

Louisiana Ryan White HIV/AIDS Part B CBO Program Region 6 Annual Report January 01, 2019 - December 31, 2019

Central Louisiana AIDS Support Services (CLASS) served 278 persons living with HIV, approximately 25% (278/1,125) of persons living with HIV in Region 6.

The program served a larger proportion of persons who are female, and black compared to the larger HIV+ population in the region.

84% (n=232) of clients served live below the federal poverty level (FPL).

The majority of clients served (94%) had health insurance.

CLINICAL OUTCOMES

A total of 95% (264/278) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

79% (219/278) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

For clients served by CLASS who were in care, 83% (219/264) were virally suppressed. For the larger HIV+ population living in Region 6 who were in care, 85% (586/688) were virally suppressed.

Clients who are male, older, and have higher incomes were more likely to be virally suppressed.

Of the 278 clients served by CLASS

Of the 827‡ persons living with HIV in Region 6 who have had a lab reported within the last 5 years

*Clients defined as 'in care' had at least one CD4 or Viral Load reported between January 01, 2019 and December 31, 2019.

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between January 01, 2019 and December 31, 2019 with the most recent result <200 copies/mL.

‡Includes persons diagnosed before January 01, 2019, last known to be alive and living in Region 6 as of December 31, 2019, and who've had a lab reported within the last 5 years (on or after January 01, 2015).

CARE CONTINUUM BY HEALTH INSURANCE TYPE

Louisiana Ryan White HIV/AIDS Part B CBO Region 6 Annual Report January 01, 2019 - December 31, 2019

UNMET NEED

Unmet need includes persons who are defined as out of care. These persons know their positive HIV status and are not receiving HIV-related medical care. Persons living with HIV who have no evidence of receiving a viral load test or CD4 count within a 12-month period meet the definition of unmet need. Furthermore, unmet need has been defined here only to include persons with a lab reported to the health department within the last 5 years (on or after January 01, 2015).

17% (139/827) of PLWH in Region 6 met the definition for unmet need between January 01, 2019 and December 31, 2019.

Transgender persons, Hispanics, and persons 25-44 years old were most likely not to be receiving HIV-related medical care.

Parishes with the largest proportion of persons with unmet need include La Salle, Concordia, Winn, and Catahoula.

NUMBER OF PERSONS LIVING WITH HIV WHO MEET UNMET NEED CRITERIA* 139
