

LA HAP

LA HAP stands for Louisiana Health Access Program, which is the AIDS Drug Assistance Program (ADAP) for the state of Louisiana. LA HAP is a federally funded program that provides access to medications for uninsured persons and assistance with premiums and cost shares for insured persons for the purpose of ensuring that clients access health care and achieve viral suppression. Please visit www.lahap.org for more information regarding the program.

LA HAP publishes quarterly and annual factsheets for the state and each public health region. All LA HAP factsheets for calendar year 2017 are complied in this document.

During the quarter, 3,781 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=132) were first time enrollees.

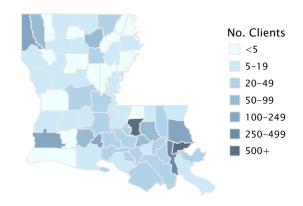

There were 242 clients who disenrolled from the program.

A total of 373 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

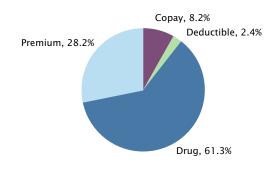

There were 55 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The majority of LA HAP clients live in the New Orleans and Baton Rouge regions, 38% (n=1,445) and 25% (n=953) respectively.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 32,076 claims including 19,658 (61%) drug claims, 2,621 (8%) copays, 761 (2%) deductibles and 9,036 (28%) premiums. Of these, 31,424 (98%) were for insured claims and 652 (2%) were for uninsured claims.

There were an average of 10.9 claims per person.

There were 2,807 clients who utilized health insurance assistance and 167 clients who utilized uninsured assistance.

CLINICAL OUTCOMES SUMMARY

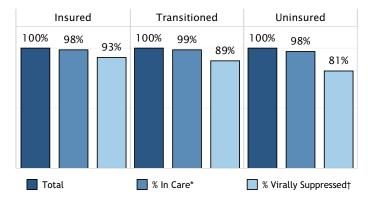

Nearly all clients (98%, n=3,717) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

91% (n=3,444) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% (n=2,781) of insured clients were virally suppressed compared to 81% (n=304) of uninsured clients.

The regions with the highest percentage of clients virally suppressed were Baton Rouge (94%) and Houma (92%).

During the quarter, 1,445 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=53) were first time enrollees.

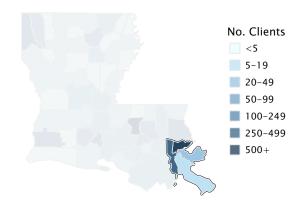

There were 95 clients who disenrolled from the program.

A total of 157 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

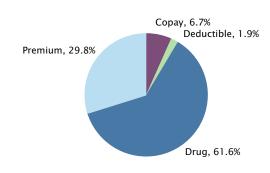

There were 17 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The largest number of clients enrolled in LA HAP reside in the New Orleans Region.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 12,658 claims including 7,801 (62%) drug claims, 842 (7%) copays, 240 (2%) deductibles and 3,775 (30%) premiums. Of these, 12,432 (98%) were for insured claims and 226 (2%) were for uninsured claims.

There were an average of 11.3 claims per person.

There were 1,074 clients who utilized health insurance assistance and 58 clients who utilized uninsured assistance.

39% of all LA HAP claims were for clients from the New Orleans Region.

CLINICAL OUTCOMES SUMMARY

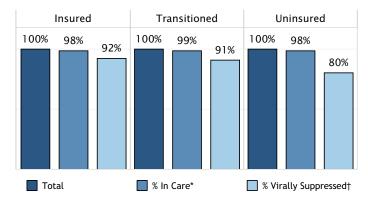

Nearly all clients (98%, n=1,423) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

91% (n=1,316) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 92% (n=1,058) of insured clients were virally suppressed compared to 80% (n=107) of uninsured clients.

The percentage of clients virally suppressed in the New Orleans Region is similar to the statewide percentage of 91%.

*Clients defined as In Care had at least one CD4 or viral load reported between April 01, 2017 and March 31, 2018.

†Clients defined as Virally Suppressed had at least one viral load reported between April 01, 2017 and March 31, 2018 with the most recent result <200 copies/mL.

During the quarter, 953 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=31) were first time enrollees.

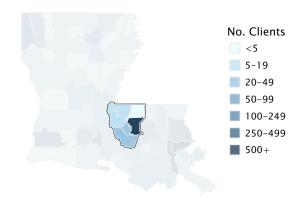

There were 44 clients who disenrolled from the program.

A total of 105 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

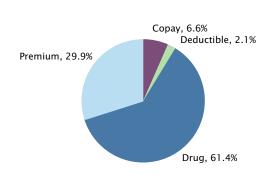

There were 12 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The second largest number of clients enrolled in LA HAP reside in the Baton Rouge Region.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 8,108 claims including 4,977 (61%) drug claims, 533 (7%) copays, 173 (2%) deductibles and 2,425 (30%) premiums. Of these, 8,029 (99%) were for insured claims and 79 (1%) were for uninsured claims.

There were an average of 10.7 claims per person.

There were 736 clients who utilized health insurance assistance and 21 clients who utilized uninsured assistance.

25% of all LA HAP claims were for clients from the Baton Rouge Region.

CLINICAL OUTCOMES SUMMARY

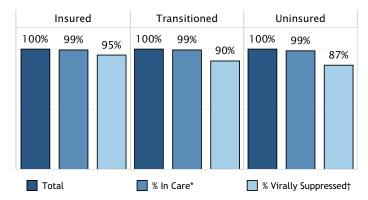

Nearly all clients (99%, n=947) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

94% (n=897) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 95% (n=737) of insured clients were virally suppressed compared to 87% (n=60) of uninsured clients.

The Baton Rouge Region has the highest percentage of clients virally suppressed in the state.

During the quarter, 179 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 2% (n=3) were first time enrollees.

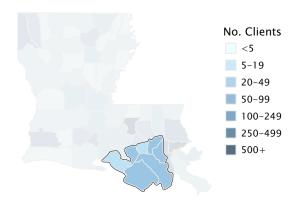

There were 13 clients who disenrolled from the program.

A total of 16 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

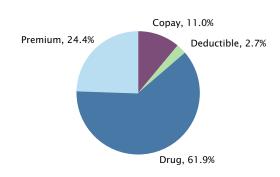

There were 6 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Houma Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,849 claims including 1,144 (62%) drug claims, 204 (11%) copays, 49 (3%) deductibles and 452 (24%) premiums. Of these, 1,809 (98%) were for insured claims and 40 (2%) were for uninsured claims.

There were an average of 12.2 claims per person.

There were 145 clients who utilized health insurance assistance and 8 clients who utilized uninsured assistance.

6% of all LA HAP claims were for clients from the Houma Region.

CLINICAL OUTCOMES SUMMARY

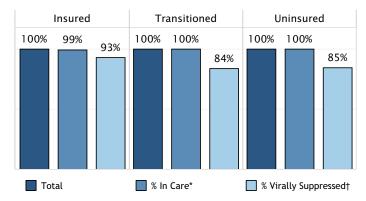

Nearly all clients (99%, n=178) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

92% (n=164) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% (n=137) of insured clients were virally suppressed compared to 85% (n=11) of uninsured clients.

The Houma Region had the second highest percentage of clients virally suppressed in the state.

During the quarter, 297 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 6% (n=17) were first time enrollees.

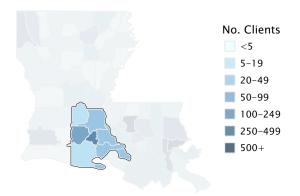

There were 19 clients who disenrolled from the program.

A total of 18 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

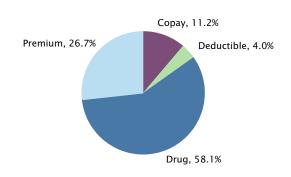

There were 6 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lafayette Region account for 8% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 2,091 claims including 1,215 (58%) drug claims, 234 (11%) copays, 83 (4%) deductibles and 559 (27%) premiums. Of these, 2,013 (96%) were for insured claims and 78 (4%) were for uninsured claims.

There were an average of 9.1 claims per person.

There were 208 clients who utilized health insurance assistance and 23 clients who utilized uninsured assistance.

7% of all LA HAP claims were for clients from the Lafayette Region.

CLINICAL OUTCOMES SUMMARY

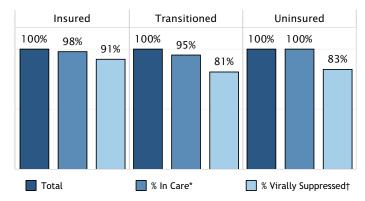

Nearly all clients (98%, n=292) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

90% (n=266) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 92% (n=214) of insured clients were virally suppressed compared to 83% (n=35) of uninsured clients.

The percentage of clients virally suppressed in the Lafayette Regon is similar to the statewide percentage of 91%.

During the quarter, 153 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=4) were first time enrollees.

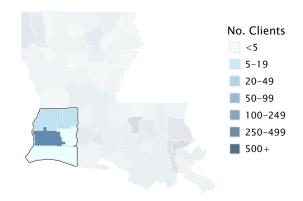

There were 13 clients who disenrolled from the program.

A total of 5 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

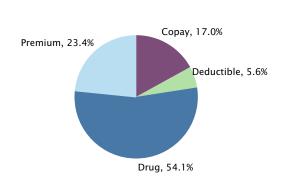

There was 1 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lake Charles Region account for 4% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,419 claims including 767 (54%) drug claims, 241 (17%) copays, 79 (6%) deductibles and 332 (23%) premiums. Of these, 1,406 (99%) were for insured claims and 13 (1%) were for uninsured claims.

There were an average of 11.3 claims per person.

There were 122 clients who utilized health insurance assistance and 5 clients who utilized uninsured assistance.

4% of all LA HAP claims were for clients from the Lake Charles Region.

CLINICAL OUTCOMES SUMMARY

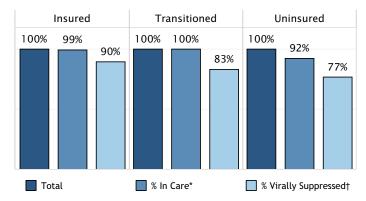

Nearly all clients (99%, n=151) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

88% (n=135) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 90% (n=120) of insured clients were virally suppressed compared to 77% (n=10) of uninsured clients.

The Lake Charles Region has the second lowest percentage of clients virally suppressed in the state.

During the quarter, 81 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 5% (n=4) were first time enrollees.

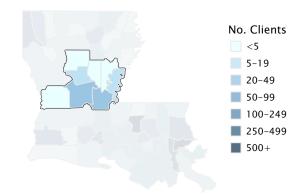

There were 10 clients who disenrolled from the program.

A total of 15 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

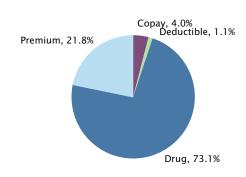

There was 1 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Alexandria Region account for 2% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 726 claims including 531 (73%) drug claims, 29 (4%) copays, 8 (1%) deductibles and 158 (22%) premiums. Of these, 707 (97%) were for insured claims and 19 (3%) were for uninsured claims.

There were an average of 12.3 claims per person.

There were 55 clients who utilized health insurance assistance and 4 clients who utilized uninsured assistance.

2% of all LA HAP claims were for clients from the Alexandria Region.

CLINICAL OUTCOMES SUMMARY

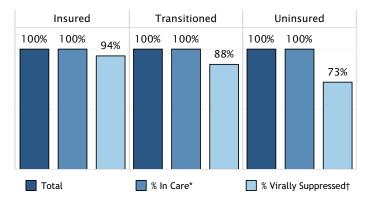

All clients (100%, n=81) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

90% (n=73) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 94% (n=51) of insured clients were virally suppressed compared to 73% (n=8) of uninsured clients.

The percentage of clients virally suppressed in the Alexandria Region is similar to the statewisde percentage of 91%.

†Clients defined as Virally Suppressed had at least one viral load reported between April 01, 2017 and March 31, 2018 with the most recent result <200 copies/mL.

During the quarter, 244 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=7) were first time enrollees.

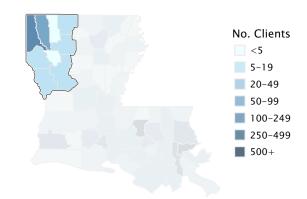

There were 14 clients who disenrolled from the program.

A total of 27 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

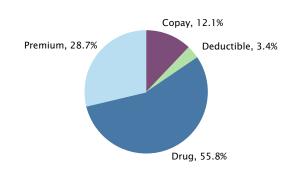

There were 8 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Shreveport Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,787 claims including 997 (56%) drug claims, 216 (12%) copays, 61 (3%) deductibles and 513 (29%) premiums. Of these, 1,670 (93%) were for insured claims and 117 (7%) were for uninsured claims.

There were an average of 9.3 claims per person.

There were 173 clients who utilized health insurance assistance and 25 clients who utilized uninsured assistance.

6% of LA HAP claims were for clients from the Shreveport Region.

CLINICAL OUTCOMES SUMMARY

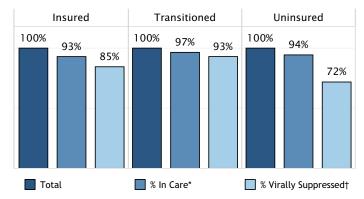

A large percentage of clients (93%, n=228) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

84% (n=205) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% (n=151) of insured clients were virally suppressed compared to 72% (n=26) of uninsured clients.

The Shreveport Region had the lowest percentage of clients virally suppressed in the state.

During the quarter, 189 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=6) were first time enrollees.

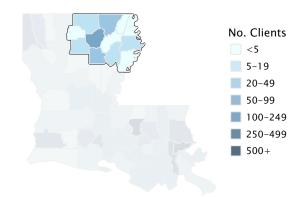

There were 18 clients who disenrolled from the program.

A total of 14 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

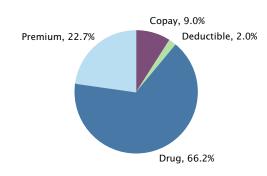

There was 1 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Monroe Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,495 claims including 990 (66%) drug claims, 135 (9%) copays, 30 (2%) deductibles and 340 (23%) premiums. Of these, 1,450 (97%) were for insured claims and 45 (3%) were for uninsured claims.

There were an average of 10.8 claims per person.

There were 127 clients who utilized health insurance assistance and 11 clients who utilized uninsured assistance.

5% of LA HAP claims were for clients from the Monroe Region.

CLINICAL OUTCOMES SUMMARY

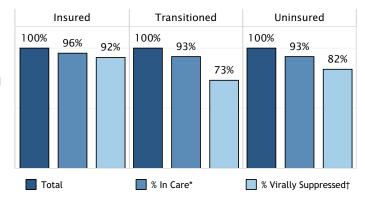

A large percentage of clients (95%, n=180) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

89% (n=169) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% (n=135) of insured clients were virally suppressed compared to 82% (n=23) of uninsured clients.

The Monroe Region had the third lowest percentage of clients virally suppressed in the state.

†Clients defined as Virally Suppressed had at least one viral load reported between April 01, 2017 and March 31, 2018 with the most recent result <200 copies/mL.

During the quarter, 240 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=7) were first time enrollees.

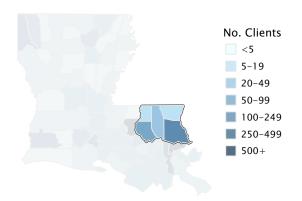

There were 16 clients who disenrolled from the program.

A total of 16 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

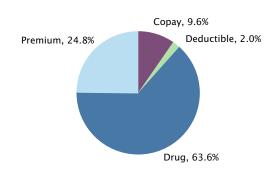

There was 3 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Hammond/Slidell Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,943 claims including 1,236 (64%) drug claims, 187 (10%) copays, 38 (2%) deductibles and 482 (25%) premiums. Of these, 1,908 (98%) were for insured claims and 35 (2%) were for uninsured claims.

There were an average of 10.9 claims per person.

There were 167 clients who utilized health insurance assistance and 12 clients who utilized uninsured assistance.

6% of LA HAP claims were for clients from the Hammond/Slidell Region.

CLINICAL OUTCOMES SUMMARY

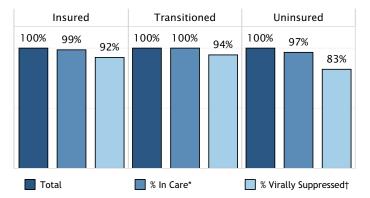

A large percentage of clients (99%, n=237) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

91% (n=219) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 92% (n=178) of insured clients were virally suppressed compared to 83% (n=24) of uninsured clients.

The percentage of clients virally suppressed in the Hammond/Slidell Region is similar to the statewide percentage of 91%.
