who disenrolled from the program. The majority 88% (n=23) did not recertify.

There were 69 clients who enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the past year.

A total of 10 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Hammond/Slidell Region account for 6% of LA HAP enrollees.

CLAIM TYPES Premium, 22.5% Deductible, 0.5% Copay, 3.9% Drug, 73.1%

UTILIZATION SUMMARY

LA HAP assisted with 4,136 claims including 3,023 (73%) drug claims, 162 (4%) copays, 22 (1%) deductibles and 929 (23%) premiums. Of these, 3,477 (84%) were for insured claims and 659 (16%) were for uninsured claims.

There were an average of 9.5 claims per person.

There were 262 clients who utilized health insurance assistance and 125 clients who utilized uninsured assistance.

Six percent of all LA HAP claims were for clients from the Hammond/Slidell Region.

CLINICAL OUTCOMES SUMMARY

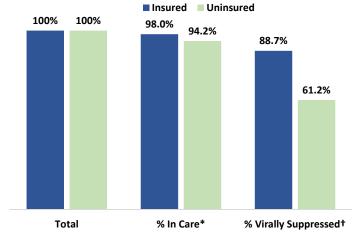

A total of 97% (n=421) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Seventy-nine percent (n=345) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. Ther percentage of clients virally suppressed in the Hammond/Slidell Region is similar to the statewide percentage of 80%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 89% of insured clients were virally suppressed compared to only 61% of uninsured clients.

Only 72% of black clients achieved viral suppression compared to 87% of white clients despite having similar in care percentages.
