Vaccine Key Indicators

In the tables below, vaccination percentage rates for each parish in Region 7 are detailed by year, from 2019 to 2022. The rows for each parish show the **percentage of residents** in that parish who received the particular vaccine group. Each block is categorized into four vaccine groups: 7 series by age 2; 10 series by age 2; HPV (up to date) doses by age 13; and annual flu doses for adults.

7 series by age 2

DTap (2 doses), Polio (3 doses), MMR (1 dose), Hep B (3 doses), Hib (3 doses), Varicella/Chickenpox (1 dose), & Pneumococcal conjugate (4 doses)

	2019	2020	2021	2022

Did you know?

Vaccines, or immunizations, are a huge reason people can lead healthy lives today. Thanks to innovations made in public health and modern medicine, vaccines have done a great job at reducing or eliminating many infectious diseases that used to cause devastating sickness in infants, children and adults.
