

LA HAP stands for Louisiana Health Access Program, which is the AIDS Drug Assistance Program (ADAP) for the state of Louisiana. LA HAP is a federally funded program that provides access to medications for uninsured persons and assistance with premiums and cost shares for insured persons for the purpose of ensuring that clients access health care and achieve viral suppression. Please visit www.lahap.org for more information regarding the program.

LA HAP publishes quarterly and annual factsheeets for the state and each public health region. All LA HAP factsheets for the third quarter of 2018 are complied in this document.

ENROLLMENT SUMMARY

During the guarter, 3,907 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=151) were first time enrollees.

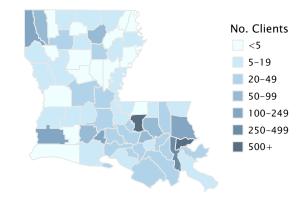

There were 79 clients who disenrolled from the program.

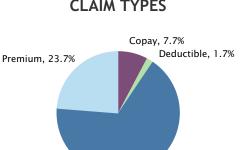

A total of 116 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 63 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The majority of LA HAP clients live in the New Orleans and Baton Rouge regions, 38% (n=1,482) and 25% (n=989) respectively.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 36,778 claims including 24,577 (67%) drug claims, 2,844 (8%) copays, 623 (2%) deductibles and 8,734 (24%) premiums. Of these, 34,739 (94%) were for insured claims and 2,039 (80%) were for uninsured claims.

There were an average of 11.6 claims per person.

There were 2,767 clients who utilized health insurance assistance and 450 clients who utilized uninsured assistance.

CLINICAL OUTCOMES SUMMARY

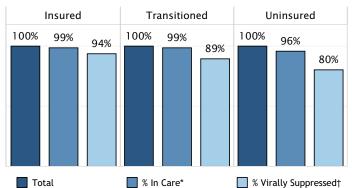

Nearly all clients (98%, n=3,842) were defined as in care. These clients had at least one CD4 or viral load test reported in the past vear.

Drug, 66.8%

91% (n=3,579) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 94% (n=2,999) of insured clients were virally suppressed compared to 80% (n=439) of uninsured clients.

The regions with the highest percentage of clients virally suppressed were Baton Rouge (95%) and Houma (92%).

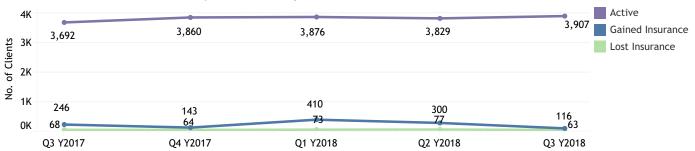

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

*Clients defined as In Care had at least one CD4 or viral load reported between October 01, 2017 and September 30, 2018. †Clients defined as Virally Suppressed had at least one viral load reported between October 01, 2017 and September 30, 2018 with the most recent result <200 copies/mL.

CARE CONTINUUM FOR CLIENTS BY GENDER

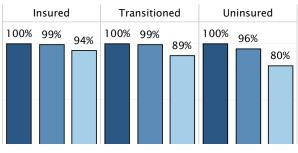

CARE CONTINUUM FOR CLIENTS BY RACE/ETHNICITY

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the quarter, 1,482 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=57) were first time enrollees.

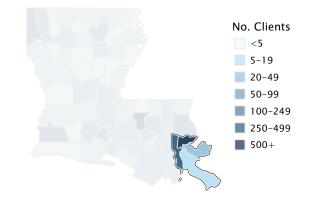

There were 23 clients who disenrolled from the program.

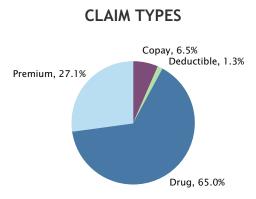

A total of 41 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 18 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The largest number of clients enrolled in LA HAP reside in the New Orleans Region.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 13,003 claims including 8,450 (65%) drug claims, 850 (7%) copays, 174 (1%) deductibles and 3,529 (27%) premiums. Of these, 12,299 (95%) were for insured claims and 704 (5%) were for uninsured claims.

There were an average of 11.2 claims per person.

There were 1,016 clients who utilized health insurance assistance and 164 clients who utilized uninsured assistance.

35% of all LA HAP claims were for clients from the New Orleans Region.

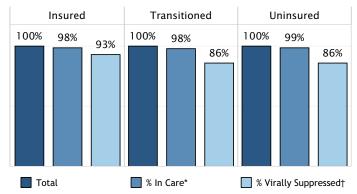

CLINICAL OUTCOMES SUMMARY

Nearly all clients (98%, n=1,459) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

92% (n=1,364) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% (n=1,145) of insured clients were virally suppressed compared to 86% (n=175) of uninsured clients.

The percentage of clients virally suppressed in the New Orleans Region is similar to the statewide percentage of 92%.

CARE CONTINUUM FOR CLIENTS BY GENDER

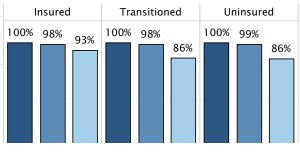

CARE CONTINUUM FOR CLIENTS BY RACE/ETHNICITY

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the guarter, 989 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=32) were first time enrollees.

There were 18 clients who disenrolled from the program.

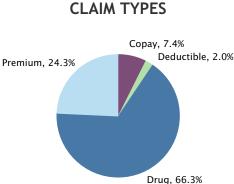

A total of 38 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 27 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The second largest number of clients enrolled in LA HAP reside in the Baton Rouge Region.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 9,857 claims including 6,539 (66%) drug claims, 726 (7%) copays, 200 (2%) deductibles and 2,392 (24%) premiums. Of these, 9,488 (96%) were for insured claims and 369 (4%) were for uninsured claims.

There were an average of 11.9 claims per person.

There were 752 clients who utilized health insurance assistance and 86 clients who utilized uninsured assistance.

27% of all LA HAP claims were for clients from the Baton Rouge Region.

CLINICAL OUTCOMES SUMMARY

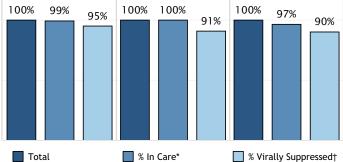

Nearly all clients (99%, n=979) were defined as in care. These clients had at least one CD4 or viral load test reported in the past vear.

95% (n=935) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 95% (n=800) of insured clients were virally suppressed compared to 90% (n=83) of uninsured clients.

The Baton Rouge Region has the highest percentage of clients virally suppressed in the state.

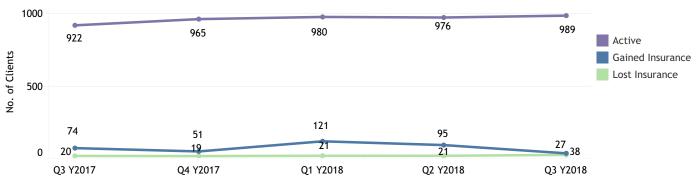

*Clients defined as In Care had at least one CD4 or viral load reported between October 01, 2017 and September 30, 2018. †Clients defined as Virally Suppressed had at least one viral load reported between October 01, 2017 and September 30, 2018 with the most recent result <200 copies/mL.

CARE CONTINUUM FOR CLIENTS BY GENDER

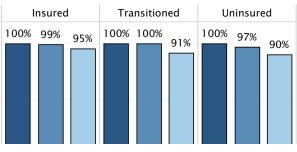

CARE CONTINUUM FOR CLIENTS BY RACE/ETHNICITY

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the guarter, 171 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=6) were first time enrollees.

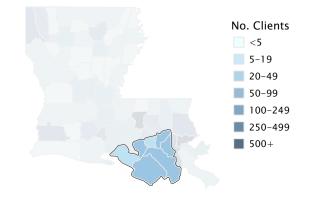

There were 4 clients who disenrolled from the program.

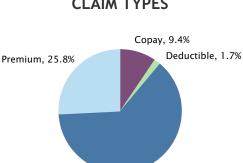

A total of 3 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 2 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Houma Region account for 4% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,676 claims including 1,058 (63%) drug claims, 158 (9%) copays, 28 (2%) deductibles and 432 (26%) premiums. Of these, 1,568 (94%) were for insured claims and 108 (6%) were for uninsured claims.

There were an average of 11.5 claims per person.

There were 129 clients who utilized health insurance assistance and 18 clients who utilized uninsured assistance.

5% of all LA HAP claims were for clients from the Houma Region.

CLINICAL OUTCOMES SUMMARY

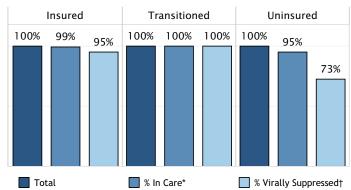

All clients (99%, n=169) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Drug, 63.1%

92% (n=158) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 95% (n=137) of insured clients were virally suppressed compared to 73% (n=16) of uninsured clients.

The percentage of clients virally suppressed in the Baton Rouge Region is similar to the statewide percentage of 92%.

CARE CONTINUUM FOR CLIENTS BY RACE/ETHNICITY

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the quarter, 335 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=22) were first time enrollees.

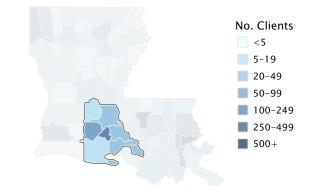

There were 5 clients who disenrolled from the program. All of them were disenrolled because they were eligible for Medicaid.

A total of 8 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 2 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lafayette Region account for 9% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

Drug, 72.5%

UTILIZATION SUMMARY

LA HAP assisted with 3,624 claims including 2,626 (72%) drug claims, 323 (9%) copays, 68 (2%) deductibles and 607 (17%) premiums. Of these, 3,335 (92%) were for insured claims and 289 (8%) were for uninsured claims.

There were an average of 12.9 claims per person.

There were 230 clients who utilized health insurance assistance and 57 clients who utilized uninsured assistance.

10% of all LA HAP claims were for clients from the Lafayette Region.

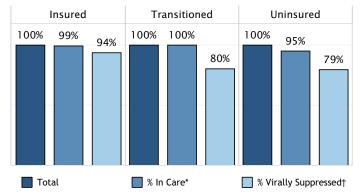

CLINICAL OUTCOMES SUMMARY

Nearly all clients (99%, n=330) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

91% (n=304) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 94% (n=246) of insured clients were virally suppressed compared to 79% (n=50) of uninsured clients.

The percentage of clients virally suppressed in the Lafayette Regon is similar to the statewide percentage of 92%.

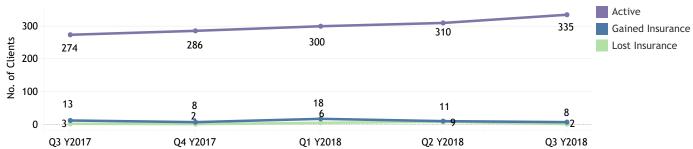

*Clients defined as In Care had at least one CD4 or viral load reported between October 01, 2017 and September 30, 2018. †Clients defined as Virally Suppressed had at least one viral load reported between October 01, 2017 and September 30, 2018 with the most recent result <200 copies/mL.

CARE CONTINUUM FOR CLIENTS BY GENDER

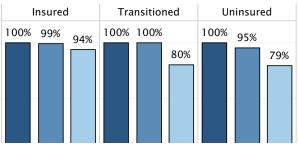

CARE CONTINUUM FOR CLIENTS BY RACE/ETHNICITY

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the quarter, 170 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=6) were first time enrollees.

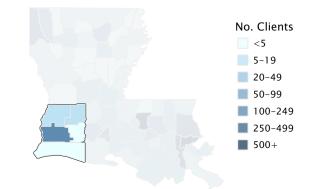

There were 9 clients who disenrolled from the program.

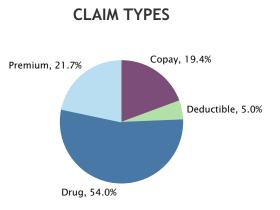

A total of 6 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There was 1 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lake Charles Region account for 4% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 1,462 claims including 789 (54%) drug claims, 283 (19%) copays, 73 (5%) deductibles and 317 (20%) premiums. Of these, 1,335 (91%) were for insured claims and 127 (9%) were for uninsured claims.

There were an average of 10.4 claims per person.

There were 114 clients who utilized health insurance assistance and 28 clients who utilized uninsured assistance.

4% of all LA HAP claims were for clients from the Lake Charles Region.

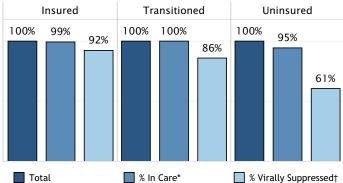

CLINICAL OUTCOMES SUMMARY

Nearly all clients (98%, n=167) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

85% (n=144) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 92% (n=115) of insured clients were virally suppressed compared to 61% (n=23) of uninsured clients.

The Lake Charles Region had the lowest percentage of clients virally suppressed in the state.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

LA HAP Region 5 Quarterly Report 24 of 40

ENROLLMENT SUMMARY

During the quarter, 81 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=3) were first time enrollees.

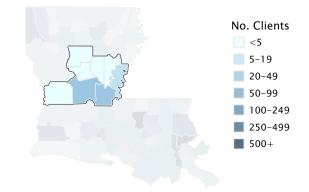

There were 2 clients who disenrolled from the program.

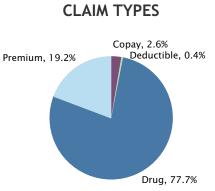

1 client was enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 2 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Alexandria Region account for 2% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 681 claims including 529 (78%) drug claims, 18 (3%) copays, 3 (0%) deductibles and 131 (19%) premiums. Of these, 628 (92%) were for insured claims and 53 (8%) were for uninsured claims.

There were an average of 11.9 claims per person.

There were 48 clients who utilized health insurance assistance and 9 clients who utilized uninsured assistance.

2% of all LA HAP claims were for clients from the Alexandria Region.

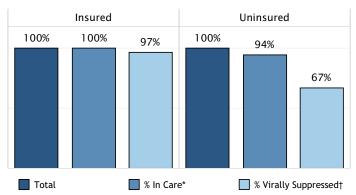

CLINICAL OUTCOMES SUMMARY

Nearly all clients (99%, n=80) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

90% (n=73) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 97% (n=59) of insured clients were virally suppressed compared to 67% (n=12) of uninsured clients.

The percentage of clients virally suppressed in the Alexandria Region is similar to the statewide percentage of 92%.

CARE CONTINUUM FOR CLIENTS BY AGE GROUP

ENROLLMENT SUMMARY

During the guarter, 253 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 6% (n=14) were first time enrollees.

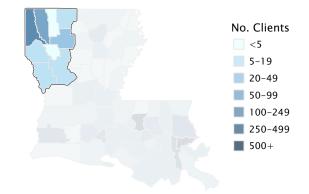

There were 5 clients who disenrolled from the program.

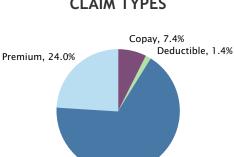

A total of 11 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 6 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Shreveport Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 2,046 claims including 1,374 (67%) drug claims, 152 (7%) copays, 29 (1%) deductibles and 491 (24%) premiums. Of these, 1,892 (92%) were for insured claims and 154 (8%) were for uninsured claims.

There were an average of 10.0 claims per person.

There were 177 clients who utilized health insurance assistance and 30 clients who utilized uninsured assistance.

6% of LA HAP claims were for clients from the Shreveport Region.

CLINICAL OUTCOMES SUMMARY

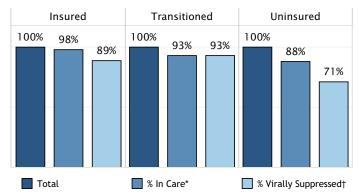

A large percentage of clients (96%, n=243) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Drug, 67.2%

86% (n=218) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 89% (n=175) of insured clients were virally suppressed compared to 71% (n=30) of uninsured clients.

The Shreveport Region had the second lowest percentage of clients virally suppressed in the state.

ENROLLMENT SUMMARY

During the guarter, 180 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 2% (n=3) were first time enrollees.

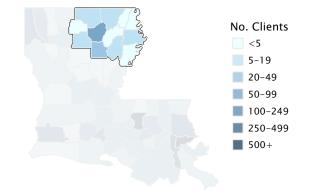

There were 6 clients who disenrolled from the program.

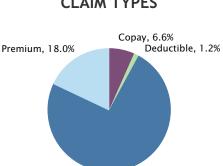

A total of 5 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There was 2 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Monroe Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,943 claims including 1,441 (74%) drug claims, 129 (7%) copays, 24 (1%) deductibles and 349 (18%) premiums. Of these, 1,839 (95%) were for insured claims and 104 (5%) were for uninsured claims.

There were an average of 12.4 claims per person.

There were 130 clients who utilized health insurance assistance and 28 clients who utilized uninsured assistance.

5% of LA HAP claims were for clients from the Monroe Region.

CLINICAL OUTCOMES SUMMARY

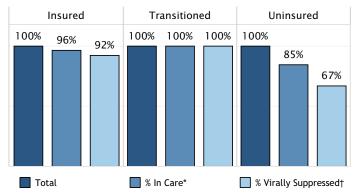

A large percentage of clients (94%, n=170) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Drug, 74.2%

88% (n=158) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 92% (n=130) of insured clients were virally suppressed compared to 67% (n=22) of uninsured clients.

The Monroe Region had the third lowest percentage of clients virally suppressed in the state.

ENROLLMENT SUMMARY

During the quarter, 246 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=8) were first time enrollees.

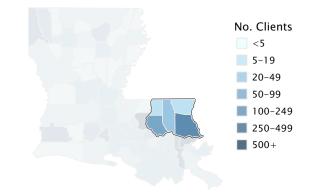

There were 7 clients who disenrolled from the program.

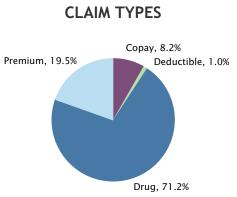

A total of 3 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There was 3 client enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Hammond/Slidell Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,486 claims including 1,771 (71%) drug claims, 205 (8%) copays, 24 (1%) deductibles and 486 (20%) premiums. Of these, 2,355 (95%) were for insured claims and 131 (5%) were for uninsured claims.

There were an average of 12.5 claims per person.

There were 171 clients who utilized health insurance assistance and 30 clients who utilized uninsured assistance.

7% of LA HAP claims were for clients from the Hammond/Slidell Region.

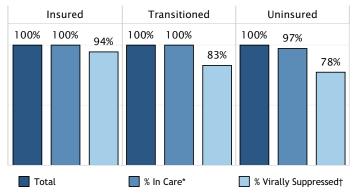

CLINICAL OUTCOMES SUMMARY

Nearly all clients (100%, n=245) were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

91% (n=225) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 94% (n=192) of insured clients were virally suppressed compared to 78% (n=28) of uninsured clients.

The percentage of clients virally suppressed in the Hammond/Slidell Region is similar to the statewide percentage of 92%.

*Clients defined as In Care had at least one CD4 or viral load reported between October 01, 2017 and September 30, 2018. †Clients defined as Virally Suppressed had at least one viral load reported between October 01, 2017 and September 30, 2018 with the most recent result <200 copies/mL.
